1. "Research MS" program: This is a thesis-based program in which the student completes a combination of didactic coursework and, under the mentorship of an advisor, performs and defends a scholarly thesis project.

2. "Professional MS" program, Medical Product Engineering: This is a nonthesis-based form of education focused on didactic coursework related to medical product engineering and yields a Master of Science in Bioengineering - Medical Product Engineering. It provides opportunities for students to acquire relevant business, advanced engineering, and technology skills such as entrepreneurship, product development, regulatory processes, and commercialization. It is ideally positioned to offer a premier educational program in response to the strong interest and support for medical product innovation and product development. It is ideal for current industry professionals or students desiring a career in the healthcare industry.

3. "Professional MS" program, focus on Neural Engineering: This is a nonthesis-based form of education focused on didactic coursework related to neural engineering and yields a Master of Science in Bioengineering. Students will gain a deeper knowledge of the nervous system and, from an engineering perspective, the knowledge to develop computational models and build neuro-mimetic devices for treatment of neurological disorders and application to non-biological systems.

MS Bioengineering (Research or Thesis Track) Requirements

The course requirements for the MS in Bioengineering (thesis track) include the following:

- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Societal, Political and Ethical Issues in Bioengineering (BIOENG 2241 or equivalent) - 3 credits
- Life Sciences (from a list of approved Life Science courses) - 3 credits
- Track Courses (from a list of approved courses for specific tracks) - 9 credits
- Elective Course - 3 credits
- BIOENG 2999 - M.S. THESIS - 6 credits
- Bioengineering Seminar (BIOENG 2023) - 3 semesters

Total number of credit hours - 30 credits (not including seminar credits, and in addition to credits from foundational courses, if taken). Other required courses may be tailored to the student's background and interests. Students must always maintain a 3.0 GPA to remain in good standing in the program. Research-based MS students are also required to complete one teaching practicum. There is no course registration for the educational practicum experience, and fulfillment is monitored by the department.
Typically, completion of the Research MS program requires two years. The student is expected to have identified a research mentor before entering the program. Within the first year of enrollment (preferably within the first semester), the MS candidate is expected to finalize the general area in which they will write a thesis. By the third semester of enrollment, the student is to prepare a Master's Thesis, following University requirements for Electronic Theses and Dissertations (ETDs.) The student (under the guidance of their advisor) selects a thesis committee that consists of three faculty members and at least two need to be members of the Bioengineering faculty. The third member can also be a Bioengineering faculty, although an outside member is recommended. The student's advisor will act as Chairman of this committee. The committee meets at least once per year and oversees the Thesis Defense.

**MS Bioengineering - Medical Product Engineering (Non-Thesis Track) Requirements**

The Department of Bioengineering offers a Master of Science degree in Bioengineering - Medical Product Engineering in the non-thesis program of graduate education. The focus on medical product engineering is ideal for current industry professionals or students desiring a career in the healthcare industry. It provides opportunities to acquire relevant business, advanced engineering, and technology skills such as entrepreneurship, product development, regulatory processes, and commercialization. It is ideally positioned to offer a premier educational program in response to the strong interest and support for medical product innovation and product development.

**MS Bioengineering Requirements (Non-Thesis Track; Neural Engineering focus)**

This curriculum in the non-thesis program of graduate education prepares students to work in the exciting and dynamic field of neural engineering including neural prosthetics, brain-computer interface systems, epilepsy monitoring, deep brain stimulation, engineering approaches to psychiatric disorders, and brain-inspired computation. It is a fast-growing field that provides clinical and technological benefits.

Neural engineering students will pursue didactic coursework that builds core competency in at least two areas. Example concentration areas include but are not limited to:

- Brain-computer interfaces
- Neural tissue interfaces
- Neural imaging and signals
- Neural devices and neuromorphic engineering

The concentrations for core competency will be selected in consultation with the program director and will take into consideration the student's previous training and career aspirations.

The course requirements for the MS in Bioengineering (professional track) include the following:

- 12 credits in Concentration 1
- 9 credits in Concentration 2
- 3 credits in life science
- 3 credits in medical ethics
- 3 credits in mathematics/statistics

Total number of credit hours - 30 credits (not including seminar requirements, and in addition to credits from foundational courses, if taken). All students must maintain a 3.0 GPA at all times to remain in good standing in the program. All non-thesis MS students will also register for a zero-credit seminar (BIOENG 2024) that focuses on career development.

**Medical Product Engineering, MS-MPE**

The Master of Science in Bioengineering - Medical Product Engineering program is a non-thesis program of graduate education in Bioengineering aimed at current industry professionals and students desiring a career in the healthcare industry. The program will provide opportunities for students to acquire relevant business, advanced engineering, and technology skills such as entrepreneurship, product development, regulatory processes, and commercialization.

The University of Pittsburgh, through BioE and SSOE and in cooperation with SOHS and KGSB, is ideally positioned to offer a premier educational program in response to the strong regional interest and support for medical product innovation and product development. The Master of Science in Bioengineering - Medical Product Engineering degree will be awarded by SSOE and administered through the Department of Bioengineering.
Medical Product Engineering program will combine bio/medical engineering, hands-on product design, development, and commercialization. Working with practicing healthcare and biomedical professionals, student teams will be challenged to create new solutions addressing unmet clinical needs in diagnosis, treatment, surgery, hospital care, patient rehabilitation, or home healthcare environments.

The MS-MPE program will be attractive to students who want to pursue an advanced degree in Bioengineering, but who do not want to pursue a research-based MS or PhD degrees. Although the program is specifically directed toward undergraduate engineering students, individuals with strong, quantitative background in a STEM discipline are also eligible candidates. Qualified students in SOHS, KGSB, and Law and professionals currently working in the health care field who are seeking to complement their education with a graduate degree in Medical Product Engineering may be interested. In addition, the MS-MPE program could be of interest to undergraduate students pursuing the 5-year BS/MS program and it will satisfy the requirements for the joint MBA/MS program co-sponsored by the KGBS and SSOE.

Most of the special courses offered as part of the MS-MPE program are also available to all eligible Pitt students (graduate and undergraduate) as electives. These special courses are also available to Pitt students who are already enrolled in a graduate program and not prepared to complete the 30-credit MS-MPE program, but wish to obtain the 15-credit Graduate Certificate in Medical Product Innovation (C-MPI). The Graduate Certificate was approved by the Provost in 2012. A PRMS document for the Certificate program is on file with the Provost's office.

I. Four Required (Core) Courses: 12 credits

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT
- BIOENG 2170 - CLINICAL BIOENGINEERING
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

II. One Required Biomedical Ethics Course: 3 credits

Students will be expected to enroll in "Societal, Political, and Ethical Issues in Biotechnology" (BIOENG 2241), which is offered both semesters by the Department of Bioengineering. In the event of class conflict, students can enroll in a course offered by another department (e.g., Bioethics) with the approval of the graduate coordinator.

III. One Required Math/Stats Course: 3 credits (choose one course from the approved lists of graduate level math and statistics courses):

Approved Math Courses

Approved Statistics Courses

Another option that may be well-suited for MS-MPE students is:

- BIOENG 2351 - BIOSIGNAL ACQUISITION AND ANALYSIS

Prerequisites: None

Description: This course is designed to teach you programming in the context of real-world tasks that you will likely encounter in future academic or industrial work.

IV. Elective Courses relevant to Medical Product Engineering curriculum (Per approval by program director): 12 credits (four Advanced Engineering/Science courses)

Students can take any program relevant 2000+ level courses as electives. Since program students can explore and examine all facets of the medical product engineering process from ideation to prototyping to clinical evaluation, the following list of elective courses, which have been offered one or more times since Fall 2011, are highly appropriate for graduate study in Medical Product Engineering.

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION
- BIOENG 2173 - MEDICAL DESIGN FOR LOW RESOURCE ENVIRONMENTS
• BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES
• BIOENG 2230 - CARDIO ORGAN REPLACEMENT
• BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
• BIOENG 2385 - ENGINEERING MEDICAL DEVICES FOR QUANTITATIVE IMAGE ANALYSIS AND VISUALIZATION
• BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING
• BIOENG 2601 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS
• BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR
• BIOENG 2811 - MICROFABRICATION AND CHARACTERIZATION OF NEURAL INTERFACE DEVICES
• ENGR 2460 - ADVANCED SCIENTIFIC VISUAL COMMUNICATION
• ENGR 2017 - MANUFACTURING FOR THE FUTURE: FLEXIBLE, GREEN, AND DIGITAL
• ENGR 2051 - PRODUCT REALIZATION
• ENGR 2080 - INNOVATING FOR COMMERCIAL IMPACT
• IE 2003 - ENGINEERING MANAGEMENT
• IE 2011 - FUNDAMENTAL OF MICRO AND NANOMANUFACTURING
• IE 2023 - INTRODUCTION TO MEDICAL PRODUCT DEVELOPMENT
• IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
• IE 2106 - OPERATIONS IMPROVEMENT IN HEALTHCARE
• IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
• IE 2123 - PROJECT MANAGEMENT FOR ENGINEERS
• IE 2188 - SIMULATION MODELING AND APPLICATIONS
• IE 2201 - BIOMATERIALS AND BIOMANUFACTURING
• IE 2303 - WORK DESIGN

V. One Rotation of Co-op/Internship: 0-3 credits

Minimum one rotation of individually arranged co-op/internship is highly recommended. The co-op/internship requirement is waived for students working full-time. As such, when students enter the MS-MPE program, the internship requirement is co-determined with the Program Director.

MS-MPE students can opt to earn 0-3 course credits toward degree requirements, which are a part of the 12 required elective credits. Thus, if a student earns less than 3 credits for the co-op/internship, electives must be taken to hit the required total 30 credits.

• BIOENG 2095 - GRADUATE PROJECTS
• ENGR 2090 - GRADUATE ENGINEERING COOPERATIVE PROGRAM

VI. BIOENG 2024 - Bioengineering Seminar for Professional MS: 0 credits

BIOENG 2024 is a required, zero-credit seminar focused on career development for students in the Professional MS program.

Department of Chemical and Petroleum Engineering

Contact Information

Vice Chair for Graduate Education
Contact: Graduate Program Administrator

Main Office:
940 Benedum Engineering Hall
Graduate Degree Programs

The Department of Chemical and Petroleum Engineering awards Master of Science degrees in chemical engineering and the Doctor of Philosophy degree in chemical engineering; offers several dual degree programs; and participates in joint degree programs with the Katz Graduate School of Business and the School of Medicine. The general objective of all programs is to develop the ability of the chemical or petroleum engineer to carry out original research at advanced levels.

The aim of the doctoral program is to develop individuals for careers in academic and industrial research. The program is flexible. Its primary emphasis is on innovative and distinctive research on the cutting edge of engineering science. Students wishing to pursue the PhD should have an outstanding academic background and a desire and ability to carry out original research. PhD students here are given independence and responsibility. They are not only encouraged, but are expected, to develop research ideas, which they propose and defend. They work closely with their faculty research advisors and often participate in a research group addressing relevant engineering problems. To supplement their research, students take advanced courses in areas related to their research work. Candidates for the PhD achieve a high level of proficiency through this advanced course work and individual study in their research area and related areas.

The graduate program offers MS and PhD students the opportunity to pursue independent research in five research focus areas in which the department has developed national and international reputations: biotechnology, catalysis, environment and energy, materials, and multi-scale modeling. Additional research areas exist in programs that have exploited opportunities at the interface between disciplines. The department's recognized research activities impact the following boundaries between established disciplines: biotechnology/environment; biology/medicine/engineering; energy/environment; polymer chemistry/physics; catalysis/chemistry/materials; catalysis/energy; and catalysis/environment.

Admissions

Chemical Engineering: For admission to full graduate status, students should have an undergraduate degree in chemical engineering with high academic standing from an ABET accredited curriculum.

Students from chemistry or from another engineering discipline who desire to pursue a graduate degree in chemical engineering must have a high grade point average and prepare for graduate course work by taking selected undergraduate courses in chemical engineering. See requirements for students with non-Chemical Engineering BS degree for PhD or MS (select program from the programs list, below). Each case for admission will be evaluated individually, and applications are encouraged. Interested students may apply online. Questions can be sent to che@pitt.edu. Please be sure to include your name and complete mailing address.

Pittsburgh, PA 15260

Financial Assistance

While admission to the graduate program does not imply the granting of financial aid, most fulltime PhD students are supported. All students who qualify for financial assistance are awarded departmental fellowships. In addition, a select few top students receive supplementary dean's fellowships. An applicant interested in obtaining financial aid should request information directly from the department. Applications for admission and financial aid should be submitted by January 1 for the following fall term.

Doctoral

Chemical Engineering, PhD
The following special regulations pertain to the Department of Chemical and Petroleum Engineering. For additional requirements, review the school-wide information in the Doctor of Philosophy Programs section as well as the Regulations Pertaining to Doctoral Degrees.

**Entry to the PhD Program**

In order to enter the PhD program, a student must have completed an MS degree and passed the PhD oral qualifying preliminary examination. Especially well-prepared students, with consent of the department faculty, may be granted permission to obtain the PhD degree directly without obtaining an MS degree. This eliminates the required completion of the MS thesis. All MS-level course work is still required.

During the summer of the first year as a graduate student in the department, the student wishing to continue into the PhD program must take the oral preliminary examination. Failure to take this examination at this time will forfeit one of two opportunities to pass this examination. The structure and content of the PhD oral qualifying examination is subject to change in order to meet the requirements of the faculty and PhD program.

**PhD Course Requirements**

A student's course series will be designed by the student and his/her thesis advisor, approved by the PhD committee, and signed off by the graduate coordinator. This sequence should include courses in the student's research area as well as courses not related to his/her research area. Forty-two credits beyond the MS degree are required and must include the following courses:

- XX 2/3XXX Electives (Science, Math, or Engineering) 12 credits
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING (if not taken at MS level)
- CHE 3990 - ADVANCED GRADUATE PROJECTS (18 credit minimum)
- CHE 3999 - PH.D. DISSERTATION (taken after PhD proposal/comprehensive exam defense), 12 credits (minimum)

Additional course requirements may include the following, if the student has not previously completed courses in these areas at the master's level:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMENTAL OF REACTION PROCESSES
- CHE 2301 - FUNDAMENTAL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

**Note:**

Students must also register for one credit in PhD research methodology and one credit of CHE 3001 - GRADUATE SEMINAR each term. A minimum of 72 graduate credit hours, including MS courses and thesis credits, are required. All full-time students must fulfill a two-term teaching requirement during their course of study; this requirement is three terms for students starting their PhD from a BS degree.

**Dissertation Requirement**

A dissertation topic should be selected after passing the PhD oral qualifying examination. This is done by submitting a formal request in writing to the departmental graduate faculty for appointment of a faculty advisor (or advisors). Preliminary work (at least 18 credits) can be done on the dissertation by registering for CHE 3990. After being admitted to PhD candidacy, the student should concentrate on the dissertation, registering for CHE 3999 (minimum 12 credits). Most students complete more than 30 credits of these courses.

**PhD Comprehensive Examination and Proposal Conference**

This is an oral examination covering chemical engineering at the PhD level and is based upon a written dissertation proposal. If this examination is passed, a doctoral committee will be officially appointed. This exam should be taken at least 18 months before completion of the dissertation and preferably within the first year beyond the MS.
PhD Final Oral Examination

A final review (defense) of the thesis must be conducted by the dissertation committee in order to determine the acceptability of the dissertation.

Off-Campus Research

Occasionally, a research program can be conducted at a government or industrial site. In those situations the student should submit a proposal for such research to the Vice Chair for Graduate Education for approval by the faculty. The faculty advisor must be actively involved in the research.

Joint Degree

Chemical and Petroleum Engineering Dual Degree, MS

Requirements

A program of study is available in which a student may pursue a dual degree between chemical engineering and petroleum engineering. At least 48 credits are required, including the fundamental courses in the two areas. Both thesis and non-thesis options are possible. The required chemical engineering courses are:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMENTAL OF REACTION PROCESSES
- CHE 2301 - FUNDAMENTAL TRANSPORT PROCESSES I
- CHE 2410 - MATH MTCL METHD IN CHEMCL ENGRG I

and the required petroleum engineering courses are:

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2202 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS

Additional requirements for the Dual Degree MS, non-thesis options:

- CHE 2910 - SPECIAL PROJECTS
- 3 course credits in Chemical or Petroleum Engineering coursework
- PETE 2211 - RESERVOIR SIMULATION and 6 additional course credits from the approved list (as specified in the Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology

Additional requirements for Dual Degree MS with thesis:

- 6 course credits from the approved list (as specified Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING
- CHE 2999 - M.S. THESIS or PETE 2999 - M.S. THESIS
- Registration for one credit of CHE 2980 - MS RESEARCH METHODOLOGY or PETE 2980 - MS RESEARCH METHODOLOGY each fall and spring term until graduation
- Registration for CHE 3001 - GRADUATE SEMINAR each fall and spring term
MS Final Examination

A final review (oral defense) of the MS Thesis must be conducted by the thesis committee in order to determine the acceptability of the thesis. The committee consists of the student's major advisor and two (2) other members of the faculty.

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses ChE 804 and 805). Neither of these courses can serve as an elective nor core course substitute in the dual MS in Chemical and Petroleum Engineering required courses. Students who do not have an undergraduate engineering degree are also required to take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with an MS degree.

Computational Modeling & Simulation, PhD

Requirements

Course Requirements

http://cmsp.pitt.edu/course-requirements

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the he program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Comprehensive Exam

The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.
Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Course Requirements

http://cmsp.pitt.edu/course-requirements

A minimum of 24 credits of graduate level courses from categories I - IV will be required. It is anticipated that students entering the program will be able to complete the six core courses in categories I - III in their first year and the concentration requirements in the second year.

Computational Modeling and Simulation Seminar Series: All students enrolled in the program are expected to attend the Computational Modeling and Simulation seminar program each semester they are enrolled. Students will receive one credit for each term they are enrolled in the Seminar Series. Seminars will be held typically twice per month, during the academic year. Each enrolled student will be required to give a seminar in this series, at least six months before the PhD defense.

University Credit Requirement: All students in the program must satisfy the university's requirement of a minimum of 30 credits for an MS. At least 24 of these credits will be satisfied by the core program, including the concentration area, described above, and at least 4 credits will be satisfied by enrollment and participation in the Computational Modeling and Simulation seminar program. The remaining credits will be met by directed study (i.e., research).

Master's

Chemical Engineering (Professional Engineer Program), MSCHe

Students who wish to pursue advanced study in chemical engineering may apply for admission to the Professional Engineer Program. It differs from the regular MS program in two important respects:

1. Course work replaces the MS thesis requirement.
2. The student completes a 3-credit special project course, CHE 2910, during their last term in the program. This course could be satisfied, for example, by a project with a faculty member, or a project based on their professional work (for engineers currently working in industry) for which a faculty member agrees to serve as advisor. Submission of a term paper, which is completed under the advisement of a member of the faculty, is required.

A minimum of 31 credit hours of course work is required.

These must include the five core courses and elective courses listed below.

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- CHE 2910 - SPECIAL PROJECTS
- ChE 2XXX - Chemical Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)

Note:
Up to 6 credit hours may be elected in approved graduate course offerings outside the department (denoted by XX, above); approvals are granted by the ChE Vice Chair for Graduate Education. Students who wish to enter this program should first apply for admission to graduate study in chemical engineering. Once admitted, students can then request admission to the Professional Engineer Program.

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805). In addition, students must take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with the MS, offered in the spring and summer terms. Neither of these courses can serve as an elective nor core course substitute in the MS in Chemical Engineering required courses.

Chemical Engineering (Research-Oriented Program), MSCHe

Requirements

The candidate for the Master of Science degree must demonstrate proficiency in basic chemical engineering subjects by successfully taking the following required courses:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING

In addition to these 15 credits, the student must satisfactorily complete the following courses:

- At least 9 additional credits of graduate-level course work, at least 3 of which must be in chemical engineering. Approved courses, with the permission of the student's major advisor and/or the ChE Vice Chair for Graduate Education, can be taken outside the department.
- 6 credits of CHE 2999 - M.S. THESIS must also be taken.
- 3 credits of Research Methodology are required (see below).

A full-time student will normally take 24 didactic credits, 6 thesis credits, 3 credits of research methodology, and up to 3 credits of seminar.

Full-time students are required to register each term for Research Methodology, a 1-credit course. In Research Methodology, a letter grade will be given each term based upon the student's research performance. Full-time students are also required to register for CHE 3001 - GRADUATE SEMINAR during the fall and spring terms. It should be emphasized that the preceding course requirements are minimum requirements, and additional work may be necessary for an individual student, especially if the student's undergraduate degree is not in chemical engineering.

A student who does not maintain a B (3.00 GPA) average in all MS-level courses is put on academic probation. The graduate faculty of the Department of Chemical and Petroleum Engineering will review all cases of probation each term and determine whether the student will be permitted to continue to pursue graduate study. Should a student receive a grade lower than B- in a required MS course, the student will be required to repeat that course and receive a B- grade or better before being permitted to graduate.

A student with full-time status should discuss possible thesis topics with at least three members of the departmental faculty and then submit a written request to the Vice Chair for Graduate Education for assignment of a thesis advisor. After the faculty assigns an advisor, the student can begin the thesis. The MS thesis oral examination is given at the completion of the thesis.

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805). Neither of these courses can serve as an elective nor core course substitute in the MS required courses. Students who do not have an undergraduate engineering degree are also required to take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with an MS degree. This requirement is waived for students who complete a PhD in Chemical Engineering.
Petroleum Engineering, MSPE

The candidate for the degree of non-thesis Master of Science in Petroleum Engineering must demonstrate proficiency in petroleum engineering by passing the following:

Mandatory Courses:

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1 or PETE 2211 - RESERVOIR SIMULATION

Note:

In addition to these 24 credits, the student must satisfactorily complete two other courses from the accepted electives list in order to fulfill the 30 credits required for the MS degree.

Accepted Electives:

- GEOL 2110 - PLATE TECTONICS
- GEOL 2151 - GROUNDWATER GEOLOGY
- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS
- GEOL 2640 - ADV GEOHAZARDS & RISK MGMNT
- ME 2055 - COMPUTER AIDED ANALYSIS OF TRANSPORT PHENOMENA
- ME 2060 - NUMERICAL METHODS
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING
- CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE
- CEE 2800 - ENGINEERING GEOLOGY
- CEE 3501 - ENVRNMTL ENGRG PROCESSES 1
- CEE 3502 - ENVRNMTL ENGRG PROCESSES 2
- CEE 3805 - ROCK MECHANICS
- ENGR 2637 - STRATA CONTROL ENGINEERING
- ENGR 2638 - MINING HEALTH AND SAFETY
- PETE 2910 - SPECIAL PROJECTS

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805) or the ChE Bridging Program offered by Pitt during the summer term immediately preceding matriculation to the graduate degree program. Neither of these courses can serve as an elective nor core course substitute in the MS in Petroleum Engineering required courses.

Department of Civil and Environmental Engineering
Graduate Degree Programs

http://www.engineering.pitt.edu/Departments/Civil-Environmental/Graduate-Overview/

The Department of Civil and Environmental Engineering offers graduate study and research leading to the Master of Science in Civil Engineering and Doctor of Philosophy degrees. Also offered is a joint degree program resulting in a second Master of Science degree in mathematics, and a joint degree program with the Katz Graduate School of Business resulting in a MBA degree. The MS in Civil Engineering and the PhD in engineering may be pursued in one of the following areas:

The Master of Science degree in Civil and Environmental Engineering is primarily designed for students with an undergraduate degree in engineering, although students with other backgrounds can be accommodated with specially designed programs. An MS degree can be pursued by either a full-time or part-time student in one of the following areas:

- Construction Management
- Environmental Engineering
- Geotechnical and Pavement Engineering
- Structural Engineering and Mechanics
- Sustainable Engineering
- Transportation Engineering
- Water Resources Engineering

The areas of study for the Ph.D. in Civil Engineering in the Department of Civil and Environmental Engineering within the Swanson School of Engineering are divided into two integrated research areas and sub-component specialty areas as follows:

- Sustainability and Environmental Engineering (SEE):
  - Environmental Engineering;
  - Sustainable Engineering; and
  - Water Resources Engineering
- Advanced Infrastructure Systems (AIS):
  - Geotechnical and Pavement Engineering;
  - Structural Engineering and Mechanics; and
  - Transportation Engineering.

Certificate

Circular Economy Certificate

***The Circular Economy Certificate was approved on 10/10/23, with an effective date of Spring 2024. To maintain accurate records, the newly approved program was added to the published catalog on 10/10/23.***

The certificate in Circular Economy (CE) is housed administratively within the Mascaro Center for Sustainable Innovation (MCSI). The 15-credit graduate certificate has been developed based on current research on recommended skills and knowledge related to the circular economy.
The objectives of the Circular Economy Certificate (CEC) are:

1. Enable graduate students to develop knowledge of circular economy principles and ultimately create circular and sustainable solutions.
2. Embark on a novel, cross-disciplinary educational experience that integrates existing campus resources with a new course focusing on circular economy design.
3. Create a learning pathway that enables the development of breadth and depth and the skills needed for circular economy solutions.
4. Create regional and nationally scalable circular economy solutions through an existing capstone course.
5. Experience a diverse and inclusive training environment that builds upon and extends our networks, ultimately establishing a diverse and inclusive academic environment for our program.

The CEC graduate certificate is designed for individuals looking to develop the skills and knowledge of circular economy necessary to support promising career opportunities. The curriculum is aimed at existing graduate students or professionals whose academic or professional aspirations require expertise in the understanding and application of circular economy.

The certificate is structured so the participant is required to take five total courses. Three of the courses are required, with two elective courses.

**Required Courses**

The following courses are required:

- CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
- ENGR 2007 - SUSTAINABILITY CAPSTONE
- CEE 2630 - DESIGN FOR CIRCULAR ECONOMY

**Elective Courses**

Students must complete two of the following courses:

- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- LAW 5340 - ENVIRONMENTAL LAW
- PIA 2115 - ENVIRONMENTAL ECONOMICS
- BMKT 2513 - CONSUMER BEHAVIOR 1
  BMKT Consumer Behavior 1 and 2 (3 credits in total).
  Other courses related to CE as approved by advisor.

**Total Credits: 15**

**Civil and Environmental Engineering - Construction Management Certificate**

The Construction Management Certificate Program is directed at Part-time students currently employed in the construction industry as well as other students interested in obtaining credentials in construction management.

The Academic Requirements associated with the Graduate and Post-Baccalaureate Certificate in Construction Management include the completion of fifteen (15) credits of coursework within the Civil and Environmental Department from among the following Graduate Level courses:

- CEE 2201 - CONSTRUCTION COST ENGINEERING*
- CEE 2202 - CONSTRUCTION SCHEDULING*
- CEE 2203 - CONSTRCT METHODS AND EQUIPMENT*
- CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT
- CEE 2205 - CONSTRCT FINANCE & COST CONTROL
- CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY
- CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS
- CEE 2230 - BUILDING INFORMATION MODELING

Students must complete three (3) required courses above (designated with an asterisk *) and may select any two (2) of the remaining courses above as electives in the completion of their Certificate. Additional graduate level courses within the Swanson School of Engineering may be considered as
substitutes for the two (2) elective courses with permission of the Program Director to customize the Certificate to meet the educational goals of the student. All courses can be taken either on campus or online.

**Doctoral**

**Civil Engineering - Advanced Infrastructure Systems - Geotechnical and Pavement Engineering Specialty, PhD**

**PhD Track Requirements**

Students pursuing the PhD must complete a minimum of 72 post-baccalaureate credits, including the following:

- a minimum of 24 course credits (e.g., eight, 3-credit lecture courses) in their major area as agreed in consultation with their primary advisor
- a minimum of 9 course credits (e.g., three, 3-credit lecture courses) in a chosen minor area
- a minimum of 18 credits of dissertation research

Remaining credits may be course credits or special investigation credits or doctoral research credits in their area of concentration or a closely related area as agreed in consultation with their primary advisor.

The total number of credits above these minimum requirements will depend on the student's background and academic achievement upon entering the program and their dissertation topic. This decision will be made in consultation with their primary advisor.

Each student must complete a minimum of 8 courses towards the **Major Concentration** and 3 courses towards their **Minor Concentration** for a total of 11 Lecture Courses, i.e., a minimum of 33 credits of post-baccalaureate coursework taken at Pitt (2XXX level or higher) or transferred in from post-baccalaureate study elsewhere. The coursework shall be comprised of lecture courses and not include seminar or research courses.

Independent of any credits transferred from prior post-baccalaureate study, each student must complete at least 9 course credits (approximately 3 courses) at Pitt. At least 3 of these credits (typically 1 course) must come from "CEE" designated courses.

Up to 30 credits may be applied to the Major Concentration and/or Minor Concentration from previously completed post-baccalaureate study (e.g., an earned Master of Science degree in civil and environmental engineering or related discipline).

A minor area of concentration can be within any approved coherent area of study outside of CEE.

Doctoral Research (CEE 3997 - RESEARCH, PH.D) may only be taken following successful completion of the PhD Preliminary Exam.

At least 12 credits of the Dissertation Research credit must be taken as Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION), which may only be taken following successful completion of the Comprehensive Examination (i.e., PhD Dissertation Proposal Exam). The remaining 6 credits of Dissertation Research may be taken as Doctoral Research (CEE 3997 - RESEARCH, PH.D) or Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION).

All students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of full-time residency (i.e., full-time study in the PhD program).

All PhD students are subject to all applicable guidelines and rules set out by SSOE and The University of Pittsburgh.

**Additional Information**

**Plan of Study**

The PhD Plan of Study is prepared by the student with the aid of the student's faculty advisor during the student's first two terms of graduate study. It shall be approved and signed by the faculty advisor, majority of faculty members in the program area, the graduate coordinator, and the department chair. Copies should be made available to the student, the faculty advisor, and the academic coordinator. Any change in the Plan of Study must be approved by the faculty advisor and the academic coordinator, and should likewise be recorded.
PhD Examination Structure

All PhD candidates must pass the preliminary, comprehensive, and final oral examinations:

Preliminary Examination

The purpose of this examination is to determine the student's potential to complete the PhD program. It is organized by the advisor and faculty from the student's program area, before or sometime during the first two terms of the program. Not counting the summer term, full-time students already with an MS (or equivalent) must take the exam following completion of their first 2 terms of study, while full-time students without an MS (or equivalent) should take the exam no later than completion of their first 3 terms of study.

Comprehensive Examination

All PhD students must take this examination toward the end of their course work. Students must submit a written proposal of their expected dissertation research and pass a presentation and comprehensive oral examination administered by the student's doctoral committee. The comprehensive examination committee will typically also serve as the final dissertation examination committee and shall consist of the major advisor as chair, at least two faculty members from the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering. The written proposal is recommended to be in the format of a standard federal research proposal (e.g., National Science Foundation) in terms of length, formatting, and technical content. A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the final oral examination (dissertation defense).

Final Oral Examination

This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

Civil Engineering - Advanced Infrastructure Systems - Structural Engineering and Mechanics Specialty, PhD

PhD Track Requirements

The written proposal is recommended to be in the format of a standard federal research proposal (e.g., National Science Foundation) in terms of length, formatting, and technical content. A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the final oral examination (dissertation defense).

Final Oral Examination
This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

**Joint Degree**

**Civil Engineering/Mathematics, MSCE/MS**

The general requirements for the two options for the Master of Science in Civil and Environmental Engineering/Mathematics degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with comprehensive and final examinations.

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

**MS Final Examination**

Students pursuing the thesis and project MS options must take and pass both a comprehensive examination and a final oral examination.

**Comprehensive Examination**

This examination is given to all students during the last term of the program. It may be either an oral examination or, at the recommendation of the area faculty, a written examination. It is administered by an MS committee made up of the faculty advisor (as chair), plus a minimum of two other faculty members from fields related to the student's interest. If the result of the examination is unsatisfactory, subsequent action is at the discretion of the MS committee.

**Final Oral Examination**

The purpose of this examination is to evaluate the student's MS thesis or project and/or related course work. The examination is administered by the MS committee, chaired by the student's major advisor.

**Master's**

**Civil and Environmental Engineering - Construction Management Area, MSCE**

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Construction Management Area degree (thesis and professional) are detailed below:

**Requirements**

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits
All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

**Professional MS Degree Requirements**

a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent

b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent

c) 3 credits - CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT or Equivalent

d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent

e) 3 credits - CEE 2205 - CONSTRUCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS or Equivalent

g) 12 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count toward the degree program coursework requirements.

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent

b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent

c) 3 credits - CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT or Equivalent

d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent

e) 3 credits - CEE 2205 - CONSTRUCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS or Equivalent

g) 6 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count toward the degree program coursework requirements.

**Thesis Defense**

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.
Civil and Environmental Engineering - Environmental Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Environmental Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

**Professional MS Degree Requirements**

a) 3 credits - CEE 2500 - ENVIRONMENTAL MICROBIOLOGY or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL CHEMISTRY or Equivalent

c) 3 credits - CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING or Equivalent

d) 3 credits - CEE 3501 - ENVIRONMENTAL PROCESSES 1 or Equivalent

e) 3 credits - CEE 3502 - ENVIRONMENTAL PROCESSES 2 or Equivalent

f) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2500 - ENVIRONMENTAL MICROBIOLOGY or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL CHEMISTRY or Equivalent

c) 3 credits - CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING or Equivalent

d) 3 credits - CEE 3501 - ENVIRONMENTAL PROCESSES 1 or Equivalent

e) 3 credits - CEE 3502 - ENVIRONMENTAL PROCESSES 2 or Equivalent

f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS
Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

Civil and Environmental Engineering - Geotechnical Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Geotechnical Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent
b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent
c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent
d) 3 credits - CEE 2814 - SLOPES & EARTH RETAINING STRUCT or Equivalent
e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent
b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent
c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent
d) 3 credits - CEE 2814 - SLOPES & EARTH RETAINING STRUCT or Equivalent
e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996) No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS
Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

Civil and Environmental Engineering - Pavement Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Pavement Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent
c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent
d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or CEE 2716 - PAVEMENT CONSTRUCTION or Equivalent
e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent
c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent
d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or CEE 2716 - PAVEMENT CONSTRUCTION or Equivalent
e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS
Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

Civil and Environmental Engineering - Structural Engineering and Mechanics Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Structural Engineering and Mechanics Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent

c) 3 credits - SEM Graduate Design Elective - CEE 2340 - CONCRETE STRUCTURES 2, CEE 2341 - DESIGN OF STEEL STRUCTURES, CEE 2343 - PRESTRESSED CONCRETE, CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING

d) 6 credits - SEM Graduate Technical Elective - CEE 2330 - ADVANCED STRUCTURAL ANALYSIS, CEE 2343 - PRESTRESSED CONCRETE, CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES or CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

e) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent
c) 3 credits - SEM Graduate Design Elective - CEE 2340 - CONCRETE STRUCTURES 2, CEE 2341 - DESIGN OF STEEL STRUCTURES, CEE 2343 - PRESTRESSED CONCRETE, CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING

d) 6 credits - SEM Graduate Technical Elective - CEE 2330 - ADVANCED STRUCTURAL ANALYSIS, CEE 2343 - PRESTRESSED CONCRETE, CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES or CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

e) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

Civil and Environmental Engineering - Sustainable Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Sustainable Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent

b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent

c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or CEE 2630 - DESIGN FOR CIRCULAR ECONOMY or Equivalent

d) 3 credits - CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN or CEE 2531 - AIR POLLUTION AND CONTROL or Equivalent

e) 18 credits - Graduate Technical Electives
Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent

b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent

c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or CEE 2630 - DESIGN FOR CIRCULAR ECONOMY or Equivalent

d) 3 credits - CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN or CEE 2531 - AIR POLLUTION AND CONTROL or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS

**Thesis Defense**

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

**Civil and Environmental Engineering - Transportation Engineering Area, MSCE**

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Transportation Engineering Area degree (thesis and professional) are detailed below:

**Requirements**

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

**Professional MS Degree Requirements**

a) 3 credits - CEE 2700 - TRAFFIC MGMT AND OPERATIONS or Equivalent

b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent

c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent
d) 3 credits - CEE 2730 - HIGHWAY ENGINEERING or CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

f) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent

b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent

c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent

d) 3 credits - CEE 2730 - HIGHWAY ENGINEERING or CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

**Thesis Defense**

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

**Civil and Environmental Engineering - Water Resources Engineering Area, MSCE**

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Water Resources Engineering Area degree (thesis and professional) are detailed below:

**Requirements**

**Professional Option:** 30 course credits (e.g., ten, 3-credit lecture courses) minimum

**Thesis Option:** 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants are required to pursue the thesis option. All full-time graduate students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of their full-time study.

The detailed course requirements for these two degree options are as follows:

**Professional MS Degree Requirements**
a) 3 credits - CEE 3414 - ADVANCED HYDROLOGY

b) 3 credits - CEE 2410 - WATER RESOURCES ENGINEERING

c) 3 credits - CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

d) 21 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

**MS Thesis Degree Requirements**

a) 3 credits - CEE 3414 - ADVANCED HYDROLOGY

b) 3 credits - CEE 2410 - WATER RESOURCES ENGINEERING

c) 3 credits - CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

d) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

e) 6 credits - CEE 2999 - M.S. THESIS

**Thesis Defense**

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The thesis examining committee will consist of the advisor as chair plus at least two other members of the faculty recommended by the major adviser and approved by the department chair or program director.

**Department of Electrical and Computer Engineering**

**Contact Information**

Department Chair: Alan D. George  
Main Office: 1238 Benedum Hall  
412-624-8002  
Fax: 412-624-8003  
E-mail: ecemain@pitt.edu  
http://www.engineering.pitt.edu/ECE/

Additional information concerning the Electrical and Computer Engineering graduate programs may be obtained from the department's Graduate Program Administrator, located at 1238 Benedum Hall, 3700 O'Hara Street, Pittsburgh, PA 15261, and available by email at ecegrad@pitt.edu.

**Graduate Degree Programs**

The Department of Electrical and Computer Engineering offers a program of graduate study and research for master's and doctoral degree students whose career choice is oriented toward basic or applied research in industry, government, or academic institutions. Degrees awarded are the Master of Science in Electrical and Computer Engineering and the Doctor of Philosophy in Electrical and Computer Engineering. Course work and faculty/student research in the graduate Electrical and Computer Engineering program are concentrated in the following four areas:
Computer Engineering
Optical and Electronic Devices
Electric Power Engineering
Signal Processing and Systems

and include research in computer architecture, reconfigurable and high-performance computing, computer-aided design (CAD), very-large-scale integrated (VLSI) design, optical interfacing, embedded systems, parallel processing architectures, networking, photonic and electronic devices, plasmonics, quantum photonic devices, micro/nanorobots and systems, fiber optics, ultrafast laser processing, 2D/low-dimensional materials and devices, semiconductor device modeling and characterization, power electronics, pattern recognition, biomedical image processing, speech processing, statistical signal processing, wavelets, intelligent and neutral control, human-centered control, networked control, radio-frequency identification (RFID) and tags, electric power systems analysis, simulation and modeling: transmission, distribution systems and technologies, real-time control of power systems, renewable energy interconnections, and smart grid.

Graduate Admissions

https://www.engineering.pitt.edu/ece

Applicants for admission must submit transcripts of all college-level work and two letters of recommendation. GRE scores are not required for applications and admissions, but may be optionally submitted by students who want them included as part of their application package. International applicants whose first language is not English must demonstrate English language proficiency by submitting IELTS, TOEFL or Duolingo test scores. More on Graduate Admissions can be found here.

Financial Aid

The Department of Electrical and Computer Engineering offers graduate students support in a variety of ways. Many full-time students are supported by graduate research assistantships or teaching assistantships. There are also several fellowships available for highly qualified graduate students.

Certificate

Electric Power Engineering Certificate

- Via Asynchronous or Synchronous, Interactive, Distance-Enabled Delivery

The University of Pittsburgh Swanson School of Engineering has established an Electric Power Engineering Post-Baccalaureate/Graduate Certificate Program that rises to the challenge of meeting the nation's critical development needs for electric power engineering professionals. This is a distance-enabled program in electric power engineering that allows students to take classes either synchronously or asynchronously, depending on the course.

The program is deeply rooted in core electric power engineering principles and focuses on the expansion and enhanced reliability and resilience of electric power grid infrastructure through application of power electronics and advanced control technologies, as well as renewable energy integration and smart grids. Program content - combined with innovative distance-enabled delivery and collaborative program components - makes this program an attractive and unique choice in graduate engineering, particularly for individuals in industry/business. For additional information and to apply, please visit www.engineering.pitt.edu/powercertificate.

Certificate Curriculum

Credit-hours required: 15

Students may select any five of the following courses:

- ECE 2250 - POWER ELECTRONICS
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2774 - ADVANCED POWER SYSTEMS ANALYSIS
- ECE 2775 - ADVANCED ELECTRIC MACHINES AND DRIVES
ECE 2776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES
ECE 2777 - POWER SYSTEMS TRANSIENTS I
ECE 2778 - FACTS AND HVDC TECHNOLOGIES
ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY
ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS
ECE 2795 - SPECIAL TOPICS POWER - Artificial Intelligence and Machine Learning Applications for Modern Power Systems
ECE 2795 - SPECIAL TOPICS POWER - Electrical Distribution System Engineering & Analysis II
ECE 2795 - SPECIAL TOPICS POWER - Power Magnetic Devices
ECE 2795 - SPECIAL TOPICS POWER - Protective Relaying and Substation Automation

Additional Information

Admission Requirements

- BS in electrical engineering from an ABET-accredited university program (no industry experience required) OR
- BS in any engineering field, PLUS a minimum of three years of power industry experience
- Completed application via EngineeringCAS, Pitt's online application portal
- At least two references preferred
- No GRE required
- Applications and references will be reviewed by the program director prior to admission

For more information about the Electric Power Engineering program, contact:

Alexis Kwasinski, PhD, Program Director
Associate Professor, Electrical & Computer Engineering
akwasins@pitt.edu

Doctoral

Electrical & Computer Engineering, PhD ECE

The objective of the PhD program is to achieve a high degree of competence in one major field in Electrical and Computer Engineering.

Application Procedure and Admission Requirements

Applicants should consider the GRE an optional submission. If an applicant has already taken the GRE and believes their score demonstrates outstanding academic ability, beneficial to portraying you as a wholistic student and applicant, you may submit -- but it is optional. The GRE scores will not be considered as part of our admissions criteria for these application cycles. For students applying to terms after those listed above, please check back in the future for updates, as the Swanson School is still evaluating whether waiving the GRE will be permanent.

Students who obtained the MS degree from Pitt ECE:

Students must have a QPA of 3.30 or better and the recommendation from the MS advisor. Students must submit an application to continue into the PhD program. Application forms can be obtained from the Graduate Program Administrator.

Students who obtained the MS degree from outside Pitt ECE:
Students must follow the regular application procedure for admission to the ECE Graduate Program and submit the following materials: transcripts (both BS and MS); minimum two letters of recommendation; GRE general exam and TOEFL, IELTS or Duolingo (if required) score reports; statement of purpose; resume.

Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree.

**Students who are currently enrolled in the MS program at Pitt ECE:**

The request to transfer an MS student to the PhD program without an MS degree should be initiated by the students' thesis advisor in a letter submitted to the Graduate Program Director. The decision to approve the request is the responsibility of the Graduate Program Director. To be eligible for transfer, the student should have completed a minimum of 15 credits of graduate course work at Pitt and have maintained a minimum QPA of 3.5.

**Students who obtained the BS degree only and would like to apply to the PhD program:**

To be eligible for direct admission, students must have a minimum QPA of 3.5 and strong recommendations. Students must take the regular application procedure for admission to the ECE Graduate Program, submitting the following materials: transcripts (BS); minimum two letters of recommendation; GRE general exam and TOEFL, IELTS or Duolingo (if required) score reports; statement of purpose; resume.

**Degree Requirements**

**Students who obtained the MS degree:**

Up to 30 credits of approved coursework can be transferred in. The student is responsible to complete the balance of 30 credits if transferring in less than 30 credits. Beyond the 30-credit MS requirement, a minimum of 42 credits and a dissertation are required for the PhD degree. The dissertation should embody an extended original and independent investigation of a problem of significance in Electrical and Computer Engineering. Of those 42 credits, at least 18 must be in dissertation research (6 or more in ECE 3997 and 12 or more in ECE 3999), and at least 24 course credits must be attained beyond the MS degree. The 24 credits must include:

1. Four ECE book courses (12 credits) at the 2000 or 3000 level.*
2. A maximum 12-credit combination of ECE 3998 and ECE 3995 research/project courses.

ECE 3995 should be directed toward research. This research course requires the approval of the student's Program Conference Committee (i.e. the Preliminary Exam should be completed before taking this course). In addition, the student is required to write a 1-2 page proposal for each such course citing the topic, the teacher, the rationale for the course, and a deliverable from the course experience. The deliverable can be a submitted journal/conference paper, a research proposal for funding, or a complete patent application.

* A student with a Pitt ECE MS is waived from this four-book-course requirement. Instead, students substitute a 12-credit combination of research courses (ECE 3998 and/or ECE 3995).

**Students who obtained the BS degree only:**

Students must complete a minimum of 72 credits beyond the BS degree. Of those credits, at least 18 must be in dissertation research (6 or more in ECE 3997 and 12 or more in ECE 3999), and at least 54 course credits must be attained beyond the BS degree. The 54 credits must include:

1. At least eight ECE book courses (24 credits) that are in the catalog; of those 24 credits, at least 4 courses (12 credits) must be ECE courses at the 2000 or 3000 level.
2. A maximum 30 credit combination of ECE 3998 and ECE 3995 research/project courses.

**Entrance Requirements**

To be accepted into the PhD program a student who graduated from the University of Pittsburgh with an MS degree in Electrical and Computer Engineering must have a QPA of 3.30 or better and the recommendation from the MS thesis committee. The student must submit an application to continue into the PhD program. Applications can be obtained from the Graduate Program Administrator. For students who obtained the MS degree from other institutions, the QPA and letters of recommendation, GRE general exam and TOEFL (if required) results will be used for admission. Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree.

**Exams**
There are four separate exams that must be passed in order to obtain the PhD degree. The student must also have a Program Conference with a faculty committee to approve his/her plan of study. Descriptions of each follow.

Program Conference

During the first year, a PhD student must schedule a meeting with a faculty committee to present a tentative program of study for approval. The committee consists of the student's advisor, who chairs the committee, and a minimum of two other faculty members from the department.

On the Program Conference form, the student must list all of the courses he/she has taken as a graduate student in the department as well as those for which he/she has obtained advanced standing. Courses that he/she is planning to take in the future in Electrical and Computer Engineering as well as in related areas should also be included. Finally, the form should list the four courses that are required for the PhD Comprehensive Exam and a tentative schedule for the different exams and the residency requirements. The committee can approve, reject or make modifications to the proposed program. The advisor is responsible for supervising the student's progress in the approved program.

Preliminary Exam

The purpose of the preliminary exam is to ascertain the capabilities of a student to do independent research. The exam generally consists of an oral presentation of a written document, prepared by the student, to a committee of ECE faculty members. The student and his/her advisor will determine the subject of the document.

Students completing the MS research option who are interested in pursuing doctoral studies have already demonstrated their ability to do independent research. Therefore, their MS thesis oral and the preliminary exam may be administered simultaneously.

Continuing MS students who elected the professional option or who obtained their degrees from other institutions must schedule a preliminary exam. The student must prepare a written document of the same caliber as an MS thesis. This may be done by either taking a graduate project course (ECE 3998) or by using a thesis presented at another institution. The student's advisor will then assist the student in forming a committee with a composition similar to that of an MS thesis exam committee. Two weeks before the exam, the written report should be given to the committee members and the Graduate Program Administrator should be informed of the composition of the committee, time, title and abstract of the thesis in order to publish an announcement.

PhD Comprehensive Exam

To complete the Comprehensive PhD exam, a student must obtain a minimum QPA of 3.3 in the four courses assigned by the PhD program conference committee no later than the first two years of enrollment in the PhD program.

If the student fails to achieve this requirement, he/she must pass an oral exam that takes place at the same time as the PhD Proposal exam and answer general questions related to his/her research area. If he/she fails this oral exam, the student may take it once more three months later.

To complete the PhD Comprehensive exam, a student must select four courses in his/her area of specialization and have earned a grade of B or higher in each.

Dissertation Proposal Exam

For the dissertation proposal examination, the student prepares a written proposal of his/her dissertation and presents it orally to an exam committee. Students must have a cumulative graduate QPA of 3.30 to be considered for doctoral candidacy. The committee consists of at least five members, four of whom must be from the Electrical and Computer Engineering Department, and at least one who must be from outside the department (external member). Three of the departmental members must be graduate faculty members and at least one of the external members must be a graduate faculty member from another department in the university. Other appropriate member(s) may also serve on the committee. A faculty member from another accredited university may serve as an external graduate faculty member of the committee if that individual's academic background is comparable to the qualifications for graduate faculty status at the University of Pittsburgh.

The dissertation proposal should be given to the committee members at least two weeks before the exam, and the student must inform the Graduate Program Administrator of the composition of the committee and provide a proposal with a completion time line as well as a title and an abstract at least two weeks prior to the exam date.

If the doctoral committee approves the dissertation proposal, the student is then formally admitted to Candidacy for the Doctor of Philosophy Degree. The proposal exam must be completed at least two semesters before the student plans to graduate. Students can register for ECE 3997 for preliminary work for the PhD proposal exam.
Final Oral Exam

The final oral exam is administered by the doctoral committee and determines the acceptability of the student's dissertation and his/her ability to comprehend, organize and make original contributions to his/her area of research.

Only students who have passed the dissertation proposal exam may register for dissertation research (ECE 3999). A minimum of 18 research credits is required for graduation, of which at least 12 must be in ECE 3999. Once a student registers for research, he/she must continue to register for Fall and Spring terms until the final oral examination has been passed.

At least two weeks before the date set for the exam, the student must submit a copy of the dissertation to each member of the exam committee and register with the Graduate Program Administrator. The final oral exam is open to the public.

Students scheduling their final oral exam must submit at least one paper from their thesis work to a refereed journal. The publication form must be signed by the major advisor and submitted to the Graduate Program Administrator at least two weeks before the final oral exam. Submitting a paper to a refereed journal is a requirement for the PhD degree.

Master's

Electrical & Computer Engineering, MS ECE

As a general rule, the admission requirements for the Master of Science degree in Electrical Engineering are a minimum QPA of 3.0, two letters of recommendation, GRE General Test scores recommended, and English language proficiency exam for international applicants.

Applicants should consider the GRE an optional submission. If an applicant has already taken the GRE and believes their score demonstrates outstanding academic ability, beneficial to portraying you as a wholistic student and applicant, you may submit -- but it is optional. The GRE scores will not be considered as part of our admissions criteria for these application cycles. For students applying to terms after those listed above, please check back in the future for updates, as the Swanson School is still evaluating whether waiving the GRE will be permanent.

The degree of Master of Science in Electrical Engineering can be obtained by following either a research or a professional option. The research option includes a thesis while the professional option is 30 credits of course work. Students who intend to continue for a PhD degree are highly encouraged to take the research option.

Course selection for either the research or the professional degree options is to be done in consultation with the student's advisor according to the following requirements:

1. The course selection must include at least 15 graduate credits in ECE, and
2. Courses outside of ECE must come from a pre-approved list of courses.

Courses that are required of students admitted on a provisional status are to be considered additional to these requirements. If the student chooses the research option, only 6 credits of ECE 2999 will count towards the degree requirement. Notice that credits in ECE 2997, research for the MS, and in ECE 3893, the graduate seminar, will not be considered towards the degree requirements.

Professional Option. A minimum of 30 credits of course work conforming to the requirements above. Although not required, a three credit graduate project course (ECE 2998) is highly recommended for students who might later choose to enter the PhD program. No comprehensive exam is required for students following the professional option.

Research Option. A minimum of 24 credits of course work is required. In addition, a thesis (with a minimum of six credits of ECE 2999, MS Thesis) must be completed and presented at an oral defense.

It should be emphasized that the above credit requirements for both options are the minimum acceptable and may not necessarily satisfy the degree requirements. In some instances it might be necessary for a student to take undergraduate courses to be accepted into full graduate status. Thus, depending upon the student's background and program, it may be necessary to take more than the minimum number of credits required.

Thesis Requirement. MS students taking the research option must prepare a thesis showing marked attainment in their area of investigation. A graduate student begins thesis work after the fulfillment of the following conditions:

- Completing at least 12 credits,
- Being on full graduate status, and
- Achieving a cumulative QPA of 3.00 or higher.
Students in the research option must defend their theses orally. A committee consisting of three Electrical and Computer Engineering graduate faculty members and chaired by the student's major advisor is formed to evaluate the thesis and defense. Faculty members with a secondary appointment in Electrical and Computer Engineering may also chair such a committee. The student must provide this committee with copies of the thesis at least two weeks prior to the day of the oral exam. The names of the faculty on the committee, the time, the title and the abstract of the thesis should be submitted to the Graduate Program Administrator at least two weeks before the desired exam date in order to publish an announcement. The oral exam is open to the public. If the student is interested in pursuing a PhD, this exam may be combined with the PhD Preliminary Exam and the Program Conference.

A copy of the ECE Orientation Notes can be requested from the ECE Graduate Program Director or Administrator.

Department of Industrial Engineering

Contact Information

Interim Department Chair: Lisa Maillart
Main Office: 1025 Benedum Hall
412-624-9830
Fax: 412-624-9831
E-mail: maillart@pitt.edu
http://www.engineering.pitt.edu/industrial/

Additional information concerning the department's graduate program may be obtained from the graduate secretary; please send email to gradie@pitt.edu.

Graduate Degree Programs

The Department of Industrial Engineering's graduate programs prepare engineers to assume leadership positions in industry, government, and service organizations. The Master of Science in Industrial Engineering program is very flexible, and students could either choose to focus on some specific area of interest or opt for a more broad-based curriculum with coursework spanning multiple areas. Narrower concentration areas in Data Science, Engineering Management and Safety Engineering are also available.

In addition, the department offers two options in cooperation with the Joseph M. Katz Graduate School of Business: a joint degree MSIE/MBA program and a joint degree MSIE/MSSCM (Master of Science in Supply Chain Management) program. The department also offers several other options with the Master's program, including (1) a Graduate Certificate in Safety Engineering, (2) opportunities for Lean Six Sigma Certification, (3) a Graduate Certificate in Healthcare Systems Engineering in cooperation with the School of Public Health, and (4) a Graduate Certificate in Nuclear Engineering in cooperation with the Department of Mechanical Engineering and Materials Science.

The Doctor of Philosophy degree is the department's flagship graduate program. Currently, the primary areas of research include all aspects of operations research, analytics, and data science; and manufacturing science and nontraditional manufacturing. Doctoral graduates are qualified for academic research careers as well as technical leadership positions in industry.

Admissions

Applicants must possess an undergraduate or graduate degree from an ABET-accredited program in any engineering discipline, or a degree in a complementary technical discipline, such as mathematics, statistics, or computer science. Outstanding applicants from other disciplines such as physics, chemistry, biology, economics, information systems and quantitative business will also be considered, as long as they have the required prerequisites of undergraduate calculus, linear algebra, and calculus-based probability and statistics. Proficiency in computer programming is also an asset.

Applicants for admission must submit the application form and fee, transcripts of all college-level work, three letters of recommendation, and a statement of career goals/objectives. Submission of scores from the Graduate Record Examination (GRE) is optional. International applicants whose first language is not English must take either the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service.
with a minimum score of 550 (paper-based test)/213 (computer-based test)/80 (internet-based test), the International English Language Testing System (IELTS) exam with a minimum Band of 6.5 (taking the academic writing and reading modules of the test), or the Duolingo English Test with a minimum score of 105. It is desirable for PhD applicants to have an interview with a faculty member, although this is not a requirement for admission.

All applicants are considered on an ongoing basis. However, the following deadlines are strongly recommended for international applicants: Fall term - April 15, and Spring term - September 30. Also, all PhD applicants who wish to be considered for financial assistance must apply before January 31. International applicants are not accepted for enrollment beginning in a summer term. Prospective students are encouraged to apply early whenever possible.

Applications may also be completed online by going to https://www.engineering.pitt.edu/departments/industrial/admissions/graduate-admissions/.

Applicants to the MSIE-MBA and MSIE-MSSCM programs must apply through the Joseph M. Katz Graduate School of Business.

Financial Assistance

It is the department's policy to provide graduate teaching or research assistantships to as many PhD students as possible. However, these awards are limited in number and highly competitive, and are awarded on the basis of merit and departmental research/teaching requirements. Financial support comes from the department, not individual faculty, and is generally restricted only to students interested in pursuing a doctoral degree. All decisions on assistantships are made by the chair based upon the recommendations of the departmental graduate committee. Barring unforeseen circumstances, students who are awarded financial support will have their financial support continued as long as they maintain their level of academic excellence and make satisfactory progress toward their degree objectives. For full consideration, students must apply early for financial support and in no case later than January 31 for the fall term and July 31 for the spring term.

Certificate

Health Care Systems Engineering Certificate

The certificate in Health Care Systems Engineering is intended for individuals pursuing careers in health systems management and process engineering. Primarily designed for Master's degree students in the Department of Health Policy & Management and the Department of Industrial Engineering, this program provides a rigorous and multi-disciplinary education as a complement to the core curriculum of both programs. With a focus on enhancing innovation, effectiveness and efficiency in health care and public health, the Certificate's ultimate goal is to produce well-educated professionals and leaders in their disciplines. The HSE certificate is not a stand-alone option but is open to all Master's students in Industrial Engineering, and students must formally apply for this option. For IE graduate students, the MS degree in IE along with the HSE certificate requires a total of 37-38 credits. Students interested in the HSE certificate are strongly encouraged to map out their study plans immediately after enrolling in the department.

A recommended study plan for MSIE students who choose the HSE Certificate option is shown below.

Fall Year 1 (10 Credits)

- IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS I
- IE 2006 - INTRO TO MANUFACTURING SYSTEMS
- IE 2106 - OPERATIONS IMPROVEMENT IN HEALTHCARE
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- IE 2110 - HEALTH SYSTEMS ENGINEERING SEMINAR

Spring Year 1 (12 Credits)

- IE 2001 - OPERATIONS RESEARCH
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2303 - WORK DESIGN
- IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
Fall Year 2 (9 Credits)

- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2217 - CLINICAL DECISION ANALYSIS
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- IE Core Elective\(^1\) - 3 credits

Spring Year 2 (6-7 Credits)

- HPM Elective\(^1\) - 2-3 credits
- HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2
- IE 2998 - GRADUATE PROJECTS/PRACTICUM \(^2\)

Note

\(^1\)These electives can be switched around, or the last term could be reduced to just 3 credits if these elective credits are taken earlier in the program (e.g. during the fall or summer)

\(^2\)Cannot be taken until the last term

Safety Engineering Certificate

The certificate in Safety Engineering program is intended for engineers seeking training in safety engineering to enhance their operational abilities or if they become newly assigned to positions that have higher levels of safety engineering responsibilities. It is also designed to enhance the capabilities of non-engineering based safety professionals seeking training in safety engineering, and affords the opportunity for engineers and other working professionals to maintain their certifications and licensure as safety professionals. A minimum of 15 credits are required to complete this certificate and the certificate may be obtained as a stand-alone program or in conjunction with the MS degree.

Required Courses (9 credits):

The following courses are required for this certificate:

- IE 2301 - INTRODUCTION TO SAFETY ENGINEERING
- IE 2302 - ENGINEERING FOR PROCESS SAFETY
- IE 2303 - WORK DESIGN

Electives (6 credits):

Students may select any two of the following courses (other courses may be chosen with prior approval from the Program Director):

- CEE 2201 - CONSTRUCTION COST ENGINEERING
- CEE 2202 - CONSTRUCTION SCHEDULING
- CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT
- CEE 2205 - CONSTRUCT FINANCE & COST CONTROL
- CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS
- CEE 2230 - BUILDING INFORMATION MODELING
- CEE 2347 - BRIDGE ENGINEERING
- CEE 2700 - TRAFFIC MGMNT AND OPERATIONS
Doctoral

Industrial Engineering, PhD

This is the department's flagship graduate program and prepares the student for the rigorous demands of a career in research and development, or academia. It requires a strong background in mathematics, probability & statistics, optimization techniques and manufacturing. The PhD student is expected to be a full-time student. Although it is possible to seek candidacy as a part-time student, the PhD candidate must spend at least one academic year on campus full time. The graduate faculty typically works closely with individual doctoral students to create a flexible program tailored to individual needs.

Entrance to the PhD Program: To be admitted to the doctoral program, students must pass the PhD qualifying examination, which is typically given once a year in late April or early May. The examination allows the department to assess students' ability to conduct doctoral-level research by testing their academic preparation and creativity. Students are expected to take the examination in April/May of the calendar year following the one in which they entered the graduate program, although it is acceptable to take the examination earlier. The student must seek faculty approval to take this examination. For approval to take the exam, a student is expected to (i) have a very good academic record, (ii) have an eligible departmental faculty advocate, and (iii) show promise for doing independent research.

Currently, there are four components to the qualifying examination:

1. The student must have an overall GPA of at least 3.67 in the courses comprising the qualifying core.
2. The student must select two areas from: (1) Linear Optimization, (2) Stochastic Processes, (3) Statistics & Data Analysis, and (4) Manufacturing Systems, and pass two oral examinations (typically, 45 minutes to an hour each) conducted by a committee of two to four faculty members that cover the selected areas.
3. The student must satisfactorily participate in independent research with a faculty member (either by registering for 3 credits of research or as part of the student's research assistantship duties).
4. The student must read and review one or more research papers that will be assigned by an examination committee and then defend their critique before the committee. The entire faculty then meets and discusses each candidate's performance along with the recommendations of the examination committees to decide on whether the student passes or not.

**Doctoral Course and Dissertation Credit Requirements:** In addition to the basic core courses, doctoral students take additional courses that may be required in preparation for the PhD degree and the student's dissertation topic. These courses are selected in conjunction with a program approved by the student's advisor. According to University regulations, the PhD requires at least 72 credits beyond the bachelor's degree or 42 credits beyond the master's degree, including 18 credits for dissertation research. Currently, the department requires a minimum of 45 credits in pedagogical coursework; credits typically include the following:

- Other required courses (IE 2100 & IE 2088 or IE 2188): 6 credits
- Additional course work (at least 6 credits of which must come from offerings outside the Department of Industrial Engineering): at least 24-27 credits
- Dissertation research (IE 3997 & IE 3999): at least 18 credits

**Additional Doctoral Requirements:** All full-time students must enroll in and attend IE 3095 (Graduate Seminar) each term they are in residence; the credits for these do not count toward the 72-credit requirement.

The comprehensive examination is taken by students typically after completing most of the course work in their concentration. The PhD comprehensive exam is combined with the dissertation proposal presentation and has a three-fold purpose: (1) to test the student's proficiency (knowledge and skills) in his or her major area of interest; (2) to identify deficiencies in the student's background and suggest remedial work; and (3) to test the student's ability to prepare an acceptable dissertation in his or her area of concentration.

All doctoral students are expected to pursue research by working with individual faculty in areas that can lead to a potential doctoral dissertation. A PhD candidate must demonstrate the ability to conduct research of an original nature by completing a dissertation and preparing one or more papers of publishable quality. The dissertation topic is selected by the student in some theoretical or methodological area of interest in consultation with a faculty advisor. A faculty committee must approve the dissertation proposal before the student embarks on dissertation research. Information regarding the PhD program can be obtained by going to [https://www.engineering.pitt.edu/departments/industrial/graduate/doctoral-program/](https://www.engineering.pitt.edu/departments/industrial/graduate/doctoral-program/).

**Teaching Requirements for PhD Students:** All PhD students should complete the following concentration in Scientific Communication, with two elements:

1. **Training program** requires the completion of the following:
   1. Attendance at a minimum of one teaching workshop run by the Pitt Center for Integrating Research, Teaching and Learning (PITT-CIRTL) and approved by the department; see [https://www.engineering.pitt.edu/cirtl](https://www.engineering.pitt.edu/cirtl)
   2. Attaining a score of at least four in the ELI English Comprehensibility Test for TAs
   3. ENGR 2050 - TECHNICAL WRITING or ENGR 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION

2. **Mentorship-in-practice:** The goal of this requirement is to provide a mentored experience to the PhD students, regardless of their funding support, in classroom-based pedagogy. This requires one term as a TA and one term as an independent instructor. Satisfaction of this requirement, or any exceptions, must be approved by the graduate program director.

**Joint Degree**

**Industrial Engineering/Business Administration, MSIE/MBA**

This joint degree program, offered in conjunction with the Joseph M. Katz Graduate School of Business, positions individuals with an undergraduate degree in engineering or the hard sciences to take a management role in a company that has a significant engineering and/or technological focus. Full-time students can complete both degrees in 20 months, while part-time students can do so in four years. Prospective students must apply via the Joseph M. Katz Graduate School of Business to the joint program; students who are already in the MBA program are not permitted to enroll in the joint program.

A total of 25.5 credits from the Department of Industrial Engineering are required (12 credits in core classes, 12 credits in electives, and 1.5 credits in an integrated project).

In particular these credits are divided as follows:
• Required Core (2 courses: 6 credits)*
  o IE 2001 - OPERATIONS RESEARCH
  o IE 2006 - INTRO TO MANUFACTURING SYSTEMS
• Elective Core: at least two of the following (2 courses: 6 credits)
  o IE 2003 - ENGINEERING MANAGEMENT
  o IE 2007 - STATISTICS AND DATA ANALYSIS
  o IE 2088 - DIGITAL SYSTEMS SIMULATION or IE 2188 - SIMULATION MODELING AND APPLICATIONS
  o IE 2100 - SUPPLY CHAIN ANALYSIS
  o IE 2303 - WORK DESIGN*
• Free Electives (4 courses: 12 credits)
  o Any elective offered by the IE Department (including courses in the elective core above)
• Integrated Project (1.5 credits)
  o IE 2998 - GRADUATE PROJECTS/PRACTICUM

*IE 2303 - WORK DESIGN is required for students without an undergraduate degree in IE

For details on the curriculum requirements for the MBA portion of the program, please visit Joseph M. Katz Graduate School of Business.

MBA Degree Requirements

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

  • BACC 2401 - FINANCIAL ACCOUNTING
  • BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
  • BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
  • BQOM 2421 - DECISION TECH IN MFG & OPS MGT
  • BFIN 2409 - FINANCIAL MANAGEMENT 1
  • BMIS 2409 - INFORMATION SYSTEMS
  • BMKT 2409 - MARKETING MANAGEMENT
  • BSPP 2409 - STRATEGIC MANAGEMENT
  • BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
  • BSEQ 2401 - BUSINESS ETHICS & SOCIAL PERFORM
  • BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

  • Quant Methods for Business
  • Programming for Business
  • Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

  • BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
  • BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
  • BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
  • BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
  • BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY
Total Credits: 45

Supply Chain Management and Industrial Engineering, MSSCM/MSIE

Program Requirements

This joint degree program, offered by the Industrial Engineering Department of the Swanson School of Engineering and the Joseph M. Katz Graduate School of Business, combines quantitative and analytical engineering coursework with coursework in business topics. It positions individuals with an undergraduate degree in engineering or the hard sciences to leverage their skills and become supply chain professionals who can work in a business environment. With a full load of classes, this program can be completed in 4 terms of coursework over a 20-month period and results in two degrees: the MSIE from Swanson and the MSSCM from Katz.

A total of 24 credits from the Department of Industrial Engineering (IE) are required, maintaining a 3.0 GPA:

- 12 credits in required classes, comprising the Department's 3-course, required core (IE 2001 - OPERATIONS RESEARCH, IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1, IE 2006 - INTRO TO MANUFACTURING SYSTEMS) plus IE 2100 - SUPPLY CHAIN ANALYSIS from the elective core.
- 12 credits in IE electives:
  - At least 3 elective credits (i.e. one course) must come from the remaining four courses in the elective core: IE 2003 - ENGINEERING MANAGEMENT, IE 2007 - STATISTICS AND DATA ANALYSIS, IE 2088 - DIGITAL SYSTEMS SIMULATION or IE 2188 - SIMULATION MODELING AND APPLICATIONS, and IE 2303 - WORK DESIGN (Note: students without an undergraduate degree in Industrial Engineering are required to take IE 2303 from the elective core).
  - The 9 remaining elective credits can come from the elective core or any other graduate IE course.

A total of 24 credits from the Joseph M. Katz Graduate School of Business are required, maintaining a 3.0 GPA:

- 13.5 credits in required classes with a minimum requirement of a C grade or better.
- 10.5 credits in supply chain management electives. Must complete experience-based learning requirement through a 3-credit consulting field project course focused on supply chain management, a 3-credit global research practicum on supply chain management or complete an internship (with approval from faculty director).

For application instructions and details on the curriculum requirements for the MSSCM portion of the program, please visit the Joseph M. Katz Graduate School of Business website.

Master's

Industrial Engineering, MSIE

Requirements for the MSIE Degree

The Master of Science in Industrial Engineering program is very flexible and requires 30 credits of graduate study. It may be obtained with or without a thesis option. With either option, the student is required to take three core courses (IE 2001, IE 2005, and IE 2006) that count for 9 credits, and at least two courses from the elective core (currently IE 2003, IE 2007, IE 2088 or IE 2188, IE 2100, and IE 2303) that count for an additional 6 credits. Students who do not have an undergraduate degree in Industrial Engineering are required to select IE 2303 from this elective core.

- With the non-thesis option, the remaining 15 credits may be freely chosen from the elective core or other departmental graduate courses based on the student's individual interests and the approval of his or her academic advisor. With the permission of the advisor, the student may also take up to 9 of the 15 credits from other relevant graduate offerings outside the department.
- With the thesis option, 9 of the 15 remaining credits may be freely chosen from the elective core or other departmental graduate offerings. In addition, the student must complete a 6 to 8-credit thesis. With this option, approved out-of-department electives could account for 3 of these 15 credits.

In both cases, students who have already taken one or more of the core courses as undergraduates or as part of another graduate program are encouraged to skip such courses and substitute them with more advanced course work in the same area.
Normally the program can be completed in three terms of full-time study or two to three years of part-time study. Many graduate courses are offered in the evening for the convenience of working professionals. Courses are also offered over the summer term. Information regarding the MS program can be obtained by going to: http://www.engineering.pitt.edu/industrial/graduate/

Department of Mechanical Engineering and Materials Science and Engineering

The Department of Mechanical Engineering and Materials Science (MEMS) offers MS and PhD degrees in both areas, as well as an MS degree in Nuclear Engineering. In addition, the Department offers graduate certificates in Nuclear Engineering and Processing, Properties and Performance of Engineering Metals, which are open to all graduate students within the Swanson School of Engineering. These certificates are also available to qualified post-baccalaureate students who are not seeking to earn an MS degree.

Materials Science and Engineering

The Department of Mechanical Engineering and Materials Science offers broad-based educational and research programs in materials science and engineering leading to the degrees of Master of Science and Doctor of Philosophy in Materials Science and Engineering. These programs are oriented toward the application of fundamental knowledge of materials science and engineering to the solution of real-world materials problems that impede technological progress. They are designed to educate engineers by providing them with the tools to become successful in research, development, production, management, and teaching. The department also offers a dual degree Masters program with the Katz Graduate School of Business.
Basic courses on the structure, properties, and energetics of materials are taken in common. The student, working with faculty advisors, tailors the program to suit individual interests and demands of the student's chosen field of specialization through advanced and specialty courses.

The range of research projects in materials science and engineering reflects the broad spectrum of interest of the faculty. However, interest in the structure and properties of materials and their relationship to materials processing is a common thread that ties together many of the programs. Research is aimed at building an understanding of basic phenomena that will lead to solutions of materials problems at the forefront of technological and social progress.

Current research interests are centered in several areas of metals and ceramics, including corrosion and oxidation; high-temperature materials; materials for energy applications; additive manufacturing; metal-forming processes; phase transformations in metals and ceramics; intermetallic phases; plastic deformation of metals; surfaces and interfaces; thermomechanical processing of steels; ceramic processing and sintering science; electronic properties of ceramics; nanostructured materials; catalytic materials; thin film science and technology; and laser processing of materials.

Application Deadlines

January 15 - Fall semester admission
July 1 - Spring semester admission
February 1 - Summer semester admission

Master of Science Program

The Master of Science in Materials Science and Engineering degree (MSMSE) may be pursued as either a Professional MS Track program (for practicing engineers) or a Research MS Track program. Students can tailor their individual MS program to emphasize different aspects of materials science and engineering (e.g., ceramics, metallurgy, etc.).

Admissions

A bachelor's or master's degree holder applying to the program must have a quality point average (QPA) or cumulative grade point average (GPA) equal to or higher than 3.0 (B) or equivalent. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the Graduate Committee. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or Duolingo. The required minimum acceptable score for TOEFL is 80 for the Internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test.

In some cases, depending on previous background and QPA or cumulative GPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.0 (B) or better in courses that are required to obtain a better background in materials science and engineering and/or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.

Doctor of Philosophy Program

The Doctor of Philosophy Program in Materials Science and Engineering is a research degree leading largely to careers in teaching and research in academia and industry. This program is designed for excellent students. As the studies progress, students develop an understanding at the highest level in their area of specialization that must lead to an original contribution to the field in the PhD dissertation.

Admissions

A bachelor's or master's degree holder applying to the program must have a QPA or cumulative equal to or higher than 3.3 (B+) or equivalent. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the Graduate Committee. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or
Duo Lingo. The required minimum acceptable score for TOEFL is 80 for the Internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test.

In some cases, depending on previous background and QPA or cumulative GPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.3 (B+) or better in courses that are required to obtain a better background in materials science and engineering and/or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.

**Processing, Properties, and Performance of Engineering Metals Certificate**

The graduate-level Certificate in Processing, Properties, and Performance of Engineering Metals is designed primarily to meet the needs of working engineers who wish to pursue or enhance a particular aspect of materials science and engineering and of traditional graduate students in science and/or engineering who want to supplement their program with courses having a metals focus.

The academic requirements associated with the Certificate in Processing, Properties, and Performance of Engineering Metals include the completion of fifteen (15) credits of coursework within the Department of Mechanical Engineering and Materials Science.

**Graduate Materials Science Courses**

Six core courses (MSE 2003, MSE 2011, MSE 2013, MSE 2015, MSE 2030 and MSE 2067) are offered annually and other graduate courses are offered on a two-year rotation. A full list of MSE courses is available at the end of this catalog page.

**Mechanical Engineering**

The Department of Mechanical Engineering and Materials Science offers Doctor of Philosophy (PhD) and Master of Science (MS) degrees in mechanical engineering. Each graduate program student's plan of study is developed individually under the guidance of a faculty advisor and is carefully tailored to meet his or her needs and objectives while meeting the minimum requirements for the degree.

The graduate curriculum is an integrated program of study in applied sciences and mathematics, and modern computational methods that are pertinent to the research emphasis in the department. The research in the department is focused on seven major areas: (1) Advanced Manufacturing and Design; (2) Materials for Extreme Conditions; (3) Soft Matter Biomechanics; (4) Computational and Data-Enabled Engineering; (5) Cyber-Physical Systems and Security; (6) Nuclear and other Sustainable Energies; (7) Quantitative and In Situ Materials Characterization.

In addition to the MS and PhD degrees, the Department also offers a dual-degree program with the Katz Graduate School of Business.

**Application Deadlines**

January 15 - Fall semester admission

July 1 - Spring semester admission

February 1 - Summer semester admission

**Master of Science Program**

The Master of Science in Mechanical Engineering (MSME) degree may be pursued as either a Professional MS course-only program, suitable for most practicing engineers, or a thesis-based, Research-Track MS program that requires the completion of a thesis.

**Admissions**
A bachelor's degree in mechanical engineering, or a closely related field is required. Applicants must have a cumulative grade point average of 3.0 or higher on a scale of 4.0 from their undergraduate degree. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or Duolingo. The required minimum acceptable score for TOEFL is 80 for the internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test. GRE scores are not required, but applicants who have taken the GRE exam are welcome to submit their scores.

Applicants must include in their application official transcripts from each higher education institution attended, a minimum of two confidential reference letters and a statement of purpose and goals. Official academic credentials that are issued in a language other than English must be accompanied by a certified English translation.

Applicants who do not meet these requirements, but demonstrate academic excellence in other areas may be admitted initially on a provisional basis upon the recommendation of the Graduate Admission Committee.

Applicants are urged to visit the Department and the Swanson School of Engineering websites for further details.

**Doctor of Philosophy Program**

The goal of the Doctor of Philosophy in Mechanical Engineering program is to prepare the student for the rigorous career demands of engineering research either in the industry or academia. Students are expected to develop a commanding knowledge in their area of specialization that must culminate in the form of original contributions to the field of engineering and sciences in the PhD dissertation.

**Admissions**

A bachelor's degree in mechanical engineering, or a closely related field is required. Applicants must have cumulative grade point average of 3.3 or higher on a scale of 4.0 from their undergraduate degree. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or Duolingo. The required minimum acceptable score for TOEFL is 80 for the internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test. GRE scores are not required, but applicants who have taken the GRE exam are welcome to submit their scores.

Applicants must include in their application official transcripts from each higher education institution attended, the names of a minimum of two persons who can provide confidential reference letters, and a statement of purpose and goals. Official academic credentials that are issued in a language other than English must be accompanied by a certified English translation.

Applicants who do not meet these requirements, but demonstrate academic excellence in other areas may be admitted initially on a provisional basis upon the recommendation of the Graduate Admission Committee.

Applicants are urged to visit the Department and the Swanson School of Engineering websites for further details.

**Financial Aid**

Academic admission to the graduate program does not imply the granting of financial aid. The Department provides financial aid to exceptionally qualified students in the form of teaching and research assistantships, which includes a monthly stipend, tuition waiver and individual premium health insurance coverage. Financial aid is competitive. Students applying for the PhD programs are prioritized for financial aid considerations. An applicant interested in applying for financial aid should indicate so when completing the on-line application under Application Information. Financial aid in the form of scholarships may be available to Master and PhD students through the Swanson School of Engineering. Applicants are urged to check the financial aid information on School's website.

**The Nuclear Engineering Graduate Program**

The Department of Mechanical and Materials Science offers graduate studies in advanced nuclear engineering. The graduate faculty is committed to high-quality research and teaching. The curriculum is an integrated program of study in applied sciences, applied mathematics, and modern
computational procedures that are relevant to the research emphasis in the department. The research is focused on: (1) Nuclear Energy Technology (2) Nuclear Operations and Safety (3) Nuclear Materials (4) Nuclear Modeling and Simulations and (5) Radiology and Radiochemistry.

Degree Programs

An application for the MS program is judged on the student's prior academic record, the accreditation of the prior degree granting school, and the capability of the department to match the applicant's interest with the program. A foreign national student who did not receive his or her Bachelor of Science from an accredited U.S. institution is required to take the TOEFL exam and receive a score of at least 550 (213 for the computer-based exam / 79-80 internet-based exam) or the International English Language Testing System (IELTS) and receive a minimum result of Band 6.5. Students with a Bachelor of Science degree in another engineering field, mathematics, or physics will also be considered for the graduate program with the possibility that prerequisite courses may be required. A part-time program is available for students who are employed in local industries. Part-time students usually carry from three to six credits per term in either day or evening classes.

Applicants who do not meet these requirements will be considered on an individual basis with strong emphasis given to academic promise, career orientation, work experience, and preparation in engineering and related disciplines. In some cases, applicants may be admitted provisionally until certain deficiencies in either coursework or academic achievement are satisfied.

Nuclear Engineering Graduate Certificate

The Department of Mechanical Engineering and Materials Sciences is offering a certificate for students in the Swanson School of Engineering with an interest in nuclear science and technology. Students from the Bioengineering, Civil, Chemical, Industrial, Mechanical, Materials Science, and Electrical/Computer engineering programs may be most interested in obtaining this certificate.

Fifteen units are required to complete the certificate. This certificate may be combined with graduate courses in any one of the School's seven Master of Science (MS) degree programs or the certificate may be awarded stand-alone as a post-baccalaureate certificate. All nuclear courses (labeled NUCE) count toward a Nuclear Engineering certificate. Courses designated as (NUCE/ME) on the Nuclear Engineering MS and Certificate program pages (linked below) will also be recognized for credit toward an MS or PhD in Mechanical Engineering; these courses include NUCE 2100, NUCE 2102, and NUCE 2115.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. This focus on nuclear operations and safety not only fulfills a recognized educational need, but is also designed to take advantage of unique industrial resources in the Pittsburgh area which will greatly facilitate student learning.

The renaissance of nuclear science and technology in the United States has created a need in the marketplace once again for engineers with nuclear knowledge. The University of Pittsburgh aims to meet these marketplace needs by preparing engineers through the graduate certificate in nuclear engineering. Classes are taught by current and former nuclear engineers, including faculty with experience conducting commercial nuclear operations programs for Westinghouse or the Beaver Valley Nuclear Station and with certificates or operation licenses from the US Nuclear Regulatory Commission.

Objectives

The objectives of the nuclear engineering certificate are:

- To develop the basic competencies needed by science and engineering graduates to contribute quickly and effectively to the renaissance of nuclear science and technology in the United States and abroad.
- To create a benchmark educational program that can serve as a model throughout academia.

Certificate

Nuclear Engineering Certificate

Graduate Certificate in Nuclear Engineering Overview
A key need in the nuclear technology marketplace is for engineers from diverse disciplines who possess knowledge of nuclear phenomenology and technology. The University of Pittsburgh meets these marketplace needs by preparing engineers through the graduate certificate in Nuclear Engineering.

Students have the option to complete this certificate 100% online.

Objective

The objective of the nuclear engineering certificate is to provide the advanced competencies needed by science and engineering graduates to contribute quickly and effectively to nuclear science and technology in the United States and abroad.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. The certificate may be combined with graduate courses in any one of the seven MS degree programs (Bioengineering, Chemical, Civil, Electrical and Computer, Industrial, Materials Science and Mechanical Engineering) or taken as a post-baccalaureate certificate. The focus on nuclear operations and safety not only fulfills a recognized educational need, but also takes advantage of unique industrial resources in the Pittsburgh area which greatly facilitate student learning.

All nuclear courses (labeled NUCE) count toward a Nuclear Engineering certificate. Those labeled NUCE/ME can also count toward an MS or PhD degree in Mechanical Engineering.

Requirements

All students must successfully complete five of the nuclear courses listed below in order to earn the graduate certificate. Nuclear Engineering certificates are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Contacts

If you have questions about the curriculum, please contact either the Director or Associate/Academic Director of the Nuclear Engineering program. Currently, these posts are occupied by Dr. Heng Ban (heng.ban@pitt.edu) and Dr. Tom Congedo (tvc9@pitt.edu), respectively.

If you have questions about registration, please contact the Graduate Administrator, Tara Rankin (mems_gradadmin@pitt.edu or 412-624-9722).

Nuclear Engineering Graduate Courses

- NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING (NUCE/ME)
- NUCE 2101 - NUCLEAR CORE DYNAMICS
- NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL (NUCE/ME)
- NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY
- NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
- NUCE / MSE 2110 - NUCLEAR MATERIALS
- NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- NUCE 2113 - RADIATION DETECTION AND MEASUREMENT
- NUCE / MSE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS (NUCE/ME)
- NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY
- NUCE 2120 - MATHEMATICALL MODELING OF NUCLEAR PLANTS
- NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
- NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- NUCE 2130 - THE NUCLEAR FUEL CYCLE
- NUCE 2131 - METAL COOLED REACTORS
- NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY

Note:
Courses designated as (NUCE/ME) in above list will also be recognized for credit toward an MS or PhD in Mechanical Engineering; these courses include NUCE 2100, NUCE 2102, and NUCE/MSE 2115.

Doctoral

Materials Science and Engineering, PhD

Requirements for the PhD Degree

A minimum of 72 credits is required for the PhD. Of the total of 72 credits required for the PhD degree a minimum of 36 credits must be coursework beyond the Bachelor of Science (BS) degree. PhD students must maintain a minimum QPA of 3.3 (B+) in this coursework. The coursework consists of (I) a materials core (six required courses students must take in the first year of enrollment), (II) a group of courses tailored for each student's research and as required technical broadening beyond the MSE focus, (III) courses to address mathematical/numerical skills, and (IV) PhD Research and Dissertation credits. The student's advisor must approve the course sequence selection. Students can transfer up to 30 credits from an MS or equivalent degree, subject to approval by the graduate program committee. If students are awarded with 30 block credits, they need to take at least 12 credits from the MSE program.

The 18-credit core course component must be taken within the first year of the program. Typically, PhD students will carry a course load of three courses per term until their coursework is completed. If a student's background is insufficient for a given graduate course, the student must prepare by attending appropriate undergraduate courses or through independent study. This should be arranged in consultation with the student's faculty advisor and the lecturing faculty of the relevant course(s). Students must take the PhD qualifying exam near the end of their 1st year when they complete core courses. Students who fail in their first attempt can have a second chance in the following semester. Students who fail the exam at both attempts are dismissed from the program.

In addition to core courses, a student must take at least 15 credits from advanced and technical elective courses in the MSE graduate program and relevant science and engineering disciplines. As a part of advanced and technical elective courses, a total of up to 12 credits may be taken in relevant engineering disciplines outside of the MSE designation of graduate level courses and in relevant science disciplines outside of SSoE. The selection of courses, in general, must be acceptable to the student's advisor.

In addition to core and advanced/technical elective courses, the student is required to take three (3) credits from mathematics/numerical courses.

Minimum credit requirements include:

Core Courses (18 credits)

- MSE 2003 - STRUCTURE OF MATERIALS
- MSE 2011 - ENERGETICS
- MSE 2013 - KINETICS IN MATERIALS SCIENCE
- MSE 2015 - ELECTROMGNTC PROPS MATERIALS
- MSE 2030 - MECHANICAL BEHAVR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Note:

A student must score at least a B (3.0) in each of these six classes. If a student does not get at least a letter grade of B, the class must be taken a second time. These classes must be successfully completed before the student can apply for admission to PhD Candidacy. If a student has a bachelor's degree in Materials Science and Engineering, MSE 2067 can be waived upon the permission of the Program Director. In this case, one (1) more advanced/technical elective course must be substituted for MSE 2067 to complete the requirements for the PhD degree.

Advanced and Technical Elective Courses
A student must take advanced courses and technical elective courses. These are comprised of at least two courses (6 credits) selected by the student and his or her advisor as the best advanced preparation for research in the area of the dissertation, and additional courses, as a broadening experience, to complement the student's PhD specialization and contribute significantly to career preparation.

Mathematics Courses

A student must take one mathematics/numerical course for three (3) credits beyond those required for the materials science and engineering Bachelor of Science degree. This can be satisfied by many courses. This requirement may be waived if it was met in a previous graduate program which the student attended before entering MSE, PhD program.

PhD Research and Dissertation Credits

Each student must also have:

- At least six (6) credits of MSE 3997 (PhD Research);
- At least 12 credits of MSE 3999* (PhD Dissertation);

*Please note that registration for MSE 3999 is allowed only after the student has passed the Comprehensive Examination and defended the PhD Proposal, which qualifies the student for the status of PhD Candidacy.

The course requirements described in these guidelines are a minimum requirement. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD Committee for better preparation for a given research area. Note that completion of the PhD degree and admission PhD candidacy require a GPA of B+ or better (≥3.3).

Mechanical Engineering, PhD

The goal of the Doctor of Philosophy program in the Mechanical Engineering and Materials Science (MEMS) Department is to develop the student for the rigorous career demands of engineering research either in the industrial or academic fields. The student is educated at the pioneering edge of technical, management, systems design, and decision-making concepts. This work requires a strong background in mathematics and one of the specialty areas of mechanical engineering. The PhD student is expected to attend full time. It is possible, however, to seek candidacy as a part-time student with the stipulation that the PhD candidate must spend at least one full-time academic year on campus.

Plan of Study

A minimum of 72 credits is required for the PhD degree. Of the total 72 credits, a minimum of 36 credits must be completed as coursework at the 2000 or higher levels beyond the Bachelor of Science (BS) degree. Students entering the PhD program with a master's degree in mechanical engineering or a closely related field are required to complete at least 12 graduate course credits. PhD students must maintain a minimum QPA of 3.3 (B+) in their coursework. Students can transfer up to 30 credits from an M.S. or equivalent degree, subject to approval by the graduate program committee. Students must take and pass the PhD preliminary (qualifying) exam at approximately the end of their first year. Students who fail the qualifying exam in their first attempt will have a second chance in the following semester. Students who fail the exam at both attempts cannot proceed with the PhD program and are terminated.

Each student must also have:

- At least six (6) credits of ME 3997 (PhD Research);
- At least 12 credits of ME 3999 (PhD Dissertation);

Please note that registration for ME 3999 is allowed only after the student has passed the Comprehensive Examination and defended the PhD Proposal, which qualifies the student for the status of PhD Candidacy.

The course requirements described in these guidelines are a minimum requirement. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD Committee for better preparation for a given research area. Note that completion of the PhD degree and admission PhD candidacy require a QPA of B+ or better (≥3.3). Students are urged to review the Graduate Handbook available on the department webpage for details and additional requirements for coursework.
The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Total Credits: 72

Graduate Certificate

The graduate-level Certificate in Processing, Properties, and Performance of Engineering Metals is designed primarily to meet the needs of working engineers who wish to pursue or enhance a particular aspect of materials science and engineering and of traditional graduate students in science and/or engineering who want to supplement their program with courses having a metals focus.

The academic requirements associated with the Certificate in Processing, Properties, and Performance of Engineering Metals include the completion of fifteen (15) credits of coursework within the Department of Mechanical Engineering and Materials Science as follows:

Required Courses

Students must complete the following two (2) courses:

- MSE 2030 - MECHANICAL BEHAVR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Electives

Students may select three (3) of the following courses as electives:

- MSE 2045 - ADV FERUS PHYSICAL METALLURGY
- MSE 2046 - PHYSICAL METALLURGY ENGR ALLOYS
- MSE 2047 - ANALYSIS AND CHARACTERIZATION AT THE NANO-SCALE
- MSE 2055 - PRIN OF SOLIDIFICATION ENGRNG
- MSE 2088 - POWDER PROCESSING OF MATERIALS
- MSE 2090 - CORROSION AND FAILURE ANALYSIS

Note:

If students have a bachelor's degree in Materials Science and Engineering, MSE 2067 can be waived upon the permission of the Program Director. In this case, one (1) more elective course must be substituted for MSE 2067 to complete the requirements of the Certificate. All courses must be taken on campus.

Master's

Materials Science and Engineering - Professional Track, MSMSE

The professional MS track is primarily oriented toward part-time students currently working in industry.

MS Track Requirements
The professional track consists of a minimum of 30 course credits (equivalent to 10 courses). There are no thesis or comprehensive examination requirements for this degree. Up to nine (9) credits of coursework counting towards the 30 course credits requirement may consist of non-MSE courses in other Engineering, Science or Mathematics disciplines that are approved by a student's advisor. No more than six credits may be granted to a student as transfer credit for work done at another accredited graduate institution. At least 21 course credits must be obtained from MSE 2000 and 3000 courses, not including Graduate Seminar (MSE 3023 and 3024), MS Research (MSE 2997), and MS Thesis (MSE 2999). An independent graduate project (MSE 2998) can be conducted after consultation with the student's faculty advisor and may account for 3 of the 21 required MSE credits. Students with non-MSE backgrounds are strongly encouraged to take for credit introductory courses (e.g. MSE 2067 or equivalent). MS degrees are conferred only on those students who have completed all course requirements with at least a 3.00 (B) GPA.

Materials Science and Engineering - Research Track, MSMSE

The research track is primarily for full-time students who have the intention to pursue a PhD or are strongly oriented toward a research career. The University transcript will include an entry indicating that a student is in the research MS track.

Research MS Track Requirements

The Research Track MS degree requires a minimum of 30 credits of course and research based graduate study, including at least 24 course credits. At most up to nine (9) credits of coursework counting towards the required minimum of 24 course credits may consist of technical courses in other non-MSE Engineering, Science or Mathematics disciplines that are approved by a student's advisor. No more than six (6) credits may be granted toward completion of the requirements for the Research Track MS for work completed at another accredited graduate institution. A minimum of 15 course credits must be derived from 2000- and 3000-level MSE courses, not including credits associated with Graduate Seminar (MSE 3023 and MSE 3024), MS Research (MSE 2997), and MS Thesis (MSE 2999). Students with non-MSE backgrounds are strongly encouraged to take for credit introductory courses (e.g. MSE 2067 or equivalent). The student's advisor must approve the course sequence selection. In addition to coursework requirements a minimum of six (6) credits of MS Thesis (MSE 2999) are required. Master's degrees are conferred only on those students who have completed all courses required for the degree with an average grade of least a 3.00 (B) GPA.

MS Thesis

An MS student should initiate research work as early as possible. Once thesis preparation has begun, a student must register for thesis credits (MSE 2999) in each succeeding term until successful completion of the thesis and a final oral defense and comprehensive exam. The MS thesis document is at least expected to be a report on independently conducted research and must adhere to the School of Engineering defined style and format. A Style and Form Manual for a thesis is available in the Engineering Office of Administration.

The purpose of an MS thesis oral defense is to evaluate an MS thesis and the student's command of the research subject. The successful completion of a defense is a requirement for the MS degree. The thesis examining committee consists of at least three members of the MSE faculty who are recommended by the student's advisor and approved by the department chair. After successfully completing a defense, a student must deposit an electronic and/or hard copies of the approved thesis in accordance with the current guidelines for thesis submissions available from the Office of Administration of the School of Engineering or the MSE Program Office.

Part-time students may pursue the research MS track. However, they must recognize that, although their thesis topics may be related to the broad technical area of their employment, results of work-related routine technical activities, analysis, surveys, or studies conducted for employers are not acceptable for inclusion in MS theses. Furthermore, part-time students should become aware of the University Intellectual Property Ownership Policy before undertaking theses. Prospective students must clarify all of these issues before contemplating a research-based MS degree.

Mechanical Engineering - Professional Track, MSME

Master of Science - Professional Track

The Master of Science, Professional Track is designed for individuals seeking advanced study in mechanical engineering. The program is oriented toward full-time students seeking a career in industry, and part-time students currently working in industry.

At the beginning of the program, the student must select at least one of the following study tracks with the purpose of developing mastery of specified knowledge and skills in one or more of the following areas: (1) Advanced Manufacturing and Design; (2) Controls; (3) Dynamics Systems;
(4) Fluids Engineering; (5) Thermal Engineering; (6) Solid Mechanics; and (7) Computational and Data-Enabled Engineering. Course plans for each study track can be found in the graduate handbook available at the MEMS Department website.

Completion of the professional master's degree requires a total of 30 didactic letter-graded course credits. At least one of the courses must be a mathematics course from the following list:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

Students may take up to 9 graduate course credits from other engineering, mathematics, or science departments with the approval of their faculty advisor. Students must maintain a minimum cumulative quality point average (QPA) of 3.0. The minimal graduate level attainment for courses is a C = 2.0 grade.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

**Mechanical Engineering - Research Track, MSME**

**Master of Science - Research Track**

The Master of Science, Research Track is designed for individuals seeking an in-depth research experience in mechanical engineering. Students will gain a deep understanding of their area of interest through an extended research project under the supervision of a major research advisor. This option is particularly appropriate for students interested in pursuing a PhD degree. Students working under the MS research track are required to pursue a thesis project and present a thesis that demonstrates marked attainment in some area of the student's major subject, as well as acquisition of the methods and techniques of scientific investigation.

During the first term in the program the student must submit a plan of study for approval by the department. This plan of study should be prepared under the guidance of the student's major advisor.

Completion of the MS degree requires at least 24 didactic letter-graded course credits and at least six credits of thesis research (ME 2999 - M. S. THESIS). At least one of the didactic courses must be a mathematics course from the following list:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

Students may take up to 9 graduate course credits from other engineering, mathematics, or physics departments with the approval of their faculty advisor. In addition, each full-time MS student is required to register for ME 2085 - GRADUATE SEMINAR during each fall and spring terms. Students must maintain a minimum cumulative quality point average (QPA) of 3.0. The minimal graduate level attainment for courses is a C = 2.0 grade.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

**Nuclear Engineering, MS**

**The Nuclear Engineering Graduate Program**

The Department of Mechanical Engineering and Materials Science offers graduate studies in nuclear engineering. Broad areas covered in the curriculum include: (1) Nuclear Energy Technology, (2) Nuclear Operations and Safety, (3) Nuclear Materials, (4) Nuclear Modeling and Simulations, and (5) Radiochemistry and Radiation Measurement.

Students have the option to complete this program 100% online.

**Degree Programs**
Master of Science Program

The degree requirements can be met by either of the two options described below. Upon entering, the student plans a program of study with the aid of a faculty advisor.

Thesis Option (Research M.S. Track)

The research MS track is primarily for those students focused on technology development. Further, full time graduate students who are supported by department scholarships must choose the research MS track. The thesis examining committee will consist of at least three members of the faculty recommended by a major advisor and approved by the MEMS Department Chair. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the Office of the Dean.

Requirements

Completion of the research MS degree in Nuclear Engineering requires at least 24 didactic course credits and at least six credits of thesis research (ME 2999 - M. S. THESIS).

The didactic courses must also include at least five of the nuclear engineering courses listed below (totaling at least 15 credits).

Students may take up to 9 graduate course credits (6 for MS/MBA students) from other engineering, mathematics, or physics departments, as approved by the Nuclear Engineering program directors. Students must maintain a minimum cumulative QPA of 3.0.

Non-Thesis Option (Professional M.S. Track)

The professional MS program is oriented toward full-time students seeking a career in industry, and part-time students currently working in industry. Full-time Grad Student Research-supported students might change to the Professional MS track, upon approval by the sponsoring faculty advisor and the graduate program.

The professional master's degree requires the completion of at least 30 course credits of graduate study approved by the Nuclear Engineering program directors, with at least a 3.00 GPA. No more than six credit hours may be granted as transfer credit for work done at another accredited graduate institution. All credits earned in the ME master's degree program must be at the graduate level (the 2000 or 3000 series courses).

Requirements:

To complete the requirement of 30 graduate credits for the Professional MS, students must complete:

At least five of the nuclear engineering courses listed below (totaling at least 15 credits)

Up to 9 graduate credits (6 for MS/MBA students) from courses offered in other engineering departments or in the mathematics or physics departments (totaling up to 9 credits) as approved by Nuclear Engineering program directors.

MS/MBA students are also required to complete an integrated project course. Please contact the Graduate Directors for a copy of the guidelines for the integrated project course.

Nuclear Engineering Graduate Courses

- NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING (NUCE/ME)
- NUCE 2101 - NUCLEAR CORE DYNAMICS
- NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL (NUCE/ME)
- NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY
- NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
- NUCE / MSE 2110 - NUCLEAR MATERIALS
- NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY

642
• NUCE 2113 - RADIATION DETECTION AND MEASUREMENT
• NUCE / MSE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS (NUCE/ME)
• NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY
• NUCE 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS
• NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
• NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
• NUCE 2130 - THE NUCLEAR FUEL CYCLE
• NUCE 2131 - METAL COOLED REACTORS
• NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY
• ME 2097 - SPECIAL STUDY MECHANICAL ENGRG (as agreed with Advisor)

Note:

Courses designated as (NUCE/ME) in above list will also be recognized for credit toward an MS or PhD in Mechanical Engineering; these courses include NUCE 2100, NUCE 2102, and NUCE/MSE 2115.

If you have questions about the curriculum, please contact either the Director or Associate/Academic Director of the Nuclear Engineering program. Currently, these posts are occupied by Dr. Heng Ban (heng.ban@pitt.edu) and Dr. Tom Congedo (tvc9@pitt.edu), respectively.

If you have questions about registration, please contact the Graduate Administrator, Tara Rankin (mems_gradadmin@pitt.edu or 412-624-9722).

Approved Math Courses

All graduate level courses offered through the Department of Mathematics will satisfy this requirement. Introductory machine learning courses also fulfill the requirement. Most applicable or commonly taken courses that fulfill the math requirement include:

• BIOENG 2001 - MATHEMATICAL METHODS IN BIOENGINEERING 1
• BIOST 2049 - APPLIED REGRESSION ANALYSIS
• CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
• ECE 2671 - OPTIMIZATION METHODS
• ECE 2521 - ANALYSIS STOCHASTIC PROCESSES
• ENGR 2300 - LINEAR ALGEBRA FOR MACHINE LEARNING
• INFSCI 2595 - MACHINE LEARNING
• ME 2001 - DIFFERENTIAL EQUATIONS
• ME 2002 - LINEAR AND COMPLEX ANALYSIS
• STAT 2220 - APPLIED REGRESSION
• STAT 2661 - LINEAR MODELS THEORY 1
• CMU 10-601 - INTRODUCTION TO MACHINE LEARNING
• CMU 10-701 - INTRODUCTION TO MACHINE LEARNING (PhD)

Approved Life Sciences Courses

• BIOSC 2090 - ADVANCED DEVELOPMENTAL BIOLOGY
• BIOSC 2100 - CELLULAR STRUCTURE AND MORPHOLOGY
• BIOSC 2105 - CELL SIGNALING
• BIOSC 2940 - MOLECULAR BIOLOGY
• BIOENG 2520 - MOLECULAR CELL BIOLOGY
• BIOENG 2585 - QUANTITATIVE CELLULAR NEUROSCIENCE
• BIOENG 2586 - QUANTITATIVE SYSTEMS NEUROSCIENCE
• BIOENG 2731 / MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN
• HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
Bioengineering students in the PhD program must complete 6 semesters of research seminar. Four of the six semesters must be BIOENG 2023 or BIOENG 2024, with one exception (see below). The other 2 credits may be from BIOENG 2023, BIOENG 2024 or any other seminar deemed appropriate by the Graduate Program Director. Commonly taken seminars to fulfill these 2 credits are listed below. Bioengineering student pursing the thesis-based (research) MS degree must complete two semesters of research seminar. This course must be BIOENG 2023. In exceptional cases, students may enroll in BIOENG 2024 but must get prior approval from the Graduate Program Director.

Seminar series commonly taken by Bioengineering graduate students include:

- BIOENG 2023 - BIOENGINEERING SEMINAR SERIES
- BIOENG 2024 - BIOENGINEERING SEM FOR PROF MS
- BIOENG 2027 - GRAND ROUNDS SEMINAR
- BIOENG 2028 - BIOENGINEERING IN PSYCHIATRY SEMINAR
- BIOENG 3760 - REGENERATIVE MEDICINE RESEARCH SEMINAR
- ECE 3893 - GRADUATE SEMINAR
- NROSCI 2106 - NEUROSCIENCE SEMINAR SERIES

Exception: One of the 4 seminars can be replaced with a preparation for a STEM academic career course, provided the student completes a minimum of "Associate Level" certification in STEM Teaching. This program is offered through the University of Pittsburgh Center for Integrating Research, Teaching, and Learning (Pitt-CIRTL). Relevant courses include:

- ENGR 3001 - PREPARATION FOR THE STEM CLASSROOM
Approved Statistics Courses

All graduate level courses offered through Statistics or Biostatistics departments at Pitt or CMU satisfy this requirement, with one notable exception (see below). Most applicable or commonly taken courses that fulfill the statistics requirement include:

- BIOENG 2525 - APPLIED BIOSTATISTICS
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- CLRES 2020 - BIOSTATISTICS
- PSY 2010 - STATISTICAL ANALYSIS 2
- STAT 2220 - APPLIED REGRESSION
- STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS

Note: CMU 36-759 (Statistical Models of the Brain) does NOT fulfill the statistics requirement.

Approved Track List

Bioimaging and Signals Track

Biomechanics Track

Medical Product Engineering (MPE) - PhD Track

Molecular, Cellular, and Systems Engineering (MCSE) Track

Neural Engineering (NE) Track

Tissue Engineering and Regenerative Medicine (TERM) Track

Biomechanics Track

This graduate track has a specific menu of courses to satisfy the 9-credit "Track Courses" requirement for the Research MS, PhD, DPT/PhD, or MD/PhD.

At the University of Pittsburgh there are broad and extensive research activities in Biomechanics. Application areas include cardiovascular, musculoskeletal, ergonomic, occupational, rehabilitation, and urological. Our educational goal is to expand on the fundamental knowledge gained at the undergraduate level of both biomechanics and the biological sciences, and demonstrate how they can be applied to solve basic and applied biomedical problems. We believe that biomechanics concentration students should be exposed to all areas of biomechanics, and not just their area of specialty. Further, since many areas of biomechanics share similar background material, our courses should present fundamental material first, followed by application examples to give the students a feel for "theory and application" in biomechanics. The fundamental philosophy of the approach is multi-scale, wherein Biomechanics is taught as a means to solve biomedical problems, regardless of problem scale (cell to whole body).

Due to the wide breadth of student interests, we offer the following two sub-tracks:

Sub-track I - Biosolid-fluid mechanics/Biological materials
Sub-track II - Biodynamics/Rehabilitation and Human Movement
Each sub-track has a set of three required courses (see below), as well as special options for a second/third life science courses that would be relevant to their area of interest.

Required courses for the biological materials and biofluids sub-track option:

1. BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS
2. BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
3. BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES

Required courses for the biodynamics/rehab sub-track option:

1. BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
2. BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
3. Choose one of the following options:
   1. BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS
   2. BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
   3. SPMED 2010 - PATHOKIN ORTHOPADC/ATHL INJURIES
   4. RT 2416 - WHEELCHAIR BIOMECHANICS
   5. SPMED 3010 - LABORATORY TECHNIQUES 1
   6. SPMED 3020 - LABORATORY TECHNIQUES 2

Life Science Requirement:

Students may satisfy their 6-credit life science course requirements for the PhD program with any of the courses from the BioE approved list of life science courses, or prior approval of courses not on the list.

Elective Requirement:

Students are required to fulfill 6 credits of elective courses for the PhD program. The list below provides recommendations categorized by areas of interest.

- **Cardiovascular:**
  BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING

- **Human Movement/Rehabilitation:**
  BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR
  BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT
  RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
  RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
  RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES
  RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

- **Tissue Engineering/Biomaterials:**
  BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY

- **Mechanical Engineering/Civil Engineering:**
  ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS
  ME 2027 - ADVANCED DYNAMICS
  ME 2045 - LINEAR CONTROL SYSTEMS
  ME 2047 -FINITE ELEMENT ANALYSIS
  ME 2062 - ORTHOPAEDIC ENGINEERING
  ME 2074 - ADVANCED FLUID MECHANICS 1
Bioimaging and Signals Track

The Bioimaging and Signals track is geared towards students with interests in any of the following areas:

1. Development and application of imaging devices;
2. Signal and image processing methods;
3. Biological/biomedical signal acquisition and analysis;
4. Computational modeling of biomedical signals and systems;
5. Biological/biomedical control systems; and/or

This track may be particularly attractive to students with undergraduate degrees in bioengineering/biomedical engineering; electrical engineering; computer science and engineering; math; and/or physics, but it is open to all bioengineering graduate students.

Students who have not had "signals and systems" and/or "linear systems" courses at the undergraduate level, similar to BIOENG 1320 or MEMS 1014 offered at Pitt, may find that they lack the prerequisites for many of the track courses. Moreover, knowledge of the fundamentals of signals and systems provided in these courses will be required to pass the Preliminary Exam in the Bioimaging and Signals Track. Accordingly, students lacking
this background are strongly encouraged to audit or take one of these three courses prior to taking the prelim exam in the late Spring of the first year. (Note that undergraduate courses do not fulfill graduate degree requirements.)

Students in the Bioimaging and Signals Track must complete 12 credits (4 different graduate level courses) in order to satisfy track requirements. At least one of these courses must be in the "bio-imaging" area, and at least one must be in the "signals and systems" area, as follows:

**Signals and systems course requirements (choose at least one):**

- BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE
- BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS
- ECE 2523 - DIGITAL SIGNAL PROCESSING
- ECE 2646 - LINEAR SYSTEM THEORY
- CMU 16-725 - (BIO)MEDICAL IMAGE ANALYSIS

**Bioimaging course requirements (choose at least one):**

- BIOENG 2330 - BIOMEDICAL IMAGING
- BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS
- BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES
- BIOENG 3195 - ADVANCED TOPICS IN BIOENGINEERING
- CMU 16-725 - (BIO)MEDICAL IMAGE ANALYSIS

The remaining two track courses may be selected from the lists above, or from the list below of the variety of bioimaging and signals courses available through Pitt and CMU that fulfill track requirements. However, the list is by no means comprehensive, and students are free and encouraged to explore course offerings from other science and engineering departments, at Pitt and CMU, including Electrical and Computer Engineering; Computer Science; Physics; and Neuroscience. Coupled with one additional open elective, the track requirements provide flexibility for students, in consultation with their research mentor, to design an appropriate curriculum of graduate study to complement their research.

**Possible courses for the 3rd and 4th required track courses:**

*Note: courses not listed here require pre-approval by the Track Coordinators in order to fulfill track requirements:*

- BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE
- BIOENG 2045 - COMPUTATIONAL CASE STUDIES IN BIOMEDICAL ENGINEERING
- BIOENG 2330 - BIOMEDICAL IMAGING
- BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS
- BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY
- BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING
- BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES
- BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING
- ECE 2372 - PATTERN RECOGNITION
ECE 2521 - ANALYSIS STOCHASTIC PROCESSES
ECE 2523 - DIGITAL SIGNAL PROCESSING
ECE 2556 - NEURO-SIGNAL MODELING AND ANALYSIS
ECE 2646 - LINEAR SYSTEM THEORY
ECE 2671 - OPTIMIZATION METHODS
ECE 3374 - APPLICATIONS OF WAVELET TRANSFORMS
ECE 3526 - MODERN SPECTRAL ESTIMATION
ECE 3650 - OPTIMAL CONTROL
CMU 8-792 - ADVANCED DIGITAL SIGNAL PROCESSING
CMU 10-601 - MACHINE LEARNING
CMU 16-725 - (BIO)MEDICAL IMAGE ANALYSIS
CMU 18-660 - NUMERICAL METHODS FOR ENGINEERING DESIGN AND OPTIMIZATION
CMU 18-790 - WAVELETS AND MULTiresOLUTION TECHNIQUES
CMU 42-631 - NEURAL DATA ANALYSIS
CMU 42-632 - NEURAL SIGNAL PROCESSING

The "core" knowledge for first-year graduate students in the Bio Imaging & Signals track consists of a fundamental understanding of circuits, signals and systems that is commonly taught in the undergraduate curriculum in electrical, mechanical, or biomedical engineering. A partial listing of relevant topics includes, but is not limited to:

- Current-voltage relationships of common electric devices, such as resistors, capacitors and inductors, and/or their mechanical analogues (springs, masses and dashpots). Characteristics and solutions of 1st- and 2nd-order circuits / constant-coefficient differential equations.
- Linear, time-invariant (LTI) systems: properties (i.e. linearity, time-invariance, stability, causality); input-output relations; impulse response; step response; transfer function; frequency response; inverse systems; feedback (closed-loop control) systems; superposition theory.
- Transforms: Fourier, Laplace.
- Discrete-time vs. continuous-time signals and systems: Sampling and aliasing, Shannon sampling theorem, Nyquist rate, Nyquist frequency; s-domain vs. z-domain representations; discrete Fourier vs. continuous Fourier.

In addition, graduate students are expected to have mastered the material covered in their first-year graduate courses.

Students should have a deeper understanding of those areas that are closely related to, or used in, their research; the more closely related to the student's research, the deeper the knowledge is expected to be. Finally, the student should have an understanding of those areas of his/her research that may fall outside of the core Track knowledge.

Molecular, Cellular, and Systems Engineering (MCSE) Track

Faculty research interests in the Molecular, Cellular and Systems Engineering track are quite broad including but not limited to fundamental understanding of cellular processes (example: cell migration, cell adhesion, cell cycle control) in physiology and pathology (example: cancer, sickle cell disease), stem cell engineering, tissue morphogenesis, vascular engineering, modeling of signal transduction and cardiac mechanics. Students in this track are expected to have core competency in either cell biology or physiology and biomedical imaging. The following curriculum enables the students in this track to meet the core competency criteria and expand their knowledge in bioengineering, computational biology and molecular regulation or deregulation of biological events in physiology and pathology. Note that in addition to the following category of courses, students in his track will need to satisfy their general requirements in math, statistics, ethics, and electives as mandated by the graduate program.
Life Science (6 credits): MCSE track students are required to take cellular and/or physiology coursework to fulfill this requirement.

- BIOENG 2520 - MOLECULAR CELL BIOLOGY
- BIOENG 2731 - MOLECULAR MECHANISMS OF TISSUE GROWTH AND DIFFERENTIATION
- MSBMS 2090 - CELL SIGNALING AND PHARMACOLOGY
- MSBMS 2110 - ORGAN SYSTEMS PHYSIOLOGY
- MSNBIO 2070 - HUMAN PHYSIOLOGY

Track Courses (9 credits):

Course #1 - Category 1: Bioimaging

- BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY
- BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES
- MSCBMP 2860 - MULTIPARAMETRIC MICROSCOPIC IMAGING
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

Course #2 - Category 2: Analytical / Engineering / Design Courses

- BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS
- BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING
- BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY
- ECE 2180 - COMPUTING AND BIOLOGY
- MSCBIO 2030/CMPBIO 2030 - INTRODUCTION TO COMPUTATIONAL STRUCTURAL BIOLOGY
- MSCMP 3780 - SYSTEMS APPROACH INFLAMMATION
- CMU 02-730 / MSCBIO 2041 / CMPBIO 2041 - CELLULAR AND SYSTEMS MODELING

Course #3 - Either one additional course from category 2 or one from the following list:

- BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING
- MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY
- MSIMM 2210 - COMPREHENSIVE IMMUNOLOGY
- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION

Tissue Engineering and Regenerative Medicine (TERM) Track

The PhD track in Tissue Engineering and Regenerative Medicine (TERM) prepares the students for a career in cutting edge research and development of cell- and biomaterial-based medical products. The MPE track introduces students to the use of cells, materials, biochemical and biomechanical factors in the development of functional substitutes that restore, maintain, or improve tissue or organ function. The students can expect to apply engineering principles to a diverse range of medical fields with the goal of solving critical clinical challenges.

Engineering Track Course - one of your required track courses must be taken from one of the courses below:

- BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
- BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING
- CMU 42-624 - BIOLOGICAL TRANSPORT AND DRUG DELIVERY

TERM track courses:

- BIOENG 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE
Neural Engineering (NE) Track

Neural Engineering is an exciting new field, which applies engineering techniques to understand, repair, replace, enhance, or otherwise exploit the properties of neural systems. The neural engineering track is designed to prepare the students for the fundamental understanding of both neuroscience and engineering principles.

This graduate track has a specific menu of courses to satisfy the "Life Science" and "Track Courses" requirement for the PhD.

**Life Science Requirements:** neural track students are required to take one cellular level and one systems level neuroscience course to fulfill their life science requirement.

For molecular neuroscience, choose between 1) BIOENG 2585 (Quantitative Cellular Science 3 credits); and 2) NROSCI 2100 and NROSCI 2101 (Cellular and Molecular Neurobiology I and II, 8 credits); both are offered in the fall.

For systems neuroscience, choose between 1) BIOENG 2586 (Quantitative Systems Neuroscience, 3 credits) and 2) NROSCI 2102 (Systems Neurobiology, 6 credits); both are offered in the spring.

There are four different combinations of possibilities:

- BIOENG 2585 and BIOENG 2586, equaling 6 credits
- BIOENG 2585 and NROSCI 2102, equaling 9 credits
- NROSCI 2100, NROSCI 2101 and BIOENG 2586, equaling 11 credits
- NROSCI 2100, NROSCI 2101 and NROSCI 2102, equaling 14 credits

These courses are typically taken during the first year. Students without a biology background will need to take foundational biology courses (e.g., BIOENG 2520) before taking any of the cellular and systems neuroscience courses. Students who have taken graduate-level equivalent neuroscience courses can petition to take other more advanced life science courses.

**Track Courses Requirement:** please select at least three track courses from the following courses:

- BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING
- BIOENG 2615 - INTRODUCTION TO NEURAL ENGINEERING
Elective Courses Requirement: a minimum of 6 credits are required in this category. By taking the track-specific life science courses, (total of 14, or 11 or 9 credits, depending on which option you take) the students in this track would satisfy the 6 life science credits with extra credits that can be counted as elective credits. Any additional graduate level courses approved by the advisor can be considered as electives.

Center for Neural Basis of Cognition (http://www.cnbc.cmu.edu/): the majority of NE track students are members of CNBC and participate in the CNBC graduate training program (http://www.cnbc.cmu.edu/training/). All three of the CNBC core courses can be considered track or elective courses. If you are in CNBC, you must satisfy both BIOENG and CNBC requirements before graduation.

For more information, please contact the Track Coordinator.

**Medical Product Engineering (MPE) - PhD Track**

The PhD track in Medical Product Engineering (MPE) emphasizes preparation for an industrial or academic career in medical product research and development. The MPE track introduces students to principles of engineering innovation targeted to the identification of and the solution to important challenges and unmet clinical needs in health care technology and delivery. The program of study emphasizes education in medical product design and development, the development of advanced engineering skills, and knowledge of cellular and systems level physiology pertinent to the healthcare field in which the student is doing research.

**Life Science Requirements (6 credits)**

MPE track students are required to take one cellular level physiology course and one systems level physiology course to satisfy their Life Science Requirement. These courses should be chosen based on a student's interest and upon prior approval from the track coordinator.

**Track Courses Requirement (9 credits)**

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

The third track course elective must be selected from the following list based on the student's interest and research:

- BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
- BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
- BIOENG 2230 - CARDIO ORGAN REPLACEMENT
- BIOENG 2330 - BIOMEDICAL IMAGING
- BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING
- BIOENG 3780 - HUMAN FACTORS OF AGING
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES I
- ECE 2523 - DIGITAL SIGNAL PROCESSING
Electives (6 credits)

The elective requirement is met through two, not previously taken, courses that ideally align with the student's interests. A list of our popular and highly recommended courses is provided here:

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2170 - CLINICAL BIOENGINEERING
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING
- BIOENG 2230 - CARDIO ORGAN REPLACEMENT
- BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY
- BSEO 2531 - ENTREP & NEW VENTURE INITIATION
- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
- ECE 2646 - LINEAR SYSTEM THEORY
- ENGR 2051 - PRODUCT REALIZATION
- ME 2045 - LINEAR CONTROL SYSTEMS
- IE 2003 - ENGINEERING MANAGEMENT
- IE 2006 - INTRO TO MANUFACTURING SYSTEMS
- IE 2012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS
- IE 2076 - TOTAL QUALITY MANAGEMENT
- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES
- RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

School of Engineering Faculty

- MAI ABDELHAKIM, Assistant Professor, Electrical and Computer Engineering, PhD, Michigan State University
- STEVEN D. ABRAMOWITCH, Professor and William Kepler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh
- MURAT AKCAKAYA, Assistant Professor, Electrical and Computer Engineering, PhD, Washington University
- DAVID ANDERSON, Assistant Professor, Electrical and Computer Engineering, PhD, University of Rochester
- HESSAM BABAEE, Associate Professor, Mechanical Engineering and Materials Science, PhD, Louisiana State University
- ANNA C. BALAZS, Distinguished Professor and John A. Swanson Chair, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology
- HSEEN BALED, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh
- HENG BAN, R.K. Mellon Professor in Energy, Mechanical Engineering and Materials Science, PhD, University of Kentucky
- IPSITA BANERJEE, Professor, Chemical and Petroleum Engineering, PhD, Rutgers University
- MASOUD BARATI, Assistant Professor, Electrical and Computer Engineering, PhD, Illinois Institute of Technology
- MATTHEW BARRY, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh
- AARON P. BATISTA, Associate Professor, Bioengineering, PhD, California Institute of Technology
- CARLA APARECIDA BAUMEL, Associate Professor, Civil and Environmental Engineering, PhD, Northwestern University
- TARYN BAYLES, Vice Chair for Education and Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh
- ERIC J. BECKMAN, George M. and Eva M. Bevier Chair Professor, Chemical and Petroleum Engineering, PhD, University of Massachusetts
- MOSTAFA BEDEWY, Associate Professor, Industrial Engineering, PhD, University of Michigan
- KURT E. BESHORNER, Associate Professor, Bioengineering, PhD, University of Pittsburgh
- MARY BESTERFIELD-SACRE, Senior Associate Dean for Academic Affairs and Nickolas A. DeCecco Professor, Industrial Engineering, PhD, University of Pittsburgh
- BOPAYA BIDANDA, Chair and Ernest E. Roth Professor, Industrial Engineering, PhD, Pennsylvania State University
- HODA BIDKHORI, Assistant Professor, Industrial Engineering, PhD, Massachusetts Institute of Technology
- MELISSA M. BILEC, Professor and Roberta Luxbacher Faculty Fellow, Civil and Environmental Engineering, PhD, University of Pittsburgh
• HARVEY S. BOROVETZ, Distinguished Professor, Bioengineering, PhD, Carnegie Mellon University
• IONNIS BOURMPAKIS, Assistant Professor and Bicentennial Faculty Fellow, Chemical and Petroleum Engineering, PhD, University of Crete
• BRYAN N. BROWN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh
• DANIEL D. BUDNY, Associate Professor, Civil and Environmental Engineering; Director, Freshman Engineering Program, PhD, Michigan State University
• ANDREW P. BUNGER, Associate Professor and R.K. Mellon Faculty Fellow, Civil and Environmental Engineering, Chemical and Petroleum Engineering, PhD, University of Minnesota
• KAREN BURSIC, Professor and Undergraduate Program Director, Industrial Engineering, PhD, University of Pittsburgh
• LEONARD W. CASSON, Associate Professor, Civil and Environmental Engineering, PhD, University of Texas at Austin
• RAKIE CHAM, Professor, Bioengineering, PhD, University of Pittsburgh
• JUN CHEN, Assistant Professor, Electrical and Computer Engineering, PhD, Chinese Academy of Sciences
• APRIL CHAMBERS, Assistant Professor, Bioengineering, PhD, University of Pittsburgh
• KEVIN P. CHEN, Paul E. Lego Professor, Electrical and Computer Engineering, PhD, University of Toronto
• MARKUS CHMIELUS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Technical University, Berlin, Germany
• SUNG KWON CHO, Professor, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea
• YOUNGJAE CHUN, Professor, Industrial Engineering, PhD, University of California, Los Angeles
• MINKING CHYU, Associate Dean for International Initiatives; Leighton E. and Mary N. Orr Chair Professor, Mechanical Engineering and Materials Science, PhD, University of Minnesota
• RENEE CLARK, Associate Professor, Industrial Engineering, PhD, University of Pittsburgh
• WILLIAM W. CLARK, Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University
• DANIEL G. COLE, Associate Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University
• XINYAN CUI, William Kepler Whiteford Professor, Bioengineering, PhD, University of Michigan
• AHMED DALLAL, Associate Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh
• MONI KANCHAN DATTA, Assistant Professor, Bioengineering, PhD, Indian Institute of Technology, India
• LANCE A. DAVIDSON, Professor and Wellington C. Carl Faculty Fellow, Bioengineering, PhD, University of California at Berkeley
• RICHARD E. DEBSKI, Professor and William Kepler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh
• SAMUEL J. DICKERSON, Associate Professor and Director, Electrical and Computer Engineering, PhD, University of Pittsburgh
• AMRO EL-JAROUDI, Associate Professor and Director, Electrical and Computer Engineering, PhD, Northeastern University
• MAHMOUD EL NOKALI, Associate Professor, Electrical and Computer Engineering, PhD, McGill University
• ROBERT M. ENICK, Bayer Professor and Vice Chair for Research, Chemical and Petroleum Engineering, PhD, University of Pittsburgh
• WILLIAM FEDERSPIEL, William Kepler Whiteford Professor, Graduate Coordinator, Bioengineering, PhD, University of Rochester
• SUSAN FULLERTON, Assistant Professor, Chemical and Petroleum Engineering, PhD, The Pennsylvania State University
• GIOVANNI P. GALDI, Leighton E. and Mary N. Orr Professor, Mechanical Engineering and Materials Science, PhD, University of Naples, Italy
• NEERAJ J. GANDHI, Professor, Bioengineering, PhD, University of California, San Francisco
• JIN GAO, Assistant Professor, Bioengineering, PhD, Chinese Academy of Sciences
• WEI GAO, Associate Professor, Electrical and Computer Engineering, PhD, Pennsylvania State University
• CALIXTO I. GARCIA, Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh
• MARK J. GARTNER, Professor of Practice, Bioengineering, PhD, Carnegie Mellon University
• ALAN D. GEORGE, Ruth E. and Howard T. Mickle Professor and Chair of Electrical and Computer Engineering, PhD, Florida State University
• LEANNE GILBERTSON, Associate Professor, Civil and Environmental Engineering, PhD, Yale University
• PEYMAN GIVI, Distinguished Professor and James T. MacLeod Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University
• BRIAN M. GLEESON, Chair and Harry S. Tack Professor, Mechanical Engineering and Materials Science PhD, University of California at Los Angeles
• ANDRES GOMEZ ESCOBAR, Assistant Professor, Industrial Engineering, PhD, University of California, Berkeley
• BRANDON GRAINGER, Associate Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh
• SARAH HAIG, Assistant Professor, Civil and Environmental Engineering, PhD, University of Glasgow
• JULIE M. VANDENBOSSCHE, Associate Professor, Civil and Environmental Engineering, PhD, University of Minnesota
• SACHIN S. VELANKAR, Associate Professor, Chemical and Petroleum Engineering, PhD, University of Delaware
• OLEG VELIKOKHATNYI, Assistant Professor, Bioengineering, PhD, Institute of Strength Physics and Materials Science of Russian Academy of Sciences
• GÖTZ VESER, Nickolas A. DeCecco Professor, Chemical and Petroleum Engineering, PhD, Fritz-Haber-Institute of the Max-Planck-Society
• NATASA VIDIC, Associate Professor, Industrial Engineering, PhD, University of Pittsburgh
• RADISAV D. VIDIC, Chair William Keppler Whiteford Professor, Civil and Environmental Engineering, PhD, University of Cincinnati
• JEFFREY S. VIPPERMAN, Professor and Vice Chair, Mechanical Engineering and Materials Science, PhD, Duke University
• DAVID VORP, Associate Dean for Research, and John A. Swanson Professor, Bioengineering, PhD, University of Pittsburgh
• GUOFENG WANG, Associate Professor, Mechanical Engineering and Materials Science, PhD, California Institute of Technology
• QING-MING WANG, Professor and ME Graduate Director, Mechanical Engineering and Materials Science, PhD, Pennsylvania State University
• DOUGLAS WEBER, Associate Professor, Bioengineering, PhD, Arizona State University
• JUSTIN WEINBAUM, Assistant Professor, Bioengineering, PhD, Washington University in St. Louis
• JOHN WHITEFOOT, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Michigan-Ann Arbor
• JÖRG M. WIEZOREK, Professor, Mechanical Engineering and Materials Science, PhD, University of Cambridge
• CHRISTOPHER E. WILMER, Assistant Professor, Chemical and Petroleum Engineering, PhD, Northwestern University
• SYLVANUS N. WOSU, Associate Dean for Diversity Affairs; Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Oklahoma
• FENG XIONG, Associate Professor, Electrical and Computer Engineering, PhD, University of Illinois at Urbana-Champaign
• WEI XIONG, Associate Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology
• JUDITH C. YANG, William Keppler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Cornell University
• JUN YANG, William Keppler Whiteford Professor, Electrical and Computer Engineering, PhD, University of Arizona
• VICTOR YASHIN, Assistant Professor, Chemical and Petroleum Engineering, PhD, Moscow State University
• BO ZENG, Assistant Professor, Industrial Engineering, PhD, Purdue University
• MIN HEE YUN, Associate Professor, Electrical and Computer Engineering, PhD, Arizona State University
• XIAYUN ZHAO, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Georgia Institute of Technology
• LIANG ZHAN, Associate Professor, Electrical and Computer Engineering, PhD, University of California, Los Angeles
School of Health and Rehabilitation Sciences

Established in 1969 as a health sciences school of the University of Pittsburgh, SHRS stands on its solid reputation as an international leader in rehabilitation and disabilities education, research, and community service, improving the lives and independence of all people with a focus on people at risk for or having chronic conditions or disabilities and those who have traditionally been underserved and underrepresented.

Our Vision

To be a catalyst for a world free of barriers and disparities that allows all people, regardless of health, to have opportunities to participate in life to the fullest; to be accomplished through education, research and service.

Our Mission

To advance health, rehabilitation and reintegration service delivery through teaching, research and professional service.

We advance our Mission and pursue our Vision by:

- Providing an unparalleled environment for education and training
- Supporting an inter-professional approach to research to address challenges of people with acute and chronic conditions and disabilities
- Collaborating with local, national and international partners to address and improve integration of rehabilitation services in health care delivery systems, community engagement and models of care

Our Values

- **Advocacy** - for those less fortunate or with limited access seeking greater independence
- **Excellence** - in all endeavors and facets of our work
- **Inclusion** - in student enrollment and faculty and staff composition with a major focus on inclusion of people with disabilities
- **Innovation** - in teaching and educational curricula, research, technology, and product development
- **Integrity** - through uncompromising adherence to ethical principles, truthfulness, dignity and respect in all that we do
- **Service** - to all, including the disabilities community, in regard to rehabilitation and health services with a commitment to social responsibility

Philosophy of Graduate Education

The faculty of the School of Health and Rehabilitation Sciences (SHRS) believes that it has a major responsibility in graduate education to broaden the perspectives and awareness of students in the health professions toward high standards of scholarship and recognition of its relevance to technological and human needs.

Graduate programs provide depth in a substantial area of the student's profession and foster critical thinking through a variety of scholarly and creative activities thereby generating an atmosphere of scientific inquiry. These substantive areas include the knowledge of the scientific basis for the development of advanced clinical expertise within the professions represented in the School. An equally important function is to encourage health professionals to be sensitive to the needs of the human beings they are serving and to adapt their methods to the changing social, economic and technological environments in which they practice. Accordingly, these professionals should develop the capability to perform newly emerging and expanding roles of advanced clinical services, research, teaching and administration in the health care systems, advancing the frontiers of their particular field of expertise.

On the assumption that the accumulation and mastery of basic factual knowledge have been accomplished, graduate education focuses on synthesis and integration to allow for new systemic insights into the application and extension of that knowledge. The linkage of various educational experiences with research projects enhances problem-solving skills. Through interdisciplinary and multi-disciplinary didactic, clinical and research experiences, individual professional identity is fostered, while the ability to function both on an independent and collaborative level with colleagues from other disciplines is enhanced.

Programs and Certificates

Accelerated Programs

- Athletic Training, Accelerated BS-MS
- Dietitian Nutritionist, Accelerated BS-MS

Master's Programs

- Athletic Training (MS)
- Clinical Mental Health Counseling (MS)
- Health Informatics (MS)
- Master of Rehabilitation Technology (MRT)
- Musculoskeletal Physical Therapy (MS)
- Neuromuscular Physical Therapy (MS)
- Nutrition and Dietetics (MS)
- Occupational Therapy (MS)
- Physician Assistant Studies (MS)
- Physician Assistant Studies Hybrid (MS)
- Prosthetics & Orthotics (MS)
- Speech-Language Pathology (MA/MS)
- Sports Medicine (MS)
- Sports Science (MS)

Doctoral Programs

- Doctor of Audiology (AuD)
- Doctor of Clinical Science in Speech-Language Pathology (CScD)
- Doctor of Clinical Science in Occupational Therapy (CScD)
- Doctor of Occupational Therapy (OTD)
- Doctor of Physical Therapy (DPT)
- Doctor of Physical Therapy (DPT)/Doctor of Philosophy in Bioengineering (PhD)
- Doctor of Physician Assistant Studies (DPAS)
- Communication Science and Disorders (PhD)
- Rehabilitation Science (PhD)

Certificate Programs
• Advanced Practice Certificate in Implementation of Evidence in Clinical Practice
• Health Data Analytics
• Health Information Cybersecurity
• Leadership in Health Informatics
• Revenue Cycle Management

Admission

SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Each program at SHRS has specific admission requirements. Please visit the SHRS Program and Course Offerings section of this catalog for detailed information.

Application Procedures

Application portals vary by program. Please visit the SHRS Program and Course Offerings section of this catalog for detailed information.

Admission Status

**Full Status:** The student has been admitted into a SHRS degree program. To maintain full graduate status, the student must achieve a minimum cumulative GPA of 3.000 (based on 4.000) in his/her graduate study. Students whose cumulative GPA drops below a 3.000 while in the program will be placed on academic probation (please see the Academic Probation policy in this catalog).

Students enrolled in accelerated programs must maintain a 3.000 minimum GPA to progress from the undergraduate to graduate portion of their program.

**Conditional Status:** Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted conditional admission at the discretion of the Program Director provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.

**Non-Degree Status:** Applicants who do not wish to enroll in a degree program may apply for admission as non-degree students to take one or more courses of particular interest if written permission is obtained from the course instructor. Non-degree students are permitted to take a total of six (6) credits. A non-degree student wishing to register for more than 6 credits must receive approval from the Department Chair/Program Director. Information concerning such requests should be directed first to the Director of Admissions, 4044 Forbes Tower, University of Pittsburgh, Pittsburgh, PA 15260 or via email at admissions@shrs.pitt.edu.

Deferral of Admission

Requests to defer admission must be submitted by the student, in writing, BEFORE the start of the first term of admission. If approved, the student must pay the tuition deposit (if required) which will be held by Student Financials and applied to their account, if enrolled. If they do not enroll, the deposit is forfeited.

Request for Readmission

In each of the circumstances below, the student will be discontinued from PeopleSoft and must initiate readmission to rejoin the program by contacting their program director. If the program director approves the request for readmission, they must complete the New Readmission Form, found on the SHRS Student Life website, in the Forms tab, and send to SHRS Admissions for processing.

- If a student begins their 1st term and then drops all courses BEFORE the add/drop deadline.
- If a student begins their 1st term and then requests to withdraw from all classes AFTER the add/drop deadline and before 60% of the term has passed, the student would need to go through the Student Appeals office Tuition Adjustments | Student Payment Center and their tuition will be prorated based on the last day of attendance.
In extenuating circumstances, at the discretion of the Department Chair and the Associate Dean, a student could request a late drop of the enrollment after the add/drop deadline which would remove the courses from their transcript and their bill.

Financial Information

Tuition and Fee Rates

Tuition and fee rates are available on the Financial Information page in the University Catalog and the tuition chart is on-line at Tuition Rates - Pennsylvania Residents, Tuition Rates - Out-of-State Residents.

Full Tuition

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students and are assessed the current graduate "flat" tuition rate for their academic center. Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

Summer Term

All students are billed on a per-credit basis. (except for the Doctor of Physical Therapy program)

Residency/Reduced Tuition

Students who reside in the Commonwealth of Pennsylvania may be eligible for reduced tuition through state appropriations.

Eligibility is determined by criteria outlined in the University of Pittsburgh Guidelines for Determining Eligibility for Reduced Tuition Rates, available on-line at http://payments.pitt.edu/pa-tuition-rate-eligibility.

Additional Fees

Lab Fees: Lab courses may incur an additional fee to cover laboratory expenses. These fees will be charged to the student directly and will appear on the invoice generated by Student Accounts in addition to tuition and other fees each semester.

Financial Obligation of Students

The University of Pittsburgh has the right to withhold services if a student defaults on any financial obligation until repayment arrangements have been made that are satisfactory to the office or department to which the debt is owed.

Scholarships, Grants and Financial Aid

If you are interested in applying for loans, scholarships, grants, or work study, you should call, or visit the University of Pittsburgh, Office of Admissions and Financial Aid, Alumni Hall, Pittsburgh, PA 15260, 412-624-PITT. The website for information is https://oafa.pitt.edu/

The website specifically for graduate students is: Graduate School Financial Aid Instructions.

SHRS Scholarships and Awards

General information on scholarship and awards can be found at: SHRS Financial Information Page. Information on merit, individual department and school wide scholarship and awards can be found at: Schoolwide Scholarships.

Contact individual departments for information on scholarships and awards specific to your area of study.
SHRS Academic Regulations

Minimum Academic Standard

In addition to the University-wide regulations and standards detailed in the section on General Academic Regulations, each student in SHRS is expected to be familiar with these school-specific regulations and academic standards:

- It is the student's responsibility to review her/his academic standing, to identify graduate program requirements and prerequisites for intended graduate program(s) and to monitor their completion.

- All required and prerequisite coursework must be taken for a grade, when letter grade option is available, unless approved by the Department Chair/Program Director.

- Students must receive a grade of C or better in all courses required by their program curriculum.

- Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser/faculty. If authorization to repeat the course is not given, the student may face dismissal from the program.)

- Students will not be permitted to register for a course until they attain a C or better in its prerequisites.

- Failure to receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

Allowable Credits

Transfer Credits

The completion of requirements for advanced degrees must be satisfied through registration at the Oakland Campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their Department Chair and the Dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components are responsible for providing any financial assistance to the graduate student.

Transcripts certifying graduate courses completed at another institution prior to admission to the University of Pittsburgh should be submitted at the time of application and will be evaluated for acceptability as transfer credits early in the student's graduate career by the advisor and Department Chair.

For Master of Arts and Master of Science degrees, no more than six (6) credits may be transferred. The Office of Student Services will enter the transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

For Professional Master no more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another accredited graduate institution.

For Doctor of Philosophy up to 30 credits taken at the graduate level (2000 & 3000 level courses) toward a master's degree may be transferred. In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No Undergraduate credits (1000 level course) may be applied towards the doctoral degree. All transfer credits must be submitted to and approved by the Associate Dean of Graduate Studies. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.
Transfer credits will not be accepted for courses in which a grade lower than B (GPA = 3.000), or its equivalent, has been received. No credit is granted toward an advanced degree for work completed in extension courses, correspondence courses, or in the off-campus center or another institution unless those credits are approved for the equivalent graduate degrees at the institution, and provided that the institution has an accredited program.

Advising

Master and Clinical Doctorates

Master's students are assigned an advisor who must be a member of the SHRS faculty holding a regular, research, clinical, or adjunct appointment, and having at least a master's degree. The director of the program to which the student has been accepted selects advisors for SHRS graduate students. Students are notified of their advisor after their enrollment. It is the student's responsibility to contact the advisor to schedule an initial meeting.

Doctor of Philosophy

PhD students are assigned an academic advisor in the student's main area of specialization. The academic advisor and student will plan course work and other experiences to enable the student to meet program requirements and her/his academic goals.

Change of Advisor

If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a Change of Advisor form, located on the SHRS website under forms. The student must complete the form and secure the required signatures and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate change of advisor procedures.

More information on Advisor roles and responsibilities can be found in the SHRS Graduate Handbook.

Plan of Study

Every student in SHRS must have a Plan of Study, signed by academic/faculty advisor. Any revisions to the Plan of Study must be approved by the academic/faculty advisor or Department Chair.

To be certified for graduation, students must have successfully completed all courses outlined in their final Plan of Study as well as any other requirements for the degree. A final Plan of Study will be submitted to Student Services, by the department administrator in the graduating term.

Internships

Internships

Overview: An internship is a period of supervised, planned, practical experience providing an opportunity to apply previously learned skills or theories designed to complement the didactic phase of the academic program. The internship may be primarily clinical, teaching, or administrative in nature. Many programs require internship experiences, coordinated by the student's advisor or an identified Clinical Coordinator, who provides oversight regarding internship objectives and activities, administrative and contractual relationships with the site, and ensures that students meet all SHRS and site criteria.

Clinical Internships

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply his/her knowledge in a supervised environment to develop clinical skills and judgment.
Clinical Education

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply his/her knowledge in a supervised environment to develop clinical skills and judgment.

Independent Study - HRS 2999 or CSD 2990

Independent Study provides an opportunity for the student to complete an intense, self-designed project with faculty supervision in an area of special interest. A maximum of six (6) independent study credits may be accepted toward meeting degree requirements for the program.

More information on Internships, Clinical Education, Independent Studies can be found in the SHRS Graduate Handbook.

Thesis and Non-Thesis Options and Procedures

Thesis Option

A thesis is a written report of an investigative study conducted by the student during his/her graduate program. The completion of a thesis requires that the student has the necessary knowledge and skills to conduct a valid study and that the thesis project is the investigation of a research question appropriate to his or her focus of study. The thesis is usually a concluding experience in Master of Science programs and completed under the guidance of a research mentor.

Completion of a thesis may be required for specific graduate programs within SHRS. Students should refer to the specific program requirements to determine if a thesis is required for completion of his/her program. Thesis credits can be obtained in the following courses: HRS 2924, HRS 2925, and CSD 2000. Students should refer to his/her program requirements for specific guidelines for completing the thesis, the minimum number of thesis credits required, and for required courses.

Non-Thesis Option

Many SHRS graduate programs provide a non-thesis option as an alternative to completing a thesis. The non-thesis option is program-specific and reflects the culminating assignment to demonstrate the student's mastery of his/her area of study. Some programs require the student to complete the non-thesis option while others may give the student the opportunity to choose between completing a thesis or the non-thesis option. Students should refer to their home program/department for specific information on the non-thesis option.

Scholarly Paper

As part of the non-thesis option for a Master of Science degree, some programs/departments may require a scholarly paper. A scholarly paper is of publishable quality in a focused area.

Examples of scholarly papers include but are not limited to: substantial reviews of the literature on a particular topic, development of health care policies, or development of evidence-based treatment procedures. Students who complete this option must register for HRS 2926 Scholarly Paper for 1-6 credits depending on the requirements of his/her plan of study.

More information on Thesis and Non-Thesis options and Scholarly Paper can be found in the SHRS Graduate Handbook.

Comprehensive Examination
Comprehensive Examinations are required for many graduate programs in SHRS. Successful completion of the Comprehensive Examination is needed for the student to demonstrate mastery of his/her field of graduate study. Each individual department/program will specify the content and procedure for the scheduling, administration, and grading of the Comprehensive Examination. Please refer to individual program descriptions or handbooks for details of Comprehensive Examinations for each program.

**Enrollment Status**

Graduate students cannot enroll for more than (15) units without the dean's approval. Only an advisor or the University Registrar's Office can enroll you after you receive approval for the additional unit(s). Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students. Students cannot enroll in courses that meet at the same time.

**Active Status**

Graduate students are required to register for at least 1 credit in the fall and spring terms. PhD students who have completed their course work and have successfully passed their dissertation proposal, must be enrolled in dissertation credits or FTDI (Full time Dissertation Study) in the fall and spring terms to maintain active status.

**Inactive Status**

A student who has not registered for at least 1 credit or for full-time dissertation study during a 12-month period will be transferred automatically to inactive status. Inactive students cannot apply to graduate or take Preliminary or Comprehensive Examinations. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her advisor and committee.

More information on enrolling in courses can be found in the SHRS Graduate Handbook.

**Monitored Withdrawal**

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring.

Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

The form must be signed by the instructor of the course and be returned to the Director of Student Services, Registrar, within the first nine weeks of the term in the fall and spring.

**Late Withdrawal Procedure**

**Procedure for an Appeal for Late Withdrawal**

- After the Monitored Withdrawal deadline has passed, students may appeal to withdraw from a course by submitting an Appeal for Late Withdrawal. Form can be found on the SHRS website, under current students/forms.
- All appeals for late withdrawal must be for non-academic reasons, i.e. medical or family emergencies. If you are trying to withdraw without extenuating circumstances, your appeal will be denied.
- Appeals must be submitted to the Dean's Office of the school offering the course, regardless of the student's home school.

**Appeals for Late Withdrawal from SHRS courses should be submitted to the Registrar, Kellie Beach**

- The appeal requires information on the class, including class number, catalog/course number, subject, and course title. This information can be found in your Student Center/PeopleSoft.
• The signature of the instructor-or an email from the instructor indicating the date of last attendance, grade earned, and acknowledgment of your withdrawal-is required. You must print and attach copies of the emails.
• Attach a typed statement explaining the extenuating circumstances which you feel merit consideration of withdrawal beyond the deadline. Please provide relevant documentation, such as certification from a doctor, hospital receipts, an obituary, etc.
• Please address the documentation and the letter to SHRS, Associate Dean for Graduate Studies, Dr. Michael Dickey.
• Please include your PeopleSoft ID and your University of Pittsburgh e-mail address on each submitted document.
• Please sign and date each document.
• You will be notified of the Associate Dean's decision via your student email account.
• Appeals for late withdrawal must be submitted before the end of the 13th week of the semester. After the 13th week, students can only appeal to withdraw from the entire semester.
• If your request is approved and you accept the grade of "W" there is no tuition adjustment for withdrawing from the course.

Repetition of Courses

Consult your dean's office for the proper procedure of repeating a class and for information on how this will affect your grades and the calculation of your Grade Point Average (GPA). When you repeat a class, you must officially enroll and pay for the class again. University policy prohibits any student from attending a class without being officially enrolled for that class. A repeated course has a notation appearing underneath the previous course taken designating that it is excluded from the GPA. The original course and grade will always remain on your record/transcript.

Graduate Students are only permitted to repeat a course once.

• Note: Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.
• A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
• A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
• The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
• The grade earned by repeating a course is used instead of the grade originally earned. Withdrawal (W), Repeat (R), and Audit/Non-Credit (N) grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA.
• Incomplete grades (G and I) are not identified as repeated courses until the coursework is completed.
• Students seeking to repeat other non-SHRS (prerequisites, electives, etc.) courses will be permitted to do so at the discretion of the program director.

Statute of Limitations on Allowable Coursework

Masters

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all professional masters within five years (includes both full time and part time students). Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

PHD/Doctoral

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years or within eight years if the student has received transfer credits. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full-time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Extension

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the Associate Dean of Graduate Studies for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension.
Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may process a withdrawal from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Please visit the Student Payment center resignation page on the University of Pittsburgh website for more information.

Leave of Absence

Under special conditions, a leave of absence is available for students who are enrolled in the second term or later of their program.

- To request a LOA, the student, along with their advisor, must complete the SHRS Request for Leave of Absence - Graduate Program form, which can be found on the SHRS Student Life website, in the Forms tab. This form must be submitted it to Student Services for approval.
- The length and rationale for the leave of absence must be approved by the Associate Dean. If approved, the time of the leave shall not count against the total time allowed for the degree (statute of Limitations) being sought by the student.
- If a student requests a leave for up to 1 year, and they are auto discontinued from PeopleSoft due to 3 consecutive terms of no enrollment, they will automatically be readmitted by the Admissions office to return.
- If the reason for the leave is medical in nature, a formal note from a Doctor must be included with the request. Reinstatement is not guaranteed. Students who have been dismissed from SHRS for academic reasons or who have not enrolled at SHRS for three consecutive terms must request reinstatement by contacting their program director.

Grading Policy

All SHRS graduate programs adhere to the University's grading system and grading policies for graduate students. Please refer to the Office of the University Registrar on Grades or the University Catalog on Grading and Records

SHRS Policy and Procedure for G and I Grades

SHRS (G) Grade Policy

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken.

Once the deadline has passed, the G grade will be changed automatically to a (NG) - No Grade. The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Action required by the student and faculty member for a "G" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of G Grade Credits Form (the form and the SHRS G grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.
SHRS (I) Incomplete Grade Policy

The I grade indicates that the work of the course for which it is awarded has not been completed due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars. It is to be awarded only to students who have been doing the regular work of the course but who need more time than the term allows to complete the course work. That is, if extenuating circumstances ought to arise from the nature of the course work rather than from the student's personal difficulties (in which case a G grade is appropriate; see above).

All incomplete grades are expected to be completed by no later than the end of the next consecutive semester. It is the responsibility of the faculty member to clearly state to the student the expected due date.

- If the incomplete grade is given in the spring, it is expected to be completed by the end of the summer term in August.

Action required by the student and faculty member for a "I" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of Incomplete Credits Form (the form and the SHRS I grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.
- Failure to submit the paperwork and/or complete the work by the set forth deadlines, will lead to the grade being changed to a NC (no Credit) grade.

Student Services will be following up on any Incomplete grades that are not changed within the expected time frame at the end of every term.

Satisfactory/No Credit (S/NC) grading option

- Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a B or better.
- More information on Grading Policies can be found in the SHRS Graduate Handbook.

Academic Probation and Dismissal Policy

- Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and/or suspension and will receive written notification of this status. At this point it is the student's responsibility to meet with his or her advisor.
- To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to recommendation for immediate dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Graduate Studies.
- Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or recommended for dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Graduate Studies. SHRS reserves the right to terminate a student at any time for academic or other reasons.
- Dismissal from the program is at the discretion of the SHRS Dean. Notwithstanding the foregoing, in the event it is not mathematically possible for a student to remediate their cumulative program GPA within their next two terms of study the student may be immediately dismissed.
- A student may appeal their dismissal with the University of Pittsburgh Provost office.

Graduation Requirements

Graduation Requirements for a Graduate degree from SHRS are as follows:

- Student must be considered an "active student" at time of graduation; s/he must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions
- Students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating
- Satisfactory completion of required credits
• Minimum cumulative GPA 3.000
• GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
• Completion of all requirements for the program in which student has enrolled
• No outstanding D, F, G or I grade in a required course
• Updated and approved Plan of Study on file in Student Services.
• An application for graduation must be filed in the SHRS Office of Student Services, based on the deadlines determined for that term. Email notification of these deadlines will be sent to students in the prior term.
• A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Credits Required

The number of credits required for the Master's degree varies among the departments within SHRS, but all departments require at least 30 credits. Many departments offer a variety of emphases. Individual departments should be contacted for the number of credits and Plan of Study specific to that department and focus.

SHRS Student Organizations

The SHRS Graduate and Professional Student Organization (SHRS GPSO) is a member of the Graduate and Professional Student Government (GPSG) of the University of Pittsburgh. All full- time and part-time graduate students of SHRS who have active status, as defined by the School, and who are in good standing, as defined by the University, are members of the SHRS GPSG. Further information on becoming active in this organization can be obtained by sending an email to: shrssab@shrs.pitt.edu.

Ombudsperson

The Ombudsperson assists students with resolving conflicts and issues that arise in the course of their education and training that they believe have not or cannot be addressed within their academic department. The Ombudsperson can help mediate conflicts and provides information about institutional policies related to the student's issues, including the University's grievance procedures. The Ombudsperson directs students to further resources on campus as appropriate. The Ombudsperson in the School of Health and Rehabilitation Sciences (SHRS) will be a neutral contact person (Non-faculty) for students with whom they can engage in informal discussions.

The Ombudsperson for SHRS is Kellie Beach, Director of Student Services, and Registrar. She can be reached at kbeach@pitt.edu to make an appointment. More information on the role of an Ombudsperson for SHRS can be found on the SHRS website under the Orientation page.

SHRS Programs and Course Offerings

Department of Communication Science and Disorders (CSD)

Master of Arts and Master of Science Degrees in Communication Science and Disorders
The Communication Science and Disorders program provides students with a specialized academic education in communication processes and disorders, including disorders of speech, language, swallowing, hearing and balance. It includes the knowledge and skills needed to critically evaluate empirical research, and clinical expertise in the diagnosis and treatment of individuals having communicative disorders.

The master's degree program has two concentrations: one in speech-language pathology, and one in audiology. There is also an option for meeting educational certification requirements to be a speech-language pathologist in Pennsylvania schools. For students interested in the clinical practice degree in audiology, please see the section on the Doctor of Audiology (AuD) degree in this bulletin.

A research track (resulting in the Master of Science degree) in speech-language pathology is also available for students electing to do a master's thesis.

The Master's degree programs in speech-language pathology and the AuD program in audiology at the University of Pittsburgh are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA), Address: 2200 Research Boulevard #310, Rockville, MD 20850. Phone: 800-498-2071. Website: https://caa.asha.org/.

Contact Information for Admissions

Email: csdadmissions@shrs.pitt.edu
Administrator of Admissions for master's degree Programs: 412-383-3938

General Admission Requirements (CSD MA/MS) Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC). This includes satisfactory completion of at
least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences (Physics or Chemistry), Behavioral Sciences (Sociology, Psychology), and Statistics (not research design). These requirements must be met before students enroll in the MA/MS program courses.

Students enrolling in the speech-language pathology program must complete at least 25 total hours of guided clinical observation to be eligible for clinical certification by CFCC. Prior to beginning the MA/MS SLP program courses students must complete a minimum of 15 of the total 25 observation hours.

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency (Duolingo, IELTS, or TOEFL) within 12 months of the due date of the application. Applicants from Quebec Province are required to submit English Language Proficiency scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and English Language Proficiency scores have been received.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with their advisor. To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within their next two terms of study. Failure to do so may result in the student's immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the General Academic Regulations section of this bulletin, the master's degree program is regulated by the SHRS Academic Standards, as well as the departmental Student Handbook on Academic and Clinical Requirements.

Doctor of Clinical Science (CScD) Degree in Medical Speech-Language Pathology

The CScD is an advanced clinical doctorate recommended for the student or clinician seeking to employ state of the art clinical excellence and leadership as a speech-language pathologist in settings such as medical centers, private practices, educational settings, and academic institutions.

The primary objectives of the CScD program are to provide students with advanced academic course work, clinical skills, case-based learning experiences, leadership skills, and knowledge and skill in supervision. Graduates of this program will excel in their specialties and assume leadership roles. Graduates will be prepared for independent clinical practice in the medical setting and clinical faculty positions.

Students are expected to meet the eligibility requirements for application for both American Speech-Language-Hearing Association certification (Certificate of Clinical Competence CCC-SLP) and appropriate state licensure over the course of their studies. There is no dissertation project required for the CScD degree; however, students will demonstrate expertise in the critical analysis and application of scientific information.

Email: csdadmissions@shrs.pitt.edu
www.shrs.pitt.edu/csd

Admission Requirements

A SLP MS/MA is required in order to fulfill the clinical component of this program.

Once your application is complete, it will be forwarded to the CSD Department for review by the CScD Admissions Committee.

Applicants will be required to participate in interviews addressing content knowledge and discussions of the program.

The department has an application **deadline of January 15th** to begin the program the following fall term. All application materials must be received by the deadline. Rolling admissions means the department will review and admit qualified applicants until a class is full.

All applicants must email CSD admissions before starting the application process.

All applicants are advised to ensure that they meet the certification and licensing requirements before applying to the program.

**Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.**

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

**Doctor of Audiology (AuD) Degree**

The primary objective of the AuD program is to provide students with the academic course work, clinical skills, and experience (beyond that obtained with the master's degree) needed to be a licensed audiologist, enter the professional community and assume independent leadership roles. The AuD is the required entry-level degree for audiologists. Graduates will be prepared for independent clinical practice and academic positions upon graduation and will be immediately eligible for professional licensure and for Certification from the American Speech-Language and Hearing Association and American Board of Audiology.

The Doctor of Audiology degree education program in audiology at the University of Pittsburgh is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA). Address: 2200 Research Boulevard #310, Rockville, MD 20850. Phone: 800-498-2071. Website: https://caa.asha.org/.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.0 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the General Academic Regulations section of this bulletin, the AuD program is regulated by the SHRS Academic Standards, as well as the departmental Academic Handbook for SLP MA/MS and AuD Degree Students.

Doctor of Philosophy Degree in Communication Science and Disorders

Contact Information
The PhD program in Communication Science and Disorders is oriented toward the basic scientific questions in the discipline, with an emphasis on basic and applied research.

The expectations of graduating PhD students are that they are able to conduct a program of independent, creative, scholarly research, and that they can plan and execute effective teaching at all levels of pedagogy.

**Admission Requirements**

Applicants will apply online using the GradCAS application.

No one will be admitted to the CSD PhD program without a suitable advisor in their main area of specialization. Thus, anyone interested in PhD education is encouraged to contact individual faculty members whose research interests mesh most closely with theirs.

PhD applications are due by January 15th. Applicants will be interviewed by faculty members as part of the admissions process. A final admission decision depends on the availability of a suitable research adviser and a review and recommendation by the PhD Admissions Committee.

International applicants must provide English Language Proficiency scores (Duolingo, IELTS or TOEFL) and an academic credential evaluation from Educational Credential Evaluators Inc. or World Education Services (WES).

Submission of GRE scores to institution code 2927 is optional.

It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

**Financial Aid**

Acceptance into the PhD program does not guarantee financial aid, but each admitted student is automatically put into a merit-based competition for available teaching assistantships, doctoral traineeships, and positions on research grants. Financial assistance is often available from a variety of sources, including teaching assistantships, PhD traineeships, and graduate research assistantships. Such appointments typically require 20 hours each week of teaching, research, and/or clinical service in exchange for a monthly stipend. A scholarship based on merit covers at least partial tuition remission, fees, and health insurance. The Department's Financial Aid Committee works with each admitted student's advisor to secure a funding opportunity that is rewarding both academically and financially. Prospective applicants who are interested in financial support should indicate this on their application for admission.

**Doctoral**

**Communication Science and Disorders, PhD**

**Doctor of Philosophy in Communication Science and Disorders (CSD)**
The Department of Communication Science and Disorders (CSD) research doctoral program is oriented toward scientific inquiry in the discipline of communication science and disorders with an emphasis on basic and applied research training. Much of the CSD PhD program is individually tailored and designed to meet a variety of academic and professional goals.

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree in communication science and disorders at the University of Pittsburgh. For further detail on allowable credits, see Credit Requirements under Regulations Pertaining to Doctoral Study.

All CSD PhD students are required to take CSD 3048 - Intro to PhD Studies, CSD 3049 - PH.D. Seminar in Audiology, and CSD 3479 - Research Seminar in Speech and Language Pathology.

CSD PhD students also take a minimum of 9 credits of coursework in statistics and experimental design and 6 credits of PhD research practicum. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental PhD Proseminar (CSD 3060), to participate in professional development sessions, attend invited colloquium talks, and present their own research. Students also have the opportunity to take elective courses outside of CSD, such as courses in teaching and grant preparation, and to complete teaching practica.

Four formal degree requirements must be satisfied before a student initiates PhD dissertation work:

1. In the first semester of study, students, with the help of their major advisers, develop a proposed Plan of Study and detailed Individual Development Plan (IDP) that specifies their background, goals, and tentative plans for their program of study. Students schedule a Plan of Study meeting with a faculty committee, to review this document and their plans (see Major Adviser and Advising Committees, below).
2. Annually, after the initial plan of study meeting, the student must convene an annual review meeting, in which their Plan of Study and progress will be reviewed.
3. The student must complete a pre-dissertation research project during the first year, culminating in a manuscript resulting from a research practicum experience. This project must be completed prior to initiating the comprehensive examination.
4. The student must pass a comprehensive examination, to be completed within one semester. It will consist of a substantive written deliverable and an open-ended oral examination. Students on provisional or special status, or on probation, are not eligible to take the comprehensive exam.

Students must then successfully complete both the written dissertation overview (prospectus document) and oral examination of their prospectus. After the prospectus is passed, students file an application for admission to candidacy for the Doctor of Philosophy degree. See below and also Admission to Candidacy for the Doctor of Philosophy Degree in this bulletin for details.

Major Advisor and Advising Committees

Students admitted to the PhD program are assigned a major adviser in their main area of specialization. The adviser is primarily responsible for providing assistance and advice to the student throughout all facets of the PhD program, and typically serves as the chair of the Plan of Study, Comprehensive Examination, and Dissertation Committees. Either PhD students or their advisers may initiate a change of adviser, but no student may remain in the program without an adviser.

The student, upon consultation with the major adviser, secures the agreement of at least two other departmental faculty members with graduate faculty status to serve with the adviser on the student's Plan of Study Committee. This committee initially convenes to review and make recommendations about the student's Plan of Study. Thereafter, the committee meets annually with the student to review and make recommendations about the student's progress in the PhD program. Note: The plan of study committee may, but need not be, the student's comprehensive examination or dissertation committee.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees for an overview of the dissertation committee's makeup and responsibilities.

Overview or Prospectus Meeting

See Overview or Prospectus Meeting under Regulations Pertaining to Doctoral Study for the regulations pertaining to this meeting and then read the following information that is specific to the PhD program in Communication Science and Disorders. After securing the adviser's approval, each PhD student must submit a written dissertation proposal to the dissertation committee at least two weeks prior to a formal overview meeting with that committee. (See Dissertation and Abstract section for details on the characteristics of an appropriate dissertation.)
Final Oral Examination

See Final Oral Examination under Regulations Pertaining to Doctoral Study and then note the following additional program-specific information. After securing the adviser's approval, the student submits copies of the complete document to the dissertation committee at least two weeks prior to the final oral examination in defense of the dissertation.

PhD Curriculum

For the CSD PhD degree, a minimum of 72 credits beyond the bachelor's degree is needed.

All CSD PhD students are required to take CSD 3048 Intro to PhD Studies, CSD 3049 Translation Challenges in CSD (T0-T2 Research), and CSD 3479 Translation and Innovation in CSD (T2-T4 Research). CSD PhD students also take a minimum of 9 credits of coursework in statistics and experimental design and 6 credits of PhD research practicum. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental Proseminar (CSD 3060) to participate in professional development sessions, attend invited colloquium talks, and present their own research. Students also have the opportunity to take elective courses outside of CSD, such as courses in teaching and grant preparation, and to complete teaching practica.

Otherwise, coursework and other experiences are individually tailored for each student, in consultation with the student's adviser and the adviser-chaired Plan of Study committee.

- CSD 3048 - INTRODUCTION TO PHD STUDIES
- CSD 3049 - PH.D. SEMINAR IN AUDIOLOGY
- CSD 3479 - RESEARCH SEMINAR IN SPEECH AND LANGUAGE PATHOLOGY
- CSD 3060 - PHD PROSEMINAR

Doctor of Audiology, AuD

Degree Requirements

Students with bachelor's degrees in communication science and disorders can complete the program in four years, while students with a master's degree in Audiology can complete the program in approximately two years. Students applying to the AuD program with a completed master's degree will be required to complete two years of study with a minimum of 30 credits (typically about 38 credits) to satisfy academic and clinical requirements for the degree. A review of successfully completed graduate coursework in the master's degree in CSD (focus in Audiology) will be conducted after being admitted to the AuD Program. Students applying to the AuD program with a completed bachelor's degree (major in CSD) will require four years of study with a minimum of 75 credits (typically about 100 credits) to satisfy academic and clinical requirements for the degree. Students with a bachelor's degree without a CSD major will have to complete an additional year of post-baccalaureate study. Other requirements include the successful completion of two comprehensive examinations, a mentored research project, and a full-time clinical externship.

Comprehensive Examinations

Students in the AuD program are required to successfully complete two comprehensive examinations before the Doctor of Audiology degree can be awarded. The Comprehensive Exam I is a formative examination that will identify strengths and/or weaknesses in the student's knowledge base. An ad hoc committee of reviewers administers this comprehensive examination.

In addition, students pursuing the AuD are required to successfully complete Comprehensive Exam II. During this examination, the student will demonstrate an ability to apply theoretical knowledge to a real clinical case with which the student has been extensively involved during clinical training. Comprehensive Exam II will have both written and oral portions. The student will identify a case from the student's own clinical experience in which they have been primarily responsible for case management. This case will be thoroughly presented in conjunction with in-depth background information, including relevant clinical research on all aspects of the case. A panel of three reviewers will be constituted to evaluate each individual student's examination performance.
All audiology students in good academic standing are expected to pass their comprehensive examination(s). However, regardless of academic standing, failure to pass either of the above examinations within three examination cycles will result in the student's dismissal from the audiology program.

AuD Curriculum

- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2022 - CLINICAL PROCEDURES LAB 2-2
- CSD 2029 - IMPLANTABLES IN CLINICAL PRACTICE
- CSD 2036 - EVALUATION AND TREATMENT OF TINNITUS AND SOUND INTOLERANCE
- CSD 2040 - AUDIOLOGICAL ASSESSMENT
- CSD 2041 - MANAGEMENT OF HEARING LOSS

- CSD 2657 - ADVANCED CLINICAL SEMINAR 3-3
- CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2
- CSD 2971 - RESEARCH PRACTICUM
- Comprehensive Examination II
- CSD 2659 - AUDIOLOGY EXTERNSHIP (3 terms)
- CSD 2655 - ADVANCED CLINICAL SEMINAR 4-1
- CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2
- CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3
- CSD 2046 - PEDIATRIC EVALUATION
Medical Speech-Language Pathology, CScD

The Clinical Doctorate in Speech-Language Pathology is being redesigned. While we are not currently accepting students into the program, announcements will be posted on our website when the new program is approved and open for applications.

Master's

Communication Science and Disorders - Audiology Concentration, MA/MS

Program Requirements

Clinical Practicum

Clinical practicum requirements are met through the Audiology Network and Outplacements clinical rotations. These experiences include varied settings such as hospitals, rehabilitation centers, specialty clinics, private practices, schools for the Deaf, and public schools.

Proseminar

All students must complete the proseminar requirement, which consists of attending a specified number of scientific and professional presentations that have relevance to communication science and disorders.

Comprehensive Exam for MA

All students in the Master of Arts program are required to pass an oral comprehensive examination in the spring of their second year. The comprehensive examination assesses students' ability to think critically, to communicate their thoughts in oral form, and to demonstrate their grasp of the major academic and clinical content provided in their graduate program. Requirements for passing the comprehensive examination are provided in the Academic Handbook.

Students seeking the Doctor of Audiology (AuD) degree must complete a second comprehensive examination which includes a written and oral component. Details about that comprehensive examination can be found in the section on the AuD degree.

Thesis Option for Master of Science (MS) degrees

Students pursuing the Master of Science degree in audiology must successfully complete a thesis project. Thesis students will have an examining committee of at least three University of Pittsburgh faculty members (including the research director, who serves as chair).

Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Concentration

This program is designed for those students who do not plan to provide clinical services, but would like to pursue a research track in audiology. Students pursuing the AuD degree (Clinical Doctorate) also may pursue a research track. The audiology concentration for the master's degree requires a minimum of 30 credits of coursework. All credits must be passed with a B grade or better in order to count towards graduation.

Audiology Curriculum
Communication Science and Disorders - Speech-Language Pathology Concentration, MA/MS

Program Requirements

Clinical Practicum

Clinical practicum requirements are met through the SLP Network, Outplacements, and Practicum in the Schools. These community-based sites consist of more than 100 facilities in Western Pennsylvania with which the program is affiliated. These include varied settings such as hospitals, rehabilitation centers, home based services, specialty clinics, not-for-profit clinics, early intervention, private practices, and schools.

SLP Summative Assessment Project for Master of Arts (MA) degree

All students in the Master of Arts program are required to successfully complete a Summative Assessment Project. This project assesses students’ ability to think critically, communicate their thoughts in written and oral form, and demonstrate their grasp of the major academic and clinical content provided in their graduate program. Students pursuing the Master of Arts (MA) degree in Speech Language Pathology must satisfactorily complete a one-credit course, typically taken in the fall or spring term of their last year in the graduate program. Requirements for passing the Summative Assessment Project are provided in the course syllabus.

Program Electives

Thesis Option for Master of Science (MS) degree
Students pursuing the Master of Science degree in speech-language pathology must successfully complete a thesis project. Students who complete a master's thesis are exempt from the Summative Assessment Project. Thesis students will have an examining committee of at least three University of Pittsburgh faculty members as outlined in the academic handbook. Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Optional Coursework

The master's degree program with a concentration in speech-language pathology has a generally predefined curriculum. For students interested in obtaining school certification, students must complete the regular master's degree requirements plus the following: a 3 credit child/human development course (typically taken as an undergraduate); a language development course (typically taken through the CSD undergraduate program); and CSD 2067 SLP School Practicum (4 days per week for a full semester). Additionally, the student must pass specific Praxis examinations as required by the Pennsylvania Department of Education (PDE).

Curriculum

The program is designed to be completed within 5 terms, although some students will elect to complete the program in 6 terms. The program requires 60 credits typically distributed as follows: Required Coursework, Clinic Practicum (minimum of 10 credits), and additional/optional credits. Course work must be passed with a C- grade or better to count for graduation.

The progression of courses for the general clinical requirements are outlined on the Department's web site, and includes the following Program Curriculum:

- CSD 2028 - AUTISM
- CSD 2039 - MOTOR SPEECH DISORDERS
- CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION
- CSD 2064 - INTRO CLINICAL DECISION-MAKING
- CSD 2070 - ARTICULATION AND PHONOLOGICAL DISORDERS
- CSD 2071 - CHILD LANGUAGE DISORDERS 1
- CSD 2072 - STUTTERING
- CSD 2073 - VOICE DISORDERS
- CSD 2076 - DYSPHAGIA
- CSD 2077 - AUGMENTATIVE COMMUNICATION
- CSD 2079 - PEDIATRIC FEEDING AND SWALLOWING
- CSD 2081 - RESEARCH STRATEGIES AND TACTICS
- CSD 2082 - PROFESSIONAL ISSUES 1
- CSD 2083 - PROFESSIONAL ISSUES 2
- CSD 2086 - SLP SCREENING AND PREVENTION SKILLS LAB
- CSD 2120 - PRINCIPLES OF AUDIOLOGY FOR SPEECH-LANGUAGE PATHOLOGISTS
- CSD 2130 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 1
- CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP
- CSD 2230 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 2
- CSD 2250 - CHILD LANGUAGE DISORDERS 2
- CSD 2514 - EDUCATIONAL SERVICE DELIVERY
- CSD 2525 - INTEGRATED CASES 1

Optional

- CSD 2500 - MEDICAL SPEECH-LANGUAGE PATHOLOGY 3

Clinical Practice
Other Requirements

- CSD 2069 - SLP SUMMATIVE ASSESSMENT PROJECT

Thesis Option

- CSD 2000 - RESEARCH & THESIS MASTER'S DEGR

Department of Counseling and Behavioral Health

The Department of Counseling and Behavioral Health is home to programs that deliver personalized educational experiences for future professional counselors. We prepare our students to address the complex challenges faced by clients of diverse backgrounds, including individuals across cultures, across the lifespan, and living with disabilities and behavioral health challenges. We emphasize experiential training in evidence-based practices while advancing the field through clinical research. We are committed to community engagement, advocacy, and promoting diversity, inclusion, and cultural humility.

Our award-winning educational programs, research projects, and other learning opportunities prepare students to excel in the counseling profession. Pitt graduates are highly successful as they enter this rewarding profession. We take a holistic, hands-on approach to training that provides a strong foundation of knowledge while offering ample opportunity to practice your skills and options for personalizing your education. Our world class faculty include renowned scholars, highly skilled clinicians, and passionate educators.

Clinical Mental Health Counseling (MS)

Our counseling curriculum covers a wide range of themes including:

- Advanced counseling skills techniques - individual, group, family, substance abuse and crisis counseling
- Case conceptualization and treatment planning
- Assessment and diagnosis
- Evidence-based practice

Students complete 60 credits required for a master's degree in Clinical Mental Health Counseling in five terms. The degree requires a 100-hour practicum and 600-hour internship in a professional clinical rehabilitation or mental health counseling setting.
Master's

Clinical Mental Health Counseling, MS

The Clinical Mental Health Counseling program strives to be a world class educational program, delivering a personalized educational experience for future professional counselors. We prepare our students to address the complex challenges faced by clients of diverse backgrounds, including individuals across cultures, across the lifespan, and those with disabilities and mental and behavioral health challenges. Our program emphasizes experiential training in evidence-based practices while advancing the field through clinical research. We are committed to community engagement, advocacy, and promoting diversity, inclusion, and cultural humility.

This program prepares students to practice the profession of clinical mental health counseling and is accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP) through October 2023. Our program began its accreditation review in July 2022.

The in-person program utilizes various instructional methods, including hands-on skills practice and role-plays that complement didactic learning and experiential learning activities. The curriculum includes courses on theories of counseling, foundations of professional counseling, ethics, multicultural counseling, individual and group counseling services, case conceptualization and treatment planning, case management, vocational and career development, assessment and diagnosis, evidence-based practice and research methods. Elective courses focus on trauma and grief counseling, child and adolescent counseling, and clinical rehabilitation counseling. One summer term is reserved for practicum. See curriculum for more information.

Graduates meet eligibility criteria for national certification as a national certified counselor (NCC) or as a certified rehabilitation counselor (CRC) and the educational requirements for licensure as a professional counselor (LPC) in Pennsylvania.

Requirements:

Admission Requirements

- A baccalaureate degree is required, preferably in psychology, rehabilitation sciences, human services, social sciences or a related field of study.
A minimum overall undergraduate GPA of 3.0 (based on 4.0) is suggested. If your GPA falls below 3.0, your application may still be considered. In such cases, please describe factors that may have negatively impacted your GPA as one element of your professional statement. A minimum GPA of 2.8 is required.

Applicants should possess strong interpersonal and professional skills, must be committed to developing clinical skills through clinical practice and supervision, and be open to feedback, self-assessment, and self-reflection. Applicants must communicate in a clear, organized, and logical fashion both verbally and in writing.

Promoting diversity, equity and inclusion is a major emphasis in our program and in the counseling profession. Those with knowledge, experience, skills, interest, and dedication to advancing these values are strongly encouraged to apply and to convey this through their application materials.

Verification of English Language Proficiency. Verification is required unless the following apply:
- the applicant is a citizen of a country whose official language is English

Application Requirements

- Complete the GradCAS application.
- $50 application fee (U.S.).
- Three professional letters of recommendation. These letters should be from individuals who can describe your potential for graduate level work and may include individuals such as professors, supervisors, or employers.
- A professional essay that demonstrates evidence of graduate level writing skills and discusses professional goals, strengths, skills that will contribute to success in the program and in the counseling profession. The essay should also include a statement discussing professional interest in the field of counseling and reasons for applying to the University of Pittsburgh Clinical Mental Health Counseling Program (500-word limit).
- Written response to one or more essay questions
- Curriculum Vitae or Resume
- Transcripts from all colleges and universities attended.
- Participation in group interview
- Additional requirements for international applicants
  - Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
  - English Language Proficiency scores. Minimum scores accepted:
    - Duolingo: 130. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".
    - IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
    - TOEFL: 100. TOEFL sub-scores of 26 for speaking and 24 for listening are required. Submit electronically to institution code 2927.

Curriculum and Course Descriptions

Fall Term - Year 1

- COUN 2720 - FOUNDATIONS OF COUNSELING
- COUN 2721 - CULTURAL CONSIDERATIONS IN COUNSELING
- COUN 2734 - COUNSELING THEORIES AND TECHNIQUES
- COUN 2737 - CLINICAL, DIAGNOSTIC AND FUNCTIONAL ASSESSMENT IN COUNSELING
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Spring Term - Year 1

- COUN 2732 - HUMAN DEVELOPMENT ACROSS THE LIFESPAN
- COUN 2733 - COUNSELING SKILLS & TECHNIQUES
COUN 2736 - CRISIS COUNSELING, RISK MANAGEMENT AND DISASTER PREPAREDNESS
COUN 2738 - DIAGNOSIS & TREATMENT OF COGNITIVE AND MENTAL HEALTH DISORDERS
COUN 2739 - GROUP COUNSELING
COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Summer Term - Year 1

- COUN 2740 - CLINICAL APPLICATIONS IN COUNSELING
- COUN 2742 - LEGAL, ETHICAL & PROFESSIONAL ISSUES IN COUNSELING
- COUN 2746 - COUNSELING PRACTICUM
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP
  Choice of 1 of the following option:
  - COUN 2714 - MEDICAL, PSYCHOSOCIAL, AND ASSISTIVE TECHNOLOGY CONSIDERATIONS IN DISABILITY
  - COUN 2766 - INTRODUCTION TO ASSESSMENT AND TREATMENT FOR CHILDREN AND ADOLESCENTS
  - COUN 2767 - TRAUMA AND GRIEF COUNSELING

Fall Term - Year 2

- COUN 2743 - FAMILY AND COUPLES COUNSELING
- COUN 2747 - CONCEPTUALIZATION, TREATMENT PLANNING, & CASE MANAGEMENT
- COUN 2748 - EVIDENCE BASED PRACTICE AND RESEARCH METHODS IN COUNSELING
- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Spring Term - Year 2

- COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES
- COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING
- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
- COUN 2751 - CLINICAL COUNSELING CAPSTONE EXAM

Clinical Capstone Examination

All Counseling students are required to pass a clinical competency examination. The Clinical Counseling Capstone Exam requires student demonstration of knowledge and skills that reflect entry-level competencies of a professional counselor. Students are assessed on knowledge and skills accumulated through coursework and clinical experiences. The Capstone requires students to synthesize and apply advanced concepts into clinical practice.

The Capstone employs a clinical case study approach. Students are charged with researching and completing a written review on a client issue or population with the expectation of demonstrating expertise. Students are provided a case study in their area of expertise to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate, realistic, and evidence-based intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. Successful completion of the Capstone is needed for the student to demonstrate mastery of graduate study.

Total Credits: 60

Department of Health Information Management

Master of Science Degree in Health Informatics with an Area of Concentration in Health Informatics (HI), Data Science (DS), Health Services Analytics (HSA) or Health Care Supervision and Management (HSAM)
The Master of Science in Health Informatics (MSHI) Program is a STEM Designated Program. The Department of Health Information Management (HIM) offers four tracks leading to the Master of Science degree in Health Informatics (HI), Data Science (DS), Health Services Analytics (HSA) and Health Care Supervision and Management (HSAM).

Contact Information:

Bambang Parmanto, PhD, Chair
Department of Health Information Management
6051 Forbes Tower
412-383-6650
Fax: 412-383-6655
E-mail: him@pitt.edu
http://www.shrs.pitt.edu/HIM/

Admission Requirements for Health Informatics (HI), Data Science (DS), Health Services Analytics (HSA), and Health Care Supervision and Management (HSAM)

- A baccalaureate degree from an accredited institution:
- A minimum grade point average (GPA) of 3.0 (on a 4.0 scale) is required. Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

Application Process for HI, DS, HSA & HSAM

- Complete the application for admission
  - Applications to attend the program are submitted through GradCAS
- Application fee of $50
- One Letter of Recommendation is required. These recommendation should be from college level instructors or employers/professionals who have supervised your work in a paid or volunteer capacity. These individuals should be able to comment on your academic, professional and interpersonal abilities. People submitting recommendation letters on your behalf are encouraged to send their letters to our admissions office electronically through our application system. For those people who wish to submit their letter of recommendation on paper, please forward them a copy of our Recommendation Form and follow the directions for paper recommendations.
- Statement of Purpose/Essay
- Transcripts from all institutions attended
- International applicants must provide English Language Proficiency scores (Duolingo, IELTS, or TOEFL) and an Academic Credential Evaluation from Educational Credential Evaluators, Inc. or World Education Services (WES), Inc.

Financial Aid

There are scholarships and loan opportunities available to graduate students from the American Health Information Management Association (AHIMA). Further information can be obtained from the AHIMA web site at www.ahima.org under the career and student center tab. Additionally, the Pennsylvania Health Information Management Association (PHIMA) awards scholarships to qualified students in Pennsylvania. Further information can be obtained from PHIMA's web site at http://www.phima.org/members/scholarships/.

The Healthcare Information and Management Systems Society (HIMSS) also awards scholarships to HIMSS student members who have achieved academic excellence and have the potential to be future leaders in the health care information and management systems industry. Visit the HIMSS site at http://www.himss.org/ and navigate to "Scholarships" under the Professional Development menu.

In addition, HIM provides endowment scholarships for both undergraduate and graduate studies.
Certificate

Health Data Analytics Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate programs can be counted toward the MSHI program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Health Data Analytics Certificate:

- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS

Total Credits: 12

Health Information Cybersecurity Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate programs can be counted toward the MSHI program. The required courses for each of the four certificate programs are listed below.
Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

**Required Health Informatics Courses (12 Credits)**

Students must complete the following 4 courses for the Health Information Cybersecurity Certificate:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R OR
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH

**Total Credits: 12**

**Leadership in Health Informatics Certificate**

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students open doors in new fields. All students enrolled in these certificate programs are required to complete 12 credits, or four 3-credit courses. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

**Program Requirements**

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 12 credits. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Revenue Cycle Management Certificate:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS

Total Credits: 12

Master's

Health Informatics, MS

Data Science Concentration

Data Science (DS), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Data Science (DS) concentration prepares students to be responsible for the development, evaluation, and management of health information technologies and systems. Graduates of this concentration analyze, design, implement, and evaluate health information systems. They will also have the ability to conduct in-depth data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before their enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements
All students enrolled in the Data Science concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Data Science considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

**DS Curriculum**

The Data Science curriculum allows students to take required courses and choose from elective courses. Up to 6 credits of elective courses can be chosen from other departments in the SHRS or other academic programs within the University.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link [https://www.coursera.org/learn/clinical-terminology](https://www.coursera.org/learn/clinical-terminology). Students can choose an equivalent medical terminology course from somewhere else as well.

**Required Courses (24 Credits)**

Students must complete the following 8 courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS

**Elective Courses (12 Credits)**

Students can choose 4 electives from the following list of courses:

- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP

**Health Services Analytics Concentration**

The Health Services Analytics (HSA) concentration leading to a Master of Science degree in Health Informatics prepares students to be responsible for the development and management of health information systems consistent with the clinical, fiscal, administrative, ethical, and legal requirements of healthcare institutions. Graduates of this program analyze and evaluate health information systems. As members of the healthcare team, they
interact with other healthcare professionals and administrators, and provide healthcare data for patient care, research, quality improvement, strategic planning, reimbursement, and related analytics and managerial functions.

HSA graduates work in a variety of settings, such as hospitals, health planning agencies, computer companies, consulting firms, information systems vendors, ambulatory care centers, research centers, rehabilitation facilities, and insurance companies.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

**Program Requirements - HSA**

All students enrolled in the HSA concentration are required to complete 36 credits. Students enrolled full-time normally complete the program in 3-4 consecutive semesters. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Health Informatics considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

**Please note:** All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link [https://www.coursera.org/learn/clinical-terminology](https://www.coursera.org/learn/clinical-terminology). Students can choose an equivalent medical terminology course from somewhere else as well.

**Required Courses for All Students (21 credits)**

Students must complete the following 7 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

**Elective Courses for All Students (15 Credits)**

Students can choose 5 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP
Healthcare Supervision and Management Concentration

Health Care Supervision and Management (HSAM), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Care Supervision and Management (HSAM) concentration provides students an opportunity for knowledge, skills, and career advancement. Qualified students with interests in administration and supervisory management in health care, long-term care, and rehabilitation may pursue this 36-credit concentration in HSAM. Students enrolled full-time normally complete the program in 3-4 consecutive semesters.

This program is designed for students who wish to attain knowledge and skills at the graduate level to prepare for a supervisory management position or to upgrade competencies developed earlier in his/her career.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements

All students enrolled in the Health Care Supervision and Management concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Health Care Supervision and Management considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HSAM Curriculum

The Health Care Supervision and Management curriculum allows students to choose from required courses and elective courses.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link https://www.coursera.org/learn/clinical-terminology. Students can choose an equivalent medical terminology course from somewhere else as well.

Required Courses (21 Credits)

Students must complete the following 7 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT

Electives (15 Credits)

Students can choose 5 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
Health Informatics Concentration

Health Informatics (HI), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Informatics (HI) concentration prepares students to be responsible for the evaluation and management of health information technologies and systems. Graduates of this track analyze, design, and evaluate health information systems. They may also perform data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements

All students enrolled in the Health Informatics concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Care Supervision and Management considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HI Curriculum

The Health Informatics curriculum allows students to choose from required courses and elective courses.

Please note: All students are required to finish one course in medical terminology if they do not have that course or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link https://www.coursera.org/learn/clinical-terminology, however the student can choose another medical terminology course as well.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Elective Courses (24 Credits)
Students can choose 8 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2236 - QUALITY AND PERFORMANCE IMPROVEMENT IN HEALTHCARE: METHODOLOGIES, CORE SKILLS, AND LEAN GREEN BELT C
- HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH
- HI 2453 - MACHINE LEARNING IN HEALTH SCIENCE
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS
- HI 2456 - HEALTHCARE IT TRENDS AND INNOVATION
- HI 2457 - DESIGN THINKING IN HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP

Total Credits: 36

Prerequisites for Graduate Internships

If a student chooses to complete their internship/capstone at a site that is under contract with the HIM department (or any other site where a contract is required), the items listed below are required. If a contract is not required, the student must sign a waiver. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

- Physical examination including proof or completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- Recognizing and Reporting Child Abuse Training
- FBI Background Check (includes fingerprinting)
- HIPAA Training and Certification
- Students must carry personal health insurance while participating in an internship

Students must carry professional student liability insurance coverage while participating in an internship. The University provides liability insurance for internships covered by clinical affiliation contracts.

Some sites may have additional requirements (i.e. drug screen, Covid-19 vaccine, influenza vaccine, or orientation programs specific to their organization).

Internship sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

Additional Information Related to Internship
Travel to internship sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.

All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.

For more information on internships, students are encouraged to contact their academic advisor.

The HIM department has affiliation agreements with approximately 125+ clinical sites for student internships. The following list provides a sample of these sites:

- 3M/M*Modal
- Adelphoi Village
- Allegheny Health Network
- Athena Health
- Central Ohio Trauma System
- CVS/Aetna
- Deloitte
- Geisinger Health System
- goShadow
- Grant Thornton Consulting
- Highmark
- HM Health Solutions
- Infinitus
- KPMG
- Mayo Clinic
- Merck
- Neighborhood Resilience Project
- Omnicell
- Pitt CTSI
- Southwest Veterans
- UPMC Health Plan
- UPMC Health System
- UPMC Hillman Cancer Center
- UPMC Physician Services Division
- Western PA Patient Registry
Department of Occupational Therapy

Doctor of Occupational Therapy (OTD)

The Doctor of Occupational Therapy (OTD) program is an entry-level educational program, which prepares students for careers as occupational therapists.

The (OTD) program is a 32 month (8 term) professional course of study requiring 99 credits, including fieldwork education and a Doctoral Capstone that includes a capstone experience (Experiential Preceptorship) and capstone project.

Admission to the OTD program is only available on a full-time basis. The OTD program begins at the end of August (fall term).

The entry-level occupational therapy doctoral degree program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is 301-652-AOTA and its Web address is www.acoteonline.org. Graduates of the OTD program are eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure. Additionally, certification and licensure requirements include inquiries as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act, including those associated with alcohol and/or substance abuse.

PLEASE NOTE: The OTD program requires students to complete fieldwork education and a doctoral capstone experience at facilities external to the University of Pittsburgh. All OTD students are responsible for securing required resources and completing required documents to participate in fieldwork and the doctoral capstone experience including but not limited to transportation, physical examinations and associated testing (i.e., drug screen, vaccinations), health insurance, liability insurance, background clearances, CPR/AED training, first aid training, education modules, parking, housing, food, and clothing.

Admission Requirements

We welcome applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, ancestries, races, colors, genetic information, and gender identities and expressions.

Prerequisite Courses

Completion of the following prerequisite courses within the past 5 years with a minimum grade of B and a minimum GPA in these prerequisites of 3.00 (based on a 4.00 scale).

- Human Anatomy & Physiology (with a laboratory component), 8 credits
- Lifespan Human Development, 3 credits
- Psychopathology/Abnormal Psychology, 3 credits
- Statistics, 3 credits

Note: AP credits are not accepted as fulfillment of prerequisite courses. S grades are not accepted as fulfillment of prerequisite courses (with the exception of prerequisite courses taken during Spring 2020).

Additional Requirements

- Completion of a baccalaureate degree: Students are admitted into the Doctor of Occupational Therapy (OTD) program after successful completion of a baccalaureate degree with a minimum cumulative GPA of 3.0 (based on 4.0 scale).
- Experience in occupational therapy: Complete a minimum of 12 hours of volunteer, paid work and/or telehealth experience. Experiences can occur in one or more occupational therapy practice areas (e.g., children and youth/pediatrics, health and wellness, productive aging/geriatrics, rehabilitation, mental health, work/industry, home care). NOTE: Applicants having difficulty obtaining volunteer, paid
work or telehealth experience hours may view approved videos to obtain up to 12 experience hours. See OT Video Attestation for the list of approved videos. After viewing the videos, upload the signed attestation in the OTCAS application.

- Letters of recommendation: Submission of three letters of recommendation (evaluations) attesting to the applicant's academic and professional abilities. Letters of recommendation are submitted through the Occupational Therapy Centralized Application Service (OTCAS).
  - Letter #1 - from an occupational therapist (OTR) who was involved in the applicant's occupational therapy experience hours.
  - Letter #2 - from a college-level instructor who instructed the applicant in one or more classes.
  - Letter #3 - from an individual who can attest to the skills, abilities, and professionalism of the applicant.

- Evidence of graduate level writing skills. Applicants will submit a personal statement using life experiences to discuss their strengths and skills, and how they will contribute to professional goals and success in the OTD program. The personal statement is submitted through the OTCAS application.

- Attest to satisfactory performance of the technical standards/essential skills required for successful completion of the OTD curriculum. Students admitted to the OTD program must review the Technical Standards and submit a signed form at the time of matriculation. View more on Technical Standards/Essential Skills.

**Application Procedures**

Application Deadline: Applications must be e-submitted in OTCAS no later than April 1 to be considered for admission. Applicants are encouraged to apply by November 1 as the Admissions Committee begins reviewing and offering admission in November/December. The OTCAS application cycle opens in mid-July. Prerequisite courses must be completed by June 1.

All applicants must:

- Apply online using the Occupational Therapy Centralized Application Service (OTCAS). To learn more about the application process and to create your account, please visit the OTCAS portal.

- See below for additional requirements for internationally educated students.

**Additional Information**

Admission to the OTD program is only available on a full-time basis. The OTD program begins in August (Fall Term) of each year. Official transcripts must be sent directly to OTCAS. OTCAS does not accept paper recommendations. Letters of recommendation are submitted electronically through the OTCAS system. Applications are reviewed when all materials, including transcripts and letters of recommendation, have been received and verified by OTCAS. OTCAS uses a verification process that can take several weeks. OTCAS will verify your documents before releasing them to the University of Pittsburgh. Applicants should confirm their status as verified with OTCAS. The Department of Occupational Therapy begins reviewing complete and verified applications and offering admission in November for the program starting the following August.

For questions about the receipt, processing, and verification of your application, please contact OTCAS Customer Service at 617-612-2860, otcasinfo@otcas.org.

**International Students**

In addition to the above, internationally educated students will be required to provide:

**Academic Credential Evaluation:**

- Applicants who have completed the equivalent of a baccalaureate degree or higher at an institution outside of the United States are required to provide an official third-party course-by-course evaluation of those academic credentials verifying Grade Point Average (GPA) on a 4.0 scale. The evaluation is an application requirement.

- Upon admission official transcripts of all original language academic records for all post-secondary educational endeavors are required. If original documents are issued in a language other than English, certified English translations must also be submitted. A final transcript or diploma showing completion of the undergraduate degree must be submitted prior to starting all SHRS graduate programs.
The School of Health and Rehabilitation Sciences (SHRS) requires credential evaluations from one of the companies listed below. Electronic submission is preferred.

- Educational Credential Evaluators, Inc.
- World Education Services (WES), Inc.

International applicants are not required to submit an evaluation for degrees earned in the United States. Applicants who have attended an English Canadian institution should contact the SHRS Admissions Office.

Verification of English Language Proficiency:

International graduate applicants must possess proficiency in English at a level that enables them to succeed in graduate-level studies. Applications will not be processed until the required test results are submitted, or eligibility for an exemption has been verified. Only original official test scores received directly from test administration agencies are accepted. Electronic submission is preferred. Copies of test results are not acceptable.

Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:

- Duolingo English Test: 130. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): 7. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): 100. Scores should be submitted electronically through ETS to institution code "2927".

Verification is required unless the following apply:

- The applicant is a citizen of a country whose official language is English.
- The applicant has completed a degree program at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

PLEASE NOTE: Applicants who already have a baccalaureate degree in occupational therapy and are interested in obtaining a master's degree should apply to the Master of Science (MS) program in Occupational Therapy.

**Master of Science (MS) in Occupational Therapy**

The Master of Science (MS) in Occupational Therapy program is a one-year graduate program housed within the Department of Occupational Therapy. This advanced practice program is designed for those with a baccalaureate degree in occupational therapy. Students begin the MS in Occupational Therapy program in the fall term (August). The MS in Occupational Therapy program requires the completion of 12 core credits of advanced evidence-based rehabilitation coursework. The MS in Occupational Therapy program offers exposure to a wide variety of occupational therapy practice and research. A Comprehensive Examination is required prior to graduation at the end of the last term.

**Admission Requirements and Application Process**

We welcome applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, ancestries, races, colors, genetic information, and gender identities and expressions.

Qualified applicants for the Master of Science (MS) Program in Occupational Therapy must meet the following admission requirements:

- Bachelor's degree in occupational therapy. For international students, a bachelor's degree or diploma must be from a school/university approved by the World Federation of Occupational Therapists (WFOT) in the year that the applicant graduated and/or national
govermental institutions that approve/accredit occupational therapy programs to grant a degree in occupational therapy (e.g., Ministry of Health).

- Minimum cumulative grade point average of 3.00 (based on a 4.00 scale).
- Evidence of graduate level writing skills in a self-evaluation essay that discusses goals, strengths, skills, and experiences that will contribute to success in the program and in the profession. The essay should also include a brief statement discussing interest in the field of study and reasons for applying to the University of Pittsburgh.
- Documented evidence of knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Three letters of recommendation, preferably from individuals who have taught the applicant in an academic setting and/or supervised clinical activities. Letters of recommendation should address academic, professional and personal attributes, and potential for successful graduate education.
- Unofficial transcripts from all U.S. institutions attended.
- A course by course evaluation with GPA conversion for all higher level institutions attended outside the US. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. (ECE).
- Verification of English Language Proficiency is required unless the following apply:
  - the applicant is a citizen of a country whose official language is English
  - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
  - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- Interview (personal or virtual) with the MS Program Director and at least one other faculty member from the Department of Occupational Therapy.
- All admitted students will be required to provide official transcripts to the SHRS Admissions Office prior to enrolling in classes.

If applicable:
- Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
  - Duolingo English Test: 110. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
  - International English Language Testing System (IELTS): 6.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
  - Test of English as a Foreign Language (TOEFL): 80. Scores should be submitted electronically through ETS to institution code "2927".
- Unofficial scores may be provided via GradCAS (in addition to the official scores required).

Your application will be reviewed once it is complete.

Admitted students who are citizens of a country whose official language is not English, and who score below 120 on the Duolingo English Test, below 100 on the TOEFL ibt, or overall band 7.0 or lower on the IELTS, will be required to take an English Language Proficiency Test to better assess their English Language skills when they arrive at the University of Pittsburgh. The results of this exam may be used to recommend (not require) additional English language instruction that may supplement your education. If you have additional questions about the test, please click here.
Application Information
All applicants must:

- Complete the online GradCAS application
- Submit the GradCAS application fee of $50 (U.S)
- Submit required documents (Admission Requirements) through the GradCAS application portal

Application Deadlines
Applications are accepted for enrollment beginning in the Fall term only (August). The GradCAS cycle will open for applications beginning in September and the deadline for submitting the application and all materials is May 1.

For information about our program, please contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Doctor of Clinical Science (CScD) in Occupational Therapy

The Doctor of Clinical Science (CScD) program in Occupational Therapy, delivered 100% online, provides post-professional, doctoral-level training to eligible or already credentialed or licensed occupational therapists to practice clinically with competencies above and beyond those expected of entry-level professionals. The highly personalized curriculum focuses on implementation of evidence, assessment, intervention, evidence-based protocols and guidelines and data-based decision making. Degree-seeking students culminate their matriculation through the program with an eight-credit capstone project. With the support of a faculty mentor, students will individually design and complete a capstone project that demonstrates their advanced knowledge for implementing evidence into practice.

This program also offers an Advanced Practice Certificate in Implementation of Evidence in Clinical Practice, which is earned upon completion of the CScD in Occupational Therapy degree or can be earned on a standalone basis.

Admission Requirements and Application Process

We welcome applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, ancestries, races, colors, genetic information, and gender identities and expressions.

- Applicants who received their occupational therapy training within the United States must have an entry-level master's degree in occupational therapy (e.g., MOT) from an Accreditation Council for Occupational Therapy Education (ACOTE)-accredited program, or a baccalaureate degree in occupational therapy from an ACOTE-accredited program and a master's degree in occupational therapy or another field of study.

- Applicants who received their occupational therapy training outside of the United States must have an entry-level master's degree in occupational therapy or a baccalaureate degree in occupational therapy from an ACOTE-accredited program and a master's degree in occupational therapy or another field of study from a World Federation of Occupational Therapy (WFOT)-approved program and meet all necessary requirements for admission to the University of Pittsburgh.

- U.S. applicants are required to have initial NBCOT certification (or eligibility). International applicants must provide equivalent certification documentation from country of residence.

- Interview*

  - Qualified applicants will be invited to a virtual interview with the CScD in Occupational Therapy program director.

- Verification of English Language Proficiency. Verification is required unless the following apply:

  - the applicant is a citizen of a country whose official language is English
  - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
  - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

Please note that the GRE is not required for admission to the program.
Occupational Therapists with Baccalaureate Degrees
Occupational therapists with a baccalaureate degree in occupational therapy, and no additional graduate degrees, should apply to the Master of Science (MS) in Occupational Therapy program.

Occupational Therapists with Master's Degrees
Occupational therapists with 1) an entry-level master's degree in occupational therapy, or 2) a baccalaureate degree in occupational therapy and an advanced master's degree in occupational therapy (or another field) may be able to transfer up to 30 credits from their master's degree, providing that these credits meet requirements in the CScD in Occupational Therapy curriculum.

Application Information

All Applicants
To apply to the online CScD in Occupational Therapy program, you must complete and submit the following:

- Complete the GradCAS application.
- $50 application fee (U.S.)
- Two (2) Professional Letters of Recommendation: Letters of recommendation should attest to your professional abilities and conduct, collegiality, oral and written communication skills and leadership.*
- Essay*
  - Evidence of graduate-level writing skills in an essay that outlines:
    - why you are interested in pursuing the Doctor of Clinical Science in Occupational Therapy degree or Certificate in Implementation,
    - why you are interested in advancing your education through the University of Pittsburgh,
    - what makes you a good fit for an advanced training education program that is delivered online and,
    - the future professional goals that you hope to achieve as a result of this advanced training.
- Resume: A professional resume indicating knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Upload unofficial transcripts from all U.S. institutions attended in the Academic History section of CAS.
- Upload a course-by-course evaluation with GPA conversion for all higher institutions you have attended outside the U.S. in the Academic History section of CAS. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc.
- All admitted students will be required to provide official transcripts and, if applicable, credential evaluations to the SHRS Admissions Office prior to enrolling in classes.
- If applicable, self-report unofficial English Language Proficiency (TOEFL or IELTS) test scores in the Academic History section of CAS (for Duolingo, upload an unofficial score report under Documents in Program Materials) and request official test scores be sent to the University of Pittsburgh. Minimum scores accepted and instructions for sending official test scores follow:
  - Duolingo English Test: 130. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
  - International English Language Testing System (IELTS): 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
  - Test of English as a Foreign Language (TOEFL): 100. Scores should be submitted electronically through ETS to institution code "2927".

*Note: the personal essay, professional letters of recommendation and virtual interview are NOT required for Advanced Practice Certificate ONLY applicants.
Application Deadlines
Applications are accepted on a rolling basis for students intending to start the program in August of the same calendar year or January of the following calendar year.

For More Information
Contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Doctoral

Doctor of Clinical Science (CScD) in Occupational Therapy

Program Requirements

The Doctor of Clinical Science (CScD) program in Occupational Therapy is offered 100% online on a part-time basis and requires completion of 72 credits. Students with an entry-level master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field may be eligible to transfer up to 30 credits from their master's degree, leaving a remaining 42 credits. With a transfer of 30 credits, students will be able to complete the program in as little as 7 terms or 28 months.

This program also offers an Advanced Practice Certificate in Implementation of Evidence in Clinical Practice, which is earned upon completion of the CScD in Occupational Therapy degree or can be earned on a standalone basis.

Curriculum and Course Descriptions

The program requires the completion of 72 credits (up to 30 credits may be transferred from a master's degree, potentially leaving a remaining 42 credits in the CScD in Occupational Therapy program). Each student will be paired with a faculty mentor who will oversee the development, implementation and grading of Preliminary and Comprehensive Examinations necessary to complete the program. Required courses are held in the fall, spring and summer terms.

Preliminary Examination

The preliminary examination is a requirement for doctoral studies at the University of Pittsburgh and is intended to assess the breadth of the student's knowledge of the discipline, the student's achievement following the first year of graduate study, and the potential to apply knowledge appropriately. In the CScD in Occupational Therapy program, the preliminary examination is a writing assignment in response to a writing prompt created by a preliminary examination committee composed of occupational therapy graduate faculty. Questions may address assessment concepts, intervention/education concepts, and/or implementation of evidence. The preliminary examination is typically administered following the student's first year of study and is graded by the preliminary examination committee. Students must successfully pass the preliminary examination at least six months before they graduate.

Capstone Doctoral Committee

Each student will be supervised by a doctoral committee that will be formed before or at the successful completion of the preliminary examination. The doctoral committee will be comprised of two to three members with the chair of this committee being the student's faculty mentor and at least one of the other members being faculty appointed in the Department of Occupational Therapy. Additional members will be determined
collaboratively by the student and mentor and can include external stakeholders. This committee will oversee the development, implementation and grading of the capstone project.

Comprehensive Examination

The capstone project serves as the basis of the comprehensive examination and will be developed and implemented in collaboration with the doctoral committee. The comprehensive examination includes a written paper and a presentation of the capstone project, both of which are graded by the student's doctoral committee. Students must successfully pass both the written and oral components of the comprehensive examination to complete the CScD in Occupational Therapy program. Students must be registered for at least one course credit during the semester in which they will graduate from the CScD in Occupational Therapy program.

Plan of Study

CScD in Occupational Therapy Degree Courses

All students will take the following courses:

- OT 3000 - ADVANCED ASSESSMENT
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION *
- OT 3020 - FOUNDATIONS IN IMPLEMENTATION *
- OT 3030 - THE BUSINESS OF IMPLEMENTATION *
- OT 3040 - ADVOCACY FOR IMPLEMENTATION *
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES
- OT 3300 - CONCEPTUALIZING AND ASSESSING QUALITY IMPROVEMENT
- OT 3400 - THEORIES OF CHANGE
- OT 3500 - IMPLEMENTATION EVIDENCE

Following completion of the 34 credits of online courses, CScD in Occupational Therapy students will culminate their matriculation through the program with an eight-credit capstone project. With the support of a faculty mentor, students will individually design and complete a capstone project that demonstrates their advanced knowledge for implementing evidence into practice.

- OT 3600 - CAPSTONE PHASE 1
- OT 3700 - CAPSTONE PHASE 2

*Required courses for the Advanced Practice Certificate in Implementation of Evidence in Clinical Practice.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the CScD in Occupational Therapy Student Manual.

Doctor of Occupational Therapy (OTD)

Program Requirements

The OTD program is a 32 month (8 term) professional course of study requiring 99 credits, including fieldwork education, and a Doctoral Capstone that includes a capstone experience (Experiential Preceptorship) and a capstone project. Students in the OTD program must successfully complete all didactic coursework, Level II fieldwork, and pass a comprehensive examination prior to commencement of the Doctoral Capstone. Students must complete Level II fieldwork and the doctoral capstone experience within 24 months following completion of the didactic portion of the program.
Plan of Study

Year 1 - Fall Term - 15 Credits

- OT 2200 - FOUNDATIONS OF OCCUPATION
- OT 2201 - BODY FUNCTIONS AND STRUCTURES: ANATOMY **
- OT 2202 - THERAPEUTIC APPROACHES 1 **
- OT 2203 - CLINICAL SEMINAR 1
- OT 2207 - PRINCIPLES OF ASSESSMENT **
- OT 2208 - CRITICAL APPRAISAL OF EVIDENCE
- OT 2234 - HUMAN PERFORMANCE ANALYSIS **

Year 1 - Spring Term - 15 Credits

- OT 2205 - NEUROBEHAVIORIAL SCIENCE **
- OT 2209 - CLINICAL SEMINAR 2
- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE **
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2214 - THERAPEUTIC APPROACHES 2 **
- OT 2215 - FIELDFORK EDUCATION A (FW I)**
- OT 2235 - CLINICAL CONDITIONS 1
- OT 2236 - ACTIVITY/CONTEXT THEORY AND PRACTICE

Year 1 - Summer Term - 11 Credits

- OT 2216 - CLINICAL SEMINAR 3
- OT 2217 - NEUROREHABILITATION THEORY AND PRACTICE **
- OT 2218 - BIOMECHANICAL THEORY AND PRACTICE **
- OT 2219 - FIELDFORK EDUCATION B (FW I)**
- OT 2237 - CLINICAL CONDITIONS 2
- OT 2238 - ADAPTATION/TECHNOLOGY THEORY AND PRACTICE

Year 2 - Fall Term - 13 Credits

- OT 2220 - CLINICAL SEMINAR 4
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **
- OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE **
- OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE
- OT 2226 - FIELDFORK EDUCATION C (FW I)**
- OT 2239 - PROJECT DEVELOPMENT 1
- OT 2244 - CLINICAL CONDITIONS 3

Year 2 - Spring Term - 13 Credits

- OT 2228 - FIELDFORK EDUCATION D (FW II)**
- OT 2229 - FIELDFORK EDUCATION E (FW II)**

Year 2 - Summer Term - 7 Credits

- OT 2229 - FIELDFORK EDUCATION E (FW II)**
Year 3 - Fall Term - 12 Credits

- OT 3206 - ADVANCED THEORY AND PRACTICE **
- OT 3207 - PROJECT DEVELOPMENT 2
- OT 3210 - ADVANCED CONCEPTS IN PROFESSIONAL AND CLINICAL REASONING
- OT 3211 - ADVANCED CONCEPTS IN HEALTH POLICY AND ADVOCACY
- OT 3212 - LEADERSHIP DEVELOPMENT

Year 3 - Spring Term - 13 Credits

- OT 3208 - EXPERIENTIAL PRECEPTORSHIP **
- OT 3213 - PROFESSIONAL DEVELOPMENT SEMINAR

*Curriculum is subject to change.
**Course includes laboratory, fieldwork, or experiential component.

- Admission to the OTD program is only available on a full-time basis. Term 1 begins the end of August.
- A GPA of at least 3.00 is required in the OTD program.
- A misdemeanor or felony charge or conviction may affect a student's ability to complete courses with a clinical component (fieldwork courses and experiential preceptorship).

PLEASE NOTE: The OTD program requires students to complete fieldwork education and a doctoral capstone experience at facilities external to the University of Pittsburgh. All OTD students are responsible for securing required resources and completing required documents to participate in fieldwork education and the doctoral capstone experience including but not limited to transportation, physical examinations and associated testing (i.e., drug screen, vaccinations), health insurance, liability insurance, background clearances, CPR/AED training, first aid training, education modules, parking, housing, food, and clothing. Additionally, certification and licensure requirements include inquiries as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act, including those associated with alcohol and/or substance abuse. Note that a felony conviction may affect a graduate's ability to sit for the certification examination or attain state licensure.

Fieldwork Education and Experiential Preceptorship

Fieldwork education and the Doctoral Capstone are essential components of professional preparation for the doctoral-degree-level occupational therapy student and are integrated in the curriculum design. They are an extension of the OTD program within the clinical/community setting. Fieldwork experiences provide the OTD student with the opportunity to learn professional responsibilities through modeling by qualified and experienced personnel and to practice these responsibilities in a supervised setting. The Doctoral Capstone provides an in-depth capstone experience and includes the completion of a capstone project. Fieldwork education and doctoral capstone experiences are only conducted in sites that have a signed agreement (Memorandum of Understanding) with the School of Health and Rehabilitation Sciences. This agreement formally identifies the responsibilities of the University and the site.

Fieldwork education includes Level I and Level II experiences. Level I fieldwork is integrated with coursework during Term 2 (OT 2215 - Fieldwork Education A), Term 3 (OT 2219 - Fieldwork Education B), and Term 4 (OT 2226 - Fieldwork Education C). Level I fieldwork is designed to enrich didactic coursework through direct observation and participation. For Level I fieldwork A (OT 2215) and C (OT 2226), students are assigned to sites in the Greater Pittsburgh Area by the Academic Fieldwork Coordinator in collaboration with the course instructor. These Level I fieldwork experiences are supervised by qualified personnel (e.g., currently licensed or otherwise regulated occupational therapy practitioners, psychologists, physician assistants, teachers, social workers, nurses, and other health or education professionals). Level I fieldwork B (OT 2219) focuses on the development of the student's professional identity. This Level I fieldwork experience occurs internally within the Department and is supervised by faculty (course instructors).

Level II fieldwork is completed in Terms 5 and 6 (OT 2228 - Fieldwork Education D; OT 2229 - Fieldwork Education E). Level II fieldwork is distinct from Level I fieldwork. Students must successfully complete Level I fieldwork experiences prior to enrolling in Level II fieldwork. Level II fieldwork is an in-depth experience in delivering occupational therapy services to clients in traditional and/or emerging settings consistent with our OTD program's curriculum design. Each OTD student is assigned to specific Level II fieldwork sites to ensure exposure to a variety of clients across the life span and to a variety of settings. Students can complete Level II fieldwork in a minimum of one setting if it is reflective of more than one practice area, or in a maximum of four different settings. The OTD program only uses sites within the United States that allow for supervision by an
occupational therapist who meets state regulations and has a minimum of one year of practice experience, following initial certification. Level II fieldwork is a minimum of the equivalent of 24 full-time work weeks. Level II fieldwork may be completed on a part-time basis provided it is at least 50% of a full-time equivalent at the site. The OTD student is assigned to a Level II fieldwork site by the Academic Fieldwork Coordinator in collaboration with faculty and students sign the Level II Fieldwork Acknowledgment Agreement. The performance of a student who does not successfully complete Level II fieldwork is critically reviewed by the Academic Fieldwork Coordinator and occupational therapy faculty. Satisfactory completion of targeted interventions by the student may be required prior to enrolling in a subsequent Level II fieldwork. The faculty reserves the right to place a student at a site in the Greater Pittsburgh Area based on the student's academic performance and/or professional behavior.

In Term 7, after successful completion of Level II fieldwork (OT 2228; OT 2229), the OTD student engages in didactic coursework and training of advanced skills beyond the generalist level of an occupational therapist and completes a comprehensive examination. In Term 8, the final term of the OTD program, students enroll in the Doctoral Capstone (OT 3208-Experiential Preceptorship; OT 3213 Professional Development Seminar). The Doctoral Capstone is a 14-week (560 hours) in-depth experience in clinical practice skills, research skills, administration, leadership, program and policy development, advocacy, and/or education and includes the completion and dissemination of a capstone project. The focus of the Doctoral Capstone is on the development of skills for increased autonomy as a contributor to advancing occupational therapy practice. The doctoral capstone experience is completed in a novel practice setting or a traditional setting with a novel program and has a connection with community issues or needs. Students are assigned a faculty mentor who oversees their doctoral capstone experience, including the development of individual learning objectives and plans for supervision. The doctoral capstone experience is distinct from Level I and Level II fieldwork and is the final step in the preparation of the OTD student for entry-level practice. These learning experiences (fieldwork and doctoral capstone experience) prepare the OTD student to assume the roles of practitioner, manager, and contributor upon graduation from the OTD program. Prior fieldwork, volunteer, and/or work experience hours cannot be applied towards doctoral capstone experience hours, and a student's current work setting cannot serve as a site for their doctoral capstone experience. The doctoral capstone experience may be completed on a part-time basis.

The doctoral capstone project is a multi-faceted investigative assignment that students begin associated preparatory coursework for in Term 1. It is designed to encourage students to think critically, solve challenging problems, collaborate with professionals, and develop advanced skills in communication, research, teamwork, planning, leadership, self-reliance, professionalism, and advocacy - skills that will prepare them to respond positively and confidently to the many opportunities and challenges in today's evolving and increasingly complex practice settings. Although, the learning objectives for the Doctoral Capstone project address all three roles of the occupational therapist - practitioner, manager, and contributor - the focus is on the development of skills for increased autonomy as a contributor to advancing occupational therapy practice.

Level II fieldwork (OT 2228; OT 2229) and the Doctoral Capstone (OT 3208; OT 3213) must be completed within 24 months following completion of the didactic portions of the OTD program (Term 4).

OTD students are responsible for securing all required resources in preparation for and during Level I and II fieldwork and the Doctoral Capstone including but not limited to transportation, physical examinations and associated testing (e.g., drug screen), health insurance, liability insurance, background checks and clearances, parking, housing, food, and clothing.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the OTD program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the OTD Student Manual.

Graduate Certificate

Advanced Practice Certificate in Implementation of Evidence in Clinical Practice

Certificate Requirements

The Advanced Practice Certificate in Implementation of Evidence in Clinical Practice is offered 100% online on a part-time basis and requires completion of 12 credits. Students with an entry-level doctoral degree in occupational therapy, a post-professional doctoral degree in occupational therapy, a master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field are eligible to apply. View admission requirements here. Students who complete the Advanced Practice Certificate may choose to apply and transition into the Doctor of Clinical Science (CScD) in Occupational Therapy degree program and the 12 certificate credits will be applied toward the degree.
Curriculum and Course Descriptions

The Advanced Practice Certificate in Implementation of Evidence in Clinical Practice requires completion the following four 3-credit courses:

- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3020 - FOUNDATIONS IN IMPLEMENTATION
- OT 3030 - THE BUSINESS OF IMPLEMENTATION
- OT 3040 - ADVOCACY FOR IMPLEMENTATION

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the CScD in Occupational Therapy Student Manual.

Master's

Master of Science (MS) in Occupational Therapy

Program Requirements

The Master of Science (MS) in Occupational Therapy program begins in the fall term (August). The MS in Occupational Therapy program offers Clinical and Research plans of studies, which provide exposure to a wide variety of occupational therapy practice and research. The Clinical and Research plans include 30 credits/2 terms (Fall and Spring). Additionally, the MS in Occupational Therapy program also offers a Research with Scholarly Project plan of study, which provides an opportunity to complete a scholarly project under the guidance of a faculty mentor. The Research with Scholarly Project is 30 credits/3 terms (Fall, Spring, and Summer). A comprehensive examination, which is different from the scholarly project, is required prior to graduation at the end of the last term.

Curriculum and Course Descriptions

Plan of Study: Clinical (30 credits / 2 terms)

**Term 1 - Fall Term - 15 Credits**
- OT 2207 - PRINCIPLES OF ASSESSMENT
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE OR OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE
- OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE
- OT 2241 - CLINICAL PRECEPTORSHIP 1
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3206 - ADVANCED THEORY AND PRACTICE

**Term 2 - Spring Term - 15 Credits**
- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2242 - CLINICAL PRECEPTORSHIP 2
- OT 2248 - PROFESSIONAL REASONING IN OCCUPATIONAL THERAPY
- OT 2249 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: CLINICAL
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Plan of Study: Research (30 credits / 2 terms)
Plan of Study: Research with Scholarly Project - (30 credits / 3 terms)

Term 1 - Fall Term - 12 Credits
- HRS 2927 - STATISTICAL METHODS FOR HEALTH SCIENCE RESEARCH 1
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE OR OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE OR OT 3206 - ADVANCED THEORY AND PRACTICE
- OT 2245 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: RESEARCH
- OT 2246 - RESEARCH PRECEPTORSHIP 1
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION

Term 2 - Spring Term - 15 credits
- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2247 - RESEARCH PRECEPTORSHIP 2
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Term 3 - Summer Term - 3 Credits
- OT 2251 - SCHOLARLY PROJECT

Preceptorship

The MS in Occupational Therapy program offers clinical and research preceptorships.

Clinical preceptorship provides structured exposure to the U.S. health care system. Students are exposed to occupational therapy practice in various health care settings (e.g., acute and inpatient rehabilitation hospitals, and outpatient clinics) under the supervision of a licensed occupational therapist.

Research preceptorships provide exposure to clinical research in the field of occupational therapy. Students are exposed to occupational therapy research in a variety of areas (e.g., pediatrics, neurology, geriatrics, health systems).

Students find the preceptorships to be rewarding experiences that advance their clinical or research skills and career development.

Academic Standards
In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the MS in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the MS in Occupational Therapy Student Manual.

Department of Physical Therapy

The Department of Physical Therapy offers three academic programs of study:

- DPT program leading to the DPT degree
- Joint DPT/PhD program leading to a DPT degree and a PhD in Bioengineering
- M.S. in Health & Rehabilitation Sciences with a concentration in neuromuscular or musculoskeletal physical therapy

Doctoral

Physical Therapy, DPT - Hybrid Program

Doctor of Physical Therapy (DPT) Degree (Hybrid Option)

The Doctor of Physical Therapy (DPT) program is the entry-level educational program which prepares students for a career as a physical therapist in the United States. Upon successful completion of the curriculum, graduates of the program are eligible for the licensure examination (NPTE), which is required to practice as a practicing physical therapist. The goal of the DPT curriculum is to prepare students to become self-directed, self accountable physical therapists who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance human movement and function through the use of evidence-based practice principles. Graduates of the Doctor of Physical Therapy program will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of physical therapy. Students should note that the requirements for professional licensure could vary drastically by state as well as by country. Because such requirements can change frequently and often without notice, it is strongly encouraged, and is the responsibility of the student, to ensure the degree they earn will meet the requirements for licensure in the state or country in which they seek licensure.

Fax: 412-648-5970
E-mail: ptinfo@shrs.pitt.edu
https://www.shrs.pitt.edu/dpt

Application Process

Admission to the Doctor of Physical Therapy program is only available on a full-time basis. The DPT program begins each year with the start of the Fall Term. All applicants must apply to the program through the PT Centralized Application Service (PTCAS). This information is located on the Department website. Within the PTCAS application, applicants will be required to select the specific program (Residential / Hybrid / Either) for which they wish to be considered for admission.

Admissions Requirements
Admission requirements and procedures listed below are for the DPT Residential and Hybrid program formats. Applicants, Residential and Hybrid, will select the University of Pittsburgh Doctor of Physical Therapy program in the PTCAS application portal. In the portal, applicants will be asked to select the specific program format (Residential or Hybrid) to which they wish to apply.

Applicants who are interested in the dual degree Doctor of Physical Therapy/PhD in Bioengineering program must apply directly to that program in the PTCAS application portal. NOTE: There is a specific designation for the Pitt DPT/PhD dual degree program and at this time, the dual degree DPT/PhD program is only available to students participating in the DPT Residential option.

- A bachelor's degree from an accredited institution
  
  Undergraduate degrees MUST be conferred and final transcripts received two months (July) prior to the start of the program

- Minimum GPA of 3.0 (based on a 4.0 scale)

- Minimum of three letters of recommendation
  
  - One letter MUST be from academic reference - a professor/instructor from a course(s) for which the applicant was enrolled. The academic course must either be a pre-requisite for the DPT program OR a course associated with student's major area of study. The letter should include insights regarding the applicant's potential for successful navigation through a graduate-level professional degree program and provide specific examples of observed characteristics that support such insights.
  
  - The additional two letters of recommendation may be completed by any of the following: physical therapist, professor/instructor, academic advisor, minister, employer/supervisor, life coach/mentor, research faculty, internship supervisor/faculty, or athletic coach. While it is preferred that the letters of recommendation be completed by individuals from a variety of settings, it is permissible to submit 2 letters from a similar source (i.e. two different physical therapists, or two different employers/supervisors, two different professors, etc...).

- Demonstrated evidence of adequate exposure to the field of physical therapy and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a physical therapy setting; 40 hours of exposure required. It is preferable for applicants to show evidence of the willingness to work with a variety of patients in different physical therapy settings; we prefer to see the 40 hours completed in at least 2 different clinical settings.

- A 'C' grade or higher in all prerequisite coursework

- Complete PTCAS Application

- Application Fee

- PTCAS Personal Statement

- University of Pittsburgh Essay Question (Included in PTCAS Application)

- Official transcripts from every U.S. college and university attended

- GRE not required

- Please note that many clinical sites will require a Child Abuse clearance (Act 33), Criminal Background check (Act 34), and a drug screen prior to participation in a clinical education experience. If you do not have a clean background check for either Act 33/34 clearance, or a clean drug screen you may not be able to participate in Clinical Education and therefore will not be able to meet the DPT requirements for graduation.

If applicable:

- Enter all international (non-United States/foreign) institutions you have attended on your PTCAS application. Order a WES ICAP Course-by-Course evaluation from World Education Services (WES) through the PTCAS application.

- Verification of English Language Proficiency is required unless the following apply:
  
  - the applicant is a citizen of a country whose official language is English
  
  - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
  
  - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

- If required, provide Test of English as a Foreign Language (TOEFL) scores in your PTCAS application, and request an official TOEFL scores report be sent to TOEFL code "5312" by the application deadline.

The Department faculty have outlined the Technical Standards deemed essential for successful completion of the DPT curriculum. Students admitted to the DPT program must review the Technical Standards and submit a signed form indicating that they meet the Technical Standards at the time of matriculation into the program.

Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act and if you have a criminal record you may not be able to become licensed to practice as a physical therapist after graduation. Should you have concerns regarding your eligibility, we recommend you contact your state licensing board for further clarification.
Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs, 8 credit hours.
- Physics I and II sequence with labs, 8 credit hours.
- Biology I and II sequence with labs, 8 credit hours.
- Anatomy (human, vertebrate, comparative or anatomical kinesiology), 3 credit hours.
- Physiology (human physiology preferred), 3 credit hours.
  *A two course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.
  **Science courses must be for science majors or pre-med majors. Introductory or remedial courses are not accepted as prerequisites.
- Two courses in Psychology that should include a general psychology course and a specialized psychology course such as developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours.
- Statistics, 3 credit hours.
- English Writing (English composition or an upper-division writing course), 3 credit hours.

While not required, faculty have found taking an undergraduate course in Exercise Physiology benefits students during their first term in the DPT program. At the time of application no more than 4 courses can be outstanding or in progress. Any offer of admission will be contingent upon the successful completion of any remaining prerequisites by July 1 prior to the start of the DPT Program. Academic performance on outstanding coursework should not deviate from the performance reflected in the application materials. While not required, it is preferable that courses be completed within the past 5 years.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the General Academic Regulations section of this catalog, the DPT program is regulated by the SHRS Academic Standards.

Statute of Limitations

All requirements of the DPT must be completed within three years. Extension of the statute of limitations may be granted if there are extenuating circumstances. Such requests, listing reasons for the extension and the amount of additional time needed, must be approved by the department chair.

Comprehensive Examinations

Students in the DPT program are required to pass a written comprehensive examination before the Doctor of Physical Therapy degree can be awarded. The written comprehensive examination is a cumulative examination covering the core clinical sciences and focusing on physical therapy practice.

Community Engagement & IPE Requirement

Prior to graduation, students in the DPT Program are required to engage in at least 3 Community Engagement activities, 3 Interprofessional Education experiences, and 2 "self-selected" activities in either of these categories - totaling 8 unique activities across the 7-term program. More information about this requirement can be found in the Student Handbook.

Degree Requirements

The Doctor of Physical Therapy program is a 2.3 year (7 semester*) professional course of study including clinical internships.

*From an Academic Proposal approved in May 2021, the terms were reduced from 8 to 7. This change is effective beginning Fall 2021.

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of
course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and conclude with two 15-week terminal clinical education experiences.

Physical Therapy, DPT - Residential Program

Doctor of Physical Therapy (DPT) Degree

The Doctor of Physical Therapy (DPT) program is the entry-level educational program which prepares students for a career as a physical therapist in the United States. Upon successful completion of the curriculum, graduates of the program are eligible for the licensure examination (NPTE), which is required to practice as a practicing physical therapist. The goal of the DPT curriculum is to prepare students to become self-directed, self-accountable physical therapists who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance human movement and function through the use of evidence-based practice principles. Graduates of the Doctor of Physical Therapy program will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of physical therapy. Students should note that the requirements for professional licensure could vary drastically by state as well as by country. Because such requirements can change frequently and often without notice, it is strongly encouraged, and is the responsibility of the student, to ensure the degree they earn will meet the requirements for licensure in the state or country in which they seek licensure.

**DPT Curriculum**

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our
students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in
the program and conclude with two consecutive 15-week termal clinical education experiences.

Joint Degree

Physical Therapy/Bioengineering, DPT/PhD

Program Overview

The Doctor of Physical Therapy (DPT) - PhD in Bioengineering program combines the entry-level DPT leading to licensure as a physical therapist,
with a PhD in Bioengineering that will prepare the student to become an independent researcher. The program will integrate clinical and research
experiences, with students receiving mentorship from faculty in the departments of Physical Therapy and Bioengineering. Students should have a
Bachelor's degree or higher in engineering or engineering-related discipline, with a strong interest in physical therapy.

Contact Information

Patrick Sparto, PhD, PT
Co-Director, DPT-PhD Program
Department of Physical Therapy
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
Phone: 412-383-6732
E-mail: psparto@pitt.edu

Application Process

Applications will need to be submitted through the PT Centralized Application Service (PTCAS) by December 1 for admission to the program the
following August. The application is reviewed by faculty in both departments.

Admission Requirements

Students will need to meet the admission requirements of both programs. Applicants must have a minimum of a Bachelor's degree in a field of
ingeering or closely related (e.g. physics, or applied mathematics, kinesiology). Applicants must demonstrate evidence of exposure to the field of
Physical Therapy (PT) through volunteer or work experience. Applicants must submit 3 letters of reference: one physical therapist with whom the
student has volunteered or worked for, one academic advisor, and one research supervisor. A minimum GPA of 3.0 is required but competitive
applicants typically have a 3.5 GPA or greater. Reporting of GRE scores is optional; typically, admitted students have GRE scores greater than the
50th percentile.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs - 8 credit hours
- Physics I and II sequence with labs - 8 credit hours
- Biology I and II sequence with labs - 8 credit hours
- *Anatomy (human, vertebrate, comparative or anatomical kinesiology) - 3 credit hours
- *Physiology (human physiology preferred) - 3 credit hours
- Exercise Physiology - 3 credit hours
- Two courses in Psychology: should include a general psychology course and a specialized psychology course such as: developmental
  psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours
- Statistics - 3 credit hours
- English Writing (English composition or an upper-division writing course) - 3 credit hours
- **Engineering Statics - 3 credit hours
- **Advanced Mathematics (e.g. calculus) - 3 credit hours

*A two-course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.
**Enrollment in PhD part of the program can be deferred until courses are completed.**

**Academic Standards**

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the DPT program is regulated by the *SHRS Academic Standards*.

**Curriculum Overview**

Students will follow the typical plan of study for DPT residential students for the initial seven terms (i.e., 2.3 years) of the program. Then students will follow the plan of study for PhD students in Bioengineering. Clinical internships and research experiences will be performed throughout the program. At a minimum, the program will take 6 years to complete. After completing the didactic and clinical requirements of the DPT program, the student will be allowed to take the licensing exam. Students are required to write and orally defend a dissertation to complete their PhD degree.

**DPT Curriculum**

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence-based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and conclude with two consecutive 15-week termal clinical education experiences.

**PhD Requirements**

The Department of Bioengineering follows university guidelines on students working toward joint degrees like the DPT-PhD in Bioengineering. Typically, we have waived the life science requirement (6 credits) as comparable coursework is covered in the physical therapy curriculum. The remaining course requirements closely follow requirements for the PhD in Bioengineering.

- Bioengineering Track Courses - 9 credits*
- Life Sciences (successfully completing the lecture and lab components of Human Anatomy coursework fulfills this requirement) - 6 credits
- Graduate Electives (successfully completing Musculoskeletal I & II fulfills this requirement) - 6 credits*
- Graduate Engineering Mathematics - 3 credits
- Statistics for Bioengineers - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (or equivalent bioethics course) - 3 credits
- Seminar - 6 credits total, 4 credits must be BIOENG 2023 - BIOENGINEERING SEMINAR SERIES. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP (grant writing) - 1 credit
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 - 12 credits of 3999 to be taken after the proposal - 35 credits

*The standard policy for PhD students is 9 credits of track courses and 6 credits of electives. There is an exception for the Bioimaging and Signals track, for which the requirement is 12 credits of track courses and 3 credits of electives. DPT-PhD students in this track must take all four track courses, in which case only 3 elective credits are waived.

Total number of credit hours: 72 credits minimum, which includes 6 credits to fulfill life science requirement but does not include credits from foundational courses if applicable.

DPT/PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department.

Students typically take the PhD preliminary exam in the next summer term after they have completed 2 full terms in the program but may be taken
after only one term if approved by the Department. The PhD proposal (comprehensive examination) is presented generally at the end of the second year. A final public PhD defense is made by each PhD candidate based on the student's research work.

Please see the Department of Bioengineering's PhD Requirements page for more details.

**Master's**

**Musculoskeletal Physical Therapy, MS**

This program is designed for the practicing physical therapy professional who has already earned an entry-level degree in physical therapy. This postprofessional graduate plan of study enables physical therapists to improve their clinical knowledge and clinical skills through a specific program of advanced physical therapy practice and scholarship. The Master of Science in Musculoskeletal Physical Therapy is designed to provide advanced clinical skills in the areas of musculoskeletal physical therapy.

**Fall Term**

- PTMS 2001 - ADVANCED NEUROSCIENCE
- PTMS 2003 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER
- PTMS 2004 - PRINCIPLES OF EVIDENCE-BASED PHYSICAL THERAPY PRACTICE
- PTMS 2005 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS LOWER EXTREMITY

**Spring Term**

- PTMS 2006 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION
- PTMS 2007 - ANALYSIS OF NEUROMUSCULAR SIGNS AND SYMPTOMS IN CLINICAL DECISION MAKING
- PTMS 2009 - ADVANCED MUSCULOSKELETAL CLINICAL PRACTICE: THE UPPER QUARTER
- PTMS 2011 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS LUMBOPELVIC SPINE
- PTMS 2010 - PHYSICAL THERAPY SPECIAL TOPICS SEMINAR (optional)

**Summer Term**

- PTMS 2015 - CLINICAL ROUNDS AND CASE PRESENTATION
- PTMS 2016 - CLINICAL PRACTICE SEMINAR
- PTMS 2017 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS FOR UPPER EXTREMITY
- PTMS 2018 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS FOR THE CERVICAL AND THORACIC REGIONS

**Total Credits: 33-35**

**Neuromuscular Physical Therapy, MS**

This program is designed for the practicing physical therapy professional who has already earned an entry-level degree in physical therapy. This postprofessional graduate plan of study enables physical therapists to improve their clinical knowledge and clinical skills through a specific program of advanced physical therapy practice and scholarship. The Master of Science in Neuromuscular Physical Therapy is designed to provide advanced clinical skills in the areas of musculoskeletal physical therapy.

**Fall Term**

- PTMS 2001 - ADVANCED NEUROSCIENCE
- PTMS 2002 - MOTOR LEARNING AND CONTROL OF MOVEMENT/HEALTH PROMOTION
PTMS 2003 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER
PTMS 2004 - PRINCIPLES OF EVIDENCE-BASED PHYSICAL THERAPY PRACTICE

Spring Term

- PTMS 2006 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION
- PTMS 2007 - ANALYSIS OF NEUROMUSCULAR SIGNS AND SYMPTOMS IN CLINICAL DECISION MAKING
- PTMS 2008 - CONCEPTS AND PRINCIPLES RELATED TO SENSORY MOTOR CONTROL 1
- PTMS 2009 - ADVANCED MUSCULOSKELETAL CLINICAL PRACTICE: THE UPPER QUARTER
- PTMS 2010 - PHYSICAL THERAPY SPECIAL TOPICS SEMINAR (optional)

Summer Term

- PTMS 2012 - SEMINAR IN NEUROLOGIC PHYSICAL THERAPY
- PTMS 2013 - EVIDENCE BASED MEDICAL AND PHYSICAL THERAPY INTERVENTIONS FOR PERSONS WITH NEUROMUSCULAR DISEASE
- PTMS 2014 - CASE STUDIES OF PERSONS WITH NEUROMUSCULAR DISORDERS
- PTMS 2015 - CLINICAL ROUNDS AND CASE PRESENTATION

Total Credits: 33-35

Department of Physician Assistant Studies

Award-winning and internationally recognized faculty and staff prepare you to become a highly qualified physician assistant ready to serve as a future leader in the delivery of health care, patient education and professional service. Pitt's Department of Physician Assistant Studies is deeply committed to graduating a workforce of diverse and inclusive certified PAs to serve our communities here in our city, across the nation and around the world.

By instilling a lifelong desire for continued learning and scholarly productivity, our alumni contribute to advances and advocacy in the profession long after graduation. Together, our faculty, staff, students and alumni help shape PA professional research that informs the science, delivery and administration of health care reaching patients everywhere.

Webpage: https://www.shrs.pitt.edu/pas

Doctoral
Doctor of Physician Assistant Studies

The Doctor of PA Studies Program meets the following requirements for professional doctoral degrees as stipulated in the Regulations Governing Graduate Study at the University of Pittsburgh through:

- Matriculation through a coherent program designed to assure the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession
- A research component to achieve the goal of research competence including a report demonstrating mastery of the subject matter and a high level of communication skills,
- Minimum admission requirements that will align with all graduate programs at the University of Pittsburgh,
- Completion of a defined set of prerequisites so that all students will enter with required basic knowledge, and
- Maintenance of a 3.00 GPA to remain in good standing and be graduated.

Additionally, all potential matriculants should have already completed a clinical component of their education. This component would have been guided by clear goals and objectives as part of their degree as is required by appropriate PA accrediting bodies. These clinical education components would be accepted as transfer credits for matriculants in the DPAS program.

Program Duration

Due to the rigorous and uniform nature of PA studies programs that are accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc., all potential matriculants will possess the same level of required knowledge for admission into this doctoral program. Nationally, the mean credits required for completion of the entry-level PA degree is 112.7. For this reason, the DPAS program will accept the application of 30 credits from University of Pittsburgh PA program alumni to the DPAS degree and the transfer of 30 credits from other matriculants who have graduated from a PA training program accredited by an appropriate accrediting body to the DPAS degree.

Program Characteristics, Type of Instruction, & Level of Instruction

The Doctor of PA Studies Program graduate-level coursework will consist of online courses and will culminate in a Scholarly Practice Capstone Project. The core curricular concepts will be presented primarily asynchronously, similar to an in-class lecture, but using interactive online educational activities to promote knowledge acquisition. This knowledge will be reinforced with synchronous, instructor-led, online activities to facilitate application and synthesis of the knowledge acquired through the asynchronous online activities. Additionally, each matriculant will work closely with an assigned faculty advisor who will help guide their studies and mentor them in their Scholarly Practice Capstone Project. This individualized and learner-centered approach will allow matriculants to engage in scholarly activity that will have a direct and positive impact in their daily work.

Assessments

Assessments will be competency-based and scaffolded to support completion of the Scholarly Practice Capstone. Such assessments will include:

- Reflective writing assignments,
- Scholarly writing assignments,
- Written evidence of literature review,
- Stakeholder assessments,
- Oral presentations, and
- Written defense of the Scholarly Practice Capstone.

Plan of Studies

Courses will be offered in consecutive semesters in the Spring, Fall, and Summer Terms. It is recommended that students proceed sequentially, as a cohort, through the program. This program is intended to be a post-professional degree program for full-time practicing PAs. The advantage of this design is to allow learners to remain in their clinical practice full-time, while earning their degree part-time, so that they can apply their classroom learning to their clinical practice in a meaningful and impactful way. The curriculum is designed to help students be informed by, and to inform, their current practice as they learn. This design allows for a balanced curriculum that helps working professionals stay on track. Individualized plans of study will be considered for students who experience extenuating circumstances that require individualized or personalized plans to meet their academic goals. Per the Regulations Governing Graduate Study at the University of Pittsburgh, this professional doctoral degree program, the statute of limitations for students for completion of all DPAS degree requirements will be set at 8 years and will not be extended beyond the expectation for a Doctor of Philosophy student. Courses and their sequencing are presented in Table 1.

Master's

**Physician Assistant Studies Residential Program, MS**

Program Requirements

**Prerequisite course work**

- Anatomy with lab and Physiology, two semesters*
  - This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy & Physiology combined, each with a lab.
- Biology with lab designed for science majors, two semesters*
- Chemistry with lab designed for science majors, two semesters*
- English Composition/Writing, two semesters
• Microbiology with lab, one semester*
• Chemistry, Upper Level with lab, one semester*
• Psychology, one semester
• Statistics, one semester
• Medical Terminology, one semester, for at least one college credit (certification courses not accepted)

*Prerequisite Science Courses cumulative GPA of 3.0 or higher is required

Other admission criteria

Successful completion of an undergraduate degree at an accredited institution

• Overall grade-point average (GPA) of 3.0 (based on a 4.0 scale) in all college-level course work and a minimum (GPA) of 3.0 (based on a 4.0 scale) in the prerequisite science courses marked above with an asterisk (*). Exceptions may be made for candidates who present compelling evidence of success in graduate coursework, including successful completion of a graduate-level program.
• Three letters of recommendation, one from a former college/university instructor and one from a supervisor of the required clinical experience.
• Completion of an additional personal statement in CASPA focusing on the mission of the PA Studies Program.
• A minimum of 500 hours of hands-on patient care experience.

The patient care experience must be direct, "hands-on" patient contact e.g., RN, EMT or paramedic, patient care attendant or CNA, Patient Care Technician, clinic assistant, Peace Corps volunteer or other cross-cultural health care experience, therapist, clinical research assistant, respiratory therapist/aide, medical assistant, PT/OT assistant.

All coursework, requirements, and degree must be completed by August 31st of the application year in order to be considered for a seat in the class that will begin the following January.

Interview Process

• Interviews for seats in our program are performed and scored by the program director, faculty, current students, and practicing PAs. They include the following parts and scoring:
  o Essay - Higher scores are awarded based on apparent appreciation for the state of the PA profession, passion for pursuing PA school to positively impact the profession, language and writing skills, and editorial care
  o Individual interview - Higher scores are awarded based on the strength of demonstration of the following qualities: adaptability/stress management, conflict resolution, and technical and professional knowledge/ability to learn
  o Group interview - Higher scores are awarded based on the strength of demonstration of the following qualities: active listening, conflict management, probing the group to maximize performance, leadership skills, clarification of group responses, encouraging and harmonizing with fellow group members, articulation, drawing others into the conversation, offering ideas, and summarizing
• Total Scoring and Final Review by Admissions Committee: After completion of the above, the committee reviews candidate scores, reviewer comments, and application information to decide who is accepted, waitlisted, and denied admission.

Program and Admission Notes

• The program is two full years (six consecutive semesters) and classes start each January (spring semester)
• Applications will be considered only until the class is filled
• Students are highly encouraged to apply early
• The program does not offer advanced standing
• All courses within the curriculum are required
• No credit is granted for pre-admission experiential learning
• Only full-time students are admitted

Plan of Study
The Physician Assistant curriculum is comprised of a rigorous 24 month Master of Science Program. The goals and objectives of our program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA. The first three semesters (12 months) are made up of primarily classroom instruction. Course content is presented through traditional lecture, integrated instruction, case based and hands on skills labs. The clinical year is comprised of rotations in inpatient medicine, primary care, emergency medicine, general surgery, OB/GYN, pediatrics, and behavioral health. The curriculum is presented by practicing physician assistants, medical and surgical physicians, and other health care providers who have expertise in their respective specialties.

Each course in the program is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of ‘C’ or better; leave of absence from program) will result in the delay of completion of program requirements and graduation from the program.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2101 - INTRODUCTION TO THE PHYSICIAN ASSISTANT PROFESSION
- PAS 2102 - HUMAN ANATOMY
- PAS 2105 - HEALTH POLICY
- PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2108 - INTRODUCTION TO CLINICAL MEDICINE WITH LAB
- PAS 2109 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2107 - PATIENT EDUCATION AND COUNSELING
- PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1
- PAS 2202 - CLINICAL MEDICINE 1
- PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1
- PAS 2204 - PHARMACOLOGY 1

Semester Total Credits: 15

Semester 3:

Course Credits

- PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2
- PAS 2302 - CLINICAL MEDICINE 2
- PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2
- PAS 2304 - PHARMACOLOGY 2
- PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN
- PAS 2306 - FUNDAMENTALS OF SURGERY

Semester Total Credits: 15
Year 1 Total Credits: 45

Clinical Year 2:

Semester 4:

Course Credits
- PAS 2701 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1
- PAS 2702 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2
- PAS 2703 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Semester Total Credits: 12

Semester 5:

Course Credits
- PAS 2704 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4
- PAS 2705 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5
- PAS 2706 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

Semester Total Credits: 12

Semester 6:

Course Credits
- PAS 2707 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7
- PAS 2713 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8
- PAS 2714 - TRANSITION TO PROFESSIONAL PRACTICE

Semester Total Credits: 13

Year 2 Total Credits: 37

Program Credits Total: 82

Certification

Graduates of the professional program are eligible to sit for the Physician Assistant National Certification Exam (PANCE) administered by the National Commission on Certification of the Physician Assistant (NCCPA). All States and the District of Columbia have legislation governing the qualifications or practice of physician assistants. All jurisdictions require physician assistants to pass the Physician Assistant National Certifying Examination. Only those successfully completing the examination may use the credential "Physician Assistant-Certified." To remain certified, PAs must complete 100 hours of continuing medical education every 2 years. Every 10 years, they must pass a recertification examination.

Physician Assistant Studies, MS - Hybrid Program

Program Requirements
PAS-Hybrid applicants need to have completed the following prerequisites:

- Biology with lab designed for science majors, two semesters*
- Microbiology with lab, one semester*
- Chemistry with lab designed for science majors, two semesters*
- Anatomy with lab and Physiology* (This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy with lab & Physiology combined.)
- Statistics, one semester
- Medical Terminology, one semester for at least 1 college credit
- English Composition/writing, two semesters
- Psychology, one semester

*Both prerequisite science courses and cumulative GPA of 3.0 or higher is required

There is no expiration date for prerequisite courses.

Other Admission Criteria

Successful completion of an undergraduate degree (BS or BA) at an accredited institution

- **Online Application:** Upload all application materials through Centralized Application Service for Physician Assistants (CASPA).
- **Patient Care Experience:** A minimum of 500 hours of direct, "hands-on," patient care experience is required by the application deadline. Examples of eligible experiences may include work as an RN, EMT, paramedic, medical assistant, physical therapy or occupational therapy assistant.
- **Personal Statements:** Students must provide two personal statements in CASPA. Your first essay should be a personal statement focusing on why you want to become a PA. The second essay should reflect the mission of the PA Studies Hybrid program and commitment to Diversity, Equity and Inclusion.
- **Letters of Recommendation:** Submit three letters of recommendation including one (1) character reference, one (1) from a supervisor of the required patient care experience and one (1) instructor.

All coursework, requirements, and degree must be completed by August 31st of the application year in order to be considered for a seat in the class that will begin the following January.

Virtual Interview Process

Interviews for seats in our program are performed and scored by the program director, faculty, and practicing PAs. They include the following parts and scoring:

- **Essay:** Higher scores are awarded based on apparent appreciation for the state of the PA profession, passion for pursuing PA school to positively impact the profession, language and writing skills, and editorial care
- **Individual interview:** Higher scores are awarded based on the strength of demonstration of the following qualities: adaptability/stress management, conflict resolution, and technical and professional knowledge/ability to learn
- **Group interview:** Higher scores are awarded based on the strength of demonstration of the following qualities: active listening, conflict management, probing the group to maximize performance, leadership skills, clarification of group responses, encouraging and harmonizing with fellow group members, articulation, drawing others into the conversation, offering ideas, and summarizing

Program and Admission Notes

- The program is two full years (six consecutive semesters) and classes start each January (spring semester)
- Applications will be considered only until the class is filled
- Students are highly encouraged to apply early
- The program does not offer advanced standing
- All courses within the curriculum are required
- No credit is granted for pre-admission experiential learning
- Only full-time students are admitted
- All applicants need to identify as U.S. citizens, have documentation of permanent residency or have dual citizenship status

Accreditation

The ARC-PA has granted Accreditation-Provisional status to the University of Pittsburgh Physician Assistant Studies Hybrid Program sponsored by University of Pittsburgh.

Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA Standards or when a program holding Accreditation-Provisional status appears to demonstrate continued progress in complying with the Standards as it prepares for the graduation of the first class (cohort) of students.

Accreditation-Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class.

The program's accreditation history can be viewed on the ARC-PA website at http://www.arc-pa.org/accreditation-history-university-of-pittsburgh-hybrid/.

Plan of Study

The University of Pittsburgh PA Studies Hybrid Program is a 24-month program that awards a Master of Science degree upon successful completion. The goals and objectives of the program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA.

The first three semesters (12 months) are made up of didactic instruction. This didactic component will consist of asynchronous and synchronous online didactic courses. The didactic content will be presented using interactive online educational activities to promote knowledge acquisition. Synchronous, instructor-led, online activities will facilitate application and synthesis of the knowledge acquired through the asynchronous online activities. The onsite intense immersion laboratory experiences will be utilized to master the development of clinical skills necessary for examination, evaluation, diagnosis, prognosis, intervention, and assessment of outcome. The curriculum is presented by practicing physician assistants, medical and surgical physicians, and other health care providers who have expertise in their respective specialties. All didactic component courses are sequential and must be successfully completed in order to progress to the next term of the curriculum.

The last three semesters (12 months) are made up of a clinical component and will consist of Supervised Clinical Practice Experiences (SCPE) in Internal Medicine, Family Medicine, Emergency Medicine, Pediatrics, Surgery, Behavioral Health, Obstetrical and Gynecological Medicine, and an Elective. There is also a Transition to Professional Practice course at the end of the clinical curriculum.

Since each course in the program is offered only once during each academic year, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of ‘C’ or better, leave of absence from the program) will result in a delay by retaking the course the following year, as well as delays in completing the program and graduating with the Master of Science degree.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2401 - INTRODUCTION TO THE PA PROFESSION
- PAS 2402 - HUMAN ANATOMY AND LAB
- PAS 2403 - HEALTH POLICY
- PAS 2404 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2405 - INTRODUCTION TO CLINICAL MEDICINE
- PAS 2406 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2407 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2408 - PATIENT EDUCATION AND COUNSELING
- PAS 2409 - HISTORY TAKING AND PHYSICAL EXAMINATION 1 AND LAB
- PAS 2410 - CLINICAL MEDICINE 1 AND LAB
- PAS 2411 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1 AND LAB

Master of Rehabilitation Technology

Program Overview

In the online Master's in Rehabilitation Technology, you'll learn to assess the applications of assistive devices, participate in hands-on clinical training through in-person workshops and internships and work directly with end-users in this rehabilitation master's centered around technology. Thanks to specialized course credits in clinical rehab, you'll reduce the number of work hours required to obtain Rehabilitation Engineering and Assistive Technology Society of North America's (RESNA) Assistive Technology Professional (ATP) credential.

Accreditation Status
The Master of Rehabilitation Technology Program has been granted accreditation by Commission on Accreditation for Allied Health Education Programs (CAAHEP) as recommended by the Committee on Accreditation for Rehabilitation Engineering and Assistive Technology Education (CoARATE).

Application Requirements

All applicants must:

- Complete the GradCAS application;
- Submit the application fee of $50 (U.S.);
- Submit an essay—a description of educational and long-term professional goals;
- Submit two letters of reference, preferably from individuals who have instructed you in academic settings. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study;
- Submit official transcripts from all colleges and universities you have attended;
- Additional requirements for international applicants

Note: Application can be submitted when course requirements are in progress.

Please note this program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the clinical internships.

Tuition and Fees

Tuition and Fee rates for the MRT program can be found at the following website:

- [http://ir.pitt.edu/graduate-tuition/](http://ir.pitt.edu/graduate-tuition/)

Master of Science in Prosthetics and Orthotics

Program Overview

Clinical orthotics and prosthetics includes the evaluation, design, fabrication and custom fitting of orthoses (orthopedic braces) and prostheses (artificial limbs). Artificial limbs, or prostheses, are used to replace missing limbs or portions of limbs, and to improve function of the upper or lower extremities. Orthopedic braces, or orthoses, are used to stabilize or unload joints, improve motion and reduce stresses on tissue, substitute for muscle weakness or paralysis, and assist in normal growth, development and function. Orthoses can be applied to the head, neck, trunk, or limbs. Orthotists and Prosthetists work in a variety of settings, including private practice, hospitals, rehabilitation facilities, nursing homes, and home health settings. Orthotists and prosthetists are currently in high demand, and the demand is expected to increase in the future.

Orthotists and Prosthetists are part of the health care team, and as such, work with physicians, therapists, and other health care professionals to provide the orthotic and prosthetic services to users. Orthotists and prosthetists are responsible for:

1. Performing comprehensive assessment of the orthotic/prosthetic users needs,
2. Creating a comprehensive orthotic/prosthetic treatment plan to meet the needs and goals of the user,
3. Performing the necessary procedures to deliver the appropriate orthotic/prosthetic services, which may include fabrication of the orthosis/prosthesis,
4. Providing continuing patient care and periodic evaluation to assure/maintain/ document optimal fit and function of the orthosis/prosthesis,
5. Participating in personal and professional development through continuing education, training, research and organizational affiliations, and
6. Developing, implementing and/or monitoring policies and procedures regarding human, business, and organizational management.

The MSPO Program is five consecutive terms in length, including one summer term, and requires a total of 65 credits. It is designed to meet all standards for accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE) and for preparing students to complete residencies and take the American Board for Certification in Orthotics and Prosthetics examinations.

During the last term of the Program, students complete a clinical internship, typically where they gain exposure to a real-world clinical settings. Most students will relocate out of the Pittsburgh area during this term. MSPO currently has agreement with clinical sites across the country and we can work with the student to set up additional internship sites for this final term if necessary.
Accreditation Status

The Master of Science Program in Prosthetics and Orthotics has been granted accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE). Our graduates are eligible for NCOPE residencies, and, upon successful completion of an NCOPE residency, they are eligible to take the certification examinations of the American Board for Certification in Orthotics, Prosthetics & Pedorthics (ABC).

Admission Requirements and Application Process

Admissions Application Deadline

Prerequisite courses

1. Baccalaureate Degree. No specific major is mandated; however, the degree should include a well-rounded general education with a distribution of courses in the sciences, mathematics, psychology, social sciences, and humanities.
2. Prerequisite coursework includes foundation courses in the following areas:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Physics with lab</td>
<td>4 credits</td>
</tr>
<tr>
<td>Biology with lab</td>
<td>4 credits</td>
</tr>
<tr>
<td>Chemistry with lab</td>
<td>4 credits</td>
</tr>
<tr>
<td>General Psychology</td>
<td>3 credits</td>
</tr>
<tr>
<td>Mathematics (algebra or higher)</td>
<td>3 credits</td>
</tr>
<tr>
<td>Human Anatomy</td>
<td>3 credits</td>
</tr>
<tr>
<td>Human Physiology</td>
<td>3 credits</td>
</tr>
<tr>
<td>Statistics</td>
<td>3 credits</td>
</tr>
</tbody>
</table>

3. Recommended minimum overall grade point is a 3.0 grade-point average in all college-level courses and a 3.0 average in prerequisite courses. Applicants with less than a 3.0 but with other outstanding qualifications will be considered.
4. Applicants applying to the Prosthetics and Orthotics (MS) program will apply online using the Orthotics & Prosthetics Centralized Application Service, known as OPCAS, https://portal.opcas.org/ submit one copy of their official transcript, letters of recommendation, and other required information directly to OPCAS.

To be assured inclusion in the review process, applications should be completed by the date posted on the MSPO website (http://www.shrs.pitt.edu/po/) Application information which must be submitted includes:

- Completed application form
- Official transcriptions of all college-level courses
- Letters of recommendation (three)
  - At least one from a college instructor
  - At least two from a health care professional (preferably a certified orthotist or prosthetist)
- Essay describing background leading to your choice of this profession and your long-term goals.
- Record of work, shadowing, or volunteer experience related to the profession of orthotics and prosthetics. 250 hour minimum of shadowing time.
- Additional requirements for international applicants

Please note that the University of Pittsburgh's program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, blood titers, an Act 33/34 clearance, and a drug screen to determine whether you are qualified to participate in the clinical internships. Prior to the start of the program, the student will utilize Exxat to submit the requirements and have them maintained on file during their time at the University. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Admissions process, application deadline and prerequisites requirements are available on the Prosthetics and Orthotics webpage.

The School of Health and Rehabilitation Sciences does not require a supplemental application. It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

**Tuition and Fees**

Tuition and Fee rates for the MSPO program can be found at the following websites:

- [http://ir.pitt.edu/graduate-tuition/](http://ir.pitt.edu/graduate-tuition/)

In addition to University Fees, some of the MSPO courses have lab fees associated with them. Current Fees are available on the Prosthetics and Orthotics webpage.

**Certificate**

**Assistive Technology Certificate**

This certificate is designed for graduate students who wish to increase their knowledge of assistive technology, and to work directly or indirectly with people with disabilities. It consists of 12 credits of core courses, and 3 elective credits for a total of 15 graduate-level credits.

**Eligibility**

To be eligible for admission into the certificate program, a student must:

- Be currently enrolled in a Masters or PhD program in RST, physical or occupational therapy, communication science and disorders, or engineering program or
- Possess an MS, PhD, or MD degree in an appropriate health-related or technology field

**Program Requirements**

The certificate will be awarded upon completion of a Master's or higher degree and completion of 15 credits. The following courses are required:

- HRS 2705 - PRACT REHAB ENGR & ASSISTV TECHN
- HRS 2921 - CLINICAL INTERNSHIP or
- HRS 2748 - ASSISTIVE TECHNOLOGY PRACTICUM

And at least three credits must be completed from any combination of the following courses:

(or other courses if approved by the Chair of the Department of Rehabilitation Science and Technology)

- HRS 2709 - MANUAL WHEELCHAIR DESIGN
- HRS 3705 - WHEELCHAIR BIOMECHANICS
- HRS 3702 - SOFT TISSUE BIOMECHANICS
Disability Studies Certificate

The School of Health and Rehabilitation Sciences offers a 15-credit certificate program in disability studies. This multidisciplinary field of inquiry examines how psychosocial and societal participation issues potentially affect the estimated 45 million people with disabilities.

Eligibility

Students enrolled in MS, PhD, or MD degree programs in health-related or technology fields and professionals working in a variety of fields (minimum of bachelor degree required) are eligible to apply for this certificate program. Admission is offered on a rolling basis.

Program Requirements

The certificate will be awarded upon completion of the following courses. These 15 credits can be taken over two or more semesters:

- LAW 5339 - LAW OF DISABILITY DISCRIMINATION or
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE or
- HRS 2902 - TOPICS IN HEALTH CARE
- HRS 2475 - DISABILITY RELATIONS AND SERVICES INTERNSHIP

Master's

Prosthetics & Orthotics Concentration, MS

Program Requirements/Minimum Credits

Students enrolled in the MSPO Program are required to complete 65 credits to meet degree requirements. The curriculum meets all requirements for students to do NCOPE residencies and take the American Board of Certification in Prosthetics, Orthotics, and Pedorthics certification examinations. Specific courses include:

Fall term, year one

- PO 2101 - FUNCTIONAL ANATOMY AND KINESIOLOGY
- PO 2102 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS
- PO 2103 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION
- PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS
- PO 2105 - PROFESSIONAL ISSUES IN PROSTHETICS AND ORTHOTICS
- PO 2106 - PATIENT MANAGEMENT IN ORTHOTICS AND PROSTHETICS
- RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Spring term, year one

- PO 2201 - ORTHOTICS 1
- PO 2202 - PROSTHETICS 1
- PO 2203 - CAPSTONE FOR PROSTHETICS AND ORTHOTICS
- PO 2204 - INTRODUCTION TO EVIDENCE - BASED PRACTICE IN ORTHOTICS AND PROSTHETICS
- RT 2208 - ETHICAL ISSUES IN HEALTHCARE
Summer term, year one

- PO 2301 - ORTHOTICS 2
- PO 2302 - PROSTHETICS 2
- PO 2303 - SPINAL ORTHOTICS

Fall term, year two

- PO 2401 - ORTHOTICS 3
- PO 2402 - PROSTHETICS 3
- PO 2403 - ISSUES IN THE HEALTH SYSTEM
- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY

Spring term, year two

- PO 2501 - MASTER OF PROSTHETICS AND ORTHOTICS CLINICAL INTERNSHIP
- PO 2502 - SCHOLARLY PAPER
- PO 2503 - PRACTICE MANAGEMENT IN PROSTHETICS AND ORTHOTICS

Program Total = 65 credits

*Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one year delay in completing the course, the remaining program requirements, and the year of graduation.

Comprehensive Exam

A comprehensive examination will be given, covering all aspects of the Program. All students are required to pass this examination prior to graduation.

Thesis/Non-thesis Options

All MSPO students are required to complete at least a Capstone Project, under the direction of a faculty advisor and an additional faculty reader. However, as a substitute for the Capstone Project, the student may elect to complete a master's thesis, under the direction of a faculty advisor and thesis committee. Students electing to pursue the thesis option will complete 3 credits of Graduate Research Proposal (HRS 2924) in place of the 2 credit Capstone Project (PO 2502) and will also complete 3 credits of Graduate Research (HRS 2925).

Rehabilitation Technology, MRT

The 35-credit Master of Rehabilitation Technology program can be completed in 1 year (3 semesters), or 2 years. Some students opt for a longer part-time timeframe.

Fall Courses

- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY
- RT 2104 - FUNCTIONAL & MEDICAL ASPECTS OF DISABILITY RELATED TO ASSISTIVE TECHNOLOGY
• RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Spring Courses

• RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES
• RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
• RT 2208 - ETHICAL ISSUES IN HEALTHCARE
• RT 2209 - CLINICAL APPLICATIONS OF SEATING AND MOBILITY
• RT 2210 - ASSISTIVE TECHNOLOGY FUNDING, POLICY, & MANAGEMENT

Fall, Spring, Summer Courses*

*Most students choose to complete during the Summer term

• RT 2311 - CLINICAL INTERNSHIP
• RT 2312 - SCHOLARLY PAPER

Elective Options

Students completing the 1-year, 35-credit program are not required to take electives in order to graduate. However, students pursuing the 2 year option may be recommended to take elective courses. Below are some recommended options. If there is another course you wish to take, please seek approval from your advisor prior to registration.

• RT 2415 - SOFT TISSUE BIOMECHANICS
• RT 2416 - WHEELCHAIR BIOMECHANICS
• RT 2999 - INDEPENDENT STUDY
• RT 2922 - TEACHING INTERNSHIP
• PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS
• LAW 5339 - LAW OF DISABILITY DISCRIMINATION
• HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
• HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
• HI 2452 - DIGITAL HEALTH

Department of Sports Medicine and Nutrition

In Pitt's Department of Sports Medicine and Nutrition (SMN), there's a vision for the future. It's a place where scientists, using contemporary, state-of-the-art practices have the potential to extend the careers of elite athletes and weekend warriors, where human performance optimization translates to injury prevention and military operational success, where exercise and diet help to prevent and manage disease and nutrition information impacts the well-being of the community and informs public policy.

It's a place where innovative and multidisciplinary research makes an immediate connection to real-world practices. Proof lies in the Department's growing number of regional, national and international partners as well as the quantity and quality of funding from prestigious organizations such as the National Institutes of Health, U.S. Department of Defense, NASA and others.

Through the use of technology and collaborative science, the Department of Sports Medicine and Nutrition is improving the quality of life and resiliency of people from all walks of life and abilities today, and championing health and wellness for life.

The department aims to meet these objectives by:

• developing cognitive skills, psychomotor mastery and affective values in students through the delivery of a proven formula of sound classroom education, combined with invaluable clinical education experiences, for the promotion of competent entry-level clinicians and enhancing the health and well-being of individuals and diverse populations
becoming thoughtful leaders by advancing the state of the science through evidenced-based practice, rigorous curricula, interdisciplinary collaboration and innovative technology

mitigating injury and disease and optimize human performance by conducting innovative, multidisciplinary basic and applied research and contributing to the scientific community in order to enhance clinical decisions and education

Accelerated

Athletic Training, Accelerated BS-MS

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004 and 2012 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Role Delineation Study/Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness, and Health Literacy; (2) Assessment, Evaluation, and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The academic curriculum includes such courses as anatomy, kinesiology, human and exercise physiology, injury evaluation, medical and pharmacological principles, administrative aspects, among others. The course work provides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

* See the Dietrich School of Arts and Sciences General Education Course Catalog.

**Additional Requirements**

- Required credits for admission: 60 (Applications may be submitted while prerequisite coursework is in progress).
- Grades of C- or better (C for transfer) in all prerequisite coursework with the exception of ATHLTR 1811 and ATHLTR 1812, where a grade of B or better must be earned.
- EMT certification through course for credit or other qualified course leading to EMT credential. Verification of completion of EMT certification must be provided to the program director.
- Minimum cumulative GPA of 2.8 (based on 4.0).
- Submit admissions application including technical standards for admission document.
- Personal interview with athletic training faculty (as needed).

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
• The ability to record the physical examination results and a treatment plan clearly and accurately.
• The capacity to maintain composure and continue to function well during periods of high stress.
• The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
• Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
• Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: March 1

Pitt Students (including regional campuses)

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

Transfer Student Information

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Athletic Training as their intended field of study. International transfer students click here. Transfer students must also provide application materials directly to SHRS.

All admission criteria applies to transfer students in the same way as students enrolled at the Pittsburgh campus. Students with prior athletic training experience seeking to transfer to the University of Pittsburgh for admission to the Athletic Training Program must complete the same prerequisite requirements as all other candidates including the Basic Athletic Training (ATHLTR 1811) and Basic Athletic Training Lab (ATHLTR 1812) courses and all observation hours. If admitted to the program, all students must complete University of Pittsburgh core athletic training courses. In some instances, credit may be given for other coursework taken at another institution and will be evaluated on an individual case basis. International transfer students click here.

Curriculum

Coursework for the professional BS-MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase. Students applying for the Accelerated BS-MS in Athletic Training program will complete prerequisite coursework during the first two years of their undergraduate degree. At the conclusion of their sophomore year, students will apply to the Accelerated BS-MS in Athletic Training program. Upon successful application and acceptance into the program, students will complete one year (two semesters) of pre-professional curriculum. During their last two years, students will complete the professional (graduate) curriculum.

Pre-professional Phase

During the pre-professional phase students complete prerequisite and general education courses along with specific Athletic Training-related prerequisites.

First Semester (Fall)

• REHSCI 1200 - HUMAN ANATOMY
• REHSCI 1201 - HUMAN ANATOMY LAB
• REHSCI 1205 - HUMAN PHYSIOLOGY
• REHSCI 1235 - MEDICAL TERMINOLOGY
• NUTR 1006 - INTRO TO HUMAN NUTRITION
• ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING
• ATHLTR 1816 - MEDICAL ETHICS
16 Credits

Second Semester (Spring)
Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY
- ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING
  15 Credits

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS
  15 Credits

Third Semester (Fall)

- ATHLTR 2803 - CLINICAL PRACTICUM 3
- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE
- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING
  15 credits

Fourth Semester (Spring)

- ATHLTR 2804 - CLINICAL PRACTICUM 4 - CLINICALLY IMMERSIVE SEMESTER
- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR Elective, 3 credits
  15 Credits

Dietitian Nutritionist Program, Accelerated BS-MS
Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! In 2024, all Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the accelerated program as juniors.

For more information, please contact:

Trisha A. Cousins, EdD, RDN, LDN, CLC  
Program Director, Dietitian Nutritionist Program  
6037 Forbes Tower  
412-383-6532  
E-mail: tcousins@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an accelerated BS/MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program (FG). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This accelerated program offers points of entry for:

- qualified undergraduates
- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Undergraduate students will earn both Bachelor of Science and Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for Year 2 and Year 3 of the program. Please review the experiential learning information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate, a post-baccalaureate, or as a graduate of a DPD. The application deadline for all entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Undergraduate Students to the Accelerated MS Program
Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus, courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- General Chemistry 1 with lab, CHEM 0110
- General Chemistry 2 with lab, CHEM 0120
- Foundations of Biology 1, BIOSC 0150
- Foundations of Biology 2, BIOSC 0160
- Biology Lab, BIOSC 0057 or BIOSC 0058
- Organic Chemistry, CHEM 0350, or CHEM 0310 and CHEM 0320
- Biochemistry, BIOSC 1000*
- Introduction to Microbiology, BIOSC 1850
- College Algebra, MATH 0031 or higher math required. Exemption accepted.
- Statistics, STAT 0200 or STAT 1000
- Seminar in Composition, ENGCMP 0200 or equivalent
- English Writing, any "W" or upper-level writing course
- Oral Communication, COMMRC 0520 preferred; COMMRC 0500, COMMRC 0510, and COMMRC 0530 are also accepted.
- Business, any Business or Economics course
- Social Science, any
- Psychology, PSY 0010
- Introduction to Nutrition, HRS 1006 or NUTR 1006*
- Introduction to Dietetics, NUTR 1600+
- Food and Culture, NUTR 1612+

*These courses need to have been completed within the past five years.
+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty
- 61-63 credits are required to begin the program

Application Requirements

- Complete the application for admission. Please visit the SHRS website to access information about applying;
- A personal essay addressing the following:
  - What you have done to learn about the field of nutrition and dietetics (both the science and supervised experiential learning) in preparation for our dietitian nutritionist program (maximum word count: 200 words); and,
  - An accelerated nutrition and dietetics program is challenging and the application process will be very competitive. Please explain what academic and personal skills you have developed since starting college that will allow you to be successful in this professional degree program. What do you feel are the critical skills, practices, and attitudes that you must continue to work on as you proceed further in your academic studies? (max. word count: 500 words)
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.

SHRS General Education Requirements are included in our upper-level program prerequisites and curriculum requirements.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accommodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

738
Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860-412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level RDNs to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN).
2. To prepare entry-level graduates with advanced knowledge and skills that contribute to the evidence-informed practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering as a junior will complete the program 156 credits.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1602 - NUTRITION ASSESSMENT
- NUTR 1620 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

Spring Term

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1612 - FOOD AND CULTURE (If not taken previously)
- NUTR 1610 - FOOD APPLICATION
• NUTR 1613 - FOOD APPLICATION LAB
• NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Fall Term

• HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
• HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
• HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
• HRS 2635 - PROFESSIONAL DEVELOPMENT
• Elective, 3 credits - Advisor approved

Spring Term

• HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
• HRS 2625 - COUNSELING METHODS
• HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB
• HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
• Elective, 3 credits - Advisor approved

Undergraduate students will receive a BS in Nutrition Science after successful completion of the Year 2.

Third Year

Fall Term

• HRS 2675 - PRACTICUM IN DIETETICS 1
• HRS 2676 - EXPERIENTIAL PRACTICE 1
• HRS 2658 - CAPSTONE PROJECT

Spring Term

• HRS 2659 - PRACTICUM IN DIETETICS 2
• HRS 2672 - EXPERIENTIAL PRACTICE 2
• HRS 2652 - EXPERIENTIAL PRACTICE 3
• HRS 2674 - CAPSTONE PROJECT
Credits / Units: 15

Master's

Athletic Training, MS
The Accelerated BS-MS in Athletic Training was developed for students enrolled at the University of Pittsburgh and is designed as a 4+1 financial model. In addition to the Accelerated BS-MS in Athletic Training degree, a second point of entry for the MS degree in Athletic Training was developed for students who already have obtained a bachelor's degree. This 2-year degree is called the MS in Athletic Training degree (Entry Point 2).

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004 and 2012 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness and Health Literacy; (2) Assessment, Evaluation and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The professional academic curriculum includes such courses as Injury Evaluation, Therapeutic Interventions, Functional Anatomy, Evidence Based Practice in Athletic Training, General Medical and Pharmacological Principles, among others. The course work provides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the professional program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

Admissions Requirements

Prerequisite Courses for MS in Athletic Training Degree (Entry Point 2)

- Successful completion of a Baccalaureate degree from a regionally accredited institution. Undergraduate coursework must have been completed no longer than 10 years prior to application. Applications may be submitted while baccalaureate degree is in progress.
- Minimum cumulative overall and prerequisite grade point average (GPA) of 3.0 (based on 4.0).
- EMT certification is required either through a course for credit or another qualified course leading to NR-EMT credential.
- At this time observation hours under the direct supervision of a certified athletic trainer are recommended but not required.
- Completion of Technical Standards for admissions document.
- Verification of English Language Proficiency is required unless the following apply:
  - the applicant is a citizen of a country whose official language is English
  - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
  - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- Successful completion of interview (virtual, phone or in-person).

Prerequisites must be completed for a letter grade, minimum grade of C. Applications may be submitted while prerequisite coursework is in progress. Prerequisites coursework for admission include:

- Human Anatomy, 4 credits minimum
- Human Physiology, 4 credits minimum
- Exercise Physiology, 3 credits minimum
- Introduction to Biology, 4 credits minimum
- Introduction to Physics, 3 credits minimum
- Introduction to Chemistry, 4 credits minimum
• Kinesiology or Biomechanics, 3 credits minimum
• English Composition, 6 credits minimum
• Psychology, 6 credits minimum, must include Introduction to Psychology
• Public Speaking, 3 credits
• Humanities and Social Sciences Electives, 6 credits minimum
• Nutrition, 3 credits minimum

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

• The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
• Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
• The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
• The ability to record the physical examination results and a treatment plan clearly and accurately.
• The capacity to maintain composure and continue to function well during periods of high stress.
• The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
• Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
• Effective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: May 1

Application Platform: Complete the ATCAS application which includes:

• Application fee
• An essay discussing when and how you became interested in the field and program to which you are applying, any work or volunteer experience you have that will demonstrate your awareness of the field and your long-term professional goals
• A current copy of your Curriculum Vitae or Resume;
• A letter of recommendation from a college instructor/professor, academic advisor, supervisor or employer, etc
• Official transcripts from all U.S. colleges/universities attended
• A course by course evaluation with GPA conversion for all higher level institutions attended outside the US. The evaluation may be from World Education Services, Inc. (WES) or Educational Credential Evaluators, Inc. (ECE).

Graduate Record Examination (GRE) not required

If applicable:

• Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
  o Duolingo English Test: 105. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
  o International English Language Testing System (IELTS): 6.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
  o Test of English as a Foreign Language (TOEFL): 80. Scores should be submitted electronically through ETS to institution code "2927".
Program Curriculum

Coursework for the professional MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase.

Preprofessional Phase

In the summer, prior to the start of the professional phase, students enrolled in the MS in Athletic Training Degree Program (Entry Point 2) will be required to successfully complete a 1-credit course titled - ATHLTR 1815 Foundations in Evaluation and Treatment.

- ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY
- ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

Third Semester (Fall)

- ATHLTR 2803 - CLINICAL PRACTICUM 3
- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE
- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

Fourth Semester (Spring)

- ATHLTR 2804 - CLINICAL PRACTICUM 4
- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR Elective (3 Credits)
Dietitian Nutritionist Program, MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! In 2024, all Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the program as graduate students in Fall Term.

For more information, please contact:
Trisha A. Cousins, EdD, RDN, LDN, CLC
Program Director, Dietitian Nutritionist Program
6037 Forbes Tower
412-383-6532
E-mail: tcousins@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program (FG). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This program offers points of entry for:

- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Students will earn a Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for the program. Please review the experiential learning information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate (accelerated BS/MS), a post-baccalaureate (MS), or as a graduate of a DPD (MS). The application deadline for all entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.
Entry Point for Post Baccalaureate Students to the MS Program

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

- General Chemistry 1 with lab
- General Chemistry 2 with lab
- Foundations of Biology 1
- Genetics or Foundations of Biology 2
- Biology Lab
- Organic Chemistry 1
- Organic Chemistry 2
- Biochemistry*
- Introduction to Microbiology
- College Algebra or higher math
- Statistics
- Seminar in Composition
- English Writing
- Oral Communication
- Business
- Social Science
- Psychology
- Introduction to Nutrition*
- Introduction to Dietetics+
- Food and Culture+

*These courses need to have been completed within the past five years.
+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Baccalaureate degree from an accredited institution
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

Application Requirements

- Complete the GradCAS application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit one letter of recommendation. This letter should address the academic, professional, and personal attributes and potential for graduate study;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.
- Additional requirements for international applicants
  - Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
  - English Language Proficiency scores. Minimum scores accepted:
    - TOEFL: 100. Submit electronically to institution code 2927.
    - IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
Duolingo: 130. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".

Entry Point for DPD Graduates to the MS Program

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

- Foundations of Biology 1 with Lab, 4 credits
- Genetics or Foundations of Biology 2, 3 credits
- Human Physiology, 4 credits
- Introduction to Microbiology, 3 credits
- General Chemistry 1 with Lab, 4 credits
- General Chemistry 2 with Lab, 4 credits
- †Organic Chemistry 1, 3 credits
- †Organic Chemistry 2, 3 credits
- *Biochemistry, 3 credits
- Oral Communication, 3 credits
- Business or Economics, 3 credits
- Social Science, 3 credits
- Introduction to Psychology, 3 credits
- Seminar in Composition, 6 credits
- Algebra, 2-4 credits
- *Introduction to Nutrition, 3 credits
- Introduction to Dietetics, 1 credit
- Food and Culture, 3 credits
- Nutrition Assessment, 3 credits
- Nutrition Education, 3 credits
- Nutrient Metabolism, 3-6 credits
- Food Applications with Lab, 4 credits
- Food Service Management, 3 credits
- Life Cycle Nutrition, 3 credits
- Nutrition Therapy, 3 credits

*These courses need to have been completed within the past five years.
†CHEM 0350 (3 cr.) offered each Spring Term will satisfy the Organic Chemistry requirement. Students who do not take CHEM 0350 must take OCHEM 1 & 2 (6 cr.).
+Genetics is preferred; however, a Biology 2 course with a strong genetics component will fulfill the requirements.

Additional Requirements

- Baccalaureate degree from an accredited institution
- Verification Statement from accredited program
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

Application Requirements

- Complete the GradCAS application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Submit resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit one letter of recommendation. This letter should address the academic, professional, and personal attributes and potential for graduate study;
- Submit official transcripts from all colleges and universities attended;
• Additional requirements for international applicants
  o Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
  o English Language Proficiency scores. Minimum scores accepted:
    ▪ Duolingo: 130. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".
    ▪ IELTS: 7.0. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
    ▪ TOEFL: 100. Submit electronically to institution code 2927.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accomodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level RDNs to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN).
2. To prepare entry-level graduates with advanced knowledge and skills that contribute to the evidence-informed practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering with a baccalaureate degree that is not from a Didactic Program in Dietetics (DPD) will complete 93-95 credits during this three-year program. Didactic Program in Dietetics (DPD) graduates will complete Year 2 & Year 3 of the program fulfilling a 60-credit course of study.
First Year

**Fall Term**

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1602 - NUTRITION ASSESSMENT
- NUTR 1620 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

**Spring Term**

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1612 - FOOD AND CULTURE (if not previously taken)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1613 - FOOD APPLICATION LAB
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

**Fall Term**

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
- HRS 2635 - PROFESSIONAL DEVELOPMENT
- Elective, 3 credits - Advisor approved

**Spring Term**

- HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2625 - COUNSELING METHODS
- HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- Elective, 3 credits - Advisor approved

Third Year

**Fall Term**

- HRS 2675 - PRACTICUM IN DIETETICS 1
- HRS 2676 - EXPERIENTIAL PRACTICE 1
- HRS 2658 - CAPSTONE PROJECT
Spring Term

- HRS 2659 - PRACTICUM IN DIETETICS 2
- HRS 2672 - EXPERIENTIAL PRACTICE 2
- HRS 2652 - EXPERIENTIAL PRACTICE 3
- HRS 2674 - CAPSTONE PROJECT

Sports Medicine, MS

In the Summer 2022 the Sports Medicine and Nutrition - Sports Medicine Concentration, MS was terminated. Students that are currently in the program will be given the option to have their designation remain as an area of concentration or change to the new major.

The Sports Medicine (SM) program focuses on enhancing the knowledge base in the prevention, assessment, treatment and rehabilitation of athletic injuries and illness. Athletic Trainers, other health care professionals, and individuals interested in sports medicine will find the curriculum well-suited to meet their post-professional goals and objectives.

For more information, please contact:

About

The Sports Medicine (SM) concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a two-year graduate program housed within the Department of Sports Medicine and Nutrition.

<table>
<thead>
<tr>
<th>Program Summary</th>
</tr>
</thead>
<tbody>
<tr>
<td>36 credits (full-time-only)</td>
</tr>
</tbody>
</table>
Sports medicine is a multidisciplinary field that focuses on health care issues for athletes and physically active individuals. The SM program has a research focus and provides a core curriculum that is central to the pathokinesiology of joint injury and the principles by which restoration of joint function is accomplished. Graduates of the program seek appointments in both clinical and educational settings at colleges and universities, high schools and private sports medicine clinics. Individuals who have successfully completed our program include athletic trainers, physical therapists, bioengineers and exercise physiologists.

Research

Students are provided with a research experience within the Neuromuscular Research Laboratory/Warrior Human Performance Research Center that focuses on issues central to clinical research in orthopedics and sports medicine. Research includes the use of electromyography, motion analysis, isokinetic dynamometry, physiological, proprioceptive, and balance assessment modalities for the purpose of defining and restoring function as well as optimizing performance in military personnel, injured athletes, and in physically active individuals.

The NMRL boasts:

- 30 years of comprehensive, relevant sports medicine research as part of the University of Pittsburgh
- A 10-year history of Department of Defense (DoD) Human Performance Operation and Injury Prevention Research
- Unique understanding of DoD Human Performance Operation and Injury Prevention needs
- Multi-disciplinary, team-centric approaches to research
- Cutting-edge and innovative research capabilities

Admission Requirements:

All applicants must:

- Complete the GradCAS application
- Submit the application fee of $50 (U.S.)
- GRE scores are not required
- Submit a self-evaluation essay addressing your purpose for applying to the program, your ability to successfully complete the program, and your goals (short and long term)
- Submit three letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, clinical (as appropriate) and personal attributes; as well as potential for meaningful graduate study
- Submit official transcripts from all colleges/universities attended
- Additional requirements for international applicants can be found on the SHRS website

Application deadline is March 15.

Early application deadline of January 15 to be considered for program scholarships.

Students may be eligible for the following scholarships:

Experiential Opportunities

To support graduate student career success, the MS program in Sports Medicine offers experiential opportunities that combine academic scholarship and professional practice. These career-related experiences allow students to be immersed in a work environment that will build their skillset, deepen their knowledge, and bolster career confidence. Each of these experiences allows for hands-on opportunities, professional networking, and personal development. In addition, each of these positions includes a scholarship. The amount of funding varies by year.

Sports Medicine Resource Fund
This graduate scholarship was created to help defray the cost of professional development activities. Eligible students are those individuals who have completed their undergraduate Athletic Training degree at the University of Pittsburgh and are now continuing their education at Pitt through the Master's in Sports Medicine Program. This scholarship can be used toward travel and attendance at a professional meeting.

**Freddie H. Fu, MD Graduate Research Award**

The award is named for and presented in honor of Freddie H. Fu, MD for the continued support of research in the field of Sports Medicine. The purpose of this award is to encourage graduate research activity by recognizing exceptional student research projects and defraying some of the expenses associated with the student research. The number of awards presented each year will be contingent on the number of quality proposals submitted and monies available.

**American College of Sports Medicine (ACSM)**

The ACSM provides research grants and scholarships from various endowments and funds including education, minority scholarships, and Foundation Research Grants. For more information.

**NATA Research and Education Foundation Graduate/Doctoral Scholarship**

The National Athletic Trainers' Association provides a number of scholarships to eligible students on the basis of academic and clinical excellence as well as participation in campus and community activities that demonstrate qualities of leadership and service. Applicants must be student members of the NATA by November 1 of the year preceding submission of the application, be enrolled in an accredited curriculum program and intend to pursue the profession of athletic training as their means of livelihood and have a minimum GPA of 3.2 or higher. Completed applications must include a statement of support by a certified athletic trainer and verification of academic standing. The amount of each scholarship is $2,300.00. Applications will be posted on the NATA website approximately September 1. Go to NATA Foundation for additional application information. Deadlines for portions of the application begin in January. Learn more about this scholarship.

**NATA Research & Education Foundation Master's/Doctoral Research Grant**

View more about this grant here.

**Financial Aid**

Tuition scholarships are available to master's candidates and may include appointments at the University of Pittsburgh, NMRL or UPMC Sports Medicine. The yearly scholarships vary.

**Academic Standards**

An average of at least B (GPA=3.00) is required in all courses that make up the MS emphasis in sports medicine. A student who receives a grade lower than a C is required to retake the course according to the School of Health and Rehabilitation Sciences policy.

**Student Scholarship Appointment Standards**

The Department of Sports Medicine and Nutrition, in accordance with the University of Pittsburgh and School of Health and Rehabilitation Sciences, defines a student scholarship as a teaching assistant, teaching fellow, graduate student assistant, or student employee trainee (TA/TS/GSA/SET). Although student scholarship appointments may not be made for more than one year, a student may be reappointed. While it is impossible to guarantee reappointments, most students making satisfactory progress toward a graduate degree and whose teaching or other service performance is satisfactory will receive at least one renewal of their appointment or an offer of other financial assistance. If it is impossible to offer renewal or other appointments, priority will be given to those with superior academic, teaching, and service qualifications.

The criteria for reappointment are the quality of assigned work and academic achievement. Unsatisfactory academic performance is a cumulative GPA below 3.00 or completion of fewer than 9 credits of graduate work per term. As such, students who have a cumulative GPA below 3.00 at the time of scholarship reappointment will not receive reappointment of their scholarship. This policy is in accordance with the University of Pittsburgh Policy Statement for Teaching Assistants, Teaching Fellows, and Graduate Student Assistants.

**Fall Term**

- SPMED 2000 - ANATOMICAL BASIS SPORTS MEDICINE
- SPMED 3000 - RESEARCH SEMINAR SPORTS MEDICINE
- SPMED 3010 - LABORATORY TECHNIQUES 1
Spring Term

- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- SPMED 2010 - PATHOKIN ORTHOPAD/ATHL INJURIES
- SPMED 3020 - LABORATORY TECHNIQUES 2

Fall Term

- SPMED 2020 - MUSCULOSKELETAL ASSESSMENT AND INJURY PREVENTION
- SPMED 2030 - INJURY EPIDEMIOLOGY
- Elective

Spring Term

Students will register for either HRS 2925 Graduate Research or HRS 2926 Scholarly Paper depending on the project that is selected.

- SPMED 2040 - SEMINAR IN SPORTS MEDICINE
- HRS 2925 - GRADUATE RESEARCH
  or
- HRS 2926 - SCHOLARLY PAPER
- Elective

Approved Electives

Students can take 3 credits of elective courses during the fall and spring terms of the second year of the program. The following courses have been approved as electives.

- SPMED 2628 - NUTRITION AND PERFORMANCE WITH LAB
- SPMED 2650 - EXERCISE PHYSIOLOGY
- SPSCI 2100 - ADVANCED HUMAN PERFORMANCE AND TESTING
- SPSCI 2150 - APPLIED SPORTS SCIENCE
- HRS 2921 - CLINICAL INTERNSHIP
- HRS 2922 - TEACHING INTERNSHIP
- HRS 2999 - INDEPENDENT STUDY
- HHD 2390 - NUTRITION IN SPORT AND EXERCISE

Total Credits: 36

Sports Science, MS

In the Summer 2022 the Sports Medicine and Nutrition - Sports Science Concentration, MS was terminated. Students that are currently in the program will be given the option to have their designation remain as an area of concentration or change to the new major.
The Sports Science concentration in the Master of Science in Health and Rehabilitation Sciences program is designed for students seeking graduate training to advance their knowledge and skills related to understanding and improving sports performance. Primary areas of focus pertaining to education and training in sports science, nutrition, sports medicine, and research. The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance. All students will complete a 1-year sports science practical experience with a designated sports team or organization and will also have access to the Sports Medicine and Nutrition research facilities and faculty.

For more information, please contact:
Katelyn Allison, PhD, ACSM EP-C
Program Director, MS in Sports Science
Department of Sports Medicine and Nutrition

About

The Sports Science (SS) Concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a one-year graduate program housed within the Department of Sports Medicine and Nutrition.

<table>
<thead>
<tr>
<th>Program Summary</th>
</tr>
</thead>
<tbody>
<tr>
<td>33 credits (Full or part-time)</td>
</tr>
<tr>
<td>1-3 years (varies)</td>
</tr>
<tr>
<td>Program starts fall term only</td>
</tr>
</tbody>
</table>

The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance.

Students will have access to the Department of Sports Medicine and Nutrition research facilities and faculty.

Admission Requirements

Prerequisites (satisfactory grades must be earned in all courses)

- Exercise Physiology (3 credits)
- Introduction to Nutrition (3 credits)
- Introduction to Statistics (3 credits)
- Human Anatomy and Physiology I (3 credits)

Applications may be submitted while prerequisite coursework is in progress.

Additional Requirements

Bachelor's degree from an accredited institution.

Minimum undergraduate GPA of 3.0 (out of 4.0). Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

An interview may be required.

Application Procedures
Application Deadline: March 15. If spots are available after the deadline applications will be considered on a rolling basis until the class is full.

Application Deadline for highly competitive practical experience positions: January 15. Some of the practical experiences are highly competitive and may require an on-campus interview. Qualified applicants will be contacted by the department to schedule an interview.

All applicants must:

- Complete the GradCAS application
- Submit the application fee of $50 (U.S.)
- Submit an essay - a description of professional and educational goals that are realistically attainable during enrollment in the graduate program
- Submit three letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study.
- Submit official transcripts from all colleges/universities you have attended
- Additional requirements for international applicants may be found on the SHRS website

Fall Term

- SPSCI 2110 - SPORTS SCIENCE PRACTICUM 1
- SPSCI 2150 - APPLIED SPORTS SCIENCE
  This class will be held on Wednesday 4-6:30pm
- SPSCI 3000 - RESEARCH SEMINAR SPORTS MEDICINE
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
  and
- Fall Electives (select one)
  - SPMED 3010 - LABORATORY TECHNIQUES 1
  or
  - SPSCI 2628 - NUTRITION AND PERFORMANCE WITH LAB
  or
  - SPSCI 2650 - EXERCISE PHYSIOLOGY

Spring Term

- SPSCI 2040 - SEMINAR IN SPORTS MEDICINE
- SPSCI 2100 - ADVANCED HUMAN PERFORMANCE AND TESTING
- SPSCI 2120 - SPORTS SCIENCE PRACTICUM 2
- SPSCI 2140 - SPORTS SCIENCE DATA ANALYTICS
- SPSCI 3020 - LABORATORY TECHNIQUES 2

Summer Term

- SPSCI 2130 - SPORTS SCIENCE PRACTICUM 3

Total Credits: 33

Rehabilitation Science Doctor of Philosophy (PhD)
Doctoral

Rehabilitation Science, PhD

The mission of the PhD program in Rehabilitation Science is to advance the frontiers of knowledge underlying the practice of rehabilitation disciplines and professions through research, teaching, and professional development.

This PhD is an interdisciplinary degree. Students enter the program through the following SHRS departments or programs: Counseling and Behavioral Health, Health Information Management, Occupational Therapy, Physical Therapy, Rehabilitation Science and Technology, and Sports Medicine and Nutrition. Upon degree completion, you will have mastered a specific area of expertise in rehabilitation science and carry an expansive core of related knowledge.

Contact Information:

Courtney Fleck
Assistant to the Associate Dean of Graduate Studies
4032 Forbes Tower
Phone: 412-624-6538
Fax: 412-383-6535
Email: courtney.fleck@pitt.edu
www.shrs.pitt.edu

Program Summary

Program starts in the fall term.

- Statute of limitation is 8 years (with approved credit transfer) or 10 years (without credit transfer)
- Minimum of 72 credits required to graduate (some areas of focus may require more credits)

The Primary Goals of the PhD program in Rehabilitation Science are to:

1. Provide core content in theories and models of rehabilitation, disability and/or assistive technology that underpin rehabilitation science;
2. Provide in-depth, state of the science, content in basic, clinical, social, medical and/or engineering sciences that support the dissertation research;
3. Provide mentorship opportunities for immersion in rehabilitation science research laboratories, projects, and/or ongoing studies;
4. Prepare students to conduct and disseminate original research that will advance rehabilitation science;
5. Promote interdisciplinary research in preparation for becoming a research team member;
6. Promote knowledge, behaviors and skills consistent with the responsible conduct of research;
7. Provide opportunities to teach content in an area of expertise.

The doctoral degree in Rehabilitation Science is an interdisciplinary research degree offered by SHRS and not by individual departments within the school. Graduates of this program will have a specific area of expertise in rehabilitation science as well as a core of interdisciplinary knowledge related to this specific area. They will become the researchers, scholars, teachers, thinkers, and planners in the demanding and changing field of rehabilitation science.

Areas of Study

- Assistive technology
- Biomechanics
- Evidence-based practice and epidemiology of disability
- Functioning, disability and health
- Psychosocial, cultural, and behavioral aspects of rehabilitation and disability
- Health information systems and information technology related to health and rehabilitation sciences
- Neural basis of sensory and motor function and dysfunction
- Neuromuscular aspects of sports injuries
- Health Services Research in Rehabilitation

Admission Requirements/ Application Process

755
Applicants should have a strong interest in rehabilitation research as well as a master's degree in an area related to rehabilitation science. The exceptional student with a bachelor's degree, six or more credits of graduate course work, and compelling clinical/research experience in rehabilitation science will be considered.

Resources, including research mentors, must be available to enable the student to engage in a plan of study in the student's major area of interest in rehabilitation research. Therefore, it is important that there is a match between the research interests of an applicant and an SHRS graduate faculty member.

**Admission Requirements**
Successful applicants will have a minimum GPA of 3.0 (based on a 4.0 scale) in all college work. We do not require the GRE in our admissions applications. Students for whom English is a foreign language must have a minimum Duolingo English Test score of 130, TOEFL score of 100 (internet), 600 (paper); or Band 7.0 on the IELTS (reading and writing modules).

**Application Requirements**
Applicants are required to submit the following:

- Completed GradCAS application
- An essay stating career goals, specific research interests and experience, and clinical interests and experience
- Three to five academics or work-related letters of recommendation (at least one academic reference must be included as well as a letter of support from the identified Research Mentor. The Research Mentor's letter should indicate how the student is known to the Mentor, a description of the student's potential for success in the program and as a rehabilitation scientist, and how the Mentor will support the student's dissertation research project (funding/resources))
- A résumé, including work history, formal education, continuing education, licensing and certification, professional organizations, honors and awards, publications, presentations, and grants
- Transcripts from all U.S. institutions attended
- A course-by-course evaluation with GPA conversion for all higher institutions attended outside the U.S. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. (ECE)
- Verification of English language proficiency. (Duolingo English Test, TOEFL or IELTS scores (for candidates whose native language is not English))
- At least one example of written work (class project, course assignment, publication for which candidate is first author, etc.)

The application deadline for a fall enrollment start date is May 1. For example, a student wishing to enroll in the Fall of 2024 will have an application deadline of May 1, 2024.

Applicants are evaluated by the PhD Admissions Committee. Admission to the program requires (1) the applicant to meet the standards for a PhD student in SHRS, and (2) that a faculty member of the PhD program has an opening for an additional PhD student and agrees to be the Academic Advisor for that applicant.

**For more information about admission to the PhD program contact:**
Office of Admissions  
School of Health and Rehabilitation Sciences  
4044 Forbes Tower  
412-383-6558  
Fax: 412-383-6535  
E-mail: admissions@shrs.pitt.edu  
Website: www.shrs.pitt.edu

**Financial Aid**
Financial assistance is often available from a variety of sources, including graduate student assistantships and teaching assistantships. These assistantships typically require 20 hours per week of research, teaching, or clinical service in exchange for a tuition, health insurance, and an annual stipend. Other forms of financial assistance, including fellowships, may be available through individual faculty grants. Applicants interested in financial support should indicate this on their applications for admission. Acceptance into the PhD program does not assure that a student will be offered financial aid. Depending on the availability of financial aid, the offer of financial support to an applicant may be deferred until a later date. Since financial aid is limited, applicants who desire financial aid are encouraged to apply early.

**Transfer Credits**
If a student wishes to transfer credits, the student and the student's Academic Advisor must submit a Credit Transfer Request Form to Student Services during the first year of study. Transcripts verifying the graduate courses and course descriptions must accompany the petition. The student and student's Academic Advisor will be informed by the Associate Dean of Graduate Studies which courses are acceptable as transfer credits, and this information will be placed in the student's file. Based on University guidelines, students who transfer any credits from a master's degree must complete the PhD within 8 years; students who do not transfer credits must complete the PhD within 10 years.

**Academic Advisor**

Students admitted to the PhD program are assigned an Academic Advisor who is a member of the Graduate Faculty in SHRS. He/she will have research interests similar to the student's interests and will have agreed to be the student's Research Mentor.

The Academic Advisor and student will determine the Plan of Study for the student. They will also plan course work or other experiences to enable the student to demonstrate competency in the proposed content supporting the dissertation, as well as statistics/research methodology content in preparation for the Comprehensive Examination and Dissertation Proposal Defense. It is the responsibility of the Academic Advisor to provide advice to the student during the PhD program, especially with the following steps.

1. Petitioning the Associate Dean of Graduate Studies for transfer of credits
2. Preparing a Plan of Study outlining course work and dissertation credits leading to the PhD Degree
3. Locating research opportunities
4. Revising the Plan of Study as needed as the dissertation topic is formulated
5. Finding a Primary Research Mentor

**Plan of Study**

The student and Academic Advisor will prepare a tentative Plan of Study within the first term of enrollment. If a Plan of Study has not been submitted by the end of the first term, the student will not be permitted to enroll in the subsequent term. The Plan of Study Form can be obtained online on the SHRS website. The Plan of Study should include transfer credits, course work to date, future course work, and dissertation credits leading to the PhD degree. A copy of the Plan of Study will be placed in the student's file. The Plan of Study should be reviewed each term at registration and updated as needed by the student and Academic Advisor. A final updated Plan of Study must be on file in the student's permanent file in Student Services in the term in which the student graduates, or the student cannot be certified by the Registrar for graduation.

**More information regarding the following can be found in the PHD handbook on the SHRS website:**

- SHRS Student Statistical Support
- Annual Review/Progress Reports
- Preliminary Examination
- Primary Research Mentor
- Comprehensive Examination
- Dissertation Proposal Defense
- Admission to Candidacy
- Dissertation
- Electronic thesis and Dissertation (ETD)
- Final Oral Defense of Dissertation
- Continued Use of Data After Leaving the University of Pittsburgh

**Program Requirements**

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree at the University of Pittsburgh. Some areas of focus within the PhD Program may require more than 72 credits. Up to 30 credits taken at the graduate level towards a master's degree may be accepted for transfer. In recognition of graduate study beyond the master's degree, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. Credit transfer requests are evaluated by the Associate Dean of Graduate Studies after matriculation.

In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No undergraduate credits (1000 level courses) may be applied towards the doctoral degree. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.
The overall form and content of each student's program is the responsibility of the Graduate Faculty of SHRS. To carry out this responsibility, each student has an Academic Advisor who, in consultation with the student, plans a program of study and research in accordance with SHRS guidelines.

**Course and Competency Requirements**

The following requirements apply to all PhD in Rehabilitation Science students:

**HRS 3000 - Doctoral Seminar: 4 credits**

**Core Areas**

There are two Core Areas which are required for all students in the PhD in the Rehabilitation Science Program - Methods of Inquiry for Rehabilitation Sciences and Core Concepts in Disability and Rehabilitation Sciences.

All students pursuing a Doctor of Philosophy in Rehabilitation Science degree will be required to demonstrate basic competency in designing and appraising research studies and to demonstrate basic competency in understanding the fundamentals of disability and rehabilitation sciences.

**CORE: Methods of Inquiry for Rehabilitation Sciences**

Upon completion of the courses, students will be able to design a research study to answer a specific research question, including the best design for the question asked, sampling, controls for bias or confounding, and basic statistical analysis. They will be able to critically appraise research and apply it to clinical practice.

**CORE: Core Concepts in Disability and Rehabilitation Sciences**

Upon completion of the modules, students will be able to describe and discuss core concepts in disability and rehabilitation sciences, and analyze and synthesize multiple perspectives on the current and future state-of-the science.

**A grade of B or better for each term of the Methods of Inquiry for Rehabilitation Scientists Core and Core Concepts in Rehabilitation and Disability Core (2 terms, 2 credits)**

- HRS 3002 - Methods of Inquiry I - 1 credit
- HRS 3003 - Core Concepts I - 2 credits
- HRS 3004 - Methods of Inquiry II - 1 credits
- HRS 3005 - Core Concepts II - 2 credits
- HRS 3001 - Dissertation Research: 18 credits

**Preliminary Examination for the Methods of Inquiry Core and the Core Concepts in Rehabilitation and Disability Core requires an unconditional PASS**

**Comprehensive Written and Oral Examinations in the content area of the dissertation requires an unconditional PASS**

**Content in the areas of research design and statistics: 9 credits**

**Participate in the teaching of at least one course**

**Successful completion of manuscript submission requirement**

**Manuscript Submission Requirements**

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum amount of experience in manuscript writing and submission by completing:

- 1 co-author manuscript accepted for publication
- 1 first author manuscript submitted and reviewed by a peer-reviewed journal
- Data-based manuscripts are strongly preferred.

**Successful completion of grant application submission requirement**

**Grant Submission Requirement**
Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum experience with grant writing and submission by completing one of the following:

- Submission and peer-review of a Doctoral Research or Research Fellowship Grant applications (SHRS Doctoral Scholarship Award or NIH or Private Foundations)
- Submission and peer-review of Pilot study grant applications (e.g., foundations, professional societies, the UPMC Rehab Institute Pilot Award)
- Completion of a grant writing course
- Submission of a provisional and non-provisional patent application
- Submission and peer-review of an SBIR like applications, or other options to secure funding for technology development (pitching an idea for commercial development, etc.)

Note: The peer-review may be internal or external peer review. A copy of the summary report from the review should be submitted with a copy of the grant application to Courtney Fleck (Courtney.fleck@pitt.edu) to be kept in the student's file.

Also, note: Submission to the $1,000.00 SHRS scholarship award will NOT qualify for satisfying the grant submission requirement.

**Successful defense of the dissertation research**

Note: PhD students are required to maintain a 3.000 Cumulative GPA and receive a grade of C or better in all courses required by their program curriculum.

Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser/faculty.) Students will not be permitted to register for a course until they attain a C or better in its prerequisites. Failure to receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

The essential mission of the University of Pittsburgh School of Law is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment. Pitt Law excels in teaching the next generation of diverse legal professionals; producing research of impact and contributing to society through public service.

In serving its students, the school is committed to an active and inclusive spirit of community and to the effective, efficient, and congenial provision of service. In teaching, research, and public service, the School of Law aspires to conduct all of its programs at a nationally prominent level of quality that adds luster to the legal and business communities of Pittsburgh; that makes the school relevant to the key needs of this region's private, public, and nonprofit sectors; and that distinguishes it as one of the finest public urban law schools in the United States.

For more than 110 years, the School of Law has prepared students to become excellent attorneys and leaders in both the legal profession and in society. Today, Pitt Law builds on this proud history by training lawyers to take on the opportunities and challenges of 21st century legal practice in the United States and around the world.

At Pitt Law we turn out practice-ready lawyers by providing students with both traditional law school classroom experiences designed to develop and hone analytical and communication skills and with experiential learning opportunities in one of our six clinics, which range in subject area from Environmental Law to Family Law to Health Law. Students who wish to focus their studies can enjoy the numerous benefits of enrolling in one of our five certificate programs, with their opportunities for international externships, instruction in litigation skills by teams of top practicing litigators, or membership on an intellectual property moot court team. Seven joint degree programs, including two partnerships with Carnegie Mellon University, permit students to craft discipline-bridging courses of study in areas including public health, business administration, and international affairs. And Pitt Law students can serve as editors at the award-winning website JURIST, the world's only Web-based, student-powered legal news source, which is viewed weekly by 100,000 viewers and is based right here at the School of Law.

Among its first-professional degrees, the School of Law offers the Juris Doctor (JD) degree; a number of joint degree programs with other schools of the University and Carnegie Mellon University, leading to both a JD and a master's degree; and LLM degrees for foreign law graduates as well as several certificate programs. The School of Law also offers graduate programs leading to a Master of Studies in Law (MSL) and a Doctor of Jurisprudence (SJD) degree. For further information on the graduate programs, see the School of Law-Graduate Programs section of this bulletin.

Contact Information

Financial Aid and Admissions are located in the same office at the University of Pittsburgh School of Law.

Office of Admissions and Financial Aid
Barco Law Building
3900 Forbes Avenue
Pittsburgh, PA 15260

Website: www.law.pitt.edu

General Information: (412) 648-1413
Admissions Information: (412) 648-1805
Financial Aid Information: (412) 648-1415
Fax: (412) 648-1318

Email Admissions: admitlaw@pitt.edu
Email Financial Aid: lawfa@pitt.edu
Office Hours: 8:00 a.m. - 5:00 p.m. Monday through Friday

Walk in appointments are available during office hours; however, scheduling an appointment is encouraged. To schedule an appointment, please email or call our office.

Admissions

Pitt Law is highly competitive, and we base admissions decisions on many factors. Our admissions committee will carefully evaluate your graduate work, professional experience, and undergraduate GPA and make a decision on a rolling basis, or you may request a priority decision within 14 business days. Each program, degree and certificate has various requirements. Please see each program's requirements.

Qualifications for Admission to the Bar: In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

Transfer Students

The University of Pittsburgh School of Law will accept transfer students after those students have successfully completed the first year of academic study at another law school. Applicants must complete the law school application and submit the following:

- Application fee
- Official LSDAS report
- Letter of good standing from the current law school dean
- Certified law school transcript
- Letter of recommendation from a current law school professor
- Final official undergraduate transcript

The deadline for submitting an application is June 1st of every year. Decisions made on transfer students depends on the number of seats available at Pitt Law, the QPA from the current law school and the competitiveness of the current law school.

If admission is granted, the transfer student's completed law school work will be evaluated for transfer credit in light of the curricular offerings at Pitt Law. Only up to 32 transfer credits will be accepted. However, only up to 29 credits will be accepted in the case of (1) a transfer student admitted from a U.S. law school that is not approved by the American Bar Association, (2) a transfer student who is a graduate of a foreign law school and who is admitted after completion of the Pitt Law LL.M. program, or (3) a transfer student who has not completed the Pitt Law LL.M. program and who is a graduate of a foreign law school for law school work done outside of the United States. All transferred credits must comply with the restrictions in ABA Standard 505.

In keeping with the requirements of The Order of the Coif, students are eligible for Coif membership only if they complete at least 75% of their law studies in graded courses. For transfer students, any credits transferred without grades will not count toward this requirement.

Visiting Students

A student may apply to visit at Pitt Law if he/she has completed two years of law study at another law school and has the permission of the dean of their current school. Applicants must complete the law school application and submit the following:

- Application fee
- Copy of your LSDAS report
- Letter from the dean stating the third year at Pitt Law will count toward a degree from the previous school
- Certified law school transcript.

The deadline for submitting an application is June 1st of every year. Decisions made on visiting students depends on the number of seats available at Pitt Law, the QPA from the current law school and the competitiveness of the current law school.

Scholarships and Financial Aid
All admitted students are reviewed for merit scholarship awards at time of admissions to Pitt Law. The merit scholarships are renewable for the second and third years of law school provided the recipient maintains a cumulative grade point average of 2.8 in their legal studies. Scholarship renewal review is conducted at the end of the academic year. Students whose scholarship is not renewed may request to have their scholarship reinstated at any time based upon earning the cumulative 2.8 grade point average in their legal studies.

Approximately 70 percent of the student body receives scholarship funds from the School of Law in the form of merit or need-based scholarship awards. The Law School offers various merit scholarships at the time of admissions. Some scholarship require an additional application and others are based on the materials submitted in your admissions application. If admitted, you will be emailed any scholarship application that requires additional materials.

Please visit the Pitt Law website for more details on available scholarships or contact the School of Law Financial Aid Office.

**Loans**

For most students the major portion of law school costs are met through the Federal Unsubsidized Stafford Loan, Federal Graduate PLUS Loan, and alternative educational loan programs.

Generally, to be considered for an educational loan as a law student, you must:

- Complete the Free Application for Federal Student Aid (FAFSA)
- Be a U.S. Citizen, permanent resident, or other eligible non-citizen
- Enrolled at least half-time in a degree program
- Registered with the Selective Service, if required
- Not owe a refund on a federal grant or be in default on a prior federal loan
- Maintain Satisfactory Academic Progress.

**Loan Counseling**

Before federal loan funds can be released, all incoming students must complete a Loan Entrance Counseling session, regardless of whether they have borrowed in the past. This counseling session is a federal requirement for all students to insure that they understand their rights and responsibilities as a borrower. Loan counseling can be completed online at www.studentloans.gov.

All students who have borrowed through the Federal Loan Program are required to attend a Loan Exit Counseling session before they graduate or drop below half time. The counseling sessions will be schedule in April for all third year students. All third year students will receive notification of the time of the counseling sessions. The counseling sessions informs students of their rights and responsibilities as a borrower as well as giving students information on their repayment options.

**Flex-time Program**

The flex-time program is offered to students whose outside obligations necessitate a more flexible program of study than is traditionally available. All classes are still held during the daytime; however, hours may be planned according to personal needs and interests. The pace is intended to be less strenuous than the regular program. Course loads are optimally designed to result in graduation in four years rather than three with no fewer than 10 credits per semester. The option to accelerate is also available to flex-time students after the first year of study. Flex-time students are still required to pay full tuition. Applicants to the flex-program must include a letter with their application explaining their individual circumstances. The application process is otherwise the same.

Please note that flex-time is not a part-time program.

**Academic Standards**

The School of Law Policy on Written Work for Credit, its Standards of Academic Integrity, the Grading Guidelines, and other academic policies of the school are included in the Academic Rules section of the School of Law's web site.
Professional and Career Development

The Professional Development Office is dedicated to providing students and graduates with the information and tools necessary for successful career development and advancement. Our office assists students and graduates in their pursuit of careers in a wide variety of settings, including private law firms, public interest organizations, government agencies, corporate and business environments, judicial clerkships, academia, and non-traditional careers.

Through an extensive array of services including individual counseling, educational programming, interviewing opportunities, printed and online resources, job posting databases, and a substantial alumni network, the PDO helps educate students and graduates for a lifetime of successful career management.

The PDO also serves as an intermediary between prospective employers and law students. By posting job vacancies, scheduling on-campus interviews, sponsoring programs, and participating in and promoting off-campus job fairs, we provide a range of employment prospects. Through ongoing outreach, the PDO Staff endeavors to create ever-increasing employer interest in Pitt Law students and graduates.

Each student will meet with a Career Counselor during their first year and is encouraged to meet with the counselor as often as needed. As a student begins to develop his or her legal career path they are able to work with an PDO counselor whose background mirrors the student's desired path. Our office is open Monday- Friday 8:30 a.m. - 5:00 p.m. Additionally, PDO has daily walk-in hours and hosts "Facetime" in the student lounge.

Programs and Course Offerings

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

School of Law's Programs

You expect the Juris Doctor (JD) program at Pitt Law to offer a solid foundation in the basics of legal education. You might not expect the opportunity to specialize in areas like environmental and energy law; health law; and intellectual property, technology, and innovation law.

You might not expect to be able to pursue both a JD and a second master's degree at another Pitt school-in an area such as bioethics, business, public health, and social work-or at nearby Carnegie Mellon University in less time than it would normally take to complete two consecutive degrees.

You might not expect a 30-credit Master of Studies in Law advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree. Or a Master of Laws degree to provide foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year. Or even a completely-online Health Care Compliance Online Graduate Certificate Program developed by experts in compliance, law, and online education.

And you might not expect how quickly and the extent to which you'll get to apply those classroom lessons. Assisting the public through work with a clinic (health law, elder law, the environment, immigration, and more); serving as a full-time extern on Capitol Hill or throughout Washington, D.C., as part of the Semester in D.C. Program; interning with a federal agency, nonprofit, or corporation; and participating in a national or international moot court competition are just some of the opportunities you'll have to practice your skills and hone your expertise even before you graduate.

Certificate
Law - Environmental and Energy Law Programs

The School of Law is currently in the process of transitioning its longstanding Environmental Law, Science & Policy Certificate Program into a new Energy & Environmental Law Area of Concentration:

Students who were admitted with the Class of 2016 or earlier classes can choose either to pursue the Certificate or the Area of Concentration. Whichever choice a student makes, the student must register for, and complete the requirements of, the chosen program in order to have completion of that program reflected on their transcripts.

Students who are admitted with the Class of 2017 or later classes may only enroll in the Area of Concentration.

The law around the development, sale, use and preservation of natural resources is the practice framework for energy and environmental lawyers. Pitt Law offers a flexible concentration that allows students to pursue transactional, regulatory, litigation, or policy-based courses in the area of energy & environmental law. Students pursuing this concentration may explore the law of shale plays, utility law, international commercial transactions, pollution control laws, conservation statutes, renewable energy incentives, and climate law and policy.

Energy and environmental law is often practiced in or through interactions with administrative agencies and tribunals. The Concentration exposes students to administrative decisionmaking, statutory interpretation, rulemaking and adjudication, and judicial review of agency decisions.

Area of Concentration

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students may pursue this concentration by taking foundational courses in environmental or energy law, 5-6 credits of electives, and 4-6 skills-based credits.

Please note that this program may require that you complete an internship, externship, or other field work at a facility or facilities external to the University and that such facility or facilities may require a criminal background check, an Act 33/34 clearance (if applicable), and perhaps a drug screen to determine whether you are qualified to participate.

- LAW 5340 - ENVIRONMENTAL LAW
  Or
- LAW 5038 - ENERGY LAW AND REGULATION
  Elective Courses (5-6 credits required)

Law - Health Law Certificate

Students enrolled in a degree program at the University of Pittsburgh School of Law can develop an expertise in the rapidly changing, steadily growing field of health law through the Law School's Health Law Certificate Program.

Pitt's program, one of the oldest in the country, is intended to give students interested in health law a basic grounding in the field, complemented by clinical experience and more in-depth study of advanced topics and closely related areas of law. Students are encouraged to obtain the same broad background in law expected of all graduates for the University of Pittsburgh School of Law.

The health care industry comprises more than one-sixth of the entire economy—larger even than the automobile industry. It is also a large consumer of legal services. Law firms ranging from the largest to the smallest provide legal services to hospitals, health insurance companies, nursing homes, physicians' practices, home health agencies, and pharmaceutical and device manufacturers, to name some of the more prominent. In addition, many federal and state agencies and many of the larger providers of health care goods and services employ a large number of lawyers in house. Although there are a few areas that are substantively unique—such as Medicare and Medicaid reimbursement, certificate of need requirements, and fraud and abuse prohibitions—much of health law involves the application of other areas of law, such as corporate law, employment law, and real estate law, to the health care industry's special circumstances.

The Health Law Program provides students with a strong foundation in health law that will enable them to practice in a variety of contexts, including law firms, health care management firms and insurers, government, and health care institutions. A combination of classroom and skills components acquaints students with everything from complex business and legal transactions, to bioethics and patient care issues, to the variety of legal issues that arise in the operation of a health care institution. Students gain hands-on experience in these areas through their work in the Law School's clinics and practicums, and in externships and summer jobs available in the health care setting.

In addition to courses taught by regular law school faculty, leading practitioners in various fields of health law such as fraud and abuse, business transactions, compliance, disabilities law, nonprofit organizations, and privacy teach courses designed to relate theory to practice.

Requirements

The Health Law Certificate Program is an educational program of concentration in health law for students in their second and third years of the JD curriculum. Admission is available to all students entering their second year in the JD program.

Students must complete the following requirements to receive a Certificate in Health Law:

- Complete a minimum of 18 credits in courses in health law, including Health Law and Policy, and Current Issues in Health Law;
- Write their faculty-supervised paper on a topic in health law;
- Complete a clinic, externship, or practicum;
- Take a minimum of two health law electives.
  
  Required Level Courses (register for 1 course)
  - LAW 5395 - HEALTH LAW AND POLICY
  
  Core Elective Courses (register for 2 courses)
  - LAW 5464 - BIOETHICS AND LAW *
  - LAW 5811 - HEALTH CARE BUSINESS TRANSACTIONS *
  - LAW 5284 - HEALTH CARE COMPLIANCE *
  - LAW 5089 - PUBLIC HEALTH LAW *
  
  Skills Course (register for at least 2 credits)
  - LAW 5955 - D.C. EXTERNSHIP
  - LAW 5391 - ELDER LAW CLINIC
  - LAW 5393 - HEALTH LAW CLINIC
  - LAW 5497 - HEALTH LAW PRACTICUM: ADR
  - LAW 5538 - MEDICARE & MEDICAID PRACTICUM
  - LAW 5875 - SOCIAL SECURITY DISABILITY PRACTICUM
  - LAW 5973 - VETERAN'S PRACTICUM
  
  National Health Law Transactional Competition
Additional Electives (register for at least 2 related courses)

- LAW 5251 - BIOTECHNOLOGY LAW
- LAW 5212 - BUSINESS PLANNING, ENTREPRENEURSHIP AND TECHNOLOGY
- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5672 - IMPLICIT BIAS IN HEALTH CARE *
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- HPM 2133 - LAW IN PUBLIC HEALTH PRACTICE
- Law in Public Health Practicum (GSPH)
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION

- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5313 - REPRDCTV LAW & POLICY
- LAW 5201 - ADMINISTRATIVE LAW
- LAW 5731 - CURRENT ISSUES IN HEALTH LAW

* This course may be used to satisfy the Additional Electives requirement or the Core Elective requirement, but not both.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 18

**Law - Intellectual Property, Technology & Innovation Law**

The Intellectual Property and Innovation Law Area of Concentration is designed to allow students to obtain a focused introduction to these bodies of law and practice while simultaneously getting a broad grounding in modern law practice generally. No scientific or technical background is required to pursue the Area of Concentration or to practice law in any of the related fields, though students who wish to practice law as a patent prosecutor do need to have an engineering degree or other, similar technical qualification.

Students may pursue this concentration by taking foundational courses in intellectual property law, 5-6 credits of electives, and 4-6 skills-based credits.

**Certificate Requirements**

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students must have a minimum of 14 credits and meet the below course requirements. In addition, students can opt to use one of the following as a Skills Component:

- Giles Sutherland Rich Moot Court Competition (1 credit)
- Cardozo/BMI Moot Court Competition (1 credit)
- Externships with government agencies or other organizations that focus on intellectual property and/or technology law, practice, and/or policy (4 credits)
- Semester in DC externship with a focus on intellectual property and/or technology law, practice, and/or policy (13 credits)

**Foundational Courses (2 courses totaling 5-6 credits required)**

- LAW 5328 - COPYRIGHT *
- LAW 5260 - INTELLECTUAL PROPERTY *
- LAW 5210 - PATENT LAW *
- LAW 5694 - TRADEMARK LAW *

* may be taken as elective if not taken as a foundational

**Elective Courses (5-6 credits required)**

- LAW 5895 - ARTIFICIAL INTEL & LGL RES SEM
- LAW 5251 - BIOTECHNOLOGY LAW
Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - International and Comparative Law Certificate

The International & Comparative Law Certificate program is intended to provide a foundation for careers and further study in the application of legal regimes to transnational and international relationships. Students should keep in mind that in order to be a good international or comparative lawyer, one must first be a good domestic lawyer. Thus, students in the certificate program are expected and encouraged to obtain the same broad background in law expected of all graduates of the University of Pittsburgh School of Law.

Requirements

To receive the International & Comparative Law Certificate upon graduation, students must complete:

- the required courses (below);
- satisfy the Upper Level Writing Requirement (ULW) with a paper focused on international or comparative law content;
- complete twelve credits of elective courses (below);
- and attend two designated CILE programs in each of the candidate's 2L and 3L years at the School of Law.

The courses that qualify as international and comparative law electives for purposes of the Certificate requirements are determined annually. In general, a course will satisfy the elective requirement if at least 25 percent of its content is in the areas of international or comparative law. Listed below are courses offered in recent years that have satisfied this elective requirement - you should consult the schedule of courses for any given term to determine what courses are being offered and the credits awarded. For new course offerings, you should contact CILE to determine if a given course will satisfy the elective requirement. Courses in the School of Law that do not have a predominantly international or comparative law subject matter may be approved for elective purposes on a case-by-case basis at the discretion of the CILE Academic Director if, in practice, the student's work in the class included that element in a particularly substantial manner; for example, the student satisfies the written requirement of a "W" course with a paper using a comparative law approach. (Note this would not be permitted if the given paper was also being used to satisfy the ULW requirement.)
Coursework outside the School of Law may also be eligible to satisfy up to 3 elective credits if the CILE Academic Director determines that at least 25 percent of its content is in international topics, that it otherwise is an appropriate course for these purposes, and the use of these credits has been approved by the Associate Dean of the School of Law as qualifying under School policy for the six credits of non-School of Law coursework permitted to be credited towards the JD degree. Proposed elective courses outside the School of Law must be approved in advance by the CILE Academic Director as well as in accordance with general School of Law policies.

**Required Courses**
- LAW 5226 - INTERNATIONAL LAW
- LAW 5225 - INTERNATIONAL BUSINESS TRANSACTIONS

**Example Electives**
- LAW 5618 - ARABIC FOR LAWYERS 1
- LAW 5619 - ARABIC FOR LAWYERS 2
- LAW 5124 - THE CIVIL LAW TRADITION IN U.S. COURTS
- LAW 5304 - COMMERCIAL TRANSACTIONS
- LAW 5213 - CONFLICT OF LAWS
- LAW 5307 - FOREIGN AFFAIRS, INTERNATIONAL LAW AND THE CONSTITUTION
- LAW 5469 - FRENCH FOR LAWYERS 1
- LAW 5471 - FRENCH FOR LAWYERS 2
- LAW 5986 - INTERNATIONAL ARBITRATION SEMINAR
- LAW 5043 - INTERNATIONAL COMMERCIAL ARBITRATION
- LAW 5275 - INTERNATIONAL AND FOREIGN LEGAL RESEARCH
- LAW 5653 - INTERNATIONAL HUMAN RIGHTS
- LAW 5547 - INTL INTELLECTUAL PROPERTY LAW
- LAW 5858 - INTERNATIONAL SALES SEMINAR
- LAW 5841 - INTERNATIONAL TAX
- LAW 5365 - INTRODUCTION TO RUSSIAN AND UZBEKISTAN LEGAL SYSTEM
- LAW 5866 - ISLAMIC LAW AND JURISPRUDENCE SEMINAR
- LAW 5873 - PRIVATE INTERNATIONAL LAW SEMINAR
- LAW 5475 - SPANISH FOR LAWYERS 1
- LAW 5476 - SPANISH FOR LAWYERS 2
- LAW 5694 - TRADEMARK LAW
- LAW 5453 - TRANSNATIONAL LITIGATION

**Note**

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

**Law - J.G. Civil Litigation Certificate Program**

**In the Fall of 2021, the J.G. Civil Litigation Certificate Program was inactive for students to enroll in. Students who were enrolled prior to the Fall 2021 must complete the program by Spring 2023 term.**

Are you drawn to the real life drama of the courtroom? Do you have dreams of becoming a trial attorney? If so, then the University of Pittsburgh School of Law (PittLaw) may just be the place for you. Through its unique John P. Gismondi Civil Litigation Certificate Program, PittLaw can provide you with a unique curriculum devoted exclusively to training the trial lawyers of tomorrow.

During the first year of law school, all students take the same courses. Those students who wish to register for the Gismondi program, do so at the beginning of their second year of law school. During their second and third years, all students enrolled in the certificate program will take certain required foundational core courses, a clinic or practicum, as well as a number of specialized classes. The heart of the Gismondi program is a
collection of specialized courses taught exclusively by a pre eminent group of practicing trial attorneys whose insight and experience offer an invaluable perspective in the classroom. Together with our core courses, these select courses provide a level and depth of litigation training unlike that available at most any other law school.

In each of these specialized skills courses, class size is kept small so as to enrich the learning experience. Students not only are taught legal rules and principles in a typical lecture format, but more importantly, they are assigned to "role play" in a variety of real world litigation scenarios, each designed to develop specific skills which are essential to successful trial work.

Students complete their training by taking a required litigation skills clinic or practicum selected from this group of options: Civil Practice Clinic (Health Law or Elder Law), Tax Clinic, Immigration Clinic, Environmental Law Clinic, PA Practice Practicum, Lawyering III Clinic, Unemployment Compensation Practicum, Criminal Prosecution Practicum, Veterans Practicum or Family Law Clinic. In all of these clinics, students have the potential of representing real clients in actual court proceedings.

The students in the John P. Gismondi Civil Litigation Certificate Program will complete their law school education having developed a set of skills which better prepares them to do courtroom work than traditional law school graduates, and that advantage, in turn, makes the Gismondi certificate students more attractive to law firms seeking to hire young and enthusiastic litigation associates.

Certificate Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this certificate, students must complete the Core Courses and Required Specialized Skills Courses listed below. In addition, students must take a litigation skills clinic or practicum, or a combination thereof, approved by the Director of Civil Litigation Program for a minimum of four credits.

Students must participate in the Murray S. Love Trial Moot Court Program during their second or third year or the Interscholastic Mock Trial Team (enroll in the attendant seminar Mock Trial Strategy and Practice).

Students must participate in the Program's Court Observation. Students will spend a day organized by the Academy of Trial Lawyers of Allegheny County observing court proceedings. Students will fulfill this requirement in their third year. Students must sign up with the Program Director in order to participate on one of these dates.

Students are required to complete an Upper Level Writing Requirement of 2 credits. Students may satisfy this requirement by taking any seminar or undertaking an independent study project if the paper they write is on an unresolved litigation related issue and the issue is approved by the Director of the Civil Litigation Certificate Program and the faculty member supervising the seminar or independent study project. The paper must comply also with applicable requirements of the professor and the Student Handbook relating to the Upper Level Writing Requirement.

- LAW 5103 - EVIDENCE
- LAW 5407 - TRIAL ADVOCACY
  Or
- LAW 5616 - MOCK TRIAL STRATEGY AND PRACTICE
- LAW 5129 - FEDL COURTS & FEDL LITIGATION
  Or
- LAW 5240 - PENNSYLVANIA PRACTICE
  Students must take four of these five courses:
- LAW 5320 - LITIGATION STRATEGY AND PLANNING
- LAW 5295 - EXPERT WITNESS
- LAW 5236 - PRE-TRIAL PRACTICE-PLEADINGS AND DISCOVERY
- LAW 5223 - ADVANCED TRIAL EVIDENCE
- LAW 5197 - ADVANCED PENNSYLVANIA TORT PRACTICE

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Public Policy Concentration
You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program in the spring semester of your 2L or 3L year.

While law students learn many skills that are useful for policy-related work, they do not typically learn how to apply those skills in a policy context, for example by analyzing a government agency report, mapping the stakeholders on a particular issue, preparing questions for a Senate hearing, writing a short policy brief, or developing an advocacy campaign.

The Semester in DC Program Policy Track is designed to fill this gap by teaching you how to apply your legal advocacy, research, and writing skills in the policy context, so that you can successfully engage in policy-related work after graduation. The Policy Track is offered each spring semester jointly with the Graduate School of Public and International Affairs (GSPIA) at Pitt's Washington Center in downtown Washington, DC.

Highlights of the Semester in DC Program Policy Track include:

- A policy-related externship with a government or nonprofit organization in Washington, DC
- Classes that are focused on learning from policy experts who regularly visit as guest speakers and on attaining pragmatic policy advocacy, analysis, and writing skills
- Joint classes with GSPIA students, so that both policy and law perspectives are represented in each class
- An individual alumni mentor for each student, as well as connections with Law and GSPIA's alumni network of hundreds of attorneys and policy practitioners in the Washington, DC area

Semester in DC Program alumni have gone on to do all kinds of policy work after graduation, including positions:

- With the U.S. Departments of State and Health and Human Services
- With U.S. Senate and House offices
- In healthcare policy for Johnson & Johnson, the Maryland Department of Health, and the Legal Resource Center for Public Health Policy
- In environmental policy for the Sierra Club, the Environmental Investigation Agency, and Voices for Progress
- In child/family policy for the Children's Law Center and First Focus
- In labor policy for the AFL-CIO

Requirements

You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program after taking the required 1L Legislation and Regulation course.

The Public Policy Concentration requires students to earn 15 credits in the policy-related classes listed below. Students will have already completed the 3-credit foundational course in Legislation and Regulation in their 1L year. Students can complete the 12 remaining credits by participating in the Semester in DC Program Policy Track, which offers the listed courses. Only the courses listed below may be used to fulfill the requirements of this concentration; other courses may not be substituted.

**Foundational Course**

- LAW 5032 - LEGISLATION AND REGULATION

**Electives (up to 7 credits)**

- LAW 5877 - PUBLIC POLICY SEMINAR
- LAW 5666 - LOBBYING AND ADVOCACY
- LAW 5668 - POLICY COLLOQUIUM
  
or
- LAW 5954 - D.C. SEMINAR
  
(Students may apply 1 credit from the DC Seminar to the Public Policy Concentration if their seminar papers are approved in advance as policy-focused.)

**Skills Component (6 credits required)**

- LAW 5667 - POLICY EXTERNSHIP *
- LAW 5955 - D.C. EXTERNSHIP *
  
* must be approved in advance as policy focused.

**Note**
For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

**Law - Tax Law Program**

The Area of Concentration in Tax Law is intended to provide students with a solid foundation in tax law that can be used either to enter a career in tax law, as a basis for pursuing further study in tax law, or as an adjunct to a career in another area of law. Tax law is unique in that it intersects with every area of the law-from energy and environmental law to corporate law to health law to personal injury law, just to name a few examples. Knowledge of tax law is thus important whether one wishes to specialize in tax law or whether one wishes to gain a deeper knowledge of tax law to improve skills in another area of law (e.g., in advising corporations, partnerships, and other businesses).

Students may pursue this concentration by taking a foundational course in tax law, six credits of elective courses, and three credits of skills-based courses.

**Area of Concentration**

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, the Tax Law Area of Concentration requires a minimum of 13 credits. The requirements for the program are divided into three categories-foundational, elective, and skills. Students must take a foundational course in tax law, 6 credits from among the listed elective courses, and 3 credits from among the listed skills courses.

**Foundational Course (Required)**
- LAW 5105 - FEDERAL INCOME TAXATION

**Elective Courses (6 credits required)**
- LAW 5817 - CORPORATE TAXATION
- LAW 5371 - PARTNERSHIP TAXATION
- LAW 5259 - ESTATE AND GIFT TAX
- LAW 5841 - INTERNATIONAL TAX *
- LAW 5325 - FEDERAL TAX PRACTICE AND PROCEDURE
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5273 - STATE AND LOCAL TAX
- LAW 5511 - TAX LAW & POLICY SEMINAR
- LAW 5931 - PITTSBURGH TAX REVIEW
  *Only one credit maximum of work on the Pittsburgh Tax Review can count toward the concentration.

**Skills Component (3 credits required)**
- LAW 5425 - LOW-INCOME TAX CLINIC
  Tax Law Moot Court Competition
- LAW 5414 - ESTATE PLANNING
  Externship in the area of tax law
- LAW 5955 - D.C. EXTERNSHIP
  * may be alternately used as a Skills Component

**Note**

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

**Doctoral**

**Law - Juridical Science, SJD**

**Program Information**
The Doctor of Juridical Science (SJD) is the Law School's most advanced degree, which is designed for legal academics who wish to pursue advanced independent study, research and writing. The Law School's SJD program offers candidates the opportunity to become active members of a vibrant legal community.

Degree Requirements

The SJD is a research degree. There is no formal requirement for candidates to pursue course work, whether for credit or otherwise, other than required participation in a non-credit, ungraded colloquium for SJD students during their first year in the program. However, a candidate may be required by his advisor to take or audit courses and participate in seminars and discussions which will further the student's understanding of his or her field of knowledge and its relation to other fields. Each candidate will be allowed 2-4 years to complete the program, the first year of which must be spent in residency at the University of Pittsburgh School of Law. The year of residency is in addition to the LLM year for Pitt Law LLM graduates. A candidate is required to conduct rigorous research and produce an original dissertation that will contribute significantly to legal scholarship and further understanding of the law. Specifically, a candidate is required to submit a dissertation overview, defend that overview, submit a doctoral dissertation, and successfully defend the dissertation. The SJD degree must be completed under the supervision of a faculty member who has consented to serve as the faculty advisor.

Graduate Certificate

Law - Corporate Compliance Certificate

The Online Graduate Certificate in Corporate Compliance seeks to fill a growing need for compliance professionals and leverage the Law School's reputation and expertise in this area.

As international trade and globalization continues to grow, U.S. corporations doing business abroad and foreign corporations doing business with U.S. corporations find themselves subject to a multitude of U.S. legal compliance requirements. Organizations are starting to recognize reputational risk can be as great as or greater than strategic, financial or operational risks. As a result, compliance programs are growing as many organizations implement them to prevent and detect misconduct and to protect the interests of employees, shareholders, and businesses and to guard against reputational risk.

Compliance professionals are key to ensuring that organizations are complying with their own policies and procedures as well as applicable legal statutes, regulations, and judicial decisions.

The Online Graduate Certificate in Corporate Compliance is designed for U.S. and foreign corporate employees who work or wish to work in the corporate compliance area, such as lawyers, paralegals, and other compliance professionals in finance, internal audit, human resources and environmental sustainability, in order to enhance their careers by expanding their knowledge, skills, and professional understanding of corporate compliance.

The program will cover key foundational topics in corporate compliance, and it will enhance the ability of students to understand the fundamentals of corporate compliance, to design a compliance program as well as related policies and procedures, and to evaluate the effectiveness of ethics and compliance programs. Faculty - both full-time and part-time - who teach or practice corporate compliance will teach the four mandatory and one elective 3-credit courses over the course of the 40-week program. The required curriculum will cover legal aspects of corporate compliance; ethics and compliance; designing, measuring effectiveness, and auditing compliance programs; and conducting investigations and risk assessments. In addition, there will be several electives available to students who wish to specialize in a particular area of compliance such as Foreign Corrupt Practices Act, Antitrust, International Trade and Export, Pharmaceutical and Medical Devices, and Securities compliance.

Students will learn how to establish an effective program to monitor organizational misconduct; to ensure that employees and third parties have mechanisms in place to report misconduct and seek advice; to audit compliance and ethics risks; and to evaluate the effectiveness of the ethics and compliance program as well as other issues around public company disclosures and compliance programs. The potential clientele discussed will include individuals, as well as for-profit and nonprofit corporations, and hybrid and governmental entities.

The program will help position students for leadership in:

- Corporate compliance and ethics
- Regulatory affairs
• Compliance program training
• Policy development, including CSR (Corporate Social Responsibility) and ESG (Environmental, Social and Governance)
• Auditing and monitoring
• Financial fraud
• Environmental and other corporate compliance

Curriculum:

• LAW - Conducting Investigations and Risk Assessments
• LAW - Designing, Measuring Effectiveness, and Auditing Compliance Programs (based on US DOJ guidance)
• LAW - Ethics and Compliance
• LAW - Legal Aspects of Corporate Compliance
• LAW - Special Topics in Corporate Compliance

Law - Certificate in Disability Legal Studies

The law exerts a powerful and direct impact on the lives of persons with disabilities. It is estimated that close to 20 percent of the US population, nearly 54 million people, have a disability, with a dramatic increase in the proportion since 1970. People with disabilities comprise one of the largest, least employed, and most disenfranchised minority groups in society.

This 15-credit certificate program is a unique effort to provide legal education to those working in the administration of and provision of services in disabilities programs. Administrators, educators, health practitioners, advocates, social workers, architects, city planners, attorneys, and business leaders, among others, could potentially benefit from the program’s instructional content.

Requirements

Students enrolled in the certificate program are required to take four core courses.

• LAW 2814 - U.S. LEGAL SYSTEM
• LAW 5395 - HEALTH LAW AND POLICY
• LAW 5339 - LAW OF DISABILITY DISCRIMINATION
• LAW 5028 - TORTS
  Or another first-semester required course if the Certificate Director deems it preferable for a particular student's interest

The remaining 3 credits (minimum) may be satisfied by any of the following (or similar) courses which are offered as instructor availability permits:

• LAW 5464 - BIOETHICS AND LAW
• LAW 5283 - MENTAL HEALTH LAW

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Health Care Compliance Online Graduate Certificate Program

The Health Care Compliance Graduate Certificate Program is a fully online, accelerated 10-month graduate certificate program designed for working professionals. This advanced, accelerated program will support you as you take on more strategic compliance roles. In this program, you will:

• Learn the relevant law, practical applications of compliance, best practices and explore current issues;
• Interact with expert faculty-professors from the School of Law and School of Public Health, current and former federal regulators, and compliance industry experts;
• Network and collaborate with your peers in other industries and locations through innovative online applications; and
• Work on weekly assignments when and where you choose.

This program is designed for:

• Compliance professionals who wish to enhance their understanding and professional development;
• Attorneys who wish to acquire an appreciation of the compliance industry, client needs, and issues;
• Health care professionals who must understand compliance;
• Industry administrators and leaders; and/or
• Those interested in an exciting career change.

HCC Online course work is asynchronous, meaning there are no scheduled meeting times or locations. You will complete each course in the program within eight weeks, working through weekly modules, based on your own schedule and from any location.

The objectives of the Health Care Compliance Online program are to:

• Provide an understanding of the laws that shape the health care industry in general, and compliance in particular;
• Help students acquire a deeper understanding of the regulatory context of compliance;
• Help students develop the skills and knowledge necessary to identify compliance issues, guide change, and navigate complexity while supporting an ethical culture;
• Identify best practices in compliance management;
• Enhance critical thinking and problem solving skills in a compliance context;
• Help students acquire knowledge and skills to manage conflict;
• Improve students' communication and presentation skills; and
• Facilitate peer-to-peer learning and networking opportunities.

Requirements

Applicants must have earned a baccalaureate degree at an accredited institution. Admissions decisions will be made based on professional experience, academic credentials, and a personal statement. In some instances an interview (online or via phone) may be required.

To apply for the program, complete the Health Care Compliance Online Application available at Pitt Online's website.

Note: Please visit the Pitt Online State Authorization page to be sure your state is authorized to enroll students online. Currently, pursuant to state laws and regulations, online programs at the School of Law are authorized to enroll students from all states with the exception of: Arkansas, Kentucky, Minnesota, Missouri, Oregon, Washington State. Maryland Residents: the University of Pittsburgh is registered with the Maryland Higher Education Commission.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School website.

Law - Human Resources Law Certificate

The program will be a ten-month, accelerated program. It will offer five courses designed to be taken in order. Each is eight weeks in length. At the completion of the program, students will be eligible to sit for some of the industry-based human resources certification exams offered by the Society for Human Resource Management (SHRM) and the HR Certification Institute.

The HRLC courses will be taught by industry experts and Pitt Law Faculty. In addition, the program will seek to create an advisory committee composed of Pitt law and business faculty, program faculty, and human resources professionals.

We do not expect an increase in need for student aid and minimal or no need for additional library resources. As this is a distance-learning program, we do not expect there to be any significant impact on office, laboratory, or classroom space. Instructors will need to coordinate with the Barco Law Library staff concerning planned student projects to ensure that digital resources will be available remotely to students where ever that may be. The Library staff can arrange for 30 students to access the library's existing Lexis and Westlaw databases, and by March 2019 all of the databases the Law
Library subscribes to will be available to all students, whether on-campus or off-campus. All students in the program will have a "library liaison" at the Barco Law Library available to them for assistance.

Required Courses

**Law - International Business Law Graduate Certificate**

The IBL Certificate will be a ten-month, accelerated program. It will consist of five courses designed to be taken in order. Each is eight weeks long.

The IBL courses will be taught by experienced legal professionals serving as part-time professors, and by Pitt Law Faculty.

Students in this program will not be eligible for financial aid from the School of Law. As this is a distance-learning program, we expect there will be no impact on office, laboratory, or classroom space. There will be a minimal need for additional library resources. Instructors will need to coordinate with Barco Law Library staff for student projects to ensure that digital resources will be available remotely to students wherever, and in whatever time zone, they may be. Students will have access to the library's existing digital databases. All students in the IBL will be assigned a "library liaison" at the Barco Law Library available to them for assistance.

**Required Courses**

The following five courses are required for the certificate.

- LAW 2001 - INTRODUCTION TO US & INTERNATIONAL BUSINESS LAW
- LAW 2002 - COMMERCIAL ASPECTS OF CROSS-BORDER TRANSACTIONS
- LAW 2003 - SPECIALTY AREAS IN CROSS-BORDER TRANSACTIONS
- LAW 2004 - FOUNDATIONS OF INTERNATIONAL DISPUTE RESOLUTION & LITIGATION
- LAW 2005 - SPECIAL TOPICS IN INTERNATIONAL OR DISPUTE RESOLUTION

**Law - Practical Business Law Graduate Certificate**

The Online Graduate Certificate in Practical Business Law is designed for business employees, for those who wish to work in business, and for paralegals, who seek to enhance their careers by expanding their knowledge, skills, and professional understanding of general business law.

The program will cover key foundational topics in business law, and it will enhance the ability students to understand the fundamentals of business law. Faculty - both full-time and part-time - who teach or in some area of business law will teach the five required 3-credit courses over the course of the 40-week program.

**Requirements:**

- Business Organizations and Tax Law
- Commercial Law and Technology Law
- Human Resources Law
- Regulatory Law
- Dispute Resolution
- LAW 2056 - BUSINESS & TAX LAW
- LAW 2057 - COMMERCIAL & TECHNOLOGY LAW
- LAW 2074 - SELECTED TOPICS IN HUMAN RESOURCES LAW
- LAW 2422 - ALTERNATIVE DISPUTE RESOLUTION

**Total Credits: 15**

**Law - Sports, Entertainment & Arts Law Graduate Certificate**
This online graduate certificate (SEAL) will fill a gap in the legal education market and leverage the strengths of the University of Pittsburgh School of Law, the larger University and its alumni, and the region. Our University and region have long produced leaders in sports, entertainment, and arts, from Panther to Steeler Nation, Fred Rogers to George Romero, and August Wilson to Andy Warhol. In today's rapidly changing, increasingly intersecting, and highly competitive sports, entertainment, and arts industries, leaders also need legal skills, knowledge, understanding and connections to succeed. By launching the SEAL certificate program, Pitt Law will help to ensure that our graduates, University and region will receive their cultural, social and economic return on investment.

The SEAL certificate is a ten-month, accelerated program that will target the market of business, legal and creative professionals who are currently working or planning to work in sports, entertainment, and or arts/sectors, and who wish to expand their legal skills, knowledge and understanding of these industries. These three synergistic sectors present similar legal issues, involving labor and employment, intellectual property, corporate, and commercial transactions law. Pitt Law Faculty with expertise in these fields will oversee the development and implementation of the SEAL courses, which will be taught by regular and adjunct Pitt Law faculty with industry experience.

By combining the study of sports, entertainment, and arts law into one program, the SEAL certificate will seize an opportunity to fill a gap left in the fields of sports, entertainment, and arts law education. Currently, the only programs offered by U.S. law schools that cover all three sectors are costly, in-person, full-time programs limited to lawyers or law students seeking degrees. Although a number of part-time, online programs in these legal fields do now exist, these programs force students to choose one or two sectors, despite the increasing intersection of all three of these competitive industries. By covering the law and providing connections in all three sectors, the SEAL certificate will increase the size of our target market and expand employment opportunities for our graduates. This is an ideal time to launch this program, which would distinguish it as the first online program to cover all three fields, and incoming SEAL students would be well-positioned to apply for impending employment opportunities that will open post-pandemic.

By combining the study of sports, entertainment, and arts law into one program, the SEAL certificate will seize an opportunity to fill a gap left in the fields of sports, entertainment, and arts law education. Currently, the only programs offered by U.S. law schools that cover all three sectors are costly, in-person, full-time programs limited to lawyers or law students seeking degrees. Although a number of part-time, online programs in these legal fields do now exist, these programs force students to choose one or two sectors, despite the increasing intersection of all three of these competitive industries. By covering the law and providing connections in all three sectors, the SEAL certificate will increase the size of our target market and expand employment opportunities for our graduates. This is an ideal time to launch this program, which would distinguish it as the first online program to cover all three fields, and incoming SEAL students would be well-positioned to apply for impending employment opportunities that will open post-pandemic.

The SEAL certificate will also advance the long-term goals of the Law School and University. The program will "Advance Educational Excellence" by preparing our graduates to "lead lives of impact" through the appropriate use of technology and increased and affordable access to professional education. The SEAL program will "Strengthen Communities" by ensuring that our students understand the legal issues that they must address to fully benefit from the economic impact of their work. The program will "Advance Diversity and Inclusion" by empowering our students to serve as social justice warriors, legally protected from discrimination, censorship and exploitation. And the program will allow our students to "Embrace the World" by understanding the international legal issues presented in this truly global industry.

Finally, offering this new program will positively impact existing University programs and students. SEAL students will be able to apply their credits towards fulfilling the requirements in our Master of Studies in Law (MSL) degree. The SEAL program will also leverage opportunities to work with the Pitt Athletic, Music, Studio, and Theater Arts Departments and with the Film and Media Studies Program to increase the social, cultural and economic impact of our University and region.

Course Requirements: 15 Credits

- Law - Intellectual Property in Sports, Entertainment and the Arts
- Law - Introduction to the Law and Business of Sports, Entertainment and the Arts
- Law - Labor & Employment Law in Sports, Entertainment and the Arts
- Law - Organization, Finance & Distribution Law in Sports, Entertainment and the Arts
- Law - Special Topics in Sports, Entertainment and the Arts Law

Joint Degree

Law and Arts Management (Carnegie Mellon), JD/MAM

The University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which arts management and law overlap. This program, spanning four years, prepares you for careers in which arts management and law overlap. You must satisfy both schools' degree requirements, but some credit is given by each school for completing the other school's program.

The joint degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Law Arts Management Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MAM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MAM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Bioethics, JD/MA

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law
The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Pittsburgh, PA 15260

(412) 648-1359
donley@pitt.edu

Requirements

The sequence of the curriculum is designed to allow students maximum flexibility. Students may either take the entire first-year School of Law curriculum intact, or they may take one bioethics course - Theoretical Foundations of Applied Ethics - in place of Criminal Law (which would then be taken in their second year of law school). Students should discuss this plan of study with Prof. Alan Meisel, Director of this joint program.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students acquire familiarity with the clinical setting by

- rounding in specified services with residents, attending physicians, and other health care professionals, including one night on call per service
- participating in twice weekly seminars on medical sociology and clinical ethics and to fulfill those seminar requirements of reading, writing, discussion, and case presentations
- observing ethics consultations and clinical ethics teaching sessions
- completing a self-paced programmed text covering basic medical terminology

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs and in other parts of the University. For an up-to-date list of law school courses considered to be especially appropriate for students in this joint degree program, students should consult the courses listed as electives for the Health Law Certificate Program.
Students in the joint law and bioethics program will ordinarily fulfill the requirements of the Health Law Certificate Program in the law school and may obtain this certificate concurrent with the joint degree.

**Advising**

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

**For Students Interested in Practicing in New York**

Please be advised that students who wish to be admitted to practice in New York should not enroll in this joint degree program unless they limit the number of credits from outside the Law School that count toward their JD degree to no more than 12. See New York Rules of Court § 520(c)(5).

**Credits**

Students enrolled in the joint degree program accomplish in three to four years what would take four or more years if the two degrees were obtained separately. The total required number of credits 100, as compared with 118 credits if the two degrees were taken separately. The 100 credits include 34 credits of specifically prescribed* law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Taken as a joint degree program, the two degrees are ordinarily earned in 7 semesters and one summer.

During at least 5 semesters, joint degree students must be coded by the University Registrar as "primary law." During these semesters, they pay tuition at the Law School rate. They must enroll in at least 10 credits of law school courses.

### Specifically Prescribed Law Courses

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING (Fall Term)
- LAW 5076 - LEGAL ANALYSIS AND WRITING (Spring Term)
- LAW 5028 - TORTS
- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5024 - PROPERTY
- LAW 5061 - PIT T L A W A C A D E M Y (Fall Term)
- LAW 5062 - PITT LAW ACADEMY (Spring Term)
- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2904 - MA THESIS IN BIOETHICS
- BIOETH 2606 - CLINICAL PRACTICUM 2
- BIOETH 2664 - BIOETHICS
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS

Additional credits to complete the graduation requirement may include courses service as a bioethics restricted elective or a bioethics elective.

**Note**

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.
Law and Business Administration (Carnegie Mellon), JD/MBA

The daily interaction of Law and Business in our society presents attorneys, entrepreneurs, and other professionals with a diverse set of challenges arising from public and private institutions, policies, and practices. A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from Carnegie Mellon University Tepper School of Business, which is in the top 20 of all U.S. business schools according to the the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the appropriate School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth-years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Tepper School of Business

To graduate with a JD/Tepper MBA degree students must acquire a total 88 credits from the School of Law and 64 credits (or 192 units) from Tepper. However, completing the MBA degree entitles the student to 15 credits of advanced standing at the School of Law, resulting in an actual total of 73 credits; and completing the JD degree entitles the student to 10 credits (or 30 units) at Tepper, resulting in an actual total of 54 credits (or 162 units). This means that, after a year at the School of Law and a year at Tepper, a student must acquire at least 40 additional credits from the School of Law and 22 credits (or 66 units) in electives from Tepper to graduate with a JD/MBA.

More information can be found on their website.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MBA with the Tepper School of Business). See New York Rules of Court § 520.3(c)(5).

MBA Degree Requirements

The following core courses are required of all full-time MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Total Credits: 45

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Business Administration, JD/MBA

The daily interaction of Law and Business in our society presents attorneys, entrepreneurs, and other professionals with a diverse set of challenges arising from public and private institutions, policies, and practices. A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from the University of Pittsburgh Katz Graduate School of Business, which is in the top 30 of U.S. public business schools according to the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the appropriate School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth-years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level
requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Katz School of Business

To graduate with a JD/Katz MBA degree students must acquire a total of 76 credits from the School of Law and 39 credits from Katz. This means that, after a year at the School of Law and a year at Katz, a student must normally acquire at least 43 additional credits from the School of Law and 3 credits from Katz to graduate with a JD/MBA.

More information can be found on their website.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MBA with the Tepper School of Business). See New York Rules of Court § 520.3(c)(5).

MBA Degree Requirements

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT I
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications
The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- **BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS**
- **BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS**
- **BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS**
- **BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS**
- **BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY**

Total Credits: 45

**Note**

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

**Law and Information Security Policy (Carnegie Mellon), JD/MSISPM**

Building on their longstanding and successful partnership, the University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which management, information security, and law overlap. This joint degree offering is particularly beneficial to many students' careers because legal considerations affect many management and policy decisions, and the practice of law is enhanced by a clear understanding of the policy and security concerns facing the public, private, and nonprofit sectors. Participants in the program will emerge with a broad knowledge of the fundamental intersections of law, government, privacy and information security, and management. The fields of cybersecurity, information privacy, intellectual property law, cybercrime, and other IT-related sectors are growing rapidly. There are many job opportunities in this emerging space. Many of those jobs have legal dimensions and will be filled by people with legal training. Graduates of the joint degree program will be better prepared to compete for those jobs and to succeed in them because of their broader, interdisciplinary training. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Curriculum & Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MSISPM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MSISPM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and International Affairs, JD/MPIA

This program provides rigorous, integrated training for students preparing for a professional career that combines law and public and international affairs. Increasingly, lawyers in the public and nonprofit private sectors work in managerial and policy-making capacities for which legal training alone does not prepare them. At the same time, legal considerations impinge more than ever on the work of public managers and planners, although most of them have had no exposure to legal training. Students in the joint-degree program gain a broadened knowledge base and a cross disciplinary approach to solving problems involving the intersection of law, policy, and management. They also develop more marketable professional skills than are usually acquired through single-degree programs. Professionals trained in both law and public and international affairs thus enjoy expanded career opportunities. The University of Pittsburgh's program is unique because of the range of master's degree options available.

Students in the MPIA degree program pursue majors in Global Political Economy or Security and Intelligence Studies. Students interested in international development have a choice of two major fields, which include Development Planning and Environmental Sustainability or Non-Governmental Organizations (NGOs) and Civil Society.

Ronald A. Brand
Curriculum & Requirements

The structuring of this four-year degree program is flexible. A student may begin study in either school. The only requirement in this connection is that the first year in the School of Law be taken in its entirety, with no outside courses. GSPIA also expects joint-degree program students to complete the required master's degree core courses early in their program in GSPIA.

Degrees in the joint-degree program are awarded concurrently. Therefore, it is important to note that a student who resigns from one program and elects to remain in the other will be subject to all the requirements of that particular degree program. The previously described arrangement for awarding advanced-standing credits will no longer be in effect.

Each student must satisfy both schools' requirements as modified by participation in the joint-degree program. The credit requirements are as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Joint Degree Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Juris Doctor (JD)</td>
<td>79 Credits</td>
</tr>
<tr>
<td>Master of Public and International Affairs</td>
<td>36 Credits</td>
</tr>
<tr>
<td>Total Credits for Joint Degree</td>
<td>115 Credits</td>
</tr>
</tbody>
</table>

Law and Public Health, JD/MPH

The School of Public Health, Health Policy & Management and the School of Law at the University of Pittsburgh offer a cooperative educational program, through which students may earn both the Juris Doctor (JD) degree, the first professional degree in law, and the Master of Public Health (MPH) degree, the primary professional degree in public health. Students have the option of selecting between two areas of concentration pursuing their MPH degree: health policy and management or public health sciences. The joint-degree program has been established in recognition of extensive and increasing connections between law and the broad range of health services, both public and private, in the United States.
The objective of this specialized educational program is to provide graduates with an inter-disciplinary education to prepare them to address issues and situations that affect personal and public health. Graduates of this joint-degree program are academically prepared for the practice of law with private clients, serving as house counsel with health organizations and systems, and as attorneys representing state, county and local health departments. The threat of bioterrorism and the need to balance both individual rights and public protection in establishing public health preparedness has made public health law an even more vital professional focus for attorneys.

For Additional Information

For information regarding entrance examinations, tuition and financial aid, writing requirements and field experience, please visit the GSPH website.

Requirements

Students enrolled in the joint-degree program receive integrated training in law and public health. Students must complete 37 credits in the MPH curriculum, and 8 JD credits will be applied toward the MPH degree in order to meet the required 45 credits for the MPH degree. Students must complete 76 credits in the JD curriculum, and 12 MPH credits will be applied toward the JD degree in order to meet the required 88 credits for the JD degree. The first year of law school must be completed in a single academic year before embarking on studies in public health. Neither degree may be granted prior to the fulfillment of all requirements for the joint-degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Policy and Management (Carnegie Mellon), JD/MSPPM

The University of Pittsburgh School of Law and Heinz College offer a joint-degree program designed to train students for careers in which management, public policy and law overlap. A successful partnership that has been in existence for over a decade, this program offers students a comprehensive education that marries the analytic and quantitative strength of the Heinz School with the rigorous legal training afforded by the School of Law. This joint degree offering is particularly beneficial to many students' careers since legal considerations affect many public management and policy decisions, and the practice of law is enhanced by a clear understanding of public policy and management concerns. Participants of the program emerge with a broad knowledge of the fundamental intersections of law, government, policy analysis and management. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the
other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

**Law and Social Work, JD/MSW**

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The
MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

Requirements

Students enrolled in the joint degree program will receive integrated training in social work and law over a four year period. The combined credit-hour requirements for the MSW and JD degrees obtained separately is 148 credits (60 for the MSW, usually completed in four full-time semesters, and 88 for the JD, usually completed in six full-time semesters). In the joint degree program, the two degrees are awarded for a combined total of 121 credits (46 in Social Work and 75 in Law). This reduction in credit-hour requirements is achieved through the acceptance of up to 14 credit hours of JD course work receiving a grade of C or higher toward the MSW degree and the acceptance of up to 13 credit hours of MSW work receiving a grade of B or higher toward the JD degree. All didactic foundation SW courses must be completed in a single academic year; likewise, all first-year JD courses must be completed in a single academic year. Neither degree may be granted prior to the fulfillment of all requirements for the joint degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MSW with the School of Social Work). See New York Rules of Court § 520(c)(5).

Integrative seminar

All students must complete an Integrative Seminar, to be jointly presented by the School of Social Work and Law School, during each Fall and Spring semester of their enrollment in the MSW-JD program. The integrative seminar will meet twice each Fall and Spring semester. The goal of the seminar will be to allow students the space to discuss issues related to integration and to listen to and have a dialogue with outside speakers who have integrated law and social work in their practice, research, and/or teaching.
Required electives in the Law School

Students must complete at least 2 courses from the Law School menu of MSW-JD "required electives."

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Master's

Law - Foreign Law Graduates, LLM

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study the common law legal tradition and the U.S. legal system in the United States.

Degree Requirements

Students must complete a minimum of 24 credits to graduate. The program is completed in one academic year from August to May. Part-time admission is considered on a case-by-case basis. The CILE Academic Director, Executive Director and Program Administrator take an active role in personally counseling each LLM student on their course choices, helping you to plan a course of study that is uniquely tailored to your personal needs. Courses taken must include:

- LAW 5977 - INTRODUCTION TO AMERICAN LAW
- LAW 5813 - U.S. LEGAL ANALYSIS AND WRITING
- LAW 5820 - LL.M COLLOQUIUM
- Writing Requirement - Choose one of the following:
  - LAW 5902 - INDEPENDENT STUDY
  - or a Seminar Course (Usually 3 credits-various courses are offered each semester). In seminars, the class will meet once a week for two hours with the guidance of a faculty member. The students will conduct research on the seminar topic and prepare drafts of their paper throughout the semester. Each student will present their paper in class and submit a final paper at the end of the semester.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 24

Law - Foreign Law Graduates, LLM - Hybrid

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study the common law legal tradition and the U.S. legal system in the United States.

There are two ways to complete the Hybrid LLM Degree. Students may begin by completing one of the law school's 15-credit online graduate certificates, and then coming to the Pitt campus to take 9 (or more) credits of required and elective classes in the course of one semester. Or, students may choose to come to campus first, complete 9 or more credits of required courses, and then complete an online certificate program.
Degree Requirements

Students must complete a minimum of 24 credits to graduate. The program is completed in one academic year from August to May. Part-time admission is considered on a case-by-case basis. The CILE Academic Director, Executive Director and Program Administrator take an active role in personally counseling each LLM student on their course choices, helping you to plan a course of study that is uniquely tailored to your personal needs. Courses taken must include:

- LAW 5977 - INTRODUCTION TO AMERICAN LAW
- LAW 5813 - U.S. LEGAL ANALYSIS AND WRITING
- LAW 5820 - LL.M COLLOQUIUM

Online Certificate Program Courses

Students must complete one of the following law school 15-credit online graduate certificates.

Corporate Compliance

- LAW 2011 - INTRODUCTION TO CORPORATE COMPLIANCE
- LAW 2012 - ETHICS & COMPLIANCE PROGRAMS
- LAW 2013 - DESIGNING, MEASURING EFFECTIVENESS & AUDITING COMPLIANCE
- LAW 2014 - CONDUCTING INVESTIGATIONS & RISK ASSESSMENTS
- LAW 2015 - SPECIAL TOPICS IN CORPORATE COMPLIANCE

Health Care Compliance

- LAW 2062 - INTRODUCTION TO LEGAL SYSTEM FOR HEALTHCARE AND COMPLIANCE
- LAW 2061 - LEGAL ASPECTS OF HEALTHCARE COMPLIANCE
- LAW 2969 - PROFESSIONAL JUDGEMENT AND ETHICS, THE CANVAS OF COMPLIANCE
- LAW 2968 - EFFECTIVE COMPLIANCE PROGRAM DEVELOPMENT AND SKILLS
- LAW 2970 - SELECT APPLICATIONS IN COMPLIANCE

Human Resources Law

- LAW 2070 - INTRODUCTION TO THE LEGAL SYSTEM FOR HUMAN RESOURCES; HIRING AND FIRING
- LAW 2071 - WAGES, HOURS AND BENEFITS
- LAW 2072 - WORKING CONDITIONS
- LAW 2073 - ANTI-DISCRIMINATION LAW
- LAW 2074 - SELECTED TOPICS IN HUMAN RESOURCES LAW

International Business Law

- LAW 2001 - INTRODUCTION TO US & INTERNATIONAL BUSINESS LAW
- LAW 2002 - COMMERCIAL ASPECTS OF CROSS-BORDER TRANSACTIONS
- LAW 2003 - SPECIALTY AREAS IN CROSS-BORDER TRANSACTIONS
- LAW 2004 - FOUNDATIONS OF INTERNATIONAL DISPUTE RESOLUTION & LITIGATION
- LAW 2005 - SPECIAL TOPICS IN INTERNATIONAL OR DISPUTE RESOLUTION

**Law - Professional Master of Studies in Law - In Person Option**

The Professional Master of Studies in Law ("MSL") at the University of Pittsburgh School of Law is a 30-credit advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree.

Professional Master's students gain essential, specialized knowledge of laws and legal systems. Law is a pervasive influence on almost all aspects of life across the globe, but higher education often ill-prepares students and professionals for navigating laws and legal dynamics in business and life. The degree addresses this critical knowledge gap.

Students can complete this degree either by taking classes at the Pitt Law campus in Pittsburgh, through our new online program, or through a hybrid option consisting of some online courses and some in-person courses. For more information about the online program, click here.

Those who choose the in-person program can earn their master's degree full-time in one academic year (August to May) or in two to four years on a flexible part-time schedule.

Pitt Law commands one of the oldest and best established professional Master of Studies in Law programs in the country. Only a handful of students are admitted each year and these students receive personalized mentoring and support. Students can choose from a broad array of workplace-relevant and leading-edge specializations, including a self-designed specialization.

Professional Master's students take the same vast array of courses as Juris Doctor candidates taught by world-class legal scholars, judges and attorneys, and they gain the advantages and benefits of attending the University of Pittsburgh.

**Degree Requirements**

Applicants must have completed at least an undergraduate bachelor's degree. Applicants need to provide official transcripts of all college, graduate and professional studies, whether a degree was obtained or not. No standardized test is required.

International students are welcome and encouraged to apply. They must have completed the equivalent of a US bachelor's degree, and they must submit a TOEFL, IELTS, or Duolingo score. International students are encouraged to apply as early as possible because of greater amount of time needed to process the application, obtain visas, and obtain housing.

Students must complete 30 course credits in the School of Law to receive the MSL degree. Students are required to take U.S. Legal System, one first-year JD course, and the required courses in their selected area of specialization.

The areas of specialization from which students may choose are as follows:

- Biomedical & Health Services Research
- Business Law
- Commercial Law
- Corporate Law
- Criminal Law and Justice
- Disability Law
- Elder and Estate Planning Law
- Employment and Labor Law
- Energy Law
- Environmental Law
- Family Law
- Health Care Compliance
- Health Law
- Human Resources Law
- Intellectual Property and Technology Law
- International Business Law
- International and Human Rights Law
- Jurisprudence
- Real Estate Law
Self-Design
Sports and Entertainment Law
Tax Law

Students may also design their own unique concentration.

Note

Law - Professional Master of Studies in Law - Online Option

The Professional Master of Studies in Law ("MSL") at the University of Pittsburgh School of Law is a 30-credit advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree.

Professional Master's students gain essential, specialized knowledge of laws and legal systems. Law is a pervasive influence on almost all aspects of life across the globe, but higher education often ill-prepares students and professionals for navigating laws and legal dynamics in business and life. The degree addresses this critical knowledge gap.

Pitt Law commands one of the oldest and most established Professional Master of Studies in Law programs in the country. Students can complete this degree either online or by taking in-person classes on the Pitt Law campus in Pittsburgh. For more information about the in-person option, or a hybrid option consisting of some online courses and some in-person courses, click here.

The new Online option has been available since 2021, and is a popular and fast-growing program, providing efficiency, flexibility, and affordability. Those who choose the Online-only option can earn their master's degree in two calendar years in a flexible part-time schedule.

The 15-credit Online MSL series of core courses consists of 7 short courses of between 5 and 8 weeks in length. Online students take one course at a time along with their starting cohort. The courses are designed as an asynchronous learning opportunity, so students work largely at their own pace, week by week. Course materials are created specifically for professional master's students. All courses are carefully designed to combine essential legal and policy content with practice applying that content in the workplace.

Pitt Law professors guide students through the core course series, provide personalized feedback to students, and are available for online, on-on-One meetings and review sessions.

Degree Requirements

Applicants must have completed at least an undergraduate bachelor's degree. Applicants need to provide official transcripts of all college, graduate and professional studies, whether a degree was obtained or not. No standardized test is required.

International students are welcome and encouraged to apply. They must have completed the equivalent of a U.S. bachelor's degree, and they must submit a TOEFL, IELTS, or Duolingo score. International students are encouraged to apply as early as possible because of the greater amount of time needed to process their application.

Students must complete 30 course credits of School of Law coursework to receive the MSL degree. Students are required to take the entire Online MSL 15-credit core course series, which includes:

- American Legal System
- Contracts
- Torts
- Property
- Constitutional Law
- Criminal Law
- Legislation & Regulation
Students can then complete the master's degree entirely online by taking 15 additional credits through one of our online specializations. These specializations include Healthcare Compliance, Human Resources, Law, Corporate Compliance, and International Business Law. A Business Law specialization is expected to be added in Fall 2024. Students who successfully complete the MSL core courses and a specialization will earn a master's degree plus a certificate in their specialization.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 30

Micro-Credential

Law - Cyber Law and IT, Micro-Credential

The Micro-credential in Cyber Law and IT will focus on subjects relating to the regulation of technology and cyberspace, privacy law and intellectual property. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to court toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Cyber Law:

Classes focusing on cyber law, including, for example, Cybersecurity, Privacy, and Democracy, Cyber Law and Policy Seminar, Cyberspace and the Law, or similar courses approved by the CILE Director.

- LAW 5671 - CYBERSECURITY, PRIVACY, AND AMERICAN DEMOCRACY
- LAW 5685 - CYBER LAW & POLICY SEMINAR
- LAW 2404 - CYBERSPACE AND THE LAW

IT Law:

Courses focusing on the IT Law, including, for example, Information Privacy Law and Practice, Commercializing New Technologies, Technology, Law, and Leadership, Intellectual Property, Technology and Employment Law, Applied AI.

- LAW 2430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 2135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP
- LAW 2260 - INTELLECTUAL PROPERTY
- LAW 2718 - TECHNOLOGY AND EMPLOYMENT LAW
- LAW 5719 - APPLIED LEGAL DATA ANALYTICS AND AI

Law - Energy and Environmental Law, Micro-Credential
The Micro-credential in Energy and Environmental Law will focus on subjects relating to energy regulation and environmental policy. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Energy Law:

Energy Law and Regulation, Climate Change and the Law, Oil and Gas Law, or similar courses approved by the CILE Director.

- LAW 2038 - ENERGY LAW AND REGULATION
- LAW 2082 - CLIMATE CHANGE AND THE LAW
- LAW 2099 - OIL AND GAS LAW

Environmental Law:

Environmental Law, Environmental Law, Policy, and Politics, Environmental Justice Law Seminar, Environmental Policy & Practice, Land Use or similar courses approved by the CILE Director.

- LAW 2340 - ENVIRONMENTAL LAW
- LAW 5247 - ENVIRONMENTAL POLICY, POLITICS, AND PRACTICE
- LAW 2807 - ENVIRONMENTAL JUSTICE LAW SEMINAR
- LAW 2336 - LAND USE
- LAW 5714 - ENVIRONMENTAL POLICY AND PRACTICE

Law - Health Care Law and Regulation, Micro-Credential

This program requires a minimum of six credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. If taken by an LL.M. student or a non-degree student wishing to preserve the ability to transfer credits to the LL.M. program, all requirements must be met on a graded rather than pass-fail basis. Admissions requirements for non-degree students in these micro-credentials will be identical to those for LL.M. students.

Completion of this micro-credential will require that students take at least six credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Note: This micro-credential program was approved on October 1, 2021 in order to maintain accurate records, the program was added to the catalog on October 25, 2021.

The Landscape of US Health Care Law:

Current Issues in Health Law, Health Law & Policy, or an equivalent course approved by the CILE Academic Director if neither is offered during a student's time in residence.

US Health Law Issues Encountered by Foreign Counsel:

Health Care Business Transactions, Biotechnology Law, Law of Disability Discrimination, or similar courses approved by the CILE Academic Director.
Law - Human Rights Law, Micro-Credential

The Micro-credential in Human Rights Law will focus on subjects relating to the protection of human rights under domestic and international law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses drawn from the following rubric: Philosophy of Crime and Punishment - National and International Perspective, Legal Institutions and the Holocaust, Conflict of Laws, International Human Rights Law, International Law, Law of Slavery, Abolition & Freedom Seminar, Federal Hate Crimes, Islamic Law and Jurisprudence Seminar, or similar courses approved by the CILE Director.

- LAW 2644 - PHILOSOPHY OF CRIME & PUNISHMENT - NATIONAL & INTERNATIONAL PERSPECTIVE
- LAW 2686 - LEGAL INSTITUTIONS & THE HOLOCAUST
- LAW 2213 - CONFLICT OF LAWS
- LAW 2653 - INTERNATIONAL HUMAN RIGHTS
- LAW 2226 - INTERNATIONAL LAW
- LAW 5709 - LAW OF SLAVERY, ABOLITION & FREEDOM SEMINAR
- LAW 2642 - FEDERAL HATE CRIMES
- LAW 5866 - ISLAMIC LAW AND JURISPRUDENCE SEMINAR

Law - Intellectual Property Law, Micro-Credential

The Micro-credential in Intellectual Property Law will focus on subjects relating to technology policy, patent, trademark and copyright law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to count toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses drawn from the following rubric: Foundations of Intellectual Property Law Seminar, Commercializing New Technologies, Technology, Law, and Leadership, Foundations of Intellectual Property Seminar, Copyright Law, Patent Law Practice, Trademark Law, or similar courses approved by the CILE Director.

- LAW 2862 - FOUNDATIONS OF INTELLECTUAL PROPERTY SEMINAR
- LAW 2135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP
- LAW 2328 - COPYRIGHT LAW
- LAW 2242 - PATENT LAW PRACTICE
- LAW 2694 - TRADEMARK LAW

Law - International Arbitration Micro-Credential

The micro-credential in International Arbitration will focus on subjects relating to the settlement of disputes outside of national courts and before arbitral fora, and will include specific courses on how to structure international transactions to prepare for arbitration, the practice and theory of international arbitration, and substantive international law related to state-to-state and investor-state arbitration.
Requirements:

Micro-credential in International Arbitration: Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses drawn from each of the following three rubrics as well as an internship/externship:

International Law:

- LAW 5040 - PUBLIC INTERNATIONAL LAW ADVOCACY or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

Commercial Law:

- LAW 2225 - INTERNATIONAL BUSINESS TRANSACTION or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

Dispute Resolution:

- LAW 5986 - INTERNATIONAL ARBITRATION SEMINAR, The Practice of International Litigation and Arbitration, or another course approved by the CILE Executive Director that provide a comparable introduction to one or more forms of alternative dispute resolution.

Internship/Externship:

An off-campus internship/externship approved by the CILE Executive Director that provides a practical and skills-based introduction to international arbitration.

Total Credits: 9

Law - International Arbitration, Micro-Credential

The Micro-credential in International Arbitration will focus on subjects relating to the settlement of disputes outside of national courts and before arbitral fora, and will include specific courses on how to structure international transactions to prepare for arbitration, the practice and theory of international arbitration, and substantive international law related to state-to-state and investor-state arbitration. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to court toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses drawn from each of the following three rubrics as well as an internship/externship:

International Law

Public International Law or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

- LAW 5226 - INTERNATIONAL LAW

Commercial Law:
International Business Transactions or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

- LAW 5225 - INTERNATIONAL BUSINESS TRANSACTIONS

Dispute Resolution:

International Commercial Arbitration, The Practice of International Litigation and Arbitration, or another course approved by the CILE Executive Director that provide a comparable introduction to one or more forms of alternative dispute resolution.

- LAW 5043 - INTERNATIONAL COMMERCIAL ARBITRATION
- LAW 5697 - PRACTICAL ASPECTS OF GLOBAL DISPUTES

Internship/Externship:

An off-campus internship/externship approved by the CILE Executive Director that provides a practical and skills-based introduction to international arbitration.

Unlike other Law micro-credentials, this one will require an externship or internship for credit. CILE has relationships with a number of externship providers in this field who offer regular, academic-year externships to students so long as those students are earning credit for the work. Satisfaction of the micro-credential will require each student to secure and complete one of these programs, or another suitable externship in the field of international arbitration.

Law - International Commercial Law and Dispute Resolution, Micro-Credential

This program requires a minimum of six credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. If taken by an LL.M. student or a non-degree student wishing to preserve the ability to transfer credits to the LL.M. program, all requirements must be met on a graded rather than pass-fail basis. Admissions requirements for non-degree students in these micro-credentials will be identical to those for LL.M. students.

Completion of this micro-credential will require that students take at least six credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Note: This micro-credential program was approved on October 1, 2021 in order to maintain accurate records, the program was added to the catalog on October 25, 2021.

Commercial Law:

International Business Transactions or, if not offered in a given term, one or more other courses approved by the CILE Academic Director that provide a comparable introduction to commercial and business law.

Dispute Resolution:

International Commercial Arbitration or, if not offered in a given term, one or more other courses approved by the CILE Academic Director that provide a comparable introduction to one or more forms of alternative dispute resolution.

Law - Tax Law, Micro-Credential

The Micro-credential in Tax Law will focus on subjects relating to personal and corporate, domestic and international tax law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. Because all Micro-credit courses are also regular law school courses, and because the LL.M. degree is usually completed within 12 months, there is no limit on the number of credits that can count toward both a Micro-
credential and the general LL.M degree. All Micro-Credential credits earned (with a grade of C or higher) will be valid to court toward the LL.M. degree for two years. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential will require that students take at least nine credit hours, with a grade of C or higher, in courses drawn from the following rubric: Corporate Taxation, Federal Income Taxation, Low-Income Tax Clinic, Nonprofit Exempt Organizations, Pittsburgh Tax-Review, State and Local Tax, Estate and Gift Tax, Partnership Tax, International Tax, or similar courses approved by the CILE Director.

- LAW 2817 - CORPORATE TAXATION
- LAW 2105 - FEDERAL INCOME TAX
- LAW 2425 - LOW INCOME TAX CLINIC
- LAW 2355 - NON-PROFIT ORGANIZATIONS
- LAW 5931 - PITTSBURGH TAX REVIEW
- LAW 2273 - STATE AND LOCAL TAX
- LAW 2259 - ESTATE AND GIFT TAX
- LAW 2371 - PARTNERSHIP TAX
- LAW 2841 - INTERNATIONAL TAX

Law - U.S. Business and Entrepreneurial Law, Micro-Credential

This program requires a minimum of six credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. If taken by an LL.M. student or a non-degree student wishing to preserve the ability to transfer credits to the LL.M. program, all requirements must be met on a graded rather than pass-fail basis. Admissions requirements for non-degree students in these micro-credentials will be identical to those for LL.M. students.

Completion of this micro-credential will require that students take at least six credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Note: This micro-credential program was approved on October 1, 2021 in order to maintain accurate records, the program was added to the catalog on October 25, 2021.

Structures of Business:

Classes focusing on the law of business entities and their ownership, including, for example, Business Organizations, Agency & Partnership, and Securities Regulation.

Commercial Relations:

Courses focusing on the contractual relations of business entities, including, for example, Contracts, Commercial Transactions in Goods, Secured Transactions, and International Business Transactions.

Professional

Law - Juris Doctor (JD)

Pitt Law offers the Juris Doctor (JD) degree as well as a number of joint degree programs with other Pitt schools, which lead to both a JD and a second master's degree.

In all of these programs, Pitt Law's essential mission is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment.
The program's first-year curriculum offers a solid foundation in legal analysis and reasoning through courses in subject areas traditionally viewed as basic for legal education.

Pitt Law JD students enjoy a large degree of latitude in designing courses of study that meet their individual goals and interests, with only a handful of graduation requirements beyond the first year.

Pitt Law offers particularly rich opportunities in:

- International law, featuring prominent international/comparative law faculty, a rich international and comparative law curriculum, several courses each year taught by visiting foreign law professors, internships abroad, internationally focused scholarships and fellowships, Languages for Lawyers courses, strong University programs (including area studies certificate programs), and international moot law competitions.
- "Live-client" clinics in a range of substantive areas and practice settings, giving students opportunities to develop valuable lawyering skills in the context of real-life, not simulated, legal disputes and transactions. Students grapple with legal, ethical, and practical issues, under the supervision of - and in close counsel with - a seasoned attorney faculty member.
- The Semester in D.C. Program, during which students spend a semester in Washington, D.C., earning a full semester's worth of academic credit while working full-time as an extern with a non-profit organization or government agency.
- Seven certificate programs/areas of concentration enabling students to concentrate their studies in particular areas of law. These programs include specialized advanced courses that incorporate lawyering skills relevant to particular areas of practice.
- Cross-disciplinary learning - Pitt Law students may take courses in other schools at Pitt or other local colleges and universities (up to six non-law graduate credits can be used toward the JD requirements).

Some Pitt Law courses incorporate multiple disciplines, such as Law & Human Behavior and Law & Economics Seminar, or are jointly taught by law faculty and faculty from other disciplines to classes comprising both law and other graduate/professional students - for example, Commercializing New Technologies.

Pitt Law joint degree programs enable students to earn the JD as well as a master's degree in another discipline through an integrated program, more quickly than earning the two degrees separately.

Degree Requirements

Admission applications for the Pitt Law JD program will be accepted starting September 1 through our deadline of April 1. Applications are considered only for the current year for the fall semester. We require all applicants submit their applications on-line through the Law School Admission Council (LSAC). Pitt Law is highly competitive and decisions are based upon many factors. Once your application is complete, our Admissions Committee will review your application. Once we are able to make a decision, you will be notified by mail within several weeks. You can also verify your application status on-line with a user name and password, which will be sent to you electronically once you apply. We ask for your patience during the admissions cycle as it can become very busy during key times of the year.

Application Requirements:

- Applicants must submit a $65 application fee
- Applicants must have completed a bachelor's degree from a regionally accredited college or university in the United States before the first day of law school.
- In cases where an applicant has completed studies outside the United States, the requirement is education deemed by the University of Pittsburgh to be comparable to a bachelor's degree from a regionally accredited college or university in the United States. Click here for more information.
- When evaluating an undergraduate degree, the committee pays careful attention to the strength of the major field of study, as evidenced by the courses listed on the undergraduate transcript. Pitt Law is looking for applicants who have demonstrated the discipline and ability to handle a rigorous and demanding program. The admissions committee carefully evaluates graduate work and professional experience, although utilizes the undergraduate GPA.
- Applicants are required to register with the Credential Assembly Service (CAS) through LSAC and must take the LSAT. If an applicant takes the LSAT more than one time the highest score is considered by the admissions committee when making a decision. The latest test score that will be considered for all entrance is the score from the previous February examination. Scores from tests taken more than four years prior to the current admissions year will not be considered. More information can be obtained from the Law School Admission Council (LSAC).
- A required personal statement gives the committee a view into the non-academic world of the applicant and serves as the interview. This is critical in our ability to enroll a diverse class. We ask that you keep your personal statement to no more than two pages, typed, double spaced.
Letters of recommendation play an equally important role in this process as they can reveal the strengths of the academic achievements of the applicant. We recommend three letters, although none are required. Letters should be submitted through the LSAC letter of recommendation service.

We encourage applicants to submit a Resume, as they highlight for the admissions committee a broader view of your achievements.

In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

In order to graduate, a student pursuing a JD must complete 88 credits, including the following:

- A prescribed first-year curriculum, as follows: Contracts, Criminal Law, Legislation and Regulation, Torts, Civil Procedure, Constitutional Law, Property, and Legal Analysis and Writing, as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the Pitt Law Academy speaker series
- The upper-level writing requirement
- A course in Legal Profession
- Six credits in a course designated as satisfying the professional skills requirement
- The one-credit Foundations of Legal Research course
- A course designated as satisfying the international/comparative law requirement
- A course designated as satisfying the writing ("W") requirement

Additional graduation requirements apply for those students whose grade point averages place them in the bottom 15% of their class at the end of their first or second year. The upper-level writing requirement and other academic requirements are described in the Academic Rules and Graduation sections of the School of Law's web site.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

First-Year Curriculum

The first-year curriculum is comprised of the following required courses, as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the Pitt Law Academy:

**Fall:**
- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5028 - TORTS

**Spring:**
- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5076 - LEGAL ANALYSIS AND WRITING
- LAW 5024 - PROPERTY

**Year Long Program**
- LAW 5061 - PITT LAW ACADEMY

John P. Gismondi Concentration in Civil Litigation (15-20 Credits)

Through its unique John P. Gismondi Concentration in Civil Litigation, PittLaw provides law students with a unique curriculum devoted exclusively to training the trial lawyers of tomorrow.

During the first year of law school, all students take the same courses. Those students who wish to register for the Gismondi Concentration in Civil Litigation, do so at the beginning of their second year of law school. During their second and third years, all students enrolled in the Concentration will take certain required foundational core courses, a clinic or practicum, as well as a number of specialized classes. The heart of the Gismondi
program is a collection of specialized courses taught exclusively by a preeminent group of practicing trial attorneys whose insight and experience offer an invaluable perspective in the classroom. Together with our core courses, these select courses provide a level and depth of litigation training unlike that available at most any other law school.

In each of these specialized skills courses, class size is kept small so as to enrich the learning experience. Students not only are taught legal rules and principles in a typical lecture format, but more importantly, they are assigned to "role play" in a variety of real world litigation scenarios, each designed to develop specific skills which are essential to successful trial work.

Students complete their training by taking a required litigation skills clinic or practicum selected from this group of options: Elder Law Clinic, Health Law Clinic, Tax Clinic, Immigration Clinic, Environmental Law Clinic, Securities Arbitration Clinic, PA Practice Practicum, Lawyering III Clinic, Criminal Prosecution Practicum, Criminal Defense Practicum or Family Law Clinic. In all of these clinics, students have the potential of representing real clients in actual court proceedings.

The students in the John P. Gismondi Civil Litigation Certificate Program will complete their law school education having developed a set of skills which better prepares them to do courtroom work than traditional law school graduates, and that advantage, in turn, makes the Gismondi certificate students more attractive to law firms seeking to hire young and enthusiastic litigation associates.

Core Courses (5 Credits)

- LAW 5103 - EVIDENCE
- LAW 5407 - TRIAL ADVOCACY
- OR
- LAW 5616 - MOCK TRIAL STRATEGY AND PRACTICE

Specialized Skills Courses (Must take 3) (6 cr).

(one of the courses marked with * may be substituted for one of the specialized skills course upon request to Director)

- LAW 5223 - ADVANCED TRIAL EVIDENCE
- LAW 5197 - ADVANCED PENNSYLVANIA TORT PRACTICE
- LAW 5295 - EXPERT WITNESS
- LAW 5320 - LITIGATION STRATEGY AND PLANNING
- LAW 5236 - PRE-TRIAL PRACTICE-PLEADINGS AND DISCOVERY
- LAW 5422 - ALTERNATIVE DISPUTE RESOLUTION *
- LAW 5630 - FEDERAL CIVIL LITIGATION SKILLS *

A Clinic or Practicum (min. of 3 credits)

- LAW 5939 - CRIMINAL DEFENSE PRACTICUM
- LAW 5952 - CRIMINAL PROSECUTION PRACTICUM
- AND
- LAW 5953 - CRIMINAL PROSECUTION PRACTICUM
- LAW 5391 - ELDER LAW CLINIC
- LAW 5883 - ENVIRONMENTAL LAW CLINIC
- LAW 5398 - FAMILY LAW CLINIC take for 2 semesters
- LAW 5393 - HEALTH LAW CLINIC
- LAW 5880 - IMMIGRATION LAW CLINIC
- LAW 5429 - COMMUNITY LAWYERING
- LAW 5929 - PA PRACTICE PRACTICUM
- LAW 5425 - LOW-INCOME TAX CLINIC
- LAW 5874 - SECURITIES ARBITRATION CLINIC
Trial Competitions (1 credit)

- LAW 5926 - MURRAY S. LOVE TRIAL MOOT CRT
- LAW 5908 - INTERSCHOLASTIC MOCK TRIAL

School of Law Faculty

Full Time

Jessie Allen, Associate Professor of Law
JSD, Columbia University School of Law
JD, Brooklyn Law School

Chaz Arnett, Assistant Professor of Law
JD, Harvard Law School

Kevin D. Ashley, Professor of Law and Intelligent Systems
JD, Harvard Law School
PhD, University of Massachusetts and Amherst

Elena A. Baylis, Associate Professor of Law
JD, Yale Law School

Deborah L. Brake, John E. Murray Faculty Scholar and Professor of Law
Associate Dean for Research & Faculty Development
JD, Harvard Law School

Ronald A. Brand, Professor of Law
Academic Director, CILE
Chancellor Mark A. Nordenberg University Professor and John E. Murray Faculty Scholar
JD, Cornell University

Ben Bratman, Professor of Legal Writing
JD, Vanderbilt University Law School

Teresa Kissane Brostoff, Professor of Legal Writing
JD, University of Pittsburgh School of Law

Tomar Pierson-Brown, Clinical Assistant Professor of Law
Director - Health Law Clinic
JD, Case Western Reserve University School of Law
LLM, University of the District of Columbia, David A. Clarke School of Law

William M. Carter, Jr., Professor of Law
JD, Case Western Reserve University School Of Law

Pat K. Chew, Judge J. Quint Salmon and Anne Salmon Chaired Professor
JD, University of Texas
M.Ed, University of Texas

Mary Crossley, Professor of Law
JD, Vanderbilt University

Vivian Curran, Distinguished Professor of Law
JD, Columbia University
PhD, Columbia University
MPhil, Columbia University

Kevin Deasy, Associate Professor of Legal Writing
Associate Dean of Students
JD, University of Pittsburgh School of Law

Gerald S. Dickinson, Assistant Professor of Law
JD, Fordham Law

Greer Donley, Assistant Professor of Law
JD, University of Michigan Law School

Jasmine B. Gonzales Rose, Assistant Professor of Law
JD, Harvard Law School

Philip Hackney, Associate Professor of Law
LLM, (Tax), New York University School of Law
JD, LSU Paul M. Herbert Law Center

Haider Ala Hamoudi, Professor of Law
Vice Dean of the University of Pittsburgh School of Law
JSD, Columbia University
JD, Columbia University

David A. Harris, Sally Ann Semenko Endowed Chair, Professor of Law
John E. Murray Faculty Scholar
LLM, Georgetown University
JD, Yale Law School

Bernard J. Hibbitts, Professor of Law
LLM, Harvard University
LLM, University of Toronto
LLB, Dalhousie University
BA (Juris.), Oxford University

David J. Hickton, Professor of Law
Founding Director, Institute for Cyber Law, Policy and Security
JD, University of Pittsburgh School of Law

Anthony C. Infanti, Professor of Law
Affiliate Faculty, Gender, Sexuality & Women's Studies Program
Buchanan, Ingersoll & Rooney Faculty Scholar
LLM (Taxation), New York University
JD, University of California, Berkeley

Jules Lobel, Professor of Law
JD, Rutgers University

Grant MacIntyre, Assistant Professor of Law
JD, University of Pittsburgh School of Law

Michael J. Madison, Professor of Law
Faculty Director, Innovation Practice Institute
JD, Stanford Law School

Martha M. Mannix, Clinical Associate Professor of Law
JD, Hastings College of the Law

Alan Meisel, Professor of Law and Psychiatry
Dickie, McCamey & Chilcote Professor of Bioethics
Director of MSL Program, Health Law Certificate Program, and Certificate in Disability Legal Studies
JD, Yale University

Peter B. Oh, Professor of Law
JD, The University of Chicago

Ann Sinsheimer, Professor of Legal Writing
PhD, Rhetoric, Carnegie Mellon University
JD, University of Pittsburgh School of Law

Matiangai Sirleaf, Assistant Professor of Law
JD, Yale Law School

George H. Taylor, Professor of Law
JD, Harvard University

David Thaw
Assistant Professor of Law and Information Sciences
JD, Berkeley Law
PhD, University of California, Berkeley

Lu-in Wang, Professor of Law
JD, University of Michigan Law School

Sheila I. Velez Martinez, Clinical Assistant Professor of Law
Director of Clinical Programs

Rhonda Wasserman, Professor of Law
JD, Yale Law School

Amy J. Wildermuth, Professor of Law
Dean of the University of Pittsburgh School of Law
JD, College of Law, University of Illinois

Professor Emeritus of Law

Douglas M. Branson, W. Edward Sell Professor of Business Law
LL.M, University of Virginia
JD, Northwestern University

William J. Brown
LL.M, Yale University
Certificate in International Business Law, City of London College

Nancy M. Burkoff
JD, University of Pittsburgh

John M. Burkoff
LL.M, Harvard University
JD, University of Michigan

Richard Delgado
JD, University of California - Berkeley

Harry M. Flechtner
JD, Harvard Law School

Cyril A. Fox, Jr.
JD, University of Pittsburgh School of Law
Lawrence A. Frolik
LLM, Harvard Law School
JD, Harvard Law School

Robert Berkley Harper
JD, University of Pittsburgh School of Law

Arthur D. Hellman
JD, Yale University

William V. Luneburg, Jr.
JD, Harvard University

Margaret M. Mahoney
JD, University of Michigan

Francis Barry McCarthy
LLM, Columbia University
JD, Boston College

Thomas Ross
JD, University of Virginia

Richard Harry Seeburger
LLM, Harvard University
LLB, Harvard University

Stella L. Smetanka
JD, University of Pittsburgh School of Law

Research Professor Emerita

Jean Stefancic
MA, University of San Francisco

Professor of Practice

Charles C. Cohen
JD, University of Michigan

Honorable Judith K. Fitzgerald
JD, University of Pittsburgh School of Law

Honorable Laurie Marin
JD, Brooklyn Law School

Marily Nixon
JD, University of Virginia School of Law

Visiting Faculty

Anne W. Bauer
LLM, Georgetown University Law Center 2009
JD, University of Pittsburgh School of Law, 2008
William A. Congelio, Esquire
Leigh Coogan
JD, University of Pittsburgh School of Law
Joshua Galperin
JD, Vermont Law School
Marco Gardini
LLM, University of Pittsburgh School of Law
JD, University of Parma (Italy)
Jacqueline Lipton
PhD, LLM, Cambridge University
PhD, Griffith University
LLM, Monash University
Alice L. Stewart, Visiting Clinical Assistant Professor
JD, Duquesne University School of Law
Judith A. Teeter, Visiting Professor
JD, Boston University School of Law

Adjunct

Kevin C. Abbott
JD, University of Pittsburgh School of Law
Sara Burhan Abdullah
LLM, University of Pittsburgh School of Law
JD, University of Pittsburgh School of Law
Rodney R. Akers
JD, Harvard University
Lynn J. Alstadt
JD, University of Pittsburgh School of Law
Heather Batzel
Alan S. Baum
JD, Ohio Northern University School of Law
Jaclyn M. Belczyk
JD, University of Pittsburgh School of Law
Thomas Beline
JD, University of Pittsburgh School of Law
Dan Berlin
C. Allen Black, Jr.
PhD, University of Newcastle (Australia)
JD, University of Pittsburgh School of Law
Paul D. Boas
Alison Bonebrake
MPA, Public Management and Policy, University of Pittsburgh School of Law
Honorable Edward J. Borkowski
MWS, University of Pittsburgh
JD, Duquesne University

Eduardo H. Bozzo
JD, University of Argentina

Samuel W. Braver
JD, Duquesne University

Robert Marc Brenner

Christopher S. Channel
JD, Marshall-Wythe School of Law at the College of William and Mary

Susan K. Cohen
PhD, University of Minnesota

James P. Coletta
JD, University of Pittsburgh School of Law

Julie R. Colton

Timothy Conboy
JD, University of Pittsburgh School of Law

Pamela Wilkins Connelly
JD, University of Pittsburgh School of Law

James V. Corbelli
JD, University of Pittsburgh School of Law

Mary Nell Cummings
JD, SUNY Buffalo Law School

Stephanie Dangel
JD, Yale Law School

Robert E. Dapper, Jr.
JD, University of Pittsburgh School of Law

Elliot Dater

Claudia Davidson

Marshall L. Dayan

Michelle DeBord

Elizabeth A. DeLosa.
JD, Duquesne University

Charles A. DeMonaco
JD, Ohio Northern University

Cecile C. M. Desandre
Baccalaureate A2, the Sorbonne, Paris

Steven A. Diaz

Louis A. DiNardo, C.P.A., J.D.
JD, Duquesne University
Matthew R. Divelbiss  
JD, University of Pittsburgh School of Law

Christian Ehret  
JD, University of Pittsburgh School of Law

Jack W. Elliott  
JD, Wake Forest University School of Law

Karen Engro  
JD, Tulane Law School

Adam S. Ennis  
JD, Benjamin N. Cardozo School of Law, Yeshiva University

Thomas J. Farrell  
JD, New York University School of Law

Ralph G. Fischer  
JD, University of Pittsburgh School of Law

Paige Forster  
JD, University of Pittsburgh School of Law

Susan Frietsche

School of Medicine

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to his or her fullest potential.

School of Medicine Faculty

Certificate

Certificate in Hearing and Vision Sciences

***This new program was approved on October 5th, 2023 with an effective date of Spring 2024. To maintain accurate records, the program was created in the published catalog on October 5th, 2023.***

The Certificate in Hearing and Vision Sciences (HVS Doctoral Certificate) is designed to train the next generation of hearing and vision researchers both in basic and translational research. This goal will be accomplished by offering additional coursework and opportunities for collaborative research and mentorship with basic and translational researchers. The certificate will be available to students who are pursuing a doctoral degree in any relevant graduate program at the University of Pittsburgh. This program will attract and train top graduate students and leverage the strengths of our world-class hearing and vision sciences programs. As such, this program will train new graduate students, serve the needs of our faculty, and further promote the highly collaborative academic research environment that is a hallmark of our school and university.

The purpose of the Hearing and Vision Sciences Certificate (HVS Doctoral Certificate) is to allow students in existing doctoral programs in the University of Pittsburgh to obtain additional training in Hearing and Vision research and methodology, and to stimulate involvement in translational research. This goal will be accomplished by offering additional coursework and opportunities for collaborative research and mentorship with translational researchers.

Admission Requirements:

Students must first be admitted into a doctoral degree granting program in one of the graduate programs of the University of Pittsburgh prior to applying to the graduate certificate program. Once admitted for graduate study within a program, students may apply to the PHVC for admission to the Hearing and Vision Sciences Certificate program. Students must be in good academic standing (i.e., not in probation and must have successfully completed all the required courses and program milestones for their current year of studies) and demonstrate a strong interest in clinical and translational science. Students will enroll in the program after the successful completion of their comprehensive examination.

Course Requirements

The certificate has two main components:

(1) A set of core courses that provide students with standardized skills that are fundamental to hearing and vision research

(2) Research support and training through the Center

Successful completion of the required curriculum and elective courses will lead to the granting of the certificate. The requirements for the certificate is expected to be spread over years 2-4 of graduate study. Support will be provided for one year, but requests for extension will be considered. It is estimated that students who complete this certificate will add a maximum of six months to their overall graduate studies.

A. Required Courses

- The Neuroscience of Hearing and Vision (3 credits) - The goal of this course will be to discuss the neurobiology of hearing and vision, starting from the cochlea and retina to cortex and back.
• **Methods for Assessing Hearing and Vision (3 credits)** - The goal of this course is to cover fundamental concepts and basic methods pertaining to quantify and assess hearing and vision in animal models and humans.

• **Recent Advances in Therapy in Hearing and Vision (YYY) (3 credits)** - This course is designed to introduce students who have no significant clinical experience to the recent advances in treatment and cures in hearing and vision pathology. Surgeon- and physician-scientists along with our basic scientist faculty will participate in teaching this course.

B. Research

Within the PHVC, our over 50 world-class faculty and trainees are investigating hearing and vision sciences. The PHVC also promotes the translation of findings from basic research into applications for new treatments in hearing and vision pathology. This certificate program is open to students pursuing PhDs in PHVC-affiliated departments and graduate programs. Students may apply for membership upon admission to a PHVC-affiliated doctoral program.

Students involved in basic and translational research will be mentored by accomplished investigators who are actively involved in basic or translational research, have active NIH funding, have established track records of mentoring, and are committed to the career development of students.

Total Credits: 10

**Clinical Translational Sciences Certificate**

This certificate program in Clinical Translational Sciences provides students within MS or PhD programs in the health sciences the opportunity to develop expertise in conducting clinical and translational research. Though the majority of courses are in person, the certificate is considered hybrid because one course is offered online only. The core curriculum provides trainees with the basic set of skills that are required by clinical and translational investigators in all fields of interest. It is made up of 2 curricular cores: the first is the Research Core, which consists of 8 credits of courses in computer methods, clinical research methods and biostatistics. The second is a Regression and Ethics Core, which includes 3 credits of courses in Regression and ANOVA, Logistical Regression and Ethics in research. Combined with the mentorship from their graduate programs, this certificate provides added expertise and develops students' ability to conduct clinical and translational research.

**Detailed Admissions Requirements**

Students must first be admitted into a doctoral or masters degree granting program in one of the Schools of the Health Sciences prior to their acceptance into the clinical translational sciences graduate certificate program. Once admitted for graduate study within a program, students may apply to the Institute for Clinical Research Education for admission to the certificate program. Students must be in good academic standing and possess a strong interest in clinical and translational science

**Contact Information**

Institute for Clinical Research Education  
200 Meyran Ave, Suite 300  
Pittsburgh, PA 15213  
Phone: 412-586-9632  
Fax: 412-586-9672  
Email: icre@pitt.edu

**Admissions Criteria**

• Applicants must meet the following requirements before filling out an online application.
• Candidates must be in a graduate program (PhD or MS) in the health sciences
• Candidates must have a high level of interest and potential for the pursuit of innovative clinical and translational research as a major focus of their career plan.
• A minimum GPA of 3.2 on a 4.0 scale
• TOEFL, IELTS, and Duolingo scores (when applicable)
• GRE scores are not accepted

Timeline

The Certificate in Clinical Translational Sciences accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Clinical Translation Sciences Certificate - Course Curriculum

Research Core (8 Credits)

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
  *CLRES 2020 (Biostatistics) may be substituted for an alternative graduate level biostatistics course up to 6 credits

Regression & Ethics Core (3 Credits)

- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Total Credits: 11

First Professional Program (MD)

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to their fullest potential.

UPSOM has a well-developed curricular infrastructure that combines a case-based curriculum with early and in-depth clinical experiences. The clinical years are characterized by an integrated clerkship structure and an emphasis on student flexibility. The UPSOM educational objectives, which are used to guide course content and learning objectives, underwent a school-wide review and update in 2023.

UPSOM introduced the Three Rivers Curriculum in 2023. This is a case-based curriculum with more frequent assessment, greater integration across the curriculum, and enhanced coverage of priority areas of four key threads: clinical reasoning, interprofessional education, leadership, and social medicine. Students will also participate in other activities (which includes observation of and appropriate participation in patient care, community-site visits, experiences with standardized patients, high-fidelity simulations, patient conferences, laboratory exercises, and other activities). A longitudinal performance-based assessment program provides formative support as students hone their clinical skills.
The patient focus of the UPSOM curriculum begins on day one, in the Introduction to Being a Physician course. Students interview patients about their experience of illness and experiences with their physicians, to develop an understanding of their roles as medical professionals. Medical interviewing and physical examination courses follow, along with exercises examining the many facets of physician life-in society, ethical and legal settings, and at the patient bedside.

Throughout the Foundations phase, students apply their new skills in local practices and hospitals one afternoon per week. The Keystone Fundamentals course runs through the fall of the first year and provides language and concepts that underlie the scientific basis of medical practice. Organ Systems block courses integrate physiology, pathophysiology, pharmacology, and introduction to medicine with concurrent courses in the Patient-Centered Care and Patient, Physician and Society blocks. Weekly discussions, patient interviews, and examination of patients reinforce essential clinical skills.

There are a number of other learning activities students participate in during their time in the Three Rivers Curriculum. The Longitudinal Alliance Program is designed to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system. The Community Alliance Program is a uniquely innovative program that aims to partner with community organizations to engage students and faculty in communities of practice to address social and structural determinants of health. The Streams are a unique way students can do a deeper dive into select areas such as advocacy or innovation. Flex Weeks are dedicated time for independent learning and remediation, shadowing, research, and personal activities.

The Legacy UPSOM curriculum was implemented in 2004 and features a mix of lecture; small group learning (much of which is problem-based learning; the remainder includes demonstrations, faculty-directed problem-solving exercises, skill-practice sessions, and other activities); and other activities. Student achievement of course objectives is supported by a host of technologies, including the online curriculum and podcasts. A longitudinal performance-based assessment program provides formative support as students hone their clinical skills.

The third-year curriculum consists of ten required clerkships. They are designed to optimize the balance between out-of-hospital and inpatient learning opportunities, eliminate unintentional curriculum redundancy, and optimize opportunities for student-designed curricula in the junior and senior years. The third year is punctuated by three one-week clinical focus courses. Every student engages in a mentored longitudinal research project conducted longitudinally throughout the four-year curriculum. Completion and presentation of the longitudinal research project is due in the spring of the senior year and is a requirement for graduation. An innovative system of web-based learning portfolios facilitates learner-mentor communication and enriches the possibilities for collaboration within and beyond the University.

Requirements for Admission

Admission Process

The admissions process is described in great detail on the Office of Admissions and Financial Aid web site.
The by-laws of the Admissions Committee specifically state the school's criteria for selecting students for admissions. The by-laws are reviewed and updated at the year-end business meeting of the UPSOM Admissions Committee.

https://www.medadmissions.pitt.edu/admissions/you-apply/policies-restrictions

Financial Aid

Financial aid for medical students is available in the form of scholarships, need-based grants, and loans (federal, private, and institutional resources). For maximum consideration of all resources, students should complete the CSS Profile and the Free Application for Federal Student Aid (FAFSA). These applications should include the student's information, spouse's information (if applicable), and both parents' information. Signed copies of federal tax returns (for student/spouse and parents) must be provided to the financial aid office. Aid is awarded on the basis of financial need, as determined from the financial aid applications and supporting documentation.

Newly admitted students should apply by March 1, or if admitted after February 15 no later than two weeks after acceptance, to ensure that an award letter is provided prior to the national decision date of April 15th.

Upperclassmen should provide all required information no later than March 1. The Free Application for Federal Student Aid (FAFSA) should be submitted prior to March 1 to ensure results are available prior to the deadline.

Students who do not wish to provide parental information are still considered for Federal Direct Unsubsidized loans, Federal Direct Graduate PLUS loans, and private loans; these students should complete the FAFSA and provide a signed copy of their federal tax return but do not have to submit parent information or the CSS Profile.

The financial aid process is described in detail on the Office of Financial Aid's website.

Academic Standards

The University of Pittsburgh School of Medicine offers a centrally governed, integrated, interdisciplinary curriculum that emphasizes problem solving and self-directed learning. The academic year is in session between 10 and 12 months, depending on the level of study. Academic calendars specific to each year can be found on the Office of Medical Education's web site. The first three years is a set curriculum and the fourth year is a combination of both set and elective offerings. To be considered to be making satisfactory academic progress, the student must complete the first two years of the curriculum by the end of the third year after initial enrollment. The full text of the guidelines for student promotion can be found in the medical student handbook on the Office of Student Affairs web site. Students are governed by an Honor Code, which seeks to support and sustain respect for each other as well as for patients. The full text of the Honor Code can be found in the student handbook.

Grading

The UPSOM makes use of a 2 tiered grading system.

The first two years of the curriculum are graded as Satisfactory/Unsatisfactory.

In the second two years of the curriculum, all clinical rotations and most electives are graded using a five-tiered grading system, with narrative comments: Honors, High Pass, Pass, Low Pass, or Unsatisfactory.

Degree Requirements

To receive the MD degree, students must:

1. Successfully complete curricular requirements for each of the four years.

The Foundations Phase courses include: introduction to being a physician; keystone fundamentals; cardiology; nephrology; pulmonology; digestion and nutrition; rheumatology; dermatology; evidence, discovery, and reasoning; patient, physician and society; and the patient-centered care courses.

Second year: Course work in organ systems including body fluid homeostasis, digestion and nutrition, hematology, endocrine, reproductive
and developmental biology, skin and musculoskeletal diseases, and integrated case studies; investigation and discovery; population health, racism in medicine; and introduction to patient care courses.

Third year: Rotations in inpatient medicine; family medicine; pediatrics; obstetrics and gynecology; neurology; psychiatry; surgery, anesthesiology; and outpatient medicine; emergency medicine; otolaryngology; dental medicine; and ophthalmology. The third and fourth year schedule is viewed as a continuum and designed so students may enroll in clinical or research electives at any time during the third or fourth years.

Fourth year: An acting internship in either internal medicine, pediatrics, family medicine, cardiothoracic surgery, physical medicine and rehabilitation, otolaryngology, or surgery; four weeks of an integrated life science course of the student's selection; a boot camp; and seven to eight months of clinical and/or research elective experiences.

2. Pass the United States Medical Licensing Examination, both Steps 1 and 2 CK, as well as an internal clinical skills competency assessment.

Degree Options

In addition to the MD program, the UPSOM offers a structured MD/PhD dual degree program, an MD/MA in Bioethics, a certificate program in Clinical Research, and a five-year non-degree-granting program for physician-scientists. Students can also participate in a joint degree program with the School of Public Health, earning a MPH, MMPH, or MS degree. The school encourages and facilitates students completing other degree programs during the MD curriculum, such as a MBA or MPA.

Professional Enrichment Courses

Professional Enrichment Courses (PECs) provide increased opportunities for preclinical medical student exploration and growth. Examples of PECs include Medical Spanish, Culinary Medicine, Introduction to Ophthalmology, and Plastic Surgery. In the Three Rivers Curriculum, students will be able to enroll in PECs during their Flex Weeks. In the Legacy Curriculum, students will take PECs mostly in the spring semester or longitudinally.

Doctoral

First Professional Program, MD Curriculum

Three Rivers Curriculum Foundations Phase

• Introduction to Being a Physician - MED 5111
• Keystone Fundamentals - MED 5102
• Patient, Physician, and Society 1 -MED 5103
• Medical Interviewing - MED 5104
• Evidence, Discovery, and Reasoning 1 - MED 5105
• Physical Examination - MED 5108
• Cardiology - MED 5109
• Nephrology - MED 5120
• Pulmonology - MED 5140
• Digestion & Nutrition - MED 5118
• Rheumatology - MED 5130
• Dermatology - MED 5136
• Patient, Physician, and Society 2 - MED 5125
• Evidence, Discovery, and Reasoning 2 - MED 5129
• Introduction to Clinical Medicine 1 - MED 5139
• Longitudinal Research Project - MED 5134

MS-2

Patient Physician & Society Block (PPS)

• Population Health - MED 5261
• Racism in Medicine - MED 5261

Organ Systems Pathophysiology Block (OSP)

• Body Fluid Homeostasis: Cardiovascular - MED 5218
• Body Fluid Homeostasis: Renal - MED 5218
• Body Fluid Homeostasis: Pulmonary - MED 5218
• Digestion & Nutrition - MED 5223
• Skin & Musculoskeletal Diseases - MED 5223
• Hematology - MED 5223
• Endocrine - MED 5223
• Reproductive & Developmental Biology - MED 5223
• Integrated Case Studies - MED 5227

Evidence and Discovery Block (E&D)

• Investigation and Discovery - MED 5265
• Longitudinal Research Project - MED 5134

Introduction to Patient Care Block (IPC)

• Advanced Physical Examination 2 - MED 5233
• Clinical Experiences 2 - MED 5233
• Advanced Medical Interviewing - MED 5234
• Clinical Procedures - MED 5234
Clinical Skills Assessment in IPC Block

- Clinical Competency Assessment Orientation Handbook

MS-3

Clerkships

- Adult Inpatient Medicine
- Adult Outpatient Medicine
- Anesthesiology
- Family Medicine
- Neurology
- Obstetrics and Gynecology
- Pediatric Medicine
- Psychiatry
- Specialty Care
- Surgery

Clinical Clerkships

Ten required clerkships form the core of the combined clinical years. The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. Together, the clerkships, and all other clinical experiences, share a fundamental set of objectives.

Overall, the objectives of the required clerkships are for students to be able to:

• Integrate basic science concepts with clinical reasoning.

• Establish and maintain appropriate therapeutic relationships with patients.

• Obtain a sensitive and thorough medical history.

• Perform a sensitive and accurate physical examination.

• Perform general clinical procedures.

• Participate in discussions and decision-making with patients and families.

• Clearly communicate medical information in spoken and written form.

• Develop knowledge, skills, and attitudes to practice the basic principles of prevention.

• Demonstrate sound clinical reasoning.

• Appropriately assess patients with common signs and symptoms.

• Appropriately use testing to guide diagnostic and therapeutic decisions.

• Diagnose and demonstrate basic understanding of common diseases and conditions.

• Describe therapeutic options and participate in the care of patients with common problems.
Recognize acute life-threatening medical problems and initiate care.

Develop the knowledge and exhibit the skills necessary to assist in the management of chronic diseases.

Participate in care in a variety of settings.

Develop the knowledge, skills and attitudes necessary to provide culturally competent care.

Recognize and develop approaches to mitigate bias, social inequities, and systemic racism that undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.

Use information and educational technology to facilitate research, education and patient care.

Incorporate ethical and legal principles in clinical practice and research.

Demonstrate professional behaviors.

Work effectively with others as a member or leader of a health care team or other professional group.

Develop an understanding of the impact of nonmedical determinants of health on health outcomes and health equity.

Clinical Focus Courses

The third year is punctuated by three one-week learning experiences, spread over the 48 weeks of the third year.

1. The Preclerkship Course is an introduction that is presented immediately prior to the start of the third year. It includes aspects of clinical, humanistic, and administrative preparation for clinical experiences.

2. The Interprofessional Geriatrics Course uses a combination of learning formats, including classroom sessions and experiences at clinical sites, to provide a highly focused exposure to key topics in this important discipline. A major emphasis is on developing skills to succeed in and lead inter-professional teams. This curriculum builds upon the new perspectives gained by students during the first six rotations of the third year.

3. Assessment Week is conducted at the time of transition from third to fourth year. Students complete a series of structured assessments and participate in focused review sessions. Together these activities provide students with timely and specific formative feedback about their progress toward the objectives of the curriculum.

MS-4

General Schedule for Fourth Year

During the combined clinical years (MS-3 & MS-4) students rotate through 10 required clerkships in any sequence. Additional requirements are 1 Acting Internship, 1 Integrated Life Sciences Selective, 1 Boot Camp Selective, 8 electives, and 3 Clinical Focus Courses.

What do the 12.5 Periods in the MS-4 year include?

- Eight electives
- One acting internship
- One integrated life science course
- One boot camp course
- Two recess/interview periods
• One recess week in the fall

**Acting Internship**

An acting internship (sub-internship) of four-week duration is required during the senior year. An AI is a clinical rotation offered on an in-patient service in which one or more attending physicians have overall responsibility for coordinated patient care. The service will be structured with both attending staff and house staff.

The acting internship should include the assignment to the student of specific groups of patients upon whom he or she completes an initial history and physical examination, constructs a differential diagnosis, formulates a treatment plan, writes orders, and carries out necessary therapy, all under careful supervision.

Acting internships that fulfill this requirement are offered in:

- Cardiothoracic Surgery
- Family medicine
- Internal Medicine
- Medical Intensive Care Unit
- NICU
- Physical Medicine and Rehabilitation
- Surgery

Search the Course Catalog for more information on Acting internships.

Acting internships in other departments or out of the city will not fulfill the AI requirement.

**Integrated Life Science Course**

The fourth year Integrated Life Science (ILS) Program includes a choice of courses that revisit some aspect of basic science after students have had several years of clinical experience. Because of the level of sophistication that students have developed by this stage in their medical education, they can better understand the relevance of basic science to clinical problems. Each student is required to complete one ILS course.

**ILS Courses**

- Clinical Pharmacology - MED 5710
- Genetics/Genomics in Primary Care - PEDS 5715
- Immunization, Immune Deficiency, and Inflammation in Kids - PEDS 5710
- Infectious Disease in Obstetrics, Gynecology and Reproductive Medicine - OBGYN 5725
- Neoplasia and Neoplastic Disease - MED 5715
- Neurosurgery and Head and Neck Dissection - NSURG 5705
- Science of Resuscitation - EMED 5735

**Boot Camp**

A Residency Boot Camp of four-week duration is required during the senior year.

Boot Camps that fulfill this requirement are offered in:

- Anesthesiology
- Emergency Medicine
- Internal Medicine
- Obstetrics & Gynecology
Recommended Electives

In order to provide diversity, it is strongly recommended that you take at least one elective in each of the following blocks:

1. Medicine or neurology
2. Pediatrics, pediatric neurology, pediatric pathology, pediatric surgery
3. Surgery or surgical subspecialties, obstetrics and gynecology
4. Ambulatory care, community medicine, or psychiatry.

Clinical Competency Assessment (CCA)

- Clinical Competency Assessment Orientation Handbook

Joint Degree

Bioethics, MD/MA

Students enrolled in the University of Pittsburgh School of Medicine may elect to earn the Master of Arts in Bioethics in conjunction with their medical degree. This allows the 30 credit MA degree to be earned in an accelerated program, taking a year away from the MD program, usually between the second and third years of medical school. During this one year, the student will follow the Dietrich School of Arts and Sciences calendar for the fall and spring terms, pay tuition at the in-state tuition rate set for Dietrich School graduate students, and must adhere to the rules, regulations, policies, and procedures of the Dietrich School. Applicants must complete the on-line application and provide official transcripts from their undergraduate and graduate studies, 3 letters of recommendation, a personal statement, writing sample, and official MCAT or GRE scores. Additional information about the MD/MA program may be found here.

Core Course Requirements

The following courses are required for the degree:

- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS
- BIOETH 2664 - BIOETHICS
  OR
- LAW 5464 - BIOETHICS AND LAW

Clinical Practica

The following courses are required for the degree:

- BIOETH 2604 - CLINICAL PRACTICUM 1

Thesis Research

Students must complete a research project and write a thesis under the supervision of an advisor, and defend it before a committee. Students may register for up to 6 course credits related to their thesis research.

Restrictive Electives
Students choose one elective from a list of "restricted elective" courses. Courses placed on this pursue ethical issues related to a particular area in substantial depth, than or employ a particular disciplinary perspective to explore issues in medicine and research. In recent years, restricted electives have included:

- Ethics and Aging
- Gender, Ethics, and the Body
- Medical Anthropology
- Medical Sociology
- Mental Health Law
- New Reproductive Practices and Law
- Philosophy of Psychiatry
- Public Health Law and Ethics
- Special Topics in Bioethics

**Electives**

The remaining credits may be taken in electives approved by the program director. Students work with the program director and their thesis advisor to pursue their particular interests. Students may take a Special Topics in Bioethics or Directed Reading in Bioethics course, or may identify relevant elective courses from various departments and schools of the University, including:

- Anthropology
- Communication
- Cultural Studies
- English
- Film Studies
- Gender, Sexuality, and Women's Studies
- History and Philosophy of Science
- Law
- Philosophy
- Psychology
- Public Health
- Sociology
- Women's Studies

In addition, through the Pittsburgh Council on Higher Education, full-time students may take courses at ten consortium-affiliated institutions, including Carnegie Mellon University, Duquesne University, and the Pittsburgh Theological Seminary.

**Clinical Science Training Program, MD/MS**

The Clinical Scientist Training Program (CSTP) offers clinical research training and scholarships to University of Pittsburgh medical students who are committed to careers in clinical investigation. Students may complete the dual MD/MS in clinical research or the MD/Certificate in clinical research.

The CSTP involves a research year between third and fourth year of medical school, typically scheduled July 1 - June 30. We expect students to take their research year after completing their core clerkships in the third year of medical school in order to ensure that their research will be informed by their clinical knowledge. The research year includes:

- **Formal coursework:** Students complete the ICRE core curriculum (11 credits). Those completing the MD/Certificate complete 7 additional elective credits. Those completing the dual MD/MS program complete 6 units of thesis research and 10 additional track-specific required and elective credits.
- **Mentored clinical research:** Students complete a mentored clinical research project with their SP mentor.
- **Financial support:** During the research year, students receive a living stipend, health insurance, and travel funds. Additionally, they receive a full tuition scholarship for the cost of the Certificate. The cost of the additional credits for the MS are the student's responsibility to pay. Students who successfully complete their research year objectives additionally receive a substantial tuition scholarship toward the fourth year of medical school upon returning from the research year.
Core Curriculum

All CSTP students complete the core curriculum during the CSTP research year.

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
- CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH
- CLRES 2075 - SEMINAR FOR UNDERSTANDING PRINCIPLES AND PRACTICES OF RESEARCH TECHNIQUES (SUPPORT)

- MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)
  or
- NROSCI 2014 - SPEAKING OF SCIENCE

MD/Certificate

Students completing the dual MD/Certificate register for 18 units during their CSTP research year (9 units in Summer, 4.5 units in Fall, and 4.5 units in Spring). These credits include the 11-credit core curriculum and 7 credits of elective credits.

MD/MS

Students completing the dual MD/MS degree receive 3 credits from pre-clinical courses in the MD curriculum MED 5180, MED 5181, & MED 5265 toward the 30-credit MS degree. Students register for the remaining 27 credits during their CSTP research year (9 credits in Summer, 6 credits in Fall, and 6 credits in Spring) and after returning to medical school.

Law and Bioethics, JD/MA

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Contact Information

University of Pittsburgh School of Law
Professor Greer Donley
3900 Forbes Avenue
Pittsburgh, PA 15260

(412) 648-1359
Requirements

The sequence of the curriculum is designed to allow students maximum flexibility. Students may either take the entire first-year School of Law curriculum intact, or they may take one bioethics course - Theoretical Foundations of Applied Ethics - in place of Criminal Law (which would then be taken in their second year of law school). Students should discuss this plan of study with Prof. Alan Meisel, Director of this joint program.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students acquire familiarity with the clinical setting by:

- rounding in specified services with residents, attending physicians, and other health care professionals, including one night on call per service
- participating in twice weekly seminars on medical sociology and clinical ethics and to fulfill those seminar requirements of reading, writing, discussion, and case presentations
- observing ethics consultations and clinical ethics teaching sessions
- completing a self-paced programmed text covering basic medical terminology

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs and in other parts of the University. For an up-to-date list of law school courses considered to be especially appropriate for students in this joint degree program, students should consult the courses listed as electives for the Health Law Certificate Program.

Students in the joint law and bioethics program will ordinarily fulfill the requirements of the Health Law Certificate Program in the law school and may obtain this certificate concurrent with the joint degree.

Advising

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in this joint degree program unless they limit the number of credits from outside the Law School that count toward their JD degree to no more than 12. See New York Rules of Court § 520(c)(5).

Credits

Students enrolled in the joint degree program accomplish in three to four years what would take four or more years if the two degrees were obtained separately. The total required number of credits 100, as compared with 118 credits if the two degrees were taken separately. The 100 credits include
34 credits of specifically prescribed* law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Taken as a joint degree program, the two degrees are ordinarily earned in 7 semesters and one summer.

During at least 5 semesters, joint degree students must be coded by the University Registrar as "primary law." During these semesters, they pay tuition at the Law School rate. They must enroll in at least 10 credits of law school courses.

Specifically Prescribed Law Courses

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING (Fall Term)
- LAW 5076 - LEGAL ANALYSIS AND WRITING (Spring Term)
- LAW 5028 - TORTS
- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5024 - PROPERTY
- LAW 5061 - PITT LAW ACADEMY (Fall Term)
- LAW 5062 - PITT LAW ACADEMY (Spring Term)
- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2904 - MA THESIS IN BIOETHICS
- BIOETH 2606 - CLINICAL PRACTICUM 2
- BIOETH 2664 - BIOETHICS
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS

Additional credits to complete the graduation requirement may include courses service as a bioethics restricted elective or a bioethics elective.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Medical Scientist Training Program, MD/PhD

The Medical Scientist Training Program (MSTP) offers exceptionally talented individuals the opportunity to undertake a physician-scientist training program tailored to their specific research interests. Our primary directive is to create future biomedical investigators by providing the highest quality graduate medical training. This program offers a range of special services and opportunities to facilitate the completion of a dual degree (MD/PhD). In addition to efficiency, the close integration of clinical and basic science training better reflects the future careers of biomedical scientists.

Information regarding the application process can be found on the MSTP web site.

Admissions Process: Prospective students must apply individually to the University of Pittsburgh School of Medicine through the American Medical College Application Service (AMCAS) and complete the MSTP online application. The criteria for acceptance to the MSTP include an outstanding academic record and letters of recommendation, positive personal interviews, and significant prior research experience. Admission to the MSTP is competitive, as is admission to graduate school, with students applying to the PhD programs of their choice after the first year of medical school.

Every year the program receives approximately 600 applications for a maximum of 15 available positions. The application review committee screens each completed application and well-qualified applicants are invited for an interview in Pittsburgh. Students recently enrolled in the MSTP have an average undergraduate GPA of 3.78 (This is for general assessment purposes only; applications are considered holistically.) We also review the letters of recommendation that are submitted to the medical school as part of candidates' School of Medicine application. Please be sure to include two letters of recommendation from faculty and/or scientists who are conversant with your research training. Previous research experience and commitment to a career as a physician-scientist are crucial in the evaluation of applications. Please convey your anticipated research interests and plans as well as past work. Additionally, a bachelor's degree or equivalent must be completed prior to matriculating.
1. MSTP Application Deadline: Applicants must submit an initial application through AMCAS by October 1. In order to be considered for the MSTP, your MD application along with the supplemental application for Pitt-CMU MSTP and all supporting documents, including letters of recommendation, are due no later than 11:59 PM on OCTOBER 15. We do not grant application deadline extensions. Early applications is strongly encouraged, as interview offers are made on a rolling basis. Our MSTP admits only U.S. citizens and U.S. permanent residents; international students are ineligible for the MSTP.

2. Acceptances: We accept students on a rolling basis; therefore, it is very important to complete the application, including recommendation letters, as early as possible. Applicants must complete their MD secondary application as soon as possible. Starting October 17, those who were chosen for interviews will be informed of their acceptance status to our program within roughly three weeks of their interview date. Applicants are ranked and notified of the following action:
   1. Acceptance into MSTP with full funding for all years of medical school and graduate school (including tuition and stipend)
   2. Wait-listed for acceptance into MSTP with funding
   3. Not accepted into MSTP

A second group of students is placed on the wait list that is considered depending on spots available after admitted student decisions. The University of Pittsburgh MSTP also accepts a small number of matriculated second-year medical students into the dual-degree program based upon their outstanding performance and developing interest in research pursuits during their medical school experience. Once admitted to the program, we do not accept any transfer credits from undergraduate or graduate courses to fulfill the MSTP course requirements.

The University of Pittsburgh and Carnegie Mellon University MSTP recognizes that our training environment is positively enriched by trainees with diverse backgrounds and needs. Our program considers all eligible applicants and does not discriminate on the basis of race, color, sex, veteran status, disability, national origin, creed, marital status, age, disability, gender identity, or sexual orientation.

**Tuition and Fees:**

MSTP students are fully supported through the entire program. Tuition, health insurance, and stipend are supported by a combination of funds from a National Institute of Health training grant, individual graduate programs, and School of Medicine funds.

**Degree and Program Requirements**

The MSTP program has many unique aspects of the curriculum, designed to integrate MSTP education through courses such as molecular medicine, the research basis of medical knowledge, professional development, ethics, and longitudinal clinical clerkships. MSTP students begin training to become physician-scientists from the very first week, and are well advised about possible courses and research opportunities. Descriptions of additional MSTP courses are listed below:

- MSTP 5015 - MSTP LABORATORY RESEARCH ROTATION
- MSTP 5010 - MOLECULAR MEDICINE
- MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSTP 5973 - PROFESSIONAL DEVELOPMENT II: METHODS AND ANALYSIS
- MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
- MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
- MSTP 5990 - LONGITUDINAL CLINICAL COURSE
- MSTP 5993 - LONGITUDINAL CLN CLERKSHIP 3
- MSTP 5955 - MSTP WORKSHOPS
- MSTP 5975 - CAREER-RELATED RESEARCH

**Master's**

**Medical Science, MS**

The academic requirements for this degree will include successful completion, i.e., passing grades, of all courses in the Preclerkship Years (MS 1-2) and the submission a scholarly project that incorporates the student's medical knowledge. The scholarly project would represent a mentored capstone project rather than be a credit bearing course. The scholarly project would culminate in a document structured as a research report or literature view. The written product will be at least 5-page summary demonstrating the knowledge gained through the engagement in the project. Together, these requirements would meet the criteria defined by the Program Committee for the Master of Medical Science. No additional courses will be
required, and no additional tuition will be required for completion of the scholarly project. The Program Committee for the Master of Medical Science will decide on the acceptability of the project. The student must also submit a letter voluntarily withdrawing from the University of Pittsburgh School of Medicine MD program.

Non-Degree
Physician Scientist Training Five-Year Non-Degree Program

Overview: The Physician Scientist Training Program (PSTP) at the University of Pittsburgh School of Medicine is a five-year tuition assistance non-degree granting program through which students with a strong basic/translational research interest can start to build careers as physician-scientists. The PSTP website is located at pstp.pitt.edu.

Tuition Assistance: Medical school tuition is partially covered by the program ($10,000 for each of the four years of medical school). Students do not pay tuition during their research year between MS2 and MS3.

Admissions Process: Applicants invited for an interview at the University of Pittsburgh School of Medicine are eligible to apply to the PSTP. A completed PSTP application consists of both the PSTP supplemental application and two research-focused letters of recommendation.

The PSTP interviews approximately 20 qualified candidates per year. Qualified applicants demonstrate a high degree of scholastic excellence, a sincere commitment to a career in academic medicine, and the potential to be a leader in biomedical research.

Program Completion Requirements

All PSTP students successfully complete paid research rotations during the summer before and after the first year of medical school, and a paid research year between the second and third years of medical school. PSTP students also participate in a longitudinal enrichment curriculum of research-oriented classes:

- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
- MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
- MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR
- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
- MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
- MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR

Graduate Programs

The University of Pittsburgh School of Medicine has a long tradition of research excellence and training by world-class faculty committed to mentoring the next generation of scientists. The School of Medicine offers a variety of programs leading to the Doctor of Philosophy, the Master of Science, or a certificate. In addition, it works with other schools of the University through collaborative graduate programs. The School of Medicine also offers an MD degree as well as a joint MD/PhD program enabling exceptionally able students to earn both degrees simultaneously. These programs are described in the First Professional Program section of the School of Medicine catalog.

Fax: 412-648-1077
http://www.somgrad.pitt.edu

Degree Requirements
In addition to School of Medicine requirements, all University requirements as detailed in the *Regulations Governing Graduate Study at the University of Pittsburgh* section of this catalog apply.

**Graduate Programs (PhD, MS, Certificate)**

Biomedical Informatics (PhD, MS, Certificate)

Biomedical Sciences (MS)

Cancer Biology and Oncology (PhD)

Computational Biology (PhD)

Computational Biomedicine and Biotechnology (MS)

Hearing and Vision Sciences (Certificate)

Institute for Clinical Research Education

Clinical & Translational Science (PhD)
Clinical Research (MS, Certificate)
Medical Education (MS, Certificate)

Integrative Systems Biology (PhD)

Interdisciplinary Biomedical Graduate Program

Cell Biology & Molecular Physiology (PhD)
Cellular & Molecular Pathology (PhD)
Molecular Genetics & Developmental Biology (PhD)
Molecular Pharmacology (PhD)

Microbiology and Immunology (PhD)

Molecular Biophysics and Structural Biology (PhD)

Neurobiology/Neuroscience (PhD)

**Certificate**

**Biomedical Informatics Certificate**

**Certificate Requirements**

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

**Additional Requirements for Master's, Doctoral, and Certificate Students in Biomedical Informatics**
Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at http://www.ctsi.pitt.edu/RCR/index.shtml.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Clinical Research (Certificate)

The Certificate in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaboration among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over a year of part-time study.

Contact Information

Institute for Clinical Research Education
200 Meyran Ave, Suite 300
Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672
Email: icre@pitt.edu

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Certificate in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements
Coursework Requirement:

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
CLRES 2010 - CLINICAL RESEARCH METHODS
CLRES 2020 - BIOSTATISTICS
CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Electives

Students collaborate with your academic advisor to enroll in ICRE courses that most benefit their research and future career goals. Certificate students take a minimum of 6 elective credits.

Responsible Conduct of Research (RCR) Requirement:

Clinical Research Certificate students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

More Information:

For additional program details, please visit the certificate program page and review the program handbook.

Comparative Effectiveness Research (Certificate)

The Certificate in Comparative Effectiveness Research aims to teach trainees the skills necessary to design and conduct high quality comparative effectiveness research. The program is for advanced clinical researchers who have already completed the Institute for Clinical Research Education core curriculum. Since this program is highly specialized, please contact the ICRE using the contact information below for further program details.

Contact Information

Institute for Clinical Research Education

https://www.icre.pitt.edu/degrees/cert_cer.html
Medical Education (Certificate)

This certificate program is flexible and allows students to choose courses within the Medical Education program that align with their learning and professional goals. Students in this program typically choose courses in teaching and learning to enhance their skills as a clinician-educator at either a university or community-based program. The program is typically completed over one year of part-time study.

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a clinical appointment within UPMC (faculty, fellow, or resident) and/or an academic appointment within a University of Pittsburgh Health Sciences school. Since successful participation in and completion of our courses depend on having clinical and classroom environments in which to teach, concurrent with the program.
- Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.
- Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- We do not accept GRE or MCAT scores

Timeline

The Certificate in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements
The Certificate in Medical Education offers a very flexible curriculum. Students are required to complete 15 credits, but are able to choose courses based on their individual educational interests and research goals. A minimum of 9 credits out of the 15 must be Medical Education courses. Please see the ICRE courses page for a complete list of our courses.

More information

To learn more about the Medical Education Program at the Institute for Clinical Research Education, please visit the program page and review the program handbook.

Doctoral

Biomedical Informatics (PhD, MS, Certificate)

Biomedical informatics is the science and engineering of information handling in health care delivery and biomedical research, studying and developing models of the various aspects of health care delivery and biomedical research in order to better understand how they operate. Those models suggest interventions that may improve health care delivery and biomedical research, including new methods for capturing, organizing, analyzing, and conveying clinical information to clinicians and researchers. Experiments are performed in which the effect of promising interventions on health care delivery or biomedical research are observed and compared to existing methods, which serve as controls. The analysis of the results of such experiments can lead to greater understanding of health care delivery and biomedical research, and thereby to methods with which to improve them.

Example areas of investigations in biomedical informatics at the University of Pittsburgh include the development and evaluation of new computer-based methods for (1) analyzing proteomic data to diagnosis disease, (2) supporting clinical trials, (3) providing clinical information to patients, (4) understanding the mechanism of diseases from genomic data, (5) natural language processing of electronically available medical text to extract important clinical features, (6) alerting clinicians when patient care appears atypical, (7) real-time detection and assessment of outbreaks of infectious disease and (8) teaching clinical trainees.

This program offers both master's and doctoral degrees. Most students choose to follow a general course of study in biomedical informatics; some, however, elect a specialization in one of the following areas: bioinformatics, clinical informatics, image informatics, or biosurveillance/infectious disease informatics. The specific curricula for the specializations, which are variations of the general course of study in biomedical informatics, can be found on the Training Program Web site at http://dbmi.pitt.edu.

Individuals who want a less intensive exposure to informatics may seek a 15-credit certificate in lieu of an academic degree. The biomedical informatics certificate can be a means of augmenting professional training in fields related to informatics and/or fulfilling educational needs associated with a professional position. Trainees across all health professions are welcome.

More information on Admissions, Financial Aid, Curriculum, Courses, Degree Requirements, and Faculty, can be found at http://dbmi.pitt.edu.

PhD Requirements

Credits: To earn the PhD degree in biomedical informatics, a student must complete a program of study approved by a committee of biomedical informatics faculty. The program requirements include a minimum of 72 credits consisting of a required Foundations course (15 credits); Research
Skills (5 credits); Teaching Practicum (3 credits); doctoral dissertation research (18 credits); elective courses (12 credits); additional electives and/or independent study (19 credits); successful completion of a preliminary evaluation; successful completion of a doctoral comprehensive examination; and research work leading to an acceptable dissertation. All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertations studies (to be determined by the faculty advisors). A minimum "B" grade is required in all graduate courses.

Admission to Candidacy/Dissertation: To qualify for admission to candidacy, a student must have completed formal coursework with a 3.3 GPA or higher, passed the comprehensive examination, and received approval of the proposed subject and plan for the dissertations from their dissertation committee following a prospectus meeting. The dissertation committee usually includes the principal dissertation advisor and three additional faculty (a majority of the committee must be biomedical informatics core faculty, and have University graduate faculty status).

An appropriate dissertation project involves a substantive piece of original and independent biomedical informatics research, grounded in an appropriate mode of literature and providing a significant contribution to the field. The dissertation must be successfully defended in a public oral defense. The dissertation process will follow the applicable regulations and procedures of the University and the School of Medicine, as described in the Regulations Pertaining to Doctoral Degrees section of this document.

MS Requirements

Credits: The Master of Science in Biomedical Informatics requires a minimum of 36 credits consisting of required biomedical informatics core Foundation (15 credits); Research Skills (4 credits); electives/independent study (14 credits); and Research (3 credits).

All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertation studies (to be determined by faculty advisors). A minimum "B" grade is required in all graduate courses.

Research Project or Thesis: A key element of the program is a research project with two key deliverables: (1) the writing and submission of a paper of publishable quality based upon the research and (2) the completion of an oral examination on its contents. A master's project committee will oversee the student's research progress, including the oral comprehensive examination. Students have the option of developing their projects into a formal master's thesis.

Successful completion of the oral examination on the research project satisfies the comprehensive examination requirement of the University's Committee on Graduate Studies. Final certification of the completion of the master's degree requires submission of the hard copy of the master's research project to the program coordinator.

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Additional Requirements for Doctoral, Master's, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at https://ctsi.pitt.edu.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Cell Biology and Molecular Physiology (PhD)
The graduate program in Cell Biology and Molecular Physiology (CBMP) has a rich tradition of scientific training and discovery. Graduates of the PhD program have gone on to become chairs of departments at six major U.S. medical schools and are represented at all levels of academic and biomedical research. The program combines basic and clinical research faculty who are dedicated to the training of students. Faculty employ an integrative cell biology focus: combining tools of imaging, genetics, biochemistry, molecular biology, structural biology, computational modeling and physiological approaches to understand the functions of cells, tissues and organisms. The program is home to the Center for Biologic Imaging, a state-of-the-art imaging center and the NIH-supported O'Brien Kidney Center. Students in CBMP are supported in part by a T32 training grant from NIGMS. Areas of expertise in the program include the cellular trafficking of proteins and lipids, genetic disorders of ion channels, fundamental mechanisms of cell-cell adhesion and cell polarity, DNA damage repair and cancer, models of neurodegeneration and aging, signal transduction in diabetes, cell biology and physiology of renal diseases and the regulation of male and female reproduction systems.

Core Courses

Apart from the general degree requirements for all IBGP students, all CBMP students are required to take the following core courses:

- MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS
- OR
- MSCBMP 2860 - MULTIPARAMETRIC MICROSCOPIC IMAGING

Other electives include:

- MSCBMP 2870 - HISTOLOGY
- MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC
- MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY
- MSCBMP 2852 - RESEARCH SEMINAR IN CELLULAR BIOLOGY

Cellular and Molecular Pathology (PhD)

The Cellular and Molecular Pathology program integrates the fields of cell biology, molecular biology, and innate immunity with the study of human disease, primarily in the context of translationally relevant Regenerative Medicine. Utilizing the latest technologies, the program combines both basic science and clinical research to explore fundamental questions related to the biology of normal tissue growth and embryonic development, current best practices in tissue engineering, and the cellular and molecular pathways that lead to the development of disease. Active research programs investigate diverse topics such as liver development, disease and transplantation in the NIH-funded Pittsburgh Liver Research Center; developmental neuroscience and neurological diseases; mechanisms of gene regulation; cancer biology; angiogenesis; pulmonary disease; inflammation and autoimmunity; genetics; bioinformatics; and molecular diagnostics. Research laboratories are located throughout the medical center campus and research studies involve both basic research scientists (PhD's) and clinician scientists (MD's, PhD's, and MD/PhD's).

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses for the Cellular and Molecular Pathology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCMP 2730 - MOLECULAR MECHANISMS OF TISSUE GROWTH AND DIFFERENTIATION
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- OR
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY

869
Additionally we require at least 5 terms of:

- MSCMP 2750 - RESEARCH SEMINAR

As well as two electives of your choice

from either the above electives or from courses throughout the School of Medicine on diverse topics of interest to students such as the following CMP-sponsored courses (partial listing):

- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY

Clinical and Translational Science (PhD)

The Institute for Clinical Research Education at the University of Pittsburgh has designed the PhD Program in Clinical and Translational Science to train researchers in this emerging field that aims to close the gap between basic science and clinical research. This rigorous and advanced training program is intended primarily for clinicians, and aims to substantially enhance the capabilities of scientists to conduct high-quality clinical and translational research.

Contact Information

Institute for Clinical Research Education
200 Meyran Ave, Suite 300
Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672
email: icre@pitt.edu

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.5 on a 4.0 scale
- TOEFL, IELTS, or Duolingo scores (when applicable)
- MCAT or GRE scores are not accepted

Timeline
The PhD Program in Clinical and Translational Science accepts applications from September 1 through January 31 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by January 31. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The PhD in Clinical and Translational Science curriculum is organized into 4 categories of coursework: Core, Advanced Selectives, Research Specialization, and Dissertation Research. While students advance through the program they will also complete the Preliminary Evaluation, Comprehensive Exam, and Dissertation Milestone.

To view the curriculum in detail, please visit this page.

Non-credit Requirements/Milestones

Responsible Conduct of Research (RCR) Requirement

PhD in CTS students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

Comprehensive Examination

PhD in CTS students are required to complete a Comprehensive exam. This exam consists of a written examination in the form of an NIH R01-style proposal (including, at a minimum, specific research aims, background and significance, and research methods) and an oral defense of the written portion.

Doctoral Prospectus and Dissertation

PhD in CTS students must complete both a Doctoral Prospectus and successfully complete and defend a Doctoral Dissertation.

- Individuals must prepare a dissertation proposal for presentation to a doctoral dissertation committee at a formal dissertation overview meeting. At this meeting, the dissertation committee members will provide guidance in shaping the conceptualization and methodology for the individual's Doctoral Dissertation.
- The proposal, writing, and defense of a culminating research project. The written work must conform to the University of Pittsburgh style manual. The Final Oral Defense is a public defense of the Doctoral Dissertation.

More information:

Please view the PhD in CTS Program Handbook for complete program details.

Computational Biology (PhD)
Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavioral science.

The Joint Pitt-CMU PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

Fax: 412-648-3163  
kmg120@pitt.edu
Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences are ideal candidates.

Recommended Prerequisites

For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91.

Application

REQUIRED MATERIALS - Deadline December 10, 2019

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts (submitted online)
- Conversion of GPA (for international students only)
- Unofficial TOEFL Scores (submitted online)
- Application Fee

Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.

For more information on application process, see www.compbio.pitt.edu/?page_id=163

Financial Aid

All students are provided with a stipend and full tuition remission. Assistance is also provided for health insurance.

Teaching Assistantships

Although all students are supported as research assistants throughout their time in the program, students are required to TA for one semester. There are also opportunities to assist in the teaching courses of the program. Students are also encouraged to develop teaching skills by mentoring other students and passing on their knowledge to lab mates and fellow students.

Curriculum
The curriculum is designed to train students who will shape the next generation of discovery in computational biology in academia and industry. Students are required to complete 72 credit hours of academic work toward partial fulfillment of the requirements for completion of dissertation study. Of these, 30+ are formal coursework, and the remaining to be completed with full-time research.

All students are required to take five core graduate courses. The core courses aim at providing a strong common background in computational biology before they specialize in particular research areas

**Core Courses**

- Machine Learning
- Introduction to Computational Structural Biology
- Computational Genomics
- Cellular and Systems Modeling
- Laboratory Methods for Computational Biologists

In addition, all students are required to take three graduate elective courses: a life science/physical science course; an advanced interdisciplinary elective specified for the student's chosen area of specialization; and one general elective.

**Specialization Areas**

- Computational Genomics
- Computational Structural Biology
- Cellular and Systems Modeling
- Bioimage Informatics

For more information on the curriculum, see [www.compbio.pitt.edu/?page_id=87](http://www.compbio.pitt.edu/?page_id=87)

**Other Courses**

In addition to core and elective courses, students take complementing courses, if needed, and participate in program seminar, journal clubs, ethics courses and directed studies toward their dissertation projects.

**Program Seminar Series**

Students enrolled in the program are expected to attend scientific seminars during all years of training. Beginning in their second year and ending in the year before their thesis defense, students present their research progress to fellow students and the faculty on at least an annual basis.

**CPCB Course**

Effective presentation of scientific data is an invaluable aspect of graduate training. Therefore, all first- and second-year students must present a scientific article on a topic (selected by a faculty member) that introduces students to the methodology and applications of computational biology. The talk is made in a format that allows the student to develop basic presentation skills. Students subsequently receive feedback on their talks, thereby improving their presentations skills as their graduate training advances.

**Training in Ethics**

Ethical conduct and scientific integrity is an essential aspect of research. This is especially important given the competitive nature of funding processes and the high demand for productivity. Hence, the program instructs students on the significance and practice of ethical conduct.

**Directed Study**
Credits are given for laboratory projects (wet or computer labs) under the direction of the dissertation advisor prior to admission to candidacy for the doctorate.

**Scheduling**

We anticipate two types of course schedules for students in the program. The default for students who have taken the prerequisites will be to take three courses in each of the first two terms (50-75% time) and spend the remaining time on research. Such students would normally take the core courses in the first year along with one additional course. The third and fourth terms would be split between taking electives and doing research.

Students who enter with some biology or computer science or physical science background but not with sufficient background to take all of the core courses would take a mix of missing prerequisites and core courses in each of the first two terms (approx. 90% time) and spend 10% time on research. These students would then take a mix of remaining core courses and electives in the third and fourth terms (along with 30% research) and finish electives in the fifth and/or sixth terms.

**Comprehensive Examination**

Students are required to pass a comprehensive examination after completion of their courses, prior to being officially admitted to candidacy to the PhD degree. Students are expected to complete this examination no later than the beginning of the spring term of their third year. The comprehensive examination consists of two parts: a 12-page "grant-style" written proposal of the proposed research, followed by an oral defense of the proposed research.

**Post-Comprehensive Qualifying Examination**

Students who have been accepted to PhD candidacy conduct research on a full time basis, and are required to complete a minimum of 40 credit hours (9-14 credits per term) of full-time dissertation study in order to meet the criteria for dissertation defense. Hence, all students will have completed at least 72 credit hours of study prior to graduation, including 29 credit hours of core + elective courses, and at least 40 credit hours of dissertation research.

**Completion of Degree**

The program is structured in such a way that students can finish their degree within four years of entering their dissertation laboratory. However, it is recognized that the actual time required to attain the degree depends on the specific type of research undertaken and how quickly progress is made in completing the experimental program.

**Terminal Master's Degree**

The Program does not admit students whose goal is to attain a MS degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

For more information on the program, such as list of training faculty, please see [www.compbio.cmu.edu/?page_id=31615](http://www.compbio.cmu.edu/?page_id=31615)

**Integrative Systems Biology (PhD)**

ISB is an innovative program in graduate training that rapidly immerses students into a research environment, then mentors them to become independent scientific practitioners, skilled not only in the art of technical execution but in the creative multidisciplinary thinking required to address important questions in systems biology. Students receive a PhD in Integrative Systems Biology.

Integrative Systems Biology is a field of study that has emerged within the last decade as a unifying discipline that focuses on placing the molecules that comprise living systems within functional and organism contexts. The goal of ISB is to utilize all of our available resources to create a training
and research environment to answer challenging questions of fundamental importance in biomedical and life sciences. The ISB faculty are drawn from cellular, developmental, molecular and systems biologists across the University of Pittsburgh campus and are distributed between research foci:

- Quantitative Biology
- Translational Medicine

Admission Requirements and Procedures

Students most likely to gain admittance will have a baccalaureate degree from a natural science, physical science, or engineering program, a grade point average of 3.0 (on a scale of 4), and three letters of recommendation. As this is an accelerated program, students should have prior immersive experience in research studies. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 650 (paper), IELTS score of at least 7.50 or iBT score of at least 100 is required for admission to the Program.

Additional information and a link to the online application can be found at http://www.isb.pitt.edu/how-apply

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the program in the fall session, and after performing three rotations identify an advisor and area of research dissertation research project. Areas of research focus include Cell, Development, and Molecular Biology, Quantitative Biology, Translational Medicine, and Genes and Evolution. Required course work is completed during the first two years. After Spring of the students' second year, they take a comprehensive examination that includes the generation of a research proposal ready for submission to national fellowship programs. Students receive career mentoring throughout their ISB training to ensure a seamless transition to the postdoctoral level. Additional information can be found in the Student Handbook: https://www.isb.pitt.edu/sites/default/files/ISB-Handbook_4-13-21.pdf.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

- ISB 2000 - LABORATORY RESEARCH ROTATION
- ISB 2070 - THE BEDSIDE TO BENCH
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON
- BIST 2041 - INTRODUCTION TO STATISTICAL METHODS
Microbiology and Immunology (PhD)

The Program in Microbiology and Immunology (PMI) is an innovative program in graduate education that is administered through the School of Medicine of the University of Pittsburgh. The program aims to train highly motivated PhD students as self-reliant scholars in an environment where they have ready access to the breadth of expertise, approaches and sub-disciplines of microbiology and immunology. Students in this program will gain broad knowledge of diverse fields within microbiology and immunology, which is supplemented by seminars, journal clubs and laboratory rotations. The program rapidly immerses students into a research environment, and mentors them to become independent and creative scientists.

PMI brings together faculty in basic and translational sciences, including researchers from the University of Pittsburgh School of Medicine (Departments of Microbiology & Molecular Genetics and Immunology; Center for Vaccine Research; Microbiome Center), Magee-Women's Research Institute, Rangos Research Center at the Children's Hospital of Pittsburgh, and the University of Pittsburgh Cancer Center (e.g. Cancer Virology and Cancer Immunology Programs).

Faculty research interests in the PMI can be broadly divided into the following areas:

- Autoimmunity
- Basic immunological mechanisms
- Bacteriology
- Cancer immunology
- Discovery and development of novel antimicrobial therapies
- Host-pathogen interactions
- Immunology of organ transplantation
- Innate Immunity
- Parasitology
- Viral and bacterial pathogenesis
- Virology

Admission Requirements and Procedures

Students with at least a baccalaureate degree in biological or physical science or in mathematics, computer science or engineering are encouraged to apply. Admissions are based upon the student's academic record, letters of recommendation, previous research experience, written statement of interest and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. Applicants who have earned a bachelor's degree or a higher degree from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Additional information and a link to the online application can be found at https://www.pmi.pitt.edu/admissions

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4-6 years. Students enter the program in the fall sessions and perform four research rotations during their first year. It is expected that four rotations of seven weeks each will be performed in different laboratories of members of the PMI training faculty, but there are several circumstances where the requirement for four rotations or laboratories might be relaxed. Additional information can be found in the Student Handbook on our website by clicking here. https://www.pmi.pitt.edu/sites/default/files/KristinD-Files/Handbook_PMI_05.18.21.pdf

A minimum of 72 credits is required for graduation with a PhD. Of these, 32 credits must come from approved courses, both required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination, to be held during the fall term of the second year and advancing to candidacy. Required course work includes the following:

- MSMI 2100 - FIRST PMI LABORATORY ROTATION
- MSMI 2110 - SECOND PMI LABORATORY ROTATION (taken during fall and spring terms of the first year)
- MSMI 2000 - PRINCIPLES OF MICROBIOLOGY AND IMMUNOLOGY (taken during the fall of the first year)
- MSMI 2200 - COMPREHENSIVE MICROBIOLOGY: MOLECULAR VIROLOGY & MOLECULAR PATHOGENESIS and/or
- MSMI 2210 - COMPREHENSIVE IMMUNOLOGY (taken during the spring of the first year)
- MSMI 2250 - TA: MEDICAL MICROBIOLOGY (taken during the spring of the second and third years)
Molecular Biophysics and Structural Biology (PhD)

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

Admission Requirements and Procedures

Students with at least a baccalaureate degree in physics, chemistry and mathematics or cellular and molecular biology are encouraged to apply. Admissions are based upon the student's academic record, CV, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duo Lingo. A minimum TOEFL score of 600 (paper) or 100 (iBT), IELTS score of at least 7.00, or a minimum Duo Lingo score of 120 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disability.

Additional information and a link to the online application can be found at http://www.mbsb.pitt.edu/index.php/apply-here.

Financial Assistance

All students receive complete financial support in the form of stipend, tuition, and health insurance.

Degree Requirements
All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first two years. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

- MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS or
- MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring & summer term of the first year.

- INTBP 2000 - FOUNDTNS OF BIOMEDICAL SCIENCE - taken during the fall term of the first year

- MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE or
- MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE - taken during the fall term of the first year

- MSMBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS or
- MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS - taken during the spring term of the first year

- 09763 - MOLECULAR MODELING AND COMPUTATIONAL CHEMISTRY taken during the spring of the first year

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer term of the first year

- INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS - taken during the summer term of the first year

- MSMBPH 2020 - STRUCTURAL BIOLOGY/ MOLECULAR BIOLOGY SEMINAR or
- MOLBPH 2020 - STRUCTURAL BIOLOGY/ MOLECULAR BIOPHYSICS SEMINAR - taken every fall and spring term through graduation

- MSMBPH 2030 - DATA AND LITERATURE CLUB or
- MOLBPH 2030 - DATA AND LITERATURE CLUB - beginning with the spring term of the first year, D&L Club is taken every fall and spring term through graduation

- MSMBPH 2040 - TA: MBSB or
- MOLBPH 2040 - TA: MBSB taken once in any term

Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at http://www.mbsb.pitt.edu/index.php/training/curriculum.

**Molecular Genetics and Developmental Biology (PhD)**
The Molecular Genetics and Developmental Biology (MGDB) graduate program provides an exciting and vigorous academic environment for highly motivated and qualified students to prepare for a rewarding career in biomedical research. The MGDB program brings together faculty in both basic and translational sciences, including researchers from the Magee-Womens Research Institute, the Aging Institute, the UPMC Hillman Cancer Center, the Children's Hospital of Pittsburgh and the Department of Biological Sciences. MGDB faculty are pursuing research projects that address fundamental, contemporary issues in biology and medicine using molecular genetic, genomic and computational tools in a spectrum of models from yeasts, worms, flies and mice to human studies. MGDB research is centered at the cutting edge of Developmental & Reproductive Biology, Geroscience & Aging Biology, Stem Cells & Regeneration, and DNA Damage & Repair. Our work has direct relevance to cancer, diabetes, heart disease, fertility/infertility, and age-related diseases and regenerative medicine. We are committed translating our bench discoveries to the bedside and graduate students are fully integrated in all aspects of our investigative work.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the Molecular Genetics and Developmental Biology program:

- MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE
- MSMGDB 2535 - MODEL ORGANISMS
- MSMGDB 2550 - RESEARCH SEMINAR
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS

Molecular Pharmacology (PhD)

Biomedical research in the Molecular Pharmacology program is focused on cutting-edge discovery of molecular and cellular mechanisms of intracellular signaling using a combination of biochemical, molecular biological, biophysical, ultrastructural, and imaging approaches. Basic research into cellular communication in health and disease is the main emphasis of the program with the added advantage of an array of translational opportunities into the development and testing of novel therapeutic agents. Applications of this common theme are directed toward research in molecular biology of cancer, neuropharmacology, cell and organ system pharmacology, signal transduction, neurodegenerative diseases and drug discovery. Formal collaborative interactions with the Pittsburgh Cancer Institute, the Center for Neuroscience, the Pittsburgh Institute for Neurodegenerative Diseases (PIND), the Division of Clinical Pharmacology, the University of Pittsburgh Drug Discovery Institute, University of Pittsburgh Structural Biology Imaging Center, the Vascular Medicine Institute and the Center for Biological Imaging provide a broad multidisciplinary approach to training in modern molecular pharmacology.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the molecular pharmacology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 3360 - MOLECULAR PHARMACOLOGY
- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION
- MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS
  OR
- MSMPHL 3375 - NEUROPHARMACOLOGY
  OR
- MSMPHL 2370 - DRUG DISCOVERY
- MSMPHL 3340 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1
- MSMPHL 3341 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 2

Neurobiology/Neuroscience (PhD)

The Center for Neuroscience (CNUP) Training Program is an interschool PhD degree-granting program offered cooperatively by the School of Medicine (Neurobiology, MSNBIO) and the Dietrich School of Arts and Sciences (Neuroscience, NROSCI). The program introduces students to the
fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

We are highly invested in enhancing diversity, which is expressed in multiple forms - race, ethnicity, gender and gender identity, sexual orientation, socioeconomic status, language, culture, national origin, religious commitments, age, (dis)ability status and political perspective. In addition, we strive to create a community that is equitable, so that all persons have equal opportunity, and inclusive, so that everyone feels welcomed. We hope you share our values and goals.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Brain Institute, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Conte Center for Translational Mental Health Research, Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Contact Information
Center for Neuroscience
E1440 Thomas E. Starzl Biomedical Science Tower
200 Lothrop Street
Pittsburgh, PA 15261
412-648-9537
Fax: 412-648-1441
http://cnup.pitt.edu/
argenzio@pitt.edu

Admission Requirements and Procedures
Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those who are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, test scores, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics, neuroscience, or psychology with a cumulative grade point average (GPA) of at least 3.40 (on a 4.00 scale). Applicants with a GPA below 3.0 will not be considered.

Additional information and a link to our on-line application can be found at: https://www.cnup.pitt.edu/phd-program-training/prospective-students

Financial Assistance
All students receive full stipend support and individual health benefits. This support is derived from University fellowships and numerous grants funded by the federal government and private agencies. Students in the program also have access to sponsorship on NIH training grants.

PhD Degree Requirements
https://www.cnup.pitt.edu/phd-program-training/current-students/phd-requirements

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

Core courses:

- MSNBIO 2010 - SCIENTIFIC ETHICS or
- NROSCI 2010 - SCIENTIFIC ETHICS
• MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
• NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

• MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
• NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

• MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
• NROSCI 2102 - SYSTEMS NEUROBIOLOGY

• MSNBIO 2624 - GRANT WRITING

Other requirements:

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; participate in program-wide journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

A list of CNUP Training Faculty may be viewed at:  https://www.cnup.pitt.edu/people/core-faculty-members

A complete list of courses may be viewed at:  https://www.cnup.pitt.edu/phd-program-training/current-students/curriculum

Master's

Biomedical Sciences (MS)

The Biomedical Masters Program (BMP) is designed to develop critical scientific thinking skills and train students for successful application to professional degree programs in the health sciences. Biomedicine is the centerpiece of the health sciences, interconnecting everything from medicine and dentistry, to clinical and biomedical research. The field of Biomedicine ultimately studies and advances understanding of the human body, how it works in health and how it goes awry in disease. The BMP at the University of Pittsburgh School of Medicine offers educational and experiential training in Biomedicine as preparation for successful careers in the health sciences within a faculty mentored community individualizing each student's success.

Contact Information

Biomedical Masters Program
3500 Fifth Avenue, Suite 206
Pittsburgh, PA 15213 USA

412-383-3265
Fax: 412-648-1077
Email: bmppitt@pitt.edu
www.bmp.pitt.edu

Admissions

Admissions Criteria:
The BMP welcomes candidates who are U.S. Citizens, non-citizen nationals, or lawfully admitted permanent residents of the U.S., or individuals who already hold, or can obtain a J-1, H1-B, or F1 transfer visa.

The program is designed for applicants with long-term goals of entering careers in the health sciences, or applying to DO and MD, PA, DMD/DDS, PhD, other health science degree programs or seeking a master's degree in the Biological Sciences.

Candidates must have distinguished personal qualifications of past academic ability and references. Application requirements include a bachelor's degree with at least a cumulative 3.0 GPA; a 3.3 or higher GPA is preferred. Completion of pre-requisite courses for application to future professional degree programs are required. MCAT, DAT, PCAT, or GRE scores are not required for admission, but should be reported by any applicant who has taken one of these tests. Candidates with community service, clinician shadowing, patient volunteering, clinical or basic research experiences, and strong academic performance will be viewed very favorably.

Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) and are seeking their first degree in the United States are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), an IELTS score of at least 7.00, or a Duolingo score of 120 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Application Process:

- The online application process starts October 1st and closes on June 1st the following year. Admissions is conducted on a rolling basis. Students matriculate for the beginning of the fall semesters. A focus on ensuring student success is employed in the admissions process.
- Admissions are based upon the student's academic record, letters of recommendation, previous experience, written statement of interest, an updated resume/CV, and an interview.

The online application is available at: https://admissions.gradbiomed.pitt.edu/

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: http://oafa.pitt.edu/learn-about-aid/.

The BMP offers scholarships to select students. Awards are determined based on a holistic evaluation and amounts are based on financial need. All students are responsible for ensuring their tuition is paid.

Degree Requirements

All requirements detailed in the Regulations Governing Graduate Study at the University of Pittsburgh will be met. The MS in Biomedical Sciences requires the completion of a minimum of 32 credits with a GPA of 3.0 or higher. Maximum credits allowed per term will be 15, and a typical course load will be 15 credits for the fall and spring terms and 2 credits for the summer term.

Foundational Components:

The Curriculum: The BMP employs science-based instruction designed to improve student preparation for professional degree programs in medicine, dentistry, research, and other related health science professions. By emphasizing understanding and how to think in addition to what to know, the BMP promotes the development of study habits that enable our students to excel and thrive in the first two years of these demanding professional degree programs. These goals will be achieved through an integrated series of required core courses and elective courses and experiential training opportunities together with dedicated one-on-one advising and mentorship that will enable students to successfully apply to and perform well in their chosen professional school.

Experiential Training: The BMP affords opportunities for experiential training specifically tailored to the strengths and weaknesses of each individual student. The areas selected correspond to the typical aspects considered in the review of standard professional school applications: community service, patient volunteering, clinical shadowing, and research training.

Mentoring and Coaching: The BMP provides a multi-tiered mentoring and coaching model to all students. Each student will meet with their assigned faculty advisor during the initial phase of the program in order to identify strengths and weaknesses of the previous training received by the student. The student and faculty advisor will identify the best selection of academic courses and experiences to maximize long term student learning and success. Career and professional development coursework and access to an internal International Coaching Federation career coach will support
individual growth including many of the AAMC Core Competencies. Access to an external International Coaching Federation life coach is also provided to address broader challenges such as limiting beliefs. In addition, near-peer mentoring is facilitated by the BMP Alumni Mentor Network. Students also engage in large group lectures, larger group discussions, small group discussions, and peer-to-peer writing-and-reflection coursework, with a focus on developing competencies in written and verbal professional communication skills. These activities are specifically targeted to develop the quality of students' professional program application materials.

Expanding on these three components, the BMP enables the student to differentiate with elective courses, experiential opportunities and mentoring to focus on specialized interests. These Areas of Concentration (AOCs) are in Medicine, Dentistry, or Biomedical Research. The AOCs are designed to individualize the program for students seeking future professional programs leading to the MD, DMD, or PhD degree, respectively.

Successful completion of the BMP results in conferral by the University of Pittsburgh of the Master of Science (MS) degree in the major of Biomedical Sciences. The BMP is a 12-month program. Applicants who are working may complete the program part-time over the course of two academic years.

Curriculum

The BMP curriculum includes three major components: core, electives, and experiential activities. A common "core" has been designed to provide the foundational sciences for students who have a minimal level of basic science training as well as advanced education in health science thinking skills to serve students well into the first two years of professional degree programs. These courses are complemented by electives and experiential activities that are chosen based on each student's interests in his/her AOC.

Core Courses: Biochemistry and Physiology; Method and Logic in Biomedicine; Cell Signaling and Pharmacology; Comprehensive Analysis of Disease 1 and 2; Organ Systems Physiology; Professional Communications Reflections 1 and 2.

Elective Courses: Human Anatomy; Histology and Cell Function in Health and Disease; Cell Biology Pathways in Treatment of Disease; Neurophysiology; Clinical Pharmacology; Career Planning and development, Professional and Non-cognitive Development, Diversity Awareness, Exploration in the Biomedical Sciences; Experiential Learning.

Additional Elective Courses: Additional graduate level courses are available with written approval from the student's academic advisor and permission from the instructor and/or department offering the course.

Experiential Courses: The BMP provides ample opportunities for students to engage in community service, hospital volunteering, and clinical shadowing. Research training experiences are also available in a wide range of biomedical and clinical research laboratories. Students are expected to take the initiative, guided by their faculty advisor, to find suitable matches and schedule experiential education and training sessions during the Fall, Spring, and/or Summer terms.

Academic Standards

All graduate students must maintain a minimum cumulative GPA of 3.0 in order to stay in good academic standing and be eligible for graduation.

Clinical Research (MS)

The Master of Science in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaborations among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over 2 years of part-time study.

Contact Information

Institute for Clinical Research Education
200 Meyran Ave, Suite 300
Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672
Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Master of Science in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
CLRES 2010 - CLINICAL RESEARCH METHODS
CLRES 2020 - BIOSTATISTICS
CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Advanced Grant Writing Course

This course focuses on research design and development and is a two-part course offered during the fall and spring terms. The Advanced Grant Writing course is taken by MS students during year 2.

CLRES 2071 ADVANCED GRANT WRITING PART 1
Specialty Track Requirements:

Students who enter the Master of Science in Clinical Research Program will select a curriculum track that offers specialized training in a specific clinical research area. Each specialty track offers a different curriculum of required courses, which can be viewed in the Program Handbook. The MS program has 5 specialty tracks:

- Clinical Trials Research Track
- Comparative Effectiveness Research Track
- Health Services Research Track
- Translational Research Track
- Innovation Track
- Implementation Science Track
- Data Science Track

Each of these tracks has a distinct set of required courses that allow students to specialize in an area of clinical research. All MS students will also take a selection of elective courses to reach the 30 credit minimum required for this degree.

Comprehensive Competency Review:

The Comprehensive Competency review is a program check-in completed at the midpoint of a student's degree progress. The MS in Clinical Research Program is designed to train students in the skills, knowledge, and professional norms for clinical researchers and the Comprehensive Competency Review helps students be confident that they are on track to develop competence in all key areas.

Thesis or Substantive Research Project:

The MS in Clinical Research requires each student to complete a formal thesis or substantive research project. Students are able to write a standard thesis, grant proposal, or 2 manuscripts to fulfill this requirement.

Students must successfully defend their research project to a review committee as required by the University's Committee on Graduate Studies.

Responsible Conduct in Research (RCR) Requirement

Clinical Research Master of Science students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

More Information:

For additional program details, please visit the Master of Science in Clinical Research Program page and review the Program Handbook.

Computational Biomedicine and Biotechnology (MS)

The Computational Biomedicine and Biotechnology (CoBB) Master's of Science program trains leaders who can translate cutting-edge computational technologies into real-world advances in biomedicine and biotechnology. Seated in the Department of Computational and Systems Biology, the program focuses on the interface between computer science and applied biology. It is appropriate for students with backgrounds in either quantitative disciplines (computer science, engineering) or biological sciences and who seek to have an impact in the rapidly evolving field of computational biotechnology. Students in the CoBB program will learn to develop and apply novel computational, mathematical, statistical, and in

silico techniques to meet current challenges in biotechnology. Our trainees will be equipped with the necessary skills for successful biomedical data science and biocomputing technology careers in the health care and biotechnology industry, government, and academia.

Master's Program Administrator:

Amanda L. Axelson, MBA

ama251@pitt.edu

cobb@pitt.edu

Executive Committee:

Mert Gur, PhD

Joseph Ayoob, PhD

James Faeder, PhD

Program Website:

www.csb.pitt.edu/cobb/

Admissions

CoBB welcomes students from various backgrounds, including life science, computer science, physical science, mathematics and statistics, and engineering majors, students with interdisciplinary or multi-disciplinary backgrounds.

Application
Required Materials:

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts
- Unofficial TOEFL Scores/IELTS/Duolingo Scores (for international applicants)
- Application Fee

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: https://financialaid.pitt.edu/graduate-students/. All students are responsible for their own tuition.

Degree Requirements

To receive the CoBB MS, all students are required to complete a minimum of 30 credits of masters-level coursework and to maintain an overall GPA of 3.0 or higher. Additionaly information can be found in the Student Handbook.

Curriculum

- At least 4 research credits of independent study
- A summer internship or additional directed study, worth 3 credits
- 3 credits of Fundamentals of Computational Biology
- 2 credits of Professional Development
- One course (taken or waived) from each of the five groups
  - Computational Biophysics
  - Computational Systems Biology
  - Computational Genomics
  - Computer Science
  - Electives

Directed Study

Gaining hands on experience in solving problems in computational biology is an essential part of CoBB training. Each student is therefore required to take a minimum of 4 credits of directed study with a University of Pittsburgh faculty member. Students are expected to select a research mentor for the directed study in their first semester, and to complete the research requirement in the second and/or third semesters.

Internship

To gain experience in the professional application of computational biology, students are encouraged to participate in a 2 to 3 month summer internship at a company of their choosing. Acceptable internship sites include industrial labs, biotech/pharma companies, and governmental organizations.

Students will present a written report with well-defined structure and content at the end of their internship to summarize their experience and the skills they acquired during their experiential training, and to make recommendations for future work. They will also make an oral presentation to share their experience with others.

Completion of Degree
The program is structured in such a way that students can finish their degree within 12-20 months, depending on the background of the student. To complete the degree in one year, students must demonstrate proficiency in programming, calculus and linear algebra.

For more information on the program, please visit www.csb.pitt.edu/cobb/

Medical Education (MS)

The Master of Science in Medical Education Program is designed to help academically oriented health care professionals enhance their education, strengthen their teaching skills, and expand their ability to facilitate the learning process of students and residents in a variety of clinical teaching environments. This program is typically completed over 2 years of part-time study. Alumni of this program have gone on to make valuable contributions to the field of medical education, many of them through leadership positions in top training programs across the country.

Institute for Clinical Research Education

Admissions

Admissions Criteria

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a clinical appointment within UPMC (faculty, fellow, or resident) and/or an academic appointment within a University of Pittsburgh Health Sciences school, since successful participation in and completion of our courses depend on having clinical and classroom environments in which to teach, concurrent with the program.
- Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.
- Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, or Duolingo scores (when applicable)
- GRE and MCAT scores not accepted

Timeline

The Master of Science in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements
The University requires the successful fulfillment of a minimum of 30 credits for awarding a Master of Science in Medical Education. The degree is granted upon the completion of a tightly integrated curriculum with three components: (1) coursework plus observed teaching activities focusing on adult learning, classroom and clinical teaching skills, curriculum development, innovation in medical education, professional development, and medical administration; (2) additional courses to provide trainees with fundamental research skills; and (3) a project on curriculum development or a mentored research project.

**Core Curriculum**

All Master of Science trainees in the Medical Education Program enroll in 11 required courses that cover the fundamental aspects of the field of medical education. Below are the required courses:

- MEDEDU 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- MEDEDU 2010 - CLINICAL RESEARCH METHODS
- MEDEDU 2020 - BIOSTATISTICS
- MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH
- MEDEDU 2080 - MASTERS RESEARCH
- MEDEDU 2100 - ENHANCING TEACHING SKILLS
- MEDEDU 2111 - FUNDAMENTALS OF ADULT LEARNING PART 1
- MEDEDU 2120 - PROFESSIONAL DEVELOPMENT
- MEDEDU 2125 - ASSESSMENT OF MEDICAL LEARNERS
- MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN
- MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)

**Electives**

Trainees choose elective coursework to reach the required 30 credits. These courses may be offered through the Medical Education or Clinical Research program.

**Independent Research Project**

Trainees pursuing the Master of Science in Medical Education are required to complete a substantive research project. This thesis requirement can take the form of a curriculum development project, survey research, qualitative research, or other type of research project. The trainee must be the principal investigator for their thesis project and plan to publish their research in a peer-reviewed journal.

**More Information**

To learn more about the Medical Education Academic Programs, please visit the program page and review the program handbook.

**Non-Degree**

**Institute for Clinical Research Education**

The Institute for Clinical Research Education (ICRE) is the home for the University of Pittsburgh's premier clinical and translational research training programs. The ICRE offers a variety of educational, training, and career development programs for researchers in clinical and translational science as
well as medical education. The degree programs of the ICRE emphasize the multidisciplinary nature of clinical research, translational science, and medical education while engaging adult learners through the use of applied approaches to build skills. Learn more.

Graduate Training Programs:

- Clinical and Translational Science (PhD)
- Clinical Research (MS)
- Clinical Research (Certificate)
- Medical Education (MS)
- Medical Education (Certificate)
- Certificate in Clinical and Translational Science for Doctoral Students in the Health Sciences

PhD

Cancer Biology and Oncology, PhD

Oncology Graduate Program (OGP)

The proposed OGP will be organized by Hillman Faculty in Hillman Cancer Center and the newly refurbished Ford Assembly Building (5KB) at 5051 Centre Avenue in Shadyside. On a student's diploma it will be a PhD with a major in Cancer Biology and Oncology. The OGP be used to market the cancer focus of the program to students, faculty, and the public.

The OGP will be an innovative program in graduate education that aims to train highly motivated PhD students as self-reliant scholars in an environment with ready access to the breadth of expertise, approaches, and sub-disciplines that constitute the diverse fields of Oncology. This unique program will rapidly immerse students into a research environment that will train them to become independent and creative scientists.

Key features of the OGP include:

- Providing didactic, lecture-based instruction in fundamental and contemporary aspects of Oncology.
- Reinforcement of formal didactic teaching with informal small group discussions led by faculty experts and based on primary scientific literature.
- Providing courses with cohesive themes to facilitate students' understanding of the material, promoting gradual conceptual progression in the classroom with laboratory-based skill building.
- Engaging students early in laboratory research in core competencies of mentors' laboratories with emphasis on multidisciplinary approaches to important research questions.

Faculty research interests in the proposed OGP can be broadly divided into the following areas:

- Cancer Biology Program (CBP)
- Cancer Epidemiology and Prevention Program (CEPP)
- Cancer Immunology and Immunotherapy Program (CIIP)
- Cancer Therapeutics Program (CTP)
- Cancer Virology Program (CVP)
- Genome Stability Program (GSP)

The OGP will be the 12th Graduate Program in the UPSOM, and will have a similar structure and requirements to the other UPSOM programs.

Admission Requirements
1. A baccalaureate degree in a biological or physical science or in mathematics, computer science or engineering.
2. A minimum grade point average of 3.2 (on a scale of 4) or its equivalent from an accredited institution.
3. A minimum of three letters of recommendation. Letters from faculty familiar with the applicant's research accomplishments are of particular value to the evaluation process.
4. A personal statement.
5. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duo Lingo. A minimum overall TOEFL score of 90 (within a minimum score of 22 in each section), 100 iBT, 7.0 on the IELTS, or 120 on Duo Lingo is required for admission to the program. Scores must be less than two years old. To submit TOEFL scores, use Institution Code 2927 and Department Code 45. Applicants who have earned a bachelor's degree or higher from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Course Curriculum

In line with University requirements, students will be required to earn 32 course credits and 40 PhD dissertation credits in order to be eligible for graduation from the program.

Laboratory Rotations

Laboratory rotations are important for helping to ensure a good fit between a student and PhD mentor. Rotations in the OGP will run for 12 weeks. This is sufficient time for the student and potential mentor (and the mentor's lab personnel) to interact, while still allowing time to perform a short-term research project. Each student is required to complete three lab rotations. Students will be expected to complete a short rotation report (2-3 pages), to be turned in within 1 week of the end of the rotation, detailing the goal(s) of the project and its rationale, as well as any results obtained and potential future directions. At the end of each rotation, students will be evaluated by the faculty member supervising the rotation; these evaluations will be forwarded to the Program Directors and will become part of the student's academic record. Rotations will be graded, and each rotation will receive 3 credits.

Course Instruction

Courses will be taught by Oncology Graduate Program Faculty who will be chosen from existing Hillman Cancer Center members. This will fulfill their existing teaching requirement and therefore have no workload impact.

First Year

Fall

All first year OGP students will take a newly developed common courses in the fall semester, to be titled "Fundamentals in Biology" to be directed by Dr. Katherine Aird as well as "Cancer Biology & Therapeutics" an existing course directed by Drs. Laura Stabile and Roderick O'Sullivan (MSCMP3710). These will be three credit courses.

All first-year students will be offered a newly developed common course "Classic Manuscripts in Cancer Biology and Oncology. In this course, students will be taught how to read and analyze scientific literature, with an emphasis on current and classic papers in Oncology. This will be a two-credit course.

Students will also attend one of HCC's research program's work-in-progress conferences where they will learn how to present state-of-the-art research in Oncology.

Finally, students in the fall of year 1 will complete a laboratory rotation of 12 weeks each (three credits).

- MSOGP 2000 - FUNDAMENTALS IN BIOLOGY
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSOGP 2001 - CLASSIC MANUSCRIPTS IN CANCER BIOLOGY AND ONCOLOGY

Spring
All first-year students will be required to take a newly developed common course "Fundamentals of Clinical Oncology" to be directed by Dr. Chris Bakkenist. This will be a three-credit course.

All first-year students will be required to take three elective courses in the Spring of the first year (two or three credits). These may be electives offered by OGP or other Graduate Programs. For example, we imagine that some OGP students will elect to take an existing course, Comprehensive Immunology MSMI 2210 with PMI (two credits) prior to taking a new course, Cancer Immunology and Immunotherapy (three credits) in the summer of their first year. Some OGP students may take an existing course, Principles of Pharmacology MSMPHL 2310 (two credits) and/or Drug Discovery MSMPHL 2370 (two credits) prior to a new course, Women's Cancer (three credits) in the summer of their first year. While the OGP will be an innovative, contemporary, and comprehensive Graduate Program to train the next generation of cancer researchers, we do not propose that it be exclusive. We will integrate with existing Graduate Programs who offer electives that interest our students, and our electives will be open to Graduate Students in other programs. Students will also complete a second laboratory rotation.

- MSOGP 2002 - FUNDAMENTALS OF CLINICAL ONCOLOGY
- MSMI 2210 - COMPREHENSIVE IMMUNOLOGY
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 2370 - DRUG DISCOVERY

Summer

In the summer concluding their first year in the Program, OGP students will take the same Scientific Ethics (one credit) and Statistics (three credits) courses currently required of all students in the IBGP and other SOM PhD programs. Many of the faculty who will participate in OGP have participated in the aforementioned courses and will continue to do so once the OGP is established. OGP students will also take an elective (two or three credits).

Students will also complete a third laboratory rotation.

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- STATISTICS COURSE

Second Year

Fall

Upon completion of rotations, students will confer with their first-year advisor, rotation mentors, and/or the members of the OGP executive committee to identify a mentor and laboratory in which to conduct their thesis research. Students will commence or continue work in their chosen thesis laboratory, depending on when their laboratory rotations were completed.

If a thesis laboratory is not chosen at the end of the third rotation, a fourth rotation may be offered at the discretion of the Program Directors. These situations will be reviewed on a case by case basis.

- MSMPHL 2300 - MS THESIS RESEARCH

Spring

All second-year students will be required to take a course in scientific writing (one credit). Our experience examining written comprehensive exams is that some students need intensive training in scientific writing as they start working on their comprehensive exams.

- MSOGP 2003 - SCIENTIFIC WRITING

OGP Electives

To be completed during the first two years of study.

OGP students will be required to complete 6 credits of Cancer elective courses based upon their particular area of interest. We anticipate that these will generally be of the following:
Research Credits

Lab Rotations (Fall/Spring/Summer First Year, 9 credits): Students will be required to complete three lab rotations of 12 weeks each for 3 credits per rotation. These rotations will commence in early September. After the rotations, students will sign up for Directed Study (Spring/Summer/Fall First/Second Year, 23/24 credits) or Dissertation Study (after completion of the qualifying exam and advancing to candidacy; until graduation).

Total Credits: 72

Interdisciplinary Biomedical Graduate Program

Through the Interdisciplinary Biomedical Graduate Program, students may be admitted into one of the following 4 PhD degree-granting programs in the School of Medicine:

- Cell Biology and Molecular Physiology (PhD)
- Cellular and Molecular Pathology (PhD)
- Molecular Genetics and Developmental Biology (PhD)
- Molecular Pharmacology (PhD)

Students will not be admitted to pursue a master's degree. However, students who cannot complete the PhD program due to extenuating personal, financial, academic, or medical reasons may be awarded a master's degree.

The Interdisciplinary Biomedical Graduate Program is flexible and accommodates students whose research interests are still evolving by introducing them to a variety of fields through interdisciplinary courses and laboratory experiences. For those students who have a clearly defined research interest, the program offers the opportunity to move quickly into a laboratory and accelerate their study.

For more information on Admissions, Financial Assistance, Training Faculty, etc. please visit www.gradbiomed.pitt.edu

Contact Information

Associate Dean for Graduate Studies
Office of Graduate Studies
M240 Scaife Hall
3550 Terrace Street, Pittsburgh PA 15261

Fax: 412-648-1077
E-mail: gradstudies@medschool.pitt.edu
www.gradbiomed.pitt.edu

Academic Standards

Students must maintain a minimum overall cumulative GPA of 3.00. In addition, a minimum of a B grade must be earned in each of the required courses and in each of the degree-granting program core courses.
General Degree Requirements - All Interdisciplinary Biomedical Graduate Students

The first term core course, Foundations of Biomedical Science, is required of all students and is followed by increasingly specialized course work in the discipline-specific program the student has chosen. A course in biomedical experimental design and analysis and a course in research ethics are also required of all students. The first year includes three laboratory research rotations. (See listing of Required Courses below.) Students are guided through their first year of graduate study by a faculty mentor assigned by the program.

The mentor helps to identify rotation laboratories, provides advice on classes, and ensures that students reach appropriate milestones in the first year of the program. At the end of the first year, a preliminary student performance evaluation is conducted by the Program Steering Committee. When a student has successfully completed the preliminary evaluation and chosen a dissertation advisor, the student transfers into one of the degree-granting programs.

Evaluation following the first year is undertaken by the degree-granting program and includes course performance and a comprehensive exam at the end of the second year of study. The comprehensive exam is in the form of an original research proposal followed by an oral examination before a faculty committee. Upon successful completion of the comprehensive exam, the student nominates a dissertation advisory committee composed of a minimum of 5 members. A majority of the committee (including the major advisor) must have graduate faculty status. The student then presents a dissertation proposal to the committee and is admitted to candidacy. The training program is completed by execution of an original and independent research project and defending a dissertation. Please see Regulations Pertaining to Doctoral Degrees.

Required Courses - All Students

The following courses are required of all students in the Interdisciplinary Biomedical Graduate Program:

INTBP 2000 - FOUNDTNS OF BIOMEDICAL SCIENCE
INTBP 2005 - FOUNDATIONS CONFERENCE
INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS
INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
INTBP 2010 - LABORATORY RESEARCH ROTATION

A minimum of 72 credits (32 course credits and 40 PhD dissertation research credits) beyond the baccalaureate degree is required for the PhD degree.

Scholarly Project

Background

Our mission, first and foremost, is to educate the finest clinicians and investigators. To be successful in either - or, in some cases, both - of these ventures requires nothing less than outstanding creativity and leadership. One needs to be creative as a clinician because, despite all of the advances we have made in medicine, it is still quite often a mystery and diagnoses are not always obvious. One needs to be creative as an investigator because research, by its very nature, involves a quest for that which is hidden and, if discovered, constitutes one more bit of the vast, intricate puzzle we call life.

Implementation

For Pitt medical students since 2004, part of their training is to meet the new curricular requirement of formulating and completing a scholarly project of personal interest to them. The scholarly project was incorporated longitudinally throughout the curriculum as an indispensable component of medical education and has been broadly defined to provide a wide range of opportunities (including laboratory-based or clinical research experiences as well as less traditional choices) to appeal to individual students' interests and aspirations. The intent is to expose students to the mechanics of scientific investigation; teach them how to develop a hypothesis and how to collect, analyze, and interpret data to support it; encourage them to pursue research opportunities; and help them understand the structure of thought underlying the practice of medicine.

Among the program's distinctive elements are thorough preparatory course work designed to foster the skills that students need to conduct scholarly
work successfully and an emphasis on developing technology to promote longitudinal reporting, learning, and mentorship. Many students initiate their scholarly project by participating in a summer research program, while others might take a year off to pursue an intensive research program at Pitt or elsewhere. Some students find the experience so rewarding that they consider a career as a physician-scientist. The goal in every case, however, is to enhance their ability to think independently, critically, and creatively and, thereby, become better equipped to practice medicine in the 21st century.

Outcomes

The class of 2008 was the first to complete the scholarly project experience. Students worked with mentors from virtually all medical school departments and an array of institutions across the US. Students chose their mentored research theme from a wide array of possibilities, from outcomes research to evolutionary molecular biology. The endeavors of this first graduating class resulted in 13 fellowships, grants, or other national awards; 20 School of Medicine awards; co-authorship of 42 peer-reviewed papers; and more than 46 national presentations and abstracts.

Students are able to be highly productive on scholarly projects during the four-year medical curriculum. These projects and their outcomes demonstrate the achievability of the scholarly project program goals, including development of in-depth knowledge in a focused area, the ability to synthesize and critically evaluate published work by others, and the generation and completion of new studies that advance the health sciences. The scholarly project represents a novel (and perhaps even prototypical) way to increase the number of medical students who pursue research-based careers or clinical careers grounded in evidence-based medicine. It endows all of our graduates with the confidence needed to be creative and analytical clinicians - and those are the kinds of doctors we want.

Adult Inpatient Medicine

Course Description

This 8-week interdisciplinary clerkship is divided into two blocks of 4 weeks each. During each block the student is assigned to an inpatient rotation at a local hospital. On the first day of each block students participate in case-based workshops led by faculty in Emergency Medicine and Geriatric Medicine. During this inpatient rotation, students are assigned their own patients and apply their clinical skills under resident and faculty supervision. Students learn how to take an accurate and pertinent history, conduct a physical examination, recognize patterns of illness, and acquire approaches to disease management. All students participate in four critical care medicine simulation sessions at the WISER Center, where they have hands-on experience evaluating and treating acute cardiopulmonary conditions.

The objectives of the course are that students should become able to:

1. outline the diagnostic evaluation and initial management of common medical symptoms.
2. demonstrate understanding of the historical features, physical examination findings and underlying pathophysiology of common medical conditions, and particularly of disease processes present in encountered patients.
3. formulate an appropriate differential diagnosis, and create and implement the diagnostic evaluation and therapeutic plan for encountered patients.
4. recognize the need for patient resuscitation and initiate appropriate initial treatment in unstable patients.
5. Clerkship locations include UPMC Montefiore, UPMC Shadyside, UPMC Mercy, and the VA Pittsburgh Healthcare System.

Educational Methods

- Inpatient patient care
- Case-based workshops
- Simulation sessions
- Lectures
- Student teaching attending conferences
- Standardized patient sessions
Evaluation

Each 4-week Clinical Block contributes 40% of the clerkship grade. The Clinical Block grades are from the evaluations of the ward attending (50% of the block grade), the student teaching attending (25% of the block grade), and the resident (25% of the block grade). The final written examination is a National Board of Medical Examiners subject exam that constitutes 20% of the clerkship grade.

Grading: The clerkship is graded Honors, High Satisfactory, Satisfactory, Low Satisfactory, Unsatisfactory.

Faculty Note

Clerkship Director Thomas Painter, MD, is a recipient of the Kenneth E. Schuit Master Educator Award. Clerkship Co-Director Melissa McNeil, MD, is a recipient of the Kenneth E. Schuit Master Educator Award, the Donald S. Fraley Award for Medical Student Mentoring, and multiple Excellence in Education Awards for Small Group Facilitator. Clerkship Co-Director Brian Heist, MD, is a recipient of the Clerkship Preceptor of the Year Award. Clerkship Co-Director Erika Hoffman, MD, is a recipient of the Clerkship Preceptor of the Year Award. Clerkship Co-Director Susan Dunmire, MD, is a recipient of the Provost's Innovation in Education Award; and multiple Clinical Educator of the Year Awards, Clinical Golden Apple Awards. Clerkship Co-Director Adam Yares, MD, is a recipient of the Sheldon Adler Award for Innovation in Medical Education. In addition, Drs. Painter, McNeil, Dunmire, and numerous clerkship faculty are members of the UPSOM Academy of Master Educators.

Neurology

Course Description

The Neurology Clerkship (3 weeks) integrates experience in neurology, neurosurgery, neuropathology, and neuroradiology. Clinical teaching with attendings and residents takes place in inpatient and ambulatory settings.

The objectives of the course are for students to be able to:

1. perform a detailed and focused neurologic history and physical exam.
2. describe the presentations, course, and treatment of common neurologic disorders.
3. understand and use tests to localize and diagnose neurologic diseases.
4. recognize and understand how to manage neurologic emergencies.

Clinical sites include Children's Hospital of Pittsburgh of UPMC, Magee-Womens Hospital of UPMC, UPMC Montefiore, UPMC Presbyterian, UPMC Shadyside, Shadyside Neurology Center, and the VA Pittsburgh Healthcare System.

Clinical experiences are augmented by a focused classroom curriculum that includes lectures, small group discussions, and case presentations. During the formative standardized patient encounters students refine their skills in neurologic assessment and patient management. Students also attend neuropathology workshops, and have the option of attending neurosurgery operating-room sessions.

Educational Methods

- Inpatient patient-care activities
- Ambulatory patient-care activities
- Workshops
- Medical record review
- Structured readings
- Standardized patient encounters
- Lectures
- Diagnostic imaging workshops

Evaluation
The Neurology clerkship grade is based on clerkship-preceptor evaluation (50% of the Neurology final grade), the National Board of Medical Examiners subject exam score (30%), the Neurology Patient Exam (10%), the Medical Record Review (5%), and professionalism (5%).

Grading: The clerkship is graded Honors, High Satisfactory, Satisfactory, Low Satisfactory, Unsatisfactory.

Faculty Note

Clerkship Director Laurie Knepper, MD, is a recipient of the Clerkship preceptor of the Year Award. Clerkship faculty Drs. Paula Clemens, John Doyle, Robert Kaniecki, and Angela Lu are also recipients of the Clerkship Preceptor of the Year Award.

Combined Ambulatory Medicine and Pediatrics

Course Description

This 8-week combined ambulatory course provides students with 4-week experiences in medicine and in pediatrics. During one half-day per week, students participate in a longitudinal curriculum that covers topics common to both disciplines. The clerkship curriculum is presented in an integrated fashion across both disciplines, and incorporates many cross-cutting themes, such as evidence-based medicine, health-care finance, tobacco cessation, women's health, geriatrics, wellness and prevention, and interpersonal communications.

The objectives of the course are that students should become able to:

1. assess the well patient in the ambulatory setting.
2. evaluate common acute clinical problems in the ambulatory setting.
3. participate in the longitudinal care of patients with chronic conditions.
4. incorporate cost-effective, age-specific, preventive strategies into routine care.

Students participate in patient care at offices and clinics throughout the region, including hospital-based sites and a variety of community-based locations, in generalist and/or specialist settings.

Educational Methods

- Ambulatory patient-care activities
- Critically appraised topic assignments
- Standardized patient sessions
- Multimedia modules
- Lectures
- Web-based CLIPP cases
- Structured readings
- Learning logs
- Workshops

Evaluation

Evaluation in this course is based on medicine preceptor evaluations (30%), pediatrics preceptor evaluations (30%), written exam (15%), standardized patient OSCE (15%), and professionalism (10%).

Grading: The Clerkship is graded Honors, High Pass, Pass, Low Pass, or Unsatisfactory.

Faculty Note
Family Medicine

Course Description

The Family Medicine Clerkship is a 4-week rotation that encompasses the comprehensive and longitudinal care of patients with a special emphasis on care of individuals in the context of families and communities.

The objectives of the course are for students to:

1. demonstrate knowledge and implementation of comprehensive evidence-based, gender- and age-specific individualized care.
2. outline treatment strategies for the patient as a "whole person," addressing acute and chronic diseases, health promotion and disease prevention in the context of each patient's social, economic, cultural and religious background.
3. recognize the complex interactions among culture, literacy, community, race, age, gender, education, and language on an individual patient's experience with health care.

Students participate in patient care at offices and clinics throughout the region, including hospital-based sites and a variety of community-based locations.

Educational Methods

- Ambulatory and inpatient clinical experiences
- Case-based workshops
- Patient-centered medical home exercises
- Home visit and family and community assessment
- Clinical skills workshops
- Lectures
- Required readings

Evaluation

Evaluation in this course is based on evaluation of clinical performance by preceptors at community-based sites (70%), modified chart simulated recall oral exam (10%), written exam consisting of 50 multiple-choice items (10%), and documentation of family and community assessments (10%).

Grading: The clerkship is graded Honors, High Pass, Pass, Low Pass, Unsatisfactory.

Obstetrics and Gynecology

Course Description

This 4-week clerkship emphasizes health care for women of reproductive and postmenopausal ages. Students will rotate through three clinical segments, including outpatient services (emergency department, outpatient clinics and offices), obstetrics (labor and delivery suite), and gynecology
The objectives of the course are that students:

1. adequately perform a thorough and organized menstrual, obstetric, gynecologic, contraceptive and sexual history.
2. demonstrate competency in the performance of breast and pelvic exams.
3. recognize the presentation and course of common diseases specific to women.
4. demonstrate understanding of the physiologic changes of normal pregnancy.

The clerkship takes place at Magee-Womens Hospital of UPMC.

Educational Methods

- Inpatient patient care activities
- Outpatient patient care activities
- Workshops
- Lectures
- Structured readings
- Small group didactic sessions
- Conferences
- Grand Rounds

Evaluation

Evaluation of the clerkship is based on preceptor evaluations of clinical performance (50%); small group performance (25%); and a final exam consisting of multiple-choice, extended-matching, and short-answer questions (25%).

Grading: The clerkship is graded Honors, High Pass, Pass, Low Pass, Unsatisfactory.

Pediatric Inpatient Medicine

Course Description

This 4-week clerkship exposes students to inpatient pediatrics. Students are assigned to one pediatric inpatient team and participate in all aspects of patient care and management, including performing histories and physical examinations; writing progress notes; and communicating with other members of the medical team, attending physicians, referring physicians, consultants, families, and patients.

Students read the current literature and standard pediatric textbooks in order to understand childhood growth and development, and major pediatric disease processes and therapies. In addition, students attend conferences, lectures, and rounds that are held throughout the rotation.

During the inpatient rotation, students work as part of the floor medical team. Each student presents a clinicopathologic conference (CPC).

The objectives of the course are that the student will:

1. increase his/her knowledge base in pediatrics; specifically he/she will become familiar with anticipatory guidance, nutrition and common pediatric health problems.
2. develop an understanding of the growth and development unique to children, with particular attention paid to the attainment of developmental milestones as well as the effect of illness on the child's growth and development.
3. develop an understanding of the importance of psycho-social factors, their influence on a child's growth and development and various somatic complaints.
4. learn how to interview effectively the patients and their families and be able to adapt the interview to the particular age group and developmental level of the patient.
5. be able to obtain and organize a complete and relevant history.
6. develop basic skills in pediatric physical examination and will attain facility with the evaluation of infants, children, and adolescents.
7. enhance his/her problem-solving and critical-thinking skills and be able to develop a reasonable differential diagnosis, an appropriate assessment, and a coherent plan, using evidence whenever possible.
8. develop skills in both oral and written presentations and be able to present information in a succinct, organized manner.
9. develop an understanding of the therapeutic role of the patient-family-physician relationship.
10. explore ethical issues as they relate to the patient-family-physician relationship.
11. understand the roles of the pediatrician caring for hospitalized children.
12. demonstrate professional attitudes and behavior.

The clerkship takes place at Children's Hospital of Pittsburgh of UPMC.

Educational Methods

- Inpatient patient care activities
- CLIPP cases
- Workshops
- Lectures
- Structured readings
- Learning logs
- Conferences

Evaluation

Evaluation of the clerkship is based on preceptor evaluations (65%), participation/presentation at student morning report (10%), completing the required CLIPP cases (10%), and a multiple-choice, written exam (15%).

Grading: The clerkship is graded Honors, High Pass, Pass, Low Pass, Unsatisfactory.

Faculty Note

Clerkship Director Michael J. Decker, MD, is a recipient of multiple Clerkship Preceptor of the Year Awards.

Psychiatry

Course Description

The Psychiatry Clerkship is a five-week experience that mixes inpatient, ambulatory exposure to provide a broad view of behavioral health care. Students attend a neuropathology workshop and an AA/NA meeting. Students have the option of attending neurosurgery operating-room sessions and the psychiatric emergency room overnight. Integrated teaching sessions consist of psychiatry core material as supported by evidence-based medicine, involving topics that highlight clinical conditions common to these areas of medicine. Students also participate in formative standardized patient encounters, to develop higher-level skills in psychiatric assessment and patient management.

The objectives of the course are that students should become able to:

1. describe the presentations, course, and treatment of common neuropsychiatric disorders.
2. improve clinical skills by being observed by a faculty member while performing a history (focused or complete), neurological exam (focused or complete), and a psychiatric assessment (including mental status examination).
3. establish rapport and a therapeutic alliance with patients/families.
4. recommend, implement, and assess the benefits of common/important biopsychosocial treatments for specific disorders.

Educational Methods

- Inpatient patient-care activities
- Ambulatory patient-care activities
- Workshops
- Structured readings
- Standardized patient encounters
- Lectures

Evaluation

The Psychiatry Clerkship grading system is comprised of four components:

- Core Clinical Experience (50% of Final Grade)
- Reflective Statement (10%)
- Performance Based Video Exam (10%)
- National Board of Medical Examiners Exam (30%)

The clerkship is graded Honors, High Satisfactory, Satisfactory, Low Satisfactory, Unsatisfactory.

Faculty Note

Course Director Jason Rosenstock, MD, is a recipient of the Kenneth E. Schuit Master Educator Award, the Sheldon Adler Award for Innovation in Medical Education, and the Excellence in Education Award for Course Director. In addition, Dr. Rosenstock is a member of the UPSOM Academy of Master Educators and is the current chair of the UPSOM Curriculum Committee.

Specialty Care

Course Description

This 4-week clerkship is designed to provide students with the opportunity to see patients in specialty-care settings. Students hone their skills in the performance of focused histories and physical examinations, and participate in the development of a plan for the patients. Students rotate for one week each through the specialties of adult emergency medicine, pediatric emergency medicine, ophthalmology, and otolaryngology. They work closely with residents and faculty, and participate as the first point of contact for many patient encounters. In addition, there are workshops in select areas, including dermatology, detailed examination of the musculoskeletal system, suturing/splinting, and interpretation of electrocardiograms. A longitudinal didactic series focuses on topics in ophthalmology and otolaryngology.

The objectives of the course are that students should become able to:

1. perform an accurate and focused history and physical examination on acute, undifferentiated patients, based on presenting complaint and degree of urgency.
2. develop initial treatment plans for common conditions encountered in the Emergency Department.
3. recognize acutely dangerous health problems and prioritize decisions accordingly.
4. develop proficiency in the comprehensive ophthalmologic examination.
5. recognize common ophthalmologic conditions and describe their treatment.
6. recognize ophthalmologic emergencies.
7. develop proficiency in the comprehensive examination of the head and neck.
8. demonstrate an understanding of the presentation and treatment of common otolaryngologic conditions.

Sites for the clerkship include specialist settings in numerous offices and clinics throughout the region, and emergency departments at UPMC Presbyterian, UPMC Mercy, and Children's Hospital of Pittsburgh of UPMC.

**Educational Methods**

- Clinical experiences
- Lectures
- Workshops
- VpSim Online Cases

**Evaluation**

Evaluation in this course is based on adult emergency medicine preceptor evaluations (15%), ophthalmology preceptor evaluations (15%), otolaryngology preceptor evaluations (15%), pediatric emergency medicine preceptor evaluations (15%), one written exam composed of multiple-choice and short-answer questions (20%), learning logs (10%), and professionalism (10%).

Grading: The clerkship is graded Honors, High Pass, Pass, Low Pass, Unsatisfactory.

**Faculty Note**

Clerkship Co-Director Stephanie Gonzalez, MD is a recipient of the Donald S. Fraley Award for Medical Student Mentoring. Clerkship Co-Director David Eibling, MD, is a recipient of the Kenneth E. Schuit Master Educator Award and the Clinical Golden Apple Award. Clerkship Co-Director Evan Waxman, MD, PhD, is a recipient of the Kenneth E. Schuit Award and multiple Clerkship Preceptor of the Year Awards. In addition, Drs. Gonzalez, Eibling, and Waxman are members of the UPSOM Academy of Master Educators.

**Surgery and Perioperative Care**

**Course Description**

This 6-week clerkship covers the discipline of general surgery. Students are assigned to general surgery service (3 weeks) and a surgical specialty service (3 weeks). Teaching with attending physicians and residents occurs in conferences, on rounds, in the operating room, at the bedside, and in small groups.

**The objectives of the clerkship are for students to:**

1. explain the etiology, differential diagnosis and management of common diseases requiring surgical care.
2. recognize the need for routine, urgent and emergent surgical referrals.
3. demonstrate proficiency in common bedside procedures, and simple suturing.
4. demonstrate proficiency in the approach to preoperative evaluation of patients for surgery.

Additional goals include developing skills in the management of acute pain and postoperative complications. Overall the course is primarily designed to prepare students to assume the role of a primary care physician and to become familiar with the clinical presentations and management of common surgical problems.

Clinical sites include Children's Hospital of Pittsburgh of UPMC, Magee-Womens Hospital of UPMC, UPMC Montefiore, UPMC Presbyterian, UPMC Shadyside, UPMC Mercy, UPMC Passavant, and the VA Pittsburgh Healthcare System. Every student participates in hands-on simulation sessions at the WISER Center, where they gain experience in airway management and trauma resuscitation. The laparoscopic skills lab provides
students with an opportunity to practice laparoscopic techniques on specialized simulators. During the mid-clerkship OSCE, students refine their skills in the evaluation of common surgical conditions.

**Educational Methods**

- Clinical experiences
- Lectures
- Workshops
- Simulations
- Oral presentations
- Conferences
- Ward rounds
- Standardized patient sessions (OSCE)
- Web-based palliative care modules

**Evaluation**

The Surgery evaluation is based on feedback from faculty and residents (70%), a National Board subject exam (20%), and two formal surgery case presentations (Walk Rounds and Saturday Case Conference, 10%).

Grading: The clerkship is graded Honors, High Satisfactory, Satisfactory, Low Satisfactory, Unsatisfactory.

**Faculty Note**

Clerkship Director Gregory A. Watson, MD, is a two-time recipient of the Clerkship Preceptor of the Year Award, and was honored with the 2016 Simmons Mentorship Award in Surgery. The former Clerkship Director Peter F. Ferson, MD, is a recipient of the Kenneth E. Schuit Master Educator Award, the Sheldon Adler Award for Innovation in Medical Education and the Clerkship Preceptor of the Year Award. In addition, Drs. Kevin Garrett, Giselle Hamad, Kenneth Lee, Andrew Peitzman, and Peter Ferson are members of the UPSOM Academy of Master Educators.

**Preclerkship Course**

**Course Description**

The overall goal of this course is for students to gain a basic knowledge and understanding of core topics that will prepare them to get the most from the clerkship experience.

**Specific objectives include preparing students to:**

1. recognize the requirements for successful completion of each clerkship rotation.
2. clearly communicate medical information in spoken and written form, and write progress notes, orders, and prescriptions.
3. learn the requirements for successful use of electronic medical records.
4. use information and educational technology to facilitate patient care.
5. function as an ombudsman for the patient's welfare.
6. initiate prompt treatment for acute medical problems, including performing CPR.
7. comprehend the basic approach to management of medical disasters and pandemics.
8. incorporate the tenets of the Honor Council into their daily behaviors.
9. recognize where to go to get help through the SHARP program.
10. complete N95 respirator testing and understand how to effectively use these protective devices.
11. initiate key actions after a blood or body fluid exposure.
12. follow basic infection control procedures against current pathogenic threats, such as MRSA and C. diff.
13. make appropriate referral to and utilization of the services of other members of the health care team.
14. understand the importance of and have respect for all members of the health care delivery team.
15. recognize the key roles of cooperation, collaboration, communication, and leadership in healthcare endeavors.

The course also includes sessions on various administrative necessities, such as pager use and tuberculosis testing, and gives an overall orientation to the clinical years.

The 34 faculty in this course are drawn from departments throughout the School of Medicine and from other health care disciplines and are assisted by fourth year medical students.

**Educational Methods**

- Lecture
- Workshops
- Pandemic simulation exercise
- Skills sessions
- Small-group cases
- Pre-class preparation exercises

**Evaluation**

Evaluation for this course is based on attendance and participation in the course sessions.

Grading: This course is graded Satisfactory / Unsatisfactory.

**Faculty Note**

Course Director Joe Suyama, MD, is a recipient of the Clerkship Preceptor of the Year Award. Course Director John Mahoney, MD, is a recipient of the Carnegie Science University/Post-Secondary Educator Award. Peter Ferson, MD; Donald Middleton, MD; Thomas Painter, MD; and Jason Rosenstock, MD, are recipients of the Kenneth E. Schuit Master Educator Award. In addition, Drs. Mahoney, Ferson, Middleton, Painter, and Rosenstock; Peter Bolova, MD; and Elmer Holzinger, MD, are members of the UPSOM Academy of Master Educators.

**Geriatrics Course**

**Course Description**

The Geriatrics course focuses on an interprofessional team approach to complex issues related to aging, which span the basic sciences, clinical acumen, and profound socioeconomic issues for our society. The course is intended to help medical students, as well as selected nursing and pharmacy students, understand the critical issues of aging, and the importance of team-based health care for geriatric patients in long term care facilities.

This course is placed in the curriculum at the mid-point of the third year, which is a unique teachable moment where students can benefit from focused instruction on key topics which are commonly encountered during the core clerkships.

The Geriatrics course is designed to provide students with the knowledge, skills, and experience to recognize and approach common problems in older adults in inpatient and outpatient settings as well as in the nursing home.

**Specific objectives include preparing students to:**

1. be aware of the great spectrum of health, functional, and cognitive states among individuals as they age.
2. be able to define the word geriatric syndrome, identify a patient with a geriatric syndrome, and develop a rational approach to the work-up and management.
3. be able to describe changes in pharmacologic parameters that occur with aging, obtain a medication history from a geriatric patient, and recognize common drug-related problems in older patients.
4. be able to discuss an approach to a patient with possible cognitive impairment including clinical exam, lab testing, and imaging.
5. be able to list treatments for dementia and describe their use.
6. be able to list hazards of hospitalization and strategies to minimize their occurrence.
7. be able to explain similarities and differences between assisted living, post-hospital rehabilitation, and a dementia unit, and the patient characteristics associated with each.
8. be able to describe the difficulties encountered during transitions of care.
9. be able to describe elements of a patient discharge plan with a focus on patient safety.
10. be able to conduct a basic functional and cognitive assessment of a patient.

The course faculty members are drawn from the Schools of Medicine, Nursing, and Pharmacy.

Educational Methods

- Lectures
- Clinical site visits
- Patient case sessions
- Team-based assignments
- Workshops
- Small-group cases

Evaluation

Evaluation for this course is based on the course individual and group assignments, the course examination, and attendance and participation in the various course sessions.

Grading: This course is graded Satisfactory / Unsatisfactory.

Faculty Note

Robert Arnold, MD, is a member of the UPSOM Academy of Master Educators.

Assessment Week

Course Description

The overall goal of this course is to have students complete a series of structured assessments and participate in focused review sessions designed to enhance their preparation for the Step 2 Clinical Knowledge and Clinical Skills exams.

Specific objectives include:

1. Reviewing common important dermatological conditions and how to describe skin lesions
2. Reviewing common radiologic findings that every graduating student should know how to identify
3. Interpreting common and life-threatening EKG findings
4. Practicing with Step 2 CK exam questions to better understand content and timing of the exam
5. Practicing common clinical procedures often performed in acting internships
6. Reflect on personal strengths and opportunities for growth, as part of establishing one's own educational agenda for the senior year

Educational Methods
• Practice exams
• Skills sessions
• Small group cases
• Self-assessment sessions
• Standardized patient examination (OSCE)

Evaluation

Evaluation for this course is based on attendance and participation in the course sessions.

Grading

This course is graded Complete/Incomplete. Any session that is not attended must be made up before a grade of "Complete" will be registered on the transcript.

Faculty Note

Course Director Reed Van Deuren, MD, is a recipient of the Cohen Award for Excellence in Clinical Skills Instruction. Course Co-Director John Mahoney, MD, is a recipient of the Carnegie Science University/Post-Secondary Educator Award. In addition, Drs. Van Deuren and Mahoney are members of the University of Pittsburgh School of Medicine Academy of Master Educators.

Mini-Electives

Medical student curricula are packed with essential courses and content that all students must master, yet most students find time to pursue areas of personal interest. A goal of the recent curricular revision was to provide increased opportunities for such exploration and growth. We believe, and students confirm, that pursuing studies beyond the required curriculum helps students understand the connection between their basic science coursework and medical practice, and provides exposure to topics and specialties that cannot readily be included in the core curriculum. A mini-elective structure was developed to provide well-structured, rigorous and high quality experiences in areas not typically available to students (especially students in the pre-clinical years).

These courses are offered to any first- or second-year student who is able to commit to attending all course sessions, typically four to eight of them. Most mini-electives are only offered during the Spring Term of each academic year. Updates to the course list as well as date changes typically occur in the late Fall. An email is sent to students in early December announcing registration dates. Please note that the longitudinal mini-electives begin in the fall and registration for those mini-electives are made separately by contacting the course director listed on the course description.

Students who have other assigned academic commitments at the course times must meet those commitments. Therefore, some students may not be able to enroll in some mini-electives.

Course space is limited, based on the maximum number of students designated by the course director.

Students who successfully complete a mini-elective course will receive a certificate of completion. It will not be shown on their official University transcript.

For a complete list of courses, please click here.

Additional questions about mini-elective courses should be directed to Betsy Nero in the Office of Medical Education at 412-648-9829 or betsy@medschool.pitt.edu.

School of Nursing

http://www.nursing.pitt.edu/

The School of Nursing was established as an independent school of the University by action of the Board of Trustees in April 1939 and was opened in September of the same year. The University conferred the degree Bachelor of Science in Nursing Education for the first time in August 1939. The University conferred the first Bachelor of Science in Nursing degrees in February 1942.

The first Master's degree was awarded in 1944, and the first Doctor of Philosophy degree in 1957. The first Doctorate of Nursing Practice degree was awarded in 2008

Mission

The University of Pittsburgh School of Nursing, founded in 1939, is one of the oldest programs in baccalaureate and doctoral education in nursing in the United States. As one of the nation's distinguished schools of nursing, the resources of the School constitute an invaluable asset for the intellectual, scientific, and economic enrichment of health care in Pennsylvania, the nation, and throughout the world.

The School of Nursing's mission is to:

- provide high-quality undergraduate education in nursing;
- maintain and develop superior graduate programs in nursing that respond to the needs of health care in general and nursing in particular within Pennsylvania, the nation, and the world;
- engage in research and other scholarly activities that advance learning through the extension of the frontiers of knowledge in health care;
- cooperate with health care, governmental, and related institutions to transfer knowledge in health sciences and health care;
- offer continuing education programs adapted to the professional upgrading and career advancement interests and needs of nurses in Pennsylvania; and
- make available to local communities and public agencies the expertise of the School of Nursing in ways that are consistent with the primary teaching and research functions and contribute to the intellectual and economic development in health care within the commonwealth, the nation, and the world.

Master's Program Admission Process and Admission Criteria

http://www.nursing.pitt.edu/degree-programs/master-science-nursing-msn/msn-applicationadmission

Applications are available online at www.nursing.pitt.edu/apply. Admission criteria are described on the school's Web site (http://www.nursing.pitt.edu/degree-programs/master-science-nursing-msn/msn-applicationadmission). Complete applications will be reviewed and interviews (face to face or virtually) will be conducted prior to an admission decision. The application deadlines are as follows: Fall Term admission June 15, Spring Term admission October 1, and Summer Term admission March 1. International students are advised to apply by the February 15 deadline. Applicants must apply online at Nursing Online Application.
Applications to the Master Program in nursing are reviewed by the faculty in the applicant's Major/Area of Concentration. Applicants must meet the criteria listed below. Qualified applicants are considered without regard to race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era.

**Applicants must have:**

- A baccalaureate degree in nursing from an ACEN, NLN, ACICS, or CCNE accredited program.
- Current RN license in U.S. state/territory or locale where student will complete clinical requirements.
- A GPA of 3.0 or higher in the undergraduate degree.
- A pre-admission interview. If the applicant resides at a great distance, a virtual interview may be conducted.
- Official scores on the Graduate Record Examination (GRE). The GRE may be waived if the GPA is 3.5 or higher.
- Pre-requisite statistics course with a grade of B- or better.
- Three letters of recommendation attesting to the applicant's capacity and potential for master's study from each of the following (these can be uploaded into the Nursing Online Application): the director or a faculty member from the most recent academic program attended (if applicant has been a nursing student in the last 5 years), a recent employer, and a person who can speak to the applicant's professional work.
- A typed essay (500-word minimum) stating your philosophy of nursing, reasons for wanting to study in a particular area of concentration, what you expect from the master's program, and your future career goals.

**Doctor of Nursing Practice (DNP) Admission Process and Admission Criteria**

**Application Instructions**

Pitt Nursing accepts applications for admission to all areas of the DNP Program via NursingCAS. Each applicant must complete and submit the following:

1. Completed application form.
2. A non-refundable application fee.
3. Complete official transcripts of all undergraduate and graduate education.
4. Admission test scores if applicable.
5. Three letters of professional recommendation indicating the reviewer's support of the student's ability to successfully complete a demanding graduate level academic and clinical program. At least one recommendation should come from a current or recent direct supervisor. These letters will be submitted by the reviewer through NursingCAS.
6. Personal essay addressing the questions:
   a. Share life experiences that have influenced your interest in progressing your nursing career.
   b. Describe a time when you advocated for an individual from a disadvantaged group in a healthcare setting.
   c. Describe how your personal strengths, experiences, & abilities will contribute to your success in nursing school and your career in nursing (community service, leadership experience, healthcare experience).
d. Explain the academic challenges, successes, or obstacles in your life that have affected your ability to achieve your goals. How did you respond to the situation?

e. Why did you choose your area of concentration?

f. What are your expectations for the program?

g. What are your expectations for the program?

7. Completion of the Experience Survey.

8. Current CV or resume.

All completed applications are to be submitted to Student Affairs and Alumni Relations who will forward them to the Area of Concentration Coordinator or Program Director for review and appropriate action. DNP admission decisions are the responsibility of the DNP Admissions Committee.

DNP Admissions Committee chair presents a summary of admission decisions to the DNP Council including the number and status of students offered admission.

Student Affairs and Alumni Relations will notify applicants of the admission decision. Applicants who do not qualify for admission to full graduate status may be considered for provisional status except for international applicants.

Admission Criteria

You may apply to the DNP program at various points in your educational career. The school offers both BSN to DNP and MSN to DNP pathways; your choice will depend upon which degrees you previously earned and which majors/concentrations you select.

Students, who are currently enrolled in their last term of a BSN program, may apply to the BSN to DNP focus areas, which do not require clinical experience beyond the BSN educational experiences. If offered admission, it would be contingent on the student's (1) successful completion of the BSN and (2) obtainment of the RN license.

BSN-prepared students, who are currently enrolled in their last term of an MSN or MS program in a related focus, may apply to the MSN to DNP pathway. If offered admission, it would be contingent on the student's (1) successful completion of the MSN or MS in a related focus and (2) fulfillment of all admission criteria.

The University of Pittsburgh School of Nursing admits a FALL COHORT ONLY to all DNP Program majors/concentration except the Nurse Anesthesia BSN to DNP major, which admits a SPRING TERM COHORT only. The application deadlines for all areas are February 15th and May 1st. International students are advised to apply by the February 15th deadline. Complete applications received by February 15th will be reviewed and admission decisions will be made by June 1. Complete application received by the May 15th deadline will be reviewed and admission decisions made by June 30th.

Applicants must apply online at NursingCAS.

Admission to the DNP Program

The DNP Program admits BSN graduates and, advanced practice nurses and nursing administrators who have completed a graduate degree in nursing from a CCNE, ACICS, NLN, or ACEN accredited program in nursing.*

* BSN graduates with a master's in other areas may be considered for admission.

BSN to DNP

- Current RN license in U.S. state/territory or locale where student will complete clinical requirements
- ≥ 3.0 GPA in BSN (from ACEN, NLN, ACICS, or CCNE accredited program
- Pre-requisite statistics course with a grade B or better
- Clinical experience for select focus areas ** required or preferred for selected majors and concentrations
### MSN to DNP

- Current RN license in U.S. state/territory or locale where student will complete clinical requirements
- \( \geq 3.0 \) GPA in MSN from an accredited program or master's in related field (must have BSN from an accredited program)
- Pre-requisite statistics course with a grade B or better
- Clinical experience for select focus areas**
- Nurse Anesthesia MSN to DNP (additional requirements)
  1) current Nurse Anesthetist certification in US state/territory or locale where student will complete the DNP Scholarly Project
  2) Minimum of \( 3.0 \) GPA in MSN or MS in Nurse Anesthesia from an accredited program

**Clinical Experience for Select Focus Areas

- **Neonatal NP:** Equivalent of 2 years full time (within last 5 years) nursing experience in the care of critically ill newborns, infants, and children in critical care inpatient settings (preferably Level III NICU). Students may enroll in pre-clinical courses while obtaining practice experience
- **Health Systems Executive Leadership:** 2 years of management experience preferred.
- **Nurse Anesthesia BSN to DNP:** Minimum 1 year full-time ICU/critical care nursing experience (within last 5 years) by start of program (may apply if employed in ICU/critical care and will have required experience before admission term). Taking the GRE is optional but may be considered supplemental information in the holistic admission process.

### Doctor of Philosophy (PhD) Admission Process and Admission Criteria

http://www.nursing.pitt.edu/degree-programs/doctor-philosophy-phd

The PhD program follows a FALL TERM ONLY COHORT ADMISSIONS process. Applications to the PhD program are accepted on a rolling basis throughout the year and will receive an admission decision usually within 4-6 weeks of receiving completed application materials. Application decisions will be communicated electronically (by e-mail). Applicants must apply online at NursingCas. The School offers BSN-PhD and MSN-PhD options, and a dual DNP/PhD option. Applicants are expected to be RNs. The School of Nursing also offers a currently matriculating BSN to PhD option, in which a student who has not yet completed the BSN can be admitted conditionally into the PhD program pending successful completion of their BSN. Interested applicants should contact the Student Affairs & Alumni Relations Office at 412-624-4586 for further information.

### Admission to the PhD Program

Admission to the PhD program is assessed through interviews, references, standardized testing, an essay that provides a written statement of goals, and a second sample of writing ability. Documentation of academic success is required.

The doctoral faculty strongly recommends that students develop knowledge of and experience with word processing, database management, and computerized literature searches prior to applying to the PhD program.

### Length of Program

The post-master's full-time curriculum (MSN to PhD) is comprised of 48 credits minimum, and students may complete the program in a minimum time of approximately two and a half years depending on the nature and complexity of research for the dissertation. Twenty-four credits are granted from the prior master's program. For prior courses taken, an evaluation of the content of a course taken elsewhere must be approved by the Director of the PhD Program to determine its comparability with the coursework at the University of Pittsburgh. Students entering the MSN to PhD program will work with their academic advisor to conduct a gap analysis to review prior research-related coursework to determine if additional research core coursework is needed beyond that specified in the MSN to PhD curriculum plan. The part-time student may complete the program in three to four years. The statute of limitations for completion of the MSN to PhD track is eight consecutive calendar years from the first term of registration for credits that are in the required curriculum plan for the doctoral degree.

The BSN to PhD program requires 72 credits minimum. Students admitted to the BSN to PhD track are expected to enroll full-time, and the program can be completed in a minimum of three years, depending on the complexity of research for dissertation. Students are also encouraged to consider...
obtaining a simultaneous master's degree such as the Clinical Nurse Leader. The statute of limitations for completion of the BSN to PhD track is 10 consecutive calendar years from the first term of registration for credits that are in the required curriculum plan for the doctoral degree.

For more information, see Policy 208.

**Doctor of Philosophy (PhD)**

Doctor of Philosophy

The Doctor of Philosophy (PhD) program prepares nurse scholars who will discover and extend scientific knowledge that advances the science and practice of nursing and contributes to other disciplines. Graduates can assume leadership roles within research teams, health care systems, industry, and schools of nursing in academic institutions.

The PhD program of study provides a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of content, methods, and values of the discipline of nursing and its relation to other fields. The curriculum includes courses in the philosophical underpinnings and theoretical foundations for research, and research design, measurement and intervention development. Courses also include advanced statistics, advanced quantitative methods, the responsibilities and activities of scientists, and the art and science of teaching and learning. Students work closely with research faculty members from nursing and other disciplines. Each student also participates in two mentored research experiences. The first is the Apprenticeship Practica, wherein students affiliate with a mentor's established research team over time to explore the scientific literature, develop, plan, and implement an apprenticeship research project, and disseminate findings. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored application environment, which is additive to and precedes the dissertation experience. The second mentored research experience is the students' development and implementation of their independent dissertation project, culminating in dissertation defense. Students prepare and submit applications for competitive research funding.

**Admission of Students from Other Countries (MSN, DNP, and PhD)**

Students from other countries applying to the School of Nursing should apply using the same admissions process and admissions criteria described above. The application should be completed in English and be accompanied by official academic credentials with notarized English translations. Applicants must successfully complete the TOEFL, IELTS or Duolingo English Test (DET) if English is a second language. Applicants must also have a professional nursing license. The following links specify the licensure requirement for the MSN, DNP, and PhD programs. Applicants who need to apply for a professional nursing license are encouraged to visit the Pennsylvania State Board website which contains information for internationally educated nurses applying to take the NCLEX-RN examination.

**Insurance and Health Care Requirements**

All admitted students are required to submit a School of Nursing Initial Health Form with documentation of health insurance; and Act 33, 34 and 73 clearances prior to beginning their program of study. Once enrolled, students must submit the School of Nursing's Annual Health Form with verification of health insurance each year and have an annual influenza vaccination (unless a requested exemption is submitted and approved). Individual students must meet additional health requirements of clinical agencies such as drug testing. Current CPR certification is required prior to enrollment in all clinical courses. Students are required to carry health insurance for the duration of their study, which will cover payment for treatment and follow-up procedures related to injury or medical problems incurred during graduate study. The University of Pittsburgh makes insurance programs available to graduate students (see: http://www.hr.pitt.edu/benefits/student-in). All students admitted with full or provisional status are automatically enrolled in a University liability insurance policy annually which only covers a student acting within the scope of their duties as a student in the School of Nursing.

**Financial Assistance**

http://www.nursing.pitt.edu/scholarship-opportunities

The sources of awards and aid may include: professional nurse traineeships, graduate student assistant positions, graduate student researcher positions, teaching assistant positions, teaching fellow positions, school scholarships, pre- and postdoctoral training grant fellowships, federal Stafford Loans, private loans, and emergency aid.
Academic Policies

http://www.nursing.pitt.edu/resources-students/policies

All students in the School of Nursing are governed by School of Nursing and University policies. Therefore, it is essential that students regularly review and familiarize themselves with those policies, both general and graduate. Questions about policies should be directed to the academic advisor or to their respective program, major or area of concentration director/coordinator. Policies of particular importance deal with admission criteria, registration processes, transfer of credits, clinical requirements, acceptable academic status, warning and probation, readmission, requirements for degree completion, academic integrity, unsafe clinical performance, and impaired clinical performance.

Advising

Each new student who is admitted to the graduate program is assigned a faculty advisor from the specific program, major or area of concentration to which the student is admitted. The faculty advisor provides initial orientation to the school, the University, and the program requirements. Each student is required to meet with their advisor prior to course selection and enrollment for each term. It is also recommended that they meet with their advisor at least one other time each term to review their academic progress and any other time they have questions or concerns about their program of study. The advisor is actively involved if there are academic concerns.

Students also can use the staff in the Student Affairs & Alumni Relations Office in the School of Nursing to obtain information about sources of financial aid, scholarships, school policies, registration, course availability, University resources, and community resources for help with personal problems. An online general orientation program is mandatory for all new students.

General Degree Requirements

To earn the Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP) and Doctor of Philosophy (PhD), the student must demonstrate satisfactory academic achievement in required coursework prescribed by the curriculum with an overall academic achievement of a minimum Grade Point Average (GPA) of 3.00. Successful completion of a comprehensive examination is also required for the MSN, BSN to DNP and PhD in nursing. The DNP requires successful completion of a DNP project and the PhD requires successful defense of a dissertation.

Application for Graduation

Each candidate for graduation must file an official Application for Graduation in the Nursing Student Affairs & Alumni Relations Office at least three months before the degree is to be completed. A fee will be assessed after the deadline for application. All students must be registered for at least one credit during the 12 months prior to graduation and must be registered for at least one credit in the term in which they take their comprehensive examination. International students must be registered according to the conditions of their visa.

Major and Degree Options

The School of Nursing offers the following graduate degrees:

- The Master of Science in Nursing with majors and areas of concentration in the following areas:
  - Nurse Practitioner
    - Neonatal Nurse Practitioner* (no longer accepting applications as of December 2018)
  - Nurse Specialty Role
    - Clinical Nurse Leader
    - Nursing Informatics
    - School Nursing
  *not currently accepting applications

- The Doctor of Nursing Practice (DNP)
  - MSN to DNP Options
Special Academic Opportunities/Programs

The School of Nursing offers a variety of special programs within its master's and doctoral programs:

Minors

Students in the Master's program, the DNP program and the PhD program have the option of completing a minor in nursing education, nursing informatics, nursing research, nursing administration, and gerontology for nurse practitioners, or health care genetics. The minimum credits required to obtain a minor is 9-12 credits.

Post-Professional Certificates

Post-professional certificates are available in nursing education, school nursing, health care genetics, nursing informatics, and gerontology for nurse practitioners, as well as an adult-gerontology acute care nurse practitioner, pediatric acute care nurse practitioner, neonatal nurse practitioner, and psychiatric mental health nurse practitioner. The certificate options require a minimum of 10 credits; additional credits may be required depending on the certificate program and previous graduate course work. All students admitted to a nurse practitioner certificate program must meet all curriculum requirements of the full graduate degree program, either through previous course work or credits earned during the certificate program. Individual review of transcripts will determine the exact number of credits needed to meet curriculum requirements.

Admission criteria for master's level certificate programs include:
Evidence of successful completion of MSN, DNP or other relevant first professional degree
Relevant work experience
Three letters of recommendation
Satisfactory interview with program faculty
Current RN license if the certificate program includes clinical experiences.

School of Nursing Faculty

School of Nursing Faculty

Program and Course Offerings

Certificate

Adult-Gerontology Acute Care Nurse Practitioner Certificate

Post-Professional Certificate in Adult-Gerontology Acute Care Nurse Practitioner

This non-degree certificate is designed for nurse practitioners or clinical nurse specialists with a previous Master of Nursing or Doctor of Nursing Practice who are seeking to expand their roles via nurse practitioner certification in Adult-Gerontology Acute Care. The total credits required are 24.

Overview

The Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) Post-Professional Certificate is designed for graduate prepared Nurse Practitioners (NP) or Clinical Nurse Specialists (CNS) who are seeking to expand their roles via nurse practitioner certification in Adult-Gerontology Acute Care. The curriculum prepares nurse practitioners to function as generalist, principal providers of care for adults and older adults with acute, critical and complex chronic health problems across the continuum of acute care services.

AG-ACNP students may choose a clinical emphasis in cardiopulmonary, critical care, oncology, trauma and emergency preparedness or directed study. The directed study allows students to design clinical experiences around a particular area of interest (i.e. internal medicine, general surgery). The curriculum consists of NP and AG-ACNP specialty courses and clinical practice hours.

Graduates of the AG-ACNP Post-Professional Certificate are eligible to sit for a national nurse practitioner certification examination in Adult-Gerontology Acute Care offered by either the American Nurses Credentialing Center or American Association of Critical Care Nurses. Successful passing of the national certification examination entitles the graduate to apply for certification as a Certified Registered Nurse Practitioner (CRNP) in Adult-Gerontology Acute Care by the State Board of Nurse Examiners of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's state of employment.

Curriculum Format

- Course work may be completed in 3 terms (or can be extended out to 5 terms of study)
- 540 clinical hours**
- Online or onsite
- Students are required to attend a 3-day onsite laboratory intensive, usually scheduled in the Summer term, 2nd term of study (availability of the lab intensive is pending current COVID travel restrictions). Each student will be responsible for transportation costs and for room and board costs during the lab intensive.
- Students will need to arrange for clinical placements and appropriate physician or nurse practitioner preceptors, as directed by their academic advisor.
- An Affiliation Agreement between the University and the clinical site is required before clinical hours can begin. This often takes some time to finalize, so applicants are highly encouraged to apply early and begin this process as soon as accepted into the program so that there will be no delay in beginning clinical rotations.
Program Outcomes

Graduates of the AG-ACNP Post-Professional Certificate are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining and restoring health to acutely ill, critically ill and complex chronically ill adults and older adults
- Identify health risks, promote wellness, and diagnose and manage acute and chronic illness
- Participate in multi-disciplinary research and provide leadership in mobilizing health services

Admission Criteria

- Valid registered nurse license in state where clinical experiences are performed
- Minimum of one year nursing experience recommended
- BSN required
- Previous MS, MSN or DNP as a NP or CNS [from accredited program: ACEN, NLN, ACICS, or CCNE]
- GPA ≥ 3.0 in the MS, MSN or DNP degree
- Pre-admission interview
- Complete online application
- International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu
- Spring Term Admission Only

Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified on-site, in-state students as per Policy 438

Curriculum (subject to change)

Spring

- NUR 2044 - NURSING GRADUATE ORIENTATION MODULE
- NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
  or
- NURNP 2100D - MANAGEMENT OF ADULT WITH EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
- NURNP 2101 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE CLINICAL
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  or
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS

Summer Term

- NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
  or
- NURNP 2104D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
  or
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2028 - ROLE PRACTICUM *

Fall Term
Choose one of the following*: (3 cr. each)

- NURNP 2105 - CLINICAL EMPHASIS - CARDIOPULMONARY
- NURNP 2106 - CLINICAL EMPHASIS - CRITICAL CARE
- NURNP 2107 - CLINICAL EMPHASIS - ONCOLOGY
- NURNP 2109 - CLINICAL EMPHASIS - DIRECTED STUDY
- NURNP 2194 - CLINICAL EMPHASIS: TRAUMA EMERGENCY PREPAREDNESS

Notes

Successful completion of the AG-ACNP Specialty Comprehensive Exam is required.

* Dependent on the individual's previous role, population of patients and years of experience as a nurse practitioner in an acute or critical care setting with adult/gerontology patients, up to 300 clinical hours may be completed through the option of credit by course examination.

The total credits required will vary based on evaluation of the student's previous coursework. Applicants must have completed courses in their prior MSN or DNP nurse practitioner program that meet the core course requirements to sit for the AG-ACNP certification examination (Advanced Pathophysiology across the Lifespan, Advanced Pharmacology across the Lifespan, Advanced Health Assessment across the Lifespan, and Health Promotion). Additional coursework may be required and/or credit may be given for previous coursework that meets the core curriculum requirements.

Total Credits: 24

Certificate in Gerontology for Nurse Practitioners

The online Post-Professional Certificate in Gerontology for Nurses Practitioners is a non-degree certificate designed for graduate-prepared Family, Adult Primary Care, Psychiatric Mental Health, and Adult Acute Care Nurse Practitioners who seek to increase their formal education as a principal provider of primary health care in the care of older adults.

The curriculum includes a total of 11 credits; five (5) credits of core advanced nursing practice and six (6) approved elective credits. The core advanced nursing practice courses are specifically designed to enable Nurse Practitioners to increase their capacity in the complex care of older adults. The curriculum includes a clinical practicum to provide students with the opportunity to synthesize and integrate concepts learned in the delivery of primary health care to older adults across a variety of settings.

Students will select six (6) credits of elective courses related to their career goals or interests (some taught through other departments).

Upon successful completion of all requirements students will receive a Certificate in Gerontology for Nurse Practitioners. Certificate in Gerontology for Nurse Practitioners will appear on the student transcript.

Graduates will increase their marketability across health care settings with expertise in geriatrics and will enhance their clinical practice to better meet the complex health care needs of our aging population.

Curriculum Format

- 100% online delivery (no onsite campus requirements)
- Part time (2-3 terms)
- 11 credits (students may add up to 180 hours of optional practicum in student's locale)
- Rolling admission
Program Outcomes

Graduates of the Certificate in Gerontology for Nurse Practitioners will be prepared to:

- Apply advanced knowledge about gerontology and geriatrics, and specialized knowledge of aging and the aging process
- Bring expertise to the NP role that includes the diagnosis and management of acute, chronic, and preventive health care needs of the older adult population
- Collaborate with and lead inter-disciplinary health care teams in the care of older adults.

Admission Criteria

- Current RN license in U.S. state/territory where student will complete practicum requirement
- ≥ 3.0 GPA in MSN or DNP as a Family, Adult Primary Care, Psychiatric Mental Health, or Adult Acute Care NP program from ACEN, NLN, ACICS, or CCNE accredited program
- Pre-admission interview
- Short essay

Core Advance Nursing Practice (Required): 5 Credits

- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
  or
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
  or
- NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES

Electives: 6 Credits

Choose two courses from the following:

- GERON 2001 - ETHICS AND AGING
- GERON 2002 - PREVENTION AND HEALTHY AGING
- GERON 2004 - MENTAL HEALTH AND MENTAL ILLNESS IN LATE-LIFE
- GERON 2005 - PERSPECTIVES IN AGING
- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING
- GERON 2009 - AGING AND COMMUNICATION
- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Total Credits: 11 cr.

Certificate in Health Care Genetics

Genetic based health care is routinely becoming a part of daily health care, having major impacts on patient diagnosis, prognosis, and treatment. The Certificate in Health Care Genetics is designed for health care workers who are seeking focused, graduate-level education in the specialty of genetics. Knowledge gained through coursework will enable healthcare workers to better care for and educate their patients.

Admission Criteria

- Healthcare worker with a Bachelor's or Master's Degree
- GPA ≥ 3.0 in the Bachelor's or Master's Degree
Curriculum

This curriculum is currently only offered in person. The curriculum includes courses in genetics (taught through the School of Nursing) and choice of a 3 courses related to the student's career goals or interests (taught through other departments in the Schools of the Health Sciences). Learning experiences may be enriched through Clinical Genetics Case Conferences, Human Genetics Research Seminar, Human Genetics Journal Club, Genetics Grand Rounds, and a Research Practicum in a molecular genetics laboratory.

- Full-time or Part-time (~ 3 terms)
- Electives (per approval of Coordinator) 9 cr.
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS or NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 15

Program Outcomes

Graduates of the Certificate in Health Care Genetics are prepared to:

- Guide patients in their understanding of the genetic basis of disease as well as providing patient education and guidance in the areas of available genetic testing, interpretation of testing, recurrence risks, and genetic based therapies
- Provide advocacy for patients and families with genetic conditions
- Utilize family histories to determine disorders for which the patient is at risk
- Utilize a variety of resources to stay up to date with advances in genetic based medicine
- Determine when patient referral to a genetic professional is required
- Utilize a variety of resources to provide patients and their families with support mechanisms
- Interpret genetic research findings

Neonatal Nurse Practitioner Certificate

The Neonatal Nurse Practitioner (NNP) Post-Professional Certificate is designed for graduate prepared nurse practitioners who are seeking to expand their roles via nurse practitioner certification in neonatal critical care. The NNP is prepared to manage the health care of high-risk infants, within families and children up to 2 years of age. This expanded role is performed in collaboration with neonatologists and other pediatric clinicians. NNPs are primarily employed in neonatal intensive care units (NICUs) and are involved in coordinating and managing care for infants with chronic health problems and providing continuity for these children from hospital to home.

The NNP curriculum provides students with course work and clinical experiences focusing on the care and management of critically ill and convalescent premature and full-term infants. The sequence of courses provides for a logical building of the clinical decision making skills necessary to function as a neonatal nurse practitioner. Clinical experiences may be in a variety of clinical settings, which include newborn nurseries, intensive care units of various levels and out-patient clinics.

Graduates are prepared to perform acts of medical diagnosis and prescribe medical therapeutics and corrective measures. In addition, the NNP selects and performs clinically advanced diagnostic and therapeutic invasive procedures on newborns in the intensive care setting.

Graduates are eligible for both legal certification as a Certified Registered Nurse Practitioner (CRNP) and prescriptive authority by the Commonwealth of Pennsylvania, as well as other states and national professional certification as an NNP offered by the National Certification Corporation.
Curriculum Format

- Full-time or part-time (length depends on prior academic preparation)
- 660 clinical hours (neonatal-specific)

Program Outcomes

Graduates of the Post-Professional NNP area of concentration are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining, and restoring health to infants from the newborn period up to 2 years of age
- Identify health risks, promote wellness, and diagnose and manage acute and chronic illness
- Participate in quality improvement projects and provide leadership in mobilizing health care resources in the community

Admission Criteria

- A baccalaureate degree in nursing
- MSN or DNP preparation as a nurse practitioner from accredited program (ACEN, NLN, ACICS, or CCNE)
- Valid registered nurse license in state where clinical experiences are performed
- Equivalent of 2 years full-time, recent (within past 5 years) practice experience as a registered nurse in the care of critically ill newborns, infants or children in critical inpatient settings, primarily in Level III or IV NICU. Applicants must have acquired this experience or be currently employed in the indicated settings.
- GPA>3.0 in MSN or DNP program
- Pre-admission interview
- Complete online application
- International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu

Curriculum

- NURNP 2570 - COMPREHENSIVE NEONATAL ASSESSMENT THEORY
- NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY
- NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL
- NURNP 2028 - ROLE PRACTICUM
- NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY
- NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY
- NNP Clinical Specialty Comprehensive Exam is required

Total Credits: 25 (minimum) **

**The total credits required will vary based on evaluation of the student's previous coursework.

Nursing Education Certificate

The Post-Professional Certificate in Nursing Education combines didactic courses and two field-based practica in clinical and academic settings aligned with the student's interest. The online curriculum prepares students to apply instructional theory and research in the following types of educational settings and roles: schools of nursing, health care agency staff development, continuing education departments, advanced practice nursing and patient and community education agencies. The certificate involves the completion of 10 credits of coursework. The Nursing Education certificate is available to nurses with an MSN, DNP, or PhD.

Upon completion of the certificate, graduates with a valid RN license may be eligible to take the Certified Nurse Educator (CNE) Exam offered by the National League of Nursing (NLN). (Note: visit the NLN website for eligibility requirements).
Program Outcomes

Graduates of the Post-Professional Certificate in Nursing Education are prepared to:

- design current, progressive nursing education programs using research and theories of learning instruction, curriculum, evaluation, and measurement.
- utilize a variety of teaching strategies and media appropriate to learner characteristics, instructional objectives, and nursing or health-related content.
- plan the learning activities of individuals and groups of students in clinical and didactic settings.
- guide the performance of learners in settings where nurses function as educators for nurse colleagues, students, patients, families, and communities.
- apply principles of measurement and evaluation to the development of learner assessment procedures for didactic and educational instruction.
- utilize computer technology and educational informatics as integral components of nursing education and training.
- articulate the role of the nurse educator within the health professions, schools of nursing, and community.
- perform the role of education consultant in settings where nurses, patients, families, and communities participate in education activities.

Admission Criteria

- Valid registered nurse license in state where clinical practica are performed
- GPA ≥ 3.0 from an MSN, DNP or PhD program
- Pre-admission interview with program coordinator
- International applicants: Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements and www.nursing.pitt.edu and www.ois.pitt.edu for additional information.
- Online application: Apply Now.

Curriculum Format Total 10 Credits (150 Practicum Hours)

- Part-time (~3-4 terms)
- Courses are taught online
- Fall or Spring admission.
- Three of the four required courses are to be completed in sequence and are offered once a year (NUR 3293 in Spring, NUR 2084 in Summer and NUR 2183 in Fall); the 4th required course (NURSP 2093) can be taken any term.
- Practica are arranged based on student's needs.
- Applicants must have the curriculum plan approved by the Nursing Education program coordinator.

Required courses and scheduled terms include:

- NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING
  (3 credits any term; 60 hours clinical)
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
  (2 credits Spring)
- NUR 2084 - MEASUREMENT AND EVALUATION IN TEACHING
  (2 credits Summer)
- NUR 2183 - PRACTICUM: TEACHING IN ACADEMIC SETTINGS
  (3 credits Fall; 90 hours clinical)
Total Credits: 10

**Nursing Informatics Certificate**

The Post-Professional Certificate in Nursing Informatics is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems that support, enhance and manage patient care. Informatics nurses are involved in practice, education, research, administration, and consultation and can work in public, private, or corporate settings. Career opportunities for graduates of this specialty are numerous.

The curriculum includes course work in introduction to informatics, clinical information systems, and project management. Practica are designed to enhance the students’ knowledge and skill set through active participation in a selected informatics role.

**Curriculum Format**

- Part-time (~ 4 terms)
- 240 practicum hours (minimum)
- 15 course credits
- Online only

**Program Outcomes**

Graduates of the Post-Professional Certificate in Nursing Informatics are prepared to:

- Analyze clinical information systems for adoption by healthcare systems
- Manage projects in a multidisciplinary integrated healthcare informatics environment
- Consult with companies in the design of healthcare information systems
- Plan and develop informatics applications for telehealth, consumer health, and community-based care

**Admission Criteria**

- Valid registered nurse license in state where clinical experiences are performed
- 3.0 or higher in MSN, DNP or higher nursing degree (from accredited program (ACEN, NLN, ACICS, or CCNE)
- Satisfactory resume
- Pre-admission interview
- Complete https://nursingcas.liaisoncas.org/apply/
  - *International applicants: see Pitt's Office of International Services*
- Fall term admission

**Admission of International Applicants**

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

**Curriculum**

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT
- NURSP 2085 - NURSING INFORMATICS PRACTICUM 1
Total Credits: 15

**Pediatric Acute Care Nurse Practitioner Certificate**

This non-degree certificate is designed for nurses with previous Master's or Doctor of Nursing Practice preparation as another type of nurse practitioner who are seeking to expand their role by certification in Pediatric Nurse Practitioner Acute Care. The Pediatric Acute Care Nurse Practitioner Post-graduate Certificate is designed for MSN- or DNP-prepared nurse practitioners who want to obtain the education necessary to be eligible to take the certification exam to become a pediatric acute care nurse practitioner (CPNP-AC).

Pediatric acute care nurse practitioner students are prepared to provide quality health care to acutely, critically, and chronically ill children, birth through emerging adulthood, and their families. CPNP-ACs work in collaboration with other health care professionals, most often in inpatient pediatric settings as well as pediatric emergency rooms. The sequence of courses provides for a logical building of the clinical decision making skills necessary to function as a pediatric acute care nurse practitioner. Clinical experiences may be in a variety of general or specialty pediatric acute care settings.

Graduates are eligible for national certification offered by the Pediatric Nursing Certification Board (PNCB) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania or by the Board of Nursing in the student's state of employment.

**Curriculum Format**

- Course work may be completed in as few as two terms
- A minimum of 500 clinical hours
- Onsite
- Clinical placements will be provided by the program

**Program Outcomes**

Graduates of the Pediatric Acute Care Nurse Practitioner Post-graduate Certificate are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining, and restoring health to acutely ill, critically ill, and complex chronically ill pediatric patients
- Identify health risks, promote wellness, and diagnose and manage acute and chronic illness
- Participate in quality improvement projects and provide leadership for interprofessional health care teams

**Admission Criteria**

- Valid registered nurse license in the state where clinical experiences are performed
- A baccalaureate degree in nursing
- MSN or DNP preparation as a nurse practitioner from an accredited program (ACEN, NLN, ACICS, or CCNE)
- Minimum of one year nursing experience recommended
- GPA ≥ 3.0 in the MSN or DNP program
- Pre-admission interview
- Complete online application
- International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu
Sample Full time Curriculum (subject to change)

Spring

- NURNP 2531 - PEDIATRIC ACUTE CARE 1
  or
  NURNP 2531D - PEDIATRIC ACUTE CARE 1
- NURNP 2533 - MANAGEMENT: PEDIATRIC ACUTE CARE CLINICAL 1
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  or
  NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NURNP 2028 - ROLE PRACTICUM

Summer

- NURNP 2532 - PEDIATRIC ACUTE CARE 2
  or
  NURNP 2532D - PEDIATRIC ACUTE CARE 2
- NURNP 2534 - MANAGEMENT: PEDIATRIC ACUTE CARE CLINICAL 2
- NURNP 2028 - ROLE PRACTICUM

Total Credits: 18-21

Notes:

The Pediatric Acute Care Nurse Practitioner Clinical Specialty Comprehensive Exam is required.
The total credits required will vary based on evaluation of the student's previous coursework.

Psychiatric Mental Health Nurse Practitioner Certificate

The Psychiatric Mental Health Nurse Practitioner Post-Professional Certificate is designed for graduate prepared Nurse Practitioners (NP) or Clinical Nurse Specialists (CNS) who are seeking to expand their roles via nurse practitioner certification in Psychiatric Mental Health Care.

The curriculum includes foundational and psychiatric care content providing students with the advanced practice skills to effectively manage persons with psychiatric disorders across the lifespan. Emphasis is placed on psychobiologic diagnosis and treatment, including psychotherapies for these individuals and their families to promote mental health and prevent subsequent mental disorders.

Clinical experiences are designed so that students provide comprehensive management to psychiatric clients with mental illness in intensive and varied clinical experiences. Culminating clinical management practice provides students with the opportunity to synthesize and integrate concepts from primary health care with their psychiatric knowledge base.

Graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania.

Curriculum Format
• Full-time or part-time (length depends on prior academic preparation)
• 640 clinical hours (length depends on prior academic preparation)

Program Outcomes

Graduates of the PMHNP are prepared to accomplish the following:

• Provide comprehensive care to psychiatric clients
• Conduct psychotherapies for psychiatric clients and their families

Admission Criteria

• Valid registered nurse license (all students must obtain a Pennsylvania license)
• Previous MS or MSN as a NP or CNS (from accredited program (ACEN, NLN, ACICS, or CCNE)
• GPA ≥ 3.0 in the MS or MSN degree
• Minimum of one year nursing experience recommended
• Prerequisite statistics course (within 10 years) with a grade of B- or higher
• Pre-admission interview
• Complete online application
• International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu
• Rolling admissions

  or
- NURNP 2029D - ROLE SEMINAR 2
- PMHNPC Clinical Specialty Comprehensive Exam is required.

Total Credits: 34

- *Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified onsite students as per Policy 438.

School Nurse PK-12 Certificate -online

Currently in Pennsylvania, completion of an approved School Nurse PK-12 Certificate program is required to practice as a school nurse. The School Nurse PK-12 Certificate fulfills the educational requirements for the School Nurse Certificate (Education Specialist 1) issued by the PA Department of Education (PDE).
This online School Nurse PK-12 Certificate from the School of Nursing, a 15-credit (three-term) curriculum, is designed for graduates of BSN programs and students and/or graduates of MSN, DNP, or PhD programs. This program will prepare registered nurses to meet the health needs of children of all ages in diverse school settings. The curriculum includes a School Nurse Seminar course which covers the true essentials of school nursing, taught by a certified school nurse. Practicums are completed in diverse elementary and secondary school settings including special needs students. Three nurse practitioner courses enhance student's knowledge of health promotion and disease prevention in culturally diverse populations and their skills in physical assessment and working with psychiatric conditions.

Upon completion of the School Nurse Certificate curriculum, you will be eligible to apply for the School Nurse PK-12 Certificate (Education Specialist 1) issued by the Pennsylvania Department of Education (PDE). In addition to meeting PDE educational requirements, Pennsylvania requires certified school nurses to have a BSN and a valid RN license. (Visit education.pa.gov or your home state's Board of Nursing website for state-specific requirements.)

**Program Outcomes**

- Graduates of the School Nurse Certificate will be prepared to apply nursing knowledge, skills, and abilities in the care of school age children in diverse elementary and secondary school settings.
- This program will help prepare school nurses who in the future may decide to take the National Certification Examination for School Nurses (NCSN). You must have completed 1000 hours working as a school nurse. This test is administered by the National Board for Certification of School Nurses (NBCSN).

**Admission Criteria**

- Pre-admission Interview
- Current RN license in U.S. state/territory or location where student will complete clinical requirements
- ≥ 3.0 GPA in BSN or higher nursing degree from an ACEN, ACICS, CCNE, or NLN accredited program
- Current Criminal Record Clearance (ACT 34 and ACT 73)
- Current Pennsylvania Child Abuse History Clearance (ACT 33)
- Current American Heart Association - BLS Healthcare Provider Course Certification
- Online application
- Application Deadlines: August 1 (Fall Term), December 1 (Spring Term), and April 1 (Summer Term)

**Curriculum Format**

- Online* (no on-site campus requirements)
- Part-time (3 terms)
- 15 credits (includes 120 practicum hours with a Certified School Nurse)
- Fall, Spring and Summer Term admission

**Curriculum**

**Fall**

- NUR 2176 - SEMINAR SCHOOL NURSE
- NUR 2179 - PRACTICUM SCHOOL NURSE

**Spring**

- NUR 2174 - LEADERSHIP IN SCHOOL NURSING
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
  OR
Your options for education in nursing research and practice don't end with a singular terminal degree. There is an increasing need for doctorally prepared nurses, and an especially crucial need for nursing scientists and nursing faculty.

The University of Pittsburgh School of Nursing offers you a journey to get there, through the new dual degree Doctor of Nursing Practice/Doctor of Philosophy program.

This program admits baccalaureate-prepared nurses to simultaneously achieve their PhD and DNP degrees, from which they emerge as both nurse researchers and advanced practice nurses. Students graduate with two separate degrees, but 30 credits are shared between the two degrees.

You will join as a dedicated, passionate nurse with a drive and desire to impact nursing research and how health care is delivered, and you will leave with a range of career opportunities available to you, including:

• Nursing faculty at a range of highly ranked universities
• Nurse leaders of health systems and organizations
• Advanced practice nurses who bring highly advanced skills in nursing research and clinical practice to their role

At present, the dual DNP/PhD program is available in these areas of Doctor of Nursing Practice concentrations

• Adult-Gerontology Clinical Nurse Specialist (https://www.nursing.pitt.edu/degree-programs/doctor-nursing-practice-dnp/dnp-clinical-nurse-specialist-major)
The DNP/PhD Program admits BSN graduates to the BSN to DNP/PhD track. Applicants for the program must satisfy the requirements for both PhD and DNP program admission. The DNP/PhD program follows a FALL TERM ONLY COHORT ADMISSIONS process. Applicants to the program must submit their completed applications by February 1 or May 1. Complete applications received by February 1 or May 1 will be reviewed and admission decisions made prior to June 1. Application decisions (except for international applicants) will be communicated electronically (by e-mail). Applicants must apply online at NursingCAS.

Applications to the programs are reviewed in their entirety and appraised for evidence of intellectual inquisitiveness and rigor, and commitment and motivation for scholarship and the development of nursing science.

Interested applicants should contact the Student Affairs & Alumni Relations Office at 412-624-4586 or more information.

Curriculum

BSN-DNP/PhD for AG-CNS Concentration

(Students are expected to enroll Full Time)

The BSN Track consists of a minimum of 121 credits (cr):

- 104 cr. of Didactic courses from the Nursing PhD and AG-CNS DNP Curriculum
- 17 cr. of Clinical Hours (1020 hours)

Fall Term (YR 1)

- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 2044 - NURSING GRADUATE ORIENTATION MODULE

Spring Term (YR 1)

- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3010 - PHD DISSERTATION

Summer Term (YR 1)

- NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- NUR 3288 - RESEARCH MEASUREMENT
- NUR 3289 - INTERVENTION DEVELOPMENT
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3010 - PHD DISSERTATION

Fall Term (YR 2)

- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY
• NUR 3290 - ADVANCED QUANTITATIVE ANALYTIC METHODS SEMINAR
• CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR
• CLRES 2120 - COST EFFECTVNS ANAL HLTH CARE
• NUR 3010 - PHD DISSERTATION

Spring Term (YR 2)

• NUR 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
• NURSP 2098 - HEALTHCARE QUALITY
• NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
• NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2
• Clinical Research Cognate (CLRES)

Summer Term (YR 2)

• NUR 2034 - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN
• NUR 2031 - THE DIAGNOSTIC PHYSICAL EXAM ACROSS THE LIFE SPAN
• NUR 3031 - METHODOLOGIES FOR DNP PROJECTS
• NURCNS 2850 - CNS ROLE IMPLEMENTATION
• NUR 3010 - PHD DISSERTATION

Fall Term (YR 3)

• NUR 2033 - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN
• NURSP 2062 - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS
• NURCNS 2851 - CNS CLINICAL PRACTICUM 1
• NUR 3010 - PHD DISSERTATION

Spring Term (YR 3)

• NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
• NURCNS 2852 - CNS CLINICAL PRACTICUM 2
• NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT
• NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
• NUR 3010 - PHD DISSERTATION

Summer Term (YR 3)

• NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
• NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
• NURSP 2388 - DATABASE MANAGEMENT
• NURSP 3096 - DATA ANALYTICS AND CLINICAL SYSTEMS DESIGN
• NUR 3010 - PHD DISSERTATION

Fall Term (YR 4)

• NURCNS 2853 - CLINICAL EMPHASIS SPECIALTY
• NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
• NURCNS 3039 - DNP-CNS ROLE PRACTICUM
Spring Term (YR 4)

- NURCNS 3039 - DNP-CNS ROLE PRACTICUM
- NUR 3037 - DNP PROJECT CLINICAL
- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NUR 3032 - DATA ANALYSIS FOR DNP PROJECTS
- NUR 3010 - PHD DISSERTATION

Optional Breakout

YR 04 OPTIONAL breakout for Full Time Dissertation (FTDS). If so, insert last 2 Dissertation Credits scheduled for YR 04 into YR 03.

PhD MILESTONE ORAL DEFENSE IN SUMMER TERM. Clinical practice clerkship-ND 1 day per week

Total Credits: Minimum of 121 Credits

Preliminary and Comprehensive Examinations and Dissertation Overview

The preliminary examination is taken after completing the following required courses.

- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- and Statistics Courses
  - NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
  - NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2

By following the established curriculum plan, all full time students should sit for their Preliminary Examination in their third term of study. The examination is designed to assess the student's breadth of knowledge of the discipline of nursing and potential ability to apply research methods independently. Remediation work may be required if deficiencies are identified that may impede the student's success in program completion. See School of Nursing Policy 230.

The comprehensive examination assesses the student's mastery of the general field of doctoral study, acquisition of depth and breadth of knowledge in a focused area of study, and the ability to use the research methods of the discipline. The comprehensive examination is taken after completion of all required course work and concurrent with the dissertation overview. See School of Nursing Policy 235.

The dissertation overview requires the student to formulate a research plan and to justify the selected approach for studying the topic before the student's dissertation committee.

Dissertation Committee

Prior to the comprehensive examination and the dissertation overview, the student and research advisor propose, subject to approval by the director of the PhD program and the Dean, a committee of four or more members, one of whom must be from another school within the University and the majority of whom must be from the School of Nursing. A majority, including the major advisor, must also be full members of the Graduate Faculty of the University.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees of the University catalog.

Admission to Candidacy for the Doctor of Philosophy
Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary examination, have completed formal courses with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed dissertation research by the dissertation committee. Admission to candidacy is granted by the Dean.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study (nine credits), which excludes any other employment except as approved. The doctoral student must notify the PhD program director in writing the term that this occurs.

Dissertation and Abstract

The date and title of the dissertation defense must be submitted to the PhD program director one month prior to the final defense. For definitions and detail on what constitutes an acceptable dissertation, please see Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees of this catalog.

Research Apprenticeship Model

The PhD program includes an apprenticeship model of research training that combines rigorous coursework and an apprenticeship with successful research mentors. This model includes a formalized series of Apprenticeship Practica (minimum of 6 credits under the direction of a research mentor), with recommended experiences and a series of defined deliverables. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored research application environment, which is additive to and precedes the dissertation experience.

All mentors are experienced nurse researchers. During their apprenticeships, students acquire tangible skills in research methodology, grantsmanship, professional skills, the responsible conduct of research, and dissemination of research findings through publications and presentations. Students receive an intense and comprehensive research experience resulting in publications and pilot data to support applications for independent research funding and dissertation work.

Adult-Gerontology CNS-BSN to DNP Major

The Adult-Gerontology (CNS) major prepares nurses as expert providers of care to patients/families across the continuum of healthcare services (from wellness through acute care). The CNS functions as a developer and manager of programs of care for populations of patients; as a mentor who provides support to nurses caring for patients at the bedside; as a leader of multidisciplinary groups driving change throughout the organization; and as a developer of evidence-based projects to ensure best patient outcomes.

CNS students choose a clinical emphasis of choice to focus their studies such as: general medicine or surgery, cardiopulmonary, critical care, oncology, or trauma and emergency preparedness (TEP). Graduates are eligible for national certification by the American Nurses Credentialing Center or the American Association of Critical Care Nurses.

Master's

Masters Neonatal Nurse Practitioner

We are no longer accepting admissions to the MSN Neonatal Nurse Practitioner Program, as of December 31, 2018. Applicants interested in becoming a neonatal nurse practitioner who have an earned BSN are encouraged to apply to the Doctor of Nursing Practice (DNP) Neonatal Nurse Practitioner BSN to DNP Concentration program. Those with and earned MSN as a neonatal nurse practitioner may add the DNP degree by applying to the Neonatal Nurse Practitioner MSN to DNP Concentration.

The Neonatal Nurse Practitioner (NNP) is prepared to manage the health care of high-risk infants within families and children up to 2 years of age. This expanded clinician role is performed in collaboration with neonatologists and other pediatric clinicians. Graduates assume leadership roles in a
variety of clinical settings including intensive care nurseries of various levels, newborn nurseries and high-risk follow-up clinics. Course work and clinical experiences focus on the care and management of critically ill and convalescent premature and full-term infants. Graduates select and perform diagnostic and therapeutic invasive procedures on newborns in the intensive care setting. Students are also prepared to participate in research.

The NNP area of concentration offers both full and part time study on the main campus in Pittsburgh. A post master's option is also available. Selected core courses may be transmitted to distance students (additional fees apply). Graduates are eligible to take the NNP certification examination offered by the National Certification Corporation (NCC) and for legal certification as a CRNP and prescriptive privileges through the State Board of Nursing of the Commonwealth of PA.

**Applicant Requirements**

A baccalaureate degree in nursing from a CCNE, ACICS or ACEN [NLN] accredited program in nursing An RN-Option, Early Admission to MSN/DNP is available for this Area of Concentration. Other requirements for admission include an application, transcripts, professional references, an essay, a resume/CV, a prerequisite statistics course within the last 10 years with a grade of B- or better, and a copy of a current license to practice nursing in a state or territory of the United States. All students must obtain a Pennsylvania license prior to beginning clinical courses. Official scores on the Graduate Record Examination (GRE). The GRE may be waived if the BSN GPA IS 3.5 or higher.

Relevant clinical experience: Equivalent of 2 year full time recent (within past 5 years) practice experience as a registered nurse in the care of critically ill newborns, infants, or children in critical care inpatient settings, primarily Level III or IV NICU is required before a student begins the clinical courses

**NNP Full-Time Sample Curriculum Plan:**

**Fall Term (YR 1)**

- NUR 2044 - NURSING GRADUATE ORIENTATION MODULE
- NUR 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
  or
- NUR 2004D - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
  or
- NUR 2010D - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
  or
- NUR 2011D - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
- NURNP 2026 - ROLE SEMINAR 1
  or
- NURNP 2026D - ROLE SEMINAR 1

**Spring Term (YR 1)**

- NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
  or
- NUR 2000D - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
- NUR 2034 - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN
  or

Total Credits: 58

* Courses with a "D" are delivered synchronously via distance education for qualified students per Policy 438

**Nurse Specialty Role**

- Clinical Nurse Leader Concentration
- Nursing Informatics Concentration

**School Nursing, MSN**

**School Nursing Major**

The School Nursing online major will prepare licensed registered nurses to work in the specialty practice of school nursing, which requires advanced skills to address the complex health needs of students within a school community setting. This innovative online program is a continuation of our online School Nurse PK-12 Certificate. Students will receive a personalized educational experience tailored to school nursing. This program will include evidence-based practice, compassionate care, communication, clinical judgment, diversity, public policy, ethics and social determinants of health. The Future of Nursing Report 2020-2030 notes that school nurses play a vital role in advancing health equity.

The School Nursing major will meet the need of nurses looking for programs offering online school nurse certificate (Level 1) as well as online MSN programs to allow them to get credits needed for their Level 2 school nurse certificate. Theory and practicum courses in school nursing provide opportunities to meet the school nurse competencies. The practicum in school nursing is completed in person in a school district selected by the student and approved by the course faculty. Career opportunities for graduates with this specialty are numerous in elementary, middle, and high schools in both public and private school settings.

**School Nursing Applicant Requirements**

A baccalaureate degree in nursing from CCNE, ACICS, ACEN, or NLN accredited program in nursing is required. Other requirements for admission include an application, official transcripts, professional references, an essay, a resume/CV, pre-requisite statistics course with a grade of B- or better, and a copy of a current license to practice nursing in the state or U.S. territory where the clinical practicum requirements will be completed. A GRE score may be required.

The school nursing major is only offered online. It can be completed on a full- or part-time basis.

**Course Curriculum**

**Fall**

- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
- NUR 3012 - PUBLIC POLICY IN HEALTH CARE
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NUR 2044 - NURSING GRADUATE ORIENTATION MODULE
- NUR 2176 - SEMINAR SCHOOL NURSE

**Credits: 11**

**Spring**

- NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
- NURSP 2098 - HEALTHCARE QUALITY
- NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 2179 - PRACTICUM SCHOOL NURSE

Credits: 11

Summer

- NURSP 2092 - LEADERSHIP DEVELOPMENT
- NUR 2218 - STUDIES IN ADVANCED NURSING ETHICS
- NUR 2031 - THE DIAGNOSTIC PHYSICAL EXAM ACROSS THE LIFE SPAN
- NURNP 3025 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE
- Comprehensive Exam

Credits: 11

Total Credits: 33

Minor

Gerontology Minor for Nurse Practitioners

An 8-credit Gerontology Minor for Nurse Practitioners (NP) can be obtained by DNP students who are enrolled in the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) DNP or the Psychiatric Mental Health Nurse Practitioner (PMHNP) DNP area of concentration.

The Nurse Practitioner functions in an expanded role that includes the diagnoses and management of health care needs of a specific population and this curriculum will prepare the Nurse Practitioner to develop expertise in the care of older adults. The gerontology courses are specifically designed to address the needs of the older adult in regard to the common geriatric syndromes, geriatric economic and social issues and the unique presentation of disease. Content includes an emphasis on chronic conditions, multi-morbidity, and internal medicine.

The diagnosis and management of these conditions will be emphasized in keeping with the role of the Nurse Practitioner. The courses were designed using national standards for nurse practitioner education through a combination of didactic and clinical learning experiences.

The Gerontology Minor is an 8 - credit curriculum available to DNP students currently enrolled in the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) DNP or Psychiatric Mental Health Nurse Practitioner (PMHNP) DNP programs who want to increase their knowledge and expertise related to the diagnosis and management of health care needs in the care of older adults.

Curriculum Format

- ~ 3 Terms
- Onsite
- 180 Practicum Hours

Program Outcomes

Graduates of the Gerontology Minor are prepared to accomplish the following:
• Provide comprehensive, evidence-based geriatric focused care for elderly patients and their caregivers based on physical, mental, emotional and functional changes

• Practice culturally sensitive care in regard to ethnicity, religion, gender and socio-economic status

• Identify available community resources to promote health, safety, function and independence

• Provide leadership to other members of the interdisciplinary team that is focused on the needs and wishes of the patient

• Assume the role of advocate for patients and caregivers in regard to access and transitions within the health care system

Curriculum: Gerontology Minor (subject to change)

• NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
  or
• NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH

• NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
  or
• NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES

• NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Total Credits: 8

*Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified onsite students as per Policy 438.

Health Care Genetics Minor

Genetic based health care is routinely becoming a part of daily health care, having major impacts on patient diagnosis, prognosis, and treatment. The curriculum is designed for health care workers who are seeking focused, graduate-level education in the specialty of genetics. Knowledge gained through coursework will enable healthcare workers to better care for and educate their patients.

The Minor in Health Care Genetics is available to enrolled University of Pittsburgh graduate students. Students should consult with their academic advisor. The Minor includes courses in genetics (taught through the School of Nursing) and a choice of 2 courses related to the student's career goals or interests (taught through other departments in the Schools of the Health Sciences). Learning experiences may be enriched through Clinical Genetics Case Conferences, Human Genetics Research Seminar, Human Genetics Journal Club, Genetics Grand Rounds, and a Research Practicum in a molecular genetics laboratory.

Curriculum Format

• Full-time or Part-time (~ 3 terms)
• This curriculum is currently only offered in person.

Program Outcomes

Graduates of the Minor in Health Care Genetics are prepared to accomplish the following:

• Guide patients in their understanding of the genetic basis of disease as well as providing patient education and guidance in the areas of available genetic testing, interpretation of testing, recurrence risks, and genetic based therapies
• Provide advocacy for patients and families with genetic conditions
Utilize family histories to determine disorders for which the patient is at risk
Utilize a variety of resources to stay up to date with advances in genetic based medicine
Determine when patient referral to a genetic professional is required
Utilize a variety of resources to provide patients and their families with support mechanisms
Interpret genetic research findings

Admission Criteria

- GPA ≥ 3.0 in current graduate program

Curriculum

- Electives (per approval of Coordinator) 6 cr.
  - NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  or
  - NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
  - NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 12

Nursing Administration

The Minor in Nursing Administration is available to enrolled University of Pittsburgh School of Nursing graduate students pursuing education in advanced clinical specialty roles who want the opportunity to also obtain knowledge and experience pertinent in management and leadership. Students should consult with their academic advisor. The minor will prepare nurses to assume positions as advanced practice nurses with some management and/or leadership responsibility.

The curriculum focuses on management in complex social and operational systems for healthcare delivery. Attention is given to applying role-related knowledge and skills in diverse settings and populations, including acute care, long term care, psychiatric settings, and community settings. The culminating practicum is a uniquely designed mentored clinical experience that provides students with an opportunity to experience a leadership role.

Curriculum Format

- Part-time (~ 2 terms)
- 180 Clinical hours

Program Outcomes

Graduates of the Minor in Nursing Administration are prepared to accomplish the following:

- Assume leadership for clinical initiatives and outcomes within their area of clinical focus
- Develop a business case for change within their area of clinical focus

Curriculum

* These courses are available via distance education for qualified students per Policy 438

- NURSP 2062 - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS
NURSP 2062D - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS

NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT

or

NURSP 2099D - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT

NURSP 2092 - LEADERSHIP DEVELOPMENT

or

NURSP 2092D - LEADERSHIP DEVELOPMENT

NURSP 2064 - NURSING ADMINISTRATION SEMINAR AND PRACTICUM

Total Credits: 12

Nursing Education Minor

The Nursing Education Minor combines didactic courses and two field-based practica in clinical and academic settings aligned with the student's interest. The online curriculum prepares students to apply instructional theory and research in the following types of educational settings and roles: schools of nursing, health care agency staff development, continuing education departments, advanced practice nursing, and patient and community education agencies. The Nursing Education Minor is available to graduate students enrolled at the University of Pittsburgh School of Nursing. The minor involves the completion of a minimum of 10 credits of coursework. Active students, including those in the Nurse Faculty Loan Program, should consult with their respective academic advisor and the coordinator of the Nursing Education Minor to develop their curriculum plan.

Upon completion of the minor, graduates with a valid RN license may be eligible to take the Certified Nurse Education Exam offered by the National League of Nursing (NLN) (Note: visit the NLN website for eligibility requirements)

Program Outcomes

Graduates of the Nursing Education Minor are prepared to:

- design current, progressive nursing education programs using research and theories of learning instruction, curriculum, evaluation, and measurement.
- utilize a variety of teaching strategies and media appropriate to learner characteristics, instructional objectives, and nursing or health-related content.
- plan the learning activities of individuals and groups of students in clinical and didactic settings.
- guide the performance of learners in settings where nurses function as educators for nurse colleagues, students, patients, families, and communities.
- apply principles of measurement and evaluation to the development of learner assessment procedures for didactic and educational instruction.
- utilize computer technology and educational informatics as integral components of nursing education and training.
- articulate the role of the nurse educator within the health professions, schools of nursing, and community.
- perform the role of education consultant in settings where nurses, patients, families, and communities participate in education activities.

Admission Criteria

- Valid registered nurse license may be required in state where clinical practica will be performed.
- GPA ≥ 3.0 in current MSN, DNP, or PhD program at the University of Pittsburgh, School of Nursing.

Curriculum Format Total 10 Credits (150 Practicum Hours)

- Part-time (~ 3-4 terms).
Courses are taught online.

- Fall or Spring admission. Starting the coursework in Spring will enable completion of the minor in three consecutive terms.
- Three of the four required courses are to be completed in sequence and are offered once a year (NUR 3293 in Spring, NUR 2084 in Summer, and NUR 2183 in Fall); the 4th required course (NURSP 2093) can be taken any term.
- Practica are arranged based on student's needs.
- Applicants must have the curriculum plan approved by the coordinator of the Nursing Education Minor and student's advisor.

Required courses and scheduled terms include:

- NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING
  (3 credits any term; 60 hours clinical)
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
  (2 credits Spring)
- NUR 2084 - MEASUREMENT AND EVALUATION IN TEACHING
  (2 credits Summer)
- NUR 2183 - PRACTICUM: TEACHING IN ACADEMIC SETTINGS
  (3 credits Fall; 90 hours clinical)

Total Credits: 10

Nursing Informatics Minor

The Minor in Nursing Informatics is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems that support, enhance and manage patient care. Informatics nurses are involved in practice, education, research, administration, and consultation and can work in public, private, or corporate settings. Career opportunities for graduates of this specialty are numerous.

The Minor in Nursing Informatics is available to enrolled University of Pittsburgh School of Nursing graduate students. The Nursing informatics curriculum includes introduction to informatics, clinical information systems, database management, and project management courses. Students should consult with their academic advisor.

Curriculum Format

- Part-time (2-3 terms)
- 11 course credits
- Online

Program Outcomes

Graduates of the Minor in Nursing Informatics are prepared to:

- Analyze clinical information systems for adoption by healthcare systems
- Manage projects in a multidisciplinary integrated healthcare informatics environment
- Consult with companies in the design of healthcare information systems
- Assist in the planning and development of informatics applications for telehealth, consumer health, and community-based care

Curriculum

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2388 - DATABASE MANAGEMENT
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Total Credits: 11

Nursing Research Minor

The Minor in Nursing Research is available to students pursuing education in advanced clinical specialty roles who want the opportunity to also obtain training pertinent to conduct and coordinate clinical research. Students should consult with their academic advisor. The curriculum focuses on research methodology and statistics. The Minor will enable graduates to apply their clinical and research skills in the following types of positions: clinical trial interventionists, research consultants, adverse events coordinators, and research project managers.

Graduates of the Minor in Nursing Research are eligible for National Certification as a Certified Clinical Research Coordinator by the Association of Clinical Research Professionals (ACRP) after successful completion of the Clinical Research Coordinator (CRC) Certification Exam. (Note: clinical research coordinator experience is required for the exam).

Curriculum Format

- Part-time (~4 terms)
- Online classes

Program Outcomes

Graduates of the Minor in Nursing Research are prepared to accomplish the following:

- Apply research principles to the management of clinical investigations
- Participate in the research process including the development of reviews of literature, research protocols, and human subjects protection protocols
- Participate in recruitment of research subjects, data collection, and dissemination of research findings
- Utilize computer technology and informatics as an integral component of a research program or project
- Articulate the role of the clinical researcher within the health professions and society
- Perform the role of nurse researcher within clinical research settings

Curriculum

- Elective - (approval by Coordinator, Nursing Research Concentration) 3 cr.
- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NUR 2800 - COORDINATING CLINICAL TRIALS

Total Credits: 12

School of Nursing Faculty

Full-Time Faculty

- Sheila A. Alexander, PhD, University of Pittsburgh
- Marianne Allen, DrNP, Drexel University
- Salah S. Al-Zaiti, PhD, University of Buffalo
• Maighdlin Anderson, DNP, University of Pittsburgh
• Sarah Belcher, PhD, University of Pittsburgh
• Jenna Bench, DNP, University of Pittsburgh
• Victor R. Bench DNP, University of Pittsburgh
• Catherine M. Bender, PhD, University of Pittsburgh
• Alice M. Blazeck, DNSc, University of Pennsylvania
• Betty J. Braxter, PhD, University of Pittsburgh
• Amy Bowser, PhD, University of Pittsburgh
• Marnie L. Burkett, DNP, Chatham University
• Yurun Cai, PhD, University of Massachusetts
• Judith A. Callan, PhD, University of Pittsburgh
• Brenda L. Cassidy, DNP, University of Pittsburgh
• Denise Charron-Prochownik, PhD, University of Michigan
• Cynthia Chew, DNP, University of Pittsburgh
• Tim M. Coleman, DNP, Carlow University
• Yvette P. Conley, PhD, University of Pittsburgh
• Rose E. Constantino, PhD, University of Pittsburgh
• Elizabeth A. Crago, PhD, University of Pittsburgh
• Jason J. Dechant, PhD, University of Pittsburgh
• Jill R. Demirci, PhD, University of Pittsburgh
• Annette J. DeVito Dabbs, PhD, University of Pittsburgh
• Barbara Dewhirst, PhD, East Tennessee State University
• Andrew Dierkes, PhD, University of Pennsylvania
• Bettina A. Dixon, DNP, University of Pittsburgh
• Heidi A. Donovan, PhD, University of Wisconsin-Madison
• Willa M. Doswell, PhD, New York University
• Jacqueline M. Dunbar-Jacob, PhD, Stanford University
• Katherine Endres, DNP, George Mason University

• Donette Svidron, MSN, University of Pittsburgh
• Jessica G. Tillia, MS, University of Pittsburgh
• Paul Wheeler, MSN, University of Pittsburgh
• Mary Wilcher, DNP, Robert Morris University
School of Pharmacy

Chartered in 1878, the School of Pharmacy has a tradition of developing leaders and innovators that drive the future of pharmacy. We investigate, discover, and create ways to improve patient health and, through partnerships, change practice and improve efficiency of care. We also use computational and bench research methods to discover and develop drugs and drug delivery systems, and optimize drug therapy. The School of Pharmacy leads the way in education, personalizing education and getting students to expert faster. The School of Pharmacy is among the oldest pharmacy schools in the country. Pitt Pharmacy is in the top tier of schools of pharmacy in US News & World Report rankings and NIH-funded research.

Mission
The School of Pharmacy is committed to improving health through excellence, innovation, and leadership in education of pharmacists and pharmaceutical scientists, in research and scholarship, in care of patients, and in service to our communities.

Vision
To be an outstanding school of pharmacy renowned for excellence in discovery and advancement of science-based use of medicines and other interventions to enhance the vitality and quality of life.

Values
Integrity guides our daily work. We foster:
Passion, commitment, and diligence
Creativity and personal growth
Collaboration and teamwork
A culture of respect for the individual.

Doctor of Pharmacy (PharmD) Program

The professional curriculum is composed of a course of study requiring sixty-two (62) credits of pre-professional study followed by four years of professional courses. The four-year professional curriculum emphasizes problem solving and critical thinking, blending classroom and laboratory learning with experiential learning in practice. The required component of experiential learning is designed to facilitate progress from initial stages of making meaningful connections with patients to caring for complex patients with acute and chronic diseases. Experiences include patient care in communities, in hospitals, and during transitions of care. This experiential education begins in the first weeks of the first professional (P1) year.

Through our commitment to personalizing education, PittPharmacy inspires students to use their unique interests and talents to improve the lives of people through the safe, effective, and responsible use of medications and other interventions.

The PharmD program prepares students to be practitioners who advance the profession by fostering innovation, leadership, interprofessional collaboration, civic engagement, advocacy, life-long learning, and a professional attitude of inclusion.

Accreditation Council for Pharmacy Education
The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60503, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

Contact Information

School of Pharmacy
3501 Terrace St
Pittsburgh, PA 15261
Admissions: 412-383-9000
E-mail: rxschool@pitt.edu
www.pharmacy.pitt.edu

Special Academic Opportunities

PittPharmacy provides opportunities to personalize students' education and get them to expert faster.
Areas of Concentration
Areas of Concentration (ARCOs) provide ways to tailor education to explore personal and professional interests. During pharmacy school, students can pursue an area of pharmacy in depth through specialized courses and experiences, mentoring, and a scholarly project. Students may apply for an ARCO during their second professional (P2) year of PharmD training. Each ARCO has specific requirements.

- Community Leadership, Innovation, and Practice
- Geriatrics and Palliative Care
- Global Health
- Pediatrics
- PharmacoAnalytics
- Pharmacotherapy Scholars
- Pharmacy Business Administration
- Research

International Pharmacy Travel
Pitt student pharmacists have the opportunity to gain exposure to diverse practices of pharmacy and global cultures through international experiences.

Student-Driven Independent Study
Students have the opportunity to work directly with a faculty member to design an elective Special Topics course organized around a specific project, inquiry, or experience. Unlike traditional electives, students play an active role in establishing the goals and parameters of the course and generate a specific product at its conclusion, such as a research poster, article, or teaching resource.

PharmD/PhD Combined Program
If students are committed to extending their research education, we offer an opportunity for a pathway to obtain a Doctor of Philosophy in Pharmaceutical Sciences (PhD) degree.

Selecting Experiential Rotations
Students can design an individualized combination of core and elective rotations that are unique to their professional interests, talents, and goals. Students are able to choose from over 1,000 rotations in a wide range of pharmacy careers locally, nationally, and internationally.

Admissions
The School of Pharmacy admits students to its programs under one of two pathways - guarantee or open. Those two admission pathways are detailed below:

Pharmacy Guarantee First Year Admission
All students should first submit an application to the University of Pittsburgh, Office of Admissions and Financial Aid. The School offers a guaranteed acceptance to a limited number of high school seniors who enroll at one of the University of Pittsburgh campuses. The number of guaranteed offers is limited and offered on a rolling basis. Students who have demonstrated academic success in high school, score 1330 or higher on the SAT I (Math and Critical Reading sections), with a minimum of 660 in the Math section, and specify Pharmacy on the application will be offered the guaranteed admission, if available.

Students who receive the guaranteed admission are expected to perform well in their pre-professional courses. In order to secure a place in the PharmD Program, students must earn:

- a letter grade of a C or better in all preprofessional courses with no repeated courses
- a 3.25 or greater overall GPA in preprofessional courses
- a competitive Math and Science GPA of 3.0

NOTE: Required Math and Science courses must be taken at the University of Pittsburgh (AP credits are acceptable).

Test optional applicants are eligible for this guarantee.

To exercise the Pharmacy guarantee, all applicants must:

- submit a completed PharmCAS application and fee
participate in a satisfactory interview prior to School of Pharmacy Admission
submit the Pharmacy College Admissions Test (PCAT) scores (PCAT for Fall 2023 Admissions see below)
writing assessment
Pharmacy Guarantee students who meet these performance criteria will be admitted into the PharmD Program.

Open Admission

Students admitted to the program through open admission compete for remaining spaces in the class. The requirements to be considered a competitive applicant for the School of Pharmacy's professional program are:

- completion of the pre-professional requirements
- competitive Math and Science GPA of 3.0
- submission of the Pharmacy College Admission Test (PCAT) scores
- submit a completed PharmCAS application and fee
- selected applicants will be required to participate in a satisfactory interview (interviews are by invitation only)

More information about PharmCAS and deadlines for application can be found at www.pharmcas.org.

Students applying for admission must apply through PharmCAS, the Web-based Pharmacy College Application Service.

Visit the School of Pharmacy Web site at www.pharmacy.pitt.edu.

Application Procedures and Deadlines

All applicants must file an application through PharmCAS, a Web-based Pharmacy College Application Service, by March 1, 2023.

The application process, application deadlines, and other admission requirements are summarized on the School of Pharmacy Web site.

Throughout the application process, it is the student's responsibility to follow all instructions and meet all deadlines. Failure to do so might result in their application being canceled. It is highly recommended that students apply early to ensure that all application materials are received by the March deadline.

Preparing to Complete the Application

The School of Pharmacy recommends that students thoroughly review the application process before entering data or filling out forms so that they are aware of all the information they will need to gather and how much time the entire process will take. Visit the PharmCAS Web site at www.pharmcas.org and review the "Preparing to Apply" tab. Then review the Checklist, PharmCAS Instructions, and the Applicant Code of Conduct links. Review the time line for the application process: Admissions Calendar

Complete Pre-professional Courses and Minimum Eligibility Requirements: Math & Science course requirements must be completed by the end of Spring term and all other courses must be completed by the end of the Summer term before students begin the first Fall semester of the PharmD program.

Register to take the PCAT (Pharmacy College Admission Test): The PCAT is optional for the Fall 2022 Admissions cycle and will be considered in the holistic application review process for applicants who have reported scores. Applicants who are unable to complete an exam or choose not to report exam scores will not be disadvantaged.

Visit the PCAT web site for registration deadlines for test dates and register as early as possible since the test sites have a limited number of examinee seats for each exam date. Register to take the PCAT and have your scores sent to PharmCAS, code 104.

Only completed applications are considered for an interview invitation. NOTE: Since the January PCAT scores will not be received until after interviews are offered, the Admissions Committee recommends an earlier PCAT testing date.

Completing the Application Process
The application process consists of one application.

PharmCAS (Pharmacy College Application Service): This service enables students to generate one primary application that can be submitted to multiple PharmD degree programs. For the University of Pittsburgh School of Pharmacy, the application must be electronically submitted on or before midnight Eastern Standard Time on March 1, 2023.

To eliminate any unforeseen problems, it is recommended that students submit their application early; i.e., November 1st. This will ensure eligibility to update fall grades and, if issues arise, they can be investigated and resolved before the March deadline.

After electronically submitting the PharmCAS application and fee for the PharmD program, there are follow-up steps that applicants must address to be certain that all the required documents (such as transcripts to PharmCAS) have been received on time.

**Tuition and Financial Aid**

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

In addition, the School of Pharmacy has a number of general scholarships provided through the generosity of the School's alumni and friends. These are described in detail on the school's Web site at [http://www.pages.pharmacy.pitt.edu/pharmdhandbook/the-pharmd-student-handbook/admissions/scholarships/](http://www.pages.pharmacy.pitt.edu/pharmdhandbook/the-pharmd-student-handbook/admissions/scholarships/)

Tuition Rates and Fees can be found on the school's Web site at [https://oafa.pitt.edu/financialaid/costs/](https://oafa.pitt.edu/financialaid/costs/).

**Academic and Professional Standards**

**Academic Integrity**

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

Enrollment in the School of Pharmacy carries with it obligations of conduct within and outside of the classroom. Professional students are expected to maintain the highest standards of personal integrity and conduct themselves in a manner that is a credit to themselves, the school, and the profession.

Students sign a copy of the University of Pittsburgh School of Pharmacy Code of Conduct that affirms their commitment to ethical and professional behavior. Details of the Code are outlined on the school's Web site.

**Grading System**

Doctor of Pharmacy students are subject to the provisions of the Guidelines and Regulations for the Promotion of Students in force at the time. All students will be given a copy of these guidelines and regulations upon entry into the program.

Calculation of grade point average (GPA) will include all required professional courses and approved electives taken while enrolled in the PharmD program. Cumulative GPA will be calculated at the end of each term. All PharmD students must maintain a cumulative GPA of 2.00. Students who fail to maintain a cumulative GPA of 2.00 or above will be placed on academic probation and given one opportunity to repeat selected courses in order to raise their cumulative GPA above 2.00. Students failing to increase their cumulative GPA above a 2.00 during this period of academic probation will be dismissed from the PharmD program. Term GPA will be calculated at the end of each term. Students with a term GPA under 2.00 will be placed on academic probation and must achieve a GPA of 2.00 or above during the following term. Students failing to achieve a term GPA of 2.00 or above during this period of academic probation will be dismissed from the PharmD program.
It is the responsibility of students to monitor their academic progress and become familiar with the program degree requirements and academic regulations.

Clearance and Immunization Policy

The Office of Experiential Learning manages learning experiences in communities and professional practice environments that are embedded across all four years of the PharmD program. Because these experiences involve direct patient contact, the practice sites where students are placed require proof of immunization to communicable diseases, fingerprinting, background checks, and drug screens. Students who fail to complete these prerequisites no later than two weeks prior to the start of classes will not be able to fulfill their experiential learning requirements. PittPharmacy works with CastleBranch, a background screening and compliance tracking solutions company, to collect and manage the documentation of all such prerequisites. Each student has access to his or her information through the secure CastleBranch web site both as a student and after graduation. CastleBranch maintains a secure site to which only the Office of Experiential Learning Office and the student have access.

A positive criminal history and/or positive drug screen may disqualify a student from completing required experiential learning and may prevent successful completion of the PharmD program. Many of the sites used for experiential learning require students to meet certain prerequisites. These prerequisites may include showing proof of immunization to communicable diseases, undergoing criminal background checks, and drug screening. Failure to meet these prerequisites can result in students being unable to complete their experiential learning requirements.

Additionally, in order to become a licensed pharmacist, many states will inquire as to whether the applicant has been convicted of any misdemeanor, felony, or any illegal act associated with alcohol and/or substance abuse. A criminal history may delay or prevent licensure.

PhD or MS in Pharmaceutical Sciences

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to train the next generation of leaders and decision makers seeking to improve the health of the community through outstanding basic and clinical research. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

Training consists of required core courses, elective courses, journal clubs, research presentations, and an original faculty-advised research project leading to a final thesis or dissertation. Students may select to enroll in one of six tracks: clinical pharmaceutical sciences, medicinal chemistry, health outcomes and policy research, pharmaceutics, biochemical pharmacology, or pharmacometrics and systems pharmacology (PSP).

altenbaughlm@pitt.edu

Application Process

Applications must be submitted electronically at the Pharmacy College Application Service for Graduate Programs (PharmGrad). Application to our program requires a $50.00 fee that cannot be waived.

Applications for the fall term must be submitted no later than January 4, 2023. Applications are reviewed on a first-come, first-served basis so it is wise to apply as early as possible. Applications for spring term admission are not accepted.

The School of Pharmacy highly recommends that applicants to the PhD program have research experience and that students mention specific faculty with whom they would like to work in their Personal Statement.
When complete, student applications are reviewed. No preliminary assessments are made on individuals applying to the program until all application requirements are complete. The GRE is no longer required.

We require three references that MUST be submitted online. Written references are not accepted.

IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT. You will be notified if your application is reviewed and you are invited for an interview. At that time, you will need to supply an official transcript.

**International Students**

For the Test of English as a Foreign Language (TOEFL), a minimum result of 100 on the iBT (Internet-based test) is required. For IELTS the minimum acceptable score is 7.0. You must submit TOEFL (or IELTS) scores to the University of Pittsburgh, institution code is 2927. You do not need a department code. TOEFL scores are good for two years; the ETS will not release TOEFL scores after 2 years from the date of the exam. **If you have graduated from a U.S. institution OR if English is the official language of your country then proof of English proficiency is not required.**

**Financial Assistance and Tuition**

Most students accepted to our PhD program are offered full tuition scholarship plus a teaching assistant stipend. Teaching assistant experience is not necessary as you will be trained upon acceptance into the program.

For the 2022-2023 academic year we granted scholarships and TA positions to 10 new admissions from a pool of approximately 108 applications. No financial assistance is available to MS students. Tuition Rates and Fees can be found on the school's Web site at https://oafa.pitt.edu/financialaid/costs/. **NOTE: Health insurance is REQUIRED for all students.**

All fees are the same for those students who are not offered a scholarship.

**Length of Programs**

The PhD Program requires a minimum of 72 credits. Most students complete the PhD degree within five years. The statute of limitations for completion of the PhD degree is ten years. (See Statute of Limitation/Leaves of Absence in the University catalog for more information.)

The MS (thesis-based) program requires a minimum of 30 credits. Most students complete the MS degree in two academic years. The statute of limitations for completing the MS degree is four consecutive calendar years from the first term of registration.

The Non-Thesis MS program requires a minimum of 34 credits and is usually completed within one calendar year (three semesters). The statute of limitations for completing the MS degree is four consecutive calendar years from the first term of registration.

**Academic Standards**

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

**Master of Pharmacy Business Administration**

The 12-month executive style Master of Pharmacy Business Administration (MPBA) program consists of 36 credits that build critical skills and expertise for pharmacy professionals seeking to substantially increase their business acumen and marketability.

Bridget T. Regan, MBA,RPh  
Director of Pharmacy Business Programs and Assistant Professor  
University of Pittsburgh
Application and Requirements

Prerequisite

- Candidates with a PharmD or BS in Pharmacy will receive preferential admission

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
- Résumé or CV
- One self-nomination letter describing:
  - Current job responsibilities and assignments
  - Finest achievements and greatest disappointments
  - Challenges met within current organization
  - Civic and community activities and any offices held
  - Reasons and motivations for entering the MPBA program
  - Professional and personal goals and plans
- Two letters of professional reference
- College or university transcripts
- Graduate school admission exam scores (recommended)
  - GMAT
- TOEFL or the IELTS examination (for anyone who speaks English as a second language)
- In-person interview with MPBA program representatives

Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information

Tuition and Financial Aid

Tuition

Tuition Rates and Fees can be found on the school's Web site at https://mpba.pitt.edu/tuition/. Tuition is paid in equal parts per term for three terms.

All students, including students traveling from out of town, are responsible for all travel expenses.

The MPBA program will provide a list of hotels that offer University rates from which students can select and reserve rooms.

Financial Aid
Federal Stafford loans are available to U.S. citizens for up to $20,500 per academic year. Refer to the University's Office of Admissions and Financial Aid for information on how to apply. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may consider financing. Furthermore, students may also finance their costs through standard loans.

Tuition Includes

- All books, cases, and simulations; meals during class sessions
- Microsoft Windows and Program Bundle software packages
- Access to all University of Pittsburgh student resources such as libraries, fitness facilities, and public transportation while on campus

Certificate in Pharmacy Business Administration

A new and unique executive-style certificate education program designed for working professionals striving to obtain an in-depth understanding of the Business of Medicines. The Certificate program consists of 18 credits and is designed to be completed in one year.

- Learn to Innovate and Solve Real World Healthcare Problems
- Focus in Specialized Areas of Concentration
- Increase your Pharmacy Business Acumen

Focused Tracks

- Advanced Community Pharmacy Management
- Specialty Pharmacy Management
- Managed Care Pharmacy

Application and Requirements

Criteria for qualified candidates for admission into the PBA certificate program include:

- Candidates with a PharmD or BS in Pharmacy will receive preferential admission

Students enrolled in another graduate program at the University of Pittsburgh are able to apply for concurrent enrollment in the PBA Certificate program. Tuition for the PBA Certificate program will be in addition and separate from the other graduate degree program.

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
- Résumé or CV
- One self-nomination letter describing:
  - Current job responsibilities and assignments
  - Finest achievements and greatest disappointments
Challenges met within current organization
o Civic and community activities and any offices held
o Reasons and motivations for entering the MPBA program
o Professional and personal goals and plans
• Two letters of professional reference
• College or university transcripts
• Graduate school admission exam scores (recommended)
  o GMAT
• TOEFL or the IELTS examination (for anyone who speaks English as a second language)
• In-person interview with MPBA program representatives

Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information.

Tuition & Financial Aid

Tuition Rates and Fees can be found on the school's Web site at https://oafa.pitt.edu/financialaid/costs/. Tuition is charged at a per credit rate each term.

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may wish to consider financing. Students may also finance their costs through standard loans.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

All students, including students traveling from out of town, are responsible for all travel expenses.

The MPBA program will provide a list of hotels that offer University rates from which students can select and reserve rooms.

Accreditation

Accreditation Council for Pharmacy Education
The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60503, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

Program and Course Offerings

Certificate

Clinical Translational Sciences Certificate
This certificate program in Clinical Translational Sciences provides students within MS or PhD programs in the health sciences the opportunity to develop expertise in conducting clinical and translational research. Though the majority of courses are in person, the certificate is considered hybrid because one course is offered online only. The core curriculum provides trainees with the basic set of skills that are required by clinical and translational investigators in all fields of interest. It is made up of 2 curricular cores: the first is the Research Core, which consists of 8 credits of courses in computer methods, clinical research methods and biostatistics. The second is a Regression and Ethics Core, which includes 3 credits of courses in Regression and ANOVA, Logistical Regression and Ethics in research. Combined with the mentorship from their graduate programs, this certificate provides added expertise and develops students' ability to conduct clinical and translational research.

Detailed Admissions Requirements

Students must first be admitted into a doctoral or masters degree granting program in one of the Schools of the Health Sciences prior to their acceptance into the clinical translational sciences graduate certificate program. Once admitted for graduate study within a program, students may apply to the Institute for Clinical Research Education for admission to the certificate program. Students must be in good academic standing and possess a strong interest in clinical and translational science.

Contact Information

Institute for Clinical Research Education

Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672
Email: icre@pitt.edu

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates must be in a graduate program (PhD or MS) in the health sciences
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical and translational research as a major focus of their career plan.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE scores are not accepted

Timeline

The Certificate in Clinical Translational Sciences accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Clinical Translation Sciences Certificate - Course Curriculum

Research Core (8 Credits)

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
CLRES 2020 - BIOSTATISTICS
*CLRES 2020 (Biostatistics) may be substituted for an alternative graduate level biostatistics course up to 6 credits

Regression & Ethics Core (3 Credits)

- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Total Credits: 11

Concentration

Doctor of Pharmacy - Community Leadership, Innovation, and Practice ARCO

The Area of Concentration in Community Leadership, Innovation, and Practice (ARCO-CLIP) provides students with mentoring and learning experiences to cultivate advanced patient care, develop health service innovations, acquire leadership and management skills, and enhance community health. Students completing the ARCO-CLIP will be well prepared to enter leadership and patient care roles in community practice and will be highly competitive for residencies and other advanced practice training opportunities.

ARCO-CLIP Academic Requirements

The ARCO-CLIP consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 21 credits of coursework and rotations in the ARCO-CLIP are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:
- PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)
- PHARM 5812 - HEALTHCARE INNOVATIONS 1
- PHARM 5820 - PHARMACY INNOVATION 1
- PHARM 5821 - PHARMACY INNOVATION 2

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Geriatrics & Palliative Care ARCO

The purpose of the Area of Concentration in Geriatrics and Palliative Care (ARCO-GPC) is to allow students to pursue an area of emphasis with geriatrics and palliative care consistent with their professional interests during their Doctor of Pharmacy (PharmD) education. The ARCO-GPC is intended to give students an in-depth exposure to geriatrics and palliative care pharmacy practice.

ARCO-GPC Academic Requirements

The ARCO-GPC consists of six (6) credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-GPC are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:
Doctor of Pharmacy - Global Health ARCO

The purpose of the Area of Concentration in Global Health (ARCO-GH) is to allow students to pursue an area of emphasis within global health consistent with their professional interests and while completing their PharmD degree. The ARCO-GH is intended to give students an in-depth exposure to global health pharmacy practice.

ARCO-GH Academic Requirements

The ARCO-GH consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs) in global health, and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-GH are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS
- PHARM 5801 - PHARMACEUTICAL CARE TO UNDERSERVED POPULATIONS
- PHARM 5814 - GLOBAL HEALTH: DETERMINANTS AND APPLICATION
- PHARM 5818 - MEDICAL PARASITOLOGY
- PHARM 5831 - HEALTHCARE FOR LGBTQIA COMMUNITY
- PHARM 5851 - SPECIAL TOPICS 1
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee.

Doctor of Pharmacy - Pediatrics ARCO

The purpose of the Area of Concentration in Pediatrics (ARCO-PED) is to allow students to pursue an area of emphasis in pediatric pharmacy practice so as to prepare them to better meet the specialization of pediatric pharmacy while completing the PharmD degree.

ARCO-PED Academic Requirements
The ARCO-PED consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs) in pediatrics, and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-PED are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5806 - PEDIATRIC PHARMACEUTICAL CARE
- PHARM 5826 - ADVANCED PEDIATRIC PHARMACEUTICAL CARE
- PHARM 5851 - SPECIAL TOPICS 1

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee.

**Doctor of Pharmacy - PharmacoAnalytics ARCO**

The purpose of the Area of Concentration in Pharmacoanalytics (ARCO-PA) in the School of Pharmacy is to allow students to learn and implement data analysis techniques while completing their PharmD degree. The ARCO-PA is designed to help students utilize data and technology to enhance pharmaceutical use, operations, and outcomes and drive better quality patient care while also providing pharmacists with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will become acquainted with big data sources, managing data, data analytic techniques from experience with statistical and analytics software to apply towards decision-making processes in the pharmacy field, including drug development, drug pricing and acquisition, and patient care outcomes.

**ARCO-PA Academic Requirements**

The ARCO-PA consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-PA are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- PHARM 3045 - ADVANCED STATISTICAL METHODS
- PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES
- PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)
- PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS
- PHARM 5851 - SPECIAL TOPICS 1

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee.

**Doctor of Pharmacy - Pharmacotherapy Scholars Program ARCO**

The purpose of the Area of Concentration - Pharmacotherapy Scholars Program (ARCO-PT) is to prepare pharmacy students to become highly proficient patient care providers and for a successful transition into competitive post-graduate residency training programs.

**ARCO-PT Academic Requirements**

The ARCO-PT consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-PT are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5813 - ACUTE CARE PHARMACOTHERAPY SIMULATION
• PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)
OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Pharmacy Business Administration ARCO

The purpose of the Area of Concentration in Pharmacy Business Administration (ARCO-PBA) is to allow students to pursue an area of emphasis within management consistent with their professional interests and expose students to an area of pharmacy practice that may best suit their interests. Student leaders and informal organizers may discover that pharmacy leadership provides an energizing career path.

ARCO-PBA Academic Requirements

The ARCO-PBA consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-PBA are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:
• BCHS 2558 - HEALTH PROGRAM EVALUATION
• PHARM 2510 - EXECUTIVE BOARDROOM
• PHARM 5805 - COMMUNITY PHARMACY MANAGEMENT
• PHARM 5812 - HEALTHCARE INNOVATIONS 1
• PHARM 5815 - CONCEPTS OF MANAGED CARE PHARMACY
• PHARM 5851 - SPECIAL TOPICS 1
• BUSERV 1915 Introduction to Management
• COMMRC 1102 Organizational Communication
• COMMRC 1106 Small Group Communication
• NUR 1900 Global Health Care
OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Research ARCO

The purpose of the Area of Concentration in Research (ARCO-RES) in the University of Pittsburgh School of Pharmacy Doctor of Pharmacy (PharmD) program is to provide students exposure to research fundamentals, cultivate an appreciation for clinical and translational research, and to help position students as highly competitive candidates for formal post-PharmD research education and training.

ARCO-RES Academic Requirements

The ARCO-RES consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-RES are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:
• PHARM 2001 - PHARMACEUTICAL ANALYSIS
• PHARM 2003 - PHARMACOEPIDEMIOLOGY
• PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
• PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
• PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
• PHARM 3034 - TOPICS IN TRANSLATIONAL RESEARCH
• PHARM 3040 - STATISTICAL METHODS
• PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY
Doctoral

Pharmaceutical Sciences - Biochemical Pharmacology Track, PhD

Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all PhD students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area. For students interested in the Clinical Pharmaceutical Scientist Track, you may find the curriculum here: http://www.pharmacy.pitt.edu/research/clinical Pharma_sience.php

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3043 - TEACH ME TO TEACH YOU
- PHARM 3042 - RESEARCH PRACTICUM

1st Year: Spring

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
• Track-Specific and/or Electives. - 3-4 credits

2nd Year: Fall

• PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
• PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
• PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
• PHARM 3042 - RESEARCH PRACTICUM
• Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

• PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
• PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
• PHARM 3042 - RESEARCH PRACTICUM
• Track-Specific and/or Electives. - 3-4 credits

3rd Year: Fall

• PHARM 3042 - RESEARCH PRACTICUM
• Track-Specific and/or Electives. - 3-4 credits

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, PhD

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

• You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
• You will study how research discoveries are translated into practices that promote health and prevent disease.
• You will learn the process required to implement new therapies as standards of care through human-based research projects.

Pharmaceutical Sciences - Medicinal Chemistry Track, PhD

Medicinal Chemistry

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

Pharmaceutical Sciences - Pharmaceutical Outcomes and Policy Research Track, PhD

Pharmaceutical Outcomes and Policy Research

Pharmaceutical Outcomes and Policy Research (POPR) is a specialty track/program in Pharmaceutical Sciences. The POPR track will train students to investigate the impact and outcomes of pharmaceutical products, pharmacy services, and pharmaceutical policies across health care systems. The
core mission of POPR is the advancement of knowledge about the safety and effectiveness of medicines, and pharmacy's role in improving population health. POPR students most often focus on patient-centered outcomes such as access, safety, quality of care, costs, and patient-reported health. Graduates will be trained to work in a broad range of settings, including: academia; pharmaceutical industry; government organizations such as FDA, AHRQ, NIH; contract research organizations; and health care systems

- You will learn epidemiological study designs, data management, data analysis, and data interpretation.
- You will develop strong quantitative methodological skills in pharmaceutical outcomes and health services research.
- You will apply social/behavioral theory to the study of patient, provider, and organizational behaviors as it relates to pharmaceuticals and pharmacy practice.
- You will learn how pharmaceutical outcomes research is used to inform clinical practice and guide health policy decisions.

**Pharmaceutical Sciences - Pharmaceutics Track, PhD**

**Pharmaceutics**

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.
- You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.
- Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

Pharmaceutical Sciences - Pharmacometrics and Systems Pharmacology Track, PhD

The Pharmacometrics and Systems Pharmacology (PSP) is an interdisciplinary science to study drug actions and rational development of new drugs through network analysis, multitype-multiscale modeling and simulations "mechanism-driven", as well as data analysis "data-driven". The PSP track focuses on applying Pharmacometrics and System Pharmacology techniques to facilitate the development of novel drug candidates that are less
likely to fail during clinical trials and to provide a better understanding of drug mechanisms of action and therapeutic effects at the systems pharmacology level.

- You will develop a broad knowledge of pharmacometrics and systems pharmacology to develop drug candidates that are less likely to fail during clinical trials.
- You will develop strong computational modeling and simulation expertise from drug target fishing, to drug lead identification, to drug profile optimization.
- You will develop strong computational expertise on pharmacokinetics (PK) and pharmacodynamics (PD) modeling and simulation.
- You will develop skills on multiscale modeling of biological processes at the molecular, gene, organ and organism levels.
- You will have opportunities to study with faculty from a variety of background including computer-aided drug design, computational and systems biology/pharmacology, population PK/PD modeling, computational chemical genomics, computational biophysics, etc.
- Candidates with programming experience, basic/intermediate knowledge in statistics and/or hands-on modeling experience are highly desired.

This program is associated with the Computational Chemical Genomics Screening Center. More about this program track is here.

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Graduate Certificate
Pharmacy Business Administration Graduate Certificate

Certificate in Pharmacy Business Administration

A new and unique executive-style certificate education program designed for working professionals striving to obtain an in-depth understanding of the Business of Medicines. The Certificate program consists of 18 credits and is designed to be completed in one year.

- Learn to Innovate and Solve Real World Healthcare Problems
- Focus in Specialized Areas of Concentration
- Increase your Pharmacy Business Acumen

Focused Tracks

- Advanced Community Pharmacy Management
- Specialty Pharmacy Management
- Managed Care Pharmacy

Contact Information

Application and Requirements

Criteria for qualified candidates for admission into the PBA certificate program include:

- Candidates with a PharmD or BS in Pharmacy will receive preferential admission

Students enrolled in another graduate program at the University of Pittsburgh are able to apply for concurrent enrollment in the PBA Certificate program. Tuition for the PBA Certificate program will be in addition and separate from the other graduate degree program.

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
- Résumé or CV
- One self-nomination letter describing:
  - Current job responsibilities and assignments
  - Finest achievements and greatest disappointments
  - Challenges met within current organization
  - Civic and community activities and any offices held
  - Reasons and motivations for entering the MPBA program
  - Professional and personal goals and plans
- Two letters of professional reference
- College or university transcripts
- Graduate school admission exam scores (recommended)
  - GMAT
• TOEFL or the IELTS examination (for anyone who speaks English as a second language)
• In-person interview with MPBA program representatives

Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information.

Tuition & Financial Aid

Tuition Rates and Fees can be found on the school's Web site at https://oafa.pitt.edu/financialaid/costs/. Tuition is charged at a per credit rate each term.

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may wish to consider financing. Students may also finance their costs through standard loans.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

All students, including students traveling from out of town, are responsible for all travel expenses.

The MPBA program will provide a list of hotels that offer University rates from which students can select and reserve rooms.

Tuition Includes

• All books, cases, and simulations; meals during class sessions
• Microsoft Windows and Program Bundle software packages
• Access to all University of Pittsburgh student resources such as libraries, fitness facilities, and public transportation while on campus

Requirements

Pharmacy Administration Core Courses

• PHARM 5910 - US HEALTHCARE SYSTEM
• PHARM 5911 - HEALTHCARE SALES AND MARKETING
• PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE
• PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM
• PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS
• PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA

Focused Areas

Choose two paired and sequenced courses from:

• PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1
• PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2
• PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1
• PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2
• PHARM 5930 - PHARMACY BENEFITS MANAGEMENT 1
• PHARM 5931 - PHARMACY BENEFITS MANAGEMENT 2

Master's

Pharmaceutical Sciences - Biochemical Pharmacology Track, MS
Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
    - PHARM 3000 - TOPICS IN NEUROSCIENCE
    - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
    - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
    - PHARM 3000 - TOPICS IN NEUROSCIENCE
    - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring
MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, MS

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
  Choose one of the following Journal Club Courses:
  - PHARM 3000 - TOPICS IN NEUROSCIENCE
  - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
  - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
  Choose one of the following Journal Club Courses:
  - PHARM 3000 - TOPICS IN NEUROSCIENCE
  - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall
2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

**Pharmaceutical Sciences - Medicinal Chemistry Track, MS**

**Medicinal Chemistry**

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

**MS Core Curriculum**

**Requirements:**

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

**1st Year: Fall**

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
  Choose one of the following Journal Club Courses:
  - PHARM 3000 - TOPICS IN NEUROSCIENCE
  - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
  - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

**1st Year: Spring**
The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

**Pharmaceutical Sciences - Non-Thesis, MS**

The Graduate Program in Pharmaceutical Sciences is pleased to offer the new Non-Thesis MS degree to qualified students.

**Why choose the non-research based thesis?**

Students will be able to complete the MS degree in one calendar year. Our MS in Pharmaceutical Sciences attracts students interested in drug discovery, delivery, and metabolism in addition to pharmacology, pharmacokinetics, and pharmacodynamics. Graduating with the MS in Pharmaceutical Sciences will prepare you for employment in pharmaceutical manufacturing plants and labs. Pharmaceutically-trained professionals are involved in biotechnology, research, synthesizing and testing new compounds, in marketing and sales of pharmaceuticals and biomedical devices, and in pharmaceutical benefit management. Some areas where graduates with degrees in Pharmaceutical Sciences are sought after are Cosmetic Science, Industrial Pharmacy, and University-based laboratory areas.

**Non-Thesis MS Academic Requirements for Acceptance**

- A BS or BA in biochemistry, biology, chemistry, pharmacy, pharmaceutical sciences or a related field is required.
- Applications must be submitted electronically.
- We require three references that MUST be submitted online. Written references are not accepted.
- Successful applicants will be admitted for fall 2012. We do not accept Spring Admissions.
- The Graduate Record Examination (GRE) is required and must have been taken within the past three years. Subject specific tests are not required.
- International applicants with English as a second language must complete the TOEFL or IELTS. For TOEFL a minimal score of 80 (Internet-based test), 550 (Paper-based test), or 213 (Computer-based test) is required. For IELTS the minimum acceptable score is 6.5.
- You must submit GRE and TOEFL (or IELTS) scores to the University of Pittsburgh, institution code is 2927. You do not need a department code. TOEFL scores are good for two years; the ETS will not release TOEFL scores after 2 years from the date of the exam.
- If you have graduated from a U.S. institution OR if English is the official language of your country then TOEFL or IELTS scores are not required.
- IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT. You will be notified if your application is reviewed and you are invited for an interview. At that time you will need to supply an official copy of your transcript.
Application to our program requires a $50.00 fee which cannot be waived. Credit cards are accepted. To apply, go to: http://www.pharmacy.pitt.edu/programs/grad/ms_nonthesis.php; click Apply On-line!

Program Requirements for Graduation

- 30 credits are required for graduation. A minimum of 10 credits must be taken in any given semester.
- In lieu of an original research study the student would complete a written project consisting of a comprehensive literature review of a topic of current interest in pharmaceutical sciences. The student would defend the project as an oral examination before their MS committee and major advisor.
- The MS committee will consist of the Director of the Graduate Program in Pharmaceutical Sciences, the student's major advisor and one other member of the faculty chosen by the student and major advisor and approved by the Program Director and Senior Associate Dean.
- Students would be required to attend the training courses offered by the University.
  - Small Animal Training
  - Bloodborne Pathogens Training
  - Chemical Hygiene Plan & Formaldehyde Awareness
  - Radiation Safety Course

Sample Curriculum for Non-Thesis MS

Fall Term

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-4 credits

Spring Term

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-4 credits

Summer Term

- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-9 credits

Pharmaceutical Sciences - Pharmaceutics Track, MS

Pharmaceutics

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.
You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.

Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
  Choose one of the following Journal Club Courses:
  - PHARM 3000 - TOPICS IN NEUROSCIENCE
  - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
  - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
  Choose one of the following Journal Club Courses:
  - PHARM 3000 - TOPICS IN NEUROSCIENCE
  - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.
Pharmaceutical Sciences - Pharmacometrics and Systems Pharmacology
Track, MS

The Pharmacometrics and Systems Pharmacology (PSP) is an interdisciplinary science to study drug actions and rational development of new drugs through network analysis, multitype-multiscale modeling and simulations "mechanism-driven", as well as data analysis "data-driven". The PSP track focuses on applying Pharmacometrics and System Pharmacology techniques to facilitate the development of novel drug candidates that are less likely to fail during clinical trials and to provide a better understanding of drug mechanisms of action and therapeutic effects at the systems pharmacology level.

- You will develop a broad knowledge of pharmacometrics and systems pharmacology to develop drug candidates that are less likely to fail during clinical trials.
- You will develop strong computational modeling and simulation expertise from drug target fishing, to drug lead identification, to drug profile optimization.
- You will develop strong computational expertise on pharmacokinetics (PK) and pharmacodynamics (PD) modeling and simulation.
- You will develop skills on multiscale modeling of biological processes at the molecular, gene, organ and organism levels.
- Your will have opportunities to study with faculty from a variety of background including computer-aided drug design, computational and systems biology/pharmacology, population PK/PD modeling, computational chemical genomics, computational biophysics, etc.
- Candidates with programming experience, basic/intermediate knowledge in statistics and/or hands-on modeling experience are highly desired.

This program is associated with the Computational Chemical Genomics Screening Center. More about this program track is here.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3042 - RESEARCH PRACTICUM

Choose one of the following Journal Club Courses:

- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
- PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB

Track-specific and/or Electives

1st Year: Spring

- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM

Choose one of the following Journal Club courses:

- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
• PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
• PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
  Track-specific and/or Electives

2nd Year: Fall

• PHARM 3069 - PHARMACOMETRICS
• PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
• PHARM 3042 - RESEARCH PRACTICUM
  Choose one of the following Journal Club courses:
• PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
• PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
• PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
  Track-specific and/or Electives

2nd Year: Spring

• PHARM 2010 - MASTER OF SCIENCE THESIS
• PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
  Choose one of the following Journal Club courses:
• PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
• PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
• PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB
  Track-specific and/or Electives

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

PharmacoAnalytics - Pharmaceutical Outcomes Research, MS

This online MS program in PharmacoAnalytics-Pharmaceutical Outcomes Research provides students the opportunity to develop expertise in the application of data science and technology to optimize pharmaceutical use and enhance patient care and outcomes.

The program will provide students with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will be competent with identifying big data sources, managing data, using various data analytic techniques from experience with statistical and analytics software to apply towards decision-making processes in the pharmacy field, including drug development, drug pricing and acquisition, and patient care outcomes. Students will work directly with highly accomplished, well-funded research faculty; will have multidisciplinary training opportunities; and gain experience with cutting-edge technologies.

Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); secondary data sources, methods and tools are preferred prior to enrollment. Courses will be 100% online.

Core Courses PharmacoAnalytics

Core Courses PharmacoAnalytics (19.5 credits)

• PHARM 2003 - PHARMACOEPIDEMIOLOGY
• PHARM 3040 - STATISTICAL METHODS
• PHARM 3045 - ADVANCED STATISTICAL METHODS
• PHARM 3049 - SCIENTIFIC WRITING SKILLS
PHARM 3301 - SECONDARY DATABASE APPLICATIONS  
PHARM 3302 - CONDUCTING RESEARCH WITH LARGE BIOMEDICAL DATABASES  
PHARM 3304 - RESEARCH METHODS FOR PHARMACEUTICAL PRACTICE AND POLICY  
PHARM 3306 - INTRODUCTION TO THE UNITED STATES HEALTHCARE SYSTEM AND PHARMACEUTICALS  
PHARM 3308 - DATA PRIVACY AND SECURITY  
PHARM 3310 - SECONDARY DATA SOURCES, METHODS AND TOOLS  
PHARM 3312 - COMMUNICATING DATA  
PHARM 3303 - TOPICS AND METHODS FOR SECONDARY DATABASE EVALUATIONS  
PHARM 3305 - TOPICS AND METHODS IN PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH

Electives

Choose Electives (minimum 9.5 credits)

- PHARM 3042 - RESEARCH PRACTICUM
- PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES
- PHARM 3300 - CONCEPTS IN PHARMACOECONOMIC AND OUTCOME EVALUATIONS IN HEALTH AND MEDICINE
- PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS
- PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA
  Required for those without a Pharmacy background, otherwise Elective:
- PHARM 3078 - MEDICATION PHARMACOLOGY: A PHARMACOLOGIC FRAMEWORK FOR UNDERSTANDING DRUG ACTION

Thesis

Thesis (minimum 1 credit)

- PHARM 2010 - MASTER OF SCIENCE THESIS

Total Credits: 30

Pharmacy Business Administration, MPBA

Master of Pharmacy Business Administration

The 12-month executive style Master of Pharmacy Business Administration (MPBA) program consists of 36 credits that build critical skills and expertise for pharmacy professionals seeking to substantially increase their business acumen and marketability.

MPBA Value

- Designed for emerging pharmacy professionals seeking executive positions.
- Obtain an in-depth understanding of the business of medicines.
- Learn to innovate and solve real-world problems.
- Focus in specialized area of either Specialty or Community Pharmacy.

MPBA Fit

- Synergistically fusing the expertise of the Schools of Pharmacy and Business
- Efficiently formatted for working professionals
Friday and Saturday every other week for 12 months.

Requirements

1st Semester

- BACC 2401 - FINANCIAL ACCOUNTING
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2801 - ORG BEHAV: LDRSHP & GRP EFFECT
- PHARM 5911 - HEALTHCARE SALES AND MARKETING
- PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS

2nd Semester

- BACC 2528 - MANAGERIAL ACCOUNTING
- BFIN 2306 - FINANCIAL MANAGEMENT
- PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE
- PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM
Choose One:
- PHARM 5924 - HEALTH SYSTEM PHARMACY MANAGEMENT 1
  OR
- PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1
  OR
- PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1
  OR
- PHARM 5930 - PHARMACY BENEFITS MANAGEMENT 1

3rd Semester

- BSPP 2409 - STRATEGIC MANAGEMENT
- PHARM 5910 - US HEALTHCARE SYSTEM
- PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA
Choose One:
- PHARM 5925 - HEALTH SYSTEM PHARMACY MANAGEMENT 2
  OR
- PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2
  OR
- PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2
  OR
- PHARM 5931 - PHARMACY BENEFITS MANAGEMENT 2

Professional

Doctor of Pharmacy, PharmD

Doctor of Pharmacy (PharmD) Program
The professional curriculum is configured in a course of study requiring two years (62 credits) of pre-professional study followed by four years of professional courses. The four-year professional curriculum emphasizes problem solving and critical thinking, blending classroom and laboratory learning with experiential learning practice. The required component of experiential learning is designed to facilitate progress from initial stages of making meaningful connections with patients to caring for complex patients with acute and chronic diseases. Experiences include patient care in communities, in hospitals, and during transitions of care. This experiential education begins in the first weeks of your P1 year.

Through our commitment to personalizing education, PittPharmacy inspires students to use their unique interests and talents to improve the lives of people through the safe, effective, and responsible use of medications and other interventions.

The PharmD program prepares students to be practitioners who advance the profession by fostering innovation, leadership, interprofessional collaboration, civic engagement, advocacy, life-long learning, and a professional attitude of inclusion.

**Program Accreditation**

University of Pittsburgh's Doctor of Pharmacy Program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60603, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org

**Pre-Professional Requirements**

Applicants to the professional pharmacy program must have successfully completed, or be in the process of completing, all prerequisite mathematics and science subjects no later than the spring term of the year of admission. All other pre-professional courses should be completed no later than the first day of the fall term of admission. Pre-professional courses must be taken for a letter grade.

**Pre-Professional Courses:**

- General Biology (with lab) - 8 credits
- General Chemistry (with lab) - 8 credits
- Organic Chemistry (with lab) - 8 credits
- English Composition - 6 credits
- Calculus - 3-4 credits
- Statistics - 3-4 credits
- Elective courses+ - 24 credits

Total: 60-62 credits

*At least 9 credits must be in the humanities and 9 credits in the social sciences. A course in Public Speaking is recommended.*

Non-native English-speaking applicants must supply evidence of their proficiency in the English language.

**Degree Requirements**

To earn the degree of Doctor of Pharmacy, the student must demonstrate satisfactory achievement in required course work prescribed by the curriculum (*detailed below under Program Description*), earning an overall GPA of 2.00 or higher. Refer to the school's Student Handbook for the guidelines for academic progress.

**Program Description**

The professional curriculum leads to the Doctor of Pharmacy (PharmD) degree and requires completion of 134.5 credits (note: this curriculum is subject to change):

**Fall Term-First Professional Year (P-1)**
• PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS
• PHARM 5112 - COMMUNITY HEALTH 1: COMMUNICATION AND WELLNESS
• PHARM 5114 - ANATOMY AND PHYSIOLOGY 1
• PHARM 5118 - PRINCIPLES OF DRUG ACTION
• PHARM 5120 - THE EMERGING PROFESSIONAL
• PHARM 5122 - CASE CONFERENCE SERIES 1
• PHARM 5124 - BIOCHEMISTRY 1: FUNDAMENTALS

Total: 16 credits

Spring Term-First Professional Year (P-1)

• PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS
• PHARM 5113 - COMMUNITY HEALTH 2: CULTURAL AWARENESS AND BEHAVIOR
• PHARM 5115 - ANATOMY AND PHYSIOLOGY 2
• PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY
• PHARM 5211 - CASE CONFERENCE SERIES 2
• PHARM 5125 - BIOCHEMISTRY 2: DNA, PHARMACOGENOMICS & BIOTECHNOLOGY
• PHARM 5133 - PROFESSIONAL AND CAREER DEVELOPMENT 1

Total: 16 credits

Fall Term-Second Professional Year (P-2)

• PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE
• PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS
• PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE
• PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE
• PHARM 5220 - CASE CONFERENCE SERIES 3
• PHARM 5222 - FUNDAMENTALS OF IMMUNOLOGY

Total: 15 credits

Spring Term-Second Professional Year (P-2)

• PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION
• PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT- IMMERSION IN PRACTICE
• PHARM 5119 - DRUG DEVELOPMENT 1
• PHARM 5223 - GASTROENTEROLOGY/NUTRITION
• PHARM 5227 - CASE CONFERENCE SERIES 4
• PHARM 5229 - FUNDAMENTALS OF NEPHROLOGY/PULMONOLOGY
• PHARM 5231 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1: COMMUNITY-BASED
• PHARM 5233 - PROFESSIONAL AND CAREER DEVELOPMENT 2

Total: 16 credits

Fall Term-Third Professional Year (P-3)

• PHARM 5312 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING
- PHARM 5318 - ENDOCRINOLOGY
- PHARM 5320 - POPULATION HEALTH AND MANAGEMENT
- PHARM 5322 - PHARMACY LAW
- PHARM 5324 - CASE CONFERENCE SERIES 5
- PHARM 5326 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2: HEALTH-SYSTEMS-BASED
- PHARM 5328 - ADVANCED THERAPEUTICS: IMMUNOLOGY
- PHARM - Professional Elective - 3 credits

Total: 16.5 credits

Spring Term-Third Professional Year (P-3)

- PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS
- PHARM 5313 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT
- PHARM 5315 - ONCOLOGY/HEMATOLOGY
- PHARM 5319 - NEUROLOGY/PSYCHIATRY
- PHARM 5321 - CRITICAL CARE AND ADVANCED NEPHROLOGY
- PHARM 5323 - CASE CONFERENCE SERIES 6
- PHARM 5333 - PROFESSIONAL AND CAREER DEVELOPMENT 3
- PHARM - Professional Electives - 3 credits

Total: 15 credits

Fourth Professional Year (P-4)

Spans 3 semesters (SUMMER, FALL, SPRING) with several options for credits earned per semester, for a total of 40 weeks

- PHARM 5401 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 1
- PHARM 5402 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 2
- PHARM 5403 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 3
- PHARM 5404 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 4
- PHARM 5405 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 5
- PHARM 5406 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 6
- PHARM 5407 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 7
- PHARM 5408 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 8

Total: 40 credits

Total Professional Credits: 134.5 credits

**School of Pharmacy Faculty**

The mission of the Graduate School of Public and International Affairs (GSPIA) is to prepare students to make substantive contributions to society through careers as managers, advisors, and policy analysts in government and nonprofit organizations in a multitude of geographic locations throughout the world. This mission is accomplished through dedication to quality teaching that builds skills and commitments to the core values, challenges, and rewards of public service. It is supported through basic and applied research on timely issues of public management; international, regional, and urban affairs; and policy making. The school and faculty are committed to making a difference in the world by drawing on diverse skills and knowledge to improve the performance of public and nonprofit organizations that contribute to free and just societies in the United States and abroad. To accomplish these ends, GSPIA teaches, conducts research, and performs public service in the following areas:

- The management and administration of public and nonprofit agencies
- The growth and sustainable development of urban metropolitan regions throughout the world
- The economic and social development of newly independent and developing states
- The emerging dynamics that are shaping today's international political economy
- Threats to and issues in international security

The mission of GSPIA stresses the importance of democratic responsibilities and personal integrity in the management of human affairs as well as the professional qualifications required for managing constructive change. Students and faculty alike are required to:

- Demonstrate the highest standards of ethical and professional conduct
- Use critical thinking and problem solving skills in addressing public policy issues
- Consider the international and intersectoral aspects of public affairs
- Develop partnerships with others both internal and external to the University of Pittsburgh

Admissions

https://www.gspia.pitt.edu/about

GSPIA admits persons who have demonstrated intellectual competence and high motivation in an academic and/or professional environment and who will enrich the quality of life in the school. Individuals from varied cultural, academic, and social backgrounds provide an exciting frame of reference for the stimulating exchanges so vital to a dynamic academic process. The following are required of all Master applicants: transcripts, application and fee, TOEFL, Duolingo or IELTS score (if international), letters of recommendation, essays, and resume.

Admission Prerequisites

It is desirable, but not mandatory, that PhD applicants have an earned master's degree in public and international affairs or a degree in one of the social sciences and work experience prior to undertaking doctoral study. PhD applicants are required to submit a GRE score.
Admission Requirements

All applicants must have earned a bachelor's degree from a regionally accredited U.S. institution or a degree that is equivalent to a four-year U.S. bachelor's degree. Applicants are expected to have a B+ or better average (3.0 GPA) in their work to date. To be competitive for merit scholarships, applicants normally need at least a 3.5 GPA. The admissions committee also takes into consideration GPA within the major, GPA within the last two years, extenuating circumstances, length of time since graduation from college, rigor of the undergraduate program, and other factors.

Doctoral applicants are only eligible for admission to full-time status in the Fall Term.

Application Requirements

Online Application

Complete and submit the online application in its entirety. All application materials can be submitted electronically using the online system, with the exception of official academic transcripts.

Application Fee

The non-refundable application fee may be paid by credit card. You will be prompted to pay the fee at the end of the online application process. The application fee is waived for Returned Peace Corps Volunteers, AmeriCorps Volunteers, Truman Scholars, Pickering Fellows, Coro Fellows, Rangel Fellows, McNair Fellows, Teach for America alumni, City Year alumni, Payne Fellows, Catholic Volunteer Network alumni, and veterans/active duty members of the US Armed Forces.

TOEFL, IELTS, or Duolingo English Language Test Scores (International Applications Only)

International applicants must submit either the TOEFL, Duolingo, or the IELTS. Contact Educational Testing Services directly to request that an official score report be sent to GSPIA. The minimum TOEFL score required for admission is 80 on the Internet-based test, although 90 or above is strongly preferred. The minimum IELTS score required for admission is 7.0 (overall, and in each of the subsections). The minimum Duolingo English test score required for admission is 115.

The scores must be sent directly from the testing agency to GSPIA. GSPIA's institutional code is 2574.

Exceptions: International students who completed a degree at a regionally accredited college or university in the United States are not required to submit an English Language score. Students from certain English-speaking countries are also exempt (see this link for a list of exempt countries). All US citizens and permanent residents are exempt.

GRE

The GRE is only required for PhD applications.

Résumé

All applicants should upload a current résumé/curriculum vitae, showing relevant awards, academic achievements, full- and part-time job experience, internships, and volunteer work.

Personal Essay - (Master & PhD applicants)
Introduce yourself to the admissions committee. Discuss your professional goals and why you feel a GSPIA degree can help you attain them. Describe your background, interests, and motivation for pursuing graduate work in public & international affairs. There is a 5,000 character limit (approximately two double-spaced, typed pages).

Optional Essay - (Master applicants)

If there are any special circumstances you would like the admissions committee to consider, highlight them in the optional essay. Use this essay to include any information that you feel is important, but that you were not able to include elsewhere on the application. There is no penalty for leaving this blank.

PhD Applicant - Second Essay (PhD applicants only)

All PhD applicants must submit a single-authored writing sample in English that is 25 pages or less. The writing sample does not need to be a published paper but it should demonstrate academic or professional research. It must be uploaded as a PDF.

PhD Applicant - Third Essay (PhD applicants only)

PhD applicants are required to submit a third essay that discusses your potential dissertation research. Describe the idea and why it's important. Further, discuss the main questions to be investigated and the types of evidence that would be needed to support conclusions. Finally, identify the GSPIA faculty with whom you would like to work. There is a 5,000 character limit (approximately two double-space, typed pages).

Academic Transcripts

When completing the online application, you will be asked to upload copies of official transcripts from all colleges and universities you have attended, whether or not you earned a degree. You should upload a scanned copy of an official transcript generated by your university's registrar's office. Self-reported transcripts, student grade reports, or copies of unofficial transcripts are not acceptable.

It is not necessary to submit hard copies of your transcripts at the time of application, as long as your scanned copies have uploaded successfully. If you are admitted, you will then be required to submit final, official transcripts directly from your university's registrar's office to GSPIA. The official copy must exactly match the scanned copy that you submitted at the time of application.

Two Letters of Recommendation

Letters should be written by professors who have taught you or supervisors who have overseen your work, either professionally or in a volunteer capacity. If you graduated from college less than three years ago, at least one, if not both, of your letters should be from professors. Letters written by friends, family members, work colleagues, or anyone who has not taught or supervised you are not acceptable.

All letters must be submitted online. When you complete the online application, you will be prompted to enter the names and email addresses of your recommenders. The system will automatically send them an email explaining how they can upload their letters.

Admission Deadlines

US Citizens/Permanent Residents:

January 15 - PhD applicants
February 1 - MPA, MPIA, MID
June 1 - MPPM applicants
August 1 - Non-degree applicants
International Students:

January 15 - MPA, MPIA, MID, PhD, and MPPM applicants

Application Deadlines: Spring Term

US Citizens/Permanent Residents:

November 1 - MPA, MPIA, MID, and MPPM applicants
December 1 - Non-degree applicants

International Students:

August 1 - MPA, MPIA, MID, and MPPM applicants

Application Deadlines: Summer Term

US Citizens/Permanent Residents:

March 1 - MPPM applicants
April 1 - Non-degree applicants

International Students:

January 15 - MPPM applicants

School-Based Funding

GSPIA offers competitive, merit-based scholarships to its most outstanding master's degree applicants. All applicants for fall admission are automatically considered for merit funding, as long as they are planning to pursue full-time study and have submitted a complete application by the February 1 deadline. There is no separate application for GSPIA merit funding.

Typically, awards are renewed for the student's second year, as long as the student has earned at least 24 credits and maintained an overall GPA of 3.5 or better.

Academic Standards

Students are in good academic standing when they earn acceptable grades for graduate work and make normal progress toward the degree. Specifically, full-time students must earn a minimum of 9 credits per term with a minimum cumulative GPA of 3.5 in all courses. Part-time students are held to the same standards. However, they are expected to do so while carrying less than 9 credits per term. Full- or part-time students admitted with provisional status must maintain a minimum cumulative GPA of 3.0 in all courses in their first 12 credits.

Students receiving school-based funding are held to higher standards. Master's students must earn, after two terms, 24 credits and a cumulative GPA of 3.0. Doctoral students must earn 24 credits and a cumulative GPA of 3.0.

Probation

Students are automatically placed on academic probation when they fail to maintain a minimum GPA of 3.00 and earn the appropriate number of credits for their status. Students are also placed on academic probation automatically if they receive two G or I grades in one term and/or earn a grade of U, C- or lower.

Dismissal

Students who fail to correct the deficiencies of their academic probation within a specified time period (normally one term) are subject to dismissal. Should a student be dismissed, students may appeal the decision to the associate dean.

For additional information on academic standards and procedures, students are referred to GSPIA's Handbook of Academic Policies and Procedures for Master's Degree Programs, GSPIA's Handbook of Academic Policies and Procedures for the Doctor of Philosophy, and the University's Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Acceptance of Transfer Credits from Outside Institutions

Students who have completed graduate courses in degree-granting graduate programs at other accredited institutions within the past seven (7) years prior to admission to GSPIA should submit official transcripts from those institutions at the time they apply so that the courses can be evaluated for...
transfer credits or waivers. If the source institution is located in the United States, the institution must be regionally accredited in order for the credits to be transferrable. Graduate-level courses taken while a student was enrolled in an undergraduate program are generally not eligible to be transferred into GSPIA. Under normal circumstances, only graduate-level courses taken after a student has earned a bachelor's degree may be evaluated as transfer credits. (See "Enrollment in Graduate Courses as an Undergraduate" above.) A maximum of 12 credits can be transferred for students enrolled in the MPA, MPIA, and MID degree programs. A maximum of 6 credits can be transferred for students enrolled in the MPPM program. Students admitted with provisional status cannot transfer credits until full graduate student status has been granted.

Official transcripts certifying graduate courses completed at another regionally accredited institution can be evaluated for acceptability as transfer credits, provided grades of B or better (GPA = 3.0) or its equivalent has been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. The documents must prove that the course(s) are substantially similar in content to existing GSPIA course(s) in order for the transfer to be approved. Transfer (advanced standing) credits are entered as block transfer credits (advanced standing) on the student's transcript. Grades and quality points are not recorded for credits accepted by transfer.

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University. Graduate students already enrolled, may, when approved in advance by the director of student services, spend a term or more at another graduate institution, to obtain training or experience not available at the University, and transfer those credits toward the requirements for a GSPIA degree. In such instances, neither the University nor GSPIA is responsible for any financial assistance to the graduate student.

No credits will be granted toward a GSPIA degree for work completed in extension courses, correspondence courses, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has a regionally accredited program.

**Acceptance of Transfer Credits from Other Graduate Schools at the University of Pittsburgh**

With the exception of students enrolled in formal joint-degree programs, students who earn/have earned credits while enrolled as a graduate student at another University of Pittsburgh school may petition for some of their credits to count toward the GSPIA degree. Typically, no more than six credits earned while enrolled in another graduate program at the University of Pittsburgh may be counted toward the GSPIA degree. In most cases, such credits will not be listed as transfer credits on the student's GSPIA transcript, and will count only as free electives. The final decision on course acceptability rests with the GSPIA director of student services and the University of Pittsburgh Registrar.

**Statute of Limitations**

The purpose of the statute of limitations is to ensure that a graduate degree from GSPIA represents mastery of current knowledge in the student's field of study.

Requirements for the professional master's degrees must be completed within a period of five consecutive calendar years from the students' initial registration for graduate study. Joint degrees that require coursework in excess of 50 credits may be granted a longer statute of limitations.

Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the division director and submitted to the dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

**Advising and Career Services**

**Academic Advising:** Each student is assigned a faculty advisor based on, whenever possible, the compatibility of student and faculty academic interests. Faculty advisors assure that students, through proper course selection, can make productive use of the resources of the school and the University during their period of residence. In addition, faculty advisors are responsible for counseling their advisees about career opportunities in the student's area of study; for counseling advisees who have been placed on probation; and for approving the advisee's school-wide required and elective
courses, proposed thesis or dissertation topics, and supervised internships. Advisors and students monitor academic progress and identify areas where corrective action on the part of students may be required. It is essential, therefore, that students consult periodically with their advisors. Unless students subsequently request a change, faculty members originally assigned will continue as advisors throughout the students' program of study. If, however, a change in faculty advisor is requested, students must obtain the signed approval of the new advisors. Based on a student-focused approach, we provide students with a academic advisor who serves as the first point of contact for class registration, financial aid application and preparation for graduation. Additionally, academic advisors support students by providing information necessary to navigate the logistical challenges of graduate school and connect students to resources at the University of Pittsburgh.

**Career Services:** GSPIA places great emphasis on assisting students in determining the best and most appropriate positions available. In addition to faculty advisors, the school provides resources and guidance for students throughout their course of study as they devise strategies to identify professional opportunities. Among the many services offered through Career Services are individual career advising, internship and job search assistance, and a series of career-related workshops and special events. Extensive reference materials on jobs, fellowships, and internships are made available in a variety of ways, including GSPIA Career Launch, GSPIA's online career management system for students and alumni. Workshops cover such topics as resume preparation, job search strategies, negotiation skills, networking, and using technology in securing employment. Special events include Foreign Service information sessions, mock interviews for the Presidential Management Fellowship Program, an internship fair, and networking events with alumni, foundations, and agency representatives on campus and in Washington, D.C.

**Concentration and Degree Options**

GSPIA offers the following degrees:

**Master of Public Administration (MPA) Public Administration, MPA**, including concentrations in:

- Energy & Environment
- Governance & International Public Management
- Policy Research & Analysis
- Public & Nonprofit Management
- Social Policy
- Urban Affairs & Planning

**Master of Public and International Affairs (MPIA) Public and International Affairs, MPIA**, including concentrations in:

- International Political Economy
- Security and Intelligence Studies
- Human Security

**Master of International Development (MID) International Development, MID**, including concentrations in:

- Energy & Environment
- Governance & International Public Management
- Human Security
- Nongovernmental Organizations & Civil Society
- Social Policy
- Urban Affairs & Planning

**Master of Public Policy and Management (MPPM) Public Policy and Management, MPPM**

- Traditional accelerated mid-career master program
- Online mid-career master program

**Doctor of Philosophy (PhD)**

**Minors**

Students have the flexibility to customize their education as any concentration can be taken as a minor. Adding a minor will help differentiate your education, deepen your knowledge base and broaden professional marketability. Each minor consists of a 9-credit sequence of courses within your
chosen subject area. This is taken in addition to general required courses and courses for your area of concentration. Any course taken to fulfill a requirement for your degree or concentration cannot count towards your minor. A course may not be double-counted. An approved course must be substituted.

For GSPIA minors, click on this link:
GSPIA Minors

Joint Degrees

GSPIA students may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements (including entrance exams like the GRE, GMAT, and LSAT, where applicable). If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed on year 9 or, in the case of current law students, two years) of full-time study.

Full-time students in the MPA, MPIA, or MID programs are eligible to participate in the following joint programs:

**Juris Doctor** with University of Pittsburgh School of Law: The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues such as refugee services and the Department of Justice.

**Master of Business Administration** with University of Pittsburgh Katz Graduate School of Business - MPIA and MID students only: Combining a GSPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

**Master of Public Health** with University of Pittsburgh School of Public Health: Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

**Master of Social Work** with University of Pittsburgh School of Social Work: Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

**Master of Science in Information Science** with University of Pittsburgh School of Information Science: The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

**Master of Quantitative Economics** with University of Pittsburgh's Dietrich School of Arts & Sciences: The joint MQE/MPA degree allows a student to pursue two graduate degrees simultaneously between the Department of Economics and the Graduate School of Public and International Affairs. This streamlined, 2.5 years joint degree program is built for students seeking training in public policy, public administration, and data analytics. It is ideally suited for students looking to enter mid-career positions as policy/data analysts in both the public and private sectors.

**Joint Degrees at Kobe University, Japan:** Through a special partnership, students may combine their GSPIA degrees with one of several degrees offered by the Graduate School of International Cooperative Studies at Kobe University: the Master of International Affairs, Master of Laws, Master of Economics, or Master of Political Science. The Kobe GSICS curriculum is in English.
Pitt Student - 4+1 Accelerated Program

4+1 Accelerated Program for Pitt undergraduate students to complete their bachelor's degree while working on a master's degree at GSPIA. Once a student has completed 24 credits in GSPIA, they may apply and obtain their bachelor's degree. To be eligible, undergraduate University of Pittsburgh students must be enrolled in The Dietrich School of Arts and Sciences, be in good academic standing with a minimum overall GPA of 3.5, have a minimum of 96 credits, have completed all Skills and General Education requirements and have no "I" or "G" grades.

Applicants must submit GSPIA's online application. In essay #3 make reference that you are applying for the 4+1 Accelerated Program, meet with your Academic/Faculty Advisor to provide confirmation that you have completed all courses in your major(s), and that they satisfy the above eligibility requirements and may enter our masters program.

Special Academic Opportunities/Programs

GSPIA offers a variety of academic programs to complement the degree programs offered, including area studies, exchange programs, and research and travel grants.

Centers, Institutes and Initiatives

The Matthew B. Ridgway Center for International Security Studies - educates the next generation of security analysts and produces scholarship and impartial analysis that informs the options available to policymakers who must confront diverse challenges to international and human security on a global scale.

The Ford Institute for Human Security - conducts research that focuses on a series of transnational threats to the human rights of civilian populations and makes independent research and policy papers available to both domestic and international policymakers.

The Johnson Institute for Responsible Leadership - reaffirms GSPIA's commitment to creating ethical leaders and provides an institutional platform from which to launch an innovative program of teaching, research, and public service on issues of ethics and accountability in all areas of public life.

Center for Analytical Approaches to Social Innovation (CAASI) - translates a real-world problem from the community into a set of quantitative research questions and engages experts across disciplines to solve them.

Center for Governance and Markets - to understand the diverse institutions and governance arrangements that affect social order and human well-being in the United States and around the world. Generating knowledge of ways in which individuals and communities overcome challenges to living free, prosperous, and peaceful lives.

Frances Hesselbein Leadership Forum reflects the vision of a university-based center for teaching, applied research, and public service where leaders and aspiring leaders from around the world can gather to advance the art and science of leadership and put these principles to practice in public service.

The Gender Inequality Research lab (GIRL) - is an interdisciplinary research forum for scholars and practitioners collaborating on policy-relevant research on gender inequality.

Area Studies

The University of Pittsburgh is home to several internationally recognized area studies centers. Many of these centers have been designated National Resource Centers (NRCs) by the US Department of Education, certifying their status as leading centers of their kind in the United States. The NRCs sponsor numerous programs and offer Foreign Language and Area Studies (FLAS) Fellowships for which GSPIA students (U.S. citizens only) are eligible.

UCIS offers graduate certificates that GSPIA students can pursue concurrently with their degrees, allowing them to focus their studies on a particular region or theme. It is normally possible to complete the requirements for a GSPIA master's degree and a UCIS certificate in two years. For further information, click here, https://www.ucis.pitt.edu/main/graduate-students

GSPIA Programs Abroad
GSPIA has developed a number of international partnerships that offer students the possibility to study abroad for a regular academic term, during the summer, or-in a double degree program-for an entire year or more:

**International Development and Asian Affairs in Kobe, Japan**
This program enables students to earn a Certificate in International Development and Asian Affairs from GSICS at Kobe University while completing their masters degree from GSPIA.

**Public Administration and/or International Studies in Seoul, Korea**
The exchange program enables students to earn credits toward their GSPIA degree by taking courses in the Graduate School of Public Administration and/or the Graduate School of International Studies at Seoul National University. GSPIA and Seoul National University also offer a dual-degree program that will give students the option to earn both a Master of Public Administration from Seoul National University and one of GSPIA's four master's degrees.

**Public Policy and International Affairs in Paris, France**
This program enables students to earn credits toward their GSPIA degree by taking courses at the Institut d'Etudes Politiques de Paris (in French), or at its English-language wing, the Paris School of International Affairs.

**Government or Political Science in Bogota, Colombia**
This program enables students to earn credits toward their GSPIA degree by taking courses at the Department of Political Science at the University of the Andes, one of Latin America's leading institutions. Coursework is in Spanish.

**Public Management in Nanjing, China**
This program enables students to earn credits toward their GSPIA degree by taking courses at Nanjing University's School of Public Management. Coursework is in Chinese.

**International Relations, Madrid, Spain**
This program allows students to earn credits toward their GSPIA degree by taking courses at the School of International Relations, IE University. Coursework is in English.

Budget permitting, each year the Office of the Dean and the school's academic programs make available small grants to students. Uses for these grants can include attending professional development conferences, presenting papers, and supporting internships and study abroad activities. These grants are awarded through a highly competitive selection process.

### Faculty

Lisa S. Alfredson, Professor, PhD, London School of Economics

Ariel Armony, Professor, PhD, University of Pittsburgh

Luke Condra, Assistant Professor, PhD, Stanford University

Sabina E. Deitrick, Associate Professor, PhD, University of California, Berkeley

George W. Dougherty, Assistant Professor, PhD, University of Georgia

Nicola Foote, Professor, PhD, University College London

Melinda Haas, Assistant Professor, JD, PhD, University of Pennsylvania Law School, Princeton University

Gary Hollibaugh, Assistant Professor, PhD, University of Rochester

Muge Kokten Finkel, Assistant Professor, PhD, University of Virginia

Shanti Gamper-Rabindra, Associate Professor, Phd, Massachusetts Insitute of Technology

Marcela Gonzalez Rivas, Assistant Professor, PhD, University of North Carolina, Chapel Hill

Ryan Grauer, Assistant Professor, PhD, University of Pennsylvania

Daniel Jones, Assistant Professor, PhD, University of Pittsburgh
Michael Kenney, Associate Professor, PhD, University of Florida
Michael Lewin, Senior Lecturer, PhD, Johns Hopkins University
Huafang Li, Assistant Professor, PhD, Rutgers University
Siyao Li, Assistant Professor, PhD, University of Pennsylvania
Sera Linardi, Assistant Professor, PhD, California Institute of Technology
Jennifer B. Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison
Ilia Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison
Lisa Nelson, Associate Professor, PhD, University of Wisconsin, Madison
Erica Owen, Assistant Professor, PhD, University of Minnesota
Carissa Schively Slotterback, Dean and Professor, PhD, Florida State University
Taylor Seybolt, Associate Professor, PhD, Massachusetts Institute of Technology
Brooke Shannon, Assistant Professor, PhD, University of Texas at Austin
Nuno Themudo, Associate Professor, PhD, London School of Economics
Jeremy Weber, Assistant Professor, Phd, University of Wisconsin, Madison
Rashad Williams, Assistant Professor, PhD, University of Minnesota

Part-time and Visiting Faculty

Kathleen Buechel, Senior Lecturer, MA, Kennedy School of Government, Harvard University
Julie Santucci, Senior Lecturer, MA, University of Arizona

Program and Course Offerings

Certificate

Cybersecurity, Policy and Law Certificate

To be a leader in cybersecurity requires more than just technical knowledge - it also requires a deeper understanding of the of the cyber challenges surrounding law, policy, regulations, and ethics. We are offering a Graduate Certificate in Cybersecurity, Policy and Law from three schools within the University of Pittsburgh: the Graduate School of Public & International Affairs, School of Law and the School of Computing and Information.

Cybersecurity is a multidisciplinary field that involves technical issues, security policies, regulation and law. Our integrated curriculum provides students with the skills to develop comprehensive cybersecurity policies and strengthen cybersecurity environments to minimize risk.

As part of the certificate's multidisciplinary approach, the certificate requires courses to be taken from all three Pitt schools. Students must complete a minimum of three courses from the School of Computing and Information, one course from the Graduate School of Public and International Affairs, and one course from the School of Law to earn the certificate.

Applicants must have a Bachelor's degree. All students are expected to complete the program within one to two years.

Students enrolled in a Graduate School of Public & International (GSPIA) degree program may count no more than six (6) of of the certificate credits (two courses) toward their degrees.
Students will need to contact the School of Law or School of Computing & Information to obtain permission to take courses from those schools.

The Certificate curriculum, comprising of 15 credits, follows:

Program Requirements

Courses

School of Computing and Information courses

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- TELCOM 2821 - NETWORK SECURITY
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- TELCOM 2811 - INNOVATING FOR PUBLIC IMPACT
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY
- CS 2530 - COMPUTER AND NETWORK SECURITY
- CS 3525 - ADVANCED TOPICS IN SECURITY AND PRIVACY

Graduate School of Public and International Affairs courses

- PIA 2156 - LAW, POLICY & THE INTERNET
- PIA 2379 - INTRODUCTION TO CYBER CRIMES
- PIA 2360 - CYBER SECURITY POLICY
- PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE
- PIA 2365 - TRANSNATIONAL SECURITY & ILlicit FINANCE
- PIA 2041 - POLICY ANALYSIS FOR CYBERSECURITY AND INTELLIGENCE STUDIES

School of Law courses

- LAW 5623 - CYBER POLICY, CRIME & NATIONAL SECURITY
- LAW 5380 - CYBERCRIME
- LAW 5404 - CYBERSPACE AND THE LAW
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5877 - PUBLIC POLICY SEMINAR

Doctoral

Public and International Affairs, PhD

Whether you want to teach, conduct research, or work in a policy environment, our Ph.D. program will equip you with the skills, tools, and knowledge to succeed in highly competitive environments such as leading universities, government agencies, and nonprofit and nongovernmental organizations around the world.
To apply to the PhD program, you must have a bachelor's degree. Before undertaking doctoral study, it's beneficial, but not mandatory, to have a master's degree in public and international affairs or in one of the social sciences. If you have earned a master's degree, you may be able to transfer 30 credits.

- We've designed our doctoral studies program to ensure a high-quality education that also expedites your time to degree. To do so, we've implemented the following procedures:
- We limit the number of students we admit to ensure that virtually all admitted students will receive at least four years of financial support, contingent on their academic performance.
- We review student progress annually, offering constructive feedback to students about their progress and providing an appropriate strategy for completing the program.
- We streamline and clarify the comprehensive exam format to expedite the completion of this requirement, so that students can move on to preparing their dissertation proposals.
- We develop strong partnerships with other academic units in the University of Pittsburgh to collaborate in offering a wider range of doctoral courses.

Requirements

Students must earn 73 credits to graduate, including advanced standing (transfer) credits, 19 credits from required core course, 18 credits from elective course, and 6 dissertation credits (PIA 3099). Full-time students are expected to complete the required core and elective courses with in the first two years of study (see also "Expected Degree Progress for Full-time Students" below). Failure to do so may be grounds for dismissal. Comprehensive examinations may only be taken after all courses are completed with a grade of "B" or better.

The required courses are:

Doctoral Core Courses: 19 credits

- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERERENCE FOR POLICY ANALYSIS
- PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS
- PIA 3026 - PHD PROFESSIONAL DEVELOPMENT WORKSHOP (1 credit)
- PIA 3050 - PHD RESEARCH DESIGN, PROCESS, & PRESENTATION WORKSHOP
- PIA 3097 - INDEPENDENT STUDY PHD (Full-time students are required to register for three credits of Independent Study (PIA 3097) to prepare for their Comprehensive Exam in the Fall Semester of their Second Year in the program. Part-time students must do so two terms before they intend to take their comprehensive exam)
- PIA 3121 - POLICY THEORY

Electives: 48 credits (including transfer credits)

Note that students can transfer up to 30 credits from a relevant master's program (and up to 36 for a graduate from GSPIA).

Must include PIA 2023 Intermediate Quantitative Methods (pre-requisite for PIA 2032) if the student does not have similar coursework from a prior degree.

Students will use electives to fill remaining credits.

PIA 3099 Dissertation: 6 credits

Students must be admitted to candidacy and must be writing their dissertation to be eligible to register for PIA 3099 Disseration. Six (6) credits of PIA 3099 Disseration are required to graduate.
Minimum Required Credits: 73 credits

Students must complete 67 credits of course work, excluding the 6 dissertation credits, with a minimum GPA of 3.0. Students must meet this requirement in order to qualify for final approval of their comprehensive examinations. Students are required to maintain full-time status while completing the 67 credits of coursework.

Additional Information

Additional Information

Students may register for additional individualized course work or guided research under the direct supervision of a GSPIA faculty member if the following conditions are met: all required course work in the School-wide core has been completed or will be completed in the term PIA 3097 will begin; the student must be in good academic standing and making normal progress toward the degree; and a summary study or research design must be submitted in writing by the students and signed by the faculty member supervisor and Doctoral Program Director.

Doctoral Practicum

As part of their coursework, students are encouraged to use the experience of a Doctoral Practicum course to better prepare themselves for subsequent career practice. This optional course, PIA 3098, can carry from one to three credits and can be taken only with the written agreement of a faculty member to supervise the practical training involved. The approval form for this course can be obtained through Student Services (the form is entitled "Doctoral Practicum"). Appropriate activities for a Doctoral Practicum include, but are not limited to, conducting basic and applied research and public policy analysis in the public, non-profit, or private sectors, teaching in higher educational institutions, and public policy development and management.

FTDK (Full-time Dissertation Study)

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for full-time dissertation study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, student health service, and activity fees. Students must consult with the Office of Student Services for permission to register for full-time dissertation study.

Doctoral Milestones

The first two years of the PhD program are structured by coursework and preparation for comprehensive examinations. Students are strongly encouraged to explore dissertation possibilities early in the program. To earn a PhD, students must pass the following milestones.

Plan of Study Meeting

Every student is assigned a first-year advisor at program entry. The student should consult with the first-year advisor to identify coursework for the first semester. Prior to the end of the student's first year the student should meet with their first-year advisor regarding the plan of study. This meeting's aim is to structure a program that best serves the student's interests and ensure that the degree requirements are met in a timely and stipulated manner.

Annual Progress Evaluation: First and Second Years

The annual evaluation serves the filling purposes:

- To monitor the student's progress in the program
- To identify any necessary adjustments to the student's original plan of study
In exceptional circumstances, to signal that a student's performance points to a reconsideration of their doctoral status. In their first two years in the doctoral program, students must meet with their faculty advisor as part of their annual progress evaluation. The relevant advisor for these meetings is the first-year advisor until the student has identified a dissertation advisor, at which point that individual becomes the relevant advisor. During these meetings, the faculty advisor should revisit the plan of study to assess student progress and, if necessary, suggest corrective actions and/or adjust the plan. The student is responsible for scheduling this meeting near the end of the Spring term and should be fully aware that many professors may be unavailable after the end of the term. Failure to schedule this meeting in a timely manner may lead to the evaluation being undertaken without student participation.

Aside from the evaluation undertaken with the faculty advisor, the Doctoral Program Director may also solicit comments from faculty with whom the student has taken coursework during the year, especially in relation to courses in which the student did not perform adequately (i.e. received a G, I or lower than B grade). Unsatisfactory progress may lead to students being put on probation, suspension of financial aid and/or dismissal from the program.

### Annual Dissertation Progress Evaluation: Third and Fourth Years

At the end of the third and later years, the student must undergo an annual evaluation of their progress toward the dissertation. The dissertation advisor is the relevant advisor for these meetings. The student is responsible for scheduling this meeting and should be fully aware that many professors may be unavailable during the summer. Failure to schedule this meeting in a timely manner may lead to the evaluation being undertaken without student participation. As stated in the Regulations Governing Graduate Study at the University of Pittsburgh, "meetings of the doctoral candidate and their dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the committee should assess the student's progress toward the degree and discuss objectives for the following year an a timetable for completing degree requirements."

The student's dissertation committee will undertake the evaluation. Students' full dissertation committees must sign off on normal progress for each academic year following defense of the proposal. This will normally occur for the first time at the end of the third academic year. If the committee decides that insufficient progress has been made, one semester will be permitted for correction prior to removal from the program.

The annual review should be scheduled at least once every academic year.

Unsatisfactory progress may lead to students being put on probation, suspension of financial aid and/or dismissal from the program.

### Comprehensive Examination

The comprehensive examination is designed to assess the student's mastery of their intended field of research. The examination is based on a reading list jointly written by the student and two faculty advisors in the end of the first year of doctoral study (more detail below). Unless an exception is granted by the Doctoral Program Director, comprehensive examinations are taken in May following a student's fourth semester, after the student completes all required courses and earns at least 67 credits (including advanced student credits). In addition, all incomplete grades must be removed by meeting the requirements to complete the courses: even if the course is viewed by the student as not being relevant to their degree program.

The process for the comprehensive examination is as follows:

One month prior to the last day of the Spring semester of the student's first year, the student identifies two faculty members to serve as advisors (a "chair" and a "reader") for the exam and second year research paper. Ideally, the student would seek out individuals who would go on to serve as members of the dissertation committee in following years, but there is no commitment to do so at this stage on either end. The chair must be a GSPIA faculty member. The reader should also be a a GSPIA faculty member but may be external to GSPIA with permission from the PhD Program Director.

After identifying advisors, the student and advisors discuss the student's initial dissertation research interests and plans and would collaboratively form a reading list around those interests. This process should be complete by the last day of the Spring semester of the student's first year. The reading list will form the basis of material that may be covered on the comprehensive exam at the end of the year. The reading list must contain readings in three categories:

1. Core readings in the student's field (where "field" is defined on an individual basis), even it not directly related to the student's specific research plans, to ensure that the student is well-read in the field that the student will be working in
2. Topical readings specific to the student's research interests
3. Methodological read ins specific to the student's research plans
All readings should be aimed towards providing knowledge and expertise necessary to execute the planned dissertation research. This does not presume that the student has solidified specific research questions(s) for their dissertation at the time that the list is being formed; indeed, part of the aim of this process should be to help the student identify where there are gaps in the literature which will then help them pose or refine their research questions.

Individualized reading lists will be reviewed by the PhD director (with assistance from members of the PhD committee in relevant fields as necessary) to ensure sufficient coverage of each of the three categories described above. No changes may be made to the reading list within six months of the comprehensive examination date.

Students will register for an independent study in the first semester of the second year, supervised by the comprehensive exam chair, to facilitate absorbing material on the reading list.

The chair and reader will then write an exam based around the reading list with six questions, asking the student to respond to three. However, we will require that the questions cover the three broad categories noted above. That is, the student must respond to one question on "core readings", one on topic-specific readings, and one on methodology.

Each exam will be 60-hour take-home exam. Answers are limited to 3,000 words per question (not including references or footnotes). During the 60-hour period, students cannot communicate with others about the exam questions.

Students will take the exam in May and will receive either a "high pass", "pass", or "fail". If a student fails, they must retake the exam prior to the start of the following Fall semester. A second failure will result in dismissal from the program.

Second Year Paper

In addition to an exam, students will complete a second-year research paper. A second-year paper will require students to complete a research project which could (though it not required to) become a chapter of their dissertation and/or could be submitted to a peer-reviewed journal for publication. The student will pose an original research question, review relevant literature, outline the methods used to answer their question, employ those methods, report their results, and provide a conclusion.

The timeline for the paper is as follows: students will submit a short proposal for their planned paper to their chair and reader no later than the last day of the Spring semester of the second year; students can and could be encouraged to complete the proposal sooner. Approval of the proposal by chair and reader will be submitted to the PhD director. Students must then submit a complete paper by the first day of the following Fall semester of the third year. Student should present their research in a venue with their chair, reader, and the PhD program director present by the end of October of their third year. The presentation should incorporate feedback provided by reader and chair following submission of the draft. The paper (and presentation) will then be evaluated as "high pass", "pass", or "fail". As with comprehensive exam, a "fail" can result in dismissal from the program.

Establishing the Dissertation Committee

During the fifth semester (typically the fall of the third year of studies), and before admission to candidacy for the PhD degree, the academic advisor proposes, for the approval of the director of the school's doctoral program and the dean, a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the dissertation committee. The majority of the committee, including the advisor, must be full or adjunct members of the Graduate Faculty. This committee must review and approved the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated three times a year. Only a GSPIA faculty member is eligible to serve as the chair of the committee.

This dissertation committee has the responsibility to advise the student on their research and has the authority to require high-quality research and/or the rewriting of any portion or the entire dissertation. It conducts the final oral examination and determines whether the dissertation meets accepted standards. The student must meet with their dissertation committee at least once a year (see Annual Dissertation Progress Evaluation above). The membership of the dissertation committee may be changed whenever it is appropriate or necessary, subject to the approve of the Doctoral Program Director and the Dean.

When a dissertation committee member leaves the University, the member must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed from within the department, and the restructured committee requires the approval of the dean and either the department chair or the director of the school's doctoral program. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.
Retired faculty members may remain as members or chairs of committee if they are spending considerable time in Pittsburgh or the vicinity and are still professionally active. Retired faculty who meets these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the dean and either the department chair or the school's director of doctoral programs.

The completed and signed Dissertation Committee Approval Form and/or the Change in Dissertation Committee Form should be submitted to the Academic Advising office for posting and filing.

All coordination between Dissertation Committee members is the responsibility of the student.

**Dissertation Proposal**

Immediately after passing the comprehensive examinations, and establishing the dissertation committee, the students should meet with the chair to discuss the development of a dissertation proposal, which outlines the goals and objectives, theoretical argument, policy implications, literature, research design, and timetable for the dissertation research. Students must defend their dissertation proposal by the end of the term after they take comprehensive exams, which will normally correspond to the end of Fall semester of the third year of studies. Students who do not defend their proposal by the end of the semester after their comprehensive exams will be placed on probation; students who do not defend their proposal by the end of the following semester (the probationary semester) are removed from the program.

The student will submit the Announcement of Dissertation Proposal Meeting Form to the Academic Advising office or the Doctoral Program Director ten days prior to the proposal meeting. The announcement will be sent to the faculty and graduate student email lists. Proposal defense meetings are open to all faculty and students.

There must be a minimum of three members present for the meeting to be convened, and the absent member is required to submit a written evaluation of the proposal to the Committee Chair. Under no circumstances can the meeting be held without the Chair. If the Committee accepts the proposal, all Committee members will sign the Approval of Dissertation Proposal Form. The completed and signed form is then submitted along with a copy of the approved proposal to the PhD.D. Program Director, who has final approval. According to University guidelines, only after the proposal has been accepted as final by the Doctoral Program Director does the student advance to candidacy. The signed and completed form is to be returned to Academic Advising office for posting and filing.

**Dissertation**

The Dissertation Committee must meet a minimum of once a year; however, students are strongly encouraged to schedule more frequent committee meetings.

An appropriate dissertation should be a substantive piece of original and independent research grounded in an appropriate body of literature. The characteristics which a dissertation should demonstrate are:

- the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution,
- a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base,
- a well-defined research design,
- clarity in composition and careful documentation,
- results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph,
- sufficient detail so that other scholars can build on it in subsequent work, and
- the preparation of the author to assume a position within the profession.

**Oral Defense of the Dissertation**

At the oral defense, the student will be asked to explain and justify dissertation research and to assess its relation and contribution to the literature and policy in the field. The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the University Times. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the dissertation committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the dissertation committee, must be sent to the Office of Student Services for posting and filing. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the dissertation committee should ensure that the dissertation is in final form, i.e., all required changes have been made, before requesting signatures of the members of the committee.
Electronic Thesis and Dissertation (ETD)

After approval of the dissertation, all candidates are required to publish the document electronically via d-scholarship. For access to more information on ETD and training, go to www.pitt.edu/~graduate/etd/training.html.

General Academic Regulations in GSPIA

Applying for Advanced Standing (Transfer Credits)

At the Plan of Study Meeting students who have completed a master's degree from an accredited institution prior to admission to GSPIA must submit official transcripts certifying graduate courses completed. They can then be evaluated for acceptability as advanced standing, provided grades of B (or its equivalent) or better have been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. All accepted course credits will be entered as block credits on the student's transcript. Grades and GPAs are not recorded for transfer credits.

The required 72 credits of coursework may include credits obtained through meeting Advanced Standing requirements. In no cases, however, will accepted credits be used to waive required core courses. For students with master's degrees, a maximum of 30 credits for coursework may be applied to the PhD.D. degree. For those students who have a master's degree from GSPIA, a maximum of 36 credits for coursework may be applied.

In recognition of relevant doctoral study completed at a school other than GSPIA, a maximum of 12 additional credits may be applied to the minimum credit requirement. In no case, however, can the total of all credits accepted through advanced standing exceed 36 credits (master's degree and relevant doctoral degree credits together, regardless of where the credits were obtained). Course Credit Acceptance forms are available through the Academic Advising office. When completed and signed, this form and supporting documentation must be submitted to the Academic Advising office for further evaluation, approval, posting and filing.

Acceptance of Transfer Credit

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University; however, graduate students already enrolled may, when approved in advance by the Doctoral Program Director, spend a term or more at another graduate institution to obtain training or experience not available at the University, and transfer those credits toward the requirements for a GSPIA degree. In such instances, neither the University nor GSPIA is responsible for any financial assistance to the graduate student.

Credit acceptance will not be granted for courses in which a grade lower than a B (GPA=3.0) or its equivalent has been received. No credits will be granted toward a GSPIA degree for work completed in extension courses, correspondence courses, courses delivered electronically, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has an accredited program.

Course Work Acceptable as Graduate Credit

Courses at the University of Pittsburgh numbered 2000-2999 and 3000-3999 are acceptable graduate courses. No undergraduate language courses, courses numbered below 2000, or language acquisition courses may be applied toward GSPIA degree requirements.

Substituting Non-GSPIA Courses for Degree Requirements

Required courses for the individual degree programs are considered by the School as essential to the study of public and international affairs. Accordingly, students are required to take these courses in GSPIA. In exceptional cases, and on a case-by-case basis, students may be permitted to substitute comparable courses offered in other Schools and departments, provided they obtain prior approval from the Doctoral Program Director and the faculty advisors for either or both the fields of specialization.

Statute of Limitations

The purpose of the statute of limitation is to ensure that a graduate degree from GSPIA represents mastery of current knowledge in the student's field of study.

Requirements for the doctoral degrees must be completed within a period of eight consecutive calendar years from the students' initial registration for doctoral study.
Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the program director and submitted to the assistant dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Leaves of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance and approved by the dean or his/her designee. Only students in good academic standing will be approved for a leave of absence. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the students. Readmission following an approved leave of absence is a formality.

Students who take an unapproved leave of absence may, at the discretion of the dean and the program director, be readmitted to the School, but must finish their degree requirements within the time by their original matriculation.

Parental accommodation. Consistent with the University's efforts to be inclusive and to support academic personal life balance, the University believes it is important to provide accommodations for graduate and professional students who become new parents, whether by childbirth or adoption, so that they may contribute to their family responsibilities while continuing to make progress towards their degree. This practice will help develop students who can successfully integrate their academic and personal pursuits. In recognition of the challenges of balancing the demands of graduate study and parenting a new child, these guidelines aim to improve the academic environment for student parents. The Graduate and Professional Student Parental Accommodation Guidelines assist graduate students immediately following the birth or placement for adoption of a child. The purpose of these guidelines is to make it possible for a student to maintain registered full-time student status, along with all the benefits of such status, while facilitating the return to full participation in courses, research and teaching.

Eligibility: The Parental Accommodation Guidelines apply only to full- and part-time students enrolled in graduate and professional programs who are in good academic standing and who are making satisfactory progress toward completion of a graduate degree. Students must have completed at least one full-time semester of their degree program to become eligible for coverage under these guidelines. The guidelines cover the situation of students who experience a childbirth, who adopt a child who is unable to be enrolled in full-day public school due to age or other developmental reasons, or who is a partner of someone who has experienced a childbirth or an adoption for whom the student has parental responsibilities. These eligibility requirements cover all provisions of the guidelines.

Graduation

Certification Requirements for Graduation

GSPIA doctoral program requires the satisfactory completion of:

- Minimum of 67 credits of coursework (includes transfer credits)
- Dissertation credits (PIA 3099) - 6 credits

Successful completion of the following milestones:

- Plan of Study Meeting
- Annual Progress Evaluations
- Comprehensive Examinations
- Approval of Dissertation Committee
- Dissertation Proposal
- Dissertation Defense
- Electronic Dissertation Submission

Moreover, all candidates for graduation must be in good academic standing and registered in the term in which they wish to graduate.

Application for Graduation

Students must submit an application for graduation early in the term in which graduation is expected. As noted above, students should be registered in the term in which they are to graduate; in exceptional circumstances, students who complete all the degree requirements at the end of a term but graduate in the next term may petition the Academic Advising office for a waiver of this registration requirement.
Public Administration Program

Master of Public Administration (MPA)

Public administration is a field practiced at the intersection of the government, nonprofit, and private sectors. GSPIA's MPA program trains managers to balance the needs of each community with its resources, promoting neighborhood development, effective local government, ethical leadership, and responsible business practices. Students gain an incredibly diverse and flexible set of professional skills that will prepare you for leadership in nonprofit agencies, government offices, and private businesses worldwide.

Students will development professiona skills in neighborhood development, data interpretation, advocacy for effective local government, ethical leadership, responsible business practices and critical thinking and problem solving.

Degree Requirements

All MPA students are required to complete the GSPIA core & MPA Degree Core courses along with the required Concentration courses and Electives.

Degree Core required courses (12 credits):

- PIA 2022 Quantitative Methods
- PIA 2025 Microeconomics
- PIA 2028 Public Policy Analysis
- PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at GSPIA. The internship must be approved by teh student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

MPA Degree Core required courses (9 credits):

- PIA 2020 Administration of Public Affairs
- PIA 2117 Program Evaluation
- PIA 2104 Financial Management

MPA Concentrations (12 credits):

Applicants will select from one of the following concentrations. Please click on this link for concentration details, Public Administration, MPA

- Energy & Environment
- Governance & International Public Management
- Policy Research & Analysis
- Public & Nonprofit Management
Free Electives/Minor Courses (15 credits)

Total MPA degree credits = 48

Minor

MPA students may also pursue a minor. Please click on the following link: GSPIA Minors

Joint Degree Options

MPA students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MPA/law degree (JD), MPA/Master of Public Health (MPH), MPA/Master of Science in Information Science (MSIS), and MPA/Master of Social Work (MSW). They may also pursue a joint master's degree through the Graduate School of International Cooperative Studies at Kobe University in Japan. An accelerated, five-year bachelor's/master's degree program is available to select University of Pittsburgh undergraduates.

Master of Public Administration/JD

Master of Public Administration/MPH

Master of Public Administration/MSW

Master of Public Administration/MIS

Quantitative Economics/Public Administration, MS/MPA

Accreditation

GSPIA's Master of Public Administration degree is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA). NASPAA accreditation recognizes that a master's program in public affairs has gone through a rigorous process of voluntary peer review conducted by the Commission on Peer Review and Accreditation (COPRA), and has met NASPAA's Standards for Professional Master's Degree Programs in Public Affairs, Policy, and Administration.

Master's

Public Administration, MPA

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

Required Courses: 21 credits
Along with the 48 credits of Required MPA courses, all students must complete a 300-hour internship with approval from GSPIA career services.

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2022 - QUANTITATIVE METHODS
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2096 - CAPSTONE SEMINAR:
- PIA 2099 - THESIS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PROGRAM EVALUATION

Energy and Environment Concentration: 12 credits

Energy & Environment explores the politics and policies of the worldwide energy industry, examining ways to meet global energy needs in a sustainable, environmentally conscious way. Pittsburgh is a global epicenter of one of the biggest energy revolutions of the 21st century - the shale gas boom. New technologies like "fracking" are making billions of dollars of natural gas accessible to world markets for the first time, generating thousands of new jobs from Europe to North America. Western Pennsylvania sits atop one of the largest and most productive shale deposits anywhere on the planet, raising major questions about how to extract the gas responsibly, how to protect communities from environmental harm, and how to tax and regulate the rapid growth. GSPIA Students study the economics of the global energy industry, environmental sustainability, and regulatory policy in one of the world's best living laboratories. Graduates are prepared for jobs at environmental protection agencies, energy corporations, and a host of local, state, and national government offices that make energy policy.

Take three of the following five courses:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
  Plus:
  PIA 2xxx Approved E&E concentration course

Governance and International Public Management Concentration (12 credits)

***On August 8, 2023 the following Governance and International Public Management course information was updated in the published catalog. In an effort to provide accurate information the update was made on August 8, 2023.***

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Take one of the following five courses:

- PIA 2310 - MARKETS AND STATES
- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT
  Plus:
  PIA 2xxx Approved GIPM Concentration Course
  PIA 2xxx Approved GIPM Concentration Course
Public & Nonprofit Management Concentration (12 credits)

Public service is a discipline practiced at many levels: local, national and international often with ripple effects across each. Through grassroots contributions and global applications, GSPIA students pursuing a public & nonprofit management major acquire a deep understanding of the many contexts in which public and nonprofit organizations operate. Many look forward to the opportunity to leverage change in a mixed economy.

Our curriculum stresses responsible leadership and our students develop the skills to diagnose leadership challenges and opportunities from a variety of ethical and moral frameworks. Our interdisciplinary approach draws from a variety of fields such as philosophy, law, organizational design and political science. Our approach gives students the skills they need to meet the challenges of a world in which services increasingly span boundaries among business, government and nonprofit organizations.

- PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR
- PIA 2185 - STRATEGIC MANAGEMENT
  
  Plus:
  PIA 2xxx  Approved PNM Concentration Course
  PIA 2xxx  Approved PNM Concentration Course

Policy Research and Analysis Concentration (12 credits)

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

- PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS
  
  Plus:
  PIA 2xxx  Approved PRA Concentration Course
  PIA 2xxx  Approved PRA Concentration Course
  PIA 2xxx  Approved PRA Concentration Course

Social Policy Concentration (12 credits)

Gain the quantitative, political, administrative and legal skills to analyze social needs and policy impact on human lives worldwide. You'll learn to monitor, evaluate, and communicate data to convey the consequences of policy development and implementation.

- PIA 2210 - RACE, GENDER, LAW AND POLICY
- PIA 2216 - ECONOMICS OF SOCIAL POLICY
  
  Plus:
  PIA 2xxx  Approved SP Concentration Course
  PIA 2xxx  Approved SP Concentration Course

Urban Affairs and Planning Concentration (12 credits)

The major in Urban Affairs and Planning takes a city-focused perspective on urban development. More than half of the world's people now live in urban areas, raising important questions about how governments should meet the public's needs for transportation, health and sanitation, education, and other essential services.

As the developing world urbanizes, and the developed world undergoes redevelopment, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face critical challenges, including poverty, homelessness, and pollution, while other cities in developed countries, like Newcastle and
Pittsburgh, face similar challenges of their own. The concentration prepares students to confront those problems while developing valuable skills in Geographic Information Systems (GIS), regional economic planning, sustainable development management, and social justice in the context of urban development.

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2715 - GIS FOR PUBLIC POLICY
  Students must take one of the following three courses:
- PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES
- PIA 2223 - CITY OF WHITE SUPREMACY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
  Plus:
  One additional elective

Elective/Minor Courses: 15 credits

48 Credits

MPA Joint Degrees

Students pursing an MPA have the option to do a Joint Degree:

MPA/JD
MPA/MIS
MPA/MPH
MPA/MSW

Quantitative Economics/Public Administration, MS/MPA

Public and International Affairs Program

Master of Public and International Affairs (MPIA)

From the halls of the United Nations to the streets of war-torn conflict zones, the modern international system is in a state of rapid flux that demands versatile, well-educated professionals. The MPIA degree is a multidisciplinary program designed to prepare students for careers of influence in the international arena - as government policymakers, diplomats, intelligence officials, global business leaders, nonprofit managers, and policy researchers. The program emphasizes practical skills and knowledge necessary to participate in the world policy process and shape its future.

The MPIA curriculum includes traditional courses on world history, economics, and international relations theory, along with practical courses on intelligence collection and analysis, diplomacy, and international finance. It also includes one of the country's only graduate specializations in Human Security - a unique field that focuses on the security of civilian populations and human rights. Students will gain professional skills in human security and rights, intelligence collection and analysis, international relations, diplomacy and international trade and finance.

Degree Requirements

All MPIA students are required to complete the GSPIA core & MPIA Degree Core courses along with the required Concentration courses and Electives.
Degree Core required courses (12 credits):

PIA 2022 Quantitative Methods

PIA 2025 Microeconomics

PIA 2028 Public Policy Analysis

PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at GSPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

MPIA Degree Core required courses (6 credits):

PIA 2023 International Affairs

*Based on Concentration, students must take one of the following:*

PIA 2303 Security & Intelligence Studies or

PIA 2307 Human Security or

PIA 2301 International Political Economy

Students will take one of the following courses based on their concentration:

- PIA 2307 - HUMAN SECURITY
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES
- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY

Human Security Concentration: 12 credits

Because the globalization process has made the world seem exponentially smaller, threats from tsunamis, earthquakes, disease and starvation are arriving faster and in more dramatic fashion than ever before. One of the most innovative, forward-thinking disciplines in international affairs today, the human security major covers a wide swath of issues critical to the safety of people worldwide.

GSPIA's program, one of the first of its kind in the United States, emphasizes the development of peacekeeping and peace-building skills. Students study threats to individuals from nongovernmental, nonmilitary sources. Examples of threats include civil wars, international migration and crime, global climate changes and natural disasters. We teach students to focus on the human condition as a planet, resulting in a new generation of leaders able to guide our global community through some of the most perilous times is has ever experienced.
International Political Economy Concentration: 12 credits

From the Euro to the yen, today's global economy operates in a climate of change. The international global political economy (IPE) major teaches students to understand globalization and the role the state plays, as well as market strategies for corporations and their corporate identities. Courses target competencies in finance, economics, international trade and development. Specific topics range from the work of nongovernmental organizations (NGOs) to political climates in post-Communist states and the role of women in developing countries.

GSPIA IPE students are idealistic, curious about the world and eager to put their vision into practice. Recent IPE graduates include a treasury expert with the Republic of Turkey, a project manager specialist for the U.S. Agency for International Development's Mission in Moscow, a presidential management fellow with the U.S. Department of Commerce, and a United Nations Fulbright Fellow with the Department of Social and Economic Affairs.

Security and Intelligence Studies Concentration: 12 credits

The post-9/11 world has brought remarkable change to national and international security. Issues of strategy, weapons systems, national defense and the role of government are being redefined every day. GSPIA's major in security & intelligence studies (SIS) approaches issues within an international context and covers a variety of topics including transnational organized crime, terrorism, weapons of mass destruction and competition for natural resources.

SIS students are interested in the use of technology, investigation and discovery and often have a desire to travel internationally. Our program prepares students for careers in the security or intelligence fields with various think tanks or intelligence agencies, such as the FBI or CIA.

48 Credits

MPIA/MBA
MPIA/MIS
MPIA/MPH
MPIA/MSW

**International Development Program**

**Master of International Development (MID)**

GSPIA's Master in International Development (MID)-one of the oldest programs of its kind in the country—is dedicated to achieving social, economic, and political progress in countries worldwide, through means that fundamentally promote human dignity, well-being, empowerment, and rights. Distinguished by a multidisciplinary and comprehensive approach, our degree program combines cutting-edge knowledge and an essential balance of theory and practice.

We offer a flexible curriculum including six major concentration options and numerous minor concentrations, valuable capstone and internship experiences, and joint degree and regional certificate options. Students gain essential development skills and insights, with emphasis on application to vulnerable and discriminated groups and to critical world problems such as impoverishment, climate change, ill health and disease, gender inequality, racial and ethnic discrimination, education gaps, migration, and urbanization.

Our program enables students to follow their passions and to develop effective and collaborative responses to critical issues and the UN Sustainable Development Goals. Graduates go on to pursue valuable careers and participate in meaningful processes of social change in diverse local contexts and at global levels.

**Degree Requirements**

All MID students are required to complete the GSPIA core & MID Degree Core courses along with the required Concentration courses and Electives.

**Degree Core required courses (12 credits):**

- PIA 2022 Quantitative Methods
- PIA 2025 Microeconomics
- PIA 2028 Public Policy Analysis
- PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at GSPIA. The internship must be approved by teh student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

**MID Degree Core required courses (6 credits):**

- PIA 2501 Development Policy & Administration
- PIA 2510 Economics of Development

Total MID degree credits = 48

Minor

MID students may also pursue a minor. Please click on the following link: GSPIA Minors

Joint Degree Options

MID students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MID/law degree (JD), MID/Master of Public Health (MPH), MID/Master of Science in Information Science (MSIS), MID/Master of Social Work (MSW) and MID/Master of Business Administration (MBA).

Master of International Development/JD
Master of International Development/MPH
Master of International Development/MIS
Master of International Development/MSW
Master of International Development/MBA

Master's

International Development, MID

MID students promote respect for human life and human rights, often working behind the scenes to bring real improvements to the human condition through hands-on careers in public service. They work face-to-face with underprivileged and vulnerable populations, in the front offices of aid agencies, and in international organizations dedicated to protecting those who need help most.

The 48-credit MID degree is designed to prepare students to make a difference locally, nationally, and globally by emphasizing intellectual rigor and practical skills. Students study development theoretically, but also learn concrete technical and managerial skills necessary to work in organizations that promote equality in the developing world. Graduates exit the program prepared for professional work in the United Nations, public aid agencies, and charities of all sizes. Often, they pursue work in the private sector, research groups, and prominent non-governmental organizations.
Required Courses: 18 credits

Along with the Required MID courses, all students must complete a 300-hour internship with approval from GSPIA career services.

- PIA 2022 - QUANTITATIVE METHODS
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2096 - CAPSTONE SEMINAR:
- PIA 2099 - THESIS
- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT

Energy & Environment Concentration: 12 credits

This concentration explores the politics and policies of environmental sustainability and environmental protection, climate change and climate emergencies, natural resource governance and the worldwide energy industry, and ways to meet global energy needs in an ethical and sustainable way. International Development students are equipped to confront the global climate emergency that threatens human survival, especially in the poorest countries. Students study efforts to achieve a just and equitable transition to renewable energy, thereby cutting global greenhouse gas emissions, while securing affordable and resilient energy systems and investing in economic diversification of traditional fossil fuel reliant regions. Students learn about international, national, state and local policy strategies to govern and protect the environment. Successes such as the Montreal Protocol for the protection of the ozone layer inform current efforts to address climate change, biodiversity loss, and transboundary air, water and waste issues.

Take two of the following five course options:
- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL

- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Plus:
Human Security Concentration: 12 credits

Human security threats are wide-ranging, manifesting in critical problems of deprivation, indignity, and fear that are also deeply interconnected. Human Security students learn to develop forward-thinking solutions to such problems by using analytical tools that are people-centered, and that tackle linkages between threats through comprehensive interdisciplinary analysis and innovative multi-sectoral collaboration across the fields of development, human rights, and security. By focusing on people as the central unit of analysis, human security approaches mark a shift away from traditional state-centered threats and responses, instead emphasizing peoples' lived experiences, as well as participatory or "bottom-up" solutions that foster resilience and sustainability. Students benefit from GSPIA's multidisciplinary faculty and its highly regarded Ford Institute for Human Security, one of the oldest human security programs in the country.

The flexible design of this concentration enables International Development students to use GSPIA's comprehensive course offerings in order to study how development intersects with other issues, for example: the empowering tools offered by human rights for achieving Sustainable Development Goals such as education, poverty, hunger, and inequality; the importance of environmental sustainability goals for development work to prevent root causes of human displacement and ill-health; the role of development in fostering peace, reducing interpersonal violence such as human trafficking and gender-based violence, as well as political violence and armed conflict; and the value of intersectional and gender analysis across human security threats.

  PIA 2xxx  Approved HS Concentration Course
  PIA 2xxx  Approved HS Concentration Course

Nongovernmental Organizations & Civil Society Concentration: 12 credits

The explosive growth of non-governmental organizations (NGOs) worldwide has fostered demand for deeply committed staff with solid development policy and organizational management skills. This concentration focuses on how NGOs and civil society drive social change and enable participation and empowerment, especially among vulnerable and excluded groups. It gives students the skills they need for careers in NGOs and social-change organizations including foundations, social movement coalitions, community organizations, non-profit associations, and social enterprises. Key topics of study include NGO management, program design and evaluation, advocacy, community participation and social movements, rights-based approaches, project and financial management, fundraising and grant writing, and policy analysis. Students apply such learning to wide-ranging policy issues at the heart of NGO work, for example food security, health policy, poverty and inequality, environmental sustainability, migration and refugees, human rights, and other UN SDGs. NGOCS students learn to apply essential organizational and management skills to address these and other important policy issues in diverse contexts around the world. Students also develop valuable direct experience through NGO internships, benefiting from the GSPIA-to-DC pathway for internships with national and international organizations in the nation's capital and the option to study at GSPIA's DC Center, GSPIA's dedicated support for a wide range of international NGO internships and study abroad experiences, and local opportunities within our own vibrant nonprofit community.

Take one of the following four courses:

- PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE
- PIA 2508 - NGO ADVOCACY & INTERNATIONAL COALITIONS
- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

  Plus:
  PIA 2xxx  Approved NGOCS Concentration Course
  PIA 2xxx  Approved NGOCS Concentration Course
  PIA 2xxx  Approved NGOCS Concentration Course

Social Policy Concentration: 12 credits
The concentration in Social Policy appeals to students who are committed to the study of social issues of public importance, who would like to pursue careers analyzing social needs and policy impacts as well as advocating for improved policies and implementation. To that effect, the curriculum offers courses on pressing social problems both in the U.S. and internationally, and highlights linkages between inequality and discrimination, conflict, poverty, political and community participation, and social mobility. Students use essential methods such as policy analysis and other rigorous tools of social science to bear on these important policy questions. Master of International Development students address social policies that are core to development problems in diverse contexts worldwide, including those highlighted in the UN Sustainable Development Goals (SDGs), such as poverty, food insecurity, health, gender inequality, human rights, and environmental sustainability.

Take two of the following five courses:
- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT
- PIA 2551 - GENDER AND DEVELOPMENT
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2590 - LOCAL AND GLOBAL FOOD POLICY & SUSTAINABILITY

Plus:
- PIA 2xxx  Approved SP Concentration Course
- PIA 2xxx  Approved SP Concentration Course

Urban Affairs & Planning Concentration: 12 credits

This concentration gives students a city-focused perspective on international development. More than half of the world population now resides in urban areas, raising important questions about how governments should meet public needs for transportation, health and sanitation, education, and other essential services within complex and often massive urban contexts. Worldwide, cities face similar challenges of development and redevelopment. As urbanization continues to grow at a rapid pace, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face particularly critical challenges including poverty, homelessness, and pollution. Students confront and compare problems and approaches from the local to the global, developing valuable skills in Geographic Information Systems (GIS), regional economic planning, sustainable development management, and social justice in the context of urban development.

Take two of the following five courses:
- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES
- PIA 2223 - CITY OF WHITE SUPREMACY
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS

Plus:
- PIA 2xxx  Approved UAP Concentration Course
- PIA 2xxx  Approved UAP Concentration Course

Elective/Minor Courses: 18 credits

48 Credits

MID Joint Degrees

Students pursuing a MID degree have the following Joint Degree options:

MID/JD
MID/MBA
MID/MIS
MID/MPH
MID/MSW
Public Policy and Management Program

Master of Public Policy & Management (MPPM)

Traditional Master of Public Policy and Management (MPPM)

The accelerated, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study.

Online Master of Public Policy and Management (MPPM)

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

Special Admissions Requirements

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs. The flexible curriculum of the MPPM program is ideal for full-time and part-time students, as it allows them to take any of the courses offered at GSPIA. Students are free to study international affairs, international development, or public administration, and may focus their course selection on any of the fields of study offered under GSPIA's traditional, 48-credit master's degree programs.

Master's

Public Policy and Management, MPPM

Master of Public Policy and Management (MPPM)

Accelerated Mid-Career Masters (Traditional)

The accelerated mid-career, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study. Students may specialize in security & intelligence, global political economy, human security, development planning & environmental sustainability, non-governmental organizations & civil society, urban & regional planning, public & nonprofit management, and policy research & analysis.

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as
budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs.

Online Accelerated Mid-Career Masters

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

The program provides mid-career professionals with an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. It is designed to help enhance and advance the careers of working professionals in the public and nonprofit sectors, but is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service.

Online Program Structure

As an online MPPM student, you will enroll in two web-based courses (for a total of 6 credits) per term. You will be able to complete the 30-credit degree in just five terms. By taking courses during the spring, summer, and fall terms, you can earn your degree in just 20 months. You may, if you prefer, complete the program at a slower pace by taking just one course at a time.

You will follow a set curriculum of online courses, all of which are taught by regular GSPIA faculty who are dedicated to your success, wherever you are. You will complete your coursework using the Pitt Online Website, where you can login at your convenience to view course material and submit assignments.

In addition to the professors teaching your courses, you will be assigned to a faculty advisor and a full-time enrollment counselor who will be able to assist you by phone, Skype, or email with any questions you may have. Your advisor and enrollment counselor will help you navigate the registration process and work with you throughout your time at GSPIA to ensure your success.

Traditional Requirements:

MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- OR
- PIA 2021 - INTERNATIONAL AFFAIRS
- OR
- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2185 - STRATEGIC MANAGEMENT
- PIA 2117 - PROGRAM EVALUATION
- PIA 2896 - MPPM POLICY SEMINAR

Specialization Courses (six courses): 18 credits

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
Minimum Required Credits: 30 credits

Online Requirements

Online MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2117 - PROGRAM EVALUATION
- PIA 2185 - STRATEGIC MANAGEMENT
- PIA 2896 - MPPM POLICY SEMINAR

Online specialization courses (six courses): 18 credits

Online MPPM students must take an additional 18 credits beyond the core.

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course

Minimum Required Credits: 30 credits

GSPIA Minors

MID, MPA, and MPIA students may pursue a minor in any of the fields GSPIA offers as a concentration, including GSPIA concentrations offered outside of their own GSPIA degree. Students may not major and minor in the same field. Students may not minor in a field offered by another academic unit of the University of Pittsburgh outside of GSPIA. A minor typically requires students to take a total of 9 credits within the minor field; courses used to fulfill minor requirements may not simultaneously fulfill any concentration requirements or core requirements. Students may pursue more than one minor, but it is not typically possible to do so without extending the length of enrollment beyond the 48 credits required for graduation. Students are not required to declare a minor. To declare a minor, a student must submit the appropriate paperwork to his or her academic advisor by the their third term of study before graduation. MPPM students may not declare a minor.

To see the requirements for the minors, please click on the appropriate link:

Cybersecurity, Policy, and Law Minor

Energy and Environment Minor

Governance & International Public Management Minor

Human Security Minor

International Political Economy Minor

Nongovernmental Organizations and Civil Society Minor

Policy Research and Analysis Minor

Public and Nonprofit Management Minor
Security and Intelligence Studies Minor

Social Policy Minor

Urban Affairs & Planning Minor
School of Public Health

Note: Students should refer to the catalog in use in their year of matriculation for course and credit requirements. All other information should be obtained from the current catalog.

The School of Public Health consists of graduate programs offered by the Departments of Behavioral and Community Health Sciences, Biostatistics, Environmental and Occupational Health, Epidemiology, Health Policy and Management, Human Genetics, and Infectious Diseases and Microbiology, the Multidisciplinary MPH program for doctoral-level health professionals, and nine certificates. Programs and specialty tracks, including joint programs, are detailed under individual department sections. The School of Public Health also offers an undergraduate degree in public health (BSPH).

The mission of the School of Public Health (Pitt Public Health) is to promote health, prevent disease, and achieve health equity for everyone through leadership in education, research, and service. Visit our website, www.sph.pitt.edu, for more information.

Public Health Genetics

Admissions

Application instructions differ depending on whether you are applying for a degree, a certificate, or for non-degree coursework. Please follow the application instructions for your plan of study when applying to Pitt Public Health.

Pitt Public Health has general admission requirements for all applicants, plus each department has requirements specific to their programs. It's important to review both requirements before applying.

Accelerated Bachelor's/Master's Degree Program

University of Pittsburgh undergraduates may apply for admission to a number of accelerated bachelor's/master's programs. Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Students must have completed the number of undergraduate credits
required by their program (minimum of 96 credits) before they can become a Pitt Public Health student. Besides the regular admission requirements, undergraduates must also meet additional requirements, which are specific to this program.

Non-Degree Status

Non-degree students can take up to 12 credits (cumulative maximum). If a non-degree student is later accepted into a degree program, that program will decide which of those credits may be applied to the degree requirements.

Requirements

A U.S. bachelor's degree or the equivalent foreign degree is required to become a non-degree student. Official transcripts must be submitted for all education, as well as a WES evaluation for study outside of the U.S. and TOEFL scores, if applicable.

Non-degree applicants must be U.S. citizens or permanent residents. In some cases, local applicants currently holding an F or J visa status may be eligible to apply; however, these applicants must contact the Office of Student Affairs for approval before submitting an application. Pitt Public Health does not sponsor I-20s for non-degree study.

How to Apply

Apply online through SOPHAS Express and complete required sections only
Pay application fee online directly to SOPHAS Express
Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code 2927, with no department code. IELTS or Duolingo scores may be substituted for the TOEFL.

Note: Non-degree applicants are not required to submit recommendations, upload transcripts through SOPHAS Express, submit test scores, or submit any non-required sections of the SOPHAS Express application.

What classes should I take?

If you're planning to apply and you know which department you're interested in, you should contact that department directly for suggestions about classes. Many non-degree students choose to enroll in the Pitt Public Health core courses (unless restricted) as a way to learn more about our various programs and/or to start working towards a degree.

Here's a sample of courses that may interest you:

BCHS 2509: Social and Behavioral Sciences and Public Health*
BIOS 2011: Principles of Statistical Reasoning*
EOH 2013: Environmental Health and Disease*
EPIDEM 2110: Principles of Epidemiology*
HPM 2001: Health Policy and Management in Public Health*
HUGEN 2049: Introduction to Public Health Genetics
PUBHTL 2015: Public Health Biology*
PUBHLT 2033: Foundations in Public Health*

*part of the Pitt Public Health Core Curriculum

Note: Pitt Public Health encourages non-degree students to apply to a degree program, but acceptance as a non-degree student does not guarantee admission to a degree program. Non-degree students are encouraged to reach out to program directors to discuss future degree options.

Financial Aid

Almost all Pitt Public Health doctoral students and many master's students receive financial aid. Most financial aid is provided through the departments, and the amount of aid available varies among programs. Applicants should contact departments directly for information about available financial aid.
Academic Standards and Academic Integrity

Students are expected to exhibit academic honesty and to uphold the ethical standards of public health professionals. A student who is not in satisfactory academic standing will be placed on probation and may be subject to dismissal. Students should refer to the Pitt Public Health Academic Handbook for complete information on the school's academic performance standards.

Grading Policies

The School of Public Health follows the University's letter grade system in evaluating student performance in course work, though a variety of options are detailed below.

Pitt Public Health school-wide core courses are graded A, B, C, etc.

Students electing to audit a course must register for the course as for any other course, and must also complete a grade option form in the Office of Student Affairs and obtain the instructor's permission to audit the course. Students receive a grade of N for audited courses and receive no academic credit for the course.

See the University Grading Policy for Graduate Courses section of this bulletin for detailed information.

Withdrawal and Resignation

To withdraw from a class after the official add/drop period while still enrolled in other classes, you must process a Monitored Withdrawal Request Form through the dean's office of the school offering the class.

If you wish to drop all of your courses after the end of the add/drop period, you must resign from the term. The effective date of your resignation determines if you are eligible for an adjustment in the tuition and fees you were charged for the term. The effective date of your resignation will normally be the date you notify the University. You are responsible for satisfying all financial obligations accumulated until the time you officially resign. The timing of your resignation also has an impact on how grades are recorded on your transcript. The last day to resign from a term is when sixty percent of the term has passed. If you decide to resign, call or email the resignation hotline (412-624-7585, resignation@cfo.pitt.edu) immediately and leave your name, seven digit PeopleSoft ID number, daytime phone number, term you intend to resign, last time you attended class, and reason you are resigning.

Official University Record: GPA Calculation

A student's graduate Grade Point Average (GPA) is obtained by dividing the total number of letter grade credits taken in the graduate program into the total number of grade points earned in the graduate program. Only letter grades with GPA values will be used in computing the GPA.

A student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser. A school may restrict the type and/or number of different courses which may be repeated during one degree program. The grade earned by repeating a course is used in lieu of the grade originally earned, although the original grade is not erased from the transcript. No course may be repeated more than twice. No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a B or higher grade. The repeated course must be the same as that in which the original grade was earned. In extenuating circumstances, a department chair or program director, with the dean's approval, may substitute another course of similar content. Grades of W, R, or N reported for the repeated course will not be counted as a course repeat.

To initiate only the last course grade being computed in the GPA, a Course Repeat form must be filed with the Office of Student Affairs.

See the Official University Record: GPA Calculation section of this bulletin for detailed information.

Advanced Standing and Transfer Credits
For details on advanced standing and transfer credits, students should consult the Pitt Public Health Academic Handbook and their academic advisor. Acceptance of transfer credits is at the discretion of the program.

Acceptance of a maximum of 12 credits taken as a non-degree student at Pitt Public Health is at the discretion of the program.

Students enrolled at Pitt Public Health may take credits in another school or institution, providing that their department has approved application of those credits to the degree requirements. In all cases, any combination of advanced standing credits and credits taken from another school or institution during enrollment at Pitt Public Health may not exceed the limits established by the University or the Regulations Governing Graduate Study at the University of Pittsburgh.

See the Acceptance of Transfer Credits section of this bulletin for detailed information.

Academic Advising

The School of Public Health considers effective academic advising an essential component of educating students. Departments have the primary responsibility for identifying and assigning to each student a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. Departments are expected to provide students with a copy of school and departmental regulations appropriate for their program, and students are expected to become familiar with University, school, and department regulations concerning graduate study and to accept responsibility for the completion of all degree requirements.

The student's academic advisor is to direct and assist the student in the selection of classes and the conduct of research. Waivers from program requirements are processed at the program level, and waivers from school requirements by the Office of Student Affairs provided the student has met CEPH competencies. The Application for Graduation is processed through the Pitt Public Health Office of Student Affairs after clearance has been received from the academic advisor. A student will be certified for graduation only after the academic advisor has confirmed that all degree requirements have been met.

For students required to take preliminary, comprehensive, or defense examinations, the academic advisor, in consultation with the student, designates faculty members to act as the examining committee.

Each doctoral student is required to complete an Independent Development Plan per year and to submit it to his/her advisor. A suggested template is provided.

Each doctoral student, together with the student's doctoral committee, is responsible for assuring accomplishment of all elements of the student's course of studies, including the core requirements, the research tools requirement, course work in the field of specialization, advanced standing, the qualifying and comprehensive examinations, and the dissertation overview and its final oral defense.

Career Services

Pitt Public Health Career Services is dedicated to providing informative programs, individualized career counseling services, and networking opportunities to help masters and doctoral students effectively prepare for, develop and manage a career related to their field of study. We offer a broad range of resources to achieve these goals including participation in Handshake, Pitt's comprehensive career services platform and job board. A career counselor is available to meet with students and alumni on a daily basis. Appointments can be scheduled online.

Faculty

School of Public Health Primary Faculty
Program and Course Offerings

A number of courses of general interest to all departments are offered. Course descriptions and class schedules are available to students in PeopleSoft. A list of course offerings by department can also be accessed through the departmental sections of this catalog.

Certificate

Global Health Certificate

This program educates students about current health patterns and transitions occurring globally, as well as about the role of dynamic global environmental, political, economic, health care, and social changes to these patterns.

The requirements for admission to the Global Health Certificate are equivalent to those for an MPH degree.

Required Courses

7 Credits

The certificate core courses cannot overlap with any other departmental requirement. Overlap is permitted for the remaining required courses and these may also fulfill departmental requirements.

- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2027 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

One of the following GSPIA courses (3 credits) is required from the list of courses below. Students can request a substitute PIA course with approval of certificate advisor.

- PIA 2101 - MANAGING EMERGENCIES AND DISASTERS
- PIA 2187 - INEQUALITY, POVERTY AND PUBLIC POLICY
- PIA 2449 - HUMANITARIAN INTERVENTION
- PIA 2509 - PROJECT MANAGEMENT
- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2551 - GENDER AND DEVELOPMENT

Field Practicum

1 Credit Minimum

Students must complete a field experience, which can be combined with the required practicum for the degree program provided the experience is relevant to global health. Students have the opportunity to complete this global health practicum in the form of local opportunities or in an international setting.

Elective Courses

1-7 Credits

Students select electives, as recommended by certificate advisor, that align with their specific area of interest and intended skillset.

Total Credits: 15
**Master's**

**Multidisciplinary, MPH**

The mission of the Multidisciplinary Master of Public Health (MMPH) degree program is to prepare doctoral level health professionals to practice in community, public, and global health settings. They will use population-based concepts, health education, health promotion and the preventive components of public and personal health care and practice. The educational program provides these individuals who have varied health science backgrounds with the advanced public health training in which they can incorporate and apply the public health knowledge and skills in a public or private setting. The program is designed to foster a comprehensive overview to bridge the gaps among public health disciplines and subdisciplines. The MMPH is uniquely designed for individuals with advanced degrees (MD, RN, DDS, DO...) and allows them the freedom to design their MPH. Comprised of the Pitt Public Health core curriculum (21 credits) the students are encouraged to choose electives from varied public health departments to form an area of focus of relevance to them. This degree gives the student the flexibility necessary to work around busy clinical schedules. Upon completion of the MMPH, students will have an understanding of statistics, health policy, research design and the ability to contribute to new research in their chosen fields of interest.

In addition to the Public Health core courses, students must complete a master's essay under the guidance of a faculty committee and a 200-hour practicum experience. The curriculum consists of 42 credits and can be completed in a year.

**Pitt Public Health Required Courses**

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

**MMPH Required Courses**

- PUBHLT 2002 - ESSAY-MMPH (1-2 credits)
- PUBHLT 2029 - MMPH PRACTICUM (1-3 credits)

**Elective Courses**

Add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits: 42

**Department of Behavioral and Community Health Sciences**

The Department of Behavioral and Community Health Sciences at the University of Pittsburgh examines the social determinants of health, that is, the set of social and behavioral factors that either promote or threaten public health. Our interventions alter these social and behavioral factors (such as housing, health literacy, or care management) to assess effects on community health. The BCHS mission statement summarizes our approach:

**VISION**

Healthy people living in thriving and equitable communities.
MISSION
Improve and promote health and equity by engaging individuals, communities, and systems through our research, teaching, and practice.

VALUES
Open communication; active collaboration; integrated and strength-based approaches; social justice and health equity; application of knowledge in the context of people's lives.
The primary educational mission of the Department is to prepare students for positions of responsibility and leadership in public health practice, research, and training. Our students learn to employ the most current health behavior theories and community development strategies in approaching public health challenges. They develop applied research skills in community health assessment and planning, program implementation and evaluation, health education, and health communication. They learn how to design programs and conduct community-based research, and to work as part of interdisciplinary teams examining behavioral interventions and community assessment strategies. These educational and practice experiences prepare our graduates to move into leadership positions at the local, national, and international levels.

The department has a world-class faculty that is involved in teaching, research, and community service on the local, national, and international level. We collaborate with local and regional public health systems, and many of the leadership staff in these organizations also have faculty appointments and teach classes in the department.

Admission & Registration
412-624-3107

https://www.sph.pitt.edu/bchs

Admission: All Applicants
Applications for admission to the Department of Behavioral and Community Health Sciences are processed through the Office of Student Affairs at Pitt Public Health. You must apply for the MPH and PhD programs through SOPHAS, the centralized application service for graduate schools of public health.

Please review the School-level Admission Requirements before applying.
Application instructions differ depending on whether you are applying for a degree, a certificate, or for non-degree coursework. Please follow the Applying for Admission to Pitt Public Health for your plan of study when applying to Pitt Public Health.

**Department requirements- BCHS doctoral applicants:**

- PhD applicants: a master's degree in a discipline relevant to public health is required
- A minimum grade point average of 3.3
- Completed 3 credits of college math passed with a C or better

**Department requirements- BCHS MPH applicants:**

- At least a 3.0 GPA on a 4.0 scale
- Completed 3 credits of college math passed with a C or better
- Completed 6 credits of social sciences passed with a C or better

The BCHS department requires a minimum TOEFL score of 100 on the IBT or a minimum IELTS score of Band 7.0, if applicable. TOEFL or IELTS must be taken within two years of application.

**Joint Degrees:**

Students in the BCHS MPH program can pursue two graduate degrees simultaneously, through partnerships with other schools and departments at the University of Pittsburgh. Joint programs typically reduce the number of credits needed for each degree, allowing students to earn two degrees in three years for master's programs and four to five years for MPH/PhD programs.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements (including entrance exams like the GRE). If admitted to both schools, students alternate their primary program of study by semester or by year.

Although it is possible to apply to both schools at the same time, currently enrolled students can still apply for a joint degree as long as they have not yet completed one year of full-time study.

**Financial Assistance**

Although resources for master's students are limited, the program makes every effort to assist students in accessing some level of financial aid. Small grants and awards are available from the Department, the School of Public Health, and from the University, and many BCHS students have been successful in competing for these awards. In addition, a small number of Graduate Student Assistant and Graduate Student Researcher assistantships are available for full-time doctoral students. There are also opportunities for paid field practicum positions, and many students are able to supplement their income through part-time employment on public health-related service or research projects conducted within the Graduate School, the University, or in the community.

**Research Focus**

The Department of Behavioral and Community Health Sciences has an extensive array of funded research and training projects. BCHS faculty and staff are skilled in the use of both quantitative and qualitative research methods, and the Department is particularly well known for its community-based participatory research strategies and modeling-simulation efforts designed to improve the health and welfare of communities.

Areas of research strengths include:

- Diabetes and Chronic Disease Prevention
- Cancer Screening Behavior
- Health Equity
- Public Health and Aging
- HIV/AIDS and Sexually Transmitted Diseases
- Maternal and Child Health
- Evaluation Science
- Global Health
- Modeling of health behavior and linked disease dynamics
- Mental Health

Research and training projects are funded by organizations such as:
Certificate

Community-Based Participatory Research and Practice Certificate

Community-based Participatory Research and Practice (CBPRP) is a collaborative process of research and practice that includes both researchers and community representatives. Communities are generally defined as those that share a unit of identity (e.g., social ties, geographical locations). The CBPRP process involves engaging community members, using local knowledge in the understanding of health problems, and a long-term commitment to partnership. CBPRP is oriented towards holistic interventions informed by social ecology modeling, a widely recognized approach that not only targets knowledge, attitudes, and behaviors of individuals, but also includes social factors such as family and friendship ties, community norms, and the structure of community services.

This certificate provides a comprehensive set of courses that will prepare students for a career in community-based participatory research and practice. As part of the program, student interns will work with local community agencies to collaboratively address identified community public health issues.

Applicants must meet the requirements for admission to the MPH program in the Department of Behavioral and Community Health Sciences and be accepted into the certificate program. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Required Courses

- BCHS 2135 - LEADERSHIP
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2503 - PRACTICUM (6 credits)

Total Credits: 15

Evaluation of Public Health Promotion and Health Education Programs Certificate

Demand for comprehensive program evaluations is rising in a range of public and private organizations dealing with the health and social welfare needs of populations in the United States as well as worldwide. Graduates with a specialization in program evaluation in public health have expanded opportunities for employment in organizations such as health departments and ministries of health, health and hospital systems, educational programs, philanthropic foundations, and consulting firms. Students in the BCHS program evaluation certificate study under expert faculty and research staff. Students are trained in the application of both quantitative and qualitative methods for evaluation, and have the opportunity to participate directly on interdisciplinary evaluation teams on actual community-based projects. The evaluation concentration typically involves taking courses in basic and advanced evaluation methods, qualitative approaches, health survey methods, and the evaluation practicum.
Applicants must meet the requirements for admission to Pitt Public Health. The certificate program is designed to be completed in four semesters of full-time study, but completion time may vary.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

**Doctoral Student Required Courses**

**12 Credits**

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM (3 credits, 320 hours)

**Doctoral Student Elective Courses**

**3 Credits**

- BCHS 2511 - INDEPENDENT STUDY (Students may qualify for independent study in evaluation as determined by the certificate program director)
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
- NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
  OR
  PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

**Master's Student Required Courses**

**9 Credits**

- BCHS 2503 - PRACTICUM (3 credits, 400 hours)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION

**Master's Student Elective Courses**

**6 credits**

- BCHS 2511 - INDEPENDENT STUDY (Students may qualify for independent study in evaluation as determined by the certificate program director)
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
Total Credits: 15

Health Equity Certificate

This innovative certificate program was created to address the systemic root causes of health disparities. While racial and ethnic health disparities are examples of the consequences of social and economic disadvantages, disparities may also be related to sexual orientation, religion, gender, native language, age, and disability status. The certificate provides students with an academic foundation for achieving health equity through assessing the complexity of inequities among diverse groups of marginalized populations, mobilizing communities where disparities exist, developing/evaluating culturally tailored interventions, and advocating for healthy public policy. The program is designed to increase the cultural competency of public health and other professionals and provide an interdisciplinary vehicle for individuals to pursue and strengthen their career interests relevant to health equity.

Applicants must meet the requirements for admission to the MPH program. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Requirements for the Certificate

Students must complete 15 credits, including Overview of Health Equity, Introduction to Community Health, Health Equity: Research and Interventions (or approved methods class substitute), and the Integrative Seminar in Health Equity. A field experience such as an equity-focused MPH practicum or participation in the Health Equity Journal Club is required.

Required Courses

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- PUBHILT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS
- PUBHILT 2500 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Methods Course Substitute

Students may substitute BCHS 2526 HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS for one of the approved methods courses.

- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING (non-BCHS students)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH (non-BCHS students)
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH AND
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE AND
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
BCHS 3002 - HEALTH SURVEY METHODS
BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE
BIOST 2016 - SAMPLING DESIGN AND ANALYSIS
BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
BIOST 2062 - CLINICAL TRIALS: METHODS AND PRACTICE
EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS
HPM 2064 - HEALTH POLICY ANALYSIS (master's students)
HPM 3064 - HEALTH POLICY ANALYSIS (doctoral students)
HPM 2063 - THE POLITICS OF HEALTH POLICY
HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
HPM 3125 - INTERMEDIATE HEALTH ECONOMICS
PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

Elective Courses

BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH
BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS
BCHS 2575 - SEMINAR MATERNAL AND CHILD HEALTH
BCHS 2599 - PUBLIC HEALTH APPROACHES TO WOMEN'S HEALTH
BCHS 2995 - GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: EMPOWERMENT, GENDER EQUALITY, AND HEALTH
EPIDEM 2143 - SOCIAL EPIDEMIOLOGY
EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
CLRES 2200 - INTRODUCTION TO RESEARCH DISPARITIES ON HEALTH CARE
MEDEDU 2240 - CULTURAL COMPETENCE MEDICAL EDUCATION
PUBHILT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

Total Credits: 15

Lesbian, Gay, Bisexual, and Transgender (LGBT) Health and Wellness Certificate

The interdepartmental (BCHS, EPIDEM, IDM) certificate program will prepare students to collaborate and conduct independent research designed to improve the understanding of unique health concerns among lesbian, gay, bisexual, and transgender (LGBT) populations; participate in agency or organization planning, training, and delivery of health care for LGBT populations; work with local, state, and federal agencies in developing LGBT competent health care providers; provide leadership in public and private sector organizations serving the health and wellness needs of LGBT populations; and evaluate the effectiveness of health care delivery systems to meet the needs of LGBT populations.

In the United States, public health professionals seek to address health disparities. Students enrolled in this program will be prepared to address health disparities affecting subpopulations who may be experiencing a lower quality of health and wellness, due in part, to historic discrimination, with a focus on lesbian women, gay men, bisexuals, and transgender/transsexual individuals. As such, the certificate will offer courses that include information on identifying and documenting health disparities; impact of historical stigmatizing politics that contribute to development of health disparities; impact of politics and policy to improve means of addressing health disparities; design of appropriate research programs to address health disparities; theories behind intervention programs that work among disparate populations; and means to develop competency skills in working with stigmatized populations.
Applicants must meet the requirements for admission to Pitt Public Health. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Requirements for the Certificate

Students must complete 15 graduate credits, a practicum, and a thesis or project related to LGBT health and wellness and oral presentation of the thesis or project for peers and members of the Center for LGBT Health Research, or at approved scientific meeting.

Required Courses

9 Credits

- PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES
- PUBHLT 2019 - PUBLIC HEALTH SPECIAL STUDIES (1 credit, Departmental independent studies/thesis/dissertation credits may be substituted with advisor approval)
- PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Elective Courses

Minimum 6 credits

Other electives may be taken with the approval of one of the certificate directors.

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3002 - HEALTH SURVEY METHODS
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Total Credits: 15

Doctoral

Behavioral and Community Health Sciences, PhD

The Doctor of Philosophy (PhD) program prepares students to conduct research in the social and behavioral sciences areas of public health in a variety of settings as well as teach in academic settings. The PhD curriculum is formed by a social-ecological perspective regarding the determinants of health and opportunities for intervention. Within this overarching framework, the curriculum also emphasizes theory-driven research, addressing health issues across the developmental life span of populations, examining variation across socio-demographic categories such as gender, age, and sociocultural status as it affects health and health disparities. The curriculum addresses the following areas: individual behavior, population health, research design and methods, statistical analysis; behavioral interventions; and the integration of public health research and practice.
The minimum credit requirement for the PhD program is 72 credits of completed course work and independent research. Twenty-four credits may be awarded for a previously earned master's degree. In recognition of graduate study beyond the master's degree successfully completed elsewhere, 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. All students must complete a common core of courses in the following categories:

- Theories of behavior and community (6 credits)
- Research design and methods (11 credits)
- Elective: theory and methods (3 credits)
- Statistical analysis (9 credits)
- Interventions (6 credits)
- Integration of public health research and practice (6-8 credits)
- Milestones (2-4 credits)
- Electives (1-6 credits)

PhD students will typically earn 3 credits preparing for their comprehensive exam and a minimum of 1 dissertation credit must be earned. All PhD students must be enrolled as a full-time student at least 1 semester during their program. Registration for FTDR (i.e. Full-time Dissertation Research) after completion of 72 credits will fulfill this requirement. The program is designed to be completed in four years.

BCHS PhD Requirements

Theories of Behavior & Community

6 Credits

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Research Design & Methods

11 Credits

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Elective: Theory & Methods

3 Credits

3 credits from the list below or 3 credits of relevant graduate-level coursework as recommended by academic advisor.

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
  AND
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
  AND
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS

Statistical Analysis
9 Credits

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
BIOST 2049 - APPLIED REGRESSION ANALYSIS
BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Interventions

6 Credits

BCHS 2558 - HEALTH PROGRAM EVALUATION
BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH

Integration of Public Health Research & Practice

6-8 Credits

BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING
BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION
FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING
OR
BCHS 2511 - INDEPENDENT STUDY (1-3 credits) Students must complete 6 UCTL Workshops
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
(two terms)
PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH

Milestones

2-4 Credits

BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION (1-3 credits)
BCHS 3010 - RESEARCH AND DISSERTATION PHD (1 credit)
OR
FTDR 3999 - FULL-TIME DISSERTATION STUDY

Electives

1-6 Credits

As recommended by academic advisor.

Total Credits: 72

Joint Degree

Behavioral and Community Health Sciences, MPH/MID
This program is a collaboration between the Graduate School of Public and International Affairs and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/MID joint degree program prepare students for careers as public health practitioners in emerging economies where health issues are closely linked to social, political, and economic problems.

The BCHS MPH/MID joint degree is designed to be completed in three years of full-time study. The BCHS requirements for the MPH/MID joint degree are listed below. Students should refer to the Graduate School of Public and International Affairs page for the most current MID requirements.

45 Public Health credits *(6 credits of public health-relevant electives taken in GSPIA can be applied to the 45 credit requirement)*

78 total credits, including coursework and one 300 contact hour field placement practicum

essay or thesis

Pitt Public Health Required Courses

BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

OR

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE

EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH

PUBHLT 2015 - PUBLIC HEALTH BIOLOGY

PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH

PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS

PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/MID Required Courses

BCHS 2503 - PRACTICUM *(1-3 credits)*

BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION

BCHS 2521 - ESSAY *(1-3 credits)*

BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH

BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH

BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses

Minimum 6 credits from list below. Additional electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program. Students can apply a maximum of 6 credits of public health-relevant coursework taken in GSPIA to meet elective requirements.

BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION

BCHS 2516 - VIDEO FOR HEALTH PROMOTION

BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING

BCHS 2524 - OVERVIEW OF HEALTH EQUITY

BCHS 2551 - SOCIAL NETWORKS & HEALTH

BCHS 2558 - HEALTH PROGRAM EVALUATION

BCHS 2572 - RISK COMMUNICATION

Behavioral and Community Health Sciences, MPH/MSW

This program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both Master of Social Work and Master of Public Health degrees, and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community.

The BCHS MPH/MSW joint degree typically is completed with a three-year curriculum plan for Direct Practice or COSA. The BCHS requirements for the MPH/MSW joint degree are listed below. Students should refer to the School of Social Work for the most current MSW program requirements.

45 Public Health credits (9 credits taken in Social Work can be applied to the 45 credit requirement; 3 credits of field placement in place of BCHS 2503 and 6 credits of public health-relevant electives)
33 Social Work credits (plus 18 field placement credits)
practicum
essay or thesis

Behavioral and Community Health Sciences, MPH/PhD, Anthropology

This program is a collaboration between the Dietrich School of Arts and Sciences, Department Anthropology and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/PhD joint degree program prepares anthropologists for research, teaching, and program planning/evaluation for specialization in the cultural, social, and behavioral aspects of health and health care in either a domestic or international setting.

The MPH/PhD joint degree is designed to be completed in four to five years including time for dissertation research. The BCHS requirements for the MPH/PhD joint degree are listed below. Students should refer to the Department of Anthropology for the most current PhD requirements.

45 Public Health credits
87 total credits, including coursework, research and fieldwork
practicum
essay or thesis (Anthropology dissertation fulfills this requirement)

BCHS MPH/PhD Anthropology Required Courses

BCHS 2503 - PRACTICUM (1-3 credits)
BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
BCHS 2521 - ESSAY (1-3 credits)
BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses

Minimum 6 credits from list below. Additional electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program. Students can apply a maximum of 6 credits of public health-relevant coursework taken in Anthropology to meet elective requirements.

BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION
BCHS 2516 - VIDEO FOR HEALTH PROMOTION
BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
BCHS 2524 - OVERVIEW OF HEALTH EQUITY
BCHS 2551 - SOCIAL NETWORKS & HEALTH
BCHS 2558 - HEALTH PROGRAM EVALUATION
BCHS 2572 - RISK COMMUNICATION
BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
Behavioral and Community Health Sciences, MPH/PhD, Social Work

This program is a collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/PhD joint degree program prepares students to fulfill leadership roles in public health systems or academic settings. Students in this program have opportunities to work with local organizations on a variety of planning, evaluation, and research activities.

The MPH/PhD joint degree is designed to be completed in four to five years including time for dissertation research. The BCHS requirements for the MPH/PhD joint degree are listed below. Students should refer to the School of Social Work for the most current PhD requirements.

45 Public Health credits (6 credits of public health-relevant electives taken in Anthropology can be applied to the 45 credit requirement)
72 total credits, including coursework and research practicum
essay or thesis (Social Work dissertation fulfills this requirement)

Pitt Public Health Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/PhD Social Work Required Courses

- BCHS 2503 - PRACTICUM (1-3 credits)
- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2521 - ESSAY (1-3 credits)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses
Minimum 6 credits from list below. Additional electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program. Students can apply a maximum of 6 credits of public health-relevant coursework taken in Social Work to meet elective requirements.

- BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION
- BCHS 2516 - VIDEO FOR HEALTH PROMOTION
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2572 - RISK COMMUNICATION
- BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS
- BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Total School of Public Health Credits: 45

Total Joint Degree Credits: 72

Master's

Behavioral and Community Health Sciences, MPH

The MPH Program is a 45-credit program requiring students to complete the Pitt Public Health core courses, departmental core courses, and electives that pertain to a student's area of interest.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Pitt Public Health Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
  OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH
BCHS MPH Required Courses

BCHS 2503 - PRACTICUM (1-3 credits)
BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
BCHS 2521 - ESSAY (1-3 credits)
BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Elective Courses

Minimum 6 credits from list below. Additional graduate-level electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program.

BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION
BCHS 2516 - VIDEO FOR HEALTH PROMOTION
BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
BCHS 2524 - OVERVIEW OF HEALTH EQUITY

Total Credits: 45

Department of Biostatistics

Biostatistics is an innovative field that involves the design, analysis, and interpretation of data for studies in public health and medicine. Biostatistics experts arrive play a crucial role in drawing meaningful at conclusions about disease and health risks by evaluating and applying employing mathematical and statistical formulas to address the factors that impact health.

Students at Pitt Public Health our students benefit from collaboration with the renowned University of Pittsburgh School of Medicine and UPMC, Pennsylvania's largest academic medical center, and have access to extensive University computing facilities. Through rigorous courses, students gain a comprehensive understanding of statistical methods in the context of public health and medical problems; work with faculty on developing new and innovative methodologies and analytical techniques; and have the opportunity through both research and service to apply these methods to current and pressing concerns in biomedicine and public health.

Contact Information
Admissions

In addition to the School-level Admission Requirements, admission to all Biostatistics degree programs requires two semesters of calculus.

Applying for Admission to Pitt Public Health

Early Admission

University of Pittsburgh undergraduates may apply for early admission to the Biostatistics MS Program. Students must have completed the number of undergraduate credits required by their school before they can become a Biostatistics MS student.

Accelerated Bachelor's/Master's Program

Accelerated Bachelor's/Master's Program Admission Requirements

Financial Aid

The department awards assistants to full-time PhD students. The department awards financial aid to applicable MS students at the time of admission.

Tuition and Billing

Tuition & Financial Aid

Advanced Standing and Credit Transfer

Acceptance of a maximum of 12 credits taken as a non-degree student at Pitt Public Health is at the discretion of the department and program.

Students enrolled at Pitt Public Health may take credits in another school or institution, providing that their department has approved application of those credits to the degree requirements. In all cases, any combination of advanced standing credits and credits taken from another school or institution during enrollment at Pitt Public Health may not exceed the limits established by the University or the Regulations Governing Graduate Study at the University of Pittsburgh.
Students with previous graduate experience in Biostatistics or a related field may apply to transfer credits for graduate-level coursework successfully completed with a grade of B or better. PhD students may apply to transfer up to 24 credits and MS students 6 credits. The course credits to be transferred must be reviewed and approved by the student's academic advisor. Students who receive transfer credits for a public health core course must complete a Core Course Exemption Form in addition to the credit transfer paperwork to exempt out of those classes. Students who receive transfer credits for BIOST 2087 must complete a Course Exemption Form in addition to the credit transfer paperwork to exempt out of the course. All transfer credit and course exemption paperwork must be completed by the end of a student's first term of study.

Outside Elective Courses

At least 3 graduate-level credits taken outside BIOST

Total Credits: 72

Master's

Biostatistics, MS

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months).

Required Courses

BIOST 2025 - BIOSTATISTICS SEMINAR
BIOST 2037 - FOUNDATIONS OF STATISTICAL THEORY
BIOST 2039 - BIOSTATISTICAL METHODS
BIOST 2049 - APPLIED REGRESSION ANALYSIS
BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
BIOST 2066 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE
BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
BIOST 2087 - BIOSTATISTICS CONSULTING PRACTICUM
BIOST 2093 - SAS FOR DATA MANAGEMENT AND ANALYSIS
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
PUBHILT 2011 - ESSENTIALS OF PUBLIC HEALTH
PUBHILT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

BIOST 2021 - SPECIAL STUDIES (faculty-guided thesis research: two terms required; 1st term one credit, 2nd term 2 credits)

OR
BIOST 2022 - CAPSTONE PREPARATION

AND

BIOST 2099 - CAPSTONE

Elective Courses

10 Credits

In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor. BIOST 2025 cannot be used to fulfill elective credits.

BIOST 2036 - INTRODUCTION TO HEALTH DATA SCIENCE
BIOST 2056 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS
BIOST 2062 - CLINICAL TRIALS: METHODS AND PRACTICE
BIOST 2063 - BAYESIAN DATA SCIENCE
BIOST 2067 - APPLIED META-ANALYSIS
BIOST 2068 - INTRODUCTION TO CASUAL INFERENCE
BIOST 2069 - STATISTICAL METHODS FOR OMICS DATA
BIOST 2079 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
BIOST 2080 - ADVANCED STATISTICAL LEARNING
BIOST 2094 - ADVANCED R COMPUTING
Total Credits: 40

**Biostatistics, MS - Health Data Science (HDS) Concentration**

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months).

**Required Courses**

- BIOST 2025 - BIOSTATISTICS SEMINAR
- BIOST 2036 - INTRODUCTION TO HEALTH DATA SCIENCE
- BIOST 2037 - FOUNDATIONS OF STATISTICAL THEORY
- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BIOST 2079 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
- BIOST 2087 - BIOSTATISTICS CONSULTING PRACTICUM
- BIOST 2094 - ADVANCED R COMPUTING

Department of Environmental and Occupational Health

The mission of the Department of Environmental and Occupational Health (EOH) is to study and elucidate the health effects of exposure to chemical, physical, and biological agents encountered in the workplace or general environment. Intrinsic to this research mission is that fundamental information regarding actions of environmental toxicants will provide insight into basic human biology in health and disease. Accordingly, current research includes fundamental studies on free radical biology and especially oxidative lipidomics and mitochondrial function, genetic basis of susceptibility to injurious agents including gene x environment approaches, cellular and molecular regulation of reparative response to injury including mesenchymal stem cells as modifying biological therapeutic agents, cardiopulmonary toxicology of heavy metals and particulate matter including nanoparticles, molecular carcinogenesis including metabolism of telomeres and DNA damage and repair, genetic and epigenetic contributions to neurodegenerative disease with focus on cholesterol dyshomoestasis and integrated studies in complex disorders such as environmental induced interstitial pulmonary fibrosis. In addition, a focus on exposure science and environmental epidemiology supports efforts into the health effects of air pollution and public health concerns associated with energy procurement including unconventional natural gas development. Translation of these collective efforts in basic and applied research is in part provided by members of EOH active in environmental policy, risk assessment, and community behavioral sciences. These efforts coincide and are coordinated with mentoring and educational programs for PhD, MS and MPH students.

Admissions

Course work in mathematics and the physical, chemical, and biological sciences must be documented in the undergraduate transcript. Acceptable undergraduate training includes a bachelor's degree in the physical, chemical, or biological sciences with a minimum of two courses each in organic chemistry, biology, physics, and calculus.

Applicants for admission must also take the Graduate Record Examination (GRE). The MPH program also accept MLATS and DATS. If the candidate already has a graduate or professional degree a waiver may be approved by the department. Consistent with Pitt Public Health requirements, students are ordinarily required to have at least a 3.00 (on a 4.00 scale) overall undergraduate GPA, and a 3.00 GPA in the basic science courses (chemistry, physics, biology, mathematics).

Financial Assistance

Financial support is available for tuition and stipend for PhD students through a graduate research assistance program from the University of Pittsburgh School of Public Health. Stipends are made available from the Department of Environmental and Occupational Health, and from individual research laboratories. Although master's students in the environmental health and/or environmental health risk assessment programs are eligible for support, in general it is expected that tuition and stipends for these students will be derived from external sources.

Certificate

Environmental Health Risk Assessment Certificate

The aim of this certificate program is to provide concentrated graduate education in a well-defined area of environmental health. By means of highly focused course work, the objective of the program is to impart proficiency in the risk sciences for individuals who desire positions involving risk assessment strategies or already have such positions and are seeking to strengthen their professional competency. These include the following groups:

- Public and private sector professionals who evaluate scientific data in the context of risk assessment and management,
- Health and safety professionals, including industrial hygienists and Environmental and occupational health professionals who need to acquire or strengthen training in the risk sciences,
- Environmental scientists, engineers, policy analysts, and health and safety professionals,
- Occupational physicians.

Students must hold a graduate degree or be pursuing a graduate degree concurrently.

Required Courses

11 Credits
EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
EOH 2175 - PRINCIPLES OF TOXICOLOGY
EOH 2181 - RISK ASSESSMENT PRACTICUM
EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

Suggested Elective Courses

Minimum 4 credits

- BCHS 2572 - RISK COMMUNICATION
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- LAW 5340 - ENVIRONMENTAL LAW

Total Credits: 15

Doctoral

Environmental and Occupational Health, PhD

The PhD in Environmental and Occupational Health provides a broad theoretical and practical education for individuals who desire positions in academic, industrial, or government laboratories in the multifaceted discipline of environmental health sciences. The program combines training in classical toxicological and environmental biophysics with the new and continually developing fields of cellular and molecular pathobiology of environmental disease. Training is geared toward an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations.

During the first two years of study, students will take the majority of their coursework and have an opportunity to rotate in three different research laboratories. Students spend the remainder of the graduate program completing the research dissertation project and taking elective courses.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EOH 2109 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES JOURNAL CLUB (four terms)
- EOH 2110 - ROTATION/PRACTICUM (two terms, optional if dissertation mentor is identified)
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EOH 3010 - RESEARCH AND DISSERTATION PHD (3-8 credits)
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Elective Courses
Minimum 6 credits from list below. Alternate graduate-level electives can be added as recommended by academic advisor.

EOH 2004 - OCCUPATIONAL HYGIENE
EOH 2609 - CHEMICAL TOXICOLOGY IN THE AGE OF GREEN CHEMISTRY
EPIDEM 2223 - INTRODUCTION TO ENVIRONMENTAL EPIDEMIOLOGY

Total Credits: 72

Environmental and Occupational Health, PhD, Public Health Practice (PHP)

The PhD in environmental and occupational health provides a broad theoretical and practical education for individuals who desire positions in academic, industrial, or government laboratories in the multifaceted discipline of environmental health sciences. This program will provide a degree that emphasizes a practice-oriented, interdisciplinary approach to research that encompasses in its coursework the competencies of the five core areas of Public Health: environmental health, biostatistics, epidemiology, health policy and management, and behavioral and community health aspects of Public Health. It further includes courses to develop proficiencies in one of several high-level career directions.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

EOH PhD, PHP Required Courses

- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EOH 2004 - OCCUPATIONAL HYGIENE
- EOH 2021 - SPECIAL STUDIES (two terms)
- EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 2609 - CHEMICAL TOXICOLOGY IN THE AGE OF GREEN CHEMISTRY

Research & Dissertation

- EOH 3010 - RESEARCH AND DISSERTATION PHD (25 credits max)
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Elective Courses

Optional, at discretion of academic advisor. Suggested electives below.

- BCHS 2572 - RISK COMMUNICATION
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
Master's

Environmental and Occupational Health, MPH

The MPH program provides an opportunity for students interested in environmental and occupational health to become familiar with the relevant concepts as they apply to public health practice. The program will also be an opportunity for working health professionals to achieve an in-depth environmental perspective as well as a degree in public health. The degree may be tailored more toward either environmental health science or risk assessment depending on the choice of electives and desire of the student.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis. The program typically takes two years to complete.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

EOH MPH Required Courses

- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EOH 2021 - SPECIAL STUDIES (2 credits)
- EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM (2 credits)
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

Elective Courses

Minimum 8 credits from list below. Alternate graduate-level electives can be added as recommended by academic advisor.

- BCHS 2572 - RISK COMMUNICATION
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- EOH 2004 - OCCUPATIONAL HYGIENE
- EOH 2021 - SPECIAL STUDIES (1-9 credits)
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2609 - CHEMICAL TOXICOLOGY IN THE AGE OF GREEN CHEMISTRY
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EOH 3305 - GENOME INSTABILITY AND HUMAN DISEASE
Environmental and Occupational Health, MS

The emphasis of the MS in Environmental and Occupational Health is directed towards the theoretical underpinnings of environmental health sciences and toxicology with more limited involvement in laboratory-based research. The program is designed as an integrated modern curriculum combining the training in the toxicological and environmental biophysics disciplines that are traditional to the Department of Environmental and Occupational Health with the new and continually developing fields of cellular and molecular pathobiology of environmental disease and gene-environment interactions. The program provides an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations.

The program typically takes approximately 2 years to complete.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHILT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHILT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- EOH 2021 - SPECIAL STUDIES (2 credits)
- EOH 2109 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES JOURNAL CLUB (four terms)
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE

Elective Courses

Minimum 12 credits from list below. Alternate graduate-level electives can be added as recommended by academic advisor.

- EOH 2004 - OCCUPATIONAL HYGIENE
- EOH 2021 - SPECIAL STUDIES
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2609 - CHEMICAL TOXICOLOGY IN THE AGE OF GREEN CHEMISTRY
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EPIDEM 2223 - INTRODUCTION TO ENVIRONMENTAL EPIDEMIOLOGY

Total Credits: 42

Department of Epidemiology

Epidemiology is the application of the scientific method to the study of disease in populations for the purpose of prevention or control. It is a key basic science of public health and preventive medicine. Epidemiologists play a fundamental role in public health and preventive medicine by identifying variabilities in human situations that may have a critical influence on the occurrence of disease within populations.

The epidemiological method for studying a problem involves three approaches:
Description of the frequency and determinants of a disease in a defined population; 
Evaluation of factors that may cause a disease; and 
Experimental studies of the effects of modifying risk factors on the subsequent frequency of a disease.

Director, MD/PhD Program Iva Miljkovic, MD, PhD, FAHA ivm1@pitt.edu

Admissions

Applying for Admission to Pitt Public Health

The department accepts students with a variety of prior health-related professional degree backgrounds, prior graduate degrees, and superior students who have completed a bachelor's degree. Students may matriculate for the MPH, MS, or PhD degree. A joint MD/PhD program is also available. Major areas of emphasis within the department are aging, psychiatric, social epidemiology, cancer, injury prevention, applied public health cardiovascular and diabetes, clinical trials and methods, infectious disease, molecular and genetic epidemiology, environmental epidemiology, global health, prevention lifestyle and physical activity, neuroepidemiology, nutritional epidemiology, reproductive, perinatal, and pediatric epidemiology, and women's health.

Financial Assistance

Graduate Student Researcher (GSR) Appointment Information for doctoral program applicants and students only: Graduate Student Researcher Assistantship

Financial Assistance: Tuition & Financial Aid

Minority Student Support Information: https://www.sph.pitt.edu/research-practice/research-centers-and-institutes/center-health-equity

Research
In fiscal year 2022-2023, the faculty within the Department of Epidemiology received approximately $40 million in research funds. These projects, mostly federally funded, included activity in the major areas of focus within the department. For additional information, review details about our research practices and our numerous Areas of Research Emphasis.

The student's course of study includes School of Public Health core courses, department core courses, electives drawn from our frequently used courses, and other appropriate selections throughout the University. The sequencing of courses is developed in conjunction with the academic advisor, taking into account background, area of focus, degree program, and Pitt Public Health requirements.

The minimum credit requirement is 30 for the MS program for health professionals and 72 for the PhD. A 45-credit MPH or MS is available for students who are not health professionals. MPH students will be involved in a hands-on internship. Master's students must complete a (MS) thesis or essay (MPH) and doctoral students (PhD) must complete a dissertation and one-semester Teaching Practicum experience.

**Doctoral**

**Epidemiology, PhD**

The Epidemiology PhD program provides students with an advanced level of academic preparation to conduct research, teach, and mentor students. This includes concentrated training in epidemiological concepts and methodology and the completion of a research-based dissertation. Students may choose from a number of areas of research emphasis as they plan coursework with their faculty mentors, and prepare for dissertation collaboration with their mentors and faculty committee members.

Please note that the Epidemiology PhD can be adapted to have an applied focus. Through elective coursework, internship opportunities, and the dissertation, PhD candidates can obtain the essential skills required for public health practice.

Graduates are employed at federal governmental agencies including the US Centers for Disease Control and Prevention, the US Food and Drug Administration, National Institute for Occupational Safety and Health, the Epidemic Intelligence Service, and the US Department of Health and Human Services, in addition to local and state departments of health, and the consulting, insurance and pharmaceutical industries.

Alumni are also leading research efforts at universities across the US and internationally, and inspiring students in the classroom as faculty instructors who are sharing their cutting-edge training, wealth of experience, and accomplishments with future public health leaders.

**Required Courses**

- **EPIDEM 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN**
- **OR**
- **EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE**
- **EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY**
- **EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES**
- **EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY**
- **EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS**

  PhD students who completed a comparable course in their master's-level training are not required to enroll in EPIDEM 2180. Those with master's degrees in non-Epidemiology areas and those with Epidemiology master's degrees that did not cover topics presented in this course must enroll. Students and their academic advisors should consult the Epidemiology doctoral program director concerning registration for this course.

- **EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS**
- **EPIDEM 2185 - INTRODUCTION TO SAS**
- **OR**
- **EPIDEM 2186 - INTRODUCTION TO R**
- **EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES**
- **EPIDEM 2192 - CAUSAL INERENCE IN EPIDEMIOLOGIC RESEARCH**
- **EPIDEM 2193 - MACHINE LEARNING AND BAYESIAN ANALYSIS IN EPIDEMIOLOGICAL RESEARCH**
- **EPIDEM 2215 - TEACHING PRACTICUM**
- **EPIDEM 2230 - SECONDARY DATA ANALYSIS: A CAPSTONE COURSE**
- **EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY**
- **EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL**
- **EPIDEM 2600 - INTRODUCTION TO MOLECULAR EPIDEMIOLOGY**
EPIDEM 2921 - GRANT WRITING
EPIDEM 3100 - RESEARCH AND DISSERTATION PHD (3 credits)

OR

FTDR 3999 - FULL-TIME DISSERTATION STUDY
EPIDEM 3183 - READING, ANALYZING, AND INTERPRETING THE PUBLIC HEALTH AND MEDICAL LITERATURE
BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
BIOST 2049 - APPLIED REGRESSION ANALYSIS

One advanced quantitative course is required. Choose one from the following: BCHS 2991, BCHS 3002, BCHS 3015, BIOST 2016, BIOST 2050, BIOST 2066, EFOP 3408, HPM 3505, HUGEN 2080.

PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

These training requirements must also be completed:

Academic Integrity Training
Internal Review Board (IRB) Training
Independent Development Plan (IDP) Requirement
Primary Data Collection Requirement
Competency in Communication Requirement

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program. All Pitt Public Health course descriptions may be found on the Department of Epidemiology course offerings.

Total Credits: 72

Master's

Epidemiology, MPH

The Epidemiology MPH program provides a strong foundation in epidemiology and biostatistics, as well as the other core competencies of public health. It provides a clinically relevant educational and practical experience based on research excellence. Students are trained to engage in research and/or applied public health practice activities that impact public health by evaluating and responding to important public health issues such as infectious diseases, aging, and chronic disease prevention, global, reproductive, or environmental health, population neuroscience, and injury prevention.

Recent graduates are employed at state, county, and local health departments, the Centers for Disease Control and Prevention, the National Institutes of Health, hospitals, pharmaceutical and consulting companies. Some pursue medical or dental careers or doctoral programs in epidemiology or biostatistics.

Pitt Public Health Required Courses

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

This training requirement must also be completed:
Academic Integrity Training

EPIDEM MPH Required Courses

BIOST 2049 - APPLIED REGRESSION ANALYSIS
EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
EPIDEM 2210 - SPECIAL STUDIES - ESSAY (1-2 credits)
EPIDEM 2214 - PUBLIC HEALTH INTERNSHIP (1-2 credits)
EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY
These training requirements must also be completed:
Internal Review Board (IRB) Training
Competency in Communications Requirement

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program. All Pitt Public Health course descriptions may be found on the Department of Epidemiology course offerings.

Total Credits: 45

Epidemiology, MS (30 Credit)

For those who hold a professional health degree or a related doctoral degree, the department offers a 30 credit condensed MS program that provides concentrated training in epidemiological concepts, skills, and methodology with a research focus. A 45 credit Epidemiology MS program is available for those with a similar research focus who do not already hold a professional health degree or a related doctoral degree. Both MS programs require completion of a flexible mix of courses in epidemiology and biostatistics. Applicants may reference the credit option that best fits their qualifications and needs in the application goals statement, although this is not required.

Recent graduates are employed at universities and governmental agencies as well as pharmaceutical and consulting companies.

Required Courses

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
BIOST 2049 - APPLIED REGRESSION ANALYSIS
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
OR
EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
OR
EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program. All Pitt Public Health course descriptions may be found on the Department of Epidemiology course offerings.
Department of Health Policy and Management

The Department of Health Policy and Management prepares individuals to assume roles of leadership, policy development, and management within the health care system and public health. Its educational programs are grounded in the faculty's contributions in advancing the state of knowledge and professional practice in institutional and system health care management and the development, advocacy, analysis, and implementation of health policy. The HPM Faculty are engaged in interdisciplinary research addressing a range of problems relevant to public policy, organization, and management as applied to health care organizations and systems and in various professional and community service activities.

Admission Requirements

Masters Degree Programs: The School of Public Health requires that students apply online for all degree programs. Requirements for admission include a bachelor's degree from an accredited college or university; GRE scores are not a required component for the MS, MHA and MPH applications. (For those students who feel that their past academic performance and/or prior work history do not adequately represent their skill set (or strength of their application), the GRE may be submitted for additional consideration. A strong test score can help offset the lack of industry experience and/or previous academic success); and successful completion of: three postsecondary (college/university)-level semester credits in biology; three post-secondary (college or university) level semester credits in mathematics (algebra or higher); and 6 post-secondary (college/university) level semester credits in social and behavioral sciences, preferably including one course in economics.

In addition, the Admissions Committee cites the following as important factors in the admissions decision: undergraduate performance, GRE scores (optional), letters of recommendation, relevant work (or volunteer) experience, and good interpersonal and communication skills. Most applicants are interviewed as part of the application review process. Students enroll in August of each year. Although a rolling admissions process is in place, applicants are encouraged to apply as soon as possible and prior to the end of May. International University of Pittsburgh students should apply by February 1.

Doctoral Degree Program: Applicants to the PhD Program in Health Services Research and Policy must hold a baccalaureate degree with a GPA of at least 3.3 desirable; college level coursework in calculus with a grade of 3.0 or better is a prerequisite; GRE scores are not a required component for the PhD application. Applicants who feel that their past academic performance and/or prior work history do not adequately represent their skill set may submit GRE scores for consideration; Applicants for whom English is not their first language must submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. Students must score a minimum of 213 on the computerized TOEFL (or 550 on the paper-based version). The minimum score for the IELTS is 65.

In addition, applicants must demonstrate in their personal statement that they have a clear understanding of how the program of study will benefit them in achieving their career goals. Three letters of recommendation are required from individuals who are in a position to judge the applicant's professional and/or academic abilities. At least one recommendation should be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or advisor).

Certificate Program in Health Care Systems Engineering: Applicants to this program must be admitted to or enrolled in the MHA program, the HPM-MPH program, or the MS program in industrial engineering.

Certificate Program in Health Systems Leadership and Management: All Certificate applicants, except those already enrolled in GSPH, need to apply through SOPHAS. In addition, the Certificate applicant will submit a brief statement addressing: interest in health systems leadership and management; previous experience; areas of interest; and the relation of the Certificate to career goals.
The admission requirements for applicants are based on completion of at least an advanced health care provider degree (e.g. MD, RN, PharmD, PT, OT) or appropriate job experience.

Financial Assistance

The Department of Health Policy and Management has limited scholarship funds and these funds are allocated separate from admission decisions. The scholarship funds are mainly awarded to incoming high caliber students on an annual basis. Graduate student assistantships are periodically available on a competitive basis.

Department Website: https://www.sph.pitt.edu/hpm

Certificate

Health Care Systems Engineering Certificate

Offered jointly by the University of Pittsburgh Swanson School of Engineering and Pitt Public Health, this program provides students with specific competencies and analytical tools required for effective problem solving relevant to quality improvement and process engineering in the health care industry. Students are equipped to serve as quality champions and agents of change in addressing the challenges health care faces in the twenty-first century. Engineering students gain knowledge of health care operations, the organizational culture, and the strategic issues facing the industry. Health care management students will learn engineering principles, models, and tools within a systems approach to analysis, problem-solving, and project implementation.

This certificate is intended for individuals pursuing careers in the management, redesign, and improvement of the health care industry. Designed for master's students in the Department of Health Policy and Management and the Department of Industrial Engineering, this program provides a rigorous and multidisciplinary education as a complement to the core curriculum of both programs. With a focus on innovation, effectiveness, and efficiency in health care and public health, the certificate nurtures well-educated professionals and leaders in their disciplines.

Students in this certificate program will be able to:

- Demonstrate knowledge of the structures, performance, quality, policy and environmental context of health and health care to formulated solutions for health policy problems,
- Design and implement projects, including collecting, analyzing, interpreting data and offering sound evidence-based recommendations, and
- Summarize and present health care engineering-related research orally and in writing.

Required Courses

BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
or
BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
HPM 2050 - HEALTH SYSTEMS ENGINEERING SEMINAR
HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
IE 2001 - OPERATIONS RESEARCH
or
HPM 2051 - HEALTHCARE APPLICATIONS OF OPERATIONS RESEARCH
IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
IE 2303 - WORK DESIGN
IE 2998 - GRADUATE PROJECTS/PRACTICUM

Health Systems Leadership and Management Certificate

1172
General Requirements

This graduate certificate provides rigorous training for health care clinicians and providers looking to enhance their careers and improve health care delivery through strengthened leadership and management skills. The certificate was initially designed for physicians in the School of Medicine, but is open to all health care clinicians and providers.

The admission requirements for applicants are based on completion of at least an advanced health care provider degree (e.g. MD, RN, PharmD, PT, OT), job experience, and career plans.

The curriculum requires 15-16 total credits and consists of coursework in leadership theory and practice; strategic management; financial management; health policy; quality and patient safety; and one applied project.

Required Courses

HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
or
HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
or
HPM 2064 - HEALTH POLICY ANALYSIS
HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
or
HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
HPM 2150 - STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS
HPM 2700 - SEMINAR IN HEALTH SYSTEMS LEADERSHIP
HPM 2275 - HPM SPECIAL STUDIES
*Applied Project

Doctoral

Health Services Research and Policy, PhD

The Health Services Research and Policy (HSRP) PhD program meets an ongoing need for public health researchers who focus on cost, access and quality of the health care system. Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

Students must successfully pass a preliminary exam given after the first year, a comprehensive exam given after the second year, and typically present their dissertation overview towards the end of the third year. The doctoral dissertation will take the form of three thematically linked manuscripts of publishable quality.

Required Courses

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
BIOST 2049 - APPLIED REGRESSION ANALYSIS
BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING (1 credit)
OR
HPM 2275 - HPM SPECIAL STUDIES (1 credit)
HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
HPM 3000 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 1 (students are encouraged to attend throughout their time in the program)
HPM 3001 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 2 (students are encouraged to attend throughout their time in the program)
Elective Courses

Minimum of 12 elective credits recommended by academic advisor.

Total Credits: 72

Joint Degree

Health Policy and Management, JD/MPH

For the JD/MPH degree, students enrolled in the joint-degree program receive integrated training in law and public health over a four year period. Students must apply to, and be accepted into, both the School of Law and the School of Public Health.

Once admitted, the student completes the first year of law school before registering for courses in public health. During subsequent semesters students are encouraged to integrate coursework between the schools to best accommodate the students learning objectives.

Pitt Public Health Required Courses

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
BIOST 2111 - PRINCIPLES OF STATISTICAL REASONING

OR

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM JD/MPH Required Courses
Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program. Students can apply a maximum of 3 credits of public health-relevant coursework taken in LAW to meet joint degree requirements.

Total School of Public Health Credits: 45

Total Joint Degree Credits: 113

Health Policy and Management, MHA/MBA

An outstanding opportunity to become highly skilled in the management of health care processes, quality, and finances, the MHA/MBA joint degree program is designed to create future leaders in the management of health care organizations. Uniting the strengths of the University of Pittsburgh's School of Public Health and Joseph M. Katz Graduate School of Business, the program blends outstanding training in management and finance with the content expertise in health care quality improvement, outcomes measurement, and analytics.

Students must complete applications for, and be accepted into, both the School of Public Health and the Joseph M. Katz Graduate School of Business. Application to Pitt Public Health must be submitted through SOPHAS at www.sophas.org. Application to the Katz Graduate School of Business should be made at www.business.pitt.edu/katz/apply.

Our highly trained graduates will be fully prepared to assume fast-track leadership positions in a variety of health care organizations. The Bureau of Labor Statistics estimates that the demand for health care managers will grow by 17 percent in the next decade. The U.S. health care system is the largest industry in the United States, currently consuming nearly 18 percent of GDP. At the same time, there remain significant problems with access and quality. The joint training in business and health care management should provide a strong foundation for a variety of positions in health care finance, insurance, operations, disease and population health management.

The standard full-time curriculum is a three-year, 73-credit course of study leading to the joint degree. The competency-based curriculum emphasizes both professional and leadership development, as well as functional management skills, blending courses across both the Katz School (MBA) and Pitt Public Health's Department of Health Policy and Management (MHA) in six academic terms.

Students are required to complete a management residency in the first summer term that may be extended into the second summer term. These supervised placements in health care services or health-related practice sites are an invaluable experience for professional development and networking. The student must also complete a master's essay and an applied management project at the residency site.

Required Courses

BACC 2401 - FINANCIAL ACCOUNTING
BFIN 2409 - FINANCIAL MANAGEMENT 1
BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
Elective Courses

Remaining MBA elective credits may be taken in spring of 2nd or 3rd year. Student may take HPM 2115 for an optional 1 credit.

Total Joint Degree Credits: 73

Master's

Health Policy and Management, MHA

The MHA program offers students a competency-based curriculum and an array of professional development resources and activities to prepare graduates for managerial roles in health care systems and networks, managed care, health insurance, and long-term care organizations. The broad curriculum provides students with a foundation of knowledge, analytical and communication skills, and core values for ongoing career growth and professional and leadership development. Upon completion of the MHA program, our graduates obtain post-graduate fellowships or full-time employment in hospitals, academic medical centers, physician practices, long-term care facilities, health plans, and consulting firms.

The mission of the Masters in Health Administration (MHA) Program is to provide students with the competencies necessary for early to mid-level management positions and provide the foundation for subsequent professional development, leadership and executive management in organizations involved in the delivery or financing of health care services. The program's curriculum is based on evidence-based practice enriched by the research activity of the faculty.
In order to be eligible for graduation, students must complete 60 credit hours with a B average or better including a supervised management residency, which is typically scheduled during the summer term, and prepare a scholarly master's essay relating to the culminating experience. The curriculum includes select Pitt Public Health core courses, the required health management core, and elective credits offered within and outside the schools of the health sciences.

Elective Courses

Add electives as recommended by academic advisor to earn total credits required for the program.

Total Credits: 60

Health Policy and Management, MPH

The MPH in Health Policy and Management (HPM) prepares students for careers as public policy analysts, advocates for public health and high quality care, and professionals engaged in the development and implementation of health policies. The program provides professional development through a combination of coursework, a health policy or management related practicum, a Public Health Leader-in-Residence, and other curricular activities.

This two-year, 45-credit Program prepares students for careers in both health policy development, analysis and advocacy and program and organization management in public health agencies, foundations, other nonprofits and the private sector. Graduates of our MPH Program should be well-prepared to pass the Certification in Public Health (CPH) exam, pursue related Doctoral studies and/or obtain professional employment in public health and related sectors, nationally and globally.

In order to be eligible for graduation, students must complete 45 credit hours with a B average or better including a supervised 200-hour practicum, and prepare a scholarly master's essay relating to culminating experience.

Pitt Public Health Required Courses
BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

OR

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
PUBHLT 2022 - THE DEAN’S PUBLIC HEALTH GRAND ROUNDS (two terms)
PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM MPH Required Courses

HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2
HPM 2025 - HPM PRACTICUM (1 credit)
HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
HPM 2037 - ESSAY-HA (1 credit)
HPM 2055 - MANAGING HEALTH PROGRAMS AND PROJECTS
HPM 2063 - THE POLITICS OF HEALTH POLICY
HPM 2064 - HEALTH POLICY ANALYSIS
HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT
HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
HPM 2131 - PUBLIC HEALTH LAW AND ETHICS

Elective Courses

Add electives as recommended by academic advisor to earn total credits required for the degree program. Recommended electives are listed below.

HPM 2108 - LEADERSHIP
HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE

Total Credits: 45

Health Services Research and Policy, MS

The Master of Science in Health Services Research and Policy program prepares graduates for positions in health services research and policy, analytics and also prepares them for higher level education (such as a PhD). Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

The MS requires a minimum of 42 credits. The program includes coursework in statistics and research methods as well as foundations in public health. Students must successfully pass a comprehensive exam given during the second year and submit and successfully defend a master's thesis.

Required Courses

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
BIOST 2049 - APPLIED REGRESSION ANALYSIS
BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
HPM 3508 - RESEARCH AND DISSERTATION PHD (1-2 credits)
PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

Area of Focus Courses

Students work with their academic advisor to identify an area of focus with at least 11 credits that focuses on a discipline or area of interest.

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits: 42

Department of Human Genetics

The Department of Human Genetics provides graduate training in the fields of human genetics, public health genetics, and genetic counseling. The mission of the department is to discover new knowledge about the genetic determinants of human health and disease through basic and applied research; to educate students, trainees, and other interested persons in that knowledge; and to apply that knowledge to improve the health of populations, families, and patients.

Contact Information

Noel Harrie
Department Office: 1135 Public Health
412-624-3066
Fax: 412-624-3020
nce1@pitt.edu
https://www.sph.pitt.edu/hugen

Admission

In addition to meeting the School of Public Health's general admission requirements, applicants to the MS and PhD programs should have completed courses in calculus and genetics. For the genetic counseling program, the preferred undergraduate background includes courses in each of the following: genetics, organic chemistry-general biochemistry, calculus, statistics, and a behavioral or social science. In some cases, deficiencies can be made up after admission. For applicants to the MPH program, these courses are suggested but not required. For the MS in genome bioinformatics, applicants should have complete courses in calculus, genetics, and programming or coding. For information on admission and registration contact the Department of Human Genetics at 412-624-3066 or nce@pitt.edu.

Financial Assistance

Graduate student assistantships are often available for PhD students. For other degree programs, aid is not usually available, although it is often possible to arrange for hourly wage/stipend support from research mentors or other faculty.

Certificate

Public Health Genetics Certificate
Advances in genetics are occurring at a pace that challenges our collective ability to respond to the many social, legal, ethical, and public health policy implications generated by this revolution of knowledge. Consequently, there is a compelling need to prepare future public health professionals in the biology, technology, applications, responsibilities, and issues of genetic information, which will play an increasing role in our understanding of health and disease. All areas of public health can be improved and expanded by examining the role of genetics in public health issues.

The purpose of the Certificate in Public Health Genetics is to provide graduates with a basic grounding in public health genetics that will enable them to function as public health professionals at the cutting edge of this important new area. Students enrolled in this certificate program are trained to incorporate knowledge of how genes, together with the environment and behavior, influence health and apply this insight into their area of practice or research. Students will be able to:

- Demonstrate basic knowledge of the role that genetics plays in the development of disease
- Identify the limits of his/her genetic expertise
- Identify ethical and medical limitations to genetic testing, including uses that don't benefit the individual
- Identify the role of cultural, social, behavioral, environmental, and genetic actors in the development and prevention of genetic-related diseases

Certificate Requirements

The curriculum consists of 15 credits, of which at least 12 must be traditional classroom courses. The remaining three credits can be seminar, project, or practicum work.

In addition, all students receiving the certificate must give a presentation in a public health genetics course.

Other courses may be permitted, but must be pre-approved by the director of the MPH in the Department of Human Genetics.

1) All students must take:
   HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS

2) At least six credits from the following five courses are required to achieve competency in the basic science of genetics:
   HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
   HUGEN 2022 - HUMAN POPULATION GENETICS
   HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
   HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
   HUGEN 2090 - GENETICS OF COMPLEX DISEASES 1
   HUGEN 2091 - GENETICS OF COMPLEX DISEASES 2

3) A maximum of 3 credits may come from the following courses:
   HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE
   HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM
   HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS

4) Additional courses permitted for the certificate include the following:
   EPIDEM 2601 - MOLECULAR EPIDEMIOLOGY TOOLS & TECHNIQUES
   BCHS 2572 - RISK COMMUNICATION

*Other courses may be permitted, but must be pre-approved by the Director of the MPH in Public Health Genetics Program in the Department of Human Genetics.

Students enrolled in Human Genetics degree programs other than the MPH in Public Health Genetics may receive the certificate, with the stipulation that the certificate curriculum must include at least six credits of coursework that is not part of the coursework for their degree and three credits of project or practicum work. The requirements for current Human Genetics students include:

Six additional credits of coursework not already required by the student's degree program Three of these credits must be HUGEN 2049: Introduction to Public Health Genetics and the additional three can come from the approved list of additional courses above or otherwise must be approved by the Directors of the MPH in Public Health Genetics program.

Three credits of a project or practicum work A paper (10 double-spaced page minimum, plus references) describing the project or practicum is required to receive a grade for these credit hours. Writing guidelines will be provided.

Students must give a presentation in a public health genetics course on a topic decided by the course instructor.

Competencies

Graduates will be able to:
(1) Apply knowledge of inheritance, including basic cellular and molecular mechanisms, and risk factors for disease to understanding a variety of rare and common health conditions.

(2) Identify interactions among genes, environmental factors, and behaviors, and their effects on public health.

(3) Assess the ethics of the application of genetic technologies to public health

**Doctoral**

**Human Genetics, PhD**

The Doctoral Program in Human Genetics prepares students for careers leading genetics and genomics research in academia or industry. The flexible curriculum provides a broad background in the field while allowing customized emphasis on molecular genetics/genomics, statistical genetics and genetic epidemiology, or genetic counseling. Typically four to ten doctoral students are admitted each year, including external applicants and internal applicants currently pursuing Master's degrees within the department. In addition to core coursework and advanced classes in a chosen area of interest, doctoral students pursue mentored research projects culminating in the production and defense of a dissertation.

**Required Courses**

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2025 - HUMAN GENETICS SEMINAR *(four terms)*
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW *(two terms, must present at least once)*
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - GENETICS OF COMPLEX DISEASES 1
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES 2
- HUGEN 3020 - DOCTORAL RESEARCH AND PROFESSIONAL SKILLS DEVELOPMENT *(two terms, must present at least once)*
- HUGEN 2021 - SPECIAL STUDIES
  AND/OR
- HUGEN 3010 - RESEARCH AND DISSERTATION PH.D.
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

**HUGEN Elective Courses**

Students must complete one of the following electives. In situations where a student's special interests or needs indicate an alternative course is more appropriate, it may be substituted for an elective course with the permission of the student's academic advisor.

- HUGEN 2080 - STATISTICAL GENETICS
- HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE
- HUGEN 2072 - GENOMIC DATA PIPELINES AND TOOLS
- HUGEN 2073 - GENOMIC DATA VISUALIZATION AND INTEGRATION
- HUGEN 2051 - INBORN ERRORS OF DEVELOPMENT

**Additional Elective Courses**

In addition to the courses listed above, students are expected to select, in consultation with their academic and research advisors, additional courses appropriate for their areas of concentration. In addition, a student's Dissertation Committee may require that a student register for elective courses...
within or outside the Department of Human Genetics to gain knowledge in an area relevant to the student's area of concentration. Furthermore, students who are not fluent in English are strongly recommended to take a University course in conversational English.

Total Credits: 72

Joint Degree

Genetic Counseling and Public Health Genetics Dual-Degree Program, MS/MPH

The University of Pittsburgh established the MPH in Public Health Genetics and MS in Genetic Counseling dual degree program in 2004, which was the first program of its kind to be offered to students pursuing a genetic counseling degree. The dual degree program enables students to build upon the clinical skills that they acquire through the Genetic Counseling Program to understand the importance of genetics, genomics, and genetic counseling in the field of public health.

Given the rapid expansion of available genetic and genomic testing, the current focus on precision medicine, and the increasing interest of national organizations, state public health offices, and hospitals in the application of genomics to public health, there is a growing need for professionals with skills in both disciplines. Graduates of the dual degree program are well-prepared to integrate public health genetics into clinical, research, public health, and industry settings. The dual degree program also benefits students by broadening their areas of expertise and career qualifications in other areas of public health including program development, evaluation, and policy.

There are a variety of options for completing the dual degree, which depend in part on the timing of the student entering the program. However, most students starting the degrees at the same time are able to complete the dual degree program in 22 months, which is one additional summer session beyond the typical completion time for the MS in Genetic Counseling degree program.

More information regarding the program can be found on the Pitt Public Health website, Department of Human Genetics, under the Dual MPH/MS Genetic Counseling program designation.

Dual-Degree Requirements

Students interested in both genetic counseling and public health genetics can pursue both degrees in a combined 62-credit program. All requirements for each individual program must be completed.

All required courses for both degrees must be taken by dual degree students, with the exception of PUBHLT 2011, Essentials of Public Health. Given that some of the curriculum overlaps, the dual degree requires the completion of a minimum of 62 credits. In addition to completing all of the requirements for the MS in Genetic Counseling degree, students enrolled in the dual degree will take additional courses required by the MPH curriculum and fulfill the MPH practicum and MPH essay requirements.

The required courses for the dual-degree program are outlined below. Schedules are discussed on an individual basis with the Program Directors of the MPH in Public Health Genetics and MS in Genetic Counseling Programs.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH
Required HUGEN Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES (1 credit)
- HUGEN 2025 - HUMAN GENETICS SEMINAR (two terms)
- HUGEN 2032 - GENETIC TECHNIQUES
- HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2036 - GENETIC COUNSELING INTERNSHIP (two terms - fall and spring of 2nd year; fulfills the MPH practicum requirement, students must complete and submit all materials required for the MPH practicum)
- HUGEN 2037 - GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
- HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
- HUGEN 2039 - RISK CALCULATION GENETIC COUNSELING
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2061 - CANCER GENETIC COUNSELING

Thesis and Essay Requirements

Students in the dual degree program will complete both the thesis requirement for the MS in Genetic Counseling degree and the Essay requirement for the MPH in Public Health Genetics degree. Depending on the thesis and essay topics, sometimes these documents can be combined into one document comprising the student's thesis project with additional background on public health genetics relevance and, at least one additional, extensive chapter focusing on an application of public health genetics. The student's thesis committee and the Program Director for the MPH in Public Health Genetics will work with the student to identify the additional components or topics that are needed to satisfy the MPH Essay requirement.

Elective Courses

Add electives as needed recommended by academic advisor to earn total credits required for the degree program.

Total Credits: 62

Master's

Genetic Counseling, MS

The Genetic Counseling Graduate Program at the University of Pittsburgh is committed to providing cutting-edge training in the complex science of genetics while fostering a strong foundation in counseling. This unique program is constantly evolving to ensure the continued success of graduates entering a dynamic workforce. Each year between 10 and 12 students are welcomed into the incoming class to be trained by world-renowned faculty. The Genetic Counseling Program is grounded in three important elements: scientific training in human genetics and genomics, comprehensive clinical experience, and understanding the psychological and social aspects of counseling, with an added focus on integrating up to the minute discoveries in genetics and genomics as well as valuable concepts from other academic disciplines.

The Genetic Counseling Program is fully accredited by the Accreditation Council for Genetic Counseling, Inc. (ACGC), 7918 Jones Branch Drive, Suite 300 McLean, VA 22102; Phone: 703-506-7667. Our comprehensive program helps students to achieve and often surpass the standards outlined by the ACGC.

Required Courses
Participation in Ethical Issues, Online Embryology Modules, Clinical Case Conference and Scientific Writing is required for all students.

BHST 2041 - INTRODUCTION TO STATISTICAL METHODS
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
HUGEN 2025 - HUMAN GENETICS SEMINAR (two terms)
HUGEN 2032 - GENETIC TECHNIQUES
HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
HUGEN 2036 - GENETIC COUNSELING INTERNSHIP (two terms - fall and spring of 2nd year)
HUGEN 2037 - GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
HUGEN 2039 - RISK CALCULATION GENETIC COUNSELING
HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
HUGEN 2061 - CANCER GENETIC COUNSELING
PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

Clinical Rotations

Genetic counseling students have the opportunity to participate in patient care at world-renowned medical facilities. They typically see 150-200 cases or more and are exposed to a variety of genetic referral types as well as diverse medical systems.

Rotation schedules are divided into 13 blocks, with each block lasting three weeks. All students will spend three blocks in Cancer genetics, three blocks in Prenatal genetics, three blocks in Pediatric genetics as well as one block in Adult/Specialty genetics, Primary Care, and a thesis focused block. In addition, students spend three weeks (one block) at an optional rotation site. This allows students the opportunity to select specific training experiences to develop a higher level of expertise based on their interests.

Total Credits: 38

Genome Bioinformatics, MS

The Master of Science in Genome Bioinformatics (MSGB) program prepares students for careers analyzing the human genome both in academia and in pharmaceutical and genomic testing industries. Graduates of the program will meet the growing need for computational analysts with expertise in manipulating, annotating, and interpreting human genome data. In addition to coursework and hands-on training, students will participate in a structured internship experience in industry or other non-academic setting to provide real world exposure to genome bioinformatics and hone analytic and communication skills in preparation for entering the job market.

Required Courses

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
HUGEN 2025 - HUMAN GENETICS SEMINAR (two terms)
HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE
HUGEN 2072 - GENOMIC DATA PIPELINES AND TOOLS
HUGEN 2073 - GENOMIC DATA VISUALIZATION AND INTEGRATION
HUGEN 2075 - GENOME BIOINFORMATICS THESIS AND WRITING
HUGEN 2076 - GENOME BIOINFORMATICS CAPSTONE
HUGEN 2077 - GENOME BIOINFORMATICS PROFESSIONAL SKILLS
HUGEN 2078 - GENOMIC DATA ADVANCED TOPICS IN BIOINFORMATICS
PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

5 or more credits

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - GENETICS OF COMPLEX DISEASES 1
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES 2

Additional Elective Courses and Internship

In addition to the required courses listed above, MS in Genome Bioinformatics students are expected to select at least 6 additional credits of elective courses approved by the Program Director and must complete an internship in an industry, academic, or governmental setting after the first year.

Total Credits: 45

Human Genetics, MS

The Master of Science program in Human Genetics prepares students for careers as contributing members of genetics and genomics research teams in academia or industry. Graduates of the program often go on to PhD level study and become independent scientists. The flexible curriculum provides a broad background in the field while allowing customized emphasis on laboratory genetics or genetic data analysis. In addition to core coursework and advanced classes in a chosen area of interest, MS students pursue mentored research projects culminating in the production and defense of a thesis.

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES (two credits)
- HUGEN 2025 - HUMAN GENETICS SEMINAR (two terms)
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

5 or more credits

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - GENETICS OF COMPLEX DISEASES 1
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES 2

Additional Elective Courses
In addition to the required courses listed above, students must complete at least 11 credits through elective courses within or outside the Department of Human Genetics, HUGEN 2021 Special Studies research credits, or transfer credits from previous graduate level coursework. Elective courses and transfer credits counting toward the degree must be discussed and approved by the student's academic and research advisors. Students who are not fluent in English are strongly recommended to take a University course in conversational English.

Total Credits: 36

Public Health Genetics, MPH

The Master of Public Health in Public Health Genetics program integrates human genetics and the public health science disciplines of epidemiology, behavioral and community health sciences, biostatistics, environmental health, and health services research with ethics, social sciences, public affairs, and law to prepare students for a career in the evolving field of public health genetics. Public health genetics integrates genetics with multiple public health disciplines to address society's legal, ethical, financial, regulatory, and organizational responsibilities in offering genetic services and developing interventions to bring genetic services to the public.

A detailed program description can be found on the Pitt Public Health website, Department of Human Genetics, under the Master of Public Health (MPH) in Public Health Genetics designation.

The MPH in Public Health Genetics curriculum is designed to give students a strong knowledge base in Human Genetics with a broad understanding of the field of public health. Through the coursework, students are immersed in current topics in human genetics, public health, and the ethical, legal and social issues important to the field of public health genetics. The curriculum, 200-hour practicum experience, and public health essay focus on the development of skills that are desirable to employers after graduation. The entire program can be completed in 1 1/2 years, although most students prefer to spread it out over two years.

Pitt Public Health Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
- PUBHILT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHILT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHILT 2035 - APPLICATIONS IN PUBLIC HEALTH

HUGEN MPH Required Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES (1 credit)
- HUGEN 2025 - HUMAN GENETICS SEMINAR (two terms)
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM (1 credit)
- HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS

HUGEN Elective Courses

At least three credits from the following courses:
Additional Elective Courses

Students fulfill the remaining credits with electives from the School of Public Health based on their interests and future career goals. Elective courses outside of the School of Public Health are permitted with Program Leadership approval.

Total Credits: 47

Department of Infectious Diseases and Microbiology

The mission of the Department of Infectious Diseases and Microbiology is to conduct research, teaching, and service that will enhance the control of infectious diseases in the human population. Our goals to accomplish this mission include:

- Research programs that focus on understanding the mechanisms of pathogenesis of microbial infections at the cellular and molecular level as they relate directly to developing methods for disease prevention and treatment.
- Integrated teaching programs that are devoted to the education and training of graduate students in various molecular, immunologic and biologic aspects of microbial pathogenesis, as well as disease control and prevention.
- Programs that focus on population-based education and prevention for control of infectious diseases.

We have a commitment to high quality graduate education that is consistent with our leading cutting-edge research and behavioral health and community education programs. The degree programs draw upon the disciplines of molecular biology, immunology, epidemiology, medicine, health education, and community intervention to provide our students with opportunities to participate in cross-disciplinary research into multiple aspects of infectious diseases. As a graduate of our program you will be prepared for careers in academia, industry, government, and community service sectors. Our graduates have obtained professional positions with prestigious employers in the USA and worldwide. Examples include the National Institutes of Health, the Centers for Disease Control and Prevention, state and local health departments, pharmaceutical companies, hospitals, and major universities and other academic institutions.

The Department offers Master of Public Health (MPH), Doctor of Philosophy (PhD), and Master of Science (MS) degree programs. Students in the MPH program can pursue one of two concentrations: Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL) or Infectious Disease Management, Intervention, and Community Practice (MIC).

Contact Information

Vice Chair for Education
Velpandi Ayyavoo
412-624-3070
velpandi@pitt.edu

For more information on admissions and registration contact the department at 412-624-3331 or idm@pitt.edu.

Financial Assistance

Financial support through assistantships are available for full-time doctoral students. A limited number of partial scholarships are available to outstanding new MS and MPH students.

Doctoral
Infectious Diseases and Microbiology, PhD

The PhD program in the Department of Infectious Diseases and Microbiology prepares students for competitive research and teaching careers in academia, government agencies, and private industry. Our PhD students complete coursework that emphasizes the fundamentals of pathogen biology, immunology, cell biology, and molecular biology, which provides the necessary educational basis to conduct independent research mentored by our faculty.

PROGRAM REQUIREMENTS

- 72 credits total
- Preliminary exam
- Comprehensive exam
- Research project and Dissertation
- First author publication

PROGRAM LENGTH

Students complete the PhD program on an average of 6 years

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2161 - METHODS INFECTIONOUS DISEASES EPIDEMIOLOGY
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (six terms)
- IDM 2023 - MICROBIOLOGY LABORATORY
- IDM 2025 - MICROBIOLOGY SEMINAR (four terms)
- IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES
- IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION
- IDM 3440 - VACCINES AND IMMUNITY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits: 72

Master's

Infectious Disease Management, Intervention, and Community Practice (MIC), MPH

The Infectious Disease Management, Intervention, and Community Practice (MIC) MPH program provides a tailored educational experience to foster competencies for practice, research, and education in public health. Students take courses that focus on global and domestic infectious diseases including HIV, and assists students in designing interventions, approaches, and policies to address the increase in infectious diseases as well as emerging infectious disease threats to public health. This coursework paired with hands-on practicum experience particular to the student's interest prepares students for careers in public health education, program development and management, or further education.
Program Length:

Full-time students complete the program in 2 years or less
Part-time students complete the program in 3-4 years on average

Program Requirements:

42 credits
200-hour practicum
essay or thesis

Pitt Public Health Required Courses

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
BIOST 2111 - PRINCIPLES OF STATISTICAL REASONING
OR
BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)
PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

IDM-MIC MPH Required Courses

IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM (3 credits)
OR
IDM 2068 - INFECTION PREVENTION AND CONTROL PRACTICUM/INTERNSHIP
IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (2-3 credits)
IDM 2025 - MICROBIOLOGY SEMINAR
IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES
IDM 2069 - INFECTION PREVENTION AND CONTROL IN HEALTH CARE SETTINGS

Electives

Add electives as recommended by academic advisor to earn total credits required for degree program.

Total Credits: 42

Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL), MPH

The Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL) MPH program enables students a unique educational experience, which brings together pathogen biology, immunology, and epidemiology within the broader framework of public health. Students then have the opportunity to apply what they learn in a laboratory setting. Students graduate from the MPH PEL program with the expertise necessary for occupations in public health education, analysis, and research in the non-profit, government, or private sectors. The program also prepares students for further education in medical or graduate programs.

Program Length:
Full-time students complete the program in 2 years or less
Part-time students complete the program in 3-4 years on average

Program Requirements:

- 42 credits
- 200-hour practicum
- essay or thesis
- optional lab rotation

Pitt Public Health Required Courses

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
OR
BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (2 terms)
PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

IDM-PEL MPH Required Courses

IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION
IDM 2004 - VIRAL PATHOGENESIS
IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM (3 credits)
IDM 2010 - PATHOGEN BIOLOGY
IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (2-3 credits)
IDM 2025 - MICROBIOLOGY SEMINAR
IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Electives

Add electives as recommended by academic advisor to earn total credits required for degree program.

Total Credits: 42

Infectious Diseases and Microbiology, MS

The Master of Science program within the Department of Infectious Diseases and Microbiology provides students with a unique basic science education within the School of Public Health. Graduates of our MS program develop skills and experience to become more competitive applicants for medical school and doctoral programs, as well as qualified researchers in academia, government and industry. This two year program emphasizes coursework in immunology, cell biology, and virology, and enables students to apply their coursework to their thesis research projects completed under a faculty advisor.

Program Requirements

- 36 credits total
- Comprehensive exam
- Research project
- Written thesis & defense

Program Length
Full-time students complete the program in 2 years or less
Part-time students complete the program in 3-4 years on average

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY (every term)
- IDM 2022 - SPECIAL TOPICS (3 credits)
- IDM 2023 - MICROBIOLOGY LABORATORY
- IDM 2025 - MICROBIOLOGY SEMINAR (four terms)
- IDM 2035 - ADVANCED VECTOR-BORNE INFECTIOUS DISEASES
- IDM 3440 - VACCINES AND IMMUNITY
- IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS (two terms)

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree. Recommended electives can be found below.

- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY

Total Credits: 36

Applying for Admission to Pitt Public Health

If You Are Applying for a Degree Program

All new degree-seeking applicants, except those applying for non-degree study, only a certificate program, Genetic Counseling MS, and/or dual-degree Genetic Counseling MS/MPH, must apply through SOPHAS, the online, centralized application service for CEPH-accredited schools and programs of public health. SOPHAS submits applications to Pitt Public Health only after all required materials are received.

- Apply online through SOPHAS
- Pay application fee directly to SOPHAS
- Submit personal statement through SOPHAS
- Submit three recommendations directly to SOPHAS
- Submit official transcripts for ALL education in the United States directly to SOPHAS
- Submit a course-by-course WES evaluation for ALL education outside of the United States (not including study abroad) directly to SOPHAS
- Submit official GRE scores (if applicable) to the School of Public Health code 4234, with no department code. Program-specific requirements can be found here.
- Submit official TOEFL scores (if applicable) to SOPHAS code 5688. IELTS or Duolingo scores may be substituted for the TOEFL.
- Track the status of your completed application online through SOPHAS
If You Are Applying for Genetic Counseling MS or dual-degree Genetic Counseling MS/MPH Programs

All new Genetic Counseling MS and/or dual-degree Genetic Counseling MS/MPH applicants must apply through SOPHAS Express.

- Register for the Genetic Counseling Admissions Match through National Matching Services Inc. (NMS)
- Apply online through SOPHAS Express
- Pay application fee directly to SOPHAS Express
- Submit personal statement through SOPHAS Express
- Submit three recommendations through SOPHAS Express
- Upload unofficial transcripts for ALL education in the United States and/or in Canada directly to SOPHAS Express under Documents
- Upload Genetic Counseling Experience Tracking form to SOPHAS Express under Documents - Program Form
- Submit a course-by-course WES evaluation for ALL education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) directly to Pitt Public Health Office of Student Affairs
- Submit official TOEFL scores (if applicable) to University of Pittsburgh code 2927. IELTS or Duolingo scores may be substituted for the TOEFL.

If You Are Applying for Non-Degree Study

Interested applicants may enroll in 12 credits of non-degree study before applying to a degree-seeking program.

- Apply online through SOPHAS Express and complete required sections only
- Pay application fee online directly to SOPHAS Express
- Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
- Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
- Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code 2927, with no department code. IELTS or Duolingo scores may be substituted for the TOEFL.

**Note:** Non-degree applicants are not required to submit recommendations, upload transcripts through SOPHAS Express, submit test scores, or submit any non-required sections of the SOPHAS Express application.

More information about the non-degree option can be found here.

If You Are Applying for a Certificate Only

If you are only applying to a Pitt Public Health certificate, you may apply through the abbreviated application below. If you also plan to apply for a degree program, do not apply through SOPHAS Express for the certificate. You will only be required to apply through SOPHAS following the instructions above.

- Apply online through SOPHAS Express
- Pay application fee online directly to SOPHAS Express
- Submit a personal statement through SOPHAS Express
- Submit three recommendations through SOPHAS Express
- Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
- Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
- Submit official GRE scores (optional) to the University of Pittsburgh code 2927, with no department code
- Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code 2927, with no department code. IELTS or Duolingo scores may be substituted for the TOEFL.

**Note:** Applicants who are interested in only pursuing a certificate should contact the program before applying to confirm the availability of courses. International applicants are not eligible to apply for only a certificate program due to the full-time registration requirements of the student visa.
Current Pitt Public Health Students Applying to a New Degree or Certificate Program

Current degree-seeking students interested in transferring to another program or adding another academic program/certificate must:

Email a brief statement including name, current program, details on the plans to transfer or add a program, and the term in which you would like to begin the program to the Office of Student Affairs, PHAdmissions@pitt.edu.

Further instruction will be forwarded to you once the admissions office receives your email of intent, depending on the department's requirements.

Note: Pitt Public Health non-degree students are required to apply through SOPHAS if they are interested in being considered for a degree program. See above for the application instructions.

Admissions Review Process

Once the school has received your verified application from SOPHAS or SOPHAS Express and has processed internally, you will be notified by email. If your application is complete by our school-specific requirements, it will be sent to the department for their review. If your application is incomplete, you will receive an initial email about the missing items and then you will be sent periodic email reminders about the incomplete status. Applicants are not considered for admission until all required application materials have been received. Please be sure to add donotreply@webadmit.org to your safe senders list in your email account.

Your application will be reviewed by the departmental committees. Departmental review generally takes four to six weeks, but the timing may vary by department or by season. As soon as the department has submitted a decision on your application to the Office of Student Affairs, you will be notified of the admissions committee's decision by email.

Note: A departmental committee evaluates applications and makes a recommendation to the associate dean for enrollment in the Office of Student Affairs. Admission is not final until the associate dean for enrollment issues a letter of acceptance.

In the following circumstances, application materials will be kept for one year from the date the application was received and then be destroyed:

- Application remains incomplete
- Application is not accepted
- Application is accepted, but the applicant does not respond
- Application is accepted, but the applicant declines admission

Mailing Address

University of Pittsburgh
School of Public Health
Office of Student Affairs
1100 Public Health
130 DeSoto Street
Pittsburgh, PA 15261
(412) 624-3088

Note: Pitt Public Health holds its applicants and students to the high ethical standards expected of public health professionals. Any form of misrepresentation or plagiarism discovered in an application will result in immediate rejection of the applicant. The incident also will be reported to SOPHAS or SOPHAS Express, the public health shared application service, which will notify other participating schools.
School-level Admission Requirements

Degree and Certificate Requirements

All degree and certificate applicants must have completed Pitt Public Health's prerequisite course requirements.

International Applicants

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (80); IELTS (Band 6.5, which must include the academic writing and reading modules); and Duolingo English Test (110). Individual departments may require higher scores. See Department-specific Admission requirements for this information.

Master of Public Health (MPH)

Applicants must possess:

U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or both

Graduate Record Examination (GRE) scores are optional for most master's programs. See the requirements below for each department.

Master of Health Administration (MHA)

Applicants must possess:

U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or both

Graduate Record Examination (GRE) scores are optional. MHA/MBA applicants may submit optional GMAT or GRE scores.

Multidisciplinary Master of Public Health (MMPH)

Applicants must hold a doctoral degree in the health sciences, be an advanced medical, dental, or veterinary student, or hold a relevant doctoral degree in a related field (considered on an individual basis).

In most cases, official scores from the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE) must be submitted. MCAT or DAT may be substituted for the GRE. All other test scores are considered on a case-by-case basis.

International applicants must submit GRE scores.

Note: If you're a graduate of a foreign medical or dental school, you must hold a valid medical or dental license in the United States, be eligible for licensure, be in a residency or fellowship program, or be a visiting clinician planning to return to your native country.

Master of Science (MS)

Applicants must possess:

A Bachelor's degree in arts, science, engineering, or nursing, or an MD, DDS, or DVM from an approved U.S. school or equivalent foreign degree

Evidence of adequate training in the sciences basic to public health (some applicants may be admitted at the discretion of the faculty, making up deficiencies as prescribed)

Graduate Record Examination (GRE) scores are optional for most master's programs. See the requirements below for each department.

Doctor of Philosophy (PhD)

Applicants must:
Possess a U.S. graduate or bachelor's degree, or the equivalent degree from a foreign school, in a field relevant to the PhD program to which they are applying.

Have had sufficient courses in mathematics and the biological and social sciences.

Have had sufficient prerequisite courses in the field to which they are applying.

Graduate Record Examination (GRE) scores are optional for most PhD programs. See the requirements below for each department.

Certificate Programs

Applicants must possess:

U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or a combination.

GRE Requirements for Degree Programs

The School of Public Health's GRE requirement is determined by each individual program. Please refer to the chart below for the specific program to which you are applying. When submitting, official GRE scores must be sent from ETS to the Pitt Public Health SOPHAS code 4234. Copies/unofficial scores will not be accepted.

School-wide Prerequisite Courses

Social Science Requirement
MHA, MPH, and certificate applicants must have six college credits in behavioral and social sciences (with a C or better).

Mathematics Requirement
All applicants must have mathematical preparation appropriate for entrance into Principles of Statistical Reasoning through either previous collegiate coursework or advanced placement coursework reflected on the college transcript. An ETS administered advanced placement test score of three or higher in calculus or a GRE quantitative score at or above the 70th percentile is also evidence of acceptable preparation.

Department Requirements
In addition to school and degree-level requirements, each department has specific requirements. Once you know which program(s) you're applying to, be sure to review departmental requirements.

Certificate Programs
Applicants must meet requirements for admission to MPH.

Accelerated Bachelor's/Master's Program

Qualified Pitt undergraduates will apply in their third year of study. In the fourth year, students can complete any remaining undergraduate requirements while enrolling in graduate classes. Accelerated students are restricted in their fourth year to 15 credits/term of undergraduate and graduate credits combined (but may apply for special permission to exceed this cap). Up to 20 graduate credits will apply to the master's degree. In the fifth year, participants must register full-time as graduate students in both the fall and spring terms. Students will earn their bachelor's degree at the end of their fourth year and master's degree at the end of their fifth year.

Students in the accelerated bachelor's/master's program fully participate in the graduate school experience and prepare themselves for their future careers by:

- Developing new skills with advanced coursework
- Gaining real-world experience through a required practicum or internship, and
- Working with experienced researchers on basic and applied research problems

Graduate school is challenging, but the accelerated program allows motivated students to obtain their graduate degree and discover their career path--all while saving up to one year's worth of tuition!

Note: the Accelerated program is currently open to participating majors in Dietrich School of Arts and Sciences; College of General Studies; School of Computing and Information; and School of Health and Rehabilitation Sciences. Students must speak with their undergraduate program to confirm participation.

Try out Public Health

Not sure what public health is all about? Explore public health or learn more about the school and the professional field by...

- Taking a course for credit to either satisfy a general education elective or to count towards a future graduate degree
- Attending events that are open to the University, including talks, workshops, or presentations,
- Visiting an informational session or fall open house for prospective students,
- Check out our faculty and find out whose work interests you,
- Chatting with a student services coordinator to learn more about our different departments and programs,
- Talking to your advisor,
- Contacting our Office of Student Affairs (PHAdmissions@pitt.edu) with questions or to set up a meeting.

Preparing your Application
Students interested in the accelerated bachelor's/master's program should contact us early for information. They will apply online through SOPHAS Express (details below) to the specific department and program in the middle of their junior year. Applicants should plan on:

- completing background courses in behavioral and social sciences (with a C or better)
- having appropriate mathematical coursework to take Principles of Statistical Reasoning (usually college-level statistics, algebra, or calculus with a C or better)
- completing additional program-specific requirements
- being on track to complete at least 96 credits before you start as a graduate student
- meeting with the Public Health Office of Student Affairs and the individual graduate programs of interest before applying
- submitting a completed graduate application online via SOPHAS Express by January 15 of their junior year

**How to Apply**

Accelerated Bachelor's/Master's Applicants will complete an abbreviated application through SOPHAS Express.

- Apply online through SOPHAS Express
- Pay $50 application fee per designation to SOPHAS Express
- Submit a personal statement and resume through SOPHAS Express
- Submit three recommendations through SOPHAS Express
- Upload unofficial transcripts for ALL post-secondary education directly to your SOPHAS Express application

**Accelerated Bachelor's/Master's Program Admission Requirements**

In addition to the general requirements, each department has its own admissions requirements.

<table>
<thead>
<tr>
<th>Department (Program)</th>
<th>Admission Requirements for Accelerated Bachelor's/Master's Program</th>
</tr>
</thead>
</table>
| Behavioral and Community Health Sciences (MPH) | Undergraduate GPA: 3.5  
Health-related experience (work or volunteer)  
All majors acceptable if above criteria are met |
| Biostatistics (MS, MS-HDS, MS-SCG) | Undergraduate GPA: 3.0  
Prior coursework: calculus (6 credits)  
All majors acceptable if above criteria are met |
| Environmental and Occupational Health (MPH or MS) | Undergraduate GPA: 3.0  
An undergrad major in an applied/natural science, engineering or mathematics |
| Epidemiology (MPH or MS) | Undergraduate GPA: 3.2  
Prior coursework: social sciences (6 cr.), mathematics (3 cr.), human biology (3 cr.)  
All majors acceptable if above criteria are met |
| Health Policy and Management (MPH) | Undergraduate GPA: 3.5  
All majors acceptable, if above criterion is met |
| Human Genetics (MPH) | Undergraduate GPA: 3.0  
Prior coursework in genetics; other college level coursework in biology may be considered to fulfill this requirement on a case-by-case basis  
An undergrad major relevant to public health, biology, and/or genetics |
| Human Genetics (MS) | Undergraduate GPA: 3.0  
Prior coursework in genetics and either calculus or statistics  
Additional coursework in biochemistry and behavioral or social sciences is recommended but not required  
An undergrad major related to the biological, quantitative, or behavioral sciences |
Genome Bioinformatics  
(\textit{MS})  
Undergraduate GPA: 3.0  
one course in calculus or statistics, one course in programming or coding, and one course in biology or genetics or a related field is required  
An undergrad major in mathematics, computer science, biology, or a related field

Infectious Diseases and Microbiology  
(\textit{MPH-MIC, MPH-PEL, or MS})  
Undergraduate GPA: 3.3  
Strong letters of recommendation from persons directly familiar with academic performance  
Appropriate undergraduate major

**Department-specific Admission Requirements**

Each program at Pitt Public Health has specific requirements. Once you know which program(s) you're applying to, be sure to review the departmental requirements listed below.

**Behavioral and Community Health Sciences**

\textit{MPH applicants}

- MPH applicants should have an undergraduate quality or grade point average of 3.0  
- MPH applicants must meet the school-wide requirements.  
- GRE scores are optional.

\textit{PhD applicants}

- PhD applicants must hold a post-baccalaureate degree in a discipline relevant to public health.  
- PhD applicants must have a graduate quality or grade point average of at least 3.3.  
- GRE scores are not accepted.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (100); IELTS (Band 7.0, which must include the academic writing and reading modules); and Duolingo English Test (120).

**Biostatistics**

The following table summarizes the department-specific requirements for admission by degree:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Calculus (6 credits)</td>
<td>Yes</td>
<td>Yes</td>
</tr>
<tr>
<td>GRE</td>
<td>Optional</td>
<td>Recommended</td>
</tr>
</tbody>
</table>

**International Applicants**
In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (100); IELTS (Band 7.0, which must include the academic writing and reading modules); and Duolingo English Test (120).

**Environmental and Occupational Health**

*MS and PhD applicants:*

A bachelor's degree in the physical, chemical, or biological sciences with at least a 3.0 grade-point average overall and in the basic sciences. Previous courses in organic chemistry, biology, physics, and calculus would be useful.

GRE scores are optional.

*MPH applicants:*

A bachelor's degree in the physical, chemical, or biological sciences with at least a 3.0 grade-point average overall and in the basic sciences.

GRE scores are optional.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (80); IELTS (Band 6.5, which must include the academic writing and reading modules); and Duolingo English Test (110).

**Epidemiology**

Three college-level credits of human biology course work. Examples of qualifying courses include general/introductory human biology, microbiology, cell biology, genetics, physiology, and anatomy. Advanced Placement (AP) biology coursework does not fulfill the human biology prerequisite requirement. Applicants must fulfill all prerequisites before beginning their studies.

GRE scores are optional.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (90, but over 100 is strongly preferred); IELTS (Band 7.0, which must include the academic writing and reading modules); and Duolingo English Test (115).

**Health Policy and Management**

*MHA and MHA/MBA applicants*

Minimum of three credits in college-level mathematics (algebra or higher) or statistics
Minimum of six credits in the social and behavioral sciences, preferably with at least one course in economics
GRE scores are not a required component for the MHA application. For those students who feel that their past academic performance and/or prior work history do not adequately represent their skill set (or strength of their application), the GRE may be submitted for additional consideration. A strong test score can help offset the lack of industry experience and/or previous academic success.

*MPH and JD/MPH applicants*

Minimum of three credits in college-level mathematics (algebra or higher) or statistics
Minimum of six credits in the social and behavioral sciences, preferably with at least one course in economics
GRE scores are optional for MPH applicants and LSAT scores are optional for the MPH portion of the JD/MPH application

*MS applicants*

QPA of 3.0 or higher (undergraduate degree)
Undergraduate or graduate calculus with a 3.0 or higher
GRE scores are optional.
Recommended: coursework in statistics, economics, and another social science
**PhD applicants**

- QPA of 3.3 or higher (master's degree not required)
- Undergraduate or graduate calculus with a 3.0 or higher

GRE scores are not a required component for the PhD application. Applicants who feel that their past performance and/or prior work history do not adequately represent their skill set may submit GRE scores for consideration.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (90); IELTS (Band 6.5, which must include the academic writing and reading modules); and Duolingo English Test (115).

**Human Genetics**

**MS in Human Genetics**

- Bachelor's or graduate degree in a relevant discipline
- Introductory courses in genetics and calculus (required), as well as biochemistry and behavioral/social sciences (recommended).
- The General Graduate Record Examination (GRE) scores for the verbal, quantitative, and analytical tests are optional.

**MS in Genetic Counseling**

- A bachelor's degree from an accredited college or university with a minimum quality point average (QPA) of 3.0.
- Completion of an undergraduate course in each of the following: genetics, organic chemistry, general biochemistry, statistics, and a behavioral or social science.
- Graduate Record Examination (GRE) scores will not be accepted.
- Submission of a personal statement that discusses their interest in becoming a genetic counselor and highlights their strengths, previous experiences related to genetic counseling and understanding of the field.
- Applicants are encouraged to gain exposure to the field of genetic counseling by volunteering at clinical genetic centers, speaking with practicing genetic counselors, and/or pursuing other opportunities to educate themselves about the field prior to admission.
- Admission to the Genetic Counseling Program requires an interview by the faculty and clinical staff involved in the counseling internship programs.

**MPH in Public Health Genetics**

- A bachelor's degree in a discipline relevant to public health, biology and/or genetics or must have substantial knowledge of a discipline relevant to public health gained either through study or experience.
- The General Graduate Record Examination (GRE) scores for the verbal, quantitative, and analytical tests are optional.
- Six college credits in behavioral and/or social sciences (with a C or better).
- Three college credits in mathematics or statistics (with a C or better).
- An introductory course in genetics is required; other college-level coursework in biology may be considered to fulfill this requirement on a case-by-case basis. Coursework in biochemistry and calculus is helpful but not required.

**MS in Genome Bioinformatics**

- Bachelor's degree in mathematics, computer science, biology, biotechnology, or related field.
- One course in calculus or statistics and one course in biology, genetics or related field.
- Programming/coding experience as evidenced by prior coursework or work experience.
- The General Graduate Record Examination (GRE) scores for the verbal, quantitative and analytical tests are optional.

**PhD in Human Genetics**

- Bachelor's or graduate degree in a relevant discipline. Applicants with bachelor's degrees in unrelated fields who have acquired substantial knowledge of genetics through coursework or work experience may also be considered for admission on a case-by-case basis.
- Introductory courses in genetics and calculus (required), as well as biochemistry and behavioral/social sciences (recommended).
- The General Graduate Record Examination (GRE) scores for the verbal, quantitative and analytical tests are optional.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (80); IELTS (Band 6.5, which must include the academic writing and reading modules); and Duolingo English Test (110).
Infectious Diseases and Microbiology

**MS and PhD programs**

- Minimum 3.0 combined grade-point average in biology, chemistry, math, and biochemistry and/or molecular biology and/or immunology
- Relevant research experience in biochemistry, immunology, and molecular biology
- College biology with or without microbiology
- Chemistry, including organic chemistry with laboratory and biochemistry
- College-level algebra
- GRE scores are optional

**MPH programs**

- Minimum six credits of college-level behavioral science, to include at least one course in sociology or social psychology and an additional course in anthropology, economics, political science, psychology, or sociology with a grade of C or better.
- GRE scores are optional.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (90, but 100 is preferred); IELTS (Band 7.0, which must include the academic writing and reading modules); and Duolingo English Test (115).

**Multidisciplinary Master of Public Health** (for clinically trained health professionals)

*The program is open to...*

- Physicians, dentists, and veterinarians
- Holders of doctoral degrees in the health sciences
- Advanced medical and dental students (considered on an individual basis)
- Holders of other relevant doctoral-level degrees (considered on an individual basis)

If you're a graduate of a foreign medical and dental school, you must hold a valid medical or dental license in the United States, be eligible for licensure, be in a residency or fellowship program, or be a visiting clinician planning to return to your native country.

GRE, MCAT, or DAT scores are required. Other test scores are considered on a case-by-case basis. International applicants must submit GRE scores.

**International Applicants**

In addition to the application materials required of all students, international students must submit an official score report from the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Duolingo English Test and a WES ICAP evaluation for all education from outside of the United States. The minimum acceptable scores are: TOEFL (80); IELTS (Band 6.5, which must include the academic writing and reading modules); and Duolingo English Test (110).

**Certificate Programs**

*Applicants must possess:*

- U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or a combination

Applicants must meet the requirements for admission to MPH.

**Non-Degree Status**

- US bachelor's degree or the equivalent foreign degree.
Non-degree applicants must be U.S. citizens or permanent residents. In some cases, local applicants on a visa may apply, but must contact the Office of Student Affairs to verify eligibility before submitting an application. Non-degree students can take up to 12 credits (cumulative maximum). If a non-degree student is later accepted into a degree program, that program will decide which of those credits may be applied to the degree requirements.

Tuition & Financial Aid

Tuition and fees are set by the University and the official postings should be consulted for current information.

Learn more about Pitt Public Health Tuition Costs and Billing

Financial Aid

The School of Public Health cannot guarantee funding to every student. However, almost all Pitt Public Health doctoral students and many master's students receive some type of financial aid, whether in the form of full or partial scholarships, fellowships, student assistantships, student employment, or student loans.

Students who receive aid generally receive it through their department, and the amount of aid available varies among the programs. Departments may award graduate student research assistantships to international students.

Important Information on Financial Aid for International Applicants

In general, international students are not eligible for student loans, federal traineeships, or fellowships. International students may be eligible for selected scholarships or assistantships. (A significant number of our international doctoral students are supported by assistantships.)

Important: At the time of admission, international applicants who have not been offered financial aid are required to submit an affidavit, indicating that they have sufficient funds to cover their tuition and living expenses for the duration of the program. Visa documents are issued on the basis of these affidavits, and the expectation of self-support continues throughout the period of enrollment.

International students should always consult with the Office of International Services before applying for student employment.

Contacts for Financial Aid

Contact your Pitt Public Health Department Student Services Staff or academic advisor first with questions about student assistantships, scholarships, and hourly employment.

University of Pittsburgh Student Loans

Visit the graduate student financial aid page or contact the University's Office of Admissions and Financial Aid 412-624-7488.

Student Hourly Employment

Contact your Pitt Public Health Department Student Services Staff or your departmental academic advisor.

Visit the student employment page or contact the University's Office of Human Resources at 412-624-7312.

Scholarships, Assistantships, Fellowships

Contact your Pitt Public Health Department Student Services Staff or academic advisor.

Key Deadlines

Loan Applications

Student loan applications are processed for Pitt Public Health students by the University's Office of Admissions and Financial Aid (OAFA; 412-624-7488). See complete instructions for applying for a student loan on the University's Office of Admissions and Financial Aid page.

Student Loan Deadlines
Students are encouraged to submit loan application documents as soon as possible before the start of the term for which a loan is requested.

For information about student loans, view the University's Office of Admission and Financial Aid's quick reference guide for graduate students.

Types of Aid

Student Loans

Generally, applicants must be U.S. citizens or permanent residents. Contact Office of Admissions and Financial Aid for information on loan options, availability, and to apply.

Call 412-624-7488 to check the status of your loan application.

Free Application for Federal Student Aid (FAFSA)

The Free Application for Federal Student Aid (FAFSA) is required for all students who wish to be considered for loans or Pitt Public Health aid. The University of Pittsburgh federal school code is 008815.

Federal Regulations on Student Loans: Satisfactory Academic Progress (SAP)

Institutions participating in Title IV Federal Student Aid programs must monitor satisfactory academic progress of students receiving any federal loans or other aid (e.g. scholarships).

To demonstrate satisfactory progress, students must maintain a 3.0 GPA and complete at least 67% of the total credits attempted at any point. Doctoral students must complete the degree within the statute of limitations for the degree and must complete the degree with no more than 150% of the required credits. If progress is not met, students may be ineligible to receive loans or other aid. Students may appeal, in which case they will have one term to achieve the SAP standards. See Mike Dolinger in the Office of Student Affairs, to submit an appeal of determination of no progress.

If you receive federal aid, you should read the entire SAP policy. In particular, FTDR registration is counted as 9 credits for the purposes of this law; retaking courses and receiving course grades of W, I, G, F, N (audit) and R all count towards the stated totals. Advanced standing credits also count toward the total number of credits taken. Also, carrying a large number of I, G, W, R, and F graded credits may potentially violate the 67% completion rule. Contact your instructor(s) about filing real grades on a term-by-term basis, where appropriate.

Emergency Assistance Fund

The University may provide emergency assistance. Please visit https://www.studentaffairs.pitt.edu/dean/student-emergency-assistance-fund/ or call 412-648-1006 for more information.

Grants and Scholarships

Important Note on Loan Eligibility with Regard to Grants and Scholarships

The University recalculates a student's loan eligibility whenever additional financial aid appears in the student financial system. New aid may result in a reduction or total cancellation of loan eligibility, including an obligation to immediately repay all or part of a loan already disbursed. If you receive a scholarship, you may want to schedule a meeting with a loan counselor in the Office of Admissions and Financial Aid and ask for a recalculation of your loan eligibility.

University Aid

The University offers several scholarships throughout the year that are suitable for graduate students. These scholarships will be announced to departments and students will be invited to apply.

PittFundSMe

All students seeking aid should fill out a personal profile at my.pitt.edu, PittFundSMe, to be considered for any University aid for graduate students.

Pitt2Pitt Funding

Graduating Pitt undergraduates and alumni of an undergraduate program at Pitt can receive a Pitt2Pitt tuition scholarship when they are enrolling in a participating Pitt graduate or professional program.
Pitt Alumni Association Graduate Scholarship
A one-time $5,000 scholarship awarded to graduate students who also completed their undergraduate degree at Pitt.

The George L. Carson Graduate Fellowship for Pitt Alumni
Awarded to a graduate student who was affiliated with a Pitt athletics program as an undergraduate. Applications will be available in February and are typically due May 1. Contact the Student Life and Compliance Office in the Athletics Department with questions.

Owens Fellowship
A needs-based fellowship (approximately $6,000 per year) that can be used for tuition, books, and living expenses. Copies of GRE scores or other standardized test scores may be required. Applications are available in early May. Login to my.pitt.edu and go to the PittFund$Me link, for applications and information.

Provost's Dissertation Year Fellowship for Historically Underrepresented Doctoral Students
A needs- and merit-based grant for doctoral students intended to provide financial support and professional development for students who are considered Underrepresented Racial Minority (URM) in their field and whose racial/ethnic background contributes to the diversity of their program and field. Applicants must also be in the final year of their doctoral program, having completed all required coursework and working on their dissertation. Contact VPGodley@pitt.edu for more information.

K. Leroy Irvis Fellowships
Graduate schools receive one award each year to provide first-year support of an outstanding, full-time doctoral student who supports the University's and school's diversity mission. The Irvis Fellowship provides a stipend, tuition remission, and health insurance for the first year; the academic department provides the same level of support for years two and three. Nominations are made by departments.

Pitt Public Health Aid
The School of Public Health awards the following partial scholarships annually, generally at the start of the fall term. Students may contact their departments and request to be nominated.

Campaign for the Next 5,000 Alumni
Financial support based on need, merit, and diversity. Although preference may be given to master's students, doctoral students are also eligible. Students must be nominated by their departments.

Dean's Endowed Doctoral Scholarship
Support for doctoral students based on need, merit, diversity, and community service. Students must be nominated by their departments.

Dr. Edgar and Lauraine Duncan Scholarship
Financial support for disadvantaged students who are members of a group that contributes to the diversity of the school (e.g. race/ethnicity, first generation, etc.). Funds can be used for tuition, student fees, books, travel expenses, and other purposes. Students must be nominated by their departments.

Bernard D. Goldstein Student Award in Environmental Health Disparities and in Public Health Practice
For students or postdoctoral fellows studying either the environmental causes of health disparities or the practice of public health. This award is administered in alternate years by the Center for Health Equity (even-numbered years) and the Center for Public Health Practice (odd-numbered years). Apply by November 17.

Segal AmeriCorps Education Award
Scholarships are available for incoming Pitt Public Health US students who have successfully completed at least one year of service with AmeriCorps. Applicants must indicate their AmeriCorps experience in their SOPHAS application and then will be automatically considered for an award, pending confirmation of service. The scholarship will be issued as a Pitt Public Health Futures Award.

Coverdell Fellows Program
The School of Public Health and the Center for Global Health are proud to announce a partnership with the Peace Corps Paul D. Coverdell Fellows Program, which provides qualified Returned Peace Corps Volunteers (RPCVs) financial support towards a Master of Public Health (MPH) or Master of Science (MS) degree as well as experience working with local under-served communities. Coverdell Fellows receive a 40 percent tuition + fees scholarship for up to four academic terms of study.

Visit the Pitt Public Health website for additional information.
Departmental Awards

Behavioral and Community Health Sciences

Carol McAllister Award
Based on need and merit, awards can be used for books, fees, stipends, or travel expenses.

Karen S. Peterson Memorial Research Award for Women's Health
Assist with research or practice leading to improvement in women's health.

Joseph and Brigida Ricci Scholarship
Needs-based support for an outstanding student.

Myrna Silverman Scholarship
Needs-based support for an outstanding doctoral student.

BCHS Research Support Fund
These funds are available for BCHS master's and doctoral students to assist with the costs of conducting research toward the MPH, DrPH, or PhD degrees. MPH students must have formed their committees and obtained IRB approval in order to be eligible. Doctoral students must have passed their Overview and have IRB approval in order to be eligible.

Biostatistics

Harvey Co Chien Endowed Scholarship Fund
Needs-based tuition awarded to outstanding accepted full-time MS applicants.

Biostatistics School of Public Health Scholarship
Tuition support awarded to a School of Public Health Biostatistics student or students.

Biostatistics Department Achievement Award
Tuition support awarded to outstanding accepted full-time Biostatistics MS applicants.

Department of Biostatistics Endowment Fund
Resource support including travel and registration for academic and professional conferences.

Epidemiology

Arlene W. Caggiula Student Award in Nutrition
Tuition funds for continuing master's and doctoral program Epidemiology students focusing in the area of nutritional epidemiology, a nutrition-related component of chronic disease, a nutrition-related component of aging, or the evaluation of the epidemiology of a nutrition-related disorder.

Katherine Detre Scholarship
Tuition awards for promising accepted doctoral applicants or continuing doctoral students who demonstrate high levels of scholarship and commitment to public health. Established to supplement graduate student support in the Epidemiology Data Center (EDC). Student applications are not solicited, since an EDC faculty committee selects the award recipient.

Lewis H. Kuller Scholarship Award
Tuition support for eligible accepted PhD applicants, new PhD students, or continuing, active PhD students based upon merit or need. Student applications are not solicited, since recipients are selected by a faculty committee. Funds are awarded through a Graduate Student Researcher (GSR) appointment providing a monthly stipend, 100% tuition coverage, and health insurance coverage.

Evelyn H. Wei Memorial Fund
Financial assistance for Epidemiology students in good academic standing seeking travel funding to attend approved scientific meetings or events. Primary consideration is given to students planning travel to the annual meeting of the American Public Health Association (APHA), although other travel requests will be considered. Travel expenses may include on-site or virtual event registration fees or poster preparation expenses.
Evelyn H. Wei Scholarship Award in Epidemiology
Tuition assistance for Epidemiology students studying at any level in the Department of Epidemiology. Continuing, active master's and doctoral program students in good academic standing are eligible. Scholarships are based on potential contribution to public health, with emphasis on scholarship, leadership, and service.

Health Policy and Management

The Dawn Gideon Scholarship for MHA Students
Scholarship assistance for an MHA student whose talents lean towards creative problem solving and an understanding of the value all individuals bring to the process.

Nathan Hershey Endowment in Health Administration
An annual award to a full-time student enrolled in the MHA program. Secondary criteria shall include need.

HPM Friends and Alumni Scholarship Fund
Tuition support to students within the Department of Health Policy and Management.

Hunter Group Health Policy and Management Student Scholarship Award
This endowed fund provides tuition assistance for students in the Department of Health Policy and Management.

Thomas and Judy Priselac Endowed Fund for Healthcare Leadership
Provides support for MHA students participating in selected professional and leadership development activities nationally, including professional association conferences, academic team competitions, professional networking, and other health management career path opportunities.

Surma Scholarship for Long-Term Healthcare Administration in Policy and Aging
This endowed fund provides support to Pitt Public Health students who are Pennsylvania residents and have demonstrated interest in long-term healthcare administration or policies.

Human Genetics

George Qi Wang Memorial Student Assistance Fund in Pharmacogenetics
Tuition support for students pursuing research studies in pharmacogenetics; open to students in any of the Schools of the Health Sciences or Arts and Sciences.

Robert Ferrell Student Resource Fund
Provides support for books, lab fees, travel or other educational expenses for students in the Department of Human Genetics at Pitt Public Health. Shall be administered by the Chair of the Department of Human Genetics.

C. C. & Clara Li Endowed Scholarship
The endowment is used to support tuition, travel, or other educational expenses for Human Genetic students studying at any level. It may also be used to help promising current students attend a scientific meeting to present their research. The award is offered to an incoming student.

Infectious Diseases and Microbiology

Bob Yee Student Award
Tuition support.

Other Financial Support - Resources for Research and Professional Development

Russell Rule Rycheck Award for a Promising MPH Student
A $500 award for MPH students committed to the practice of public health. Funds can be used for books, coursework, travel, or professional development. Applications are due to stuaff@pitt.edu, by December 4 each year. If December 4 falls on a Saturday or a Sunday, applications are due the following Monday.

William T. Green Jr. Award in Public Health Studies - Awarded in Fall and Spring Terms
A $750 award to support research and special projects for currently enrolled Pitt Public Health students. Funds can be used for direct research costs, books, travel, or professional memberships. Applications are due to stuaff@pitt.edu by December 4 for the fall term, and by March 15 for the spring term.
Other Financial Support - Travel Awards for Conferences and International Study

Pitt Public Health Support

Student Government Association
Students can apply for a modest travel award from the Pitt Public Health Student Government Association. Applications are available in the Office of Student Affairs.

University Support

Foreign Language Area Studies (FLAS)
Funded by the U.S. Department of Education with the intent of promoting the study of a modern, European foreign language within a cultural, scientific, or historical framework. Fellowships are awarded annually for summer and academic year study. Submit an application to Pitt Public Health, and we will then select nominees and forward them to the University Center for International Studies.

Graduate and Professional Student Government
Grant support for travel to academic and professional conferences. Applicants are eligible for one grant per fiscal year (July 1- June 30), and funds are awarded on a first-come, first-served basis.

Nationality Rooms Scholarships
These scholarships reflect decades of work honoring education through cultural exchange. After the Nationality Rooms were built in Pitt's Cathedral of Learning, committees stayed together to raise funds enabling eligible Pitt students to study abroad, thereby experiencing another culture in depth. There are several different awards available.

University Center for International Study Scholarships
The Pitt Study Abroad Office offers a central listing of the range of scholarship possibilities available to help defray the cost of a study abroad program. Scholarships are managed by academic departments and schools such as the Center for Global Health or the College of General Studies.

Women's Studies Student Research Fund
Awards of up to $1,000 to support travel expenses, secretarial costs, research materials, or other direct costs for research related to the study of women, gender, and/or sexuality.

EXTERNAL SUPPORT

The following external sources also provide travel support for conferences and international study:

Fulbright Fellowship Program
Grants for individually designed study/research projects or for English Teaching Assistantships. During their program, Fulbrighters will meet, work, live with, and learn from the people of a host country, sharing daily experiences.

Fulbright Hays
Funding for students wishing to conduct their doctoral dissertations abroad.

George Mitchell Scholarship
National scholarship for students interested in pursuing one year of graduate work in an institution of higher education in Ireland or Northern Ireland.
International Education Financial Aid

Information on financial aid for U.S. and international students wishing to study abroad.

External Funding Opportunities

Student Assistantships

Graduate student assistants, graduate student researchers, teaching assistants, and teaching fellows are students who receive support in return for specified duties while gaining teaching, teaching-related, or research experience under the guidance of a faculty mentor.

Whenever available, assistantships and traineeships are awarded by the departments. There are no assistantships available through the Office of Student Affairs or the Dean's Office. Students may receive an assistantship from any department in the University, but there is no central listing of assistantships available.

Descriptions

Traineeships

A traineeship is money from a training grant allocated to students to support advanced study in a specified field. A traineeship may provide full or partial tuition and/or living expenses. Usually, there is no service requirement. Several departments have traineeships available for students in particular concentrations.

Assistantships

An assistantship provides a full or partial tuition scholarship, a stipend, and individual health insurance coverage in exchange for performance of specified duties, usually in support of a faculty member's research project. Assistantship appointments can be full or part-time. Each department may award a limited number of student assistantships, usually to doctoral students. Students may also be awarded an assistantship by another University department. There is no central listing of University assistantships.

Teaching Assistants

A teaching assistant (TA) is a student who holds a teaching or teaching-related appointment made within the University regulations pertaining to teaching assistants. No teaching assistant shall be employed to teach post baccalaureate courses.

Teaching Fellows

A teaching fellow (TF) is the same as a teaching assistant except that the teaching fellow is more educationally advanced or experienced, typically holding the equivalent of a master's degree. TFS should not be assigned to teach graduate courses. Exceptions may be made only in rare cases where the individual shows clear evidence of outstanding skills in specialized areas and when the individual is directly supervised by faculty.

Eligibility

Students must be appointed through Pitt Public Health and must be enrolled at Pitt Public Health.

Effort

Full-time GSRs are expected to devote twenty hours per week to the research project they are assisting. GSRs may be required to devote more hours if the research pertains to their thesis or dissertation. Time expenditure of part-time GSRs is proportional to this standard of twenty hours (i.e. half-time GSRs must devote ten hours per week to their research project, and more if the research pertains to their thesis).

TAs and GSAs have the same obligation of twenty hours a week. However, their assignments will differ from a GSR and will not likely relate directly to their research interests.

Appointments

GSR, GSA, and TA appointments may be made annually for one to no more than three terms at a time (one academic year). Renewals are subject to satisfactory performance and availability of funding.

Evaluation

At least once each year, the faculty supervisor must provide a written evaluation of a GSR/TA/GSA's performance to the student and to the department. A suggested evaluation form is available from the department administrator, who should request the evaluation in the spring term. A copy of the completed evaluation should be provided to the department administrator.
Stipend
The monthly stipend amount is set by the department within a range established by the University. Monthly stipend payments for part-time GSR positions will be proportional to this standard. The University does not set a different stipend level for TA and GSA positions.

Tuition Scholarships
Full-time GSR/GSA/TAs are eligible to receive full tuition scholarships to cover up to and including 15 credits per term. Part-time positions are eligible for partial tuition scholarships in accord with their appointments, i.e., a half appointment receives a scholarship for six credits and a quarter appointment covers three credits per term.

Health Insurance
GSRs, GSAs, and TAs are provided individual coverage under the UPMC Health Plan for graduate students. Family coverage is available at an additional cost to the student.

University Policies
Learn about University policies regarding student assistantships.

Student Employment
Registered students can work in part-time student positions for a maximum of 20 hours per week in the fall and spring terms, and 37.5 hours per week in the summer term. Graduate students do not generally receive funding through the federal work-study program.

Tuition and Billing
The tuition and fees listed below reflect current information at the time of posting and are likely to increase in the next academic year. Rates are set by the University and the official postings should be consulted for current information.

Tuition Rates for 2023-2024

Billing Information

Contact the Student Payment Center, 412-624-7520, with billing questions.

Invoice Payment
Students and their Authorized Users will be notified twice before each due date if there is a balance due on the student account. Electronic invoices (eBills) are posted on the student's account after registration for classes, on or about the 20th of every month, and are due on the 17th of the next month. The University may also place a financial hold on overdue accounts.

Add/Drop
Students who drop courses by the term's deadline for add/drop may have their tuition for the term adjusted if they are part-time students, or if the drop changes their status from full-time to part-time.

Resignation Refunds Direct Deposit
Adjustments to tuition charges resulting from official resignation or Add/Drop are based on the effective date of resignation and in accordance with the federally mandated calculation. Contact the Student Payment Center (412-624-7520) for information on the amount of tuition adjustment.

Installment Payments
All students should enroll for direct deposit as refunds and financial aid are awarded through eRefunds. They should also update their authorized users (parents, spouses, and others) so that they can have access to their student account.

Individual Development Plan

A Tool for Outlining Professional Development Objectives

A Graduate Student Independent Development Plan (IDP), is a tool for helping students and advisors outline and discuss short-term and long-term objectives to guide the student's professional development.

The School of Public Health doctoral students and advisors are required to complete an IDP at least annually, typically timed to coincide with the required annual doctoral committee meeting. The school has an IDP template or students and advisors may substitute any other form that meets the same purpose (e.g. department-specific templates or templates provided by professional societies).

Completed IDP forms should be kept in student files at the department level. They should be treated as confidential student records. The Report on Requirements form for the doctoral preliminary exam and dissertation overview includes a checkbox that the committee should use to certify that an IDP has been completed within the six months prior to the exam.

IDPs are intended as a career development tool, and are not a substitute for a GSR evaluation that assesses job performance. For students whose GSR is closely tied to their dissertation research, it may be possible to combine the two, but it is still necessary to assess academic development and job performance separately.

IDPs are not required for master's students but they are highly recommended. This policy was voted and approved by the Educational Policies and Curriculum Committee and the Pitt Public Health Council on February 2015.

SPH-Epidemiology Areas of Research Emphasis

Areas of Emphasis

Students take a series of core courses in epidemiology and public health, then may choose to enroll in courses in one or several Areas of Emphasis. Faculty in each of these areas have major research and/or community service programs that provide excellent facilities for student research and field training, and some have training grants. Summaries of each area, and their specific details, are provided below.

Faculty members in each of these areas offer major research and/or community service programs that provide excellent facilities for student research and field training.
Areas of research broadly include: successful aging and longevity, physical function, activity and disability, osteoporosis, vascular aging, sarcopenia, brain aging and mobility.

Training grant: All trainees participate in a three course series on aging, hands-on research training, research conferences and seminar series. Additional career development opportunities for post-doctoral students are available.

All doctoral trainees design, implement, analyze data, and report the results of an independent study as part of the program with a goal of submitting three manuscripts for publication. Trainees are encouraged to present their research in a variety of venues, including SPH Dean's Day.

Faculty members primarily working in this area include: Robert Boudreau, Jane Cauley, Nancy Glynn, Lewis Kuller, Iva Miljkovic, Anne Newman, Caterina Rosano, Andrea Rosso, Elsa Strotmeyer, Joseph Zmuda

Collaborating Faculty include: Steve Albert, Howard Aizenstein, Steve Belle, Emma Barinas-Mitchell, Jen Brach, Maria Brooks, Clare Bunker, Lora Burke, Mary Ganguli, Tiffany Gary-Webb, Susan Greenspan, Joseph Hanlon, John Jakicic, Candy Kammerer, Oscar Lopez, Neelesh Nadkarni, Karen Matthews, Ryan Minster, Trevor Orchard, Sara Piva, Chip Reynolds, Akira Sekikawa, Jian-Min Yuan

Areas of focus include: population health status assessment; infectious and chronic disease surveillance and control, maternal and child health epidemiology and environmental health epidemiology.

Opportunities include practicum experiences, independent study and other applied projects. An enhanced practicum experience is the Summer Institute in Applied Public Health at the Allegheny Health Department.

Faculty members currently working in this area include LuAnn Brink, Marshal Ma, Kristen Mertz, and Thomas Songer.

An advanced course is offered in cancer epidemiology on topics of surveillance, etiology and prevention.

Research focus areas include: breast cancer and hormonal factors; environmental exposures determined by objective biomarkers and gene-environment interaction in the etiology of and susceptibility to cancer, including cancers of the lung, liver, colorectum, urinary bladder, breast, ovary and prostate; molecular epidemiology; cancer screening and related health services; diet as a source of risk and protective factors of cancer; obesity and weight loss for cancer prevention.

Cancer Epidemiology and Prevention Program Seminar series at the University of Pittsburgh Cancer Institute, an National Cancer Institute-designated Comprehensive Cancer Center.

Faculty members currently working in this area include: Clareann Bunker, Jane Cauley, Brenda Diergaarde, Lewis Kuller, Faina Linkov, Jian-Min Yuan.
Faculty Contact: Akira Sekikawa, MD, MPH, PhD

Areas of research broadly include: cardiovascular aging and longevity; body composition and obesity; cardiovascular epidemiology; physical activity and subclinical CVD; novel CVD risk factors, high risk and ethnic subpopulations; vascular health; hypertension; peripheral nerve function; lipid metabolism, and evaluation of cardiac interventions.

Diabetes areas of research include extensive programs in both Type 1 and Type 2 diabetes. For type 1 diabetes, these include a 30 year follow up study of childhood onset diabetes, (Pittsburgh Epidemiology of Diabetes Complications Study) and the national DCCT/EDIC study also with over 25 years follow up. For type 2 diabetes the Diabetes Prevention Program Outcomes Study and the translation of the interventions to the community form the basis of much activity including a Diabetes Prevention Support Center.

Training grant: Designed to provide concentrated, tailored training in the quality collection of subclinical atherosclerotic measures, organized around four major research strengths: vascular aging, women's health, genetics and high risk/international populations. All trainees will participate in course work, research field work, and professional development (including CVD and diabetes journal clubs, independent research, grant writing, manuscript preparation and conference presentations).

Faculty members currently working in this area include: Emma Barinas-Mitchell, Marnie Bertolet, Maria Mori Brooks, Clareann Bunker, Tina Costacou, Samar El Khoudary, Matthew Muldoon, Suresh Mulukutla, Anne Newman, Trevor Orchard, Akira Sekikawa, Thomas Songer, Elsa Strotmeyer, Evelyn Talbott.

Faculty Contact: Steven Belle, PhD, M.Sc.Hyg.

The activities of the Epidemiologic Methods group contribute to all areas of emphasis, specializing in design and conduct of studies including adaptive trials, survey sampling, and statistical methods.

The didactic component includes three general methods courses and a design of clinical trials course. The journal club has covered topics including Latent Variable Modeling in Epidemiology and Causal Inference.

The Epidemiology Data Center (EDC) was established in 1980 as a section of the Department of Epidemiology, founded by Katherine M. Detre, M.D., Dr.P.H., and under the co-direction of Steven Belle, PhD, Maria Brooks, PhD, and Stephen Wisniewski, PhD. The EDC has collaborated in over 100 research studies sponsored by the National Institutes of Health and other agencies. Presently, the EDC coordinates data management and analysis activities for 26 research projects sponsored by federal and various other governmental or private agencies and by industry. For more information, see the EDC web-site.

The EDC hosts the CTSI Design, Biostatistics and Epidemiology (DBE) Core providing services to researchers at all stages of the research spectrum. Services include: grant application development and the pairing of researchers with statistical collaborators. It also hosts a Journal Club offering topics such as Propensity Scores and Survey Sampling.

Faculty members currently working in this area include: Emma Barinas-Mitchell, GK Balasubramani, Steven Belle, Marnie Bertolet, Robert Boudreau, Maria Mori Brooks, Clareann Bunker, Yona Cloonan, Samar El Khoudary, Anthony Fabio, Sheryl Kelsey, Wendy King, Ashley Naimi, Rachel Mackey, Bedda Rosario, Kristine Ruppert, Robert Schoen, Stephen Wisniewski.

Additional collaborators from the Department of Biostatistics include: Jong Jeong, and Abdus Wahed.

Faculty Contact: Evelyn Talbott, DrPH, MPH

Areas of research include: air pollution and cardiovascular disease outcomes, cancer epidemiology and cancer cluster investigation, ambient air lead and PM2.5 and health effects, childhood autism and personal and environmental risk factors.

Graduate student research assistantships for CDC funded projects involving ambient air lead and childhood lead poisoning, childhood autism and the environment, PM2.5 air pollution and cardiopulmonary outcomes.

All doctoral trainees conduct an independent study with the requirement to submit three manuscripts for publication. Hands on training in the area of environmental epidemiology with collaborations with over 23 state health departments through CDC environmental public health tracking programs.

Faculty members currently working in this area include: Jennifer Adibi, Gary Marsh, Evelyn Talbott, and Ada Youk.

Additional collaborators from the Department of Biostatistics include: Vincent Arena, and Jeanine Buchanich and from the Allegheny County Health Department: LuAnn Brink and Kristen Mertz.
Faculty Contact: Clareann Bunker, PhD

Areas of research include: maternal and child health (rural India); functional disability in aging (rural India); diabetes (Rwanda), hypertension, cardiovascular disease (rural India, Tobago); impaired kidney function (Tobago); infectious disease/HIV (Brazil, India, and Mozambique); bone health (Tobago); prostate cancer (Tobago, Nigeria); cancer (China); environmental health (China); application of the Internet and Mobile technology for global health and prevention. Infectious diseases/dengue modeling (Thailand, Cambodia, Laos, Vietnam, Philippines, Singapore, Malaysia, Taiwan, Brazil, Columbia); atherosclerosis, coronary heart disease, alzheimer's disease, chronic obstructive pulmonary disease (Japan).

Development of the internet Supercourse with 50,000+ members from over 170 countries, teaching over 50,000,000.

Development of Project Tycho, a global health data repository released in November of 2013 providing open access to high resolution disease data for research, training, and public health public policy at www.tycho.pitt.edu.

Faculty members currently working in this area include: Donald Burke, Clareann H. Bunker, Jane Cauley, Catherine Haggerty, Lee H. Harrison, M. Kaye Kramer, Andrea Kriska, Allison Kuipers, Ronald LaPorte, Faina Linkov, Iva Miljkovic, Jean Nachega, Anne Newman, Trevor Orchard, Akira Sekikawa, Evelyn Talbott, Willem van Panhuis, Jian-Min Yuan, Joseph Zmuda.

Faculty Contact: Lee Harrison, MD

Areas of research include: epidemiology and molecular epidemiology of serious, vaccine-preventable, drug-resistant and hospital-associated bacterial infections; prevention of HIV infection; infectious diseases surveillance; computational modeling of disease and intervention strategies; use of geotemporal analysis in infectious diseases.

Training grants: 1) Dengue and vaccine-preventable and drug-resistant bacterial infections in Brazil and 2) prevention of HIV infection in Brazil, India, and Mozambique.

All doctoral trainees conduct an independent study with the requirement to submit three manuscripts for publication. Trainees can choose traditional epidemiology or molecular epidemiology as the basis of their doctoral research.

Faculty members currently working in this area include: Steven Belle, Donald Burke, Catherine Haggerty, Lee Harrison, Lawrence Kingsley, Jean Nachega, Willem van Panhuis, and collaborating from the Allegheny Health Department: Kristen Mertz.

Faculty Contacts: Tom Songer, PhD, MPH, Anthony Fabio, PhD, MPH

Applied research in broad areas of unintentional and intentional injury including but not limited to injury from motor vehicle crash, falls, natural disasters, poisoning, head trauma, criminal violence, child maltreatment, domestic violence, and treatment of injury.

Emphasis on the application of epidemiologic methods in population and clinical settings to understand key risk and prognostic factors for primary and secondary prevention of injury.

Trainees participate in academic training in injury epidemiology and/or injury prevention and control and applied research training on specific injury and violence topics using mentors from multiple disciplines in the fields of epidemiology, statistics, trauma, behavioral sciences, surgery, psychiatry, criminology and others.

Faculty members currently working in this area include: Steven Albert, Anthony Fabio, Thomas J. Songer, Evelyn Talbott, Stephen Wisniewski, Mazen Zenati.

Faculty Contact: Joseph Zmuda, PhD

Areas of current research broadly include aging, cancer, reproduction and early development, cardiovascular disease, diabetes, obesity, sarcopenia, and osteoporosis.

Requirements vary depending on student background and needs, and are offered in collaboration with the Departments of Environmental and Occupational Health and Human Genetics in the School of Public Health.

Didactic and laboratory courses are offered.
Faculty members currently working in this area include: Jennifer Adibi, Clareann H. Bunker, Brenda Diergaarde, Allison Kuipers, Iva Miljkovic, Anne Newman, Jian-Min Yuan, Joseph Zmuda.
Collaborators from other departments include: Robert Ferrell, Candace Kammerer, Ilyas Kamboh, Ryan Minster, Dan Weeks.

Faculty Contact: Caterina Rosano, MD, MPH

Focuses on the application of epidemiology methods and cutting-edge neuroimaging methodologies in population and clinical studies to enhance etiological research and evaluation of specific therapies in the disorders of the central nervous system.
Targets the interdependent nature of clinical characterization, epidemiological methods and multimodal assessment of disorders of the central nervous system through rigorous academic training and applied research opportunities.
Maximizes the potential for applied research training and for successful field placements of the trainees through multidisciplinary mentored work with leaders in the fields of epidemiology, psychiatry, neuroscience, neurology, and others.
Read more about Specialization in Neuroepidemiology
Faculty members currently working in this area include: Jane Cauley, Mary Ganguli, Lewis Kuller, Karen Matthews, Trevor Orchard, Gale Richardson, Caterina Rosano, Andrea Rosso, Evelyn Talbott.
Collaborators from other departments include: Howard Aizenstein (psychiatry), James Becker (psychiatry), Kirk Erickson (psychology), Peter Gianaros (psychiatry), Samay Jain (neurology) Oscar Lopez (neurology), Amy Wagner (psychology).

Faculty Contact: Lisa Bodnar, PhD

Areas of research include: nutritional epidemiology, obesity epidemiology, body composition, bariatric surgery, dietary intake, and supplement use.
Relevant courses include Nutritional Epidemiology, Nutrition Assessment Laboratory.
Faculty members currently working in this area include: Lisa Bodnar, Lora Burke, Samar El Khoudary, Wendy King, M. Kaye Kramer, Andrea Kriska, Iva Miljkovic, Akira Sekikawa, Lauren Simkin-Silverman.

Faculty Contacts: Andrea Kriska, PhD, MS

This program involves translating the proven benefits of lifestyle intervention on a broad range of health outcomes including type 2 diabetes, cardiovascular disease and obesity. This program encompasses the conceptual and practical foundation needed for such public health translation initiatives. Learning objectives include a thorough understanding of disease prevention, behavioral intervention theory and lifestyle intervention training, along with a critical understanding of the methodological issues in designing and evaluating these efforts. Course work includes formal training and a practicum in which students gain community-based experience administering the lifestyle intervention, which is comprised of weight loss, increased physical activity and healthy eating.
An integral part of this AOE in the Department of Epidemiology is the Diabetes Prevention Support Center (DPSC). The DPSC is comprised of Epidemiology faculty who were originally part of the Diabetes Prevention Program, the national multi-center clinical trial that demonstrated the benefits of lifestyle intervention in preventing a chronic disease. The DPSC serves as the central training center for lifestyle intervention delivery as well as provision of subsequent post-training support.
The Department of Epidemiology is also the home of the Physical Activity Resource Center for Public Health (PARC-PH) which was developed to provide the physical activity assessment information and lifestyle intervention tools necessary to carry out prevention/translation efforts.
Faculty members currently working in this area include: Lisa Bodnar, Joyce Bromberger, Lora Burke, Margaret Conroy, Jacqueline Dunbar-Jacob, Nancy Glynn, Wendy King, M. Kaye Kramer, Andrea Kriska, Lewis Kuller, Faina Linkov, Karen Matthews, Kathleen McTigue, Trevor Orchard, Lauren Simkin-Silverman, Elizabeth Venditti, Tiffany Gary-Webb.

Faculty Contact: Gale Richardson, PhD
The Psychiatric Epidemiology Training Program focuses on the acquisition of epidemiological, biostatistical, and psychiatric concepts and methods, and on their application to research in the field of psychiatric disorders. Training is accomplished through course work in epidemiology and biostatistics, and through courses in psychiatric epidemiology that were designed specifically for the PET Program. The training experience includes the opportunity to work on research projects with faculty mentors who are active researchers in psychiatry and epidemiology within the School of Public Health (SPH) and the Department of Psychiatry within the University of Pittsburgh School of Medicine. Faculty members currently working in this area include: David Brent, Joyce Bromberger, Tammy Chung, Marie Cornelius, Nancy Day, Mary Amanda Dew, John Donovan, Mary Ganguli, Karen Matthews, Margaret McDonald, Kenneth Perkins, Gale Richardson, Stephen Wisniewski.

Faculty Contact: Catherine Haggerty, PhD, MPH

Areas of research broadly include: causes of pregnancy complications and adverse outcomes including spontaneous abortion, stillbirth, preterm birth, low birth weight, intrauterine growth restriction, and preeclampsia; obesity and nutrition among pregnant women; fertility and contraception; breastfeeding; and sexually transmitted infections. A major clinical site for collaboration is Magee-Womens Hospital, the obstetrics, gynecologic, and reproductive sciences specialty hospital associated with the University of Pittsburgh Medical Center. Global health research experiences are available through a study of pregnancy being conducted in India. Training program provides concentrated, tailored training on the patterns, risk factors, and interventions that might improve reproductive, perinatal, and pediatric health, as well as women's health across the lifespan. All trainees will participate in coursework, research field work, and professional development including courses in Reproductive Epidemiology, Epidemiology of Women's Health, and Pediatric Epidemiology; a Reproductive, Perinatal and Pediatric Epidemiology Journal Club; a Maternal and Child Health Journal Club; independent research; grant writing; manuscript preparation; and scientific conference presentations.

Trainees who engage in community service activities in addition to completing the didactic requirements will be eligible for a Women's Health Specialization, which honors trainees' combined interests in women's health research and community outreach. Faculty members currently working in this area include: Jennifer Adibi, Emma Barinas-Mitchell, Lisa Bodnar, Joyce Bromberger, Clareann H. Bunker, Janet Catov, Jane Cauley, Yona Cloonan, Marie Cornelius, Nancy Day, Samar El Khoudary, Catherine Haggerty, Sheryl Kelsey, Andrea Kriska, Lewis Kuller, Rachel Mackey, Dara Mendez, Evelyn Talbott, Nina Markovic, Karen Matthews, Gale Richardson, James Roberts, Rebecca Thurston.

Faculty Contact: Jane Cauley, DrPH

Areas of research broadly include: women's health across the lifespan, menopause and late life. Menopause and Aging focuses on furthering our understanding of chronological aging versus ovarian aging. Emphasis is placed on a broad range of topic areas including the skeleton, cardiovascular disease, mental health, physical function and disability, body composition and lifestyle. Faculty members currently working in this area include: Emma Barinas-Mitchell, Lisa Bodnar, Joyce Bromberger, Maria Mori Brooks, Clareann Bunker, Janet Catov, Jane Cauley, Marie Cornelius, Nancy Day, Natacha DeGenna, Samar El Khoudary, Catherine Haggerty, Sheryl Kelsey, Andrea Kriska, Lewis Kuller, Rachel Mackey, Nina Markovic, Karen Matthews, Dara Mendez, Gale Richardson, Akira Sekikawa, Evelyn Talbott, Rebecca Thurston.

SPH-Epidemiology Funded Research & Practice

Funded Research and Training Projects

The Department of Epidemiology, the largest department at Pitt Public Health, offers interdisciplinary research opportunities in the City Of Pittsburgh, which is recognized as an international hub for health care innovation and practice. The school is one of the nation's leading schools of public health, consistently ranking in the top tier among schools of public health in terms of NIH funding. The Department of Epidemiology accounts for about forty percent of the school's total grant funding.
The Department of Epidemiology has a central theme of "Teaching and Prevention through Quality Research," and is involved in both research and prevention activities. The department’s primary faculty members have a varied range of research interests reflected in more than 90 funded projects and more than 500 publications each year. Faculty, staff and student participation in regular seminars provides a rich collaborative environment.

Based on faculty research, the department offers many areas of emphasis including aging, applied public health, cancer, cardiovascular and diabetes, clinical trials and methods, environmental, global health, infectious disease, injury prevention, molecular and genetics, neuroepidemiology, obesity and nutritional, prevention, lifestyle and physical activity, psychiatric, reproductive, perinatal and pediatric and women's health epidemiology.

Research programs include those with global reach in over a dozen nations including: maternal and child health (rural India); functional disability in aging (rural India); diabetes (Rwanda), hypertension, cardiovascular disease (rural India, Tobago); impaired kidney function (Tobago); infectious disease/HIV (Brazil, India, and Mozambique); bone health (Tobago); prostate cancer (Tobago, Nigeria); cancer (China); environmental health (China); application of the Internet and Mobile technology for global health and prevention; Infectious diseases/dengue modeling (Thailand, Cambodia, Laos, Vietnam, Philippines, Singapore, Malaysia, Taiwan, Brazil, Columbia); atherosclerosis, coronary heart disease, Alzheimer's disease, chronic obstructive pulmonary disease (Japan).

Research Innovations

*in risk assessment*

- use of advanced imaging methods
- use of biomarkers, including genetic profiles and personal monitoring
- use of activity monitoring and environmental (air and water quality) assessment
- use of molecular tools to detect and study emerging bacterial infections - *in data management and analysis*
- adaptive designs for clinical trials
- geographic modeling
- temporal modeling

Research Highlights

through the Center for Aging and Population Health (CAPH, a Centers for Disease Control and Prevention (CDC) Research Center, supporting data collection for several large studies, primarily in older adults but also in other groups

through CAPH, addressing healthy aging by promoting a comprehensive community prevention program called the 10 Keys to Healthy Aging with funding from the National Institutes of Health, currently conducting the Lifestyles and Independence for the Elderly Trial, Testosterone Trial, and Aspirin to Prevent Events in the Elderly Trial

engaging in ongoing follow-up for the Epidemiology of Diabetes Complications study, Women's Health Initiative, Cardiovascular Health Study, Study of Osteoporotic Fracture, and Men's Osteoporosis Study

Collaborating Partners

- Pitt Public Health departments
- Pitt Department of Psychiatry
- University of Pittsburgh Cancer Institute
- Magee Womens Research Institute
- Allegheny County Health Department
- Pennsylvania Department of Health

Yuan, Jian-Min | Epidemiology | Professor | PhD, University of Southern California; MD, Shanghai Medical University; MPH, Shanghai Medical University

Zhao, Jiming | Environmental & Occupational Health | Research Associate Professor | PhD, Fudan University; MS, Nanhua University

Zmuda, Joseph M. | Epidemiology | Associate Professor | PhD, University of Pittsburgh; MPH, University of Pittsburgh; MS, University of Rhode Island
The University of Pittsburgh's School of Social Work, successor to the Division of Social Work in the Department of Sociology of the University, was founded in September 1918, and accepted its first class of MSW students that year. The school shares with the University a commitment to the advancement and application of knowledge. Students in Pitt's School of Social Work learn the knowledge, skills, and values to engage in culturally competent practice with diverse populations and communities. They learn to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques, and to advocate for those who confront barriers to fulfilling their potential.

The school's students and faculty members also engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems. In addition, school students, alumni, and personnel serve local, national, and international communities by developing and participating in collaborations with social agencies, community-based organizations, government, and foundations.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to:

Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.

Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.

Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

The school offers a full continuum of social work educational programs at the undergraduate, master's, and doctoral levels (as well as a continuing education program for practicing social workers). The school's bachelor's and master's programs in social work are accredited by the Council on Social Work Education, and graduates are eligible for full membership in the National Association of Social Workers.

Degree Options

The School of Social Work offers the Master of Social Work (MSW) and the Doctor of Philosophy (PhD) degrees. MSW students may combine their degree work with course work leading to a certificate. In addition, the School of Social Work has joint and cooperative degree options with other schools in the University as well as external institutions. The degree options include:

Master of Social Work

http://www.socialwork.pitt.edu/academics/master-social-work-msw

Skill Concentrations (one is required)
- Direct Practice with Individuals, Families, and Groups
- Community, Organization, and Social Action (COSA)

Direct Practice Certificate Programs
- Gerontology Certificate
- Home and School Visitor/School Social Worker Certificate
- Children Youth and Families Certificate
- Mental Health Certificate
- Integrated Healthcare Certificate
- Human Services Management Certificate

Doctor of Philosophy
Joint and Cooperative Degrees

MSW
- Master of Social Work/Master of Divinity
- Master of Social Work/Master of Public Administration
- Master of Social Work/Master of Public and International Affairs
- Master of Social Work/Master of International Development
- Master of Social Work/Doctor of Philosophy (PhD) in Social Work
- Master of Social Work/Master of Public Health
- Master of Social Work/Juris Doctorate
- Master of Social Work/Certificate of Advanced Study in Teaching
- Master of Social Work/Master of Business Administration

PhD
- Master of Social Work/Doctor of Philosophy (PhD) in Social Work
- Master of Public Health/Doctor of Philosophy (PhD) in Social Work

Specific details regarding course requirements are described in this bulletin and on the School of Social Work Web site and in the Student Handbook.

Admissions

Admission to the MSW and PhD programs is for fall term (September) only. Applicants seeking full-time or part-time admission should submit the application far in advance of their expected entry into the program; all application materials are due no later than May 31 for the MSW program and December 31 for the PhD program of the year in which entry is expected. Applications are reviewed only upon receipt of all required materials. Application forms are available from:

School of Social Work
Office of Admissions
2101 Cathedral of Learning
412-624-6302
E-mail: sswadmissions@pitt.edu
www.socialwork.pitt.edu/admissions/

Online applications are accepted via the MSW or PhD sections of our website located at http://www.socialwork.pitt.edu

For more specifics on admissions requirements for the MSW or the PhD, consult the description of the relevant degree program.

Admission of Students from Other Countries

The School of Social Work welcomes applications from students in other countries whose credentials meet the requirements and the standards of the School of Social Work and the Office of International Services of the University.

MSW and PhD applicants from other countries must apply directly to the School of Social Work. Applicants must submit the completed application form, additional required forms, and other required materials in English. Additional University of Pittsburgh application procedures for international students are described at http://www.socialwork.pitt.edu/admissions-aid/international-students. Other information and assistance for international students can be found online at www.ois.pitt.edu/intladmissions.html.

For MSW applicants only: International students who hold a baccalaureate degree in social work from a program that is not accredited by the Council on Social Work Education and who are interested in obtaining advanced standing credit must submit their transcript to the council for a determination of equivalency. Further Information can be found online at www.cswe.org.
Financial Assistance

Students interested in financial assistance to meet tuition and/or living costs should direct inquiries to both the Office of Admissions of the School of Social Work and the University's Office of Admissions and Financial Aid.

Students should be advised that limited resources often preclude any one funding source from granting awards that meet total financial needs. As a result, students are strongly encouraged to seek financial aid packages consisting of partial awards (including loans and scholarships) from a variety of sources, including the Office of Admissions and Financial Aid in Alumni Hall (412-624-PITT) and the School of Social Work Financial Aid Sources, Office of Admissions, Room 2104 Cathedral of Learning (412-624-6302; http://www.socialwork.pitt.edu/admissions-aid/financial-aid . See also the University-wide information on Financial Aid.

Applications for financial assistance are accepted only after an admissions decision has been made. Awards are made for a one-year period. New applications are required for each succeeding period.

Academic Standards

The School of Social Work's expectations for student and faculty conduct are described in school policies and embody the standards of professional social work. Students in the School of Social Work are required to adhere to the NASW Code of Ethics.

Academic Review Policy

The school maintains an academic review policy that applies to all degree students in the school and that seeks to ensure academic standards of achievement (i.e., satisfactory performance in the field, satisfactory grades for academic course work, and reasonable rates of progress toward completion of degree requirements). The policy statement on academic review appears in the Student Handbook.

Academic Integrity Policy

The school also has an academic integrity policy that applies to all students and faculty members in the school and seeks to ensure that students and faculty members respect the ethical standards expected of them in the performance of their duties and responsibilities. The policy statement on academic integrity appears in the School of Social Work Student Handbook.

Statute of Limitations for School of Social Work Degrees and Leaves of Absence

MSW Program

There is a four-year limitation on the earning of the MSW degree. The four-year period is counted from the date of entry into the program for four full academic calendar years. Under extenuating circumstances (listed below), an advisor can recommend an extension of time to the MSW program director and the associate dean for academic affairs. If approved, the period of extension and the conditions for completing the program will be recorded in the student's folder, with a copy sent to the student. Extenuating circumstances include the following:

- extended illness of the student,
- extended personal emergency,
- involuntary mobilization into a U.S. military unit, and
- death of a close family member.

Under special conditions, MSW students may be granted one leave of absence. A maximum leave of one full academic year may be granted to master's students. A student wishing to take a leave of absence must submit in advance to the MSW program director a written request that indicates the length and rationale for the leave. The MSW program director and the associate dean for academic affairs will review the request. If approved, the time of the leave will not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.
PhD Program

There is an eight-year statute of limitations for the completion of the PhD for students who enter with an MSW and who are not pursuing an MPH. There is a 10-year statute of limitations for students in the MSW/PhD program or the MPH/PhD program. Course work and the comprehensive examinations should be completed within three years and the dissertation within five. Under exceptional circumstances, a candidate for the PhD may apply for an extension of the statute of limitations. Requests for an extension of the statute of limitations must be submitted to the doctoral program director and must be approved by the doctoral committee and the dean. The request must be accompanied by a program assessment of the work required of the student to complete the degree and evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, doctoral students may be granted one leave of absence. A maximum leave of two academic calendar years may be granted to doctoral students. A student wishing to take a leave of absence must submit in advance to the doctoral program director a written request that indicates the length and rationale for the leave. The doctoral program director and the associate dean for academic affairs will review the request. If approved, the time of the leave will not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

NASW Code of Ethics

Professional ethics are at the core of social work. The profession has an obligation to articulate its basic values, ethical principles, and ethical standards. The NASW Code of Ethics sets forth these values, principles, and standards to guide social workers' conduct. The Code is relevant to all social workers and social work students, regardless of their professional functions, the settings in which they work, or the populations they serve. The NASW code of ethics can be viewed online at www.naswdc.org/pubs/code/default.asp.

Advising

Students are assigned a faculty advisor at the beginning of the student's matriculation into the MSW or PhD program. Students in the MSW program are assigned an advisor from among the faculty and professional staff. The assignment is made by the MSW program director and remains in effect until changed after a request by an advisor or advisee, as indicated by field assignment or program change, or due to a change in the advisor's assignment.

Special Academic Opportunities

The school offers several academic resources and programs for its students, as detailed below:

Student Participation on School Committees

Students have opportunities to participate in the governance of the School of Social Work by serving on school committees. Information about the purposes and functions of the committees is distributed during the beginning of each fall term. Through the Office of the Associate Dean for Admissions and Student Affairs, students can volunteer to serve on committees and become full members of those committees.

Student Executive Council (SEC)

All degree students in the School of Social Work comprise the membership of the student organization that elects the Student Executive Council. The council concerns itself with student life and serves as a liaison with the administration and faculty.

The Student Executive Council relies heavily on student participation and it endeavors to be of service to the student body. Activities include the publication of a student newsletter, the development of discussion sessions around critical social issues, the provision of opportunities for social action, the participation in planning for orientation, and the planning of a variety of social events.
In addition, SEC members, representing the student body, are appointed to serve in the following organizations and/or committees: Black Action Society; Student Chapter, NASW; Student Chapter, NABSW; Alumni Association (Liaison); BASW Club; and Graduate and Professional Student Association (GPSA).

The Student Executive Council is working to strengthen its involvement in diversity initiatives to benefit the student body. More information regarding the activities and goals regarding diversity initiatives will be published as they are created.

The Student Executive Council supports the MSW student body and welcomes any feedback from all students. The SEC Office is located in Room 2201B CL. Please reach us at our e-mail address at pitt.sec@gmail.com.

SEC’s website can be found at:  http://www.socialwork.pitt.edu/student-resources/student-executive-council

Buhl Library

The Buhl Library of Social Work is a special collection of books, journals, and other resource materials specifically focused on social work. The Buhl Library is located on the first floor of Hillman Library and is staffed by a full-time social work librarian. Additionally, students at the School of Social Work have full access to the wide range of services provided by the University of Pittsburgh library system.

School of Social Work Faculty

Yodit Betru, Director, MSW Program and Assistant Professor, DSW, University of Pennsylvania

Jaime Booth, Associate Professor, PhD, Arizona State University

Laura Borish, CWEB/CWEL Agency Coordinator and Field Assistant Professor, MSW, University of Pittsburgh

Cynthia K. Bradley-King, Clinical Assistant Professor and Academic Coordinator, Child Welfare Education For Baccalaureates Program, PhD, Indiana University of Pennsylvania

Helen Cahalane, Principal Investigator, Child Welfare Education and Research Programs, Clinical Associate Professor, PhD, University of Pittsburgh

Keith Caldwell, Associate Dean for Student Success and Assistant Professor, EdD, University of Pittsburgh

Melvin Cherry, Jr., Field Education Coordinator and Lecturer, MSW, University of Pittsburgh

Valire Carr Copeland, Professor, Associate Director of the Public Health Social Work Training Program, and faculty affiliate in the Center for Minority Health at the University of Pittsburgh's School of Public Health, PhD, University of Pittsburgh

John Dalessandro, Director of Field Education, MSW, University of Pittsburgh

Larry Davis, Donald M. Henderson Professor, PhD, University of Michigan

Amy DeGurian, Field Education Coordinator and Lecturer, MSW, University of Pittsburgh

Aliya Durham, Assistant Professor and Director of Community Engagement, MSW, MPIA, University of Pittsburgh

Shawn M. Eack, James and Noel Browne Endowed Chair, Associate Dean for Research, and Professor of Social Work and Professor of Psychiatry, PhD, University of Pittsburgh

Stephanie Eckstrom, Program Coordinator, Pitt-Bradford MSW Program, MSW, University of Maryland At Baltimore

Rafael J. Engel, Associate Professor, Associate Dean of Academic Affairs, PhD, University of Wisconsin

Elizabeth M.Z. Farmer, Dean, PhD, Duke University

Rachel Gartner, Assistant Professor, PhD, University of California-Berkeley
Program and course Offerings

Master of Social Work Program

MSW Mission and Goals

The University of Pittsburgh's School of Social Work, successor to the Division of Social Work in the Department of Sociology of the University, was founded in September 1918, and accepted its first class of MSW students that year. The school shares with the University a commitment to the advancement and application of knowledge. Students in Pitt's School of Social Work learn the knowledge, skills, and values to engage in culturally competent practice with diverse populations and communities. They learn to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques, and to advocate for those who confront barriers to fulfilling their potential.

The school's students and faculty members also engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems. In addition, school students, alumni, and personnel serve local, national, and
international communities by developing and participating in collaborations with social agencies, community-based organizations, government, and foundations.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to:

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

The school offers a full continuum of social work educational programs at the undergraduate, master's, and doctoral levels (as well as a continuing education program for practicing social workers). The school's bachelor's and master's programs in social work are accredited by the Council on Social Work Education, and graduates are eligible for full membership in the National Association of Social Workers.

**MSW Admissions**

http://www.socialwork.pitt.edu

The following section details admissions information particular to applicants to the MSW program.

Persons seeking admission to the MSW program must exhibit potential and professional capabilities essential to function effectively in a graduate school environment.

An applicant must meet the following requirements:

- A bachelor's degree from an accredited college or university.
- A minimum average of a B (3.0 GPA on a 4.0 scale) in all undergraduate work.

A student with a grade point average of less than 3.0 may be admitted provisionally to the program. Applicants with grade point averages of less than 3.0 may be required to interview with the school's admissions office.

- Successful completion of 3-credit coursework in statistics or quantitative analysis (If a student does not have a course in Statistics, this requirement must be completed before enrollment)
- A minimum of 60 undergraduate (or undergraduate plus graduate) divided into 30 credits in the liberal arts and 30 credits in the social sciences is recommended, not required.

Liberal Arts classes include:

- Humanities-English, fine arts, languages, literature, philosophy, religion, and communication.
- Fine Arts- Art, photography, dance, and theater
- Natural science-biology, chemistry, physics, mathematics, and statistics.

Social Sciences courses include:

- Psychology
- Sociology
- Anthropology
- Economics
- Political Science
- Social Work
- History
- Criminal Justice

(Human Biology no longer required effective November 2007)

Applicants applying for advanced standing must have earned a BSW degree from an accredited Council on Social Work Education (CSWE) baccalaureate program within seven years of their scheduled enrollment dates.
School of Social Work Policy #25: Consistent with the Council on Social Work Education's Educational Policies and Accreditation Standards, the School of Social Work's MSW Program does not grant course credit, transfer credit, or exemptions for prior life, volunteer, or employment experience.

We do not require GRE Scores.

Bradford & Johnstown Campuses

The School of Social Work offers its MSW degree program at both the University of Pittsburgh's Bradford and Johnstown campuses. Admissions requirements at those two campuses are the same as at the Pittsburgh campus, except that the Bradford and Johnstown campuses offer the MSW degree in a part-time-only program format. In addition, the Bradford and Johnstown campuses will only admit students once every other year (in 2020, 2022, 2024, etc.).

Readmission

Formerly enrolled students who withdrew from Pitt's MSW program for more than one year and wish to be readmitted to the school must resubmit an MSW application. In addition, such students must submit a two-page, double spaced personal statement stating why they are requesting readmission and why they believe they will be successful this time around. Also, one new letter of recommendation (not from a reference previously submitted upon initial enrollment to the school) must be submitted.

Transfer Applications

Applicants who within the past seven academic years have completed graduate-level coursework may be granted transfer credit. For applicants requesting transfer credit from non-social work graduate degree programs, a maximum of 12 credits can be transferred. Applicants transferring from other Council on Social Work Education (CSWE) accredited schools can receive a maximum of 30 transfer credits.

School of Social Work Policy #25: Consistent with the Council on Social Work Education's Educational Policies and Accreditation Standards, the School of Social Work's MSW Program does not grant course credit, transfer credit, or exemptions for prior life, volunteer, or employment experience.

Application and Admission Materials

Completed applications include the school online application form, transcripts, three letters of reference, a written statement, a resume, an agreement to participate in field education form and a $40 application fee. Applicants may request an interview, but this is not required. The director of admissions and student affairs may also request an interview.

Applications and other admissions information are available from:

Office of Admissions
School of Social Work
412-624-6302
E-mail: sswadmissions@pitt.edu
Online applications are accepted at:
http://www.socialwork.pitt.edu/admissions/msw/application-process

Application materials may also be downloaded from the School of Social Work Web site or applications may be completed directly online. These materials are available at www.socialwork.pitt.edu/admissions/.

Each year, the school has a priority admissions deadline of January 10, 2020. All first time MSW applicants to the school who complete their application by the priority deadline, and have a minimum 4 year undergraduate GPA of 3.4 are guaranteed both acceptance and a scholarship assistance. The school's regular application deadline is May 31.

Selection of Skill Concentration
At the time of admission, students are required to designate a skill specialization. Students can choose to specialize in either:

- Direct Practice with Individuals, Families, and Small Groups (Direct Practice)
- Community, Organization, and Social Action (COSA)

The two skill specialization curricula build on foundation curriculum content and prepare students for autonomous social work practice at an advanced level. The specializations expose students to: specific practice roles; the uses and applications of research for practice; practice with and on behalf of the welfare of the poor and oppressed; practice with diverse populations; policy, organizational, and environmental influences on practice; and advanced practice theories, methods, and strategies.

**Admissions Interview**

Admissions interviews may be initiated by the admissions officer of the school in some special circumstance. Decisions on applications for admission are usually made without such an interview. All applicants are welcome to seek information-sharing interviews.

**Financial Assistance for MSW Students**

The University of Pittsburgh School of Social Work recognizes that financing graduate education is extremely important, especially because the cost of higher education continues to increase each year. Please note that it is the University's Financial Aid Office that administers the process of awarding loans to graduate students. The School of Social Work awards scholarships to its master's level students and scholarship and assistantships to its PhD students.

Financial aid is not awarded to any student until admission to the School has been granted. Early application for financial aid is strongly encouraged.

Each year, the school has a priority admissions deadline of January 10, 2020. All first time MSW applicants to the school who complete their application by the priority deadline, and have a minimum 4 year undergraduate GPA of 3.4 are guaranteed both acceptance and a scholarship assistance. The school's regular application deadline is May 31.

Students applying for financial aid must complete the Free Application for Federal Student Aid (FAFSA) form. Pitt's federal school code is 008815. The FAFSA form is not available until January for those applying for the next academic year.

**MSW Degree Requirements**

The MSW curriculum is designed to provide students, who enter with a liberal arts perspective, a professional education that includes both breadth and depth of knowledge and skills development. The Generalist Curriculum addresses the acquisition of knowledge, skills, and values that comprise the generalist social work perspective.

Upon this common foundation rests the curricula for the two advanced Skill Specializations:

- Direct Practice with Individuals, Families, and Small Groups » (Direct Practice)
- Community, Organization, and Social Action » (COSA)

Employees of public child welfare agencies interested pursuing an MSW degree should visit the CWEL home page.

Those interested in working with older adults should visit the Aging Initiatives & Programs page.

The MSW degree requires completion of a minimum of 60 credits -42 class and 18 field practicum. Both the class and field requirements include foundation and skill concentration curricula. Please refer to the MSW Student Handbook (PDF) to obtain more detailed information on course of study plans for the various MSW curricula options.

Field education is an important component of the MSW educational experience. Students complete both a foundation and a concentration-specific placement as part of their MSW studies.

The School of Social Work offers seven joint degree options for master's level students. Learn more about these dual, joint and cooperative degree program options.

**MSW Academic Standards: Probation**

A student in the MSW program will be placed on academic probation if:
after completing at least nine (9) quality point credits, the student's cumulative GPA falls below 3.00;
the student receives a grade lower than a B- in a required course (including the five foundation courses, the required concentration skill courses, the second-level human behavior, policy, and research courses, and any specific courses needed to fulfill specialization or certificate requirements), or
the student receives an NC grade for field placement (SWGEN 2099, SWINT 2099, or SWCOSA 2099).
The MSW program director will send a letter to the student and the student's advisor notifying them of the student's placement on academic probation. The letter will advise the student and the student's advisor of the date and location of an academic review meeting, to be convened by the MSW program director, to discuss the terms of the student's academic probation. A copy of this letter will be placed in the student's folder. Depending on the outcome of the meeting, a student placed on academic probation may be required to modify the student's course of study in the MSW program, including changing the academic courses for which the student is registered and/or delaying entry into or suspending field placement.

Part-Time MSW Students

Students pursuing a part-time course of study must complete the MSW degree in four academic years.

The school offers part-time study for persons seeking to earn the master's degree whose economic, occupational, or familial situation precludes their current enrollment on a full-time basis. Preference for admission to part-time study will be given to persons currently employed in social service positions or to persons whose social service careers were interrupted by family responsibilities. Others interested in social work as a career are, of course, welcome to apply and will be given full consideration.

To the extent feasible, courses will be offered during evenings. However, part-time students must be prepared to take some courses during the day. Part-time students will have to make accommodations and be flexible in scheduling field instruction since field placement sites that offer evening or weekend instruction are very limited.

Part-time students will need to enroll in at least two courses a term during two of the three terms each academic year in order to qualify for the MSW degree. The following options are acceptable:

Two courses (three credits per course)
OR

One course (three credits) plus a minimum of three field credits
OR

A minimum of six field credits (equivalent to two courses)

Part-time students must complete all of the MSW degree requirements in four years.

Advanced Standing and Exemptions for MSW Course Work

Students entering the MSW program may be granted advanced standing, receive transfer credit, or be exempt from specific course requirements if their coursework was completed within the past 7 years. The definition for each is:

Advanced Standing is defined as the awarding of academic credit toward a degree by the School of Social Work for prior baccalaureate course or field work completed at an undergraduate social work program accredited by the Council on Social Work Education when such work is evaluated as entirely comparable. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits. In addition, they can also receive an exemption from Foundations of Social Work Practice with Diverse Populations (SWGEN 2034). Full-time students who have advanced standing graduate in December of their second year. Students who have advanced standing are allowed to pursue their MSW degree on a part-time basis, but must complete all of the requirements for the MSW degree in four years.

Transfer Credit is defined as the awarding of academic credit toward a degree by the School of Social Work for post-baccalaureate course or field work completed at an accredited academic institution when such work is evaluated as entirely comparable.

Exemption is defined as the waiving of a required academic course by the School of Social Work following an evaluation of the student's previous course work that is determined to be essentially identical to the required course being waived. Such an exemption does not, however, reduce the number of credits required for graduation.

Specific details and limitations regarding this policy and related procedures are described in the Student Handbook and on the School of Social Work Web site, http://www.socialwork.pitt.edu/academics/policies-handbooks.
Consistent with the Council on Social Work Education's (CSWE's) Educational Policies and Accreditation Standards, the School of Social Work's MSW program does not grant advanced standing, transfer credit, or exemption for prior life, volunteer, or employment experience.

Generalist Curriculum

The generalist curriculum is designed to provide all incoming master's students with the basic values, knowledge, and skills needed to gain competence in applying the generalist social work perspective to practice. An understanding of the profession's values orientation, history and philosophy, and frames of reference for practice establishes a basis for students to progress through the MSW Program's advanced concentration curricula. All MSW students must complete the MSW Generalist requirements listed below unless they are exempted via advanced standing credit or testing.

Required Generalist Courses

SWRES 2021 Generalist Social Work Research 3 crs.
SWGEN 2034 Social Work Practice with Diverse Populations 3 crs.
SWBEH 2063 Human Behavior and the Social Environment 3 crs.
SWWEL 2081 Social Welfare 3 crs.
SWGEN 2098 Generalist Social Work Practice 3 crs.
SWGEN 2099 Generalist Field Education 6 crs.

Certificate

Children, Youth and Families Certificate

The Children, Youth and Families Certificate is designed to prepare graduates of the MSW program to provide services to at-risk children and families through a wide range of public and private agencies. Through specialized coursework and internship opportunities, students are prepared for professional practice in settings such as family service agencies, child protection, the courts, early intervention, community-based treatment, and other child and family-focused programs. The Children, Youth and Families Certificate is awarded by the School of Social Work, and provides students with the opportunity to enhance professional competency in providing services to young persons and their families.

COSA Community Organizing and Practice Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

COSA specialization students pursuing this proposed certificate will complete twelve course credits and twelve field credits in the areas of community organizing; community planning; community development; and community social change. For the course work, students must complete the following four courses: (1) SWCOSA 2084: Human Services Organization Management (3 crs.); (2) SWCOSA 2088: Community Organizing and Planning (3 crs.); (3) SWCOSA 2090: Working with Group/Intergroup Relations: Facilitation, Negotiation and Mediation (3 crs.); and (4) SWCOSA 2096: Community Planning and Development (3 crs.). Students must also complete a COSA specialization field placement (12 credits - 720 clock hours) in a community organizing and practice setting to apply the knowledge, values, and skills they are learning through their coursework. This proposed certificate builds on the School's existing field placement opportunities around community organizing and practice.

Required Core Courses

SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING
COSA Skill Electives

SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

COSA Specialization Field Placement

SWINT 2099 - FIELD WORK

Total Credits: 24

COSA Gerontology Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

The proposed COSA Gerontology Certificate is designed to prepare students for professional practice in communities and organizations addressing the needs of older adults. Knowing how to work with older adults as a social work professional offers many opportunities in an era when that segment of the population continues to increase steeply.

Through specialized courses and a dedicated field placement experience, the proposed COSA Gerontology Certificate students will be exposed to the various roles and settings that constitute contemporary social work practice in aging.

Required Courses

SWBEH 2077 - HUMN BHVR: ADLT DVLP AGING
SWWEL 2039 - SOCIAL POLICY AND GERONTOLOGY

Elective Courses

At least one SWCOSA electives (3 credits) where student completes a gerontology project or assignment and presents this to their academic advisor and the Gerontology Certificate Chair. Possible courses are:

SWCOSA 2040 - GRANT PROPOSAL WRITING
SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

A 2nd above SWCOSA elective or 3 credits of other graduate level gerontology coursework from the wider university.

Specialized Field Placement

SWCOSA 2099 - FIELD WORK

Total Credits: 24

COSA Human Services Management Certificate

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.
Students pursuing the proposed Human Services Management Certificate will complete twelve course credits and twelve field credits covering the Community, Organization, and Social Action (COSA) MSW competencies in areas of executive leadership; resource management; strategic management and community collaboration. Students will enroll in and successfully complete the following COSA core and skill electives courses: (1) SWCOSA 2084 Human Service Organization Management (3 crs.); (2) SWCOSA 2088 Community Organizing & Planning (3 crs.); (3) SWCOSA 2086: Human Resources, Supervision and Financial Management (3 crs.); and (4) SWCOSA 2040: Grant and Proposal Writing (3 crs.). Students will also complete their second (specialized COSA) field placement (12 credits - minimum 720 clock hours) in a community-based or human services organization where they will have the opportunity to apply and build on organizational management theories and skills they are learning in their courses.

**Required Courses**

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

**COSA Electives**

- SWCOSA 2086 - HUMAN RESOURCE/SUPERVISION AND FINANCIAL MANAGEMENT
- SWCOSA 2040 - GRANT PROPOSAL WRITING

**COSA Specialization Field Placement**

- SWCOSA 2099 - FIELD WORK

**Total Credits: 24**

**DP-Children, Youth, & Families Certificate**

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

The proposed Children, Youth, and Families certificate is designed to prepare students to provide services to diverse child, adolescent, young adult, and family populations through a wide range of public and private agency settings. Students in this certificate will deepen their knowledge and skills in social work practice with at-risk children and families through coursework and field placement experiences in settings which serve vulnerable children and their families. Students wishing to obtain the proposed CYF certificate must complete Children and Families at Risk (SWBEH 2062) as their second-level human behavior course and Child and Family Policy (SWWEL 2059) as their second-level policy course. They will also be required to complete two children, youth, or family-focused courses as direct practice skill electives as well as complete their 12 credit specialized field placement in a setting/program serving children, youth, parents, families, and groups.

**Required Courses**

- SWWEL 2059 - CHILD AND FAMILY POLICY
- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK

**Direct Practice Skill Electives - Choose two courses from the following list:**

- SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES
- SWINT 2035 - INTIMATE PARTNER VIOLENCE
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
- SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
- SWINT 2063 - ISSUES IN CHILD MALTREATMENT
- SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS
Specialized Field Placement

SWINT 2099 - FIELD WORK

Total Credits: 24

**DP-Gerontology Certificate**

The Certificate Program in Aging has been in place since 1980 and continues to attract numerous MSW students. The goals of the DP Gerontology Certificate program are to enhance students' understanding of the aging process and to provide them with the skills relevant to practice with and/or on behalf of the elderly and their family members. Knowing how to work with the elderly as a social work professional offers many opportunities in an era when that segment of the population continues to increase steeply.

Through courses and the field placement experience, DP Gerontology Certificate students are exposed to the various roles and settings that constitute contemporary social work practice in aging. Emphasis is given to understanding client and family strengths; diversity among the aged population; the social, cultural, community, and policy contexts of aging; and how these factors inform, and may be influences by, social work practice. DP Gerontology Certificate students are encouraged to apply to the Hartford Program Partnership in Aging Education Fellowship.

**DP-Home and School Visitor/ School Social Worker Certificate**

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). All students in the MSW must select a single specialization when they matriculate. The proposed COSA Community Organizing and Practice Certificate will be part of the COSA specialization.

The proposed Home and School Visitor/ School Social Work Certificate is designed to enhance professional competency in the development and delivery of high-quality social work services to diverse student populations in both public and private elementary and secondary schools. Through coursework and direct practice specialized field placements, students will gain advanced knowledge and skills in social work practice with individuals, families, and small groups in educational settings. Students in the proposed certificate will complete HBSE-Children and Families at Risk (SWBEH 2062) as their second-level human behavior course and Child and Family Policy (SWWEL 2059) as their second-level policy course. They will also complete the existing (SWINT 2058) Social Work in a School Setting as one of their direct practice skill electives. The HSV/SSW certificate is a part of the Direct Practice (DP) specialization and consistent with that, students must complete their 12 credits of specialized field placement in a school-based setting serving individuals, families, and groups.

Additionally students who elect the HSV/SSW certificate will complete the following four courses from the School of Education: (TLL 2500) Foundations of Special Education, (TLL 2257) Instructing English Language Learners, (TLL 2101) PA School Law, and (TLL 2502) Students with Disabilities in the Classroom or (TLL 2501) Students with Disabilities in the Secondary Classroom.

**Required Core Courses**

- SWWEL 2059 - CHILD AND FAMILY POLICY
- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK

**Direct Practice Skill Elective**

- SWINT 2058 - SOCIAL WORK EDUCATIONAL SETTINGS

**Specialized Field Placement**

- SWINT 2099 - FIELD WORK
Required School of Education Courses

TLL 2101 - PENNSYLVANIA SCHOOL LAW
TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
TLL 2500 - FOUNDATIONS OF SPECIAL EDUC
TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM
TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

Total Credits: 33

DP-Integrated Health Care Certificate

The DP Integrated Health Care Certificate Program prepares graduate social work students specializing in direct practice with the knowledge and skills necessary to work with individuals, families, groups, and communities in a variety of institutional and community-based health-related settings. With a focus on leadership and advocacy, the goal of the certificate program is to increase the number of students focused on health and social work. Master's level social work training (MSW), along with a Certificate in DP Integrated Health Care, provides the knowledge and skills to work in a variety of integrated healthcare settings. Students completing the DP Integrated Health Care Certificate Program will have a deeper understanding of the relationship between behavioral health (e.g., mental health, substance use) and physical health. New opportunities abound in health care for social workers trained in an interdisciplinary approach who are prepared to bridge the gap between health care providers and patient needs within a coordinated system of care.

Students interested in integrated health care may also apply for the Edith Baker Behavioral Health Care Fellowship, a competitive program that will provide successful applicants with stipends of $10,000 during their concentration field placement.

For more information regarding this fellowship, please e-mail BHWET@pitt.edu.

DP-Mental Health Certificate

The Mental Health Certificate is designed to prepare students for professional practice with individuals, families, and/or small groups with mental/behavioral health challenges. Mental health practice can be found in a wide range of social and human services agencies. Through courses and field placement experiences, students are exposed to a wide range of mental health conditions and disorders and contemporary modalities to address these conditions and disorders. Students in this proposed certificate will complete Human Behavior: Mental Health (SWBEH 2065) as their second-level human behavior course and Mental Health and Public Policy (SWWEL 2057) as their second-level policy course. They will also be required to complete two mental health focused courses as direct practice skill electives as well as complete their 12 credit specialized field placement in a mental health setting.

Required Core Courses

SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH
SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY

Direct Practice Skill Electives - Choose two courses from the following list:

SWINT 2007 - INTRO PSYPHMCLGY SOCL WRK PRACT
SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES
SWINT 2018 - CLINICAL SKILLS IN SOCIAL WORK PRACTICE FOR MENTAL HEALTH RECOVERY
SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
SWINT 2046 - PLANNED SHORT-TERM TREATMENT
SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
SWINT 2053 - GROUP INTERVENTIONS WITH HIGH-RISK POPULATIONS
SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS
SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL
SWINT 2032 - ADV DRCT PRAC: SOCIAL SYSTEMS
Specialized Field Placement

Total Credits: 24

Home and School Visitor Certificate

Since the 1930s, the School of Social Work has offered a Home and School Visitor/School Social Worker certificate. The program was started by pioneering social work practitioner and educator Marion Hathway. The H&SV/SSW is an interprofessional Educational Specialist certificate program, operated jointly with the University of Pittsburgh School of Education and the Pennsylvania Department of Education, and is intended for students who plan to deliver social work services in elementary or secondary schools. There are three models for certification:

- Certification earned while earning the MSW
- Certification earned post-MSW
- Certification earned without an MSW

The H&SV/SSW certificate program is designed to enhance professional competency in the development and delivery of high quality social work services to diverse student populations in both public and private elementary and secondary schools. The certificate program is organized around the Direct Practice concentration and offers students the opportunity to gain advanced knowledge and skills via courses taken in the Schools of Social Work and Education and a field placement in an educational setting.

For further information, please contact Deborah Robinson, MSW, LSW, Director, dcr16@pitt.edu.

Home and School Visitor/School Social Worker Certificate

The Home and School Visitor/School Social Worker (H&SV/SSW) certificate, a joint effort with the University of Pittsburgh School of Education that is accredited by the Pennsylvania Department of Education, prepares students for professional practice in both public and private educational settings throughout Pennsylvania. The H&SV/SSW certificate program is designed to enhance professional competency in the development and delivery of high-quality social work services to diverse student populations in elementary and secondary schools.

Human Services Management Certificate

Many MSW’s often find themselves moving up quickly into supervisor, management, and even executive positions. The generalist perspective and systems knowledge from their social work education provides a strong basis for leadership growth in a range of social work settings. However, to better prepare macro practice/COSA students to take advantage of leadership opportunities and enhance their personal and professional development, the School now offers the Human Services Management Certificate in collaboration with the Network of Social Work Management under a new University partnership initiative.

This national Human Services Management Certificate can be completed by COSA students in the course of their MSW studies. Students pursuing this certification option must complete twelve credits through the following COSA core and skill electives course work covering Network of Social Work Management (NSWM) competency and practice behaviors in the areas of:

- Social Administration/Human Services Management
- Community Organizing (Community Collaboration)
- Human Resources & Financial Management with Supervision
- Grants, Proposals, and Funding Development

COSA students are encouraged to take other skill electives in COSA, as well as skills courses in other schools. For more information on the NSWM competencies: https://socialworkmanager.org/competencies
In addition, COSA student in Social Administration/Human Service Management must also complete a COSA concentration field placement (12 credits) in a community-based or human services organization to apply their course knowledge, values, and skills in the organizational setting.

For more information on the Human Services Management Certificate, please contact the Community Organization, and Social Action Concentration Chair, Tracy M. Soska, at 412-624-3711 or tsssw@pitt.edu.

**Mental Health Certificate**

The Certificate in Mental Health is designed to prepare MSW graduates for professional practice with individuals, families, and/or groups with mental and/or behavioral health challenges through a wide range of social and human service agencies. Students in the MSW Program take a series of required and elective courses leading to the Certificate in Mental Health within the normal MSW requirements and need not exceed the length of the degree program. Direct practice social workers in mental health services have a wide array of career opportunities across a range of public and private settings, including psychiatric inpatient services, outpatient psychotherapy services, child and family services, partial hospitalization and case management services, drug and alcohol services, and private practice.

**Joint Degree**

**Social Work, MSW/MBA**
