

2026-2027

Graduate and Professional Studies Catalog

Academic Calendar

University of Pittsburgh

ACADEMIC CALENDAR • 2026-27

Dates highlighted in yellow apply to all schools on all University campuses. Those in blue apply only to the Pittsburgh campus.

Official dates for degrees awarded apply to all schools on all University campuses. Specific dates affecting the professional programs in the Schools of Dental Medicine, Law, Medicine, Pharmacy, Health and Rehabilitation Sciences, and the Joseph M. Katz Graduate School of Business may be obtained from the appropriate Dean's Office.

* Employees covered by the collective bargaining agreements will be governed by the terms of those agreements.

NOTE: THE UNIVERSITY RESERVES THE RIGHT TO MAKE SUCH CALENDAR CHANGES AS IT DEEMS NECESSARY

☑ **All Campus Dates** ☑ **Pittsburgh Campus Only** Mix-in: All, None

August 2026

Begins			Ends		Campus
8/10/2026	Monday	International Student Welcome Week	8/17/2026	Monday	Pittsburgh Campus
8/12/2026	Wednesday	Summer 12-WEEK, 6-WEEK-2, 4-WEEK-3 Sessions Grades Must Be Approved by Instructors by 11:59 p.m.	8/12/2026	Wednesday	Pittsburgh Campus
8/15/2026	Saturday	Official Date for Awarding Degrees	8/15/2026	Saturday	All Campuses

University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, does not discriminate on the basis of disability, race, color, religion, national origin, ancestry, genetic information, marital status, familial status, sex, age, sexual orientation, veteran status or gender identity and expression in its programs and activities.

The University does not tolerate discrimination, harassment, or retaliation on these bases and takes steps to ensure that students, employees, and third parties are not subject to a hostile environment in University programs or activities.

The University responds promptly and equitably to allegations of discrimination, harassment, and retaliation. It promptly conducts investigations and takes appropriate action, including disciplinary action, against individuals found to have violated its policies, as well as provides appropriate remedies to complainants and the campus community. The University is committed to taking prompt action to end a hostile environment if one has been created, prevent its recurrence, and remedy the effects of any hostile environment on affected members of the campus community.

Please note that the University's Nondiscrimination, Equal Opportunity, and Affirmative Action Policy also covers discrimination based on ethnicity. Although not listed explicitly, the University interprets discrimination based on ethnicity as being prohibited based on the policy's inclusion of race, color, national origin, and ancestry as prohibited bases for discrimination. If you experience any discrimination on the basis of ethnicity, you should report such discrimination and it will be investigated in accordance with University policy and procedure.

For complete details on the University's Nondiscrimination, Equal Opportunity, and Affirmative Action Policy (CS 07) and Sexual Misconduct Policy (CS 20), please visit the Policies, Procedures, and Practices page.

About the University of Pittsburgh

The University of Pittsburgh is an internationally respected center of learning and research, offering exceptional educational opportunities in the humanities, sciences, and professions. A state-related, coeducational institution, the University of Pittsburgh's Pittsburgh campus offers a multitude of degree-granting and other programs housed in 16 undergraduate, graduate, and professional schools. The University system includes the Pittsburgh campus and four regional campuses at Bradford, Johnstown, Greensburg, and Titusville; the regional campuses offer undergraduate programs only.

Mission

The University of Pittsburgh, founded in 1787, is one of the oldest institutions of higher education in the United States. As one of the nation's distinguished comprehensive universities, the resources of the University constitute an invaluable asset for the intellectual, economic, and social enrichment of Pennsylvania, while the international prestige of the University enhances the image of Pennsylvania throughout the world.

The University's mission is to:

• Provide high-quality undergraduate programs in the arts and sciences and professional fields, with emphasis upon those of special benefit to the citizens of Pennsylvania;

• Offer superior graduate programs in the arts and sciences and the professions that respond to the needs of Pennsylvania, as well as to the broader needs of the nation and the world;

• Engage in research, artistic, and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavor;

• Cooperate with industrial and governmental institutions to transfer knowledge in science, technology, and health care;

• Offer continuing education programs adapted to the personal enrichment, professional upgrading, and career advancement interests and needs of adult Pennsylvanians; and

• Make available to local communities and public agencies the expertise of the University in ways that are consistent with the primary teaching and research functions and contribute to social, intellectual, and economic development in the Commonwealth, the nation, and the world.

The trustees, faculty, staff, students, and administration of the University are dedicated to accomplishing this mission, to which they pledge their individual and collective efforts, determined that the University shall continue to be counted among the prominent institutions of higher education throughout the world.

History

The University began in the Pennsylvania wilderness as the Pittsburgh Academy in 1787, the year the U.S. Constitution was adopted. Thirty-two years later, the Pittsburgh Academy became the Western University of Pittsburgh, and in 1908, the school changed its name to the University of Pittsburgh.

The recognition of graduate study at the University of Pittsburgh began with the awarding of Master of Arts degrees in 1836. By 1870, over 30 MA degrees had been awarded. These degrees were conferred for study beyond the Bachelor of Arts degree. In 1884, Chancellor Milton Goff set up a two-year professional study program leading to either a Master of Philosophy (predecessor of the Master of Science degree) or a Master of Arts degree and a three-year program leading to a Doctor of Philosophy degree. Before admission to these programs, each student was required to show proficiency in three areas of study. Both master's and doctoral candidates were required to prepare and defend theses.

In 1906, new rules were formulated for graduate study, requiring students to be in residence and requiring the completion of one year of study or 30 credits for the master's degree and three years or 90 credits for the doctoral degree. The catalogs of 1908 and 1909 announced

the establishment of the Graduate School with five departments offering courses for the Doctor of Philosophy degree. These departments, plus five others, offered courses for the Master of Arts degree.

In 1910, a faculty committee drafted proposals, adopted by the board of trustees in 1913, making the Graduate School an independent administrative unit of the University and authorizing the selection of a Graduate Council. The Graduate School was grouped into three divisions (Humanities, Social Sciences, and Natural Sciences) in 1947. Until 1956, the administration of graduate study was the responsibility of the dean of the Graduate School and the Graduate Council. At that time, the individual schools and the three divisions were given direct administrative responsibility for their graduate programs in accord with the regulations established by the University Council on Graduate Study-formerly the Graduate Council. In 1968, the dean of the Graduate School retired from his administrative role, and the position he had held was discontinued. General responsibility for the University's graduate programs was assigned to the provost pending reorganization of the University's graduate structure. The University Council on Graduate Study, the University administration, and members of the Graduate Faculty cooperated in drafting a proposed reorganization of graduate study, which was approved by written ballot by the entire Graduate Faculty and, in turn, accepted by Chancellor Wesley Posvar. This organizational structure became effective July 1, 1971, and is still the official structure.

Thus, during the 200-plus year history of the University, graduate education has grown to encompass the Dietrich School of Arts and Sciences and all 13 of the professional schools, which share a commitment to meet the nation's need for well-educated researchers, scholars, and leaders of professions and the tri-state region's need for trained professionals.

A private institution for most of its past, the University of Pittsburgh became state-related in 1966, establishing a relationship with the Commonwealth of Pennsylvania that continues to benefit both partners. Today, as an elected member of the prestigious Association of American Universities, the University of Pittsburgh claims its place among the top public research universities in the nation.

Accreditation

The University of Pittsburgh is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, (267) 284 - 5000. In addition, programs may be accredited by discipline-specific accrediting bodies. See Schools, Departments, and Programs section of this catalog for this information.

Web Address

For more information on the University of Pittsburgh, see the University's Web site at www.pitt.edu.

Organization of Graduate and Professional Education at the University

While the University Council on Graduate Study (www.provost.pitt.edu/about/committees/university-council-graduate-study), acting for the Graduate Faculty, develops minimum standards for graduate work throughout the University, the immediate responsibility for developing and administering graduate programs is assigned to the deans and Graduate Faculty members of the several schools and the Dietrich School of Arts and Sciences. This responsibility applies both to the traditional MA, MS, and PhD programs and to programs leading to advanced professional degrees, except for first-professional degrees (i.e., the MD, JD, LLM, PharmD, and DMD). The provost has responsibility for the general supervision of graduate and professional programs, including first-professional degree programs, throughout the University, giving leadership to the deans and faculties in maintaining high standards of instruction and research.

Faculty are appointed to the Graduate Faculty by the provost upon recommendation by the dean on the basis of an appraisal by the faculty of a department or other appropriate faculty group. Graduate Faculty are competent in graduate instruction and in supervision of student research at all levels and are active in advancing knowledge through their own research.

University of Pittsburgh Board of Trustees

The Board of Trustees is responsible for advancing the purposes of the University; promoting and protecting its independence, academic freedom, and integrity; and enhancing and preserving its assets for the benefit of future students and society at large. In addition, because the University of Pittsburgh is a state-related institution, the trustees ensure that Pitt meets its obligations both to the Commonwealth of Pennsylvania and to society generally.

General administrative, academic, and management authority is delegated to the chancellor. However, the board retains ultimate responsibility for all University affairs.

There are three or more regular meetings of the Board of Trustees each year, including an annual meeting. Special meetings also may be called. Much of the board's work is carried out by committees; many of these committees include faculty, staff, and students as non-voting representatives.

Regulations Governing Graduate Study at the University of Pittsburgh

Note for AY 2026-27: The Graduate Catalog and several Office of the Provost Academic Regulations are undergoing a multiyear review and update process. Differences may exist between the Academic Regulations referenced on this page and statements found in individual School or Program Catalog pages. The Office of the Provost has approved a limited number of School- and Program-specific exceptions. Unless a School or Program Catalog page notes an explicit approval by the Office of the Provost, the Academic Regulations listed on this page supersede any conflicting statements in School or Program Catalog pages.

Responsibility

Each department or school with a graduate program is expected to: (1) establish and maintain a high quality graduate program appropriate for its discipline and in accord with the regulations established by the University Council on Graduate Study; (2) provide each graduate student with a copy of the regulations concerning graduate study and the requirements for advanced degrees; and (3) designate a faculty member (or a committee) to advise each graduate student concerning all aspects of the graduate program and provide for a thesis or dissertation adviser and the appropriate committees.

Each graduate student is expected to become familiar with the general regulations concerning graduate study and with the specific regulations of his or her major department of graduate study and to accept responsibility for the completion of degree requirements as prescribed.

Any program desiring an exception to these academic regulations must receive approval from the Office of the Provost.

Introduction

Academic policies and regulations establish the shared framework that makes graduate study at the University of Pittsburgh clear, fair, and navigable across all of the University's graduate and professional programs. This resource is designed to help graduate students, faculty, staff, and advisors find the regulations and policies most relevant to graduate study at the University of Pittsburgh, organized thematically and linked to their authoritative sources.

This index is maintained by the Office of the Provost, which is responsible for its organization, interpretation, and ongoing revision.

The regulations and policies collected here originate from several sources, reflecting the University's administrative structure:

- **University-wide policies** are promulgated by the Office of Policy Development and Management.
- **Academic regulations** governing instruction, grading, and student academic progress are issued by the Office of the Provost.
- **Student conduct standards** are established and administered by the Division of Student Affairs.
- **School-specific requirements** - such as detailed graduation requirements, program prerequisites, and school-level academic standards - are maintained within individual schools and documented in each school's section of this Catalog.

These regulations apply to all graduate and professional students at the University of Pittsburgh. Unless an academic program has a documented exception on file with the Office of the Provost, the regulations in this index govern.

If you have questions about a specific policy or regulation, the office or unit listed as the source is the appropriate first point of contact.

Admissions

- ## Application for Admission

Information about admissions to all graduate and professional programs must be clearly defined and easily accessible via the school's website as well as the Graduate Catalog. The applicant is expected to:

- Complete the online application and submit the application fee through the online payment system. The application fee is required of all applicants, unless waived by the program, and is non-refundable. It does not apply toward the payment of tuition.
- Provide a copy of the transcript of all undergraduate and graduate schools attended. An official transcript with degree posted must be sent prior to enrollment in the graduate program.
- Submit any additional material required by the department or school and, if available, other evidence of academic and personal qualifications for graduate study. These materials may include any or all of the following: scores achieved on standardized examinations accepted by the University of Pittsburgh such as, but not limited to, the Graduate Record Examination, letters of recommendation, term papers written during previous study, evidence of relevant work/life experience, evidence of motivation for graduate study, and a statement of career objectives.
- Arrange for a personal interview if requested by the department or school. Interviews may take place virtually or in person at the School's discretion.

No action should be taken on an application for admission to graduate study until the department or school has received: (1) the completed application form; (2) the application fee; (3) unofficial transcripts of all work done in undergraduate and graduate schools; and (4) supporting materials as required by the department or school. (Under the Admission Status section below, see Special Status for circumstances in which a student may be granted temporary admission.)

Each department or school has the responsibility to establish deadline dates both for receipt of application for admission and for application for fellowships, scholarships, or other forms of aid and to notify prospective applicants of these dates. A department or school may limit admission to a specific term only or may allow admission in any of the three terms. Each department or school is obligated both to act promptly on completed applications, if submitted on or before the established deadline date, and to give a thorough and fair review of each completed application. It is at the school's discretion as to whether applications received after the deadline will be reviewed.

Decisions regarding admission should be based on an overall evaluation of all the credentials submitted by the candidate, and be in accord with the availability of faculty, facilities, and student support necessary to meet the applicant's expressed academic and research needs and interests. Applicants should be notified promptly of decisions concerning their applications. Many departments or programs have a limited number of places available. In cases where the number of qualified applicants exceeds the number of places available, applicants should be judged competitively.

If a department or school so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter for the new term of matriculation. Additional coursework taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. The deferral of admission is independent of financial aid.

Officially, admission may be granted or denied only by the dean of the school, and the issuance of visa documents may be granted or denied for non-academic reasons only by the Office of International Services. Registration is permitted only after admission is granted.

Changing Graduate Programs

A student already admitted to graduate study and desiring to change a major department of graduate study must file an application for such a change in the office of the dean of the school the student wishes to enter. The application for admission to the new program should be evaluated in the same manner as an application from a new student.

Admission Status

Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

Full Graduate Status: For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. International applicants must meet the admissions guidelines described under "International Students". Qualification for advanced study normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence

(such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may be considered for the award of an advanced degree.

Provisional Graduate Status: Applicants who are graduates of a recognized college or university, but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate course program or their scholastic achievement, may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

Special Status: Students may be granted temporary admission as "special status" under the following circumstances:

- Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.
- Individuals not seeking an advanced degree but with specific qualifications for one or more courses, including courses required for licensing or certification, may register for such courses subject to review by the department and the dean. Schools providing such an opportunity may specify the number of credits or courses for which an individual may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the individual is subsequently admitted to a graduate degree program.

International Students

The University of Pittsburgh welcomes applications from students in other countries. International students are expected to apply the same way as domestic applicants and provide the same supporting documentation with two additional requirements:

- An international degree (or combination of degrees) must be equivalent to a four-year bachelor's degree earned in the U.S. It is at the school's discretion to require a formal evaluation of the international credentials by a third party such as World Education Services. Certified translations must accompany credentials which are not in English.
- Each international applicant must provide clear evidence of proficiency in English. (See the English Language Proficiency section below.) The Office of International Services (OIS) will issue, as appropriate, the Form I-20 Certificate of Eligibility for Non-Immigrant "F-1" Student Status or Form DS-2019 Certificate of Eligibility for Exchange Visitor "J-1" Status.

The University reserves the right, even after the arrival and enrollment of a student from another country, to require, at his or her own expense, individual curricular adjustments whenever particular deficiencies or needs are found. This could include enrollment without credit in additional course work in English as a foreign language or in courses prerequisite to his or her regular course of study. New students from abroad should be encouraged to use the services of OIS to help them in their adjustment to the United States and to facilitate their total educational experience.

English Language Proficiency

Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. The determination that the applicant has sufficient proficiency is made by the admitting department or school, subject to University-wide minimum standards determined by the University Council on Graduate Study. The University's full policy on Assessment for English Language Proficiency for Admission can be found here: https://www.policy.pitt.edu/ac-07-assessment-english-language-proficiency-admission-formerly-09-02-01. Any exceptions to this policy must be approved by the Provost or Provost's delegate after review of the entire record and consultation with the Office of International Services.

Admission Decisions

When a program has completed its evaluation of the credentials of an applicant, they should be notified as to whether they are academically qualified for admission. The letter to the applicant must state that the applicant will receive either a visa document or further instructions from the Office of International Services. In all cases, a duplicate copy of the letter of admission and award of financial aid, if any, must be sent to the Office of International Services as must copies of all rejection letters.

- # Readmission

A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her adviser and committee. Readmission is not automatic, nor does it necessarily reinstate the student in the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements.

- # Early Admissions and Accelerated Pathway Programs

Exceptionally able undergraduate University of Pittsburgh students may be admitted to full graduate status as outlined under Early Admissions Programs.

Accelerated Bachelors/Graduate (for example, "4+1") programs allow students to complete two sequential degrees on an accelerated timeline per regulations.

Registration

The Office of the Provost publishes the University of Pittsburgh Academic Calendar, which establishes the dates for registration. These dates also appear in the Schedule of Classes for each term, which is available online through the Office of the Registrar.

- **Registering for Classes**

After being admitted to a graduate program, students may register for classes during the enrollment period. The enrollment period for a term or session is published in the University's Academic Calendar. Students registering for the first time are advised to complete the enrollment process well before the beginning of the term. More information may be found at www.registrar.pitt.edu/enrollment.

All graduate students are expected to be registered in accordance with the program of study they are carrying. Students are required to follow the registration process outlined by their school, and they must adhere to registration deadlines.

Students pursuing two independent degrees or a degree and a certificate simultaneously will have one indicated as the primary academic program with the other as a secondary academic program during the registration process. Students are billed at the tuition rate of the primary academic program. Generally, a certificate program should be listed as a secondary academic program.

After the start of classes, registration is permitted for new and continuing students only with the written approval of the dean in unusual circumstances. Students must be registered in the term in which they take preliminary and comprehensive examinations. Students must also be registered for the term in which they graduate; see AC 56 for exceptions.

The University reserves the right to change registration procedures. Current registration procedures are published each term in the Schedule of Classes.

Most students have the ability to utilize self-service enrollment tools available through PeopleSoft/HighPoint CX. Continuing students with the ability to utilize self-service enrollment will be assigned an enrollment appointment during the first two weeks of the enrollment period.

Once students have enrolled, they may view their class schedules online via PeopleSoft/HighPoint CX. For additional registration information, visit the Office of the University Registrar website: www.registrar.pitt.edu.

A student must be officially admitted, readmitted, or reinstated to the University before he or she may register for courses.

- **Student registration and enrollment are managed by the Office of the University Registrar in conjunction with the Schools and Colleges. Policies and Regulations governing registration and enrollment include the following:**

- Registration Status (AC 56) - This policy establishes the criteria used to determine registration status, including full-time/part-time and active/inactive status. This policy includes information about graduate student registration while working toward graduation. International students may have additional registration and enrollment requirements. Information can be found on the Office of International Services Resources page.
- Registration and Add/Drop (AC 54) - This policy establishes the responsibilities and regulations regarding the Registration and Add/Drop processes and applies to all campuses of the University.
- Fees and Tuition (AC 30) - This policy establishes that tuition and mandatory fees are approved by the Board of Trustees and other fees and deposits are approved by the Office of the Provost. Some mandatory fees may not be applicable to all campuses; however, if assessed, the rate must be consistent with the current approved rates established at all campuses.
- Maximum Credits Per Term (AC 30) - No student is permitted to register for more than 15 graduate credits without written permission from the dean of the academic center in which the student is pursuing a degree. Graduate students who register for more than 15 credits will be billed for each additional credit that exceeds their full-time tuition rate. Individual schools and departments may restrict the maximum program of any or all of their graduate students.
- Termination of Registration (AC 67) - This policy establishes Termination of Registration, a process that allows students to drop all their courses during the Add/Drop period, after which time a student resignation is required. It includes the resulting grade assignments, and academic and nonacademic financial adjustments associated with a Termination of Registration by the resignation process. This policy also documents administrative termination of registration resulting from disciplinary sanctions.
- Cross Registration via the Pittsburgh Council on Higher Education (PCHE) - Cross registration is a program through the Pittsburgh Council on Higher Education (PCHE) that provides an opportunity for enriched educational programs by permitting students to attend courses at any of ten participating colleges and universities.
- Full-Time and Part-Time Study - Definitions of tuition categories and limits on the number of credits for which a student can register each term.
- Registration for Full-Time Dissertation Study Course: Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, wellness, and activity fees. Students must consult with the dean's office of their school for permission to register for full-time dissertation study.
- Course Withdrawal: This policy establishes regulations for course withdrawal and assignment of the Withdrawal (W) grade. This section also covers resigning from the University for a Specific Term and the Monitored Withdrawal process.
- **Registration of Undergraduate Students for Graduate Courses:** Undergraduate students with sufficient preparation are permitted to enroll in graduate courses following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below in the Credential Overlap regulation.

Undergraduate students who need fewer than 30 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final year to register for graduate courses which will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as Advanced Standing credits on the graduate transcript.

- **Specific resources related to registration and enrollment deadlines and processes include:**
  - The Office of the University Registrar maintains an Enrollment Resources website with information and tutorials related to registration, add/drop, withdrawal, and resignation.
  - The Enrollment Calendar is made up of important dates surrounding enrollment/registration into classes at the University of Pittsburgh.
- **Required Training for All Graduate and Professional Students**

Any graduate or professional student enrolled in a graduate program requiring more than 10 credits of in-person instruction or in any other graduate program designated by the Provost is required to complete training in the recognition, prevention and reporting of sexual misconduct, harassment and sexual violence (often known as Title IX training). The Title IX training program created by Pitt's Office of Institutional Engagement and Well-being satisfies this requirement. Under some circumstances, students may be allowed to complete special versions of the training designed to meet their specific needs. Requests for alternative training should be submitted to the Vice Provost for Graduate Studies. An approved version of the training must be completed in the student's first semester at the University.

Advising

The quality of education that graduate students receive is greatly enhanced with Graduate Student Mentoring. Students are encouraged to consult with the individual school for school-specific advising services.

Faculty members are responsible for advising students concerning their programs and specific course selections each term. If a student is pursuing two independent degrees or a degree and a certificate simultaneously, they should meet with advisers in both the primary and secondary academic programs. Students are required to follow the registration process outlined by their school, and they must adhere to registration deadlines. Students pursuing two degrees or a degree and a certificate simultaneously must list one as the primary academic program and may list the other as a secondary academic program during the registration process. Students are billed at the tuition rate of the primary academic program. It is recommended that such students meet with advisers in both the primary and secondary academic programs. Generally, a certificate program should be listed as a secondary academic program.

Students registering for the first time should be advised to complete registration well before the beginning of the term. After the start of classes, registration is permitted for new and continuing students only with the written approval of the dean in unusual circumstances.

No person should expect to receive guidance and direction from members of the Graduate Faculty unless they are registered in accordance with the program of study they are carrying.

Allowable Credits

There are certain limitations on credits, other than those earned as part of regular graduate courses taken at the University, that may be applied toward a degree. Those limitations are detailed in the following resources.

- Advanced Standing Credit - This regulation establishes the criteria for the acceptance of advanced standing credits, which are credits toward a University of Pittsburgh degree or credential through mechanisms other than credits earned through course registration at the University. This includes transfer credit, standardized test credit, credit by course examination, and credit for educational experiences in the armed services.
- Course Repeat - This regulation places limitations upon when students can earn credit for repeated or similar courses.
- Credential Overlap - This regulation establishes guidelines for credit overlaps occurring between multiple degrees or credentials being pursued at the University of Pittsburgh. Covers students who pursue two independent graduate degrees simultaneously in two different schools within the University or two different departments within the same school. This includes Dual, Joint, and Cooperative Programs.
- **Course Work Acceptable as Graduate Credit -**A substantial proportion of courses acceptable toward a graduate degree should be designed explicitly for graduate students. Introductory graduate level (master's level) courses are numbered 2000-2999, those at an advanced graduate level (doctoral level) are numbered 3000-3999. To be eligible for a master's degree, a student must have completed at least 30 credits at the graduate level with at least an average grade of B (3.00). A doctoral student must complete additional graduate level courses as determined by his or her department or school. No lower-level undergraduate course (numbered 0001-0999 or 7000-7999) may be applied toward a graduate degree.
- At least four courses (12 credits) or one-half the master's degree program, whichever is greater, must be at the graduate-level (the 2000 or 3000 series) and must be completed with an average grade of B (3.00). Additionally, the Commonwealth of Pennsylvania requires that master's degrees include a minimum of 30 semester credit hours beyond the baccalaureate level. The Commonwealth requires that a first professional degree, except those for the preparation of professional educators, must require the satisfactory completion of a minimum of 60 semester credit hours or 90 quarter credit hours for admission to the degree program and the satisfactory completion of a total minimum of 150 semester credit hours for the program.

Grading

Student grades are processed by Dean's Offices in conjunction with the Office of the University Registrar. Policies and Regulations governing grading and student records include the following:

- Grade Changes - This regulation establishes the responsibilities and regulations regarding the grade change process.

- Grade Point Average - This regulation establishes the University Cumulative Quality Point Average (QPA) and Grade Point Average (GPA).
- University Grading - This establishes the official University grades and symbols, including any corresponding grade points and definitions.

Records

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information.

- Information on requesting and verifying transcripts can be found on the Office of the University Registrar Transcripts & Verification page.
- The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record may display additional course details, certain academic events, and detailed advanced standing/placement/transfer credit information. Students can view a copy of their academic record in the Student Center at my.pitt.edu.

Academic Standing and Satisfactory Academic Progress

While enrolled at the University of Pittsburgh, students are expected to meet certain cumulative GPA standards and maintain progress towards their degree. The University of Pittsburgh makes use of multiple levels of academic standing to identify students at risk of jeopardizing successful completion of their degree and to provide multiple opportunities for intervention and coaching towards successful completion.

Note: While different from academic standing, Satisfactory Academic Progress (SAP) may impact the financial aid eligibility of students.

This is described in more detail in the following regulations:

- Academic Standing for Graduate and Professional Students: This regulation establishes the criteria for determining academic standing for graduate and professional students, and includes Academic Notice, Academic Program Change, and Academic Dismissal. Any exceptions to this policy must be approved by the Office of the Provost and posted in the University Catalog.
- Financial Aid Satisfactory Academic Progress (AC 31) - This policy establishes Satisfactory Academic Progress for students used in determining financial aid eligibility. It applies to most aid programs at the University of Pittsburgh. If a financial aid program has eligibility criteria that differ from this policy, then refer to the specific requirements of that program. The Satisfactory Academic Progress requirements for individual academic programs are separate from this policy.

Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more, but not less, stringent than those stated here.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all requirements for professional master's degrees, in five years. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of ten years or eight years if the student has received credit for a master's degree appropriate to the field of study. Programs for professional

doctoral degrees, for which the majority of candidates pursue part-time study while working full time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Regulations Pertaining to Master of Arts and Master of Science Degrees

The Master of Arts (MA) and Master of Science (MS) degree programs provide an introduction to scholarly activities and research and often serve as preparation for teaching careers. These degrees are awarded for the completion of a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the faculty of the department. To carry out this responsibility, each student must be assigned a major advisor, who, in consultation with the student, plans a program of study and research in accordance with school and departmental guidelines.

Master of Arts (MA) degrees are awarded for completion of graduate programs in various departments within the School of Arts and Sciences, the School of Education, and the School of Public and International Affairs; the Master of Science (MS) degree is offered in departments within the School of Arts and Sciences, the Joseph M. Katz Graduate School of Business, the School of Dental Medicine, the School of Education, the John A. Swanson School of Engineering, the School of Health and Rehabilitation Sciences, the School of Medicine, the School of Public Health, the School of Pharmacy, and the School of Social Work. Some of the MA or MS degrees offered are specified as being "in" a particular discipline; e.g., Master of Science in Chemical Engineering.

- **Programs of Study**

Some master's programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. Such areas of concentration or minors are added to the transcript upon the granting of the degree.

The requirement of proficiency in second languages is at the discretion of individual departments or schools.

Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements and/or maintain current and accurate web sites covering this information. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

- **Credit Requirements**

The Master of Arts and Master of Science degrees normally require the satisfactory completion of a minimum of 30 credits of graduate study approved by the department or school. No Master of Arts or Master of Science degree program may require fewer than 24 course credits. See Advanced Standing Credits for full policy.

- **Comprehensive Examination**

MA or MS degrees are conferred only upon those students who, in one or more comprehensive examination or the equivalent, show that they have mastered the general field of their graduate study. Each department or similar unit is responsible for specifying the content and procedure for administration of the comprehensive examination and will specify for each candidate the field of his or her examination,

which may vary from student to student. Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program should notify the University Council on Graduate Study and describe the substitution.

Students on special or provisional status are not eligible to take a comprehensive examination. These examinations must be taken at least one month prior to the last day of the term in which the degree is to be granted. The results must be reported promptly to the office of the dean but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a two-year period after passing the comprehensive examination may be re-examined at the discretion of the department, program director, or dean.

- **Thesis Option**

The requirement of a thesis or its equivalent is at the discretion of individual departments, programs, or schools. If a thesis is submitted, its form must be in accord with specifications stipulated in the Electronic Theses and Dissertation Format Guidelines. The thesis examining committee will consist of at least three members of the faculty recommended by the major adviser and approved by the department chair or program director. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the office of the dean.

After the examination, the approved ETD must be deposited to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school. A receipt for the ETD processing/microfilming fees and any necessary paperwork must be submitted to the appropriate ETD Student Services Staff in the Office of the Dean.

- **Non-thesis Option**

It is usual for a program to require additional course work if a thesis is not required.

For the Master of Arts degree, each student must describe one or more substantial intellectual experience(s) or accomplishment(s) acceptably in writing. In programs in which a master's thesis is optional, the student must satisfy this requirement by submitting a paper (or papers), as designated by the major department, and must demonstrate competence in using the methods of scholarship.

For a Master of Science degree, a paper or research project is usually required.

Regulations Pertaining to Professional Master's Degrees

The University of Pittsburgh, through its professional schools, offers the following master's degrees in professional fields of study: Master of Business Administration, Master of Dental Science, Master of Fine Arts, Master of Education, Master of Science in Geographic Information Systems and Remote Sensing, Master of Health Administration, Master of Health Promotion and Education, Master of Science in Information Science, Master of International Business, Master of International Development, Master of Law, Master of Library and Information Science, Master of Applied Mathematics (MA and MS), Master of Science in Nursing, Master of Public Administration, Master of Public Health, Master of Public and International Affairs, Master of Public Policy and Management, Master of Social Work, Master of Arts in Teaching, and Master of Science in Telecommunications.

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions.

- **Programs of Study**

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions. Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of their general field of study. The program of study should be a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the student's department or school. To carry out this responsibility, each student must be assigned a major adviser, who, in consultation with the student, plans a program of study and research in accordance with school and departmental guidelines.

Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers as part of demonstrating their comprehensive mastery of their field of study.

Requirements vary from program to program. Departments provide students with a copy of school and departmental regulations or maintain current and accurate Web sites appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of the general field of study. This includes: (a) satisfactory completion of all course requirements and (b) other performances that indicate comprehensive mastery such as examinations, internships, research projects, theses, and practica. These requirements vary from school to school; students should refer to the specific requirements of their program.

Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers as part of demonstrating their comprehensive mastery of their field of study.

- **Credit Requirements**

The professional master's degrees require the satisfactory completion of a minimum of 30 credits of graduate study approved by the department. See Advanced Standing Credits for full policy.

- **Additional Requirements**

Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers.

- **Student Assessment**

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of the general field of study. This includes: a) satisfactory completion of all course requirements and b) other performances which indicate comprehensive mastery such as examinations, internships, research projects, theses, practica, and so forth. These requirements vary from program to program.

Regulations Pertaining to Doctoral Degrees

While the regulations governing doctoral study in this section represent University-wide policy, students should check the School section of this catalog and with their advisor for any expansions of or exceptions to these rules.

- **Doctor of Philosophy Degree**

Doctor of Philosophy degrees are awarded for completion of graduate programs in various departments within the School of Arts and Sciences, the Joseph M. Katz Graduate School of Business, the School of Dental Medicine, the School of Education, the John A. Swanson School of Engineering, the School of Health and Rehabilitation Sciences, the School of Computing and Information, the School of Medicine, the School of Nursing, the School of Pharmacy, the School of Public Health, the School of Public and International Affairs, and the School of Social Work.

- **Admission to Doctoral Study**

In some doctoral programs, the requirements for admission to graduate study and for admission to doctoral study are identical, while other programs require the completion of a master's degree or its equivalent as a prerequisite for admission to doctoral study. Admission to doctoral study does not include any implication concerning "admission to candidacy for the Doctor of Philosophy degree."

Normally, only one major department of graduate study is permitted for the PhD degree. However, a few formal interdisciplinary programs and, under some circumstances, some independently designed interdisciplinary doctoral programs are available (see Interdisciplinary Doctoral Programs).

- **Programs of Study**

All PhD programs offered at the University of Pittsburgh should provide a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of the content, methods, theories, and values of a field of knowledge and its relation to other fields. Each program should train the student in the methods of independent research appropriate to the discipline and provide an adviser and a committee to guide the student in an extended investigation of an original and independent research project of significance in the field.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of the department or program. To carry out this responsibility, departments or programs must ensure that each student has a major adviser who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. The adviser may prescribe additional courses both within and outside the department or program that are essential and/or appropriate to the student's program.

Some doctoral programs may include approved areas of concentration used to define and describe the students' training and expertise within the broader discipline. Such an area of concentration is added to the transcript upon the granting of the degree.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Normally, courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Students must maintain a minimum cumulative GPA of 3.00 in courses to be eligible to take the preliminary and comprehensive examinations as well as to be graduated.

The requirement of proficiency in the use of foreign languages or other tools of research is at the discretion of individual departments or schools.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their program and, in turn, students are expected to become familiar with these and to satisfy all prescribed degree requirements.

- **Credit Requirements**

The minimum 72 credit requirement for the PhD degree is met by six terms of registration as a graduate student for 12 or more credits per term or the equivalent number of credits in a reduced load. If the school requires completion of its master's degree program prior to admission into its doctoral program, at least four terms of registration for 12 or more credits per term or the equivalent number of credits in a reduced load are required as a minimum for the PhD degree. No more than 30 credits may be accepted for a master's degree awarded by another institution to meet the minimum credit requirement. In recognition of graduate study beyond the master's degree successfully completed elsewhere. (See Advanced Standing Credits)

Graduate students already enrolled may, when approved in advance by their department or programs and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In all cases, at least three terms, or 36 credits, of full-time doctoral study or the equivalent in part-time study must be successfully completed at the University of Pittsburgh.

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again.

- **Residency Requirement**

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study, which excludes any other employment except as approved by their departments or programs.

- **Preliminary Evaluation**

The preliminary evaluation should be designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently. The form and nature of the evaluation should be approved at the school level and described in the school bulletin. It should be conducted at approximately the end of the first year

of full-time graduate study. The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation. Evaluation results must be reported promptly to the dean's office, but no later than the last day of the term in which the evaluation occurs. A student on provisional, inactive, or special status or on probation is not eligible to take the preliminary evaluation.

- **Comprehensive Examination**

The Comprehensive Examination should be designed to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline. In some programs, the comprehensive examination is combined with the overview or prospectus meeting. It should be administered at approximately the time of the completion of the formal course requirements and should be passed at least eight months before the scheduling of the final oral examination and dissertation defense. In no case may the comprehensive examination be taken in the same term in which the student is graduated. Examination results must be reported promptly to the dean's office but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department, program, or school. A student on provisional, inactive, or special status or on probation is not eligible to take the program comprehensive examination.

- **Doctoral Committee**

Before admission to candidacy for the PhD degree, the student's major adviser proposes for the approval of the doctoral program director and the dean a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the doctoral committee. The majority of the committee, including the major adviser, must be full or adjunct members of the Graduate Faculty. This committee must review and approve the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated weekly.

This doctoral committee has the responsibility to advise the student during the progress of the candidate's research and has the authority to require high quality research and/or the rewriting of any portion or all of the dissertation. It conducts the final oral examination and determines whether the dissertation meets acceptable standards.

Meetings of the doctoral candidate and his/her dissertation committee must occur at least annually from the time the student gains Admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward degree and discuss objectives for the following year and a timetable for completing degree requirements. It is the responsibility of the dean of each school to determine a mechanism for monitoring the occurrence of these annual reviews.

The membership of the doctoral committee may be changed whenever it is appropriate or necessary, subject to the approval of the department chair or program director and the dean.

When a doctoral committee member leaves the University, he or she must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed from within the department, and the restructured committee requires the approval of the department chair or director of the school's doctoral program and the dean. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.

A retired faculty member may remain as a member or chair of a committee if he or she is spending considerable time in Pittsburgh or its vicinity and is still professionally active. Retired faculty who meet these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly-formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the department chair or the school's director of doctoral programs and the dean.

- **Overview or Prospectus Meeting**

Each student must prepare a dissertation proposal for presentation to the doctoral committee at a formal dissertation overview or prospectus meeting. The overview requires the student to carefully formulate a plan and permits the doctoral committee members to provide guidance in shaping the conceptualization and methodology of that plan. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal. The student is responsible for ensuring that all appropriate regulatory approvals are obtained for the proposed research. For example, if the research proposed in the overview or prospectus involves human subjects, that proposed research must be approved by the University Institutional Review Board (IRB) before it may be carried out.

- **Admission to Candidacy for the Doctor of Philosophy Degree**

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary evaluation, have completed formal course work with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed subject and plan of the dissertation from the doctoral committee following an overview or prospectus meeting of the committee. In some schools, admission to candidacy is a prerequisite to registration for dissertation credits. Students are informed of admission to candidacy by written notification from the dean, who also states the approved doctoral committee's composition.

- **Registering for Full-Time Dissertation Study Course**

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for Full-Time Dissertation Study Course, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for the full-time computer and network, security/transportation, student health, and activity fees. Students must consult with the dean's office of their school for permission to register for full-time dissertation study.

- **Dissertation and Abstract**

Each student must write a dissertation that presents the results of a research project carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It presents a hypothesis tested by data and analysis and provides a significant contribution or advancement in that field. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

Characteristics which a dissertation should demonstrate are: the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution; a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base; a well-defined research design; clarity in composition and careful documentation; results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph; sufficient detail so that other scholars can build on it in subsequent work; the preparation of the author to assume a position within the profession.

If the dissertation is the result of a collaborative research effort, the project should be structured in such a way that the student's dissertation results from one, clearly identified piece of work in which the student has supplied the unquestionably major effort. The contributions of the student and the other collaborators must be clearly identified.

Published articles authored by the student and based on research conducted for the dissertation study may be included in the dissertation, if the student's department and school have a written policy that this is acceptable. In any case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. The student should be the sole or primary author of the published work. If the published articles were co-authored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. Instructions on incorporating articles into the dissertation are provided in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh. The ETD Format Guidelines gives instructions on incorporating articles into the dissertation.

Candidates for the doctoral degree must provide a suitable number of copies of the dissertation, as determined by the doctoral committee and school policy, for review and use during the final oral examination. The general format of the dissertation and the abstract is determined by the Office of the Provost and is set forth in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh. Specific instructions should be available in the office of the dean of the school. After the final oral examination is successfully completed, the candidate must electronically submit the approved complete dissertation and abstract in final form. The candidate must submit a dissertation approval form, the required agreement with University Microfilms Inc. for the publication of the dissertation on microfilm and for the publication of the abstract in Dissertation Abstracts, and any appropriate fees to the designated student services representative in the dean's office of the candidate's school.

The general format of the dissertation and the abstract is determined by the Office of the Provost and is set forth in the ETD Format Guidelines. Specific instructions should be available in the office of the dean of the school. After the final oral examination is successfully completed, the candidate must deposit the approved ETD to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school. At least two additional copies of the dissertation abstract, a receipt for payment of the dissertation processing/microfilm fees and any necessary paperwork must be submitted to the appropriate ETD Student Services Staff in the office of the dean of the student's school. The candidate is also required to execute an agreement with ProQuest Information and Learning for the publication of the dissertation on microform and in an electronic format and submit the Survey of Earned Doctorates

(Forms are available in the dean's office). Students should check with their school for any additional supporting documents and/or requirements.

- **Publication of Theses and Dissertations**

All theses and dissertations submitted at the University of Pittsburgh must be submitted electronically. Electronic Theses and Dissertations (ETDs) are theses or dissertations prepared as text-based PDF files that can contain non-text elements such as multimedia, sound, video, and hypertext links.

All ETDs are made publicly available on the University Library System's online catalog. Students may choose to restrict access to the ETD to University of Pittsburgh IP addresses for a maximum period of five years. After five years, the ETD will automatically become fully accessible. Full access to the ETD may be withheld for a maximum of one year if a patent application has been filed and the student receives appropriate approval from the Provost's Office.

All doctoral candidates are required to execute an agreement with ProQuest/University Microfilms Inc. for the publication of the dissertation in the ProQuest/UMI repository.

Any thesis or dissertation may be published, either by the University or through an outside agency, provided due credit is given to the University. No form of publication, however, shall relieve the student of his or her responsibility for supplying the electronic thesis or dissertation to the University Library System.

Advisors should exercise responsibility in approving research topics that will not endanger long-term research projects or the safety or welfare of informants. Dependent upon the circumstances and the research point at which the danger is recognized, the provost's office may authorize a delay in publication of a dissertation for up to a maximum of one calendar year. Similarly, a publication may be withheld for a maximum of one year, if required, for filing a patent application.

- **Language of the Doctoral Dissertation**

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's dean with the approval of the dissertation adviser and committee, but only for sound reasons of scholarship. Permission shall never be granted on the ground of inadequate command of English.

- **Final Oral Examination**

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in in The Pitt News or *Pittwire.* Other qualified individuals may be invited by the committee to participate in the examination. Only members of the doctoral committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the doctoral committee, must be sent to the dean. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the doctoral committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

- **Interdisciplinary Doctoral Programs**

A student may be admitted into one of two types of interdisciplinary doctoral programs:

- *Generic Programs*, which are ongoing, formally structured, and approved doctoral programs, admission into which follows the same procedures as those of departmental programs; and,
- *Individualized Programs*, which are specially designed to permit an exceptionally able student who has earned a master's degree or the equivalent to pursue an interdisciplinary doctoral program structured to satisfy his or her unique goals. Such students should apply to the dean of the school if the departments involved in the proposed program are organized within one school or to the Provost if the departments are organized within more than one school. The student must satisfy the admission requirements of each of the departments or schools involved in the proposed program. If the request is approved, the dean or the Provost, in consultation with the departments concerned, will designate five members from these departments to serve as an advisory committee. After these advisers meet with the student, a chief adviser is selected to assume responsibility for general guidance to the student. These advisers continue their responsibility until the student is admitted to candidacy for the PhD degree and may, if it is appropriate, continue as the doctoral committee for this student.

• Other Research Doctoral Degrees

The University of Pittsburgh also offers the research doctoral degrees which are not PhD degrees.

These doctoral degree programs are similar to those for the PhD in the degree of rigor required, the minimum total credit requirements and permissible transfer credits, requirements for the successful completion of a preliminary evaluation and a comprehensive examination, admission to doctoral candidacy, nomination of a doctoral committee, preparation of the dissertation and abstract, publication of the dissertation, and successful completion of the final oral examination. These doctoral dissertations are usually based on an in-depth research project by the student and are intended to permit the student to apply relevant theory and knowledge as well as demonstrate skills in analysis of a major problem and to contribute to the improvement of practice in the student's area of specialization.

- **Professional Doctoral Degrees**

The University of Pittsburgh also offers professional doctoral degree programs for practitioners. These programs provide a coherent curriculum designed to impart the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession. If the program is an accredited program, the standards of the accrediting body for a professional doctorate must be met. The University of Pittsburgh also offers professional doctoral degree programs which, provide a coherent curriculum designed to impart the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession. The curriculum should contain a research component to achieve the goal for the research competence of the graduate. Students should deliver a report based on research that demonstrates both mastery of their subject matter and a high level of communication skills. The curriculum should contain an internship, a practicum, or a clinical component. Each experience should have associated with it clear goals and objectives, a statement of what skills the student should master, a statement of how those skills will be assessed objectively by the academic program and what steps the program will take in response to those assessments. In addition, the program should have an objective way to evaluate the site where internships and/or clinical rotations take place and assure the expertise of those responsible for administering training and instruction. If the program is an accredited program, the standards of the accrediting body for a professional doctorate must be met.

- **Admission to Professional Doctoral Study**

The minimum admission requirements must be the same as for all graduate programs at the University of Pittsburgh. In addition, the student must have completed a defined set of prerequisites so that all students will enter with required basic knowledge. A student must attain a 3.00 GPA in order to maintain good standing and be graduated

- **Programs of Study**

The curriculum should contain a research component to achieve the goal for the research competence of the graduate. Students should deliver a report based on research that demonstrates both mastery of their subject matter and a high level of communication skills. The curriculum should contain an internship, a practicum, or a clinical component. Each experience should have associated with it clear goals and objectives, a statement of what skills the student should master, a statement of how those skills will be assessed objectively by the academic program and what steps the program will take in response to those assessments. In addition, the program should have an objective way to evaluate the site where internships and/or clinical rotations take place and assure the expertise of those responsible for administering training and instruction.

- **Credit Requirements**

To attain the depth of knowledge and experience required by someone earning a professional doctorate, a minimum of 72 credits must be required. To attain the depth of knowledge and experience required by someone earning a doctorate, a minimum nine semesters of full-time study is required. Of this, no more than one-third should be internships or clinical work. A comprehensive examination will be used to assess the student's mastery of a substantial and complex body of knowledge.

Regulations Pertaining to Certificates and Micro-credentials

Graduate Certificate and Graduate Micro-Credential programs are coherent sets of courses and related work specifically designed to provide depth of understanding (via a certificate) or awareness (via a micro-credential) in a particular area. For students enrolled in a

graduate degree program at the University of Pittsburgh, the pursuit and awarding of a given certificate or micro-credential allows for an explicit recognition of a specific set of skills or educational experiences that may not be readily apparent through the conferring of a given graduate degree. Students not concurrently enrolled in a graduate degree program at the University of Pittsburgh can also apply for admission into some graduate certificate and micro-credential programs. Students seeking enrollment into graduate certificates and micro-credential programs must hold a baccalaureate degree or an advanced degree and be subject to admission requirements as outlined and governed by the academic unit(s) offering the certificate or micro-credential.

- **Graduate Certificates**

Graduate certificates are intended to provide depth of understanding in a given topic or area. A graduate certificate requires the satisfactory completion of a minimum of 10 credits, of which at least nine (9) credits are at the graduate level. Graduate certificates may include additional requirements for non-course educational activities such as workshops, projects, or other milestones. Transfer credits from other universities may be applied toward a University of Pittsburgh graduate certificate, but at least ten (10) Pitt credits must be earned towards the certificate. The certificate courses may be comprised from one academic unit or multiple academic units. At the discretion of the academic unit, graduate certificates may be offered to currently enrolled students or to students not concurrently enrolled in other graduate or professional programs at the University. Such students seeking enrollment into graduate certificates programs must hold a baccalaureate or other advanced degree and be subject to admission requirements as outlined and governed by the academic unit granting the certificate.

At the discretion of the individual academic unit(s) offering the certificate, students successfully completing courses in a graduate certificate program may apply some or all of those credits to a graduate degree program if the student meets all admission requirements for that program.

The awarding of a graduate certificate will be annotated on the official transcript of students who successfully meet the requirements as set forth by the academic unit (s) offering the graduate certificate. It is the responsibility of the academic unit offering the graduate certificate to track student progress and certify completion with the University Registrar's Office. The University Registrar's Office will not send a diploma for a graduate certificate. The issuing School(s) may develop and distribute a paper certificate following guidelines found at: https://www.provost.pitt.edu/standards-issuing-physical-certificates.

- **Graduate Micro-Credentials**

Graduate micro-credentials are intended to indicate familiarity with a given topic or area and require the satisfactory completion of at least four and at most nine credits. Graduate micro- credentials may include additional requirements for non-course educational activities such as workshops, projects, or other milestones. The micro-credential courses may be comprised from one academic unit or multiple academic units and are intended to be flexible and adaptive to changing demands. At the discretion of the academic unit, graduate micro-credentials may be offered to currently enrolled students seeking a graduate degree or to students who intend to pursue only a micro-credential. Students enrolled exclusively to seek micro-credential must hold a baccalaureate or other advanced degree and are subject to admission requirements as outlined and governed by the academic unit(s) offering the micro-credential.

At the discretion of the individual academic unit(s) offering the micro-credential, students successfully completing courses in a graduate micro-credential may apply some or all of those credits to an appropriate graduate certificate or degree if the student meets all admission requirements for that program.

The awarding of a graduate micro-credential will be annotated on the official transcript of students who successfully meet the requirements as set forth by the academic unit (s) offering the graduate micro-credential. It is the responsibility of the academic unit offering the graduate micro-credential to track student progress and certify completion with the University Registrar's Office. The University Registrar's Office will not send a diploma for a graduate micro-credentials. The issuing School(s) may develop and distribute a paper micro-credential certificate following guidelines found at: https://www.provost.pitt.edu/standards-issuing-physical-certificates.

Other Policies

- **Graduate Programs Offered in Off-Campus and Distance Learning Programs**

The academic standards set forth in the Regulations Governing Graduate Study apply to graduate programs offered in off-campus locations and offered via electronic communication. Admission criteria should be the same as those used by a school for its on-campus programs.

- **Editorial Assistance**

A student preparing a dissertation or other written work as part of academic requirements may, when appropriate, use the assistance of professional editors, provided that (1) he or she receives the approval of the research adviser or professor of the course in which written work is being submitted; (2) that editorial assistance provided be limited to use of language and not to subject matter, content or meaning; and (3) that all editorial assistance be described and acknowledged in the report.

- **Application for Graduation**

Each candidate for graduation must file an official Application for Graduation in the office of the dean early in the term in which graduation is expected. Students are required to be registered for at least one credit or full-time dissertation study at the University in the 12-month period before graduation. Students must file an application for graduation through the online graduation application. Each school establishes its own deadline by which students must apply for graduation. Students should check with their dean's office for the deadline. As noted above, students must be active. In exceptional circumstances, students who complete all the degree requirements at the end of a term but graduate in the next term may petition the dean of the school for a waiver of this registration requirement. The requirement that a student be on active status cannot be waived.

Prior to the end of the term in which they are graduated, all doctoral candidates must submit to the office of the dean a completed Survey of Earned Doctorates Awarded in the United States.

- **Certification for Graduation**

The Graduate Faculty of the department or program evaluates the performance of the student. If that performance is satisfactory, a report should be submitted to the dean certifying that the candidate has satisfactorily completed all departmental requirements for a graduate degree. The dean, after confirming that the overall school and University requirements have been met, certifies the candidate for graduation.

Student Rights and Responsibilities

The information that follows summarizes several key University-wide policies affecting graduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

- Academic Integrity Policy: Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures here.
- AO 10 Access to and Use of University Computing Resources: This policy governs who may access and use computing resources provided by the University of Pittsburgh.
- FERPA: The federal Family Educational Rights and Privacy Act of 1974 (FERPA), as amended, provides students' rights of access to their education records, as well as limited control over the disclosure of personally identifiable information from their education records. The University's commitment to safeguard student privacy and comply with the regulations is reflected in Policy AC 04 and Procedure AC 04.
- Pitt Promise: A Commitment to Civility: The University of Pittsburgh is committed to the advancement of learning and service to society. This is best accomplished in an atmosphere of mutual respect and civility, self-restraint, concern for others, and academic integrity. The Pitt Promise outlines common principles that contribute to a civil campus environment.
- Human Research Subjects: Human Research Protection Office (HRPO) (RI 10 Intellectual Property Policy)
- RI 07 Research Integrity Policy
- Student Code of Conduct: The Student Code of Conduct is an outline of the nonacademic rights and responsibilities of University students. The code defines offenses by and against students.

Statements of Compliance

- **Satisfactory Academic Progress (SAP) for VA Educational Beneficiaries - 38 US Code Section 3675(b)**

This policy applies to students who are VA beneficiaries and is intended to prevent the submission of VA-claims ("certifications") for those students who are suspended.

- In this instance, VA beneficiaries are defined as students receiving VA educational benefits under Chapter-30, Chapter-33, Chapter-35 and Chapter-1606, Title 38 U.S. Code.
- Students placed on academic probation at the end of the term may be certified for VA educational benefits for the subsequent term. If the student does not meet satisfactory academic progress in that subsequent term-defined as attaining a cumulative GPA at or above 2.00 for full-time students or attaining a cumulative GPA at or above 2.00 after attempting 12 additional credits for part-time students-the university will immediately suspend further VA certifications on behalf of the student.
- Students returning from one calendar year of suspension must re-apply for admission to the university. If accepted, those students may be certified for VA educational benefits.

Certification of Chapter-31 students will be at the discretion of the student's VA vocational rehabilitation counselor.

- **VA Educational Beneficiaries - 38 US Code Section 3679(e)**

As a matter of policy, the University of Pittsburgh allows students identified as *covered individuals** to attend and participate in all course(s) of education for any given term in which the student has been certified for VA educational benefits. This policy includes those circumstances in which VA payment(s) for student tuition and fees is late or delayed for up to 90 days after date of certification. The University retains the right to impose late fees upon those students who incur or retain an outstanding balance beyond the amount of expected VA tuition & fee payment for the term.

It is school policy to request all beneficiaries of VA educational benefits-including covered individuals*-provide the following documentation as part of certification process:

- VA Certificate of Eligibility (COE) or Statement of Benefits as printed from the VA.gov website

Completion of a certification request form (in hard-copy or on-line), which includes biographical information necessary for submission in the VA's IT system of record-VA-Once.

Failure to provide such documentation will result in the delay of any VA claim or certification. *Note: VA defines a Covered Individual as any individual who is entitled to VA educational assistance under the VA's Vocational Rehabilitation and Employment program (38 U.S. Code Chapter 31) or the VA's Post-9/11 GI Bill® (38 U.S. Code Chapter 33).

("GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.)

- **Johnny Isakson and David P. Roe Veterans Health Care and Benefits Improvement Act of 2020 - Section 1018**

In accordance with the *"Responsible Education Mitigating Options and Technical Extensions Act"* or the "REMOTE Act" of 2021 to Section 1018 of the *Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020* (Public Law 116-315)., the University of Pittsburgh provides a College Financing Plan (formerly known as Financial Aid Shopping Sheet) to every student who completes a FAFSA application including all VA beneficiaries.

Per Veterans Benefits Administration notification, "Isakson and Roe, Section 1018 Changes, dated June 13, 2022: The REMOTE Act affords the opportunity for schools to use the College Financing Plan (CFP), available through the U.S. Department of Education as a means to satisfy the requirements of section 3679(f). An Educational Training Institution that utilizes this form is providing sufficient consumer information, will be exempt from all section 3679(f) requirements, and does not need to apply for a waiver. An Educational Training Institution does not need to be participating in Federal Title IV Federal Student Aid to utilize the CFP to satisfy the requirements of section 3679(f).

Definitions

- **Graduate/Professional programs**: all programs of study leading to a research or professional master's degree, a research or professional doctoral degree, a graduate certificate, or a graduate micro-credential.
- **Advanced degrees**: all master's and doctoral degrees awarded upon completion of graduate/professional degree programs as defined above. Graduate micro-credentials and certificates are not considered advanced degrees.
- **Dual, Joint, and Cooperative programs:** A student may pursue an academic course of study which stipulates completion of all or most of the requirements of two distinct academic degree programs, administered by two or more schools or campuses within the University, for which two degrees are awarded.
- **Accelerated programs**
- **Distance Education**
- **Schools:** academic units of the University headed by deans, having their own teaching staffs, and offering instructional programs leading to degrees.
- **Graduate Faculty**: members of the various schools who have been recognized and approved as qualified: (1), (2) to serve on examining committees for advanced degrees, and (3) to advise graduate students and direct their research.
- **Graduate/Professional student:** a student who is enrolled in a graduate program as defined above

Application for Admission

Graduate admissions to the University of Pittsburgh are handled by the particular graduate school or program; there is no central admissions office for graduate and professional schools at the University. This section details only the University requirements and procedures for admission to the University. Officially, admission may be granted or denied only by the dean of the school, and the issuance of visa documents may be granted or denied for non-academic reasons only by the Office of International Services.

The Graduate Admissions Office of each school provides admissions information for prospective students to that school.

The admissions information in this section is subject to change at any time. It is intended to serve only as a general source of information.

Graduate Admissions

Decisions regarding admission are based on an overall evaluation of all the credentials submitted by the candidate and in accord with the availability of faculty, facilities, and student support necessary to meet the applicant's expressed academic and research needs and interests. Many departments or programs have a limited number of places available. See also Regulations Governing Graduate Study.

Application Procedures and Deadlines

Prospective students are encouraged to check with the school and program for specific admissions information.

International Students

The minimum requirement for admission to a graduate program is the completion of a bachelor's degree from a regionally accredited institution in the United States or the completion of education that the University of Pittsburgh deems comparable to a bachelor's degree from a regionally accredited institution in the United States.

Applicants are required to submit official original academic credentials. Official original academic credentials that are issued in a language other than English must be accompanied by a certified English translation. In cases where the transcript (grade report, academic record, examination results, mark sheet) does not attest to the awarding of a degree or an academic qualification, a certified copy of the original certificate or diploma awarding the degree or qualification must also be submitted. Certificates or diplomas that are issued in a language other than English must be accompanied by a certified English translation.

The Office of International Services (OIS) provides immigration-related services for international visitors, students, faculty, researchers, and staff at the University of Pittsburgh. The Office of International Services (OIS) advises international students on how to maintain their immigration status and helps to ensure compliance for both international visitors and the University, with respect to federal regulations. For more information, contact OIS at ois@pitt.edu or call 412-624-7120. Non-immigrant students must meet U.S. Department of Homeland Security eligibility requirements for visa document issuance as determined by the Office of International Services.

Admissions Status

Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

Full Graduate Status

For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. This normally is demonstrated by a B average (a grade point average of 3.00 on a

4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may take the PhD preliminary evaluation, take the MA/MS or PhD comprehensive examination, be considered for the award of an advanced degree or certificate, or be graduated.

Provisional Graduate Status

Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

A student on provisional or special status or on probation is not eligible to take the PhD preliminary evaluation, to take the MA/MS or PhD comprehensive examination, or to be graduated.

Special Status

Students may be granted temporary admission as "special status" under the following circumstances:

1. Students who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.

2. Students who are not seeking an advanced degree but who have specific qualifications for one or more courses, including courses required for learning or certification, may register for such courses subject to review by the department and the dean of the school. Schools providing such an opportunity may specify the number of credits or courses for which a student may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the student is subsequently admitted to a graduate degree program.

Guaranteed Admission and Accelerated Pathway Programs

Undergraduate students can apply for guaranteed admission into select graduate programs. Undergraduate students can also apply to accelerated Bachelors/Graduate (for example, "4+1") programs, which allow students to complete two sequential degrees on an accelerated timeline per regulations.

Deferred Admission

If a department or school so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Approval of a student's request to defer admission does not necessarily mean that any financial aid awarded is also deferred.

Readmission

A student who has not registered for at least one credit or full-time dissertation study during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Inactive students cannot apply to graduate, nor take preliminary or comprehensive exams. Readmission is not automatic nor does it necessarily reinstate the student to the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements.

Readmission of Student Service Members to the University of Pittsburgh

The University of Pittsburgh will promptly readmit a service member with the same academic status they had when last attending or accepted for admission. This requirement applies to any student who cannot attend school due to military service.

Definitions

Military service (or service in the uniformed services)-Voluntary or involuntary service in the armed forces, including service by a member of the National Guard or Reserve on active duty, active duty for training, or full-time National Guard duty under federal authority, for a period of more than 30 consecutive days under a call or order to active duty of more than 30 consecutive days. This does not include National Guard service under state authority.

Service member-someone who is a member of, applies to be a member of, performs, has performed, applies to perform, or has an obligation to perform, service in the uniformed services.

Appropriate officer-A warrant, commissioned, or noncommissioned officer authorized to give such notice by the military service concerned.

Armed Forces-the U.S. Army, Navy, Air Force, Marine Corps, Space Force, and Coast Guard.

Active duty-full-time duty in the active military service of the United States. Active duty includes full-time training duty, annual training duty, and attendance, while in the active military service, at a school designated as a service school by law or by the Secretary of the military department concerned. Active duty does not include full-time National Guard duty.

Notice and Procedure

The student must notify the school of their military service and intention to return to school as follows:

- *Notification of military service*. The student (or an appropriate officer of the armed forces or official of the Department of Defense) must give oral or written notice of such service to the University of Pittsburgh Office of Veterans Services ("OVS") as far in advance as is reasonable under the circumstances. This notice does not have to indicate whether the student intends to return to the school and may not be subject to any rule of timeliness. (Timeliness must be determined by the facts in each case.) Alternatively, at the time of readmission, the student may submit an attestation of military service that necessitated their absence from school. No notice is required if precluded by military necessity, such as service in operations that are classified or would be compromised by such notice.
- *Notification of intent to return to school.* The student must also give oral or written notice of their intent to return to their program of study to OVS within three years after the completion of the period of service. A student who is hospitalized or convalescing due to an illness or injury incurred or aggravated during the performance of service must notify OVS within two years after the end of the period needed for recovery from the illness or injury. A student who fails to apply for readmission within these periods does not automatically forfeit eligibility for readmission but is subject to the applicable University of Pittsburgh policies or practices generally governing student leaves of absence, readmission, and/or reinstatement.

OVS suggests that students providing Notification of military service or Notification of intent to return to school do so sending an email to the Director of OVS at the following address veterans@pitt.edu, or orally by calling 412-383-5580, in order to ensure accuracy and expeditious processing, but such notice is not required to follow any particular format. When a student is requesting readmission, they will be required to provide any supporting documentation requested by the University, in accordance with 34 C.F.R. § 668.18(g).

The University of Pittsburgh will promptly readmit the student into the next class or classes in the program beginning after they provide notice of intent to reenroll, unless they request a later date or unusual circumstances require the University of Pittsburgh to admit them at a later date.

The University of Pittsburgh will admit the student with the same academic status, which means:

- to the same program to which the student was last admitted or, if that exact program is no longer offered, the program that is most similar to that program, unless they choose a different program;
- at the same enrollment status, unless the student wants to enroll at a different enrollment status;
- with the same number of credit hours previously completed, unless the student is readmitted to a different program to which the completed credit hours are not transferable; and
- with the same academic standing (e.g., with the same satisfactory academic progress status) the student previously had.

If the student is readmitted to the same program, for the first academic year in which they return, the University of Pittsburgh will assess the tuition and fee charges that they were or would have been assessed for the academic year during which they left the school. However, if their veteran's education benefits or other service member education benefits will pay the higher tuition and fee charges that other students in the program are paying for the year, the University of Pittsburgh may assess those charges to the student as well.

If the student is admitted to a different program, and for subsequent academic years for a student admitted to the same program, the University of Pittsburgh will assess no more than the tuition and fee charges that other students in the program are assessed for that academic year.

The cumulative length of the absence and of all previous absences from the University of Pittsburgh for military service may not exceed five years. Only the time the student spends actually performing service is counted.

Helping students be readmitted and when it might not occur

If the University of Pittsburgh determines that the student is not prepared to resume the program with the same academic status at the point where they left off or will not be able to complete the program, the University of Pittsburgh will make reasonable efforts at no extra cost to the student to help them become prepared or to enable them to complete the program. This may include providing refresher courses and/or other remedial measures as the University deems appropriate under the circumstances.

The University of Pittsburgh is not required to readmit the student if it determines:

- that there are no reasonable efforts it can take to prepare the student to resume the program at the point where they left off or to enable them to complete the program; or
- that after it makes reasonable efforts (those that do not place an undue hardship on the institution), the student is not prepared to resume or complete the program.

"Undue hardship" means an action requiring significant difficulty or expense considering the overall financial resources of the school and the impact of such action on its operation.

The University of Pittsburgh has the burden to prove by a preponderance of the evidence that the student is not prepared to resume the program with the same academic status at the point where they left off or that they will not be able to complete the program.

Financial Information

Tuition

Enrollment Fee or Tuition Deposit

Upon acceptance to the University, students may be required to pay a nonrefundable, nontransferable enrollment fee or tuition deposit. If paying an enrollment fee, part of that fee will be considered to be a tuition deposit, and part might be used to pay for new student programming of some nature. The tuition deposit component will be applied toward their first-term tuition. The amount of the deposit varies, depending on your program of admission. Instructions for payment will be specified in the admission letter.

Full-time and Part-time Tuition and Mandatory Fees

Mandatory fees vary by campus, undergraduate and graduate level, and by full-time and part-time enrollment. Tuition rates are campus, level, and school specific. The University's tuition and mandatory fee rates are available on the Tuition Rates - Pennsylvania Residents page or the Tuition Rates - Out-of-State Residents page.

Pitt Online Tuition and Mandatory Fees

Pitt Online is a division of the University Center for Teaching and Learning. Through Pitt Online, several of the graduate programs offered in traditional classroom settings are available to qualified applicants regardless of their geographical location. Tuition and mandatory fees are available on the Pitt Online Tuition And Fees page; please note, these rates apply to students admitted to one of the Pitt Online programs, not to students taking one or more online classes as part of a traditional academic program.

Determining How Full-Time vs Part-Time Students are Billed

Undergraduate:

Undergraduate students registered for 12 to 18 credits are regarded as full-time students and are assessed the current undergraduate "flat" tuition rate for their academic center.

Undergraduate students registered for fewer than 12 credits are considered part-time and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the full-time credit limit.

Graduate:

Graduate students registered for 9 to 15 credits are regarded as full-time students and are assessed the current graduate "flat" tuition rate for their academic center.

Graduate students registered for fewer than 9 credits are considered part-time and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the full-time credit limit.

In the Summer Term:

All graduate students are billed on a per-credit basis except for students enrolled in a full-time program that charges a flat rate per term for fall, spring, and summer.

DETERMINING HOW UNDERGRADUATE VS. GRADUATE STUDENTS ARE BILLED

Students are billed at the undergraduate or graduate tuition level in accordance with University of Pittsburgh Tuition and Fees Policy.

- A student enrolled in an associate's or bachelor's degree program is considered an **undergraduate** student and is billed at the appropriate undergraduate tuition rate.
- A student who has already been awarded a bachelor's degree and is enrolled in a **graduate** or doctorate-professional practice program is considered a graduate student and is billed at the appropriate graduate tuition rate, even for undergraduate classes taken during the student's graduate career.
- A student who has already been awarded a bachelor's degree and is enrolled in an associate's program or in another bachelor's program is considered a **post-baccalaureate** student. Post-baccalaureate students enrolled in an undergraduate academic center are billed at the undergraduate tuition rate, while post-baccalaureate students enrolled in an academic center that has both undergraduate and graduate degree programs may be billed at either the undergraduate or graduate rate, according to the admitting school's program requirements.

About Mandatory Fees

Mandatory Fee figures are applicable to students regardless of Pennsylvania or Out-of-State residency. Not listed under Mandatory Fees are:

1. **Course/major fees** that are based upon registration in specific courses (e.g., lab fees).
2. **Academic fees** (e.g., application fees, academic program fees for programs such as Cooperative Engineering Program and Study Abroad).
3. **Service fees** (e.g., late application for graduation and lost ID cards).
4. **Professional workshop and professional development fees**
5. **Specific-student fees** such as the Freshman Socialization Fee at the Greensburg Campus.

Residency/Reduced Tuition

Admitted students who are United States citizens and have lived in Pennsylvania for a continuous period of 12 months before enrollment in any institution of higher education may be eligible for Pennsylvania tuition rates. Students who wish to challenge their residency classification may petition for Pennsylvania tuition rates by submitting convincing evidence for review to the Student Appeals Office in Thackeray Hall. The University's policy on Pennsylvania Residency Classification is located online at https://www.policy.pitt.edu/pa-residency-classification-eligibility-reduced-tuition.

Military affiliated students and students who are not U.S. citizens may be eligible for Pennsylvania tuition rates if they meet the qualifications and provide the documentation required by University of Pittsburgh Policy, Pennsylvania Residency Classification.

For any student younger than 22, both the student and parent(s) or legal guardian(s) must meet the residency requirements to be eligible for reduced tuition.

Eligibility for Pennsylvania tuition (in-state rates) is governed by the University's Policy on PA Residency Classification. The policy establishes the criteria used to classify a student as a Pennsylvania Resident (PA Resident) or Non-Resident for tuition purposes. PA Residents are charged in-state tuition rates; Non-Residents are charged out-of-state rates. The term "PA Resident" for tuition billing purposes may differ from other definitions of Pennsylvania residency.

I. Scope

This policy affects tuition rates charged to students who are enrolled in classes at the University of Pittsburgh. It outlines the requirements that must be met to be considered a PA Resident and the responsibilities of those charged with managing the process governing classification of a student's residency, including the PA Residency Coordinators at each campus.

II. Definitions

A. PA Resident: Classification of students who are charged the in-state tuition rate.

B. Enrolled: Enrolled, as it pertains to this policy, means a student is registered for one or more classes.

III. Policy

One of the requirements to be considered a PA Resident for tuition purposes is that a student must live in PA for 12 continuous months immediately prior to enrollment at an institution of higher education in PA. This is called the "12 Month Requirement." Students under the age of 22 are considered minors for purposes of residency determination and are classified based on the residency information of their parent(s) or legal guardian(s).

In addition to meeting the 12 Month Requirement, Non-U.S. Citizens must submit documentation proving they fall into one of the three immigration categories in the "Non-U.S. Citizens Immigration Requirements" section of this policy.

Section V below outlines the requirements that must be met in determining residency classification. As explained in that section, PA Residency Coordinators serve as the central points of contact for submitting materials required under this Policy. Contact information for the PA Residency Coordinators at each campus is provided in Section IX-Resources, below. Where deadlines in this Policy refer to academic term and session dates, please refer to the University's official academic calendar on the Office of the University Registrar's website.

Scholarships Contingent on Non-Residency

A student receiving a scholarship or grant contingent on maintaining a residence in a state other than PA will be classified as a Non-Resident for tuition purposes.

University of Pittsburgh grants or scholarships awarded to the student based on out-of-state residency status may be reduced or cancelled if the student is subsequently reclassified as a PA Resident.

IV. Requirements

A. 12 Month Requirement

Students who have lived in PA for at least 12 consecutive months immediately prior to enrollment at any institution of higher education in PA meet the 12 Month Requirement. For U.S. Citizens, this is all that is required for classification as a PA Resident. Students who are Non-U.S. Citizens must also meet the immigration requirements described in Subsection B below in order to be eligible for reclassification to PA Resident. Students under the age of 22 are considered minors for purposes of residency determination and are classified based on the residency information of their parent(s) or legal guardian(s).

Students who do not meet the 12 Month Requirement are classified as Non-Residents. Those who wish to challenge their classification can file a petition with their campus PA Residency Coordinator. Instructions are provided below in Section VI. Petitioning to Overcome the 12 Month Requirement.

B. Non-U.S. Citizens Immigration Requirements

In addition to meeting the 12 Month Requirement, Non-U.S. Citizens must demonstrate that they fall into one of three immigration categories to be reclassified to PA Resident:

1. Asylee, refugee, or U.S. Lawful Permanent Resident (green card holder); or
2. Has an approved I-140 or I-130, along with Form I-797, the Receipt Notice for the filing of Form I-485; or
3. Has an approved I-140 or I-130, along with evidence to support that they intend, but are unable, to file a Form I-485 because they do not have a current priority date as determined by the most recent U.S Department of State Visa Bulletin.* To provide sufficient evidence under this category, the student must provide evidence of their country of birth; in most cases, a copy of the passport identification page meets this requirement.

Filing Deadlines. Students who meet the 12 Month Requirement and fall into one of the immigration categories above must submit copies of their immigration documents to their campus PA Residency Coordinator to request reclassification by:

- Fall, Spring, and Summer Terms: no later than 30 calendar days after the first official day of classes for the term.
- Summer session within the Summer Term: no later than 15 calendar days after the first official start date of classes for the session.

If documentation is submitted after the deadline, the request for reclassification will be effective on the first day of the following term or summer term session. Residency reclassification is not retroactive to any prior terms.

** Refer to the U.S. Department of State and U.S. Citizen and Immigration Services for further information about determining your priority dates. As explained in those resources, a person's priority date is determined by the specific category of permanent residency applied for, and the country of chargeability (birth).*

C. Military Affiliated Students

Qualifications. Individuals who meet at least one of the following qualifications are eligible for PA Resident status for tuition purposes:

Under the Commonwealth of Pennsylvania Statutes Title 24 (Education), Section 2509 (the "Act").

1. Any Veteran, their spouse, dependent children, or any other individual who is eligible to receive benefits under any of the following:

1. 10 U.S.C. Chapter 1606 Montgomery GI Bill® Selected Reserve
2. 38 U.S.C. Chapter 30 Montgomery GI Bill® Active Duty
3. 38 U.S.C. Chapter 31 Vocational Rehabilitation and Employment
4. 38 U.S.C. Chapter 33 Post-9/11 GI Bill®

In addition, a child, a spouse, or a surviving spouse who is eligible to receive benefits under Chapter 35 (relating to survivors' and dependents' educational assistance) qualifies for the PA Resident tuition rate.

For purposes of the Act, a "Veteran" is any individual who served in the United States Armed Forces, including a reserve component or National Guard, and who was discharged or released from service under conditions other than dishonorable.

If you meet any of the above-listed requirements, please provide a copy of the Service Member's DD214 and your Certificate of Eligibility from the VA to the Residency Coordinator at the Pittsburgh campus.

2. Military personnel who are assigned to an active duty station in Pennsylvania and who reside in Pennsylvania, and their spouses and dependent children. If you meet this requirement, please provide a copy, to the Residency Coordinator at the Pittsburgh campus, of the active duty member's orders and a copy of the first page of the most recent IRS Form 1040/1040A displaying the name of the spouse or dependent child, if applicable.

3. Civilian personnel employed at a US Department of Defense facility who are transferred to Pennsylvania by the US Department of Defense and who reside in Pennsylvania, and their spouses and dependent children. If you meet this requirement, please provide a letter, to the Residency Coordinator at the Pittsburgh campus, from the US Department of Defense that documents the transfer to Pennsylvania specifying the name of the person employed, the applicable US Department of Defense facility in Pennsylvania, and the start date, along with a copy of the first page of the most recent IRS Form 1040/1040A displaying the name of the spouse or dependent child, if applicable.

Under the Commonwealth of Pennsylvania Consolidated Statutes Title 51 (Military Affairs), Chapter 32:

1. Service Members of the Pennsylvania National Guard who are receiving the Education Assistance Program (EAP) Grant qualify for the resident tuition rate. Beginning academic year 2020-2021, PA National Guard members' spouses, surviving spouses, and children who are eligible for benefits under the Military Family Education Program (MFEP) also qualify for the resident tuition rate. If you meet these requirements, you will be reclassified to a Pennsylvania resident once you are an enrolled student and the financial aid office has been notified by the Pennsylvania Higher Education Assistance Agency that you have been awarded EAP or MFEP benefits.

Filing Deadlines. Military affiliated students should submit the documentation described in paragraph (1), (2), or (3) above to the PA Residency Coordinator at their campus to request reclassification by:

- Fall, Spring, and Summer Terms: no later than 30 calendar days after the first official day of classes for the term
- Summer session within the Summer Term: no later than 15 calendar days after the first official start date of classes for the session.
- date of classes for the session.

If documentation is submitted after the deadline, the request for reclassification will be effective on the first day of the following term or summer term session. Residency reclassification is not retroactive to any prior terms.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

V. Petitioning and Appealing to Overcome the 12 Month Requirement

A. Filing a Petition

Students whose initial residency classification is Non-Resident because they do not meet the 12 Month Requirement may complete the University's petition form and file it, together with supporting documentation, to the PA Residency Coordinator at their campus. Through the Petition Process and supporting documentation, the student must demonstrate that they:

1. Came to PA for reasons other than enrollment in an institution of higher education; and/or
2. Intend and are able to live in PA permanently or indefinitely upon completion of their academic studies.

Contact information for the PA Residency Coordinator at each campus, the petition form, and its filing instructions, are provided in Section IX-Resources, below.

Petition Deadlines. A student must submit their petition to the PA Residency Coordinator by:

- Fall, Spring, and Summer Terms: no later than 30 calendar days after the first official day of classes for the term.
- Summer session within the Summer Term: no later than 15 calendar days after the first official start date of classes for the session.

Petitions Filed After the Deadline. A petition filed after the deadline will be considered for the following term or summer term session.

Request for Additional Documentation. If additional documentation and information is requested by the PA Residency Coordinator, it must be submitted within 15 days of the date requested. Otherwise, the petition will be denied for that term.

B. Factors Considered

The following factors may be taken into consideration by the University when rendering a decision on a petition or appeal for reclassification. No required number of factors must be met, since each case is decided on the basis of the facts provided, the quality and reliability of the documentation submitted, and *the student's intentions and actual ability to live permanently or indefinitely in PA*.

- Payment of appropriate PA state and local taxes.
- Agreement for permanent, full-time employment in Pennsylvania.
- Lease or purchase of a permanent, independent residence in Pennsylvania by the student.
- Transfer of bank accounts, stocks, automobiles, and other registered property to Pennsylvania from another state.
- Membership in social, civic, political, athletic, and religious organizations located in Pennsylvania.
- Procurement of a Pennsylvania driver's license.
- Procurement of a Pennsylvania motor vehicle registration.
- Registration to vote in Pennsylvania
- A notarized statement by the student or their parent(s) or legal guardian(s) in the case of a minor declaring their intention to make Pennsylvania their residence either permanently or for an indefinite period of time.
- A notarized statement from the parent(s) or legal guardian(s) of a student under the age of 22 setting forth facts to establish the student's financial independence and separate residence. The student should provide financial documentation demonstrating the ability to fully and independently support themselves to substantiate this condition.

C. PA Residency Coordinator Decision

The PA Residency Coordinator will review the petition and supporting documentation, and then render a decision and provide written notification to the student.

If the petition was submitted by the deadline for the term, and the petition is approved, the residency reclassification will remain in effect going forward.

A petition filed after the deadline for a term, if approved, will be effective on the first day of the following term or summer term session. Reclassification is not retroactive to any prior terms.

If the petition is denied, the student has 30 days from the date of notice of denial to inform their PA Residency Coordinator in writing if they wish to appeal by appearing before the University Residency Appeals Committee (the Committee) as noted in Subsection D below. The PA Residency Coordinator will notify the Committee of the student's request.

D. University Residency Appeals Committee

If a student properly files an appeal of the PA Residency Coordinator's decision, the student will be invited to the next regularly scheduled meeting of the Committee so the Committee can review the PA Residency Coordinator's decision. The student has the option to attend that meeting with the Committee to discuss their case and answer questions. After the meeting, the Committee will deliberate and render a final decision that will be provided to the student in writing. If the student wishes to be accompanied to the meeting by legal counsel, the attorney will be limited to observing and cannot participate in the meeting, nor respond to questions on behalf of the student.

If the initial petition form was submitted by the deadline, and the Committee approves the student's appeal, the effective beginning term of reclassification will be term in which the student filed the petition.

If the initial petition form was submitted after the deadline for a term, and the Committee approves the appeal, the effective beginning term of reclassification will be on first day of the following term or summer term session. Reclassification is not retroactive to any prior terms.

VI. Notifications

1. When a student moves from Pennsylvania to another state they must give written notice to their campus PA Residency Coordinator.
2. When parents of a student under 22 years of age move, the student must give written notice of any change in their parent's/parents' or legal guardian's/legal guardians' address to their campus PA Residency Coordinator.

VII. Adjustments and False Information

Students who are found eligible for in-state rates due to an error in classification are subject to retroactive reclassification as Non-Residents and are responsible for the payment of all related tuition and fees.

Students who are found eligible for in-state rates as a result of false or concealed facts are subject to University discipline and are responsible for the immediate payment of all Non-Resident tuition and fees. Failure to make payment in full may result in legal action and additional costs, including legal fees, court costs, and collection costs that may include an additional percentage of the total amount due to the University, if the unpaid account balance is assigned to a Collection Agency.

The University reserves the right to periodically audit and make any necessary adjustment in the classification of all students.

VIII. Governance or Responsibilities

A. Student

- Under 22, notifies the University of a change in residency of their parent(s) or legal guardian(s);
- Notifies the University of a change in their residency status;
- Files a petition with their campus PA Residency Coordinator, if they receive a Non-Resident classification; and
- Notifies their PA Residency Coordinator if they wish to file an appeal of a decision to deny their petition of a Non-Resident classification.

B. PA Residency Coordinator

- Reviews residency petitions and makes decisions on residency classification;
- Communicates results to the student as needed and when appropriate;
- Notifies the University Residency Appeals Committee of a student's appeal of the PA Residency Coordinator's decision on a petition; and
- Provides written notification to the student of the Committee's final decision, if the student has elected to have the Committee review the appeal.

C. University Residency Appeals Committee

- Reviews student appeals; and
- Provides final decisions on residency classification based on information provided during the review of the appeal.

Petitioning for Eligibility for Reduced Tuition Rates

Instructions for Petitioning

Financial Obligation

Students establish a financial obligation to the University when they enroll in courses and will be asked to acknowledge that obligation to be permitted to enroll in classes each term. The agreement to pay (Promissory Note) the student electronically agrees to provide detailed information about the student's financial obligation and also the consequences of default of that obligation. Unpaid accounts may be referred to a collection agency, reported to credit bureau(s), and/or the student may be subject to legal action. In either case, the student will be responsible for any and all expenses incurred, including attorney fees. Students will bear the University's costs and fees associated with all collection activity resulting from the student's failure to make payment under the agreement they will sign each term.

Fees

Special Service Fees may be charged for University transactions that are processed beyond deadlines, due dates, and specified time limits. Special service fees are listed each term in the Schedule of Classes.

Course Fees are associated with certain courses and will be charged when the student enrolls in those courses. These courses are identified in the Schedule of Classes and Course Descriptions. Course fee information is also available on the Academic Regulations page.

Late Payment Fees are charged when students make payment after the published due date for their charges for the term.

Payments and Credit Balance Refunds

PittPAY is the University's online financial portal for students and the Authorized Users that students have designated as having access to their financial information.

Payments may be made in PittPAY by electronic check (eCheck) or by credit or debit card. While there is no charge for eCheck transactions, our vendor will charge a non-refundable convenience fee for all debit or credit card payments. Check payments can be mailed to the address on the Remittance Form at the bottom of the Term Statement, which students and Authorized Users can generate and print themselves.

International Payments can be processed in PittPAY through the University's partnership with Flywire. Flywire offers a streamlined and cost effective way for students and Authorized Users to make international payments on the student account from almost any country, in most currencies.

PittPAY Payment Plans are available for those who elect to make payments in a series of monthly installments, instead of one payment by the due date. Participation in a payment plan is optional. To view available payment plan offers, go to the Payment Plans tab in PittPAY.

eRefunds are automatic refunds of credit balances from the student account. Credit balances occur when payments to the account, including the disbursement of loans and financial aid, exceed the amount you owe. Students and Authorized Users who are Parent PLUS loan borrowers, go to the eRefund tab in PittPAY to designate the checking or savings account where your credit balances should be directly deposited.

Tuition Rates - Pennsylvania Residents

Graduate Cost of Attendance

Pennsylvania Residents

Cost of Attendance includes Tuition, Mandatory Fees, and Other Estimated Expenses. Tuition and Mandatory Fees are the board-approved rates. Tuition and mandatory fees also apply to the summer term.

Costs charged to the student account include tuition and mandatory fees, on-campus housing, university meal plans, some course materials, and certain program-related fees. Examples of costs that are not charged to the student account are off-campus housing and food, misc. personal expenses, and transportation costs.

Tuition Rates

Program	Fall and Spring Terms	Full-time per Term	Part-time per Credit	Summer Term per Credit
Dietrich School of Arts and Sciences	$27,412	$13,706	$1,100	$1,100

Mandatory Fees

Fee Type	Full-time, Two terms	Full-time per Term	Part-time per Term
Student Activity Fee	$80	$40	$20
Wellness and Recreation Support Fee	$1,060	$530	$265
Computing and Network Services Fee	$550	$275	$137
Transportation Fee	$316	$158	$158
Total*	$2,006	$1,003	$580

*In summer term, the Student Activity Fee is $20 for full-time and $10 for part-time enrollment. Tuition and Mandatory fees exhibited on this website are subject to change without prior notice. Additional fees apply for School of Medicine students.

Other Estimated Expenses

Fee Type	Full-time, Two Terms	Full-time per Term	Part-time per Term
Transportation	$1,114	$557	$557
Loan Fees	$218	$109	$109
Miscellaneous Personal Expenses	$3,304	$1,652	$1,652

Housing	$10,374	$5,187	$5,187
Food	$6,118	$3,059	$3,059
Books & Supplies	$584	$292	$292
Total*	$21,712	$10,856	$10,856

*The Other Estimated Expenses displayed are the same for PA and non-PA students. Your actual expenses may vary based on student choice, travel habits, and academic program.

Pitt Online Tuition And Fees

Online Graduate Cost of Attendance

Cost of Attendance includes Tuition, Mandatory Fees, and Other Estimated Expenses. Tuition and Mandatory Fees are the board-approved rates. Tuition and mandatory fees also apply to the summer term.

Costs charged to the student account include tuition and mandatory fees, on-campus housing, university meal plans, some course materials, and certain program-related fees. Examples of costs that are not charged to the student account are off-campus housing and food, misc. personal expenses, and transportation costs.

Graduate Tuition

School/College	Full-time per Term	Part-time per Credit
School of Public and International Affairs Master of Public Policy and Management (MPPM)	$13,706	$1,100
Swanson School of Enginnering Graduate Certificate in Construction Management	$15,314	$1,449
Swanson School of Engineering Graduate Certificate in Electric Power Engineering	$15,314	$1,449
Swanson School of Engineering Graduate Certificate in Nuclear Engineering	$15,314	$1,449
Swanson School of Engineering Master of Science in Civil Engineering	$15,314	$1,449
Swanson School of Engineering Master of Science in Nuclear Engineering	$15,314	$1,449
School of Computing and Information Graduate Certificate in Applied Data-Driven Methods	$14,412	$1,170
School of Computing and Information Master of Data Science	N/A	$510
School of Computing and Information Master of Library and Information Science (MLIS)	$14,412	$1,170
School of Nursing Adult-Gerontology Acute Care Nurse Practitioner (MSN) (Hybrid)	N/A	$1,200

Transportation	$0	$0	$0
Loan Fees	$218	$109	$109
Miscellaneous Personal Expenses	$3,304	$1,652	$1,652
Housing	$10,374	$5,187	$5,187
Food	$6,118	$3,059	$3,059
Total*	$20,598	$10,299	$10,299

*The Other Estimated Expenses displayed are the same for PA and non-PA students. Your actual expenses may vary based on student choice, travel habits, and academic program.

Due Date Schedule

Notifications and Due Dates

Weekly Balance Due Notifications are sent by email and text to students and their Authorized Users from pittpay@pitt.edu when there is a balance due on the student account. To view and edit your email and mobile phone number settings for these notifications, login to PittPAY, select Actions, then Manage Notifications.

Please note, due dates provided here are for planning purposes. The due dates for future terms are estimates, and are subject to change. When balance due notifications begin for each new term, the official due date will be presented in PittPAY on the Account Summary and Account Activity tabs. The current due date is always provided on the Student Payment Center's homepage, as well.

Term	Periodic Balance Due Notifications Begin:	Balance is Due:
Spring 2024	November 22, 2023	January 24, 2024
Summer 2024	April 17, 2024 May 22, 2024	May 22, 2024 June 20, 2024
Fall 2024	July 24, 2024	September 11, 2024
Spring 2025	November 20, 2024	January 29, 2025

As soon as you make an online payment in PittPAY, your balance due will be updated to reflect the payment. You can view your payment receipt in Transaction History. Late fees, collection costs, and financial holds are placed on past due accounts.

If you prefer to make monthly payments, learn about the PittPAY Payment Plan. **There is a deadline to enroll in a payment plan each term** and you can take advantage of more monthly installments by enrolling in a plan early.

Graduate programs in the Dietrich School of Arts and Sciences (A&S) are designed to prepare students for careers in research and teaching in the humanities, natural sciences, and social sciences responsive to the evolving needs of the private and public sectors of society as well as to the particular interests of academia.

A&S Graduate Studies has final approval over all admissions to graduate study in A&S. It reviews and records the academic progress of graduate students, including the passing of comprehensive examinations, admissions to doctoral candidacy, and final oral examinations. It verifies the completion of theses and dissertations and certifies all graduate degrees awarded in the Dietrich School of Arts and Sciences.

Contact Information

Questions regarding admissions and programs of study should be addressed first to the individual graduate department or program. Questions regarding registration and graduate status should be addressed to:

Dietrich School of Arts and Sciences-Graduate Studies
910 Cathedral of Learning
412-624-6094
E-mail: graduate@as.pitt.edu
www.asgraduate.pitt.edu

Admissions

A&S offers MA, MFA, and PhD degrees and certificate programs in the humanities; MA, MS, and PhD programs in the natural sciences; and MA and PhD programs in the social sciences. Several dual and joint degree programs are available.

Students applying for admission should proceed as follows:

Interested applicants are encouraged to go to the Dietrich School of Arts and Sciences graduate Web page at www.asgraduate.pitt.edu and to visit Web pages of their departments of interest. Students should complete the online application through Liaison GradCAS.

Deferred Admission

Admission to graduate study is valid for the academic year. If a department approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. The deferral of admission is independent of financial aid.

Transferring Between A&S Departments

A student desiring to change a major department of graduate study in A&S must file an application for admission in the department of intended graduate study. Applications for transfer will be evaluated in the same way as applications for admission to the designated department. An application fee is not required.

Admission of International Students

Before reading the A&S-specific details below, see the *International Graduate Student Admission section under Application for Admission* section for a complete overview of University admissions requirements, including the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), and the Duolingo English Test as a measure of English language proficiency.

Minimum requirements for all Dietrich School graduate programs (several graduate degree programs have higher requirements, please check the specific requirements of your prospective program):

TOEFL: a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. TOEFL scores submitted must not be more than two years old.

IELTS: score of 7.0, with at least 6.5 in each of its four sections. IELTS scores submitted must not be more than two years old.

Duolingo English Test: Minimum score: 120. Duolingo scores submitted must not be more than two years old. The Duolingo English Test is an online English proficiency test that can be taken online, on-demand, in under an hour. The test is taken via a computer with a camera and includes a proficiency score, video interview, and writing sample which are shared with the University of Pittsburgh when you send your results.

International Student Application Deadlines and Application Fee

The deadlines for submitting a completed application and financial aid form are determined by the individual departments, but due to delays in the issuance of visas it is recommended that international students apply as early as possible, preferably at least six months prior to the start of the term of admittance, so that paperwork can be processed in a timely manner.

The application fee for all students is $75. The fee must be submitted in the form of a check or money order made payable to the University of Pittsburgh or may be paid using a credit card when applying online.

Admission Status

For an overview of the requirements for the three admission statuses-full, provisional, and special-see Admissions Status in the Application for Admission section of this catalog.

Full Graduate Status

Only students in full graduate status may undergo preliminary evaluations, take comprehensive examinations, or be advanced to degree candidacy.

Provisional Graduate Status

Transfer from provisional to full graduate status is possible only upon formal recommendation of the student's department and after:

1. removal of deficiencies noted at the time of admission, with A or B grades, and/or
2. completion of four courses (12 credits) for which graduate credit is earned with at least a 3.00 average.

Special Status

A special status student who takes courses while not seeking an advanced degree may transfer up to four courses (12 credits) taken while on special status to a degree program if the student is subsequently admitted into one, and if the department recommends the transfer. A transferred course must carry a grade of B or better.

Those special status students who earn graduate credits while on temporary admission may apply those credits toward degree requirements.

Early Admission Program

Exceptionally able students in Arts and Sciences at the University of Pittsburgh (GPA of 3.50 or above) with strong letters of recommendation from faculty in the department to which they are applying may be admitted to full graduate status in a department in A&S. At the time of admission, students must have completed 96 credits toward the baccalaureate degree, the final 30 of which must have been taken in A&S, and must have satisfied the general education requirement, second language requirement (if any), and academic major requirements (as certified by A&S). For additional information regarding requirements for the completion of the baccalaureate degree, see the *A&S section in the University of Pittsburgh Undergraduate Catalog.*

Inactive Status/Readmission

For detailed information on what constitutes inactive registration status and requirements for readmission to active status, please see *Readmission.*

Applications for readmission to A&S should be received according to the following schedule:

- Fall term readmission applications by August 1
- Spring term readmission applications by December 1
- Summer term and/or sessions by April 1

Academic Standards

In addition to those University-wide regulations and standards detailed in the section on General Regulations, each student in A&S is expected to be familiar with these school-specific regulations and academic standards:

Credits and Grade Points

Courses for which a G, I, N, R, or W grade is recorded and courses numbered below 1000 or lower (0-0999) do not contribute either credits or grade points toward graduation. When a course is repeated, only the last grade and credits are used to calculate the GPA.

Students must achieve the minimum GPA established by their departments, in no case less than 3.00, to undergo the preliminary evaluations, to take comprehensive examinations, to be admitted to candidacy for the PhD degree, and to graduate.

Independent study and individual thesis and dissertation research must be graded using the S/NC option and thus are not used in the calculation of the GPA required for continuation in good academic standing.

Academic Probation and Dismissal

A graduate student who fails to maintain an overall GPA of 3.00 or to make satisfactory progress in a degree program is subject to dismissal from graduate study at the University. When the overall GPA of a student falls below 3.00, the student is automatically placed on academic probation; is not eligible for participation in the department comprehensive examination; and is subject to dismissal at the end of the following term. The department should so warn the student in writing.

In addition, any student who is not making satisfactory progress toward the completion of an advanced degree (completion of an acceptable number of required courses and/or research each term or year) may be placed on academic probation by the department. The student must be informed in writing of this action by the department. Normally, one term will be granted in which to correct the deficiency.

A student whose performance on a preliminary or comprehensive examination is judged to be inadequate may be subject to dismissal at the end of the term.

Students who have been dismissed for academic reasons may be able to appeal that decision. Students can appeal until all appeals are exhausted. Appeals generally start in the student's home department, depending on the outcome of the initial appeal they can then appeal the initial outcome to the Graduate Dean's office and ultimately to the Office of the Vice-Provost of Graduate Studies.

Withdrawal from Courses

Students may add or drop courses before the end of the add/drop period. A student who wishes to withdraw from an individual course after the add/drop period must complete a Monitored Withdrawal form available from the Dean of the school offering the course, obtain the signature of the instructor, and return the completed form to the Assistant Dean of Graduate Studies, 910 Cathedral of Learning. A W grade will then be issued.

Students may terminate their registration in all classes by informing the Office of the University Registrar of their intent to do so prior to the end of the add/drop period for the term. Students registered for courses scheduled to begin after the end of the add/drop period for the term may terminate their registration by informing the Office of the University Registrar of their intent to do so at any time prior to the first scheduled meeting day of the class. A student who stops attending a course and does not initiate the withdrawal or resignation procedures may be assigned an F grade.

Repetition of Courses

A student may repeat any course in which a grade of B- or lower is received if authorization is given by the student's department. When a graduate student repeats a course in which the subject matter has not changed, only the last grade received is counted in computing the grade point average. A Course Repeat form must be filed with A&S Graduate Studies, 910 Cathedral of Learning, to initiate proper computing of the grade point average.

Grade Changes

A grade given by an instructor for completed work will not be changed unless an error has been made in reporting or recording the grade. (Reexamination or extra work may not be used as a basis for a change of grade.) Grade Changes must be approved by the Assistant Dean of Graduate Studies.

Independent Study

Students who are using University facilities to an extent greater than represented by their formal course load (and those students required by a fellowship or other appointment to be full-time students) are required to register for an appropriate number of additional credits of Independent Study to reflect their correct status. All graduate study not under the direct supervision of a specific faculty member is, by definition, Independent Study, course number 2990 in each program. This includes study for preliminary evaluations, comprehensive and overview examinations, the preparation of research proposals, etc. Only the S/NC Grade Option may be used in a 2990 course.

Directed Study

Registration for Directed Study is limited to students in good academic standing and normally beyond their first year of graduate study who wish to study or carry out a project in an area not available in a formal course. The work must be under the direct supervision of a faculty member who has approved the proposed work in advance of registration. A brief description of the work should be recorded in the student's file in the department. Either a letter grade or the S/NC option may be used to evaluate the quality of work performed by the student, and both the credits and the grade points (if any) will be used in determining the academic standing of the student.

Transfer Credits

Students may transfer credits earned at another accredited institution in an approved degree-granting graduate program toward the requirements for an advanced degree at the University of Pittsburgh. Students requesting advanced-standing credits by transfer should indicate this within the first year of graduate study and provide official transcripts. The department evaluates each applicant's credentials and indicates to the student at the time of admission its recommendation to the Assistant Dean of Graduate Studies concerning advanced-standing credit. Credits for course work taken 10 or more years prior to admission for graduate study at the University of Pittsburgh are not automatically transferred for PhD students. For master's students, credits for course work taken four or more years prior to admission for graduate study at the University of Pittsburgh are not automatically transferred. Departments must evaluate such coursework in terms of its currency of knowledge in the field when submitting transfer credit requests for approval by A&S. Students admitted with special or provisional status cannot transfer credits until full status has been granted. Graduate students already enrolled, when approved in advance by their department and the Assistant Dean of Graduate Studies, may spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and may transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh.

A maximum of 6 credits may be accepted by transfer toward the requirements for the master's degree. A maximum of 30 credits may be transferred toward the requirements for the PhD degree for course work at the master's level earned in another approved graduate school. A student who transfers 30 credits due to completion of a master's degree at another institution is not eligible to earn a master's degree in that discipline at the University of Pittsburgh. If a student has completed relevant graduate work beyond the master's level at another institution, up to an additional 6 credits may be accepted for transfer. (No more than 36 credits can be accepted for transfer from all other graduate institutions.) Acceptance of credits by transfer from other graduate schools does not relieve the student from the requirement to register at the University of Pittsburgh and satisfactorily complete a minimum of 24 credits for a master's degree and a minimum of 36 credits for a PhD degree.

For further detail on University requirements on transfer credits, see Acceptance of Transfer Credits under the General Regulations section of this catalog.

Registration of Undergraduate Students for Graduate Credit

University of Pittsburgh undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree in A&S may be permitted, during their final term, to register for one or two courses at the 2000 level for credit toward a graduate degree. Students must obtain written permission from an A&S department admissions officer that the course may count when and if they are admitted into the degree program. This privilege should not be granted if the proposed total course program exceeds a normal full-time load or if the courses are required for the undergraduate degree. When students register for graduate study at the University, these graduate credits and grades may be transferred to the graduate transcript upon recommendation of the department and approval by the Assistant Dean of Graduate Studies. No more than 6 credits can be transferred in this manner.

Statute of Limitations and Leaves of Absence

All regulations regarding the statute of limitations for completion of degree requirements and leaves of absence are detailed under Statute of Limitations section under General Regulations. Variations and additions to those rules within A&S are as follows:

Requirements for the master's degree should be completed within a period of four consecutive calendar years from the student's initial registration for graduate study. Requirements for the PhD degree must be completed within a period of 10 years from the student's initial registration, or within 8 years if the student has received a previous master's degree. Some departments may have a more stringent statute of limitations for completion of master's or doctoral degrees. There is also a strictly enforced limit of four calendar years on the master's comprehensive examination or its equivalent for students beginning or readmitted for graduate study in fall 2002 or later, and a seven-calendar-year limit on the PhD comprehensive examination for students entering graduate study programs in fall 1999 or later. (Ten-year limits on PhD comprehensive examinations apply for doctoral students enrolled prior to fall 1999.) If the student has not completed all requirements for the master's or doctoral degrees within the time limits on comprehensive examinations for degrees as specified above, the comprehensive examination for the degree must be retaken in order to graduate.

Under exceptional circumstances a candidate for an advanced degree may apply for an extension of the statute of limitations. Applications are available in the department or in A&S Graduate Studies, 910 Cathedral of Learning. They must state the reason for the delay, provide evidence of continuing progress toward the completion of the degree, and include a detailed plan of study and proposed date for completion. The request must be approved by the Chair of the student's doctoral or master's committee and the department Chair or director of graduate studies and be submitted to the Assistant Dean of Graduate Studies for final action. Each student who requests an extension of the statute of limitations must be able to demonstrate proper preparation for the completion of all current degree requirements. There is no extension on the time limits for the master's and doctoral comprehensive examinations.

Under special conditions, graduate students may be granted a leave of absence. Only one leave of absence can be obtained by students during their graduate career. Readmission following an approved leave of absence is a formality.

Advising and Placement

Advising and placement services in A&S graduate programs are conducted within the various departments and programs. Students should consult department handbooks, their departmental advisor, their departmental director of graduate studies, their departmental graduate administrator, and/or the Chair for details. The A&S Graduate Studies Office makes every effort to keep advising and placement in the forefront of departmental concerns. All departments are responsible, with A&S oversight, for implementing policies and practices consistent with the University's in *Elements of Good Academic Advising*. Unresolved problems relating to the advising of graduate students at the department level can be taken to the Assistant Dean of Graduate Studies and Research in A&S Graduate Studies, 910 Cathedral of Learning

A&S Degree Requirements

The general requirements for the master's degrees and doctoral degrees are detailed under Regulations Pertaining to Master of Arts and Master of Science Degrees, Regulations Pertaining to Professional Master's Degrees (including the MFA), and Regulations Pertaining to Doctoral Degrees. For further A&S-specific requirements, see below. Once the University-wide requirements and the A&S Degree Requirements below have been reviewed, see the relevant departmental description for more specific detail.

Requirements for the MA, MS, and MFA Degrees

The minimum requirement for the Master of Art and Master of Science degrees is 30 credits beyond the baccalaureate degree. Furthermore, the MFA, as a professional degree, requires a minimum of 36 credits. Not more than 6 credits may be granted toward the completion of the requirements for a master's degree for work completed at another accredited graduate institution. Most programs require more than this minimum.

Credit Requirements

In addition to the general credit requirements detailed under MA and MS Requirements at the front of this catalog, the following requirements must be satisfied:

- Completion of 12 credits from the 2000 or 3000 series with a grade of B or higher.
- All courses from the 2000 or 3000 series must be completed with an average grade of B (3.00)
- Registration for research, independent study, or directed study cannot be included among the minimum of 12 credits that must be taken from the 2000 or 3000 series with a grade of B or higher
- Independent study credits do not count towards the MA/MS/MFA degrees

Second Language Requirement

The requirement of proficiency in second languages is at the discretion of individual departments.

Comprehensive Examination

Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program must obtain prior approval from the A&S Graduate Council and notify the University Council on Graduate Study and describe the situation. Students on inactive, special, or provisional status, or who have a GPA less than 3.00, are not eligible to take the comprehensive examination. *See Comprehensive Examination under Regulations Pertaining to Master's Degrees for further detail on requirements for comprehensive exams.*

Thesis

The requirement of a thesis or its equivalent is at the discretion of individual departments. If a thesis is submitted, its form must be in accord with specifications available from The ETD Format Guidelines Manual and approved by the Assistant Dean of Graduate Studies. A report of the final oral examination in defense of the master's thesis must be filed in 910 Cathedral of Learning. *For further information on thesis requirements, including the make up of the thesis committee, see Thesis Option under Regulations Pertaining to Master's Degrees.*

Application for Graduation

Each candidate for graduation must file an official Application for Graduation early in the term in which graduation is expected. (See your graduate administrator for deadline dates.) *See Application for Graduation under General Regulations for further details on graduation and graduation requirements.*

Graduation Certification

The faculty of the department evaluates the performance in course work and on comprehensive examinations. If the candidate's performance is satisfactory and all degree requirements have been met, a letter must be submitted to the Associate Dean for Graduate Studies and Research, on behalf of the department, certifying that the candidate has completed all requirements for a master's degree and indicating whether or not the candidate is recommended to proceed to doctoral study.

Requirements for the PhD Degree

An overview of the University requirements for the PhD degree is presented in Regulations Pertaining to Doctoral Degrees. A&S-specific requirements are detailed below.

Credit Requirements

The minimum requirement for the PhD degree of 72 credits may be earned in formal course work, directed study, independent study, and/or thesis and dissertation research.

Course Requirements

Students must achieve the minimum GPA established by their departments, in no case less than 3.00, to be eligible to undergo the preliminary examination, to take the comprehensive examination, to be admitted to candidacy for the PhD degree, and to be graduated.

Second Language and/or Other Tools of Research

The requirement of proficiency in the use of second languages or other tools of research is at the discretion of individual departments. The second language departments have the capacity to evaluate second language proficiency and will be available to so certify.

Preliminary Examination

The nature of the preliminary examination/evaluation and the time when it is conducted are determined by each department. In some programs, the preliminary doctoral exam/evaluation may be combined with a master's comprehensive examination. *See Preliminary Evaluation under Regulations Pertaining to Doctoral Degrees for further details on regulations pertaining to the exam. Students must be registered in the term they are completing the Preliminary Examination*.

Comprehensive Examination

Comprehensive examination results must be reported promptly to A&S Graduate Studies, 910 Cathedral of Learning, and no later than the last day of the term in which the examination is administered. Students must be enrolled in the term in which they are completing the Comprehensive Examination. *See Comprehensive Examination under Regulations Pertaining to Doctoral Degrees for further detail on regulations regarding the exam*

Doctoral Committee

Doctoral dissertation committees are composed of four members, three of whom must be Graduate Faculty with either a primary appointment in the candidate's department or a secondary/joint appointment in the candidate's department and a primary/joint appointment in another relevant department within the University of Pittsburgh ("internal members"). The fourth member must be Graduate Faculty external to the candidate's department within the University of Pittsburgh or a qualified scholar with an equivalent status at another accredited institution ("external member"). The Graduate Faculty Roster for the University of Pittsburgh can be viewed at the following website: https://www.gradstudies.pitt.edu/academics/resources-research/graduate-faculty-roster. Membership in the Graduate Faculty is not automatic and must be formally requested by the faculty member's department and approved by the Associate Dean of Graduate Studies before the faculty member can serve on a doctoral dissertation committee. The Chair of the committee must be a current (or recently departed) member of the University of Pittsburgh. Any member may serve as Co-Chair.

Notification of Committee Membership

The names of the committee members must be submitted to the Graduate Studies Office as part of the application for candidacy by the graduate student. All requests for subsequent changes to the committee should be submitted for approval to the Graduate Studies Office by the Graduate Administrator for the candidate's department. Any changes to the committee membership, internal or external, after the dissertation proposal/prospectus/overview meeting must be approved by the Assistant Dean of Graduate Studies before the dissertation defense. Forms for admission to candidacy and committee changes can be obtained by the Graduate Administrator in the A&S Graduate Handbook.

Special Requirements for External

Faculty from outside the University of Pittsburgh may serve as external committee members, but the qualifications of the proposed committee member must be reviewed and their participation approved by the Assistant Dean of Graduate Studies **before** the dissertation proposal/prospectus/overview meeting or defense is scheduled. Such a request should be accompanied by the requested committee member's current CV and a brief memo that explains the benefits for the student of the participation of this faculty member on the committee. CVs for external committee members who have been approved previously by the Assistant Dean for a particular department's graduate students need only be resubmitted once every five years. In this case, however, the memo accompanying each request for an external member's participation in a new committee must also note the date on which the CV was last submitted for this individual. If the date is not known, a new CV must be included. Requests for external members must be approved by the Assistant Dean in advance of the requested member's participation on the doctoral committee. The Assistant Dean will review the material and either approve or reject the proposed external member.

Additional Committee Members

Additional members may be added to the doctoral committee in cases where additional expertise is needed. Such additional committee members are expected to have significant involvement with the graduate student and to attend both the proposal/prospectus/overview meeting and the defense unless prior approval has been received for remote attendance. For additional committee members only, the Graduate Faculty status (or the equivalent at another institution) requirement may be waived if prior approval from the Assistant Dean is requested and granted. Such a request should be accompanied by a brief memo that explains the benefits for the student of the participation of this faculty member on the committee and, in the case of a member who is not from the University of Pittsburgh, a current CV. The CV need only be provided every five years for committee members serving on multiple committees within the same department.

Committee Participation by Former Members of the University of Pittsburgh Faculty

Committee members who leave the University after a graduate student has been admitted to candidacy may stay on the committee in their original capacity, as long as they are willing and able to physically attend the defense (or have requested and received permission to attend remotely as described below), and providing that the defense is scheduled within 12 months of the faculty member's departure. If the departed committee member is the Chair, and continues in this role, a Co-Chair from the department must be designated. The participation of any committee member in this category will not affect the maximum number of remote attendees permitted (two, one of whom must be external as described below).

Committee Participation by Retired Members of the University of Pittsburgh Faculty

Faculty who are retired from the University of Pittsburgh are eligible to serve as members on committees formed both before and after their retirement, as long as they are still active professionally in the academic community as reasonably determined by the Chair of the Department. Retired faculty may serve in any capacity including as Chair of the committee. The participation of any committee member in this category will not affect the maximum number of remote attendees permitted (two, one of whom must be external as described below).

Remote Participation by Candidate and Committee members

The candidate and the Committee Chair must attend in person both the dissertation proposal/prospectus/ overview meeting and the defense. All other committee members should also be physically present at both meetings. In exceptional circumstances, however, this requirement may be waived as described below.

External committee member only: Remote attendance may be requested from the Assistant Dean for both the dissertation proposal/prospectus/overview meeting and the defense for the external committee from a distant location if, and only if, remote attendance can be arranged according to the guidelines detailed below.

Other committee members. Remote attendance may also be requested from the Assistant Dean for no more than one of the other committee members. Where an external member from outside the University of Pittsburgh is already attending remotely, however, the request must also be accompanied by a memo from the department explaining the need for this second member to attend remotely. Such a request may not be granted by the Assistant Dean if the situation could easily be resolved by a shift in the meeting date of one month or less. A committee member who participated remotely in the overview meeting must attend the defense in person. It is the responsibility of the student to consult as early as possible with committee members about their availability such that remote attendance by more than one member is avoided if at all possible. Remote attendance by more than two committee members will not be permitted.

Remote Attendance Requirements

To satisfy the requirements of remote attendance, any remotely attending committee member must have full audiovisual interaction. The attendee must be visible to other committee members and the graduate student presenter and must be able to see the presenter as well as others in the room as necessary. The attendee must be able to hear and participate orally in all parts of the discussion and questioning. The candidate's department is responsible for arranging the necessary technology to fulfill the remote attendance requirements and it is recommended that someone with technological expertise be present to resolve difficulties if they arise. **The dissertation proposal/prospectus/overview meeting or the defense of the dissertation** must **be rescheduled (or finished at later time) if -**

1. it is not technologically possible to accomplish the required level of audiovisual interaction at the time and place appointed; or

2. the video portion of the connection fails before the defense is 50% completed (reasonably determined by the Committee Chair) and cannot be reestablished; or

3. the audio portion connection fails before 90% of the meeting or defense is completed (reasonably determined by the Committee Chair) and cannot be reestablished.

Chair Certification of Compliance with Remote Participation Requirements

The Chair of a dissertation committee in which any members participate remotely will be required to complete a form ("Remote Attendance Certification"), in which the Chair attests that the requirements for remote attendance have been met. This form must be included with the results of the dissertation proposal/prospectus/overview meeting or defense in the submission to the Graduate Office. If the Chair of the committee signs the student's paperwork in the name of the remotely attending member, a copy of the authorization for this signature (an email from the remotely attending member authorizing the signature is sufficient) must also be provided when the documentation is submitted.

The form is available at: Remote Attendance Certification

Admission to Candidacy for the PhD Degree

After completion of the overview, the student should, in consultation with the student's major advisor, file the application for admission to candidacy for the Doctor of Philosophy degree. Students are informed of admission to candidacy by written notification from the Assistant Dean of Graduate Studies. When the topic has been accepted and the proposed doctoral committee has been approved by the Department Chair and the Assistant Dean of Graduate Studies, the student will be informed of admission to candidacy and of the membership of the doctoral committee. Students must be enrolled in the term in which they are completing the overview for candidacy. *For a listing of requirements for admission to candidacy, see Admission to Candidacy for the Doctor of Philosophy Degree under Regulations Pertaining to Doctoral Degrees.*

Admission to candidacy must be at least eight months before the defense of the dissertation in order to provide an opportunity for the members of the doctoral committee to review, criticize, and monitor the proposed research.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. A record of such meetings must be maintained in the student's file in the department.

Dissertation

See Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees for an overview of requirements and form for the dissertation and abstract. In addition, students in A&S should note that photocopies of journal articles may be used only in the appendix and only if necessary.

Language of the Doctoral Dissertation

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted for graduate students in second language departments but only for sound reasons of scholarship. Permission shall never be granted on the grounds of inadequate command of English. Students who wish to write a dissertation in a second language shall apply formally to their Department Chair for permission. The

application must be approved by the Assistant Dean of Graduate Studies prior to submission of the paperwork for admission to candidacy. For approval, the following requirements must have been met:

1. The application must be recommended for approval by the department.
2. All members of the doctoral committee must have an adequate command of the language.
3. The student must have demonstrated full proficiency in English to the satisfaction of the Assistant Dean of Graduate Studies.

Dissertation abstracts shall in any case be in English. The final oral examination must be conducted in English.

Final Oral Examination

Students preparing to take their final oral examination in defense of their dissertation should refer to Final Oral Examination under Regulations Pertaining to Doctoral Degrees for details on the examination. Expansions on and additions to that information are given below.

Candidates for a doctoral degree must provide a suitable number of copies of the dissertation, as designated by their doctoral committee, for review and use during the final oral examination.

One copy of the dissertation must be submitted to each member of the doctoral committee at least two weeks before the date set for the final oral examination. All members of the doctoral committee must attend the examination; exceptions can be made only with the permission of the Assistant Dean of Graduate Studies. At least four weeks before the final examination, the Chair of the doctoral committee must provide the Assistant Dean of Graduate Studies with a typewritten notice, listing the title of the dissertation and the time and place for its defense, for announcement in the University Calendar. A report of this examination and a report on approval of the dissertation, signed by all members of the doctoral committee, must be sent to the Assistant Dean of Graduate Studies for approval. The report on the approval of the dissertation may be signed concurrently with or subsequently to the report of the final oral examination. If the decision of the committee is not unanimous, the case is referred to the Assistant Dean of Graduate Studies for resolution.

When the examination is completed, the candidate must notify the Assistant Dean if they have uploaded an electronic dissertation and submit three copies of an abstract of the dissertation initialed by the dissertation advisor in the upper right-hand corner. These documents must have been prepared for publication in accordance with instructions furnished by A&S Graduate Studies, 910 Cathedral of Learning. All graduation requirements are on the graduation website: https://www.asgraduate.pitt.edu/academics/graduation.

Multiple Degree Options

Students in A&S have several options for dual and joint degrees that may be pursued as detailed below. Students also may pursue two independent degree programs simultaneously, either in two departments within A&S or in a department within A&S and a department in another school at the University. *For information on pursuing two independent degrees simultaneously, see Two Independent Degree Programs Simultaneously under Special Academic Opportunities* .

Dual-Degree Programs

A&S dual-degree programs are available only in mathematics and computer science. For further details, contact one of those departments and see Cooperative, Dual-Degree, and Joint-Degree Programs under *Special Academic Opportunities* .

Joint-Degree Programs

There are three joint-degree programs involving A&S:

1. The MD/PhD program offers selected students an opportunity to earn MD and PhD degrees simultaneously from the School of Medicine and certain departments in A&S. Interested applicants should contact the MD/PhD program at M211 Scaife Hall, 412-648-2324 for further information.
2. The MBA/MA in area studies program provides students who are admitted to the MBA program in the Joseph M. Katz Graduate School of Business an opportunity to earn a joint MA in area studies with foci in Asian studies, Latin American studies, Russian and East European Studies, or West European studies. Interested students should contact the International Business Center, 355 Mervis Hall, 412-648-1509 for further information.
3. The JD/MA program offers selected students the opportunity to earn the JD and the interdisciplinary MA degree in Bioethics. Interested students should see the Bioethics section of this catalog or call the School of Law at 412-648-1415.
4. The MD/MA program offers selected students the opportunity to earn their MD and the interdisciplinary MA degree in Bioethics. Interested students should see the Bioethics section of this catalog or call the School of Medicine at 412-648-9891.

In both the dual- and joint-degree programs, students must be admitted to both academic programs offering the degrees and must be graduated from both degree programs at the same time. *For further details, see Cooperative, Dual-Degree, and Joint-Degree Programs under Special Academic Opportunities* .

Certificate Programs

A variety of interdisciplinary programs leading to completion of a certificate may be pursued by students working toward a master's degree or doctorate in A&S.

Composition, Literacy and Pedagogy Certificate

Composition, Literacy and Pedagogy Certificate, MA

Composition, Literacy and Pedagogy Certificate, MFA

Composition, Literacy and Pedagogy Certificate, PhD

Cultural Studies, Doctoral Certificate

Cultural Studies, Master's Certificate

Digital Studies and Methods Certificate

Film and Media Studies Doctoral Certificate

Film and Media Studies Master's Certificate

Gender, Sexuality, and Women's Studies Doctoral Certificate

Gender, Sexuality, and Women's Studies Master's Certificate

Graduate Certificate in Bioethics

Medieval and Renaissance Studies Doctoral Certificate

Medieval and Renaissance Studies Master's Certificate

TESOL Certificate

Department and Program Descriptions

The minimal requirements established by the Graduate Faculty of the University, as described under General Academic Regulations, and any additional requirements of A&S Graduate Studies described under A&S Degree Requirements, should be read in conjunction with specific departmental and program requirements.

Courses numbered from 1000 to 1999, inclusive, are advanced undergraduate credits. They may not be taken for graduate credit. All courses numbered 2000 and above are open only to graduate students unless special permission is granted.

Descriptions of graduate courses offered in a particular term in departments of the Dietrich School of Arts and Sciences can be obtained by visiting the following Web site: www.courses.as.pitt.edu.

Arts and Sciences Administration and Staff

http://www.asgraduate.pitt.edu/node/318

Arts and Sciences Faculty

Dietrich School of Arts and Sciences Faculty

Departments/Programs

PhD

Astrophysics, PHD

The Department of Physics and Astronomy offers the PhD in Astrophysics. The PhD in Astrophysics provides students with foundational knowledge in modern astrophysics as well as focused study in several speciï¬c subdisciplines. The PhD trains students to perform independent research in several subdisciplines of astrophysics. Individuals earning the Astrophysics PhD are prepared for a variety of careers including teaching and research at major academic institutions, research at government and industrial laboratories, data analysis and software development, statistical analysis, quantitative modeling, scientiï¬c writing and outreach technical marketing corporate leadership at science and engineering ï¬rms and a variety of scientiï¬c entrepreneurial endeavors.

Required Courses

- ASTRON 3540 - Introduction to Astrophysics and Cosmology
- ASTRON 3550 - STELLAR STRUCTURE
- ASTRON 3580 - GALACTIC AND EXTRAGALACTIC ASTRONOMY
- ASTRON 3650 - Galactic Dynamics
- ASTRON 3705 - STATISTICS AND DATA SCIENCE
- ASTRON 3785 - COSMOLOGY
- ASTRON 3907 - DIRECTED RESEARCH

Suggested Elective Courses

The number and specific elective courses to be taken by any individual student will be determined in consultation with the academic advisor, thesis committee, and director of graduate studies based on the prior preparation and research area of the student.

- PHYS 2373 - MATHEMATICAL METHODS IN PHYSICS
- PHYS 2513 - DYNAMICAL SYSTEMS
- PHYS 2541 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 3274 - COMPUTATIONAL METHODS
- PHYS 3725 - GENERAL RELATIVITY 1
- PHYS 3726 - GENERAL RELATIVITY 2
- PHYS 3790 - PARTICLE ASTROPHYSICS

Department of Africana Studies

Africana studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. The term Africana incorporates the three-tier interdisciplinary thrust of the department: African, African American, and Caribbean social sciences and humanities.

Africana studies prepares social science majors for advanced graduate studies in international affairs, education, social work, social policy studies, and legal and professional training. In the humanities, preparation in the creative arts and literature gears students to practical development in such fields as communication, teaching, theater, and dance. Africana studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana studies offers intellectual paradigms for the multicultural approach to historical, political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana studies is committed to producing liberally educated

women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site at www.africanastudies.pitt.edu.

Admissions

Applications are considered once a year for fall admission only. All students wishing to apply must submit their application electronically through the university's online application process. In addition to the following requirements, applicants must meet the general Dietrich School of Arts and Sciences requirements for admission to graduate study. The following application materials are required: an application form submitted online to the School of Arts & Sciences; a non-refundable application fee of $75 (The University offers fee waivers for the following national programs that cover application fees: Gates Millennium Scholars Program, McNair Scholars, the Society for Advancement of Chicanos & Native Americans, and those currently serving or who previously served as members of the U.S. Armed Services); a statement of purpose describing the applicant's intellectual interests (in alignment with our faculty areas of expertise) and professional aspirations; three (3) letters of recommendation intended to provide independent evaluation of each applicant's potential; unofficial transcripts from all undergraduate and graduate institutions attended (If applicants are non-US citizens, they must submit transcripts in the native language accompanied by notarized English translations); and English Language Scores for all non-US citizens. All non-U.S. citizens applying to the graduate program (except for those who have received degrees from a U.S. institution or from other English-speaking countries) must submit scores from the Test of English as a Foreign Language (TOEFL), IELTS, or Duolingo as part of their application packet to demonstrate a sufficient command of English to meet the requirements of their field. TOEFL: a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. TOEFL scores submitted must not be more than two years old. 7.0 for IELTS (with at least 6.5 in each of its four sections), and IELTS scores submitted must not be more than two years old and a 120 for Duolingo. Duolingo scores submitted must not be more than two years old.

Master's

Africana Studies, MA

The University of Pittsburgh's graduate program in Africana Studies is led by faculty trained in Africana Studies as well as other disciplines from the humanities and social sciences. The M.A. program in Africana Studies distinguishes itself with its emphasis on Race & Equity, Migration & Community Transformation, and Culture & Creative Production. Graduate students in the program receive rigorous training in the discipline of Africana Studies. In addition, to broaden their intellectual experience and maximize their professional opportunities, students are encouraged to explore the various graduate certificates and courses outside the department which align with their areas of concentration. The M.A. program in Africana Studies prepares graduate students for university-level research and teaching, as well as professions in international relations & development, public policy & government, the arts, health equity & global health, non-profit organizations and other careers.

Students will complete the M.A. in two years. The M.A. program is for two years, and it is for students who desire to obtain the Ph.D. in Africana Studies degree but have not yet earned an M.A. in Africana Studies from another school (**since we do not offer a terminal MA, this program is not for students who only want an MA degree**).

To obtain the M.A. in Africana Studies, students must have a G.P.A of 3.0. For the master's comprehensive they must complete a research paper of about 5,000 to 7,500 words. The paper must be based on original research and should be potentially publishable. The research paper is a separate standalone paper, but students can expand on a paper from one of their courses to craft this standalone research paper.

Students must take 18 graduate credits from courses in the Department of Africana Studies. The following course of study will comprise these credit requirements:

Core Courses (12 Credits)

- AFRCNA 2031 - Critical Africana Pedagogy
- AFRCNA 2750 - Africana Studies Proseminar I
- AFRCNA 2850 - Africana Studies Proseminar II
- AFRCNA 2860 - Africana Research Methods

Additional Courses in the Department of Africana Studies: (6 credits)

- Students will have a wide selection of courses from which to choose each semester.

Change "Theme Courses" to "Sample Courses in the Race & Equity Concentration Area"

Theme: Migration & Community Transformation

Building from the extensive scholarship in Africana and African Diaspora Studies, this research track analyzes the causes and implications of the movements of people of African origin throughout time and space. Through an interdisciplinary methodological approach, it sheds light on how such movements led to transformative outcomes in both the sending and receiving spaces. Graduate students may find support for their research with the University Center for International Studies and the World History Center.

Sample Courses in the Migration & Community Transformation Concentration Area

AFRCNA 2012 Early 20th Century Black Social Movements

AFRCNA 2035 Black Body Studies

AFRCNA 2039 History Of Caribbean Slavery

AFRCNA 2131 Mobility, Identity, and the Black Atlantic

AFRCNA 2201 Global Diasporas: Contemporary African And Caribbean Migration

AFRCNA 2240 African Literature And Society

AFRCNA 2250 Black Europe

AFRCNA 2301 Black Space: Architectures of Race and Resistance.

AFRCNA 2309 Women Of African And African Diaspora

AFRCNA 2310 Cultures Of Africa

AFRCNA 2330 Science And Technology In Africana Context

AFRCNA 2347 Francophone Africana Literature

AFRCNA 2349 Contemporary Caribbean Literature

AFRCNA 2425 Caribbean Identities

AFRCNA 2450 Africana Cultural Memory

AFRCNA 2510 Health In The African Diaspora

AFRCNA 2535 Dimensions Of Racism

FRCNA 2537 Race And The Criminal Justice System

AFRCNA 2555 Afro Caribbean Dance

AFRCNA 2610 Health in the Environment in the Caribbean

AFRCNA 2628 Afro-Latinos In The United States

AFRCNA 2655 African Cinemas/Screen Griots

AFRCNA 2704 Africana World Literature

Theme: Culture & Creative Production

This track seeks to illuminate the intersections between socio-economic, political, intellectual, and psychological transformation and Black cultural productions in music, literature, performing and visual arts, as well as film & media. To further develop their expertise, graduate students may use resources from various units, including the Center for African American Poetry and Poetics, the Jazz Studies Program, the graduate program in Film & Media Studies, the August Wilson archive, and the Rob Penny papers.

Sample Courses in the Culture & Creative Production Concentration Area

AFRCNA 2010 Issues in Contemporary Africa

AFRCNA 2035 Black Body Studies

AFRCNA 2042 Class and Inequality Portrayals in Black Women's Writing

AFRCNA 2108 African American Folk Culture

AFRCNA 2110 Race and Race-Making in U.S. History

AFRCNA 2131 Mobility, Identity, and the Black Atlantic

AFRCNA 2150 Contemporary African American Writing

AFRCNA 2240 African Literature And Society

AFRCNA 2301 Black Space: Architectures of Race and Resistance.

AFRCNA 2330 Science And Technology In Africana Context

AFRCNA 2347 Francophone Africana Literature

AFRCNA 2349 Contemporary Caribbean Literature

AFRCNA 2420 Power And Performance In Africa: From Hip-Life To Soukouss

AFRCNA 2450 Africana Cultural Memory

AFRCNA 2555 Afro Caribbean Dance

AFRCNA 2616 African American Women Writers

AFRCNA 2655 African Cinemas/Screen Griots

AFRCNA 2704 Africana World Literature

Elective Courses

- AFRCNA 2010 - Issues in Contemporary Africa
- AFRCNA 2035 - Black Body Studies
- AFRCNA 2042 - Class and Inequality Portrayals in Black Women's Writing
- AFRCNA 2110 - Race and Race-Making in U.S. History
- AFRCNA 2131 - Mobility, Identity, and the Black Atlantic
- AFRCNA 2301 - Black Space: Architectures of Race and Resistance
- AFRCNA 2435 - Prison Literature & Black Life
- AFRCNA 2610 - Health in the Environment in the Caribbean
- AFRCNA 2900 - Field Placement
- AFRCNA 2901 - Independent Study
- AFRCNA 2902 - Directed Reading
- AFRCNA 2903 - Directed Research

Cross-Listed Electives

- AFRCNA 2012 - Early 20th Century Black Social Movements
- AFRCNA 2021 - History Of The African Diaspora
- AFRCNA 2039 - History Of Caribbean Slavery
- AFRCNA 2108 - African American Folk Culture
- AFRCNA 2150 - Contemporary African American Writing
- AFRCNA 2201 - Global Diasporas: Contemporary African And Caribbean Migration
- AFRCNA 2240 - African Literature And Society
- AFRCNA 2250 - Black Europe
- AFRCNA 2309 - Women Of African And African Diaspora
- AFRCNA 2310 - Cultures Of Africa
- AFRCNA 2330 - Science And Technology In Africana Context
- AFRCNA 2347 - Francophone Africana Literature
- AFRCNA 2349 - Contemporary Caribbean Literature
- AFRCNA 2402 - Learning Paradigms African American Child Development
- AFRCNA 2420 - Power And Performance In Africa: From Hip-Life To Soukouss
- AFRCNA 2425 - Caribbean Identities
- AFRCNA 2450 - Africana Cultural Memory
- AFRCNA 2510 - Health In The African Diaspora
- AFRCNA 2522 - Sex And Racism
- AFRCNA 2535 - Dimensions Of Racism
- AFRCNA 2537 - Race And The Criminal Justice System
- AFRCNA 2555 - Afro Caribbean Dance
- AFRCNA 2616 - African American Women Writers
- AFRCNA 2628 - Afro-Latinos In The United States
- AFRCNA 2655 - African Cinemas/Screen Griots

- AFRCNA 2704 - Africana World Literature
- AFRCNA 2710 - African American Health Issue
- AFRCNA 2904 - Rebels And Revolution

Theme: Race & Equity

Drawing from various methodological and theoretical approaches, this research track articulates an understanding of race as a social construct with material, intellectual, cultural, political, and bioethical implications. It aims to create and develop the tools to achieve social justice and equity throughout Africa and its diaspora. Graduate students may enhance their expertise by exploring opportunities in Public Health Programs with an emphasis on equity https://www.publichealth.pitt.edu/certificates , as well as The Center for Urban Education https://www.cue.pitt.edu/people.

Theme Courses

- AFRCNA 2035 - Black Body Studies
- AFRCNA 2039 - History Of Caribbean Slavery
- AFRCNA 2042 - Class and Inequality Portrayals in Black Women's Writing
- AFRCNA 2110 - Race and Race-Making in U.S. History
- AFRCNA 2131 - Mobility, Identity, and the Black Atlantic
- AFRCNA 2150 - Contemporary African American Writing
- AFRCNA 2250 - Black Europe
- AFRCNA 2309 - Women Of African And African Diaspora
- AFRCNA 2310 - Cultures Of Africa
- AFRCNA 2347 - Francophone Africana Literature
- AFRCNA 2349 - Contemporary Caribbean Literature
- AFRCNA 2402 - Learning Paradigms African American Child Development
- AFRCNA 2420 - Power And Performance In Africa: From Hip-Life To Soukouss
- AFRCNA 2425 - Caribbean Identities
- AFRCNA 2435 - Prison Literature & Black Life

Admissions

Applications are considered once a year for fall admission only. All students wishing to apply must submit their application electronically through the university's online application process. In addition to the following requirements, applicants must meet the general Dietrich School of Arts and Sciences requirements for admission to graduate study. The following application materials are required: an application form submitted online to the School of Arts & Sciences; a non-refundable application fee of $75 (The University offers fee waivers for the following national programs that cover application fees: Gates Millennium Scholars Program, McNair Scholars, the Society for Advancement of Chicanos & Native Americans, and those currently serving or who previously served as members of the U.S. Armed Services); a statement of purpose describing the applicant's intellectual interests (in alignment with our faculty areas of expertise) and professional aspirations; three (3) letters of recommendation intended to provide independent evaluation of each applicant's potential; unofficial transcripts from all undergraduate and graduate institutions attended (If applicants are non-US citizens, they must submit transcripts in the native language accompanied by notarized English translations); and English Language Scores for all non-US citizens. All non-U.S. citizens applying to the graduate program (except for those who have received degrees from a U.S. institution or from other English-speaking countries) must submit scores from the Test of English as a Foreign Language (TOEFL), IELTS, or Duolingo as part of their application packet to demonstrate a sufficient command of English to meet the requirements of their field. The minimum scores are TOEFL: a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. TOEFL scores submitted must not be more than two years old. IELTS: score of 7.0, with at least 6.5 in each of its four sections. IELTS scores submitted must not be more than two years old. Duolingo English Test: score of 120. Duolingo scores submitted must not be more than two years old.

General Requirements

The School of Arts and Sciences at the University of Pittsburgh requires a minimum of 72 credits at the 2000-level or above for the PhD. Of these 72 credits required for the PhD Africana Studies, 39 will be earned through required seminars, courses, and electives offered by the Department of Africana Studies; an additional 33 credits can be earned through other elective courses, seminars, direct reading, independent studies, or dissertation credits. The following course of study will comprise these credit requirements:

- AFRCNA 2860 Africana Research Methods

This seminar explores how Africana scholars formulate their research questions and design their methodologies. It explains how they use a variety of methodological approaches for conducting research in Black communities worldwide and creating new ideas that contribute to the advancement of Africana Studies scholarship.

- AFRCNA 2031 Critical Africana Pedagogy

This seminar examines the arts of teaching and learning in Africana Studies. Students are introduced to Africana-centered pedagogical tools while also being exposed to resources from the University's Center for Teaching and Learning.

- AFRCNA 2750 Africana Studies Proseminar I

Introduces students to cultural, social, historical, artistic, and theoretical approaches to developing a global analytics of Blackness

- AFRCNA 2850 Africana Studies Proseminar II

Explore theories of Black migration and community formation

- Additional AFRCNA courses: 27 credits

- Electives: 33 credits

Courses in Concentration Area (research track):

- Students must take a minimum of three (3) courses in their particular area of concentration or research track. The areas are Race & Equity; Migration & Community Transformation; and Culture & Creative Production.

Preliminary Exams: The core courses fulfill the role of preliminary exams in the PhD requirements for the Dietrich School of Arts and Sciences. Students must complete the courses with at least a B grade in each course. They should complete their core courses no later than the end of their second year.

Graduate Transfer Credits: Students already holding a Master's degree have the potential to transfer up to 30 credits from another approved degree-granting graduate program. The transfer credits will be evaluated and approved by the Director of graduate studies and two other members of the department graduate faculty.

Comprehensive Exams: Students should aim to take their comprehensive exam either before or in the fall semester of the third year. Should the student fail the comprehensive exam they will have the right to retake it once. The failed exam must be retaken prior to the end of the third year. The student has the right to choose new examiners. If a student does not pass the retake exam, tenure will end with the term during which this exam took place.

To obtain the Ph.D. in Africana Studies, it is recommended that students:

- Complete required coursework by the end of the second year; if the student has a master's degree in Africana Studies already, they do not have to complete the master's comprehensive examination (research paper), but they should complete the preliminary examination by the end of their first year
- Pass comprehensive examinations in the fall of the third year or earlier
- Defend the dissertation prospectus in the spring of the third year (no later than early fall of the fourth year)
- Be admitted to candidacy at least 8 months prior to their defense date
- Have their dissertation defended and approved by the dissertation committee by the agreed upon date that the student chooses in consultation with their dissertation chair
- Complete at least 72 credits (course work and research included) with a GPA of at least 3.0, including the required courses

Admissions Requirements

Students will complete the Ph.D. in five years. Students who have already earned a master's degree Africana Studies can often receive credit for previous coursework which may shorten the time needed to earn a Ph.D. by as much as a year. Students accepted without this disciplinary training will earn an MA in Africana Studies in the course of working toward the Ph.D. Applications are considered once a year for fall admission only. All students wishing to apply must submit their application electronically through the university's online application process.

The following application materials are required:

- An application form must be submitted to the School of Arts & Sciences online using the link below: https://gradcas.liaisoncas.org/apply/
- A non-refundable application fee of $75. The University offers fee waivers for the following national programs that cover application fees: Gates Millennium 3 Scholars Program, McNair Scholars, and Society for Advancement of Chicanos & Native Americans and applicants who are currently serving or who previously served as members of the U.S. Armed Services. To apply for a fee waiver, you need to fill out the application form at the link below: https://pitt.co1.qualtrics.com/jfe/form/SV_3CxvKCWrXUv6tCd
- A statement of purpose describing the applicant's intellectual interests and professional aspirations. The applicant should also be able to explain how their intellectual interest aligns with our faculty areas of expertise. Be as specific as possible about your research interests and qualifications.
- Three (3) letters of recommendation intended to provide independent evaluation of each applicant's potential. Letters should come from current or former teachers or others who can evaluate your intellectual and academic qualifications for graduate study. Reference writers will submit these forms and letters independently from the application using a link embedded in an e-mail they receive from the "apply online" process.

- Unofficial transcripts from all undergraduate and graduate institutions you have attended. If non-US citizens, please submit transcripts in the native language accompanied by notarized English translations. The University requires at least a 3.0. GPA. Note: official transcripts will need to be sent if admitted into the program.
- English Language Scores for all non-US citizens: All non-U.S. citizens applying to the graduate program - except for those who have received degrees from a U.S. institution or from other English-speaking countries - must submit scores from the Test of English as a Foreign Language (TOEFL), IELTS, or Duolingo as part of their application packet to demonstrate a sufficient command of English to meet the requirements of their field. The minimum scores are 90 for TOEFL (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing), 7.0 for IELTS (with at least 6.5 in each of its four sections), and a 120 for Duolingo.

Program Requirements

The School of Arts and Sciences at the University of Pittsburgh requires a minimum of 72 credits at the 2000-level or above for the PhD. Of these 72 credits required for the PhD in Africana Studies, 39 credits must be earned in the four AFRCNA core courses (12 credits) and through nine additional AFRCNA seminars and courses at the 2000 level or higher (27 credits). Additional credits may be earned through elective courses and seminars (in AFRCNA or other departments), directed studies, independent studies, or dissertation credits. The following course of study will comprise these credit requirements:

Core Courses: 12 credits

Additional AFRCNA coursework: 27 credits

Additional electives: 33 credits

Core Courses

- AFRCNA 2031 - Critical Africana Pedagogy
- AFRCNA 2750 - Africana Studies Proseminar I
- AFRCNA 2850 - Africana Studies Proseminar II
- AFRCNA 2860 - Africana Research Methods
- AFRCNA 3000 - Research And Dissertation PhD

Electives

- AFRCNA 2010 - Issues in Contemporary Africa
- AFRCNA 2035 - Black Body Studies
- AFRCNA 2042 - Class and Inequality Portrayals in Black Women's Writing
- AFRCNA 2110 - Race and Race-Making in U.S. History
- AFRCNA 2131 - Mobility, Identity, and the Black Atlantic
- AFRCNA 2301 - Black Space: Architectures of Race and Resistance
- AFRCNA 2435 - Prison Literature & Black Life
- AFRCNA 2610 - Health in the Environment in the Caribbean
- AFRCNA 2900 - Field Placement
- AFRCNA 2901 - Independent Study
- AFRCNA 2902 - Directed Reading
- AFRCNA 2903 - Directed Research

Cross-Listed Electives

- AFRCNA 2012 - Early 20th Century Black Social Movements
- AFRCNA 2021 - History Of The African Diaspora
- AFRCNA 2039 - History Of Caribbean Slavery
- AFRCNA 2108 - African American Folk Culture
- AFRCNA 2150 - Contemporary African American Writing
- AFRCNA 2201 - Global Diasporas: Contemporary African And Caribbean Migration
- AFRCNA 2240 - African Literature And Society
- AFRCNA 2250 - Black Europe
- AFRCNA 2309 - Women Of African And African Diaspora
- AFRCNA 2310 - Cultures Of Africa
- AFRCNA 2330 - Science And Technology In Africana Context
- AFRCNA 2347 - Francophone Africana Literature
- AFRCNA 2349 - Contemporary Caribbean Literature
- AFRCNA 2402 - Learning Paradigms African American Child Development
- AFRCNA 2420 - Power And Performance In Africa: From Hip-Life To Soukouss
- AFRCNA 2425 - Caribbean Identities
- AFRCNA 2450 - Africana Cultural Memory
- AFRCNA 2510 - Health In The African Diaspora
- AFRCNA 2522 - Sex And Racism
- AFRCNA 2535 - Dimensions Of Racism
- AFRCNA 2537 - Race And The Criminal Justice System
- AFRCNA 2555 - Afro Caribbean Dance
- AFRCNA 2616 - African American Women Writers
- AFRCNA 2628 - Afro-Latinos In The United States
- AFRCNA 2655 - African Cinemas/Screen Griots
- AFRCNA 2704 - Africana World Literature
- AFRCNA 2710 - African American Health Issue
- AFRCNA 2904 - Rebels And Revolution

Themes

The theme information highlights various areas of study that students may pursue. Students may choose to focus on a single theme or to sample from multiple themes, depending on their interests. These themes are meant to help graduate students organize coherent programs of study without requiring any specific commitment to a fixed number of themes or courses per theme.

Race & Equity

Drawing from various methodological and theoretical approaches, this research theme articulates an understanding of race as a social construct with material, intellectual, cultural, political, and bioethical implications. It aims to create and develop the tools to achieve social justice and equity throughout Africa and its diaspora. Graduate students may enhance their expertise by exploring opportunities in Public Health Programs with an emphasis on equity https://www.publichealth.pitt.edu/certificates , as well as The Center for Urban Education https://www.cue.pitt.edu/people

Theme Courses:

- AFRCNA 2035 - Black Body Studies
- AFRCNA 2039 - History Of Caribbean Slavery
- AFRCNA 2042 - Class and Inequality Portrayals in Black Women's Writing
- AFRCNA 2110 - Race and Race-Making in U.S. History
- AFRCNA 2131 - Mobility, Identity, and the Black Atlantic
- AFRCNA 2150 - Contemporary African American Writing

- AFRCNA 2250 - Black Europe
- AFRCNA 2309 - Women Of African And African Diaspora
- AFRCNA 2310 - Cultures Of Africa
- AFRCNA 2347 - Francophone Africana Literature
- AFRCNA 2349 - Contemporary Caribbean Literature
- AFRCNA 2402 - Learning Paradigms African American Child Development
- AFRCNA 2420 - Power And Performance In Africa: From Hip-Life To Soukouss
- AFRCNA 2425 - Caribbean Identities
- AFRCNA 2435 - Prison Literature & Black Life
- AFRCNA 2510 - Health In The African Diaspora
- AFRCNA 2522 - Sex And Racism
- AFRCNA 2535 - Dimensions Of Racism
- AFRCNA 2537 - Race And The Criminal Justice System
- AFRCNA 2616 - African American Women Writers
- AFRCNA 2655 - African Cinemas/Screen Griots
- AFRCNA 2710 - African American Health Issue

Migration & Community Transformation

Building from the extensive scholarship in Africana and African Diaspora Studies, this research theme analyzes the causes and implications of the movements of people of African origin throughout time and space. Through an interdisciplinary methodological approach, it sheds light on how such movements led to transformative outcomes in both the sending and receiving spaces. Graduate Students may find support for their research with the University Center for International Studies https://www.ucis.pitt.edu/main/ & the World History Center https://www.worldhistory.pitt.edu

Theme Courses:

- AFRCNA 2012 - Early 20th Century Black Social Movements
- AFRCNA 2035 - Black Body Studies
- AFRCNA 2039 - History Of Caribbean Slavery
- AFRCNA 2131 - Mobility, Identity, and the Black Atlantic
- AFRCNA 2201 - Global Diasporas: Contemporary African And Caribbean Migration
- AFRCNA 2240 - African Literature And Society
- AFRCNA 2250 - Black Europe
- AFRCNA 2301 - Black Space: Architectures of Race and Resistance.
- AFRCNA 2309 - Women Of African And African Diaspora
- AFRCNA 2310 - Cultures Of Africa
- AFRCNA 2330 - Science And Technology In Africana Context
- AFRCNA 2347 - Francophone Africana Literature
- AFRCNA 2349 - Contemporary Caribbean Literature
- AFRCNA 2425 - Caribbean Identities
- AFRCNA 2450 - Africana Cultural Memory
- AFRCNA 2510 - Health In The African Diaspora
- AFRCNA 2535 - Dimensions Of Racism
- AFRCNA 2537 - Race And The Criminal Justice System
- AFRCNA 2555 - Afro Caribbean Dance
- AFRCNA 2610 - Health in the Environment in the Caribbean
- AFRCNA 2628 - Afro-Latinos In The United States
- AFRCNA 2655 - African Cinemas/Screen Griots
- AFRCNA 2704 - Africana World Literature

Culture & Creative Production

This theme seeks to illuminate the intersections between socio-economic, political, intellectual, and psychological transformation and Black cultural productions in music, literature, performing and visual arts, as well as film & media. To further develop their expertise, Graduate students may use resources from various programs, including The Center for African American Poetry and Poetics https://www.caapp.pitt.edu/about/people , The PhD Concentration in Jazz Studies https://www.music.pitt.edu/graduate/phd-jazz-studies , the graduate program in Film & Media Studies https://www.filmstudies.pitt.edu/graduate,the August Wilson archive https://augustwilson.library.pitt.edu & the Rob Penny papers https://library.pitt.edu/rob-penny-papers

Theme Courses:

- AFRCNA 2010 - Issues in Contemporary Africa
- AFRCNA 2035 - Black Body Studies
- AFRCNA 2042 - Class and Inequality Portrayals in Black Women's Writing
- AFRCNA 2108 - African American Folk Culture
- AFRCNA 2110 - Race and Race-Making in U.S. History
- AFRCNA 2131 - Mobility, Identity, and the Black Atlantic
- AFRCNA 2150 - Contemporary African American Writing
- AFRCNA 2240 - African Literature And Society
- AFRCNA 2301 - Black Space: Architectures of Race and Resistance.
- AFRCNA 2330 - Science And Technology In Africana Context
- AFRCNA 2347 - Francophone Africana Literature
- AFRCNA 2349 - Contemporary Caribbean Literature
- AFRCNA 2420 - Power And Performance In Africa: From Hip-Life To Soukouss
- AFRCNA 2450 - Africana Cultural Memory
- AFRCNA 2555 - Afro Caribbean Dance
- AFRCNA 2616 - African American Women Writers
- AFRCNA 2655 - African Cinemas/Screen Griots
- AFRCNA 2704 - Africana World Literature

Total Credits: 72

Department of Anthropology

The Department of Anthropology offers the degrees of Master of Arts (non-terminal) and Doctor of Philosophy.

The department also offers several areas of concentration:

- Linguistic Anthropology
- Archeology & Bioarchaeology
- Cultural Anthropology
- Medical Anthropology
- Biological Anthropology

Students may earn an MA on the way to the PhD degree, including a program in which the student earns an MPH (Master of Public Health in behavioral and community health science), as part of the PhD in anthropology. Students may also opt to leave the PhD program with an MA, subject to satisfying program requirements. Students are encouraged to develop a regional specialization that can lead to a certificate in Latin American studies, Asian studies, West European studies, or Russian and Eastern European studies.

Contact Information

Department Chair: Gabriella Lukacs
Main Office: 3302 Wesley W. Posvar Hall
412-648-7500
Fax: 412-624-5133
E-Mail: lukacs@pitt.edu
www.anthropology.pitt.edu

Admissions

Entrance into programs leading to the MA and PhD degrees in anthropology requires a baccalaureate degree in one of the arts or sciences from an accredited institution of higher learning. Qualified students from any discipline are considered for admission. Graduate Record Examination (GRE) scores are no longer required. International applicants whose first language is not English are required to submit the TOEFL administered by the Educational Testing Service, the IELTS administered by the University of Cambridge (taking the academic writing and reading modules), or an exam through DuoLingo. The department admits students only for the fall term. The deadline for applications is December 5. All applicants are automatically considered for financial aid.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Anthropology, PhD

Requirements

Dietrich School of Arts and Sciences requirements for the PhD also apply.

Credit Requirements:

A minimum of 72 course credits is required for the PhD (doctoral) degree. Of these, at least 42 credits must be in formal courses (as opposed to readings courses and independent study). The remaining 30 credits may be any combination of formal courses, readings courses and independent study.

Core Courses/Preliminary Examinations:

The core course system of the Department of Anthropology fills the role of the preliminary examination in the Dietrich School of Arts and Sciences requirements for the PhD. PhD students are required to pass (with a grade of B or better) at least three of the four core courses (cultural anthropology [ANTH 2788], biological anthropology [ANTH 2688], archeology [ANTH 2587], and linguistics [ANTH 2491]), including the core course in the student's chosen subfield of specialization. Students may also fulfill the linguistics requirement with LING 2267 Sociolinguistics in a year in which the department is not offering the linguistics core course; students should consult with their advisor and the DGS ahead of time about this option. Full-time students are expected to pass the required core courses by the end of their second term in residence. A student may petition the Graduate Studies Committee to waive the core course on the basis of an equivalent course taken in an MA or PhD program at another institution.

Graduate Seminar Electives Requirement:

Students must pass with a grade of B or better a minimum of three **graduate seminar electives** (at the 2000-level). These courses are grad-only (or at a minimum grad-predominant) seminars and are offered by different faculty across the subfields on a rotating basis. They are

intended to advance student theoretical knowledge in areas related to our program's strengths and student interests. Students should consult with their advisors to discover which courses satisfy this requirement in a given term. While only three courses are required, students are encouraged to take more than that. These courses are also open to ABD students. This new requirement applies to students entering the program in the fall of 2022 and after.

Language Requirement:

Before students advance to candidacy, they must demonstrate competence in a language other than English that is relevant to the student's research.

Method/Theory Requirements:

All students must pass the Method/Theory requirement with a grade of B or better by the end of the second year. Students may petition for approval of other courses to satisfy these requirements.

Students in **archeology** must pass ANTH 2534 and ANTH 2524 (Archeological Data Analysis 1 and 2). Students in **bioarcheology** must pass ANTH 2534 and ANTH 2524 (Archaeological Data Analysis 1 and 2), or, with the approval of their advisor, a two-course statistical sequence, BIOST 2041 and BIOST 2042 (Introduction to Statistical Methods I and II). Students in **biological anthropology** must pass (Introduction to Statistical Methods I and II), or, with the approval of their advisor, Anthropology ANTH 2534 and Anthropology ANTH 2524 (Archeological Data Analysis I and II). Students in **cultural anthropology** must pass ANTH 2763 (Field Methods). Students in **medical anthropology** (for the joint PhD / MPH) must pass ANTH 1761 (Patients and Healers: Medical Anthropology 1), ANTH 2731 (Medical Anthropology 2), and 12 credits from a list of approved courses.

Comprehensive Examinations:

Students must pass the comprehensive examination designed to test breadth and depth of knowledge in the chosen areas of expertise. The acceptable forms of the exam are described in greater detail in the department's handbook. Examinations are designed and administered by a faculty committee consisting of at least two members of the department and a third member. Students will generally have completed the comprehensive exam requirements during their third year in the program.

Dissertation Overview:

Before actively pursuing dissertation research, the student makes an oral presentation of the intended project to a dissertation committee chosen by the student subject to approval by the department chair and dean. The committee consists of three members of the department and a fourth external member. Following committee approval, the student applies for admission to candidacy for the Doctor of Philosophy degree. Students conducting research with human subjects must also have their projects approved by the IRB before advancing to candidacy.

Dissertation Defense and Graduation:

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee. The defense is accompanied by a public presentation, which is open to the University community.

Courses

Anthropological Linguistics

- ANTH 2441 Field Methods in Linguistics
- ANTH 2466 Topics in Anthropological Linguistics
- ANTH 2490 Linguistics Core Course

Archaeology and Prehistory

- ANTH 2512 Prehistory of a Selected Area
- ANTH 2513 Selected Archaeological Problem
- ANTH 2515 Seminar: Andean Archaeology
- ANTH 2516 Chiefdoms
- ANTH 2517 Archaeological Method and Theory
- ANTH 2524 Archaeological Data Analysis 2
- ANTH 2525 Europe in Later Prehistory
- ANTH 2526 Maritime Adaptations
- ANTH 2531 Household Archaeology
- ANTH 2532 Archaeological Applications of Geographic Information Systems
- ANTH 2533 Ancient States in the New World
- ANTH 2534 Archaeological Data Analysis 1
- ANTH 2535 The Maya: Past and Present
- ANTH 2541 Regional Settlement Patterns and Demography
- ANTH 2550 Ethnoarchaeology
- ANTH 2551 Peoples in Contact
- ANTH 2554 Human Behavioral Ecology
- ANTH 2588 Archaeology Core Course

- ANTH 2603 Laboratory Methods in Biological Anthropology
- ANTH 2605 Primate Anatomy
- ANTH 2607 Experimental Morphology and Functional Anatomy
- ANTH 2608 Primate Biology
- ANTH 2617 Paleopathology
- ANTH 2619 Advanced Skeletal Analysis
- ANTH 2620 Special Topics in Biological Anthropology SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY
- ANTH 2630 Biological Anthropology Research
- ANTH 2687 Core Course in Biological Anthropology
- ANTH 2692 Biological Anthropology Research Seminar

Social and Cultural Anthropology

- ANTH 2720 The Poetics and Politics of Ethnography
- ANTH 2726 Gender and Health
- ANTH 2728 Educational Anthropology
- ANTH 2730 Environments, Health and Power
- ANTH 2731 Health and Healing: Analysis and Theory
- ANTH 2732 Anthropology and Contemporary Political Issues
- ANTH 2735 Economic Anthropology
- ANTH 2736 Population and Culture
- ANTH 2737 Anthropology of Food
- ANTH 2740 Pacific Ethnology
- ANTH 2741 Anthropology of Law
- ANTH 2744 Grants and Research Design
- ANTH 2745 History of Anthropological Theory
- ANTH 2750 Contemporary Anthropological Theory
- ANTH 2753 Conflict and Violence
- ANTH 2755 Cultural, Social, and Psychological Explanation
- ANTH 2756 Religion and Culture
- ANTH 2761 Development Education and Applied Anthropology
- ANTH 2763 Field Methods in Cultural Anthropology

- ANTH 2764 Kinship Theory
- ANTH 2766 Anthro and Political Economy
- ANTH 2771 Gender and the State
- ANTH 2775 Applied Anthropology
- ANTH 2782 Special Topics in Cultural Anthropology
- ANTH 2783 Social Stratification and Expressive Culture
- ANTH 2785 Ethnography of Education
- ANTH 2789 Cultural Anthropology Core Course
- ANTH 3007 Ethnographic Approaches to Program Evaluation

General

- ANTH 2000 Research and Thesis for the Master's Degree
- ANTH 2755 The Art of Publication
- ANTH 2902 Directed Study for MA Students
- ANTH 2980 Readings in Selected Fields
- ANTH 2990 Independent Study
- ANTH 3000 Research and Dissertation for the PhD Degree
- FTDC 3999 Full Time Dissertation Study

Joint Degree

Anthropology, PhD/MPH

Requirements

Dietrich School of Arts and Sciences requirements for the PhD also apply.

The joint degree program makes it possible to complete both the PhD in anthropology and an MPH in approximately six years. The typical program consists of completion of coursework in the first three years, a fourth year in dissertation field research, and dissertation writing in the final year(s). The program guarantees students funding for five years; pending satisfactory student progress and departmental resources, funding in the sixth year is common.

Admissions:

Students should apply to the Anthropology PhD program. They can then apply to the MPH upon being accepted into the Anthropology PhD program, or during their first year at Pitt. Coursework in public health taken during this first year will count towards the MPH.

Credit Requirements:

The program is structured so that the student meets the general PhD requirements for anthropology including the core courses, comprehensive exam, and language requirements, and the requirements for a concentration in medical anthropology.

Language courses do not count towards the formal credit requirement, nor do any courses below the 1000 level.

Under most circumstances, the MPH essay/thesis requirement will be met by the doctoral dissertation, so that the MPH will be awarded at the same time as the PhD. As an option, the student can choose to obtain an MPH at an earlier point by writing a separate MPH essay/thesis, and completing the MPH course requirements.

Master's

Anthropology, MA

Requirements

Anthropology does not currently offer a terminal MA degree other than in cases where a PhD student decides to leave the PhD program and wishes to write an MA paper. In such cases,a minimum of 30 course credits in anthropology and a paper is required for the MA (master's) degree. Of these, at least 21 credits must be in formal courses (as opposed to readings courses, independent study, or thesis credits). The MA committee consists of three graduate faculty members. Two must come from the department and include the student's advisor. The third member can be either from the department or outside of the department. All committees are approved by the faculty of anthropology. The language requirement is the same as for the PhD program. Students must pass a designated "methods" course with a B or better.

For the MA paper, students plan an original research paper with their advisory committee. This committee will also evaluate the final paper. Note that the required paper is not necessarily a "thesis" as defined in Dietrich School of Arts and Sciences requirements (although a thesis, as formally defined, would also satisfy the MA paper requirement).

Bioethics Program

Overview of the Program

The Kenneth P. Dietrich School of Arts & Sciences provides innovative graduate-level education in bioethics through its Master of Arts in Bioethics (MA) and a Graduate Certificate in Bioethics, serving the interests of those who do not want to commit to pursuing a graduate degree, as well as joint degree programs with the School of Law and School of Medicine. Like the field of bioethics itself, each program's curriculum is interdisciplinary. Courses are taught by faculty from a range of disciplines, including ethics and philosophy, health policy and law, medicine, and the social sciences. Students from varied backgrounds, pursuing diverse career paths, explore ethical issues within these programs through seminars, clinical ethics practica, and research projects tailored to their individual interests and career goals.

Contact Information

Program Director: Lisa S. Parker, PhD
Program Administrator: Mia Spinelli
Main Office: 519 Barco Law Building
412-648-7007
Fax: 412-648-2649
bioethics@pitt.edu

Admissions

Applicants for admission must submit digital scans of all undergraduate and graduate transcripts, three letters of recommendation, a personal statement explaining interest in the program (and its relevance for current or future education or career plans), and a sample of written work demonstrating critical reasoning skills and/or ability to present an argument. (Official transcripts are not required during the application process; applicants will be required to submit certified transcripts when they accept the offer of admission and matriculate.) International applicants whose first language is not English are required to submit TOEFL scores. Applications for admission to the Bioethics Program in the fall term must be submitted by March 31; after that date, interested applicants should contact the program administrator. Joint program students must be admitted by both the Dietrich School and the relevant professional school.

Financial Assistance

Applicants may qualify to receive a Dean's Tuition Scholarship to defray part of the cost of tuition and fees and may apply for student loans. Qualified out-of-state students may be offered a scholarship equal to the difference between out-of-state and in-state tuition.

Master's

Bioethics, Graduate Certificate

Graduate Certificate in Bioethics

The Graduate Certificate in Bioethics provides broad interdisciplinary background in the core concepts, methods, and topics in bioethics. The 15-credit curriculum provides a foundation for ethical analysis of issues in clinical care, health policy, and biomedical research, as well as the ethical and social implications of emerging technologies.

The Certificate allows practicing professionals to explore ethical issues arising in their work and the social implications of advances in their fields. It enables graduate students to address issues associated with their primary academic or professional program. Within many programs, Certificate courses may serve as electives.

Program Administrator: Mia Spinelli
Main Office: 519 Barco Law Building
412-648-7007
Fax: 412-648-2649
bioethic@pitt.edu

Admissions

Interested graduate or professional students enrolled in a University of Pittsburgh degree program, as well as post-baccalaureate healthcare professionals and those working in relevant fields-including social work, chaplaincy, mental health, health law or policy, health-related research, and biotechnology or bioengineering-are invited to apply.

Prospective students are invited to contact the Certificate's director at bioethics@pitt.edu to learn how to complete a Certificate Application for Admission to the Dietrich School of Arts and Sciences.

Requirements for the Graduate Certificate

Following are the course requirements (15 credits) for the Graduate Certificate in Bioethics:

Courses

- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS
- BIOETH 2664 - BIOETHICS
- Two elective courses in Bioethics or related disciplines, of which one may be Clinical Ethics Practicum

Bioethics, MA

Overview of Degree Program

The 30-credit interdisciplinary Master of Arts in Bioethics, permits students to tailor the curriculum to their interests and career paths. Designed for clinicians, lawyers, and students of the humanities and social sciences, the program is interdisciplinary with a strong emphasis on the philosophical foundation of bioethics. The program, founded in 1989, affords students the opportunity to observe ethical issues as they arise in clinical practice and to pursue in-depth research. Coursework allows students to combine studies in ethical theory, philosophy, history of medicine, cultural and gender studies, health law, public health, and the social sciences. The degree is intended primarily to complement and enhance other graduate or professional education.

Joint JD/MA and MD/MA programs with the Schools of Law and Medicine allow students to integrate their dual interests during their professional education and to complete both degrees in less time than would be required to pursue the degrees separately. Joint program students must be admitted by both the bioethics program and the relevant professional school.

Requirements

- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2606 - CLINICAL PRACTICUM 2
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS
- BIOETH 2664 - BIOETHICS
- Elective courses are chosen from related disciplines, as well as Bioethics
- Master's thesis

Department of Biological Sciences

Graduate education in the biological sciences provides individuals with the training, guidance, experience, and opportunity to participate in research that enables their transition from being students of biological knowledge to being fully participating members of their profession. The Department of Biological Sciences offers the degree of Doctor of Philosophy via two areas of concentration:

Molecular, Cellular and Developmental Biology (MCDB)
Ecology and Evolution (E&E)

Contact Information

Department Chair: Jeffrey G. Lawrence, PhD
Main Office: A234 Langley Hall
412-624-4350
Fax: 412-624-4349
E-mail: biophd@pitt.edu
http://www.biology.pitt.edu/

Additional information concerning the department's graduate programs may be obtained from the University of Pittsburgh, Department of Biological Sciences, Graduate Administrator, A210 Langley Hall, Pittsburgh, PA 15260. Phone: 412-624-4268. Fax: 412-624-4349. E-mail: cbarr@pitt.edu.

Admissions

Admissions to our graduate programs are competitive, and applications must meet minimum standards (http://www.biology.pitt.edu/graduate/how-apply). Applications should be submitted via online at https://gradcas.liaisoncas.org/apply. Applications are considered for matriculation for the fall term beginning in September.

Faculty

http://www.biology.pitt.edu

Doctoral

Biological Sciences, PhD

Requirements

http://www.biology.pitt.edu/graduate

A PhD in biological sciences involves four or more years of study and requires the completion of 72 credits. Specific requirements are as follow:

- Seminar Courses. MCDB students take two semesters of Biological Sciences Seminar (BIOSC 2450) in the first year. EE students take two semesters of Seminar in Ecology and Evolution (BIOSC 2540) in the first two years.
- Communications workshops. Students must complete three 1-credit Communication in the Biological Sciences workshops, one each in Grant writing, Paper writing, and Seminar/Poster presentation.
- Graduate Courses. Students in both the MCDB and EE programs are required to take 4 graduat-level courses within the first two years.
- Research Rotations. Both MCDB and EE students perform research rotations in the first year in at least two (EE) or three (MCDB) different labs.
- Research Ethics. Students must complete a workshop in the ethical performance of scientific research in the first year.
- Seminars. MCDB and EE students must attend the weekly MCDB Student Research Seminar (BIOSC 2050) and EE Student Research Seminar (BIOSC 2050), respectively. After the first year, students must present their research at these seminars once per year. Students must also attend the weekly Departmental Seminar presented by outside scholars.
- Preliminary Evaluation. Advancement to the second year of study requires successful completion of courses with an overall average of B or better, satisfactory performance in research rotations, the identification of a research mentor and a positive vote from Department Faculty.
- Dissertation Research. MCDB students choose a dissertation advisor by the end of the second semester. Typically, students in the E&E program identify a research advisor prior to entry. Each student also has a Dissertation Committee made up of three other members of Department and an outside member and must meet with this committee at least once a year. Students are expected to establish their dissertation research topic during the second year.
- Comprehensive Exam. Taken in the second year, this is designed to test a student's general knowledge of MCDB or EE and their detailed knowledge of one particular area.
- Teaching Practicum. Each student must participate in this teaching practicum as an academic requirement and if they take part in the Teaching Minor Program there will be more requirements.
- Admission to Candidacy for the PhD Degree. This is based upon research performance and satisfactory completion of the comprehensive exam. Admission to candidacy is decided at a special overview meeting of the Dissertation Committee.
- PhD Defense. The PhD is awarded following a public seminar followed by a private defense with the Thesis Committee, and satisfaction of all other University, department, and program requirements. This includes acceptance of the PhD Thesis Document by the Committee University.

Department of Chemistry

The Department of Chemistry provides programs of graduate study leading to the MS and the PhD in chemistry in the fields of **analytical, biological, inorganic and materials, organic**, and **physical** chemistry. Interdisciplinary research is also currently conducted in the areas of surface science, combinatorial chemistry, natural products synthesis, nanotechnology, biosensors, laser spectroscopy, organometallic chemistry, and biophysical chemistry.

The Department of Chemistry is housed in a modern chemistry complex that includes Eberly Hall, Chevron Annex, Ashe Lecture Halls, and the 15-story Chevron Science Center. The Chemistry Instrumentation Center is an in-house research instrumentation laboratory that includes NMR, mass spectroscopy, and X-ray crystallography facilities. In addition to instrumentation within individual research groups, the department supports a vast array of modern research instruments, including three 300 MHz NMRs, one 500 MHz NMR, one 600 MHz NMR, two high-resolution and two low-resolution mass spectrometers, a light-scattering instrument, a circular dichroism spectrophotometer, a spectropolarimeter, X-ray systems for both single crystal and powder samples, a scanning electron microscope, an atomic force microscope, a vibrating sample magnetometer, several FT-IR and UV-VIS spectrophotometers, an X-ray photoelectron spectrometer, an AFM-Raman system, and workstation computer clusters. Additional shared research resources include in-house materials characterization laboratory, machine shop, electronics shop, and glassblowing laboratory; helium recovery system, and the Dietrich School Scientific Stockroom.

Admissions

A bachelor's degree in chemistry, or closely related discipline, including courses in mathematics through integral calculus, is preferred. In addition, the student must meet the general Dietrich School of Arts and Sciences requirements for admission to graduate study.

All applicants are recommended to submit Graduate Record Examination (GRE) and advanced chemistry GRE scores. International applicants must also submit TOEFL, IELTS, or Duolingo scores. The minimum acceptable TOEFL score for the Department of Chemistry is minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. The minimum IELTS score for the Department of Chemistry is a 7.0 with a minimum of 6.5 in each section. The minimum Duolingo score is 120.

Faculty

http://www.chem.pitt.edu/people/faculty

Overview of Degree Program

The chemistry department has ca. 32 tenured/tenure track faculty members and typically accepts ca. 40 doctoral students each year. Student interested in applying for the M.S. program should contact the department prior to applying. Typical time to earn a PhD is five to six years.

Degree Requirements

Entering students take appraisal exams in each of four areas of chemistry: analytical, inorganic/materials, organic and physical. In discussion with a member of the department's Graduate Student Advisement Committee, scores on the appraisal exams are considered, as each student selects and registers for appropriate coursework. Midway through the first year in residence, students are assigned to research groups. The remainder of the student's graduate program is developed in consultation with their research advisor. Satisfactory performance in graduate core courses is required for students to pass the preliminary examination, as well as a brief written and oral overview of a research project with the student's committee. All advanced degree programs require original research and course work. Additional requirements include a comprehensive examination, thesis/dissertation, and defense.

Doctoral

Chemistry, PhD

Requirements for the PhD

PhD candidates are required to earn 72 graduate credits that include 12 credits of core courses (CHEM 2110, CHEM 2120, CHEM 2210, CHEM 2220, CHEM 2230, CHEM 2310, CHEM 2320, CHEM 2430, CHEM 2440, CHEM 2810, CHEM 2820). In consultation with their research advisor or GSAC, students may take additional courses after they complete the required core selections. Candidates are required to participate in a teaching practicum for at least one or two terms during their doctoral program.

Additional Requirements

PhD Preliminary Evaluation: The preliminary exam is a 'closed door' meeting that includes the student, the student's advisor, and two other chemistry department T/TS faculty members. To pass this exam the student must demonstrate a strong likelihood for passing the comprehensive exam, which occurs in the last part of the student's second year in the program. In the preliminary exam, the student must demonstrate i) good progress in meeting the course requirement (i.e., at least 6 credits with an average GPA of 3.0 or better), ii) an understanding of their research project (i.e., an ability to articulate their project's goals and importance), and iii) basic skills and aptitude for chemistry research (i.e., a basic understanding and experience in theory, literature, and methods that are core to their research).

Comprehensive Examination: The comprehensive examination provides the candidate an opportunity to demonstrate their potential for independent research and scholarship. The student submits a research report on their own work to committee members; the oral exam is a discussion of the student's research to date. The student must be prepared to answer questions related to the theoretical and practical aspects of the research problem. The student is also expected to show a command of graduate course work related to the field of the student's research. The department's comprehensive examination satisfies the Dietrich School of Arts and Sciences requirements for an overview examination. Upon satisfactory completion of the Comprehensive Exam, with approval by the department chair and the assistant dean of graduate studies, the student is formally admitted to candidacy for the PhD program.

Seminar: Each student in the doctoral program is required to present at least one seminar, open to the department. The seminar may be given at any time during the student's career and on any topic approved by the student's major advisor, including the results of doctoral research.

Dissertation and Final Examination: The PhD dissertation is a report of scientific investigation completed under the supervision of the student's faculty mentor/research advisor. It must represent an original contribution to knowledge and must relate what is found to what was known before. The candidate must defend his/her dissertation in an oral examination before a doctoral committee consisting of the major advisor, at least two additional departmental graduate faculty members, and one graduate faculty member from another department within the University. With prior approval, a qualified faculty member from another institution may also be appointed. The final examination is open to all members of the University community.

Analytical Chemistry Concentration

Students with a concentration in Analytical Chemistry are required to take at least two out of these three courses: Electrochemistry (Chem 2210), Chemical Separations (Chem 2220), and Analytical Spectroscopy (Chem 2230) for 6 credits toward the 12-credit course requirement. The other 6 credits may be chosen based on the student's own interests, the advice of the Graduate Student Advising Committee, or the recommendation of the Major Advisor.

- CHEM 2210 - ELECTROANALYTICAL CHEMISTRY
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2230 - ANALYTICAL SPECTROSCOPY

Biological Chemistry Concentration

Biological Chemistry doctoral students will take four 3-credit courses. All external courses will need approval by the Graduate Curriculum Committee.

- CHEM 2810 - BIOLOGICAL CHEMISTRY 1
- CHEM 2820 - BIOLOGICAL CHEMISTRY 2
- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2830 - SYNTHETIC BIOLOGY
- BIOSC 2940 - MOLECULAR BIOLOGY
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS
- MSMVM 3410 - MICROBIAL PATHOGENESIS
- PHARM 3032 - MEDICINAL CHEMISTRY

Inorganic and Materials Chemistry Concentration

- CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING
- CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY

Organic Chemistry Concentration

Organic students are required to take both organic core courses (Chemistry 2310 and 2320) and Chemistry 2380 (Techniques of Organic Research). Advanced courses in the Division are treated in a two-year cycle of one month, one credit modular units (Minicourses) on Special Topics (Chemistry 3300, 3310, 3320). This program is designed to give advanced students exposure to new developments outside their area of concentration. Each doctoral candidate is required to take for credit a total of three credits of advanced-level minicourses during his or her residence but is encouraged to audit others. No single course can be used to account for all 3 credits, and a GPA of 3.00 or greater is required. In order to ensure maximum freedom of choice, students are advised to register for all three courses (3300, 3310, 3320) during any term in which he or she plans to take one minicourse for credit; before the final examination in the course, the student informs the instructor whether he or she wishes to take the course for credit or audit.

- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH
- CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1
- CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2

Physical Chemistry Concentration

Physical Chemistry doctoral students are required to take both Physical Chemistry core courses: CHEM 2430 and CHEM 2440. The Graduate Student Advising Committee, Preliminary Examination Committee, and/or the Research Advisor will recommend additional courses, from within and outside the Department to meet the 12-credit concentration requirement.

- CHEM 2430 - QUANTUM MECHANICS AND KINETICS
- CHEM 2440 - THERMODYNAMICS & STATSTCL MECHNC

Master's

Chemistry, MS

Requirements for the Master's Degree

Four to six terms of full-time graduate work is generally required to obtain a MS degree in chemistry (a minimum of 30 credits). Special arrangements can be made for individuals who wish to pursue a MS degree as part time students. Each MS student must take a minimum of 12 credits of 2000- or 3000-level chemistry courses. These must include 2 three-credit core courses (CHEM 2110, CHEM 2120, CHEM 2210, CHEM 2220, CHEM 2230, CHEM 2310, CHEM 2320, CHEM 2430, CHEM 2440, CHEM 2810, CHEM 2820); the remaining courses can either be in the student's area of specialization or in other chemistry division areas. Students electing to present a nonresearch thesis must take one laboratory course (CHEM 1250, 1430, 1440, or 1600) for credit, in addition to the preceding requirements. Each student must also demonstrate proficiency in physical chemistry by achieving 65% or higher score on physical chemistry appraisal exam, or earn a grade of B or better in CHEM 1410 and 1420 (or equivalent) or earn a B or better grade in either CHEM 2430 or CHEM 2440.

Additional Requirements

Comprehensive Examination: The student must earn a B or higher in all required chemistry courses and must maintain an overall QPA of 3.0 or higher to be in good standing. The comprehensive examination consists of an examination of the student's record in the required core courses and the additional 2000- or 3000-level courses.

Thesis: The thesis for the MS must represent an original research project or a comprehensive and detailed survey of a research topic of current interest in chemistry. It must be defended in an oral examination.

Analytical Chemistry Concentration

Students with a concentration in Analytical Chemistry are required to take at least two out of these three courses: Electrochemistry (Chem 2210), Chemical Separations (Chem 2220), and Analytical Spectroscopy (Chem 2230) for 6 credits toward the 12-credit course requirement. The other 6 credits may be chosen based on the student's own interests, the advice of the Graduate Student Advising Committee, or the recommendation of the Major Advisor.

- CHEM 2210 - ELECTROANALYTICAL CHEMISTRY
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2230 - ANALYTICAL SPECTROSCOPY

Biological Chemistry Concentration

Biological Chemistry doctoral students will take four 3-credit courses. All external courses will need approval by the Graduate Curriculum Committee.

- CHEM 2810 - BIOLOGICAL CHEMISTRY 1
- CHEM 2820 - BIOLOGICAL CHEMISTRY 2
  The research advisor will recommend remaining courses that include (but are not limited to):
- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2830 - SYNTHETIC BIOLOGY
  These outside courses, each 3-credit, may include the following courses:
- BIOSC 2940 - MOLECULAR BIOLOGY
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS
- MSMVM 3410 - MICROBIAL PATHOGENESIS
- PHARM 3032 - MEDICINAL CHEMISTRY

Inorganic and Materials Chemistry Concentration

- CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING
- CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY
- Six other credits of graduate level classes to meet the 12-credit course requirement..

Organic Chemistry Concentration

Organic students are required to take both organic core courses (Chemistry 2310 and 2320) and Chemistry 2380 (Techniques of Organic Research). Advanced courses in the Division are treated in a two-year cycle of one month, one credit modular units (Minicourses) on Special Topics (Chemistry 3300, 3310, 3320). This program is designed to give advanced students exposure to new developments outside their area of concentration. Each doctoral candidate is required to take for credit a total of three credits of advanced-level minicourses during his or her residence but is encouraged to audit others. No single course can be used to account for all 3 credits, and a GPA of 3.00 or greater is required. In order to ensure maximum freedom of choice, students are advised to register for all three courses (3300, 3310, 3320) during any term in which he or she plans to take one minicourse for credit; before the final examination in the course, the student informs the instructor whether he or she wishes to take the course for credit or audit.

- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH
- CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1
- CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2

Physical Chemistry Concentration

Physical Chemistry doctoral students are required to take both Physical Chemistry core courses: CHEM 2430 and CHEM 2440. The Graduate Student Advising Committee, Preliminary Examination Committee, and/or the Research Advisor will recommend additional courses, from within and outside the Department to meet the 12-credit concentration requirement.

- CHEM 2430 - QUANTUM MECHANICS AND KINETICS
- CHEM 2440 - THERMODYNAMICS & STATSTCL MECHNC

Department of Classics

The Department of Classics focuses on the interpretation of the culture and society of Greco-Roman antiquity in the widest sense of those terms. Our Doctor of Philosophy is integrated into the Joint Graduate Program in Classics, Philosophy and Ancient Science, http://cpas.pitt.edu/. The program is primarily designed to train professional scholars and teachers of the Classics with a specialization in ancient philosophy, and/ or ancient science. Students receive intensive training in methodologies appropriate to their special areas of concentration, reading and analysis of Greek and Roman texts, and in the secondary literature. While the students' primary association is with the Department of Classics, they will work closely with graduate students and faculty drawn from the Departments of Philosophy and the History and Philosophy of Science.

Contact Information

University of Pittsburgh, Department of Classics

1501 Cathedral of Learning

4200 Fifth Avenue, Pittsburgh, PA 15260

[P] 412-624-4494

[F] 412-624-4419

https://www.classics.pitt.edu/

Director of Graduate Studies:

Sarah Brucia Breitenfeld, Assistant Professor, Department of Classic, University of Pittsburgh

Office: 1530 Cathedral of Learning

Email: sbb78@pitt.edu

Admissions

Applicants should have a broad exposure to the cultural history of ancient Greece and Rome, and will have demonstrated knowledge of Ancient Greek and Latin appropriate for graduate work. All applicants will also have demonstrated reading knowledge of at least one modern foreign research language besides English (German, French, or Italian) before beginning the program. Applicants from outside the U.S. must show evidence of having completed a program of study equivalent to a Master of Arts degree and be prepared to present certification of the degree or license at the time of registration. If the credentials are incomplete or not familiar, please send a copy of the application to Office of International Services for evaluation. For applicants whose first language is not English, please refer to http://www.asgraduate.pitt.edu/admissions/international-students to ensure fulfillment of the University's language requirements.

Required Application Materials:

- University of Pittsburgh's on-line Application for Admission (note the $75.00 application fee)
- A Personal **Statement of Purpose** indicating your reasons for pursuing a graduate degree at the University of Pittsburgh and your academic and professional goals. We welcome applicants who approach the intellectual history of the civilizations of ancient Greece and Rome as part of a multicultural and interconnected Mediterranean region. Using specific examples from your past academic experiences and a vision for your future academic trajectory, please write your statement in response to our Mission Statement.
- One **Academic Writing Sample** not longer than 20-25 double-spaced pages. You may submit your statement of purpose and writing sample in the "Additional Information" section of the online Application for Admission, which allows you to upload your documents.
- **Unofficial College Transcripts**. Admitted students must send copies of their official transcripts by email before they can be enrolled. The transcripts need to come directly from an applicant's institution.
- **Three Letters of Recommendation**. Please submit the names of three referees with your online Application for Admission. The letters should address the applicant's expertise in Latin and/ or Ancient Greek, ability to conduct independent research, and academic potential. The recommendation form to be included with each letter of recommendation is available for download as a .pdf file once you begin your online application process. Referees receive an automated email requesting recommendation letters and submit them electronically through the GradCAS portal
- **For Non-US Citizens: TOEFL, IELTS or Duolingo scores**. The application portal allows you to upload them, but you may submit these scores directly to the department later, preferably by January 15.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Classics, PhD

Overview of Degree Program

The Doctor of Philosophy in Classics is integrated into the Joint Graduate Program in Classics, Philosophy and Ancient Science,

http://cpas.pitt.edu/

The program is primarily designed to train professional scholars and teachers of the Classics with a specialization in ancient philosophy, and/ or ancient science. The students' primary association is with the Department of Classics. At the same time, they will work closely with graduate students and faculty drawn from the Departments of Philosophy and the History and Philosophy of Science. The rigorous curriculum is comprised of inter-departmental seminars offered by the graduate faculty from the three participating departments, and complemented by a range of seminars from across the University's thriving intellectual departments and communities. The Ph.D. program mentors students' professionalization by actively supporting publication, conference participation, and membership in professional organizations. It prepares students to participate in and contribute to scholarly conversations nationally and internationally. All Ph.D. students instruct a variety of undergraduate courses under mentorship of the faculty, which include Greek and Latin language classes, Greek and Roman civilization and history. Graduates of the program are well-qualified and competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and non-academic employment sectors

Requirements for the PhD

Degree Requirements

Course Requirements:

Students are required to enroll in the following courses:

- CPAS Proseminar (two terms, during year 1 in the program)
- CPAS Ancient Greek Seminar (four terms, during years 1 and 2 in the program)
- Four courses in Classics, one of which may be completed at the undergraduate level with appropriate graduate components added (e.g. papers and oral examinations, as approved by the DGS). These four must include:

· at least two Classics graduate seminars in Ancient Science (2000-level)

· at least two other graduate seminars in Classics or a related subfield (e.g. ancient Greek or Roman literature, history, archaeology, rhetoric, art history) approved by the student's advisor and the DGS.

- Two courses in Philosophy, including Metaphysics and Epistemology.
- One course in History and Philosophy of Science: Part One of the 'History of Science Sequence' (equals one course).
- Remaining credits may be earned through electives, Independent or Directed Study, and up to 12 credits of PhD dissertation research.

Comprehensive PhD Examinations

Students are required to demonstrate expertise in both Greek and Latin by passing a translation exam by the beginning of the Fall Term of their second year. As a preparation, students are required to carry out independent work on the departmental reading lists in both Latin and Ancient Greek authors (as specified on the departmental lists and in discussion with the student's advisor). This translation exam will represent the Doctoral Preliminary Examination. Students may petition to retake the exam subject to consensus of the Dissertation Committee (see the section 'The Dissertation Committee', below, p.8).

Before admission to Ph.D. candidacy, students must pass three Comprehensive ("Qualifying") Examinations by the beginning of their third year in the program:

1. Greek and Roman History
2. Greek and Latin Literature
3. Special Topic: either Classical Philosophy or Ancient Science

Students are required to demonstrate expertise in a second modern research language by passing a departmental exam by the beginning of their second year (one modern language qualification must have been obtained upon entry into the graduate program, see the section **Admissions Requirements**). This second modern research language must be German unless prior qualification in German has already been obtained before entry into the doctoral degree program. The modern foreign language requirement may also be satisfied by earning a 'B' or better in an appropriate reading course offered by the Departments of German and/or French and Italian Languages and Literature.

The Prospectus

The prospectus proposes the subject and plan for the completion of the dissertation. It must include the following items:

- Abstract (*ca*. 200 words). The abstract gives a clear statement of the research topic and the main conclusion(s).
- Proposal (*ca.* 3000-4000 words).

1. statement of the research topic, with review of earlier scholarship on the topic. Make clear to the reader how your work fits into the scholarly discussion of the topic. A precise mapping of your own position relative to the views of other scholars will make it easier for you to focus your attention on your own project and to define your contribution to the scholarship.
2. description of the method(s) you will use in conducting your research. This item is related to the review of scholarship. In the course of the review you may single out the approach of a scholar or scholars that you have decided to follow in your own research; or you may reject previous approaches in favor of your own. Here you may include a specific example or examples of what kinds of evidence you will be using and how you will treat that evidence. A sample of the argumentation you will be using allows readers to see whether your method is adequate to the material you are working with.
3. statement of the contribution that the dissertation will make to scholarship on the topic. Here you will explain how your work marks an advance in some way on what previous scholars have written.
4. bibliography (not a comprehensive listing at this stage of all relevant items but rather of the works that at this point have stimulated and influenced your own thinking on the topic).

- A Chapter Outline with a brief summary of contents for each one.
- A Timetable for Completion, setting out a realistic schedule for completing the project.

For the submission of the prospectus, the student must file the Prospectus Form with the Graduate Administrator. A prospectus meeting is then held to discuss the student's completed prospectus. At that meeting the prospectus must be approved by the three members of the Classics faculty plus a member from outside the department (usually drawn from within the university but may, with special permission, be chosen from outside the university). These four members, all of whom must have graduate faculty status, will constitute the student's Dissertation Committee (see the section 'The Dissertation Committee' below, p.8). All these committee members must be present for the prospectus meeting and later for the dissertation defense.

The Dissertation

This written work must demonstrate the student's capacity to carry out independent and original research in the field of Classics, ancient philosophy and/ or ancient science. It must embody an extended original investigation of a problem of significance to these fields, and is the capstone to the research program of a student's education. A specific description of the requirements, and of the final oral examination, which completes the requirements for the PhD, can be found in the Faculty of Arts and Sciences Bulletin http://www.bulletins.pitt.edu/graduate/index.html.

Dissertation Defense

When the student completes the dissertation and the supervisor believes it is ready to be defended, a dissertation defense is scheduled and the date of the defense must be published in advance in the University Times (see the Graduate Administrator about this; also note that the date of the defense must be set at least one month in advance so that it can be published on time). The student must submit to the full Dissertation Committee a complete, polished, copy-edited text with full scholarly apparatus and images. This must be submitted by November 1 at the latest to schedule a defense in the fall semester, or by March 1 at the latest to schedule a defense in the spring semester. There are no defenses in the summer semester. The defense is normally a two-hour conversation with the Dissertation Committee; all four members must be physically present. The defense is open to the public and may thus be attended by other students in the department as well as by family or friends of the student.

Students must submit an application to graduate in the term in which they plan to defend and must be enrolled for at least one credit or for **Research and Dissertation for the Ph.D. Degree (CLASS 3000).** The university now requires all dissertations to be filed electronically. Complete instructions can be found at http://www.pitt.edu/~graduate/etd/. Students should have their committee members sign the Electronic Theses and Dissertations Approval Form

http://www.pitt.edu/~graduate/etd/pdf/ETD_Approval_Form.pdf at the defense.

Note: The defense must be passed no later than seven calendar years after the passage of the comprehensive exams. If a student does not pass their defense in this time limit, they must re-take the comprehensive exams in a format approved by the Dean's Office.

Summary of Milestones towards the PhD Degree

1. Modern Language Exam by beginning of Year Two
2. PhD Preliminary Examination by Beginning of Year Two
3. Three Comprehensive Exams (oral and written) by beginning of Year Three
4. Dissertation Prospectus by end of Year Three Fall Term
5. Admission to PhD candidacy at least 8 months prior to defense

- # of courses required (list core courses, etc.)
- PhD Prelim Evaluation
- Comprehensive Exam
- Proposal/overview
- Dissertation and Final Examination

Department of Communication

The department offers the Doctor of Philosophy in Communication. Students entering the program without a prior Communication MA may pick up one from the department along the way. The curriculum emphasizes critical, cultural, historical, philosophical, and theoretical approaches to studying contexts of power, knowledge, and desire that exert differential impacts on various bodies and groups. Departmental research, teaching, and extracurricular community interventions attend to structures of power informing race, class, gender, sex, sexuality, ability, and other intersecting axes of social difference. Many students and faculty members examine the forms of persuasion, protest, silence, coming-to-voice, testimony, noise, and imagination needed to transform such power structures that produce and reproduce inequality.

412-624-6798
Fax: 412-624-1878
E-mail: bmalin@pitt.edu
http://www.comm.pitt.edu/

Additional information concerning the department's graduate program may be obtained by contacting commgrad@pitt.edu or writing to University of Pittsburgh, Department of Communication, Graduate Admissions, 1433 Cathedral of Learning, Pittsburgh, PA 15260.

Admissions

Admission is highly selective, and limited to those who can be funded for five years. Applications to the doctoral program are reviewed holistically. In order to be considered for admission to graduate standing, students must meet the requirements of the Dietrich School of Arts and Sciences and supply (by the first business day of the year) all materials called for in the department's application guidelines, including a completed application form, copies of all post-secondary educational records, at least three letters of recommendation, a statement of purpose, and writing sample. Non-native speakers of English without a degree from an accredited institution of higher education in the U.S. must also have the Educational Testing Service send TOEFL scores as part of the application. Citizens of other nations follow a separate set of guidelines that include TOEFL requirements and, if they are offered admission, certified /notarized translations of transcripts and diplomas for applicants from countries where English is not the official language. Upon admission, candidates will be assigned an advisor who will assist them in planning a course of study.

William Pitt Debating Union

Graduate students interested in public argument and argumentation theory can pursue co-curricular study and teaching of argumentation practices by working with the William Pitt Debating Union (WPDU), one of the nation's most venerable debating societies.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Communication: Rhetoric and Communication, PhD

The aim of the program is to train rigorous researchers and excellent teachers. To this end it offers historical, theoretical, and critical approaches to the study of communication. The curriculum includes traditional and innovative course work drawn from four intersecting areas of emphasis: History, Theory and Criticism of Rhetoric; Media and Cultural Studies; Public Address and Argument; and Rhetoric of Science.

Requirements for the PhD

- 24 courses (72 credit hours) required, thirteen of which will consist of the departmental core requirements of COMMRC 2295 Teaching Practicum, COMMRC 2296 Approaches to Communication, COMMRC 2297 Faculty Research Forum, COMMRC 2298 Research Laboratory, and COMMRC 2299 Writing Workshop. Complete a first semester in residence enrolled in a minimum of nine credit hours under the guidance of the DGS, who will approve course selections for the following semester and offer advice about choosing a DPA. Students entering with a recent MA in Communication or cognate field may be able receive credit toward the PhD.
- Approved Plan of Study (by end of third semester of degree work)
- 9 credit hours of coursework outside of the Communiations Department
- Up to 12 credits of individual study through some combination of COMMRC 3001 Prospectus Research, COMMRC 3002 Professional Development, and COMMRC 3902 PhD Directed Study
- Portfolio-based Comprehensive Exam with Oral Defense (after or near the end of coursework)
- Dissertation Prospectus and Oral Defense
- Dissertation and Final Oral Defense

Master's

Communication: Rhetoric and Communication, MA

The aim of the program is to train rigorous researchers and excellent teachers. To this end it offers historical, theoretical, and critical approaches to the study of communication. The curriculum includes traditional and innovative course work drawn from four intersecting areas of emphasis: History, Theory and Criticism of Rhetoric; Media and Cultural Studies; Public Address and Argument; and Rhetoric of Science.

Requirements for the MA

- 10 courses (30 credit hours) required, two of which are core (COMMRC 2296 - APPROACHES TO COMMUNICATION and COMMRC 2295 - TEACHING PRACTICUM), one of which may be taken as COMMRC Directed Study, and two of which may be taken outside the Department of Communication.

- Approved Plan of Study (in first year of degree work)
- Up to 3 credits of Directed Study
- Written Comprehensive Exam with Oral Defense (after or near the end of coursework)

Program in Computational Biology

Joint Pitt-CMU PhD Program in Computational Biology

James Faeder and Russell Schwartz, Directors

Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavior science.

The Joint CMU-Pitt PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

*NIH Working Definition, July 17, 2000

Program Website:	www.compbio.pitt.edu	www.compbio.cmu.edu

Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences, are ideal candidates.

Recommended Prerequisites

For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91

Application

REQUIRED MATERIALS - Deadline December 15

1. The Online Application
2. Statement of Purpose
3. Three letters of Recommendation
4. Unofficial Transcripts (submitted online)
5. Conversion of GPA (for international students only)
6. Unofficial TOEFL Scores (submitted online)
7. Application Fee

Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.

For more information on application process, see http://www.compbio.cmu.edu/?page_id=163

Terminal Masters Degree

The program does not admit students whose goal is to attain a Master's of Science degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Courses

http://www.compbio.cmu.edu/?page_id=87

Training Faculty

The program provides students with cross-disciplinary training in established as well as newly emerging fields of computational biology. Students have access to a community of faculty mentors from the University of Pittsburgh and Carnegie Mellon University, which not only provides a breadth of research areas for investigation, but also offers the technical and intellectual resources to make rapid progress toward their doctoral degree.

For a list of training faculty, see https://www.cmu.edu/compbio/people/core-faculty.html

Doctoral

Center for Neuroscience Training Program (CNUP), PhD

PhD Degree Requirements

Credits: A minimum of 72 credit hours including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neurobiology and several elective courses.

Specifically, the following core courses are required:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

- MSNBIO 2010 - SCIENTIFIC ETHICS or
- NROSCI 2010 - SCIENTIFIC ETHICS

- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY

- MSNBIO 2624 - GRANT WRITING

Note:

In addition to University requirements for graduate degrees, students are also required to obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense.

Integrative Molecular Biology, PhD

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the Program in the summer session, and after performing three rotations identify an advisor and area of research. Areas of research focus include Genomics, Proteomics, and Gene Function and Cellular and Developmental Dynamics. Required course work is completed during the first year. At the end of the first year students take a comprehensive examination that includes the submission of a research proposal to national fellowship programs. Students receive career mentoring during the third and fourth years to ensure a seamless transition to the postdoctoral level. Additional information can be found at the following Web site: www.pimb.pitt.edu/curriculum.php.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

- MSIMB 2000 or
- IMB 2000 - LABORATORY RESEARCH ROTATIONS - 9 credits - taken in the summer prior to the first year

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer of the second year
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

- MSIMB 2050 or
- IMB 2050 - PIMB RESEARCH SEMINAR - the Department/Program Seminar and Journal Club/Conference are taken each fall and spring term until graduation

Advanced Elective Courses (6 credits total)

A large number of courses are available and are listed on the following Web site: www.pimb.pitt.edu/curriculum.php - Students are required to select courses in more than one of the following disciplines: molecular genetics, biochemistry, cell biology, and developmental biology.

Critical European Culture Studies Program

The PhD Program in Critical European Culture Studies offers a flexible interdisciplinary curriculum that appreciates the idea of Europe as a historically dynamic discourse. This new graduate program offers students discipline-specific training while fortifying it with a focus on broader issues such as transnationalism, migration, and cultural identity. It allows students to work across disciplinary boundaries to explore in depth the culture of Europe and develop new configurations in European and national cultural studies: European Studies and German/Russian/Polish/English/French/Italian/etc. These may include literary, historical, anthropological, media-based, and other studies.

Contact Information

Program Director: Professor Randall Halle
E-mail: rhalle@pitt.edu

Graduate Administrator: Jennifer Berkebile
E-mail: JES379@pitt.edu

Main Office: 454 Cathedral of Learning
412-624-6564
www.cecs.pitt.edu

Admissions

Admission Requirements:

- a Master's degree in a field related to Critical European Culture Studies
- proficiency in English (for non-native English speakers, TOEFL, IELTS, or Duolingo scores should be provided),
- proficiency in a second European-related language. Proficiency in this European language should be at a level sufficient to study at a European University and may be demonstrated by:

1) semester-length enrollment in a European University OR

2) a minimum score of Advanced Low or the equivalent on the ACTFL/OPI or a similar score on a nationally or internationally recognized scale (such as the Common European Framework of Reference for Languages).

Affiliated Faculty

Dietrich School of Arts and Sciences Faculty

PhD

Critical European Culture Studies, PhD

Credit Requirement:

The requirements for the PhD are at least 72 graduate-level credits, including language courses, elective courses in a single discipline and five required core courses. The core required courses are an Introduction to Literary and Theory Course, a Theory of Europe Course, a EU Studies Core Course, a Pedagogy Course and a research methodology course (ethnography, digital humanities, oral history, translation studies, or any other suitable methodology course that serves the students research interests and goals).

PhD Qualifying Examination:

Students take the PhD qualification exam during their 3rd semester in the program. They provide a reading list composed of all the texts read in the graduate courses up to this point. In addition to that they also submit two papers, one written in English and the other in their chosen primary European language.

Supervised Teaching Practicum:

A hands-on teaching practicum is an academic requirement of the doctoral program for students to learn about university-level teaching. This experience will serve as preparation for scholarly and professional careers. Students will be supported by a pedagogy seminar to prepare and aid them.

Comprehensive Examination:

A hands-on teaching practicum is an academic requirement of the doctoral program for students to learn about university-level teaching. Topics include pedagogy. This experience will serve as preparation for scholarly and professional careers. Students will be supported by a pedagogy seminar to prepare and aid them.

Dissertation Overview:

Upon completion of the comprehensive examination and all other requirements, during the 5th semester, the student files an application for admission to candidacy for the Doctor of Philosophy. In consultation with a dissertation advisor the student presents a prospectus of a dissertation to a doctoral committee. The dissertation prospectus (10-15 pages) completed by the student gives a brief introduction to the topic, previous and related research done on the topic, and the specific lines of inquiry, including methodologies and specific skills used, that the dissertation will pursue. In addition, students should address how work on the dissertation will embed them in academic and non-academic networks. Students should also address how the outcome of their dissertation will address non-academic audiences? (for example, Cultural institutions, NGOs, Governmental institutions, the creative and cultural industry). After the advisor approves this prospectus, the student will defend the prospectus to the doctoral committee. Faculty members affiliated with CECS from at least three different departments should constitute the members of the doctoral committee.

Language Requirement:

By the time they defend their dissertation overviews, the students must also demonstrate an intermediate-level proficiency in a third language (in addition to English and the other, primary research language) on one of the following ways:

- passing an intermediate-level language sequence with a grade of "B" or better;
- take a nationally recognized exam such as the OPI, verifying intermediate proficiency;
- or take a departmental exam verifying such proficiency.

Dissertation Defense:

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community. The dissertation should engage a European-related question and include ethnographic, oral historical, digital, or other methodological approaches relevant to the chosen problematic of the research project. Due to the interdisciplinary nature of the program and the dissertation committees, the dissertation must be written in English.

Cultural Studies Program

The Graduate Program for Cultural Studies is a certificate-granting intellectual center for interdisciplinary cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. In its course offerings and other activities, the program draws upon over one hundred faculty affiliate members and ninety enrolled graduate certificate students from many of Pitt's departments and schools. The program's varied faculty members and students consistently exchange ideas about studying culture, beyond national boundaries and disciplinary divisions. The program stands as an institutional forum for responding to the increasing global need to engage, through interdisciplinary and post disciplinary lenses, the problematics of culture.

The program addresses debates concerning the theory of texts and their production; the relationship between culture and politics; the formation of disciplines and institutions; and the nature of cultural antagonisms and crises. It features a variety of recent methodologies of historical and textual interpretation, and offers students opportunities to work with faculty and other students from the following departments, programs, and schools: Anthropology, Bioethics, Classics, Communication, East Asian Languages and Literatures, Education, English, Film and Media Studies, French and Italian Languages and Literatures, Gender, Sexuality, and Women's Studies, German Languages and Literatures, Hispanic Languages and Literatures, History, History and Philosophy of Science, History of Art and Architecture, Law, Library Science, Linguistics, Medicine, Music, Philosophy, Political Science, Public and International Affairs, Public Health, Religious Studies, Slavic Languages and Literatures, Social Work, Sociology, and Theatre Arts.

The program offers a master's certificate and doctoral certificate in cultural studies, which enhance MA and PhD degrees in the disciplines.

Contact Information

Program Director: Professor Michael Sawyer

Fax: 412-624-7232
E-mail: cultural@pitt.edu
www.culturalstudies.pitt.edu/

Admissions

Students who wish to apply to the certificate program must be enrolled in a graduate or professional program at the University of Pittsburgh and must be in good academic standing. A student may earn either a master's certificate or a doctoral certificate, but not both.

Publications

Cultural studies faculty edit journals of international renown, including *boundary 2* and *Critical Quarterly*, leading publications in the study of culture. The Program Director is co-editor of the *Oxford History of Popular Print Culture, vol. 5, United States, to 1860.*

Affiliated Faculty

http://www.culturalstudies.pitt.edu/faculty

Certificate

Cultural Studies, Doctoral Certificate

This interdisciplinary program is concerned with cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. The methodologies employed derive from the most advanced historical, social, and literary models. The program, open to students who are and must be discipline-trained and discipline-oriented, provides a transcultural-critical expertise not generally available in specific departments. The faculty is drawn from twenty-five areas of the humanities and social sciences at the University. The program is open to any student enrolled full time in any graduate or professional program at the University of Pittsburgh; certificates are granted at both Master's and PhD levels. Two fellowships are offered annually to outstanding students who have passed their doctoral comprehensive examinations.

Requirements for the Doctoral Certificate

The following are course requirements (27 credits) for the doctoral certificate in cultural studies:

- Common Seminar (CLST 2050)
- Three core courses (one from each group): A, B, or C (courses are listed at http://www.culturalstudies.pitt.edu/courses)
- One designated cultural studies course (D) in the student's home department or school
- One designated cultural studies course (D) outside the student's home department

Students from departments without second language requirements are expected to demonstrate the ability to use primary and secondary texts in one language other than English. Courses are regularly offered in the language departments toward the achievement of this level of reading proficiency and those departments will schedule individual written examinations to demonstrate this ability.

Virtually all of the program's courses are cross-listed with offerings in other departments and schools. Each cross-listed course counts for credit both in its home department and in the cultural studies program. Thus, the certificate program normally requires only one or two extra courses beyond those mandated by students' disciplinary degree program.

Cultural Studies, Master's Certificate

This interdisciplinary program is concerned with cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. The methodologies employed derive from the most advanced historical, social, and literary models. The program, open to students who are and must be discipline-trained and discipline-oriented, provides a transcultural-critical expertise not generally available in specific departments. The faculty is drawn from twenty-five areas of the humanities and social sciences at the University. The program is open to any student enrolled full time in any graduate or professional program at the University of Pittsburgh; certificates are granted at both Master's and PhD levels. Two fellowships are offered annually to outstanding students who have passed their doctoral comprehensive examinations.

Requirements for the Master's Certificate

Following are course requirements (15 credits) for the master's certificate in cultural studies:

- Common Seminar (CLST 2050)
- One core course from group A or B (courses are listed a http://www.culturalstudies.pitt.edu/coursest)
- One designated cultural studies course (D) in the student's home department or school
- One designated cultural studies course (D) outside the student's home department or a course from group C

Digital Studies and Methods Program

Graduate Certificate in Digital Studies and Methods

This certificate offers graduate students at the University of Pittsburgh the opportunity to acquire a proactive, mindful engagement with digital methods in the humanities and allied social sciences. While interpretive scholars have been applying computational methods to their work for as long as there have been digital computers, the arrival of the World Wide Web witnessed a more expansive group of humanists and social scientists, armed with a new array of interpretive possibilities, joining the conversation about how computing can productively enrich their research. In these recent years, such scholars have turned to using the computer not only as a revolutionary programmable calculator but also as a medium of connection, capable of supporting a wide number of approaches to scholarly investigation, interpretation, and expression. In sum, they focus on what it means to be human in a world where the dominant force-for-change seems to be technology. The Graduate Certificate in Digital Studies and Methods is designed to welcome students into this community.

Being a mode of inquiry with an expansive set of methods and tools, the use of digital techniques within the humanities and allied social sciences requires a pedagogical approach that relies on not only lecture and seminar time, but also hands-on workshop opportunities where students can apply the techniques they have been learning and discussing. To this end, this certificate includes traditional classroom hours as well as studio-based learning experiences that provide the hands-on, peer- and mentor-supported experience that this digitally-attentive approach to interpretive scholarship requires.

The methods, skills, and techniques that the students enrolled in this certificate might encounter include: network analysis, topic modeling, digital visualization techniques, geographic information systems (GIS), effective data modeling practices, and approaches to text analysis focused on the use of markup languages.

Department of East Asian Languages and Literatures

The Department of East Asian Languages and Literatures (EALL) offers an interdisciplinary Master of Arts in East Asian Studies (IDMA), focusing on China, Japan, or Korea.

Contact Information

Department Chair (EALL): Elizabeth Oyler
Main Office: 2701 Cathedral of Learning
Graduate Administrator: Jennifer Berkebile
412-624-5227
Fax: 412-624-3458

E-mail: JES379@pitt.edu
http://deall.pitt.edu/graduate

Admission and Application Form: To apply, go to http://deall.pitt.edu/graduate/apply and click on Apply Yourself.

The interdisciplinary Master of Arts degree in East Asian studies (IDMA) combines advanced language training with study in the social sciences and humanities focusing on East Asia. It is designed for graduate students who plan Asia-related; or for those who want intensive area training before pursuing a doctoral program in a particular discipline. The IDMA is typically a two-year program. It is designed for students who have already had at least two years of Chinese, Japanese, or Korean language study. The interdisciplinary nature of the program comes not from specially constructed interdisciplinary courses but from taking a planned complement of graduate-level courses in different departments. The strength of this interdisciplinary approach lies in the fact that students are able to elect to work with faculty in several disciplines, as well as to take courses in different areas in the humanities and social sciences. The applicant's academic interests must be compatible with the expertise of the East Asian faculty at the University of Pittsburgh.

Applicants for admission must submit a 500-600 words statement in English that identifies the student's academic and intellectual goals through discussing a book that has influenced them in applying to the IDMA program. They must submit transcripts of all college-level work, three letters of recommendation in English, and a writing sample in English. International applicants whose first language is not English are required to submit the TOEFL administered by the Educational Testing Service: The required TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing); the required minimum IELTS of 7.0 (with at least 6.5 in each of its four sections). The deadline each year for submitting applications is January 15. Notification can be expected by the middle of March. The program admits students only for the fall term.

Financial Assistance

Current as well as prospective students in Asian Studies are eligible to apply for a variety of scholarships and fellowships administered by the Asian Studies Center. See the Web site https://www.ucis.pitt.edu/asc/students/graduate-students/funding for descriptions of awards.

The dean of the Dietrich School of Arts and Sciences has approved some Tuition Reduction Scholarships for out-of-state students accepted into the IDMA program each year. As a result, most IDMA students pay in-state tuition rates.

Faculty

The Asian Studies faculty affiliated with the IDMA Program comprise an outstanding group of specialists in the social sciences and humanities. They share a common dedication to teaching and a vigorous commitment to scholarly research as well as service to the profession. Academic disciplines of individual faculty members and their teaching specializations are noted on the website above.

Dietrich School of Arts and Sciences Faculty

Course Note

Not all courses are offered every term. Students should consult with their academic advisers for course selections. 30 credits of graduate courses are required for the degree. For more detailed information about the requirement, refer to the department website: http://deall.pitt.edu/graduate/requirements.

Master's

East Asian Studies, MA

The interdisciplinary Master of Arts degree in East Asian studies (IDMA) combines advanced language training with study in the social sciences and humanities focusing on East Asia. It is designed for graduate students who plan Asian-related careers; or for those who want intensive area training before pursuing a doctoral program in a particular discipline. The IDMA is typically a two-year program. It is designed for students who have already had at least two years of Chinese, Japanese, or Korean language study. The interdisciplinary nature

of the program comes not from specially constructed interdisciplinary courses but from taking a planned complement of graduate-level courses in different departments. The strength of this interdisciplinary approach lies in the fact that students are able to elect to work with faculty in several disciplines, as well as to take courses in different areas in the humanities and social sciences. The applicant's academic interests must be compatible with the expertise of the East Asian faculty at the University of Pittsburgh. IDMA students are eligible to apply for a variety of scholarships and fellowships administered by Asian Studies. See the Web site www.ucis.pitt.edu/asc and click on Funding for descriptions of awards.

Requirements for the MA

Requirements for the IDMA

The interdisciplinary Master of Arts in East Asian Studies (IDMA) is intended primarily for predoctoral students who want intensive area training before pursuing a doctoral program in a particular discipline, or for those planning professional careers in government, business, journalism, or pre-college teaching.

Credit Requirements: Students must earn a minimum of 30 credits of course work (excluding language credits) in two or more departments with an overall GPA no lower than 3.0. In addition, EAS 2005 - APPROACHES TO EAST ASIA , a research methodology course, must be taken in the first year.

Language Requirement: Students must have successfully completed two years of Chinese, Japanese, or Korean language training in order to apply to the program and must continue their language study as part of their graduate work. A minimum of three years' college-level language study or its equivalent is necessary to fulfill the language requirement for the degree.

Course Specialization: Students who specialize in one country (China, Japan, or Korea) must take a least one 3-credit course on either of the other two countries. For example, those who specialize in Japan must take at least one 3-credit course on China or Korea.

Thesis: Students must complete a culminating Master's thesis-level project in consultation with their academic advisor and two additional graduate faculty members. These three faculty members serve as the student's thesis committee. There are three options for the project: a conventional Master's thesis, a portfolio consisting of three papers in lieu of a thesis, or a translation project with critical commentary.

Presentation: In preparation of the thesis project, each IDMA student must give a talk on their topic in the EALL Colloquium series.

Oral Comprehensive Examination: When course work and thesis are completed, the student must pass an oral comprehensive examination administered by the student's faculty committee.

Department of Economics

The aim of the programs in economics at the University of Pittsburgh is to prepare students to be professional economists in academia, business, or government.

The normal time to complete the PhD is five years. Graduate students may apply for a Master of Arts (MA) under specific circumstances as described below.

1. **Continuing Master's Degree**
   Continuing students may apply for an MA in economics after they have passed all preliminary examinations and have at least 30 credits in graded coursework at the 3000 level. In addition, their GPA must be 3.0 or higher in all courses counting toward the 30-credit minimum.
2. **Non-continuing Master's Degree**
   The Graduate Committee may recommend that a MA in economics be awarded to a student who is leaving the PhD program either voluntarily or because of dismissal. The requirements for the terminal master's degree are: 1) either passing each of the seven first year courses with a minimum grade of B or passing one of the preliminary exams; and, 2) completing 30 credits of graduate level coursework with a cumulative GPA of 3.0.

Continuing students do not qualify for a non-continuing master's degree.

The department also offers a stand-alone Master of Science (MS) through the Master of Science in Quantitative Economics (MQE) program. The MQE program is just 8 months, or 2 semesters (Fall and Spring). The program begins at the end of August and ends at the end of April, the following year.

Faculty members have a wide variety of research interests. Currently, the department's strengths are greatest in the following fields:

- Comparative Systems and Development Economics
- Econometrics
- Economic History
- Experimental Economics
- International Economics
- Labor Economics
- Macroeconomics
- Microeconomic Theory
- Public Economics
- Urban Economics

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Economics, Graduate Administrator Dane Youkers, 4700 Wesley W. Posvar Hall, Pittsburgh, PA 15260. Phone: 412-648-2305. E-mail: dcy14@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement that addresses the applicant's personal and professional goals and the reasons for pursuing doctoral study in economics. Submission of the Graduate Record Examination is optional. International applicants whose first language is not English are required to submit official scores from either the TOEFL administered by the Educational Testing Service with a minimum score of 90 on the internet-based test (with at least a score of 22 in all four sections). Applicants may also submit scores from the IELTS administered by the University of Cambridge, Local Examinations Syndicate. The minimum acceptable score is 7.0, with at least a score of 6.5 in each of the 4 sections (taking the academic writing and reading modules). The department also accepts Duolingo scores, with a minimum of 120. Applications must be received by January 15 for the PhD program. The MQE program accepts applications for each fall term on a rolling basis; international students must apply by June 1 and domestic students must apply by July 31. The department admits students only for the fall term.

Doctoral

Economics, PhD

Requirements for the PhD

Credit Requirement

The minimum requirement is 72 credit hours. Of these, 45 credit hours must be in graded course work. Core courses include:

- **ECON 3001 - INTRO TO MATHEMATICAL METHODS**
- **ECON 3010 - MATHEMATICAL METHODS OF ECONOMIC ANALYSIS**
- **ECON 3020 - ECONOMETRIC THEORY 1**
- **ECON 3030 - MICROECONOMIC THEORY 1**
- **ECON 3040 - MACROECONOMIC THEORY 1**
- **ECON 3050 - ECONOMETRIC THEORY 2**
- **ECON 3060- MICROECONOMIC THEORY 2**
- **ECON 3070 - MACROECONOMIC THEORY 2**
- **ECON 3080 - EMPIRICAL METHODS**
- **ECON 3210 - TEACHING ECONOMICS**
- **ECON 3220 - RESEARCH METHODS IN ECONOMIS**
- **ECON 3900 - COMPREHENSIVE PREPARATION**

- ECON 3001 - INTRO TO MATHEMATICAL METHODS
- ECON 3010 - MATHEMATICAL METHODS OF ECONOMIC ANALYSIS
- ECON 3020 - ECONOMETRIC THEORY 1
- ECON 3030 - MICROECONOMIC THEORY 1
- ECON 3040 - MACROECONOMIC THEORY 1
- ECON 3050 - ECONOMETRIC THEORY 2
- ECON 3060 - MICROECONOMIC THEORY 2
- ECON 3070 - MACROECONOMIC THEORY 2
- ECON 3080 - EMPIRICAL METHODS
- ECON 3210 - TEACHING PRACTICUM
- ECON 3220 - RESEARCH METHODS IN ECONOMICS
- ECON 3990 - RESEARCH AND DISSERTATION PHD

Additional Requirements

Preliminary Examinations

The PhD preliminary exams consist of a four-hour exam in microeconomic theory and a second four-hour exam in macroeconomic theory. These exams are offered in June after the first year of study. If a student fails either or both preliminary examinations, a second attempt is offered two months later in August. Students must pass both exams by the second attempt to continue in the program.

Minimum GPA

All students must attain a minimum GPA of 3.00 in 3000-level course work in economics as well as maintain a minimum GPA of 3.00 in all courses qualifying for graduation to be certified for the PhD in economics, as well as to qualify for continued financial assistance.

Comprehensive Exam Requirement (Research Paper)

All students are required to complete a single authored, original research paper demonstrating their ability to do research in economics. This is typically begun in the latter half of the second year and completed in the first term of the third year. The paper is reviewed by two faculty members, who may ask for revisions or additions. Following their approval of the paper, the student is certified as having completed the comprehensive examination requirement.

Field Requirements

Students are required to take coursework in two major fields, consisting of two graded courses and one graded seminar in each field, and one minor field consisting of two graded courses. The two major fields must be completed within separate areas of research, as follows:

- Microeconomics
- Macroeconomics
- Applied Microeconomics
- Experimental Economics
- International, Comparative, and Developmental Economics
- Econometrics

The list of fields offered within each area is periodically updated by supervising faculty members within the relevant area.

Dissertation Overview (Admission to Candidacy)

Following successful completion of the comprehensive examination, the student begins to work full time on the doctoral dissertation. This involves searching for a topic, finding a faculty advisor, and beginning preliminary research. When a topic is selected and preliminary research is underway, the student, in consultation with the advisor, forms a dissertation committee. A dissertation overview is held at which the student presents his proposal for doctoral research, preliminary findings, and a strategy for completing the work to the dissertation committee. If the dissertation committee approves of the topic and research strategy, the student can file an application for admission to candidacy for the Doctor of Philosophy.

Dissertation Defense

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Joint Degree

Quantitative Economics/Public Administration, MS/MPA

The proposed joint degree program will require that students complete all of the typical requirements for MQE program. Students will also complete all the required GSPIA MPA coursework, except for 3 quantitative courses whose content is replaced by the quantitative training in the MQE classes. Joint degree students also have the number of required MPA elective courses reduced by one relative to the normal MPA degree. Finally, both the MQE and MPA program require a capstone project. Joint degree students will be able to choose whether to do their capstone project through the MQE program or through the MPA program. Thus, the required plan of study is as follows:

MQE/MPA Joint Degree Requirements

All MQE/MPA students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Plan of Study (if opting for SPIA Capstone) 39 SPIA credits & 27 MQE credits

Year 1 - Fall (15 credits)

- ECON 2811 - INDIVIDUALS, FIRMS, AND MARKETS
- ECON 2812 - INCENTIVES AND INFORMATION
- ECON 2821 - QUANTITATIVE METHODS
- ECON 2822 - ECONOMIC INFERENCE FROM DATA
- ECON 2801 - COMMUNICATING ECONOMIC INSIGHTS

Year 1 - Spring (12 credits)

- ECON 2813 - GLOBAL ECONOMICS AND FINANCE
- ECON 2814 - EVIDENCE-BASED ANALYSIS IN LABOR, PUBLIC AND HEALTH ECONOMICS
- ECON 2824 - BIG DATA AND FORECASTING IN ECONOMICS
- ECON 2823 - APPLICATIONS OF ECONOMIC ANALYSIS TECHNIQUES
- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

SPIA required Internship

All MQE/MPA students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Year 2 - Fall (12 credits)

PIA 2xxx Concentration Required Course or Elective

PIA 2xxx Concentration Required Course

- OR PIA 2096 - CAPSTONE SEMINAR:
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2028 - PUBLIC POLICY ANALYSIS

Year 2 - Spring (12 credits)

- PIA 2xxx Concentration Required Course
- PIA 2xxx Concentration Required Course
- PIA 2xxx Concentration Required Course or Elective Course
- PIA 2xxx Concentration Required Course or Elective Course
    - OR
- PIA 2096 - CAPSTONE SEMINAR:

Year 3 - Fall (12 credits)

PIA 2xxx Concentration Required Course

PIA 2xxx Concentration Required Course or Elective Course

Total Credits: 66

Plan of Study (if opting for MQE Capstone project) 30 MQE credits & 36 SPIA credits

Year 1 - Fall - if opting for MQE capstone project

- ECON 2811 - INDIVIDUALS, FIRMS, AND MARKETS
- ECON 2812 - INCENTIVES AND INFORMATION
- ECON 2821 - QUANTITATIVE METHODS
- ECON 2822 - ECONOMIC INFERENCE FROM DATA
- ECON 2801 - COMMUNICATING ECONOMIC INSIGHTS

Year 1 - Spring (15 credits)

- ECON 2813 - GLOBAL ECONOMICS AND FINANCE
- ECON 2814 - EVIDENCE-BASED ANALYSIS IN LABOR, PUBLIC AND HEALTH ECONOMICS
- ECON 2824 - BIG DATA AND FORECASTING IN ECONOMICS
- ECON 2823 - APPLICATIONS OF ECONOMIC ANALYSIS TECHNIQUES
- ECON 2841 - DATA DESIGN FOR ECONOMIC APPLICATIONS (CAPSTONE)

SPIA required Internship

All MQE/MPA students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Year 2 - Fall (12 credits)

- PIA 2xxx Concentration Required Course
- PIA 2xxx Concentration Required Course or Elective Course
- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT

Year 2 - Spring (12 credits)

PIA 2xxx Concentration Required Course

PIA 2xxx Concentration Required Course or Elective

- PIA 2096 - CAPSTONE SEMINAR:
- PIA 2028 - PUBLIC POLICY ANALYSIS

Year 3 - Fall (12 credits)

- PIA 2xxx Concentration Required Course

- PIA 2xxx Concentration Required Course
- PIA 2xxx Concentration Required Course or Elective Course
- PIA 2xxx Concentration Required Course or Elective Course

Total Credits: 66

Master's

Quantitative Economics, MS

Program Description

The MS in Quantitative Economics (MQE) program in the Department of Economics trains professionals to become experts who can inform economics and business decisions with sophisticated, state-of-the-art data analysis.

Students acquire the knowledge needed to formulate economic questions surrounding alternative policy and business strategies; identify the data needed to answer these questions; read and interpret data; produce forecasts that support core business and policy decision making; build the skills needed to effectively present and communicate data-driven knowledge.

The program is a professional 8-month program to be completed during the Fall and Spring semesters. The degree requires 30 credits, equally divided into 10 courses of 3 credits each, over two semesters. Each semester is split into two terms that are 7 weeks long, and each term includes 3 courses, with one of them running over two terms. All students are required to participate in a summer course in mid-August that will strengthen their skills in math and computer programming. MQE offers intensive Career Services that prepare students for the workplace, help them network and make mentor connections. The MS in Quantitative Economics qualifies as a STEM designated degree program.

Fall	**Session 1**	Individuals, Firms, and Markets	Quantitative Methods	Communicating Economic Insights
	Session 2	Incentives and Information	Economic Inference from Data	
Spring	**Session 1**	Financial Econometrics	Applications of Economic Analysis Techniques	Data Design for Economic Applications (Capstone)
	Session 2	Evidence-Based Analysis in Macro, International and Microeconomics	Big Data and Machine Learning in Economics	

Program Requirements

Applicants must hold a bachelor's degree from a recognized college or university, or have completed an equivalent level of education that the University of Pittsburgh deems comparable to a bachelor's degree. Applicants must have demonstrated mastery in calculus I and a basic understanding of economics and basic computer programming skills with a minimum 3.0 cumulative GPA in the total undergraduate program. For foreign students, language-test scores above certain thresholds will be required.

Submission of personal statement with a consideration for a student's ability to overcome challenges and assert strength in relevant skills.

Two letters of recommendation, preferably from an academic source, must be submitted online. Letters should be written on letterhead stationery and signed by the recommender. Applications can be submitted prior to receipt of letters.

International applicants must submit test scores in the Test of English as a Foreign Language (TOEFL), IELTS (International English Language Testing System) score (required of applicants whose official native language is not English even if English was the medium of instruction in the foreign schools attended by the applicant) or the Duolingo English Test. The required TOEFL score is 90 (with a minimum of 22 in each section), the required IELTS score is 7.0 (with a minimum of 6.5 in all sections), or the required Duolingo English Test score is 110 or higher. Applicants who have completed or are about to complete a bachelor's degree or graduate degree from a regionally accredited institution in the United States are exempt from submission of the Duolingo English Test, TOEFL or IELTS. Exemptions on a case-by-case basis are possible for applicants who hold a degree or are currently enrolled in an institution in which the only language of instruction is English. When requesting that TOEFL scores be sent to the University of Pittsburgh use code 2927.

Academic Support

The students will be academically supported by the MQE director and program director. The students will be supported in their professional development through workplace-readiness workshops, networking events and mentoring programs.

Students are required to maintain a GPA average of at least 3.0 and receive a grade of B or higher in all courses. A student failing to meet these requirements will be terminated from the program.

Additional information concerning the department's graduate program may be obtained from the Graduate Administrator, Department of English, University of Pittsburgh, Pittsburgh PA 15260. Phone: 412-648-3303. E-mail: engrad@pitt.edu. Web site: www.english.pitt.edu/graduate.

Admissions

Applicants for admission must submit an online application, transcripts of all college-level work, three letters of recommendation, a personal statement, and a writing sample (which varies by degree-please consult the application requirements link above). International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service with a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section, the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 7.0 (with at least 6.5 in each of its four sections) or Duolingo English test with a minimum score of 120. Applications to the MA and PhD program will be accepted for fall term admission until December 10, and applications to the MFA program are due January 7. Newly admitted students enter the program in the fall semester only.

Certificate in Composition, Literacy and Pedagogy

http://www.composition.pitt.edu/graduate/certificate

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at https://www.composition.pitt.edu/graduate/certificate.

Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Composition, Literacy and Pedagogy Certificate

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Certificate in Composition, Literacy and Pedagogy

http://www.composition.pitt.edu/graduate/certificate

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html

Certificate

This graduate certificate recognizes sustained, advanced study in composition, literacy, pedagogy and rhetoric at the University of Pittsburgh. It can be awarded to students who have earned the MA, MFA, or PhD degree in the Department of English, and to those earning graduate degrees in other departments, programs, and institutions.

To qualify for the certificate, students must successfully complete ENGLIT 2500 - SEMINAR IN PEDAGOGY (or an equivalent course in writing pedagogy), and a set of additional courses described below: the MA and MFA certificate will require three (3), and the PhD certificate five (5) additional courses. These courses are selected from among an array of seminars that represent intersecting strands of work in the Composition Program:

- **Composition**, including study of the theories and practices of writing, within and beyond the field of Rhetoric and Composition;
- **Literacy**, including research into public rhetorics and the literacies of diverse groups in the larger culture beyond the academy;
- **Pedagogy**, including historical and critical inquiry into issues of schooling, teaching, and the institutions of academic writing;
- **Rhetoric**, including the history and theory of rhetoric and its functioning in institutional, political and literary spheres of communication.

Students interested in the certificate should see the Director of Composition for initial advising. He or she will identify qualifying courses for the certificate in English and may approve courses in other departments at the University of Pittsburgh. One course of Directed Study may also be accepted for the certificate, with the approval of the Director of Composition. In order to graduate with this certificate, students must apply to the certificate program at least one semester in advance of their graduation. The application form can be obtained from the Graduate Administrator in the Department of English (engrad@pitt.edu (mailto:engrad@pitt.edu)).

To qualify for the Graduate Certificate in composition, Literacy, Pedagogy, and Rhetoric, students are further required to produce a teaching portfolio. The portfolio must be submitted to the Director of Composition at least 3 weeks before the end of the semester in which the student plans to graduate. The portfolio assembles materials that document at least one of the following:

- An ability to design and teach an effective undergraduate course or communitybased writing workshop;
- Significant work in support of teaching: for instance, as a mentor to beginning teachers, or as an assistant in the administration of the Composition Program, the Western Pennsylvania Writing Project, or the Writing Center;
- Demonstrated ability as a writing tutor in the Writing Center, in other university support services, or in afterschool programs for children.

Portfolios characteristically include teaching materials such as syllabi, assignments, exercises, and observations by peers and faculty members. Administrative documents may include reports, proposals, newsletters, Web pages, and other materials that demonstrate the work of the position, as well as statements of evaluation. Portfolios are reviewed by a committee of the composition faculty.

Notice that students have been awarded the Graduate Certificate in Composition, Literacy, Pedagogy, and Rhetoric appears on their final transcript for the MA, MFA, or PhD degree.

Composition, Literacy and Pedagogy Certificate, MA

Graduate and Professional Degrees

Doctoral

English, PhD

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Requirements for the PhD

General Requirements. The PhD requires 72 credit hours, 41 of which must be in courses at the 2000 or 3000 level, with a minimum grade point average of 3.00. Required courses are a one-credit practicum, Introduction to Graduate Study; Seminar in Pedagogy (3 credits); two pedagogy training courses, Writing Pedagogy 1 (3 credits) and Writing Pedagogy 2 (3 credits); a PhD Writing Workshop (3 credits); and a one-credit professional development practicum. Additionally, three core courses in at least two programs of the department (Composition, Film, and Literature) are required. The remaining credits are earned through elective seminars, independent studies in preparation of the PhD project and dissertation research credits. PhD candidates must fulfill a language requirement by demonstrating reading knowledge of two languages other than English, advanced study in one language other than English, or beginning knowledge of a new language.

Earning the MA. PhD students may elect to earn an MA as they progress in the PhD program, although they are not required to do so. If they wish to earn the MA, they must successfully complete the two core courses listed above with a grade of B or better, and either complete the master's research paper (outlined above under "Requirements for the MA Degree"), or successfully pass their PhD comprehensive examinations. Application for the MA must be made before the end of the student's fourth year in the PhD program.

The Comprehensive Exams. The University requires a comprehensive examination prior to initiating dissertation work. The exam is meant to demonstrate a breadth of knowledge in tandem with the ability to work on a focused area or an interrelated set of questions. In English, the PhD comprehensive exam process requires composing a preliminary exam proposal and bibliography; expanding the preliminary proposal into an annotated bibliography with a synthesizing introduction; a written exam responding to questions posed by a student's faculty committee; and an oral exam. Through this process, students demonstrate expertise in disciplinary subfields relevant to their research area, with an eye to both historical/genealogical and theoretical exploration defined by a set of questions or problems. The exam bibliography and synthesis should be useful for both dissertation work and for teaching after PhD completion.

The Dissertation. After students have passed their comprehensive examinations, they will register for independent study credits in order to write a prospectus for the dissertation. The student should choose a dissertation director and a committee at this time. Once a dissertation committee has been formed, the student will submit a formal dissertation prospectus to them for approval. When the dissertation committee has approved the prospectus, the dissertation director and student will submit an application for admission to doctoral candidacy. Once students have passed their dissertation prospectus and have been admitted to doctoral candidacy, they should begin the work of researching and writing the dissertation. Normally students will complete the dissertation during the fifth year in the program. Once the dissertation is completed, students must successfully defend their dissertation in order to earn the PhD.

Master's

English, MA

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Requirements for the MA

General Requirements. The MA requires the completion of 30 credit hours, including a one-credit Introduction to Graduate Studies and a core course for one of the programs of the PhD (in Composition, Film, or Literature). MA students must complete a master's research paper in an elective course of their choice (see below).

Master's Research Paper. All MA students must also complete a master's research paper in an elective course of their choice. The master's research paper should be of professional article length, defined by the Modern Language Association (MLA) as 6,000-8,000 words not including documentation. Students must engage in primary research beyond course readings and/or what is ordinarily required for a term paper, and the master's research paper must reflect that research. Students must consult an instructor, and receive the instructor's approval, no later than the end of the add/drop period if they wish to write their master's research paper for that instructor's seminar. The instructor of the seminar will be solely responsible for evaluating the paper. The master's research paper must be completed no later than the last day of the spring term of a student's second year, or fourth term in residence. In order for the master's research paper to count toward earning the MA, a student must receive a grade of B or better on the paper and as a final grade for the course in which the paper was completed.

English, MFA

Graduate and Professional Degrees

The MFA in English allows students to specialize in one of three areas of concentration in creative writing: poetry, fiction, and nonfiction. The degree also integrates courses in literature and literary history.

Requirements for the MFA

General Requirements. The MFA requires 36 credit hours with a minimum grade point average of 3.0, plus the completion of a final manuscript in the student's major area of concentration. The degree requires a combination of writing workshops, graduate-level readings courses, and English courses outside the Writing Program (in Composition & Rhetoric, Literature, or Film). Further information about requirements can be found in the English Department's graduate handbook. There are no language requirements for MFA students.

The Final Manuscript. The final manuscript is equivalent to the MA comprehensive examination. It consists of a book-length manuscript of the student's best work in the area of major interest - 150 pages (typed, double-spaced, standard format) for fiction and nonfiction, and 50 pages for poetry. The manuscript shall be submitted to a committee of three English graduate faculty members, at least two of which must be writing graduate faculty, and chaired by a faculty member in the student's primary genre. There is an option to have a fourth, external member, either from another department at the University of Pittsburgh or at another University. The chair of the manuscript committee is assigned to the student, but the student may choose the remaining members of their committee. The Writing Program Director must approve the student's committee composition.

Film and Media Studies Program

The Film and Media Studies Program is an interdisciplinary program offering courses in history, aesthetics, theory, and critical studies. The Film and Media Studies Program offers the following graduate degrees and certificates:

PhD in Film and Media Studies (in conjunction with five Associated Departments)
MA Certificate in Film and Media Studies
PhD Certificate in Film and Media Studies

Contact Information

Director of Graduate Studies: Professor Robert Clift
E-mail: robertclift@pitt.edu

Graduate Administrator: Jesse Daugherty
412-624-6549
E-mail: JED110@pitt.edu

www.filmandmedia.pitt.edu

Admissions

Applicants will submit an application to the Film and Media Studies PhD program, identifying an Area of Concentration from the list of associated departments (e.g. English, French, Hispanic, History of Art and Architecture, and Slavic). The name of the Associated Department will appear on the student's transcript when the degree is granted. The application will be vetted simultaneously by Film and Media Studies and the Associated Department. Only one application fee is required.

Students who have already entered graduate programs in associated departments are welcome to apply to the Film and Media Studies PhD through the normal application process. If accepted, they are eligible to transfer a maximum of 24 credits towards the Film and Media Studies PhD degree requirements and can petition to waive required courses that have been fulfilled, following normal University, School, and Program regulations.

Students who wish to enroll in the graduate certificate programs in Film and Media Studies (whether MA or PhD) must be matriculated for a graduate degree in a department of the Dietrich School of Arts and Sciences or in another school within the University. Students interested in pursuing a Film and Media Studies certificate at any point in their career may do so by filing the appropriate form with the Film and Media Studies Program.

Affiliated Faculty

Certificate

Film and Media Studies Doctoral Certificate

Eligibility

Students engaged in an A&S doctoral program at Pitt can enroll in the Film and Media Studies Doctoral Certificate Program at any point in the course of their study by submitting a completed Graduate Certificate Application Form to filmandmedia@pitt.edu or 454 Cathedral of Learning. The doctoral certificate is awarded only after the completion of all degree requirements for the PhD in the student's home department, school, or program.

Course Work

Six film and Media Studies courses (18 credits) including:

Core Course:

- ENGFLM 2451 - FILM HISTORY/THEORY or
- ENGFLM 2452 - FILM HISTORY/THEORY 2

Five Electives:

- At least two courses must be outside the student's home department
- Can include a second core course

Research Paper

The PhD Certificate requires a research paper be written in the field of Film and Media Studies (approx. 25-30 pp. in length) and evaluated by a Film and Media Studies faculty member who teaches one of the seminars that the student takes for his/her Certificate requirements.

The procedure for so doing is as follows:
At the beginning of a Film and Media Studies course that counts for the Certificate the student will inform the faculty member teaching the course that he/she wishes for his/her seminar to count as well as the official Research Paper for the Certificate Program. The faculty member will then require of the student something more ambitious than the normal seminar paper (see Guidelines for Certificate Research Paper below) and meet with the student during the term to advise him/her.

At the end of the course the student has two options: (1) submit the Certificate Research Paper for both the course and Certificate requirements or (2) submit a paper that satisfies the course requirements and continue to work on the expanded Certificate Research Paper over the following semester. The paper should be turned in for the Certificate requirement no later than at the end of the semester following the course in which the paper was conceived.

Guidelines for Certificate Research Paper

The research paper that qualifies for the MA and/or PhD Certificates in Film and Media Studies should go beyond the average seminar paper for a course, though (as per above) it should begin as such a seminar paper in conjunction with a member of the Film and Media Studies faculty. In essence, the research paper should aspire to be one publishable in an academic journal (though there is no requirement that it actually be published).

This paper might go beyond a standard seminar paper in any or several of the following ways: (1) have a demonstrated original point of view or approach to a given topic; (2) articulate a clear and demonstrated argument about a topic that clarifies important issues in media studies; (3) involve substantial research with primary sources; (4) forge new theoretical or historical terrain; (5) consider hitherto ignored media texts. It will be up to the Film and Media Studies instructor/advisor to determine how the paper might meet some of the above standards.

Additional Conditions

- Only two directed study courses (supervised by Film and Media faculty) can be counted toward the doctoral certificate.
- All courses must be passed with a B or higher.
- Students should notify the program director of their intention to file for graduation at the beginning of their final semester.

Film and Media Studies Master's Certificate

Eligibility

Students engaged in an A&S master's program at Pitt can enroll in the Film and Media Studies Master's Certificate Program at any point in the course of their study by submitting a completed Graduate Certificate Application Form to filmandmedia@pitt.edu or 454 Cathedral of Learning. The master's certificate is awarded only after the completion of all degree requirements for the MA in the student's home department, school, or program.

Course Work

Four Film and Media Studies courses (12 credits) including:

Core Course:

- ENGFLM 2451 - FILM HISTORY/THEORY or
- ENGFLM 2452 - FILM HISTORY/THEORY 2

Three Electives

- One outside home department
- Can include a second core course

Research Paper

The MA Certificate requires a research paper in the field of Film and Media Studies (approx. 25-30 pp. in length) to be written for and evaluated by a Film and Media Studies faculty member who teaches one of the seminars that the student takes for his/her Certificate requirements.

The procedure is as follows:
At the beginning of a Film and Media Studies course that counts for the Certificate, the student will inform the faculty member teaching the course that he/she wishes for his/her seminar to count as the official Research Paper for the Certificate Program. The faculty member will then require something more ambitious than the normal seminar paper (see Guidelines for Certificate Research Paper below) and meet with the student during the term to advise him/her.

At the end of the course the student has two options: (1) submit the Certificate Research Paper for both the course and Certificate requirements or (2) submit a paper that satisfies the course requirements and continue to work on the expanded Certificate Research Paper

over the following semester. The paper should be turned in for the Certificate requirement no later than the end of the semester following the course in which the paper was conceived.

Guidelines for Certificate Research Paper

The research paper that qualifies for the MA and/or PhD Certificates in Film and Media Studies should go beyond the average seminar paper for a course, though (as per above) it should begin as such a seminar paper in conjunction with a member of the Film Studies faculty. In essence, the research paper should aspire to be one publishable in an academic journal (though there is no requirement that it actually be published). Such a paper might go beyond a standard seminar paper in any or several of the following ways:

1. Have a demonstrated original point of view or approach to a given topic
2. Articulate a clear and demonstrated argument about a topic that clarifies important issues in media studies
3. Involve substantial research with primary sources
4. Forge new theoretical or historical terrain
5. Consider hitherto ignored media texts.

It will be up to the Film and Media Studies instructor/advisor to determine how the paper might meet some of the above standards.

Additional Conditions

- Only one directed study course (supervised by Film and Media Studies faculty) can be counted toward the master's certificate.
- All courses must be passed with a B or higher.
- Students should notify the program director of their intention to file for graduation at the beginning of their final semester.

Doctoral

Film and Media Studies, PhD

Requirements for the PhD

General Requirements. The PhD requires 72 credits. All Film and Media Studies PhD students will be required to fulfill the requirements of their associated department as well as the Film and Media Studies requirements. These required courses will bring together students from all six associated departments so that they will have an opportunity to interact with each other. This core of required courses will also ensure that students have a common and coherent thread in their Film and Media Studies doctoral experience. PhD students must take three core courses in Film and Media Studies (7 credits): A two-course (6 credit) sequence taken in any order (Film History/Theory I ENGFLM 2451 and Film History/Theory II ENGFLM 2452) and a one credit Film Studies Proseminar FILMG 2905, as well as four elective Film and Media Studies courses (in any department). Of the total six required seminars, the student must take at least two courses taught by a member of the faculty outside of the student's associated department. These courses can include the two required core courses as well as any of the four electives. Language and teaching requirements are determined by associated departments.

Comprehensive Exam. The comprehensive exam will be taken in the student's associated department. While the exam structure will differ from department to department, in all cases:

- one component (or more) of the exam will focus on Film and Media Studies
- a second component of the exam will focus on the departmental field (including its relation to cinema)
- at least one member of the exam committee in the student's associated department will be a member of the graduate faculty in Film and Media Studies.

The Dissertation. The dissertation will be completed in the associated department and must involve film and/or media studies as subject matter incorporated with the student's area of concentration (as determined by the dissertation director). The chair of the dissertation committee will be a graduate faculty member in the student's associated department who is also member of the interdisciplinary Film and Media Studies graduate faculty. The external member of the committee will be a member of the Film and Media Studies graduate faculty from outside the associated department.

Courses

Film and Media Studies

- ENGFLM 2453 - FILM HISTORY AND THE NON-THEATRICAL
- ENGFLM 2456 - FILM STUDIES AS A DISCIPLINE
- ENGFLM 2464 - LOW LIGHT: NARRATIVE AESTHETICS OF FILMING DARKNESS
- ENGFLM 2493 - MEDIA / ECOLOGY
- ENGFLM 2705 - THE (RE-) ANIMATED HUMAN
- FMST 2151 / ENGFLM 2451 - FILM HISTORY/THEORY 1
- FMST 2152 / ENGFLM 2452 FILM HISTORY/THEORY 2
- FMST 2153 - PROSEMINAR IN FILM AND MEDIA STUDIES
- FMST 2155 / ENGFLM 2455 - FILM AND MEDIA HISTORIOGRAPHY
- FMST 2220 - NEW CHINESE CINEMA
- FMST 2235 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- FMST 2327 - RUSSIAN FILM SYMPOSIUM
- FMST 2341 - CONTEMPORARY LATIN AMERICAN FILM
- FMST 2411 - FILM AND LITERATURE
- FMST 2415 / ENGFLM 2500 - WOMEN DIRECTORS IN FILM AND TELEVISION
- FMST 2416 / ENGFLM 2467- CINEMA AND TRAUMA
- FMST 2417 / ENGFLM 2661 - QUEER THEORY, QUEER CINEMA
- FMST 2421 / ENGFLM 2710 - GLOBAL FILM STARDOM
- FMST 2422 / ENGFLM 2496 - MEDIA AND MOBILITY
- FMST 2425 / ENGFLM 2425 - BLACK TIME: AFROFUTURISM, AFROPESSIMISM, AND BEYOND
- FMST 2440 / ENGFLM 2491 - FILM SOUND: HISTORY, THEORY, AESTHETICS
- FMST 2485 / ENGFLM 2457 - ETHNOGRAPHIC FILM AND MEDIA
- FMST 2508 - TELEVISION STUDIES
- FMST 2510 / ENGFLM 2700 - ANIMATION THEORY
- FMST 2520 - FILM COMEDY
- FMST 2524 / ENGFLM 2485 - GENRE AND FILM MELODRAMA
- FMST 2525 / ENGFLM 2695 - HORROR FILM
- FMST 2526 / ENGFLM 2480 - WAR AND CINEMA
- FMST 2540 / ENGFLM 2000 - ESSAY FILM/DOCUMENTARY FILM
- FMST 2542 / ENGFLM 2459 - DOCUMENTARY THEORY & PRACTICE
- FMST 2570 / ENGFLM 2494 - KEY CONCEPTS IN NEW MEDIA
- FMST 2660 / ENGFLM 2660 - SEXUAL REPRESENTATION AND CINEMA
- FMST 2760 - THEORY/TECHNOLOGY/MEDIA FROM PLATO TO VIDEO GAMES
- FMST 2902 - DIRECTED STUDY FOR THE MA
- FMST 2907 - INTERNSHIP IN FILM AND MEDIA
- FMST 3902 - DIRECTED STUDY FOR THE PHD

Department of French and Italian

The Department of French and Italian offers programs leading to the MA in Italian, a PhD in French with an MA *en route* and the PhD in French. Students may also apply for the PhD in Film Studies with a Concentration in French (granted by Film Studies). The following tracks are offered at the MA level in French and Italian:

French
Italian

The following tracks are offered at the PhD level in French:

French
Film and Media Studies with a Concentration in French

In addition, the department encourages students to participate in various interdisciplinary programs, such as African Studies; Cultural Studies; Digital Studies and Methods; European Union Studies; Film and Media Studies; Gender, Sexuality, and Women's Studies; Global Studies, Medieval/Renaissance Studies, and West European Studies, where students may work toward a graduate certificate in conjunction with their degree.

Graduate Degree Programs

Admissions

Students accepted into the graduate program must meet the following criteria:

- They should have completed an undergraduate major (or equivalent) in the language, literature, media, and culture they propose to study at the graduate level or substantial coursework in a related field.
- They must be able to enroll in courses that are taught entirely in French and/or Italian. This presupposes a high level of skill in speaking, reading, and writing in their major language.
- It is recommended that incoming students have a reading knowledge of German, a second Romance language, or Latin.

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a personal statement, and samples of their writing in the target second language and in English. International applicants whose first language is not English are required to submit either the TOEFL: a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section (TOEFL scores submitted must not be more than two years old), IELTS: score of 7.0, with at least 6.5 in each of its four sections. IELTS scores submitted must not be more than two years old, or Duolingo English Test: score of 120. Duolingo scores submitted must not be more than two years old. For a complete list of required items for admission, go to https://www.frenchanditalian.pitt.edu/graduate/admissions.

Applications for fall term admission will be accepted until April 15. For funding consideration, applications must be completed by January 15 for French and February 1 for Italian. The department admits students only for the fall term.

Faculty

https://www.frenchanditalian.pitt.edu/people

Doctoral

Film and Media Studies with a Concentration in French

The PhD in Film Studies at the University of Pittsburgh is an interdisciplinary and interdepartmental degree that stresses the history, theory, and aesthetics of international cinema, video, television, and new media. While the student will earn a PhD in Film Studies (granted by the Film Studies Program), he or she will also be a full member of French, fulfilling all requirements for the PhD in French. French will appear as an Area of Concentration on the student's transcript. Thus, the student graduating with a PhD in Film Studies will be doubly qualified: in film studies as well as in French Studies.

Students must fulfill all of the requirements for the PhD in French (listed above) and the following additional requirements:

Core Courses in Film Studies (7 credits):

a two-course (6 credit) sequence taken in any order:

- ENGFLM 2451 - FILM HISTORY/THEORY
- ENGFLM 2452 - FILM HISTORY/THEORY 2
- 1 credit Film Studies Proseminar ENGFLM 2905

Note:

This will not count toward seminar credit within the French program and will be given on aSatisfactory/Unsatisfactory basis.

Electives in Film Studies (12 credits):

- Four elective Film Studies courses (in any department).

Note:

Of the total six required seminars, the student must take at least two courses taught by a member of the faculty outside of French. These courses can include the two required core courses as well as any of the four electives.

Additional Requirements

*Teaching Practicum***:** All Film PhD students are required to complete a teaching practicum as part of their academic requirements for at least one film course. If the Department of French and Italian does not offer a film course or does not have available opportunities in a film course, students will complete their teaching practicum in the undergraduate course *Introduction to Film* (or another comparable introductory course developed in the future).

Credit Requirement: Minimum of 72 hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching or dissertation work as detailed elsewhere in this bulletin.

Preliminary Examination/Evaluation: The two required core courses in Film Studies (Film History/Theory I and II) will serve as the preliminary exam in Film Studies. Successful completion of these two classes with a grade of B or better will constitute passing the preliminary examination.

To maintain funding, students must also pass the required preliminary evaluation conducted by the French faculty at the end of the first year of enrollment.

Comprehensive Examination: The Comprehensive Exam must contain at least one component focusing on Film Studies, and at least one component on French Studies (including its relation to cinema).

At least one member of the exam committee will be a member of the graduate faculty in Film Studies.

Dissertation Committee: The dissertation will be completed in the Department of French and Italian and must involve film and/or media studies as subject matter incorporated with French Studies (as determined by the dissertation director).

The Chair of the dissertation committee will be a graduate faculty member in the Department of French and Italian who is also a member of the interdisciplinary Film Studies graduate faculty. The external member of the committee will be a member of the Film Studies graduate faculty from outside the Department of French and Italian. It is expected that students will have been exposed to these faculty members in taking the required Film Studies courses (taught by the interdisciplinary Film Studies faculty), elective Film Studies courses (outside the student's associated Department), and in the Proseminar (taught by the interdisciplinary faculty).

French, PhD

Requirements for the PhD

Before students may be considered for admission to candidacy for the PhD, they must complete successfully a minimum of eight 2000-level courses (24 credits) beyond the MA level, five of which must be in French (a minimum of 72 credits). In addition, the candidates must present a *précis* of their emerging dissertation research area at the end of their first year, satisfy PhD language requirements, and pass written and oral comprehensive examinations. Upon admission to candidacy, the candidate will write and defend a doctoral dissertation. The course work must include:

FR 2710 (if not taken at the MA level) and an additional course in literary or cultural theory.

With the advisor's consent students are free to take some of the additional required courses in other departments. Students in French are encouraged to pursue certification in one of the various programs offered by the University (African Studies, Cultural Studies, European Union Studies, Film Studies, Gender, Sexuality and Women's Studies, Global Studies, Medieval and Renaissance Studies, West European Studies). However, only three exterior courses may count towards the degree in French.

Dissertation Committee

The dissertation committee should include one faculty member with expertise in each of the two major periods/areas.

Credit Requirement: Minimum of 72 hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching or dissertation work as detailed elsewhere in this bulletin.

Preliminary Examination/Evaluation: Students in the PhD program will undergo a preliminary evaluation at the end of the first full year of residence. The written *précis* will serve as the preliminary evaluation.

Comprehensive Examination: Students must take written and oral comprehensive examinations on a topic with historical coverage and an topic in the area of specialization. Candidates will work with a faculty advisor and a committee to prepare the reading list in the areas chosen. The purpose of the comprehensive examinations is to ensure that the candidate can develop a relevant and original approach to the study of French and Francophone literature, media, and culture. These examinations should be passed at least eight months (two terms) before the degree is to be awarded. Students may schedule their examinations only after passing all preliminary examinations and language and other requirements..

Prospectus Review: As soon as the comprehensive examinations have been passed, students and their advisor should agree on a dissertation committee including at least three members of the department (including the director) and one member chosen from another department in an area of expertise relevant to the dissertation topic. Usually during the third year, but in no case later than the first term of their fourth year, students must submit a prospectus to the director for circulation among the committee members. The scope, size, organization, and format of the prospectus are specified in a separate departmental document, which PhD students should receive or request as soon as they pass their comprehensive examinations.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Joint Degree

French, MA/PhD

Requirements for PhD with MA en route

This degree is intended for students who wish to pursue the Doctor of Philosophy (PhD) degree in French but who do not already hold an MA in this field or in a closely-related discipline. Students must first successfully complete the requirements for the MA in French listed below, normally within their first two years of full-time enrollment. Students doing the PhD with the MA en route will be awarded an MA degree at the completion of these requirements:

- A minimum of ten one-term courses is required, for a total of 30 credit hours. These courses will include FR 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY: LANGUAGE, GENDER, HISTORY, FR 2903 - MA RESEARCH PAPER DIRECTED STUDY, and FR 2910 - COMPREHENSIVE EXAMINATION MA.
- Comprehensive examination: the comprehensive examination is a written examination and is given in two sessions on separate days during the fourth semester of the MA en route program. An oral interview is held after completion of the written exams to discuss the results of the exams and the MA research paper.
- Seminar Paper: each candidate must revise a paper written for a seminar under the guidance of the instructor of that seminar.
- Second language: candidates must demonstrate a reading knowledge of a second Romance Language, or German, or Latin.

To ensure the acquisition of a broad knowledge of French-language literature, media, and culture, candidates must take at least one seminar in each of the following four areas: Middle Ages/Renaissance, Early Modern, Post-Revolution/Modern, and Global South) before they reach candidacy.

Before students may be considered for admission to candidacy for the PhD, they must successfully complete a minimum of five 2000-level courses (15 credits) beyond the MA, two of which must be in French. In addition, the candidate must pass written and oral comprehensive examinations. The PhD language requirement will normally be satisfied at the MA level. The eight courses must include:

1. FR 2710 (if not taken at the MA level) and an additional course in literary or cultural theory.
2. With the adviser's consent, students are free to take some of the additional required courses in other departments. Students in French are encouraged to pursue certification in one of the various programs offered by the University (African Studies, Cultural Studies, European Union Studies, Film Studies, Gender, Sexuality, and Women's Studies, Global Studies, Medieval and Renaissance Studies, West European Studies). However, only three exterior courses may count towards the degree in French.

Upon admission to candidacy, the candidate will write and defend a doctoral dissertation.

Master's

Italian, MA

Requirements for the MA in Italian

A minimum of ten one-term courses is required. These courses will includeITAL 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY: LANGUAGE, GENDER, HISTORY - ITAL 2903 - MA FINAL PROJECT DIRECTED STUDY, and ITAL

2910 - COMPREHENSIVE EXAMINATION MA . Other program requirements may require enrollment in ITAL 2970 - TEACHING PRACTICUM, though this does not count toward the required ten. Candidates must also fulfill the following additional requirements:

- Comprehensive Examination
  - The MA comprehensive examination is a two-component written examination consisting of a General Knowledge and a Field Exam and is given in on separate days during the second year of the MA program; an oral interview is held after completion of the exams to discuss the comprehensive exam results, as well as the student's final project.
- Final Project
  - Each candidate must complete a final faculty-guided project, selected by the student in consultation with the Italian faculty, and in alignment with their future plans beyond completion of the MA in Italian. Students may select from (but are not limited to) the following options:

• Presentation on previously executed teaching demo (cluster or module consisting of multiple lessons, planned in consultation with appropriate faculty)

• Syllabus development

• Podcast

• DH project

• Annotated translation

• Conference paper (with reflections on expansion)

• Publishable article

- Second Language
  - Candidates must demonstrate a reading knowledge of Latin or German or a Romance language other than Italian. Other languages will be considered upon petition.
- Proposal/Overview (N/A)
- Dissertation and Final Examination (N/A)

Gender, Sexuality, and Women's Studies Program

The Gender, Sexuality, and Women's Studies Program offers graduate certificates in Gender, Sexuality, and Women's Studies at both the master's and doctoral levels. The interdisciplinary curriculum draws upon faculty expertise in the arts, humanities, and social sciences; and in business, law, library and information science, nursing, medicine, public and international affairs, public health, and social work. The program provides opportunities for students who wish to focus their study on women, gender, and sexuality or who wish to add these areas as a subspecialty.

Admissions

The graduate certificate programs admit only students already enrolled in other graduate degree programs at Pitt. Interested students can find information about the certificate programs at https://www.gsws.pitt.edu/academics/graduate-studies and should contact the program Director for advising.

Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Gender, Sexuality, and Women's Studies Doctoral Certificate

Requirements for Doctoral Certificate

The doctoral-level certificate requires 18 credits as detailed below:

- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- At least two other courses must be outside the candidate's home department, including at least one course with a GSWS course number
- At least three courses in one field, determined in consultation with the program director
- No more than 2 courses may be Directed Study

Note:

All candidates for graduate certificates must maintain a 3.00 average in courses for the certificate and submit a research paper to be read by at least one faculty member affiliated with the program. Students should notify the program director of their intention to graduate at the beginning of their final term. Students not in the Dietrich School must apply to graduate in A&S Graduate Studies. This certificate program is available only to students who are enrolled in other graduate degree programs at the University of Pittsburgh.

Gender, Sexuality, and Women's Studies Master's Certificate

Requirements for Master's-Level Certificate

The master's-level certificate requires 12 credits as detailed below:

- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- At least one other course must be outside the candidate's home department
- At least two of the total courses must be in one field, determined in consultation with the program director
- No more than 1 course may be a Directed Study

Note:

All candidates for graduate certificates must maintain a 3.00 average in courses for the certificate and submit a research paper to be read by at least one faculty member affiliated with the program. Students should notify the program director of their intention to graduate at the beginning of their final term. Students not in the Dietrich School must apply to graduate in A&S Graduate Studies. This certificate program is available only to students who are enrolled in other graduate degree programs at the University of Pittsburgh.

Department of Geology and Environmental Science

The department offers programs that lead to the MS or PhD in Geology and Environmental Science and a Professional MS in Geographical Information Systems and Remote Sensing.. The principal objective of the graduate programs is to provide a broad and strong foundation upon which students may base careers. The PhD program is designed to educate scientists for basic or applied research and teaching. Graduate research may involve specialization in geology, geochemistry, geophysics, planetary science, and environmental science.

www.geology.pitt.edu

Research and Facilities

Please visit www.geology.pitt.edu to find out more about research and analytical facilities available in the Department of Geology and Environmental Science

Admissions

Prospective graduate students must meet Dietrich School of Arts and Sciences requirements for entrance into graduate programs.

Doctoral

Geology and Environmental Science, PhD

Students in the PhD program have opportunities to participate in research programs encompassing many fields of current interest in geology, geochemistry, volcanology, geographic information systems (GIS), remote sensing, planetary geology, paleoclimatology, hydrology, and environmental science. In general, the research is interdisciplinary, collaborative, and employs techniques such as traditional field-based studies, advanced geochemical analytical work, sophisticated remote sensing and GIS analysis, and advanced computer modeling of natural systems. Many students enter the program with an undergraduate or MS degree in the geosciences; however, students with degrees in other natural sciences or in engineering are often admitted.

Requirements for the PhD

The minimum course requirement for the PhD degree is seventy-two (72) credits. A minimum of twenty-four (24) credits must be from formal courses and at least eighteen (18) of the credits must be taken within the Department of Geology and Environmental Science. Up to thirty (30) credits may be accepted from a Master of Science degree or graduate study toward the PhD from another institution. No course numbered below 2000 may be applied toward graduation requirements. A minimum grade point average of 3.0 must be maintained for all formal courses taken. Students with full graduate status will be placed on probation if the cumulative grade point average falls below the minimum grade point level. Ph.D. Students admitted to the graduate program take a suite of six courses in their first two years in residence

that constitute the Preliminary Examination. Students will be considered to pass the Preliminary Exam when they have achieved a grade of B or better in each of the courses.

A graduate student seeking the PhD degree must complete a Comprehensive Overview Examination. The written and oral comprehensive overview exams must be taken before the 7th semester of residence in the Ph.D. program, typically during third year. The written exam (i.e., the proposal or manuscript) must be passed before the oral exam. After passing both written and oral examinations (as well as the requirements of the preliminary exam), the student is admitted to "Ph.D. candidacy." Therefore, it is to the student's advantage to complete all requirements as soon as possible. However, the student does not need to complete all degree plan classes before the comprehensive overview exams. In particular, examining committees can require additional course work be taken as an outcome of the oral comprehensive overview exam.

Each Ph.D. candidate must prepare a dissertation demonstrating successful completion of the research project as well as competency in the methods and techniques of scientific investigation in the field of her/his area of specialization. The dissertation must be clearly, logically, and carefully written. The Major Advisor must approve of the content, format, and grammar prior to submission of the dissertation to the Dissertation Committee. The dissertation should contain an introductory statement, including appropriate justification of the research, a description of the methods and observations of the investigation, evaluation of the significance and meaning of the results, and a final summary.

Each Ph.D. candidate must formally defend her/his submitted dissertation with a public presentation followed by a meeting with the Dissertation Committee. The dissertation will be formally accepted or rejected by the Dissertation Committee at the defense and the committee will decide what, if any, revisions should be made. A report on the results of the defense and on acceptance of the dissertation, signed by each member of the Dissertation Committee, must be submitted to the Dean of Graduate Studies for approval.

Each Ph.D. student must submit at least one manuscript to a peer-review journal prior to graduation and present research results at both a departmental colloquium and at a meeting of a national or international scientific organization.

Complete descriptions of the most recent degree requirements are available at www.geology.pitt.edu.

Master's

Geographical Information Systems & Remote Sensing, MS

Curriculum & Course Information:

General Information: The GIS/RS Professional-M.S. program in the Department of Geology & Environmental Science is a multidisciplinary, multi-departmental, non-research degree. Notionally, designed to be completed in two academic years (plus one summer), the program length can be changed to slightly shorter or longer depending on the student's work limitations. The required courses are centered in the Geology and Environmental Science Department and focus on GIS and RS core proficiencies. Students are also required to take at least one course in the Schools of Business, Law, and Information Sciences. A large degree of flexibility is designed into the 41 credit program so that the student can tailor their coursework to fit specific future career goals, personal interests, and time constraints of work/family life.

First Semester:

Skill Sets: GIS and Remote Sensing fundamental principles & software use; communication proficiency; exposure to geospatial professionals

Total Credits: 10

Second Semester:

Skill Sets: advanced GIS/RS proficiency; introduction to computer programming

Total Credits: 9

Summer Semester:

Skill Sets: work experience utilizing geospatial analysis tools; compilation of digital dossier; oral/written presentation experience

Total Credits: 4

Third Semester:

Skill Sets: statistical data analysis; methodology of information science; introduction to business administration

Total Credits: 9

Fourth Semester:

Skill Sets: advanced GIS/RS proficiency; awareness of comparative law; personalized elective expertise; data mining & database management

Total Credits: 9

Geology and Environmental Science, MS

Students in the MS program have opportunities to participate in research programs encompassing many fields of current interest in geology, geochemistry, volcanology, geographic information systems (GIS), remote sensing, planetary geology, paleoclimatology, hydrology, and environmental science. In general, the research is interdisciplinary, collaborative, and employs techniques such as traditional field-based studies, advanced geochemical analytical work, sophisticated remote sensing and GIS analysis, and advanced computer modeling of natural systems. many students enter the program with an undergraduate degree in the geosciences; however, students with degrees in other natural sciences or in engineering are often admitted.

Requirements for the Master's Degree

The minimum course requirement for the MS degree is thirty (30) credits beyond the baccalaureate. A minimum of twelve (12) credits must be from formal courses within the Department of Geology and Environmental Science numbered 2000 or higher. Each MS candidate prepares a thesis demonstrating successful completion of the research project as well as competency in the methods and techniques of scientific investigation in the field of the student's area of specialization. The thesis should serve as a source of publishable material, and all MS students must present research results at a meeting of a national or international scientific organization. Each MS student publicly defends their thesis before a Thesis Committee consisting of at least three faculty members from the Department of Geology and Environmental Science. Complete descriptions of the most recent degree requirements are available at www.geology.pitt.edu.

Department of German

**German is currently not accepting graduate applications.*

The Department of German offers a PhD program that includes the MA degree as a required step toward the PhD. The program trains future scholars in German Studies and prepares them to be competitive on the national job market. It encourages interdisciplinary work and students are required to pursue a certificate or related area in programs such as Cultural Studies, Film Studies, Women Studies, European Studies, or in another related area.

Contact Information

Director of Graduate Studies: Randall Halle
412-648-2614
Fax: 412-624-6318
E-mail:rhalle@pitt.edu
http://www.german.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of German, 1518 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5909. E-mail: grmndept@pitt.edu.

For more on each of the following programs, visit http://www.german.pitt.edu/graduate/.

Admissions

All applicants apply for the PhD program. Applicants should have a BA or MA in German or a related field. Students with training in related fields will be considered for full graduate status if their background in German language and culture is sufficient to succeed in graduate-level courses. For admission to the PhD, students completing their MA at the University of Pittsburgh must pass a preliminary evaluation in their final semester of study. For students entering with an MA from another institution, this evaluation takes place by the end of their first year of study at the University of Pittsburgh.

Applications should include:

- an Application Form;
- a Statement of Intent (Please describe your intellectual background, research interests, and academic goals);
- 3 Letters of Recommendation;
- Official Transcripts from all undergraduate and graduate study (non-US degrees must be accompanied by a notarized English translation);
- an audio recording (Non-native speakers should supply a recording in which they 1) speak freely about a topic and 2) read formally a passage from a literary or academic text);
- a Writing Sample (a research paper or selection from a thesis of about 20 pages that offers an example of the applicant's ability to conduct research and provide evidence of strong writing skills. It may be in either English or German.);
- TOEFL scores (Required of Foreign Students: minimum score of 550 [paper-based test] / 80 [internet-based test]) or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 6.5 (taking the academic and reading modules); and
- an Application fee of $50 (Please contact the Director of Graduate Studies if this represents a financial hardship).

Applicants are required to submit all materials for fall term admissions by January 2. Students who would like to be considered for fellowships are encouraged to submit their applications before the New Year. Applications submitted after the deadline will be considered only if space is available. Applications are submitted online at app.applyyourself.com/?id=up-as.

Faculty

http://www.german.pitt.edu/people/

Doctoral

German, PhD

Requirements for the PhD

The requirements for the PhD consist of: (1) at least 72 credits of course work, (2) a language requirement, (3) the PhD comprehensive examination, (4) the dissertation prospectus, (5) the dissertation, and (6) the completion of a certificate program or approved work in a related area. Specific details are:

- minimum 72 credits of course work, broken down as follows:
    - 30 credits from the MA
    - at least 12 seminars total (for students entering Pitt with an MA from another institution) / at least 18 seminars total (for students entering Pitt with a BA-seminars taken at the MA level count towards this requirement)
        - of these seminars, at least 6 seminars (for students with an MA from another institution) / at least 12 seminars (for students entering Pitt with a BA) should be taken in the German department.
        - at least 6 of the above seminars should be in certificate-related courses (see below).
    - at least 2/3 of the seminars taken must be taken for a letter grade;
- Language requirement: High level of oral proficiency in German (superior on OPI scale, 3 on ILR scale); reading knowledge of another language;
- Comprehensive Examination: A written examination, evaluated by a committee of 3 faculty members. Demonstrates the student's foundation in German culture from the Enlightenment to the present, as well as the student's ability to situate a specific focus within this larger context. The PhD comprehensive examination needs to be completed with an average grade of A-. The examination may be retaken only one time and needs to be retaken by the next academic term. Before completing the PhD comprehensive examination, students have to submit to their examination committee two research/seminar papers that demonstrate their scholarly potential;
- Dissertation Prospectus: 10-15 pages, submitted in the semester following the comprehensive examination. After approval by the doctoral committee, students are admitted to PhD candidacy, after which the student meets annually with the dissertation committee;
- Dissertation Defense: The dissertation must be approved by the dissertation committee after a public oral defense; and
- Completion of a certificate program or work in a related area (at least 18 credits). Approved certificates include Cultural Studies, Film Studies, and Women Studies, and West European Studies, and other related areas can be defined by the student in consultation with the Director of Graduate Studies (for example, a recently developed area of concentration is Philosophy and Literature).

Master's

German, MA

Requirements for the Master's Degree

The Master of Arts normally takes two years of study. The 30 credits include nine graduate seminars, at least six taken within the department, and a 3 credit MA project (between 35 and 50 pages long). In addition, all entering students must enroll in GER 2110 - INTRODUCTION TO LITERARY AND CULTURAL THEORY .

In addition to the satisfactory completion of courses, students must demonstrate a high level of proficiency in writing both in German and English by submitting for departmental approval at least one paper written in German and one paper written in English by the time of the preliminary evaluation. They must also demonstrate reading proficiency in an additional language by the end of their last term of study.

Department of Spanish and Portuguese

The Department of Spanish and Portuguese offers a five-year Doctor of Philosophy (PhD) with an en route Master of Arts (MA) sequence. Unlike other Spanish departments, we concentrate on Latin American Literature and Culture, including Brazil. Within that broader context, we also offer an interdisciplinary and interdepartmental PhD in film studies, and field specializations in Peninsular, Brazilian, and cultural studies.

Candidates for both the MA/PhD can also earn certificates in Latin American Studies, Cultural Studies, Film Studies, Global Studies and Gender, Sexuality, and Women Studies.

Contact Information

Department Chair: Chris Bonneau
Main Office: 1309 Cathedral of Learning
412-624-2709
Fax: 412-624-8505
E-mail: Cwb7@pitt.edu
https://www.spanport.pitt.edu/graduate

For additional information regarding the department's graduate program, or responses to questions that are not answered elsewhere, please contact the University of Pittsburgh's Department of Hispanic Languages and Literatures' Graduate Administrator:
Jennifer Berkebile
JES379@pitt.edu
(412) 624-5227
1301A CL

Admissions

Applicants must submit an online application, application fee of $75, transcripts of all college-level work (along with notarized translations into English, if admitted), three letters of recommendation, a statement of academic goals, and a 15-30-page writing sample (in English, Spanish, or Portuguese; if submitting the sample in English, please also send us a short sample in Spanish).

Applicants whose native language is not English and who have not already completed a degree program in a U.S. college or university are required to submit either the TOEFL (administered by the Educational Testing Service) with a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. TOEFL scores submitted must not be more than two years old. The IELTS (administered by Cambridge University, Local Examinations Syndicate) with a minimum score of 6.5 in each of its four sections. Duolingo English Test: score of 120. Duolingo scores submitted must not be more than two years old.

Completed applications for admission in the fall term must be received no later than January 18.

Duration of the Program

It is expected that the MA/PhD program will take five years to complete. As of Fall 2005, incoming students, assuming that satisfactory academic progress is maintained, are entitled to five (5) years of support, whether or not they already have an MA degree when they enter our graduate program. However, students with an MA from another university can elect to receive only four (4) years of funding and will be entitled to transfer up to 24 credits upon successfully passing the MA Comprehensive/PhD Preliminary examinations during their fourth semester. The decision to do so must be submitted to the departmental graduate office in writing by the end of the first week of their second term in graduate program (normally first week of January).

Faculty

http://www.hispanic.pitt.edu/people/faculty

Joint Degree

Spanish and Portuguese, MA/PhD

Requirements for the PhD with En Route MA

The en route MA requires a minimum of 30 credits; 24 credits must be in substantive courses in the department, meeting major field and minor field requirements; the remaining 6 credits can consist of any combination of courses taken outside of the department (including transfer credits), a maximum of 1 Independent Reading and 1 Directed Study course.

Other requirements may include enrollment in teaching methodology and language learning to assist students new to the department, unless a waiver is obtained.

In addition to the minimum of 30 credits, during the fourth year of full-time study (or its equivalent):

- Students must complete a long paper in the department, which is graded and serves as one part of the MA Comprehensive/PhD Preliminary examination.
- Students must also sit for the two-day MA Comprehensive/PhD Preliminary examination

Including the MA-level work, a minimum of 72 credit hours must be attained for the PhD. Students who have received the en route MA and are working toward the PhD in the department must take a total of 48 credits of substantive courses in the department. The remaining 24 credits may consist of courses taken outside of the department, credits transferred from other institutions, directed study, or PhD comprehensive exam/overview. Up to a maximum of 12 credits of PhD dissertation research credits are permitted to count toward these 24 credits.

Students who enter the department with an MA in Spanish or a related field from another institution must complete 30 credits of substantive course work out of the 72 total credits required for the PhD. The remaining 42 credits can be distributed among credits transferred from the institution from which they earned their MA's (normally, up to 24 are allowed, in exchange for the fifth year of funding), courses taken in other departments at the University of Pittsburgh, directed study and PhD comprehensive exam/overview credits, and up to 12 credits of PhD dissertation research.

PhD Preliminary Exam: Students who enter the department with an MA in Spanish from another institution must pass the two-day PhD Preliminary examination in the fourth term of graduate study in the department, after which they can petition for the transfer of credits and continue on for the PhD.

Language Requirement: Candidates for the PhD degree must give evidence of their ability to read a third language (Portuguese, French, Italian, etc.) prior to presenting their dissertation proposal. The Department strongly encourages the learning of the Portuguese language.

PhD Comprehensive Exam/Dissertation Overview: After completing 60 credits of coursework and fulfilling the Portuguese requirement, students take the PhD Comprehensive exam made up of questions based on their proposal for doctoral research, which must also be defended before their proposed doctoral committee. Upon successful completion of this two-step exam process, the student is formally nominated to candidacy for the doctoral degree.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community. The dissertation must be presented in English unless prior permission is obtained for it to be presented in a language other than English.

Department of History

The Department of History, which offers the degree Doctor of Philosophy (PhD), is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. The graduate program provides training in historical research and teaching to students who wish to find careers in colleges, universities, and other settings where the skills of the historian can be used. To advance this purpose, the department encourages a climate of intellectual inquiry and active research that embraces graduate students and faculty members alike. The hallmark of the program is the high measure of independence and flexibility it allows students in shaping a curriculum that meets their needs, within the limits of faculty expertise and available resources.

Email: mgobat@pitt.edu

Director of Graduate Studies: Niklas Frykman (niklas.frykman@pitt.edu)

Main Office: 3511 Posvar Hall

Graduate Administrator: L.J. Woolcock-Srolovic (LIW151@pitt.edu)

www.history.pitt.edu

Admissions

Admission to the graduate program in history is highly competitive. Candidates must present a career statement, a sample of their written work on a historical topic, undergraduate and/or graduate transcripts and two letters of recommendation. TOEFL, IELTS, or Duolingo scores are required of all applicants whose primary language is not English. Students interested in the graduate program should contact the graduate administrator by e-mail: L.J. Woolcock-Srolovic (LIW151@pitt.edu), or apply online at https://gradcas.liaisoncas.org/apply/.

Degree Requirements

The minimal requirements for the degrees established by the Graduate Faculty of the University and by Dietrich School of Arts & Sciences A&S Graduate Studies, as described elsewhere in this bulletin, should be read in conjunction with the specific departmental requirements for these degrees in the following sections.

Doctoral

History, PhD

The graduate program in history is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. Close cooperation with the interdisciplinary programs in Latin American Studies, Russian and East European Studies, West European Studies, and Asian Studies, coordinated under the University Center for International Studies, strengthen the international orientation of the program, with graduate students from Europe, Asia, and Latin America joining American students pursuing PhD degrees.

Requirements for the PhD

Prerequisite for admission is a Master of Arts in History or equivalent preparation (plus approval, for those previously enrolled in the department). Students entering the program with an MA from another institution must pass a preliminary examination at the end of the first year in the program. They must complete 9 credits in order to sit for the one-hour oral examination.

The coursework and comprehensive exam portion of the PhD program should take no more than one year beyond the MA. Required doctoral coursework includes successful completion post-MA of two graduate courses in History and the completion of the department pedagogy program.

Breadth Requirement: Ph.D. students entering the program with a B.A. must fulfill the Breadth Requirement by the end of their fifth year. This requirement is intended to help students think more broadly about their dissertation and intellectual trajectory as well as future career paths. It may be fulfilled as follows: a) a second foreign language; b) two skill-based courses agreed-upon with their advisor including but not limited to statistics, digital humanities, oral history/ethnography, and computer programing; c) two courses agreed-upon with their advisor that will permit students to enhance their knowledge in an interdisciplinary area including Gender, Sexuality & Women's Studies, Cultural Studies, or an area of the student's design; or d) in consultation with the DGS and their advisor, 6 credit hours or the equivalent accrued from internships and/or courses designed to enhance students' ability to utilize their professional skills in diverse career environments.

Comprehensive Exam:

For students entering with a BA, the comprehensive exam needs to take place by February 1 of their third year. At the end of their first year, students must meet with their advisor and the DGS to: a) constitute a comps committee consisting of three members, all of whom need to have Graduate Faculty status; and b) identify any coursework completed in their first year that could be included in the comps portfolio. At the end of their second year, students and their full comps committee will agree upon the contents of the comps portfolio that will form the basis of the oral exam.

Students will work with faculty members who are members of the Graduate Faculty to develop expertise in: a regional field (Asia, Europe, Latin America, or United States); and a transregional or global field defined by the student in consultation with their advisor(s). Students may fulfill this requirement in one of the following ways: a) a field in world or global history; b) a field in a transregional history such as Atlantic history or Eurasian history; or c) a thematic field with transregional scope such as gender or empire.

The portfolio will consist of: a) two to three historiographic essays in the regional field as well as a bibliography of 40-50 books; b) two to three historiographic essays in the transregional or global field as well as a bibliography of 30-40 books; and c) an annotated teachable undergraduate course syllabus that demonstrates students' ability to translate their knowledge of the historiography and recent research trends in a given field into the composition of an undergraduate course.

Students complete the comprehensive exam through an oral examination, which will take place no later than February 1 of their third year. The oral examination will be a maximum of two hours in duration and should focus on the portfolio. Students should be able to discuss the essays, the bibliographies, and the course syllabus.

Dissertation overview: After having selected a suitable dissertation topic in consultation with their advisor, students will present a written overview to their Ph.D. committee describing the purpose, scope, and method of the proposed study and the sources upon which it will be based. A PhD committee is composed of at least four members, all of whom must be members of the Graduate Faculty. There must be three graduate faculty members from the candidate's department and at least one graduate faculty member external to the candidate's department. With the acceptance of this prospectus at the overview examination and the approval of the assistant dean of graduate studies, the student is formally admitted to candidacy for the PhD.

Dissertation defense: The doctoral thesis, directed and evaluated by the student's Ph.D. committee, is expected to demonstrate the student's capacity to carry out independent, original research. Only if the dissertation is judged to demonstrate such competence, after formal defense in a final oral examination, does the department recommend the awarding of a degree.

For further details regarding the graduate program in history and the specific exam requirements, please see the latest version of the Handbook of the Graduate Program in History, which can be downloaded from the History Department Website.

Master's

History, MA

The graduate program in history is committed to training area specialists with a global perspective. Our students learn how to research, interpret, and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational, and global perspectives. Close cooperation with the interdisciplinary programs in Latin American Studies, Russian and East European Studies, West European Studies, and Asian Studies, coordinated under the University Center for International Studies, strengthen the international orientation of the program, with graduate students from Europe, Asia, and Latin America joining American students pursuing PhD degrees.

Requirements for the Master's Degree

While the History Department does not offer a terminal Master's degree, for students admitted with funding, graduate students get the Master's degree while working towards their PhD. The requirements for being awarded the Master of Arts in History should be met within two years. 30 credits are required for the degree. Students must take six credits in seminars or directed studies in transregional or global fields (the six credits may be in different transregional/global fields); and six credits in seminars or directed studies in a regional field (Asia, Europe, Latin America, or the United States). In addition, students must take three credits of graduate-level coursework outside of the discipline of history.

First Research Tool: The Master's degree requires the completion of the first research tool, which consists of reading proficiency in one foreign language. Students select, in consultation with their advisor, the language most useful to their specialization. Students are urged to complete language preparation before entering graduate school, not only to lighten their workload, but also because some seminars require the use of a second language.

Research paper: To complete their MA degree, students write a research paper of approximately 10,000 words, which is kept as part of their permanent record and is considered equivalent to a Master's thesis. This paper must be based on original research and should be potentially publishable.

MA committee: In consultation with their advisor, students create a three-person committee for their MA examination, usually chaired by their advisor. At least two of the committee members must be members of the Graduate Faculty. Before students can sit for their MA exam, the chair of the MA committee must approve the final version of the research paper.

MA examination and admission to the Ph. program: The MA examination will be a one-hour oral examination. Questions will be based on the MA research paper. At the conclusion of the examination, the committee will inform the student of its decision as to whether or not it recommends that the student be awarded the MA degree. If the student has expressed a desire to enter the PhD program, the committee will also make a determination as to whether or not it recommends admission into the PhD program. At the earliest opportunity, the MA committee's evaluation of the examination must be reported to the department, which must approve admission into the PhD program.

Department of History and Philosophy of Science

The graduate program in the history and philosophy of science offers MA and PhD degrees through a combination of coursework and dissertation research. The department also offers an area of concentration in classics, philosophy and ancient science. The department supports scholarship in the history and philosophy of general science and in history and philosophy of particular sciences. It has special strengths in the history and philosophy of physical, biological, medical, cognitive and neurosciences. See http://www.hps.pitt.edu/graduate/areas.php.

Contact Information

Department Chair: David Wallace
Main Office: 1101 Cathedral of Learning
412-624-5896
Fax: 412-624-6825
E-mail: David.wallace@pitt.edu
www.hps.pitt.edu

Admissions

Applicants for admission to the graduate program in history and philosophy of science will be expected to have a suitable undergraduate degree and to have some knowledge of the natural or social sciences. Applications are online. The deadline for completed applications is December 5. While the department awards both PhD and MA degrees, students admitted to the MA track are generally pursuing another graduate degree at the university.

Degree Requirements

The graduate program consists of a series of seminars (approximately four to six are offered each term). These range from general surveys of the field and methods of research to specialized research seminars on selected topics in history and philosophy of science. These courses are divided into three areas:

- Area 1: Core sequence: a three-term introduction at the graduate level to history and philosophy of science
- Area 2: History of science
- Area 3: Philosophy of science

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

History and Philosophy of Science, PhD

The department offers a comprehensive program of study leading to the PhD. It combines core and elective seminars with more advanced, supervised study and encourages continued study of a particular science outside the department. All periods of the history of science are supported, including ancient, and 16th century to present science; as is work in general philosophy of science (confirmation, explanation, realism, scientific change, etc.) and in the philosophy of particular sciences (biology, physics, psychology, cognitive science, medical sciences, etc.).

PhD Degree Requirements:

A minimum of 72 credits with an MA in history and philosophy of science or completion of MA requirements.

1. Further distribution of studies requirements: At least nine hours at the 2000 level, or a graduate degree from the University of Pittsburgh in one of the following:
    - Philosophy, exclusive of philosophy of science and logic
    - History, exclusive of history of science
    - A field of natural sciences, social science, mathematics, or computer science
      (courses taken toward the MA degree may be counted toward the requirement for the PhD)
2. Formal Methods Requirement: (a) Proficiency in basic symbolic logic (equivalent to PHIL 2499), and (b) further coursework, at either the upper-level undergraduate or graduate level, involving formal methods in an area approved by the DGS.
3. Satisfactory fulfillment of the comprehensive requirements, which are:
    - Core Seminar Examinations: Students must pass the end-of-term examinations in each of the Core Seminars.
    - Research papers: Students must submit a research paper in the history of science and a research paper in the philosophy of science. Both must pass at the PhD level.
4. Submission of a significant and acceptable dissertation on a topic in history and philosophy of science. Both the dissertation prospectus and dissertation must be presented and defended, the dissertation defense is open to the publi
5. All students must complete the hands-on teaching practicum.

These requirements are specific departmental requirements, in addition to the general requirements for the MA and PhD degrees laid down by the Dietrich School of Arts and Sciences.

Master's

History and Philosophy of Science, MA

MA Degree Requirements

A. Distribution-of-Studies Requirement:

1. Nine hours from Area 1 (Core Seminars).

2. Nine hours from Area 2 (History of Science).

3. Nine hours from Area 3 (Philosophy of Science).

B. Core Examination Requirement: Students must pass the end-of-term examination in each of the Core Seminars.

C. Language Requirement: Good reading knowledge of a second language besides English.

D. Research Paper Requirement: Students must submit a research paper in the history of science and a research paper in the philosophy of science. Evaluations of papers will be limited to a master's pass-fail. A master's pass on both papers is required for the M.A. degree.

D. Course Credit Requirement: A minimum of 30 credit hours at the 2000 level.

Department of History of Art and Architecture

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in the discipline from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD.

We strongly encourage applicants to explore our web site (www.haa.pitt.edu) for more information on faculty members, graduate program requirements, and the application process. Our program emphasizes learning and innovative research through our Constellations framework, which fosters faculty-student collaboration in the classroom and beyond on themes that inform the discipline's most adventurous and generative work. While our students acquire specialized knowledge of a particular art-historical subfield, they also produce conceptually ambitious and methodologically innovative research for their PhD. We urge all prospective students to contact a potential advisor (or advisors) from among our graduate faculty before applying to discuss your interests and find out more specific information about how they can be accommodated.

Contact Information

Ian A. Bennett
Graduate Administrator
E-mail: iab5@pitt.edu

Admissions

Applicants for admission must submit: an online application, copies of transcripts of all college-level work, three letters of recommendation, a personal statement outlining the applicant's intellectual and professional goals, and a sample of academic work that demonstrates the applicant's scholarly ability.

Applicants are expected to have successfully completed four courses of art or architectural history at the undergraduate level. However, exceptions can be made for other courses and competencies that provide students with a grounding in the visual and/or spatial arts.

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD. Students in coursework have opportunities to acquire additional language skills both on campus and beyond. Our program embraces global perspectives on art and architecture, and we welcome applicants who will contribute diverse language skills that are essential to this mission.

Applicants from outside the U.S. must meet University of Pittsburgh requirements for English language proficiency scores. Please consult the International Students page for Graduate Study in the Dietrich School of Arts and Sciences regarding minimum requirements on TOEFL, IELTS, and Duolingo English Test scores for admission.

Applications must be received by December 15. Applicants are notified of their status in spring, and admitted students enter the program the following fall.

Faculty

https://www.haa.pitt.edu/people/faculty

Doctoral

Film and Media Studies - History of Art and Architecture Concentration, PhD

Degree Requirements

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in history of art and architecture or film and media studies from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD. Students who have been admitted into the Film and Media Studies PhD with a concentration in History of Art and Architecture must satisfy degree requirements for both programs (for more information please visit the Film and Media Studies website).

For those entering without an MA, all graduate coursework completed in our program before conferral of the MA degree counts toward our PhD requirements. Doctoral students must complete 72 credit hours, of which 30 must be completed in the first two years for the MA. Students entering with an approved MA from another institution may transfer 24 credits; they must also complete nine graduate-level classroom (i.e. seminar or lecture) courses during their first two years in our program. Graduate students without an MA must complete three additional graduate-level classroom courses (for a total of twelve). After required classroom courses have been completed, the remaining required credits for the PhD may be fulfilled through additional coursework or independent studies directed toward comprehensive exam and prospectus preparation, and dissertation research. The final requirement for the degree is the successful defense of the dissertation.

Course work

The PhD requires a total of 72 credits.

12 graduate-level classroom courses (for students without an MA)/9 graduate-level classroom courses (for students with an approved MA) are part of this requirement. Students typically complete this requirement in the first two years. The normal course load is 3 courses per semester (9 credits). The courses must include:

- HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP and HAA 2007 - HISTORIOGRAPHY (Methods and Historiography are alternated every other fall semester and must be taken in the student's first and second year.)
- ENGFLM 2451 - FILM HISTORY/THEORY 1 and ENGFLM 2452 - FILM HISTORY/THEORY 2 (to be taken in any order).
- FILMG 2905 - PROSEMINAR IN FILM AND MEDIA STUDIES .
- Four or five HAA graduate seminars (depending on MA status)
- Three or five elective courses (depending on MA status), in HAA or in other departments

The remaining credits may be amassed through various independent study options and additional courses if necessary.

In line with the department's research Constellations, students are expected to take courses on many different historical and geographical topics, while at the same time acquiring in-depth knowledge and expertise in a specific subfield. In consultation with the student's individual advisor(s) and Director of Graduate Studies, students should select their courses with these two objectives in mind.

Languages

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD.

Certification in research languages may be achieved in the following ways:

- through passage of a departmentally administered exam.
- completion through the intermediate level (typically the third semester) of a language, taken at the University of Pittsburgh during the period of the student's graduate study, with a grade of B+ or better in the final semester.
- completion of two graduate level reading courses in a research language or the second level of a two-part tiered sequence of reading courses (e.g., German for Reading 2), taken at the University of Pittsburgh, with a grade of B+ or better in the final semester.
- completion of an accredited language immersion program, in the United States or abroad.
- certification of language qualification attained at another accredited graduate degree program.

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors. All students are strongly encouraged to be certified in both languages as early in their time in the program as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

The MA Paper and Degree

In the case of students who did not earn an approved MA degree in history of art and architecture or film and media studies at another institution prior to entering our program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA degree requires a total of 30 graduate credits including:

- HAA 2005 (Methods).
- HAA 2007 (Historiography).
- a minimum of 3 additional HAA graduate seminars.
- One graduate-level cognate course outside HAA.
- HAA 2000 Research and Thesis MA Degree (up to 6 credits).
- at least one research language certified.
- an MA paper passed by majority vote of the graduate faculty.

The MA paper is a 25-to 45-page paper with an original argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

Fourth Semester Review

In their fourth semester, all students (except for those who entered with an MA) undergo a review for continuation in the PhD program. Students submit a dossier including:

- their completed MA paper, including a one-page abstract.
- all faculty evaluations of the student's course work to date.
- a one-page form that summarizes their proposed dissertation field and lists the course requirements they have met and relevant research languages they have passed. This document must be approved and signed by the student's advisor and certified by the Director of Graduate Studies.

The graduate faculty then reviews the dossier to make sure the student's work demonstrates the ability to complete a dissertation successfully. More specifically, the faculty looks for evidence of ability to carry out original research in the student's field, to master secondary literature, to frame an original argument, and to write lucidly.

If the graduate faculty makes a positive determination, the MA is granted, and the student is officially approved to continue in the PhD program. All graduate coursework done to this date counts toward the PhD degree. A dissertation committee is named, consisting of the student's advisor and two other faculty members drawn from HAA.

If the faculty determines that the student's work does not merit continuation in the PhD program, the student may be granted a terminal MA degree providing they have met the MA requirements and the graduate faculty by majority vote deems the MA paper creditable.

Preliminary Exam

In the first semester (for students entering with an approved MA) or fifth semester (for students entering without an approved MA), the first of the student's annual PhD committee meetings is held. The student presents a three-page description of the dissertation topic, and the student and committee together decide on comprehensive exam areas and procedures. Once the student's committee reviews and approves the dissertation topic and exam areas, the "prelim" is passed.

Comprehensive Exams

Doctoral students normally take their comprehensive exams in the third or fourth year (or second or third year if they are entering with an approved MA), after they have completed their coursework requirements. While a committee member from outside the department is not required at this stage, it is recommended to have an outside member participate both in the formulation of the exam contents and in the exam evaluation. The comprehensive exams have two broad goals. The first goal is to test whether the student has sufficient knowledge of their subfield(s) of specialization to carry out the dissertation. The student should be able to articulate the state of research in their subfield(s) and conversant with current trends in scholarship. The second goal is to test whether the student has sufficient knowledge to teach one or more broadly defined areas.

Upon passing the comprehensive exams, the student prepares a dissertation prospectus that must be approved by a dissertation committee consisting of four members, including one faculty member from outside HAA.

Teaching and Mentoring Portfolio

Graduate students must produce portfolios that demonstrate their proficiency as teachers and mentors of undergraduate students to advance to candidacy. Students will develop the components of the portfolio in the context of HAA 2970 - TEACHING OF ART HISTORY. Thereafter, they should include the teaching portfolio with the materials they send to their PhD committee for their annual meetings. PhD committees give further feedback to the student as appropriate, especially as the student's thinking about pedagogy evolves and as they prepare for the job market.

Dissertation

The dissertation is an in-depth research project designed to make an original scholarly contribution to the student's subfield. Our department accepts modifications to the traditional ca. 200-page manuscript format. For example, students in our program have graduated with dissertations that include, in addition to a shorter written component, digital humanities and/or curatorially related dimensions. Ideally, students begin to focus their dissertation topic early in their graduate career, within the first two years. The MA paper can serve as part of the final dissertation. As soon as possible, students should design their curriculum to enrich and advance their dissertation project.

Once the student completes the dissertation, they must pass a defense, normally a two-hour conversation with the committee, including the external faculty member.

Time to Degree

The PhD degree is designed to take five to seven years to complete, depending on the student's subfield. Actual time to degree varies depending on many factors, including the language preparation and/or specialized skills needed to conduct dissertation research.

For more details on degree requirements, the student-advisor relationship, and other related matters, please see the HAA's Graduate Program Handbook (https://www.haa.pitt.edu/graduate/handbook-resources).

History of Art and Architecture, PhD

Degree Requirements

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in the discipline from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD.

For those entering without an MA, all graduate coursework completed in our program before conferral of the MA degree counts toward our PhD requirements. Doctoral students must complete 72 credit hours, of which 30 must be completed in the first two years for the MA. Students entering with an approved MA from another institution may transfer 24 credits; they must also complete nine graduate-level classroom (i.e. seminar or lecture) courses during their first two years in our program. Graduate students without an MA must complete three additional graduate-level classroom courses (for a total of twelve). After required classroom courses have been completed, the remaining required credits for the PhD may be fulfilled through additional coursework or independent studies directed toward comprehensive exam and prospectus preparation, and dissertation research. The final requirement for the degree is the successful defense of the dissertation.

Course work

The PhD requires a total of 72 credits.

12 graduate-level classroom courses (for students without an MA)/9 graduate-level classroom courses (for students with an approved MA) are part of this requirement. Students typically complete this requirement in the first two years. The normal course load is 3 courses per semester (9 credits). The courses must include:

- HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP and HAA 2007 - HISTORIOGRAPHY (Methods and Historiography are alternated every other fall semester and must be taken in the student's first and second year.)
- Four or five HAA graduate seminars (depending on MA status)
- Three or five elective courses (depending on MA status), in HAA or in other departments

The remaining credits may be amassed through various independent study options and additional courses if necessary.

In line with the department's research Constellations, students are expected to take courses on many different historical and geographical topics, while at the same time acquiring in-depth knowledge and expertise in a specific subfield. In consultation with the student's individual advisor(s) and Director of Graduate Studies, students should select their courses with these two objectives in mind.

Language Requirement

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD.

Certification in research languages may be achieved in the following ways:

- through passage of a departmentally administered exam.
- completion through the intermediate level (typically the third semester) of a language, taken at the University of Pittsburgh during the period of the student's graduate study, with a grade of B+ or better in the final semester.
- completion of two graduate level reading courses in a research language or the second level of a two-part tiered sequence of reading courses (e.g., German for Reading 2), taken at the University of Pittsburgh, with a grade of B+ or better in the final semester.
- completion of an accredited language immersion program, in the United States or abroad.
- certification of language qualification attained at another accredited graduate degree program.

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors. All students are strongly encouraged to be certified in both languages as early in their time in the program as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

The MA Paper and Degree

In the case of students who did not earn an MA degree in history of art and architecture at another institution prior to entering our program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA degree requires a total of 30 graduate-level credits including:

- HAA 2005 (Methods).
- HAA 2007 (Historiography).
- a minimum of 3 additional HAA graduate seminars.
- One graduate-level cognate course outside HAA.
- HAA 2000 Research and Thesis MA Degree (up to 6 credits).
- at least one research language certified.
- an MA paper passed by majority vote of the graduate faculty.

The MA paper is a 25-to 45-page paper with an original argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

Fourth Semester Review

In their fourth semester, all students (except for those who entered with an MA) undergo a review for continuation in the PhD program. Students submit a dossier including:

- their completed MA paper, including a one-page abstract.
- all faculty evaluations of the student's course work to date.
- a one-page form that summarizes their proposed dissertation field and lists the course requirements they have met and relevant research languages they have passed. This document must be approved and signed by the student's advisor and certified by the Director of Graduate Studies.

The graduate faculty then reviews the dossier to make sure the student's work demonstrates the ability to complete a dissertation successfully. More specifically, the faculty looks for evidence of ability to carry out original research in the student's field, to master secondary literature, to frame an original argument, and to write lucidly.

If the graduate faculty makes a positive determination, the MA is granted, and the student is officially approved to continue in the PhD program. All graduate coursework done to this date counts toward the PhD degree. A dissertation committee is named, consisting of the student's advisor and two other faculty members drawn from HAA.

If the faculty determines that the student's work does not merit continuation in the PhD program, the student may be granted a terminal MA degree providing they have met the MA requirements and the graduate faculty by majority vote deems the MA paper creditable.

Preliminary Exam

In the first semester (for students entering with an approved MA) or fifth semester (for students entering without an approved MA), the first of the student's annual PhD committee meetings is held. The student presents a three-page description of the dissertation topic, and the student and committee together decide on comprehensive exam areas and procedures. Once the student's committee reviews and approves the dissertation topic and exam areas, the "prelim" is passed.

Comprehensive Exams

Doctoral students normally take their comprehensive exams in the third or fourth year (or second or third year if they are entering with an approved MA), after they have completed their coursework requirements. While a committee member from outside the department is not required at this stage, it is recommended to have an outside member participate both in the formulation of the exam contents and in the exam evaluation. The comprehensive exams have two broad goals. The first goal is to test whether the student has sufficient knowledge of their subfield(s) of specialization to carry out the dissertation. The student should be able to articulate the state of research in their subfield(s) and conversant with current trends in scholarship. The second goal is to test whether the student has sufficient knowledge to teach one or more broadly defined areas.

Upon passing the comprehensive exams, the student prepares a dissertation prospectus that must be approved by a dissertation committee consisting of four members, including one faculty member from outside HAA.

Teaching Practicum and Mentoring Portfolio

Graduate students must produce portfolios that demonstrate their proficiency as teachers and mentors of undergraduate students to advance to candidacy. Students will develop the components of the portfolio in the context of HAA 2970 - TEACHING OF ART HISTORY. Thereafter, they should include the teaching portfolio with the materials they send to their PhD committee for their annual meetings. PhD committees give further feedback to the student as appropriate, especially as the student's thinking about pedagogy evolves and as they prepare for the job market.

Dissertation

The dissertation is an in-depth research project designed to make an original scholarly contribution to the student's subfield. Our department accepts modifications to the traditional ca. 200-page manuscript format. For example, students in our program have graduated with dissertations that include, in addition to a shorter written component, digital humanities and/or curatorially related dimensions. Ideally, students begin to focus their dissertation topic early in their graduate career, within the first two years. The MA paper can serve as part of the final dissertation. As soon as possible, students should design their curriculum to enrich and advance their dissertation project.

Once the student completes the dissertation, they must pass a defense, normally a two-hour conversation with the committee, including the external faculty member.

Time to degree

The PhD degree is designed to take five to seven years to complete, depending on the student's subfield. Actual time to degree varies depending on many factors, including the language preparation and/or specialized skills needed to conduct dissertation research.

For more details on degree requirements, the student-advisor relationship, and other related matters, please see HAA's Graduate Program Handbook (https://www.haa.pitt.edu/graduate/handbook-resources).

Master's

History of Art and Architecture, MA (for admitted PhD students only)

General requirements

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in the discipline from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD.

Six credits (two courses) may be transferred from another approved graduate program.

Requirements

In the case of students who did not earn an MA degree in history of art and architecture at another institution prior to entering our program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA degree requires a total of 30 graduate-level credits including:

- HAA 2005 (Methods).
- HAA 2007 (Historiography).
- a minimum of 3 additional HAA graduate seminars.
- One graduate-level cognate course outside HAA.
- HAA 2000 Research and Thesis MA Degree (up to 6 credits).
- at least one research language certified.
- an MA paper passed by majority vote of the graduate faculty.

Language Requirement

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD.

The MA Paper

The MA paper is a 25-to 45-page paper with an original argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

It must be submitted by a deadline in January of the student's fourth semester.

Interdisciplinary Programs

Doctoral

Computational Modeling & Simulation, PhD

Requirements

Course Requirements

http://cmsp.pitt.edu/course-requirements

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 30 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the he program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Proposal Presentation and Comprehensive Exam

The proposal presentation and comprehensive exam will be taken by the end of the student's seventh semester at Pitt and will focus on the progress that the student has made to date on his/her research. It will consist of a written report/proposal prepared by the student on his/her research, followed by an oral comprehensive examination. The exam will be administered by the doctoral committee of four graduate faculty members, three of whom are affiliated with the CMS program and at least one of whom will be from outside the student's research department. Beyond the four graduate faculty members, the student may add external committee members from outside the graduate faculty.

If a student does not pass the proposal presentation and comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis Defense

Every graduate student has to write and defend a thesis or dissertation before being awarded a MS or PhD degree. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Interdisciplinary Studies - Medical Informatics Concentration, PhD

Requirements for the PhD

Students pursuing the Doctor of Philosophy degree in ISP must complete a program of study approved by an advisory committee of faculty. A total of 72 graduate credits are required for this degree. This program must include:

(a) The required courses:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC or
- CS 2710 - FOUNDTNS OF ARTIFICIAL INTELLGNC

- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

(b) Two courses from the following:

- ISSP 2170 - MACHINE LEARNING or
- CS 2750 - MACHINE LEARNING

- ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG or
- CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG

(c) A theory course from both A and B

A

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

B

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

(d) an additional course from either A or B

(e) four advanced courses numbered 2000 or higher

(must be approved by advisor)

(f) GPA of 3.0 or better

(g) Successful defense of a proposal and doctoral dissertation

Concentration Requirements

The curriculum assumes that a student already has training in a health care field. If this is not so the faculty will select a set of courses that teaches the student basic medical knowledge, and the student may take these courses as electives.

Master's

Computational Modeling & Simulation, MS

Requirements

Course Requirements

http://cmsp.pitt.edu/course-requirements

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 30 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the he program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Proposal Presentation and Comprehensive Exam

The proposal presentation and comprehensive exam will be taken by the end of the student's seventh semester at Pitt and will focus on the progress that the student has made to date on his/her research. It will consist of a written report/proposal prepared by the student on his/her research, followed by an oral comprehensive examination. The exam will be administered by the doctoral committee of four graduate faculty members, three of whom are affiliated with the CMS program and at least one of whom will be from outside the student's research department. Beyond the four graduate faculty members, the student may add external committee members from outside the graduate faculty.

If a student does not pass the proposal presentation and comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis Defense

Every graduate student has to write and defend a thesis or dissertation before being awarded a MS or PhD degree. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Interdisciplinary Studies - Medical Informatics Concentration, MS

Requirements for the Master's Degree

Overlapping with ISP requirements of the Dietrich School of Arts and Sciences (A&S). Students should speak with their advisors to make sure they complete both sets of requirements.

Students pursuing the Master of Science degree in ISP must complete a minimum of 24 credits including:

(a) First year students are encouraged, but not required, to take the following:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS (fall)
- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS (spring)
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

(b) The required courses:

- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC or

Two courses from the following:

- ISSP 2170 - MACHINE LEARNING or
- CS 2750 - MACHINE LEARNING

- ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG or
- CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG

(c) A theory course from both A and B

A

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

B

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

(d) Four advanced courses numbered 2000 or higher

(must be approved by advisor)

(e) GPA of 3.0 or better

(f) MS-Level Project

Approved by the faculty after an oral prospectus presentation, involving significant research, design, or development work and a written report.

Concentration Requirements

http://www.isp.pitt.edu/about/degrees

The curriculum assumes that a student already has training in a health care field. If this is not so the faculty will select a set of courses that teaches the student basic medical knowledge, and the student may take these courses as electives.

Department of Linguistics

The Department of Linguistics offers the degrees of Master of teaching English to Speakers of Other Languages (TESOL) and Master of Arts and Doctor of Philosophy in both Linguistics and Applied Hispanic Linguistics, with areas of concentration in Applied Linguistics and Sociolinguistics. The MA Program requires a minimum of 10 courses (30 credits). The Dietrich School of Arts and Sciences requires a minimum of 72 credits beyond the baccalaureate for a PhD degree.

Master of Arts in Linguistics

Master of Arts in Teaching English to Speakers of Other Languages (TESOL)

Doctor of Philosophy in Linguistics

Master of Arts and Doctor of Philosohy in Hispanic Linguistics

Students may fulfill requirements for the TESOL Certificate in conjunction with their graduate study or as a stand-alone post baccalaureate certificate.

Contact Information

Department Chair: Matt Kanwit
Main Office: 2816 Cathedral of Learning
412-624-5900
Fax: 412-624-6130
E-mail: lingpitt@pitt.edu
www.linguistics.pitt.edu

Graduate Administrator: Jennifer Berkebile

412-624-5227

E-mail: jes379@pitt.edu

The best and most current information is at the department website. Potential applicants are encouraged to thoroughly explore this site for further information. **See especially the Graduate Handbook**.

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Linguistics, Graduate Administrator, 2816 CL, Pittsburgh, PA 15260. Phone: 412-624-5227.

In addition to graduate and undergraduate education in the field of linguistics, the Department of Linguistics is responsible for the following programs and centers:

Less Commonly Taught Languages Center
Robert Henderson Language Media Center
TESOL Certificate Program

Admissions

In order to be admitted to graduate standing in linguistics, students must meet the admission requirements of the Dietrich School of Arts and Sciences and have at least two years, or the equivalent, of university-level study of a second language. The Graduate Record Examination is required for all applicants. PhD applicants must also submit samples of written work in linguistics. To be considered for financial aid for the PhD program, complete applications should be received by December 1. Applicants for Hispanic Linguistics must be fluent in Spanish in addition to the above admissions requirements (determined by interview following review of other application materials).

Doctoral

Linguistics, MA/PhD

The PhD programs in linguistics (also referred to as the MA/PhD program) combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, morphology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and bilingualism. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

Required Core Courses for the PhD (all concentrations)

The following courses are required of all students in the PhD program. Students entering with an MA degree from another institution may petition to have coursework from that MA degree apply to the PhD degree at Pitt (see also the Preliminary exam requirement for students with an existing MA).

Courses normally required to be taken in the first year:

- LING 2578 - PHONETICS AND PHONEMICS
- LING 2144 - RES METHODS IN APPLIED LING
- LING 2773 - MORPHOLOGY
- LING 2777 - SYNTACTIC THEORY
- LING 2579 - PHONOLOGY

Required courses that can be taken any time:

One course in sociolinguistics/language change.

- LING 2267 - SOCIOLINGUISTICS

Required upper level course:

Choose one advanced level core course approved by the student's advisor and DGS or Chair.

Applied Linguistics PhD Course Requirements:

In addition to core requirements above.

Required Courses:

- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- A course in psycholinguistics or first language development
- A course in statistics
    - One of the following:
        - LING 2147 - CUR ISSUES IN SECOND LANG LRNG
        - LING 2149 - ADV SECOND LANGUAGE ACQUISITION

Hispanic Linguistics PhD Requirements:

In addition to core requirements above.

Required Courses:

- LING 2394 - SPANISH DIALECTOLOGY
- LING 2391 - PHONOLOGY OF SPANISH
- Two Special Topics courses in Hispanic Linguistics
- A course in statistics

Other Hispanic Linguistics requirements:

Entrance requirement: Advanced Low Proficiency in Spanish as measured by an OPI or equivalent. Students are also interviewed by faculty in Spanish during the admissions process.

In core courses, students are encouraged to work on topics in Hispanic linguistics and to use Spanish sources.

Further specialization within Hispanic Linguistics:

Students may wish to focus on Applied Spanish Linguistics or Spanish Sociolinguistics, but these are not official ARCOs. The following are suggested courses.

Applied Spanish Linguistics:

- Second Language Acquisition
- Approaches and Methods of TESOL
- Techniques and Procedures of TESOL

Spanish Sociolinguistics:

- Language Contact

- Discourse Analysis
- Variation Analysis

Sociolinguistics PhD Course Requirements:

In addition to core requirements above.

Required Courses:

- LING 2267 - SOCIOLINGUISTICS (if not already taken)
- LING 2441 - FIELD METHODS IN LINGUISTICS
- SOC 2102 - SOCIOLGCL THRY POST CLASSICAL
- A statistics course
- Two of the following:
- LING 2761 - DISCOURSE ANALYSIS
- LING 2274 - LANGUAGE CONTACT
- LING 2269 - CURRN ISSUES IN SOCIOLINGUISTICS
- LING 2860 - INTRO TO HISTORICAL LINGUISTICS

Other MA/PhD Requirements:

Language requirement:

Native speakers of English:

1. three semesters of a language taught at the college level plus
2. at least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic.

Non-native speakers of English:

1. English-language proficiency
2. At least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic.

Candidates for the Hispanic Linguistics ARCO:

1. English-language proficiency
2. At least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic,
3. Satisfactorily completing the Spanish language proficiency required of candidates. See the DGS to set up a language exam.

Preliminary exam:

Students entering without an MA:

The preliminary exam is fulfilled by attaining a grade of B+ or better on the final exam of all core courses with a B+ grade or better, and by submitting a portfolio of written work from coursework. See the Graduate Handbook for procedures.

Students entering with an MA:

Students entering with an MA degree may petition to have core courses waived. In order to waive phonetics, phonology, morphology or syntax, a student must demonstrate knowledge by providing course syllabi and passing an oral interview. In order to fulfill the portfolio requirement when entering with an MA, a student must submit an identical portfolio as outlined above from their MA coursework by the end of their first semester of study. Students will be notified of the outcome by the end of the next semester.

Comprehensive exam:

Two comprehensive papers are required to fulfill the comprehensive exam requirement for the Linguistics PhD. The topics of the two papers must be substantially different. Although the topics can be in the same specialty of linguistics, at least one paper should involve linguistic form or structure (for example, by analyzing the acquisition of a particular syntactic construction, by investigating variation of a phonological variable, or by doing a theoretical analysis in syntax or phonology). Both papers have a paper and presentation portion, but only one of the presentations must be public in department colloquium. The second paper can be presented to the readers only, but it is possible to present it publicly.

Dissertation proposal:

When the student has successfully completed the PhD comprehensive examination, they must prepare a dissertation proposal and present it in a formal dissertation proposal defense. A dissertation proposal must have at least two main elements: a knowledge essay and a proposal. The dissertation advisor will determine exactly the format for these two elements. See the Graduate Handbook for procedures.

Dissertation:

After being admitted to candidacy, the student will conduct dissertation research and write a dissertation primarily in consultation with the main advisor, with secondary consultation with committee members when needed. A dissertation defense should be scheduled at least six months in advance. The dissertation draft should be submitted to the committee at least one month before the defense, and the defense draft must be approved by the advisor. See the Graduate Handbook for specific procedures and further advice.

Master's

Linguistics, MA

The degree programs in linguistics combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

Requirements:

Required Courses for all linguistics MA degrees:

- LING 2578 - PHONETICS AND PHONEMICS
- LING 2579 - PHONOLOGY
  or
- LING 2773 - MORPHOLOGY
- LING 2777 - SYNTACTIC THEORY
- LING 2144 - RES METHODS IN APPLIED LING

Other MA Requirements:

Comprehensive exam:

Students must attain a B+ in all core courses. If the grade is lower than a B+, a student must re-take the final exam the following year-or take an exam through other arrangements-and attain a grade of B+ on the exam, or retake the course.

Language requirement:

Proficiency in one second language is required for the MA degree. This requirement is satisfied by examination for students whose native language is English. Students whose native language is not English and who complete their MA work with a grade point average of B (3.0) or better will have fulfilled this requirement automatically.

Teaching English to Speakers of Other Languages (TESOL), MA

This one-year degree is available beginning in Fall 2020. It consists entirely of 30 credits (15 per semester) of coursework and is intended for students who wish to teach English as a Second Language to adults both in the United States and internationally.

The curriculum is fixed, and all courses are required.

Admission Requirements

The requirements for entry to the program will be the same as for the two-year MA.

Contact Information

Chair: Professor Matt Kanwit (mkanwit@pitt.edu)

Admissions and Advisor One-year MA/TESOL and Two Year MA: Dr. Amanda Huensch (amh360@pitt.edu)

Program Requirements:

The degree program will require 30 credits. The following summarizes the sequences of courses.

Fall

- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- LING 2144 - RES METHODS IN APPLIED LING
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- LING 2150 - LANGUAGE LEARNING AND TECHNOLOGY (CALL)
- LING 2194 - PRACTICUM OBSERVATION ESL TEACHING
- LING 2959 - DEPARTMENTAL SEMINAR

Total 15 Credits

Spring

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2141 - TEACHING ENGLISH ACROSS CULTURES
- LING 2195 - PRACTICUM ESL TEACHING
  (3 credits)

Total 15 Credits

Note:

The LING 2194 - PRACTICUM/OBSERVATION and LING 2195 - PRACTICUM ESL TEACHING (Fall and Spring) include observation of classes in English as an additional language (EAL) in higher education contexts, supervised practice teaching of adult English language learners, application of course-work content and tools to teaching contexts, and interactions with EAL teaching faculty and students outside the classroom.

Department of Mathematics

The Department of Mathematics offers programs leading to Master of Arts, Master of Science, and Doctor of Philosophy degrees in the mathematical sciences. Students are given ample opportunity to attain scientific excellence by working with an active and broad-based research faculty in diverse areas of pure and applied mathematics..

Contact Information

Department Chair: Dehua Wang
Main Office: 301 Thackeray Hall
412-624-8375

Graduate Administrator: Jay Drummond

E-mail: jad432@pitt.edu

www.mathematics.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Mathematics, Graduate Administrator.

Admissions

To qualify for admission to full graduate status, an applicant must have a bachelor's degree in mathematics or a closely related field, a minimum overall QPA of 3.0 (relative to a possible maximum of 4.0) in all undergraduate subjects, and a minimum QPA of 3.25 in the mathematics curriculum. It is desirable that the applicant's undergraduate background include courses in calculus, linear and abstract algebra, differential equations, and real and complex analysis. It is also strongly suggested that applicants provide their scores on the GRE General Test and, if possible, on the GRE Subject Test in mathematics. However, this is not required.

Official TOEFL scores from the Educational Testing Service are required if you are an international student whose native language is not English. International applicants whose first language is not English must attain either a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section, or an IELTS score of 7.0 (with at least a 6.5 in each of its four sections). Duolingo English Test will also be accepted with a minimum of a 120 score.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Mathematics, PhD

Requirements for the PhD

A student must maintain a B average over 72 credit hours of course work and pass departmental preliminary and comprehensive examinations. The main requirement for the Doctor of Philosophy (PhD) degree in mathematics is the successful completion and defense of a dissertation embodying a substantial piece of original mathematical research. The main stages are listed below.

PhD Preliminary Examination: Students must pass a written preliminary examination on advanced linear algebra and multivariable calculus. The preliminary examination should be attempted as early as possible and must be passed by May of their second year for support to be extended for a third year.

Comprehensive Examination: Students must pass a PhD comprehensive examination demonstrating their competence in their chosen area of mathematics after approximately one year of course work beyond the preliminary examination or within three years of study.

Dissertation Overview: Following successful completion of the comprehensive examination, students file an application for admission to candidacy for the Doctor of Philosophy. At this stage, students present a proposed topic for doctoral research and a research work plan for its execution to be reviewed by their dissertation committee.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Most candidates will require from three to five years of full-time study to complete the degree. Part- time students may be allowed as many as 10 years to finish all requirements.

Additional information and details concerning examinations, requirements, and the advising system can be found in the departmental handbook.

Joint Degree

Mathematics and Computer Science, MA/MS

Requirements for the Dual Degree

The dual degree program requires the completion of a minimum of 45 credits of course work through either a thesis or non-thesis option. The total set of courses taken must include, as a subset, the course requirements for MA degree in mathematics and a MS degree in computer science.

Mathematics/Civil Engineering, MS/MSCE

Joint Master's Degree

A student is able to earn the Master of Science Civil Engineering degree and the Master of Science degree in mathematics at the same time. In general, 42 credits are required, and students must complete the fundamental courses in both areas.

Master's

Mathematics, MA

Degree Requirements

http://www.mathematics.pitt.edu/graduate/graduate-handbook

Requirements for the MA

http://www.mathematics.pitt.edu/graduate/graduate-handbook#mastershttp://www.mathematics.pitt.edu/graduate/graduate-handbook#masters

The MA in mathematics requires completion of at least ten mathematics courses (30 credits) and an oral comprehensive examination. Achievement of an overall course average of B or better is required for all courses.

The master's programs in applied mathematics contain several tracks, each having a selection of required and elective courses. The MA program requires 30 credits (minimum of 7 departmental) and an oral comprehensive examination. An MS option is available that requires a total of 30 credits and a thesis (24 course credits + 6 credits-thesis).

Requirements for the MS

http://www.mathematics.pitt.edu/graduate/graduate-handbook#masters

The MS in mathematics requires completion of at least eight mathematics courses (24 credits) and the completion and defense of a thesis in mathematics (6 credits). Six of the eight courses must be taken at the 2000-3000 level; the remaining ones may be those cross-listed with other departments. Achievement of an overall course average of B or better is required for all courses.

The master's programs in applied mathematics contain several tracks, each having a selection of required and elective courses. Medieval and Renaissance Studies Program

Students doing graduate work in the Medieval and Renaissance periods require a particularly broad interdisciplinary background. To meet this need, the faculty involved in MRST at the University of Pittsburgh have instituted a certificate program that is designed to enrich the student's work in the major department while allowing the student to undertake inventive interdisciplinary projects.

Each year the MRST Program organizes a series of lectures featuring visiting national and international scholars and distinguished speakers from the Pittsburgh area. We collaborate with PCMRS, the Pittsburgh Consortium for Medieval and Renaissance Studies (www.pcmrs.org), in regularly bringing together faculty and graduate students from Pitt, Carnegie Mellon, Duquesne, and many other area universities.

Contact Information

Director: Chloé Hogg
Department Coordinator: Megan Ponter
Main Office: 454 Cathedral of Learning
Phone: 412-624-6564
E-mail: mep355@pitt.edu
http://www.medren.pitt.edu/

Admissions

Students who are already enrolled in a graduate degree program at Pitt can apply for the Certificate in Medieval and Renaissance Studies at any time during their graduate studies, but are encouraged to applyas early in their program of study as possible. Contact the Department Coordinator, Megan Ponter, at mep355@pitt.edu for a certificate application information.

Requirements for the Certificate

For students wishing to complete the MRST certificate at the graduate level, the most important requirement is a research paper focused on medieval and/or Renaissance Studies. As specified by the University, a MA certificate also requires at least 15 credits (5 courses) and a PhD certificate requires 18 credits (6 courses). Many of these credits may be drawn from coursework already required for the student's degree in the home department (for instance, the requirements for English, HAA, or French and Italian). Working with the Director of MRST, the student will create an individually tailored course of study that gives consideration both to the requirements of home departments and to the importance of interdisciplinary study.

Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Medieval and Renaissance Studies Doctoral Certificate

This is a certificate program for MA or PhD students in one of the disciplines who desire to pursue additional interdisciplinary work in Medieval or Renaissance studies.

PhD Certificate Requirements

1. A PhD thesis of an interdisciplinary nature focused on medieval and/or Renaissance studies.
2. At least four graduate courses focused on medieval and/or Renaissance studies. We strongly encourage students to take courses outside of their home departments. In some cases-involving, for instance, infrequent course offerings or research abroad-students may petition the Director to reduce the number of courses required.
3. A reading knowledge of one language other than English. We also strongly recommend (but do not require) that PhD certificate candidates acquire a reading knowledge of Latin.
4. A one-page cover letter attached to the thesis. The letter should be addressed to the Program Director and should use direct language and specific examples. In this letter, we would like you to reflect on what you have learned from earning a certificate from the Program in Medieval and Renaissance Studies.

Medieval and Renaissance Studies Master's Certificate

This is a certificate program for MA or PhD students in one of the disciplines who desire to pursue additional interdisciplinary work in Medieval or Renaissance studies.

MA Certificate Requirements

1. A major interdisciplinary research paper in medieval and/or Renaissance studies. This may be either an MA thesis or a substantial term paper (20 - 30 pages).
2. At least two graduate courses focused on medieval and/or Renaissance studies. We strongly encourage students to take courses outside of their home departments. In some cases-involving, for instance, infrequent course offerings or research abroad-students may petition the Director to reduce the number of courses required.
3. We strongly recommend (but do not require) that MA certificate candidates acquire a reading knowledge of at least one language other than English.
4. A one-page cover letter attached to the research paper. The letter should be addressed to the Program Director and should use direct language and specific examples. In this letter, we would like you to reflect on what you have learned from earning a certificate from the Program in Medieval and Renaissance Studies.

Molecular Biophysics and Structural Biology Program

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer the key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

Program Co-Directors: Andrew Hinck (UPSOM) and Gordon Rule (CMU)

Admission Requirements and Procedures

Students with at least a baccalaureate degree in physics, chemistry, and mathematics or cellular and molecular biology are encouraged to apply. Admissions are based upon the student's academic record, CV, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 250 (computer) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Additional information and a link to the online application can be a found at http://www.mbsb.pitt.edu/index.php/apply-for-the-mbsb-program

Training Faculty

Dietrich School of Arts and Sciences Faculty

Degree Requirements

All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first two years. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

• MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring & summer term of the first year.

• INTBP 2000 - FOUNDTNS OF BIOMEDICAL SCIENCE - taken during the fall term of the first year

• MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE - taken during the fall term of the first year

• MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS - taken during the spring term of the first year

• 09763 - MOLECULAR MODELING AND COMPUTATIONAL CHEMISTRY - taken during the spring term of the first year at Carnegie Mellon University

• INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer term of the first year

• INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS - taken during the summer term of the first year

• MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR - taken every fall and spring term through graduation

• MOLBPH 2030 - DATA AND LITERATURE CLUB - beginning with the spring term of the first year, D&L Club is taken every fall and spring term through graduation

Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at http://www.mbsb.pitt.edu/index.php/training/curriculum.

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at

http://www.mbsb.pitt.edu/index.php/training/curriculum

- MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS OR
- BIOSC 2810 - MACROMOLECULAR STRUCTURE AND FUNCTION -taken during the first fall semester of the first year.

- MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE OR
- MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE -taken during the first fall semester of the first year.

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH -taken during the first summer semester of the first year.

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS -taken during the first summer semester of the first year.

- MSMBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOLOGY SEMINAR OR
- MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR -taken every fall and spring semester through graduation.

- MSMBPH 2030 - DATA AND LITERATURE CLUB OR
- MOLBPH 2030 - DATA AND LITERATURE CLUB -taken every fall and spring semester through graduation.

- Advanced Elective Courses-6 credits total-with the permission of his/her advisor, students are permitted to choose from a number of courses offered at Pitt as well as CMU.

Additional Information

Terminal Masters Degree
The program does not admit students whose goal is to attain a Master's of Science degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Department of Music

The Department of Music offers the degrees of Master of Arts and Doctor of Philosophy in music.

The graduate program in music consists of four areas of concentration:

- Musicology
- Ethnomusicology
- Composition and Theory
- Jazz Studies

Students may combine work for the MA and PhD degrees with a program of theoretical, historical, or area studies specialization leading to a certificate in Cultural Studies, Medieval and Renaissance Studies, Global Studies, Asian Studies, Latin American Studies, European Union Studies, West European Studies, Russian and East European Studies, Film Studies or Gender, Sexuality, and Women's Studies.

Contact Information

Department Chair: Aaron Johnson
Main Office: 306 Music Building
412-624-4193
Fax: 412-624-4186
E-mail: musicdpt@pitt.edu, music.grad.info@pitt.edu
www.music.pitt.edu

Admissions inquiries concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Music, Director of Graduate Admissions, Dr. Amy Williams, 110 Music Building, Pittsburgh, PA 15260. Phone: 412-624-4120. Fax: 412-624-4186. E-mail: amywill@pitt.edu

Admissions

The deadline for receipt of all elements of the application is **January 5**.

Prospective students should apply online by filling out the online application form (app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=up-as), paying the application fee and attaching pdf files of the statement of purpose, transcripts, resumé/CV and work samples. Applicants must include letters of recommendation with the online application. Please send all additional application materials (music scores, CDs, test scores) to:

University of Pittsburgh
School of Arts and Sciences
Department of Music
Amy Williams, Director of Graduate Admissions
110 Music Building
4337 Fifth Avenue
Pittsburgh, PA 15260

The elements of the application are:

1. *Application form* and $75 application fee.
2. *Statement of purpose*, an essay of about two pages that describes the applicant's academic background and professional goals.
3. *Undergraduate and graduate transcripts* from all higher education institutions attended. These should be scanned and included with online application. Students will be required to forward official transcripts/translations at the time of matriculation (upon enrollment) to the Graduate School to clear transcript contingencies.
4. *CV or Resumé.*

5. *Three letters of recommendation*, preferably by persons who have taught the applicant in subjects related to the four research subdisciplines, rather than in performance lessons.
6. *Official scores of the general test of the Graduate Record Examination (GRE)*. Please note that international applicants from a country whose official language is not English are exempt from taking the GRE. All others are required to take the test (including international students who hold or will hold a degree from an English-language institution). Applicants are encouraged to take the test by November 1, if possible, so that scores can reach the department by January 5. For information, go to www.gre.org (http://www.gre.org) . The University of Pittsburgh GRE code is 2927.
7. *Samples of work.* Applicants in historical musicology and ethnomusicology should submit two papers on an analytical, historical, or theoretical topic. Applicants in composition and theory should submit three scores and a CD of recent compositions, together with one paper on an analytical or theoretical topic. Applicants in jazz studies should submit a recording that demonstrates their ability to improvise on an original jazz composition and a jazz standard. They should also send a full score of an original work for a large jazz ensemble/orchestra and a full score of an original or standard composition for a small jazz ensemble (up to 9 players). Finally, they should submit a research paper on a style or period in the history of jazz. **Please note:** papers can be submitted online. However, in order to submit two papers, both must be merged into a single pdf document first and then submitted.
8. *TOEFL, IELTS, or Duolingo Exam scores.* International applicants whose country's official language is not English must submit certified scores of one of these exams. TOEFL: a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. TOEFL scores submitted must not be more than two years old. IELTS: score of 7.0, with at least 6.5 in each of its four sections. IELTS scores submitted must not be more than two years old. Duolingo English Test: score of 120. Duolingo scores submitted must not be more than two years old.

For information on music department admissions, contact the department's Director of Graduate Admissions, Professor Amy Williams (amywill@pitt.edu) . More general information can be found on the University Graduate Admissions (http://www.asgraduate.pitt.edu/applicationadmission) and the Graduate Studies (http://www.asgraduate.pitt.edu) home pages.

International students are urged to consult the website of the Office of International Services (http://www.ois.pitt.edu).

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Music - Composition and Theory Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st -century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music - Ethnomusicology Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st -century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music - Jazz Studies Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st -century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music - Musicology Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Master's

Music - Composition and Theory Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

Music - Ethnomusicology Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or

above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

Music - Jazz Studies Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

Music - Musicology Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. Students in Musicology must demonstrate a reading knowledge of a second research language.

Department of Neuroscience

The Center for Neuroscience (CNUP) Training program is an interschool PhD degree-granting program offered cooperatively by the School of Arts and Sciences (Neuroscience, NROSCI) and the School of Medicine (Neurobiology, MSNBIO). The program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

We are highly invested in enhancing diversity, which is expressed in multiple forms - race, ethnicity, gender and gender identity, sexual orientation, socioeconomic status, language, culture, national origin, religious commitments, age, (dis)ability status and political

perspective. In addition, we strive to create a community that is equitable, so that all persons have equal opportunity, and inclusive, so that everyone feels welcomed. We hope you share our values and goals.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Brain Institute, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Conte Center for Translational Mental Health Research, Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Training is also available for a master's degree through the Department of Neuroscience in the Dietrich School of Arts and Sciences. It is important to note that this is a departmental program rather than a component of CNUP. Thus, training is only available with faculty with primary or secondary appointments in the Department of Neuroscience. Applicants must also arrange for a faculty sponsor before their application will be considered. A more detailed explanation of the program requirements is available on the Department of Neuroscience Web site at https://www.neuroscience.pitt.edu/programs/masters-program/masters-degree-program

Contact Information

Center for Neuroscience
A210 Langley Hall
E-mail: LMD196@pitt.edu
https://www.cnup.pitt.edu/about

Admission Requirements and Procedures

Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those that are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics, neuroscience, or psychology with a cumulative grade point average of at least 3.40 (on a 4.00 scale).

Success in scientific research requires personal qualities not measured by tests - attributes such as curiosity, creativity, adaptability, self-motivation, passion for research, conscientiousness, persistence, self-organization, grit, resilience, and integrity, just to name a few. Select elect one or two traits you feel are your greatest strengths and provide an example from your life experience that illustrate each trait.

Additional information and a link to our on-line application can be found at: https://www.cnup.pitt.edu/training-programs/phd-graduate-training/application-process

Doctoral

Neuroscience, PhD

Overview of Degree Program

Neuroscience is the study of the structure and function of the nervous system. The field has emerged over the past two decades as one of the fastest-growing disciplines within the biomedical sciences, attracting people from many different disciplines in the natural sciences. By now, the study of mind and brain is arguably the most exciting scientific enterprise of our time.

Understanding the nervous system provides key insights into human nature as well as treatments for a host of devastating neurologic and psychiatric disorders. Our graduate program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research.

The CNUP Graduate Training Program has been designed to accomplish several objectives:

- To develop competence in conducting laboratory research including planning, executing, reporting, and defending an original piece of research relevant to the study of neuroscience.
- To develop general competence in neuroscience and specific expertise in one or more areas of neuroscience such as behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and neurobiology of disease.
- To develop a general professional competence in oral and written expression, necessary for a career in science and/or teaching.
- To develop fundamental skills in scientific reasoning required to redefine research questions and devise innovative multidisciplinary strategies as a means for adapting to the continually evolving landscape of neuroscience and neuroscience research.

In formulating the graduate training program, the faculty has been guided by several principles. First, the program should aid each student in the development of an individualized training program based on the student's background and interests.

Second, research experience should form the core of each student's training and as such should not be postponed by a lengthy period of time devoted exclusively to coursework.

Third, students should be able to complete the program in approximately five years.

Fourth, students should be evaluated in terms of those competencies that are important to a research scientist: designing, conducting and evaluating research, both their own and that of others.

Thus, the progress that a student makes in the program is considered primarily in terms of the student's performance as an investigator.

Degree Requirements

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

- MSNBIO 2010 - SCIENTIFIC ETHICS or
- NROSCI 2010 - SCIENTIFIC ETHICS
- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
- MSNBIO 2624 - GRANT WRITING

Other Requirements

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense.

Master's

Neuroscience, MS

The following sections outline the academic courses, the research experiences, and the oral and written examinations (herein referred to as "milestones") that the student must successfully complete prior to being awarded the master's degree. These requirements are described in terms of the academic and research accomplishments expected during each year of the student's progress through the program. Deviations from the outlined sequence and time schedule need to be approved by the Director of Graduate Studies.

MS Degree Requirements

Credits: A minimum of 30 credit hours, including 12 credit hours of graduate course work in courses numbered 2000 or above.

- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
  OR
- NROSCI 2011 - FUNCTIONAL NEUROANATOMY

  AND
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
  OR
- NROSCI 2012 - NEUROPHYSIOLOGY
- NROSCI 2017 - SYNAPTIC TRANSMISSION
- A graduate-level course in statistics also is strongly recommended though not required

Additional

Students must also participate in a journal club every fall and spring term (this could be either a CNUP journal club or a more specialized journal club), and must attend the neuroscience seminar series (NROSCI 2106). Journal club and seminar series credits should account for no more than 3 of the 12 required course credits. A minimum grade of B is required to pass a course, and a cumulative grade point average of at least 3.0 must be maintained throughout the course of study.

Students must complete at least 12 credit hours of coursework toward the total of 30 credits required for the master's degree.Course credits completed before admission to the Department of Neuroscience Master's Degree program cannot be applied to the credit hour requirements required for the master's degree, although prior coursework may satisfy specific course requirements.

Students are also required to pass two milestones en route to the master's degree: the Reprint Exam and the Master's Thesis Defense. Specific details regarding these milestones are provided later in this document.

Yearly Sequence of Requirements and Expectations

Entering Students

Entering students should schedule an introductory meeting with the Director of Graduate Studies. The purpose of this meeting is to answer any questions that the student may have and to assist the student in getting settled in the program. Prior to the beginning of the student's first term, the student, with the aid of their research mentor and the Director of Graduate Studies, outlines a complete plan of study leading to the Master's Degree.

First Year

The major objectives of the first year are to become actively engaged in laboratory research, to complete core course requirements, and to obtain sufficient experience to pass the Reprint Exam. Participation in journal clubs, research seminars, and involvement in critical assessment of the literature through readings with the mentor and peers is integral to meeting these objectives.

It is required that students participate in the following activities during the fall and spring terms of their first year:

1. laboratory research

2. core courses in neuroscience
3. journal club
4. neuroscience seminar series.

During the summer term at the end of their first year, students should focus primarily on research, although some course work may be appropriate (e.g., statistics). During the first year, the students typically register for 3-9 research credits of Directed Study (NROSCI 2902) per term; the students should register for this course pass/fail.

Students are required to submit a research progress report at the end of the first year of study. This report is due by the last day of final exam week of the second term.

The Reprint Exam (see Section 9.1) must be completed by May 31 of the first year of study.

This assumes that the student initiated study in the program at the beginning of the fall term. Because admission into the program is considered on a rolling basis, it is not unusual for students to enter the program in the spring or summer terms. In these instances, completion of the reprint examination should take place at the end of the first month following the second term of study.

Second Year

After completion of the first year, the only remaining requirements are to finish course requirements and complete a master's thesis project. A list of elective courses currently offered can be obtained from the administrative office. Selection of the coursework that will be used to satisfy the requirements of the program should be made in consultation with their mentor and is subject to approval by the Director of Graduate Studies. However, given the time constraints of completing the degree it is expected that research will be the principal focus of students throughout their program of study.

During each fall and spring term the student is enrolled in the program, the student must participate in:

1. research (registered for as 6-9 credits, NROSCI 2990, pass/fail)
2. journal club
3. neuroscience seminar series (NROSCI 2106).

Department of Philosophy

The Department of Philosophy offers the degrees of Master of Arts and Doctor of Philosophy.

It is possible for students in the Department of Philosophy to plan a combined program with the Department of History and Philosophy of Science by fulfilling specific requirements in each of the departments. The Departments of Classics, Philosophy, and History and Philosophy of Science jointly offer a graduate program leading to the MA and PhD degrees with an area of concentration in classics, philosophy, and ancient science.

412-624-5775
Fax: 412-624-5377
E-mail: jrs164@pitt.edu
http://www.philosophy.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Philosophy, Graduate Administrator, 1017 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-383-0422. Fax: 412-624-5377. E-mail: Jes379@pitt.edu

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a statement of purpose, and a writing sample. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service or the IELTS administered by the University of Cambridge, Local Examination Syndicate. The required minimum TOEFL score is 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing). The required minimum IELTS score 7.0 (with at least 6.5 in each of its four sections). Applications will be accepted for fall term admission until January 10. The department admits students only for the fall term.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Philosophy, PhD

Requirements for the PhD

The University requirement for the PhD is 72 credits. The department requires that 36 of these credits must be obtained by taking 12 seminars (including directed studies) offered by the philosophy department (or an approved seminar offered by another department) passed with a grade of at least B, and the remainder are typically satisfied by dissertation research.

Departmental requirements are fully spelled out in the *Handbook of Rules and Policies for Graduate Study in Philosophy at the University of Pittsburgh (PDF)*. In summary, these requirements include:

1. proficiency in basic and advanced logic, normally shown by passing (with a grade of at least B) PHIL 2500
2. proficiency in ethics, metaphysics and epistemology, and philosophy of science
3. proficiency in the history of philosophy, shown by doing three units, where a unit is a graduate seminar or departmental examination covering a historical topic

When these requirements have been satisfied, the student is comprehensively evaluated and starts working on a paper to serve as the basis for comprehensive examination, which is the student is expected to take by the end of his or her seventh term. Students who pass this examination are then allowed to form a dissertation committee and to present this committee a prospectus for a dissertation. If the prospectus is approved, the student is admitted to Ph.D. candidacy and proceeds to writing the dissertation. Once the dissertation is approved for examination, the student must pass a final oral exam on the dissertation and their research.

Master's

Philosophy, MA

M.A. in Philosophy

The department has no regular terminal M.A. program. Students enrolled in the Ph.D. program may apply for an M.A. when they have satisfied the requirements for comprehensive evaluation described in §4.1 of this handbook and been comprehensively evaluated. Except in extraordinary circumstances, students working towards an M.A. in Philosophy who are not enrolled in the Philosophy Ph.D. program are Ph.D. students in other departments at the University who are seeking a "secondary M.A.". Students pursuing a secondary M.A. are supervised by the Director of Graduate Studies and must satisfy the following requirements:

A. The student must satisfy the Area Requirement in the field of metaphysics and/or epistemology, and in addition one of the other Area Requirements (i.e. either ethics or the philosophy of science), as described in §3.3 of this Handbook. These requirements may (but need not) be satisfied by taking the core courses for Ph.D. students (described in §3.4 of this Handbook). But M.A. students may not take the M&E Core Seminar or Ethics Core Seminar in the Fall term: courses in the Core Sequence are open to M.A. students only in the spring term.

B. The student must do at least two units of history (where a "unit" is defined in §3.5 of this Handbook), such that one is in ancient philosophy and the other in modern/nineteenth century philosophy.

C. The student must either pass the Basic Logic Exam or Phil 2499 (or a more advanced logic course), as described in §3.1 of this Handbook.

D. The student must pass (with a grade of B or better) at least 10 courses (30 credits) offered by the Department at the 2000 level or above. Neither Directed nor Independent Studies may count. Courses that are offered by other departments and cross-listed with Philosophy do not automatically count. Students, may, however, petition the Graduate Committee to use them to satisfy this requirement.

None of the courses used to fulfill these requirements can be among those used to fulfill requirements for another degree, including residency requirements for the student's "home" degree. When requirements (A) through (D) have been met, the student must submit to the Graduate Committee a dossier of three papers written for courses taken in our program, together with any available comments from instructors on these papers. This portfolio will be comprehensively evaluated by the Department and, if the evaluation is favorable, the Department will recommend the conferral of the secondary M.A. degree. Students must register for at least one credit in the term of graduation and be registered for a minimum of three credits in the 12-month period preceding the graduation month. Note that the M.A. degree is only conferred upon students with an overall QPA of 3.0 or higher. All requirements for the secondary M.A. degree should be completed within a period of four calendar years from the student's initial registration for graduate study.

To apply to the secondary M.A. program, students must submit the following to the Director of Graduate Studies: a writing sample, copies of undergraduate and graduate transcripts, and a letter of recommendation from the Director of Graduate Studies in the student's home department indicating that the home department supports the student's application to the secondary M.A. Program. The University allows a maximum of six credits taken prior to admission to a secondary M.A. Program to count toward the requirements for the secondary M.A.

Secondary M.A. Programs in other departments

Students enrolled in the regular Ph.D. program in the Department may pursue a secondary M.A. degree in other departments at the University. The University allows a maximum of six credits taken prior to admission to a secondary M.A. Program to count toward the requirements for the secondary M.A. If the secondary M.A. would contribute significantly to the student's philosophical training, or form an integral part of their projected dissertation project, the student may submit a written request to the Graduate Committee that his or her pursuit of the secondary M.A. be officially endorsed by the Department. The Graduate Committee, with the approval of the Chair, may endorse the student's secondary M.A. in which case an additional year of financial support by the Department will be granted, and the timing of requirements will be appropriately adjusted.

Department of Physics and Astronomy

The Department of Physics and Astronomy offers MS and PhD degrees in astrophysics. Both PhD programs provide broad experimental, observational, and theoretical training. Our graduates are prepared for a variety of careers including teaching and research at major academic institutions, research at government and industrial laboratories, data analysis and software development, statistical analysis, quantitative modeling, scientific writing and outreach, technical marketing, corporate leadership at science and engineering firms, and a variety of scientific entrepreneurial endeavors.

Contact Information

Main Office: 100 Allen Hall
412-624-9066 or 412-624-9000
Fax: 412-624-9163
E-mail: pagrad@pitt.edu
www.physicsandastronomy.pitt.edu

Research

Students may perform their MS and/or PhD research in any of several subdisciplines including astrophysics, cosmology, condensed matter physics, particle physics, biophysics, quantum computing, quantum information, and physics education research. Topics in astrophysics and/or cosmology include observational, numerical, and theoretical cosmology; dark matter and dark energy; galaxy formation and evolution; active galactic nuclei and quasars; galactic and intergalactic medium; stellar atmospheres; massive stars; supernovae; and physics of the early universe. Topics in condensed matter physics include nanoscience; nanophotonics; quantum information; quantum kinetics; quantum optics; quantum states of matter; strongly interacting materials; tensor network numerics; superconducting quantum circuits; semiconductor physics; statistical physics; superconductivity; topological phases; ultrafast optics and cold atoms; optical physics and devices. Topics in particle physics include the origin of mass and flavor; the search for new symmetries of nature; neutrino physics; CP violation; heavy quarks; baryogenesis; inflation and early universe physics, precision tests of the Standard Model; effective field theory; and strong interaction field theory. Topics in biophysics include bacteria dynamics, scaling laws of epigenetic expression, turbulence and stochastic fluctuations, theoretical statistical physics of cell sensing and behavior. Topics in physics education research include cognitive issues in learning physics and development and evaluation of research-based curricula for introductory and advanced physics courses. Multidisciplinary thesis research may also be carried out in, for example, particle astrophysics, biophysics, chemical physics, laser physics, materials science, nanoscience, and surface science. This research may be done in cooperation with faculty from other departments at the University.

Admissions

To be considered for admission, a student must have earned a baccalaureate degree in one of the physical sciences, mathematics, astronomy/astrophysics or engineering. Research experience is recommended but not required. Application details are listed on our web site under "How to Apply." A complete application consists of the following.

- • An online application
  • Transcripts (clear downloads) from all college-level institutions attended (unofficial until admitted)
  • Proof of degree(s) either posted on the transcript or in another form
  • Minimum GPA for admission with full status is 3.0 on a 4.0 scale
  • Brief statement of purpose, including rank ordered list of research preferences; in addition to list of textbooks used for intermediate/advanced level physics classes.
  • Evidence of any research experience (recommended but not required)
  • Curriculum Vitae
  • Three letters of recommendation
  • International applicants only: TOEFL (Test of English as a Foreign Language), IELTS or Duolingo English test scores and completed Certification of Financial Responsibility and International Graduate Student Supplemental Form for the Dietrich School of Arts and Sciences (Refer to department's graduate application details website for minimum score information)

Faculty

Department of Physics and Astronomy Faculty

Doctoral

Physics, PhD

Requirements for the Doctor of Philosophy

Physics, Ph.D.

The PhD program in physics, described in more detail in the referenced documents, aims to assure that graduates are well versed in the fundamentals of their fields, have a broad knowledge of contemporary developments, and are experts in the techniques and current state of the subject area of their research.

Students pursuing the PhD in Physics are required to complete core courses in thermodynamics/statistical physics, electrodynamics, and quantum mechanics (PHYS 2541, PHYS 2555, PHYS 2565) and at least one of Dynamical Systems (PHYS 2513) or Quantum Mechanics II (PHYS 2566) within the first two years of graduate study, though for most students we recommend both courses. Students who are already familiar with the material of one or several core courses may directly take the course exam(s) at the start of the term. Students entering with a Masters degree from another institution are encouraged to review Section 4.B of the Graduate Student Handbook, as they may be eligible to take an oral exam to earn exemption from the aforementioned required courses.

At least four classes numbered above 3000 are also required for the degree. Teaching practicum, presentation and attendance of seminars, and writing and an oral presentation of a dissertation give candidates broad experience in the effective communication of their work.

A minimum of 72 graduate credits are required for the PhD degree.

The PhD preliminary evaluation, which also serves as the comprehensive examination for the MS, is based on performance in the core graduate and/or advanced undergraduate courses. All students are required to pass the preliminary examination by the end of the first year.

PhD students are also required to complete the PhD comprehensive examination, which is similarly based on performance in the core graduate courses. This examination should be passed within the first two years of residency. Students who were exempted from a particular core course are deemed to have met the comprehensive examination requirement for that course.

The PhD dissertation research, which is the largest component of the PhD program, must contribute significantly to the advancement of knowledge in physics and/or astronomy. Students will be required to meet annually with their thesis committee and successfully defend their dissertation before this committee and the University community.

Astrophysics, Ph.D.

The PhD in Astrophysics provides students with foundational knowledge in modern astrophysics as well as focused study in several specific subdisciplines. The PhD trains students to perform independent research in several subdisciplines of astrophysics. Individuals earning the Astrophysics PhD are prepared for a variety of careers including teaching and research at major academic institutions, research at government and industrial laboratories, data analysis and software development, statistical analysis, quantitative modeling, scientific writing and outreach, technical marketing, corporate leadership at science and engineering firms and a variety of scientific entrepreneurial endeavors.

The course curriculum for the Astrophysics PhD consists of eight (8) required courses as well as a number of electives. The required courses for the Astrophysics PhD are:

- ASTRON 3540 - Introduction to Astrophysics and Cosmology
- ASTRON 3550 - Stellar Structure
- ASTRON 3580 - Galactic and Extragalactic Astronomy
- ASTRON 3650 - Galactic Dynamics
- PHYS 3701 - Radiative Processes in Astrophysics
- ASTRON 3705 - Statistics and Data Science
- ASTRON 3785 - Cosmology
- ASTRON 3907 - Directed Research

In case any of the core courses on this list are not offered at a given time, substitutes can be approved by the DGS and the Graduate Curriculum Committee.

The number and specific elective courses to be taken by any individual student will be determined in consultation with the academic advisor, thesis committee, and director of graduate studies based on the prior preparation and research area of the student.

At least 72 graduate credits are required for the PhD degree.

All students will be expected to pass a Preliminary Evaluation by the end of their first academic year in the program. To pass the preliminary evaluation, students must achieve a grade of at least B in a minimum of four graduate-level astrophysics courses from the list of required courses and electives (where the research course ASTRON 3907, Directed Research shall be one of those courses), as well as maintaining a GPA of 3.0 or better.

By the end of the second academic year, all students enrolled in the program will be expected to pass the Comprehensive Evaluation. To pass the comprehensive evaluation, students must pass four of the six required graduate courses (not including ASTRON 3907 - Directed

Research) in astrophysics with a grade of B+ or higher. Credit for courses in recognition of work performed at other institutions will be recognized in accordance with current Dietrich School policy.

The PhD dissertation research, which is the largest component of the PhD program, must contribute significantly to the advancement of knowledge in astrophysics. Students will be required to meet annually with their thesis committee and successfully defend their dissertation before this committee and the University community.

Master's

Physics, MS

Requirements for the Master of Science

Physics, M.S.

A minimum of 30 credits (3.0 GPA) is required for the MS for both thesis and non- thesis options. The student must be in compliance with all of the University's degree requirements. At least four physics courses (12 credits) at the graduate 2000-level must be completed with a grade of B (3.00). A 3000-level course can be substituted for one of these, but only with the Academic Advisor's approval. No more than six credits of graduate work completed at another institution may be accepted by the Graduate Committee toward the completion of the residence requirement. Credits earned for PHYS 2997 and PHYS 2998 may not be used to satisfy this requirement. No more than two non-physics graduate-level courses, approved in advance by the Director of Graduate Studies, will be considered for credit for the MS degree. Please refer to department's graduate website for details about the course, directed research, and thesis options for this degree.

The Comprehensive Examination for MS students, which is equivalent to the Preliminary Evaluation for Physics PhD students, is based on performance in the core graduate and/or advanced undergraduate courses.

Department of Political Science

Overview of Department

The Department of Political Science offers the degrees of Master of Arts and Doctor of Philosophy. However, the MA degree functions primarily as a stepping-stone to the PhD. The department does not have a distinct MA program, and does not, except under very unusual circumstances, admit students for graduate study who seek a terminal Master of Arts degree. However, PhD students who, for various reasons, choose to discontinue their training after two years are eligible for a terminal MA, contingent upon the successful completion of the requirements outlined below.

Contact Information

Department Chair: Jae-Jae Spoon
Main Office: 4600 Wesley W. Posvar Hall
412-648-7250
Fax: 412-648-7277
E-mail: polisci@pitt.edu
http://www.polisci.pitt.edu

Graduate Program

The Department of Political Science offers the degrees of Master of Arts and Doctor of Philosophy. However, the MA degree functions as a stepping-stone to the PhD. The department does not have a terminal MA program, and does not admit students for graduate study who

seek a terminal Master of Arts degree. However, PhD students who, for various reasons, choose to discontinue their training after two years are eligible for a terminal MA, contingent upon the successful completion of the requirements outlined below.

The graduate program in political science incorporates five fields:

- American Politics
- Comparative Politics
- Mass Political Behavior
- Political Research Methodology
- World Politics (International Relations)

Students choose two of these fields as areas of specialization. Students may combine work for the MA and PhD degrees with a program of regional or global specialization leading to a certificate in Global Studies, Latin American studies, Asian studies, West European studies, or Russian and East European studies.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing or the IELTS administered by the University. For fall term admission and awards consideration, complete applications must be submitted by early January (see deadlines) 1. The department admits students only for the fall term.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Political Science, PhD

Requirements for the PhD

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching practicum, or dissertation work.

Course Requirements: Students must complete at least four graduate seminars from their examination field and at least three graduate seminars from their second field and receive a grade of an A- or above in at least two of these three classes and a grade of B+ above in the other class.

Comprehensive Examination: Students must successfully pass comprehensive examination in one of the department's examination fields in August following the successful completion of the MA qualifying paper. The purpose of the examination is to demonstrate that the student is capable of teaching a graduate-level seminar in the examining field and to assure that the student can synthesize and critically evaluate the literature.

Dissertation Overview: The overview consists of a carefully developed research design for the proposed Ph.D. dissertation. Students are expected to defend dissertation overview at the end of their third year in residence.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Supervised Teaching Practicum: A hands-on teaching practicum is an academic requirement of the doctoral program for students to learn about university-level teaching.

The specifics of the PhD degree requirement can be found at Graduate Student Handbook.

Master's

Political Science, MA

Requirements for the MA

The department does not admit students who intend to pursue a terminal MA degree. Instead, the degree is assumed to be a milestone on the way toward a Ph.D. Terminal MA's are offered only to students who, for personal or professional reasons, cannot or choose not to continue their training beyond a minimum of two years of study.

Preliminary Examination: At the end of the first year of coursework, the full faculty assess the performance of each first-year student. This assessment comprises the college-mandated preliminary examination. Students who have earned a grade of A- or higher in each of their courses in the first year are automatically considered to have passed the preliminary examination. Students who have earned a grade of B+ or lower in one or more courses must submit a remediation plan to the Graduate Education Committee, via the Director of Graduate Studies, to remain in good standing in the program.

Credit Requirement: For the MA degree, students must earn 30 hours of credit with a B+ average or better in courses numbered 2000 level. Credits received from "Directed Reading" and "Directed Research" count toward this requirement, credit from PS 2905 (Teaching and Research in Political Science) does not. These courses must involve the completion of the eight-credit sequence of core courses (PS2000, PS2020, PS2030). These courses should be taken during the first year of graduate work, although they may be deferred to the second year in the case of conflicts in the students' academic schedule and with the permission of the Director of Graduate Studies and the instructor. In addition, students must complete at least four graduate seminars in one of the following fields: American Politics, Comparative Politics, International Relations, Mass Political Behavior, and Political Methodology.

MA Qualifying Paper: Students are required to write an MA qualifying paper and successfully defend it before the entire department by the end of their second year in the program.

The specifics of the MA degree requirement can be found at Graduate Student Handbook.

Department of Psychology

The department offers graduate training leading to a Doctor of Philosophy in psychology. Specialization in the fields of biological and health psychology, clinical psychology, cognitive psychology, developmental psychology, and social psychology is available, along with joint programs in clinical/developmental and clinical/health psychology. A specialization in Cognitive/Neuroscience is also available. The area of concentration in clinical psychology is accredited by the American Psychological Association. All graduate programs emphasize training in science and experimental research methods, including the clinical psychology program, which has the aim of producing the next generation of clinical scientists.

Contact Information

Department Chair: Tessa Warren
Main Office: 3137 Sennott Square
412-624-4502
Fax: 412-624-4428
E-mail: psygrad@pitt.edu
http://www.psychology.pitt.edu/graduate-studies

Admissions

Applications for admission must be submitted online by December 1. Admission is in the fall only. Applicants for admission to graduate study in psychology must submit academic transcripts, 3 letters of recommendation, statement of goals -which include reasons for pursuing a PhD, past research experience, clinical experience (if applicable), and other skills and experiences, and a personal essay about leadership or outreach experiences, employment or athletics that had to be balanced with academic demands, out of classroom learning, challenges one may have overcome, and if desired, any issues relevant to diversity, broadly considered. GRE requirements vary by program and applicants are advised to view the department's webpage for the latest details: https://www.psychology.pitt.edu/graduate/application-process. Applicants to the clinical and joint-clinical programs may also submit scores for the GRE Subject test, which is recommended, not required. Students may obtain information concerning the dates and places of administration of the GRE from the Graduate Record Examination, Educational Testing Service, Princeton, NJ 08541-0001; from www.ets.org; or from the testing service of their own college or university.

International graduate applicants must possess proficiency in English at a level that enables them to succeed in graduate-level studies. Applicants in the following categories meet this requirement: citizens of a country whose official languages include English; graduates of regionally accredited institutions in the U.S.; graduates of institutions whose language of instruction is English **and** located in countries whose official languages include English.

These scores are required for all applicants whose native language is not English. The minimum requirements for each exam are listed below:

TOEFL: a minimum overall score of 4.5 with 4.5 in the speaking, reading, writing sub-section and a 5.0 in the listening sub-section. TOEFL scores submitted must not be more than two years old.

IELTS: score of 7.0, with at least 6.5 in each of its four sections. IELTS scores submitted must not be more than two years old.

Duolingo English Test: score of 120. Duolingo scores submitted must not be more than two years old.

As preparation for graduate study, the department recommends broad undergraduate training including courses in biology, mathematics, the physical sciences, the social sciences, and effective oral and written expression. The department recommends college-level mathematics and 12 credits of psychology, including experimental psychology, statistics, and, for applicants to the clinical program, psychopathology (abnormal psychology).

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Psychology, PhD

Requirements for the PhD

A minimum of 72 credits is required for the PhD. The credits are readily earned in the course of completing the regular requirements. Up to 24 credits may be granted for a master's degree awarded by another institution.

In addition to the credit requirement, the PhD in psychology requires:

1. Demonstration of proficiency in the program-specific core and required courses as described in the following links: biological and health, clinical, cognitive, developmental, and social.
2. Demonstration of competence in research at the master's level, with an oral defense of a master's thesis or equivalent work. (This may be waived for students entering with a master's degree.)
3. Maintenance of a B average (3.0) in all course work.
4. A comprehensive examination in a field of specialization.
5. Demonstration of teaching competence in a formal course setting.
6. A dissertation based on empirical research.

7. An oral examination concerned primarily with the dissertation.

It is possible to complete these requirements in four years, although most students take four to six years to complete the work for a PhD.

Clinical Program Note: Clinical students are also required to complete a one-year internship in an approved setting. This internship normally takes place after the student has met the requirements for admission to doctoral candidacy. For this reason, the minimum time in which a PhD may be earned in clinical psychology is one year longer.

Teaching Practicum: Each student is required to complete a teaching practicum.

Master's

Psychology, MS

Requirements for the Master's Degree

Normally, students are only admitted for graduate study leading to the PhD. If a student wishes, they may also obtain a master's degree by submitting an approved master's thesis and fulfilling the 30 credit course requirement. Satisfactory completion of the program's specific core courses (as described in the following links: biological and health, clinical, cognitive, developmental, and social) constitutes the comprehensive examination for the MS.

Minor

Quantitative Methodology Minor

Students pursuing a doctorate within the major of Psychology may now obtain a Minor in Quantitative Methodology.

Approval to pursue the Minor is contingent on:

A.) Being a student pursuing a graduate degree in Psychology in good standing. Written approval of the student's primary advisor.

B.) Completion of the standard 2-course sequence in graduate statistics in the Department with a grade of B+ or higher, or an approved waiver of this criterion based on equivalent prior coursework. The two required courses are Statistical Analysis 1 (PSY 2005) and Statistical Analysis 2 (PSY 2010).

C.) Completion of 3 additional courses in advanced quantitative methods with a grade of B+ or higher. These courses may be completed within or outside of the Department of Psychology. Courses taken to fulfill this requirement from other departments require approval by the current faculty administrator of the Minor. The psychology department currently offers three advanced quantitative methodological courses on a regular basis: Structural Equation Modeling PSY 2090), Applied Longitudinal Data Analysis (PSY 2575 - Special Topics in Psychology), and Mixed Effects Models (PSY 2575 - Special Topics in Psychology). In addition, students may take advanced quantitative courses in other departments in the college (e.g., Department of Statistics, Department of Political Science), or outside of the college (e.g., School of Education, Carnegie Mellon University Machine Learning program). A list of previously approved courses can be found on KennyNet (Psychology KenneyNet>Programs>Quant folder>Quant resources (open to all). Additional courses can be proposed by trainees and will be approved on an ad hoc basis following a review of the syllabus by a faculty member of the committee.

D.) Enrollment in (1 credit) and attendance of at least one semester's worth (6 lectures) of the Community for Advanced Methodological Learning (CAMeL: https://psychology.pitt.edu/graduate/camel) series, including a presentation of one lecture on a topic approved by the CAMeL organization committee.

E.) Demonstration of mastery of quantitative methodology through the inclusion of an advanced technique as part of a milestone or independent project that has been approved by one of the affiliated faculty.

For the purposes of evaluation, a the following faculty below will constitute the Quantitative Minor committee. This committee will comprise Drs. Scott Fraundorf, Marquis Hawkins, Rebecca Reed (chair), and Colin Vize.

Evaluation of each of the proposed requirements are as follows:

For academic requirements B and C above, successful completion of the coursework with a grade of B+ or higher in each of the 5 courses will be evaluated by a review of the trainee's transcript. The Psychology Department graduate administrator will maintain a list of courses that are approved.

For academic requirement D, confirmation of attendance to CAMeL will be ascertained by review of the sign-in sheets collected at each meeting, and satisfactory presentation will be judged by one of the review committee faculty in attendance on the date of the student's presentation.

Finally, successful completion of requirement E, inclusion of an advanced methodological technique in a milestone project (i.e., Master's Thesis, Comprehensive Exam, or Doctoral Dissertation) or independent project, will be evaluated by one review committee member. The criterion for satisfactory completion will be commensurate with the requirements associated with the milestone project (i.e., the technique would need to be judged to be acceptable for satisfactory completion of the milestone project) or consistent with expected publication standards in the field, should the student choose to pursue an independent project. A review committee faculty member is not required to be part of the milestone project committee, and in the case that there is not an affiliated faculty member on the committee an independent evaluation of the application of the advanced statistical technique will be performed.

If you wish to pursue the Quantitative Minor, please do the following:

At least one year before you plan to graduate, email the Chair of the Quantitative Minor Committee (and cc your faculty mentor) to indicate that you intend to complete the quantitative minor. In this email, outline how you have completed or plan to complete the requirements A through E listed above.

At least one semester before you plan to graduate, complete this survey to obtain final approval for the Quantitative Minor: https://pitt.co1.qualtrics.com/jfe/form/SV_er4NdkNmRKg6Xoa.

Current Chair of the Quantitative Minor Committee: Rebecca Reed, PhD. Additional information can be found here: https://www.psychology.pitt.edu/graduate/additional-training-options/minor-quantitative-methodology.

Department of Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers a Master of Arts (as a degree leading to the Doctor of Philosophy) and a Doctor of Philosophy, with an area of concentration in Russian literature and culture, including cinema. Students may combine work for the MA and PhD degrees with a program of regional specialization leading to a certificate in Russian, East European & Eurasian Studies; Cultural Studies; Film & Media Studies; Gender, Sexuality, & Women's Studies; Jewish Studies; and others.

Eligible Slavic PhD students may apply, before taking the Slavic PhD comprehensive examinations, to transfer to Pitt's Interdisciplinary Film Studies PhD (with a concentration in Slavic), thereby working towards a single PhD in two disciplines. For information on the Interdisciplinary Film Studies PhD, see http://www.english.pitt.edu/graduate/phd-film-studies.

Contact Information

Department Chair: Bella Grigoryan

412-624-5906
Fax: 412-624-9714
E-mail: slavic@pitt.edu
www.slavic.pitt.edu

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Slavic Languages and Literatures, Graduate Administrator, Jennifer Berkebile, 1229 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5227. Fax: 412-624-9714. E-mail: JES379@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement, an academic writing sample, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing or the IELTS administered by the University of Cambridge, Local Examinations Syndicate. Applications will be accepted for fall term admission until April 15. For awards consideration, applications must be completed by January 15. The department normally admits students only for the fall term.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Slavic Languages and Literature, PhD

Requirements for the PhD

Credit Requirement: 72 graduate credits (36 beyond the MA), of which 12 may be dissertation credits; at least 60 credits must be completed by the end of the semester in which the PhD examination is to be taken.

Approved Second Area: Nine to 15 credits outside the department (but within the 72-credit total) in an approved second area (e.g., Russian, East European, & Eurasian Studies, Cultural Studies, Film & Media Studies, Gender, Sexuality, & Women's Studies; Jewish Studies, etc.).

Research Languages: Reading competence in a research-relevant language other than Russian or English is required before taking the PhD exam.

MA Examinations: The MA exam serves as the qualifying stage for those students who wish to pursue graduate work at the PhD level.

Supervised Teaching Practicum: A hands-on teaching practicum is an academic requirement of the doctoral program for students to learn about university-level teaching.

PhD Examination: Students take a PhD examination after approximately two years of coursework beyond the MA. For examination procedures visit http://www.slavic.pitt.edu/graduate/examinations.

Dissertation Overview: Following successful completion of the PhD examination, the student files an application for admission to candidacy for the Doctor of Philosophy. At this stage the student presents a proposed topic for doctoral research and a research prospectus for its execution to be reviewed by the dissertation committee.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Master's

Slavic Languages and Literature, MA

Requirements for the MA

For the MA, students must earn 36 hours of graduate credit with a B average or better in courses numbered 1000 or above. At least half of these credits must be in courses numbered 2000 or above. All MA students are required to complete RUSS 2110 - INTRODUCTION TO LITERARY AND CULTURAL THEORY: LANGUAGE, GENDER, HISTORY and either RUSS 2970 - TEACHING PRACTICUM or FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING . Courses are chosen in consultation between the student and the Director of Graduate Studies (DGS) and are subject to approval by the latter. The remainder of student coursework is used to develop competence in Russian literature and culture or in an approved second area (see above).

The MA comprehensive exam covers material from a **reading list**. For examination procedures see **https://www.slavic.pitt.edu/graduate/examinations**.

Department of Sociology

The Department of Sociology offers the degrees of Master of Arts and Doctor of Philosophy. However, a terminal Master's degree is infrequently awarded, as students awarded Master's Degrees usually continue in the Department to receive PhD Degrees.

The faculty conduct research and offer courses within two broadly defined areas: 1) social movements and 2) politics and culture. Within each of these areas, graduate students are able to pursue a variety of theoretical, substantive, and methodological interests.

Graduate students are encouraged to combine their work in sociology with multidisciplinary study in a particular area by enrolling in any of the following certificate programs: African Studies, Asian Studies, European Studies, Global Studies, Latin American Studies, Russian and Eastern European Studies, Cultural Studies, or Gender, Sexuality, and Women's Studies.

Contact Information

Department Chair: Lisa Brush

412-648-7580
Fax: 412-648-2799
E-mail: lbrush@pitt.edu
www.sociology.pitt.edu/graduate/

Additional information concerning the department's graduate program may be obtained from the graduate administrator, Amber Fontenot (alf@pitt.edu).

Admissions

Qualified students from any discipline are considered for admission. Qualifications include preparation for graduate-level work in sociological theory and both qualitative and quantitative research methods, including a required course in social science applications of multivariable regression models. Applicants must submit to the departmental director of graduate studies transcripts of all college-level work, three letters of recommendation, a career statement, and a brief writing sample. International applicants are also required to submit TOEFL, IELTS (the International English Language Testing System), or DuoLingo scores, unless they hold an undergraduate or graduate degree from an accredited U.S. college or university or from other English-speaking countries. All applications and application fees must be submitted on-line. Applications are accepted for fall term admission until January15. The department admits students only for the fall term.

How to apply: https://www.sociology.pitt.edu/graduate/how-apply

Faculty

Dietrich School of Arts and Sciences Faculty

http://www.sociology.pitt.edu/faculty

Doctoral

Sociology, PhD

Requirements for the PhD

Admission: Prerequisite for admission is a Bachelor of Arts degree or equivalent preparation (plus approval from the Admissions Committee). If a Student has not yet received a Master's Degree at the time of application, the Department will require the student to pursue a Master's Degree at the University of Pittsburgh. The requirements for the Master's Degree are listed below. Those students entering with an MA degree from another institution may petition the Admissions Committee for a transfer of credits but core courses are usually not waived.

Credit Requirement: The PhD program requires 72 credits earned from a combination of the required core course sequences, MA courses, additional graduate sociology seminars, and any suitable combination from course work, independent study, research, and dissertation work as detailed elsewhere in this bulletin.

Required Teaching Practicum: A hands-on teaching practicum is an academic requirement of the doctoral program for students to learn about university-level teaching.

Comprehensive Examination: The PhD comprehensive examination is an individually designed review essay using relevant research literatures to develop research questions for the dissertation and to support those questions with appropriate methodological and theoretical "best practices" in the field and substantive findings related to the dissertation project.

Dissertation Overview: At this stage students will have selected, in consultation with their dissertation committee, a suitable dissertation topic. Students present a written prospectus to their committee describing the purpose, scope, and method of proposed study and the sources upon which it will be based. Students are encouraged to give careful thought early on in their graduate work to possible doctoral research topics and discuss their interests with related faculty.

Final Oral Examination: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Master's

Sociology, MA

Requirements for the Master's Degree

For the MA, students must earn 36 credits in approved graduate courses. The 36 credits must include completion of the nine credit core course sequence: Research Design, Social Theory, Qualitative Methods and Quantitative Methods, as well as at least 14 credits of elective graduate coursework in the sociology program with grades of B or better.

Students also write a Second Year Paper in lieu of a Master's thesis.

Remaining credits may be earned with sociology electives (which may include 3 credits of directed study) or graduate coursework in other programs.

Department of Statistics

The Graduate Faculty offers various programs of study and research in statistics. Degree programs lead to the Master of Arts or Master of Science in applied statistics, the Master of Arts or Master of Science in statistics, and the Doctor of Philosophy in statistics. These may be pursued by full-time and part-time students. The department also provides courses for students engaged in graduate studies in other

disciplines requiring statistics and for individuals requiring specialized statistical skills in the workplace. Full details of all programs and departmental regulations are available on the website at the address listed below.

Contact Information

Chair: Kehui Chen
Main Office:1800 Wesley W. Posvar Hall
412-624-8368
Graduate Administrator: Jay Drummond
E-mail: statadmn@pitt.edu
www.statistics.pitt.edu

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Statistics, Academic Coordinator. 1800 Wesley W. Posvar Hall, Pittsburgh, PA 15260. E-mail: statadmn@pitt.edu.

Admissions

http://www.statistics.pitt.edu/graduate/admissions

A basic requirement for admission to the graduate program in statistics is the completion of a bachelor's degree from an accredited institution in the United States or the completion of a level of education that the University of Pittsburgh deems comparable to a U.S. bachelor's degree. Applicants whose native language is not English and who have not already completed a degree program in a U.S. college or university are required to submit either the TOEFL (administered by the Educational Testing Service) or the IELTS (administered by Cambridge University, Local Examinations Syndicate).

Decisions regarding admission are based on the applicant's official credentials, grade point averages, and the availability of faculty and facilities to meet the applicant's expressed academic or research needs and interests. With limited space available, not all qualified applicants can be admitted.

The minimal course requirements for admission into the graduate programs of the Department of Statistics are:

- Three terms of calculus
- Linear algebra
- One year of probability and statistics, preferably an introductory mathematical statistics sequence

Students lacking some of these prerequisites may be admitted provisionally at the discretion of the Graduate Committee. In addition, students intending to pursue the PhD should either have taken a one-term course in advanced calculus, or be prepared to take such a course in the first year of graduate study.

Requirements for the Master's Degree in Statistics or Applied Statistics

http://www.stat.pitt.edu/graduate-programs

The department encourages its students to obtain a broad background in statistics, including both methods and theory courses, regardless of whether they specialize in applied statistical methodology or in statistical theory. Consequently, two-term sequences in applied statistical methods (STAT 2131-STAT 2132) and intermediate mathematical statistics (STAT 2630-STAT 2640) are common to all master's degree programs offered by the department, and are also generally taken by students whose goal is the PhD in statistics.

Doctoral

Statistics, PhD

Requirements for the PhD

The main requirement for the Doctor of Philosophy in statistics is the successful completion and defense of a dissertation making a substantial and original contribution to statistics, probability, or their application. Prior to embarking on their research, candidates must pass the qualifying exam (see Requirements for the Master's Degree above) at the PhD level. To be admitted to PhD candidacy, candidates must successfully pass an oral PhD Comprehensive examination over an area of research chosen in consultation with their advisory committee. The purpose of the comprehensive examination is to demonstrate that students are able to understand, summarize, and make use of the statistical literature in an area of potential research that is of interest to them. Students who have found a specific topic for their dissertation are encouraged to combine the comprehensive examination with the presentation of the thesis proposal. Students who are not yet ready to present a proposal can still take the comprehensive exam, but must later submit a thesis proposal orally and in writing to their advisory committee.

Course requirements for the PhD are STAT 2631 - THEORY OF STATISTICS 1, STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS, STAT 2661 - LINEAR MODELS THEORY 1, and STAT 2711-STAT 2712 (Probability Theory) or their equivalent. PhD candidates are also required to take at least three credits in statistical consulting; those students anticipating a career involving consulting are advised to take a substantial number of consulting credits. The remaining courses of the 72 credits required for the PhD will be decided in conjunction with the student's advisor and should consist of mainly formal courses prior to the commencement of research for the dissertation.

The department has no second language requirements for the PhD. Although not required, facility in the use of one or more computer programming languages, especially those used in writing statistical software (for example, SAS, R), is highly recommended.

Full-time graduate students usually take between four and five years to complete a PhD. Part-time students may be allowed as many as 10 years to finish all requirements. Additional information concerning examinations and requirements can be found in the Graduate and Professional Bulletin and the Kenneth P. Dietrich School of Arts and Sciences (A&S).

Master's

Applied Statistics, MA

Master of Arts

Department requirements for the Master of Arts in Applied Statistics and Master of Arts in Statistics are the completion of 30 credits and passing the Preliminary Exam, equivalent to receiving grades B or higher in STAT 2630-2640 and STAT 2131-2132.(The same preliminary exam is required for all four master's programs in applied statistics and statistics). .

The Master of Arts in Statistics differs from the Master of Arts in Applied Statistics by replacing the requirements of a two-course sequence in a discipline other than statistics and 3 credits in consulting with the requirement that three additional 3-credit graduate-level statistics courses be taken. Both master's degrees require completion of 30 credits and the passing of the Preliminary Evaluation as explained about.

Applied Statistics

1. Five Required Courses:

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

2. Currently four statistics electives (12 credits) are required.

3. Two graduate courses in a field other than statistics to which students might apply statistical methods (6 credits).

Statistics

1. Four Required Courses (12 credits):

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

2. Six graduate level statistics elective courses (18 credits).

Applied Statistics, MS

Master of Science

The requirements for the Master of Science, either in applied statistics or in statistics for a total of 30 credits.

Applied Statistics

1. Five Required Courses:

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

2. One graduate level statistics elective course (3 credits)
3. Two graduate courses in a field other than statistics to which students might apply statistical methods (6 credits)
4. Two graduate level thesis credit courses (6 credits)

Statistics

1. Four Required Courses (12 credits):

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

2. Four graduate level statistics elective courses (12 credits)
3. Two graduate level thesis credit courses (6 credits)

Statistics, MA

Master of Arts

Department requirements for the Master of Arts in Applied Statistics and Master of Arts in Statistics are the completion of 30 credits and passing the Preliminary Exam, equivalent to receiving grades B or higher in STAT 2630-2640 and STAT 2131-2132.(The same preliminary exam is required for all four master's programs in applied statistics and statistics). .

The Master of Arts in Statistics differs from the Master of Arts in Applied Statistics by replacing the requirements of a two-course sequence in a discipline other than statistics and 3 credits in consulting with the requirement that three additional 3-credit graduate-level statistics courses be taken. Both master's degrees require completion of 30 credits and the passing of the Preliminary Evaluation as explained about.

Teaching of English to Speakers of Other Languages (TESOL) Program

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition or teaching English language learners, materials and curriculum development, and assessment.

The Department of Linguistics offers two courses in the Teaching of English to Speakers of Other Languages (TESOL).

- Higher Education Course
- ESL Program Specialist Course

Certificate

TESOL Certificate

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition, materials and curriculum development, and assessment.

The Department of Linguistics offers two courses in the Teaching of English to Speakers of Other Languages (TESOL).

- ESL Program Specialist Course
- Higher Education Course

ESL Program Specialist Course

Requirements

Any student who wished to earn the certificate must fulfill the following requirements:

Prerequisite
(or taken concurrently with the first certificate course)

LING 1000 - INTRODUCTION TO LINGUISTICS

Course Requirements

LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT

TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS

TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

TEACHING PRACTICUM - TLL 2791 - SUPERVISED RESEARCH - FOREIGN LANGUAGE (Term varies)

Please note:

1. iTEACHING PRACTICUM - TLL 2791 - SUPERVISED RESEARCH - FOREIGN LANGUAG involves supervised language teaching concurrent with or following LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING. Candidates fulfill the requirement by signing up for TLL 2791 and completing their practicum in a K-12 context with the support of the School of Education, Department of Teaching, Learning, and Leading , or, with permission of the TESOL Certificate advisor, another ESL teaching context.
2. The certificate candidate must earn a grade of B or higher in each certificate course.

Degree Prerequisite for Admission

Applicants must hold a baccalaureate degree or its foreign equivalent with a minimum grade point average of B (3.0 on a 4-point scale). Preference is given to applicants who have studied abroad, worked with international students, and/or have any EFL/ESL teaching experience (including volunteer).

Instructional I Prerequisite

Applicants must hold a Pennsylvania Instructional I certificate (or equivalent from another state) and be able to provide a copy as part of the application packet.

Additional Language Learning Prerequisite for Admission

Native Speakers of English:

Native speakers of English must have classroom foreign language learning experience equivalent to at least one year of college level study of a language other than English and/or have learned a foreign language during an overseas living/work experience.

Native Speakers of Other Languages:

- **Recommended TOEFL Score:** 5.0 or higher on the new TOEFL scale (1-6), effective for tests taken on or after January 21, 2026. Skill Requirements: Reading, Listening, Writing - 4.5 or above; Speaking - 5.0 or above. For tests taken before January 21, 2026, a score of 95 or higher on the iBT (0-120) scale is recommended (Skill Requirements: Reading and Listening - 22 or above; Speaking and Writing - one skill must be at the level of Advanced). TOEFL scores must not be more than two years old.
- **Recommended IELTS Score:** 7 or higher on the IELTS with at least 6.5 in each of its four sections. (Skill Requirements: Speaking and Writing - combined minimum of 13). IELTS scores must not be more than two years old.
- **Recommended Duolingo English Test (DET) Score:** 130 or higher (Skill Requirements: Speaking and Writing or Production and Conversation - one skill must be 130). DET scores must not be more than two years old.
- Admitted students in TESOL-related programs who use English as an additional language must demonstrate proficient spoken English skills as determined by a score of at least 4 on the interview test administered by the University of Pittsburgh. These students must successfully complete the interview before graduating.

Transcripts and CV and Teaching Certificate

Undergraduate transcripts (and graduate if applicable) and a CV (including a list of references) must be submitted as part of the application. In addition, a copy of the applicant's state teaching certificate must be included in the application materials.

Plan of Study

Students must complete a TESOL certificate plan of study form after consultation with the TESOL Certificate advisor during the first term of study.

Completion of Requirements

When nearing completion of all TESOL certificate requirements, students must apply for graduation from the TESOL Certificate program through the Arts and Sciences Dean's Office. This graduation application is separate from any other degree graduation applications. Additional paperwork for the state endorsement must be filed with the Pennsylvania Department of Education with the help of the School of Education.

Suggested Sequence of Courses

Two-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]

Four-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)

- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

Fall:

- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- [PRACTICUM]

Spring:

- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]

***Note:**

Students must enter the program in the fall term. Students may complete LING 1000 - INTRODUCTION TO LINGUISTICS prior to the fall term, however.

Higher Education Course

Requirements

Higher Education Course Requirements

Any student who wishes to earn the certificate at the MA or PhD level:

Prerequisite
(or taken concurrently with the first certificate course)

- LING 1000 - INTRODUCTION TO LINGUISTICS

Course Requirements

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2146 - SECOND LANGUAGE ACQUISITION
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- LING 2195 - PRACTICUM ESL TEACHING (Term varies)
- *PhD students must take an additional 3 credit course approved by the TESOL Certificate Advisor*

Please Note:

1. LING 2195 - PRACTICUM ESL TEACHING involves supervised language teaching concurrent with or following LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING.
2. The certificate candidate must earn a grade of B or higher in each certificate course.
3. Those applying for graduate degrees will completed the TESOL Certificate program application process after gaining acceptance to the degree program.

Degree Prerequisites for Admission

Applicants must hold a baccalaureate degree or its foreign equivalent with a minimum grade point average of B (3.0 on a 4-point scale). Preference is given to applicants who have studied abroad, worked with international students, and/or have any EFL/ESL teaching experience (including volunteer).

Additional Language Learning Prerequisite for Admission

Native Speakers of English:

Native speakers of English must have classroom foreign language learning experience equivalent to at least one year of college level study of a language other than English and/or have learned a foreign language during an overseas living/work experience.

Native Speakers of Other Languages:

- Recommendations for applicants who are non-native speakers of English are as follows:
- Recommended TOEFL Score: 95 or higher on the iBT TOEFL (Skill Requirements: Reading and Listening - 22 or above; Speaking and Writing - one skill must be at the level of Advanced)
- Recommended IELTS Score: 7 or higher on the IELTS (Skill Requirements: Speaking and Writing - combined minimum of 13)
- Admitted students in TESOL-related programs who are non-native speakers of English must have good spoken English skills as determined by a score of at least 4 on the interview test administered by the University of Pittsburgh. These students must successfully complete the interview before graduating.

Transcripts and CV

Undergraduate transcripts (and graduate if applicable) and a CV (including a list of references) must be submitted as part of the application.

Plan of Study

Students must complete a TESOL certificate plan of study form after consultation with the TESOL Certificate advisor during the first term of study. The student then will work with academic advisor if earning a graduate degree, or the TESOL Certificate advisor if not in a degree program.

Completion of Requirements

When nearing completion of all TESOL certificate requirements, students must apply for graduation from the TESOL Certificate program through the Arts and Sciences Dean's Office. This graduation application is separate from any other degree graduation applications.

Suggested Sequence of Courses

Two-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- [PRACTICUM]
- Elective for PhD-level students

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]
- Elective for PhD-level students

Four-term Option
(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- Elective for PhD-level students

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2146 - SECOND LANGUAGE ACQUISITION
- Elective for PhD-level students

Fall:

- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- Elective for PhD-level students
- [PRACTICUM]

Spring:

- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]

Note:

*Students must enter the program in the Fall term. Students may complete LING 1000 - INTRODUCTION TO LINGUISTICS prior to the fall term, however.

Department of Theatre Arts

The Department of Theatre Arts fosters a collaborative, inclusive learning community and excellence in theoretical and practical research and pedagogy through its MFA Performance Pedagogy and PhD Theatre and Performance Studies programs. The structure of the programs and their intersections encourage ways of thinking and communicating within and beyond students' fields and the academy in support of students' diverse personal and career goals.

The MFA program is designed to equip working, professional actors with the tools to expand their employment opportunities in teaching acting and other performance styles at the college and university level. It offers a dynamic synthesis of teaching, practice, and scholarship. This program is based on the premise that the professional actor has already gained a level of craft and broad experience that can become the foundation for solid teaching skills. Therefore, emphasis is placed on exploration and strengthening of pedagogical techniques as related to areas of acting and performance training.

The PhD program prioritizes the integration of scholarship with teaching and artistic practice in order to prepare students to be competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and employment sectors beyond academia. In line with the department's intellectual vision, the program integrates theory and practice and focuses on underrepresented groups and areas of research, including migration, disability studies, race, gender, sexuality, religion, and transnationalism, across historical, historiographical, literary, performance studies, and practice-based research methodologies.

For additional information on these aspects of study in the theatre arts at Pitt, visit the department website: www.play.pitt.edu.

Graduate Student Services Administrator: LJ Woolcock-Srolovic
E-mail: liw151@pitt.edu
Fax: 412-648-3303

Admissions

Applicants to the PhD program in Theatre and Performance Studies should demonstrate a desire for rigorous research at the PhD level; potential for teaching excellence; interest in the exploration of artistic practice; and capacity for creative and critical risk-taking (in terms of research, artistic practice, and teaching). An MA in theatre arts is not a prerequisite for admission to the program. The department admits some highly qualified students with BAs directly into the PhD program.

Applicants to the MFA Program in Performance Pedagogy must demonstrate a desire to develop a pedagogical approach to teaching performance; exhibit potential for teaching excellence; show interest in practice-based research; demonstrate ability to collaborate across degree programs; and display a willingness to continue professional experience outside of the classroom. Successful applicants will be seasoned professional actors willing to make a full commitment of time and energy to the program.

An undergraduate major in theatre arts is normally a prerequisite for admission to the program, though exceptions can be made if circumstances warrant. Because candidates will be teaching extensively during their residency, some teaching experience is preferred.

Rubrics with admissions criteria are available for both programs on our department website.

Theatre Arts Faculty (https://www.play.pitt.edu/people/theatre-arts-faculty)

Doctoral

Theatre and Performance Studies in Theatre Arts, PhD

The PhD program in Theatre and Performance studies prioritizes the integration of scholarship with teaching and artistic practice in order to prepare students to be competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and employment sectors beyond academia. In line with the department's intellectual vision, the program integrates theory and practice and focuses on underrepresented groups and areas of research, including migration, disability studies, race, gender, sexuality, religion, and transnationalism, across historical, historiographical, literary, performance, and practice-based research methodologies.

The program integrates scholarship with experiential learning opportunities through a curricular requirement called the Immersive Practice Credential. Each student develops a 12-15 credit program of individualized study focused an area of artistic practice, such as directing, dramaturgy, or playwriting, or a professional career outside of the academy, such as Public Humanities or Education and Community Engagement. In their Immersive Practice Credential coursework, students work with Theatre Arts faculty and MFA students as well as pursue professional training and internship opportunities outside of the university.

Mentored by faculty, each student develops their pedagogy through scaffolded teaching opportunities. These experiences allow students to acquire and practice pedagogical skills in smaller practice-based classes as well as larger lecture and discussion courses in theatre history, performance studies, and script analysis for majors and non-majors.

Degree Requirements

A minimum of three years or six terms of full-time residency is required. It is not possible to complete the degree on a part-time basis.

72 credit hours, of which 30 can be granted for an approved Master's degree or its equivalent, are required past the BA, made up of courses stipulated in the curriculum and electives (including independent study, directed study, in-training programs, and dissertation credits).

Students are required to demonstrate advanced knowledge in one foreign language sufficient to read criticism and drama in the language and sufficient to allow them to attend a play in the language and understand it reasonably well. The language requirement may be fulfilled in four ways.

Up to three sections of World Theatre (as designated by the Diagnostic Exam)

Nine seminar-level courses in history, literature, and critical theory of theatre and performance studies. During the first two semesters of a full-time PhD student's program, they must take at least three of these seminars in the Department of Theatre Arts.

At least seven of the nine required courses will be advanced graduate seminars in the Department of Theatre Arts (2000 series). The others may be graduate-level (2000 series) listed in any appropriate University department. Courses labeled "research," "directed study," or "independent study" cannot be used to fulfill this requirement, except by approval of the Graduate Faculty. The student's advisor will regularly monitor selection of courses, and approve the overall sequence chosen. No lower-level undergraduate courses numbered 0001-0999 may be applied toward a graduate degree.

PhD Prelim Evaluation

All students who enter the PhD program are required to take the preliminary examination. Students in their first year of doctoral study must take a minimum of three seminars in the department. Their work in those seminars shall constitute the basis for the prelim exam. The exam is designed to assess students' critical thinking, facility with methodology, and writing skills as well as ability to articulately discuss the course material in the selected seminars.

Comprehensive Exam

By the end of their second year, students should begin to consider and discuss with faculty areas for their comprehensive exam that fall into the three categories: Critical Methodologies and Theoretical Discourses; Historical Discourses; Textual Discourses. By the beginning of their third year, three areas of study should be approved. Through the comprehensive examination, students demonstrate both breadth and depth in regards to theatre and performance history, theory, and practice.

Proposal/overview

The prospectus proposes the subject and plan for the completion of the dissertation. The graduate faculty member who will serve as chair for the student's dissertation committee will provide guidance for the completion of the prospectus. Once the committee chair has approved the prospectus, the student will schedule a defense with all of the members of their PhD committee.

Dissertation and Final Examination

The University of Pittsburgh's *Graduate and Professional Bulletin* outlines the requirements for the final stage of the degree, which is the preparation and defense of a dissertation. This written work, which must embody an extended original investigation of a problem of significance to theatre arts or performance studies, is the capstone to the research program of a student's training.

Master's

Performance Pedagogy in Theatre Arts, MFA

Designed to equip working, professional actors with the tools to expand their employment opportunities in teaching at the college and university level, the MFA in Performance Pedagogy at the University of Pittsburgh offers a dynamic synthesis of teaching, practice, and scholarship.

This program is based on the premise that the professional actor has already gained a level of craft and broad experience that can become the foundation for solid teaching skills. Therefore, emphasis is placed on exploration and strengthening of pedagogical techniques as related to areas of acting and performance training.

Each student is given the mentorship of an experienced teacher of performance and works closely with the mentor to create opportunities for independent studies in pedagogy and curriculum development. Students gain experience applying theory to the practice of teaching acting and performance classes every semester, creating a course, conducting master class workshops, working on production assignments, and coaching or advising undergraduate students as needed. Students are encouraged to develop an area of specialty and to develop other areas of training in order to broaden their knowledge and remain competitive in the academic market.

Degree Requirements

The curriculum for the MFA degree in Performance Pedagogy centers around three focus areas:

1. Pedagogical Study

2. History/Literature/Criticism

3. Practice of Acting and/or other performance styles

4. Other Electives

Each semester students are expected to carry a 15-credit load. In addition, one teaching practicum with a focus on performance instruction is required.

of courses required (list core courses, etc.)

60 credits are required for the program: 36-39 credits in pedagogy; 15 credits in History, Literature and Criticism; and 3-6 credits in electives. Core courses include: Techniques in Performance Pedagogy, Course Development, Production Mentorship, and Directed Studies in Pedagogy.

Thesis and Final Examination

The thesis project is the final requirement for the Performance Pedagogy degree. It is comprised of an original, created course, a substantial written document that serves as a teaching guidebook for other instructors interested in using the thesis topic in the classroom, and an oral defense of the written document. The thesis document identifies a pedagogical question, investigates that question through research and classroom work, and identifies conclusions reached and considerations for future revisions of the course. Thesis documents typically range from 40-80 pages in length and are directly connected to the created course devised by the student.

Joseph M. Katz Graduate School of Business

School of Business

The Joseph M. Katz Graduate School of Business creates and disseminates knowledge that enhances the quality of the management of organizations. The School of Business, through faculty research programs and our doctoral program, produces high- quality research in areas of importance and infuses knowledge created by this research into all programs, but especially the MBA and related professional programs. Our school's reputation, primarily resulting from our MBA, Specialized Master's and doctoral programs, allows us to attract international, national, regional, and campus partners, with whom collaboration results in specialty professional programs with the MBA program as a foundation. This includes areas such as, technology management/engineering, law, and health sciences. Our culture of teamwork, adaptability, and flexibility permits the school to readily adapt to future environments and strategic opportunities.

The Joseph M. Katz Graduate School of Business is accredited by AACSB-the International Association for Management Education.

Application Procedures

Please refer to individual program descriptions in this section for further information regarding application procedures for Master of Business Administration (MBA), Master of Science (MS), Doctor of Business Administration (DBA) and the Doctor of Philosophy (PhD) degrees.

Degree Options

The School of Business awards the Master of Business Administration (MBA), the Master of Science (MS), Doctor of Business (DBA), and the Doctor of Philosophy (PhD) degrees. Full-time, Part-time and Executive MBA degree programs are offered, as well as a number of MS degree programs. The Executive MBA, the DBA, as well as the Signature MBA, Accelerated MBA, Dual MBA/MS programs, Part-time MBA, and MS programs are each offered in a cohort-based model.

The PhD degree program has concentrations in accounting, finance, information systems and technology management, business analytics and operations, organizational behavior and human resources management, strategy, and marketing.

The Signature, Accelerated, Dual-degree MBA/MS, and Part-time MBA programs allow students to concentrate their studies through the declaration of micro-credentials and graduate certificates, many of which are stackable within the elective portion of the programs.

Additionally, the School of Business offers a number of MS, dual-degree and joint-degree options for students who wish to specialize and/or add a second professional degree. Many of the specialized degree options in business analytics, supply chain management, and management of information systems qualify as STEM programs.

Doctor of Business (DBA) and Doctor of Philosophy (PhD) Programs

- Doctor of Business Administration, DBA
- Accounting, PhD

- Business Analytics and Operations, PhD
- Finance, PhD
- Information Systems and Technology Management, PhD
- Marketing, PhD
- Organizational Behavior and Human Resources Management, PhD
- Strategic Management, PhD

Master of Business Administration (MBA) Programs

- Executive Master of Business Administration, MBA
- Master of Business Administration, MBA
- Master of Business Administration with Business Analytics, MBA

Master of Science (MS) Programs

- Accounting, MS
- Accounting and Business Analytics, MS (STEM-designated)
- Analytics and Applications of Artificial Intelligence for Business, MS
- Marketing Science, MS
- Marketing Science and Business Analytics, MS (STEM-designated)
- Finance, MS
- Finance and Business Analytics, MS (STEM-designated)
- Supply Chain Management, MS (STEM-designated)
- Supply Chain Management and Business Analytics, MS (STEM-designated)
- Management, MS
- Management and Business Analytics, MS
- Management Information Systems, MS (STEM-designated)

Dual Degree Programs

- Dual Degree: Accounting, MS / Analytics and Application of Artificial Intelligence for Business, MS
- Dual Degree: Finance, MS / Analytics and Application of Artificial Intelligence for Business, MS
- Dual Degree: Management, MS / Analytics and Application of Artificial Intelligence for Business, MS
- Dual Degree: Marketing Science, MS / Analytics and Application of Artificial Intelligence for Business, MS
- Dual Degree: MBA / Analytics and Application of Artificial Intelligence for Business, MS
- Dual Degree: MBA / Finance, MS
- Dual Degree: MBA / Marketing Science, MS
- Dual Degree: MBA / Supply Chain Management, MS
- Dual Degree: MBA / Management Information Systems, MS
- Dual Degree: Supply Chain Management, MS / Analytics and Application of Artificial Intelligence for Business, MS

Joint Degree Programs

- MBA/Doctor of Medicine
- Business Administration and Public and International Affairs, MBA/MPIA
- Business Administration and International Development, MBA/MID
- Business Administration and Engineering, MBA/MS
- Health Policy and Management, MHA/MBA
- Social Work, MSW/MBA, Joint Degree
- Law and Business Administration, JD/MBA
- Supply Chain Management and Industrial Engineering, MSSCM/MSIE

Graduate Certificates

- Accounting, Graduate Certificate
- Business Analytics, Graduate Certificate
- Finance, Graduate Certificate

- Foundations of AI for Business, Graduate Certificate
- Management Consulting, Graduate Certificate
- Management Science, Graduate Certificate
- Technology Management, Graduate Certificate

Micro-credentials

- Accounting, Micro-Credential
- Data Programming for Business Insights, Micro-credential
- Finance, Micro-Credential
- Foundations of AI for Business, Micro-Credential
- Innovation and Entrepreneurship, Micro-credential
- Leading People in Organizations, Micro-Credential
- Management Consulting, Micro-Credential
- Management Science, Micro-Credential
- Marketing Management, Micro-Credential
- Technology Management, Micro-Credential
- Sustainable Business, Micro-Credential

3+1 BSBA to MS Programs

The Undergraduate and Graduate Programs at the University of Pittsburgh School of Business collaborate to offer accelerated BSBA and MS programs.

- 3+1/BS in Business Administration and MS in Accounting
- 3+1/BS in Business Administration and MS in Management of Information Systems

Special Academic Opportunities

The School of Business offers the following special opportunities/programs:

Professional Development Workshops

Students participate in a variety of workshops throughout the program. Students work closely with their academic and career advisors to identify areas for professional development and develop a plan to engage in workshops related to those areas.

Workshops are offered on topics such as presentation skills, project management, problem solving, time management, data visualization, team dynamics, and diversity/equity/inclusion. Full-time MBA and MS students are required to complete a certain number of professional development hours each semester. Part-time students are not required to complete these hours but are welcome to participate in workshops as their availability allows.

Exchange Programs

Students can spend time studying at a school in another country through a variety of international exchange programs. Applicability of these credit-bearing opportunities is dependent on the program and students should discuss the available opportunities with their academic advisor.

Global Research Practicums

As part of a 3-credit international elective course, MBA and MS students can spend a week in another part of the world studying business culture and practices and visiting different companies in that region. Regions frequently visited include Asia, Europe, and Latin America.

Corporate Connections

Through both professional development programming and career development programming, students can engage with business executives from major firms throughout the year. Opportunities include skills-development workshops, recruiting presentations, one-on-one conversations, and networking mixers.

Graduation

A special School of Business graduation ceremony for all graduating students is held in the spring of each year. Graduate students who completed their degree in the preceding summer and fall semesters, or who are expected to complete their degrees in the upcoming summer semester are invited to participate in the ceremony alongside the spring semester graduates.

MBA and Masters Programs

The following section details the full range of programs for students interested in pursuing an MBA, an MS, or a combination of dual or joint degree programs. Unless otherwise noted, additional information regarding these programs may be obtained by contacting the Admissions Office.

Contact Information

University of Pittsburgh School of Business
Admissions Department
301 Mervis Hall
412-648-1508
Fax: 412-648-1659
E-mail: admissions@katz.pitt.edu
www.katz.business.pitt.edu/form/contact

Application Procedures

Applicants should have earned an undergraduate degree from an accredited U.S. college or university or its international equivalent. Applicants should demonstrate quantitative and qualitative competence via academic coursework and/or GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or a personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is recommended, and only exams taken at testing centers are accepted. The Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or Duolingo test is a requirement for international applicants. International applicants should also see the section on Admissions of International Students in the front section of this catalog.

University of Pittsburgh undergraduate applicants from any campus who meet the following conditions can waive the GMAT/GRE:

Overall undergraduate 3.25 cumulative GPA

Completed at least six credits of undergraduate quantitative coursework with minimum 3.0 GPA

Financial Assistance

The primary sources of financial assistance for incoming full-time MBA students are tuition scholarships and loans. Limited scholarships are available for MS programs.

Merit-based scholarships are awarded in various dollar amounts and are directly applied against tuition charges. School of Business scholarships are available to full-time U.S. citizens, U.S. permanent residents, and international students. Award notifications are mailed along with the official admission decision. While consideration for scholarship is independent of the admissions decision, there is no additional application required.

There are several educational loan programs available for students.

Tuition and Fees

Financial Information

Tuition information can be found at https://www.tuition.pitt.edu/. The School of Business also charges a Professional Development fee that is based on the program in which a student is enrolled, which goes to support the implementation of the wide variety of professional development, career development, and student support programming that the school offers. Certain courses, including the Integrated MBA Capstone course also carry a course fee, which supports the experiential components of the course.

Academic Standing

For the University policies on Academic Standing, Notice & Dismissal, visit Academic Standing for Graduate and Professional Students | Office of the Provost | University of Pittsburgh

Dean's List

The Dean's List for full-time students is compiled at the point of degree completion and is awarded to students who have achieved a cumulative GPA of 3.750 or above.

Transfer of Graduate-Level Courses

For University policies on the Advanced Standing Credits, visit Policies & Guidelines | Office of the Provost | University of Pittsburgh

Students may request that credits earned through other institutions be reviewed for transfer toward their degree or credential. All courses must be completed with a grade of "B" or higher to be eligible for transfer consideration.

If a student wishes to have previously earned graduate credits applied to their degree or credential as transfer credits, they must submit syllabi for each course to be reviewed for rigor and applicability by School of Business faculty. Matriculated students should contact their academic advisor to initiate this process.

If a student must relocate during his or her studies at the School of Business, the student may earn credits at an AACSB accredited program to complete the School of Business program. The same procedures apply for transferring previously earned graduate credits. Each course from an alternative institution must be preapproved for transfer prior to enrollment. Courses taken at other institutions may or may not be approved by the School of Business faculty.

The School of Business follows the Statute of Limitations established by the University. School of Business Students who wish to request an extension to their Statute of Limitations, should contact the Senior Director of Graduate Academic Programs and Student Services in writing . The request for the extension must be detailed and such request must be filed before the end of the statutory period.

Academic Integrity

All students are expected to adhere to the school's *Guidelines on Academic Integrity*, copies of which are available in each student's program Canvas shell, as well as by request from any academic staff member. These standards follow the University's guidelines with several procedure changes. Students may also contact the school's academic integrity officer for advice or clarification of academic integrity guidelines.

Development & Employer Engagement

The Career Development team assists all master's students. The mission is to be a collaborative career development partner with both students and corporate recruiters, as well as an industry leader in professional development. The team is committed to providing advice in a manner that is designed to tailor a career path to fit each student's unique strengths and professional competencies and develop and execute a job search plan to secure employment post-graduation. All full-time students are assigned a career advisor and are expected to regularly engage with them throughout their enrollment and their job search process. Part-time students are welcome and encouraged to utilize the services of the Career Development team as appropriate for their career needs. The Employer Engagement team's mission is to cultivate and foster relationships with corporate partners that lead to internship and full-time employment opportunities for MBA and MS students. The Career Development team and the Employer Engagement team work closely to ensure alignment between students' career preparation, job search, and available employment opportunities.

Academic Advising

The Academic Advising team is responsible for advising students regarding degree requirements and procedures of their program. The academic advisors will verify degree requirements and are responsible for making sure students stay on track for graduation. The academic advisors collaborate closely with the career advisors to ensure that students are well-informed about curricular opportunities that align with and support their career goals. The Academic Advising team also manages the registration of all new students, the maintenance of student records, and the certification of all students' graduation.

Student Engagement

The Student Engagement team manages professional development workshops, student events and activities, student clubs and student government, and large-scale events such as New Student Orientation and Commencement.

Executive Degree Programs

The University of Pittsburgh School of Business offers two graduate programs designed for experienced professionals who seek to advance their leadership capabilities and deepen their expertise without interrupting their careers. Detailed program information, curriculum overviews, and application requirements are available on the program pages linked below.

Executive MBA

The Executive MBA (EMBA) program is designed for mid- to senior-level professionals seeking to broaden their strategic business acumen and accelerate their career growth. For full program details, visit Executive Master of Business Administration, MBA .

Doctor of Business Administration

The Doctor of Business Administration (DBA) program is designed for senior practitioners seeking to generate applied research that addresses real-world business challenges. For full program details, visit Doctor of Business Administration, DBA .

PhD Programs

The theoretically based, managerially relevant doctoral program in business administration seeks to prepare students for careers in research and teaching in management and related areas at leading business schools and universities. This is accomplished by fostering a learning environment in which students can achieve intellectual growth and fulfillment. Successful completion of the PhD program therefore entails much more than the satisfaction of a set of formal requirements. PhD students are expected to assess their knowledge and skills in regular consultation with the faculty and to develop a set of educational experiences that will fulfill their needs and facilitate the pursuit of personal goals.

Contact Information

University of Pittsburgh
School of Business
Ph.D Program
282 Mervis Hall
katzphd@katz.pitt.edu

www.katz.business.pitt.edu/phd

Application Procedures

All application materials must be submitted by January 15 of the expected entry year into the program. The basic prerequisite for admission to the doctoral program is the equivalent of an American bachelor's degree. Many applicants also have advanced degrees and professional experience. Scores on the GMAT or GRE (as well as on the TOEFL for international students) are required, along with recommendation letters and transcripts.

Sequence of Study

Progress to the PhD consists of the seminar phase, comprehensive examinations, teaching requirement, and the dissertation. Students complete course work in the seminar phase. This is the time during which the student sets scholarly standards and goals. Every student prepares a written statement called the Field Statement upon declaring the student's areas of study. This is also the time to form relationships with faculty members and begin developing research skills.

A minimum of 72 post baccalaureate credits is required for the PhD degree. A maximum of 30 credits from a previously earned master's degree may be applied.

Formal requirements in the seminar phase are:

- Work to ensure a basic level of competence in the disciplines and functions relevant to management. Students choose 6 credits of MBA course work. Some or all of these requirements may be exempted depending on educational background and doctoral course objectives.
- Eight courses in the major area of study and three courses in the minor area of study or a seven-course research methodology minor.
- Two semester teaching practicum
- At least four courses in research methodology or a seven-course research methodology minor.
- A grade point average of 3.3.
- A preliminary evaluation (comprehensive examinations).

Comprehensive examinations are written and oral examinations in both the major and minor area of study. Each student's exams are designed individually, focusing on the area(s) of study. The student is expected to demonstrate comprehensive ability, meaning the ability to synthesize and build on all that the student has learned.

Dissertation

Doctoral students are required to demonstrate their capacity to engage in a sustained research effort by completing a doctoral dissertation. The dissertation entails an independent investigation of a problem of acknowledged significance and size in a management-related area. Only if the dissertation is judged to demonstrate such competence, after a formal defense in a final oral examination, does the department recommend the awarding of a degree.

For more details on requirements of doctoral students, see Regulations Pertaining to Doctoral Degrees.

Teaching

All School of Business PhD students are required to enroll in a teaching practicum as part of their graduation requirements.

Timeline to Graduation

Most students earn the PhD in five years. The seminar phase typically lasts two years, while the comprehensive exams and the dissertation together require an additional three years to complete.

Statute of Limitations

The statute of limitations represents the maximum time permitted for the fulfillment of all requirements for the PhD degree. The statute of limitations is as follows:

1. Comprehensive examinations must be completed no later than the seventh term of study.
2. The dissertation overview examination must be successfully completed before the end of the fourth year.
3. The dissertation defense must be completed successfully before the end of the sixth year.

Exceptions to the School of Business PhD Program statute of limitations, not to exceed the University of Pittsburgh's statute of limitations, must be approved by the School of Business Doctoral and Research Committee.

Placement

The School of Business's goal is to place PhD graduates in universities that consistently produce high quality business research, and a successful record has been established in this regard.

Individual Curriculum Design

Students must choose from the following areas of study leading to the PhD.

- Accounting
- Business Analytics and Operations
- Finance
- Information Systems and Technology Management
- Marketing
- Organizational Behavior and Human Resource Management
- Strategic Management

Within the framework of these standard areas, every PhD student plans a unique, individual area of study. A student may choose any of the areas as a primary (major) area of study or as a secondary (minor) area of study. Each of the areas of study provides additional choices to meet student interests and developmental needs. All have subspecialties; all explore a range of current topics. In addition, to expand the option in the core areas, students are invited to draw on courses and research opportunities at the School of Business, as well as other parts of the University, and other institutions.

Two goals must be balanced in planning an individual program. One is to acquire a sound body of knowledge in recognized disciplines and methods. The other is to choose a mix of courses, mentors, and research topics geared to the student's own interests and talents. Ideally, this will lead to a truly original dissertation, followed by a career of meaningful research.

Certificate

Foundations of AI for Business, Graduate Certificate

The Graduate Certificate in Foundations of AI for Business is a 15-credit program designed to develop advanced technical, strategic, and ethical skills for AI implementation in business settings. This graduate certificate requires successful completion (earning a grade of B or better) of pre-requistie coursework. Students must complete one of the following courses:

1. BMIS 2402 Computational Thinking (1.5)
2. BMIS 2542 Data Programming Essentials with Python (3 cr)
3. BMIS 2526 Advanced Data Programming with R (3 cr)
4. Or demonstrated programming experience.

Course Name	**Course Number**	**Credits**	**Required** or **Elective**
Technical Foundation of Generative AI	BMIS 2630	3.0	R
Deploying AI for Business: Strategy, Design, and Execution	BMIS 2635	3.0	R
Approved electives		*9.0*	*E*
Total Credits		**15.0**	

Required Courses

These 6 credits are required for completion of the certificate

- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION

Elective Courses

9 elective credits are required for the Micro-Credential. Examples of elective courses are provided below and other electives are being developed.

- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BMIS 2525 - CURRENT ISSUES IN COMPUTING
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION
- BMKT 2573 - AI IN MARKETING
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Doctoral

Doctor of Business Administration, DBA

The Doctor of Business Administration (DBA) is the highest level of academic achievement in the Business School and is designed for working professionals who are seeking applied research skills and want to continue working while participating in a part-time program. Individuals pursuing the DBA program should have 8+ years of professional experience and currently work in a middle-to-top management position. The program provides knowledge and skill in research methodologies across business disciplines and is taught by world-renowned faculty.

The DBA program is delivered in a Hyflex Model and can be completed over three years beginning in the Fall Term. It focuses on engagement and research synthesis with the real-world practice of business and students' executive management experience.

Contact Information

Executive Degree Programs Office

412-648-1600

E-mail: executiveprograms@katz.pitt.edu

Application Procedures

Apply Here

Applications may be submitted year-round, and admissions decisions are typically made within three weeks of receiving a completed application package and successful completion of the interview process. The application will either be accepted, rejected, or wait-listed. If wait-listed, an admissions decision may not be made until a month before classes begin. At that time, those with the strongest credentials are admitted. Applicants must hold a bachelor's and a master's degree from accredited colleges or universities.

Both baccalaureate and master's degrees from accredited colleges or universities are required for admission with the professional work requirements included. Applicants with a master's degree from an approved institution can transfer up to 27 credits into the DBA program.

Quick Check List:

- Online application form
- Resume or CV
- Personal statement
- Two letters of recommendation from professional references, including your current supervisor if applicable
- Official academic transcripts from all institutions attended
- Official TOEFL or IELTS scores for non-English native speakers. The admission committee recommends a total score of 100 or better on the TOEFL, 7.0 or better for the IELTS exam, and 130 or better for the Duolingo English Test. The minimum total scores to be eligible for admission consideration are an 80 on the TOEFL (taken prior to 1/20/26), 4.0 on the TOEFL, with all subscores at 4.0 or higher (taken on or after 1/20/26), 6.5 on the IELTS, and a 125 on the Duolingo English Test. Please note that scores are valid for two years.

Tuition, Fees and Financial Assistance

The cost for this program is $3,000 per credit and includes tuition, student fees, and course materials and is the same for in-state and out-of-state residents. Limited merit aid may be available for qualified students. If you are accepted into the program, you may apply and be

considered for this aid by completing the Executive DBA Financial Support Plan form. The program can also share information regarding financial resources you may explore such as Federal loans and external funding. Visit tuition.pitt.edu for tuition information

Doctor of Business Administration Degree Requirements

Graduates would receive a DBA degree from the University of Pittsburgh upon successful completion of the following degree requirements:

- 72 credits (includes 27 credits that can be satisfied by transfer from an approved master's program, 33 credits of core courses, and 12 credits of supervised Practicum Research Project coursework).
- Practicum Research Project
- 3.0 GPA or higher to graduate
- One-week residency during each of the first two summers. Students facing travel/visa restrictions can request to participate virtually.

The minimum course load is 72 credits, including 27 transfer credits from a master's degree or equivalent, 33 credits of coursework, and 12 credits for the Practicum Research Project. A Pitt Business faculty member would supervise the Practicum Research Project. An additional faculty member (from Pitt Business and/or a partner institution) could serve as a co-advisor if additional specialty expertise is needed.

Total Credits: 72

Dual

Dual Degree: Accounting, MS / Analytics and Application of Artificial Intelligence for Business, MS

The STEM-designated Dual MS in Accounting and MS in Analytics & Applications of AI for Business is a 45-credit program that combines advanced accounting preparation with high-demand analytical and AI capabilities. Students enrolled in this program must complete the appropriate number of prerequisites, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

The Master of Science in Accounting program prepares students for leadership roles in financial, managerial, and tax accounting. Students gain general business knowledge and specialized accounting skills necessary for success. In addition, the program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the educational requirements for certification in Pennsylvania and many other U.S. states.

The Dual MS model provides students with a strong competitive edge by combining their discipline expertise with advanced training in analytics, data management, and applied AI for business. Through coursework in data mining, programming, machine learning, database management, and AI deployment, students learn to generate and apply insights to real business challenges across functions.
Emphasizing analytic and AI technical skills, responsible AI use, and core business foundations, the program equips graduates to translate complex analysis into strategic decisions that drive innovation and organizational impact.

Core Required Curriculum (39 Credits)

- BACC 2236 - ACCOUNTING INFORMATION SYSTEMS
- BACC 2238 - AUDITING
- BACC 2252 - TAXATION FOR ENTITIES
- BACC 2254 - ADVANCED FINANCIAL ACCOUNTING
- BACC 2258 - STRATEGIC COST MANAGEMENT
- BACC 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING
- BACC 2559 - TAXES AND DECISION MAKING

- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2578 - DATA MINING

Accounting Electives (3 Credits)

Select 3 credits of accounting electives from the list below:

- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS

Analytics & AI Electives (3 Credits)

Elective curriculum includes a mix of business analytics and AI specific electives or preapproved Business Analytics/AI related non-business graduate courses.

Elective courses within the MS Analytics and Applications of AI for Business degree are required to dedicate a substantial proportion of their content to Business Analytics and/or AI related topics, thereby advancing students' business analytics and AI knowledge while supporting the program's broader academic objectives.

At least 1.5 credits must come from experiential learning courses. The experiential learning component must emphasize the application of business analytics and/or AI methods to real world problems and require students to demonstrate competencies in data-driven decision making (e.g., through project courses or internships).

At least 1.5 credits must come from courses focused on responsible AI/ethical considerations.

Total Credits: 45

Dual Degree: Finance, MS / Analytics and Application of Artificial Intelligence for Business, MS

The STEM-designated Dual MS in Finance and MS in Analytics & Applications of AI for Business is a 45-credit program that combines advanced accounting preparation with high-demand analytical and AI capabilities. Students enrolled in this program must complete the appropriate number of prerequisites, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

The Master of Science in Finance provides students with a broad overview of the quantitative and qualitative aspects of finance, helping them understand what steps should be taken to maximize shareholder wealth. Students learn the technical skills of everything from valuation techniques, to forecasting methods, to the application of the time value of money, to building pro-forma financial statements.

The Dual MS model provides students with a strong competitive edge by combining their discipline expertise with advanced training in analytics, data management, and applied AI for business. Through coursework in data mining, programming, machine learning, database management, and AI deployment, students learn to generate and apply insights to real business challenges across functions. Emphasizing analytic and AI technical skills, responsible AI use, and core business foundations, the program equips graduates to translate complex analysis into strategic decisions that drive innovation and organizational impact.

Core Curriculum (36 Credits)

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2039 - INVESTMENT MANAGEMENT
- BFIN 2145 - FINANCIAL MODELING
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2578 - DATA MINING

Finance Electives (3 Credits):

Students must complete 3 credits of Finance electives from the list below or other approved BFIN XXXX course

- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2069 - FIXED INCOME SECURITIES
- BFIN 2141 - REAL ESTATE FINANCE
- BFIN 2126 - INVESTMENTS ANALYSIS & STRATEGIES
- BFIN 2420 - FINTECH
- BFIN 2430 - CORPORATE FINANCIAL STRATEGY
- BFIN 2035 - VALUATION

Analytics & AI Electives (6 Credits)

Elective curriculum includes a mix of business analytics and AI specific electives or preapproved Business Analytics/AI related non-business graduate courses.

Elective courses within the MS Analytics and Applications of AI for Business degree are required to dedicate a substantial proportion of their content to Business Analytics and/or AI related topics, thereby advancing students' business analytics and AI knowledge while supporting the program's broader academic objectives.

At least 1.5 credits must come from experiential learning courses. The experiential learning component must emphasize the application of business analytics and/or AI methods to real world problems and require students to demonstrate competencies in data-driven decision making (e.g., through project courses or internships).

At least 1.5 credits must come from courses focused on responsible AI/ethical considerations.

Total Credits: 45

Dual Degree: Management, MS / Analytics and Application of Artificial Intelligence for Business, MS

Dual Degree: Master of Science in Management & Master of Science in Analytics & Applications of AI for Business

The STEM-designated Dual MS in Management and MS in Analytics & Applications of AI for Business is a 45-credit program that combines advanced accounting preparation with high-demand analytical and AI capabilities. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements and maintain a minimum GPA of 3.0.

The MS in Management curriculum provides a broad foundation in core business disciplines, giving students an integrated understanding of how organizations operate across functions. Through coursework in areas such as finance, information systems, marketing, organizational behavior, human resources, and strategy, students develop skills in analytical thinking, problem solving, and leadership to prepare for roles in a wide range of organizational settings.

The Dual MS model provides students with a strong competitive edge by combining their discipline expertise with advanced training in analytics, data management, and applied AI for business. Through coursework in data mining, programming, machine learning, database management, and AI deployment, students learn to generate and apply insights to real business challenges across functions. Emphasizing analytic and AI technical skills, responsible AI use, and core business foundations, the program equips graduates to translate complex analysis into strategic decisions that drive innovation and organizational impact.

Core Required Curriculum (33 Credits)

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT
- BUSSCM 1760 - DATA MINING

Management Electives (6 Credits)

Students must choose 6 credits of general business electives. A variety of graduate-level courses from various business disciplines are offered each term.

Analytics & AI Electives (6 Credits)

Elective curriculum includes a mix of business analytics and AI specific electives and/or preapproved Business Analytics/AI related non-business graduate courses.

Elective courses within the MS Analytics and Applications of AI for Business degree are required to dedicate a substantial proportion of their content to Business Analytics and/or AI related topics, thereby advancing students' business analytics and AI knowledge while supporting the program's broader academic objectives.

At least 1.5 credits must come from experiential learning courses. The experiential learning component must emphasize the application of business analytics and/or AI methods to real world problems and require students to demonstrate competencies in data-driven decision making (e.g., through project courses or internships).

At least 1.5 credits must come from courses focused on responsible AI/ethical considerations.

Total Credits: 45

Dual Degree: Marketing Science, MS / Analytics and Application of Artificial Intelligence for Business, MS

The STEM-designated Dual MS in Marketing Science and MS in Analytics & Applications of AI for Business is a 45-credit program that combines advanced accounting preparation with high-demand analytical and AI capabilities. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements and maintain a minimum GPA of 3.0.

The Master of Science in Marketing Science prepares students for the future of marketing, offering a broad introduction to marketing alongside in-depth study of customer insights, research techniques, data analytics, digital marketing, and social media marketing. Students learn how to build effective marketing strategies based on data and the latest technological tools.

The Dual MS model provides students with a strong competitive edge by combining their discipline expertise with advanced training in analytics, data management, and applied AI for business. Through coursework in data mining, programming, machine learning, database management, and AI deployment, students learn to generate and apply insights to real business challenges across functions. Emphasizing analytic and AI technical skills, responsible AI use, and core business foundations, the program equips graduates to translate complex analysis into strategic decisions that drive innovation and organizational impact.

Core Required Curriculum (31.5 Credits)

- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMKT 2031 - MARKETING RESEARCH
- BMKT 2409 - MARKETING MANAGEMENT
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2578 - DATA MINING

Marketing Electives (7.5 Credits)

- BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE
- BMKT 2530 - SERVICES MKTG:STRATEGIES/TACTICS
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2527 - BRANDING IN THE AGE OF AI
- BMKT 2528 - ADVERTISING
- BMKT 2533 - BUSINESS TO BUSINESS

- BMKT 2569 - BRAND MANAGEMENT
- BMKT 2573 - AI IN MARKETING
- BIND 2024 - CONSULTING FIELD PROJECT
- BIND 2603 - INTERNSHIP
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON

Analytics & AI Electives (6 Credits)

Total Credits: 45

Dual Degree: MBA / Analytics and Application of Artificial Intelligence for Business, MS

The STEM-designated Dual MBA and MS in Analytics & Applications of AI for Business is a 60-credit program that combines business preparation with high-demand analytical and AI capabilities.

The MBA program prepares students to become agile and thoughtful leaders through broad exposure to core business domains and the integrated knowledge needed to navigate complex organizational environments. The program equips students with the skills and applied experiences required to make evidence-based decisions and to drive meaningful impact across a wide range of business settings.

The Dual MBA/MS model provides students with a strong competitive edge by combining their discipline expertise with advanced training in analytics, data management, and applied AI for business. Through coursework in data mining, programming, machine learning, database management, and AI deployment, students learn to generate and apply insights to real business challenges across functions. Emphasizing analytic and AI technical skills, responsible AI use, and core business foundations, the program equips graduates to translate complex analysis into strategic decisions that drive innovation and organizational impact.

Required Core Curriculum (34.5 Credits)

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BIND 2454 - INTEGRATED MBA CAPSTONE
- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2578 - DATA MINING
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT

Required Experience Based Learning (1.5 Credits)

In addition to the courses listed above, students are required to complete 1.5 credits in experiential learning coursework.

EBL requirement: BIND 2024 - CONSULTING FIELD PROJECT, BIND 27** Global Research Practicum; or Internship that has been approved by the faculty.

Required MBA Professional Courses (3 Credits)

To supplement the MBA Core Curriculum, students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses (18 Credits)

Students must choose 18 credits of general business electives. A variety of graduate-level courses from various business disciplines are offered each term.

Analytics & AI Electives (4.5 Credits)

Elective curriculum includes a mix of business analytics and AI specific electives and/or preapproved Business Analytics/AI related non-business graduate courses.

Elective courses within the MS Analytics and Applications of AI for Business degree are required to dedicate a substantial proportion of their content to Business Analytics and/or AI related topics, thereby advancing students' business analytics and AI knowledge while supporting the program's broader academic objectives.

At least 1.5 credits must come from courses focused on responsible AI/ethical considerations.

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to their degree program may declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Students should refer to the requirements for any micro-credentials or graduate certificates of interest and discuss with their academic advisor how those requirements might be stackable within their degree program.

Total Credits: 60

Dual Degree: MBA / Finance, MS

An option for those who desire both a wide-ranging understanding of business and a deep specialization in Finance, our School of Business Dual Degree MBA / MS Finance program allows you to pair your MBA with a School of Business Master of Science (MS) degree in Finance. The full-time two-year program option is designed to be completed in 21 months with time for a summer internship experience and includes an integrated learning capstone experience. Distinguish yourself with two graduate business degrees. Part-time students may complete the program at their own pace, typically within 3 to 4 years.

MBA Dual Degree

Students enrolled in the dual-degree with an MBA and MS program must fulfill the following requirements to earn the dual degrees:

1. A minimum of 60 credits of approved graduate work
2. The appropriate distribution of core, required, and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

To supplement the MBA Core Curriculum, students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to their degree program may declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Students should refer to the requirements for any micro-credentials or graduate certificates of interest and discuss with their academic advisor how those requirements might be stackable within their degree program.

MS Finance with Dual MBA

The following courses are required to satisfy the MS Finance portion of the dual-degree program:

- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2145 - FINANCIAL MODELING
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2039 - INVESTMENT MANAGEMENT

Total Credits: 60

Dual Degree: MBA / Management Information Systems, MS

The School of Business offers a dual-degree program that awards both an MBA and an MS in the Management of Information Systems to develop tech-savvy business leaders. The curriculum extends the MBA program to include advanced course work and a practicum in information management. Full-time students can complete the dual-degree program (60 credits required) in 21 months, four of which are usually spent working in an internship position. The program can also be completed on a part-time/evening basis.

MBA Dual Degree

Students enrolled in the dual-degree with an MBA and MS program must fulfill the following requirements to earn the dual degrees:

1. A minimum of 60 credits of approved graduate work
2. The appropriate distribution of core, required, and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

To supplement the MBA Core Curriculum, students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS

- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to their degree program may declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Students should refer to the requirements for any micro-credentials or graduate certificates of interest and discuss with their academic advisor how those requirements might be stackable within their degree program.

MS MIS Core Requirements (For Dual Degree with MBA)

The following 6 credits of required to satisfy the MS Management Information Systems portion of the dual-degree program.

- BMIS 2056 - MGT INFORMATION SYSTEMS PRACM
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
  Note: BMIS 2542 fulfills and replaces the MBA required BMIS 2402 course.

MS MIS Elective Requirements

Students in the dual-degree MBA/MS Management of Information Systems program must complete a minimum of 30 elective credits, of which at least 12 credits must be in the management information systems area. The remaining elective credits may be from any area of study offered at the School of Business.

Dual Degree: MBA / Marketing Science, MS

For those who desire both a broad understanding of business and a deep specialization in consumer behavior and marketing research, our Katz Dual Degree MBA / MS Marketing Science program allows you to pair your MBA with a Katz Master of Science (MS) degree in Marketing Science. Distinguish yourself with two graduate business degrees.

The full-time two-year program option is designed to be completed in 21 months with time for a summer internship experience and includes an integrated learning capstone experience. Part-time students may complete the program at their own pace, typically within 3 to 4 years.

MBA Dual Degree

Students enrolled in the dual-degree with an MBA and MS program must fulfill the following requirements to earn the dual degrees:

1. A minimum of 60 credits of approved graduate work
2. The appropriate distribution of core, required, and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Students should refer to the requirements for any micro-credentials or graduate certificates of interest and discuss with their academic advisor how those requirements might be stackable within their degree program.

MS Marketing Science Dual MBA

In addition to the MBA requirements listed below, the following courses are required the satisfy the MS Marketing Science portion of the dual-degree program:

- BMKT 2031 - MARKETING RESEARCH
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY

Total Credits: 60

Dual Degree: MBA / Supply Chain Management, MS

Gain a broad understanding of business and a deep specialization in supply chain management including procurement, operations, and analytics with our School of Business Dual Degree MBA / MS Supply Chain Management program. Pair your MBA with a School of Business STEM-designated Master of Science (MS) degree in Supply Chain Management.

The full-time two-year program option is designed to be completed in 21 months with time for a summer internship experience and includes an integrated learning capstone experience. Distinguish yourself with two graduate business degrees.

Part-time students may complete the program at their own pace, typically within 3 to 4 years.

MBA Dual Degree

Students enrolled in the dual-degree with an MBA and MS program must fulfill the following requirements to earn the dual degrees:

1. A minimum of 60 credits of approved graduate work
2. The appropriate distribution of core, required, and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

To supplement the MBA Core Curriculum, students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to their degree program may declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Students should refer to the requirements for any micro-credentials or graduate certificates of interest and discuss with their academic advisor how those requirements might be stackable within their degree program.

MS Supply Chain Management Core Curriculum

The following courses are required of all MS Supply Chain Management students.

- BQOM 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS

- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT

Dual Degree: Supply Chain Management, MS / Analytics and Application of Artificial Intelligence for Business, MS

The STEM-designated Dual MS in Supply Chain Management and MS in Analytics & Applications of AI for Business is a 45-credit program that combines advanced accounting preparation with high-demand analytical and AI capabilities. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements and maintain a minimum GPA of 3.0.

The Master of Science in Supply Chain Management provides students with broad supply chain knowledge and technical skills in sourcing, logistics, planning, inventory, pricing, and consulting. The program has a strong interdisciplinary flavor, letting students select from a wide range of electives that relate to everything from information technology to accounting, to strategy.

The Dual MS model provides students with a strong competitive edge by combining their discipline expertise with advanced training in analytics, data management, and applied AI for business. Through coursework in data mining, programming, machine learning, database management, and AI deployment, students learn to generate and apply insights to real business challenges across functions. Emphasizing analytic and AI technical skills, responsible AI use, and core business foundations, the program equips graduates to translate complex analysis into strategic decisions that drive innovation and organizational impact.

Core Required Curriculum (27 Credits)

- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
- BQOM 2578 - DATA MINING

Required Experience Based Learning (3 Credits)

In addition to the courses listed above, students are required to complete 3 credits in experiential learning coursework.

EBL requirement: BIND 2024 - CONSULTING FIELD PROJECT, BIND 27** Global Research Practicum; or Internship that has been approved by the faculty director (may substitute BQOM 2139 with faculty director approval) 3 cr.

Supply Chain Electives (6 Credits)

- BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS

Analytics & AI Electives (9 Credits)

Elective curriculum includes a mix of business analytics and AI specific electives and General Business Electives/or preapproved Business Analytics/AI related non-business graduate courses.

Elective courses within the MS Analytics and Applications of AI for Business degree are required to dedicate a substantial proportion of their content to Business Analytics and/or AI related topics, thereby advancing students' business analytics and AI knowledge while supporting the program's broader academic objectives.

At least 1.5 credits must come from courses focused on responsible AI/ethical considerations.

Total Credits: 45

Graduate Certificate

Accounting, Graduate Certificate

This 15-credit certificate is designed to equip students with the foundational skills in accounting.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Accounting. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Curriculum

The Graduate Certificate in Accounting would require the successful completion of 15.0 credits including 3.0 credits of required coursework (BACC 2401 - Financial Accounting) and 12.0 elective credits to include BACC2*** coursework or other with Accounting Faculty approval.

A student who has completed the Accounting, Micro-Credential would be able to count, or stack, the credits to the Graduate Certificate in Accounting. The Graduate Certificate in Accounting would be efficiently stackable to the following Katz degree programs:

- Master of Business Administration (MBA)
- Master of Science in Accounting (MAcc)

Total Credits: 15

Business Analytics, Graduate Certificate

This 15-credit certificate is designed to equip students with the quantitative skills to collect and evaluate data, and the qualitative skills to communicate the findings. Students will learn how to conduct data mining, database management, data programming, and other forms of advanced data analysis. Ultimately, students will be able to use data as a strategic asset to make better decisions and drive results

Curriculum

Admissions to the Graduate Certificate in Business Analytics may be conditional pending successful completion of the following pre-requisite coursework with a minimum grade in each course of a B or better:

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Required Courses (12 credits)

- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BMIS 2588 - DATA BASE MANAGEMENT
  Completion of either:
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
  OR
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Elective Courses Options (3 Credits)

Choose at least 3 credits from the below:

- BACC 2523 - ACCOUNTING DATA ANALYTICS
  Completion of either:
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
  OR
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BQOM 2537 - FORECASTING
- BQOM 2559 - APPLIED SIMULATION AND OPTIMIZATION
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Total Credits: 15

Finance, Graduate Certificate

This 15-credit certificate is designed to equip students with financial management skills.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Finance. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Required Courses

The Graduate Certificate in Finance would require the successful completion of 15.0 credits including 3.0 credits of required coursework (BFIN2409 Financial Management and BFIN2410- Financial Management 2) and 12.0 elective credits to include BFIN 2*** coursework or other with faculty approval.

A student who has completed the School of Business Micro-Credential in Finance would be able to count, or stack, the credits to the Graduate Certificate in Finance. The School of Business Graduate Certificate in Finance would be efficiently stackable to the following School of Business degree programs:

- Master of Business Administration (MBA)
- Master of Science in Finance (MSF)

- Dual-Degree MBA/MSF

Total Credits: 15

Management Consulting, Graduate Certificate

The Management Consulting certificate enables students to become familiar with the structure and workings of the management consulting industry and the essential toolkit of a consultant, while requiring at least one, and allowing multiple, (elective) project-based courses in which students apply that knowledge to gain experience working on a real-life client consulting project.

Curriculum

The curriculum for the certificate includes those that provide foundational knowledge in management consulting and a customizable set of elective coursework.

- Required credits: 6.0 credits
- Elective credits: 9.0 credits from list of approved School of Business elective courses, or alternate coursework, including from other Pitt schools, with faculty approval.

Required Courses: 6.0 Credits

- BIND 2024 - CONSULTING FIELD PROJECT
- BSEO 2570 - FUNDAMENTALS OF MANAGEMENT CONSULTING
- BSPP 2409 - STRATEGIC MANAGEMENT

Elective Courses: 9.0 Credits

- BSPP 2110 - SCALING INNOVATION STUDIO
- BENV 2115 - MARKET MANIPULATIONS
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BSEO 2509 - BUSINESS AND POLITICS
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1
- BSEO 2538 - STRATEGIC LEADERSHIP
- BSEO 2553 - STRATEGIC MANAGEMENT OF ACQUISITIONS AND DIVESTMENT
- BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER
- BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT IN THE ERA OF GLOBALIZATION, INNOVATION AND ESG

Total Credits: 15

Management Science, Graduate Certificate

This 15-credit certificate is designed to equip students with the quantitative skills in management science.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Management Science. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Curriculum

In this 15-credit certificate program, students will learn to employ management science techniques such as optimization, simulation, and statistics to deploy minimum resources to achieve maximum outcomes. They will receive interdisciplinary training of problem solving and decision making, with strong emphasis on management, business, consulting, marketing, finance, and other fields. Operations endeavor is omnipresent and cuts across every sector and industry. By completing this certificate program, students can enhance their knowledge and skills to improve organization's performance

The Graduate Certificate in Management Science would require the successful completion of 15.0 credits including 4.5 credits of required coursework (BQOM 2401 Statistical Analysis and BQOM 2421 Decision Technologies) and 10.5 elective credits to include BQOM 2*** coursework or other with faculty approval.

A student who has completed the School of Business Management Science, Micro-Credential would be able to count, or stack, the credits to the Graduate Certificate in Management Science. The School of Business Graduate Certificate in Management Science would be efficiently stackable to the following School of Business degree programs:

- Master of Business Administration (MBA)
- Master of Science in Management of Information Systems (MIS)
- Master of Science in Supply Chain Management (SCM)
- Dual Degree MBA/MIS
- Dual Degree MBA/SCM

Total Credits: 15

Technology Management, Graduate Certificate

This 15-credit Graduate Certificate in Technology Management prepares students for roles managing and leading technology projects, programs, and data analysis.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Technology Management. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Curriculum

The Graduate Certificate in Technology Management requires the successful completion of 15.0 credits including 1.5 credits of required coursework (BMIS 2409 - INFORMATION SYSTEMS) and 13.5 elective credits to include BMIS 2*** coursework or other with faculty approval.

A student who has completed the School of Business Micro-Credential in Technology Management would be able to count, or stack, the credits to the Graduate Certificate in Technology Management. The School of Business Graduate Certificate in Technology Management would be efficiently stackable to the following School of Business degree programs:

- Master of Business Administration (MBA)
- Master of Science in Management of Information Systems (MIS)
- Dual Degree MBA/MIS

Required Course (1.5 Credits)

1.5 credits of required coursework

- BMIS 2409 - INFORMATION SYSTEMS

Electives Courses (13.5 Credits)

Students must choose at least 13.5 credits of elective coursework.

- BMIS 2525 - CURRENT ISSUES IN COMPUTING
- BMIS 2537 - BUSINESS SYSTEMS PLATFORMS
- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BSPP 2110 - SCALING INNOVATION STUDIO

Total Credits: 15

Joint Degree

Social Work, MSW/MBA, Joint Degree

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the School of Business.

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students.

Students who want to earn a joint-degree must gain acceptance into both graduate degree programs by applying separately to each school. Students who have questions about this joint degree program should contact the admissions offices at both the School of Social Work and the School of Business.

MSW/MBA Joint Degree Admissions Criteria

1. SSW Requirement

1. A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.
    1. Undergraduate students with social work and human service backgrounds are preferred.
    2. In general, we would expect an undergraduate GPA of 3.0 or better for admission.

3. International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
4. Paid work experience is preferred but not required.

2. GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, School of Business, by the admission deadline.
3. Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.
4. Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
5. Applicants will submit their current resume.
6. English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.
7. Non-refundable application fee is $40.
8. Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.
9. Submission of online MSW application form by the admissions deadline data of **May 31**.

2. School of Business Requirement

1. A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.

    1. Undergraduate students with strong analytical backgrounds are preferred.
    2. In general, we would expect an undergraduate GPA of 3.0 or better for admission.
    3. International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
    4. Work experience is not necessary, though highly desirable.
2. GMAT/GRE scores are optional, but reccommended.
3. Applicants will submit application essays addressing questions related to experience, professional goals, and reasons for pursue the program.
4. Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
5. Applicants will submit their current resume.
6. English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
    1. TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
    2. IELTS Minimum acceptable score: 7.0
7. $50 non-refundable application fee.
8. Prospective candidates, domestic or international, will be interviewed before admission, in person or virtually.

Learning outcome goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

1. Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.
2. Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.
3. Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.

4. To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program requirements

1. A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.

2. The MBA program requires a minimum 45 credits,, of which at least 33* credits must be from School of Business courses, while the balance of 12 credits are accepted from School of Social Work courses.

Master of Business Administration Core Courses

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 7.5 elective credits of School of Business courses.

Program requirements

1. All MSW/MBA joint degree students will be required to take at least 33 credits of KGSB credits, consisting of the above 25.5 credits of core courses plus an additional 7.5 credits of School of Business electives. Thus, up to 12 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 45 credits required for the completion of the School of Business MBA degree.
2. The following School of Business courses will count as credits towards the MSW degree:
    1. BACC 2401 - FINANCIAL ACCOUNTING will qualify as equivalent to SWCOSA 2085 - FINANCIAL MANAGEMENT SOCIAL SERVICE INSTITUTIONS (3 credits), and will count as 3 credits for both the MSW and MBA programs,

2. BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
3. SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS), which will count as 3 credits for both the MSW and MBA programs, and
4. SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g.,BIND 2444 - MANAGEMENT SIMULATION CAPSTONE), which will count as 3 credits for both the MSW and MBA programs.

Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two-degree programs separately.

1. It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will count towards completion of the MSW program.

2. Thus, full-time COSA students with advanced standing must earn a total of 63 credits for CO students, and 60 credits for SA students (adding all MSW and MBA courses). This means a total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 33 credits of MBA courses, which includes 25.5 and 7.5 credits of required and electives, respectively.

3. Full-time COSA students without advanced standing must earn a total of 84 credits for CO students, and 81 credits for SA students (adding all MSW and MBA courses). This means a total of 51 social work credits to be taken by CO students and 48 credits to be taken by SA students. Additionally, they must take minimum of 33 credits of MBA courses, which includes 25.5 and 7.5 credits of required and electives, respectively.

Business Administration and Engineering, MBA/MS

The Swanson School of Engineering and the Katz Graduate School of Business have established joint MBA/MS programs with each of seven engineering departments. These programs are designed to meet the clear and growing need felt by various industry sectors for managers with sophisticated business and engineering skills. In today's environment, such cross-functional skills are essential in addressing multifaceted problems involving issues related to product development, quality, information systems, modeling and quantitative analysis, finance and accounting, international relations, and marketing.

Both full-time and part-time options are available. The full-time option can be completed in two academic years, whereas the part-time option may require a period of four to five years. The programs generally consist of 64.5 credits for full-time and part-time. It is designed for students with undergraduate degrees in engineering and, in some cases the physical sciences, preferably with industry work experience. Candidates must meet the admissions criteria of both the MBA program and the specific MS engineering program of interest.

Students accepted into the program will be expected to complete both degrees concurrently and pay full tuition. Courses will be scheduled in such a manner as to preclude students from receiving one degree before the other.

This program is only for those students seeking a professional MS engineering degree. Students interested in the research MS engineering degree track will not be admitted. Students who are enrolled in the joint degree program are expected to complete both degrees.

Full-time students will register for the program through the Katz Graduate School of Business for four semesters at the one-year MBA tuition rate.

Business Administration and International Development, MBA/MID

Requirements

Offered with the Graduate School of Public and International Affairs (GSPIA), the joint MBA/MPIA program enables students who are in the process of acquiring professional training in public policy (with a focus on international relations) to simultaneously obtain a substantial

knowledge of private sector management with a focus on international business. Similarly, the MBA/MID allows a student to focus on international development at GSPIA. These programs normally require at least five terms of full-time study and 75 credits.

Business Administration and Public and International Affairs, MBA/MPIA

Requirements

Offered with the Graduate School of Public and International Affairs (GSPIA), the joint MBA/MPIA program enables students who are in the process of acquiring professional training in public policy (with a focus on international relations) to simultaneously obtain a substantial knowledge of private sector management with a focus on international business. Similarly, the MBA/MID allows a student to focus on international development at GSPIA. These programs normally require at least five terms of full-time study and 75 credits.

Joint Degree: Business Administration and Law, MBA/JD

The School of Business and the School of Law provide the opportunity for a student to earn both an MBA and a JD degree in a period of three and a half years of full-time study. A total of 115 credits are required for both degrees.

For additional program information, contact the Admissions Office, School of Law , Phone: 412-648-1413.

MBA/Doctor of Medicine

Joint Degree

Students may pursue a joint degree program that results in an MBA from the School of Business and an MD from the School of Medicine.

Note: Joint-degree students complete the standard MD curriculum and 33 credits from the School of Business. The MBA requirements are completed after either the 2nd or 3rd year at the School of Medicine, at which points students transfer to the School of Business for one year to complete the MBA requirements. The two degrees will be awarded simultaneously after the completion of all requirements for both degrees.

Requirements for the joint degree MD/MBA

MD

Students complete the standard MD requirements from the School of Medicine.

Master of Business Administration requirements: 33

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS

- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 7.5 elective credits of School of Business courses.

Master's

Accounting and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which prepares students for leadership roles in financial accounting, managerial, and tax accounting. Students gain general business knowledge and specialized accounting and analytics skills. In addition, the program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the educational requirements for certification in Pennsylvania and many other U.S. states. Students enrolled in this program must complete the appropriate number of prerequisites required, and elective courses and maintain a minimum GPA of 3.0.

This program is closed to new applicants as of Fall 2026. Enrolled students may complete all degree requirements as planned. Students who wish to pursue analytics alongside a master's degree are encouraged to explore our dual degree programs with the MS in Analytics and Applications of AI for Business.

Prerequisite Courses

Prerequisite Courses, may be waived pending previous coursework (minimum grade of B or better)

- BUSACC 0030 - Financial Accounting
- BUSACC 0040 - Managerial Accounting

Required Courses (Required total: 37.5 credits):

- BACC 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING
- BACC 2236 - ACCOUNTING INFORMATION SYSTEMS
- BACC 2238 - AUDITING
- BACC 2252 - TAXATION FOR ENTITIES
- BACC 2254 - ADVANCED FINANCIAL ACCOUNTING

- BACC 2258 - STRATEGIC COST MANAGEMENT
- BACC 2559 - TAXES AND DECISION MAKING
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
  Programming course (choose one):
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2588 - DATA BASE MANAGEMENT
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT (minimum grade of B required)
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT (minimum grade of B required)
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING

Business Analytics Elective Courses (Required minimum 3 credits):

Elective credits allow students to participate in an internship for credit experience, complete other accounting or business analytics elective courses or an Experience-Based Learning course.

- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Accounting, MS

The Master of Science in Accounting is a 30-credit program designed to be completed, in two terms, on a full-time basis. The program prepares students for leadership roles in financial accounting, managerial, and tax accounting. Students gain general business knowledge and specialized accounting skills necessary for success. In addition, the program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the educational requirements for certification in Pennsylvania and many other U.S. states. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses and maintain a minimum GPA of 3.0.

Prerequisite Courses [6 credits]:

Prerequisite Courses; may be waived pending previous coursework (minimum grade requirement of B or better)

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING

Required Courses [21 credits]:

- BACC 2236 - ACCOUNTING INFORMATION SYSTEMS
- BACC 2238 - AUDITING
- BACC 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING
- BACC 2254 - ADVANCED FINANCIAL ACCOUNTING
- BACC 2258 - STRATEGIC COST MANAGEMENT
- BACC 2559 - TAXES AND DECISION MAKING
- BACC 2252 - TAXATION FOR ENTITIES

Accounting Elective Courses Group A (Required 3 Credits)

- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BSEO 2315 - BUSINESS LAW
  or
- BSEO 2316 - BUSINESS LAW

Accounting Elective Courses Group B (Required 6 credits)

- BACC 2100 - MACC INTERNSHIP
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BACC 2270 - PERSONAL WEALTH AND TAXES
- BACC 2562 - VOLUNTEER INCOME TAX ASSISTANCE
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2578 - DATA MINING
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS
- BSEO 2315 - BUSINESS LAW
  OR
- BSEO 2316 - BUSINESS LAW

Analytics and Applications of Artificial Intelligence for Business, MS

The STEM-designated 30-credit MS in Analytics & Applications of AI for Business equips students with the advanced analytical and AI capabilities required to lead in today's data-driven marketplace, while grounding every skill in practical business application. Students receive rigorous training in data mining, programming, machine learning, database management, and AI deployment, learning not only how to generate data insights but how to apply them to real organizational challenges in marketing, finance, operations, accounting, management, and strategy. The curriculum emphasizes ethical and responsible AI use alongside strong business fundamentals, ensuring graduates can translate complex analysis into informed decisions that drive innovation and competitive advantage. Students enrolled in this program must complete the appropriate number of prerequisites, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Core Required Curriculum (18 credits)

- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2578 - DATA MINING

Elective Courses (12 Credits):

Elective curriculum includes a mix of business analytics and AI specific electives and/or preapproved Business Analytics/AI related non-business graduate courses.

Elective courses within the MS Analytics and Applications of AI for Business degree are required to dedicate a substantial proportion of their content to Business Analytics and/or AI related topics, thereby advancing students' business analytics and AI knowledge while supporting the program's broader academic objectives.

At least 1.5 credits must come from experiential learning courses. The experiential learning component must emphasize the application of business analytics and/or AI methods to real world problems and require students to demonstrate competencies in data-driven decision making (e.g., through project courses or internships).

At least 1.5 credits must come from courses focused on responsible AI/ethical considerations.

Total Credits: 30

Executive Master of Business Administration, MBA

The Executive MBA is designed for working professionals who are emerging and advancing leaders who typically have 10+ years of work experience and 3+ years of management or leadership experience. This program blends rigorous academic learning with practical, real-world application, focusing on leadership, strategy, analysis, and innovation.

The Executive MBA coursework is delivered in a blended format with in-person sessions held one weekend (Friday/Saturday) a month on the University's Oakland campus, and up to half of the coursework delivered online. The program is designed to enhance your expertise and to build business acumen, analytic and strategic skills and prepare you to be a catalyst for change and lead your organization into the future. Professionals across industries discover how the addition of finance, economics, business management, and leadership skills opens doors to advancement. The program can be completed in 19-months over five terms, beginning in the Fall Term.

Required Core Courses

Required core courses taken by all Executive MBA students. The core courses identified are predominantly the same as the current curriculum for both programs. BQOM 2535 course exists but the name will be updated to remove healthcare from the title as it will be taken by all EMBA students.

- BACC 2256 - STRATEGIC COST MANAGEMENT
- BACC 2801 - FINANCIAL ACCOUNTING
- BFAE 2801 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISIONS
- BFIN 2306 - FINANCIAL MANAGEMENT
- BMIS 2811 - INFORMATION TECHNOLOGY AND BUSINESS VALUE
- BMKT 2306 - MARKETING MANAGEMENT
- BOAH 2801 - ORG BEHAV: LDRSHP & GRP EFFECT
- BQOM 2801 - STATSTCL ANAL: UNCERT
- BSEO 2901 - STRATEGY, MISSION AND VALUES
- BQOM 2535 - HEALTHCARE OPERATIONS AND SUPPLY CHAIN MANAGEMENT

Practicum and/or Consulting Project

Required: six credits of practicum and/or consulting project

Healthcare ARCO (Proposed ARCO in Executive Management of Healthcare Organizations)

Nine total credits are required for the healthcare ARCO. Required healthcare ARCO courses plus three credits of electives. The three elective credits may be taken with cross-industry students. Elective offerings may vary.

- BIND 2902 - COMPARATIVE HEALTHCARE POLICY
- BQOM 2821 - HEALTH INSURANCE AND FUNDING U.S. HEALTHCARE

Elective Courses

Nine credits of electives are required for the cross-industry track. Elective offerings may vary.

- BIND 2902 - COMPARATIVE HEALTHCARE POLICY
- BQOM 2821 - HEALTH INSURANCE AND FUNDING U.S. HEALTHCARE
  Three (3) credits of electives. Electives may be taken with cross-industry EMBA students. Elective offerings may vary.

Total Credits Required

45 Credits

Executive Masters of Business Administration Healthcare, MBA

The Executive MBA in Healthcare program is designed for physicians, clinicians, and healthcare professionals in administrative roles with 10+ years of experience in the industry and 3+ years of management or leadership. This program blends rigorous academic learning with practical, real-world application, focusing on leadership, strategy, analysis, and innovation across the healthcare industry.

The Executive MBA in Healthcare coursework is delivered in a blended format with in-person sessions held one weekend (Friday/Saturday) a month on the University's Oakland campus, and a third of the coursework delivered online. The program is designed for working professionals to build business acumen, analytic and strategic skills and prepare you to be a catalyst for change and lead the future of healthcare. Professionals across this industry discover how the addition of finance, economics, business management, and leadership skills can enable them to make a deeper impact in their organizations. The program can be completed in 19-months over five terms, beginning in the Fall Term.

Application Procedures

Apply Here

Applications may be submitted year-round, and admissions decisions are typically made within three weeks of receiving a completed application package and conducting an interview. Your application will either be accepted, rejected, or wait-listed. If wait-listed, an admissions decision may not be made until a month before classes begin. At that time, those with the strongest credentials are admitted. Applicants must hold a bachelor's degree from an accredited university.

Quick Check List:

- Online application form
- Resume or CV
- Self-nomination letter
- Two references, including your current supervisor
- Official academic transcripts from all institutions attended
- Official TOEFL or IELTS scores for non-English native speakers

Tuition, Fees and Financial Assistance

The cost for this program is $95,000 and includes tuition, student fees, course materials, and meals when attending on-campus weekends and is the same for in-state and out-of-state residents. Merit aid and travel scholarships are available for qualified students. Applicants can apply and be considered for this aid by completing the Executive MBA Financial Support Plan form. Visit tuition.pitt.edu for tuition information.

Executive MBA in Healthcare Degree Requirements

Graduates would receive an MBA degree from the University of Pittsburgh upon successful completion of the following degree requirements:

- 45 credits (include 37.5 credits in the core MBA curriculum and 7.5 credits of electives and practicum)
- 3.0 GPA or higher to graduate
- Completion of 6-hour research practicum

Executive MBA in Healthcare Core Curriculum

- BACC 2256 - STRATEGIC COST MANAGEMENT
- BACC 2802 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS
- BFAE 2850 - HEALTHCARE ECONOMICS
- BFIN 2306 - FINANCIAL MANAGEMENT
- BIND 2101 - PRACTICUM FOR EMBA HEALTHCARE STUDENTS
- BIND 2902 - COMPARATIVE HEALTHCARE POLICY
- BMIS 2911 - HEALTHCARE INFORMATION TECHNOLOGY
- BMKT 2554 - MARKETING DESIGN AND ANALYSIS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY
- BORG 2402 - LEADING PEOPLE IN HEALTHCARE ORGANIZATIONS
- BQOM 2535 - HEALTHCARE OPERATIONS AND SUPPLY CHAIN MANAGEMENT
- BQOM 2801 - STATSTCL ANAL: UNCERT
- BQOM 2821 - HEALTH INSURANCE AND FUNDING U.S. HEALTHCARE
- BSEO 2901 - STRATEGY, MISSION AND VALUES

Executive Elective Curriculum

One 1.5 credits elective course is part of the Executive MBA curriculum and is chosen by the students through student input and course availability. The elective allows them to learn more about a specific subject based on their interest and focus on current or future challenges they might face in their professional path. Executive MBA students may also select a different elective from the PMBA offerings based on scheduling and course availability; however, the course delivery method and schedule will be different.

Finance and Business Analytics, MS (STEM-designated)

The STEM-designated Master of Science in Finance and Business Analytics is a 45-credit master's degree program you may complete in three terms of full-time study beginning in the fall (August) term. Students develop foundational quantitative and qualitative finance skills with powerful data analysis tools and technical skills to be prepared to tackle challenges in portfolio analysis, risk management, and capital markets.

A CFA Institute Partner School, the School of Business offers a finance curriculum covering 70 percent of the topics on the Chartered Financial Analyst (CFA) exam and enhances your preparation for related certifications such as the Certified Public Accountant (CPA) and Certified Financial Planner (CFP) certifications.

This program is closed to new applicants as of Fall 2026. Enrolled students may complete all degree requirements as planned. Students who wish to pursue analytics alongside a master's degree are encouraged to explore our dual degree programs with the MS in Analytics and Applications of AI for Business.

Required Courses (34.5 Credits)

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2039 - INVESTMENT MANAGEMENT
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2145 - FINANCIAL MODELING
- BMIS 2588 - DATA BASE MANAGEMENT
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT (minimum grade of B required)
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
  (minimum grade of B required)
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
  Programming Course:
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
  OR
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Business Analytics Electives (Minimum 3 Credits)

- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMKT 2544 - SHOPPER ANALYTICS (pre-requisite is BMKT 2409)
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Finance Electives (Minimum 7.5 Credits)

- BFIN 2035 - VALUATION
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2141 - REAL ESTATE FINANCE
- BFIN 2342 - ALTERNATE ASSETS: FROM VC TO PE
- BFIN 2420 - FINTECH

Total Credits: 45

Finance, MS

The Master of Science in Finance is a 30-credit program designed to be completed in two terms, on a full-time basis. The program provides students with a broad overview of the quantitative and qualitative aspects of finance, helping them understand what steps should be taken to maximize shareholder wealth. Students learn the technical skills of everything from valuation techniques, to forecasting methods, to the application of the time value of money, to building pro-forma financial statements. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

A CFA Institute Partner School, the School of Business offers a finance curriculum covering 70 percent of the topics on the Chartered Financial Analyst (CFA) exam and enhances your preparation for related certifications such as the Certified Public Accountant (CPA) and Certified Financial Planner (CFP) certifications.

Required Courses (21.0 Credits)

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2039 - INVESTMENT MANAGEMENT
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2145 - FINANCIAL MODELING

Elective Courses (Minimum 9.0 Credits)

- BFIN 2035 - VALUATION
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2141 - REAL ESTATE FINANCE
- BFIN 2342 - ALTERNATE ASSETS: FROM VC TO PE
- BFIN 2420 - FINTECH

Total Credits: 30

Management Information Systems, MS (STEM-designated)

The MS in Management Information Systems is a STEM-designated program that develops tech-savvy business leaders. The program offers flexible options: it can be pursued standalone, with a Graduate Certificate in Business Analytics, as a dual degree with the MBA, or in a part-time format. Students enrolled in this program must complete a minimum of 24 credits of information systems-focused courses on topics including data programming, technology innovation, and project management, along with up to 6 credits of broader elective courses that are business-oriented and provide experience-based learning.

Required Courses (24 credits):

- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2537 - BUSINESS SYSTEMS PLATFORMS
- BMIS 2056 - MGT INFORMATION SYSTEMS PRACM
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2525 - CURRENT ISSUES IN COMPUTING
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION

Elective Courses (6 credits):

Students may choose a minimum of 6 credits of elective coursework.

Total Credits: 30

Management, MS

The curriculum includes 19.5 credits of core business management courses that overlap with the School of Business MBA curriculum. Students also choose 10.5 credits of electives from areas of study in finance, management of information systems, marketing, organizational behavior, human resource management, and entrepreneurship.

Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (19.5 credits)

Students are required to complete 19.5 credits of core courses.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Electives Courses (10.5 credits)

Students will choose 7.5 credits that reflect their business discipline interest, as well as a 3.0 credit Experienced Based Learning course. Students are encouraged to utilize their elective credits to complete a micro-credential, and should discuss possible options with their academic advisor.

Total Credits: 30

Marketing Science and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which allows students to gain technical skills in multivariate data analysis, data programming, data mining, and database management. In addition, the program helps students develop an in-depth understanding of consumer behavior through the study of customer insights, research techniques, digital marketing, and social media marketing with advanced data analysis and decision making techniques and skill. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements and maintain a minimum GPA of 3.0.

This program is closed to new applicants as of Fall 2026. Enrolled students may complete all degree requirements as planned. Students who wish to pursue analytics alongside a master's degree are encouraged to explore our dual degree programs with the MS in Analytics and Applications of AI for Business.

Required Courses (Required total: 30 credits):

- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BMIS 2588 - DATA BASE MANAGEMENT
- Programming course (choose one): BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON/BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMKT 2409 - MARKETING MANAGEMENT
- BMKT 2031 - MARKETING RESEARCH
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT (minimum grade of B required)
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING

Required Project Course (Required minimum 1.5 credits)

- BIND 2024 - CONSULTING FIELD PROJECT
- BIND 2603 - INTERNSHIP
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2530 - SERVICES MKTG:STRATEGIES/TACTICS
- BMKT 2569 - BRAND MANAGEMENT

Elective Courses (Required minimum: 7.5 credits):

Student may complete the remaining 7.5 credits of electives using any course from the marketing area (BMKT 2***), any of the courses on the required project course list not taken to satisfy the project course requirement, or any of the following:

- BMKT 2528 - ADVERTISING
- BMKT 2533 - BUSINESS TO BUSINESS

- BMKT 2573 - AI IN MARKETING
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Total Credits: 39

Marketing Science, MS

The Master of Science in Marketing Science is a 30-credit program designed to be completed in two terms, on a full-time basis. The program prepares students for the future of marketing, offering a broad introduction to marketing alongside in-depth study of customer insights, research techniques, data analytics, digital marketing, and social media marketing. Students learn how to build effective marketing strategies based on data and the latest technological tools. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements and maintain a minimum GPA of 3.0.

Required Courses (16.5 credits):

- BMKT 2409 - MARKETING MANAGEMENT
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BMKT 2031 - MARKETING RESEARCH
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY

Required Project Course (1.5 credits)

Students must complete a minimum of 1.5 project course credits.

- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BIND 2024 - CONSULTING FIELD PROJECT
- BIND 2603 - INTERNSHIP
- BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2530 - SERVICES MKTG:STRATEGIES/TACTICS
- BMKT 2569 - BRAND MANAGEMENT

Elective Courses (12 credits):

Student may complete the remaining 12 credits of electives using any course from the marketing area (BMKT 2***), any of the courses on the required project course list not taken to satisfy the project course requirement, or any of the following:

- BMKT 2528 - ADVERTISING
- BMKT 2533 - BUSINESS TO BUSINESS

- BMKT 2573 - AI IN MARKETING
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Total Credits: 30

Master of Business Administration, MBA

The MBA program prepares students to become agile and thoughtful leaders through broad exposure to core business domains and the integrated knowledge needed to navigate complex organizational environments. The program equips students with the skills and applied experiences required to make evidence-based decisions and to drive meaningful impact across a wide range of business settings.

Enrollment Options

The MBA is offered in three enrollment options: Signature, Accelerated, and Part-time. Each option delivers the same rigorous curriculum and teaching. The three formats are designed to accommodate a range of professional backgrounds, career goals, and scheduling needs.

Signature MBA

The Signature MBA program offers students a unique opportunity to complete a traditional two-year MBA program in only 18 months, allowing them to return to work sooner and thereby increase the return on investment of completing the degree. This full-time option is well suited for students who value an immersive campus experience and the depth of engagement that comes from a cohort-based, residential program. The culiminating experience for students in this program is a week-long Travel Capstone experience.

Accelerated MBA

The Accelerated MBA program enables students to complete the MBA full-time in an intensive 12-month format, minimizing time away from the workforce. Designed for students with extensive post-bachelor professional experience or sponsored professionals seeking to return to their organization within a condensed timeframe, the program begins in early August and is structured across three consecutive terms, concluding in July. The culiminating experience for students in this program is a weekend Pittsburgh-based Capstone experience.

Part-Time MBA (PMBA)

The Part-Time MBA program offers the same curriculum and teaching philosophies as the Signature and Accelerated MBA programs in a format designed for working professionals who do not want to put their careers on hold to pursue their MBA. The degree can be earned in seven semesters by taking approximately six credits per term. The program runs year-round with fall, spring, and summer semesters, with classes held on weekday evenings and select weekends.

Students select a modality, on-campus (in-person) or hybrid, for their courses and complete that portion of the program as a cohort.

In-Person: Core and required courses are delivered on the Pittsburgh campus.

Hybrid: Core and required courses are delivered via live synchronous online sessions, allowing students to participate from anywhere.

Regardless of modality, the culiminating experience for students in the PMBA is an on-campus immersion weekend for the Pittsburgh-based Capstone course.

MBA Degree Requirements

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Elective Courses

Students in the MBA program must complete a minimum of 19.5 elective credits from any area of study offered at the School of Business.

Taking electives at other Professional Schools at Pitt

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to the MBA program may be able to declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Not all micro-credentials or graduate certificates will be feasible for every MBA program. Students should discuss their interest in micro-credentials and graduate certificates with their academic advisor to see how those requirements might be stackable within their degree program.

Part Time MBA Hybrid Cohort

Part-Time MBA Program

The Part-Time MBA program offers the same curriculum and encompasses the same teaching philosophies as the Accelerated and Signature MBA programs offered in a format that meets the needs of working professionals who don't want to put their careers on hold in order to pursue their MBA. The Part-Time MBA can be earned in 7 semesters by taking approximately 6 credits per term. The program runs year-round with fall, spring, and summer semesters of 12 or 14 weeks each. Classes are conducted on weekday evenings and select weekends, and are offered in both on-campus and online formats. Student select a modality (online or on-campus) for their core and required courses and complete that portion of the program as a cohort. Students can then select elective courses across modalities, to fit their interests, schedule, and preferred learning format.

Regardless of selected modality for core and required courses, all students are required to complete an on-campus orientation weekend and an on-campus immersion weekend for the BIND 2454 Integrated MBA Capstone (1.5 credits)

MBA Degree Requirements

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS

- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Elective Courses

Students in the MBA program must complete a minimum of 19.5 elective credits from any area of study offered at the School of Business.

Taking electives at other Professional Schools at Pitt

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to the MBA program may be able to declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Not all micro-credentials or graduate certificates will be feasible for every MBA program. Students should discuss their interest in micro-credentials and graduate certificates with their academic advisor to see how those requirements might be stackable within their degree program.

Supply Chain Management and Business Analytics, MS (STEM-designated)

This STEM-designated program combines broad supply chain knowledge in sourcing, logistics, planning, process improvement, inventory, and pricing with in-depth business analytics skills in data analysis, data mining, data programming, and database management. Streamline process, manage risk, and deliver results in today's global business environment. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

This program is closed to new applicants as of Fall 2026. Enrolled students may complete all degree requirements as planned. Students who wish to pursue analytics alongside a master's degree are encouraged to explore our dual degree programs with the MS in Analytics and Applications of AI for Business.

Required Courses (28.5 credits):

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT (minimum grade of B required)
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
  (minimum grade of B required)
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BQOM 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2588 - DATA BASE MANAGEMENT

Elective Courses (13.5 Required)

Students need to complete 10.5 elective credits including 3.0 Experienced Based Learning credits. At least 4.5 credits need to come from the BQOM area, no more than 4.5 credits can come from the BIND area or adjacent area. 3.0 elective credits will be from the Business Analytics area.

Analytics Elective Courses (3.0 credits):

Students must complete a minimum of 3 credits in Analytics elective courses.

- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMKT 2544 - SHOPPER ANALYTICS
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Total Credits: 45

Supply Chain Management, MS (STEM-designated)

The Master of Science in Supply Chain Management is a 30-credit program designed to be completed in two terms, on a full-time basis. The program provides students with broad supply chain knowledge and technical skills in sourcing, logistics, planning, inventory, pricing, and consulting. The program has a strong interdisciplinary flavor, letting students select from a wide range of electives that relate to everything from information technology to accounting, to strategy.

Required Courses (13.5 credits):

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
- BQOM 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS

Experienced Based Learning Courses (3.0 credits)

Students are required to complete 3 credits of experienced based learning credits.

- BIND 2024 - CONSULTING FIELD PROJECT
- BIND 27** Global Research Practicum
- BIND 2603 - Supply Chain Internship
- BQOM 2139 - Lean Six Sigma

Supply Chain Elective Courses (9.0 credits):

Students must complete a minimum of 9 credits of Supply Chain elective courses.

- BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Business Elective Courses (4.5 credits):

Students may complete the remaining 4.5 credits of electives in any area of the School of Business.

Total Credits: 30

Micro-Credential

Accounting, Micro-Credential

The Micro-credential in Accounting requires the successful completion of 9.0 credits including 3.0 credits of required coursework (BACC 2401 - FINANCIAL ACCOUNTING) and 6.0 elective credits to include BACC 2*** coursework or other with faculty approval.

A student who has completed the School of Business Micro-Credential in Accounting is able to count, or stack, the credits to the Graduate Certificate in Accounting.

Data Programming for Business Insights, Micro-credential

Micro-Credential in Data Programming is designed to provide you with knowledge, skills, and abilities in the fundamentals of data programming.

Required Course (3 credits)

- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON

Elective Courses (6 credits)

Students should select 6 -credits from the following:

- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS

Finance, Micro-Credential

The Micro-credential in Finance would require the successful completion of 9.0 credits including 3.0 credits of required coursework (BFIN 2409 - FINANCIAL MANAGEMENT 1 and BFIN 2410 - FINANCIAL MANAGEMENT 2) and 6.0 elective credits to include BFIN 2*** coursework or other with faculty approval.

A student who has completed the School of Business Micro-Credential in Finance would be able to count, or stack, the credits to the Graduate Certificate in Finance.

Total Credits: 9

Foundations of AI for Business, Micro-Credential

The Micro-Credential in Foundations of AI for Business offers a condensed 9-credit pathway focusing on core technical and strategic AI competencies for business applications. The micro-credential in AI requires a pre-requisite of one of the following:

1. BMIS 2402 Computational Thinking (1.5)
2. BMIS 2542 Data Programming Essentials with Python (3 cr)
3. BMIS 2526 Advanced Data Programming with R (3 cr)
4. Or demonstrated programming experience

Students need to earn a B in whichever pre-requisite course they opt to take to be considered for admissions into the micro-credential.

Course Name	Course Number	Credits	Required or Elective
Technical Foundation of Generative AI	BMIS 2630	3.0	R
Deploying AI for Business: Strategy, Design, and Execution	BMIS 2635	3.0	R
Approved Electives		3.0	E
Total Credits		9.0	

Required Courses

These 6 credits are required for completion of the micro-credential

- BMIS 2630 - TECHNICAL FOUNDATIONS OF GENERATIVE ARTIFICAL INTELLIGENCE FOR BUSINESS
- BMIS 2635 - DEPLOYING ARTIFICIAL INTELLIGENCE (AI) IN BUSINESS: STRATEGY, DESIGN, AND EXECUTION

Elective Courses

3 Elective credits are required for the Micro-Credential. Examples of elective courses are provided below and other electives are being developed.

- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BMIS 2525 - CURRENT ISSUES IN COMPUTING
- BMIS 2537 - BUSINESS SYSTEMS PLATFORMS

- BMIS 2640 - RESPONSIBLE ARTIFICIAL INTELLIGENCE (AI) FOR BUSINESS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION
- BMKT 2573 - AI IN MARKETING
- BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Innovation and Entrepreneurship, Micro-credential

Micro-Credential in Innovation & Entrepreneurship is designed to provide you with knowledge, skills, and abilities to remain agile in an ever-changing business landscape. Substitutions for elective courses can be made with faculty approval.

Required Courses

- BSEO 2531 - ENTREP & NEW VENTURE INITIATION
- BSPP 2110 - SCALING INNOVATION STUDIO

Elective Courses Options

Choose at least 3 credits from the list below:

- BSEO 2012 - SOCIAL ENTREPRENEURSHIP
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BIND 2024 - CONSULTING FIELD PROJECT

Leading People in Organizations, Micro-Credential

Micro-Credential in Leading People in Organizations is designed to provide you with knowledge, skills, and abilities to be an effective business leader. Substitutions for elective courses can be made upon approval of the faculty.

Required Courses

- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSPP 2409 - STRATEGIC MANAGEMENT

Elective Courses Options

Choose at least 3 credits from the list below:

- BOAH 2421 - HUMN RESORC COMPETITIVE ADVNTG
- BOAH 2517 - INTERPERSONAL SKILLS FOR MANAGERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BOAH 2537 - CONFLICT RESOLUTION IN THE WORKPLACE 1
- BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER
- BSEO 2538 - STRATEGIC LEADERSHIP

Total Credits: 6

Management Consulting, Micro-Credential

Micro-Credential in Management Consulting offers you the opportunity to become familiar with the structure and workings of this industry, as well as the essential toolkit of a consultant. Substitutions for elective courses can be made with faculty approval.

Required Courses

The following two courses are required:

- BSPP 2409 - STRATEGIC MANAGEMENT
- BSEO 2570 - FUNDAMENTALS OF MANAGEMENT CONSULTING

Elective Courses Options

Choose at least 6 credits from the list below:

- BENV 2115 - MARKET MANIPULATIONS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BSEO 2509 - BUSINESS AND POLITICS
- BSEO 2538 - STRATEGIC LEADERSHIP
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1
- BSEO 2553 - STRATEGIC MANAGEMENT OF ACQUISITIONS AND DIVESTMENT
- BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER

Total Credits: 9

Management Science, Micro-Credential

The Micro-credential in Management Science would require the successful completion of 9.0 credits including 4.5 credits of required coursework (BQOM 2401 - STATISTICAL ANALYSIS and BQOM 2421 - DECISION TECHNOLOGIES) and 4.5 elective credits to include BQOM 2*** coursework or other with area director approval.

A student who has completed the School of Business Micro-Credential in Management Science would be able to count, or stack, the credits to the Graduate Certificate in Management Science.

Total Credits: 9

Marketing Management, Micro-Credential

The Micro-credential in Marketing Management requires the successful completion of 9.0 credits including 1.5 credits of required coursework (BMKT 2409 - MARKETING MANAGEMENT) and 7.5 elective credits to include BMKT 2*** coursework or other with faculty approval.

Sustainable Business, Micro-Credential

The Micro-Credential in Sustainable Business guides students to act as ethically responsible leaders. Students learn how companies manage their social (people, environmental (planet), and financial (profits) risks, obligations, and opportunities to positively impact both stakeholders and financial wellbeing. Substitutions for elective courses can be made upon approval.

Curriculum

Required Courses (4.5 Credits)

- BSEO 2578 - SUSTAINABLE BUSINESS STRATEGY
- BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT IN THE ERA OF GLOBALIZATION, INNOVATION AND ESG

Elective Courses (4.5 Credits)

Electives Course Options (must choose at least 4.5 credits from the below). Alternative elective coursework can also come from other Pitt schools, with faculty program director approval

- BACC 2561 - SUSTAINABILITY REPORTING
  Note: BACC 2401 or equivalent course is a required prerequisite for BACC 2561
- BENV 2115 - MARKET MANIPULATIONS
- BSEO 2012 - SOCIAL ENTREPRENEURSHIP
- BSEO 2033 - MANAGING THE NATURAL ENVIRONMENT
- BSEO 2509 - BUSINESS AND POLITICS

Total Credits: 9

Technology Management, Micro-Credential

The Micro-credential in Technology Management would require the successful completion of 9.0 credits including 1.5 credits of required coursework (BMIS 2409 - INFORMATION SYSTEMS) and 7.5 elective credits to include BMIS 2*** coursework or other with faculty approval.

Required Course (1.5 Credits)

All tracks for the Micro-credential in Technology Management require first taking BMIS 2409 Information Systems

- BMIS 2409 - INFORMATION SYSTEMS

Elective Courses & Tracks (7.5 Credits)

The micro-credential requires 7.5 of elective credits. There are three elective tracks offered: Digital Innovation, Project Management and Information Systems/AI Design. Regardless of the combination of electives taken, students earn one micro-credential in Technology Management.

Total Credits: 9

PhD

Accounting, PhD

The School of Business Accounting Doctoral Program discipline prepares graduates to succeed as accounting scholars and educators at top business schools in the United States and abroad. The program features rigorous coursework, thorough research training and close working relationships between doctoral students and faculty to prepare students to be leading accounting academics. Our graduates have an excellent track record of placements at research-oriented business schools and in succeeding in those environments.

Accounting students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within accounting, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of School of Business seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the School of Business PhD Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, accounting doctoral students typically complete School of Business accounting doctoral seminars (BACC 3000 and above) that may include the courses listed below. Students will take additional coursework in areas such as Finance, Econometrics, Game Theory, Cognitive Psychology, Experimental Design and other areas as appropriate. These remaining courses toward the student's program of study must be approved in advance by the Accounting faculty and the School of Business Doctoral Program Director. Students are also required to register for independent study courses and independent dissertation work/credits to complete the degree requirements.

Curriculum

The following accounting seminars are offered by the School of Business PhD Program (subject to student enrollment):

- BACC 3001 - INTRODUCTION TO ACCOUNTING RESEARCH
- BACC 3010 - INDEPENDENT STUDY IN ACCOUNTING
- BACC 3014 - EXPERIMENTAL RESEARCH IN ACCOUNTING
- BACC 3017 - ACCOUNTING WORKSHOP
- BACC 3021 - ARCHIVAL RESEARCH IN MANAGERIAL ACCOUNTING
- BACC 3025 - CAPITAL MARKETS RESEARCH IN ACCOUNTING
- BACC 3052 - CRITICAL THINKING IN ACCOUNTING II
- BACC 3099 - READINGS IN ACCOUNTING
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Business Analytics and Operations, PhD

The Business Analytics and Operations discipline offers flexible options for a doctoral student in a variety of related research topics including Supply Chain Management, Data Mining and Business Analytics, Decision Sciences, Project Management, Revenue Management, Simulation Methodology, Stochastic Modeling and Applied Statistical Methods, and Business Analytics. These programs require coursework for two years, followed by a period of dissertation-related research. The PhD program prepares students for a career in teaching and research at institutions of higher learning.

Business Analytics and Operations students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Business Analytics and Operations, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of seminars and courses (BQOM 3000 and above), as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the

student's faculty advisor and the Director of the School of Business PhD Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, Business Analytics and Operations PhD students will complete School of Business doctoral seminars (BQOM 3000 and up) that may include Linear and Nonlinear Programming, Simulation, Statistics, Stochastic Processes, Decision Theory, Current Topics in Operations, Value Chain, Data Mining, Business Analytics, Project Management, and Readings in Operations. Students may also take additional coursework from Pitt Business seminars in other disciplines such as Marketing or Finance. They may request courses from the Industrial Engineering Department and from other University of Pittsburgh approved graduate courses in addition to approved courses from other cross-registration eligible institutions.

The following business analytics and operations doctoral seminars may be offered by the School of Business PhD Program (subject to student enrollment). Students may supplement their programs of study with additional courses as noted. The following list suggests seminars and courses that students may use, with the permission of their advisors and the School of Business PhD Program Director, to satisfy the course work phase of their programs of study.

Curriculum

- BQOM 3020 - SIMULATION
- BQOM 3023 - DATA MINING SEMINAR
- BQOM 3024 - OPERATIONS MANAGEMENT FOUNDATIONS AND EMERGING TOPICS
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 3099 - READINGS IN OPERATIONS RESEARCH
- BFAE 3001 - MICROECONOMICS
- IE 2081 - NONLINEAR OPTIMIZATION
- IE 2100 - SUPPLY CHAIN ANALYSIS
- IE 2007 - STATISTICS AND DATA ANALYSIS
- IE 3094 - MARKOV DECISION PROCESSES
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3417 - STRUCTURAL EQUATION MODELING
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY
- BQOM 3010 - INDEP STUDY OPERATIONS RESEARCH

Finance, PhD

The finance PhD program seeks to prepare students to make significant contributions to the existing body of academic research in corporate finance, mergers and acquisitions, capital structure, internal firm organization, corporate diversification, corporate restructuring, financial institutions and investments and others. The program produces graduates that can independently identify important research questions and carry out theoretical and empirical investigation at levels suitable for publication in the top academic journals. The finance faculty works closely with students to develop suitable research topics and very often collaborates with students on joint research. In short, we strive for our graduates to obtain academic placements at top research institutions.

Finance students take courses from both the University of Pittsburgh School of Business and the Department of Economics as part of their training. The finance faculty offers seminars that provide the core of the doctoral students' training. These seminars introduce the theoretical underpinnings of finance. Beyond these seminars, students are expected to take additional finance seminars that focus on their chosen areas of interest. Since strong methodological skills are critical to a successful scholarly career, finance doctoral students typically also take courses in econometrics, statistics, and mathematical methods. Students are free to matriculate into courses within the School of Business, other colleges at the University of Pittsburgh (such as Statistics or Mathematics), or at Carnegie Mellon University.

A minimum of eight major and seven methodology-related courses are necessary to fulfill coursework requirements. Students typically pursue four courses per semester for two years prior to taking their comprehensive exams in late summer following their second year.

Students are also required to complete an independent research proposal/paper and submit it to the finance faculty at the end of the spring in their second year of study. It is anticipated that this proposal will eventually develop into a publishable research article; however, the

main goal of the assignment is for students to gain experience in identifying important research questions and carrying out theoretical and empirical investigation of these questions.

The following finance PhD seminars are offered by the School of Business PhD Program (subject to student enrollment):

Curriculum

The following finance doctoral seminars are offered by the School of Business PhD Program (subject to student enrollment)

- BFIN 3000 - FINANCE FUNDAMENTALS
- BFIN 3010 - INDEPENDENT STUDY IN FINANCE
- BFIN 3030 - FINANCE RESEARCH SEMINAR
- BFIN 3031 - CORPORATE FINANCE THEORY AND METHODS
- BFIN 3032 - CORPORATE FINANCE SEMINAR 1
- BFIN 3033 - CORPORATE FINANCE SEMINAR 2
- BFIN 3034 - CORPORATE FINANCE SEMINAR 3
- BFIN 3044 - CORPORATE FINANCE SEMINAR 4
- BFIN 3036 - EMPIRICAL ASSET PRICING
- BFIN 3099 - READINGS IN FINANCE
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Additional

The Economics, Math, and cross-registered courses may include:

- ECON 3001 - INTRO TO MATHEMATICAL METHODS
- ECON 3010 - MATHEMATICAL METHODS OF ECONOMIC ANALYSIS
- MATH 3225 - MATHEMATICS OF FINANCE 1
    - CMU 0723 Seminar in Finance 1-4

Information Systems and Technology Management, PhD

The doctoral program discipline in Information Systems and Technology Management prepares students for successful scholarly careers in research universities. The program provides students with theoretical knowledge and methodological skills to enable them to become productive researchers. Students in Information Systems and Technology Management study problems that practicing IS professionals and managers face as they design, use, and apply information systems and technologies to solve business problems.

Information Systems and Technology Management students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Information Systems and Technology Management, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Pitt Business seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the School of Business Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen-course total, Information Systems and Technology Management doctoral students typically complete School of Business ISTM doctoral seminars (BMIS 3000 and above) as noted below and combine these with choices from other disciplines, for example from Psychology or Statistics.

Students are strongly encouraged to register for all seminars offered by the ISTM faculty. See list below.

Curriculum

The following ISTM seminars may be offered towardthe major by the School of Business Doctoral Program (subject to student enrollment):

- BMIS 3010 - INDEP STUDY MGT INFOR SYSTEMS
- BMIS 3012 - FDS INFORMATION SYSTEMS RESEARCH
- BMIS 3019 - HUMAN/COMPUTER INTERACTION
- BMIS 3027 - ECONOMICS MODELS OF ARTIFICIAL INTELLIGENCE
- BMIS 3029 - SOCIAL MEDIA AND DIGITAL PLATFORMS
- BMIS 3039 - DIGITAL PLATFORMS, ALGORITHMS AND REMOTE WORK
- BMIS 3042 - DESIGN INFORMATION SYSTEMS RESEARCH
- BMIS 3043 - DESIGN IN INFORMATION SYSTEMS RESEARCH 2
- BMIS 3044 - QUANTIATIVE METHODS IN INFORMATION SYSTEMS RESEARCH
- BMIS 3099 - READINGS IN MIS
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDO 0000 - FULL-TIME DISSERTATION STUDY

Marketing, PhD

The marketing PhD program discipline seeks to prepare students to contribute to the marketing discipline via the discovery, development, and dissemination of knowledge. The program is designed to equip students with the requisite theoretical background and methodological skills for successful scholarly careers at institutions of higher learning. The marketing group feels strongly that the apprenticeship model is the most efficacious approach to doctoral training and students typically engage immediately in research projects with faculty. Recent students have been successful in publishing these projects in leading journals such as the Journal of Consumer Research, the Journal of Marketing Research, and the Journal of Marketing

The marketing interest group offers seminars that provide the theoretical core of marketing doctoral students' training. These seminars introduce the central conceptual and phenomenological aspects of the marketing field, as well as the methodological approaches employed in their examination. Since the field of marketing scholarship segments into consumer behavior, modeling, and marketing management, seminars are offered in each of these areas, plus a methodological and marketing theory seminar.

Curriculum

The following finance doctoral seminars are offered by the School of Business PhD Program (subject to student enrollment)

- BMKT 3001 - CONSUMER BEHAVIOR 1
- BMKT 3002 - CONSUMER BEHAVIOR 2
- BMKT 3010 - INDEPENDENT STUDY IN MARKETING
- BMKT 3014 - MARKETING STRATEGY
- BMKT 3017 - MARKETING MODELS
- BMKT 3025 - MARKET BEHAVIOR RESEARCH
- BMKT 3099 - READINGS IN MARKETING
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Additional Seminar Courses

Beyond these seminars, students are expected to take additional seminars (the minimum major course requirement is eight courses) that focus on their chosen area of interest. Students are free to matriculate into courses within the School of Business, other departments at the University of Pittsburgh (such as Psychology, Economics, or Statistics), or at Carnegie Mellon University.

Since strong methodological skills are critical to a successful scholarly career, marketing doctoral students typically take seven or more courses in analytical methods, statistics, and/or econometrics (the minimum course requirement for a combined research methods/minor is seven). A focus on analytical methods or advanced statistics is the norm. Below is a list of some of the topics offered to satisfy this requirement. These topics are offered University-wide, within the School of Business, or at Carnegie Mellon University. Other choices may be proposed by the student and approved by the faculty advisor.

Analysis of Variance
Probability Theory
Experimental Design
Multivariate Statistics
Mathematical Statistics
Introduction to Econometric Theory
Human Judgment and Decision Making
Behavioral Economics
Katz Microeconomics
Learning and Memory
Advanced Data Analysis
Advanced Topics in Emotion and Decision Making

Students are required to complete an independent research paper and submit it to the marketing faculty in the summer of their first year of study (third term). It is anticipated that this paper will develop into a publishable research article.

Organizational Behavior and Human Resources Management, PhD

The OBHR PhD program discipline focuses on preparing students to impact the study of people, processes and outcomes within the fields of organizational behavior and human resources management. Through research, collaboration, and dissemination of knowledge, students understand how to impact organizational effectiveness in a variety of different environments, industries, and across multiple levels of analyses. Our expectation is that students will craft a program of research that is built upon rigorous theory as well as strong methodological skills that are both necessary for effective scholarship. We encourage collaboration with OBHR faculty that has a proven track record of publishing within a variety of top outlets.

Organizational Behavior and Human Resources Management students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Organizational Behavior and Human Resources Management, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Pitt Business seminars and courses, as well as from approved University of Pittsburgh seminars and courses. For example, students often choose psychology, decision sciences, statistics, and research methodology to name a few. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the School of Business PhD Program. Any subsequent seminar/course changes must also be approved.

Curriculum

The following OBHR seminars are offered by the School of Business PhD Program (subject to student enrollment):

- BOAH 3002 - FOUNDATIONS OF ORGANIZATIONAL BEHAVIOR
- BOAH 3019 - RESEARCH IN ORGANIZATIONAL THEORY
- BOAH 3027 - OBHR RESEARCH WORKSHOP 1
- BOAH 3028 - OBHR RESEARCH WORKSHOP II
- BOAH 3099 - RDGS ORGNZTNL BEHAVIOR/HR MGT
- BORG 3005 - SEMINAR ON INNOVATION AND ORGANIZATIONAL CHANGE: A MICRO-LEVEL PERSPECTIVE
- BORG 3010 - INDEP STUDY ORGNZTNL STUDIES
- BORG 3020 - TOPICS ORGANIZATIONAL BEHAVIOR

- BORG 3039 - GROUP DYNAMICS, INTERGROUP RELATIONS & IDENTITY
- BORG 3099 - READINGS ORGANIZATIONAL STUDIES
- BUSADM 3011 - INTERNATIONAL MANAGEMENT
- BUSADM 3013 - WORK AND ORGANIZATIONS
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Strategic Management, PhD

Students in the Strategy discipline study the problems and issues facing general managers who must formulate and implement strategies for organizations in uncertain and ambiguous environments. Seminars cover theory and empirical findings related to strategy formulation and implementation and are intended to familiarize students with the variety of research perspectives relevant to the strategy field. In addition, each faculty member leading a course will ask participants to build upon extant research to develop their own research topics as a first step toward publishing articles.

Strategy students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Strategy, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Pitt Business seminars and courses, as well as from approved University of Pittsburgh seminars and courses.

Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the School of Business PhD Program. Any subsequent seminar/course changes must also be approved.

Curriculum

The following Strategy seminars are offered by the Scjhool of Business PhD Program (subject to student enrollment):

- BSPP 3010 - INDEP STUDY STRATGC PLNNG POLICY
- BSPP 3011 - STRATEGIC PLANNING SYSTEMS
- BSPP 3012 - RESEARCH IN COMPETITIVE STRATEGY
- BSPP 3014 - RESEARCH IN CORPORATE STRATEGY
- BSPP 3016 - INNOVATION, FIRM STRATEGY AND PERFORMANCE
- BSPP 3019 - SEMINAR IN ENTREPRENEURSHIP
- BSPP 3099 - READINGS STRATEGC PLNNG & POLICY
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Department of Business Administration and Executive Business Administration

Concentration

Executive Management of Healthcare Organizations

The area of concentration in Executive Management of Healthcare Organizations is available to students enrolled in the Executive MBA program in the School of Business. Designed for experienced professionals seeking to deepen their expertise at the intersection of business

and healthcare, the area of concentration provides a structured, focused curriculum that builds the strategic, operational, and leadership competencies essential to navigating today's complex healthcare environment.

Upon completing the nine required credits within the Executive MBA program, students who fulfill the concentration requirements will receive the Area of Concentration in Executive Management of Healthcare Organizations in addition to their MBA degree.

Healthcare Courses

- BIND 2902 - COMPARATIVE HEALTHCARE POLICY
- BQOM 2821 - HEALTH INSURANCE AND FUNDING U.S. HEALTHCARE

Elective Courses

Three credits of electives. Electives may be taken with cross-industry EMBA students. Elective offerings may vary.

Total Credits Required

Nine Credits

The School of Computing and Information

School of Dental Medicine

School of Dental Medicine

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and beyond. We are one of six Schools of Health Sciences at the University of Pittsburgh and are the only school at the University to manage our own clinic.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted in 1898, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.

The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. More than half a century ago, we pioneered the speciality dental care that we now deliver in our fully equipped Center for Patients with Special Needs.

The Pitt Dental Medicine research mission is to expand the boundaries of knowledge and build on discoveries to enhance the quality of human life. Our mission aligns with the University of Pittsburgh's position as a research-intensive university. In addition, our research is an essential part of the School's teaching mission for health science students. Furthermore, the contribution of research can be directly applied to patient care by advancing the knowledge base of the dental field as a whole. This, too, is a key component of education for Pitt Dental Medicine students and serves to integrate research into the future of clinical dentistry and ultimately benefit patients.

Every day, the positive contributions of our faculty, staff, residents and students-the Pitt Dental Medicine community-demonstrate their commitment to our mission of improving oral health through teaching, research and service. Visit the University of Pittsburgh School of Dental Medicine website, www.dental.pitt.edu, for more information.

Graduate and Professional Degree Programs at the School of Dental Medicine

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the Doctor of Dental Medicine (DMD); Doctor of Philosophy (PhD); Master of Science (MS); and Bachelor of Science (BS).

The four-year Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The International Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre doctoral curriculum with the rest of the class.

The Department of Oral and Craniofacial Sciences encompasses the study of fundamental biological phenomena related to the development, structure, and function of the craniofacial region as well as the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area with the aim of improving health. Current research focuses involve craniofacial regeneration and genetics.

The School of Dental Medicine offers advanced residency certificate and Master of Dental Medicine degree programs in each of the full array of dental specialties.

The School of Dental Medicine encourages students to engage in the public health and community service nature of dentistry. The *Certificate in Dental Public Health* offers an additional University-acknowledged certification program whereby students who have highly developed social/ public policy interests are able to participate in a variety of dental public health programs to develop essential teaching, learning, and leadership skills. The Certificate requires an additional 15 credits of coursework at the School of Dental Medicine, with 6

credits being shared core courses (SCOPE I and II) and one course of 2-3 credits taken at the Pitt School of Public Health. There is no additional tuition for students in the program.

To learn more about The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program offerings, please visit the University of Pittsburgh Undergraduate Catalog.

Mission, Vision, and Values

Mission

The mission of the University of Pittsburgh School of Dental Medicine is to improve oral health through Teaching, Research and Service:

- Teaching a new generation of clinicians to deliver oral health care with skill and compassion
- Research that expands the boundaries of our knowledge and builds on discoveries to enhance human life
- Service to the diverse community of patients who entrust themselves to our care

Vision

The University of Pittsburgh School of Dental Medicine will be a diverse, welcoming and supportive community widely recognized for excellence and leadership in the improvement of oral health.

- We will train our students to care for patients skillfully, professionally, and compassionately; to treat each patient with respect and kindness; and to be aware at all times of the privilege and responsibility of being entrusted with the care of another human being. We will model evidence-based treatment and the importance of life-long learning.
- We will actively contribute to the mission of the University of Pittsburgh to be a leading research institution, broadening the scientific foundations of dental and craniofacial medicine and translating new knowledge into life-enhancing treatments for people everywhere.
- We will be known for our clinical expertise and serve as a regional resource to which our neighbors will turn for comprehensive care. We will use the best techniques and current technologies to create optimal outcomes for our patients.
- We will maintain a strong and enduring connection with our alumni to help ensure our School's success for generations to come. Our alumni will carry on our mission through clinical excellence, service to the dental profession, and generous outreach to people in need.

Values

- **Service**: Providing exemplary service to our students, faculty, patients, and society
- **Passion for Excellence**: Continuously striving to achieve the highest level of excellence in education, research, and service

- **Professionalism and Integrity**: Adhering to the highest ethical and professional standards of our profession
- **Leadership**: Serving as role models and mentors to students, faculty, and staff to shape the future of oral health care
- **Collaboration**: Embracing a team approach to accomplish shared goals
- **Humanism**: Respecting the contributions of each person within the School of Dental Medicine family to foster an environment of trust, safety, and fairness

School of Dental Medicine Faculty

A faculty and staff directory is available on the School of Dental Medicine website.

Predoctoral (DMD) Program

Welcome to Pitt Dental Medicine

Students from Pennsylvania, across the country and around the world come to study at the University of Pittsburgh School of Dental Medicine. Among the best dental schools in the country, the School of Dental Medicine seeks only the most qualified students for admission to nationally recognized predoctoral and graduate academic programs. The central program at the school is the Doctor of Dental Medicine (DMD) program. Providing students with a solid evidence-based education in dental medicine, graduates of the program are well prepared to be practicing clinicians or researchers. The four-year predoctoral program begins at the White Coat Ceremony and leads to a Doctoral degree in Dental Medicine (DMD). Advanced dental education and residency programs are available to students, including the Oral Biology Graduate Program.

Competency-Based Educational Program

The four-year predoctoral program prepares students to provide basic health promotion and disease prevention, diagnose and develop treatment plans, analyze complex medical and dental cases, and achieve competency in all areas defined for general practitioners. The competency-based curriculum also reflects the school's commitment to supporting the development of professionalism, life-long learning, and synthesis of clinical and biomedical science concepts.

View our four-year curriculum.

Beyond the Classroom

Student learning continues far beyond the classroom. Community service is encouraged through the Student Community Outreach Program and Education (SCOPE) and the Univeristy of Pittsburgh WISER Center offers dental students hands-on medical experience in a world-class multidisciplinary simulation-based training facility. The Simulation Clinic gives students life-like experience with simulated patients in a classroom, clinical learning environment and the Fassinger Learning Resource Center lets students continue learning past the traditional hours and space of the classroom meetings.

Students are encouraged to participate in any of a number of the school's active student organizations to connect with others sharing and investigating the same interests. Student organizations focus on advancing knowledge and extend the frontiers of a particular segment of oral health. Personal, academic and career counseling are available through the school's Office of Student Affairs for all students. An extensive library system, learning skills center, housing resource center, student health care and recreational and fitness facilities are available through the University.

Research opportunities abound for students in good academic standing to study many different aspects of dental research, including craniofacial genetics, tissue regeneration, informatics, public health and other fields. With an extended history of profound dental research, the University of Pittsburgh School of Dental Medicine also fosters interactions between dental students and researchers in other disciplines. Academic rewards and contributions to the dental profession are just two reasons many students conduct research at the school. Students have opportunities to share their projects and results at national meetings and conferences and provide excellent learning and

networking opportunities with colleagues. Student researchers also may compete for awards, scholarships, and other opportunities at the University.

About the School of Dental Medicine

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.
Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull. Every day, the positive contributions of our faculty, staff, residents and students-the Pitt Dental Medicine family-demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the School of Public Health; and bachelor of science (BS).

The four-year Doctor of Dental Medicine (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The International Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre doctoral curriculum with the rest of the class.

The Department of Oral and Craniofacial Sciences encompasses the study of fundamental biological phenomena related to the development, structure, and function of the craniofacial region as well as the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area with the aim of improving health. Current research focuses involve craniofacial regeneration and genetics.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The intreprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education.

The School of Dental Medicine offers advanced residency certificate and Master of Dental Medicine degree programs in each of the full array of dental specialties.

General Dentistry and Specialty Clinics

The School of Dental Medicine provides clinical education and patient care through 15 dental clinics encompassing general dentistry, anesthesiology, special needs, emergency, endodontics, implants, oral and maxillofacial pathology, oral and maxillofacial surgery, orthodontics and dentofacial orthopaedics, pediatric dentistry, periodontics and preventive dentistry, dental hygiene, endodontics, prosthodontics, radiology, and restorative dentistry/comprehensive care.

Clinical Centers
The Multidisciplinary Implant Center focuses on patient care, teaching, and research related to the treatment of tooth loss and the functional bone and soft tissue deficits that can follow tooth loss.
The Center for Patients with Special Needs was established by Dean Thomas W. Braun as a school priority to centralize and increase treatment capacity for patients with physical, developmental, neurological, and intellectual disabilities.
University Dental Health Services (UDHS) is a legally separate nonprofit practice plan that is closely affiliated with the School of Dental Medicine. UDHS providers are full- or part-time faculty members, many of whom are board-certified specialists and nationally recognized experts in their respective fields.

Important Information

- Type of degree granted: DMD
- Class size: 80
- Length of program: 4 years
- DAT: required
- Applications accepted through AADSAS
- Interview are granted by invitation in the fall and early spring
- Have questions? Email us at dentaladmissions@dental.pitt.edu

The program in dental education is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Doctoral

Doctor of Dental Medicine, DMD

The mission of the University of Pittsburgh School of Dental Medicine is to improve oral health through Teaching, Research, and Service. Teaching a new generation of clinicians to deliver oral health care with skill and compassion. Research that expands the boundaries of our knowledge and builds on discoveries to enhance human life. Service to the diverse community of patients who entrust themselves to our care.

The four-year DMD program prepares students to provide oral health care at the level of a general dentist, including health promotion and disease prevention, assessment and diagnosis, treatment planning, clinical care, and practice management. The competency-based curriculum also reflects the school's commitment to supporting the development of professionalism and ethics, person-centered care, integration of the sciences, and evidence-based care and critical thinking.

Contact Information

University of Pittsburgh
School of Dental Medicine
3501 Terrace Street
Pittsburgh PA 15261

https://www.dental.pitt.edu/

Admission Requirements

Admission requirements are outlined on the School of Dental Medicine website.

Admission Process

The DMD admission process, including application deadlines and contact information, is outlined on the School of Dental Medicine website.

Financial Aid

The School of Dental Medicine website provides information about financing a DMD education, including scholarship opportunities and student loan programs.

Degree Requirements

Degree requirements include successful completion of all required courses in the DMD curriculum. Students are also required to achieve competence in all defined areas as well as complete two selective courses of their choosing.

An overview of the four-year DMD curriculum is provided on the School of Dental Medicine website.

Degree Options

In addition to the traditional DMD program, the School of Dental Medicine offers simultaneous degree options through the Department of Oral and Craniofacial Sciences . Students may earn a Doctor of Philosophy (PhD) or Master of Science (MS) degree in Oral and Craniofacial Science in one of two areas of concentration:

- Craniofacial and Dental Genetics
- Craniofacial Tissue Regeneration

The program in dental education is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The American Dental Association Commission on Dental Accreditation can be contacted at 800-232-6108 or at 401 North Michigan Avenue, Suite 3300, Chicago, IL, 60611-4250. The Commission's web address is https://www.ada.org/en.

DMD Curriculum

Following is a listing of all DMD courses and a typical curriculum for each of the four years of the program:

First Year-Fall Term

- DIASCI 5110 - FUNDAMENTALS OF RADIOLOGY 1
- DMED 5110 - FOUNDATIONS OF PERSON-CENTERED CARE
- DMED 5112 - PRINCIPLES OF PROFESSIONAL PRACTICE
- DMED 5130 - PROFESSIONALISM AND ETHICS 1
- OCS 5115 - MICROBIAL PHYSIOLOGY AND IMMUNOLOGY
- OCS 5118 - EMBRYOLOGY AND ORAL TISSUES
- OCS 5119 - MOLECULAR AND CELL BIOLOGY
- OCS 5120 - BODY TISSUES
- RESTD 5111 - DENTAL ANATOMY AND MORPHOLOGY

- RESTD 5118 - DENTAL ANATOMY AND MORPHOLOGY LAB

First Year-Spring Term

- DIASCI 5140 - FUNDAMENTALS OF RADIOLOGY 2
- DMED 5142 - FOUNDATIONS OF PERSON-CENTERED CARE 2
- DMED 5143 - PRINCIPLES OF PROFESSIONAL PRACTICE 2
- DMED 5144 - CARIOLOGY AND CARIES MANAGEMENT 1
- DMED 5145 - CARIOLOGY AND CARIES MANAGEMENT 1 LAB
- DMED 5146 - CONTEMPORARY CARIOLOGY: FOUNDATIONS OF PREVENTION AND INTERVENTION
- DMED 5160 - PROFESSIONALISM AND ETHICS 2
- OCS 5140 - SYSTEMIC GROSS ANATOMY
- OCS 5141 - SYSTEMIC HUMAN PHYSIOLOGY 1
- OCS 5142 - HEAD AND NECK GROSS ANATOMY
- OCS 5144 - SYSTEMIC HUMAN PHYSIOLOGY 2
- PERIO 5141 - PERIODONTOLOGY 1
- PERIO 5143 - PERIODONTOLOGY 1 LAB
- PROSTH 5142 - DENTAL MATERIALS

First Year-Summer Term

- DIASCI 5173 - GENERAL AND SYSTEMIC PATHOLOGY
- DMED 5170 - CARIOLOGY AND CARIES MANAGEMENT 2
- DMED 5171 - CARIOLOGY AND CARIES MANAGEMENT 2 LAB
- DMED 5173 - APPLICATIONS OF PERSON-CENTERED CARE
- DMED 5190 - PROFESSIONALISM AND ETHICS 3
- OCS 5176 - IMMUNOLOGY
- PERIO 5181 - PERIODONTOLOGY 2
- PERIO 5183 - PERIODONTOLOGY 2 LAB
- PROSTH 5171 - PRINCIPLES OF DENTAL OCCLUSION

Second Year-Fall Term

- DENT 5211 - DIAGNOSIS AND TREATMENT PLANNING 1
- DIASCI 5214 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 1
- DMED 5212 - APPLICATIONS OF PROFESSIONAL PRACTICE 1
- DMED 5230 - PROFESSIONALISM AND ETHICS 4
- ENDOD 5210 - ENDODONTICS 1
- ENDOD 5216 - ENDODONTICS 1 LAB
- PEDENT 5211 - PEDIATRIC DENTISTRY 1
- PERIO 5214 - PERIODONTOLOGY 3
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PROSTH 5211 - FIXED PARTIAL DENTURES 1
- PROSTH 5215 - FIXED PARTIAL DENTURES 1 LAB
- PROSTH 5218 - COMPLETE DENTURES
- PROSTH 5219 - COMPLETE DENTURES LAB

Second Year-Spring Term

- DENT 5242 - DIAGNOSIS AND TREATMENT PLANNING 2
- DIASCI 5244 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 2
- DIASCI 5245 - INTRODUCTION TO DENTAL RADIOGRAPHIC TECHNIQUES
- DMED 5243 - APPLICATIONS OF PROFESSIONAL PRACTICE 2
- DMED 5260 - PROFESSIONALISM AND ETHICS 5
- DSANE 5241 - ANESTHESIA 1: LOCAL ANESTHESIA
- ENDOD 5247 - ENDODONTICS 2 LAB
- ENDOD 5252 - ENDODONTICS 2
- OCS 5245 - CRANIOFACIAL GENETICS
- ODO 5242 - INTRODUCTION TO ORTHODONTICS
- ORSUR 5241 - ORAL SURGERY 1
- PEDENT 5242 - PEDIATRIC DENTISTRY 2 LAB
- PEDENT 5253 - PEDIATRIC DENTISTRY 2
- PERIO 5241 - PERIODONTAL INSTRUMENTATION
- PERIO 5243 - PERIODONTAL CLINIC
- PROSTH 5241 - REMOVABLE PARTIAL DENTURES
- PROSTH 5245 - REMOVABLE PARTIAL DENTURES LABORATORY
- PROSTH 5251 - FIXED PARTIAL DENTURES 2
- PROSTH 5256 - FIXED PARTIAL DENTURES 2 LAB
- PROSTH 5258 - IMPLANTOLOGY

Second Year-Summer Term

- CDENT 5272 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 1: COMMUNITY OUTREACH
- DENT 5283 - DIAGNOSIS AND TREATMENT PLANNING 3
- DMED 5290 - PROFESSIONALISM AND ETHICS 6
- DSANE 5245 - LOCAL ANESTHESIA TECHNIQUE LAB
- DSANE 5272 - ANESTHESIA 2: MEDICAL EMERGENCIES
- ODO 5275 - INTRODUCTION TO ORTHODONTICS LAB
- ORSUR 5283 - ORAL SURGERY 2
- PROSTH 5271 - DIGITAL DENTISTRY 1
- RESTD 5282 - OPERATIVE TECHNIQUES REVIEW

Third Year-Fall Term

- CDENT 5312 - PRINCIPLES AND PRACTICE OF DENTAL PUBLIC HEALTH
- DENT 5312 - DENTISTRY FOR PATIENTS WITH SPECIAL HEALTHCARE NEEDS
- DIASCI 5320 - MANAGEMENT OF DENTAL EMERGENCIES
- DMED 5310 - OROFACIAL PAIN AND TEMPOROMANDIBULAR JOINT DISORDERS
- DMED 5330 - PROFESSIONALISM AND ETHICS 7
- DSANE 5313 - ANESTHESIA 3: PAIN AND ANXIETY CONTROL
- DSANE 5315 - NITROUS OXIDE LAB
- ENDOD 5313 - ENDODONTICS 3
- ORSUR 5313 - ORAL SURGERY 3

Third Year-Spring Term

- DIASCI 5345 - SEMINARS IN ORAL PATHOLOGY AND ORAL MEDICINE

- DMED 5360 - PROFESSIONALISM AND ETHICS 8
- DSANE 5342 - CLINICAL MEDICINE
- DSANE 5344 - MEDICAL EMERGENCIES - WISER CENTER
- ODO 5319 - CLINICAL ORTHODONTICS
- ORSUR 5344 - ORAL SURGERY 4
- PERIO 5346 - PERIODONTOLOGY 4
- PROSTH 5348 - DIGITAL DENTISTRY 2

Third Year-Summer Term

- CDENT 5372 - ETHICS AND BEHAVIORAL DENTISTRY
- DENT 5377 - SUCCESSFUL PRACTICE MANAGEMENT 3
- DENT 5383 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 1
- DENT 5389 - CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS 1
- DMED 5370 - MULTIDISCIPLINARY CASE STUDIES
- DMED 5390 - PROFESSIONALISM AND ETHICS 9
- DIASCI 5389 - CLINICAL EMERGENCY 1
- ENDOD 5388 - CLINICAL ENDODONTICS 1
- ORSUR 5388 - CLINICAL ORAL SURGERY 1
- PEDENT 5379 - CLINICAL PEDIATRIC DENTISTRY 1
- PERIO 5379 - CLINICAL PERIODONTICS 1
- PROSTH 5375 - CLINICAL PROSTHODONTICS 1
- RESTD 5375 - ESTHETIC RESTORATIVE DENTISTRY
- RESTD 5379 - CLINICAL RESTORATIVE DENTISTRY 1

Fourth Year-Fall Term

- DENT 5000 - FULL-TIME DENTAL MEDICINE STUDY
- DMED 5430 - PROFESSIONALISM AND ETHICS 10
- PROSTH 5377 - SIMULATED PATIENT TREATMENT

Fourth Year-Spring Term

- CDENT 5440 - STUDENT COMMUNITY OUTREACH AND EDUCATION PROGRAM (SCOPE) 2
- DENT 5440 - SENIOR CASE PRESENTATION
- DENT 5455 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 2
- DENT 5469 - CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS 2
- DIASCI 5459 - CLINICAL RADIOLOGY
- DIASCI 5469 - CLINICAL EMERGENCY 2
- DMED 5440 - PRE-TREATMENT EVALUATION AND MEDICAL RISK ASSESSMENT
- DMED 5460 - PROFESSIONALISM AND ETHICS 11
- ENDOD 5448 - CLINICAL ENDODONTICS 2
- ORSUR 5449 - CLINICAL ORAL SURGERY 2
- PEDENT 5449 - CLINICAL PEDIATRIC DENTISTRY 2
- PERIO 5449 - CLINICAL PERIODONTICS 2
- PROSTH 5448 - CLINICAL PROSTHODONTICS 2
- PROSTH 5469 - CLINICAL IMPLANT DENTISTRY
- RESTD 5449 - CLINICAL RESTORATIVE DENTISTRY 2
- Two Selective Courses (Minimum 1 Credit Total)

Total Credits: 233.50

International Advanced Standing (DMD) Program

The International Advanced Standing Program (IASP) at the University of Pittsburgh School of Dental Medicine is designed to permit qualified, international dentists who graduated from programs not accredited by the Commission on Dental Accreditation (CODA) to earn a Doctor of Dental Medicine (DMD) degree from Pitt Dental Medicine.

The IASP is a minimum of two academic years in length. It is individualized for each admitted student and may require additional time to complete. The program begins in May of each year with intensive, one-term didactic and preclinical courses. Following successful completion of this provisional segment, IASP students enter the predoctoral program.

Requirements to Apply to Program

English Language Proficiency

- Must be proficient in the English language.
- Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) (IB and Home based).
- Successful completion of the TOEFL with a score of 100 or above is preferred.
- TOEFL results must be dated after Dec. 31, 2021 and sent directly to ADEA CAAPID®.

National Board Dental Examination (NBDE) (INDBE)Requirements

- Program requires passage of NBDE Parts I and II or INDBE to be considered for admission.
- Official NBDE both parts or INDBE results must be entered on the ADEA CAAPID application under the "Academic History" > "Standardized Tests" section.

Advanced Dental Admission Test (ADAT)

- Completion of the ADAT is preferred, but not required for admission to the program.

Letters of Evaluation

- Three Letters of Evaluation are required*:
- Two letters of evaluation must be from either a dean, associate dean, department chair or faculty member of the dental school from which applicant graduated.
- One letter must be from a shadowing experience, preferably within the United States.
- These letters must be directly uploaded by the letter writers to ADEA CAAPID. When you fill out your CAAPID application you will provide the names of your evaluators and their contact information. CAAPID will then contact them via email with instructions on how to submit a letter. The email will include a link to an online portal where they will upload their letters.
- Up to three additional letters may be uploaded by the applicant to the "Documents Section" of their CAAPID application.

**These three letters are non-negotiable.*

Transcripts and Evaluations

- All foreign dental school transcripts must be evaluated and uploaded by transcript evaluators; either the ECE or WES evaluation will be accepted.
- Licenses/certifications should be uploaded to ADEA CAAPID in the "Supporting Information" > "Licenses" section.

Application Fees

- In addition to the CAAPID application fee, a university application fee of $75 is required upon submission of your application.
- University application fee can be paid online.

Additional Requirements

- Qualified applicants will be invited for a virtual interview and an in-person bench test.
- If invited for interview, applicants will be asked to submit:
- An electronic copy of a passport page of **any** valid visa status or proof of U.S. citizenship or permanent residency (*any status is acceptable*) and
- An electronic 2" x 2" cell phone "headshot" photo. Photo must be in .jpeg or .png format.
- A bench test fee will be required from those applicants invited to interview.
- Additionally, accepted applicants will be required to pay a non-refundable tuition deposit at time of acceptance to be applied to the fall term and a non-refundable fee prior to the provisional summer program that begins in early May.
- Again, all fees described herein are non-refundable.

Learn more about the International Advanced Standing Program at dental.pitt.edu/education/international-advanced-standing-program

Summer Program

Advanced Standing students are required to complete the following courses in the Summer Program before they join other DMD students in their third and fourth years.

- DENT 5000 - FULL-TIME DENTAL MEDICINE STUDY
- DMED 5145 - CARIOLOGY AND CARIES MANAGEMENT 1 LAB
- DMED 5171 - CARIOLOGY AND CARIES MANAGEMENT 2 LAB
- DIASCI 5244 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 2
- DSANE 5245 - LOCAL ANESTHESIA TECHNIQUE LAB
- ENDOD 5247 - ENDODONTICS 2 LAB
- PROSTH 5245 - REMOVABLE PARTIAL DENTURES LABORATORY
- DENT 5283 - DIAGNOSIS AND TREATMENT PLANNING 3
- DSANE 5272 - ANESTHESIA 2: MEDICAL EMERGENCIES
- ODO 5275 - INTRODUCTION TO ORTHODONTICS LAB
- PROSTH 5271 - DIGITAL DENTISTRY 1
- RESTD 5282 - OPERATIVE TECHNIQUES REVIEW

Advanced Dental Education and Residency Programs

The School of Dental Medicine offers nine Advanced Dental Education and Residency Programs leading to a Certificate of Completion in the respective program. Programs of three-year duration offer an optional educational tract leading to a Master of Dental Science degree (MDS).

All residents in the various specialties begin their advanced education by studying a core curriculim. This core curriculum includes, but is not limited to, an orientation program; Clinical Operations; BLS Certification; Infection Control Policies and Procedures; Ethics in the Dental Specialties; Chemical Dependency; Hospital Protocols and Procedures; Conferences / Classes; Advanced Oral Pathology; Applied Head and Neck Anatomy; Clinical Pharmacology; Intravenous and Inhalation Sedation; Management of Medical Emergencies; Mineralized Tissue Biology; Multidisciplinary Treatment Planning Grand Rounds; Oral and Maxillofacial Radiology and Imaging; Pathobiology and Immunology; and Research Design and Methodology

Details about the residency programs at Pitt Dental Medicine is available on our website at **https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs.**

About the School

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to provide direct patient care in our own clinics. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine community. To learn more, visit our website at www.dental.pitt.edu.

General Dentistry and Specialty Clinics

The School of Dental Medicine provides clinical education and patient care through 16 dental clinics encompassing general dentistry, dental anesthesiology, special needs, emergency, endodontics, implants, oral and maxillofacial pathology, oral and maxillofacial surgery, orthodontics and dentofacial orthopaedics, pediatric dentistry, periodontics and preventive dentistry, dental hygiene, prosthodontics, radiology, and restorative dentistry/comprehensive care.

Clinical Centers

The **Multidisciplinary Implant Center** focuses on patient care, teaching, and research related to the treatment of tooth loss and the functional bone and soft tissue deficits that can follow tooth loss.
The **Center for Patients with Special Needs (CPSN)** was formally established in 2008-after more than 50 years of treating patients with special health care needs-to centralize and increase treatment capacity for patients with physical, developmental, neurological, and intellectual disabilities.

University Dental Health Services (UDHS) is a legally separate nonprofit practice plan that is closely affiliated with the School of Dental Medicine. UDHS providers are full- or part-time faculty members, many of whom are board-certified specialists and nationally recognized experts in their respective fields.

Research Strengths

The Pitt Dental Medicine research mission is to expand the boundaries of knowledge and build on discoveries to enhance the quality of human life. Our mission aligns with the University of Pittsburgh's position as a research-intensive university. In addition, our research is an essential part of the School's teaching mission for health science students. Furthermore, the contribution of research can be directly applied to patient care by advancing the knowledge base of the dental field as a whole. This, too, is a key component of education for Pitt Dental Medicine students and serves to integrate research into the future of clinical dentistry and ultimately benefit patients.

Read more about our research at Research Mission and Vision | School of Dental Medicine

Certificate

Dental Anesthesiology Certificate

Program Description

The Pitt Dental Medicine Department of Dental Anesthesiology directs and coordinates the three-year, CODA-accredited, dental anesthesiology residency program. The goal of this program is to prepare dentists to manage pain and anxiety in adult, pediatric and special needs patients by using pharmacologic and non-pharmacologic techniques.

A significant portion of the Residency Program in Dental Anesthesiology is a unit of the medical anesthesiology residency program, administered through the UPMC Medical Education Program (UPMC-MEP).

At the conclusion of the program, the dentist will earn a certificate in dental anesthesiology and be proficient in providing all levels of anesthesia services for ambulatory patients undergoing a variety of medical and dental procedures.

For more information on our program visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/dental-anesthesiology

Rotations

Within this first year and a half, one month is devoted to training in each: Internal Medicine, Critical Care Medicine, Pediatric Emergency Medicine, and Cardiology/Pulmonology.

The second- and third-year residents continue with rotations through UPMC Presbyterian and Montefiore Hospitals, UPMC Mercy, UPMC St. Margaret's, Children's Hospital of Pittsburgh of UPMC, and Magee-Womens Hospital of UPMC. During this rotation cycle, residents will participate in the anesthetic management of patients undergoing general surgery, complex head and neck procedures, orthopedic surgery, and transplantation operations. Three months at UPMC St. Margaret's will provide experience in a high-paced operating room that prepares the resident for private practice. Regional anesthesia and advanced pain management techniques are also developed. Children's Hospital of Pittsburgh of UPMC offers a diversity of experiences in managing the anesthetic requirements of children of all physical sizes and ages who are undergoing a wide variety of surgical procedures. Magee-Womens Hospital of UPMC gives the resident an opportunity to learn about epidural and spinal anesthesia techniques intended for obstetric procedures along with general surgery experience in the hospital operating rooms. Magee-Womens Hospital of UPMC utilizes an after-hours call schedule. The resident serves at the University of Pittsburgh School of Dental Medicine for several months throughout the final 2 years educating the incoming residents and rotating with the part-time faculty in ambulatory settings to prepare them for private practice.

A focus of the training includes developing skills in the management of special needs patients receiving dental care. The University of Pittsburgh School of Dental Medicine has an active Center for Patients with Special Needs that provides the resident with a unique opportunity to provide anesthesia services to this underserved population. Residents will take part in regular journal reviews of current literature and a structured lecture series in anesthesiology. In addition, residents are expected to attend at least one national conference per year and initiate work on a mentored clinical research project.

Goals and Objectives of the Program

Mission Statement of the Department of Dental Anesthesiology

The Department of Dental Anesthesiology is a group of highly committed individuals dedicated to the education and training of dental students, dentists and dentist anesthesiologists in the best principles and practices of dental anesthesiology.

Vision Statement of the Department of Dental Anesthesiology

- We will foster ethics and professionalism and leadership through example

- We will dedicate ourselves to excellence in education, patient care and research
- We will strive to always ensure the well-being and safety of our patients, with special consideration for children, the elderly and infirm, and those with special health care needs
- We will maintain and nurture our inter-professional association

Curriculum

Didactic

- First-year residents take part in a weekly, one-year lecture series at the dental school.
- Second-year residents will take part in a 20 day anesthesia course with the MD anesthesia residents.
- All residents take part in a monthly journal club at the dental school.
- Many of the rotations will have daily didactic lectures during the rotation (Emergency Medicine, Critical Care Medicine, Children's Hospital, etc).

Clinical

Please see above in Description and Rotations

Program Requirements

Applicants must be graduates of a United States or Canadian accredited dental school and be eligible for state licensure. To learn more about the program, visit Advanced Education and Residency Program in Dental Anesthesiology | School of Dental Medicine

Benefits, Stipend, Tuition & Fees

Residents in dental anesthesiology receive standard postgraduate salaries and benefits provided be GME.

Application Process

The applicant must submit the American Dental Education Association Postdoctoral Application Support Service (ADEA PASS) application and register for the Match Program.

For additional information about the Dental Anesthesiology Residency Program application process, please contact

Department of Dental Anesthesiology
412-648- 8401
Email the Department of Dental Anesthesiology

Research

The department stresses that residents participate in some manner of research (case report, review article, survey, novel drug, etc) that can be submitted for publication. Learn more about Dental Anesthesiology Research at the School of Dental Medicine here: Dental Anesthesiology Research | School of Dental Medicine

Learn more about requirements and application to the program by visiting **dental.pitt.edu/dental-anesthesiology**

The advanced general dentistry education program in dental anesthesiology is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Endodontics Certificate

About the Program

The University of Pittsburgh School of Dental Medicine Endodontic Department supports its fully accredited 24-month program. The graduate endodontic program provides a robust clinical experience in addition to a solid scientific foundation. The combination of our clinical and scientific experiences allows each resident to be fully prepared for a career in private practice or academia.

Our state-of-the-art clinic provides care to our diverse patient population. Each resident has a fully equipped cubicle, which includes a surgical operating microscope with video capabilities, wall mounted flat screen monitor, digital radiography, an ultrasonic unit, and various obturation materials. The residents also utilize GentleWave® and EdgePro® Laser technologies. Our broad patient base allows residents the opportunity to provide care to children, patients with special needs, patients who require general anesthesia, adults, and the elderly. Our ability to meld state of the art technology with such a diverse patient base allows our endodontic residents to have the breadth of experiences necessary for them to become the best clinician version of themselves.

While our endodontic residents benefit from an exceptional clinical experience, at the University of Pittsburgh, our residents are true clinician scientists. Our didactic curriculum provides a solid foundation for the required research component of the program. Every resident is required to participate in either a basic science or clinical science research project. It is expected that all research projects will be presented at the American Association of Endodontics Annual Meeting and published in a peer-reviewed scientific journal. Our ability to provide the best clinical care for our patients and produce the best clinician scientists makes the University of Pittsburgh School of Dental Medicine Endodontic Program unique.

For more information on our program, visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/endodontics

Endodontic Certificate of Completion Requirements

Requirements for Certificate completion can be found at Advanced Dental Education and Residency Program in Endodontics | School of Dental Medicine.

Admissions

At this time, the Endodontics Advanced Education and Residency Program is only accepting applicants for the program who utilize the ADEA PASS application.

For additional information about how to apply to the Advanced Dental Education Residency Program in Endodontics, please visit our Advanced Dental Education Residency Programs general information page.

- Supplemental Application Fee - A non-refundable supplemental application fee is required at time of application. Visit Advanced Dental Education and Residency Program in Endodontics | School of Dental Medicine for more details.

Stipend/ Benefits/ Fees

For information about resident stipends, benefits. tuition and fees, visit our website at https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/endodontics.

The advanced specialty education program in endodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is https://www.ada.org/en.

General Practice Residency

Program Description

The General Practice Residency (GPR) Program, sponsored by the University of Pittsburgh Medical Center (UPMC), offers a one-year program that provides residents with postdoctoral clinical and didactic experiences. Based in the UPMC Montefiore Dental Center on the UPMC Presbyterian/Shadyside Campus, the program enrolls a combined total of three (3) residents each year. Residents completing the GPR earn a Certificate of Training.

Program Philosophy

Guided by the philosophy that oral health is an integral and interactive aspect of total health, residents engage in approximately nine months of comprehensive dental care. The remaining three months are spent on rotations in anesthesia, emergency medicine, internal medicine, and oral and maxillofacial surgery.

Curriculum and Content

In addition to intensive exposure to hospital-based dentistry, the program provides clinical and didactic training across a range of dental specialties, including endodontics, periodontics, implant dentistry, prosthodontics, oral and maxillofacial surgery, oral pathology/oral medicine, head and neck oncology patients, transplant and cardiothoracic surgery patients and treating patients with complex medical histories. Instruction is also provided in ancillary topics pertinent to dental practice, such as patient evaluation and physical examination, emergency medical care, treatment of traumatic dental injuries, inpatient care and hospital organization, and a multitude of other medical and dental subjects.

In addition to the delivery of clinical care in the UPMC Presbyterian Shadyside Dental Center and Hospital, the residents will rotate through the UPMC Mercy Hospital Emergency Department, Catholic Charities of Pittsburgh Free Care Dental Center and The University of Pittsburgh School of Dental Medicine Interdisciplinary Implant Center.

Journal Club, treatment planning conferences, resident portfolios and off-site local and national dental meetings are also part of the program content.

Residents will be required to provide 24-hour, on-call emergency services as scheduled by the residency director. Short-range and long-range pagers will be provided to each resident. Residents are not often required to remain in-house, but usually take call from home.

Goals and Objectives of the Program

The General Practice Dental Residency Program is designed to provide training beyond the level of pre-doctoral education in oral health care, using applied basic and behavioral sciences. Education in this program is based on the concept that oral health is an integral and interactive part of total health. The program is designed to expand the scope and depth of the residents' knowledge and skills to enable them to provide comprehensive oral health care to a wide range of population groups. The goals of this program are derived from the Commission on Dental Accreditation's (CODA) Standards for Advanced Education Programs in General Practice Residency.

Specific to the UPMC Presbyterian Shadyside Dental Center General Practice Residency Program, the program will prepare each resident to:

- Triage and treat a variety of emergency dental conditions
- Plan and provide multidisciplinary comprehensive oral health care using advanced dental treatment modalities
- Direct and promote disease prevention activities
- Manage the delivery of oral health care to patients with complex histories
- Provide consultative evaluations and treatments of patients admitted within the UPMC Presbyterian Shadyside hospital system who are referred to our service
  • Surgical (Cardiothoracic, Orthopedic, etc) clearance
  • Transplant clearance
  • Medical service and ICU patients
  • Trauma patients
- Apply concepts of patient and practice management and quality improvement that are responsive to a dynamic health care environment
- Function effectively within interdisciplinary health care teams
- Apply scientific principles to learning and oral healthcare
  •Critical thinking
  • Evidence/outcomes-based clinical decision making
  • Use of technology-based information retrieval systems
- Utilize the values of professional ethics, life-long learning, patient centered care, adaptability and acceptance of cultural diversity in professional practice
- Understand the needs of communities at large and engage in community service

Supervision and Progressive Responsibility

The UPMC Presbyterian Shadyside Dental Center is a resident-driven clinic. Residents must be supervised either directly or indirectly, with direct supervision immediately available (i.e. attending dentist is in the hospital or other site of care and is immediately available to provide direct supervision). Much of the learning process and the development of progressive responsibility is based on teaching by example under supervision. Supervision and close observation provide the ability of the program director to ascertain when a resident is ready and able to assume progressive autonomy and responsibility. Each resident must know the limits of their scope of authority and the circumstances under which they are permitted to act with conditional independence as well as their skill set and experience. Attending doctors always maintain professionalism within this relationship and will encourage residents to practice with increasing autonomy while freely seeking guidance from the attending at any time the resident believes it to be helpful to the care of the patient. This relationship is designed to be reciprocal and fundamental to the residents' successful progression.

Application Process

Those interested in making application to the program may do so through the American Dental Education Association's Postdoctoral Application Support Service (PASS). This program participates in the National Dental Match.

For additional information about the application process, please contact

GPR Coordinator, UPMC Presbyterian Shadyside Hospital
OMFS/GPR Dental Residency Programs
412-648-6801

Application Deadline

October 15 of each year

Benefits, Stipend, Tuition & Fees

While in the program, residents receive UPMC Health System's postgraduate trainee stipend.

Benefits include 10 days (80 hours) paid time off, 3 days (24 hours) of paid time off for job-search-related activities, healthcare insurance for the trainee and dependents. The option is also offered for inclusion in 401K, healthcare spending account, dependent care savings accounts and other modest benefits.

Research

Research is encouraged and supported, but not a formal part of the program.

If you would like to make an appointment, or have a question about your treatment here, please contact our patient care coordinators at **412-648-6730**.

If you are a dentist or physician who would like to refer a patient to the UPMC Presbyterian Shadyside Dental Center, please call **412-648-6328** or fax the referral to **412-648-6505**.

stgraduate trainee stipend and benefits package. Those interested in making application to the program may do so through the American Dental Education Association's Postdoctoral Application Support Service (PASS).

For additional information, please visit dental.pitt.edu/general-practice-residency-program

The general practice dental residency program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Oral and Maxillofacial Pathology

Program Description

The Oral and Maxillofacial Pathology (OMFP) Advanced Education and Residency program consists of two tracks: one track for applicants who have graduated from an accredited US or Canadian dental school, which is federally funded, and one track for those who have graduated from an approved international dental school, which is tuition-based. The programs are a collaboration between the University of Pittsburgh School of Dental Medicine Department of Diagnostic Sciences and UMPC-Medical Education (UPMC-ME). These programs are fully accredited by the Commission on Dental Accreditation. As with all accredited OMFP programs, both tracks require a minimum of 36-months of training, with at least six of those months in ACGME-accredited pathology rotations. The UPMC-based program accepts a maximum of one resident a year, and the program at The University of Pittsburgh School of Dental Medicine Oral and Maxillofacial Pathology Residency Program can accept up to two residents per year. Successful completion of the UPMC-based program will lead to a certificate in Oral and Maxillofacial Pathology and will qualify the graduate to sit for the specialty board examination in Oral and Maxillofacial Pathology. Successful completion of the University of Pittsburgh School of Dental Medicine-based program will lead to a certificate in Oral and Maxillofacial Pathology, with the option to obtain a Master's of Science in Dentistry (MSD) degree, and will qualify the graduate to sit for the specialty board examination in Oral and Maxillofacial Pathology.

For more information on our program visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/oral-and-maxillofacial-pathology

Curriculum

Faculty members are certified by their specialty boards of Oral and Maxillofacial Pathology, Oral and Maxillofacial Radiology, Oral Medicine, or Anatomic Pathology, and possess a wide range of clinical, teaching, research, and surgical pathology experience. The residency program offers a mix of didactic courses, electives, microscopic general and oral pathology, clinical oral pathology, oral and maxillofacial radiology, hospital rotations, and research. Clinical patients are seen at the University of Pittsburgh School of Dental

Medicine and though the faculty practice plan at the University Dental Health Services, Inc., as well as during the rotation in dermatopathology.A large part of the program is in managing and diagnosing biopsy cases at the School of Dental Medicine anatomic pathology (biopsy) service.

Rotations

Most pathology rotations take place at UPMC-Presbyterian Hospital, in the Oakland section of Pittsburgh, across the street from the University of Pittsburgh School of Dental Medicine. UPMC is a major regional, tertiary care and transplant center that will expose the resident/student to a large volume and a wide variety of experiences. Rotations include 12 weeks in head and neck anatomic pathology, 4 weeks in dermatopathology, 4 weeks in hematopathology-lymph node, 2 weeks in molecular and genomic pathology, 2 weeks in bone and soft tissue pathology, 4 weeks in pediatric pathology, and 1 week in autopsy, with additional opportunities in gastrointestinal pathology ("GI quicks"), thoracic pathology, surgical breast pathology, pathology informatics, or research. The program allows some flexibility for the resident to concentrate on a particular area of oral and maxillofacial pathology.

More information including requirements and making an application to the program are available by visiting **dental.pitt.edu/omp-residency**

Research

Each resident is required to perform scholarly activity. This can include case reports of classic or unusual cases, clinicopathologic case challenges, and performing original research. The University of Pittsburgh, UPMC, and surrounding universities provide a vast array of opportunities for research. Faculty within the Pitt Dental Medicine Department of Diagnostic Sciences conduct research in areas including 3-D printing and imaging, oral and maxillofacial lesions, immunohistochemical studies of salivary and odontogenic tumors, and data mining of the dental health record.

The program in dental education is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Oral and Maxillofacial Surgery

Academic programs in the Department of Oral and Maxillofacial Surgery offer both predoctoral and advanced education residency opportunities.

Predoctoral DMD students may take advantage of the internship and externship programs, while advanced specialty training is offered in the OMS Surgical Residency Program.

Oral and Maxillofacial Surgery Residency Program

The Department of Oral and Maxillofacial Surgery (OMS) at the University of Pittsburgh School of Dental Medicine offers a six-year, dual-degree program, and a four-year program. Three residents are accepted each year (two six year positions and one four year position), and they commence training as interns in the department. In the six-year, dual-degree program, two residents join their corresponding medical school class in the spring of the first year. These residents earn a medical degree and participate in advanced surgical training in oral and maxillofacial surgery, spending a total of 33 months on the oral and maxillofacial surgery service. The four-year program offers a total of 33 months on the oral and maxillofacial surgery service and rotating on medicine, surgery and anesthesia services the other 15 months. The department's graduates have accepted positions in both outstanding surgical practices and university attending positions at major medical centers throughout the United States.

Eight full-time oral and maxillofacial surgery faculty members, as well as part-time faculty and private practice oral and maxillofacial surgeons from the Pittsburgh area, provide surgical training and mentoring. The School of Dental Medicine has, on-site, a modern

ambulatory surgical suite with full anesthesia support and facilities that enhance caseload and outpatient surgical management. The department provides instruction in anesthesia, dentoalveolar surgery, dental implants, head and neck pathology, cleft and craniofacial disorders, craniofacial trauma, and head and neck anatomy.

Residents

The program is designed to be truly "integrated" and allow for the maximal benefit of coordinated medical training, and progression of knowledge and skill in oral and maxillofacial surgery. Residents are exposed to the full scope of oral and maxillofacial surgery throughout their training-including interdisciplinary care. From day one, new residents work with first professional dental students in a training and supervisory role in the undergraduate OMS clinic. They are involved in managing emergency cases at the UPMC Montefiore Dental Center and in assist the attending surgical faculty in the operating rooms of UPMC Presbyterian/Shadyside, Mercy Hospital, and Children's Hospital of Pittsburgh of UPMC. During the entire final year of the program, the chief residents devote a full 12 months to the OMS service, working with an enviable surgical caseload. Residents are also required to attend the Department of Oral and Maxillofacial Surgery Grand Rounds, Journal Club, treatment planning conferences in the Dentofacial Deformities Program (in conjunction with the Orthodontic Program), and the weekly Surgical Treatment Planning and Trauma Conference.

Application

The annual application deadline is **September 1** of the preceding year. Late applications will not be accepted. Applicants must graduate from an ADA-accredited dental school, must apply through the ADEA Postdoctoral Application Support Service (PASS), and must participate in the Postdoctoral Dental Matching Program (MATCH).

Interview and Selection

Applicants are screened for interviews that occur in November and December of each year. In late January, through the MATCH Program, two applicants are selected to matriculate into the first year of residency, which commences in late June. Applicants matched to the University of Pittsburgh are enrolled in both the Department of Oral and Maxillofacial Surgery residency and the University of Pittsburgh School of Medicine.

Benefits/Stipend/Tuition

Residents receive a full UPMC post-graduate trainee stipend during each year of the program. In addition, health and disability insurance benefits are provided. Tuition is incurred while residents are enrolled in the medical school phase of the program.

OMS Externship and Internship Programs

Externship Program

The Department of Oral and Maxillofacial Surgery is accepting applications from interested students from U.S. accredited dental schools for our externship program. Please contact the department for additional information and complete the application materials below.

Please see the links below for application materials and information.

Information for Visiting Students

Prerequisites for Participation

All students from dental schools accredited by the American Dental Association Council on Education, who will have completed their third year requirements at the time of the desired elective participation, are eligible to apply. Students must be in good academic standing at their parent school and must have their school's approval to participate in the desired elective(s).

Visiting students are permitted to enroll for a continuous 4-6 week Oral and Maxillofacial Surgery elective at the School of Dental Medicine during their fourth year.

Application Procedure

An "Application for Non-Pitt Student Elective" form must be submitted. These applications are available from the Department of Oral and Maxillofacial Surgery by writing to the address, below. The application must contain all requested information from both the student and the appropriate dean of the student's school, including original signatures. Incomplete applications will be returned to the student's Student Affairs Office.

The application should be mailed before May 15. Upon receipt the completed application will be reviewed and the student applicant notified about acceptance status.

Insurance

All students must be covered by malpractice or liability insurance verified by their dean of students. Applicants must **provide proof of personal health insurance.** We accept no liability for health costs incurred by visiting students while at this school.

Cancellations

The courtesy of a telephone call is requested at least 4 weeks prior to the start of an elective if you find you're unable to participate. Please call directly to the Department of Oral and Maxillofacial Surgery at **412-648-6801**.

Housing

The School of Dental Medicine has no short term housing at its disposal. The School of Medicine keeps a reference of students who are scheduled to be away and may wish to sublet. You can get in touch with them by calling Margie Sikorski at **412-648-9040**. There is dormitory space available during the months of May, June, July and August, call 412-648-1100. There is also a University Housing Office, available by phone at **412-624-7116**, which may be able to refer you. A final suggestion, check to see if you have graduates from your school in this area who may be willing to share or otherwise assist you.

Internship Program

A one-year internship program is available for those individuals who are interested in applying for a career in oral and maxillofacial surgery, but would like additional training prior to applying for an Oral and Maxillofacial Surgery position through the MATCH program.

The program is unique in that a balanced and extensive experience is offered in the clinical setting. This includes rotations in our outpatient clinics as well as the operating room service. Interns also are expected to attend and participate in conferences and our comprehensive didactic coursework. The position is fully funded.

Application Procedure

Applications may be made at any time, and the position is usually filled once the MATCH process is complete in late January. More information can be obtained by contacting the Oral and Maxillofacial Surgery Fellowship Residency Coordinator.

For more information about both programs, please contact

Fellowship and Residency Coordinator
203 Lothrop Street, Suite 214
Pittsburgh, Pennsylvania 15213
412-648-6801

The Department of Oral and Maxillofacial Surgery adheres to the University of Pittsburgh's non-discrimination policy.

For additional information, please visit **dental.pitt.edu/oms-residency**

The Department of Oral and Maxillofacial Surgery adheres to the University of Pittsburgh's non-discrimination policy.

The advanced specialty education program in oral and maxillofacial surgery is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Orthodontics and Dentofacial Orthopedics Certificate

The Orthodontics and Dentofacial Orthopedics Program at the University of Pittsburgh School of Dental Medicine requires a three-year course of study. The goals of the program are to provide excellent education in the specialty of orthodontics and dentofacial orthopedics, to provide high quality clinical care, and to conduct research designed to advance the knowledge of the specialty. The curriculum reflects this mission and provides residents with the necessary knowledge and experience to enter the specialty well prepared for practice. The curriculum is based upon a solid foundation of scientific principles and methods that residents may use as a rational framework for understanding treatment and evaluating future changes. The application of basic and clinical scientific knowledge to the practice of orthodontics is the fundamental tenet of the curriculum.

Successful completion of the program leads to a certificate in orthodontics and dentofacial orthopedics and enables graduates to participate in the American Board of Orthodontics certifying examination. Students may also pursue a course of study leading to a Master of Dental Science degree in orthodontics and dentofacial orthopedics.

For more information on our program, visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/orthodontics

Components of the Program

- Clinical training which prepares the resident for specialty board certification
- Education from a broad curriculum, which provides residents with greater insight on the nature of orthodontics
- Research to enrich the profession and develop critical thinking skills

Curriculum

The curriculum for the Orthodontics and Dentofacial Orthopedics Residency Program is designed to be taught at the postdoctoral level. The path of study followed by the residents comprises a core curriculum of graduate level basic sciences, followed by a broad course of study in craniofacial biology, clinical sciences, and orthodontic techniques. A significant portion of the curriculum is devoted to clinical orthodontics, allowing the resident to develop proficiency through a broad, diverse experience in patient care.

Conferences provide an excellent foundation in the basic and clinical sciences and provide opportunity for growth and development in dental statistics, occlusion and malocclusion, development of the dentition, dentofacial abnormalities, biomechanical orthodontics, genetics, bone biology, cephalometrics, diagnosis and treatment planning, evidence-based care, surgical orthodontics, practice management, and orthodontic technique. Orthodontic conferences and literature review sessions provide opportunities for critical analysis of historical and current literature with application to contemporary orthodontic principles in case diagnosis and treatment planning.

Application Process

Applicants must apply through the Postdoctoral Application Support Service (PASS) and register for the Dental Match. Residency positions are awarded through the Postdoctoral Dental Matching Program in the Phase I (fall) match. The program is fully accredited by the Commission on Dental Accreditation.

A non-refundable supplemental application fee is required at time of application. More information about the program, requirements and deadlines can be found at https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/orthodontics.

Orthodontics and Dentofacial Orthopedics Research

Scholarly activity in the form of basic or clinical research is a fundamental component of the curriculum. Residents design, implement, and complete a research project that provides greater knowledge of the specialty and permit residents to develop the ability to apply the scientific method.

The Orthodontic and Dentofacial Orthopedics Residency Program requires a research project to be completed prior to graduation.

The following are titles of research projects completed or in progress by orthodontics and dentofacial orthopedics residents:

- A Comparison of Inferior Turbinate Hypertrophy in Pediatric Cleft Patients
- Comparison of Bracket Failure Using a Hydrophilic and Hydrophobic Primer
- Comparative Analysis of Two Clear Aligner Systems for Orthodontic Refinement
- The Effect of Bite Turbos on Mandibular Anterior Bracket Failure Rate: A Retrospective Study
- The Comparison of Tensile Strength, Modulus of Elasticity and Bending Modulus of Arch Wires used in Orthodontics
- Impact of Model Base Design and Three-Dimensional (3D) Print Settings on the Quality of Orthodontic Retainers
- Genetic Variation Contributing to Microdontia
- Genetic Variation Involving Human Tooth Agenesis
- The Impact of Computer Aided Design (CAD) on the Accuracy and Fit of Direct Print Aligners (DPA)

Read more about the Orthodontics and Dentofacial Orthopedics Residency Program by visiting Advanced Dental Education Residency Program in Orthodontics and Dentofacial Orthopedics | School of Dental Medicine.

The advanced specialty education program in orthodontics and dentofacial orthopedics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Pediatric Dentistry Certificate

Program Description

The Department of Pediatric Dentistry offers a two-year Advanced Education Program in Pediatric Dentistry resulting in a Certificate in Pediatric Dentistry. Residents are trained in the advanced diagnostic and clinical techniques necessary to provide specialty care to children, adolescents, and individuals with disabilities. Residents are eligible to participate in the American Board of Pediatric Dentistry certification examinations, upon successful completion of the program.

An option to obtain a Master in Dental Science (MDS) is available and will require additional coursework resulting in additional time beyond the two-year period.

All facilities within the School of Dental Medicine are available for resident use, and there is a vast Health Science Center Library system housed in the medical school directly across the street from the School of Dental Medicine.

For more information on our program visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/pediatric-dentistry

Goals and Objectives of the Program

It is the intent of the program to prepare residents for a career in specialty pediatric dentistry practice, teaching, and community health service in the area of comprehensive oral health care for children, with a particular emphasis on providing quality services for children with special health care needs. The Program is designed to follow the principles, policies and educational requirements set forth in the accreditation requirements in the American Dental Association Guidelines for Advanced Specialty Education Programs and the American Academy of Pediatric Dentistry Guidelines for Advanced Education in Pediatric Dentistry. Learn more about the program's goals and objectives at Advanced Dental Education and Residency Program in Pediatric Dentistry | School of Dental Medicine.

Curriculum

The multifaceted advanced pediatric dentistry curricula integrate scientific principles and methods with the clinical application of pediatric dentistry. Ample time is provided for either basic science or clinical research. Emphasis is also given to community and dental public health experiences. In addition to the core curriculum for all specialty residents, the following pediatric dentistry specific conferences are offered: For more information, visit https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/pediatric-dentistry.

Rotations

Rotations are scheduled at the University of Pittsburgh Medical Center (UPMC) - Children's Hospital of Pittsburgh, UPMC Presbyterian Hospital, and the Cleft Palate/Craniofacial Center. For more information, visit https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/pediatric-dentistry.

Application Process

The Advanced Education Program in Pediatric Dentistry applications must be filed through the Postdoctoral Application Support Service (PASS) and the Postdoctoral Dental Matching Program (MATCH).

For additional information about how to apply to the advanced dental education residency program in pediatric dentistry, please visit our Advanced Dental Education Residency Programs general information page.

Pediatric Dentistry Research

A research project is a graduation requirement for the Advanced Pediatric Dentistry Residency Program.

The following are projects completed, or in progress, within the last five years

- Association Between Autism Spectrum Disorder and Caregiver-Reported Dental Caries in Children
- Child Dental Neglect Laws: State Specifications and Repercussions for Dentists
- The Relationship Between Training with a Dental Anesthesiologist and Preference in the Modality of Anesthesia Delivery Among Board-Certified Pediatric Dentists in the United States
- Factors Associated with the Agent of Choice for Moderate Sedation
- Parental Acceptance of the Human Papilloma Virus Vaccine
- Outcomes of Single-Surface Restorations Placed in Young Children Receiving Outpatient General Anesthesia
- Race and Payer Types for Child Visits with Public Health Dental Hygienist Practitioners
- Various Recall Intervals Following Outpatient General Anesthesia Services for Patients with Special Needs and DMFT Scores

For additional information about the residency program in pediatric dentistry, please visit Advanced Dental Education and Residency Program in Pediatric Dentistry | School of Dental Medicine.

The advanced specialty education program in pediatric dentistry is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Periodontics Certificate

Program Description

Our program aims to continue developing basic and clinical research in dental implantology, novel bone regenerative technologies and the development of novel approaches to treat periodontal disease by modulating the immune system. We are working on new therapies to improve patient outcomes and bring clinical research into clinical practice with cutting-edge treatment modalities. Some of our ongoing projects include: development of periodontal therapies by regulating the immune response; development of novel magnesium-related materials for bone regeneration; the assessment of novel periodontal grafting material compared to the standard of care, and surgical treatment of peri-implantitis. All residents are encouraged to pursue research projects and have contributed to national and international meetings for organizations in their specialty.

Each resident is exposed to all periodontal diagnostics and therapies and is expected to be competent in all phases of clinical periodontal care. During their program, residents in periodontics are supervised and taught by board-certified periodontists and prosthodontists. A resource for both dentists and patients throughout the Pittsburgh region, our services are characterized by the integration of innovative techniques with conservative treatment approaches resulting in excellent treatment outcomes and a high standard of quality care.

The residency in periodontics is a three-year certificate program with the option of pursuing a Master in Dental Science (MDS) concurrent with the certificate program. Three residents are accepted annually for the three-year program.

For more information on our program visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/periodontics

Program Requirements

The residency in periodontics is a three-year certificate program. Each resident is exposed to all periodontal diagnostics and therapies and is expected to be competent in all phases of clinical periodontal care. All residents are encouraged to participate in the American Academy of Periodontology board certification process, and to graduate as board-certified periodontist. A master's degree option is available to residents in the Department of Periodontics.

Residents in the department are encouraged to pursue research projects and have contributed to national and international meetings for organizations in their specialty. Several are enrolled in the master's degree program in public health, or the master's degree in dental science.

Application Process

Applications to the residency program are accepted through the ADEA Postdoctoral Application Support Service (PASS) and Postdoctoral Dental Matching Program (MATCH).

For information about application requirements and deadlines, please visit https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/periodontics.

Periodontics Research

Research in our Periodontics department focuses on cutting-edge clinical procedures that will ultimately improve patient quality of life. Our researchers represent some of the best dentist-scientists working in the field, and they collaborate with fellow investigators nationally and internationally and across diverse disciplines. Our department exists as a center of excellence providing state-of-the-art periodontal and implant clinical therapies while exploring the possibilities for enhanced treatment technologies, procedures and strategies.

Key Areas of research focus include:

- Peri-implant Diseases: Prevention and Management of Peri-implantitis
- Short and Extra-Short Implants
- Artificial Intelligence in Periodontics
- Bone tissue regeneration
- Polymer magnesium periodontal membranes
- Resorbable metal fixation devices
- Biomineralization
- Immuno-modulation
- Biodegradable materials
- Load-bearing bone fixation devices
- Pre-clinical Testing for Regulatory Approval

Learn more about the Periodontics Residency Program by visiting Advanced Education & Residency Program in Periodontics | School of Dental Medicine.

The advanced specialty education program in periodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Fall Term

- PERIO 2121 - PERIODONTAL LITERATURE REVIEW 1
- PERIO 2122 - SPECIAL TOPICS IN PERIODONTICS 1
- PERIO 2142 - PERIODONTICS JOURNAL CLUB - 1

Spring Term

- PERIO 2157 - PERIODONTAL LITERATURE REVIEW 2

Prosthodontics Certificate

The Advanced Education and Residency Program in Prosthodontics is an American Dental Association-accredited three-year certificate program with the option to complete a master's degree. Students who pursue a master's degree will receive their MDS upon completion of the extra required didactic courses within the three-year limit. The Program's didactic and clinical components are designed to train and equip the graduate to transfer new prosthodontic knowledge and approaches, to implement evidence-based prosthodontic decision-making in clinical practice, and to prepare for certification by the American Board of Prosthodontics.

For more information on our program visit our website at: https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/prosthodontics

Program Objectives

Provide clinical training in all aspects of prosthodontics including:

- clinical experiences to ensure proficiency in all aspects of prosthodontics;
- clinical experiences to ensure proficiency in diagnosis, treatment planning, and management of multi-disciplinary cases;
- to recruit and retain faculty with broad and varying backgrounds in clinical prosthodontics, who espouse diverse philosophies in patient care and prosthodontic procedures, and effectively communicate their knowledge and skills to residents.

Provide biologically and scientifically based education in order to:

- develop, monitor, and update all prosthodontic seminars and conferences to present contemporary, technologically, and biologically-oriented information;
- provide opportunities for scholarly activities, applied research, scientific articles, and clinical and/or research presentations.

Prepare and train residents for a career in prosthodontic practice and/or academics to:

- require all residents to complete annual comprehensive examinations (ACP Annual Board Review Examinations);
- provide opportunities for completion of a treatment case suitable for presentation to the American Board of Prosthodontics;
- provide residents with opportunities to pursue academic degree(s) in related disciplines.

Provide quality and professional care to all patients to:

- ensure ethical and professional conduct by all individuals involved in patient care;
- ensure proper care of all patients in the prosthodontic residency program;
- ensure patient satisfaction with the care they receive.

Program Requirements

The program's clinical components focus on diagnosis, treatment planning, and treatment of edentulous, partially edentulous, and completely edentulous patients. Fixed, removable, and implant prosthodontics constitute the major portion of the clinical training, with occlusion, temporomandibular disorder, and geriatrics as integral components of all phases of care. Residents are required to manage and

treat patients requiring complete dentures, removable partial dentures, fixed partial dentures, and implant restorations. Clinical training for residents in implant dentistry emphasizes all aspects of implant treatment including implant placement. Additionally, the program requires the resident's involvement in the treatment of patients with congenital and acquired defects.

Residents enrolled in the Prosthodontic Residency Program must complete the prescribed advanced prosthodontic curriculum and perform required research to submit a research paper.

Prosthodontic Curriculum

The multifaceted prosthodontic curriculum comprises a core curriculum in biomedical sciences for all dental residents and prosthodontic specialty conferences.

The didactic core curriculum and prosthodontic conferences include the following:

- Advanced Fixed Prosthodontics;
- Advanced Removable Prosthodontics;
- Biomaterials;
- Implant Surgery and Prosthodontics;
- Implant Dentistry Literature Review;
- Fixed and Removable Literature Review;
- Maxillofacial Prosthetics;
- Prosthodontic Treatment Planning;
- Multidisciplinary Treatment Planning;
- Occlusion and Management of TMD;
- Prosthodontic Conferences and Board Reviews.

For more information about program requirements or curriculum for The University of Pittsburgh Advanced Education and Residency Program in Prosthodontics, visit https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/prosthodontics.

Application

The ADEA Postdoctoral Application Support Service (PASS) and Postdoctoral Dental Matching Program (MATCH) application or the University's self-managed application are both accepted by the department. For information about application requirements and fees, visit https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs/prosthodontics

Tuition

Tuition varies from year to year. Current tuition information is available on the School of Dental Medicine Residency Budget page.

The advanced specialty education program in prosthodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Department of Oral and Craniofacial Sciences

The School of Dental Medicine Department of Oral Biology Graduate Program offers basic, translational, and clinical studies in oral biology, biomedical research and health that span spatial scales from the molecular and cellular levels to the whole organism level. Studies

include fundamental biological phenomena related to the development, structure, and function of the craniofacial region and the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area. The Graduate Program provides a stimulating and collegial environment to prepare motivated and qualified students for careers in academia, industry, and government.

Students may earn Doctor of Philosophy (PhD) and Master of Science (MS) degrees in Oral Biology within one of two research concentrations:

- Craniofacial and Dental Genetics
- Craniofacial Tissue Regeneration

Students will work with faculty in the Department of Oral Biology on research in these concentrations.

The program is open to post-baccalaureate students, pre-doctoral dental students, and dental residents. School of Dental Medicine pre-doctoral students and residents may apply for a dual degree option with the PhD or MS Graduate Programs in Oral Biology. Pre-doctoral dental medicine students may also pursue dual degrees while enrolled in the School of Dental Medicine through collaborative programs with the School of Public Health, the School of Law, and the School of Education.

Admissions will only be considered for the fall term. However, early applications are encouraged, and offers may be extended to suitably qualified candidates before the application deadline.

To read detailed information abou tthe program options as well as how to apply, please visit **dental.pitt.edu/oral-biology-academic-programs.**

About the School

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.
Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull.
Every day, the positive contributions of our faculty, staff, residents and students-the Pitt Dental Medicine family-demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the School of Public Health; and bachelor of science (BS).

The four-year doctor of Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre doctoral curriculum with the rest of the class.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The intreprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education.

Research Strengths

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Master's

Oral and Craniofacial Sciences, MS Program

The Department of Oral and Craniofacial Sciences (DOCS) Master of Science Program requires two years to complete, but no more than four years. Early completion may be considered for students with exceptional progress in their thesis that have completed their coursework. The MS Program is distinct from the PhD Program. MS students may apply to be accepted for the PhD Program once they are accepted into the MS Program. If the student is accepted into the PhD Program at a later date, courses taken toward their master's degree will satisfy doctoral degree credit and residency requirements.

Students may earn Master of Science (MS) degree in Oral and Craniofacial Science within one of two research concentrations:

- Craniofacial and Dental Genetics
- Craniofacial Tissue Regeneration

The program is open to post-baccalaureate students, pre-doctoral (First Professional) DMD students, and dental residents. School of Dental Medicine pre-doctoral students and residents may apply for a dual degree option with the PhD or MS Graduate Programs in Oral and Craniofacial Sciences.

Admissions will only be considered for the fall term each year. However, early applications are encouraged, and offers may be extended to suitably qualified candidates before the application deadline.

Students will experience to both concentrations in the program curriculum, which includes three courses with DMD students, and work with faculty in the Department of Oral and Craniofacial Sciences on research in one of these concentrations.

Requirements for the MS Degree

- A total of 31 credits: 25 didactic in the MS core curriculum and 6 in research
- Successful completion of MS core curriculum with a **grade of B (3.0 GPA) or better** in each course
- A one-year research project leading to an master's thesis

- A master's thesis
- Defense of the master's thesis before a thesis committee research

- OCS 3505 - DIRECTED RESEARCH

Summer Term Sixth Semeter

- OCS 3511 - THESIS RESEARCH

PhD

Oral and Craniofacial Sciences, PhD Program

The Department of Oral and Craniofacial Sciences (DOCS) PhD Program requires approximately four to five years to complete and employs a core curriculum which is separate from the MS Program. Students may enter the PhD program directly following their undergraduate degree and do not necessarily have to earn a master's degree first. Earning a master's degree can be incorporated into the PhD program without increasing the total length of time in studies.

Students may earn Doctor of Philosophy (PhD) degree in Oral and Craniofacial Science within one of two research concentrations:

- Craniofacial and Dental Genetics
- Craniofacial Tissue Regeneration

The program is open to post-baccalaureate students, pre-doctoral (First Professional) DMD students, and dental residents. School of Dental Medicine pre-doctoral students and residents may apply for a dual degree option with the PhD or MS Graduate Programs in Oral and Craniofacial Sciences.

Admissions will only be considered for the fall term each year. However, early applications are encouraged, and offers may be extended to suitably qualified candidates before the application deadline.

Students will experience to both concentrations in the program curriculum, which includes three courses with DMD students, and work with faculty in the Department of Oral and Craniofacial Sciences on research in one of these concentrations.

Requirements for the PhD degree

- A total of 72 credits of coursework: 37 didactic (25 in the PhD core curriculum) and 35 research
- Successful completion of PhD core curriculum with a grade of B (3.0 GPA) or better in each course
- Written comprehensive examination after the sixth semester (for advancement to PhD candidacy)
- Dissertation proposal defense
- Approval of a dissertation committee and dissertation research
- Dissertation defense
- A PhD thesis

A student who earned a master of science degree from another institution may petition the Graduate Studies Committee to waive the comprehensive examination.

Department of Periodontics and Preventive Dentistry

Certificate

Clinical Research in Periodontics and Implant Dentistry

This certificate program in Periodontics and Implant Dentistry combines didactic education, clinical experiences, and research opportunities to provide students with a baseline education in the field of periodontics and implant dentistry. Students attend the same courses, seminars, case conferences, and literature reviews offered in the first year of the three-year Department of Periodontics residency program. The curriculum is designed to provide comprehensive and advanced training with time allocated for the development of clinical and translational research.

The curriculum for the certificate is carefully planned by the department's program coordinator. The availability of diverse courses, combined with dedicated faculty mentorship, ensures that students have the flexibility to customize their educational journey while meeting the high standards set by the program.

Didactic Training:

- The program integrates extensive didactic training, including seminars, lectures, and literature reviews covering fundamental and advanced topics in Periodontics and Implant Dentistry. Courses are taken alongside residents in the Periodontics department.

Clinical Training:

- Students actively participate in hands-on demonstrations to acquire practical skills. Training involves treating patients alongside faculty in the Department of Periodontics clinic, providing a diverse and immersive learning experience.

Research Engagement:

- Students are integrated into ongoing scientific research projects led by principal investigator(s) (PI). This active engagement in research enhances their understanding of contemporary issues and contributes to the advancement of the field.

Educational Environment:

- The program cultivates a challenging and enriching educational environment, promoting critical thinking, problem-solving, and evidence-based practice in the field of periodontics and implant dentistry.

For more information about the program, including admissions requirements and deadlines, please visit: https://www.dental.pitt.edu/education/clinical-research-program-periodontics-and-implant-dentistry.

Required Courses

Core courses for the enrollees. Same courses first year periodontic residents take. Totals 26.5 credits

- CDENT 2113 - DENTAL RESEARCH METHODOLOGY 1
- CDENT 2114 - DENTAL RESEARCH METHODOLOGY 2
- CDENT 2183 - SCIENTIFIC WRITING
- DENT 2049 - GRADUATE PATIENT CARE
- DENT 2130 - APPLIED HEAD AND NECK ANATOMY
- DENT 2150 - ETHICS IN THE DENTAL SPECIALTIES
- DIASCI 2110 - ADVANCED ORAL PATHOLOGY 1
- DIASCI 2191 - PATHOBIOLOGY 1
- DSPHL 2243 - SCIENTIFIC BASIS FOR CLINICAL THERAPEUTICS
- PERIO 2114 - MINERALIZED TISSUE BIOLOGY
- PERIO 2121 - PERIODONTAL LITERATURE REVIEW 1
- PERIO 2122 - SPECIAL TOPICS IN PERIODONTICS 1
- PERIO 2140 - PERIODONTAL TREATMENT PLANNING 1
- PERIO 2142 - PERIODONTICS JOURNAL CLUB - 1
- PERIO 2144 - PERIODONTICS ASPECTS OF DENTAL IMPLANTS
- PERIO 2157 - PERIODONTAL LITERATURE REVIEW 2
- PERIO 2190 - ADVANCED PERIODONTAL CONCEPTS
- PERIO 2212 - SPECIAL TOPICS IN PERIODONTICS 2
- PERIO 2199 - INTRODUCTION TO PERIODONTICS SPECIALTY CLINIC
- PERIO 2240 - PERIODONTAL TREATMENT PLANNING 2
- PERIO 2242 - PERIODONTICS JOURNAL CLUB 2
- PROSTH 2117 - IMPLANT PROSTHODONTICS SEM 1
- PROSTH 2147 - IMPLANT PROSTHODONTICS SEMINAR 2

Electives

Two electives totaling 2 credits

- PERIO 2114 - MINERALIZED TISSUE BIOLOGY
- PERIO 2252 - INTRAOPERATIVE MANAGEMENT OF COMORBIDITIES

Total Credits: 28.5

School of Education

School of Education

Mission/Vision

The following statement is the Mission/Vision of the School Education, which was adopted in January 2019. It encapsulates what we do, what we believe, and who we continually seek to become as members of the School community.

We ignite learning. We strive for well-being for all. We teach. We commit to student, family, and community success. We commit to educational equity. We advocate. We work for justice. We cultivate relationships. We forge engaged partnerships. We collaborate. We learn with and from communities. We innovate and agitate. We pursue and produce knowledge. We research. We disrupt and transform inequitable educational structures. We approach learning as intertwined with health, wellness, and human development. We address how national, global, social, and technological change impacts learning. We shape practice and policy. We teach with and for dignity. We think. We dream. We lead with integrity. We are the School of Education at the University of Pittsburgh.

Admission

Admission Procedure

Faculty members in the program to which the student applies evaluate the applicant's credentials and recommend admission for those applicants meeting the criteria set by the program. Individual programs require supplemental application materials; some require prerequisite coursework and skills knowledge. More details regarding expectations for the statement of intent or writing portfolio, pre-requisite courses, and other supplemental application materials can be found on the individual program pages (through the appropriate program).

Approved applicants will be notified of their admission for a specific term and asked to indicate whether or not they accept the offer of admission. Approved applicants may defer admission for up to one year from the term specified in their admission letter. Approved applicants unable to register for courses within one year of the term specified in their admission letter must reapply for admission.

Changing Programs for Graduate Study

A student wishing to change programs for graduate study must file a new application for admission. All work taken both in undergraduate and graduate study will be reviewed by the program to which the student is applying before a decision will be made about admission to the new program. Any change from one program to another in the School of Education while the student is on active status will not alter that status. Thus, the student must register within the dates set for continuing active students.

Advising

Each student is assigned an academic advisor at the time of admission to a program. All course work scheduled must be approved by the academic advisor, who assists in the preparation of a student's plan of studies and who regularly meets with the student to review the student's academic progress.

Each graduate student who is completing a master's thesis or doctoral dissertation works with a research advisor who provides guidance during the conduct of the thesis or dissertation research. The research advisor may be the same faculty member as the academic advisor or another faculty member. The faculty member's consent to serve as the research advisor must be formally obtained. A student continuing from a master's program involving a thesis to a doctoral program may select a different research advisor to provide guidance for the doctoral dissertation.

The student, the advisor, the program, or the department may initiate a change of the academic advisor or the research advisor.

Graduate students have the following responsibilities in relation to academic advising:

- Students are expected to be proactive in learning the components of the curriculum, including all course requirements and milestones, and to seek out resources beyond their academic advisor to understand and make decisions about the curriculum.
- Students are expected to take responsibility for their personal, academic, and career decisions.
- Students are expected to utilize the student support services of the University to enhance their educational experience.
- Students are expected to perform the following in order to select courses and make informed decisions regarding degree progress:
- Refer to the academic calendar to meet necessary deadlines, including add/drop and withdrawal deadlines, and final exam schedules;
- Navigate all aspects of PeopleSoft, the student registration system.
- Students are expected to read their University e-mail on a regular basis, which is the official means of communication for the University.
- Students are expected to come to each advising appointment prepared to discuss academic progress, personal and career goals, interests, concerns, and, at times, the specifics of course work for upcoming semesters.
- Students are expected to meet all deadlines for applying for graduation and external certifications.

School of Education General Graduate Academic Regulations

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Academic Standing

Students in graduate programs need to maintain a cumulative grade point average of 3.000 to remain in good academic standing. The School of Education follows the regulations and processes for determining academic review, academic notice, and academic dismissal as described in the Academic Standing Policy. While on academic notice, students are limited to registering only for courses in which a letter grade is given.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations . School-specific detail follows.

By University regulations, no more than 50 percent of credits may be transferred toward a Pitt graduate degree. A maximum of 30 transfer credits may be counted toward an EdD or PhD degree. Any transferred credits must meet specific degree requirements and are subject to approval by the program faculty and associate/assistant dean. Graduate transfer credits will not be accepted for courses in which a grade lower than B (GPA=3.00) or its equivalent has been received. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exceptions are courses taken while an undergraduate student at the University of Pittsburgh during undergraduate study that meet the requirements in the Academic Regulations.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year may be granted to master's students or two years for doctoral students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the Dean's Office. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Non-degree enrollment

Students who have completed a baccalaureate degree may enroll in graduate courses in the School of Education as non-degree seeking students. No more than 15 credits taken as a non-degree student may be applied toward a graduate degree in the School of Education.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a plan of studies that conforms to program requirements. The plan of studies is approved by the academic advisor and the program coordinator.

Any changes in the plan of studies must be approved by the academic advisor and the program coordinator and conform to program requirements. At the time of graduation, completed courses must comply with the approved plan of studies.

Readmission

A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her advisor and committee. Readmission is not automatic nor does it necessarily reinstate the student in the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more, but not less, stringent than those stated here.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial program enrollment and all requirements for the MAT or MEd degrees in five years.

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the EdD must be completed within a period of 12 years (or 10 years if the student has received credit for a master's degree appropriate to the field of study).

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the PhD must be completed within a period of 10 years (or 8 years if the student has received credit for a master's degree appropriate to the field of study).

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean (or designated assistant or associate dean) for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion

of all current degree requirements. Under certain conditions, the dean/assistant dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean's Office of the school. Ordinarily, the statute of limitations can only be extended once.

Commonwealth Teacher Education Certification Programs

Teacher education certification programs are offered in both general and special education.

Option 1. *Initial Certification*-Available for PreK-4, Teacher of Students with Visual Impairments (TVI) PreK-12 and Special Education PreK-12. These programs result in eligibility for a teaching certification without a graduate degree.

Option 2. *Certification Plus a Graduate Degree*-for students seeking initial general or special education teacher certification along with a master's degree (e.g., Master of Arts in Teaching [MAT] or Master of Education [MEd]).

Option 3. *Dual certification* (CASE) PreK-4 and preK-12 special education.

Option 4. *Additional Field Certification*-for students already certified in one or more teaching fields who are seeking teacher certification in an additional specialty area but who are not pursuing a graduate degree.

Advanced certification programs include:

- Teacher of Visually Impaired Certification
- Orientation and Mobility Certification
- Special Education Supervisory Certification
- K-12 Principal Certification
- Superintendent Letter of Eligibility
- Reading Specialist Certification

University certificates are awarded to students who complete commonwealth teacher education certification programs offered in Teaching, Learning, and Leading. Students in these programs must apply for graduation at the beginning of the term prior to the term they expect to complete their programs. Eligibility for the University certificate is verified at the same time that a student's application for commonwealth certification is endorsed by the School of Education and sent to the Pennsylvania Department of Education in Harrisburg.

Commonwealth Teacher Education Certification Regulations

The following section details regulations pertaining to the school's teacher education certification programs.

Instructional I and II Certification

The **Instructional I**, or provisional, certificate is issued by the Pennsylvania Department of Education (PDE) to applicants who:

- possess a baccalaureate degree with a 3.0 grade point average;
- have successfully completed a PDE-approved teacher certification program;
- pass all required PRAXIS, PECT, basic skills, and/or PAPA Examinations;
- successfully complete PDE Form 430 for initial certification; and
- are recommedned for certification by the college or university offering the PDE-approved teacher certification program.

An Instructional I certificate is valid for six years.

The **Instructional II**, or permanent, certificate is issued by PDE to applicants who have completed all of the following:

- A PDE-approved induction program for beginning teachers.
- Three years of satisfactory teaching in the field specified on an Instructional I certificate, attested to by the chief school administrator of the approved public or non-public school in Pennsylvania in which the most recent service of the applicant was performed.

- Twenty-four credit hours of post-baccalaureate study or in-service courses approved by PDE. (Some credits earned beyond the baccalaureate degree in teacher education study at the University of Pittsburgh may be used to satisfy this requirement.)

Grade Point Average/Academic Standing

All students enrolled for teacher education study are required to maintain a grade point average (GPA) of at least 3.00. For graduate teacher education, the cumulative GPA is based on all coursework taken after enrollment for teacher education study. No student on academic notice or academic probation is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum.

Although the credits allowed for acceptable work completed elsewhere by transfer students count toward the total number of credits required for teacher education study, the grades earned in such courses are not included in GPA computations, except in determining the GPA required for admission to the School of Education.

Credit Requirements

Teacher education study in the Instructional I certification program requires the satisfactory completion of a minimum of 30 credits of course work approved by the department and the school. The Master of Arts in Teaching option requires 36 credits. Credit requirements for other certification options vary. Certification by the Pennsylvania Department of Education is recommended only for those students who have satisfactorily completed all courses required for certification with at least a 3.00 GPA.

Teacher Certification Testing Program

The PAPA/CORE battery of tests, required for some students seeking their first Instructional I certificate, consists of a series of examinations to assess basic communication skills, general knowledge, professional knowledge, and specialized area knowledge. Persons with an undergraduate degree already holding a Pennsylvania Instructional I or II certificate are exempt from the PAPA/CORE series. Individuals seeking Instructional I certification in more than one area must take and pass specialization area tests in all areas in which certification is sought. Individuals seeking additional field certification must pass the PRAXIS Examination in the specialization area.

Students completing an Instructional I certificate in preK-4 education, a certificate in preK-4/preK-12 special education or a secondary/preK-12-12 special education certificate must pass the appropriate PECT and Praxis tests.

Students may take the PRAXIS Examinations at any point during or after attendance at a post-secondary institution. Go to the PRAXIS website for information on registering to take the exams.

Student Teaching

In most programs, field experience in local public schools is required throughout the academic year (August to June). When a student accepts their offer of admission, they are required to complete information about student teaching. Applicants must also submit results from a tuberculin test, child abuse clearance, and criminal history check, as required by Pennsylvania Acts 33 and 34. Students must also submit results from a Federal Criminal History Record check by obtaining fingerprint results through the FBI. Lastly, students must successfully pass an online training, Protecting Children from Abuse and also read the PA Mandated Reporter law and sign to indicate understanding.

Student teaching usually begins in late August and sometimes sooner than the opening day of University classes. Specific procedures and regulations governing student teaching practicum can be found in the student teaching handbook.

Teaching Internship

Students in the Master of Arts in Teaching option must complete an academic year (August to April) teaching internship in lieu of student teaching. The internship requires a minimum of 20 hours per week in the Fall term and 30 hours per week in the Spring and a term after Spring. To qualify for the internship and the Pennsylvania Teacher Intern certificate, applicants must:

- As required by Pennsylvania Acts 33 and 34 submit the following clearances: Federal Criminal History Record by obtaining fingerprint results through the FBI; Pennsylvania State Criminal Record Check; Pennsylvania Child Abuse History Clearance. The University cannot guarantee that a person with entries in their criminal record will be permitted to do assignments in a

school. While State law bars certain offenders from schools, districts often impose more extreme requirements. Students who have entries in their records should consult the Coordinator of Clinical Practice on whether a placement will be likely

- Pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- Satisfy the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)

Students must also successfully pass an online training, Protecting Children from Abuse, submit a signed Arrest/Conviction Report and Certification Form, and also read the PA Mandated Reporter law and sign to indicate understanding

Advanced Teaching Practicum

Students in the additional field certification option must complete an advanced teaching practicum (modified student teaching experience), which vary based on the program requirements.

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the Academic Regulations section in addition to the specific school information detailed below.

Common Requirements

Most master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 30 credits and the passing of a comprehensive examination.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more, but not less, stringent than those stated here.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial program enrollment and all requirements for the MAT or MEd degrees in five years.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request for extension must include a recommendation made by the academic advisor. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean (or designated assistant or associate dean) for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements. Ordinarily, the statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the Dean's Office. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a plan of studies that conforms to program requirements. The plan of studies is approved by the academic advisor and the program coordinator.

Any changes in the plan of studies must be approved by the academic advisor and the program coordinator and conform to program requirements. At the time of graduation, completed courses must comply with the approved plan of studies.

School of Education Master's Degree Comprehensive Milestone Assessment Policy

Students invest in graduate school to advance their knowledge and skills. With many different training experiences and course assignments, this newly-acquired knowledge and skill base can feel disjointed or segmented.

World-class training programs create synthesizing experiences for students to organize and apply their knowledge and skills. The University of Pittsburgh requires completion of a comprehensive exam or its equivalent for all M.A., M.Ed. and M.S. degree completion. Comprehensive exams are separate from a thesis for programs with a thesis option and are required regardless of thesis completion. This requirement takes different forms across the School of Education and is referred to as comprehensive milestone experiences or assessments throughout this policy.

Programs with Culminating or Comprehensive Milestone Experiences:

Master-level students may be required to complete other kinds of scholarly and/or professional milestone experiences that serve as a student's comprehensive milestone assessment as determined by their majors, programs, or departments. Culminating milestones that are capstone courses, theses, projects, portfolios, practicums, demonstrations, simulations, or presentations will follow the requirements on the timelines established by their respective majors, programs, or departments.

Programs with Comprehensive Milestone Assessments:

Completion of comprehensive, end of program milestones (ex. take home or timed exams, oral exams, etc.) are one key mechanism promoting integration of that knowledge. Against the backdrop of this worthy learning goal, however, is the reality that milestone assessment completion, especially one that influences successful completion of a training program, can produce high levels of anxiety.

Mindful of this unintended consequence, faculty in the School of Education have handcrafted the following student-centered milestone policy.

Assessment window:

Fall and spring terms: Comprehensive milestone assessment administration will take place between weeks 6-8 of the term. All milestone assessments must be submitted by week 8. Scoring occurs between weeks 8-10. Following, students will receive an official email from the program coordinator noting successful completion of this milestone assessment and completion is noted on the student transcript through Career Services.

With the joint aims of fairness and transparency, milestone assessments will be scored by a faculty committee and rated as "pass," "needs revision," or "unsatisfactory." It is not unusual given the scope of the task and for the fact that many students have never attempted a task of this kind before, that a student may need more support to be successful. We've planned for this reality in our scoring process. In the case that a student needs more support, milestone assessments scored "needs revision" will be returned to students for improvements through a revision process and resubmitted by week 11. Revised milestone assessments will be re-scored and students will be notified of their revised score by week 12. Many students report the opportunity to revise work was among the single greatest learning experience of their program. For this reason, revising a milestone assessment is not viewed as a failure, but rather an opportunity for further learning. To provide students the most optimal conditions for success, students may only revise and resubmit once per term.

To ensure that a student has obtained the skills and knowledge commensurate with the degree, we offer students an additional term of study. So that if a student scores "unsatisfactory" on the first attempt or if the revisions are scored as "unsatisfactory," the student returns the next term the milestone assessment is offered to retake a new comprehensive milestone assessment for graduation. In the rare case that a student is not successful on their second attempt, faculty will counsel the student on options for next steps. Additional attempts are not guaranteed and can only be provided to students who are considered active by the university and within their statute of limitations.

Summer terms: Comprehensive milestone assessment administration will take place between weeks 1-2 of a six-week term. Students enrolled in a 12-week summer term will have the comprehensive milestone assessment administered during weeks 3-5. Scoring and notification of results will occur 2 weeks after the submission window closes.

Milestone assessments will be scored by a faculty committee and rated "pass," "needs revision" or "unsatisfactory." Milestone assessments that are scored "needs revision" will require revision and resubmission one week after notification. Revised milestone

assessments will be scored and students will be notified of their revised score one month prior to graduation. Students will only be given one chance to revise and resubmit once per term.

If a student scores unsatisfactory on the first attempt or if the revisions are scored as unsatisfactory, the student must return the next term the milestone assessment is offered to retake a new comprehensive milestone assessment for graduation. Successful completion of the milestone assessment is required for graduation.

Signing up for the comprehensive milestone assessment:

Two weeks prior to the milestone assessment window, students are required to sign-up for the comprehensive milestone assessment via the School of Education portal.

Thesis, Thesis Equivalent, and Research Paper Requirements

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research project or paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form to the Office of Student and Career Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available on the IRB website.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. The form showing a passed final oral examination must be submitted to the Office of Student and Career Services prior to the term's graduation deadlines. The dean/assistant dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Doctoral Degree General Requirements (EdD and PhD)

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Doctoral Programs

Doctor of Education (EdD) and Doctor of Philosophy (PhD) degree programs are offered by the School of Education to provide advanced graduate study and professional specialization in education. Each recipient must show evidence of superior scholarship, mastery of a special field of knowledge, and ability to conduct significant and relevant research. In doctoral study in the School of Education, a distinction is made between the preparation of education professionals resulting in the EdD degree and the preparation of education professionals resulting in the PhD degree. While both the EdD and PhD degrees produce experts in critical inquiry, the School of Education distinguishes the degrees according to, among other factors, the focus of the area of inquiry, the type of knowledge advanced, and the career path chosen by the individual student.

PhD research focuses on the study of basic problems arising primarily from behavioral and social science theory with the goal of advancing such theory and knowledge. Individuals pursuing this degree often seek academic positions in universities or research institutes. EdD research focuses on the study of applied, practical problems with the goal of contributing to solutions. Careers for these individuals often center on professional positions as administrators, curriculum developers, or specialists in schools and clinical settings.

Credit Requirements

PhD degrees require a minimum of 72 course credits in a degree program beyond the baccalaureate. EdD degrees require a minimum of 76 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 66 course credits (including transfer credits) and a minimum of 10 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance, supported by the advisor and department chair, and approved by the Assistant Dean for Student Engagement. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student.

Doctor of Education Specific Requirements

The three-year structured EdD program is built on a cohort model. The cohort of students admitted complete a three-year, 76-credit program, which includes 24 credits transferred from relevant graduate coursework. The majority of EdD experiences are shared across areas; however, students pick one of the following academic majors:

1. Education Leadership

2. Health and Physical Activity
3. Higher Education
4. Out of School Learning
5. Science, Technology, Engineering & Math
6. Education Policy and Social Change
7. Special Education
8. Urban Education

Coursework will be offered by varied delivery models, including in-person class sessions, online activities, a week-long intensive on-ramp experience, and applied experiences. Integrating diverse learning environments offers a range of structures and opportunities for doctoral students and faculty to form and access "communities of practice" face-to-face in a classroom or via Canvas (discussion boards, wikis, blogs, Zoom, etc.). Communities of practice are intentionally created collaborative learning environments that extend and enrich intellectual discourse within a socially constructed space. This flexible structure is especially important for part time doctoral students to thrive as scholarly practitioners.

A school-wide EdD admissions committee reviews all applications for the EdD degree program. The prospective advisor also reviews the application to affirm the match between student and faculty interests. A 3.5 master's GPA is recommended and GRE scores are not required. International student admission requires a TOEFL score of 100 on the internet-based test with a minimum of 21 on each subtest, 240 on the computer-based test, or 600 on the paper-based test.

Acceptance of Transfer Credits

EdD students apply 24 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (*see Acceptance of Transfer Credits*). Students may apply six additional credits of directly equivalent courses with advisor approval. The first 24 post-baccalaureate credits will be automatically applied by the School of Education records office. Any additional credits must be submitted using the "Course Credits Accepted" form found on the School of Education Policies and Forms page. These credits must be equivalent to applicable University of Pittsburgh courses and approved by the student's advisor. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA=3.0) or its equivalent.
- The course must be approved for equivalent graduate degrees at the institution, extension, or off-campus center of other institutions at which the course was taken.

Course Requirements

The EdD includes the following degree requirements:

- EdD Foundations Courses (12 credits)
- EdD Practitioner Inquiry Courses (12 credits)
- Academic Major Courses (12 credits)
- Additional Relevant Courses (24 transfer credits)
- Supervised Practitioner Inquiry (3 credits)
- Dissertation-in-Practice Overview Seminar (3 credits)
- Dissertation in Practice (10 credits)

Students seeking certification in the Superintendent Letter of Eligibility or Supervisor of Special Education additionally enroll in internship credits (3 credits) to meet Pennsylvania Department of Education requirements.

To satisfy adequate progress toward their degree program, the Doctor of Education student should resolve Incomplete grades in a timely manner. To maintain adequate progress, an EdD student cannot have more than two Incomplete grades at any one time and may be prevented from registering for future coursework if they receive a third Incomplete grade.

Practical Requirement for Professional Doctoral Degree

The EdD degree requires students to complete inquiry activities in their place of professional practice in the four courses in the Practitioner Inquiry sequence. These activities provide the opportunity for EdD students to meet the university requirement that students in professional doctoral degrees engage in internship, practicum, or clinical experiences. EdD students pursuing Pennsylvania state certification

(Superintendent Letter of Eligibility or the Supervisor of Special Education) are required to complete an additional three-credit internship course (in addition to the 76 credits required for the EdD degree) to meet PA Department of Education requirements.

Statute of Limitations

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the EdD must be completed within a period of 12 years (or 10 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean or designated associate or assistant dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean or the designated associate dean or assistant dean. The statute of limitations can only be extended once.

Advancement to Doctoral Study

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.000 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh; and
- have successfully completed the comprehensive examination as described below.

Comprehensive Examination

Completion of EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY constitutes successful completion of the comprehensive exam. Successful completion of this course signals that the student has completed the EdD program of courses and is ready to embark upon their Dissertation in Practice.

Dissertation in Practice

The Dissertation in Practice denotes a culminating, doctoral- level project that focuses on addressing a problem of practice. Unlike a PhD Dissertation, which focuses on original research, the Dissertation in Practice is an applied improvement project, rooted in a student's context (most often their place of employment). Students prepare for this improvement project in their first and second years and carry out the project in their third year. We require students to provide Institutional Review Board (IRB) approval-or evidence that IRB review is not required-before carrying out the proposed project. The culmination of the Dissertation in Practice is the defense meeting, held in students' final semester, in which the committee comes together with the student to discuss the project. The Dissertation in Practice is ultimately put into Electronic Thesis and Dissertation (ETD) format and uploaded to ProQuest at Pitt, making the document publicly available.

Doctoral Committee

EdD doctoral committees are constructed in consultation between the student and their advisor. Committees must consist of at least three members. Some students choose to invite a 4th member in order to round out the committee's expertise. The following requirements apply:

- All members must have earned a terminal degree (EdD, PhD, JD, MD, MFA, etc.)
- 1 member must be the student's designated School of Education advisor.
- 1 additional member must be full-time faculty of the School of Education: tenured, tenure stream, or appointment stream; one may be recent emeritus (i.e., retired within 2 years).
- 1 member must be a practitioner (currently or previously active) who holds expertise or a faculty member who has appropriate practitioner knowledge related to the student's problem of practice*.

*A practitioner (currently or previously active) is defined as a person engaged in (or previously engaged in) the activities related to the problem of practice addressed in the Dissertation in Practice. A practitioner may also be someone who has appropriate practitioner knowledge related to the problem of practice addressed in the Dissertation in Practice. The goal for having this member serve on the Committee is to benefit and advance the student's work by providing specialized expertise and perspectives relevant to practice. This person will facilitate the project by serving on the committee and advising the student in their study. No particular affiliation is required for the practitioner committee member.

The proposed committee goes through the following approval process: it is first approved by the student's advisor, then the coordinator of the student's major, and finally, the Director of the EdD. Any subsequent changes in the doctoral committee must go through this same process.

The doctoral committee will decide on the acceptability of the final Dissertation in Practice submission, with each committee member indicating whether they deem the project to be a pass or fail.

Additional Program Requirements

The following requirements are designed to help the students successfully move toward their Dissertation in Practice: the Problem of Practice Statement, guidelines and supports around assembling a doctoral committee, and the Dissertation Overview meeting in which a student's project plan is presented.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

Generally, final version, ETD-formatted dissertations must be submitted to the Office of Student and Career Services at least six weeks prior to the end of the term of graduation, in accordance with the date specified in the Doctoral Graduation Checklist, which can be found on the School of Education's Graduation web page. All requirements of the Doctoral Graduation Checklist must be completed by their due dates in order for a student to graduate.

Doctor of Philosophy Specific Requirements

The Doctor of Philosophy degree in the School of Education is a research-intensive training model that prepares students to be nationally competitive for research careers in both academic and non-academic institutions. International students require a minimum of 100 or higher TOEFL composite score with sub-scores of 21 or higher or 7.0 IELTS with sub-scores of 6.0 or higher. After screening, certain applicants may be interviewed by faculty prior to a final decision on admission.

The students are admitted into one of the following majors:

- Education Policy
- Exercise Physiology
- Higher Education
- Human Development and Learning Sciences
- Language, Literacy & Culture
- Special Education
- Urban Education

Plan of Studies

Prior to advancement to the formal stage called Doctoral Study, the student, in consultation with the academic advisor, must complete a plan of studies that conforms to program requirements. The plan of studies is approved by the academic advisor and the department chair. PhD students are required to file a Plan of Studies during the first year in the program. In formulating the doctoral Plan of Studies, both the student and the academic advisor must pay close attention to these School of Education requirements as well as requirements specific to the particular program or department in which the degree specialization is taken. It is the responsibility of the student to learn particular requirements from the academic advisor. The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh.

Courses approved for transfer credit must be listed individually on the plan of studies. Also, when a student plan of studies lists directed study credits, a directed study agreement form must be completed in the online system at the time of registration. A brief explanation of the directed study will be required, and then electronic signatures will be obtained. If an elective in-person course is available during the student's plan of studies that aligns with the student's interests, then students are encouraged to enroll in the course rather than ask a faculty member to supervise a directed study in the same topic. In general, enrollment in directed study credits should be used sparingly to increase classroom enrollments and reduce faculty burden.

Any changes in the plan of studies must be approved by the academic advisor and the department chair and must conform to program requirements. At the time of graduation, completed courses must comply with the approved plan of studies.

Credit Requirements

The PhD degree requires a minimum of 72 credits in a degree program beyond the baccalaureate. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study if approved on a plan of studies. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree. The University Catalog lists specific degree requirements.

Acceptance of Transfer Credits

PhD students may apply a maximum of 30 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (*see "Acceptance of Transfer Credits" and "Credit Requirements"*). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. When approved, transfer credits must appear on the student's Plan of Studies. The registrar, after notification of acceptance of transfer credits, will enter the individual transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA = 3.00) or its equivalent.
- The course must be judged relevant to a student's doctoral Plan of Studies by the program or department.
- Course must have been completed in a degree granting graduate program at another nstitution and should be evaluated for acceptability as transfer credit early in the student's graduate career subject to University policy, course equivalencies, and individual school requirements.

The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh. However, under certain circumstances, a student may earn in an accredited graduate institution other than the University of Pittsburgh a limited number of credits toward a doctoral degree.

Doctoral students desiring to take courses at another institution following admission to the University of Pittsburgh should review the course descriptions and receive approval from their academic advisors and program or department prior to registering for those courses if they wish to ensure that these credits will be acceptable for transfer. See University Regulations about Acceptance of Transfer Credit.

Residency

According to University policy, students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study. This excludes any other employment, except as approved by their departments or programs. Full-time doctoral study involves enrolling in at least 9 credits of coursework during one term from students' plans of study and can include fulfillment of supervised research activities. Enrollment in FTDG 0000 or SMSG 3666 does not fulfill the residency requirement.

Supervised Research

PhD students are required to complete a supervised research experience that results in a written report of the experience. Enrollment for six credits of supervised research, internship, practicum, or directed study is required. To satisfy the supervised research requirement, PhD students complete Milestones 1 and 2, as described below.

Statute of Limitations

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the PhD must be completed within a period of 10 years (or 8 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean or designated associate or assistant dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean or the designated associate dean or assistant dean. The statute of limitations can only be extended once.

Doctoral Preliminary Evaluation

Each doctoral student is required to complete a preliminary evaluation designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the initial phase of graduate study, and the student's potential to apply research methods independently. The preliminary evaluation is administered by the program or department to which the student has been admitted. The preliminary examination (Milestone 1) is a proposal for a pre-dissertation research project. At the beginning of the second full year, the student submits a proposal for their pre-dissertation research project. The student's pre-dissertation project committee is composed of three

faculty (the advisor and two additional faculty). The student defends the proposal in a meeting of the committee, and the proposal needs to be approved by the unanimous vote of the committee.

Pre-Dissertation Research Project

At the beginning of the third full year, the student submits the completed pre-dissertation research project (Milestone 2) for review by the student's pre-dissertation project committee. The student defends the completed project in a meeting of the committee, and the project needs to be approved by the unanimous vote of the committee.

Advancement to Doctoral Study

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.000 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh;
- have a Plan of Studies approved by the academic advisor and the department chair on file in the School of Education Records Office; and
- have passed the doctoral preliminary evaluation.

Comprehensive Examination

After advancement to doctoral study, each doctoral student is required to take a comprehensive examination. The comprehensive examination is constructed, administered, and scored by the department or program to which the student has been admitted. Procedures and schedules of administration are available from the department or program.

In accordance with University graduate program regulations, the comprehensive examination should be administered at approximately the time of the completion of the formal course requirements and should be passed at least eight months before the scheduling of the final oral examination and dissertation defense. In no case may the student graduate in the same term in which the comprehensive examination is taken. After the comprehensive examination is passed, the student has the remaining time specified by the statute of limitations to complete all remaining doctoral degree requirements. Satisfactory completion of the doctoral comprehensive examination requirement is part of the demonstration of doctoral competency.

When students have eight credits or fewer of coursework to complete, they can begin to register for dissertation guidance, even if they have not yet passed the comprehensive examination.

Doctoral Competency

Each doctoral student is required to demonstrate doctoral competency by satisfactorily completing the pre-dissertation project requirement and doctoral comprehensive examination.

Doctoral Committee

For the PhD student, the doctoral committee consists of the research advisor and at least three other members, including at least one member from another department inside or outside the School of Education at the University of Pittsburgh or from an appropriate graduate program at another academic institution. The research advisor and a majority of the total committee must be full or adjunct members of the graduate faculty of the University of Pittsburgh. Current graduate faculty membership may be found on the University's Graduate Faculty Dashboard website.

The program faculty, the department chairperson, and the dean/assistant dean must approve membership on and subsequent changes in the doctoral committee. The student initiates the "Proposed Doctoral Committee" form, using the online milestone system, to obtain the signatures of the program coordinator, the department chairperson, and the dean or designated associate dean or assistant dean. The dean or designated associate dean or assistant dean must give final approval of the doctoral committee before the overview examination may be scheduled.

Dissertation Overview

The dissertation overview is a written proposal and must be presented to the doctoral committee for approval after doctoral competency has been demonstrated.

Overview Examination

The overview examination is conducted by the doctoral committee, is chaired by the research advisor, and is open to any faculty member of the graduate faculty of the University wishing to attend. Although any faculty member may participate in the examination, only members of the doctoral committee may be present during the final deliberation and vote on approving the overview. The student initiates the "Dissertation Overview Examination and Advancement to Doctoral Candidacy" form, using the online milestone system, to obtain committee signatures. The committee must unanimously approve the overview in order for the student to be advanced to doctoral candidacy.

Dissertation

Students should review the information detailed under Dissertation and Abstract and Final Oral Examination for University-wide regulations regarding dissertations and dissertation defenses. School of Education-specific rules follow:

Dissertation Defense

The same rules apply here as detailed under the Overview Examination above.

Vote on the Dissertation Defense

Each member of the doctoral committee must approve the dissertation defense using the online milestone system and vote to pass or fail the student on the dissertation defense. If the decision of the committee is not unanimous, the case is referred to the Assistant Dean for Student Engagement for resolution.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

Generally, final version, ETD-formatted dissertations must be submitted to the Office of Student and Career Services at least six weeks prior to the end of the term of graduation, in accordance with the date specified in the Doctoral Graduation Checklist, which can be found on the School of Education's Graduation web page. All requirements of the Doctoral Graduation Checklist must be completed by their due dates in order for a student to graduate.

Faculty

School of Education Faculty

Acevedo, Rosa - PhD, University of Minnesota Twin Cities

Akiva, Thomas Matthew Schweinh - PhD, University of Michigan
Alang, Sirry - PhD, University of Minnesota

Alazar, Ghirmay - PhD, University of Denver
Anderson, Eleanor - PhD, Northwestern University
Bachman, Heather - PhD, Loyola University of Chicago
Bagnato, Stephen - EdD, Pennsylvania State University
Benson, Richard - PhD, University of Illinois
Bleiberg, Josh - PhD, Vanderbilt University
Boulder, Tinukwa - PhD, Mississippi State University

Briones, César - PhD, Western Michigan University
Campbell, Shanyce L - PhD, University of North Carolina at Chapel Hill
Cavey, Mariko Yoshisato - University of California, San Diego
Chambers, April - PhD, University of Pittsburgh
Conway, Sheila J - PhD, Temple University
Correnti, Rip - PhD, University of Michigan
Crawford, Patricia A - PhD, Pennsylvania State University
Dancy, Elon - PhD, Louisiana State University

D'Andrea, Frances Mary - PhD, University of Pittsburgh
Davis, Kelliann K. - PhD, University of Pittsburgh
DeAngelo, Linda Theresa - PhD, University of California, Los Angeles
Delale O'Connor, Lori A - PhD, Northwestern University
Dias, Beatrice - PhD, Carnegie Mellon University
Dostillo, Lina - EdD, Duquesne University
Eddy, Colleen - PhD, University of Missouri
Fernandez, Loretta - PhD, University of Pittsburgh
Files, Martez Devonte - PhD, University of Alabama at Birmingham
Fonzi, Laura A - Master's, University of Pittsburgh
Gabel, Gary - EdD, University of Missouri
Galla, Brian Matthew - PhD, University of California, Los Angeles
Gallen, Robert Timothy - PhD, University of Kentucky
Godley, Amanda Joan - PhD, University of California, Berkeley

Gonzalez, Sergio - PhD, Claremont Graduate University
Gordon, Benjamin DH - PhD, University of North Carolina at Charlotte
Gunzenhauser, Michael G - PhD, University of North Carolina at Chapel Hill
Hays, Anne Elizabeth - PhD, University of Pittsburgh
Hendry, Heather Jean - PhD, University of Pittsburgh

Higgins, Johanna - PhD, University of PIttsburgh

Ibrahim, Deanna - PhD, New York University
Jacobs, Katrina Bartow - PhD, University of Pennsylvania
Kelly, Sean Patrick - PhD, University of Wisconsin-Madison
Kline, Christopher E - PhD, University of South Carolina
Kopparla, Mahati - PhD, Texas A&M University
Kostewicz, Douglas E - PhD, Pennsylvania State University
Lee, Bridget K. - PhD, University of Texas, Austin
Lee, Duck-chul - PhD, Seoul National University
Matsumura, Lindsay Clare - PhD, University of California, Los Angeles
McCambly, Heather Nicole - PhD, Northwestern University
McCarthy, Tessa Shannon - PhD, Vanderbilt University
McLaughlin, Kevin - Master's, University of Pittsburgh

Mehls, Kelton - PhD, Middle Tennessee State University

Nachman, Brett - PhD, University of Wisconsin-Madison
Nagle, Elizabeth - PhD, University of Pittsburgh

Nelson, Melissa - EdD, University of Pittsburgh

Neupauer, Nicholas - EdD, West Virginia University
Ortiz, Lisa - PhD, University of Illinois
Osai, Esohe R. - PhD, University of Michigan
Patel, Leigh - PhD, University of Nevada, Las Vegas
Perry, Jill Alexa - PhD, University of Maryland, College Park
Petrosky, Anthony R - EdD, State University of New York at Buffalo
Porter, Maureen K - PhD, Stanford University
Qin, Xu - PhD, University of Chicago
Quigley, Cassie Fay - PhD, Indiana University
Rainey, Emily C. - PhD, University of Michigan
Ralston, Tom W. - EdD, Youngstown State University

Recch, Filipe - PhD, Stanford University
Robertson, Rachel E - PhD, Vanderbilt University
Rocco, Bart - EdD, University of Pittsburgh

Ross, Sharon Elizabeth - PhD, Pennsylvania State University
Schuster, Maximilian Thomas - PhD, University of Pittsburgh

Scott, Khirsten - PhD, University of Louisville
Shafiq, Mohammad Najeeb - PhD, Columbia University
Sherman, Sally Anne - PhD, University of Pittsburgh
Smith, Philandra Samantha - PhD, Syracuse University
Sobolak, Michelle J - PhD, University of Pittsburgh
Sprowls-Repcheck, Carma R - PhD, University of Pittsburgh

Trahan, Keith Wayne - PhD, University of Pittsburgh
Vasudevan, Veena - PhD, University of Pennsylvania
Vaught, Sabina - PhD, University of Wisconsin-Madison
Wanless, Shannon - PhD, Oregon State University
Weddle, Hayley - PhD, University of California, San Diego
Wilson, Zachary Joseph - PhD, University of Pittsburgh

Wynkoop, Kaylee - PhD, University of Pittsburgh
Zamani-Gallaher, Eboni - PhD, University of Illinois Urbana-Champaign

Program and Course Offerings

The School of Education is organized into three academic departments:

Doctoral

Human Development and Learning Sciences, PhD

The mission of the Human Development and Learning Sciences (HDLS) doctoral program is to produce a yearly cohort of nationally competitive research scholars who have the training, track record, and vision to become leaders in child, youth, family, and adult development and learning across diverse settings. The HDLS program is based on the belief that understanding teaching, facilitating, learning, and development in formal and informal learning environments is best undertaken as an interactive system, and that an integrated and coordinated interdisciplinary approach is best suited to understand, design and implement change. The program draws from scholarship in education, developmental psychology, and cognitive psychology and emphasizes the importance of community and school partnerships to generate knowledge that contributes toward a more just and humane society. HDLS centers four pillars to guide students and utilize faculty expertise: (1) Teaching, Leading, and Facilitation, (2) Cultural and Social Contexts, (3) Developmental Trajectories and Transitions, and (4) Research Designed for Change. These pillars ground the overall work as multidisciplinary as well as inclusive of formal and informal learning spaces at varying developmental thresholds and intersections. The pillars also emphasize combining traditional psychological measures with the sociocultural realities students and faculty embody on an everyday basis. Lastly, HDLS focuses on change and transformation and the research methods to understand and support that change. The goal is to cultivate the next generation of researchers who embrace complexity and collaboration, and who pursue innovative solutions to the world's most challenging problems.

Innovative features of the HDLS PhD Program:

- Immersion in rigorous interdisciplinary research and training experiences from the first day in the program.
- Access to Pittsburgh's rich talent pool of analysts, researchers and practitioners including research scientists at the Learning Research and Development Center (LRDC) and community-embedded staff and researchers at the Office of Child Development.
- Active involvement in ongoing research projects.
- Rigorous training in quantitative, qualitative, and mixed research methods.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

HDLS Core (12 credits)

- HHD 3001 - MAJOR TRANSITIONS IN CONTEXT
- HHD 3002 - COMMUNITY ENGAGED SCHOLARSHIP
- TLL 3025 - CONCEPTUALIZING AND ASSESSING CHANGE
- TLL 3026 - THEORETICAL PERSPECTIVES ON LEARNING

Seminar Courses (9 credits)

3 credits of First-Year Seminar and 6 credits of Writing Seminar (1 credit each semester). Students begin taking Writing Seminar during their second year of study and continue for six semesters.

First-Year Seminar:

EDUC 3101 - FIRST YEAR PHD SEMINAR (3 cr)

Writing Seminar:

TLL 3009 - HUMAN DEVELOPMENT LEARNING SCIENCES WRITING SEMINAR

Research Methods (18 credits)

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
  9 credits Research Methods Electives - must be approved by advisor

Supervised Research (6 credits)

- HHD 3591 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY
- TLL 3097 - SUPERVISED RESEARCH

Electives in Area of Specialization (27 credits)

Students will work with their advisor to plan a coherent set of electives for their scholarly development.

Doctoral Dissertation Research (0 credits)

Students enroll in FTDG 0000 to complete their dissertation studies.

Total Credits: 72

Department of Educational Foundations, Organization, and Policy

Programs within the Department of Educational Foundations, Organization, and Policy (EFOP) prepare graduates for careers in educational institutions and organizations. Our graduates work in formal and non-formal educational settings, including schools, higher education institutions, community agencies, policy organizations, and non-profit organizations. In our most advanced programs, students

are prepared for research and teaching careers in colleges and universities and for research and policy study careers in local, state, national, and international agencies.

General Contact Information

Chair: Lori Delale-O'Connor
Email: loridoc@pitt.edu
Phone: 412-624-1332

Department Address: 5900 Posvar Hall, 230 S. Bouquet St., Pittsburgh, PA 15260

Doctoral

Education Policy and Social Change, EdD

The EdD program in Education Policy and Social Change (EDPSC) is for the education professional interested in leading efforts to improve educational access, outcomes, and opportunities for all students. EDPSC students dig deeply into foundational issues in education, such as the meaning and value of education, education's role in society, the historical roots and significance of educational practices, the role of policy in educational change, and the significance of global trends in education access and equity. Faculty and students affiliated with the EDPSC Program ground their professional and scholarly work in multiple forms of evidence and use social science tools that lead to creative solutions, more equitable opportunities, and more socially just educational structures. Our EdD students work in varied formal and informal educational settings - K-12, higher education, community agencies, and non-profit organizations - and unite around the fundamental role that education plays in a diverse and globally-connected society.

The Education Policy and Social Change Doctor of Education (EDPSC EdD) program aligns with the mission/vision of the school of education in preparing students to be scholars, leaders, and change-makers in education and health, with a particular focus on equity and justice

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.
- **Intensive on-ramp**: The EdD cohort will participate in the first-year summer "on-ramp" courses which consist of three in-person Saturdays and a full-week, on-campus experience. The on-ramp consists of two courses-- Foundations 1 and Practitioner Inquiry 1 -- to give new students an immersive introduction to doctoral study, cohort collaborations, and program content. The one-week in-person experience typically takes place in June.
- **Hybrid seminars**: After the first summer on-ramp, students experience a hybrid learning model of education. Each semester courses are largely conducted asynchronously online which is supported through a once a month flipped classroom experience that takes place in-person (typically on Saturdays) on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

SCHEDULE (all courses are 3 credits unless otherwise noted)

Year 1: Summer	Year 1: Fall	Year 1: Spring

EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER	EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION Major Course 1	EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major Course 2
Year 2: Summer	**Year 2: Fall**	**Year 2: Spring**
EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY	EDUC 3006 - PRACTITIONER INQUIRY 2 Major Course 3	EDUC 3007 - PRACTITIONER INQUIRY 3 Major Course 4
Year 3: Summer	**Year 3: Fall**	**Year 3: Spring**
EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)

Foundation Courses: 12 Credits

- Foundations 1: EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- Foundations 2: EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- Foundations 3: EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- Foundations 4: EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: 3 credits

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

Dissertation-in-Practice Overview: 3 credits

- EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR

Guidance In Scholarly Practice: 10 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE

Education Policy and Social Change Academic Major Courses (12 credits)

- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- EFOP 3017 - ORGANIZATIONS, NETWORKS, AND EDUCATION POLICY
- EFOP 3018 - ECONOMICS-INFORMED POLICY ANALYSIS
- EFOP 3019 - EDUCATIONAL IMPLEMENTATION AND EVALUATION FOR SOCIAL CHANGE

Transfer credits (24 credits)

Total Credits: 76

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation in practice and defense

Education Policy, PhD

The Education Policy, PhD program provides students with foundational grounding in education policy analysis. Students learn frameworks and methods for evaluating how policies and systems produce educational opportunities and systemic inequities. Students gain a nuanced understanding of the education policy process including policy formulation, implementation, and evaluation, and the methodological approaches used to examine these processes and their effects. And students explore how the (re)design of policies and systems create substantive improvements in learning opportunities for students of all ages. The program includes core content in: education policy systems and implementation, disciplinary grounding, the social contexts of education, policy analysis methods, and electives exploring specific policy topics and issues. The flexible curricular design enables students to choose courses that match their interests. Through apprenticed research experiences, students gain expertise in policy analysis necessary to prepare them to do independent research and pursue careers in policy research.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Policy Core (6 credits)

- EFOP 3010 - EDUCATIONAL SYSTEMS, MACRO POLICY, AND POLITICS, PHD
- EFOP 3011 - EDUCATION POLICY IMPLEMENTATION: STUDENTS, FAMILIES, EDUCATORS, AND POLICYMAKERS, PHD SEMINAR

Program Electives (18 Credits)

Students select from a list of suggested courses in the overlapping thematic areas of Social Context, Education Policy, Comparative & International Education, and Higher Education. Students can mix and match thematic area to develop a plan of studies that works for their goals and interests. Students wishing to complete the optional area of concentration in Comparative & International Education need to meet the specific requirements indicated within that thematic area.

Social Context Thematic Area

- EFOP 2133 - GENDER AND EDUCATION
- EFOP 2305 - SOCIOLOGY OF EDUCATION
- EFOP 2306 - HISTORY OF EDUCATION
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 2343 - EDUCATION AND CULTURE
- EFOP 2352 - ANTHROPOLOGY OF EDUCATION
- EFOP 2398 - ECONOMICS OF EDUCATION
- EFOP 3003 - THEORIES OF EDUCATIONAL INEQUALITY
- EFOP 3310 - PHILOSOPHY OF EDUCATION, EQUITY, AND JUSTICE

Education Policy Thematic Area

- EDUC 3501 - CRITICAL POLICY ANALYSIS

- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EFOP 3095 - ORGANIZATINAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3314 - EDUCATIONAL REFORM
- EFOP 3315 - EDUCATION POLITICS: POWER AND INEQUALITY IN K12 EDUCATION SYSTEMS
- TLL 3008 - EDUCATIONAL POLICY
- TLL 3021 - LEARNING SCIENCES AND EDUCATIONAL CHANGE
- TLL 3540 - DESIGN OF EDUCATIONAL SYSTEMS

Higher Education Thematic Area

- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3150 - FOUNDATIONS FOR THE STUDY OF HIGHER EDUCATION

Special Courses (these courses can be applied toward the Program Elective category with advisor permission)

- EFOP 2089 - SPECIAL TOPICS
- EFOP 2096 - INTERNSHIP IN EDUCATIONAL FOUNDATIONS, ORGANIZATIONS & POLICY
- EFOP 3089 - SPECIAL TOPICS
- EFOP 3098 - DIRECTED STUDY

Or Optional Area of Concentration: Comparative and International Education (18 credits)

Students can opt to add an area of concentration in Comparative and International Education. Students interested in pursuing a more generally-focused policy degree enroll in the Education Policy major with no ARCO. The Comparative and International area requires the following courses:

- EFOP 3085 - COMPARATIVE & INTERNATIONAL EDUCATION PHD SEMINAR (3 Credits Required)
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 2359 - GENDER, EDUCATION, & INTERNATIONAL DEVELOPMENT
- EFOP 2398 - ECONOMICS OF EDUCATION
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3301 - SOCIAL THEORIES AND EDUCATION GLOBAL CONTEXT
- EFOP 3343 - COMPARATIVE EDUCATION

Supporting field (9 credits):

As an interdisciplinary program of study, PhD students in the Education Policy program are required to take 9 credits outside of the School of Education representing a coherent disciplinary or thematic focus. We encourage students to consult with their advisors about selecting courses that best align with their goals. Courses taken at a previous institution may be transferred to meet the Supporting Field requirement, if approved by the advisor. No modifications to this requirement are permitted, unless approved by a majority of the program faculty.

Research Methods (21 credits)

Students take a total of 7 courses (21 credits) including the schoolwide, required PhD research methods core and 12 credits of additional courses based on interests.

Required Research Methods Courses (9 credits):

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

Elective Research Methods courses taught in the School of Education:

- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2205 - FIELD METHODS
- EDUC 3000 - ADVANCED APPLIED STATISTICAL ANALYSIS
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS
- EDUC 3107 - WAYS OF KNOWING
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3503 - HISTORICAL RESEARCH ANALYSIS AND ARCHIVAL METHODS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EDUC 3506 - MIXED METHODS RESEARCH
- EDUC 3418 - CAUSAL MODERATION AND MEDIATION ANALYSIS
- EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EFOP 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- EFOP 2353 - APPLIED ANTHROPOLOGY OF EDUCATION
- EFOP 2410 - APPLIED REGRESSION ANALYSIS
- EFOP 3012 - QUALITATIVE DATA MANAGEMENT, ANALYSIS, AND PRESENTATION
- EFOP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION
- EFOP 3208 - CASE STUDY METHODS IN EDUCATION
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- TLL 3003 - RESEARCH INTERVIEWING

  Students may take additional Research Methods courses outside of the School of Education with advisor approval.

Additional Graduate-level Electives (9 credits):

Students take 9 additional graduate-level electives. They can be from the program, the School of Education, or any outside area.

Supervised Research and First-Year Seminar (9 Credits)

First-Year Seminar (3cr):

EDUC 3101 - FIRST YEAR PHD SEMINAR (3cr)

or

EDUC 3102 - FIRST YEAR SEMINAR 1 (1cr) **and** EDUC 3105 - FIRST YEAR SEMINAR 2 (2cr)

Supervised Research (6 cr):

EFOP 3097 - SUPERVISED RESEARCH

Dissertation (0 Credits)

Students enroll in FTDG 0000 to complete their dissertation studies.

- FTDG 0000 - FULL-TIME DISSERTATION STUDY

Total Credits: 72

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation and defense

Higher Education, EdD

The Doctor of Education (EdD) in Higher Education program offers a rigorous blend of theory, knowledge, and applied research to cultivate leaders who can affect positive, equity-informed, data-driven change within their institutions.

Through collaboration with a supportive interdisciplinary cohort, students will develop critical leadership attributes by engaging in thoughtful discussion of critical readings, analyzing case studies, conducting self-assessment profiles, and applying leadership and research skills in real-world field settings.

The major is part of the school's Doctor of Education (EdD) program, which has a variety of majors to serve professionals from various fields. Grounded in the principles of improvement science, this program will equip you to address complex problems of practice by engaging in systems-thinking to identify problems, develop solutions, and conduct iterative processes of testing and learning. Your leadership strategies and skills will ultimately be refined to promote institutional improvement, accountability, and transparency.

Students will learn how to:

- Examine and implement the measures foundational to institutional effectiveness
- Learn to apply evidence-based planning
- Lead within higher education environments that demand accountability grounded in equity
- Engage in improving eadership practice through a commitment to research and real-world problem-solving

This program will empower students to become the best leader they can be, driving positive, sustainable change within their organizations.

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.
- **Intensive on-ramp**: The EdD cohort will participate in the first-year summer "on-ramp" courses which consist of three in-person Saturdays and a full-week, on-campus experience. The on-ramp consists of two courses-- Foundations 1 and Practitioner Inquiry 1 -- to give new students an immersive introduction to doctoral study, cohort collaborations, and program content. The one-week in-person experience typically takes place in June.
- **Hybrid seminars**: After the first summer on-ramp, students experience a hybrid learning model of education. Each semester courses are largely conducted asynchronously online which is supported through a once a month flipped classroom experience that takes place in-person (typically on Saturdays) on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

SCHEDULE (all courses are 3 credits unless otherwise noted)

Year 1: Summer	**Year 1: Fall**	**Year 1: Spring**
EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER	EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION Major Course 1	EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major Course 2
Year 2: Summer	**Year 2: Fall**	**Year 2: Spring**
EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY	EDUC 3006 - PRACTITIONER INQUIRY 2 Major Course 3	EDUC 3007 - PRACTITIONER INQUIRY 3 Major Course 4
Year 3: Summer	**Year 3: Fall**	**Year 3: Spring**
EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)

Foundation Courses: 12 Credits

- Foundations 1: EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- Foundations 2: EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- Foundations 3: EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION

- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: 3 credits

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

Dissertation-in-Practice Overview: 3 credits

- EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR

Guidance In Scholarly Practice: 10 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE

Higher Education Academic Major Courses (12 credits)

- EFOP 3104 - INCLUSIVE LEADERSHIP AND STRATEGY IN HIGHER EDUCATION
- EFOP 3129 - HIGHER EDUCATION RESOURCE MANAGEMENT
- EFOP 3209 - EQUITY-BASED ASSESSMENT IN HIGHER EDUCATION
- EFOP 3210 - COMPLEX CASES FOR HIGHER EDUCATION LEADERS

Transfer credits (24 credits)

Total Credits: 76

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation in practice and defense

Higher Education, PhD

The PhD in Higher Education is committed to advancing scholarship, research, and practice in the field of higher education. The program is focused on critical scholarship and centers equity, inclusion, and justice. Students have research interests ranging from student access to student outcomes, student development and affairs, faculty, organizations, and administration, community colleges and community college leadership, and policy.

The PhD degree program in higher education includes a core set of courses designed for students to gain an understanding of historical, political, philosophical, and social elements that shape and continue to reshape higher education. The curriculum is designed to ground students in the study of higher education as a discipline and critical scholarship within the field. Students develop an area of research specialization. The curriculum in higher education is complemented by courses within other programs in the Educational Foundations, Organizations, and Policy Department and School of Education. In addition, through a strong focus within the program on rigorous methodological training, students gain competency in both quantitative and qualitative research methods and take advanced courses in the methodological approaches they plan to utilize in their research.

First-Year Seminars (3 Credits)

EDUC 3101 - FIRST YEAR PHD SEMINAR (3 cr)

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Required Courses (21 credits)

- EFOP 2055 - STUDENT DEVELOPMENT THEORY
- EFOP 2131 - HIGHER EDUCATION ADMINISTRATION
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3150 - FOUNDATIONS FOR THE STUDY OF HIGHER EDUCATION
- EFOP 3151 - THEORETICAL FRAMEWORKS FOR THE STUDY OF HIGHER EDUCATION
- EFOP 3153 - RESEARCH PERSPECTIVES ON DIVERSITY, EQUITY, AND INCLUSION IN HIGHER EDUCATION

Electives (24 Credits)

Students enroll for 24 credits of electives, including 12 credits of higher education courses taught in the program. Program courses include but are not limited to the following:

- EFOP 3130 - FACULTY, ADMINISTRATION, AND GOVERNANCE IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3132 - THE IMPACTS OF COLLEGE ON STUDENTS
- EFOP 3133 - CONTEMPORARY ISSUES IN RACIALIZATION, CULTURE, AND IDENTITY IN US HIGHER EDUCATION
- EFOP 3134 - CONTEMPORARY LATINX ISSUES IN US HIGHER EDUCATION
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3137 - CULTURE, INNOVATION & ORGANIZATION PERFORMANCE
- EFOP 3138 - GENDER AND SEXUALITY STUDIES IN HIGHER EDUCATION
- EFOP 3139 - LEGAL ASPECTS OF HIGHER EDUCATION
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3142 - CRITICAL ORGANIZATIONAL THEORY IN HIGHER EDUCATION
- EFOP 3143 - STUDYING COMMUNITY COLLEGES IN SOCIETY
- EFOP 3144 - FINANCE, FUNDING, AND EQUITY IN HIGHER EDUCATION
- EFOP 3150 - FOUNDATIONS FOR THE STUDY OF HIGHER EDUCATION
- EFOP 3151 - THEORETICAL FRAMEWORKS FOR THE STUDY OF HIGHER EDUCATION
- EFOP 3153 - RESEARCH PERSPECTIVES ON DIVERSITY, EQUITY, AND INCLUSION IN HIGHER EDUCATION

Research Methodology (18 credits)

Students enroll for 18 credits of research methdology, including:

Required courses (9 credits):

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

Electives in Research Methodology (9 credits):

- EDUC 3000 - ADVANCED APPLIED STATISTICAL ANALYSIS
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS
- EDUC 3107 - WAYS OF KNOWING
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EDUC 3506 - MIXED METHODS RESEARCH
- EFOP 3012 - QUALITATIVE DATA MANAGEMENT, ANALYSIS, AND PRESENTATION
- EFOP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION
- EFOP 3209 - EQUITY-BASED ASSESSMENT IN HIGHER EDUCATION
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3417 - STRUCTURAL EQUATION MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- TLL 3003 - RESEARCH INTERVIEWING

Supervised Research (6 credits)

- EFOP 3097 - SUPERVISED RESEARCH

Dissertation Research (0 credits)

- FTDG 0000 - FULL-TIME DISSERTATION STUDY

Total Credits: 72

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation and defense

Urban Education, EdD

The EdD in Urban Education is designed for experienced education professionals ready to advance into transformative leadership roles within urban communities. This major prepares practitioners to address the complex, interconnected challenges of teaching, learning, and organizational leadership in urban contexts, from PreK-12 school systems to community-based organizations and beyond. Graduates are equipped to lead across a broad range of settings, including: Curricular and instructional leadership within schools and districts; Out-of-school and informal learning organizations, such as museums, nonprofits, and youth development programs; University outreach and extension programs serving urban communities; and Policy, research, and advocacy roles that shape education at the systems level.

The major is offered through the school's Doctor of Education (EdD) program, which serves professionals across a wide range of fields and areas of expertise. Rooted in practice, the EdD develops leaders who can design, implement, and critically evaluate educational initiatives with a deep commitment to equity, access, and community impact in urban environments.

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.
- **Intensive on-ramp**: The EdD cohort will participate in the first-year summer "on-ramp" courses which consist of three in-person Saturdays and a full-week, on-campus experience. The on-ramp consists of two courses-- Foundations 1 and Practitioner Inquiry 1 -- to give new students an immersive introduction to doctoral study, cohort collaborations, and program content. The one-week in-person experience typically takes place in June.
- **Hybrid seminars**: After the first summer on-ramp, students experience a hybrid learning model of education. Each semester courses are largely conducted asynchronously online which is supported through a once a month flipped classroom experience that takes place in-person (typically on Saturdays) on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

SCHEDULE (all courses are 3 credits unless otherwise noted)

- EDUC 3015 - CRITICAL PERSPECTIVES IN URBAN EDUCATION
- EDUC 3011 - PEDAGOGIES AND PRACTICES IN URBAN EDUCATION
- EDUC 3014 - URBAN SCHOOLS, LAW, & SOCIAL POLICY

Transfer credits (24 credits)

Total Credits: 76

Urban Education, PhD

The PhD in Urban Education prepares scholars to conduct rigorous, justice-oriented research at the intersection of education, law, policy, and the social and cultural forces that shape learning in urban communities. The program takes seriously the intellectual traditions, lived experiences, and self-determined educational practices of the communities it serves, centering Black and Indigenous knowledge systems as foundational to the scholarly enterprise.

Doctoral students develop deep expertise in critical research methodologies, with opportunities to specialize across a spectrum of approaches. This methodological rigor is embedded within a transdisciplinary, inquiry-driven curriculum that challenges scholars to examine how broader sociopolitical, economic, and historical forces structure schooling and learning across K-16 contexts. The program cultivates scholars through multiple interconnected intellectual spaces, including: Credit-bearing coursework, Research collaborations, and Writing groups and peer communities Graduates are prepared for research careers in both academic institutions and non-academic settings, including think tanks, policy organizations, advocacy groups, and community-based research centers.

The program draws on connections to the Center for Urban Education and longstanding relationships with local community residents, while extending its reach to social actors, movements, and institutions across the country and around the world. Pittsburgh serves not just as a backdrop, but as a living laboratory for the kinds of questions, partnerships, and possibilities that define urban education scholarship at its best.

Program Core (13 credits)

Foundations of Education and Society

- EDUC 3010 - INTRODUCTION TO THE HISTORY & SOCIAL CONTEXTS OF URBAN EDUCATION
- EDUC 3013 - EDUCATION LAW, POLICY & SCHOOL REFORM
- EDUC 3015 - CRITICAL PERSPECTIVES IN URBAN EDUCATION **or** EDUC 3114 - BLACK EDUCATIONAL THOUGHT
- EDUC 3067 - FREEDOM SEMINAR (1 credit per seminar)
- EDUC 3107 - WAYS OF KNOWING

Research Methodology (18 credits)

9 credits of required courses, 6 credits of advanced quantitative methods, and 3 credits of advanced qualitative methods.

Required Courses (9 credits)

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

Advanced Quantitative Methods (6 credits)

- EDUC 3506 - MIXED METHODS RESEARCH
- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3417 - STRUCTURAL EQUATION MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH

- TLL 3536 - SINGLE SUBJECT RESEARCH

Advanced Qualitative Methods (3 credits)

- EDUC 3012 - LABORATORY OF PRACTICE
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EFOP 2355 - ADVANCED QUALITATIVE RESEARCH
- EFOP 3208 - CASE STUDY METHODS IN EDUCATION
- TLL 3002 - CLASSROOM DISCOURSE
- TLL 3003 - RESEARCH INTERVIEWING

Supervised Research (6 credits)

- EFOP 3097 - SUPERVISED RESEARCH

First Year Seminar (3 credits)

EDUC 3101 - FIRST YEAR PHD SEMINAR

Writing Workshops (1 credit per semester for 6-8 semesters)

The Writing Workshops provide doctoral students with a structured, supportive space to receive substantive feedback on manuscripts, milestone documents, and works-in-progress. Participants commit to reading drafts in advance of bi-weekly meetings and engaging in constructive, collegial critique that strengthens both individual scholarship and the intellectual community of the program.

Beginning in the second year, students enroll in Writing Workshop for either 1 credit or 3 credits each semester until completion of the credit requirement.

- EFOP 3087 - WRITING SEMINAR

Field Placement/Teaching Practicum (2 courses, 6 credits)

Doctoral students complete two semesters of supervised field placement in settings relevant to the Urban Education PhD program. Potential placement sites include:

- Local nonprofit organizations engaged in urban education and community development
- RAND Corporation, through a competitive application to their summer internship program
- The Center for Urban Education at the University of Pittsburgh

Students may also structure one semester as a traditional field placement and dedicate the second semester to one of the following professional development experiences:

- University teaching, serving as instructor or co-instructor alongside a faculty member
- Course development, designing a new course - such as an online course in an area relevant to Urban Education - under faculty supervision

Students enroll in the course corresponding to their chosen experience:

- EFOP 3135 - SEMINAR IN COLLEGE TEACHING (with course instructor or advisor)
- EFOP 2096 - INTERNSHIP IN EDUCATIONAL FOUNDATIONS, ORGANIZATIONS & POLICY (with course instructor or advisor)
- EFOP 3135 - SEMINAR IN COLLEGE TEACHING

Electives (variable credits)

Elective credits include approved transfer credits and approved additional credits to achieve 72 total credits for the PhD degree.

Dissertation (0 credits)

Students enroll in FTDG 0000 to complete their dissertation studies.

Total Credits: 72

Master's

Education Policy, MA

The education policy master's program provides students with foundational grounding in equity-driven education policy analysis. Students learn frameworks and methods for evaluating how policies and systems produce educational opportunities and systemic inequities. Students learn about educational policy trends and effects. And students explore how the (re)design of policies and systems create substantive improvements in learning opportunities for students of all ages. The program includes core content in: education policy systems and implementation, disciplinary grounding, the social contexts of education, policy analysis methods, and electives exploring specific policy topics and issues. The flexible curricular design enables students to choose courses that match their interests. Through community-engaged capstone projects students gain practical experience in policy analysis that is relevant to careers in program evaluation, policy organizations, and research. The program is designed to accommodate part-time and full-time students. Full time students can complete the program in as little as 3 semesters.

Students complete 36 credits.

Education Policy Foundations

Students take 2 policy core courses (6 credits):

- EFOP 2010 - EDUCATIONAL SYSTEMS, MACRO POLICY, AND POLITICS, MA
- EFOP 2011 - EDUCATION POLICY IMPLEMENTATION: STUDENTS, FAMILIES, EDUCATORS, AND POLICYMAKERS, MA SEMINAR

Program Electives

Students select at least 15 credits or 12 credits if completing the optional masters thesis.

Students completing one of the optional ARCOs select 3 credits of electives

- EDUC 3114 - BLACK EDUCATIONAL THOUGHT
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EFOP 2096 - INTERNSHIP IN EDUCATIONAL FOUNDATIONS, ORGANIZATIONS & POLICY
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION

- TLL 3021 - LEARNING SCIENCES AND EDUCATIONAL CHANGE
- TLL 3008 - EDUCATIONAL POLICY
- EFOP 3095 - ORGANIZATINAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT
- TLL 3540 - DESIGN OF EDUCATIONAL SYSTEMS
- EDUC 2100 - EDUCATION AND SOCIETY
- EFOP 2133 - GENDER AND EDUCATION
- EFOP 2305 - SOCIOLOGY OF EDUCATION
- EFOP 2306 - HISTORY OF EDUCATION
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 2343 - EDUCATION AND CULTURE
- EFOP 2352 - ANTHROPOLOGY OF EDUCATION
- EFOP 2398 - ECONOMICS OF EDUCATION
- EFOP 3310 - PHILOSOPHY OF EDUCATION, EQUITY, AND JUSTICE
- EFOP 3003 - THEORIES OF EDUCATIONAL INEQUALITY

Psychological Perspectives on Education

Students select 1 course (3 credits) from the following options:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE
- TLL 3021 - LEARNING SCIENCES AND EDUCATIONAL CHANGE

Research Methods

Students select 3 coures (9 credits) from the following options:

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
- EDUC 3107 - WAYS OF KNOWING
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EDUC 3506 - MIXED METHODS RESEARCH
- EFOP 2001 - INTRODUCTION TO RESEARCH METHODOLOGY
- EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EFOP 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 2353 - APPLIED ANTHROPOLOGY OF EDUCATION
- EFOP 2410 - APPLIED REGRESSION ANALYSIS
- EFOP 3012 - QUALITATIVE DATA MANAGEMENT, ANALYSIS, AND PRESENTATION
- EFOP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION
- EFOP 3208 - CASE STUDY METHODS IN EDUCATION
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS

- TLL 3003 - RESEARCH INTERVIEWING

Optional Comparative and International Education ARCO

Students choosing this optional area of concentration select 3 courses (9 credits) from the following:

- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3343 - COMPARATIVE EDUCATION
- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- EFOP 3007 - EDUCATION AND INTERNATIONAL DEVELOPMENT

Optional Higher Education Policy ARCO

Students choosing this optional area of concentration select 3 courses (9 credits) from the following:

- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3150 - FOUNDATIONS FOR THE STUDY OF HIGHER EDUCATION

Capstone

To complete the capstone requirement, students can complete either the applied policy project or a master's thesis.

If completing an applied policy project, students enroll in 3 credits of either EFOP 2090 or EFOP 2099.

I**f pursuing the thesis option**, students enroll in 6 credits of EFOP 2090 and/or EFOP 2099.

- EFOP 2090 - CAPSTONE SEMINAR IN EDUCATION POLICY
- EFOP 2099 - GUIDANCE IN THE MASTER'S DEGREE

Total Credits : 36

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Completion of all course requirements
- Completion of thesis or applied policy project

Higher Education, MEd

The Master of Education (MEd) in Higher Education provides students with the professional competencies, experiential learning, and personal development needed to serve in entry-level positions in a variety of offices and departments that serve students in higher education. Our curriculum centers equity and justice through practitioner-oriented coursework. 36 credits are required for this degree program. The MEd in Higher Education requires an approved plan of studies, an internship, and a capstone project. The capstone project serves as the comprehensive examination.

Admissions Requirements

- Successful completion of undergraduate degree with 3.0 GPA
- Resume/CV and personal statement

Required Coursework (24 credit)

Students are required to complete the following list of courses

- EFOP 2051 - M.ED RESEARCH METHODS FOR HIGHER EDUCATION
- EFOP 2052 - M. ED INTERNSHIP IN HIGHER EDUCATION
- EFOP 2055 - STUDENT DEVELOPMENT THEORY
- EFOP 2056 - PROGRAM ASSESSMENT IN HIGHER EDUCATION
- EFOP 2131 - HIGHER EDUCATION ADMINISTRATION
- EFOP 2135 - PROFESSIONAL DEVELOPMENT SEMINAR IN HIGHER EDUCATION
- EFOP 2140 - HIGHER EDUCATION CAPSTONE SEMINAR
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION

Electives (12 credits)

Students complete 12 credits of electives, selected from the courses listed below.

- EFOP 2059 - ADVISING AND SUPPORTING SKILLS FOR HIGHER EDUCATION PROFESSIONALS
- EFOP 2089 - SPECIAL TOPICS
- EFOP 2128 - LEADERSHIP
- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3134 - CONTEMPORARY LATINX ISSUES IN US HIGHER EDUCATION
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3137 - CULTURE, INNOVATION & ORGANIZATION PERFORMANCE
- EFOP 3139 - LEGAL ASPECTS OF HIGHER EDUCATION

Total Credits: 36

Comprehensive Requirement

Students complete EFOP 2140 - HIGHER EDUCATION CAPSTONE SEMINAR to satisfy the comprehensive requirement.

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of comprehensive requirement

Minor

Quantitative Research Methodology Minor

The minor in Quantitative Research Methodology Minor strengthens student competencies in measurement, research design and statistics for a future career.

Admissions Requirements

- Enrollment in a master's or doctoral degree program at the University of Pittsburgh.
- Completion of School of Education graduate minor application.

Curriculum

Statistical Methods

Minimum of 6 credits chosen from:

- EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EFOP 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- EFOP 2410 - APPLIED REGRESSION ANALYSIS
- EDUC 3103 - QUANTITATIVE METHODS 2

Measurement

Minimum of 3 credits chosen from:

- EFOP 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS

Research Design and Analysis

Minimum of 3 credits chosen from:

- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 2422 - DATA ANALYSIS USING COMPUTER PACKAGES
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- EDUC 3418 - CAUSAL MODERATION AND MEDIATION ANALYSIS

Electives (6 credits)

The remaining courses must be approved by the faculty coordinator of the Quantitative Methodology Minor.

Total Credits: 18

Graduation Requirements

- 3.000 cumulative Pitt graduate GPA
- Successful completion of all courses towards the minor

Department of Teaching, Learning, and Leading

The Department of Teaching, Learning, and Leading is guided by the School of Education's Mission/Vision and organized by our faculty's purposes, principles, commitments, and praxes.

Our shared purposes are to:

- Support the self-determination of peoples to practice knowledge traditions
- Join in global efforts of collective educational liberation
- Contribute to societal transformation toward freedom through our full range of educational endeavors
- Cultivate rigorous intellectual praxis in educators

Our shared principles are:

- Reciprocal and just relationality
- Common cause and collective responsibility
- Freedom through practice of knowledge traditions
- Refusal of systems and structures of domination

We are committed to:

- Bold, collective study toward liberation
- Struggling together in the internal tensions of freedom work
- Learning, recovering, and recentering knowledge traditions historically excluded from our field
- Collectively imagining and practicing free alternatives and futures
- Collaboratively cultivating freedom and justice in praxis

Our shared praxes are:

- Lifting up, studying, growing, and working across multiple liberatory knowledge and epistemic traditions
- Building community through dialecticism, dialogism, and difference
- Centering freedom stories and storytelling
- Prioritizing the obligations of purposes, principles, and commitments
- Embracing action and activism

The department offers MAT, MEd, EdD, and PhD degrees.

Degree and Certification Requirements

For additional degree requirement information for many of the following degrees, refer to the school sections on Degree Requirements.

Certificate

Applied Behavior Analysis Certificate

The Applied Behavior Analysis Certification program will provide students an opportunity to learn in-depth about the theories and practical applications of applied behavior analysis while preparing to sit for the BACB exam regulated by the Behavior Analyst Certification Board (BACB) if the student already has a Master's degree approved by the BACB. This rigorous program blends challenging coursework and possible practicum opportunities.

The ABA Certificate program fulfills the coursework requirement set forth by the Behavior Analyst Certification Board (BACB).

Program Duration: 12 months (Part Time)
Time Commitment: Part Time
Term of Enrollment: Summer
Course Requirements: 21 Credits

Admissions Requirements

Students must have earned a Bachelor's degree with a 3.0 cumulative GPA to be eligible for admission.

Certificate Program

- TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
- TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
- TLL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
- TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
- TLL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS
- TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS
- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

BACB Requirement (Optional)

For students wishing to pursue the national Board Certified Behavior Analyst (BCBA)

- TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Total Credits: 21

Early Childhood Education - Primary Plus: PreK-4 Teacher Preparation Certificate

Admission into this program is temporarily paused for the 2026-27 enrollment cycle

The Primary Plus: PreK-4 Teacher Certification Program is intended for individuals from a wide range of undergraduate degree and work backgrounds. Through coursework and field experiences with pre-kindergarteners and children in grades K-4, students acquire an integrated understanding of academic content and child development in diverse inclusive settings. Upon completion of the program, students are eligible to apply for a Pennsylvania Instructional I Certificate for PreK-4.

The Primary Plus: PreK-4 Teacher Certification Program prepares students to teach young children ages 4-9 in Pre-kindergarten and K-4 classrooms and to work collaboratively with parents and other professionals. Students develop skills for employment in public and private schools and early childhood centers. The program is a Pennsylvania Department of Education-approved teacher certification preparation program. This 36 credit program is designed for full-time study.

Please see Commonwealth Teacher Education Certification Programs for more information

Admissions Requirements

A 3.0 cumulative GPA in undergraduate study is required for admission.

Prerequisite Courses:

- College-level Math (or equivalent) - 6 credits
- Science Lab or Field Course
- U.S. History Course
- Child Development Course
- English Composition Course
- English Literature Course
- Introduction to Early Childhood Education
- Foundations of Special Education
- Teaching English Language Learners
- Language and Literacy for the Young Child

Requirements

- TLL 2047 - INTEGRATED CURRICULUM PRE-K-4
- TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1
- TLL 2209 - READING WRITING METHODS 2: GRADE 2-4

- TLL 2268 - SOCIAL STUDIES METHODS PRE-K - 4
- TLL 2433 - MATH METHODS FOR PreK-4 STUDENTS
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 2514 - SUPPORTING STUDENTS WITH DISABILTIES IN INCLUSIVE CLASSROOMS
- TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2800 - STUDENT TEACHING EARLY CHILDHOOD Credits / Units: 3
- TLL 2804 - STUDENT TEACHING - PRIMARY PLUS Credits / Units: 5
- TLL 2824 - STUDENT TEACHING SEMINAR
- TLL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES

Total Credits: 36

Graduation Requirements

In order to earn the Teacher Certification, students must meet the following requirements:

- Minimum of 3.0 cumulative GPA
- 36 credit hours
- Successfully complete all course requirements
- Meet all associated PDE requirements

Executive Cohort for Educational Leadership Certificate leading to a Superintendent's Letter of Eligibility

The Superintendent's Letter of Eligibility graduate certificate prepares an educator to become a senior administrator in K-12 public and private schools. Graduates are employed as assistant superintendents and superintendents across Pennsylvania school districts in rural, urban, and suburban settings.

While this certificate may be completed independently, many students choose to also enroll in our Doctor of Education (EdD) in Education Leadership program. Courses completed in the superintendent's letter of eligibility program are automatically applied to the education doctorate degree requirements.

The program accommodates the needs of working professionals by offering coursework mostly online, combined with an in-person class once a month. Students receive very clear timelines and a supportive environment geared toward working, adult professionals.

- 24 Credits over twenty months or 5 terms
- All courses approved for Act 45 Credit
- Three 1 credit internship experiences

Admissions Requirements

• Bachelor's degree from an accredited institution, often in education or a related field

• Satisfaction of requirements set forth in 24 P.S. § 12-1209 relating to good moral character

• Valid Pennsylvania administrative or supervisory certificate (or equivalent): principal certification

• Official graduate transcripts showing GPA requirements (often a minimum of 3.0 on a 4.0 scale)

• Experience requirements of at least six years of educational experience, three of which must be in a supervisory or administrative capacity (as required by PDE)

• Letters of recommendation, usually from supervisors or other educational leaders

• Application essay or statement of purpose describing professional goals and rationale for pursuing superintendent certification

• Resume or CV detailing leadership roles and educational experience

Curriculum

- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE
- TLL 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION
- TLL 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES
- TLL 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION
  This course is taken in three (3) separate terms for one (1) credit each
- TLL 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES
- TLL 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

Total Credits: 24

Instructional Design and Technology Certificate

The online graduate Instructional Design and Technology (IDT) certificate enables students to interrogate and discuss historical, contemporary, and emerging instructional design theories and models. Through this program, course facilitators and students will explore, discuss and apply critical pedagogy to instructional design practices. We will examine and discuss strategies that ground our instructional design praxis in design justice principles. We will broaden our understanding of instructional design to explore the possibilities of community-led design initiatives. We will use design justice principles and project management strategies to create and present instructional design artifacts for constructive peer review.

Program Outcomes

The online graduate Instructional Design and Technology (IDT) certificate enables students to:

- Interrogate and discuss historical, contemporary, and emerging ID theories and models.
- Explore, discuss and apply critical pedagogy to ID practices.
- Examine how to design justice principles apply to instructional design practices
- Select applicate technology and digital media that support meaningful learning experiences
- Create instructional design artifacts grounded in critical pedagogy and design justice principles
- Use project management strategies to coordinate and complete ID projects

Admissions Requirements

Students must have a graduate degree from an accredited institution or professional experience in instructional design or education-related field.

Curriculum

Required Courses (9 credits)

- LIS 2640 - INSTRUCTIONAL DESIGN
- EDUC 2301 - ONLINE PEDAGOGY AND PRAXIS
- EDUC 2304 - PROJECT-BASED INSTRUCTIONAL DESIGN

Elective Course (3 credits; choose one course from list below)

- EDUC 2300 - DIGITAL MEDIA FOR LEARNING
- EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY

Total Credits: 12

K-12 Principal Program Certification

The University of Pittsburgh K-12 Principal Certificate program is built to provide candidates with knowledge, skills, dispositions, and experiences to prepare them to lead equitable and just learning environments for children and school communities. Completion of the program satisfies the requirements for the Pennsylvania Department of Education K-12 Principal Certificate.

The 18-credit asynchronous online format provides working professionals with a flexible learning environment. The courses approach learning from an equitable stance and consider the interplays between health, wellness, and human development.

The program includes an internship component that gives candidates highly practical, real-world experiences with accomplished, practicing principals from various school communities. Career preparation and exposure activities are also included in the program to ensure that candidates are prepared for a successful start to their school leadership career. This program has the approval of the Pennsylvania Department of Education.

Certification

Completion of the program satisfies the requirements for the Pennsylvania Department of Education K-12 Principal Certificate.

Admissions Requirements

Candidates must hold a bachelor's degree from a regionally or nationally accredited college/university, as well as relevant professional certification.

Candidates must satisfy the requirements set forth in section 24 P.S. § 12-1209 relating to good moral character.

Candidates must satisfactorily complete two years of relevant professional education experience that is in an educational setting and related to the instructional process.

Curriculum

Required Courses

- TLL 2409 - MULTI-TIERED SYSTEM OF SUPPORT
- TLL 2410 - INSTITUTIONAL LEADERSHIP
- TLL 2413 - SCHOOL LAW
- TLL 2414 - HEALTH, MENTAL HEALTH, & SAFETY

- TLL 2415 - INSTRUCTIONAL LEADERSHIP
- TLL 2097 - INTERNSHIP (3 Credits - 1 credit taken per term)

*Note: Students are required to complete a 360-hour internship with a practicing principal focused on field-based experiences aligned with the Pennsylvania Core and Corollary Standards for School Leadership and professional development.

Total Credits: 18

Graduation Requirements

- Students must earn a 3.0 cumulative GPA in graduate coursework
- Students must successfully complete all required courses and internships

Orientation and Mobility for Individuals with Visual Impairments and Blindness Certificate

The program in Orientation and Mobility Specialist program (O&M) provides training to become an O&M practitioner for individuals of all ages and abilities. The program prepares students to earn certification as a Certified Orientation and Mobility Specialist (COMS), which is a gateway to a diverse range of employment opportunities. The program is offered in a hybrid format, with most courses online and a limited number of weekend workshops in person. TLL 2750 and 2752 are in-person, on-campus offered during the summer term. Students also complete a clinical experience of at least 350 hours. Pitt offers the O&M Graduate Certificate (26 credits), with the option to add on a Master's Degree in Education for an additional six credits (32 credits total).

Accreditations Associated

This program is fully accredited by the Association for Education and Rehabilitation of the Blind and Visually Impaired (AER).

Admissions Requirements

- Bachelors degree in any subject with minimum 3.0 GPA
- Prerequisite Coursework (can be taken as co-requisites during program)
    - Foundations of Special Education

Student Teaching

This program prepares students for national certification through the Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP), and must maintain an overall 3.0 GPA. If a student does not maintain a 3.0 GPA, they will be prohibited from starting their internship and may impact completion of their program.

Graduation Requirements

- Minimum 3.0 GPA
- Successful completion of the O&M Internship
- Completion of all coursework with a grade of B- or higher

Curriculum

All courses are 3 credits unless otherwise indicated.

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- TLL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1
- TLL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
- TLL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY
- TLL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS
- TLL 2857 - LEVEL 3 INTERNSHIP ORIENTATION AND MOBILITY 5 credits

Total Credits: 26

Reading Specialist Certificate of Advanced Study (PK-12)

The School of Education offers preparation that leads to certification as a Reading Specialist (PK-12). Coursework is completed fully online The curriculum for the Reading Specialist Certificate of Advanced Study (PK-12) is designed to provide candidates with opportunities to build specialized knowledge, engage in principled practice in supervised settings, and prepare for leadership roles in schools and school districts. The curriculum addresses the International Literacy Association's *Standards for Specialized Literacy Professionals* (2017) in the areas of:

- Foundational Knowledge
- Curriculum and Instruction
- Assessment and Evaluation
- Diversity and Equity
- Learners and the Literacy Environment
- Professional Learning and Leadership
- Practicum/Clinical Experiences

Admissions Requirements

Program prerequisites:

- Must hold a current teaching certificaiton
- 3.0 GPA in undergraduate work

Program course prerequisites:

- Teaching of Reading **or** Language Arts (3 credits)
- Human Development **or** Educational Psychology (3 credits)
- Educational Foundations **or** History of American Education (3 credits)

Applicants who hold an Instructional I teaching certification from Pennsylvania earned after January 1, 2011 will have met the following course requirements through their initial certification programs. Applicants who hold a PA certification from an earlier time or who hold an out-of-state certification must meet the following requirements to be eligible to earn the PDE Reading Specialist certification (PK-12):

- Teaching English Language Learners (3 credits)
- Foundations of Special Education (3 credits)
- Supporting Students with Disabilities in Inclusive Classrooms (3 credits)
- Supporting Literacies in Inclusive Classrooms (3 credits)

Curriculum

- TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- TLL 2211 - COMPREHENSION AND VOCABULARY
- TLL 2219 - DISCIPLINARY LITERACY **or** TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2204 - Supporting Early Literacy
- TLL 2205 - Supporting Adolescent Literacies
- TLL 2207 - LIteracy Practicum
- TLL 2202 - Literacy Leadership in Schools I
- TLL 2206- Literacy Leadership in Schools II

Certification Requirements

To be eligible for the Pennsylvania Department of Education Reading Specialist PreK-12 certification, studentes must:

- Complete all required courses
    - All classes that are not directly field-related (i.e.: student teaching placements and related seminars) must be taken for a letter grade.
- Earn a 3.0 cumulative Pitt graduate GPA
- Take and pass the Reading Specialist Praxis exam

Total Credits: 24

Supervisor of Special Education Certificate

The Supervisor of Special Education Certification Program is an advanced graduate program designed to help meet the growing demand for well-trained and experienced individuals who can provide leadership in special education at the district or Intermediate Unit levels.

This course of study is appropriate for individuals preparing for a professional position with primary responsibility in supervising educational programs and directing the activities of professional and non-professional employees in special education programs.

This part-time, hybrid program (1 course per semester) is offered to candidates who have demonstrated through previous coursework, qualifying work experience, letters of recommendation, and a personal goal statement that they have the appropriate oral and written communication skills, organizational ability and personal motivation to pursue the professional position of Supervisor of Special Education. Then, through coursework and an internship (15 total credits), candidates have the opportunity to develop knowledge of and competence in the fundamental concepts of supervising special education programs. The internship provides opportunities to learn more practically the duties, roles, and responsibilities of supervisors/administrators in special education. Students are required to secure a local, on-site mentor with whom to collaborate in completing the required activities.

The Supervisor of Special Education Certification program results in Pennsylvania Department of Education Certification.

This program provides candidates with the knowledge necessary to implement high quality programming for individuals with disabilities and to comply with federal and state regulations. The major distinguishing characteristic of this program is the application of supervisory theory to the context of special education.

Accreditations Associated

The program prepares students for the Supervisor of Special Education PreK-12 Certificate from the Pennsylvania Department of Education (PDE). Please refer to PDE for special education teaching experience requirements and praxis information.

Admissions Requirements

Completion of 5 years of satisfactory *certified* school experience in the area of special education

Requirements

This certification option in special education is built on the assumption that most supervisory operations in education are, in principle, generic, with their fundamentals of theory and practice in common. Specific emphasis is placed upon activities, relationships, facilities, agencies, persons, and processes that have particular relevance to special education. Students complete a curriculum which includes courses in supervision, finance, curriculum development, current and legal issues in the specialization, and a supervision internship.

- TLL 2542 - WEB CURRNT ISSUES & TRENDS SP ED **-OR-** TLL 3542 - WEB CURRNT ISSUES & TRENDS SP ED
- TLL 3541 - WEB INSTRNL PRACTICES SP EDUC
- TLL 2928 - WEB LEGL & LEGISLTV FDS OF SP ED **-OR-** TLL 3928 - WEB LEGL & LEGISLTV FDS OF SP ED
- TLL 3571 - SUPERVISION AND FINANCING OF SPECIAL EDUCATION
- TLL 2596 - INTERNSHIP IN SPECIAL EDUCATION **-OR-** TLL 3596 - INTERNSHIP IN SPECIAL EDUCATION

Total Credits: 15

Teacher of Students with Visual Impairments and Blindness (TVI) Certificate

The Teacher of Students with Visual Impairments (TVI) program at the University of Pittsburgh School of Education is fully aligned with the Pennsylvania Department of Education (PDE) standards, the curriculum will prepare studentsfor PA state certification to teach in preK-12 classrooms. Pennsylvania Department of Education TVI certification can only be earned by candidates who complete student teaching in Pennsylvania (students from outside PA, must check their state's certification/licensure requirements). The program is offered in a hybrid format, with most courses online and a limited number of workshops in person. Students also complete a semester-long student teaching experience with a certified TVI. The Pitt certificate program features a TVI graduate certificate (29 credits) whose courses lead to state certification.

Students interested in pursuing a master's degree can add 6 credits (see Teacher of Students with Visual Impairments and Blindness (TVI) MEd for further information)

Accreditations Associated

This program is fully accredited by the Association for Education and Rehabilitation of the Blind and Visually Impaired (AER).

Admissions Requirements

- Bachelors degree in any subject with minimum 3.0 GPA
- Prerequisite Coursework (can be taken as co-requisites during program)
    - Foundations of Special Education
    - Teaching English Language Learners
    - Supporting Literacy in the Inclusive Classroom
    - Supporting Students with Disabilities in Inclusive Classrooms

Student Teaching

Pennsylvania Department of Education requires that all students must enter a teacher education program with and maintain an overall 3.0 GPA. If a student does not maintain a 3.0 GPA, they will be prohibited from student teaching or earning certification. A full semester of student teaching is required.

Graduation Requirements

- Minimum 3.0 GPA
- Completion of all coursework with a grade of B- or higher
- Successful completion of a full-time student teaching assignment

Curriculum

All courses are 3 credits except where indicated.

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2529 - BRAILLE
- TLL 2535 - COMMUNICATION SKILLS FOR STUDENTS WITH VISUAL IMPAIRMENTS
- TLL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
- TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- TLL 2545 - EDUCATION OF CHILDREN WITH VI 2
- TLL 2547 - NEMETH CODE/ABACUS
- TLL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM IN VISUAL IMPAIRMENTS (5 credits)

Total Credits: 29

Doctoral

Education Leadership, EdD

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.
- **Intensive on-ramp**: The EdD cohort will participate in the first-year summer "on-ramp" courses which consist of three in-person Saturdays and a full-week, on-campus experience. The on-ramp consists of two courses-- Foundations 1 and Practitioner Inquiry 1 -- to give new students an immersive introduction to doctoral study, cohort collaborations, and program content. The one-week in-person experience typically takes place in June.
- **Hybrid seminars**: After the first summer on-ramp, students experience a hybrid learning model of education. Each semester courses are largely conducted asynchronously online which is supported through a once a month flipped classroom experience that takes place in-person (typically on Saturdays) on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

SCHEDULE (all courses are 3 credits unless otherwise noted)

Year 1: Summer	Year 1: Fall	Year 1: Spring
EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER	EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION Major Course 1	EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major Course 2
Year 2: Summer	**Year 2: Fall**	**Year 2: Spring**
EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY	EDUC 3006 - PRACTITIONER INQUIRY 2 Major Course 3	EDUC 3007 - PRACTITIONER INQUIRY 3 Major Course 4
Year 3: Summer	**Year 3: Fall**	**Year 3: Spring**
EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)

Foundation Courses: 12 Credits

- Foundations 1: EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- Foundations 2: EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- Foundations 3: EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- Foundations 4: EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: 3 credits

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

Dissertation-in-Practice Overview: 3 credits

- EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR

Guidance In Scholarly Practice: 10 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE

Education Leadership Major Courses (12 Credits)

- TLL 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION
- TLL 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES
- TLL 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES
- TLL 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES

Transfer credits (24 credits)

Total credits: 76 credits

Internship for Optional Superintendent's Letter of Eligibility (3 credits for 79 credits total)

- TLL 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION
    - This course is taken in three (3) seperate terms for one (1) credit each

Language, Literacy and Culture, PhD

The Language, Literacy, and Culture (LLC) PhD is for students who aim to conduct research on the interconnection of culture, language, and literacy in both formal and informal educational settings. The goal of the LLC program is to develop interdisciplinary knowledge complemented by specialized knowledge of teaching and learning in foreign and second language, literacy, social studies, and early childhood education. We frame the exploration of teaching and learning within perspectives that promote equity, social justice, and democratic values. Students engage closely with and learn from faculty who conduct research in the field and have a strong commitment to high-quality teaching.

Curriculum

PhD students in the Language, Literacy, and Culture program who enter the program without a Masters degree in a relevant field are required to take eight to nine courses within the major field of LLC, five research methods courses, the first year seminar, annual writing workshops, and elective courses as needed. Students with a Masters degree in a related field can transfer credits toward the PhD with approval by the LLC faculty. PhD students are also required to complete one research practicum and one teaching practicum. PhD students must successfully pass required doctoral milestone projects in order to continue in the program. The PhD program culminates with completion of a doctoral dissertation.

First Year Seminars (3 credits)

EDUC 3101 - FIRST YEAR PHD SEMINAR (3 cr)

Major Field Courses (24-27 credits)

- TLL 3248 - SPECIAL TOPICS-LANGUAGE AND LITERACY
- Additional course options available in the major field with approval of advisor

Research Methods (15 credits)

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
- Advanced Research Methods electives (6 credits)

Research Practicum (3 credits)

- TLL 3291 - SUPERVISED RESEARCH-LANGUAGE, LITERACY, AND CULTURE

Teaching Practicum (3 credits)

- TLL 3526 - PRACTICUM IN COLLEGE TEACHING

Electives (variable credits)

Writing Workshops (variable credits)

- TLL 3016 - PHD WRITING SEMINAR

Full-time Dissertation Study (0 credits)

Doctoral candidates who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full time on their dissertations may register for this course. While the course carries no credits and no grade, students who enroll in "full-time dissertation study" are considered by the university to have full-time registration status.

- FTDG 0000 - FULL-TIME DISSERTATION STUDY

Total Credits: 72

Science, Technology, Engineering & Mathematics (STEM), EdD

The EdD in Science, Technology, Engineering, and Mathematics Education (STEM Education) is for teachers and educators who desire the skills and credentials needed to advance their practice-oriented careers. The program offers a rigorous theoretical and practical orientation for scholar practitioners aspiring to become leaders in K-12 schools and institutions of higher learning. Graduates hold positions such as district STEM curriculum supervisor, faculty member at a teaching-focused university, director of STEM education in informal education settings (e.g., environmental education center), or district leader in the STEM fields of science or mathematics.

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.
- **Intensive on-ramp**: The EdD cohort will participate in the first-year summer "on-ramp" courses which consist of three in-person Saturdays and a full-week, on-campus experience. The on-ramp consists of two courses-- Foundations 1 and Practitioner Inquiry 1 -- to give new students an immersive introduction to doctoral study, cohort collaborations, and program content. The one-week in-person experience typically takes place in June.
- **Hybrid seminars**: After the first summer on-ramp, students experience a hybrid learning model of education. Each semester courses are largely conducted asynchronously online which is supported through a once a month flipped classroom experience that takes place in-person (typically on Saturdays) on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

SCHEDULE (all courses are 3 credits unless otherwise noted)

Year 1: Summer	**Year 1: Fall**	**Year 1: Spring**

- TLL 3471 - JUSTICE AND STEM
- TLL 3475 - STEM PEDAGOGIES
- TLL 3476 - POLICY & LEADERSHIP IN STEM

Transfer Credits (24 credits)

Total credits (76 credits)

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation in practice and defense

Special Education, EdD

Our EdD in **Special Education major** prepares leadership personnel to serve in public or private pre-K-12 schools or educational environments and services.

The EdD in Special Education major develops your knowledge and skills in leadership, collaboration, management, administration, supervision, pre-service and in-service education, program evaluation, community relations, and recruitment.

Students may focus their studies in applied behavioral analysis; autism; blindness, vision impairment, or orientation and mobility; early intervention; emotional and behavioral disorders; or learning disabilities.

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.

- TLL 3928 - WEB LEGL & LEGISLTV FDS OF SP ED
- TLL 3571 - SUPERVISION AND FINANCING OF SPECIAL EDUCATION

Transfer credits (24 credits)

Total Credits: 76

79 credits needed for students pursuing Special Education Supervisor Certificate.

Optional internship for Supervisor of Special Education certification (3 credits for 79 credits total)

Students wishing to complete the Supervisor of Special Education Certificate must meet the admission requirements for the certificate, make sure the program is declared, and complete one of these following courses for 3 credits.

- TLL 2596 - INTERNSHIP IN SPECIAL EDUCATION
  Or
- TLL 3596 - INTERNSHIP IN SPECIAL EDUCATION

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation in practice and defense

Special Education, PhD

The goal of the Special Education PhD degree is to prepare leadership personnel to assume academic faculty positions at the university level. The focus of preparation for the PhD program is on teaching graduate and undergraduate courses, mentoring graduate students, developing a research agenda that will result in funded and published research and translating research outcomes for the improvement of educational and related service programs for children and youth with disabilities. PhD candidates are mentored by a faculty adviser who shares their research interests and are supported by graduate faculty in Special Education. Students may focus their studies in one or more of the following areas: applied behavior analysis, autism, emotional and behavior disorders, learning disabilities, or severe disabilities. The PhD program is writing, and research-intensive and PhD candidates will have multiple opportunities to learn and participate in the review of research literature, the preparation and submission of research grant proposals, the design and implementation of research studies, and the preparation and dissemination of research reports.

The PHD program has a minimum of 72 credits of course work which includes dissertation research.

Special Education Major Field (24 credits minimum)

Required:

- 18 credits minimum at the 3000-level or equivalent
- 15 credits minimum at the University of Pittsburgh

Possible classes:

- Professional Seminar in Special Education 1
- Issues and Trends in Special Education
- Instructional Practices in Special Education
- Professional Seminar in Special Education 2
- Legal and Legislative Issues in Special Education

- Advanced Single-Case Design
- Grant Writing in Special Education

Research Methodology (15 credits)

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
- 2 additional research methods elective classes (6 credits)

First Year Seminar (3 credits)

- EDUC 3101 - FIRST YEAR PHD SEMINAR (3 cr)

Research Practicum (3 credits)

- TLL 3591 - SUPRVSD RESEARCH IN SPECIAL EDUC

Teaching Practicum (3 credits)

- TLL 3526 - PRACTICUM IN COLLEGE TEACHING

Special Education Writing Seminars (6-8 credits)

One credit per semester, starting in year 2.

Electives (variable credits)

Full-time Dissertation Study (0 credits)

Doctoral candidates who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full time on their dissertations may register for this course. While the course carries no credits and no grade, students who enroll in "full-time dissertation study" are considered by the university to have full-time registration status.

- FTDG 0000 - FULL-TIME DISSERTATION STUDY

Total Credits: 72

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation and defense

Graduate Certificate

Critical Technology and Digital Media for Learning Certificate

The Critical Technology and Deigital Media for Learning (CriT-DML) certificate program seeks to deepen students' understanding of how we use digital media and technology to communicate, create, design, collaborate, teach, learn, and assess within a range of educational contexts. Through this program, course facilitators and students will work collaboratively to interrogate, deconstruct, and think critically about how we produce and use digital media and technology in education and society. To intentionally work toward equity, justice, and freedom, we seek to design learning experiences that center and support people and human processes. This certificate program is designed for educators, instructional designers, administrators, leaders, school technology directors, technology curriculum specialists, or technologists who wish to broaden their understanding of and experience with digital media and technology applications for learning. Students should identify strongly with the School of Education's mission/vision for equity and justice and apply this lens to their scholarship in the program. The CriT-DML certificate can be a doorway to expanded career opportunities in technology applications across and outside the field of education.

Admissions Requirements

Student must have earned a Bachelor's degree.

Curriculum

- EDUC 2300 - DIGITAL MEDIA FOR LEARNING
- EDUC 2301 - ONLINE PEDAGOGY AND PRAXIS
- EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY
- EDUC 2303 - TECHNOLOGY IN CONTEXT

Total Credits: 12

Graduation Requirements

- Cumulative GPA of 3.0
- Successful completion of required coursework

Science, Technology, Engineering, Art & Mathematics (STEAM), Online Certificate

The goal of STEAM is simple: to engage learners in real-world, relevant problem solving that requires a high level of discipline integration. The STEAM certificate supports students in exploring the disciplines that comprise STEAM: science, technology, engineering, arts, and mathematics. Through the four courses in the certificate students will develop transdisciplinary curriculum, assessments, and pedagogies for their own classrooms, try out their curriculum, and interrogate their pedagogical decision-making. Students will have opportunities to delve into the theory and practice of STEAM teaching and learning and walk away with curriculum they developed and tested.

The STEAM certificate is approved by the Pennsylvania Department of Education as meeting the requirements for the STEM PDE endorsement.

Admissions Requirements

- Students must have successfully completed an undergraduate degree.
- Students must have a site of practice where they can implement curriculum.
- Applicants for the PA STEM Endorsement must hold a current PA teaching certification.

Curriculum

- TLL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES
- TLL 2008 - STEAM: INSTRUCTIONAL DESIGN
- TLL 2009 - STEAM: ASSESSMENT
- TLL 2010 - STEAM: IMPLEMENTATION
  Field-based hours are required (30 hours) to meet the STEM Endorsement and therefore are a part of all courses. These hours are embedded in coursework of TLL 2007 and TLL 2010.

Total Credits:12

Graduation Requirements

- Cumulative GPA of 3.0 or higher
- Completion of all required coursework

Joint Degree

World and Heritage Language Education with TESOL Certificate, MEd

This option permits qualified individuals for the MEd with a specialization in World and Heritage Language Education to be considered upon application by the Department of Teaching Learning and Leading and by the Department of Linguistics for admission to the University of Pittsburgh certificate program in the Teaching of English to Speakers of Other Languages (TESOL). If accepted, students combine course work for the MEd in World and Heritage Language Education with required courses for the TESOL certificate. Students complete a minimum of 37 credits in this combined specialization.

The University of Pittsburgh TESOL certificate is not to be confused with state certification for teaching in the public elementary or secondary schools. The degree is ideal for individuals seeking positions as English language teachers in other countries or in university English Language Institutes.

Admissions Requirements

Applicants must have earned a Bachelor's degree with a 3.0 cumulative GPA to be elegible for admission.

Each applicant who is not a native speaker of English must: (1) achieve a score of 100 or higher on the internet-based TOEFL (Skill Requirements: Reading and Listening - High; Speaking and Writing - one skill must be at the level of Good) or 7.5 or higher on the IELTS (Skills Requirement: Speaking and Writing - combined minimum of 13) and (2) have good spoken English skills.

Curriculum

- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- TLL 2256 - ISSUES IN FOREIGN LANGUAGE ED
- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- Elective - Graduate level 2000 or higher (Suggested: TLL 2255, 2722, or 2257)

- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2195 - PRACTICUM ESL TEACHING
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Comprehensive Requirement

Students will complete a written comprehensive exam.

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successfully complete all course requirements
- Successfully complete comprehensive exam

Total Credits: 37

Master's

Applied Behavior Analysis, MEd

The Applied Behavior Analysis, MEd at the University of Pittsburgh offers rigorous preparation and training in the theoretical foundations and core principles of behavior analysis. Grounded in scientific inquiry and ethical practice, function-based assessment, data-driven decision making, and single-subject research methods are emphasized. The curriculum is designed to develop behavioral scientists with strong conceptual, analytical, and applied competencies. Coursework prepares students to apply for the Board Certified Behavior Analyst (BCBA) examination. Throughout the program, students participate in supervised experiential learning through research mentorship, applying principles in home, school, and community settings.

Admissions Requirements

- Students must have successfully completed a bachelor's degree with a GPA of 3.0.
- Students must be able to obtain all federal and PA state clearances before entering supervised placements.

Curriculum

- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION
- TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
- TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
- TLL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
- TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
- TLL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS
- TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
  Electives (9 credits) - choose from list below:
- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS

- TLL 2521 - PROACTIVE STRATEGIES FOR A POSITIVE CLASSROOM
- TLL 2529 - BRAILLE
- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM
- TLL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM
- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY

Curriculum Starting in Spring 2027

Required Courses (30 credits)

- TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
- TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
- TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
- TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM (course taken twice; 3 credits each term)
- TLL 2570 - Experimental Analysis of Behavior
- TLL 2571 - Theory and Philosophy in Behavior Analysis
- TLL 2572 - Current Developments of Behavior Analysis
- TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS
- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Electives (3 credits)

Choose one course from list:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- HHD 2007 - FOUNDATIONS OF INFANT MENTAL HEALTH 1
- HHD 2008 - FOUNDATIONS OF INFANT MENTAL HEALTH 2
- HHD 2023 - DEATH AND DYING
- HHD 2024 - FAMILY DYNAMICS
- HHD 2113 - DEVELOPMENTAL PSYCHOPATHOLOGY
- HHD 2380 - BEHAVIOR CHANGE AND HEALTH COACHING
- HHD 2520 - INTRODUCTION TO COUNSELING
- HHD 2532 - PSYCHOSOCIAL ASPECTS OF ILLNESS
- HHD 2562 - PLAY THERAPY AND FIELD WORK
- TLL 2500 - FOUNDATIONS OF SPECIAL EDUC
- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2521 - PROACTIVE STRATEGIES FOR A POSITIVE CLASSROOM

Total Credits: 33

Comprehensive Requirement

The requirements for the comprehensive project are completed within TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of comprehensive requirement

Combined Applied Studies in Education, M.Ed.

The Master of Education in Combined Applied Studies in Education is within the Department of Teaching, Leading and Learning (TLL) in the School of Education. This degreeserves as the fifth year of the CASE program after completing the related B.S.; students come away from this program with expertise in general education and special education methods, as well as knowledge of practice-focused educational research methods. They are also eligible for both General Educuation PK-4 and Special Education PK-12 certification in PA. This degree is only available to those who complete the CASE B.S. major at the Pittsburgh campus of the University of Pittsburgh. Teacher certifications cannot be obtained until the completion of this graduate year of study.

Certification

Students are eligible for both General Educuation PK-4 and Special Education PK-12 certification in Pennsylvania through the Pennsylvania Department of Education.

Admissions Requirements

- Completion of the CASE undergraduate major at the University of Pittsburgh
- An undergraduate GPA of 3.0 or higher (state requirement)
- US citizen or green card required for PA teacher certification (this is a state policy)

Curriculum

GPA & Grade Requirements

Students must earn a 3.0 GPA in their graduate coursework in order to complete the degree. Students who do not maintain the 3.0 GPA will be placed on Academic Notice and not allowed to enroll or participate in field-based experiences.

All classes that are not directly field-related (ie: student teaching placements and related seminars) must be taken for a letter grade.

Educational Research Coursework

These classes are focused on providing students with a background in practice-focused educational research methodology.

- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Methods Coursework

These classes are focused on providing students with the methods and approaches best suited for teaching in early elementary and special education classrooms.

- TLL 2047 - INTEGRATED CURRICULUM PRE-K-4

- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
- TLL 2513 - INSTRNL METH-HIGH INCIDNC DISABS
- TLL 2521 - PROACTIVE STRATEGIES FOR A POSITIVE CLASSROOM

Field-Based Experiences

These classes are the credit-bearing coursework for students' pre-student teaching and student teaching experiences, and the placement-related seminar course.

- TLL 2824 - STUDENT TEACHING SEMINAR
- TLL 2860 - PRACTICUM IN SPECIAL EDUCATION
- TLL 2504 - STUDENT TEACHING SPECIAL EDUCATION

Comprehensive Requirement

Students are required to complete a comprehensive exam to complete the M.Ed. program.

Total Credits: 30

Graduation Requirements

- Cumulative GPA of 3.0 or higher
- Successful completion of all coursework
- Successful completion of comprehensive exam

Curriculum & Instruction, M.Ed.

The MEd in Curriculum and Instruction degree develops practicing teachers' ability to create and facilitate cross-disciplinary (transdisciplinary) learning experiences that emphasize critical thinking, problem-based learning within real-world contexts, collaboration, creativity, and personal expression. These advanced teaching skills are represented in learning standards in most states, including Pennsylvania. Students' experiences will be framed by equity-oriented teaching practices. The program addresses the gap in professional learning and training for teachers to teach STEAM and critical technology and digital media skills.

Embedded in the curriculum of the MEd are the following graduate certificates:

- Critical Technology and Digital Media for Learning Certificate
- STEAM Certificate

Certification

The STEAM certificate is approved by the Pennsylvania Department of Education as meeting the requirements for the STEM PDE endorsement.

Admissions Requirements

- Applicants must hold a bachelor's degree.

- Applicants must have a site of practice (e.g. classroom, after school program, out-of-school learning experience etc.) and/or students or learners to work with when designing and assessing curriculum.

- Applicants must have at least 1-year teaching or related professional experience in K-12, higher education, informal learning contexts (e.g. museums, after school programs, libraries, etc.), or other educational contexts.

Curriculum

General Core Courses (6 Credits)

The following two courses are required.

- EDUC 2100 - EDUCATION AND SOCIETY
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS

STEAM Education Courses (12 Credits)

STEAM courses are required and will earn the student a university certificate. This certificate has a STEM endorsement from the Pennsylvania Department of Education (available to PA licensed teachers).

- TLL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES
- TLL 2008 - STEAM: INSTRUCTIONAL DESIGN
- TLL 2009 - STEAM: ASSESSMENT
- TLL 2010 - STEAM: IMPLEMENTATION

Critical Technology and Digital Media for Learning Courses (12 Credits)

The Critical Technology and Digital Media for Learning (CriT-DML) courses are required so students can obtain the CriT-DML university certificate.

- EDUC 2300 - DIGITAL MEDIA FOR LEARNING
- EDUC 2301 - ONLINE PEDAGOGY AND PRAXIS
- EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY
- EDUC 2303 - TECHNOLOGY IN CONTEXT

Comprehensive Requirement

Students register with the program coordinator and complete an indpendent capstone (completed outside of course requirements) in thier last semester in the program. This will be done concurrently with their last class(es).

Total Credits: 30

Graduation Requirements

- Cumulative GPA of 3.0 or higher
- Completion of all required coursework
- Successful completion of comprehensive requirement

Early Childhood Education, MEd

The Early Childhood Education M.Ed. program is designed to provide candidates with a strong academic and practical background to support the education of young children (from birth to age 8) in varied settings including schools, community agencies, homes, and other settings. Through rigorous coursework, field placements, and hands-on learning, students develop competence in the use of culturally responsive and developmentally appropriate practices to educate infants, toddlers, preschoolers, and primary-age children.

While this program does not lead to a teaching certificate, it does prepare students to work in a variety of early childhood education-related settings such as private schools, preschools, childcare centers, and community agencies.

Admissions Requirements

Successful completion of undergraduate program with a 2.5 minimum GPA.

Requirements

Introduction to Early Childhood Education (3 credits)

- TLL 2041 - INTRO TO EARLY CHILDHOOD ED

Special Education (3 credits)

Choose one of the following 3-credit courses:

- TLL 2500 - FOUNDATIONS OF SPECIAL EDUC
- TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM
- TLL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS
- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Community Resources (3 credits)

- TLL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES

Methods Courses (9 credits)

Choose three of these 3-credit courses over the entirety of the program (9 credits total).

- TLL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD
- TLL 2047 - INTEGRATED CURRICULUM PRE-K-4
- TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1 **
- TLL 2209 - READING WRITING METHODS 2: GRADE 2-4 **
- TLL 2268 - SOCIAL STUDIES METHODS PRE-K - 4 **
- TLL 2270 - INTEGRATED ART & MUSIC IN ELEMENTARY SCHOOL
- TLL 2433 - MATH METHODS FOR PreK-4 STUDENTS **
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS **
- TLL 2563 - SEM: INCLUSION EARLY CHILDHOOD
- TLL 2905 - TEACHING INFANTS, TODDLERS AND PRESCHOOLERS
- Other Elective Approved by Advisor - 3 credits

  **These courses may only be taken by students who are currently enrolled in a teacher certification program or who have already obtained teacher certification.

Introduction to Research Methods (3 credits)

Choose one of the following 3-credit courses:

- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
  OR
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Research Seminar (3 credits)

- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Education & Human Development/ Psychological Perspectives on Education (3 credits)

Choose one of the following 3-credit courses:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
  OR
- EDUC 2007 - HUMAN LEARNING

Approved Elective (3 credits)

Choose one 3-credit practicum or approved elective related to Early Childhood Education or Family Studies.

Total Credits: 30

Comprehensive Requirement

Students complete a take-home essay exam within a designated one-week period. This experience will take place at approximately the mid-point of the fall and spring semesters.

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Completion of all coursework
- Successful completion of comprehensive requirement

Education Leadership, M.Ed

The Master of Education in Education Leadership is a 30-credit degree program that includes the 18-credit K-12 Principal Certification Program and four additional 3-credit courses. A capstone project is required to complete the degree. This program is provided in an asynchronous, online format. The program provides candidates with the knowledge, skills, dispositions, and experiences to prepare them to lead equitable and just learning environments for children and school communities.

The courses approach learning from an equitable stance and consider the interplays between health, wellness, and human development. The program includes an internship component that will give candidates highly practical, real-world experiences with accomplished, practicing principals from various school communities. Career preparation and exposure activities are also included in the program to ensure that candidates are prepared for a successful start to their school leadership career. This program has the approval of the Pennsylvania Department of Education to qualify for K-12 Principal Certificate.

Admissions Requirements

- Candidates must hold a bachelor's degree from a regionally or nationally accredited college/university, as well as a valid teaching certification.
- Satisfies the requirements set forth in section 24 P.S. § 12-1209 relating to good moral character.
- Satisfactory completion of two years of relevant professional education experience that is in an educational setting and related to the instructional process.

Curriculum

24 credits of required courses must be completed:

- TLL 2409 - MULTI-TIERED SYSTEM OF SUPPORT
- TLL 2410 - INSTITUTIONAL LEADERSHIP
- TLL 2413 - SCHOOL LAW
- TLL 2414 - HEALTH, MENTAL HEALTH, & SAFETY
- TLL 2415 - INSTRUCTIONAL LEADERSHIP
- TLL 2097 - INTERNSHIP 3 credits taken (1 credit taken each term during the program- summer, fall, spring)
- EDUC 2100 - EDUCATION AND SOCIETY
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Select 6 credits of electives from the courses below:

- EDUC 2300 - DIGITAL MEDIA FOR LEARNING
- EDUC 2301 - ONLINE PEDAGOGY AND PRAXIS
- EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY
- EDUC 2303 - TECHNOLOGY IN CONTEXT
- EDUC 2304 - PROJECT-BASED INSTRUCTIONAL DESIGN
- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT

Comprehensive Milestone

Students complete a capstone project aligned with their field-based internship experience, which is evaluated as a part of TLL 2097 - INTERNSHIP

Total Credits: 30

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Completion of all course requirements
- Successful completion of internship

English Education, MAT

The Master of Arts in Teaching (MAT) program in English Education offers students a rigorous course of instruction in teaching English in grades 7-12. Upon graduation, the MAT program satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master of Arts in Teaching (MAT) degree.

Through coursework and a two-semester internship, the MAT program prepares students to become transformative teachers that: a) center radical care and relationality; b) invite, honor, and support diverse ways of knowing; c) recognize power and seek to remake unjust systems, structures, practices, and norms; c) design and enact specialized pedagogies to teach meaningful concepts and practices; and e) cultivate a deep and reflective professional practice.

Admissions Requirements

Students must have completed a bachelor's degree with a cumulative GPA of 3.0 or higher.

EDUCATION COURSE PREREQUISITES

- 3 credits of Foundations of Special Education
- 3 credits of Adolescent Development

EXPERIENCE WORKING WITH CHILDREN PREREQUISITE

- 30 hours of experience working with K-12 children (preferably adolescents). Typical experiences include work at summer camps, tutoring, community involvement, or other volunteer or paid work with children.
- To document experience with children, candidates, complete the Hours Documentation Form (PDF), is submitted with application materials

ENGLISH COURSE PREREQUISITES

- **12 credits of English Literature**
  - This area requires a minimum of 4 three-credit courses.
  - Courses must include reading, analysis, interpretation, and writing about literatures which reflect a diversity of genders, races, and cultural perspectives.
  - A single course may satisfy more than one of these required foci. Examples include, but are not limited to literature courses such as, American, Women's, African American, Native American, African, Latino/a, Caribbean, LGBTQ, Asian, World, British, or Adolescent.
- **3 credits of English Composition**
  - This area requires a minimum of one, 3-credit course.
  - Courses must have a composition or writing focus.
  - Examples include, but are not limited to, Fiction Writing, Journalism, Poetry, or Prose.
- **6 credits of English Electives**
  - This area requires a minimum of two, 3-credit courses.
  - Courses should focus on writing, English language, or English-related areas.
  - Examples: Linguistics, Sociolinguistics, Uses of Literacy, Fiction, Non-fiction, Journalism, Poetry, Media Studies, Theater Arts, Film Studies, Film Production, Film Analysis, or Rhetorical Studies.

MAT Regulations

Accreditation

PA Department of Education accredited

Certification Requirements

Our graduates satisfy the requirements to earn a Pennsylvania Instructional I Certificate and a Master of Arts in Teaching degree by achieving the following:

- Earning a passing score on the PRAXIS II Exam in their content area
- Completing Stage 3 competencies
- Completing the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430)
- Demonstrating satisfactory performance in courses and the student internship

Internship Experience

During the fall and spring terms, students complete an internship in a local public school under the supervision of a mentor teacher and university coach. Through a gradual release of responsibility, interns observe, analyze, co-teach, and independently teach in the grade levels and subjects of their mentor teacher. In the fall term, MAT students spend approximately 15 hours per week teaching with their mentor teacher. In the spring term, MAT students attend their school sites full time, and eventually take-over their mentor teacher's full responsibilities for a minimum of two weeks.

GPA and Grade requirements

All students enrolled in the MAT majors are required to maintain a grade point average (GPA) of at least 3.0. A student is automatically placed on academic noticeif the cumulative GPA, exclusive of transfer credits, falls below 3.000. No student on academic notice is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum.

All classes that are not directly field-related (i.e.: student teaching placements and related seminars) must be taken for a letter grade.

Graduation Requirements

Students must complete the 36 credits required by the program plan of study, successfully complete the comprehensive requirement, fulfill all PA Department of Education (PDE) requirements, and obtain the required GPA of 3.00 to meet graduation requirements.

Comprehensive requirement

Completed in TLL 2290 research seminar capstone project

Curriculum

Summer semester (6 credits):

- TLL 2584 - CRITICAL PEDAGOGIES AND PRAXES
- TLL 2581 - CRITICAL HISTORIES OF EDUCATION

Fall semester (15 credits):

School placement: Mid-August through placement school district's last day before winter break

- TLL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
- TLL 2871 - TEACHING AND LEARNING IN SECONDARY ENGLISH 2
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2514 - SUPPORTING STUDENTS WITH DISABILTIES IN INCLUSIVE CLASSROOMS
- TLL 2881 - INTERNSHIP-ENGLISH OR COM EDUC

Spring semester (15 credits):

School placement: Placement school's first day back through the end of April

- TLL 2583 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING 1
- TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2824 - STUDENT TEACHING SEMINAR (1 cr)
- TLL 2881 - INTERNSHIP-ENGLISH OR COM EDUC (5 cr)

Total Credits: 36

Mathematics Education, MAT

The Mathematics Education, MAT offers students a rigorous course of instruction in teaching Math content in grades 7-12. Upon graduation, the MAT program satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master of Arts in Teaching (MAT) degree.

Through coursework and a two-semester internship, the MAT program prepares students to become transformative teachers that: a) center radical care and relationality; b) invite, honor, and support diverse ways of knowing; c) recognize power and seek to remake unjust systems, structures, practices, and norms; c) design and enact specialized pedagogies to teach meaningful concepts and practices; and e) cultivate a deep and reflective professional practice.

Admissions Requirements

Students must have completed a bachelor's degree with a cumulative GPA of 3.0 or higher.

EDUCATION COURSE PREREQUISITES

- 3 credits of Foundations of Special Education
- 3 credits of Adolescent Development

EXPERIENCE WORKING WITH CHILDREN PREREQUISITE

- 30 hours of experience working with K-12 children (preferably adolescents). Typical experiences include work at summer camps, tutoring, community involvement, or other volunteer or paid work with children.
- To document experience with children, candidates submit the Hours Documentation Form (PDF) with application materials

MATH COURSE PREREQUISITES

- Completion of a bachelor's degree with a major in mathematics or a mathematics-related field (e.g. physics, engineering, economics)
- Completion of the college-level Calculus Sequence (Calculus 1,2 & 3, or its equivalent)
- College-level experience in Abstract Algebra, Number Theory, Linear Algebra, Geometry, Probability, and Statistics (single courses may satisfy multiple areas; a portion of a course that substantially addresses one of the areas may also be accepted. In either of these cases, further information (e.g. syllabi, course documents) will be required to make a case for approval).

Total Credits: 36

Orientation and Mobility for Individuals with Visual Impairment and Blindness, M.Ed.

The Orientation and Mobility for Individuals with Visual Impairment and Blindness, M.Ed. provides students with the professional competencies and experiential learning to become orientation and mobility specialists eligible for certification by the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP), the national certifying body in O&M. The program is offered in a hybrid format, with most courses online and a limited number of workshops in person. Students also complete a clinical experience of at least 350 hours.

The program in Orientation and Mobility Specialist program (O&M) provides training to become an O&M practitioner for individuals of all ages and abilities. The program prepares students to earn certification as a Certified Orientation and Mobility Specialist (COMS), which is a gateway to a diverse range of employment opportunities. The program is offered in a hybrid format, with most courses online and a limited number of weekend workshops in person. TLL 2750 and 2752 are in-person, on-campus offered during the summer term. Students also complete a clinical experience of at least 350 hours. Pitt offers the O&M Graduate Certificate (26 credits), with the option to add on a Master's Degree in Education for an additional six credits (32 credits total).

Accreditations Associated

This program is fully accredited by the Association for Education and Rehabilitation of the Blind and Visually Impaired (AER).

Admissions Requirements

- Bachelor's degree in any subject; 3.0 cumulative GPA.
- One prerequisite course is required but can be taken as co-requisite with students' plan of studies:
    - Foundations of Special Education

Curriculum

All courses are 3 credits except where indicated

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- TLL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1
- TLL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
- TLL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY
- TLL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS
- TLL 2857 - LEVEL 3 INTERNSHIP ORIENTATION AND MOBILITY (5 credits)
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS **or** TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Student Teaching GPA Requirement

This program prepares students for national certification through the Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP), and students must maintain an overall 3.0 GPA. If a student does not maintain a 3.0 GPA, they will be prohibited from starting their internship and may impact completion of their program.

Comprehensive Milestone

Students must successfully complete a comprehensive examination to earn the M.Ed.

Total Credits : 32

Graduation Requirements

- 3.0 or higher GPA
- Completion of all O&M program coursework with a grade of B- or higher
- Completion of all other coursework requires a C or higher
- Successful completion of internship
- Comprehensive Examination

Reading Education, M.Ed.

The School of Education offers preparation that leads to certification as a Reading Specialist(PK-12). Coursework is completed fully online The curriculum for the Reading Specialist Certificate of Advanced Study (K-12) is designed to provide candidates with opportunities to build specialized knowledge, engage in principled practice in supervised settings, and prepare for leadership roles in schools and school districts. The Reading Specialist M.Ed. combines the reading specialist coursework with required research coursework to earn an M.Ed. in the field. All coursework is available online.

Admissions Requirements

- Must hold a current teaching certification
- 3.0 or higher GPA in undergraduate work
- Program course pre-requisites:
    - Teaching of Reading **or** Language Arts (3 cr)
    - Human Development **or** Educational Psychology (3 cr)
    - Educational Foundations **or** History of American Education (3 cr)
- Applicants who hold an Instructional I teaching certification from Pennsylvania earned after January 1, 2011 will have met the following course requirements through their initial certification programs. Applicants who hold a PA certification from an earlier time or who hold an out-of-state certification must meet the following requirements to be eligilbe to earn the PDE Reading Speciailst Certification (PK12):
    - Teaching English Language Learners (3 cr)
    - Foundations of Special Education (3 cr)
    - Supporting Students with Disabilities in Inclusive Classrooms (3 cr)
    - Supporting Literacies in Inclusive Classrooms (3 cr)

Certification

Students who meet all course, grade, and GPA requirements will be eligible for the Pennsylvania Department of Education Reading Specialist PreK-12 certification. Students must take and pass the Reading Specialist Praxis exam to earn the certificate.

Curriculum

- TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- TLL 2211 - COMPREHENSION AND VOCABULARY
- TLL 2219 - DISCIPLINARY LITERACY **or** TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2204 - Supporting Early Literacy
- TLL 2205 - Supporting Adolescent Literacies

- TLL 2207 - Literacy Practicum
- TLL 2202 - Literacy Leadership in Schools I
- TLL 2206 - Literacy Leadership in Schools II
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- Elective - Choose one course from list below:
    - EDUC 2100 - EDUCATION AND SOCIETY
    - EDUC 2300 - DIGITAL MEDIA FOR LEARNING
    - EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY
    - TLL 2008 - STEAM: INSTRUCTIONAL DESIGN
    - TLL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD
    - TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
    - TLL 2409 - MULTI-TIERED SYSTEM OF SUPPORT
    - TLL 2415 - INSTRUCTIONAL LEADERSHIP

Comprehensive Requirement

Students will complete a comprehensive exam as part of the MEd requirements

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of all required courses.
    - All classes that are not directly field-related (i.e.: student teaching placements and related seminars) must betaken for a letter grade.
- Successful completion of comprehensive exam

Total Credits: 30

Science Education, MAT

The Master of Arts in Teaching (MAT) program in Science Education offers students a rigorous course of instruction in teaching English in grades 7-12. Upon graduation, the MAT program satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master of Arts in Teaching (MAT) degree.

Through coursework and a two-semester internship, the MAT program prepares students to become transformative teachers that: a) center radical care and relationality; b) invite, honor, and support diverse ways of knowing; c) recognize power and seek to remake unjust systems, structures, practices, and norms; c) design and enact specialized pedagogies to teach meaningful concepts and practices; and e) cultivate a deep and reflective professional practice.

In this program, students select one of the following areas of specialization in science: Biology, Chemistry, Earth and Space Science, General Science, or Physics.

Admissions Requirements

Students must have completed a bachelor's degree with a cumulative GPA of 3.0 or higher.

EDUCATION COURSE PREREQUISITES

- 3 credits of Foundations of Special Education
- 3 credits of Adolescent Development

EXPERIENCE WORKING WITH CHILDREN PREREQUISITE

- 30 hours of experience working with K-12 children (preferably adolescents). Typical experiences include work at summer camps, tutoring, community involvement, or other volunteer or paid work with children.
- To document experience with children, candidates, complete the Hours Documentation Form (PDF), is submitted with application materials

SCIENCE COURSE PREREQUISITES

PREREQUISITES FOR BIOLOGY APPLICANTS ONLY

- A minimum of 38 credits of college-level coursework in Biology or related fields (e.g., Biochemistry, Environmental Science, etc.) with at least 9 of these credits at the upper level (junior/senior) and/or research internships;
- Foundations of Biology I and II (with labs); General Chemistry I and II (with labs); Organic Chemistry I (with lab); Calculus I (not included in 38 credit total)
- Evidence of coursework (or equivalent academic or professional experiences) in Molecular or Cellular Biology, Genetics, Biochemistry, and Environmental Biology or Ecology (single courses may satisfy multiple areas; a portion of a course that substantially addresses one of the areas may also be accepted. In either of these cases, further information (e.g. syllabi, course documents) will be required to make a case for approval)

PREREQUISITES FOR CHEMISTRY APPLICANTS ONLY

- A minimum of 38 credits of college-level coursework in Chemistry or related fields (e.g., Biochemistry, Geochemistry, etc.) with at least 9 of these credits at the upper level (junior/senior) and/or research internships;
- Foundations of Biology I (with lab); General Chemistry I and II (with labs); Organic Chemistry I and II (with labs); Introduction to Physics I; Calculus I and II (not included in 38 credit total);
- Evidence of coursework (or equivalent academic or professional experiences) in Analytic Chemistry or Instrumental Analysis; Physical Chemistry; Biochemistry, Environmental Science, or Geochemistry; (single courses may satisfy multiple areas; a portion of a course that substantially addresses one of the areas may also be accepted. In either of these cases, further information (e.g. syllabi, course documents) will be required to make a case for approval).

PREREQUISITES FOR GENERAL SCIENCE APPLICANTS ONLY

- A minimum of 38 credits of college-level coursework in the natural sciences and/or mathematics (at least 9 credits at the upper level (junior/senior) and/or research internships
- Foundations of Biology I and II (with labs);
- General Chemistry I and II (with labs); Organic Chemistry; Introduction to Physics I and II; Physics Lab; Calculus I (not included in 38 credit total)
- Evidence of coursework (or equivalent academic or professional experiences) in Molecular or Cellular Biology, Environmental Biology or Ecology, Geology, and Astronomy (single courses may satisfy multiple areas; a portion of a course that substantially addresses one of the areas may also be accepted. In either of these cases, further information (e.g. syllabi, course documents) will be required to make a case for approval).

PREREQUISITES FOR PHYSICS APPLICANTS ONLY

- A minimum of 38 credits of college-level coursework in Physics or related fields (e.g., Biophysics, Mathematics, etc.) with at least 9 of these credits at the upper level (junior/senior) and/or research internships;
- Introduction to Physics I and II (with labs); General Chemistry I and II (with labs); Calculus I, II, and III (not included in 38 credit total);
- Evidence of coursework (or equivalent academic or professional experiences) in Mechanics (above introductory level); Electricity and Magnetism (above introductory level); Optics; Wave Motion; Ethical, Human, and/or Environmental Applications of Contemporary Physics; (single courses may satisfy multiple areas; a portion of a course that substantially addresses one of the areas may also be accepted. In either of these cases, further information (e.g. syllabi, course documents) will be required to make a case for approval).

MAT Regulations

Accreditation

PA Department of Education accredited

Certification Requirements

Our graduates satisfy the requirements to earn a Pennsylvania Instructional I Certificate and a Master of Arts in Teaching degree by achieving the following:

- Earning a passing score on the PRAXIS II Exam in their content area
- Completing Stage 3 competencies
- Completing the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430)
- Demonstrating satisfactory performance in courses and the student internship

Internship Experience

During the fall and spring terms, students complete an internship in a local public school under the supervision of a mentor teacher and university coach. Through a gradual release of responsibility, interns observe, analyze, co-teach, and independently teach in the grade levels and subjects of their mentor teacher. In the fall term, MAT students spend approximately 15 hours per week teaching with their mentor teacher. In the spring term, MAT students attend their school sites full time, and eventually take-over their mentor teacher's full responsibilities for a minimum of two weeks.

GPA and Grade requirements

All students enrolled in the MAT majors are required to maintain a grade point average (GPA) of at least 3.0. A student is automatically placed on academic noticeif the cumulative GPA, exclusive of transfer credits, falls below 3.000. No student on academic notice is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum.

All classes that are not directly field-related (i.e.: student teaching placements and related seminars) must be taken for a letter grade.

Graduation Requirements

Students must complete the 36 credits required by the program plan of study, successfully complete the comprehensive requirement, fulfill all PA Department of Education (PDE) requirements, and obtain the required GPA of 3.00 to meet graduation requirements.

Comprehensive requirement

Completed in TLL 2290 research seminar capstone project

Curriculum

Summer semester (6 credits):

- TLL 2584 - CRITICAL PEDAGOGIES AND PRAXES
- TLL 2581 - CRITICAL HISTORIES OF EDUCATION

Fall semester (15 credits):

School placement: Mid-August through placement school district's last day before winter break

- TLL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1
- TLL 2873 - TEACHING AND LEARNING IN SECONDARY SCIENCE 2
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2514 - SUPPORTING STUDENTS WITH DISABILTIES IN INCLUSIVE CLASSROOMS
- TLL 2496 - INTERNSHIP - SCIENCE

Spring semester (15 credits):

School placement: Placement district's first day back through end of April

- TLL 2583 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING 1
- TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2824 - STUDENT TEACHING SEMINAR (1 cr)
- TLL 2496 TLL 2496 - INTERNSHIP - SCIENCE (5 cr)

Total Credits: 36

Social Studies Education, MAT

The Master of Arts (MAT) program in Social Studies Education offers students a rigorous course of instruction in teaching Social Studies content in grades 7-12. Upon graduation, the MAT program satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master of Arts in Teaching (MAT) degree.

Through coursework and a two-semester internship, the MAT program prepares students to become transformative teachers that: a) center radical care and relationality; b) invite, honor, and support diverse ways of knowing; c) recognize power and seek to remake unjust systems, structures, practices, and norms; c) design and enact specialized pedagogies to teach meaningful concepts and practices; and e) cultivate a deep and reflective professional practice.

Admissions Requirements

Students must have completed a bachelor's degree with a cumulative GPA of 3.0 or higher.

EDUCATION COURSE PREREQUISITES

- 3 credits of Foundations of Special Education
- 3 credits of Adolescent Development

EXPERIENCE WORKING WITH CHILDREN PREREQUISITE

- 30 hours of experience working with K-12 children (preferably adolescents). Typical experiences include work at summer camps, tutoring, community involvement, or other volunteer or paid work with children.
- To document experience with children, candidates, complete the Hours Documentation Form (PDF), is submitted with application materials

SOCIAL STUDIES COURSE PREREQUISITES

Area 1: Content Prerequisites 15-18 credits)

This area requires a minimum of 5 three-credit courses. Courses must directly address content in the following topic areas. A single course may satisfy more than one of these required foci. If regional, period, and/or topic specific courses are used to meet these prerequisites, up to 3 additional credits will be required in order to meet content expectations.

- U.S. History;
- Western European History;
- World History (non-Western);
- Ancient History;
- Geography; and
- World Cultures

Area 2: Civics (3 credits)

The course must focus on general themes of political science, particularly those related to democracy, civic engagement, American political systems, or related topics.

Area 3: Economics (3 credits)

A course in basic or advanced Economics is required

Area 4: Sociology and Social Foundations (3 credits)

This prerequisite may be satisfied by a course in either the humanities, social sciences, or education that examines how socially constructed categories create advantages and disadvantages in social or educational institutions.

Examples include courses that explore the history, nature, or implications of:

- classism and capitalism;
- heterosexism, homophobia, genderism, and sexism;
- racism, xenophobia, and ethnocentrism;
- religious oppression;
- ableism; and/or
- other, interrelated forms of subordination

MAT Regulations

Accreditation

PA Department of Education accredited

Certification Requirements

Our graduates satisfy the requirements to earn a Pennsylvania Instructional I Certificate and a Master of Arts in Teaching degree by achieving the following:

- Earning a passing score on the PRAXIS II Exam in their content area
- Completing Stage 3 competencies
- Completing the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430)
- Demonstrating satisfactory performance in courses and the student internship

Internship Experience

During the fall and spring terms, students complete an internship in a local public school under the supervision of a mentor teacher and university coach. Through a gradual release of responsibility, interns observe, analyze, co-teach, and independently teach in the grade levels and subjects of their mentor teacher. In the fall term, MAT students spend approximately 15 hours per week teaching with their mentor teacher. In the spring term, MAT students attend their school sites full time, and eventually take-over their mentor teacher's full responsibilities for a minimum of two weeks.

GPA and Grade requirements

All students enrolled in the MAT majors are required to maintain a grade point average (GPA) of at least 3.0. A student is automatically placed on academic noticeif the cumulative GPA, exclusive of transfer credits, falls below 3.000. No student on academic notice is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum.

All classes that are not directly field-related (i.e.: student teaching placements and related seminars) must be taken for a letter grade.

Graduation Requirements

Students must complete the 36 credits required by the program plan of study, successfully complete the comprehensive requirement, fulfill all PA Department of Education (PDE) requirements, and obtain the required GPA of 3.00 to meet graduation requirements.

Comprehensive requirement

Completed in TLL 2290 research seminar capstone project

Curriculum

Summer semester (6 credits):

- TLL 2584 - CRITICAL PEDAGOGIES AND PRAXES
- TLL 2581 - CRITICAL HISTORIES OF EDUCATION

Fall semester (15 credits):

School placement: Mid-August through placement school district's last day before winter break

- TLL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1
- TLL 2872 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 2
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2514 - SUPPORTING STUDENTS WITH DISABILTIES IN INCLUSIVE CLASSROOMS
- TLL 2883 - INTERNSHIP - SOCIAL STUDIES

Spring semester (15 credits):

School placement: Placement district's first day back through end of April

- TLL 2583 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING 1
- TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2824 - STUDENT TEACHING SEMINAR (1 cr)
- TLL 2883 - INTERNSHIP - SOCIAL STUDIES (5 cr)

Total Credits: 36

Special Education PreK-12, MEd

The Special Education PreK-12 MEd program prepares teachers to implement evidence-based instructional methods for school-age children with disabilities. Graduates meet training eligibility for the Instructional I Special Education PreK-12 teaching certificate from the Pennsylvania Department of Education and earn a Master of Education degree.

Admissions Requirements

Bachelor's degree in any area of study. Candidates can have degrees in education, psychology, and various social science majors. We also welcome students who have worked in different fields.

Prerequisites (6 credits), which can also be taken as co-requisites:

- Foundations of Special Education (3 credits)

- Teaching English Language Learners (3 credits)

Clearances

In order to participate in an internship where students interact with minors as part of the requirements for this program in the School of Education, students must submit all of the required clearances to the School of Education Clearance Portal.

Curriculum

Core Curriculum (24 credits)

- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2513 - INSTRNL METH-HIGH INCIDNC DISABS
- TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- TLL 2521 - PROACTIVE STRATEGIES FOR A POSITIVE CLASSROOM
- TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
- TLL 2860 - PRACTICUM IN SPECIAL EDUCATION (1 credit)
- TLL 2504 - STUDENT TEACHING SPECIAL EDUCATION (4 credits)
- TLL 2824 - STUDENT TEACHING SEMINAR (1 credit)
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Structured Literacy Curriculum Course Options (choose 3 credits from below):

- TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS (online)
- TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1
- TLL 2209 - READING WRITING METHODS 2: GRADE 2-4

Electives (6 credits)

Students work with their advisor to choose elective courses to enhance their teaching preparation in alignment with specific career goals and previous coursework. These courses may be from the fields including but not limited to Reading Education, STEAM education, Human Development, Equity & Justice or Educational Research. Elective courses must be approved in advance by the advisor.

Total Credits : 33

Internship

During the school year, students complete an internship in a local public school under the supervision of a mentor teacher. Students complete 15 hours a week in their placements in the fall and are full-time in the spring. Student teachers observe, analyze, and practice teaching skills in the grade levels and subjects of their mentor teacher.

Comprehensive Milestone

All students are required to pass a Comprehensive Exam in their final term.

Certification Requirements

All students are required to successfully complete Pennsylvania Initial Teaching Certification requirements, including passing necessary Praxis exams, Stage 3 competencies, and PDE 430 evaluation.

Graduation Requirements

- All students are required to maintain a grade point average (GPA) of at least 3.0 throughout the program.

- Successful completion of Comprehensive Exam
- Successful completion of all course and student teaching requirements

Teacher of Students with Visual Impairments and Blindness (TVI) MEd

The Teacher of Students with Visual Impairments (TVI) MEd program at the University of Pittsburgh School of Education is fully aligned with the Pennsylvania Department of Education (PDE) standards, the curriculum will prepare students for state certification to teach in preK-12 classrooms. Pennsylvania Department of Education TVI certification can only be earned by candidates who complete their student teaching in Pennsylvania (students from outside PA must check with their state's certification/licensure requirements). The program is offered in a hybrid format, with most courses online and a limited number of workshops in person. Students also complete a semester-long student teaching experience with a certified TVI. The Pitt MEd program features a TVI graduate certificate (29 credits) whose courses lead to state certification and an additional 6 credits which complete the Master's degree requierments.

Accreditations Associated

This program is fully accredited by the Association for Education and Rehabilitation of the Blind and Visually Impaired (AER).

Admissions Requirements

Bachelor's degree in any subject; 3.0 cumulative GPA.

Four prerequisite courses are required but can be taken as co-requisites with students' plan of studies:

- Foundations of Special Education
- Teaching English Language Learners
- Supporting Literacy in the Inclusive Classroom
- Supporting Students with Disabilities in Inclusive Classrooms

Student Teaching

The Pennsylvania Department of Education (PDE) requires that all students must enter a teacher education program with and maintain an overall 3.0 GPA. If a student does not maintain a 3.0 GPA, they will be prohibited from student teaching or earning certification. A full semester of student teaching is required.

Curriculum

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2529 - BRAILLE
- TLL 2535 - COMMUNICATION SKILLS FOR STUDENTS WITH VISUAL IMPAIRMENTS
- TLL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
- TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- TLL 2545 - EDUCATION OF CHILDREN WITH VI 2
- TLL 2547 - NEMETH CODE/ABACUS
- TLL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM IN VISUAL IMPAIRMENTS 5 credits
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS **or** TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Total Credits : 35

Comprehensive Milestone

Students must successfully complete a take-home comprehensive examination to earn the M.Ed.

Graduation Requirements

- 3.0 or higher GPA
- Successful completion of all coursework
- Successful completion of full-time student teaching assignment
- Successful completion of comprehensive examination

World and Heritage Language Education, MAT

The Master of Arts in Teaching (MAT) program in World and Heritage Language Education offers students a rigorous course of instruction in teaching World Languages in grades PK-12 with a specialization in one of the following languages: Spanish, French, German, Latin, Japanese, Chinese or Italian. Upon graduation, the MAT program satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master of Arts in Teaching (MAT) degree.

Through coursework and a two-semester internship, the MAT program prepares students to become transformative teachers that: a) center radical care and relationality; b) invite, honor, and support diverse ways of knowing; c) recognize power and seek to remake unjust systems, structures, practices, and norms; c) design and enact specialized pedagogies to teach meaningful concepts and practices; and e) cultivate a deep and reflective professional practice.

Admissions Requirements

Students must have completed a bachelor's degree with a cumulative GPA of 3.0 or higher.

ORAL PROFICIENCY ADMISSION REQUIREMENT:

- A score of an Intermediate-high or above on the Oral Proficiency Interview (OPI) taken through Language Testing International (LTI)

EDUCATION COURSE PREREQUISITES

- 3 credits of Foundations of Special Education
- 3 credits of Adolescent Development

EXPERIENCE WORKING WITH CHILDREN PREREQUISITE

- 30 hours of experience working with K-12 children (preferably adolescents). Typical experiences include work at summer camps, tutoring, community involvement, or other volunteer or paid work with children.
- To document experience with children, candidates submit the Hours Documentation Form (PDF) with application materials

WORLD AND HERITAGE LANGUAGE COURSE PREREQUISITES

A total of 24 credits are necessary to be distributed across Area 1 and Area 2. At least 12 credits must be completed in both Areas 1 and 2.

Area 1: Languages and Linguistics (At least 12 credits)

- Conversation and Advanced Conversation (3 credits)
- Composition/Writing (3 credits)
- Stylistics (3 credits)
- Phonetics (3 credits)

- Grammar (3 credits)
- Syntax (3 credits)
- Structure of the Language (3 credits)
- Dialects (3 credits)
- Morphology (3 credits)
- Listening Comprehension (3 credits)
- Advanced Reading (not a literature course) (3 credits)
- Professional Translation (3 credits)
- History of the Language (3 credits)
- Introduction to Linguistics (may be taught in English) (3 credits)

Area 2: Literature and Culture (At least 12 credits)

- Civilization I (3 credits)
- Civilization II (3 credits)
- Major Cultural Periods (3 credits)
- Cultural Heritage Courses (3 credits)
- Literature Surveys (3 credits)
- Author Courses (3 credits)
- Genre Courses (3 credits)
- Literary Period Courses (3 credits)
- Cultural Period Courses (3 credits)
- Thematically-based Literature Courses (3 credits)

The following prerequisites must be fulfilled by all applicants of **Latin** *only. A total of 24 credits are necessary, with at least 12 credits in Latin Area 1 and 12 credits in Latin Area 2.*

- **Latin Area 1**
  - Roman Civilization (3 credits)
  - Latin Prose Composition (3 credits)
- **Latin Area 2**
  - At least 12 credits in Latin with a maximum of 144 credits

MAT Regulations

Certification Requirements

Our graduates satisfy the requirements to earn a Pennsylvania Instructional I Certificate and a Master of Arts in Teaching degree by achieving the following:

- Earning a passing score on the PRAXIS II Exam in their content area
- Completing Stage 3 competencies
- Completing the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430)
- Demonstrating satisfactory performance in courses and the student internship

Internship Experience

During the fall and spring terms, students complete an internship in a local public school under the supervision of a mentor teacher and university coach. Through a gradual release of responsibility, interns observe, analyze, co-teach, and independently teach in the grade

levels and subjects of their mentor teacher. In the fall term, MAT students spend approximately 15 hours per week teaching with their mentor teacher. In the spring term, MAT students attend their school sites full time, and eventually take-over their mentor teacher's full responsibilities for a minimum of two weeks.

GPA and Grade requirements

All students enrolled in the MAT majors are required to maintain a grade point average (GPA) of at least 3.0. A student is automatically placed on academic noticeif the cumulative GPA, exclusive of transfer credits, falls below 3.000. No student on academic notice is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum.

All classes that are not directly field-related (i.e.: student teaching placements and related seminars) must be taken for a letter grade.

Graduation Requirements

Students must complete the 36 credits required by the program plan of study, successfully complete the comprehensive requirement, fulfill all PA Department of Education (PDE) requirements, and obtain the required GPA of 3.00 to meet graduation requirements.

Comprehensive requirement

Completed in TLL 2290 research seminar capstone project

Curriculum

Summer semester (6 credits):

- TLL 2584 - CRITICAL PEDAGOGIES AND PRAXES
- TLL 2581 - CRITICAL HISTORIES OF EDUCATION

Fall semester (15 credits):

School placement: Mid-August through placement school district's last day before winter break

- TLL 2252 - TEACHING AND LEARNING IN PK-12 WORLD AND HERITAGE LANGUAGE EDUCATION 1
- TLL 2870 - TEACHING & LEARNING IN PK-12 WORLD AND HERITAGE LANGUAGE 2
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2514 - SUPPORTING STUDENTS WITH DISABILTIES IN INCLUSIVE CLASSROOMS
- TLL 2882 - INTERNSHIP IN WORLD AND HERITAGE LANGUAGE EDUCATION

Spring semester (15 credits):

School placement: Placement district's first day back through end of April

- TLL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE
- TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2824 - STUDENT TEACHING SEMINAR (1 cr)
- TLL 2882 - INTERNSHIP IN WORLD AND HERITAGE LANGUAGE EDUCATION (5 cr)

Total Credits: 36

World and Heritage Language Education, MEd

The Master of Education (MEd) program with a specialization in World and Heritage Language Education is a professional degree for individuals who wish to pursue advanced study in the field of teaching and learning world languages. Courses implement a practice-based approach to enhance students' knowledge and application of particular teaching strategies that have been identified as essential to the field of world language education. The program coursework emphasizes practical application of current theories and methods for teaching and evaluating students as well as curriculum and materials development. Unique features of the program include six credits of practicum coursework and six credits of research methodology.

Full-time or part-time enrollment is allowed, however, full-time students must start in the Fall term.

Admissions Requirements

- 3.0 GPA in undergraduate coursework
- For non-native speakers of English, evidence of language proficiency is required with the following minimum scores:
    - TOEFL - Minimum 80
    - IELTS - Minimum 6.5
    - Duolingo Test - 110

Required Courses (30 credits)

- TLL 2251 - INTRODUCTION TO FOREIGN LANGUAGE EDUCATION
- TLL 2255 - TECHNQ/PROCDR FOREIGN LANG TCH
- TLL 2256 - ISSUES IN FOREIGN LANGUAGE ED
- TLL 2722 - PRACTICUM IN FOREIGN LANGUAGE
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE
- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY **OR**
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION

Elective Courses (6 credits)

Students will choose two 2000-level courses in LING, EFOP, TLL, or HHD that are related to the major. Suggested courses:

- LING 1000 - INTRODUCTION TO LINGUISTICS (only 1000-level course allowed)
- TLL 2041 - INTRO TO EARLY CHILDHOOD ED
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2514 - SUPPORTING STUDENTS WITH DISABILTIES IN INCLUSIVE CLASSROOMS

Comprehensive Requirement

Students complete a comprehensive exam in the last term or second to last term of the program. The comprehensive exam is not included in a course.

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA

- Successfully complete all course requirements
- Successfully complete comprehensive exam

Total Credits : 36

Department of Health and Human Development

The Department of Health and Human Development (HHD) blends health promotion, wellness, and exercise physiology with applied developmental science and evidence-based practices to address 21st century problems in diverse regional, national, and global real-world contexts. Interdisciplinary professionals in HHD apply recommended and equitable practices to promote the health and development of all children, youth, and adults. We place a special emphasis on those who are most vulnerable (e.g. at-developmental risk, with disabilities, and/or with chronic medical conditions). We assess, prescribe, teach, and supervise programs that focus on improving health-fitness and clinical outcomes, human performance, and healthy lifestyle behaviors. We collaborate with community partners in education, healthcare, wellness, and human service settings to provide health promotion and developmental supports.

Our interdisciplinary emphasis enables emerging professionals to become effective leaders by fusing strategies in health and developmental science to address real-world inequities and health challenges through effective interdisciplinary collaboration. Our work is rooted in applied research and implementation and improvement science but is informed by principles of social justice, individual potential, equity, and inclusion for all.

As students, you will become...

- Future leaders in your chosen specializations by modeling ethical behavior and equitable professional practices
- Committed professionals in Exercise Science, Health and Wellness Promotion, and Physiology (e.g. wellness, exercise prescription, cardiac and pulmonary rehabilitation, sports performance, prevention of chronic disease)
- Specialized professionals in Applied Developmental Psychology with competencies in both applied service and applied research (e.g. children with special healthcare needs-child life, behavioral health, infant mental health, child and youth development, program evaluation, early childhood intervention)
- Researchers who inform recommended practices for promoting health and development
- Faculty who educate the next generation of health and development professionals
- Committed professionals who understand the importance of enlightened public policies
- Engaged professionals who use social and political advocacy as a tool for ensuring the human rights of our most vulnerable citizens

Certificate

Infant Mental Health Certificate

The Certificate in Infant Mental Health (IMH) offers a comprehensive foundation in infant and early childhood development, mental health, and relationship-based practice. This 12-credit program integrates developmental science, applied research, and reflective practice to help students understand how early experiences, relationships, and environments shape lifelong well-being.

Through coursework emphasizing the science of early brain development, attachment, and the effects of risk, adversity, and resilience, students gain a deep understanding of early social-emotional development and psychopathology. The curriculum centers on equity, culture, and ethics as essential dimensions of effective practice with infants, young children, and their families.

Aligned with the Alliance for the Advancement of Infant Mental Health competencies, the certificate prepares students and professionals to apply evidence-informed, relationship-based, and culturally responsive approaches across diverse early childhood settings-including mental health, early intervention, education, health care, and family support systems. The program also provides a strong academic foundation for those pursuing advanced study in infant and early childhood mental health.

Admissions Requirements

Successful completion of an undergraduate degree.

Certification

The Infant Mental Health Certificate is aligned to meet the in-service training requirements for Endorsement for Culturally Sensitive Relationship-Focused Practice Promoting Infant and Early Childhood Mental Health through the Alliance for the Advancement of Infant Mental Health

Curriculum

The following four courses are required. HHD 2007 is required as a first course.

- HHD 2007 - FOUNDATIONS OF INFANT MENTAL HEALTH 1 **
- HHD 2008 - FOUNDATIONS OF INFANT MENTAL HEALTH 2
- HHD 2009 - INFANT MENTAL HEALTH INTERVENTIONS 2
- HHD - 2010 - Diversity, Equity, and Reflection in Infant and Early Childhood Mental Health
  **Students who complete the online, non-credit bearing Foundations of Infant Mental Health Pitt Professional course may enroll in the IMH Certificate and earrn 3 credits for the Foundations of IMH course (HHD 2007) upon (1) meeting in-course criteria including passing module quizzes (15) at the 80% accuracy level or (2) passing the exit exam at the 80% accuracy level.

Total Credits:12

Graduation Requirements

- Successful completion all required courses with a grad of B- or higher
- 3.000 cumulative graduate Pitt GPA.

Doctoral

Exercise Physiology, PhD

The PhD in Exercise Physiology is focused on training students to prepare for academic research careers related to exercise and physical activity to prevent and treat chronic health-related conditions, to improve health and well-being, and to identify the underlying physiological and/or behavioral mechanisms that bring about these health-enhancing outcomes. Specifically, this degree will prepare students for academic careers focused on research, teaching, mentoring, and translation of research findings to a variety of settings. For students interested in an academic research career, this degree will also prepare students for post-doctoral fellowships.

Recipients of this degree must show evidence of superior scholarship, mastery of a special field of knowledge, and the ability to conduct significant and relevant research.

Exercise Physiology Requirements

- The Plan of Study is to be submitted for Graduate Faculty review in the second semester of doctoral study.
- A minimum of 72 credits is required in the Doctoral Program
- A maximum of 30 credits from the master's degree
- Only 3 hours can be in a College Teaching Practicum (enrollment in a College Teaching Practicum Requires Prior Department Approval).

Curriculum

- First Year Seminar: EDUC 3101 - FIRST YEAR PHD SEMINAR
    - To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3101) . This seminar meets during the fall term and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).
- Major Field Health and Physical Activity, Exercise Physiology (30-36 Credits)
- Supporting Field Area (9 Credits Minimum)
    - Students are required to take a minimum of 9 credits of courses in an academic discipline that is complementary to the student's major field of specialization. These credits must be graduate-level coursework outside of the student's PhD major program. This requirement does not prohibit students from taking coursework in the School of Education or even within the HHD department so long as it is deemed outside of the student's specific PhD program.
- Research Methodology and Statistics (21 Credits Minimum)
    - EDUC 3101 - FIRST YEAR PHD SEMINAR will count as 3 credits of Research Methodology coursework
    - 18 credits of approved Methodology and Statistics coursework. Students will work with their advisor to determine appropriate coursework.
- Research Practicum (6 Credits Minimum)
- Electives (Credits Variable)

Full-time Dissertation Study (0 credits)

Doctoral candidates who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full time on their dissertations may register for this course. While the course carries no credits and no grade, students who enroll in "full-time dissertation study" are considered by the university to have full-time registration status.

- FTDG 0000 - FULL-TIME DISSERTATION STUDY

Total Credits: 72

Health and Physical Activity, EdD

The EdD in Health and Physical Activity trains students to pursue opportunities in public health, community organizations, schools, and government or policy settings, with a focus on applying improvement science to advance health and physical activity. This program will prepare students for leadership positions related to development, implementation, evaluation, or policy of evidence-based initiatives related to health and physical activity. Graduates of the program go on to work in community-health promotion, administrative and health-focused positions in K-12 education, program coordination and training programs in higher education, administrative and leadership positions in non-profit organizations, managing and running programs in healthcare and at health plans.

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. Incoming students meet program faculty, current students/alumni, receive an overview of EdD program, participate in cohort-building activities and get an introduction to the summer "on-ramp" courses.
- **Intensive on-ramp**: The EdD cohort will participate in the first-year summer "on-ramp" courses which consist of three in-person Saturdays and a full-week, on-campus experience. The on-ramp consists of two courses-- Foundations 1 and Practitioner Inquiry 1 -- to give new students an immersive introduction to doctoral study, cohort collaborations, and program content. The one-week in-person experience typically takes place in June.
- **Hybrid seminars**: After the first summer on-ramp, students experience a hybrid learning model of education. Each semester courses are largely conducted asynchronously online which is supported through a once a month flipped classroom experience that takes place in-person (typically on Saturdays) on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

SCHEDULE (all courses are 3 credits unless otherwise noted)

Year 1: Summer	**Year 1: Fall**	**Year 1: Spring**
EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER	EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION Major Course 1	EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major Course 2
Year 2: Summer	**Year 2: Fall**	**Year 2: Spring**
EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY	EDUC 3006 - PRACTITIONER INQUIRY 2 Major Course 3	EDUC 3007 - PRACTITIONER INQUIRY 3 Major Course 4

Guidance In Scholarly Practice: 10 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE

Health and Physical Activity Academic Major Courses (12 credits)

Health and Physical Activity ARCO Courses

- HHD 3114 - EVIDENCE BASED LIFESTYLE PROGRAM DESIGN AND EVALUATION
- HHD 3115 - HEALTH PROMOTION POLICY AND PROGRAM IMPLEMENTATION
- HHD 3116 - RESOURCE AND FUNDING ACQUISITION FOR HEALTH PROMOTION PROGRAMMING
- HHD 3117 - HEALTH PROMOTION PROGRAM TRANSLATION AND SUSTAINABILITY

Transfer Credits (24 credits)

Total Credits: 76

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation in practice and defense

Out-of-School Learning, EdD

The EdD in Out-of-School Learning is for experienced informal learning and out-of-school learning professionals who seek advanced training for leadership, consultant, or policymaker positions. The major is part of the school's Doctor of Education (EdD) program, which has a variety of different majors to serve professionals from various fields. Our students and graduates work in museums, after-school learning programs, intermediary organizations, media, digital design, university outreach/extension, youth development, libraries, arts and sports programs, and other areas where designed learning environments exist.

EdD Curriculum

The EdD program is a three-year 76-credit program. Students are required to transfer 24 credits of relevant graduate work into the EdD program. The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a virtual orientation in the spring (typically April) before the summer start of the program. SCHEDULE (all courses are 3 credits unless otherwise noted)

Year 1: Summer	**Year 1: Fall**	**Year 1: Spring**
EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER	EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION Major Course 1	EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major Course 2
Year 2: Summer	**Year 2: Fall**	**Year 2: Spring**
EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY	EDUC 3006 - PRACTITIONER INQUIRY 2 Major Course 3	EDUC 3007 - PRACTITIONER INQUIRY 3 Major Course 4
Year 3: Summer	**Year 3: Fall**	**Year 3: Spring**
EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)	EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE (5 credits)

Foundation Courses: 12 Credits

- Foundations 1: EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- Foundations 2: EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- Foundations 3: EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- Foundations 4: EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: 3 credits

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

Dissertation-in-Practice Overview: 3 credits

- EDUC 3090 - PRACTITIONER INQUIRY 5: DISSERTATION-IN-PRACTICE OVERVIEW SEMINAR

Guidance In Scholarly Practice: 10 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE

Out-of-School Learning Academic Major Courses (12 credits)

- HHD 3024 - INFORMAL LEARNING: THEORY AND FOUNDATION
- HHD 3023 - YOUTH DEVELOPMENT IN OUT-OF-SCHOOL SETTINGS
- HHD 3006 - FUTURE OF OUT OF SCHOOL LEARNING
- HHD 3022 - ORGANIZATIONS, NETWORKS, AND POLICY IN INFORMAL LEARNING

Transfer credits (24 credits)

Total credits (76 credits)

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of written dissertation in practice and defense

Master's

Applied Developmental Psychology, MS

The Applied Developmental Psychology Master of Science program at the Pitt School of Education emphasizes the application of research to practice in the promotion of positive human developmental outcomes for children, youth, and families. Students who complete the Master of Science degree in Applied Developmental Psychology apply knowledge of child and/or youth development and evidence-based practices to address real-world problems in real-world settings. Students also become experienced in interdisciplinary collaboration as they design, implement, and/or evaluate innovative intervention programs for children, youth, and families.

The Master of Science degree requires 36 credits distributed as follows: Applied Developmental Psychology (ADP) Core courses (18 credits), specialization and/or elective courses (12 credits), and Community-Based Practice Learning (with capstone project) courses (6 credits).

Admissions Requirements

- Successful completion of undergraduate degree with a 3.0 GPA
- Experience working with children or adolescents
- Courses in Research Methods and Developmental Psychology
- Updated Yearly Clearances (PA Criminal Record and Child Abuse, FBI Federal Criminal HIstory)
- Current negative tuberculosis test

Core Courses (18 credits)

All full-time students in the 36-credit Master of Science (MS) program in Applied Developmental Psychology (ADP) complete a common set (18 credits) of core, foundational courses.

- HHD 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- HHD 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE
- HHD 2510 - ASSESSMENT OF CHILDREN'S DEVELOPMENT IN REAL WORLD CONTEXTS
- HHD 2530 - APPLIED DEVELOPMENTAL PSYCHOLOGY (ADP): PROFESSIONAL IDENTITY AND LEADERSHIP
- HHD 2542 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS I
- HHD 2543 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS 2

Specialization Courses (12 credits)

In the second year of the program, students complete in-depth study and training in courses aligned with their interests in areas such as Behavioral Health in Schools and Communities, Out of School Time, Children with Special Healthcare Needs, Infant Mental Health, and Applied Research Methods for Child and Youth Serving Organizations, Students may create their own academic path by selecting MS level electives approved by their advisor. Students will also complete a community-based practice learning experience that consists of a field placement and development of the Master's capstone project.

Additional ADP MS options include completion of the Applied Behavior Analysis Certificate, Study Abroad, and taking additional elective courses.

Choose 12.0 credits from the following courses (other courses may be chosen based on specialization with advisor approval):

- HHD 2113 - DEVELOPMENTAL PSYCHOPATHOLOGY
- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- HHD 2532 - PSYCHOSOCIAL ASPECTS OF ILLNESS
- HHD 2520 - INTRODUCTION TO COUNSELING
- HHD 2349 - CHILD LIFE PRACTICE IN HOSPITALS
- HHD 2524 - BEHAVIORAL ASSESSMENT AND INTERVENTION
- HHD 2006 - INFANT MENTAL HEALTH INTERVENTIONS I
- HHD 2007 - FOUNDATIONS OF INFANT MENTAL HEALTH 1
- HHD 2008 - FOUNDATIONS OF INFANT MENTAL HEALTH 2
- HHD 2009 - INFANT MENTAL HEALTH INTERVENTIONS 2
- HHD 2562 - PLAY THERAPY AND FIELD WORK

Capstone Courses (6 credits)

Students will create and complete a community-based Capstone project with the support of ADP MS and University of Pittsburgh faculty. The Capstone experience includes a total of six (6) credits including two pro-seminar classes and four (4) credits of community-engaged practice.

- HHD 2316 - ADP PROFESSIONAL SEMINAR 1 (1 credit)
- HHD 2317 - ADP PROFESSIONAL SEMINAR 2 (1 credit)

Students will complete a total of four (4) credits from the following list:

- HHD 2622 - CHILD LIFE PRACTICUM
- HHD 2722 - CHILD LIFE INTERNSHIP
- HHD 2490 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY
- HHD 2765 - COMMUNITY-BASED PRACTICE LEARNING 1
- HHD 2766 - COMMUNITY-BASED PRACTICE LEARNING 2

Total Credits: 36

Comprehensive Requirement

MS students in Applied Developmental Psychology complete the comprehensive examination through completion and approval of a formal Capstone Proposal Presentation, which is completed as an assignment in HHD 2316 ADP Professional Seminar.

Graduation Requirements

- 3.0 cumulative GPA in Pitt graduate classes
- Completion of all required coursework
- Successful completion of comprehensive/capstone requirement

Health and Physical Activity - Clinical Exercise Physiology, MS

The Master of Science (MS) program in Clinical Exercise Physiology prepares students for clinical, applied, or research graduate schools and careers focused on preventing and treating chronic health-related conditions. The MS in Clinical Exercise Physiology degree is fully accredited by the Commission for Accreditation of Allied Health Education Programs (CAAHEP).

Admissions Requirements

The admission requirements include the following:

1. Applicants who possess an undergraduate degree in Exercise Science or a closely related field, or who can demonstrate foundational knowledge in key areas (human anatomy, human physiology, exercise physiology, exercise testing and prescription) are admitted to the Master of Science degree program provided that they meet all other School of Education admission requirements.
2. Applicants who do not possess an undergraduate degree in Exercise Science or a closely related field, or who cannot demonstrate foundational knowledge in key areas are provisionally admitted to the Master of Science Program provided that they complete coursework in the following areas prior to admission into the Master of Science Program in the Department of Health and Human Development (this was previously approved by the University in Spring 2018):
    1. Human Anatomy
    2. Human Physiology
    3. Exercise Physiology
    4. Exercise Testing and Prescription

Undergraduate Degree Requirement or Foundational Knowledge Requirement for Admission to the Master of Science Program in the Department of Health and Human Development	**Provisional Admission Requirement***	
• Undergraduate degree in Exercise Science or a related field of study. OR • Foundational knowledge in Anatomy, Human Physiology, Exercise Physiology, Exercise Testing and Prescription	***Completion of courses in the following areas:**	**Options for Completing this Admission Requirement**
	• Human Anatomy	Complete HHD 1011/12 (Applied Human Anatomy) or complete a comparable course.

	• Human Physiology	Complete HHD 1033 (Human Physiology) or complete a comparable course.
	• Exercise Physiology	Complete HHD 1042 (Physiology of Exercise) or complete a comparable course.
** Indicates that when the application is reviewed, only those courses where a gap in the core knowledge is identified will be required for admission.*	• Exercise Testing and Prescription	Complete HHD 1224 (Fitness Assessment and Exercise Prescription) or complete a comparable course.

Accreditation and External Credentials

The MS in Clinical Exercise Physiology degree is fully accredited by the **Commission for Accreditation of Allied Health Education Programs (CAAHEP)**. This national accreditation - considered the gold standard in the industry - is based on a rigorous review of our curriculum, faculty, facilities, and more.

This accreditation enables our students to sit for *the American College of Sports Medicine Clinical Exercise Physiologist Certification* following graduation and accumulation of 600 hours of clinical experience. Starting in 2027, all students who wish to sit for this certification must have graduated from an accredited program

Curriculum

ore Requirements (21 credits)

- HHD 2268 - PHYSICAL ACTIVITY AND HEALTH
- HHD 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH
- HHD 2380 - BEHAVIOR CHANGE AND HEALTH COACHING
- HHD 2381 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 1
- HHD 2382 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 2
- HHD 2383 - ADVANCED CLINICAL HEALTH AND PHYSICAL ACTIVITY ASSESSMENT
- HHD 2384 - MOVEMENT SCIENCE IN HEALTH AND PHYSICAL ACTIVITY

Students completing the thesis option (15 credits)

- Research Design Course: HHD 2375 - RESEARCH AND EXPERIMENTAL DESIGN IN EXERCISE PHYSIOLOGY **or** EFOP 2030 - EXPERIMENTAL DESIGN
- Statistics Course:HHD 2410 - STATISTICS IN HPA RESEARCH **or** EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- Approved Elective (3 credits)
- HHD 2999 - MASTER'S THESIS RESEARCH (6 credits)

Students completing the non-thesis option (9 credits)

- HHD 2385 - INTERNSHIP IN HEALTH AND PHYSICAL ACTIVITY
- Approved Electives (6 credits)

Comprehensive Requirement

Students must complete a comprehensive exam based on core competencies prior to graduation. Students will complete this exam at the end of spring term (or approximately 24 credits) as a part of a core spring course requirement, which includes both a practical and written assessment. Students will be provided guidance and practice time to assist in their preparation for the comprehensive exam. An 80% or pass is required for graduation.

Total Credits: 30 or 36

Thesis Option: 36 credits

Non-thesis Option: 30 credits

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Completion of all required courses
- Successful completion of comprehensive exam
- Students pursuing the Thesis Option must write and defend their thesis

Health and Physical Activity - Health and Wellness Management, MS

The Master of Science (MS) program in Health and Physical Activity with a Concentration in Health and Wellness Management is a collaborative degree offered through the School of Education's Department of Health and Human Development and Pitt's Joseph M. Katz Graduate School of Business.

This academic graduate program is designed for students with academic training and experience in health-fitness, exercise science, and/or wellness with a desire to advance to a management-level position.

Courses focus on applying evidence-based strategies and knowledge to interactions with health-fitness participants and patient populations in order to enhance engagement, adherence, and the sustainability of a healthy lifestyle business. The program will include the development of strategic management skills for interacting with patients, enhancing organizational compliance, working with patients, and improving the listening and interaction skills of the professional. The skills are applicable specifically to the health-fitness and healthcare settings.

As health and wellness employment opportunities are increasing, this dual-degree option expands the level of training of students and will build on their experience and knowledge in both the health-fitness and the business management fields. As a result, students will be prepared to transition to leadership positions (i.e. cardiac rehabilitation directors, health and wellness directors, YMCA directors, etc.).

Admission Requirements

Applicants need to meet admission requirements for both the School of Education and the Katz Graduate School of Business. These include:

- Bachelor's degree from an accredited U.S. university, as determined by the Commission on Recognition of Postsecondary Accreditation, or the non-U.S. equivalent

- Undergraduate coursework in human anatomy, human physiology, fitness assessment and exercise prescription, and exercise physiology. Applicants without this training can be admitted provisionally and will be required to take these undergraduate courses prior to graduation..

- GRE Exam is not required; however, applicants are encouraged to submit scores if they do not meet at least one of the following criteria:

- Undergraduate cumulative GPA of 3.25 and a B (3.0) average of higher in a minimum of 6 credits of quantitative coursework (on a 4.0 grading scale)
- Have earned a graduate and/or professional degree

- International applicants are also encouraged to submit GRE test scores and are required to submit scores from an English Language Proficiency Verification exam

Prerequisite courses required for admission:

Admission Requirements for the Department of Health and Human Development and School of Education. The admission requirements will be consistent with what is currently required for other Master of Science degree programs in the Department of Health and Human Development. These requirements include the following:

1. Applicants who possess an undergraduate degree in Exercise Science or a closely related field, or who can demonstrate foundational knowledge in key areas (human anatomy, human physiology, exercise physiology, exercise testing and prescription) are admitted to the Master of Science degree program provided that they meet all other School of Education admission requirements.
2. Applicants who do not possess an undergraduate degree in Exercise Science or a closely related field, or who cannot demonstrate foundational knowledge in key areas are provisionally admitted to the Master of Science Program provided that they complete coursework in the following areas prior to graduation from the Master of Science Program in the Department of Health and Physical Activity:
   a. Human Anatomy
   b. Human Physiology
   c. Exercise Physiology
   d. Fitness Assessment and Exercise Prescription

Academic Requirements

Students must complete courses in the appropriate order as outlined on the Plan of Study to be given permission to register for the appropriate courses in this degree.

School of Education Required Courses (9 credits):

- HHD 2380 - BEHAVIOR CHANGE AND HEALTH COACHING
- HHD 2386 - HEALTH AND PHYSICAL ACTIVITY PROMOTION AND MARKETING
- HHD 2322 - EVIDENCE BASED HEALTH PROGRAM PLANNING
  (A student's advisor may approve alternative courses based on availability)

School of Education Elective Courses (3 credits - select 1):

- HHD 2268 - PHYSICAL ACTIVITY AND HEALTH
- HHD 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH
- HHD 2381 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 1

The remaining credits are from Katz Business School and the courses are as follows:

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT

- BMIS 2409 - INFORMATION SYSTEMS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Total Credits: 30

Comprehensive Requirement

Students must complete a comprehensive assessment based on core skills and competencies prior to graduation. Students will be eligible for the comprehensive assessment near completion of 24 credits and typically will complete it in the spring semester.

Graduation Requirements

- 3.0 cumulative Pitt graduate GPA
- Successful completion of required courses
- Completion of comprehensive requirement

John A. Swanson School of Engineering

John A. Swanson School of Engineering

Overview

The SSoE catalog herein is a supplement to the Regulations Governing Graduate Study (RGGS). All rules therein apply, and deviations from the Regulations, as well as School-specific content, are below.

Graduate study in engineering at the Swanson School is designed for those professionals who wish to further develop the ability to apply engineering principles to the solution of modern society's problems. The programs are flexible and can be used by those interested in research, design, management, and related technical positions in both the public and private sectors. PhD programs are designed for those individuals interested in an academic or industry research career.

The Swanson School of Engineering offers graduate education leading to the Master of Science degree in bioengineering, medical product engineering, chemical engineering, electrical and computer engineering, civil engineering, industrial engineering, materials science and engineering, mechanical engineering, nuclear engineering, petroleum engineering, and sustainable engineering. Swanson School of Engineering MS degree programs have two tracks: a professional track and a research track. The school offers PhD degrees in bioengineering, chemical engineering, civil engineering, electrical and computer engineering, industrial engineering, materials science and engineering, and mechanical engineering as well as computational modeling and simulation. Also offered is a MD/PhD Program with the School of Medicine, a DPT/PhD program with the School of Health and Rehabilitation Sciences, MS/MBA and MS/MS programs with the Katz Graduate School of Business, and Certificate programs in medical product innovation, circular economy, construction management, health care systems engineering, nuclear engineering, physical metallurgy, and sustainable engineering.

Contact Information

The Swanson School of Engineering is housed in the Michael L. Benedum Hall of Engineering. Inquiries and correspondence concerning graduate study toward a PhD, MS, or graduate Certificate, should be addressed to the Graduate Program Coordinator of the appropriate department or program. Inquiries of a general nature can be sent to:

Associate Dean for Graduate Education
104 Benedum Engineering Hall
Swanson School of Engineering
Pittsburgh, PA 15261
E-mail: GradAD_ssoe@pitt.edu
www.engineering.pitt.edu

Admissions

All applicants will be judged on their own merits using a holistic process. GRE scores are not required for applications and admissions, but may be optionally submitted by students who want them included as part of their application package.

Depending on the program, applicants who do not have an engineering degree may have to take prerequisite courses as determined by the program to which the applicant is admitted before beginning their graduate engineering degree program. Applicants may be admitted provisionally until specified prerequisites are completed and/or a 3.000 grade point average is achieved.

Graduate Special Status - A student not currently enrolled at the University of Pittsburgh will be granted temporary admission, typically for at most a total of six graduate credits.. Graduate credits earned during this temporary admission period can be applied toward a graduate degree, with approval of the appropriate Graduate Program Coordinator and admission to a graduate program.

Admissions Procedures

1. Procedures for Admissions follow the requirements of the University of Pittsburgh, as outlined in the Regulations Governing Graduate Study (RGGS).

2. See the Swanson School of Engineering Web site to link to the online application. A fee is associated with the application and is not refundable. Requests for an application fee waiver should be submitted through the application fee waiver request form.

3. Per Regulations, official transcripts are required from all previously attended institutions. Official transcripts should be emailed to ssoeadministration@pitt.edu or mailed to the University of Pittsburgh; Swanson School of Engineering Office of Admissions; 104 Benedum Engineering Hall; Pittsburgh, PA 15261. An official transcript of the undergraduate record is required unless the applicant is a graduate of the University of Pittsburgh.

Once all application materials, including the application fee and complete transcripts, are received, the application will be reviewed. Application deadlines vary by department and program; details can be found here.

Additional Requirements for International Students

Please see the section on Graduate Admissions of International Students in this Catalog for additional University regulations on admissions.

This section also applies to international applicants who are already in the United States.

The Swanson School of Engineering does not require a formal evaluation of the international credentials, though these are welcomed and will assist in admissions review, if available.

Swanson School of Engineering minimum standards for English Proficiency are: TOEFL score of 81 or greater (before January 2026) or 4.5 composite, with listening of 4.5 or greater and all other subscores 4.0 or greater (after January 2026); IELTS score of 6.5 or greater; DuoLingo score of 120 or greater.

Prior to completion of registration for the first academic term, entering engineering graduate students with TOEFL scores below 100 (before January 2026) or 5.0 (after January 2026) on the iBT, below 7.5 on the IELTS, or Duolingo English Test Scores below 140 (or equivalent) may be required to register for additional English language coursework. International students who are citizens of countries where English is the official language, international students who have completed degrees at regionally accredited institutions in the U.S., and international students who have results on the TOEFL above 100 (before January 2026) or 5.0 (after January 2026) on the iBT, above 7.5 on the IELTS, or above 140 on the Duolingo English Test (or equivalent) may be exempted from taking the additional coursework.

Advisors

Three types of advisors are primarily responsible for guiding engineering students through their program:

Graduate Program Coordinator, Associate Chair, or Vice Chair

The Graduate Program Coordinator, Associate Chair, or Vice Chair is the faculty member responsible for the operation of a graduate program. The coordinator supervises the operations of admissions, registration, course scheduling, assignment of advisors, graduation, and academic disciplinary procedures. The graduate recruitment coordinator generally is the best source of information and advice when questions arise or problems are encountered during graduate study.

Faculty Advisor

Each student is assigned a faculty advisor when admitted into a graduate program, and the Faculty Advisor may be the Graduate Program Coordinator, Associate Chair, or Vice Chair for the department. This advisor assists the student in planning a course of study and is responsible for approving the student's registration and all course changes. Once the student begins thesis or dissertation research, the duties of the faculty advisor are typically assumed by the student's major research advisor(s).

Major Research Advisor(s)

The major research advisor (or advisors if joint advisors are designated) is the graduate faculty member who directs the student's research and supervises the preparation of the thesis or dissertation. Generally, the major advisor fulfills the role of faculty advisor and also serves as the chair of the final oral examination (defense) committee for the student's thesis or dissertation.

Registration

Students should work with their Faculty Advisor to register for courses each term during the enrollment period.

Responsibility for Academic Progress

It is the responsibility of students to check their academic progress by working closely with their Faculty Advisor and Graduate Program Coordinator, Associate Chair, or Vice Chair. The student should also become familiar with the program degree requirements and pertinent academic regulations, including department handbooks, this SSoE Graduate Catalog, the Regulations Governing Graduate Study (RGGS), and other policies maintained by the Provost's Office.

Academic Integrity and Code of Conduct

The integrity of the academic process requires fair and impartial evaluation on the part of faculty and honest academic conduct on the part of students. Students are expected to conduct themselves with a high level of responsibility in the fulfillment of their course of study and their conduct in and out of the classroom. Violations of the Academic Integrity Policy can impact a student's grade or status with the University; some serious or subsequent violations could lead to suspension or dismissal. Academic Integrity violations can also affect a student's eligibility for scholarships. It is the corresponding responsibility of faculty to make clear to students those standards by which they will be evaluated and the resources permissible for use by students during their course of study. The educational process is perceived as a joint faculty-student enterprise that will involve professional judgment by faculty and may involve, without penalty, reasoned exception by students to the data or views offered by faculty. Consistent with these considerations (and without limiting their scope and application in their entirety to the academic programs of the University), faculty and students are directed to observe established University of Pittsburgh and Swanson School of Engineering guidelines on academic integrity and the University Code of Conduct.

Academic Standing

The University's Academic Standing policy can be found here. Students on academic notice are not eligible to take the PhD preliminary evaluation or the MS or PhD comprehensive examination and will not be graduated. Students who are dismissed will not be re-admitted to the Swanson School of Engineering.

Allowable Credits

Course Work for Graduate Credit

Only graduate courses (i.e., 2000 or 3000 level courses) will count for graduate credit. Students may not use undergraduate courses taken at the University of Pittsburgh, or another university, to satisfy a graduate requirement.

Online Courses

Online courses are allowed only with the approval of the academic department Graduate Program Coordinator, Associate Chair, or Vice Chair, on a case by case basis. These courses must be:

1. Offered by an appropriate academic graduate program.
2. Suitable for the student's academic program and typically not available on the University of Pittsburgh campus.

Student must submit an official transcript of the course, with grade of 3.0 (B) or better, to be eligible for transfer credit.

Master of Science Programs

All departments in the Swanson School of Engineering offer MS degree programs that have two tracks: a professional (non-thesis) track and a research track. Some MS programs only provide a Professional track.

The professional MS track consists of 30 or more credits (10 courses). Advanced Standing credits are transferred at the discretion of the appropriate Graduate Program Coordinator, Associate Chair, or Vice Chair based on the actual course content and program requirements. These programs typically have a set of required core courses. As a professional degree, while no thesis or comprehensive examination is required, the department may require a special projects course.

The professional MS programs are oriented toward full-time students seeking a career in industry and part-time students currently working in industry. Certain programs may be offered off campus at industrial sites or online. Although students who have an undergraduate degree in a technical area (e.g., mathematics, physics, computer science, or chemistry) may be accepted, depending on the particular program, they may be required to take additional specified prerequisite courses. These prerequisite courses cannot be used to satisfy graduate course requirements. Interested students should contact the Graduate Program Coordinator, Associate Chair, or Vice Chair of their selected graduate program to discuss any additional coursework needs.

Research MS Track

The research track is intended for students who wish to deepen their knowledge of the research process, potentially continuing on to pursue the PhD. Students in this track will be advised to take courses best suited for a research degree. The MS research track requires a minimum of 24 course credits, depending on the selected degree, and at least six credits of thesis research. At the discretion of the appropriate Graduate Program Coordinator, Associate Chair, or Vice Chair, students may transfer graduate coursework from another graduate program to satisfy the course requirements of the Research MS degree, based on the actual course content and program requirements. The department may also specify credit distribution requirements for courses in the major and related areas. The student should see his or her major research advisor for detailed information. Students working under the MS research option are required to present a thesis that demonstrates marked attainment in some area of the student's major subject, as well as acquisition of the methods and techniques of scientific investigation. A comprehensive examination or equivalent is required, which is usually met through the final oral exam for the thesis.

A graduate student may commence MS thesis work only after obtaining full graduate status. A graduate student should initiate preliminary thesis and research work as early as possible. Once research and thesis work has begun, the student must register for thesis credits of research in each succeeding term until successful completion of the thesis and the final oral examination. Exceptions to this rule can be made only upon the recommendation of the student's major advisor, with approval by the Graduate Program Coordinator, Associate Chair, or Vice Chair. Only six credits of MS thesis may be used as partial fulfillment of the requirements for the MS degree.

MS Thesis Oral Examination (Defense)

The purpose of this examination is to evaluate the student's MS thesis and is part of the MS thesis requirements as specified by the program. For additional information on the thesis exam, see Thesis Option under Regulations Pertaining to Master's Degrees .

Electronic Thesis and Dissertation (ETD)

The ETD process requires the completion and submission of related documents to the Swanson School of Engineering Records Office at ssoeadministration@pitt.edu. Questions and problems can be addressed by contacting the School of Engineering Records Office at ssoeadministration@pitt.edu.

Joint MBA/MS Degree Program

The Swanson School of Engineering and the Joseph M. Katz Graduate School of Business have established joint MBA/MS (non-thesis) programs with each engineering Department graduate degree program and the sustainability program. These programs are designed to meet the clear and growing need felt by various industry sectors for managers with sophisticated business and engineering skills. In today's environment, such cross-functional skills are essential in addressing multifaceted problems involving issues related to product development, quality, information systems, modeling and quantitative analysis, finance and accounting, international relations, and marketing.

Both full-time and part-time options are available. The full-time option can be completed in two academic years, whereas the part-time option may typically require a period of four to five years. The programs generally consist of 57-58 credits. These programs are designed for students with undergraduate degrees in engineering and, in some cases, the physical sciences, preferably with industry work experience. Candidates must meet the admissions criteria of both the MBA program and the specific Professional (non-thesis) MS engineering program of interest.

Students accepted into the program will be expected to complete both degrees concurrently. Courses will be scheduled in such a manner as to preclude students from receiving one degree before the other. This program is only for those students seeking a Professional MS engineering degree. Students interested in the Research MS engineering degree track will not be admitted. Students who enroll in the joint degree program are expected to complete both degrees. Full-time students will register for the program through the Joseph M. Katz Graduate School of Business for four semesters; details can be found here.

Doctor of Philosophy Programs

The general PhD requirements of the Swanson School of Engineering are listed below. Further information concerning degree requirements and options can be found under each program's catalog description.

Entrance to the PhD Program

A graduate student who has received the Master of Science degree in one engineering program area or has equivalent preparation is eligible to enter a doctoral program in that same area. To be accepted for a doctoral program, a graduate student must have achieved a superior scholastic record and shown promise for conducting independent research. Evidence of research aptitude, including favorable recommendations, is required. Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree according to the established criteria and qualifications set by each Department.

Course and Dissertation Credit Requirements

An objective of the PhD program is to attain a high degree of competence in the student's chosen field of specialization. Completion of the PhD program requires a total of 72 credits, of which at least 30 must be for research. The graduate faculty determines the minimum course requirements for each PhD program. Typically, each program has a core of well-coordinated courses followed by advanced course work in one or more specialty areas, with the number of course credits varying among programs. Additional course work may be prescribed in accord with the student's specific needs. However, all PhD students must take a minimum of 24 credits of graduate level didactic coursework (2000 or 3000 level). A student may further attain the required degree of competence beyond these 24 credits by other means including independent study under faculty supervision. Regardless of how the required competence is obtained, it must be certified by passing the appropriate series of examinations.

Prior to completing the Comprehensive Examination (also referred to as the Dissertation Proposal), students register for preliminary dissertation research using a 3990 or 3997 course, as appropriate to the Department or Program. Upon passing the Comprehensive Exam, students are admitted to PhD candidacy and register for dissertation research (3999). The number of dissertation credits for which a student registers should be commensurate with the independent research effort to be undertaken during the term. Minimum registration is three credits per term. The program-specific number of research credits needed to complete the PhD degree (not less than 30) can be in any combination of 3980, 3990, 3997, 3998, and 3999 credits, as appropriate to the department and student status with regard to the comprehensive examination.

Once a student has completed the necessary 72 credits required for PhD study, the preliminary (qualifying) evaluation, and the comprehensive (proposal) exam, they are able to focus on their dissertation research. Doctoral students who are working full-time on their

dissertations should register for Full-Time Dissertation Study (FTD), which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee.

Doctor of Philosophy Evaluation/Examinations

To complete the PhD program, students must pass the preliminary evaluation, comprehensive, and final oral examinations. Students who have less than a 3.00 cumulative GPA for all courses that satisfy graduation requirements will be placed on Academic Notice. Students on Academic Notice are not permitted to take any of these examinations until their GPA is brought above 3.00.

Preliminary Evaluation (Qualifying Examination)

See Preliminary Evaluation under Regulations Pertaining to Doctoral Degrees for an overview of the purpose of this examination; school-specific information follows. This examination is usually taken within the first two to four terms of graduate study and is a first step towards the student's formal admission to candidacy for the Doctor of Philosophy degree. Each program determines the exact format and content of this examination, which may consist of written and oral components. Qualifier examinations are usually given once or twice a year at a time specified by the program.

Comprehensive Examination (Combined with the Dissertation Prospectus Meeting)

See Comprehensive Examination under Regulations Pertaining to Doctoral Degrees for an overview of the purpose and regulations of this examination; school-specific information follows. The nature and timing of this examination is determined by the department; it may be combined with students' formal presentation of their dissertation proposal, in which case student readiness and the support of the Major Advisor are recommended. The Comprehensive Examination cannot be taken until at least one full term after successfully completing the Preliminary Examination. The formal thesis proposal should be scheduled as soon as the candidate is prepared to present his/her topic and research plan, and it is recommended that this exam be completed no later than the fourth academic year of study.

Final Oral Examination (Defense)

See Final Oral Examination under Regulations Pertaining to Doctoral Degrees for an overview of the purpose and regulations regarding this examination; school-specific information follows. This examination cannot occur sooner than two full terms following the formal dissertation proposal. The final oral examination determines the acceptability of a student's dissertation and the student's ability to comprehend, organize, and contribute to the chosen field of research. One copy of the dissertation must be submitted to each member of the doctoral committee at least two weeks before the date set for the final oral examination. Because a portion of the defense is open to the public, the student should ensure that the dissertation defense is formally announced at least two weeks prior to the defense date.

Doctoral Committee

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees for an overview of the committee's make up and responsibilities. In addition, the following school-specific rules apply in the Swanson School of Engineering:

Faculty who hold a secondary appointment and actively participate in the department will be considered as internal rather than external members of the doctoral committee. Hence, they may serve as the major advisor. Faculty members whose secondary appointment within the department is viewed as a courtesy appointment may be considered as an external committee member but cannot serve as the student's sole committee chair (major advisor).

The composition of the Doctoral Committee must be approved by the department's Graduate Program Coordinator, Associate Chair or Vice Chair, and the Associate Dean for Graduate Education, prior to the presentation of the formal dissertation proposal. This committee will consist of at least three internal (from the department) and at least one external members. The majority of the members must be primary or secondary faculty in the Swanson School of Engineering, In certain cases, the Graduate Program Coordinator, Associate Chair, Vice Chair, or Associate Dean for Graduate Education may recommend one or more additional members for the committee, if appropriate.

A major advisor has an obligation to assist the student to the successful completion of his/her dissertation. In those rare cases where the major advisor no longer feels that he/she can adequately work with the student, then it is incumbent upon the Department Chair and Graduate Program Coordinator, Associate Chair, or Vice Chair to meet with the committee and, if it is decided that the student is able to complete the dissertation, select a new major advisor, typically from among the remaining members of the committee. A replacement committee member must also be appointed.

Admission to PhD Candidacy

See Admission to Candidacy for the Doctor of Philosophy Degree under Regulations Pertaining to Doctoral Degrees for the requirements for admission. An Application for Admission to Candidacy for the Doctoral Degree must be filed after these requirements have been met.

In order to have the dissertation topic approved, the student must prepare, in consultation with their major advisor(s), a dissertation proposal. A formal dissertation proposal conference will then be held in which the members of the doctoral committee will review the proposal and either unanimously accept, revise, or reject it. Depending on the department's procedure, this conference may be held in conjunction with the comprehensive examination. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal.

When the dissertation proposal is unanimously accepted by the doctoral committee, the student is formally admitted to candidacy for the Doctor of Philosophy degree. Such admittance to PhD candidacy must be accomplished at least two terms before the student plans to graduate.

PhD Dissertation

See Dissertation and Abstract for an overview of these requirements; school-specific information follows. Each student must prepare a dissertation embodying an extended original, independent investigation of a problem of significance in the student's field of specialization. The dissertation must add to the general body of knowledge or understanding of that field. Dissertations must be written in English. It is highly recommended that the student use a plagiarism-detection software (e.g., iThenticate) to ensure that no plagiarism, which is considered research misconduct, has been committed, overtly, covertly, or inadvertently.

A dissertation submitted to the Swanson School of Engineering in partial fulfillment of the requirements for an advanced degree must be free from any restriction, other than the author's copyright, concerning its publication by any agency outside the University. Any publication of a dissertation must be with appropriate acknowledgment to the University of Pittsburgh. After the dissertation has been prepared and approved by the major advisor, the final oral examination can be held.

Electronic Thesis and Dissertation (ETD)

In addition to the requirements outlined under Dissertation and Abstract, the ETD process also requires the completion and submission of related documents, all of which can be turned in via email to the Swanson School of Engineering Records Office at ssoeadministration@pitt.edu. Questions and problems can be addressed by contacting the School of Engineering Records Office at ssoeadministration@pitt.edu.

Departmental Requirements

The policies enumerated above represent minimum requirements. In certain cases, individual departments may have stricter requirements. It is the ultimate responsibility of the student to understand the policies/requirements of their graduate program; questions should be directed to their Graduate Program Coordinator, Associate Chair, or Vice Chair.

Computational Modeling and Simulation PhD Program

The Computational Modeling and Simulation (CMS) PhD Program at the University of Pittsburgh provides its graduate students with an integrated program of creative, independent research, course work, and teaching. Our students pursue research in diverse areas of engineering and sciences with concentration on numerical methods and computational schemes. Coupled with the University Center for Research Computing (www.crc.pitt.edu), this program offers unparalleled opportunities for individualized training in high performance computing and physical modeling. An extensive seminar series exposes students and faculty alike to the world's leading scientists and their latest research. Pitt's outstanding research and placement resources, coupled with the university's commitment to being one of the top

centers for computational research, uniquely positions us to help our PhD candidates to meet their objectives. For a review of our PhD Program in CMS, and application to this program, please see: www.cmsp.pitt.edu

Joint MD/PhD Degree Program: Medical Scientist Training Program

The Medical Scientist Training Program (MD/PhD) offers exceptionally talented individuals the opportunity to undertake a physician-scientist training program tailored to their specific research interests. This program is funded partly by the Medical Scientist Training Program of the National Institutes of Health. For students who have a clearly defined interest in biomedical research, the MSTP serves as a bridge between the University of Pittsburgh School of Medicine and 20 graduate programs in basic sciences or engineering at either the University of Pittsburgh or Carnegie Mellon University. During a period of seven to eight years, these individuals meet the degree requirements of both a graduate school and the medical school, thus acquiring the knowledge, skills, and experience to begin careers in some of the most exciting areas of medical research. More information can be found here or by contacting the MD/PhD program at M246 Scaife Hall, mstp@medschool.pitt.edu, 412-648-2324.

Cooperative Education

With the renewed emphasis on professional master degree programs and the development of such initiatives as the MS/MBA, and 3+1+1 (first three years at a home institution, a fourth year at the SSoE to earn the BS degree, and a fifth year at the SSoE to earn an MS degree) programs, there is a strong need to provide graduate students, including international graduate students, with a work opportunity that is an essential part of their education. This also includes PhD students who desire to take a term away from their research in order to obtain industrial experience and perspective via an industrial internship. Not only does the program provide graduate students with needed experience, but it enables them to earn a reasonable amount of money over a 12-16 week work rotation. For more information, please visit https://www.engineering.pitt.edu/coop/.

Swanson School of Engineering Faculty

School of Engineering Faculty

Contact information and research interests of faculty members can be found on the Swanson School of Engineering faculty page.

Program and Course Offerings

Joint Degree

Computational Modeling & Simulation, PhD

Requirements

Course Requirements

http://cmsp.pitt.edu/course-requirements

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming

3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 30 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the he program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Proposal Presentation and Comprehensive Exam

The proposal presentation and comprehensive exam will be taken by the end of the student's seventh semester at Pitt and will focus on the progress that the student has made to date on his/her research. It will consist of a written report/proposal prepared by the student on his/her research, followed by an oral comprehensive examination. The exam will be administered by the doctoral committee of four graduate faculty members, three of whom are affiliated with the CMS program and at least one of whom will be from outside the student's research department. Beyond the four graduate faculty members, the student may add external committee members from outside the graduate faculty.

If a student does not pass the proposal presentation and comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis Defense

Every graduate student has to write and defend a thesis or dissertation before being awarded a MS or PhD degree. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Master's

Sustainable Engineering, MSSE

Overview

The Master of Science Degree in Sustainable Engineering (MS SE) is housed within the Mascaro Center for Sustainable Innovation (MCSI), with the degree granted from the Swanson School of Engineering. The 30-credit degree was designed to integrate with current MS programs in engineering, providing students with the opportunity to complete two MS degree programs with a limited time increase.

Program Objectives

- Provide advanced education to graduate students to identify and solve sustainability issues using systems approaches in the context of the triple bottom line of environmental, societal, and economic problems.
- Create a rigorous program with breadth and depth to propel graduate students to foster sustainable technologies, science, and practices in the U.S. and abroad.

- Create regional and nationally scalable sustainability solutions through service learning projects with a cohort of students.
- Provide students with experiences that enable them to communicate sustainability issues and solutions to multiple audiences.

For more information or to create a plan of study, please contact the Program Director:

David Sanchez
153 Benedum Hall
david.sanchez@pitt.edu

Course Requirements

A total of 30 credits are required to earn the MS SE professional master's degree. The degree is structured so the participating student is required to take five core courses and five electives.

The five core courses are as follows:

- ENGR 2905 - CURRENT ISSUES IN SUSTAINABILITY
- CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
- CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT
- ENGR 2007 - SUSTAINABILITY CAPSTONE

And choose one of the following:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: LOCAL & GLOBAL
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT
- BSEO 2578 - SUSTAINABLE BUSINESS STRATEGY
- BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT IN THE ERA OF GLOBALIZATION, INNOVATION AND ESG
- Students may propose other elective courses from the Graduate School of Public and International Affairs (GSPIA) or the Joseph M. Katz Graduate School of Business (KGSB) to be approved by the Program Director.

Electives:

Students can choose five electives from the areas below. Students may propose other elective courses and other focus areas (tracks) not listed below to be approved by the Program Director.

Sustainable Built Environment & Infrastructure

- CEE 2370 - NONDESTRUCTIVE EVALUATION
- CEE 2340 - DESIGN OF CONCRETE STRUCTURES
- CEE 2720 - URBAN TRANSPORTATION PLANNING

Energy

- ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY
- ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS
- ECE 2795 - SPECIAL TOPICS POWER
- ECE 2250 - POWER ELECTRONICS
- ECE 2646 - LINEAR SYSTEM THEORY

- ECE 2774 - COMPUTER ANALYSIS OF POWER SYSTEMS

Environmental and Water Sustainability

- CEE 2410 - WATER RESOURCES ENGINEERING
- CEE 2500 - ENVRNMNTL ENGRG MICROBIOL
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING
- CEE 2515 - WATSTEWATER COLLECTWASTEWATER COLLECTION AND TREATMENT PLANT DESIGNION AND TREATMENT PLANT DESIGN

Green Computing

- ECE 2160 - EMBEDDED COMPUTER SYSTEM DESIGN
- ECE 2161 - EMBEDDED COMPUTER SYSTEM DESIGN 2
- ECE 2192 - INTRODUCTION TO VLSI DESIGN
- ECE 2193 - ADVANCED VLSI DESIGN
- ECE 2162 - COMPUTER ARCHITECTURE 1
- ECE 3162 - ADVANCED COMPUTER MICROARCHITECTURE

Department of Bioengineering

Contact Information

Department Chair: Sanjeev Shroff, PhD
Main Office: 302F Benedum
412-624-9809
E-mail: sshroff@pitt.edu
https://www.engineering.pitt.edu/bioengineering/

Graduate Degree Programs

The Department of Bioengineering offers three graduate degrees: (1) Doctor of Philosophy (PhD) in Bioengineering, (2) Master of Science in Bioengineering (MS), and (3) Master of Science in Bioengineering - Medical Product Engineering (MS-MPE). The department also offers a certificate program in Medical Product Innovation. In addition, it participates in the MD/PhD program with the School of Medicine's Medical Scientist Training Program, the DPT/PhD program in Physical Therapy with the School of Health and Rehabilitation Sciences, and the MBA/MS program with the Katz Graduate School of Business.

The graduate program in bioengineering incorporates six programmatic tracks that are used for our PhD degree and thesis-based MS degree:

- Bioimaging and Signals
- Biomechanics
- Medical Product Engineering*
- Molecular, Cellular, and Systems Engineering
- Neural Engineering**
- Tissue Engineering and Regenerative Medicine

* This track has separate tracks for the MS and PhD.

** The department also offers a non-thesis MS degree whose curriculum focuses on neural engineering.

The department has an active, interdisciplinary graduate bioengineering program in conjunction with faculty from the School of Medicine, the School of Health and Rehabilitation Sciences, the School of Dental Medicine, the clinicians at the University of Pittsburgh Medical Center hospitals, and other schools and departments at the University of Pittsburgh and Carnegie Mellon University.

The graduate program is directed toward engineering and life science education and research, with particular emphasis on the PhD and the non-thesis Master's degrees. Its scope is broadly defined to incorporate the application of engineering principles, methods, and technology in two general areas: (1) scientific queries into fundamental biological phenomena and (2) the development of instrumentation, materials, devices, and systems relative to application in the biological sciences and medicine. Thus, the bioengineering faculty are applying various forms of engineering principles, mathematics, computation, technology, and methodology to a broad variety of medical and life sciences problems.

Admissions

An undergraduate knowledge of physiology and basic biology and chemistry is assumed. In addition to the above basic requirements, evidence of significant research and/or industrial experience is relavent evidence of ability to perform well at the graduate level. These experiences should be detailed clearly in recommendation letters, as well as in the student's statement of purpose.

Certificate

Bioengineering - Medical Product Innovation Certificate

Requirements

The Graduate Certificate in Medical Product Innovation (C-MPI) is offered by the Department of Bioengineering in conjunction with the Center for Medical Innovation (CMI). The program provides graduate-level education in the clinical, engineering, business, and legal aspects of medical product design, development, and commercialization. The certificate is open to students enrolled in any graduate program at the University of Pittsburgh as well as post-baccalaureate and post-professional students and working professionals.

Certificate candidates must complete a minimum of 5 courses (15 credits) drawn from the following areas:

Medical Product Innovation Core Curriculum - 6 credits

Per approval by program director

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT (Prerequisite: BIOENG 2150 or approval by program director)

Electives - 9 credits

Select 3 credits from each of the following subgroups:

Medical Ethics

Per approval by program director - 3 credits

- BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC
- BIOETH 2001 - ETHICS AND AGING
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS

- BIOETH 2664 - BIOETHICS
- BIOETH 2698 - SPECIAL TOPICS
- CMU 80245 - MEDICAL ETHICS
- LAW 5464 - BIOETHICS AND LAW
- LAW 5980 - ETHICAL ISSUES IN CLINICAL CARE
- NUR 2308 - ETHICAL AND SOCIAL IMPLICATIONS OF BIOTECHNOLOGY

Entrepreneurship/Engineering Management

Per approval by program director - 3 credits

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION
- BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES
- BSEO 2531 - ENTREP & NEW VENTURE INITIATION
- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
- CLRES 2730 - FROM BENCHTOP TO BEDSIDE
- IE 2003 - ENGINEERING MANAGEMENT
- IE 2123 - PROJECT MANAGEMENT
- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES

Legal Aspects of Medical Product Engineering

Per approval by program director - 3 credits

Consistently Offered Course:

- BSPP 2110 - SCALING INNOVATION STUDIO
- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES

Inconsistently Offered Courses (Confirmation Needed):

- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5155 - EHEALTH LAW
- LAW 5210 - PATENT LAW (This is a 2-credit course; if selected as an elective, 1 additional credit is needed to meet the 15-credit requirement for this certificate.)
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5395 - HEALTH LAW AND POLICY
- LAW 5631 - LAW AND ENTREPRENEURSHIP
- LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP

Alternative courses permitted per approval by program director.

Note:

Post-baccalaureate and post-professional students and professionals interested only in obtaining the C-MPI need to apply to the Department of Bioengineering for admission to the Certificate program.

Graduate students and professionals who are already enrolled in a Swanson School of Engineering program may add the certificate to their degree without a separate application. They can email msmpe@pitt.edu to start the process. Graduate students from other schools at the University of Pittsburgh and professionals from outside the University must submit a separate application through EngCAS to enroll in the certificate.

Doctoral

Bioengineering, PhD

PhD Requirements

The course requirements for the PhD in Bioengineering include the following:

- Graduate Engineering Mathematics (from an approved list of Math courses) - 3 credits
- Statistics for Bioengineers (from an approved list of Statistics courses) - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (BIOENG 2241 or equivalent) - 3 credits
- Life Sciences (from an approved list of Life Science courses) - 6 credits
- Track Courses (from a menu of courses for specific track, please see the links below)
    - Bioimaging and Signals Track - 12 credits
    - Biomechanics Track - 9 credits
    - Medical Product Engineering (MPE) - PhD Track - 9 credits
    - Molecular, Cellular, and Systems Engineering (MCSE) Track - 9 credits
    - Neural Engineering (NE) Track - 9 credits
    - Tissue Engineering and Regenerative Medicine (TERM) Track - 9 credits
- Graduate Electives - 3 credits for Bioimaging and Signals Track; 6 credits for all other tracks. These can be any courses in science or engineering that are deemed useful for the student's career with the approval of the Graduate Program Director.
- BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP (grant writing) - 1 credit
- Seminar - 6 credits total, 4 credits must be BIOENG 2023 - BIOENGINEERING SEMINAR SERIES. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 - must meet the minimum number of credits required by the Swanson School of Engineering; generally, students take 35 or more research credits

Total number of credit hours: 72 credits minimum (not including credits from foundational courses, if applicable.)

Students typically take the PhD preliminary exam after their first year in the program, and PhD proposal (comprehensive examination) is presented generally by the middle of the third year. A final public PhD defense is made by each PhD candidate based on the student's research work.

Preliminary Exam

The PhD Preliminary Exam is given once a year, typically in early June, and is to be taken by students pursuing the PhD degree after their first two semesters of full-time course work. A student is allowed no more than two opportunities to take the preliminary examination.

The purpose of the preliminary examination is to evaluate the student's ability to use fundamental principles of biomedical science and engineering approaches to investigate solutions to bioengineering problems. The exam tests the student's ability to think, present, and defend in an academic environment, as well as demonstrate a sufficient background in the biomedical science and engineering aspects of the chosen problem. It explores a student's strengths, weaknesses, and breadth of knowledge in relation to the proposal as well as assesses the student's potential to become an independent investigator. The examinations will be coordinated within the current graduate tracks. The scheduling will be handled by the track coordinators, who will also determine the suitability of the research question (having both engineering and biomedical science components).

The basis of the examination is a specific research question (problem), chosen by the student and communicated through both written and oral formats. The written proposal conforms to the NIH R03 grant format. The oral presentation focuses on presenting and defending the proposed research question and the approach to its solution. The student is encouraged to focus on one to two experiments and note both alternatives and potential limitations in each experiment. Proper referencing of sources is required for both the oral and written components. The research proposal may be supported by preliminary data, but this is not a requirement. The student may seek assistance from their advisor or any other faculty member for choosing the question but must observe the usual strict standards on plagiarism. In

addition, students must provide a written statement, signed by their advisor, that clarifies the student 's contribution in developing and writing the proposal.

The final result of the preliminary examination will be based on the combined evaluation of the written and oral components, with three possible outcomes: unconditional pass, conditional pass, retake (during the first attempt), and fail (during the second attempt). Conditional pass will be accompanied by specific corrective actions, such as remedial courses to be taken by the student. A minimum of B grade must be achieved in each condition-contingent course; otherwise, the conditional pass is converted to a retake or fail outcome. The retake option is available for the first exam, allowing the candidate to retake the Preliminary Exam one additional time in the following year. During the second attempt, a fail outcome is assigned in cases where a student does not meet the threshold for an unconditional pass or a conditional pass. Students receiving a fail outcome cannot continue on in the PhD program.

Dissertation Committee Selection

In addition to dissertation committee requirements specified in the Regulations Governing Graduate Study (RGGS), the Department of Bioengineering requires that: (1) the majority of the committee must hold either primary or secondary appointment in Bioengineering, and (2) at least one committee member must have a primary appointment in Bioengineering. Regarding the RGGS requirement for an external committee member, note that industry members who are not affiliated with a graduate degree-granting institution do not count toward the external member requirement for the committee. Students are required to receive approval from the faculty Graduate Program Director of the committee, ideally 1-2 months prior to the proposal defense.

PhD students are advised to form and meet with a PhD Dissertation Committee within one year of passing the Preliminary Exam and no later than the end of their third year in the PhD program.

PhD Proposal and Comprehensive Exam

Formal admission to candidacy for the Doctor of Philosophy degree (typically in the 3rd year) constitutes a promotion of the student to the most advanced stage of graduate study. **Note that it is a departmental requirement that students complete their proposal by the end of their third full year in the program.** The student should submit the written proposal in NIH R01 format to the committee at least two weeks in advance of the oral defense to the approved committee. The approval of the proposal and defense of it constitutes passing the proposal and Comprehensive Examination.

Dissertation Defense and Graduation

Students must announce their dissertation defense at least two weeks prior per department instructions. For all other defense and graduation requirements, students should refer to SSoE guidelines.

Joint Degree

Bioengineering, MD/PhD

MD/PhD Requirements

The Department of Bioengineering participates in the University of Pittsburgh's Medical Scientist Training Program (MSTP), which governs admissions and the MD curricular requirements for MD/PhD students. This page specifies the Bioengineering PhD component requirements for MSTP students who choose to pursue their PhD through the Department of Bioengineering. The Department of Bioengineering allows some coursework to concurrently satisfy requirements for the MD and PhD degree. We typically accept medical school coursework to fulfill the life science (6 credits), elective (6 credits), and grant writing workshop (1 credit) requirements. MD/PhD students cannot use their MD courses to opt out of the advanced engineering/math/statistics course requirements for the PhD:

- Track Courses (from a list of approved courses for specific tracks) - 9 credits*
- Life Sciences (fulfilled by passing all components of MED 5218 or equivalent) - 6 credits

- Graduate Electives (fulfilled by passing all components of MED 5116 or equivalent) - 6 credits*
- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Ethics - 3 credits. The department does not enforce the 3-credit ethics requirements for MD/PhD students if they have acquired this knowledge through their medical school education. Note that these three credits are not waived. Students must acquire these three credits through another course (didactic or graduate project).
- Seminar - 6 credits total, 4 credits must be BIOENG 2023 - BIOENGINEERING SEMINAR SERIES. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP (grant writing) - 1 credit. The department does not enforce this 1-credit requirement for MD/PhD students if they have acquired this knowledge through their medical school education. Note that this 1 credit is not waived. Students may acquire the credit through research credits.
- Students should refer to SSOE policy regarding the minimum number of dissertation credits (BIOENG 3997 and BIOENG 3999) required for graduation.

* The standard policy is 9 credits of track courses and 6 credits of electives. There is an exception for the Bioimaging and Signals track, for which the requirement is 12 credit of track courses and 3 credits of electives. MD/PhD students in this track must take all four track courses.

Total number of credit hours: 72 credits minimum, which includes 12 credits to fulfill the life science and electives requirements but does not include credits from other courses that are part of the MD degree.

Please see Department of Bioengineering's PhD Requirements page for more details.

Bioengineering/Business Administration, MS/MBA

The Department of Bioengineering and the School of Business (KGSB) offer a dual MBA/MS program, with the following requirements for the Professional MS in Bioengineering.

Joint Degree

Students may pursue a joint degree program that results in an MBA from the School of Business and an MS Engineering degree from the Swanson School of Engineering. MS Engineering degrees can be completed in the following disciplines: Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, Materials Science and Engineering, Mechanical Engineering, Nuclear Engineering, Sustainable Engineering, Industrial Engineering.

Note

Joint-degree students take a minimum of 30 credits from the School of Engineering and 33 credits from the School of Business. Students must graduate from both schools at the same time.

Candidates must complete a minimum of 11 courses (30 credits) [25.5 engineering credits] drawn from the following areas:

Graduate Engineering Math or Statistics - 3 credits

Per approval by program director

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT

Medical Product Engineering Core Curriculum - 15 credits

Per approval by program director

- BIOENG 2150 - MEDICAL PRODUCT IDEATION

- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT (Prerequisite: BIOENG 2150 or approval by program director)
- BIOENG 2152 - MEDICAL PRODUCT PROTOTYPING I *
- BIOENG 2170 - CLINICAL BIOENGINEERING (Prerequisite: BIOENG 2150 or approval by program director)
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING 2 (Prerequisite: BIOENG 2170 or approval by program director)

  *Student has the option to test out of this class with appropriate previous knowledge. Please contact Graduate Program Director for details.

Graduate Engineering/Science Electives - 9 credits

Per approval by program director

- 1st Graduate Engineering/Science Elective
- 2nd Graduate Engineering/Science Elective
- 3rd Graduate Engineering/Science Elective (if tested out of BIOENG 2152)

Medical Ethics - 3 credits

Per approval by program director

- BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC

MBA/MS Project Courses - 3 credits

Per approval by program director

- Students are required to complete an integrated project. Students have the following two options to satisfy this requirement:
  - BIND 2024 - CONSULTING FIELD PROJECT or
  - BIND 2200 - INTEGRATED PROJECT FOR MBA/MS IN ENGINEERING PROGRAM
- BIOENG 2095 - GRADUATE PROJECTS or BIOENG 2250 - CARDIO CLINICAL INTERNSHIPS

Bioengineering Seminar - 0 credits

BIOENG 2024 is a required, zero-credit seminar focused on career development for students in the Professional MS program. It is required for 1 Fall and 1 Spring semester.

MBA Degree Requirements - 33

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 6 elective credits of School of Business courses.

Joint Project Course

Students are required to complete a 3-credit joint project course that integrates the business and engineering disciplines. Common courses used to meet this criteria are BIND 2024 or BQOM 2139. In cases where the 3-credit course completed is a School of Business course, 1.5 credits will count toward the MBA requirements and 1.5 will count toward the 30 credits of MSE requirements.

Total Number of Credits for Joint Degree: 63

Note:

All students must maintain a 3.0 GPA at all times to remain in good standing in the program.

Physical Therapy/Bioengineering, DPT/PhD

Program Overview

The Doctor of Physical Therapy (DPT) - PhD in Bioengineering program combines the entry-level DPT leading to licensure as a physical therapist, with a PhD in Bioengineering that will prepare the student to become an independent researcher.

Contact Information

Patrick Sparto, PhD, PT
Co-Director, DPT-PhD Program
Department of Physical Therapy
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
Phone: 412-383-6732
E-mail: psparto@pitt.edu

Application Process

The application opens in mid-June and will need to be submitted through the PT Centralized Application Service (PTCAS) by December 1 for admission to the program the following August. The application is reviewed by faculty in both departments.

Admission Requirements

Students will need to meet the admission requirements of both programs.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

Students will need to meet the prerequisite requirements of both programs.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Hanbook and the Doctor of Physical Therapy Student Handbook.*

Curriculum Overview

Students will follow the typical plan of study for DPT residential students for the initial seven terms (i.e., 2.3 years) of the program. Then students will follow the plan of study for PhD students in Bioengineering. Clinical internships and research experiences will be performed throughout the program. At a minimum, the program will take 6 years to complete. After completing the didactic and clinical requirements of the DPT program, the student will be allowed to take the licensing exam. Students are required to write and orally defend a dissertation to complete their PhD degree.

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development,and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence basedpractice and includes a comprehensive array of course off erings in musculoskeletal, neuromuscular, integumentary,cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development. The first 5 terms are comprised of both didactic instruction as well as two full-time clinical education experiences that are a duration of 6 weeks. The curriculum concludes with two 15-week terminal clinical educational experiences (Summer-Fall). The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program.

PhD Requirements

The Department of Bioengineering follows university guidelines on students working toward joint degrees like the DPT-PhD in Bioengineering. Typically, we have waived the life science requirement (6 credits) as comparable coursework is covered in the physical therapy curriculum. The remaining course requirements closely follow requirements for the PhD in Bioengineering.

- Bioengineering Track Courses - 9 credits*
- Life Sciences (successfully completing the lecture and lab components of Human Anatomy coursework fulfills this requirement) - 6 credits
- Graduate Electives (successfully completing Musculoskeletal I & II fulfills this requirement) - 6 credits*
- Graduate Engineering Mathematics - 3 credits
- Statistics for Bioengineers - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (or equivalent bioethics course) - 3 credits
- Seminar - 6 credits total, 4 credits must be BIOENG 2023 - BIOENGINEERING SEMINAR SERIES. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP (grant writing) - 1 credit
- Students should refer to SSOE policy regarding the minimum number of dissertation credits (BIOENG 3997 and BIOENG 3999) required for graduation.

*The standard policy for PhD students is 9 credits of track courses and 6 credits of electives. There is an exception for the Bioimaging and Signals track, for which the requirement is 12 credits of track courses and 3 credits of electives. DPT-PhD students in this track must take all four track courses, in which case only 3 elective credits are waived.

Total number of credit hours: 72 credits minimum, which includes 6 credits to fulfill life science requirement but does not include credits from foundational courses if applicable.

DPT/PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department.

Please see the Department of Bioengineering's PhD Requirements page for more details.

Master's

Bioengineering, MS

Students interested in pursuing a Master of Science in Bioengineering have two options:

1. **"Research MS" program**: This is a thesis-based program in which the student completes a combination of didactic coursework and, under the mentorship of an advisor, performs and defends a scholarly thesis project.

2. **"Professional MS" program**: This is a non-thesis-based program in which the student completes didactic coursework related to focused technical areas (biomechanics; data science, imaging, and sensors; molecular, cellular, and systems engineering; neural engineering; tissue engineering and regenerative medicine).

MS Bioengineering (Research or Thesis Track) Requirements

The course requirements for the MS in Bioengineering (research/thesis track) include the following:

- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Societal, Political and Ethical Issues in Bioengineering (BIOENG 2241 or equivalent) - 3 credits
- Life Sciences (from a list of approved Life Science courses) - 3 credits
- Track Courses (from a list of approved courses for specific tracks) - 9 credits
- Elective Course - 3 credits
- BIOENG 2999 - M.S. THESIS - 6 credits
- Bioengineering Seminar (BIOENG 2023) - 3 semesters

Total number of credit hours - 30 credits (not including seminar credits, and in addition to credits from foundational courses, if taken). Other required courses may be tailored to the student's background and interests.

The student (under the guidance of their advisor) selects a thesis committee that consists of three faculty members and at least two need to be members of the Bioengineering faculty. The third member can also be a Bioengineering faculty, although an outside member is recommended. The student's advisor will act as Chairman of this committee. The committee meets at least once per year and oversees the Thesis Defense.

MS Bioengineering (Professional or Non-Thesis Track) Requirements

The curriculum in the non-thesis program of graduate education prepares students to work in the exciting and dynamic field of Bioengineering in focused technical areas (biomechanics; bioimaging and signals; molecular, cellular, and systems engineering; neural engineering; tissue engineering and regenerative medicine), as well as in the area of CARE (Clinical Adoption, Realization and

Engineering) in collaboration with the School of Nursing. The concentrations for core competency will be selected in consultation with the program director and will take into consideration the student's previous training and career aspirations.

The course requirements for the MS in Bioengineering (professional/non-thesis track) include the following:

- 12 credits in Concentration 1
- 9 credits in Concentration 2
- 3 credits in life science
- 3 credits in medical ethics
- 3 credits in mathematics/statistics

Total number of credit hours - 30 credits (not including seminar requirements, and in addition to credits from foundational courses, if taken). All students must maintain a 3.0 GPA at all times to remain in good standing in the program. All non-thesis MS students will also register for a zero-credit seminar (BIOENG 2024) that focuses on career development.

Medical Product Engineering, MS-MPE

The Master of Science in Bioengineering - Medical Product Engineering (MS-MPE) is a non-thesis professional degree program administered by the Department of Bioengineering. The program prepares students for careers in the healthcare industry through coursework in medical product design and development, entrepreneurship, regulatory processes, and commercialization. Although the program is primarily directed toward students with an undergraduate engineering background, individuals with a strong quantitative background in a STEM discipline are also eligible. The MS-MPE curriculum also satisfies the engineering degree requirements for the joint MBA/MS program offered through SSOE and the Katz Graduate School of Business.

I. Five Required (Core) Courses: 15 credits

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT (Prerequisite: BIOENG 2150 or approval from the Director of Professional MS Programs)
- BIOENG 2152 - MEDICAL PRODUCT PROTOTYPING I *
- BIOENG 2170 - CLINICAL BIOENGINEERING (Prerequisite: BIOENG 2150 or approval from the Director of Professional MS Programs)
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING 2 (Prerequisite: BIOENG 2170 or approval from the Director of Professional MS Programs)

  *Student has the option to test out of this class with appropriate previous knowledge. Please contact the Director of Professional MS Programs for details.

II. One Required Biomedical Ethics Course: 3 credits

Students will be expected to enroll in "Societal, Political, and Ethical Issues in Biotechnology" (BIOENG 2241), which is offered both semesters by the Department of Bioengineering. In the event of class conflict, students can enroll in a course offered by another department (e.g., Bioethics) with the approval of the Director of Professional MS Programs.

III. One Required Math/Stats Course: 3 credits (choose one course from the approved lists of graduate level math and statistics courses):

Approved Math Courses

Approved Statistics Courses

Another option that may be well-suited for MS-MPE students is:

- BIOENG 2351 - BIOSIGNAL ACQUISITION AND ANALYSIS

Prerequisites: None

Description: This course is designed to teach you programming in the context of real-world tasks that you will likely encounter in future academic or industrial work.

IV. Elective Courses relevant to Medical Product Engineering curriculum (per approval by program director): 9 credits of Advanced Engineering/Science courses (12 credits if tested out of BIOENG 2152)

Students can take any program relevant 2000+ level courses as electives. Since program students can explore and examine all facets of the medical product engineering process from ideation to prototyping to clinical evaluation, the following list of elective courses, which have been offered one or more times since Fall 2011, are highly appropriate for graduate study in Medical Product Engineering.

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION
- BIOENG 2173 - MEDICAL DESIGN FOR LOW RESOURCE ENVIRONMENTS
- BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES
- BIOENG 2230 - CARDIO ORGAN REPLACEMENT
- BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
- BIOENG 2385 - ENGINEERING MEDICAL DEVICES FOR QUANTITATIVE IMAGE ANALYSIS AND VISUALIZATION
- BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING
- BIOENG 2601 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS
- BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR
- BIOENG 2811 - MICROFABRICATION AND CHARACTERIZATION OF NEURAL INTERFACE DEVICES
- BIOENG 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS
- ENGR 2460 - ADVANCED SCIENTIFIC VISUAL COMMUNICATION
- ENGR 2017 - MANUFACTURING FOR THE FUTURE: FLEXIBLE, GREEN, AND DIGITAL
- ENGR 2051 - PRODUCT REALIZATION
- ENGR 2080 - INNOVATING FOR COMMERCIAL IMPACT
- IE 2003 - ENGINEERING MANAGEMENT
- IE 2011 - FUNDAMENTAL OF MICRO AND NANOMANUFACTURING
- IE 2023 - INTRODUCTION TO MEDICAL PRODUCT DEVELOPMENT
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2106 - OPERATIONS IMPROVEMENT IN HEALTHCARE
- IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
- IE 2123 - PROJECT MANAGEMENT
- IE 2188 - SIMULATION MODELING AND APPLICATIONS
- IE 2303 - WORK DESIGN

V. One Rotation of Co-op/Internship: 0-3 credits

A minimum of one rotation of individually arranged co-op/internship is required. The co-op/internship requirement may be paid or unpaid and is waived for students who are working full-time. As such, when students enter the MS-MPE program, the internship requirement is co-determined with the Program Director.

MS-MPE students can opt to earn 0-3 course credits toward degree requirements, which are a part of the 12 required elective credits. Thus, if a student earns less than 3 credits for the co-op/internship, electives much be taken to hit the required total 30 credits.

- BIOENG 2095 - GRADUATE PROJECTS
- ENGR 2090 - GRADUATE ENGINEERING COOPERATIVE PROGRAM

- BIOENG 2250 - CARDIO CLINICAL INTERNSHIPS

VI. BIOENG 2024 - Bioengineering Seminar for Professional MS: 0 credits

BIOENG 2024 is a required, zero-credit seminar focused on career development for students in the Professional MS program. It is required for 1 Fall and 1 Spring semester.

Graduate Degree Programs

The Department of Chemical and Petroleum Engineering awards Master of Science degrees in chemical engineering and the Doctor of Philosophy degree in chemical engineering; offers several dual degree programs; and participates in joint degree programs with the Katz Graduate School of Business and the School of Medicine. The general objective of all programs is to develop the ability of the chemical or petroleum engineer to carry out original research at advanced levels.

The aim of the doctoral program is to develop individuals for careers in academic and industrial research. The program is flexible. Its primary emphasis is on innovative and distinctive research on the cutting edge of engineering science. Students wishing to pursue the PhD should have an outstanding academic background and a desire and ability to carry out original research. PhD students here are given independence and responsibility. They are not only encouraged, but are expected, to develop research ideas, which they propose and defend. They work closely with their faculty research advisors and often participate in a research group addressing relevant engineering problems. To supplement their research, students take advanced courses in areas related to their research work. Candidates for the PhD achieve a high level of proficiency through this advanced course work and individual study in their research area and related areas.

The graduate program offers MS and PhD students the opportunity to pursue independent research in five research focus areas in which the department has developed national and international reputations: biotechnology, catalysis, environment and energy, materials, and multi-scale modeling. Additional research areas exist in programs that have exploited opportunities at the interface between disciplines. The department's recognized research activities impact the following boundaries between established disciplines: biotechnology/environment; biology/medicine/engineering; energy/environment; polymer chemistry/physics; catalysis/chemistry/materials; catalysis/energy; and catalysis/environment.

Admissions

Chemical Engineering: For admission to full graduate status, students should have an undergraduate degree in chemical engineering with high academic standing from an ABET accredited curriculum.

Students from chemistry or from another engineering discipline who desire to pursue a graduate degree in chemical engineering must have a high grade point average and prepare for graduate course work by taking selected undergraduate courses in chemical engineering. See

requirements for students with non-Chemical Engineering BS degree for PhD or MS (select program from the programs list, below). Each case for admission will be evaluated individually, and applications are encouraged. Interested students may apply online. Questions can be sent to che@pitt.edu. Please be sure to include your name and complete mailing address.

Pittsburgh, PA 15260

Doctoral

Chemical Engineering, PhD

The following special regulations pertain to the Department of Chemical and Petroleum Engineering. *For additional requirements, review the school-wide information in the Doctor of Philosophy Programs section as well as the Regulations Pertaining to Doctoral Degrees.*

Entry to the PhD Program

In order to enter the PhD program, a student must have completed an MS degree and passed the PhD oral qualifying preliminary examination. Especially well-prepared students, with consent of the department faculty, may be granted permission to obtain the PhD degree directly without obtaining an MS degree. This eliminates the required completion of the MS thesis. All MS-level course work is still required.

During the summer of the first year as a graduate student in the department, the student wishing to continue into the PhD program must take the oral preliminary examination. Failure to take this examination at this time will forfeit one of two opportunities to pass this examination. The structure and content of the PhD oral qualifying examination is subject to change in order to meet the requirements of the faculty and PhD program.

PhD Course Requirements

A student's course series will be designed by the student and his/her thesis advisor, approved by the PhD committee, and signed off by the graduate coordinator. This sequence should include courses in the student's research area as well as courses not related to his/her research area. Forty-two credits beyond the MS degree are required and must include the following courses:

- XX 2/3XXX Electives (Science, Math, or Engineering) 12 credits
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING (if not taken at MS level)
- CHE 3990 - ADVANCED GRADUATE PROJECTS
- CHE 3999 - PH.D. DISSERTATION (taken after PhD proposal/comprehensive exam defense)

Additional course requirements may include the following, if the student has not previously completed courses in these areas at the master's level:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

Note:

Students must also register for one credit in PhD research methodology and one credit of CHE 3001 - GRADUATE SEMINAR each term.

Dissertation Requirement

A dissertation topic should be selected after passing the PhD oral qualifying examination. This is done by submitting a formal request in writing to the departmental graduate faculty for appointment of a faculty advisor (or advisors). Preliminary work can be done on the dissertation by registering for CHE 3990. After being admitted to PhD candidacy, the student should concentrate on the dissertation, registering for CHE 3999. A minimum of 30 credits of CHE 3990 and CHE 3999 is required. Most students complete more than 30 credits.

PhD Comprehensive Examination and Proposal Conference

This is an oral examination covering chemical engineering at the PhD level and is based upon a written dissertation proposal. If this examination is passed, a doctoral committee will be officially appointed. This exam should be taken at least 18 months before completion of the dissertation and preferably within the first year beyond the MS.

PhD Final Oral Examination

Please refer to the Swanson School of Engineering (SSOE) Graduate Catalog.

Off-Campus Research

Occasionally, a research program can be conducted at a government or industrial site. In those situations the student should submit a proposal for such research to the Vice Chair for Graduate Education for approval by the faculty. The faculty advisor must be actively involved in the research.

Joint Degree

Chemical and Petroleum Engineering Dual Degree, MS

Requirements

A program of study is available in which a student may pursue a dual degree between chemical engineering and petroleum engineering. At least 48 credits are required, including the fundamental courses in the two areas. Both thesis and non-thesis options are possible. The required chemical engineering courses are:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

and the required petroleum engineering courses are:

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS

Additional requirements for the Dual Degree MS, non-Thesis options:

- CHE 2910 - SPECIAL PROJECTS
- 3 course credits in Chemical or Petroleum Engineering coursework
- PETE 2211 - RESERVOIR SIMULATION and 6 additional course credits from the approved list (as specified in the Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology

Additional requirements for Dual Degree MS with Thesis:

- 6 course credits from the approved list (as specified Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING
- CHE 2999 - M.S. THESIS or PETE 2999 - M.S. THESIS
- Registration for one credit of CHE 2980 - MS RESEARCH METHODOLOGY or PETE 2980 - MS RESEARCH METHODOLOGY each fall and spring term until graduation
- Registration for CHE 3001 - GRADUATE SEMINAR each fall and spring term

MS Final Examination

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Study (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog .

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses ChE 804 and 805). Neither of these courses can serve as an elective nor core course substitute in the dual MS in Chemical and Petroleum Engineering required courses.

Master's

Chemical Engineering (Professional Engineer Program), MSCHe

Students who wish to pursue advanced study in chemical engineering may apply for admission to the Professional Engineer Program. It differs from the regular MS program in two important respects:

1. Course work replaces the MS thesis requirement.
2. The student completes a 3-credit special project course, CHE 2910, during their last term in the program. This course could be satisfied, for example, by a project with a faculty member, or a project based on their professional work (for engineers currently working in industry) for which a faculty member agrees to serve as advisor. Submission of a term paper, which is completed under the advisement of a member of the faculty, is required.

A minimum of 31 credit hours of course work is required.

These must include the five core courses and elective courses listed below.

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1

- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- CHE 2910 - SPECIAL PROJECTS
- ChE 2XXX - Chemical Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)

Note:

Up to 6 credit hours may be elected in approved graduate course offerings outside the department (denoted by XX, above); approvals are granted by the ChE Vice Chair for Graduate Education. Students who wish to enter this program should first apply for admission to graduate study in chemical engineering. Once admitted, students can then request admission to the Professional Engineer Program.

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805). In addition, students must take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with the MS, offered in the spring and summer terms. Neither of these courses can serve as an elective nor core course substitute in the MS in Chemical Engineering required courses.

Chemical Engineering (Research-Oriented Program), MSCHe

Requirements

The candidate for the Master of Science degree must demonstrate proficiency in basic chemical engineering subjects by successfully taking the following required courses:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING

In addition to these 15 credits, the student must satisfactorily complete the following courses:

- At least 9 additional credits of graduate-level course work, at least 3 of which must be in chemical engineering. Approved courses, with the permission of the student's major advisor and/or the ChE Vice Chair for Graduate Education, can be taken outside the department.
- 6 credits of CHE 2999 - M.S. THESIS must also be taken.
- 3 credits of Research Methodology are required (see below).

A full-time student will normally take 24 didactic credits, 6 thesis credits, 3 credits of research methodology, and up to 3 credits of seminar.

Full-time students are required to register each term for Research Methodology, a 1-credit course. In Research Methodology, a letter grade will be given each term based upon the student's research performance. Full-time students are also required to register for CHE 3001 - GRADUATE SEMINAR during the fall and spring terms. It should be emphasized that the preceding course requirements are minimum requirements, and additional work may be necessary for an individual student, especially if the student's undergraduate degree is not in chemical engineering.

In addition to the University's regulations for Academic Standing for Graduate and Professional Students, should a student receive a grade lower than B- in a required MS course, the student will be required to repeat that course and receive a B- grade or better before being permitted to graduate.

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805). Neither of these courses can serve as an elective nor core course substitute in the MS required courses.

Petroleum Engineering, MSPE

The candidate for the degree of non-thesis Master of Science in Petroleum Engineering must demonstrate proficiency in petroleum engineering by passing the following:

Mandatory Courses:

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1 or PETE 2211 - RESERVOIR SIMULATION

Note:

In addition to these 24 credits, the student must satisfactorily complete two other courses from the accepted electives list in order to fulfill the 30 credits required for the MS degree.

Accepted Electives:

- GEOL 2110 - PLATE TECTONICS
- GEOL 2151 - GROUNDWATER GEOLOGY
- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS
- ME 2055 - COMPUTER AIDED ANALYSIS OF TRANSPORT PHENOMENA
- ME 2060 - NUMERICAL METHODS
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING
- CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE
- CEE 2800 - ENGINEERING GEOLOGY
- CEE 3501 - ENVRNMTL ENGRG PROCESSES 1
- CEE 3502 - ENVRNMTL ENGRG PROCESSES 2
- PETE 2910 - SPECIAL PROJECTS

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805) or the ChE Bridging Program offered by Pitt during the summer term immediately preceding matriculation to the graduate degree program. Neither of these courses can serve as an elective nor core course substitute in the MS in Petroleum Engineering required courses.

Department of Civil and Environmental Engineering

Contact Information

Interim Department Chair: Vikas Khanna
Main Office: 742 Benedum Hall

Graduate Degree Programs

https://www.engineering.pitt.edu/departments/civil-environmental/graduate/graduate-overview/

The Department of Civil and Environmental Engineering offers graduate study and research leading to the Master of Science in Civil Engineering and Doctor of Philosophy degrees. Also offered is a joint degree program resulting in a second Master of Science degree in mathematics, and a joint degree program with the Katz Graduate School of Business resulting in a MBA degree. The MS in Civil Engineering and the PhD in engineering may be pursued in one of the following areas:

The Master of Science degree in Civil and Environmental Engineering is primarily designed for students with an undergraduate degree in engineering, although students with other backgrounds can be accommodated with specially designed programs. An MS degree can be pursued by either a full-time or part-time student in one of the following areas:

- Construction Management
- Environmental Engineering
- Geotechnical and Pavement Engineering
- Structural Engineering and Mechanics
- Sustainable Engineering
- Transportation Engineering
- Water Resources Engineering

The areas of study for the Ph.D. in Civil Engineering in the Department of Civil and Environmental Engineering within the Swanson School of Engineering are divided into two integrated research areas and sub-component specialty areas as follows:

- **Sustainability and Environmental Engineering (SEE):**
  - Environmental Engineering;
  - Sustainable Engineering; and
  - Water Resources Engineering
- **Advanced Infrastructure Systems (AIS):**
  - Geotechnical and Pavement Engineering;
  - Structural Engineering and Mechanics; and
  - Transportation Engineering.

Certificate

Circular Economy Certificate

The certificate in Circular Economy (CE) is housed administratively within the Mascaro Center for Sustainable Innovation (MCSI). The **15-credit** graduate certificate has been developed based on current research on recommended skills and knowledge related to the circular economy.

The objectives of the Circular Economy Certificate (CEC) are:

1. Enable graduate students to develop knowledge of circular economy principles and ultimately create circular and sustainable solutions.
2. Embark on a novel, cross-disciplinary educational experience that integrates existing campus resources with a new course focusing on circular economy design.
3. Create a learning pathway that enables the development of breadth and depth and the skills needed for circular economy solutions.
4. Create regional and nationally scalable circular economy solutions through an existing capstone course.
5. Experience a diverse and inclusive training environment that builds upon and extends our networks, ultimately establishing a diverse and inclusive academic environment for our program.

The CEC graduate certificate is designed for individuals looking to develop the skills and knowledge of circular economy necessary to support promising career opportunities. The curriculum is aimed at existing graduate students or professionals whose academic or professional aspirations require expertise in the understanding and application of circular economy.

The certificate is structured so the participant is required to take five total courses. Three of the courses are required, with two elective courses.

Required Courses

The following three courses are required:

- CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
- ENGR 2007 - SUSTAINABILITY CAPSTONE
- CEE 2630 - DESIGN FOR CIRCULAR ECONOMY

Elective Courses

Students must complete two of the following electives:

- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- LAW 5340 - ENVIRONMENTAL LAW
- PIA 2115 - ENVIRONMENTAL ECONOMICS
- BMKT 2513 - CONSUMER BEHAVIOR 1
  BMKT Consumer Behavior 1 and 2 (3 credits in total).
  Other courses related to CE as approved by advisor.

Total Credits: 15

Civil and Environmental Engineering - Construction Management Certificate

The Construction Management Certificate Program is directed at Part-time students currently employed in the construction industry as well as other students interested in obtaining credentials in construction management.

The Academic Requirements associated with the Graduate and Post-Baccalaureate Certificate in Construction Management include the completion of fifteen (15) credits of coursework within the Civil and Environmental Department from among the following Graduate Level courses:

- CEE 2201 - CONSTRUCTION COST ENGINEERING*
- CEE 2202 - CONSTRUCTION SCHEDULING*
- CEE 2203 - CONSTRCT METHODS AND EQUIPMENT*
- CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT
- CEE 2205 - CONSTRCT FINANCE & COST CONTROL
- CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY
- CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS
- CEE 2230 - BUILDING INFORMATION MODELING

Students must complete three (3) required courses above (designated with an asterisk *) and may select any two (2) of the remaining courses above as electives in the completion of their Certificate. Additional graduate level courses within the Swanson School of Engineering may be considered as substitutes for the two (2) elective courses with permission of the Program Director to customize the Certificate to meet the educational goals of the student. All courses can be taken either on campus or online.

Doctoral

Civil Engineering, PhD

- Civil Engineering - Advanced Infrastructure Systems - Geotechnical and Pavement Engineering Specialty, PhD
- Civil Engineering - Advanced Infrastructure Systems - Structural Engineering and Mechanics Specialty, PhD
- Civil Engineering - Advanced Infrastructure Systems - Transportation Engineering Specialty, PhD
- Civil Engineering - Sustainability and Environmental Engineering - Environmental Engineering Specialty, PhD
- Civil Engineering - Sustainability and Environmental Engineering - Sustainable Engineering Specialty, PhD
- Civil Engineering - Sustainability and Environmental Engineering - Water Resources Engineering Specialty, PhD

Master's

Civil and Environmental Engineering - Construction Management Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Construction Management Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent

b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent

c) 3 credits - CEE 2203 - CONSTRCT METHODS AND EQUIPMENT or Equivalent

d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent

e) 3 credits - CEE 2205 - CONSTRCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS or Equivalent

g) 12 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count toward the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent

b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent

c) 3 credits - CEE 2203 - CONSTRCT METHODS AND EQUIPMENT or Equivalent

d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent

e) 3 credits - CEE 2205 - CONSTRCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS or Equivalent

g) 6 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count toward the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Environmental Engineering Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Environmental Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2500 - ENVRNMNTL ENGRG MICROBIOL or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY or Equivalent

c) 3 credits - CEE 3501 - ENVRNMTL ENGRG PROCESSES 1 or Equivalent

d) 3 credits - CEE 3502 - ENVRNMTL ENGRG PROCESSES 2 or Equivalent

e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2500 - ENVRNMNTL ENGRG MICROBIOL or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY or Equivalent

c) 3 credits - CEE 3501 - ENVRNMTL ENGRG PROCESSES 1 or Equivalent

d) 3 credits - CEE 3502 - ENVRNMTL ENGRG PROCESSES 2 or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Geotechnical Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Geotechnical Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent

b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent

c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent

d) 3 credits - CEE 2814 - SLOPES & EARTH RETAINING STRUCT or Equivalent

e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements).

MS Thesis Degree Requirements

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent

b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent

c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent

d) 3 credits -CEE 2814 - SLOPES & EARTH RETAINING STRUCT or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996) No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Pavement Engineering Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Pavement Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent

c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent

d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or CEE 2716 - PAVEMENT CONSTRUCTION or Equivalent

e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent

c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent

d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or CEE 2716 - PAVEMENT CONSTRUCTION or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996) No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Structural Engineering and Mechanics Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Structural Engineering and Mechanics Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent

c) 3 credits - SEM Graduate Design Elective - CEE 2340 - DESIGN OF CONCRETE STRUCTURES, CEE 2341 - DESIGN OF STEEL STRUCTURES, CEE 2343 - PRESTRESSED CONCRETE , CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING

d) 6 credits - SEM Graduate Technical Elective - CEE 2330 - ADVANCED STRUCTURAL ANALYSIS , CEE 2343 - PRESTRESSED CONCRETE , CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES or CEE 2370 - NONDESTRUCTIVE EVALUATION

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

e) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements).

MS Thesis Degree Requirements

a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent

c) 3 credits - SEM Graduate Design Elective - CEE 2340 - DESIGN OF CONCRETE STRUCTURES, CEE 2341 - DESIGN OF STEEL STRUCTURES, CEE 2343 - PRESTRESSED CONCRETE , CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING

d) 6 credits - SEM Graduate Technical Elective - CEE 2330 - ADVANCED STRUCTURAL ANALYSIS , CEE 2343 - PRESTRESSED CONCRETE , CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES or CEE 2370 - NONDESTRUCTIVE EVALUATION

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

e) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Sustainable Engineering Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Sustainable Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent

b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent

c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or CEE 2630 - DESIGN FOR CIRCULAR ECONOMY or Equivalent

d) 3 credits - CEE 2515 - WATSTEWATER COLLECTWASTEWATER COLLECTION AND TREATMENT PLANT DESIGNION AND TREATMENT PLANT DESIGN or CEE 2531 - AIR POLLUTION AND CONTROL or Equivalent

e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent

b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent

c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or CEE 2630 - DESIGN FOR CIRCULAR ECONOMY or Equivalent

d) 3 credits - CEE 2515 - WATSTEWATER COLLECTWASTEWATER COLLECTION AND TREATMENT PLANT DESIGNION AND TREATMENT PLANT DESIGN or CEE 2531 - AIR POLLUTION AND CONTROL or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Transportation Engineering Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Transportation Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent

b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent

c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent

d) 3 credits - CEE 2730 - HIGHWAY ENGINEERING or CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

f) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent

b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent

c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent

d) 3 credits - CEE 2730 - HIGHWAY ENGINEERING or CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Civil and Environmental Engineering - Water Resources Engineering Area, MSCE

The MS program follows all requirements established by the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

The specific requirements for the option for the Master of Science in Civil and Environmental Engineering - Water Resources Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

Complete three of the following:

a) 3 credits - CEE 2401 - OPEN CHANNEL HYDRAULICS

b) 3 credits - CEE 3414 - ADVANCED HYDROLOGY

c) 3 credits - CEE 2410 - WATER RESOURCES ENGINEERING

d) 3 credits - CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

And:

e) 21 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

Complete three of the following:

a) 3 credits - CEE 2401 - OPEN CHANNEL HYDRAULICS

b) 3 credits - CEE 3414 - ADVANCED HYDROLOGY

c) 3 credits - CEE 2410 - WATER RESOURCES ENGINEERING

d) 3 credits - CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

And:

e) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

The examination will be administered by the master's committee in accordance with the Regulations Governing Graduate Studies (RGGS) and the Swanson School of Engineering (SSOE) Graduate Catalog.

Department of Electrical and Computer Engineering

Contact Information

Department Chair: Alan D. George
Main Office: 1238 Benedum Hall
412-624-8002
Fax: 412-624-8003
E-mail: ecemain@pitt.edu
http://www.engineering.pitt.edu/ECE/

Additional information concerning the Electrical and Computer Engineering graduate programs may be obtained from the department's Graduate Program Administrator, located at 1238 Benedum Hall, 3700 O'Hara Street, Pittsburgh, PA 15261, and available by email at ecegrad@pitt.edu.

Graduate Degree Programs

The Department of Electrical and Computer Engineering offers a program of graduate study and research for master's and doctoral degree students whose career choice is oriented toward basic or applied research in industry, government, or academic institutions. Degrees awarded are the Master of Science in Electrical and Computer Engineering and the Doctor of Philosophy in Electrical and Computer

Engineering. Course work and faculty/student research in the graduate Electrical and Computer Engineering program are concentrated in the following four areas:

- Computer Engineering
- Optical and Electronic Devices
- Electric Power Engineering
- Signal Processing and Systems

and include research in computer architecture, reconfigurable and high-performance computing, computer-aided design (CAD), very-large-scale integrated (VLSI) design, optical interfacing, embedded systems, parallel processing architectures, networking, photonic and electronic devices, plasmonics, quantum photonic devices, micro/nanorobotics and systems, fiber optics, ultrafast laser processing, 2D/low-dimensional materials and devices, semiconductor device modeling and characterization, power electronics, pattern recognition, biomedical image processing, speech processing, statistical signal processing, wavelets, intelligent and neutral control, human-centered control, networked control, radio-frequency identification (RFID) and tags, electric power systems analysis, simulation and modeling: transmission, distribution systems and technologies, real-time control of power systems, renewable energy interconnections, and smart grid.

Graduate Admissions

https://www.engineering.pitt.edu/ece

Applicants for admission must submit transcripts of all college-level work and two letters of recommendation. GRE scores are not required for applications and admissions, but may be optionally submitted by students who want them included as part of their application package. International applicants whose first language is not English must demonstrate English language proficiency by submitting IELTS, TOEFL or Duolingo test scores. More on Graduate Admissions can be found here.

Certificate

Electric Power Engineering Certificate

- Via Asynchronous or Synchronous, Interactive, Distance-Enabled Delivery

The University of Pittsburgh Swanson School of Engineering has established an Electric Power Engineering Post-Baccalaureate/Graduate Certificate Program that rises to the challenge of meeting the nation's critical development needs for electric power engineering professionals. This is a distance-enabled program in electric power engineering that allows students to take classes either synchronously or asynchronously, depending on the course.

The program is deeply rooted in core electric power engineering principles and focuses on the expansion and enhanced reliability and resilience of electric power grid infrastructure through application of power electronics and advanced control technologies, as well as renewable energy integration and smart grids. Program content - combined with innovative distance-enabled delivery and collaborative program components - makes this program an attractive and unique choice in graduate engineering, particularly for individuals in industry/business. For additional information and to apply, please visit www.engineering.pitt.edu/powercertificate.

Certificate Curriculum

Credit-hours required: 15

Students may select any five of the following courses:

- ECE 2250 - POWER ELECTRONICS
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2774 - COMPUTER ANALYSIS OF POWER SYSTEMS
- ECE 2775 - ADVANCED ELECTRIC MACHINES AND DRIVES
- ECE 2776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES

- ECE 2777 - POWER SYSTEMS TRANSIENTS 1
- ECE 2778 - FACTS AND HVDC TECHNOLOGIES
- ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY
- ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS
- ECE 2795 - SPECIAL TOPICS POWER - Artificial Intelligence and Machine Learning Applications for Modern Power Systems
- ECE 2795 - SPECIAL TOPICS POWER - Electrical Distribution System Engineering & Analysis II
- ECE 2795 - SPECIAL TOPICS POWER - Power Magnetic Devices
- ECE 2795 - SPECIAL TOPICS POWER - Protective Relaying and Substation Automation

Additional Information

Admission Requirements (Apply Here)

- BS in electrical engineering from an ABET-accredited university program (no industry experience required) *OR*
- BS in any engineering field, PLUS a minimum of three years of power industry experience

For more information about the Electric Power Engineering program, contact:

Alexis Kwasinski, PhD, Program Director
Associate Professor, Electrical & Computer Engineering
akwasins@pitt.edu

Doctoral

Electrical & Computer Engineering, PhD ECE

The objective of the PhD program is to achieve a high degree of competence in one major field in Electrical and Computer Engineering.

Degree Requirements

Students who transferred MS credits (30 credits) from a prior institution or obtained a Pitt ECE MS degree:

Beyond the 30-credit MS requirement, a minimum of 42 credits and a dissertation are required for the PhD degree (total of 72 credits beyond BS). The dissertation should embody an extended original and independent investigation of a problem of significance in Electrical and Computer Engineering. Of those 42 credits, at least 18 must be in dissertation research (18 or more in ECE 3997 or ECE 3999), and at least 24 course credits must be attained beyond the MS degree. The 24 credits must include:

1. At least 4 ECE book courses (12 credits) at the graduate level. These courses will be used for the Comprehensive Exam*.

(*) A student with a Pitt ECE MS can waive the 4 ECE book courses requirement. Instead, the book courses can be substituted by a 12-credit combination of research/project courses (ECE 3998 and/or ECE 3995).

2. A maximum 12-credit combination of ECE 3998 and ECE 3995 research/project courses.

(*) A student with a Pitt MS maximum 24-credit combination of ECE 3998 and ECE 3995.

Students who transferred less than 30 credits are still required to enroll in grad courses at Pitt to fulfill the 30-credit MS requirement.

ECE 3995 should be directed toward research. This research course requires the approval of the student's Program Conference Committee (i.e. the Preliminary Exam should be completed before taking this course). In addition, the student is required to write a 1-2 page proposal for each such course citing the topic, the teacher, the rationale for the course, and a deliverable from the course experience. The deliverable can be a submitted journal conference paper, a research proposal for funding, or a complete patent application.

Students who obtained the BS degree only:

Students must complete a minimum of 72 credits beyond the BS degree. Of those credits, at least 18 must be in dissertation research (18 or more in ECE 3997 or ECE 3999), and at least 54 course credits must be attained beyond the BS degree. The 54 credits must include:

1. At least 8 courses (24 credits) that are in the catalog; of those 24 credits, at least 4 courses (12 credits) must be ECE courses at the 2000 or 3000 level. The other courses (up to 4 courses, 12 credits) should be ECE approved courses or be approved by the Graduate Programs Coordinator.
2. A maximum 30-credit combination of ECE 3998 and ECE 3995 research/project courses.

Exams

There are four separate exams that must be passed in order to obtain the PhD degree. The student must also have a Program Conference with a faculty committee to approve his/her plan of study. Descriptions of each follow.

Program Conference

During the first year, a PhD student must schedule a meeting with a faculty committee to present a tentative program of study for approval. The committee consists of the student's advisor, who chairs the committee, and a minimum of two other faculty members from the department.

On the Program Conference form, the student must list all of the courses he/she has taken as a graduate student in the department as well as those for which he/she has obtained advanced standing. Courses that he/she is planning to take in the future in Electrical and Computer Engineering as well as in related areas should also be included. Finally, the form should list the four courses that are required for the PhD Comprehensive Exam and a tentative schedule for the different exams and the residency requirements. The committee can approve, reject or make modifications to the proposed program. The advisor is responsible for supervising the student's progress in the approved program.

Preliminary Exam

The purpose of the preliminary exam is to ascertain the capabilities of a student to do independent research. The exam generally consists of an oral presentation of a written document, prepared by the student, to a committee of ECE faculty members. The student and his/her advisor will determine the subject of the document.

Students completing the MS research option who are interested in pursuing doctoral studies have already demonstrated their ability to do independent research. Therefore, their MS thesis oral and the preliminary exam may be administered simultaneously.

Continuing MS students who elected the professional option or who obtained their degrees from other institutions must schedule a preliminary exam. The student must prepare a written document of the same caliber as an MS thesis. This may be done by either taking a graduate project course (ECE 3998) or by using a thesis presented at another institution. The student's advisor will then assist the student in forming a committee with a composition similar to that of an MS thesis exam committee. Two weeks before the exam, the written report should be given to the committee members and the Graduate Program Administrator should be informed of the composition of the committee, time, title and abstract of the thesis in order to publish an announcement.

PhD Comprehensive Exam

To complete the Comprehensive PhD exam, a student must obtain a minimum QPA of 3.3 in the four courses assigned by the PhD program conference committee no later than the first two years of enrollment in the PhD program.

If the student fails to achieve this requirement, he/she must pass an oral exam that takes place at the same time as the PhD Proposal exam and answer general questions related to his/her research area. If he/she fails this oral exam, the student may take it once more three months later.

To complete the PhD Comprehensive exam, a student must select four courses in his/her area of specialization and have earned a grade of B or higher in each.

Dissertation Proposal Exam

For the dissertation proposal examination, the student prepares a written proposal of his/her dissertation and presents it orally to an exam committee. Students must have a cumulative graduate QPA of 3.30 to be considered for doctoral candidacy. The committee consists of at least five members, four of whom must be from the Electrical and Computer Engineering Department, and at least one who must be from outside the department (external member). Three of the departmental members must be graduate faculty members and at least one of the external members must be a graduate faculty member from another department in the university. Other appropriate member(s) may also serve on the committee. A faculty member from another accredited university may serve as an external graduate faculty member of the committee if that individual's academic background is comparable to the qualifications for graduate faculty status at the University of Pittsburgh.

The dissertation proposal should be given to the committee members at least two weeks before the exam, and the student must inform the Graduate Program Administrator of the composition of the committee and provide a proposal with a completion time line as well as a title and an abstract at least two weeks prior to the exam date.

If the doctoral committee approves the dissertation proposal, the student is then formally admitted to Candidacy for the Doctor of Philosophy Degree. The proposal exam must be completed at least two semesters before the student plans to graduate. Students can register for ECE 3997 for preliminary work for the PhD proposal exam. If a student passed their proposal exam with less than 18 credits of ECE 3997, then they should enroll in ECE 3999. In this case, a student should earn at least 18 total credits of ECE 3997 and ECE 3999 combined. Once this and all other course requirements are met, a student would be eligible to move to FTDH.

Final Oral Exam

The final oral exam is administered by the doctoral committee and determines the acceptability of the student's dissertation and his/her ability to comprehend, organize and make original contributions to his/her area of research.

At least two weeks prior to the exam, the student must submit their written dissertation to the committee. The Graduate Program Coordinator must approve this exam. To get approval, at least two weeks before the exam, the student must submit a copy of their written dissertation and announcement to the Graduate Program Coordinator and Administrator. The final oral exam is open to the public.

Students scheduling their final oral exam must submit at least one paper from their thesis work to a refereed journal. The publication form must be signed by the major advisor and submitted to the Graduate Program Administrator at least two weeks before the final oral exam. Submitting a paper to a refereed journal is a requirement for the PhD degree.

Graduate Certificate

Space Engineering, Graduate Certificate

Our proposed program is a Graduate Certificate (GC) in Space Engineering. This program not only covers the basic components of a traditional astronautics program, which is built on four pillars (astrodynamics, propulsion, structures, and control), but it also emphasizes the modern ECE views and technologies of space engineering. This approach is reflected by the course curriculum (summarized below) for the GC. The key areas, and employment opportunities, that the department can support fall under the following categories: dependable computer architecture, extreme-environment electronics, orbital mechanics, spacecraft attitude dynamics, guidance and control, systems engineering, project management, rockets and launch vehicles, and spacecraft subsystems (communication and data handling subsystem, electrical power subsystem, thermal control subsystem, environmental control and life support subsystem, and structures and mechanisms).

Core Courses for GC in Space Engineering

ECE/ENGR 2073: Introduction to Space Engineering (4 cr. in every Fall semester). This course is a comprehensive overview of space engineering. Topics covered include the importance and applications of space, space environment, basics of orbital mechanics, spacecraft dynamics, systems engineering, control systems, and spacecraft subsystems (such as communication and data-handling subsystem, electrical power subsystem, environmental control and life-support subsystem, and structures), rocket propulsion, space operations, and

space politics and economics. This course includes a lab session which focuses on simulations of spacecraft orbit control and attitude control.

ECE 2165 Dependable Systems (3 cr., every Fall semester). The focus of this course is the analysis, design, evaluation, and optimization of dependable computers and other complex systems for resilient operation in space and other harsh environments while supporting critical applications. Featuring a mix of theory and practice, novel methods in hardware, information, network, software, and time redundancy are studied and employed to mitigate threats and maximize reliability, availability, performability, and safety.

ECE 2095: Extreme Environment Electronics (3cr., every Spring semester). This course covers the fundamentals of widely used circuits tailored for standard settings and advanced versions specifically engineered for challenging environments, such as those characterized by extreme radiation, temperature, vibration, and vacuum. Topics to be covered include impact of extreme environment on electronics; semiconductor device technologies, digital electronics, and analog electronics for wide temperature range and radiation; electronics for vibration and vacuum; packaging for extreme environments; and real-world applications.

ENGR 2686: Space Orbital Mechanics (3 cr., every Spring semester). This course presents rigorous treatment of classical mechanical systems pertaining to spaceflight and orbital dynamics. Students will be able to apply mathematical treatments to Newtonian systems and in the process appreciate both physical nature and engineering feats achieved in successful completion of space missions.

ECE 2098 Space Systems Project (3 cr., every semester). This course provides students in solo and small teams the opportunity to develop requirements for a national space mission and then design, construct, test, and optimize a space system and application for that mission.

Required

- ECE 2073 - INTRODUCTION TO SPACE ENGINEERING
  or
- ENGR 2073 - INTRODUCTION TO SPACE ENGINEERING

Elective

choose 2 from this list:

- ECE 2165 - DEPENDABLE SYSTEMS
- ECE 2095 - SPECIAL TOPICS: GRADUATE
- ENGR 2686 - SPACE ORBITAL MECHANICS
- ECE 2098 - MS PROJECT ON SPACE SYSTEMS

Master's

Electrical & Computer Engineering, MS ECE

The degree of Master of Science in Electrical Engineering can be obtained by following either a research or a professional option. The research option includes a thesis while the professional option is 30 credits of course work. Students who intend to continue for a PhD degree are highly encouraged to take the research option.

Course selection for either the research or the professional degree options is to be done in consultation with the student's advisor according to the following requirements:

1. The course selection must include at least 15 graduate credits in ECE, and
2. Courses outside of ECE must come from a pre-approved list of courses.

(*) Maximum 3 credits of this project course (ECE2x98) can count towards 30-credit MS graduation requirements.

Courses that are required of students admitted on a provisional status are to be considered additional to these requirements. If the student chooses the research option, only 6 credits of ECE 2999 will count towards the degree requirement. Notice that credits in ECE 2997,

research for the MS, and in ECE 3893, the graduate seminar, will not be considered towards the 30-credit degree requirements. However, funded Research MS students are required to earn 2 credits of ECE 3893 to meet degree requirements.

Professional Option. A minimum of 30 credits of course work conforming to the requirements above. Although not required, a three credit graduate project course (ECE 2998) is highly recommended for students who might later choose to enter the PhD program. No comprehensive exam is required for students following the professional option.

Research Option. A minimum of 24 credits of course work is required. In addition, a thesis (with a minimum of six credits of ECE 2999, MS Thesis) must be completed and presented at an oral defense.

It should be emphasized that the above credit requirements for both options are the minimum acceptable and may not necessarily satisfy the degree requirements. In some instances it might be necessary for a student to take undergraduate courses to be accepted into full graduate status. Thus, depending upon the student's background and program, it may be necessary to take more than the minimum number of credits required.

Thesis Requirement. MS students taking the research option must prepare a thesis showing marked attainment in their area of investigation. A graduate student begins thesis work after the fulfillment of the following conditions:

- Completing at least 12 credits,
- Being on full graduate status, and
- Achieving a cumulative QPA of 3.00 or higher.

Students in the research option must defend their theses orally. A committee consisting of three Electrical and Computer Engineering graduate faculty members and chaired by the student's major advisor is formed to evaluate the thesis and defense. The chair is considered one of the three members. Faculty members with a secondary appointment in Electrical and Computer Engineering may also chair or serve on such a committee. The student and committee must agree to a date at least two weeks before the exam. The announcement and a draft of written thesis should be submitted to the Graduate Program Coordinator and Administrator at least two weeks prior to the exam for approval. The announcement should include the names of the faculty on the committee, the location, the date and time, the title and the abstract of the thesis. The announcement will be published two weeks ahead of time provided the schedule and written thesis have been approved. The student must provide the committee with copies of the thesis at least one week prior to the day of the oral exam. The oral exam is open to the public. If the student is interested in pursuing a PhD, this exam may be combined with the PhD Preliminary Exam.

Department of Industrial Engineering

Contact Information

Department Chair: Lisa Maillart
Main Office: 1025 Benedum Hall
412-624-9830
Fax: 412-624-9831
E-mail: maillart@pitt.edu
https://www.engineering.pitt.edu/industrial

Additional information concerning the department's graduate program may be obtained from the graduate secretary; please send email to gradie@pitt.edu.

Graduate Degree Programs

The Department of Industrial Engineering's graduate programs prepare engineers to assume leadership positions in industry, government, and service organizations. The Master of Science in Industrial Engineering program is very flexible, and students could either choose to focus on some specific area of interest or opt for a more broad-based curriculum with coursework spanning multiple areas. Narrower concentration areas in Data Science and Engineering Management are also available.

In addition, the department offers two options in cooperation with the School of Business: a joint degree MSIE/MBA program and a joint degree MSIE/MSSCM (Master of Science in Supply Chain Management) program. The department also offers several other options with

the Master's program, including (1) opportunities for Lean Six Sigma Certification and (2) a Graduate Certificate in Nuclear Engineering in cooperation with the Department of Mechanical Engineering and Materials Science.

The Doctor of Philosophy degree is the department's flagship graduate program. Currently, the primary areas of research include all aspects of operations research, analytics, and data science; and manufacturing science and nontraditional manufacturing. Doctoral graduates are qualified for academic research careers as well as technical leadership positions in industry.

Admissions

Applicants must possess an undergraduate or graduate degree from an ABET-accredited program in any engineering discipline, or a degree in a complementary technical discipline, such as mathematics, statistics, or computer science. Outstanding applicants from other disciplines such as physics, chemistry, biology, economics, information systems and quantitative business will also be considered, as long as they have the required prerequisites of undergraduate calculus, linear algebra, and calculus-based probability and statistics. Proficiency in computer programming is also an asset.

Applicants for admission must submit the application form and fee, transcripts of all college-level work, three letters of recommendation, and a statement of career goals/objectives. Submission of scores from the Graduate Record Examination (GRE) is optional. International applicants whose first language is not English must take either the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service with a minimum score of 81 (prior to January 2026) or 4.5 composite, with minimum subscores of 4.5 (listening) and 4.0 (all others), the International English Language Testing System (IELTS) exam with a minimum Band of 6.5 (taking the academic writing and reading modules of the test), or the Duolingo English Test with a minimum score of 120. It is desirable for PhD applicants to have an interview with a faculty member, although this is not a requirement for admission.

All applicants are considered on an ongoing basis. However, the following deadlines are strongly recommended for international applicants: Fall term - April 15, and Spring term - September 30. Also, all PhD applicants who wish to be considered for financial assistance must apply before January 31. International applicants are not accepted for enrollment beginning in a summer term. Prospective students are encouraged to apply early whenever possible.

Applications may also be completed online.

Applicants to the MSIE-MBA and MSIE-MSSCM programs must apply through the School of Business.

Concentration

Data Science for Industrial Engineers

Our MS program is very flexible beyond the core requirements, and depending on their interests, students are able to choose either a broadly diversified program, or a more focused program that is concentrated on a particular area. We already advise students who prefer the latter option on how to concentrate their electives classes in specific areas, and this proposal simply aims to formalize this and offer such students the option of a specific concentration area that will also appear on their transcripts.

Data Science for Industrial Engineers is one of these three concentration areas, and like the other concentration areas it requires that students pick 15 credits of coursework from the following list; please note that this does not increase the overall credit requirements for the MS degree, nor does it change the overall degree requirements in any way; it merely specifies some of the electives that students will be required to take to obtain this concentration.

Required

- IE 2007 - STATISTICS AND DATA ANALYSIS
- IE 2064 - APPLIED DATA ANALYTICS

Electives

At least three courses from the following list::

- BQOM 2537 - FORECASTING
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- IE 2086 - DECISION MODELS
- IE 2088 - STOCHASTIC SIMULATION
- IE 2187 - OPTIMIZATION FOR MACHINE LEARNING
- INFSCI 2160 - DATA MINING
- INFSCI 2440 - ARTIFICIAL INTELLIGENCE
- INFSCI 2595 - MACHINE LEARNING
- STAT 2270 - DATA MINING

- Other related graduate courses (with prior advisor approval)

Engineering Management

Engineering Management is one of these three concentration areas, and like the other concentration areas it requires that students pick 15 credits of coursework from the following list; please note that this does not increase the overall credit requirements for the MS degree, nor does it change the overall degree requirements in any way; it merely specifies some of the electives that students will be required to take to obtain this concentration.

Required

- IE 2003 - ENGINEERING MANAGEMENT
- IE 2007 - STATISTICS AND DATA ANALYSIS
- IE 2123 - PROJECT MANAGEMENT

Electives

At least 2 classes from the list below

- IE 2086 - DECISION MODELS
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2103 - LEAN SIX SIGMA II (BLACK BELT)
- IE 2122 - FUNDAMENTALS OF SYSTEMS ENGINEERING
- IE 2303 - WORK DESIGN
- Appropriate graduate courses, including courses in Finance, Marketing or Organizational Behavior from KGSB (with prior advisor approval)

Doctoral

Industrial Engineering, PhD

This is the department's flagship graduate program and prepares the student for the rigorous demands of a career in research and development, or academia. It requires a strong background in mathematics, probability & statistics, optimization techniques and manufacturing. The PhD student is expected to be a full-time student. Although it is possible to seek candidacy as a part-time student, the PhD candidate must spend at least one academic year on campus full time. The graduate faculty typically works closely with individual doctoral students to create a flexible program tailored to individual needs.

Entrance to the PhD Program: To be admitted to the doctoral program, students must pass the PhD qualifying examination, which is typically given once a year in late April or early May. The examination allows the department to assess students' ability to conduct doctoral-level research by testing their academic preparation and creativity. Students are expected to take the examination in April/May of the calendar year following the one in which they entered the graduate program, although it is acceptable to take the examination earlier. The student must seek faculty approval to take this examination. For approval to take the exam, a student is expected to (i) have a very good academic record, (ii) have an eligible departmental faculty advocate, and (iii) show promise for doing independent research.

Currently, the qualifying examination consists of four separate oral exams that each run for 45 minutes to an hour. These exams cover the core areas of (1) Linear Optimization, (2) Stochastic Processes, (3) Statistics & Data Analysis, and (4) Manufacturing Systems. Each exam is conducted by a committee of two to four faculty members.

The entire faculty then meets and discusses each candidate's performance along with the recommendations of the examination committees to decide on whether the student passes or not.

Doctoral Course and Dissertation Credit Requirements: In addition to the basic core courses, doctoral students take additional courses that may be required in preparation for the PhD degree and the student's dissertation topic. These courses are selected in conjunction with a program approved by the student's advisor. According to University regulations, the PhD requires at least 72 credits beyond the bachelor's degree or 42 credits beyond the master's degree, including 18 credits for dissertation research. Currently, the department requires a minimum of 45 credits in pedagogical coursework; credits typically include the following:

- Qualifying core (IE 2006, IE 2117, IE 2081, IE 2084, IE 2011): 12-15 credits
- Other possible required courses (IE 2100 & either IE 2088 or IE 2188): 6 credits
- Additional course work (at least 6 credits of which must come from offerings outside the Department of Industrial Engineering): at least 24-33 credits
- Dissertation research (IE 3997 & IE 3999): at least 18 credits

Additional Doctoral Requirements: All full-time students must enroll in and attend IE 3095 (Graduate Seminar) each term they are in residence; the credits for these do not count toward the 72-credit requirement.

The comprehensive examination is taken by students typically after completing most of the course work in their concentration. The PhD comprehensive exam is combined with the dissertation proposal presentation and has a three-fold purpose: (1) to test the student's proficiency (knowledge and skills) in his or her major area of interest; (2) to identify deficiencies in the student's background and suggest remedial work; and (3) to test the student's ability to prepare an acceptable dissertation in his or her area of concentration.

All doctoral students are expected to pursue research by working with individual faculty in areas that can lead to a potential doctoral dissertation. A PhD candidate must demonstrate the ability to conduct research of an original nature by completing a dissertation and preparing one or more papers of publishable quality. The dissertation topic is selected by the student in some theoretical or methodological area of interest in consultation with a faculty advisor. A faculty committee must approve the dissertation proposal as part of the PhD comprehensive examination. Information regarding the PhD program can be found here.

Joint Degree

Industrial Engineering/Business Administration, MSIE/MBA

This joint degree program, offered in conjunction with the School of Business, positions individuals with an undergraduate degree in engineering or the hard sciences to take a management role in a company that has a significant engineering and/or technologial focus. Full-time students can complete both degrees in 20 months, while part-time students can do so in four years. Prospective students must apply via the School of Business to the joint program; students who are already in the MBA program are not permitted to enroll in the joint program.

A total of 24 credits from the Department of Industrial Engineering are required (12 credits in core classes and 12 credits in electives).

In particular these credits are divided as follows:

- Required Core (2 courses: 6 credits)*
    - IE 2001 - OPERATIONS RESEARCH
    - IE 2006 - INTRO TO MANUFACTURING SYSTEMS
- Elective Core: at least two of the following (2 courses: 6 credits)

    - IE 2003 - ENGINEERING MANAGEMENT
    - IE 2007 - STATISTICS AND DATA ANALYSIS
    - IE 2088 - STOCHASTIC SIMULATION or IE 2188 - SIMULATION MODELING AND APPLICATIONS
    - IE 2100 - SUPPLY CHAIN ANALYSIS
    - IE 2303 - WORK DESIGN*
- Free Electives (4 courses: 12 credits)
    - Any elective offered by the IE Department (including courses in the elective core above)

*IE 2303 - WORK DESIGN is required for students without an undergraduate degree in IE

For details on the curriculum requirements for the MBA portion of the program, please visit Joseph M. Katz Graduate School of Business.

Joint MSE/MBA

Master of Business Administration requirements: 33

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 6 elective credits of School of Business courses.

Joint Project Course

Students are required to complete a 3-credit joint project course that integrates the business and engineering disciplines. Common courses used to meet this criteria are BIND 2024 or BQOM 2139. In cases where the 3-credit course completed is a School of Business course, 1.5 credits will count toward the MBA requirements and 1.5 will count toward the 30 credits of MSE requirements.

Total Number of Credits for Joint Degree: 63

Master of Business Administration requirements: 33

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 6 elective credits of School of Business courses.

Joint Project Course

Students are required to complete a 3-credit joint project course that integrates the business and engineering disciplines. Common courses used to meet this criteria are BIND 2024 or BQOM 2139. In cases where the 3-credit course completed is a School of Business course, 1.5 credits will count toward the MBA requirements and 1.5 will count toward the 30 credits of MSE requirements.

Total Number of Credits for Joint Degree: 63

Supply Chain Management and Industrial Engineering, MSSCM/MSIE

Program Requirements

This joint degree program, offered by the Industrial Engineering Department of the Swanson School of Engineering and the School of Business, combines quantitative and analytical engineering coursework with coursework in business topics. It positions individuals with an undergraduate degree in engineering or the hard sciences to leverage their skills and become supply chain professionals who can work in a business environment. With a full load of classes, this program can be completed in 4 terms of coursework over a 20-month period and results in two degrees: the MSIE from Swanson and the MSSCM from the School of Business.

A total of 24 credits from the Department of Industrial Engineering (IE) are required, maintaining a 3.0 GPA:

- 12 credits in required classes, comprising the Department's 3-course, required core (IE 2001 - OPERATIONS RESEARCH, IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1, IE 2006 - INTRO TO MANUFACTURING SYSTEMS) plus IE 2100 - SUPPLY CHAIN ANALYSIS from the elective core.

- 12 credits in IE electives:

    - At least 3 elective credits (i.e. one course) must come from the remaining four courses in the elective core: IE 2003 - ENGINEERING MANAGEMENT, IE 2007 - STATISTICS AND DATA ANALYSIS, IE 2088 - DIGITAL SYSTEMS SIMULATION or IE 2188 - SIMULATION MODELING AND APPLICATIONS, and IE 2303 - WORK

DESIGN (Note: students without an undergraduate degree in Industrial Engineering are required to take IE 2303 from the elective core).

- The 9 remaining elective credits can come from the elective core or any other graduate IE course.

A total of 24 credits from the School of Business are required, maintaining a 3.0 GPA:

- 13.5 credits in required classes with a minimum requirement of a C grade or better.
  - BQOM 2401 - STATISTICAL ANALYSIS
  - BQOM 2421 - DECISION TECHNOLOGIES
  - BQOM 2523 - PROCESS ENGINEERING
  - BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
  - BMIS 2074 - STRATEGIC IT IN GLOBAL SUPPLY CHAINS
  - BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
  - BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- 10.5 credits in supply chain management electives. Must complete experience-based learning requirement through a 3-credit consulting field project course focused on supply chain management, a 3-credit global research practicum on supply chain management or complete an internship (with approval from faculty director).

For application instructions and details on the curriculum requirements for the MSSCM portion of the program, please visit the School of Business website.

Master's

Industrial Engineering, MSIE

Requirements for the MSIE Degree

The Master of Science in Industrial Engineering program is very flexible and requires 30 credits of graduate study. It may be obtained with or without a thesis option. With either option, the student is required to take three core courses (IE 2001, IE 2005, and IE 2006) that count for 9 credits, and at least two courses from the elective core (currently IE 2003, IE 2007, IE 2088 or IE 2188, IE 2100, and IE 2303) that count for an additional 6 credits. Students who do not have an undergraduate degree in Industrial Engineering are required to select IE 2303 from this elective core.

- With the non-thesis option, the remaining 15 credits may be freely chosen from the elective core or other departmental graduate courses based on the student's individual interests and the approval of his or her academic advisor. With the permission of the advisor, the student may also take up to 9 of the 15 credits from other relevant graduate offerings outside the department.
- With the thesis option, 9 of the 15 remaining credits may be freely chosen from the elective core or other departmental graduate offerings. In addition, the student must complete a 6 to 8-credit thesis. With this option, approved out-of-department electives could account for 3 of these 15 credits.

In both cases, students who have already taken one or more of the core courses as undergraduates or as part of another graduate program are encouraged to skip such courses and substitute them with more advanced course work in the same area.

Normally the program can be completed in three terms of full-time study or two to three years of part-time study. Many graduate courses are offered in the evening for the convenience of working professionals. Some courses are also offered over the summer term. Information regarding the MS program can be obtained by going to: http://www.engineering.pitt.edu/industrial/graduate/

Department of Mechanical Engineering and Materials Science and Engineering

The Department of Mechanical Engineering and Materials Science (MEMS) offers MS and PhD degrees in both areas, as well as an MS degree in Nuclear Engineering. In addition, the Department offers graduate certificates in Nuclear Engineering and Processing, Properties and Performance of Engineering Metals, which are open to all graduate students within the Swanson School of Engineering. These certificates are also available to qualified post-baccalaureate students who are not seeking to earn an MS degree.

Application Requirements & Deadlines

Applicants are urged to visit the Swanson School of Engineering graduate admissions webpage or graduate catalog for all application requirements and deadlines.

In addition to the SSoE requirements, an applicant applying to any MS or certificate program must have a quality point average (QPA) or cumulative grade point average (GPA) equal to or higher than 3.0 (B) on a 4.0 scale in the same or closely related field. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the program's Graduate Committee.

In some cases, depending on previous background and QPA or cumulative GPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.0 (B) or better in courses that are required to obtain a better background in the chosen field and/ or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.

Academic admission to the graduate program does not imply the granting of financial support.

Materials Science and Engineering

The Department of Mechanical Engineering and Materials Science offers broad-based educational and research programs in materials science and engineering leading to the degrees of Master of Science and Doctor of Philosophy in Materials Science and Engineering. These programs are oriented toward the application of fundamental knowledge of materials science and engineering to the solution of real-world materials problems that impede technological progress. They are designed to educate engineers by providing them with the tools to become successful in research, development, production, management, and teaching.

Basic courses on the structure, properties, and energetics of materials are taken in common. The student, working with faculty advisors, tailors the program to suit individual interests and demands of the student's chosen field of specialization through advanced and specialty courses.

The range of research projects in materials science and engineering reflects the broad spectrum of interest of the faculty. However, interest in the structure and properties of materials and their relationship to materials processing is a common thread that ties together many of the programs. Research is aimed at building an understanding of basic phenomena that will lead to solutions of materials problems at the forefront of technological and social progress.

Current research interests are centered in several areas of metals and ceramics, including corrosion and oxidation; high-temperature materials; materials for energy applications; additive manufacturing; metal-forming processes; phase transformations in metals and ceramics; intermetallic phases; plastic deformation of metals; surfaces and interfaces; thermomechanical processing of steels; ceramic processing and sintering science; electronic properties of ceramics; nanostructured materials; catalytic materials; thin film science and technology; and laser processing of materials.

Six core courses (MSE 2003, MSE 2011, MSE 2013, MSE 2015, MSE 2030, MSE 2067) are offered annually and other graduate courses are offered on a two-year rotation. A full list of MSE courses is available at the end of this catalog page.

In addition to the MS and PhD degrees, the Department also offers a dual-degree program with the Katz Graduate School of Business.

Master of Science Program

The Master of Science in Materials Science and Engineering degree (MSMSE) may be pursued as either a Professional MS Track program (for practicing engineers) or a Research MS Track program. Students can tailor their individual MS program to emphasize different aspects of materials science and engineering (e.g., ceramics, metallurgy, etc.).

Doctor of Philosophy Program

The Doctor of Philosophy Program in Materials Science and Engineering is a research degree leading largely to careers in teaching and research in academia and industry. This program is designed for excellent students. As the studies progress, students develop an understanding at the highest level in their area of specialization that must lead to an original contribution to the field in the PhD dissertation.

Processing, Properties, and Performance of Engineering Metals Certificate

The graduate-level Certificate in Processing, Properties, and Performance of Engineering Metals is designed primarily to meet the needs of working engineers who wish to pursue or enhance a particular aspect of materials science and engineering and of traditional graduate students in science and/or engineering who want to supplement their program with courses having a metals focus.

The academic requirements associated with the Certificate in Processing, Properties, and Performance of Engineering Metals include the completion of fifteen (15) credits of coursework within the Department of Mechanical Engineering and Materials Science.

Mechanical Engineering

The Department of Mechanical Engineering and Materials Science offers Doctor of Philosophy (PhD) and Master of Science (MS) degrees in mechanical engineering. Each graduate program student's plan of study is developed individually under the guidance of a faculty advisor and is carefully tailored to meet his or her needs and objectives while meeting the minimum requirements for the degree.

The graduate curriculum is an integrated program of study in applied sciences and mathematics, and modern computational methods that are pertinent to the research emphasis in the department.

In addition to the MS and PhD degrees, the Department also offers a dual-degree program with the Katz Graduate School of Business.

Master of Science Program

The Master of Science in Mechanical Engineering (MSME) degree may be pursued as either a Professional MS course-only program, suitable for most practicing engineers, or a a thesis-based, Research-Track MS program that requires the completion of a thesis.

Doctor of Philosophy Program

The goal of the Doctor of Philosophy in Mechanical Engineering program is to prepare the student for the rigorous career demands of engineering research either in the industry or academia. Students are expected to develop a commanding knowledge in their area of specialization that must culminate in the form of original contributions to the field of engineering and sciences in the PhD dissertation.

Nuclear Engineering

The Department of Mechanical and Materials Science offers graduate studies in advanced nuclear engineering. The graduate faculty is committed to high-quality research and teaching. The curriculum is an integrated program of study in applied sciences, applied mathematics, and modern computational procedures that are relevant to the research emphasis in the department. The research is focused on: (1) Nuclear Energy Technology (2) Nuclear Operations and Safety (3) Nuclear Materials (4) Nuclear Modeling and Simulations and (5) Radiology and Radiochemistry.

Master of Science Programs

An application for the MS program is judged on the student's prior academic record, the accreditation of the prior degree granting school, and the capability of the department to match the applicant's interest with the program. Students with a Bachelor of Science degree in another engineering field, mathematics, or physics will also be considered for the graduate program with the possibility that prerequisite courses may be required. A part-time program is available for students who are employed in local industries. Part-time students usually carry from three to six credits per term in either day or evening classes.

Applicants who do not meet these requirements will be considered on an individual basis with strong emphasis given to academic promise, career orientation, work experience, and preparation in engineering and related disciplines. In some cases, applicants may be admitted provisionally until certain deficiencies in either coursework or academic achievement are satisfied.

Nuclear Engineering Graduate Certificate

The Department of Mechanical Engineering and Materials Sciences is offering a certificate for students in the Swanson School of Engineering with an interest in nuclear science and technology. Students from the Bioengineering, Civil, Chemical, Industrial, Mechanical, Materials Science, and Electrical/Computer engineering programs may be most interested in obtaining this certificate.

Fifteen units are required to complete the certificate. This certificate may be combined with graduate courses in any one of the School's seven Master of Science (MS) degree programs or the certificate may be awarded stand-alone as a post-baccalaureate certificate. All nuclear courses (labeled NUCE) count toward a Nuclear Engineering certificate. Courses designated as (NUCE/ME) on the Nuclear Engineering MS and Certificate program pages (linked below) will also be recognized for credit toward an MS or PhD in Mechanical Engineering.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. This focus on nuclear operations and safety not only fulfills a recognized educational need but is also designed to take advantage of unique industrial resources in the Pittsburgh area which will greatly facilitate student learning.

The renaissance of nuclear science and technology in the United States has created a need in the marketplace once again for engineers with nuclear knowledge. The University of Pittsburgh aims to meet these marketplace needs by preparing engineers through the graduate certificate in nuclear engineering. Classes are taught by current and former nuclear engineers, including faculty with experience conducting commercial nuclear operations programs for Westinghouse or the Beaver Valley Nuclear Station and with certificates or operation licenses from the US Nuclear Regulatory Commission.

The objectives of the nuclear engineering certificate are:

- To develop the basic competencies needed by science and engineering graduates to contribute quickly and effectively to the renaissance of nuclear science and technology in the United States and abroad.
- To create a benchmark educational program that can serve as a model throughout academia.

Doctoral

Materials Science and Engineering, PhD

Requirements for the PhD Degree

A minimum of 72 credits is required for the PhD in Materials Science and Engineering (MSE). A minimum of 36 of these 72 credits must be didactic coursework beyond the Bachelor of Science (BS) degree. This requirement cannot be satisfied by graduate seminar (MSE 2185 / ME 2085), PhD Research MSE 3997), or PhD Dissertation (MSE 3999). The coursework consists of (I) MSE core (six required courses that students must take in the first year of enrollment), (II) a group of elective courses tailored for each student's research and as required for technical broadening beyond the MSE focus, (III) course(s) to address mathematical/numerical skills, and (IV) PhD Research credits. The student's advisor must approve the course sequence selection.

Transfers: Students can transfer up to 30 didactic course credits from an MS or equivalent degree as a block, subject to approval by the MSE graduate program. While students can transfer up to a 30-credit block from a previous MS degree, they still need to satisfy the core MSE course requirement and the math requirement described below. If a student has already taken similar contents to the core MSE courses, content waivers could be requested on a case-by-case basis. In all cases, students need to take at least 12 credits of didactic MSE graduate courses, even if core class content waivers are granted.

Program Milestones: In addition to the credit requirements, students must complete the PhD-required milestones, as described in the MSE graduate handbook, including passing the preliminary (qualifying) exam, comprehensive exam (along with the dissertation proposal), and dissertation defense

Credit Requirements are elaborated below:

Core Courses Requirement

The 18-credit core course component must be taken within the first year of the program*.

- MSE 2003 - STRUCTURE OF MATERIALS
- MSE 2011 - ENERGETICS
- MSE 2013 - KINETICS IN MATERIALS SCIENCE

- MSE 2015 - ELECTROMGNTC PROPS MATERIALS
- MSE 2030 - MECHANICAL BEHAVR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1**

Typically, full-time PhD students are expected to carry a course load of three courses per semester in addition to research credits (MSE 3997) until their coursework is completed. If a student's background is insufficient for a given graduate course, the student must prepare by attending appropriate undergraduate courses or through independent study. This should be arranged in consultation with the student's faculty advisor and the lecturing faculty of the relevant course(s). Students must take the PhD Preliminary (qualifying) exam at the end of their second semester as they complete the core courses. Students who fail in their first attempt can be allowed a second attempt in the following semester upon approval of their research advisor. Students who fail the exam at both attempts are dismissed from the MSE PhD program.

Note:

*:A student must score at least a B (3.0) in each of these six classes. If a student does not get at least a letter grade of B, the class must be taken a second time. All didactic classes must be successfully completed before the student can apply for admission to PhD Candidacy.

**:If a student has a background in MSE such as a bachelor's degree in Materials Science and Engineering, MSE 2067 can be waived upon the permission of the MSE graduate program. In this case, one (1) more advanced/technical elective course must be substituted for MSE 2067 to complete the requirements for the PhD degree.

Advanced and Technical Elective Requirement

In addition to core courses, a student must take at least 15 credits from advanced and technical elective courses in the MSE graduate program and relevant science and engineering disciplines. As a part of advanced and technical elective courses, up to twelve (12) credits of didactic coursework counting towards the 36 course credits requirement may consist of non-MSE courses in other Engineering, Science or Mathematics disciplines with consultation of the student's advisor and approval of the MSE graduate program. The selection of courses, in general, must be approved by the student's Major Research Advisor.

Mathematics Requirement

A student must take one mathematics/numerical course for three (3) credits beyond those required for the materials science and engineering Bachelor of Science degree. This can be satisfied by courses from the following list: ME 2001, ME 2002, ME 2060, ME 2063, MSE 2012, MSE 2049 or as approved by the MSE graduate program. This requirement may be waived if it was met in a previous graduate program which the student attended before entering.

Graduate Seminar Requirement

All PhD students are required to register for Graduate Seminar (MSE 2185) in the fall and spring semesters, unless on full-time dissertation (FTD) study, enrolled part-time or excused by the MSE graduate program. A satisfactory grade is based on attendance.

PhD Research Requirement

Each student must also have at least thirty (30) credits of MSE Research (e.g. MSE 3997 or MSE 3999). Before passing the comprehensive examination (dissertation proposal), students should register for MSE 3997 (PhD Research). After passing the comprehensive examination, students should register for MSE 3999 (PhD Dissertation).

The requirements described in these guidelines represent the minimum requirements. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD advisor for better preparation for a given research area.

Mechanical Engineering, PhD

The goal of the Doctor of Philosophy program in the Mechanical Engineering and Materials Science (MEMS) Department is to develop the student for the rigorous career demands of engineering research either in the industrial or academic fields. The student is educated at the pioneering edge of technical, management, systems design, and decision-making concepts. This work requires a strong background in mathematics and one of the specialty areas of mechanical engineering. The PhD student is expected to attend full time. It is possible, however, to seek candidacy as a part-time student with the stipulation that the PhD candidate must spend at least one full-time academic year on campus.

Plan of Study

A minimum of 72 credits is required for the PhD degree. Of the total 72 credits, a minimum of 36 credits must be completed as coursework at the 2000 or higher levels beyond the Bachelor of Science (BS) degree. Students entering the PhD program with a master's degree in mechanical engineering or a closely related field are required to complete at least 12 graduate course credits. Students must take and pass the PhD preliminary (qualifying) exam at approximately the end of their first year. Students who fail the qualifying exam in their first attempt will have a second chance in the following semester. Students who fail the exam at both attempts cannot proceed with the PhD program and are terminated.

Each student must also have:

- Thirty (30) credits of 3000-level research, including at least eighteen (18) credits of ME 3997 (PhD Research)

The course requirements described in these guidelines are a minimum requirement. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD Committee for better preparation for a given research area. Students are urged to review the Graduate Handbook available on the department webpage for details and additional requirements for coursework.

Seminar requirement: All PhD students must register for Department Seminar (ME 2085) and attend unless excused by the program coordinator.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Total Credits: 72

Graduate Certificate

Nuclear Engineering Certificate

Graduate Certificate in Nuclear Engineering Overview

U.S. domestic nuclear capacity has the potential to scale from ~100 GW in 2023 to ~300 GW by 2050 based on power system decarbonization modeling, which suggests that the U.S. will need ~200 GW of additional nuclear generation capacity, while creating up to 275,000 high-paying jobs. A key need in the nuclear technology marketplace is for engineers from diverse disciplines who possess knowledge of nuclear phenomenology and technology. The University of Pittsburgh meets these marketplace needs by preparing engineers through the graduate certificate in Nuclear Engineering.

Students have the option to complete this certificate 100% online.

Objective

The objective of the nuclear engineering certificate is to provide the advanced competencies needed by science and engineering graduates to contribute quickly and effectively to light water and advanced nuclear science and technology in the United States and abroad.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. The certificate may be combined with graduate courses in any one of the seven MS degree programs (Bioengineering, Chemical, Civil, Electrical and Computer, Industrial, Materials Science and Mechanical Engineering) or taken as a post-baccalaureate certificate. The focus on nuclear operations and safety not only fulfills a recognized educational need, but also takes advantage of unique industrial resources in the Pittsburgh area which greatly facilitate student learning.

All nuclear courses (labeled NUCE) count toward a Nuclear Engineering certificate. Those labeled NUCE/ME can also count toward an MS or PhD degree in Mechanical Engineering.

Requirements

All students must successfully complete five of the nuclear courses listed below in order to earn the graduate certificate. Nuclear Engineering certificates are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Contacts

If you have questions about the curriculum, please contact either the Director or Associate/Academic Director of the Nuclear Engineering program. Current contact information can be found here.

If you have questions about registration, please contact the Graduate Administrator at mems_gradadmin@pitt.edu.

Nuclear Engineering Graduate Courses

- NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING **(NUCE/ME)**
- NUCE 2101 - NUCLEAR CORE DYNAMICS
- NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL **(NUCE/ME)**
- NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY
- NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
- NUCE / MSE 2110 - NUCLEAR MATERIALS
- NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- NUCE 2113 - RADIATION DETECTION AND MEASUREMENT
- NUCE / MSE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS **(NUCE/ME)**
- NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY
- NUCE 2120 - MATHEMATICALL MODELING OF NUCLEAR PLANTS
- NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
- NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- NUCE 2130 - THE NUCLEAR FUEL CYCLE
- NUCE 2131 - METAL COOLED REACTORS
- NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY

Note:

Courses designated as (NUCE/ME) in above list will also be recognized for credit toward an MS or PhD in Mechanical Engineering; these courses include NUCE 2100, NUCE 2102, and NUCE/MSE 2115.

Processing, Properties, and Performance of Engineering Metals Certificate

The graduate-level Certificate in Processing, Properties, and Performance of Engineering Metals is designed primarily to meet the needs of working engineers who wish to pursue or enhance a particular aspect of materials science and engineering and of traditional graduate students in science and/or engineering who want to supplement their program with courses having a metals focus.

The academic requirements associated with the Certificate in Processing, Properties, and Performance of Engineering Metals include the completion of fifteen (15) credits of coursework within the Department of Mechanical Engineering and Materials Science as follows:

Required Courses

Students must complete the following two (2) courses:

- MSE 2030 - MECHANICAL BEHAVR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Electives

Students may select three (3) of the following courses as electives:

- MSE 2046 - PHYSICAL METALLURGY ENGR ALLOYS
- MSE 2047 - ANALYSIS AND CHARACTERIZATION AT THE NANO-SCALE
- MSE 2055 - PRIN OF SOLIDIFICATION ENGRNG
- MSE 2088 - POWDER PROCESSING OF MATERIALS
- MSE 2090 - CORROSION AND FAILURE ANALYSIS

Note:

If students have a bachelor's degree in Materials Science and Engineering, MSE 2067 can be waived upon the permission of the Program Director. In this case, one (1) more elective course must be substituted for MSE 2067 to complete the requirements of the Certificate. All courses must be taken on campus.

Master's

Materials Science and Engineering - Professional Track, MSMSE

The professional MS track is a coursework-based Master's degree in Materials Science and Engineering (MSE) suitable for both part-time students currently working in industry and full-time students.

MS in MSE - Professional Track Requirements

The professional track consists of a minimum of 30 course credits (equivalent to 10 didactic courses). There are no thesis or comprehensive examination requirements for this degree. Up to nine (9) credits of didactic coursework counting towards the 30 course credits requirement may consist of non-MSE courses in other Engineering, Science or Mathematics disciplines that are approved by a student's advisor. At least 21 didactic course credits must be obtained from MSE 2000 and 3000 courses, **not** including Graduate Seminar (MSE 2185 or ME 2085), MS Research (MSE 2997), and MS Thesis (MSE 2999). Each student is encouraged to complete an independent graduate project (MSE 2998) after consultation with the student's faculty advisor, which may account for 3 of the 21 required MSE credits. Students with non-MSE backgrounds are required to take for credit introductory courses (e.g. MSE 2067 or equivalent). Consistent with Regulations Governing Graduate Study (RGGS) at the University of Pittsburgh, MS degrees in MSE are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Materials Science and Engineering - Research Track, MSMSE

The research track is a thesis-based Master's degree in Materials Science and Engineering (MSE) suitable for full-time students who have the intention to pursue a PhD or are strongly oriented toward a research career. The University transcript will include an entry indicating that a student is in the research MS track.

MS in MSE - Research Track Requirements

The Research Track MS degree requires a minimum of 30 credits of graduate-level course and research-based study, including at least 24 didactic course credits. A minimum of 15 didactic course credits must be derived from 2000- and 3000-level MSE courses, not including credits associated with Graduate Seminar (MSE 2185 or ME 2085), MS Research (MSE 2997), or MS Thesis (MSE 2999). At most up to nine (9) credits of coursework counting towards the required minimum of 24 course credits may consist of technical didactic courses in other non-MSE Engineering, Science or Mathematics disciplines that are approved by a student's advisor. Students with non-MSE backgrounds are required to take for credit introductory courses (e.g. MSE 2067 or equivalent). The student's advisor must approve the course sequence selection. In addition to coursework requirements, a minimum of six (6) credits of MS Thesis (MSE 2999) are required. Consistent with Regulations Governing Graduate Study (RGGS) at the University of Pittsburgh, MS degrees in MSE are conferred only on those students who have completed all courses required for the degree with an average grade of least a 3.00 GPA.

MS Thesis

An MS student should initiate research work as early as possible. Once thesis preparation has begun, a student must register for thesis credits (MSE 2999) in each succeeding term until successful completion of the thesis and a final oral defense and comprehensive exam. The MS thesis document is at least expected to be a report on independently conducted research and must adhere to the School of Engineering defined style and format.

The purpose of an MS thesis oral defense is to evaluate an MS thesis and the student's command of the research subject. The successful completion of a defense is a requirement for the MS degree. The thesis examining committee consists of at least three members of the graduate faculty chaired by the student's advisor and approved by the program. After successfully completing a defense, a student must deposit an electronic and/or hard copies of the approved thesis in accordance with the current guidelines for thesis submissions available from the School of Engineering or the MSE Graduate Program.

Part-time students may pursue the research MS track. However, they must recognize that, although their thesis topics may be related to the broad technical area of their employment, results of work-related routine technical activities, analysis, surveys, or studies conducted for employers are not acceptable for inclusion in MS theses. Furthermore, part-time students should become aware of the University Intellectual Property Ownership Policy before undertaking theses. Prospective students must clarify all of these issues before contemplating a research-based MS degree.

Mechanical Engineering - Professional Track, MSME

Master of Science - Professional Track

The Master of Science, Professional Track is designed for individuals seeking advanced study in mechanical engineering. The program is oriented toward full-time students seeking a career in industry, and part-time students currently working in industry.

At the beginning of the program, the student must select at least one of the following study tracks with the purpose of developing mastery of specified knowledge and skills in one or more of the following areas: (1) Advanced Manufacturing and Design; (2) Computational and Data-Driven Engineering; (3) Dynamic Systems and Controls; (4) Solid Mechanics; and (5) Thermo-Fluids Engineering. Course plans for each study track can be found here.

Completion of the professional master's degree requires a total of 30 didactic letter-graded course credits. At least one of the courses must be a mathematics course from the following list:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

Students may take up to 9 graduate course credits from other engineering, mathematics, or science departments with the approval of their faculty advisor.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Mechanical Engineering - Research Track, MSME

Master of Science - Research Track

The Master of Science, Research Track is designed for individuals seeking an in-depth research experience in mechanical engineering. Students will gain a deep understanding of their area of interest through an extended research project under the supervision of a major research advisor. This option is particularly appropriate for students interested in pursuing a PhD degree. Students working under the MS research track are required to pursue a thesis project and present a thesis that demonstrates marked attainment in some area of the student's major subject, as well as acquisition of the methods and techniques of scientific investigation.

During the first term in the program the student must submit a plan of study for approval by the department. This plan of study should be prepared under the guidance of the student's major advisor.

Completion of the MS degree requires at least 24 didactic letter-graded course credits and at least six credits of thesis research (ME 2999 - M. S. THESIS). At least one of the didactic courses must be a mathematics course from the following list:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

Students may take up to 9 graduate course credits from other engineering, mathematics, or physics departments with the approval of their faculty advisor. In addition, each full-time MS student is required to register for ME 2085 - GRADUATE SEMINAR during each fall and spring terms unless excused by the program coordinator.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Nuclear Engineering, MS

The Nuclear Engineering Graduate Program

The Department of Mechanical Engineering and Materials Science offers graduate studies in nuclear engineering. Broad areas covered in the curriculum include: (1) Nuclear Energy Technology, (2) Nuclear Operations and Safety, (3) Nuclear Materials, (4) Nuclear Modeling and Simulations, and (5) Radiochemistry and Radiation Measurement.

Students have the option to complete this program 100% online.

Degree Programs

Master of Science Program

The degree requirements can be met by either of the two options described below. Upon entering, the student plans a program of study with the aid of a faculty advisor.

Thesis Option (Research M.S. Track)

The research MS track is primarily for those students focused on technology development. Further, full time graduate students who are supported by department scholarships must choose the research MS track. The thesis examining committee will consist of at least three members of the faculty recommended by a major advisor and approved by the MEMS Department Chair. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the Office of the Dean.

Requirements

Completion of the research MS degree in Nuclear Engineering requires at least 24 didactic course credits and at least six credits of thesis research (ME 2999 - M. S. THESIS).

The didactic courses must also include at least five of the nuclear engineering courses listed below (totaling at least 15 credits).

Students may take up to 9 graduate course credits (6 for MS/MBA students) from other engineering, mathematics, or physics departments, as approved by the Nuclear Engineering program directors. Students must maintain a minimum cumulative QPA of 3.0.

Non-Thesis Option (Professional M.S. Track)

The professional MS program is oriented toward full-time students seeking a career in industry, and part-time students currently working in industry. Full-time Grad Student Research-supported students might change to the Professional MS track, upon approval by the sponsoring faculty advisor and the graduate program.

The professional master's degree requires the completion of at least 30 course credits of graduate study approved by the Nuclear Engineering program directors, with at least a 3.00 GPA. No more than six credit hours may be granted as transfer credit for work done at another accredited graduate institution. All credits earned in the ME master's degree program must be at the graduate level (the 2000 or 3000 series courses).

Requirements:

To complete the requirement of 30 graduate credits for the Professional MS, students must complete:

At least five of the nuclear engineering courses listed below (totaling at least 15 credits)

Up to 9 graduate credits (6 for MS/MBA students) from courses offered in other engineering departments or in the mathematics or physics departments (totaling up to 9 credits) as approved by Nuclear Engineering program directors.

MS/MBA students are also required to complete an integrated project course. Please contact the Graduate Directors for a copy of the guidelines for the integrated project course.

Nuclear Engineering Graduate Courses

- NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING **(NUCE/ME)**
- NUCE 2101 - NUCLEAR CORE DYNAMICS
- NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL **(NUCE/ME)**
- NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY
- NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
- NUCE / MSE 2110 - NUCLEAR MATERIALS
- NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- NUCE 2113 - RADIATION DETECTION AND MEASUREMENT
- NUCE / MSE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS **(NUCE/ME)**
- NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY

- NUCE 2120 - MATHEMATICALL MODELING OF NUCLEAR PLANTS
- NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
- NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- NUCE 2130 - THE NUCLEAR FUEL CYCLE
- NUCE 2131 - METAL COOLED REACTORS
- NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY
- ME 2097 - SPECIAL STUDY MECHANICAL ENGRG (as agreed with Advisor)

Note:

Courses designated as (NUCE/ME) in above list will also be recognized for credit toward an MS or PhD in Mechanical Engineering; these courses include NUCE 2100, NUCE 2102, and NUCE/MSE 2115.

If you have questions about the curriculum, please contact either the Director or Associate/Academic Director of the Nuclear Engineering program. Current contact information can be found here.

If you have questions about registration, please contact the Graduate Administrator at mems_gradadmin@pitt.edu.

School of Health and Rehabilitation Sciences

School of Health and Rehabilitation Sciences

At the University of Pittsburgh School of Health and Rehabilitation Sciences (SHRS), we are driven by the possibilities of what can be achieved. Read more about SHRS's mission, values and vision on About | Pitt SHRS .

Philosophy of Graduate Education

The faculty of the School of Health and Rehabilitation Sciences (SHRS) believes that it has a major responsibility in graduate education to broaden the perspectives and awareness of students in the health professions toward high standards of scholarship and recognition of its relevance to technological and human needs.

Graduate programs provide depth in a substantial area of the student's profession and foster critical thinking through a variety of scholarly and creative activities, thereby generating an atmosphere of scientific inquiry. These substantive areas include knowledge of the scientific basis for the development of advanced clinical expertise within the professions represented in the school. An equally important function is to encourage health professionals to be sensitive to the needs of the human beings they are serving and to adapt their methods to the changing social, economic and technological environments in which they practice.

Accordingly, these professionals should develop the capacity to perform newly emerging and expanding roles of roles of advanced clinical services, research, teaching, and administration in the health care systems, advancing the frontiers of their particular field of expertise.

On the assumption that the accumulation and mastery of basic factual knowledge have been accomplished, graduate education focuses on synthesis and integration to allow for new systemic insights into the application and extension of that knowledge. The linkage of various educational experiences with research projects enhances problem-solving skills. Through interdisciplinary and multi-disciplinary didactic, clinical and research experiences, individual professional identity is fostered, while the ability to function both on an independent and collaborative level with colleagues from other disciplines is enhanced.

- Doctor of Occupational Therapy (OTD)
- Doctor of Physical Therapy (DPT)
- Doctor of Physical Therapy (DPT)/Doctor of Philosophy in Bioengineering (PhD)
- Doctor of Medical Science (DMSc)
- Communication Science and Disorders (PhD)
- Rehabilitation Science (PhD)

Certificate Programs

- Advanced Practice Certificate in Implementation of Evidence in Clinical Practice
- Health Data Analytics
- Leadership in Health Informatics

Admission

SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Each program at SHRS has specific admission requirements. Please visit See Yourself At SHRS | Pitt SHRS for detailed information.

Application Procedures

Application portals vary by program. Please visit the SHRS website for detailed information.

Admission Status

Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

Full Status: For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. International applicants must meet the admissions guidelines described under "Admission of Students from Other Countries." Qualification for advanced study normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may be considered for the award of an advanced degree.

Provisional Status: Applicants who are graduates of a recognized college or university, but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate course program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

Special Status: Students may be granted temporary admission as "special status" under the following circumstances:

1. Individuals who are seeking advanced degrees, but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be completed within the first term of registration.
2. Individuals not seeking an advanced degree but with specific qualifications for one or more courses, including courses required for licensing or certification, may register for such courses subject to review by the department and the dean. Schools providing such an opportunity may specify the number of credits or courses for which an individual may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the individual is subsequently admitted to a graduate degree program.

Admission of Students from Other Countries

The University of Pittsburgh welcomes applications from students in other countries. An inquiry from a prospective student from abroad should receive from the department or school a prompt response that includes a description of the program(s), the necessary application forms, and instructions concerning the completion of an application, including information about applying online.

Academic credentials must be originals written in the language in which credentials are normally issued. Certified translations must accompany credentials which are not in English as well as an academic credential evaluation from Educational Credential Evaluators, Inc. or Word Education Services, Inc.

Each foreign applicant must provide clear evidence of proficiency in English. (See English Language Proficiency.) In addition, each applicant must provide evidence of adequate financial resources for the estimated length of study at the University of Pittsburgh. The Office of International Services (OIS) will determine whether or not this requirement has been satisfied by the applicant.

When a department or school has completed its evaluation of the credentials of an applicant, it notifies the candidate that he or she is or is not academically qualified for admission. In all cases, a duplicate copy of the letter of admission and award of financial aid, if any, must be sent to OIS. Upon satisfaction of all academic and non-academic requirements, the OIS will issue, as appropriate, the Form I-20 Certificate of Eligibility for Non-Immigrant "F-1" Student Status or Form DS-2019 Certificate of Eligibility for Exchange Visitor "J-1" Status. Along with visa documents, OIS will send information concerning arrival and orientation. The University reserves the right, even after the arrival and enrollment of a student from another country, to require, at his or her own expense, individual curricular adjustments whenever particular deficiencies or needs are found. This could include enrollment without credit in additional course work in English as a foreign language or in courses prerequisite to his or her regular course of study. New students from abroad should be encouraged to use the services of OIS to help them in their adjustment to the United States and to facilitate their total educational experience.

English Language Proficiency

Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. The determination that the applicant has sufficient proficiency is made by the admitting department or school, subject to the Assessment for English Language Proficiency for Admission Academic Regulation.

Non-Degree Status: Applicants who do not wish to enroll in a degree program may apply for admission as non-degree students to take one or more courses of particular interest if written permission is obtained from the course instructor. Non-degree students are permitted to take

a total of six (6) credits. A non-degree student wishing to register for more than 6 credits must receive approval from the Department Chair/Program Director. Information concerning such requests should be directed first to the Director of Admissions, 3396 Fifth Avenue , University of Pittsburgh, Pittsburgh, PA 15213 or via email at admissions@shrs.pitt.edu.

Deferral of Admission

Requests to defer admission must be submitted by the student, in writing, BEFORE the start of the first term of admission. If approved, the student must pay the tuition deposit (if required) which will be held by Student Financials and applied to their account, if enrolled. If they do not enroll, the deposit is forfeited.

Request for Readmission

In each of the circumstances below, the student will be discontinued from PeopleSoft and must initiate reinstatement to rejoin the program by contacting their program director. Reinstatement is not guaranteed, and the program director may require a student to formally reapply. Tuition deposits will not be refunded after the start of the term.

- If a student begins their 1st term and then drops all courses BEFORE the add/drop deadline.
- If a student begins their 1st term and then requests to withdraw from all classes AFTER the add/drop deadline and before 60% of the term has passed, the student would need to go through the Student Appeals office: Tuition Adjustments | Student Payment Center and their tuition will be prorated based on the last day of attendance.
- In extenuating circumstances, at the discretion of the Department Chair and the Associate Dean, a student could request a late drop of the enrollment after the add/drop deadline which would remove the courses from their transcript and their bill.

SHRS Academic Regulations

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic

integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights.

SHRS Guidelines on Academic Integrity

In addition to the University-wide regulations and standards detailed in the section on General Academic Regulations, each student in SHRS is expected to be familiar with these school-specific regulations and academic standards:

- students enrolled in accelerated programs must maintain a 3.000 minimum GPA to progress from the undergraduate to graduate portion of their program.
- it is the student's responsibility to review her/his academic standing, to identify graduate program requirements and prerequisites for intended graduate program(s) and to monitor their completion.
- all required and prerequisite coursework must be taken for a grade, when letter grade option is available, unless approved by the Department Chair/Program Director.
- students must receive a grade of C or better in all courses required by their program curriculum.
- students must earn a grade of C or higher in any course intended to count towards their SHRS major and as written in the SHRS Academic Advisement Report. This includes general education requirements, pre-requisites, and elective courses that are part of the degree requirements.
- any student who does not earn a C or better in any coursework should consult with their academic advisor.
- all Pitt grades will still appear on the transcript and be calculated into the GPA unless the student repeats the course. However, credits from courses in which students have earned unacceptable grades will not be counted toward graduation.
- students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better.
- students will not be permitted to register for a course until they attain a C or better in its prerequisites.
- failure to receive an acceptable grade after the allowed opportunities to complete a required course may result in the student being dismissed from the program and SHRS

Allowable Credits

Transfer Credits

The completion of requirements for advanced degrees must be satisfied through registration at the University of Pittsburgh. Graduate students already enrolled may-when approved in advance by their Department Chair and the Dean-spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree. In such instances, neither the University nor any of its components are responsible for providing any financial assistance to the graduate student.

Transcripts certifying graduate courses completed at another institution prior to admission to the University of Pittsburgh should be submitted at the time of application and will be evaluated for acceptability as transfer credits early in the student's graduate career by the advisor and Department Chair.

Transfer credits will not be accepted for courses in which a grade lower than B (GPA= 3.000), or its equivalent, has been received. No credit is granted toward an advanced degree for work completed in extension courses, correspondence courses, or in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at the institution and the institution has an accredited program.

Master of Arts and Master of Science degrees - no more than six (6) credits may be transferred. The Office of Student Affairs will enter the transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Professional master's degrees - no more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another accredited graduate institution.

Doctor of Philosophy - up to 30 credits taken at the graduate level (2000 & 3000 level courses) toward a master's degree may be transferred. In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No undergraduate credits (1000 level course) may be applied towards the doctoral degree. All transfer credits must be submitted to and approved by the Associate Dean of Graduate Studies.

Advising

Master and Clinical Doctorates

Master's students are assigned an advisor who could be either a member of the SHRS faculty holding a regular, research, clinical, or adjunct appointment or an SHRS academic advisor, having at least a master's degree. The director of the program to which the student has been accepted selects advisors for SHRS graduate students.

Students are notified of their advisor after their enrollment. It is the student's responsibility to contact the advisor to schedule an initial meeting.

Doctor of Philosophy

PhD students are assigned to an academic advisor in the student's main area of specialization. The academic advisor and student will plan course work and other experiences to enable the student to meet program requirements and her/his academic goals.

Change of Advisor

If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a Change of Advisor form, located on the SHRS Student Resource Hub under Student Services & SHRS Registrar. The student must complete the form and secure the required signatures and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate a change of advisor procedure.

Academic Advisement Report (AAR)

AAR reports list all your degree requirements, and as you progress through your program enrolling in courses and completing requirements, updated information directly populates into the report from PeopleSoft. Eventually the whole plan will show as satisfied, indicating that your degree is complete.

These reports will be used by the SHRS Registrar to certify you for graduation.

The instructions on how to pull your AAR can be found at this link: Academic Record/Academic Advisement Report (AAR) | Office of the University Registrar

Credential Overlap

Students may pursue dual degrees within SHRS or between SHRS and another school at the University.

- The student must complete all requirements necessary to complete each degree.
- The student must also work with the academic advisors in both programs to monitor progress toward each degree.
- Students must contact SHRS Admissions Office to be admitted prior to the midpoint of their studies.

More Information is available on: Credential Overlap | Office of the Provost | University of Pittsburgh

Internships and Clinical Education

An internship is a period of supervised, planned, practical experience providing an opportunity to apply previously learned skills or theories designed to complement the didactic phase of the academic program. The internship may be primarily clinical, teaching, or administrative in nature. Many programs require internship experiences, coordinated by the student's advisor or an identified Clinical Coordinator, who provides oversight regarding internship objectives and activities, administrative and contractual relationships with the site, and ensures that students meet all SHRS and site criteria.

Clinical Education

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply their knowledge in a supervised environment to develop clinical skills and judgment.

Independent Studies

Independent Study provides an opportunity for the student to complete an intense, self-designed project with faculty supervision in an area of special interest. A maximum of six (6) independent study credits may be accepted toward meeting degree requirements for the program.

The independent study must be supervised by an SHRS approved faculty member. To register for an independent study, the student must:

- Identify and develop an independent study project with independent study supervisor to include objectives for the independent study, methods to be used to meet those objectives, and measurable assessment methods for determining degree to which objectives were met. Independent studies must have an academic focus, and the academic rigor of the objectives and assessment methods will determine the number of credits to be earned.
- Complete the Independent Study Form, which will need to be signed by the Independent Study supervisor, academic/faculty advisor, and Associate Dean for Graduate Studies.
- Submit the completed Independent Study Form to Student Services to receive a permission number for enrollment.
- The form can be found on the Student Resource Hub under forms.

Thesis and Non-Thesis Options and Procedures

Thesis Option

A thesis is a written report of an investigative study conducted by the student during their graduate program. The completion of a thesis requires that the student has the necessary knowledge and skills to conduct a valid study, and that the thesis project is the investigation of a research question appropriate to their focus of study. The thesis is usually a concluding experience in Master of Science programs and completed under the guidance of a research mentor.

Completion of a thesis may be required for specific graduate programs within SHRS. Students should refer to the specific program requirements to determine if a thesis is required for completion of their program. Students should refer to their program requirements for specific guidelines for completing the thesis, the minimum number of thesis credits required, and for required courses.

Non-Thesis Option

Many SHRS graduate programs provide a non-thesis option as an alternative to completing a thesis. The non-thesis option is program-specific and reflects the culminating assignment to demonstrate the student's mastery of their area of study. Some programs require the student to complete the non-thesis option while others may give the student the opportunity to choose between completing a thesis or the non-thesis option. Students should refer to their home program/department for specific information on the non-thesis option.

Scholarly Paper

As part of the non-thesis option for a Master of Science degree, some programs/departments may require a scholarly paper. A scholarly paper is of publishable quality in a focused area.

Examples of scholarly papers include but are not limited to substantial reviews of the literature on a particular topic, development of health care policies, or development of evidence-based treatment procedures. Students who complete this option must register for HRS 2926 Scholarly Paper for 1-6 credits depending on the requirements of their plan of study.

Comprehensive Examination

Comprehensive Examinations are required for many graduate programs in SHRS. Successful completion of the Comprehensive Examination is needed for the student to demonstrate mastery of their field of graduate study. Each individual department/program will specify the content and procedure for the scheduling, administration, and grading of the Comprehensive Examination. Please refer to individual program descriptions or handbooks for details of Comprehensive Examinations for each program.

Enrollment Status

Graduate students cannot enroll for more than (15) units without approval from the SHRS Registrar. Only the SHRS Registrar's can enroll a student after approval is received for the additional unit(s).

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students.

Students cannot enroll in courses that meet at the same time.

Active Status

All graduate students must register for at least 1 credit or full-time dissertation study during the 12-month period preceding graduation. PhD students who have completed their course work and have successfully passed their dissertation proposal must be enrolled in dissertation credits or FTDI (Full time Dissertation Study) in the fall and spring terms to maintain active status.

Inactive Status

A student who has not registered for at least 1 credit or for full-time dissertation study during a 12- month period will be transferred to inactive status. Inactive students cannot apply to graduate or take Preliminary or Comprehensive Examinations. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by their advisor and committee.

Consult your academic advisor about the proper procedure of repeating a class and for information on how this will affect your grades and the calculation of your Grade Point Average (GPA). When you repeat a class, you must officially enroll and pay for the class again.

University policy prohibits any student from attending a class without being officially enrolled for that class. A repeated course has a notation appearing underneath the previous course taken designating that it is excluded from the GPA. The original course and grade will always remain on your record/transcript.

The course repeat policy for the University can be found at: Course Repeat | Office of the Provost | University of Pittsburgh.

All SHRS graduate programs adhere to the University's grading system and grading policies for graduate students. Please refer to the Office of the University Registrar on Grades or the University Catalog on Grading and Records.

Satisfactory/No Credit (S/NC) grading option

Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a B or better.

Academic Standing for Graduate and Professional Students | Office of the Provost | University of Pittsburgh

Masters

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all professional masters within five years (including both full time and part time students). Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

PHD/Doctoral

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years or within eight years if the student has received transfer credits. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full-time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Extension

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the Associate Dean of Graduate Studies for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension.

Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

A Leave of Absence (LOA) allows SHRS students to temporarily pause their studies while maintaining good standing with the school. LOAs are available starting in the second term of enrollment.

A LOA is not required for summer if your program does not mandate summer enrollment.

Use this link for SHRS - Leave of Absence to submit a formal request.

Failure to Communicate

Students should stay in regular communication with their academic advisor and faculty members.

To facilitate this, students are strongly encouraged to review the SHRS Policy on Failure to Communicate which is located on the SHRS Student Resource Hub.

Graduation Requirements

Graduation requirements for a graduate degree from SHRS are as follows:

- Satisfactory completion of required credits
- Minimum cumulative GPA 3.000
- GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree.
- Completion of all requirements for the program in which student has enrolled.
- No outstanding D, F, G or I grade in a required course.

- The student AAR (Academic Advisement report must show all requirements satisfied.
- A student must be considered an "active student" at the time of graduation; they must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions.
- Students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating.

An application for graduation must be submitted by the student in PeopleSoft the term prior to the graduation term. A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Credits Required

The number of credits required for the master's degree varies among the departments within SHRS, but all departments require at least 30 credits. Many departments offer a variety of emphases. Individual departments should be contacted for the requirements specific to the degree.

SHRS Faculty

SHRS Faculty

SHRS Programs and Course Offerings

Department of Communication Science and Disorders (CSD)

Master of Arts and Master of Science Degrees in Communication Science and Disorders

The Communication Science and Disorders program provides students with a specialized academic education in communication processes and disorders, including disorders of speech, language, swallowing, hearing and balance. It includes the knowledge and skills needed to critically evaluate empirical research, and clinical expertise in the diagnosis and treatment of individuals having communicative disorders.

The master's degree program has two concentrations: one in speech-language pathology, and one in audiology. There is also an option for meeting educational certification requirements to be a speech-language pathologist in Pennsylvania schools. For students interested in the clinical practice degree in audiology, please see the section on the Doctor of Audiology (AuD) degree in this bulletin.

A research track (resulting in the Master of Science degree) in speech-language pathology is also available for students electing to do a master's thesis.

The Master of Arts / Master of Science degree (MA / MS) education program in speech-language pathology is a residential program at the University of Pittsburgh that is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Contact Information for Admissions

Email: csdadmissions@shrs.pitt.edu
Administrator of Admissions for master's degree Programs: 412-383-3938

General Admission Requirements (CSD MA/MS) Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.
- Applications are accepted online through CSDCAS.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC). This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program:

- Biology coursework provides knowledge in areas related to human or animal sciences (eg., biology, human anatomy and physiology, neuroanatomy and neurophysiology, human genetics).
- Chemistry or physics coursework provides foundational knowledge in areas below.
    - Chemistry: Substances and compounds that are composed of atoms and molecules, and their structure, properties, behavior, and the changes that occur during reactions with other compounds. This knowledge contributes to better aquisition and synthesis of the underlying processes of speech and hearing science.
    - Physics: Matter, energy, motion, and force. This knowledge contributes to a better appreciation of the role that physics plays in everyday experiences, society, and technology.
- Social and/or behavioral sciences coursework provides knowledge in the analysis and investigation of human and animal behavior through controlled naturalistic observation and disciplined scientific experimentation.
- Statistics and/or research methods coursework focuses on learning from data and from measuring, controlling, and communicating uncertainty. This coursework provides the knowledge essential for controlling the course of scientific and societal advances. The course should not focus soley on research design.

These requirements must be met before students enroll in the MA/MS program courses.

Observation

Students enrolling in the speech-language pathology program must complete at least 25 total hours of guided clinical observation to be eligible for clinical certification by the CFCC. Prior to beginning the MA/MS SLP program courses students must complete a minimum of 15 of the total 25 observation hours.

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency (Duolingo, IELTS, or TOEFL) within 12 months of the due date of the application. Applicants from Quebec Province are required to submit English Language Proficiency scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and English Language Proficiency scores have been received.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the master's degree program is regulated by the *SHRS Academic Standards*, as well as the departmental *Student Handbook on Academic and Clinical Requirements*.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with their advisor. To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.0 within their next two terms of study. Failure to do so may result in the student's immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Clinical Science (CScD) Degree in Medical Speech-Language Pathology

This program is under revision and currently not enrolling students.

The CScD is an advanced clinical doctorate recommended for the student or clinician seeking to employ state of the art clinical excellence and leadership as a speech-language pathologist in settings such as medical centers, private practices, educational settings, and academic institutions.

The primary objectives of the CScD program are to provide students with advanced academic course work, clinical skills, case-based learning experiences, leadership skills, and knowledge and skill in supervision. Graduates of this program will excel in their specialties and assume leadership roles. Graduates will be prepared for independent clinical practice in the medical setting and clinical faculty positions.

Students are expected to meet the eligibility requirements for application for both American Speech-Language-Hearing Association certification (Certificate of Clinical Competence CCC-SLP) and appropriate state licensure over the course of their studies. There is no dissertation project required for the CScD degree; however, students will demonstrate expertise in the critical analysis and application of scientific information.

Email: csdadmissions@shrs.pitt.edu
www.shrs.pitt.edu/csd

Admission Requirements

A SLP MS/MA is required in order to fulfill the clinical component of this program.

Once your application is complete, it will be forwarded to the CSD Department for review by the CScD Admissions Committee.

Applicants will be required to participate in interviews addressing content knowledge and discussions of the program.

The department has an application **deadline of January 15th** to begin the program the following fall term. All application materials must be received by the deadline. Rolling admissions means the department will review and admit qualified applicants until a class is full.

All applicants considering the CScD must email CSD admissions before starting the application process.

All applicants are advised to ensure that they meet the certification and licensing requirements before applying to the program.

Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Audiology (AuD) Degree

The primary objective of the AuD program is to provide students with the academic course work, clinical skills, and experience (beyond that obtained with the master's degree) needed to be a licensed audiologist, enter the professional community and assume independent leadership roles. The AuD is the required entry-level degree for audiologists. Graduates will be prepared for independent clinical practice and academic positions upon graduation and will be immediately eligible for professional licensure and for Certification from the American Speech-Language and Hearing Association and American Board of Audiology.

The Doctor of Audiology degree (AuD) education program in audiology is a residential program at the University of Pittsburgh accredited by the Council on the Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

Administrator of Admissions for AuD Program: 412-383-3938

<u>General Admission Requirements AuD Degree</u>

- A bachelor's degree from an accredited institution.
- A minimum GPA of 3.0 (based on 4.0) is required.
  - GPA of 3.5 or higher is strongly recommended
- Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Science: This course should include biological, physical, or behavioral science
- Statistics (not research design)

- Ability to satisfactorily perform all of the technical standards required for this profession.
- Applications are accepted online through CSDCAS.

There are no communication science and disorders specific prerequisite courses required to apply

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC).

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency (Duolingo, IELTS, or TOEFL) within 12 months of the due date of the application. Applicants from Quebec Province are required to submit English Language Proficiency scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and English Language Proficiency scores have been received.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the AuD program is regulated by the *SHRS Academic Standards*, as well as the departmental *Academic Handbook for SLP MA/MS and AuD Degree Students*.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with their advisor. To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.0 within their next two terms of study. Failure to do so may result in the student's immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Philosophy Degree in Communication Science and Disorders

Contact Information

CSD Administrator
Department of Communication Science and Disorders
School of Health and Rehabilitation Sciences
3396 Fifth Avenue
412-383-6540

E-mail: lcf36@pitt.edu
Website: www.shrs.pitt.edu/aud/

The PhD program in Communication Science and Disorders is oriented toward the basic scientific questions in the discipline, with an emphasis on basic and applied research.

The expectations of graduating PhD students are that they are able to conduct a program of independent, creative, scholarly research, and that they can plan and execute effective teaching at all levels of pedagogy.

Admission Requirements

Applicants will apply online using the GradCAS application.

No one will be admitted to the CSD PhD program without a suitable advisor in their main area of specialization. Thus, anyone interested in PhD education is encouraged to contact individual faculty members whose research interests mesh most closely with theirs.

PhD applications are due by January 15th. Applicants will be interviewed by faculty members as part of the admissions process. A final admission decision depends on the availability of a suitable research adviser and a review and recommendation by the PhD Admissions Committee.

International applicants must provide English Language Proficiency scores (Duolingo, IELTS or TOEFL) and an academic credential evaluation from Educational Credential Evaluators Inc. or World Education Services (WES).

Submission of GRE scores to institution code 2927 is optional.

It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Financial Aid

Prospective applicants who are interested in financial support should indicate this on their application for admission.

Doctoral

Communication Science and Disorders, PhD

Doctor of Philosophy in Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders (CSD) research doctoral program is oriented toward scientific inquiry in the discipline of communication science and disorders with an emphasis on basic and applied research training. Much of the CSD PhD program is individually tailored and designed to meet a variety of academic and professional goals.

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree in communication science and disorders at the University of Pittsburgh. For further detail on allowable credits, see Credit Requirements under Regulations Pertaining to Doctoral Study.

All CSD PhD students are required to take CSD 3048 - *Intro to PhD Studies,* CSD 3049 - *PH.D. Seminar in Audiology, and* CSD 3479 - *Research Seminar in Speech and Language Pathology.*

CSD PhD students also take a minimum of 9 credits of coursework in statistics and experimental design and 6 credits of PhD research practicum. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental *PHD Proseminar* (CSD 3060 or CSD 3061), to participate in professional development sessions, attend invited colloquium

talks, and present their own research. Students also have the opportunity to take elective courses outside of CSD, such as courses in teaching and grant preparation, and to complete teaching practica.

Four formal degree requirements must be satisfied before a student initiates PhD dissertation work:

1. In the first semester of study, students, with the help of their major advisers, develop a proposed Plan of Study and detailed Individual Development Plan (IDP) that specifies their background, goals, and tentative plans for their program of study. Students schedule a Plan of Study meeting with a faculty committee, to review this document and their plans (see *Major Adviser and Advising Committees,* below).
2. Annually, after the initial plan of study meeting, the student must convene an annual review meeting, in which their Plan of Study and progress will be reviewed.
3. The student must complete a pre-dissertation research project during the first year, culminating in a manuscript resulting from a research practicum experience. This project must be completed prior to initiating the comprehensive examination.
4. The student must pass a comprehensive examination, to be conpleted within one semester. It will consist of a substantive written deliverable and an open-ended oral examination. Students on provisional or special status, or on probation, are not eligible to take the comprehensive exam.

Students must then successfully complete both the written dissertation overview (prospectus document) and oral examination of their prospectus. After the prospectus is passed, students file an application for admission to candidacy for the Doctor of Philosophy degree. See below and also *Admission to Candidacy for the Doctor of Philosophy Degree* in this bulletin for details.

Major Advisor and Advising Committees

Students admitted to the PhD program are assigned a major adviser in their main area of specialization. The adviser is primarily responsible for providing assistance and advice to the student throughout all facets of the PhD program, and typically serves as the chair of the Plan of Study, Comprehensive Examination, and Dissertation Committees. Either PhD students or their advisers may initiate a change of adviser, but no student may remain in the program without an adviser.

The student, upon consultation with the major adviser, secures the agreement of at least two other departmental faculty members with graduate faculty status to serve with the adviser on the student's Plan of Study Committee. This committee initially convenes to review and make recommendations about the student's Plan of Study. Thereafter, the committee meets annually with the student to review and make recommendations about the student's progress in the PhD program. Note: The plan of study committee may, but need not be, the student's comprehensive examination or dissertation committee.

See *Doctoral Committee* under Regulations Pertaining to Doctoral Degrees for an overview of the dissertation committee's makeup and responsibilities.

Overview or Prospectus Meeting

See *Overview or Prospectus Meeting* under Regulations Pertaining to Doctoral Study for the regulations pertaining to this meeting and then read the following information that is specific to the PhD program in Communication Science and Disorders. After securing the adviser's approval, each PhD student must submit a written dissertation proposal to the dissertation committee at least two weeks prior to a formal overview meeting with that committee. (See *Dissertation and Abstract* section for details on the characteristics of an appropriate dissertation.)

Final Oral Examination

See *Final Oral Examination* under Regulations Pertaining to Doctoral Study and then note the following additional program-specific information. After securing the adviser's approval, the student submits copies of the complete document to the dissertation committee at least two weeks prior to the final oral examination in defense of the dissertation.

PhD Curriculum

For the CSD PhD degree, a minimum of 72 credits beyond the bachelor's degree is needed.

All CSD PhD students are required to take CSD 3048 *Intro to PhD Studies, and* 3 (or more) credits of CSD 3479 *PhD Seminar in Speech-Language Pathology* and/or CSD 3049 *PhD Seminar in Audiology.* CSD 3050/3480 *Translational Challenges in CSD* will be offered every two years and can also serve to meet this requirement. CSD PhD students are required to take a minimum of 8 credits of coursework in statistics, methods, and experimental design. Three-6 credits of CSD 3971 *Research Practicum* are also required, and this registration takes place while the student is working on their first-year project. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental CSD 3060 *Proseminar* (1 credit per semester, 4 credits total) to participate in professional development sessions, attend invited colloquium talks, and present their own research. All PhD students are required to perform two, 3-credit lab rotations with mentors other than their major advisor. These rotations can take place in or outside the CSD department. A 3-credit grant writing course administered by SHRS is also required. The grant writing course must be taken for 2 credits in the fall semester and 1 credit in the spring semester for a total of 3 credits (both parts of the grant writing course are required for a final grade). Six to 9 credits of elective courses will be selected by the student and their major advisor. Elective courses can focus on the major area of study or in professional development, such as teaching practica. Comprehensive exams and prospectus preparation are also required 3-credit registrations.

Otherwise, coursework and other experiences are individually tailored for each student, in consultation with the student's adviser and the adviser-chaired Plan of Study committee.

- CSD 3048 - INTRODUCTION TO PHD STUDIES
- CSD 3049 - PH.D. SEMINAR IN AUDIOLOGY
- CSD 3479 - RESEARCH SEMINAR IN SPEECH AND LANGUAGE PATHOLOGY
- CSD 3060 - PHD PROSEMINAR
- CSD 3050 - TRANSLATION CHALLENGES IN CSD
- CSD 3971 - RESEARCH PRACTICUM FOR PHD STUDENTS
- CSD 2972 - EXAMINATION
- CSD 3000 - DISSERTATION RESEARCH PHD DEGREE

Doctor of Audiology, AuD

Degree Requirements

Students applying to the AuD program with a completed bachelor's degree will require four years of study with a minimum of 75 credits (typically about 100 credits) to satisfy academic and clinical requirements for the degree. Other requirements include the successful completion of two comprehensive examinations, a mentored research project, and a full-time clinical externship. Practicing audiologists who seek to move from a master's degree to Doctor of Audiology should seek departmental advisement.

Comprehensive Examinations

Students in the AuD program are required to successfully complete two comprehensive examinations before the Doctor of Audiology degree can be awarded. The Comprehensive Exam I is a formative examination that will identify strengths and/or weaknesses in the student's knowledge base. An ad hoc committee of reviewers administers this comprehensive examination.

In addition, students pursuing the AuD are required to successfully complete Comprehensive Exam II. During this examination, the student will demonstrate an ability to apply theoretical knowledge to a real clinical case with which the student has been extensively involved during clinical training. Comprehensive Exam II will have both written and oral portions. Typically, the student will identify a case from the student's own clinical experience in which they have been primarily responsible for case management. This case will be thoroughly presented in conjunction with in-depth background information, including relevant clinical research on all aspects of the case. A panel of reviewers will be constituted to evaluate each individual student's examination performance.

All audiology students in good academic standing are expected to pass their comprehensive examination(s). However, regardless of academic standing, failure to pass either of the above examinations within three examination cycles will result in the student's dismissal from the audiology program.

AuD Curriculum

- CSD 2010 - AUDIOLOGY CLINIC 1 - MEDICAL
  CSD 2012 - AUD SCREENING AND PREVENTION PRACTICUM
- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2022 - CLINICAL PROCEDURES LAB 2-2
- CSD 2029 - IMPLANTABLES IN CLINICAL PRACTICE
- CSD 2036 - EVALUATION AND TREATMENT OF TINNITUS AND SOUND INTOLERANCE
- CSD 2040 - AUDIOLOGICAL ASSESSMENT
- CSD 2041 - MANAGEMENT OF HEARING LOSS
- CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB
- CSD 2043 - FUNDAMENTALS OF SPEECH-LANGUAGE PATHOLOGY FOR AUDIOLOGISTS
- CSD 2044 - DIFFERENTIAL DIAGNOSIS
- CSD 2045 - PHYSIOLOGICAL ASSESSMENT
- CSD 2046 - PEDIATRIC EVALUATION
- CSD 2047 - AMPLIFICATION 1
- CSD 2051 - CLINICAL PROCEDURES LAB 1-2
- CSD 2052 - CLINICAL PROCEDURES LAB 2-3
- CSD 2053 - CLINICAL PROCEDURES LAB 2-1
- CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION
- CSD 2057 - AUDIOLOGY CLINIC 2 (5 terms) - Variable credits
- CSD 2060 - PROSEMINAR - MA (6 terms)
- CSD 2078 - PHYSICS, PHYSIOLOGY AND PSYCHOLOGY OF SOUND
- CSD 2081 - RESEARCH STRATEGIES AND TACTICS
- CSD 2084 - SCIENCE OF IMPLANTABLES
- CSD 2087 - HEARING CONSERVATION AND RESTORATION
- CSD 2101 - DATA AND STATISTICAL LITERACY
- CSD 2103 - PROFESSIONAL WRITING FOR AUDIOLOGISTS
- CSD 2110 - NEUROSCIENCE OF COMMUNICATION
- CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP
- CSD 2251 - VESTIBULAR ASSESSMENT AND REHABILATATION
- CSD 2252 - ADVANCED PHYSIOLOGICAL ASSESSMENT
- CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE
- CSD 2454 - AMPLIFICATION 2
- CSD 2600 - INTER-PROFESSIONAL ROTATION
- CSD 2602 - EDUCATIONAL AUDIOLOGY
- CSD 2604 - PRINCIPLES OF CLINCAL INSTRUCTION AND PEER TEACHING
- CSD 2652 - ADVANCED CLINICAL SEMINAR 3-1
- CSD 2654 - PRACTICE MANAGEMENT
- CSD 2655 - ADVANCED CLINICAL SEMINAR 4-1
- CSD 2657 - ADVANCED CLINICAL SEMINAR 3-3
- CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3
- CSD 2659 - AUDIOLOGY EXTERNSHIP (3 terms)
- CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2
- CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2
- CSD 2971 - RESEARCH PRACTICUM
- Comprehensive Examination II

Medical Speech-Language Pathology, CScD

The Clinical Doctorate in Speech-Language Pathology is being redesigned. While we are not currently accepting students into the program, announcements will be posted on our website when the new program is approved and open for applications.

Master's

Communication Science and Disorders - Audiology Concentration, MA/MS

Program Requirements

Clinical Practicum

Clinical practicum requirements are met through the Audiology Network and Outplacements clinical rotations. These experiences include varied settings such as hospitals, rehabilitation centers, specialty clinics, private practices, schools for the Deaf, and public schools.

Proseminar

All students must complete the proseminar requirement, which consists of attending a specified number of scientific and professional presentations that have relevance to communication science and disorders.

Comprehensive Exam for MA

All students in the Master of Arts program are required to pass an oral comprehensive examination in the spring of their second year. The comprehensive examination assesses students' ability to think critically, to communicate their thoughts in oral form, and to demonstrate their grasp of the major academic and clinical content provided in their graduate program. Requirements for passing the comprehensive examination are provided in the Academic Handbook.

Students seeking the Doctor of Audiology (AuD) degree must complete a second comprehensive examination which includes a written and oral component. Details about that comprehensive examination can be found in the section on the AuD degree.

Thesis Option for Master of Science (MS) degrees

Students pursuing the Master of Science degree in audiology must successfully complete a thesis project. Thesis students will have an examining committee of at least three University of Pittsburgh faculty members (including the research director, who serves as chair).

Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Concentration

This program is designed for those students who do not plan to provide clinical services, but would like to pursue a research track in audiology. Students pursuing the AuD degree (Clinical Doctorate) also may pursue a research track. The audiology concentration for the master's degree requires a minimum of 30 credits of coursework. All credits must be passed with a B grade or better in order to count towards graduation.

Audiology Curriculum

- CSD 2022 - CLINICAL PROCEDURES LAB 2-2
- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2040 - AUDIOLOGICAL ASSESSMENT
- CSD 2041 - MANAGEMENT OF HEARING LOSS
- CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB
- CSD 2044 - DIFFERENTIAL DIAGNOSIS
- CSD 2045 - PHYSIOLOGICAL ASSESSMENT
- CSD 2046 - PEDIATRIC EVALUATION
- CSD 2047 - AMPLIFICATION 1
- CSD 2051 - CLINICAL PROCEDURES LAB 1-2
- CSD 2052 - CLINICAL PROCEDURES LAB 2-3
- CSD 2053 - CLINICAL PROCEDURES LAB 2-1
- CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION
- CSD 2056 - AUDIOLOGY CLINIC 1
- CSD 2057 - AUDIOLOGY CLINIC 2
- CSD 2060 - PROSEMINAR - MA
- CSD 2078 - PHYSICS, PHYSIOLOGY AND PSYCHOLOGY OF SOUND
- CSD 2085 - AUD SCREENING AND PREVENTION PRACTICUM
- CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE

Communication Science and Disorders - Speech-Language Pathology Concentration, MA/MS

Program Requirements

Students applying to the Master's in Speech-Language Pathology program with a completed bachelor's degree in Communication Science and Disorders will require a minimum of five semesters of full-time study and 60 credits to satisfy academic and clinical requirements for the degree. Other requirements include the successful completion of clinical practicum and culminating academic project.

Clinical Practicum

Clinical practicum requirements are met through Clinic Practicum 1: Foundation in Assessment and Treatment in Speech Language Pathology, Clinic Practicum 2: Speech Language Pathology in Healthcare, and Clinic Practicum 2: Speech Language Pathology in Education. Community-based clinical settings include hospitals, rehabilitation facilities, residential facilities, non-residential facilities, early intervention in naturalistic settings, private practice, and a variety of educational settings.

SLP Summative Assessment Project for Master of Arts (MA) degree

All students in the Master of Arts program are required to successfully complete a Summative Assessment Project. This project assesses students' ability to think critically, communicate their thoughts in written and oral form, and demonstrate their grasp of the major academic and clinical content provided in their graduate program. Students pursuing the Master of Arts (MA) degree in Speech Language Pathology must satisfactorily complete a one-credit course, typically taken during one of the final three semesters of the program. Requirements for passing the Summative Assessment Project are provided in the course syllabus.

Program Electives

Thesis Option for Master of Science (MS) degree

Students pursuing the Master of Science degree in speech-language pathology must successfully complete a thesis project. Students who complete a master's thesis are exempt from the Summative Assessment Project. Thesis students will have a committee of at least three University of Pittsburgh faculty members as outlined in the academic handbook. Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Educational Certification: Pennsylvania

Educational certification is valuable for students who are interested in working as a speech-language pathologist with children who have communication disorders in educational settings. Educational certification is required in Pennsylvania for professionals serving as speech-language pathologists in school settings.

The Department of Communication Sciences and Disorders Department (CSD) is an approved program provider for two options for educational certification: (a) *Instructional 1 Special Education: Speech/Language Impaired PK-12* and (b) *Educational Specialist Certificate for School Speech-Language Pathologist PK-12*.

All students complete the predefined curriculum of the master's degree including CSD 2067 Clinic Practicum 2 Speech Language Pathology in Education. For students interested in the Instructional 1 certification, additional courses must be completed. These courses include a 3-credit child or human development course and a 3-credit language development course. Both are typically completed at the undergraduate level. Students must meet current requirements at the time of application for educational certification. This may include completing additional Praxis examinations.

Curriculum

The program is designed to be completed within 5 terms, although some students will elect to complete the program in 6 terms. The program requires 60 credits typically distributed as follows: Required Coursework, Clinic Practicum (minimum of 10 credits), and additional/optional credits. Course work must be passed with a C- grade or better to count for graduation.

The progression of courses for the general clinical requirements are outlined in the student's plan of study, and includes the following Program Curriculum:

- CSD 2018 - CLINICAL SERVICE DELIVERY
- CSD 2028 - AUTISM
- CSD 2039 - MOTOR SPEECH DISORDERS
- CSD 2060 - PROSEMINAR - MA
- CSD 2064 - INTRO CLINICAL DECISION-MAKING
- CSD 2070 - SPEECH SOUND DISORDERS
- CSD 2071 - CHILD LANGUAGE DISORDERS 1
- CSD 2072 - STUTTERING
- CSD 2073 - VOICE DISORDERS
- CSD 2076 - DYSPHAGIA
- CSD 2077 - AUGMENTATIVE COMMUNICATION
- CSD 2079 - PEDIATRIC FEEDING AND SWALLOWING
- CSD 2081 - RESEARCH STRATEGIES AND TACTICS

- CSD 2082 - PROFESSIONAL ISSUES 1
- CSD 2083 - PROFESSIONAL ISSUES 2
- CSD 2121 - AURAL REHAB ACROSS THE LIFESPAN
- CSD 2130 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 1
- CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP
- CSD 2230 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 2
- CSD 2250 - CHILD LANGUAGE DISORDERS 2
- CSD 2514 - EDUCATIONAL SERVICE DELIVERY
- CSD 2525 - INTEGRATED CASES 1
- CSD 2030 - CLINIC SKILLS SIMULATION LAB 1
- CSD 2031 - CLINIC SKILLS SIMULATION LAB 2

Clinical Practice

- CSD 2065 - CLINIC PRACTICUM 1 FOUNDATIONS IN ASSESSMENT AND TREATMENT IN SPEECH LANGUAGE PATHOLOGY
- CSD 2066 - CLINIC PRACTICUM 2 SPEECH LANGUAGE PATHOLOGY IN HEALTHCARE
- CSD 2067 - CLINIC PRACTICUM 2 SPEECH LANGUAGE PATHOLOGY IN EDUCATION

Other Requirements

- CSD 2069 - SLP SUMMATIVE ASSESSMENT PROJECT

Thesis Option

- CSD 2000 - RESEARCH & THESIS MASTER'S DEGR

Department of Counseling and Behavioral Health

Department of Counseling and Behavioral Health

The Department of Counseling and Behavioral Health is home to programs that deliver personalized educational experiences for future professional counselors. We prepare our students to address the complex challenges faced by clients of diverse backgrounds, including individuals across cultures, across the lifespan, and living with disabilities and behavioral health challenges. We emphasize experiential training in evidence-based practices while advancing the field through clinical research. We are committed to community engagement, advocacy, and promoting diversity, inclusion, and cultural humility.

Our award-winning educational programs, research projects, and other learning opportunities prepare students to excel in the counseling profession. Pitt graduates are highly successful as they enter this rewarding profession. We take a holistic, hands-on approach to training that provides a strong foundation of knowledge while offering ample opportunity to practice your skills and options for personalizing your education. Our world class faculty include renowned scholars, highly skilled clinicians, and passionate educators.

Clinical Mental Health Counseling (MS)

Our counseling curriculum covers a wide range of themes including:

- Advanced counseling skills techniques- individual, group, family, substance abuse and crisis counseling
- Case conceptualization and treatment planning
- Assessment and diagnosis
- Evidence-based practice

Students complete 61 credits required for a master's degree in Clinical Mental Health Counseling in five terms. The degree requires a 100-hour practicum and 600-hour internship in a professional clinical rehabilitation or mental health counseling setting.

Master's

Clinical Mental Health Counseling, MS

The Clinical Mental Health Counseling program strives to be a world class educational program, delivering a personalized educational experience for future professional counselors. We prepare our students to address the complex challenges faced by clients of diverse backgrounds, including individuals across cultures, across the lifespan, and those with disabilities and mental and behavioral health challenges. Our program emphasizes experiential training in evidence-based practices while advancing the field through clinical research. We are committed to community engagement, advocacy, and promoting diversity, inclusion, and cultural humility.

This program prepares students to practice the profession of clinical mental health counseling and is accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP) through March 2032.

This in-person program utilizes various instructional methods, including hands-on skills practice and role-plays that complement didactic learning and experiential learning activities. The curriculum includes courses on theories of counseling, foundations of

professional counseling, ethics, multicultural counseling, individual and group counseling services, case conceptualization and treatment planning, case management, vocational and career development, assessment and diagnosis, evidence-based practice and research methods. Elective courses focus on trauma and grief counseling, child and adolescent counseling, and disability and assistive technology considerations. See curriculum for more information.

Program Contact:

Associate Professor | Program Director

Clinical Mental Health Counseling

412-383-6879 | michelle.schein@pitt.edu

Pronouns: she/her/hers

Requirements:

Prerequisites

- A bachelor's degree is required preferably in psychology, rehabilitation sciences, human services, social sciences or a related field. Students can submit an application while they are finishing their degree.
    - A minimum overall undergraduate GPA of 3.0 (based on 4.0) is suggested.
    - If the student's GPA falls below 3.0, the application may still be considered. Students will be considered if their GPA is below a 2.8 and they have taken graduate studies/courses.
- Verification of English Language Proficiency (ELP)
    - Submitting ELP scores are required for all international applicants, even if they attended an institution in the U.S. (unless citizen of a country whose official language is English).
    - Duolingo English Test: 140. **Duolingo sub-score of 140-145 conversation and 130-135 comprehension are required.**
    - International English Language Testing System (IELTS): 7.5. **IELTS sub-score of 8.0 speaking and 7.0 listening are required.**
    - Test of English as a Foreign Language (TOEFL) - 100. **TOEFL sub-score of 26 for speaking and 24 for listening are required.**
    - **New TOEFL scale as of January 2026: 5.0 with sub-scores of 4.0 or higher. Sub-scores for speaking and listening require a 5.0 or higher.**
- Applicants must:
    - Possess strong interpersonal and professional skills.
    - Be committed to developing clinical skills through clinical practice and supervision.
    - Be open to feedback, self-assessment and self-reflection.
    - Communicate in a clear, organized and logical fashion both verbally and in writing.

Transcripts

Applicants are required to provide transcripts from all U.S. universities, colleges or other higher education institutions attended.

Admitted students will need to submit official transcripts to the SHRS Admissions Office prior to enrolling in classes.

Personal Statement

- Upload a personal statement that demonstrates evidence of graduate-level writing skills and discusses career goals, strengths, skills and experiences that will contribute to success in the program and in the counseling profession. The essay should also include a brief statement discussing professional interest in the field of counseling and reasons for applying to the University of Pittsburgh Clinical Mental Health Counseling program (500 word limit).
- Answer two short essay prompts (500 word limit combined for the two essays).

Letters of Recommendation

Two (2) professional letters of recommendation are required for the application.

These letters should be from individuals who can describe your potential for graduate-level work and may include professors, supervisors or employers.

Application Review Process

- Applications are reviewed by the admissions committee after the deadline.
    - Application material received after this deadline will only be reviewed in the unlikely event that the program is unable to fill the slots for the incoming class.
    - While undergraduate GPAs are important, equally important are applicants' responses to essay questions and letters of recommendation. The admissions committee carefully considers all evidence supporting applicants' potential for being successful in a graduate program. Applicants from historically under-represented backgrounds in the counseling profession are particularly encouraged to apply.
- The program aims to notify students of their admissions decision in March at which time the program will also administer a waitlist.
- A selective group interview will be conducted via video conference. The program will reach out to students with additional instructions if they are invited for an interview.

Other Requirements

Resume or CV must be submitted through the GradCAS application.

Clinical Participation and Background Check

To participate in clinical education activities, students are required to obtain a variety of documents attesting to health and vaccination status, criminal background checks/Act 33/34 clearances, and training associated with the provision of health care services. Many of these documents and trainings must be renewed annually while in the program. Students who do not complete these requirements prior to designated deadlines will not receive clinical assignments as typically sequenced, potentially extending the program duration. Specific information on these clinical requirements and deadlines is provided shortly after acceptance. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

International Student Information

The following requirements are necessary for applicants from outside of the U.S.

For questions about the international student requirements, please reach out to the SHRS Admissions Office.

Academic Credential Evaluations

Students who have completed the equivalent of a baccalaureate degree or higher at an institution outside of the United States are required to provide an academic credential evaluation from Educational Credential Evaluators, Inc. or World Education Services (WES), Inc. with their application.

- A course-by-course evaluation with GPA conversion is required.
- Evaluations are not required for degrees earned in the United States. If you have attended an English Canadian institution, please contact the SHRS Admissions Office.
- Individual SHRS programs may have their own specific Academic Credential Evaluation requirements.

- COUN 2733 - COUNSELING SKILLS & TECHNIQUES
- COUN 2738 - DIAGNOSIS & TREATMENT OF COGNITIVE AND MENTAL HEALTH DISORDERS
- COUN 2742 - LEGAL, ETHICAL & PROFESSIONAL ISSUES IN COUNSELING
- COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Summer Term - Year 1

- COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES
- COUN 2736 - CRISIS COUNSELING, RISK MANAGEMENT AND DISASTER PREPAREDNESS
- COUN 2739 - GROUP COUNSELING
- COUN 2740 - CLINICAL APPLICATIONS IN COUNSELING

Fall Term - Year 2

- COUN 2746 - COUNSELING PRACTICUM
- COUN 2747 - CONCEPTUALIZATION, TREATMENT PLANNING, & CASE MANAGEMENT
- COUN 2748 - EVIDENCE BASED PRACTICE AND RESEARCH METHODS IN COUNSELING

Spring Term - Year 2

- COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING
- COUN 2743 - FAMILY AND COUPLES COUNSELING
- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
- COUN 2751 - CLINICAL COUNSELING CAPSTONE EXAM

Summer Term - Year 2

- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
  One of the following:
- COUN 2766 - INTRODUCTION TO ASSESSMENT AND TREATMENT FOR CHILDREN AND ADOLESCENTS
- COUN 2767 - TRAUMA AND GRIEF COUNSELING

Clinical Competency Examination

All Counseling students are required to pass a clinical competency examination. To assess student competency, students are required to take and pass the Counselor Preparation Comprehensive Examination (CPCE)

Total Credits: 60

Department of Health Information Management

Master of Science Degree in Health Informatics

The Master of Science in Health Informatics (MSHI) Program is a STEM Designated Program. It is offered in the Department of Health Information Management (HIM).

Contact Information:

Bambang Parmanto, PhD, Chair
Department of Health Information Management
4177 5th & Halket
412-383-6649
parmanto@pitt.edu
http://www.shrs.pitt.edu/HI/

Leming Zhou, PhD, DSc, Graduate Program Director and Professor

Department of Health Information Management

4185 5th & Halket

leming.zhou@pitt.edu

http://www.shrs.pitt.edu/HI/

Admission Requirements

- A baccalaureate degree from an accredited institution. Applicants may apply while completing their undergraduate degree, but must provide proof of degree completion before enrolling in the program.
- A minimum grade point average (GPA) of 3.0 (on a 4.0 scale) is required. Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

Application Process

- Complete the application for admission
    - Applications to attend the program are submitted through GradCAS
- Application fee of $50
- One Letter of Recommendation is required. The recommendation should be from college-level instructors or employers/professionals who have supervised your work in a paid or volunteer capacity. These individuals should be able to comment on your academic, professional and interpersonal abilities. People submitting recommendation letters on your behalf should send their letters to our admissions office electronically through our application system.
- Statement of Purpose/Essay
- Transcripts from all institutions attended
- International applicants must provide English Language Proficiency scores (Duolingo, IELTS, or TOEFL) and an Academic Credential Evaluation from Educational Credential Evaluators, Inc. or World Education Services (WES), Inc.

Financial Aid

There are scholarships and loan opportunities available to graduate students from the American Health Information Management Association (AHIMA). Further information can be obtained from the AHIMA web site at www.ahima.org under the career and student center tab. Additionally, the Pennsylvania Health Information Management Association (PHIMA) awards scholarships to qualified students in Pennsylvania. Further information can be obtained from PHIMA's web site at http://www.phima.org/members/scholarships/.

In addition, HIM provides endowment scholarships for both undergraduate and graduate studies.

Certificate

Applied AI in Healthcare, Certificate, Online

Certificate in AI in Healthcare

Students are required to take four courses (12 credits) to obtain the Certificate in Applied AI in Healthcare. Three of those courses are required coruse and one is an elective. The three required courses are: HI 2251, HI 2458, and HI 2310. All the rest are electives.

- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2252 - APPLIED AI IN HEALTHCARE: TOOLS, CONCEPTS, AND IMPACT
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2461 - NATURAL LANGUAGE PROCESSING AND LARGE LANGUAGE MODELS IN HEALTHCARE
- HI 2462 - ETHICAL, LEGAL, AND SOCIAL ISSUES (ELSI) OF AI IN HEALTHCARE

Applied AI in Healthcare, Certificate, Residential

Course Curriculum

Students are required to take four courses (12 credits) to obtain the Certificate in Applied AI in Healthcare. Three of those courses are required coruse and one is an elective. The three required courses are: HI 2251, HI 2458, and HI 2310. All the rest are electives.

- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2461 - NATURAL LANGUAGE PROCESSING AND LARGE LANGUAGE MODELS IN HEALTHCARE

Health Data Analytics Certificate

In the Department of Health Information Management, we offer a Certificate in Health Data Analytics. This certificate program can help students open doors in new fields.

There are online and on-campus versions of this certificate. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the certificate. On-campus students are permitted to take up to 3 credits online in the certificate program.

Program Requirements

The admission requirements for the certificate program are identical to our graduate programs. All students enrolled in a certificate program are required to complete 12 credits, or four 3-credit courses. For students who pursue an MS degree in our graduate programs, the credits obtained from the certificate program can be counted toward the MS programs. The required courses for the Health Data Analytics Certificate are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Health Data Analytics Certificate:

- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES

Total Credits: 12

Leadership in Health Informatics Certificate

In the Department of Health Information Management, we offer a Certificate in Leadership in Health Informatics. This certificate program can help students open doors in new fields.

There are online and on-campus versions of this certificate. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the certificate. On-campus students are permitted to take up to 3 credits online in the certificate program.

Program Requirements

The admission requirements for the certificate program are identical to our graduate programs. All students enrolled in a certificate program are required to complete 12 credits, or four 3-credit courses. For students who pursue an MS degree in our graduate programs, the credits obtained from the certificate program can be counted toward the MS programs. The required courses for the Leadership in Health Informatics Certificate are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (12 Credits)

Students must complete the following 4 courses for the Leadership in Health Informatics Certificate:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT

Total Credits: 12

Master's

AI in Healthcare, MS, online

The new online Master of Science in AI in Healthcare (OMSAIH) requires a total of 36 credits, comprising 21 credits from seven required courses (3 credits each) and 15 credits from five elective courses (3 credits each).

Required Courses

- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2462 - ETHICAL, LEGAL, AND SOCIAL ISSUES (ELSI) OF AI IN HEALTHCARE
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2252 - APPLIED AI IN HEALTHCARE: TOOLS, CONCEPTS, AND IMPACT

Elective Courses

Students will choose five elective courses (15 credits total) from the list below.

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2411 - REVENUE CYCLE ANALYTICS
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS
- HI 2670 - INTERNSHIP
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES
- HI 2461 - NATURAL LANGUAGE PROCESSING AND LARGE LANGUAGE MODELS IN HEALTHCARE

AI in Healthcare, MS, Residential

The new Master of Science in AI in Healthcare (MSAIH) requires a total of 36 credits, comprising 21 credits from seven required courses (3 credits each) and 15 credits from five elective courses (3 credits each).

Required Courses

- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2252 - APPLIED AI IN HEALTHCARE: TOOLS, CONCEPTS, AND IMPACT
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2462 - ETHICAL, LEGAL, AND SOCIAL ISSUES (ELSI) OF AI IN HEALTHCARE

Elective Courses

Students will choose five elective courses (15 credits total) from the list below.

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT

- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - INTERNSHIP
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES
- HI 2461 - NATURAL LANGUAGE PROCESSING AND LARGE LANGUAGE MODELS IN HEALTHCARE

Health Informatics, MS

The Master of Science in Health Informatics (MSHI) program is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

There are online and on-campus versions of the Master of Science in Health Informatics (MSHI) program. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

On-campus students are permitted to take up to 15 credits online.

Required Courses (24 Credits)

Students must complete the following 8 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS

Elective Courses (12 Credits)

Students can choose 4 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R - last offered Fall 2026
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES - last offered Spring 2027
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - INTERNSHIP

Total Credits: 36

Curricula for Students Enrolled Before Spring 2026 with Specific Tracks

There are four tracks (or areas of concentration) in the MSHI program before Spring 2026. Students admitted before Spring 2026 can choose to be in one of the four tracks. Below are the details of the curricula for the four tracks.

Data Science Concentration

Data Science (DS), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Data Science (DS) concentration prepares students to be responsible for the development, evaluation, and management of health information technologies and systems. Graduates of this concentration analyze, design, implement, and evaluate health information systems. They will also have the ability to conduct in-depth data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before their enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements - DS

All students enrolled in the Data Science concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Data Science considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

DS Curriculum

The Data Science curriculum allows students to choose from required courses and elective courses. Up to 6 credits of elective courses can be chosen from other departments in the SHRS or other academic programs within the University.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link https://www.coursera.org/learn/clinical-terminology**. Students can choose an equivalent medical terminology course from somewhere else as well.**

Required Courses (21 Credits)

Students must complete the following 7 courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R - last offered Fall 2026
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES

Elective Courses (15 Credits)

Students can choose 5 electives from the following list of courses:

- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
  - last offered Spring 2027
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - INTERNSHIP

Health Services Analytics Concentration

The Health Services Analytics (HSA) concentration leading to a Master of Science degree in Health Informatics prepares students to be responsible for the development and management of health information systems consistent with the clinical, fiscal, administrative, ethical, and legal requirements of healthcare institutions. Graduates of this program analyze and evaluate health information systems. As members of the healthcare team, they interact with other healthcare professionals and administrators, and provide healthcare data for patient care, research, quality improvement, strategic planning, reimbursement, and related analytics and managerial functions.

HSA graduates work in a variety of settings, such as hospitals, health planning agencies, computer companies, consulting firms, information systems vendors, ambulatory care centers, research centers, rehabilitation facilities, and insurance companies.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements - HSA

All students enrolled in the Health Services Analytics concentration are required to complete 36 credits. Students enrolled full-time normally complete the program in 3-4 consecutive semesters. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Health Informatics considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HSA Curriculum

The Health Services Analytics curriculum allows students to choose from required courses and elective courses. Up to 6 credits of elective courses can be chosen from other departments in the SHRS or other academic programs within the University.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link https://www.coursera.org/learn/clinical-terminology**. Students can choose an equivalent medical terminology course from somewhere else as well.**

Required Courses (18 credits)

Students must complete the following 6 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Elective Courses (18 Credits)

Students can choose 6 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R - last offered Fall 2026
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
  - last offered Spring 2027
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - INTERNSHIP

Healthcare Supervision and Management Concentration

Health Care Supervision and Management (HSAM), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Care Supervision and Management (HSAM) concentration provides students an opportunity for knowledge, skills, and career advancement. Qualified students with interests in administration and supervisory management in health care, long-term care, and rehabilitation may pursue this 36-credit concentration in HSAM. Students enrolled full- time normally complete the program in 3-4 consecutive semesters.

This program is designed for students who wish to attain knowledge and skills at the graduate level to prepare for a supervisory management position or to upgrade competencies developed earlier in his/her career.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements - HSAM

All students enrolled in the Health Care Supervision and Management concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to have an in-depth study of Health Care Supervision and Management considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HSAM Curriculum

The Health Care Supervision and Management curriculum allows students to choose from required courses and elective courses. Up to 6 credits of elective courses can be chosen from other departments in the SHRS or other academic programs within the University.

Please note: All students are required to finish one course in medical terminology if they do not have that course in their previous study or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link https://www.coursera.org/learn/clinical-terminology**. Students can choose an equivalent medical terminology course from somewhere else as well.**

Required Courses (18 Credits)

Students must complete the following 6 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
  - last offered Spring 2027
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT

Electives (18 Credits)

Students can choose 6 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R - last offered Fall 2026
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES
- HI 2670 - INTERNSHIP

Health Informatics Concentration

Health Informatics (HI), a concentration in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Informatics (HI) concentration prepares students to be responsible for the evaluation and management of health information technologies and systems. Graduates of this track analyze, design, and evaluate health information systems. They may also perform data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this concentration. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before enrollment. International students are required to attend the on-campus version of the concentration.

Program Requirements - HI

All students enrolled in the Health Informatics concentration are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Care Supervision and Management considering the student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HI Curriculum

The Health Informatics curriculum allows students to choose from required courses and elective courses. Up to 6 credits of elective courses can be chosen from other departments in the SHRS or other academic programs within the University.

Please note: All students are required to finish one course in medical terminology if they do not have that course or clinical background. Pitt offers a Coursera course in medical terminology that can meet this program requirement and can be found at this link https://www.coursera.org/learn/clinical-terminology**, however the student can choose another medical terminology course as well.**

Required Courses (12 Credits)

Students must complete the following 4 courses:

- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2251 - HEALTHCARE ANALYTICS, MACHINE LEARNING, AND DATA VISUALIZATION
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Elective Courses (24 Credits)

Students can choose 8 electives from the following list of courses:

- HI 2021 - PRACTICAL STATISTICS AND PROGRAMMING USING R - last offered Fall 2026
- HI 2022 - INTRODUCTION TO PYTHON FOR HEALTH INFORMATICS
- HI 2310 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN HEALTHCARE INNOVATION & CLASSIFICATION
- HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT
- HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES
  - last offered Spring 2027
- HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE
- HI 2457 - APPLIED AI & DESIGN THINKING FOR HEALTH INFORMATICS
- HI 2458 - GENERATIVE ARTIFICIAL INTELLIGENCE IN HEALTHCARE
- HI 2459 - ARTIFICIAL INTELLIGENCE FOR MEDICAL IMAGING INFORMATICS
- HI 2460 - DATA SCIENCE AND MACHINE LEARNING IN HEALTH SCIENCES
- HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT
- HI 2670 - INTERNSHIP

Total Credits: 36

Prerequisites for Graduate Internships/Capstones

Health Informatics (HI) graduate students may participate in an internship or capstone project to facilitate a deeper understanding of the professional practice aspects in the field. This is usually undertaken towards the end of the student's graduate career.

Internship/Capstone placement is the responsibility of the student, and all interested students are expected to actively apply to opportunities that align with their interests and career goals. While the program provides support through shared opportunities and recruiter engagement, securing an internship/capstone ultimately depends on the student's initiative. Any placements facilitated by the Clinical Education Coordinator are unpaid and may take place during the summer, fall, or spring.

If a student chooses to complete their internship/capstone at a site that is under contract with the HIM department (or any other site where a contract is required), the items listed below are required. If a contract is not required, the student must sign a waiver. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

- Physical examination including proof of completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- Recognizing and Reporting Child Abuse Training
- FBI Background Check (includes fingerprinting)
- HIPAA Training and Certification
- Students must carry personal health insurance while participating in an internship

Students must carry professional student liability insurance coverage while participating in an internship. The University provides liability insurance for internships covered by clinical affiliation contracts.

Some sites may have additional requirements (i.e. drug screen, Covid-19 vaccine, influenza vaccine, or orientation programs specific to their organization).

Internship/capstone sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

For more information on Internship/Capstone, email Taylor Horne, HIM Clinical Education Coordinator: tah241@pitt.edu.

Additional Information Related to Internship/Capstone

Travel to internship/capstone sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.

All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.

For more information on internships, students are encouraged to contact their advisor or the clinical education coordinator.

The HIM department has affiliation agreements with approximately 145+ clinical sites for student internships. The following list provides a sample of these sites:

- 3M/M*Modal
- Adelphoi Village
- Allegheny Health Network
- Athena Health
- Central Ohio Trauma System
- CVS/Aetna
- Deloitte
- Geisinger Health System
- goShadow
- Grant Thornton Consulting
- Highmark
- HM Health Solutions
- Infinitus
- KPMG
- Mayo Clinic
- Merck
- Neighborhood Resilience Project
- Omnicell
- Pitt CTSI
- Southwest Veterans
- UPMC Health Plan
- UPMC Health System
- UPMC Hillman Cancer Center
- UPMC Physician Services Division
- Western PA Patient Registry

Department of Occupational Therapy

Doctoral

Doctor of Clinical Science (CScD) in Occupational Therapy

Program Requirements

The Doctor of Clinical Science (CScD) program in Occupational Therapy is offered 100% online on a part-time basis and requires completion of 72 credits. Students with an entry-level master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field may be eligible to transfer up to 30 credits from their master's degree, leaving a remaining 42 credits. With a transfer of 30 credits, students will be able to complete the program in as little as 7 terms or 28 months.

This program also offers an Advanced Practice Certificate in Implementation of Evidence in Clinical Practice, which is earned upon completion of the CScD in Occupational Therapy degree or can be earned on a standalone basis.

Admission Requirements

Admission Requirements and Application Process

Pitt SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

- Applicants who received their occupational therapy training within the United States **must have an entry-level master's degree in occupational therapy** (e.g., MOT) from an Accreditation Council for Occupational Therapy Education (ACOTE)-accredited program, or a **baccalaureate degree in occupational therapy from an ACOTE-accredited program** and a **master's degree in occupational therapy or another field of study**.

- Applicants who received their occupational therapy training outside of the United States **must have an entry-level master's degree in occupational therapy** from a World Federation of Occupational Therapy (WFOT)-approved program or a **baccalaureate degree in occupational therapy** from a World Federation of Occupational Therapy (WFOT)-approved program and a **master's degree in occupational therapy or another related field of study** and meet all necessary requirements for admission to the University of Pittsburgh.

- U.S. applicants are required to have initial NBCOT certification (or eligibility). International applicants must provide equivalent certification documentation from country of residence.

- Interview*

- Qualified applicants will be invited to a virtual interview with the CScD in Occupational Therapy program director.

- Verification of English Language Proficiency. Verification is required unless the following apply:

- the applicant is a citizen of a country whose official language is English

- the applicant has completed a degree program at a regionally accredited institution in the U.S., or

- the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

Please note that the GRE is not required for admission to the program.

Occupational Therapists with Baccalaureate Degrees

Occupational therapists with a baccalaureate degree in occupational therapy, and no additional graduate degrees, should apply to the Master of Science (MS) in Occupational Therapy program.

Occupational Therapists with Master's Degrees

Occupational therapists with 1) an entry-level master's degree in occupational therapy, or 2) a baccalaureate degree in occupational therapy and an advanced master's degree in occupational therapy (or another field) may be able to transfer up to 30 credits from their master's degree, providing that these credits meet requirements in the CScD in Occupational Therapy curriculum.

Application Information

All Applicants

To apply to the online CScD in Occupational Therapy program, you must complete and submit the following:

- Complete the GradCAS application.
- $50 application fee (U.S.)
- Two (2) Professional Letters of Recommendation: Letters of recommendation should attest to your professional abilities and conduct, collegiality, oral and written communication skills and leadership.*
- Essay*
- Evidence of graduate-level writing skills in an essay that outlines:
- Why you are interested in pursuing the Doctor of Clinical Science in Occupational Therapy degree or Certificate in Implementation,
- Why you are interested in advancing your education through the University of Pittsburgh,
- What makes you a good fit for an advanced training education program that is delivered online
- How your identity, background, or experiences to date have contributed to your motivation and preparation for this program and will impact your progress in it, and
- The future professional goals that you hope to achieve as a result of this advanced training
- Resume: A professional resume indicating knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Upload unofficial transcripts from all U.S. institutions attended in the Academic History section of CAS.
- Upload a course-by-course evaluation with GPA conversion for all higher institutions you have attended outside the U.S. in the Academic History section of CAS. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc.
- **All admitted students will be required to provide official transcripts and, if applicable, credential evaluations to the SHRS Admissions Office prior to enrolling in classes.**

- If applicable, self-report unofficial English Language Proficiency (Duolingo, IELTS or TOEFL) test scores in the Academic History section of CAS and request official test scores be sent to the University of Pittsburgh. Minimum scores accepted and instructions for sending official test scores follow:
- Duolingo English Test: 140. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): 7.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): 100. New TOEFL scale as of January 2026: 5.0 with all sub-scores of 4.0 or higher. Scores should be submitted electronically through ETS to institution code "2927".

*Note: the personal essay, professional letters of recommendation and virtual interview are NOT required for Advanced Practice Certificate ONLY applicants.

Application Deadlines

Applications are accepted on a rolling basis for students intending to start the program in August of the same calendar year or January of the following calendar year.

For More Information

Contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Curriculum and Course Descriptions

The program requires the completion of 72 credits (up to 30 credits may be transferred from a master's degree, potentially leaving a remaining 42 credits in the CScD in Occupational Therapy program). Each student will be paired with a faculty mentor who will oversee the development, implementation and grading of Preliminary and Comprehensive Examinations necessary to complete the program. Required courses are held in the fall, spring and summer terms.

Preliminary Examination

The preliminary examination is a requirement for doctoral studies at the University of Pittsburgh and is intended to assess the breadth of the student's knowledge of the discipline, the student's achievement following the first year of graduate study, and the potential to apply knowledge appropriately. In the CScD in Occupational Therapy program, the preliminary examination is a writing assignment in response to a writing prompt created by a preliminary examination committee composed of occupational therapy graduate faculty. Questions may address assessment concepts, intervention/education concepts, and/or implementation of evidence. The preliminary examination is typically administered following the student's first year of study and is graded by the preliminary examination committee. Students must successfully pass the preliminary examination at least six months before they graduate.

Capstone Doctoral Committee

Each student will be supervised by a doctoral committee that will be formed before or at the successful completion of the preliminary examination. The doctoral committee will be comprised of two to three members with the chair of this committee being the student's faculty mentor and at least one of the other members being faculty appointed in the Department of Occupational Therapy. Additional members will be determined collaboratively by the student and mentor and can include external stakeholders. This committee will oversee the development, implementation and grading of the capstone project.

Comprehensive Examination

The capstone project serves as the basis of the comprehensive examination and will be developed and implemented in collaboration with the doctoral committee. The comprehensive examination includes a written paper and a presentation of the capstone project, both of which

are graded by the student's doctoral committee. Students must successfully pass both the written and oral components of the comprehensive examination to complete the CScD in Occupational Therapy program. Students must be registered for at least one course credit during the semester in which they will graduate from the CScD in Occupational Therapy program.

Plan of Study

CScD in Occupational Therapy Degree Courses

All students will take the following courses:

- OT 3000 - ADVANCED ASSESSMENT
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION *
- OT 3020 - FOUNDATIONS IN IMPLEMENTATION *
- OT 3030 - THE BUSINESS OF IMPLEMENTATION *
- OT 3040 - ADVOCACY FOR IMPLEMENTATION *
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES
- OT 3300 - CONCEPTUALIZING AND ASSESSING QUALITY IMPROVEMENT
- OT 3400 - THEORIES OF CHANGE
- OT 3500 - IMPLEMENTATION EVIDENCE

  Following completion of the 34 credits of online courses, CScD in Occupational Therapy students will culminate their matriculation through the program with an eight-credit capstone project. With the support of a faculty mentor, students will individually design and complete a capstone project that demonstrates their advanced knowledge for implementing evidence into practice.

- OT 3600 - CAPSTONE PHASE 1
- OT 3700 - CAPSTONE PHASE 2

  *Required courses for the Advanced Practice Certificate in Implementation of Evidence in Clinical Practice.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the CScD in Occupational Therapy Student Manual.

Doctor of Occupational Therapy (OTD)

Program Requirements

The Doctor of Occupational Therapy (OTD) program at Pitt is an entry-level educational program that offers an innovative, hands-on curriculum that prepares students to lead in occupational therapy with cutting-edge research, clinical experiences and community impact. The OTD program is a 32 month (8 terms, including 2 summer terms) on-campus professional course of study requiring 99 credits, including fieldwork education and a doctoral capstone. Students in the OTD program must successfully complete all didactic coursework, Level II fieldwork, and a comprehensive exam prior to the commencement of the doctoral capstone. Level II fieldwork and the doctoral capstone must be completed within 24 months following completion of the didactic portions of the program. Admission to the OTD program is only available on a full-time basis and begins at the end of August (fall term).

The OTD program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 7501 Wisconsin Avenue, Suite 510E, Bethesda, MD 20814. ACOTE's telephone number, c/o AOTA, is 301-652-6611and its web address is www.acoteonline.org. Graduates of the OTD program are eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

NOTE: A felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure. Additionally, certification and licensure requirements include inquiries as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act, including those associated with alcohol and/or substance abuse.

https://www.shrs.pitt.edu/academics/ot/otd/

Admissions

Prerequisites

A bachelor's degree with a minimum cumulative GPA of 3.00 (based on a 4.00 scale).

Completion of the following courses within the past five (5) years with a minimum grade of B and a minimum GPA of 3.00 (based on a 4.00 scale). Courses must be completed by June 1 prior to the start of the program.

- Human Anatomy and Physiology (with a laboratory component), 8 credits
    - Separate Anatomy and Physiology courses are acceptable.
    - The program does not recommend online coursework for this requirement.
- Lifespan Human Development, 3 credits
- Psychopathology/Abnormal Psychology, 3 credits
- Statistics, 3 credits

NOTE: All prerequisites must be taken for a letter grade. AP courses do not satisfy the prerequisite requirements.

Transcripts

Applicants are required to provide transcripts from all U.S. universities, colleges or other higher education institutions attended. Admitted students will need to submit official transcripts to the School of Health and Rehabilitation Sciences (SHRS) Admissions Office prior to enrolling in classes.

Experience

Applicants must complete a minimum of 12 hours through volunteer, shadowing, observation, or paid work. These experiences can occur in one or more occupational therapy practice areas (e.g., children and youth/pediatrics, health and wellness, productive aging/geriatrics, rehabilitation, mental health, work/industry, home care).

Personal Statement

Applicants complete a personal statement via the Occupational Therapist Centralized Application Service (OTCAS) that reflects graduate level writing skills and explains why they selected occupational therapy as a career and how this degree relates to their immediate and long-term professional goals. Applicants are strongly encouraged to include how their lived experiences (e.g., personal, professional, etc.) have

influenced their interest in pursuing occupational therapy and how their strengths and skills will contribute to their success in the OTD program.

Letters of Recommendation

Submission of three (3) letters of recommendation (evaluations) attesting to the applicant's academic and professional abilities. Letters of recommendation are submitted through OTCAS and must include a letter from:

1. A licensed occupational therapist who was involved in the applicant's experience in occupational therapy hours.
2. A college-level instructor who instructed the applicant in one or more courses.
3. An individual who can attest to the skills, abilities and professionalism of the applicant.

NOTE: OTCAS does not accept paper recommendations. All recommendations must be submitted electronically via OTCAS.

Technical Standards and Skills

Applicants admitted to the program must review the Technical Standards and Essential Skills and submit a signed form at the time of matriculation.

Application Review Process

1. Applications must be e-submitted in OTCAS no later than **May 1, 2027 for international applicants (F-1) and July 7, 2027 for domestic applicants** to be considered for admission.
2. Applications are reviewed when all materials, including transcripts and letters of recommendation, have been received and verified by OTCAS.
3. OTCAS uses a verification process that can take several weeks.
4. OTCAS will verify your documents before releasing them to the University of Pittsburgh.
5. Applicants should confirm their status as verified with OTCAS.
6. The Department of Occupational Therapy begins reviewing complete and verified applications and offering admission in November for the program starting the following August.
    - While cumulative and prerequisite GPAs are important, the applicant's response to essay questions and letters of recommendation are equally important.
    - Interviews are not part of the application process.

For questions about the receipt, processing, and verification of applications, please contact OTCAS Customer Service at 617-612-2860, otcasinfo@otcas.org.

International Applicant Information

The following requirements are necessary for applicants from outside of the U.S.

For questions about the international student requirements, please reach out to the SHRS Admissions Office.

Academic Credential Evaluations

Applicants who have completed the equivalent of a baccalaureate degree or higher at an institution outside of the United States are required to provide an academic credential evaluation from Educational Credential Evaluators, Inc. or World Education Services (WES), Inc. with their application.

- A course-by-course evaluation with GPA conversion is required.
- Evaluations are not required for degrees earned in the United States. If you have attended an English Canadian institution, please contact the SHRS Admissions Office.
- Individual SHRS programs may have their own specific Academic Credential Evaluation requirements.

Verification of English Language Proficiency

The University of Pittsburgh accepts the official results of the Duolingo English Test, the International English Language Testing System (IELTS) or the Test of English as a Foreign Language (TOEFL) as a measure of English language proficiency.

Verification is required unless the following apply:

- The applicant is a citizen of a country whose official language is English.

- The applicant has completed a degree program at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:

- Duolingo English Test: 140. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): 7.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): 100. New TOEFL scale as of January 2026: 5.0 with sub-scores of 4.0 or higher. Scores should be submitted electronically through ETS to institution code "2927".

PLEASE NOTE: Applicants who already have a baccalaureate degree in occupational therapy and are interested in obtaining a master's degree should apply to the Master of Science (MS) program in Occupational Therapy. .

Curriculum and Course Descriptions

Plan of Study*

Year 1 - Fall Term - 15 Credits

- OT 2200 - FOUNDATIONS OF OCCUPATION
- OT 2201 - BODY FUNCTIONS AND STRUCTURES: ANATOMY **
- OT 2202 - THERAPEUTIC APPROACHES 1 **
- OT 2203 - CLINICAL SEMINAR 1
- OT 2207 - PRINCIPLES OF ASSESSMENT **
- OT 2208 - CRITICAL APPRAISAL OF EVIDENCE
- OT 2234 - HUMAN PERFORMANCE ANALYSIS **

Year 1 - Spring Term - 15 Credits

- OT 2205 - NEUROBEHAVORIAL SCIENCE **
- OT 2209 - CLINICAL SEMINAR 2
- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE **
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2214 - THERAPEUTIC APPROACHES 2 **
- OT 2215 - FIELDWORK EDUCATION A (FW I)**
- OT 2235 - CLINICAL CONDITIONS 1
- OT 2236 - ACTIVITY/CONTEXT THEORY AND PRACTICE **

Year 1 - Summer Term - 11 Credits

- OT 2216 - CLINICAL SEMINAR 3
- OT 2217 - NEUROREHABILITATION THEORY AND PRACTICE **
- OT 2218 - BIOMECHANICAL THEORY AND PRACTICE **
- OT 2219 - FIELDWORK EDUCATION B **
- OT 2237 - CLINICAL CONDITIONS 2
- OT 2238 - ADAPTATION/TECHNOLOGY THEORY AND PRACTICE **

Year 2 - Fall Term - 13 Credits

- OT 2220 - CLINICAL SEMINAR 4
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **
- OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE **
- OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE
- OT 2226 - FIELDWORK EDUCATION C (FW I)**
- OT 2239 - PROJECT DEVELOPMENT 1
- OT 2244 - CLINICAL CONDITIONS 3

Year 2 - Spring Term - 13 Credits

- OT 2228 - FIELDWORK EDUCATION D (FW II)**
- OT 2229 - FIELDWORK EDUCATION E (FW II)**

Year 2 - Summer Term - 7 Credits

OT 2229 - FIELDWORK EDUCATION E (FW II)**

Year 3 - Fall Term - 12 Credits

- OT 3206 - ADVANCED THEORY AND PRACTICE **
- OT 3207 - PROJECT DEVELOPMENT 2
- OT 3210 - ADVANCED CONCEPTS IN PROFESSIONAL AND CLINICAL REASONING
- OT 3211 - ADVANCED CONCEPTS IN HEALTH POLICY AND ADVOCACY
- OT 3212 - LEADERSHIP DEVELOPMENT

Year 3 - Spring Term - 13 Credits

- OT 3208 - EXPERIENTIAL PRECEPTORSHIP **
- OT 3213 - PROFESSIONAL DEVELOPMENT SEMINAR

*Curriculum is subject to change.
**Course includes laboratory, fieldwork, or experiential component.

- Admission to the OTD program is only available on a full-time basis. Term 1 begins at the end of August (fall term).
- A GPA of at least 3.00 is required in the OTD program.

Fieldwork Education and Doctoral Capstone

Fieldwork education and the **doctoral capstone** are essential components of professional doctoral preparation and are integrated in the curriculum design. They are an extension of the OTD program within the clinical and community settings. Fieldwork education includes Level I and Level II experiences, which provide the OTD student with the opportunity to learn professional responsibilities by having them modeled by qualified and experienced personnel and to practice these responsibilities in a supervised setting. The doctoral capstone provides an in-depth capstone experience and includes the completion of capstone projects. The focus of the doctoral capstone is on the development of skills for increased autonomy as a contributor in advancing occupational therapy practice. Fieldwork education and the doctoral capstone are only conducted in sites that have a written agreement with SHRS. This agreement formally identifies the responsibilities of the University and the site.

PLEASE NOTE: The OTD program requires students to complete fieldwork education experiences and a doctoral capstone experience at facilities external to the University of Pittsburgh. All OTD students are responsible for securing required resources and completing required documents to participate in fieldwork and the doctoral capstone experience including but not limited to transportation, health examinations and associated testing (i.e., drug screen, vaccinations), health insurance, background clearances, CPR/AED training, education modules, parking, housing, food, and clothing.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the OTD program is regulated by the SHRS Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the Doctor of Occupational Therapy Student Handbook.

Graduate Certificate

Advanced Practice Certificate in Implementation of Evidence in Clinical Practice

Certificate Requirements

The Advanced Practice Certificate in Implementation of Evidence in Clinical Practice is offered 100% online on a part-time basis and requires completion of 12 credits. Students with an entry-level doctoral degree in occupational therapy, a post-professional doctoral degree in occupational therapy, a master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field are eligible to apply. View admission requirements here. Students who complete the Advanced Practice Certificate may choose to apply and transition into the Doctor of Clinical Science (CScD) in Occupational Therapy degree program and the 12 certificate credits will be applied toward the degree.

Curriculum and Course Descriptions

The Advanced Practice Certificate in Implementation of Evidence in Clinical Practice requires completion the following four 3-credit courses:

- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3020 - FOUNDATIONS IN IMPLEMENTATION
- OT 3030 - THE BUSINESS OF IMPLEMENTATION
- OT 3040 - ADVOCACY FOR IMPLEMENTATION

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the CScD in Occupational Therapy Student Manual.

Master's

Master of Science (MS) in Occupational Therapy

Program Requirements

The Master of Science (MS) in Occupational Therapy program begins in the fall term (August). The MS in Occupational Therapy program offers Clinical and Research plans of study, which provide exposure to a wide variety of occupational therapy practice and research. The Clinical and Research plans include 30 credits/2 terms (Fall and Spring). Additionally, the MS in Occupational Therapy program also offers a Research with Scholarly Project plan of study, which provides an opportunity to complete a scholarly project under the guidance of a faculty mentor. The Research with Scholarly Project is 30 credits/3 terms (Fall, Spring, and Summer).

Comprehensive Examination
Each student must successfully complete a Comprehensive Examination at the end of the program. This examination is used to determine mastery of the core content in the curriculum.

Contact Information

Department of Occupational Therapy
School of Health and Rehabilitation Sciences
University of Pittsburgh
Bridgeside Point 1, 100 Technology Drive, Suite 350
Pittsburgh, PA 15219

Admission Requirements

Admission Requirements and Application Process

Pitt SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Qualified applicants for the Master of Science (MS) Program in Occupational Therapy must meet the following admission requirements:

- Bachelor's degree in occupational therapy. For international students, a bachelor's degree or diploma must be from a school/university approved by the World Federation of Occupational Therapists (WFOT) in the year that the applicant graduated and/or national governmental institutions that approve/accredit occupational therapy programs to grant a degree in occupational therapy (e.g., Ministry of Health).
- For International applicants, a bachelor's degree must be completed by June 15 of the year the applicant would enter the program.
- Minimum cumulative grade point average of 3.00 (based on a 4.00 scale).
- Verification of English Language Proficiency is required unless the following apply:
    - the applicant is a citizen of a country whose official language is English
    - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
    - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- Interview (personal or virtual) with the MS Program Director

Application Requirements

- Complete the GradCAS application
- Submit the application fee of $50 (U.S.).
- Evidence of graduate level writing skills in a self-evaluation essay that discusses goals, strengths, skills, and experiences that will contribute to success in the program and in the profession. The essay should also include a brief statement discussing interest in the field of study and reasons for applying to the University of Pittsburgh.
- Documented evidence of knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Two letters of recommendation, preferably from individuals who have taught the applicant in an academic setting and/or supervised clinical activities. Letters of recommendation should address academic, professional and personal attributes, and potential for successful graduate education.
- Transcripts from all U.S. institutions attended.
- A course-by-course evaluation with GPA conversation for all higher-level institutions attended outside the US. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. (ECE).
- **Admitted students will be required to provide official transcripts and/or credential evaluations from all higher institutions attended to the SHRS Admissions Office prior to enrolling in classes.**

If applicable:

- Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
    - Duolingo English Test: 120. Scores should be sent to "University of Pittsburgh School of Health and Rehabilitation Sciences"
    - International English Language Testing System (IELTS): 6.5. Scores should be sent to "University of Pittsburgh School of Health and Rehabilitation Sciences"
    - Test of English as a Foreign Language (TOEFL): 80. New TOEFL scale as of January 2026: 4.0 with all sub-scores 4.0 or higher. Scores should be sent to institution code "2927".
    - Unofficial scores may be provided via GradCAS (in addition to the official scores required).

Admitted students who may need supplemental English language support should talk with their advisors. For additional information please click here.

Your application will be reviewed once it is complete.

Application Deadlines

May 1st. Applications are accepted for enrollment beginning in the Fall term only (August).

For questions about GradCAS, the application process and needed materials please email admissions@shrs.pitt.edu.

For information about our program, please contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Curriculum and Course Descriptions

Plan of Study: Clinical (30 credits / 2 terms)*

Term 1 - Fall Term - 15 Credits

- OT 2207 - PRINCIPLES OF ASSESSMENT **
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **OR** OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE**
- OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE
- OT 2241 - CLINICAL PRECEPTORSHIP 1 **
- OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION
- OT 3206 - ADVANCED THEORY AND PRACTICE **

Term 2 - Spring Term - 15 Credits

- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE **
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2242 - CLINICAL PRECEPTORSHIP 2 **
- OT 2248 - PROFESSIONAL REASONING IN OCCUPATIONAL THERAPY
- OT 2249 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: CLINICAL
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Plan of Study: Research (30 credits / 2 terms)*

Term 1 - Fall Term - 15 Credits

- HRS 2927 - STATISTICAL METHODS FOR HEALTH SCIENCE RESEARCH 1
- OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE **OR** OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE**

- OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE **
- OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM
- OT 2251 - SCHOLARLY PROJECT
- OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS
- OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Term 3 - Summer Term - 3 Credits
OT 2251 - SCHOLARLY PROJECT

*Curriculum is subject to change.
**Course includes laboratory or preceptorship component.

Preceptorship

The MS in Occupational Therapy program offers clinical and research preceptorships.

Clinical preceptorship provides structured exposure to the U.S. health care system. Students are exposed to occupational therapy practice in various health care settings (e.g., acute and inpatient rehabilitation hospitals, and outpatient clinics) under the supervision of a licensed occupational therapist.

Research preceptorships provide exposure to clinical research in the field of occupational therapy. Students are exposed to occupational therapy research in a variety of areas (e.g., pediatrics, neurology, geriatrics, health systems).

Students find the preceptorships to be rewarding experiences that advance their clinical or research skills and career development.

PLEASE NOTE: The MS in OT program requires students to complete preceptorship experience at facilities external to the University of Pittsburgh. All MS in OT students are responsible for securing required resources and completing required documents to participate in preceptorships including but not limited to transportation, health examinations and associated testing (i.e., drug screen, vaccinations), health insurance, background clearances, CPR/AED training, education modules, parking, housing, food, and clothing.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the MS in Occupational Therapy program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the Master of Science in Occupational Therapy Student Handbook.

Department of Physical Therapy

The Department of Physical Therapy offers three academic programs of study:

- Doctor of Physical Therapy (DPT) Program
- Joint DPT/PhD program leading to a DPT degree and a PhD in Bioengineering
- M.S. in Neuromuscular Physical Therapy

Doctoral

Physical Therapy, DPT - Hybrid Program

Program Requirements

The Doctor of Physical Therapy (DPT) program is the entry-level professional degree designed to prepare students for a career as a licensed physical therapist in the United States. The program is a 2.3 year (7-semester) course of study that includes both didactic education and clinical internships. The program is built to develop self-directed and accountable practitioners who can deliver cost-effective, evidence-based care across a wide range of settings and patient populations. Graduates are equipped to enhance human movement and function using evidence-based practice principles and are prepared with a strong foundation for continued growth in specialized areas, as well as for contributing to the advancement of the physical therapy profession.

The curriculum is structured around four key areas: basic science, clinical science, leadership and professional development, and critical inquiry. Through an integrated plan of study, students connect foundational sciences with clinical application while engaging in comprehensive coursework across major areas of practice, including musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy. To ensure graduates are fully prepared for entry into professional practice, the program combines rigorous didactic instruction with extensive clinical education. Students complete 42 weeks of full-time clinical internships, beginning with early clinical exposure in the second semester and culminating in two 15-week terminal clinical experiences. This emphasis on early and continuous clinical integration supports the development of confident, competent practitioners ready to enter the workforce. Upon successful completion of the curriculum, graduates are eligible to sit for the National Physical Therapy Examination (NPTE), a requirement for licensure and clinical practice. Students are responsible for understanding and meeting licensure requirements for the state or country in which they intend to practice. Because these requirements may vary and are subject to change, it is strongly recommended that students regularly review the applicable regulations to ensure compliance.

NOTE: In order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act and if you have a criminal record you **may** not be able to become licensed to practice as a physical therapist after graduation. Should you have concerns regarding your eligibility, we recommend you contact your state licensing board for further clarification. Additonally, many clinical sites will require a Child Abuse clearance (Act 33), Criminal Background check (Act 34), and a drug screen prior to participation in a clinical education experience. **If you do not** have a clean background check for either Act 33/34 clearance, or a clean drug screen you may not be able to participate in Clinical Education and therefore will not be able to meet the DPT requirements for graduation.

Admissions Requirements

Admission requirements and procedures listed below are for the DPT Residential and Hybrid program formats.

Prerequisites

A bachelor's degree from an accredited institution with a minimum GPA of 3.0 (based on a 4.0 scale)

Completion of the following courses, while not required, it is preferable that courses be completed within the past 5 years with a minimum of a C grade or higher. At the time of the application no more than 4 courses can be outstanding or in progress. Any offer of admission will be contingent upon the successful completion of any remaining prerequisites by July 1 prior to the start of the DPT Program. Academic performance on outstanding coursework should not deviate from the performance reflected in the application materials.

- Chemistry I and II sequence with labs, 8 credit hours.
- Physics I and II sequence with labs, 8 credit hours.
- Biology I and II sequence with labs, 8 credit hours.
- Anatomy (human, vertebrate, comparative or anatomical kinesiology), 3 credit hours.
- Physiology (human physiology preferred), 3 credit hours.
  *A two course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.
  **Science courses must be for science majors or pre-med majors. Introductory or remedial courses are not accepted as prerequisites.
- Two courses in Psychology that should include a general psychology course and a specialized psychology course such as developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours.
- Statistics, 3 credit hours.
- English Writing (English composition or an upper-division writing course), 3 credit hours.

NOTE: While not required, faculty have found taking an undergraduate course in Exercise Physiology benefits students during their first term in the DPT program. **GRE not required.**

Transcripts

Applicants are required to provide official transcripts from every U.S. college and university attended.Admitted students will need to submit official transcripts to the SHRS Admissions Office prior to enrolling in classes.

Letters of Recomendation

Submission of three (3) letters of recomendation attesting the applicant's academic and professional abilities.

1. One (1) letter **MUST** be from academic reference - a professor/instructor from a course(s) for which the applicant was enrolled. The academic course must either be a pre-requisite for the DPT program OR a course associated with student's major area of study. The letter should include insights regarding the applicant's potential for successful navigation through a graduate-level professional degree program and provide specific examples of observed characteristics that support such insights.

2. One (1) letter must be from a physical therapist that the applicant has shadowed.

3. One (1) letter of recommendation may be completed by any of the following: physical therapist, professor/instructor, academic advisor, minister, employer/supervisor, life coach/mentor, research faculty, internship supervisor/faculty, or athletic coach. While it is preferred that the letters of recommendation be completed by individuals from a variety of settings, it is permissible to submit Two (2) letters from a similar source (two different physical therapists, or two different employers/supervisors, two different professors, etc.).

Experience

Applicants must have demonstrated evidence of adequate exposure to the field of physical therapy and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a physical therapy setting; 50 hours of exposure required. It is preferable for applicants to show evidence of the willingness to work with a variety of patients in different physical therapy settings; we prefer to see the 50 hours completed in at least two (2) different clinical settings.

Technical Standards

The Department faculty have outlined the Technical Standards deemed essential for successful completion of the DPT curriculum. Students admitted to the DPT program must review the Technical Standards and submit a signed form indicating that they meet the Technical Standards at the time of matriculation into the program.

Application Process

Admission to the Doctor of Physical Therapy (DPT) program is offered on a full-time basis only. The program begins annually in the Fall Term. The application cycle opens in mid-June and closes on October 1 each year. All applicants must apply through the Physical Therapist Centralized Application Service (PTCAS). Applicants can access the application through the Department website.

Within the PTCAS application, applicants must select the University of Pittsburgh Doctor of Physical Therapy program in the application portal. Applicants will also be required to indicate their preferred program format (Residential, Hybrid, or Either) within the system.

A complete application includes the following components:

1. Completed PTCAS application
2. Application fee
3. PTCAS personal statement
4. University of Pittsburgh essay question (included within the PTCAS application)

Applicants who are interested in the dual degree Doctor of Physical Therapy/PhD in Bioengineering program must apply directly to that program in the PTCAS application portal.

NOTE: There is a specific designation for the Pitt DPT/PhD dual degree program and at this time, the dual degree DPT/PhD program is only available to students participating in the DPT Residential option.

If applicable:

1. Enter all international (non-United States/foreign) institutions you have attended on your PTCAS application. Order a WES ICAP Course-by-Course evaluation from World Education Services (WES) through the PTCAS application.

2. Verification of English Language Proficiency is required unless the following apply:
    - the applicant is a citizen of a country whose official language is English
    - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
    - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
3. If required, provide Test of English as a Foreign Language (TOEFL) scores in your PTCAS application, and request an official TOEFL scores report be sent to TOEFL code "5312" by the application deadline.

Community Engagement & IPE Requirement

Prior to graduation, students in the DPT Program are required to complete 2 Community Engagement activities and 3 Interprofessional Education (IPE) experiences, totaling 5 unique activities across the 7-term program. Additional details regarding this requirement can be found in the Student Handbook.

DPT Curriculum

Plan of Study*

Fall - Term 1:

- PT 2030 - HUMAN ANATOMY
- PT 2229 - KINESIOLOGY AND INTRODUCTION TO THERAPEUTIC EXERCISE
- PT 2201 - CARDIOPULMONARY PHYSICAL THERAPY 1
- PT 2241 - PATIENT MANAGEMENT 1

Spring - Term 2:

- PT 2060 - NEUROSCIENCE
- PT 2231 - MUSCULOSKELETAL PHYSICAL THERAPY 1
- PT 2202 - CARDIOPULMONARY PHYSICAL THERAPY 2
- PT 2040 - SURVEY OF HUMAN DISEASE 1
- PT 2281 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 1
- PT 2141 - CLINICAL EDUCATION 1

Summer - Term 3:

- PT 2045 - SURVEY OF HUMAN DISEASE 2
- PT 2232 - MUSCULOSKELETAL PHYSICAL THERAPY 2
- PT 2261 - NEUROMUSCULAR PHYSICAL THERAPY 1
- PT 2242 - PATIENT MANAGEMENT 2
- PT 2282 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 2
- PT 2291 - EVIDENCE BASED PRACTICE PHYSICAL THERAPY 1
- PT 2142 - CLINICAL EDUCATION 2

Fall - Term 4:

- PT 2059 - GERIATRIC PHYSICAL THERAPY
- PT 2243 - PATIENT MANAGEMENT 3
- PT 2262 - NEUROMUSCULAR PHYISCAL THERAPY 2
- PT 2255 - GROWTH & DEVELOPMENT
- PT 2028 - HEALTH AND WELLNESS
- PT 2283 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 3
- PT 2292 - EVIDENCE-BASED PRACTICE PHYSICAL THERAPY 2

Spring - Term 5:

- PT 2263 - NEUROMUSCULAR PHYSICAL THERAPY 3
- PT 2079 - MANAGEMENT OF THE MEDICALLY COMPLEX PATIENT
- PT 2233 - MUSCULOSKELETAL PHYSICAL THERAPY 3
- PT 2102 - PHARMACOLOGY
- PT 2293 - EVIDENCE-BASED PRACTICE PHYSICAL THERAPY 3

Summer - Term 6:

- PT 2294 - EVIDENCE-BASED PRACTICE PHYSICAL THERAPY 4

- PT 2143 - CLINICAL EDUCATION 3

  Fall - Term 7:
- PT 2295 - EVIDENCE-BASED PRACTICE PHYSICAL THERAPY 5
- PT 2144 - CLINICAL EDUCATION 4

  Pitt DPT 7-Term Outline
  *Curriculum is subject to change. A GPA of at least 3.00 is required in the DPT program.

Statute of Limitations

All requirements of the DPT must be completed within three years. Extension of the statute of limitations may be granted if there are extenuating circumstances. Such requests, listing reasons for the extension and the amount of additional time needed, must be approved by the department chair.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Hanbook and the Doctor of Physical Therapy Student Handbook.*

Physical Therapy, DPT - Residential Program

Program Requirements

The Doctor of Physical Therapy (DPT) program is the entry-level professional degree designed to prepare students for a career as a licensed physical therapist in the United States. The program is a 2.3 year (7-semester) course of study that includes both didactic education and clinical internships. The program is built to develop self-directed and accountable practitioners who can deliver cost-effective, evidence-based care across a wide range of settings and patient populations. Graduates are equipped to enhance human movement and function using evidence-based practice principles and are prepared with a strong foundation for continued growth in specialized areas, as well as for contributing to the advancement of the physical therapy profession.

The curriculum is structured around four key areas: basic science, clinical science, leadership and professional development, and critical inquiry. Through an integrated plan of study, students connect foundational sciences with clinical application while engaging in comprehensive coursework across major areas of practice, including musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy. To ensure graduates are fully prepared for entry into professional practice, the program combines rigorous didactic instruction with extensive clinical education. Students complete 42 weeks of full-time clinical internships, beginning with early clinical exposure in the second semester and culminating in two 15-week terminal clinical experiences. This emphasis on early and continuous clinical integration supports the development of confident, competent practitioners ready to enter the workforce. Upon successful completion of the curriculum, graduates are eligible to sit for the National Physical Therapy Examination (NPTE), a requirement for licensure and clinical practice. Students are responsible for understanding and meeting licensure requirements for the state or country in which they intend to practice. Because these requirements may vary and are subject to change, it is strongly recommended that students regularly review the applicable regulations to ensure compliance.

Pitt DPT 7-Term Outline
*Curriculum is subject to change. A GPA of at least 3.00 is required in the DPT program.

Statute of Limitations

All requirements of the DPT must be completed within three years. Extension of the statute of limitations may be granted if there are extenuating circumstances. Such requests, listing reasons for the extension and the amount of additional time needed, must be approved by the department chair.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Hanbook and the Doctor of Physical Therapy Student Handbook.*

Joint Degree

Physical Therapy/Bioengineering, DPT/PhD

Program Overview

The Doctor of Physical Therapy (DPT) - PhD in Bioengineering program combines the entry-level DPT leading to licensure as a physical therapist, with a PhD in Bioengineering that will prepare the student to become an independent researcher.

Contact Information

Patrick Sparto, PhD, PT
Co-Director, DPT-PhD Program
Department of Physical Therapy
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
Phone: 412-383-6732
E-mail: psparto@pitt.edu

Application Process

The application opens in mid-June and will need to be submitted through the PT Centralized Application Service (PTCAS) by December 1 for admission to the program the following August. The application is reviewed by faculty in both departments.

Admission Requirements

Students will need to meet the admission requirements of both programs.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

Students will need to meet the prerequisite requirements of both programs.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Hanbook and the Doctor of Physical Therapy Student Handbook.*

Curriculum Overview

Students will follow the typical plan of study for DPT residential students for the initial seven terms (i.e., 2.3 years) of the program. Then students will follow the plan of study for PhD students in Bioengineering. Clinical internships and research experiences will be performed throughout the program. At a minimum, the program will take 6 years to complete. After completing the didactic and clinical requirements of the DPT program, the student will be allowed to take the licensing exam. Students are required to write and orally defend a dissertation to complete their PhD degree.

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development,and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence basedpractice and includes a comprehensive array of course off erings in musculoskeletal, neuromuscular, integumentary,cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development. The first 5 terms are comprised of both didactic instruction as well as two full-time clinical education experiences that are a duration of 6 weeks. The curriculum concludes with two 15-week terminal clinical educational experiences (Summer-Fall). The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program.

PhD Requirements

The Department of Bioengineering follows university guidelines on students working toward joint degrees like the DPT-PhD in Bioengineering. Typically, we have waived the life science requirement (6 credits) as comparable coursework is covered in the physical therapy curriculum. The remaining course requirements closely follow requirements for the PhD in Bioengineering.

- Bioengineering Track Courses - 9 credits*
- Life Sciences (successfully completing the lecture and lab components of Human Anatomy coursework fulfills this requirement) - 6 credits
- Graduate Electives (successfully completing Musculoskeletal I & II fulfills this requirement) - 6 credits*
- Graduate Engineering Mathematics - 3 credits
- Statistics for Bioengineers - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (or equivalent bioethics course) - 3 credits
- Seminar - 6 credits total, 4 credits must be BIOENG 2023 - BIOENGINEERING SEMINAR SERIES. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP (grant writing) - 1 credit
- Students should refer to SSOE policy regarding the minimum number of dissertation credits (BIOENG 3997 and BIOENG 3999) required for graduation.

*The standard policy for PhD students is 9 credits of track courses and 6 credits of electives. There is an exception for the Bioimaging and Signals track, for which the requirement is 12 credits of track courses and 3 credits of electives. DPT-PhD students in this track must take all four track courses, in which case only 3 elective credits are waived.

Total number of credit hours: 72 credits minimum, which includes 6 credits to fulfill life science requirement but does not include credits from foundational courses if applicable.

DPT/PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department.

Please see the Department of Bioengineering's PhD Requirements page for more details.

Department of Physician Assistant Studies

Award-winning and internationally recognized faculty and staff prepare you to become a highly qualified physician assistant ready to serve as a future leader in the delivery of health care, patient education and professional service. Pitt's Department of Physician Assistant Studies is deeply committed to graduating a workforce of diverse and inclusive certified PAs to serve our communities here in our city, across the nation and around the world.

By instilling a lifelong desire for continued learning and scholarly productivity, our alumni contribute to advances and advocacy in the profession long after graduation. Together, our faculty, staff, students and alumni help shape PA professional research that informs the science, delivery and administration of health care reaching patients everywhere.

Doctoral

Doctor of Medical Science

The Doctor of Medical Science (DMSc) Program meets the following requirements for professional doctoral degrees as stipulated in the *Regulations Governing Graduate Study at the University of Pittsburgh* through:

- Matriculation through a coherent program designed to assure the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession
- A research component to achieve the goal of research competence including a report demonstrating mastery of the subject matter and a high level of communication skills,
- Minimum admission requirements that will align with all graduate programs at the University of Pittsburgh,
- Completion of a defined set of prerequisites so that all students will enter with required basic knowledge, and
- Maintenance of a 3.00 GPA to remain in good standing and be graduated.

Program Duration

The program is designed to be completed in three terms, but flexible plans of study are available.

Program Characteristics, Type of Instruction, & Level of Instruction

The Doctor of Medical Science Program graduate-level coursework will consist of online courses and will culminate in a Scholarly Practice Capstone Project. The core curricular concepts will be presented primarily asynchronously, similar to an in-class lecture, but using interactive online educational activities to promote knowledge acquisition. This knowledge will be reinforced with synchronous, instructor-led, online activities to facilitate application and synthesis of the knowledge acquired through the asynchronous online activities. Additionally, each matriculant will work closely with an assigned faculty advisor who will help guide their studies and mentor them in their Scholarly Practice Capstone Project. This individualized and learner-centered approach will allow matriculants to engage in scholarly activity that will have a direct and positive impact in their daily work.

Assessments

Assessments will be competency- based and scaffolded to support completion of the Scholarly Practice Capstone. Such assessments will include:

- Reflective writing assignments,
- Scholarly writing assignments,
- Written evidence of literature review,
- Interested party assessments,
- Oral presentations, and
- Written defense of the Scholarly Practice Capstone.

Plan of Studies

Courses will be offered in consecutive semesters in the Spring, Fall, and Summer Terms. It is recommended that students proceed sequentially, as a cohort, through the program. This program is intended to be a post-professional degree program for full-time practicing PAs. The advantage of this design is to allow learners to remain in their clinical practice full-time, while earning their degree part-time, so that they can apply their classroom learning to their clinical practice in a meaningful and impactful way. The curriculum is designed to help students be informed by, and to inform, their current practice as they learn. This design allows for a balanced curriculum that helps working professionals stay on track. Individualized plans of study will be considered for students who experience extenuating circumstances that require individualized or personalized plans to meet their academic goals. Per the *Regulations Governing Graduate Study at the University of Pittsburgh*, this professional doctoral degree program, the statute of limitations for students for completion of all DMSc degree requirements will be set at 8 years and will not be extended beyond the expectation for a Doctor of Philosophy student. Courses and their sequencing are presented in Table 1.

Table 1. DMSc Program Plan of Studies

COURSE NUMBER	TITLE OF COURSE	CREDIT HOURS
PAS 3001	Core Concepts of Scholarly Practice	4
PAS 3002	Examining Supporting Evidence	4
PAS 3003	Developing the PA Leader: Internship Experience 1	6
PAS 3004	Personalized Elective (Academic, Administrative, or Digital Health)	4
PAS 3005	Scholarly Practice Capstone Phase 1	4
PAS 3006	Developing the PA Leader: Internship Experience 2	6
PAS 3007	Scholarly Practice Capstone Phase 2	8
PAS 3008	Developing the PA Leader: Internship Experience 3	6

DMSc credits	42
Graduate transfer credits	30
Total credits for DMSc degree	**72**

Requirements

- PAS 3001 - CORE CONCEPTS OF SCHOLARLY PRACTICE
- PAS 3002 - EXAMINING SUPPORTING EVIDENCE
- PAS 3003 - DEVELOPING THE HEALTHCARE LEADER: INTERNSHIP EXPERIENCE 1
- PAS 3004 - PERSONALIZED ELECTIVE
- PAS 3005 - SCHOLARLY PRACTICE CAPSTONE PHASE 1
- PAS 3006 - DEVELOPING THE HEALTHCARE LEADER: INTERNSHIP EXPERIENCE 2
- PAS 3007 - SCHOLARLY PRACTICE CAPSTONE PHASE 2
- PAS 3008 - DEVELOPING THE HEALTHCARE LEADER: INTERNSHIP EXPERIENCE 3

Master's

Physician Assistant Studies Residential Program, MS

Program Requirements

Application

Application Opens

April 30, 2026

Application Closes

August 1, 2026

Application System

Apply through the Centralized Application System for Physician Assistants (CASPA)

The application fee is set by CASPA.

Academic Standards and Prerequisites

- Qualified applicants must hold a bachelor's degree from an accredited institution.

- Applicants should have an overall GPA of 3.0 (based on 4.0) in all college level coursework and a minimum GPA of 3.0 (based on 4.0) in the prerequisite science courses designated below with an asterisk (*).
    - See the Centralized Application Service for Physician Assistants (CASPA) site for definitions of these GPAs.
    - Exceptions may be made (but are not guaranteed) for applicants who present compelling evidence of success in graduate coursework. This means that if an applicant has an overall GPA of <3.0, their application may still be reviewed/considered if they have completed an entire master's or doctorate level program.
    - Completion of graduate level courses without a diploma from said programs will not be considered, nor will graduate-level certificate programs.
- All admissions requirements must be completed by the application deadline to start classes in the following spring term (January).

Prerequisite Coursework

A 'C' grade or higher in all required prerequisite coursework listed below:

- Biology with lab designed for science majors, two semesters*
- Chemistry with lab designed for science majors, two semesters*
- Microbiology with lab, one semester*
- Anatomy with lab and Physiology*
    - This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy with lab and Physiology combined.
- Statistics, one semester
- Medical Terminology, one semester for at least 1 college credit
- English Composition/writing, two semesters
- Psychology, one semester
- There is no expiration date for prerequisite courses. Please review this detailed prerequisite rubric to ensure your courses satisfy our prerequisite requirements. If applicants still have questions after the self-assessment, they may request an unofficial prerequisite evaluation. To request an unofficial evaluation, please complete and email the following items:

- Completed PAS Prerequisite Rubrichttps://live-shrs23wp-pitt.pantheonsite.io/wp-content/uploads/PA-MS-Prereq-Sheet-Fillable-February
- Refer to page 3 to provide detailed course description for the course in question
- Send the completed rubric to: PittPA@shrs.pitt.edu
- Official transcripts from all colleges and universities attended will be required.

NOTE: The GRE General Test is not required for admission to the program.

Transcripts

Official transcripts from all U.S. universities, colleges or other higher education institutions attended are required at the time of application.

Experience

A minimum of 500 hours of direct, hands-on patient care experience is required by the admissions requirement deadline. Direct patient care involves active participation in the care, evaluation, or treatment of patients. Examples of eligible experiences include registered nurse (RN), licensed practical nurse (LPN), paramedic, emergency medical technician (EMT), emergency room technician, military medical roles (e.g., medic or corpsman), athletic trainer, dietician, medical assistant, nursing assistant, patient care technician, surgical technician, pharmacy technician, dental assistant, physical or occupational therapy assistant, and phlebotomist.

Contact the PA enrollment specialist if you are unsure if your experience will satisfy this requirement.

Personal Statement

Applicants must provide one personal statement in CASPA focusing on why the applicant wants to become a physician assistant/associate (PA).

The program encourages applicants to reflect on how their experiences, values and career goals align with the mission and goals of the University of Pittsburgh PA Studies program.

Letters of Recommendation

Three (3) professional letters of recommendation are required, including:

- **One (1) Patient Care Experience (PCE) Supervisor** - A supervisor the applicant has worked with or currently works with in a patient care role.
    - Examples: manager, assistant manager, department director or military supervisor.
- **One (1) Character Reference** - Someone who can speak to the applicant's personal qualities, reliability and professionalism.
    - Examples: peer, coworker, mentor, volunteer group leader or religious and/or spiritual leader.
- **One (1) Prior Instructor** - An individual who has taught or formally trained the applicant.
    - Examples: college or university instructor/professor, certification or skills instructor, a supervisor who provided on-the-job skills training or a military instructor.

Recommendations should not be provided by friends or family members. This information will be collected with the CASPA application.

Technical Standards and Skills

Students admitted to the program must review the Technical Standards for admission and graduation and submit a signed form at the time of matriculation verifying satisfactory performance of the essential skills.

Application Review Process

Application Review

The entire application (including prerequisite courses, letters of recommendations and personal statement) must be received and verified by CASPA no later than 11:59 p.m. (EST) on the deadline. Applications not verified, or any required application materials not submitted by the deadline, will not be considered and will disqualify the application.

The admissions committee will then rate and review all completed applications. The most qualified applicants will be invited for a virtual interview in September.

Interview Process

Applicants invited for a virtual interview will participate in several individual mini-interviews and one group interview exercise with other applicants. Each interview will be conducted by one faculty or community member and one current Pitt PA student. Following completion of all interviews, a class of up to 67 students will be selected. The number of seats available through the regular admissions cycle may vary based on the number of students accepted through the Guaranteed Admission Program. Applicants will be notified of a decision (offer of admission, waitlist, or denial) in October after all interviews are completed

What We Look For In an Applicant

The University of Pittsburgh Physician Assistant Program uses a holistic admissions process. We evaluate academic preparation, clinical experience, service, leadership, and the context in which achievements occurred. Our review is applied consistently to all applicants. The most competitive applicants strongly align with our program mission and goals, as well as our core values of reliability, accountability, humility, integrity, curiosity, and generosity.

We evaluate the following objective measures:

- Overall GPA
- Prerequisite science GPA
- Completion of prerequisite coursework
- Duration and level of patient care experience
- Graduate degree attainment, if applicable

We give preference to those who demonstrate a strong match to our mission, and to applicants with the following non-academic attributes and/or experiences:

- Significant service in community organizations and/or free medical clinics
- Experience serving systematically disadvantaged communities or populations
- Firsthand upbringing in resource-limited environments, including a health professional shortage area or an economically/educationally disadvantaged setting
- Perseverance through adverse life events
- Serving a key role in providing care and support to another person, including non-traditional roles (e.g., sibling, parent, or extended family caregiving)
- First generation college student
- Active military service or Veteran status
- Multilingual or English not primary language

Understanding of the healthcare system and the PA role within it, along with demonstrated leadership, teamwork, ethical reasoning, personal insight and maturity, motivation, conflict resolution, and active listening, will also weigh strongly in the admissions decision.

Admissions Notifications

- Applicants from all backgrounds and life experiences are encouraged to apply.
- Advanced placement is not offered in this program. Required PA curriculum courses and components cannot be waived or transferred, and all students must complete the full curriculum at the University of Pittsburgh.
- Background checks and screening are required for admission and enrollment. This includes a criminal background check, health assessment, and drug screen. Admission and continued enrollment are contingent upon satisfactory results and timely completion of required documentation. Additional screenings may be required for supervised clinical practice experiences.

International Student Information

The following requirements are necessary for applicants from outside of the U.S.

For questions about the international student requirements, please reach out to the SHRS Admissions Office.

Verification of English Language Proficiency

The University of Pittsburgh accepts the official results of the Duolingo English Test, the International English Language Testing System (IELTS) or the Test of English as a Foreign Language (TOEFL) as a measure of English language proficiency.

Verification is required unless the following apply:

- The applicant is a citizen of a country whose official language is English.
- The applicant has completed a degree program at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

Minimum Scores by Program

How to Submit Scores

- Duolingo English Test: Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
- International English Language Testing System (IELTS): Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
- Test of English as a Foreign Language (TOEFL): Scores should be submitted electronically through ETS to institution code "2927".

Academic Credential Evaluations

Students who have completed the equivalent of a baccalaureate degree or higher at an institution outside of the United States are required to provide an academic credential evaluation from Educational Credential Evaluators, Inc. or World Education Services (WES), Inc. with their application.

- A course-by-course evaluation with GPA conversion is required.
- Evaluations are not required for degrees earned in the United States. If you have attended an English Canadian institution, please contact the SHRS Admissions Office.
- Individual SHRS programs may have their own specific Academic Credential Evaluation requirements.

Accreditation

The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation-Continued status to the Physician Assistant Studies program sponsored by the University of Pittsburgh. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards. Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The date for the next validation review of the program by the ARC-PA will be September 9-10, 2027. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

The program's accreditation history can be viewed here: https://www.arc-pa.org/wp-content/uploads/2026/03/Accreditation-History-Univ-of-Pittsburgh-113.pdf

Questions?

If you have questions, reach out to pittpa@shrs.pitt.edu at any time.

Plan of Study

The Physician Assistant curriculum is comprised of a rigorous 24 month Master of Science Program. The goals and objectives of our program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA. The first three semesters (12 months) are made up of primarily classroom instruction. Course content is presented through traditional lecture, integrated instruction, case based and hands on skills labs. The clinical year is comprised of rotations in inpatient medicine, primary care, emergency medicine, general surgery, OB/GYN, pediatrics, and behavioral health. The curriculum is presented by practicing physician assistants, medical and surgical physicians, and other health care providers who have expertise in their respective specialties.

Each course in the program is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of 'C' or better; leave of absence from program) will result in the delay of completion of program requirements and graduation from the program.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2101 - INTRODUCTION TO THE PHYSICIAN ASSISTANT PROFESSION
- PAS 2102 - HUMAN ANATOMY
- PAS 2105 - HEALTH POLICY
- PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2108 - INTRODUCTION TO CLINICAL MEDICINE WITH LAB
- PAS 2109 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2107 - PATIENT EDUCATION AND COUNSELING
- PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1
- PAS 2202 - CLINICAL MEDICINE 1
- PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1
- PAS 2204 - PHARMACOLOGY 1

Semester Total Credits: 15

Semester 3:

Course Credits

- PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2
- PAS 2302 - CLINICAL MEDICINE 2
- PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2
- PAS 2304 - PHARMACOLOGY 2
- PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN
- PAS 2306 - FUNDAMENTALS OF SURGERY

Semester Total Credits: 15

Year 1 Total Credits: 45

Clinical Year 2:

Semester 4:

Course Credits

- PAS 2701 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1
- PAS 2702 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2
- PAS 2703 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Semester Total Credits: 12

Semester 5:

Course Credits

- PAS 2704 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4
- PAS 2705 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5
- PAS 2706 - SUPERVISED CLNICAL PRACTICE EXPERIENCE 6

Semester Total Credits: 12

Semester 6:

Course Credits

- PAS 2707 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7
- PAS 2713 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8
- PAS 2714 - TRANSITION TO PROFESSIONAL PRACTICE

Semester Total Credits: 13

Year 2 Total Credits: 37

Program Credits Total: 82

Certification

Graduates of the professional program are eligible to sit for the Physician Assistant National Certification Exam (PANCE) administered by the National Commission on Certification of the Physician Assistant (NCCPA). All States and the District of Columbia have legislation governing the qualifications or practice of physician assistants. All jurisdictions require physician assistants to pass the Physician Assistant National Certifying Examination. Only those successfully completing the examination may use the credential "Physician Assistant-Certified." To remain certified, PAs must complete 100 hours of continuing medical education every 2 years. Every 10 years, they must pass a recertification examination.

Physician Assistant Studies, MS - Hybrid Program

Program Requirements

PAS-Hybrid applicants need to have completed the following prerequisites:

- Biology with lab designed for science majors, two semesters*

- Microbiology with lab, one semester*
- Chemistry with lab designed for science majors, two semesters*
- Anatomy with lab and Physiology* (This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy with lab & Physiology combined.)
- Statistics, one semester
- Medical Terminology, one semester for at least 1 college credit
- English Composition/writing, two semesters
- Psychology, one semester

*Both prerequisite science courses and cumulative GPA of 3.0 or higher is required

There is no expiration date for prerequisite courses.

Other Admission Criteria

Successful completion of an undergraduate degree (BS or BA) at an accredited institution

- **Online Application:** Upload all application materials through Centralized Application Service for Physician Assistants (CASPA).
- **Patient Care Experience:** A minimum of 500 hours of direct, "hands-on," patient care experience is required by the application deadline. Examples of eligible experiences may include work as an RN, EMT, paramedic, medical assistant, physical therapy or occupational therapy assistant.
- **Personal Statements:** Students must provide two personal statements in CASPA. Your first essay should be a personal statement focusing on why you want to become a PA. The second essay should reflect the mission of the PA Studies Hybrid program and commitment to Diversity, Equity and Inclusion.
- **Letters of Recommendation:** Submit three letters of recommendation including one (1) character reference, one (1) from a supervisor of the required patient care experience and one (1) insrtuctor.

All coursework, requirements, and degree must be completed by August 31st of the application year in order to be considered for a seat in the class that will begin the following January.

Virtual Interview Process

Interviews for seats in our program are performed and scored by the program director, faculty, and practicing PAs. They include the following parts and scoring:

- **Individual interview:** Higher scores are awarded based on the strength of demonstration of the following qualities: adaptability/stress management, conflict resolution, and technical and professional knowledge/ability to learn
- **Group interview:** Higher scores are awarded based on the strength of demonstration of the following qualities: active listening, conflict management, probing the group to maximize performance, leadership skills, clarification of group responses, encouraging and harmonizing with fellow group members, articulation, drawing others into the conversation, offering ideas, and summarizing

Program and Admission Notes

- The program is two full years (six consecutive semesters) and classes start each January (spring semester)
- Students are highly encouraged to apply early
- The program does not offer advanced standing
- All courses within the curriculum are required
- No credit is granted for pre-admission experiential learning
- Only full-time students are admitted
- All applicants need to identify as U.S. citizens, have documentation of permanent residency or have dual citizenship status

Accreditation

The ARC-PA has granted **Accreditation-Provisional** status to the **University of Pittsburgh Physician Assistant Studies Hybrid Program** sponsored by **University of Pittsburgh**.

Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA Standards or when a program holding Accreditation- Provisional status appears to demonstrate continued progress in complying with the Standards as it prepares for the graduation of the first class (cohort) of students.

Accreditation-Provisional does not ensure any subsequent accreditation status. It is limited to no more than five years from matriculation of the first class.

The program's accreditation history can be viewed on the ARC-PA website at http://www.arc-pa.org/accreditation-history-university-of-pittsburgh- hybrid/.

Plan of Study

The University of Pittsburgh PA Studies Hybrid Program is a 24-month program that awards a Master of Science degree upon successful completion. The goals and objectives of the program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA.

The first three semesters (12 months) are made up of didactic instruction. This didactic component will consist of asynchronous and synchronous online didactic courses. The didactic content will be presented using interactive online educational activities to promote knowledge acquisition. Synchronous, instructor-led, online activities will facilitate application and synthesis of the knowledge acquired through the asynchronous online activities. The onsite intense immersion laboratory experiences will be utilized to master the development of clinical skills necessary for examination, evaluation, diagnosis, prognosis, intervention, and assessment of outcome. The curriculum is presented by practicing physician assistants, medical and surgical physicians, and other health care providers who have expertise in their respective specialties. All didactic component courses are sequential and must be successfully completed in order to progress to the next term of the curriculum.

The last three semesters (12 months) are made up of a clinical component and will consist of Supervised Clinical Practice Experiences (SCPE) in Internal Medicine, Family Medicine, Emergency Medicine, Pediatrics, Surgery, Behavioral Health, Obstetrical and Gynecological Medicine, and an Elective. There is also a Transition to Professional Practice course at the end of the clinical curriculum.

Since each course in the program is offered only once during each academic year, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of 'C' or better, leave of absence from the program) will result in a delay by retaking the course the following year, as well as delays in completing the program and graduating with the Master of Science degree.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2401 - INTRODUCTION TO THE PA PROFESSION
- PAS 2402 - HUMAN ANATOMY AND LAB
- PAS 2403 - HEALTH POLICY
- PAS 2404 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2405 - INTRODUCTION TO CLINICAL MEDICINE
- PAS 2406 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2407 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2408 - PATIENT EDUCATION AND COUNSELING
- PAS 2409 - HISTORY TAKING AND PHYSICAL EXAMINATION 1 AND LAB
- PAS 2410 - CLINICAL MEDICINE 1 AND LAB
- PAS 2411 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1 AND LAB
- PAS 2412 - PHARMACOLOGY 1

Semester Total Credits: 15

Semester 3:

Course Credits

- PAS 2413 - HISTORY TAKING AND PHYSICAL EXAMINATION 2 AND LAB
- PAS 2414 - CLINICAL MEDICINE 2 AND LAB
- PAS 2415 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2 AND LAB
- PAS 2416 - PHARMACOLOGY 2
- PAS 2417 - HEALTH ISSUES ACROSS THE LIFESPAN
- PAS 2418 - FUNDAMENTALS OF SURGERY

Semester Total Credits: 15

Year 1 Total Credits: 45

Clinical Year 2:

Semester 4:

Course Credits

- PAS 2421 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1
- PAS 2422 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2
- PAS 2423 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Semester Total Credits: 12

Semester 5:

Course Credits

- PAS 2424 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4
- PAS 2425 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5
- PAS 2426 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

Semester Total Credits: 12

Semester 6:

Course Credits

- PAS 2427 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7
- PAS 2428 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8
- PAS 2429 - TRANSITION TO PROFESSIONAL PRACTICE

Semester Total Credits: 13

Year 2 Total Credits: 37

Program Credits Total: 82

Certification

Graduates of the professional program are eligible to sit for the Physician Assistant National Certification Exam (PANCE) administered by the National Commission on Certification of the Physician Assistant (NCCPA). All States and the District of Columbia have legislation governing the qualifications or practice of physician assistants. All jurisdictions require physician assistants to pass the Physician Assistant National Certifying Examination. Only those successfully completing the examination may use the credential "Physician Assistant-Certified." To remain certified, PAs must complete 100 hours of continuing medical education every 2 years. Every 10 years, they must pass a recertification examination.

Department of Rehabilitation Science and Technology

Master of Rehabilitation Technology

Program Overview

The hybrid Master's in Rehabilitation Technology prepares you to evaluate and apply assistive devices across clinical settings. The program combines online coursework with in-person workshops and internships, grounding technical knowledge in direct client work. Specialized coursework also reduces the work hours required to sit for the RESNA Assistive Technology Professional (ATP) credential.

Contact Information

RST Admin
University of Pittsburgh
6425 Penn Avenue, Suite 401
Pittsburgh, PA 15206
412-383-1150
E-mail: rstinfo@shrs.pitt.edu
http://www.shrs.pitt.edu/RST/

Application Requirements

All applicants must:

- Complete the GradCAS application;
- Submit the application fee of $50 (U.S.).
- Submit an essay -- a description of educational and long-term professional goals;
- Submit two letters of reference, preferably from individuals who have instructed you in academic settings. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study;
- Submit official transcripts from all colleges and universities you have attended;
- Additional requirements for international applicants

Note: Application can be submitted while course requirements are in progress.

Please note this program requires that you complete clinical internships at facilities that may be external to the University, and such facilities will or may require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the clinical internships.

Tuition and Fees

Tuition and Fee rates for the MRT program can be found at the following website:

- https://www.tuition.pitt.edu/

Master of Science in Prosthetics and Orthotics

Program Overview

Clinical orthotics and prosthetics includes the evaluation, design, fabrication and custom fitting of orthoses (orthopedic braces) and prostheses (artificial limbs). Artificial limbs, or prostheses, are used to replace missing limbs or portions of limbs, and to improve function of the upper or lower extremities. Orthopedic braces, or orthoses, are used to stabilize or unload joints, improve motion and reduce stresses on tissue, substitute for muscle weakness or paralysis, and assist in normal growth, development and function. Orthoses can be applied to the head, neck, trunk, or limbs. Orthotists and Prosthetists work in a variety of settings, including private practice, hospitals, rehabilitation facilities, nursing homes, and home health settings. Orthotists and Prosthetists are currently in high demand, and the demand is expected to increase in the future.

Orthotists and Prosthetists are part of the health care team, and as such, work with physicians, therapists, and other health care professionals to provide the orthotic and prosthetic services to users. Orthotists and prosthetists are responsible for:

1. Performing comprehensive assessment of the orthotic/prosthetic users needs,
2. Creating a comprehensive orthotic/prosthetic treatment plan to meet the needs and goals of the user,
3. Performing the necessary procedures to deliver the appropriate orthotic/prosthetic services, which may include fabrication of the orthosis/prosthesis,
4. Providing continuing patient care and periodic evaluation to assure/maintain/ document optimal fit and function of the orthosis/prosthesis,
5. Participating in personal and professional development through continuing education, training, research and organizational affiliations, and
6. Developing, implementing and/or monitoring policies and procedures regarding human, business, and organizational management.

The MSPO Program is five consecutive terms in length, including one summer term, and requires a total of 65 credits. It is designed to meet all standards for accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE) and for preparing students to complete residencies and take the American Board for Certification in Orthotics and Prosthetics examinations.

During the last term of the program, students complete a clinical internship, typically where they gain exposure to a real- world clinical settings. Most students will relocate out of the Pittsburgh area during this term. The MSPO program currently has agreements with clinical sites across the country and we can work with the student to establish new sites for internship for this final term if necessary.

Contact Information

RST Admin
University of Pittsburgh

Accreditation Status

The Master of Science Program in Prosthetics and Orthotics has been granted accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE). Our graduates are eligible for NCOPE residencies, and, upon successful completion of an NCOPE residency, they are eligible to take the certification examinations of the American Board for Certification in Orthotics, Prosthetics & Pedorthics (ABC).

Admission Requirements and Application Process

Admissions Application Deadline

Prerequisite courses

1. Baccalaureate Degree. No specific major is mandated; however, the degree should include a well-rounded general education with a distribution of courses in the sciences, mathematics, psychology, social sciences, and humanities.
2. Prerequisite coursework includes foundation courses in the following areas:

Physics with lab	4 credits
Biology with lab	4 credits
Chemistry with lab	4 credits
General Psychology	3 credits
Mathematics (algebra or higher)	3 credits
Human Anatomy	3 credits
Human Physiology	3 credits
Statistics	3 credits

3. Recommended minimum overall grade point is a 3.0 grade-point average in all college-level courses and a 3.0 average in prerequisite courses. Applicants with less than a 3.0 but with other outstanding qualifications will be considered.
4. Applicants applying to the Prosthetics and Orthotics (MS) program will apply online using the Orthotics & Prosthetics Centralized Application Service, known as OPCAS, https://portal.opcas.org/ submit one copy of their official transcript, letters of recommendation, and other required information directly to OPCAS.

To be assured inclusion in the review process, applications should be completed by the date posted on the MSPO website (http://www.shrs.pitt.edu/po.) Application information which must be submitted includes:

- Completed application form
- Official transcriptions of all college-level courses
- Letters of recommendation (three)
    - At least one from a college instructor
    - At least two from a health care professional (preferably a certified orthotist or prosthetist)

- Essay describing background leading to your choice of this profession and your long-term goals.
- Record of work, shadowing, or volunteer experience related to the profession of orthotics and prosthetics. 250 hour minimum of shadowing time.
- Additional requirements for international applicants

Please note that the University of Pittsburgh's program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, blood titers, an Act 33/34 clearance, and a drug screen to determine whether you are qualified to participate in the clinical internships. Prior to the start of the program, the student will utilize Exxat to submit the requirements and have them maintained on file during their time at the University. To become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Admissions process, application deadline and prerequisites requirements are available on the Prosthetics and Orthotics webpage.

The School of Health and Rehabilitation Sciences does not require a supplemental application. It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Tuition and Fees

Tuition and Fee rates for the MSPO program can be found at the following websites:

https://www.tuition.pitt.edu/

In addition to University Fees, some of the MSPO courses have lab fees associated with them. Current Fees are available on the Prosthetics and Orthotics webpage.

Master's

Prosthetics & Orthotics, MS

Program Requirements/Minimum Credits

Students enrolled in the MSPO Program are required to complete 65 credits to meet degree requirements. The curriculum meets all requirements for students to participate in NCOPE residencies and take the American Board of Certification in Prosthetics, Orthotics, and Pedorthics certification examinations. Specific courses include:

Fall term, year one

- PO 2101 - FUNCTIONAL ANATOMY AND KINESIOLOGY
- PO 2102 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS
- PO 2103 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION
- PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS
- PO 2105 - PROFESSIONAL ISSUES IN PROSTHETICS AND ORTHOTICS
- PO 2106 - PATIENT MANAGEMENT IN ORTHOTICS AND PROSTHETICS
- RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Spring term, year one

- PO 2201 - ORTHOTICS 1
- PO 2202 - PROSTHETICS 1
- PO 2203 - CAPSTONE FOR PROSTHETICS AND ORTHOTICS

- PO 2204 - INTRODUCTION TO EVIDENCE - BASED PRACTICE IN ORTHOTICS AND PROSTHETICS
- RT 2208 - ETHICAL ISSUES IN HEALTHCARE

Summer term, year one

- PO 2301 - ORTHOTICS 2
- PO 2302 - PROSTHETICS 2
- PO 2303 - SPINAL ORTHOTICS

Fall term, year two

- PO 2401 - ORTHOTICS 3
- PO 2402 - PROSTHETICS 3
- PO 2403 - ISSUES IN THE HEALTH SYSTEM
- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY

Spring term, year two

- PO 2501 - MASTER OF PROSTHETICS AND ORTHOTICS CLINICAL INTERNSHIP
- PO 2502 - SCHOLARLY PAPER
- PO 2503 - PRACTICE MANAGEMENT IN PROSTHETICS AND ORTHOTICS

Program Total = 65 credits

*Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one-year delay in completing the course, the remaining program requirements, and the year of graduation.

Comprehensive Exam

A comprehensive examination will be given, covering all aspects of the Program. All students are required to pass this examination prior to graduation.

Thesis/Non-thesis Options

All MSPO students are required to complete at least a Capstone Project, under the direction of a faculty advisor and an additional faculty reader. However, as a substitute for the Capstone Project, the student may elect to complete a master's thesis, under the direction of a faculty advisor and thesis committee. Students electing to pursue the thesis option will complete 3 credits of Graduate Research Proposal (PO 2924) in place of the 1 credit Capstone (PO 2203) and 2 credits Scholarly Paper (PO 2502). They will also complete 3 credits of Graduate Research (PO 2925). This will change the total amount of completed credits from 65 to 68.

Rehabilitation Technology, MRT

The 35-credit Master of Rehabilitation Technology program can be completed in 1 year (3 semesters), or 2 years. Some students opt for a longer part-time timeframe.

Fall Courses

- RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY
- RT 2104 - FUNCTIONAL & MEDICAL ASPECTS OF DISABILITY RELATED TO ASSISTIVE TECHNOLOGY
- RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Spring Courses

- RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES
- RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- RT 2208 - ETHICAL ISSUES IN HEALTHCARE
- RT 2209 - CLINICAL APPLICATIONS OF SEATING AND MOBILITY
- RT 2210 - ASSISTIVE TECHNOLOGY FUNDING, POLICY, & MANAGEMENT

Fall, Spring, Summer Courses*

*Most students choose to complete during the Summer term

- RT 2311 - CLINICAL INTERNSHIP
- RT 2312 - SCHOLARLY PAPER

Elective Options

Students completing the 1-year, 35-credit program are not required to take electives in order to graduate. However, students pursuing the 2 year option may be recommended to take elective courses. Below are some recommended options. If there is another course you wish to take, please seek approval from your advisor prior to registration.

- RT 2415 - SOFT TISSUE BIOMECHANICS
- RT 2416 - WHEELCHAIR BIOMECHANICS
- RT 2999 - INDEPENDENT STUDY
- RT 2922 - TEACHING INTERNSHIP
- PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION
- HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM
- HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS
- HI 2452 - DIGITAL HEALTH AND ARTIFICIAL INTELLIGENCE

Department of Sports Medicine and Nutrition

In Pitt's Department of Sports Medicine and Nutrition (SMN), there's a vision for the future. It's a place where scientists, using contemporary, state-of-the-art practices have the potential to extend the careers of elite athletes and weekend warriors alike, where human performance optimization translates to injury prevention and military operational success, where exercise and diet help to prevent and manage disease and nutrition information impacts the well-being of the community and informs public policy.

It's a place where innovative and multidisciplinary research makes an immediate connection to real-world practices. Proof lies in the Department's growing number of regional, national and international partners as well as the quantity and quality of funding from prestigious organizations such as the National Institutes of Health, U.S. Department of Defense, NASA and others.

Through the use of technology and collaborative science, the Department of Sports Medicine and Nutrition is improving the quality of life and resiliency of people from all walks of life and abilities today, and championing health and wellness for life.

The department aims to meet these objectives by:

- developing cognitive skills, psychomotor mastery and affective values in students through the delivery of a proven formula of sound classroom education, combined with invaluable clinical education experiences, for the promotion of competent entry-level clinicians and enhancing the health and well-being of individuals and diverse populations
- becoming thoughtful leaders by advancing the state of the science through evidenced-based practice, rigorous curricula, interdisciplinary collaboration and innovative technology
- mitigating injury and disease and optimizing human performance by conducting innovative, multidisciplinary basic and applied research and contributing to the scientific community in order to enhance clinical decisions and education

Accelerated

Athletic Training, Accelerated BS-MS

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004, 2012, and 2024 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Role Delineation Study/Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness, and Health Literacy; (2) Assessment, Evaluation, and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The academic curriculum includes such courses as anatomy, kinesiology, human and exercise physiology, injury evaluation, medical and pharmacological principles, administrative aspects, among others. The course work provides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

For more information, please contact:

Amy E. Aggelou, PhD, LAT, ATC
Program Director, Athletic Training
School of Health and Rehabilitation Sciences
Department of Sports Medicine and Nutrition

3396 Fifth Avenue

6th Floor, Office 6178

Pittsburgh, PA 15213

412-383-9738
E-mail: aaggelou@pitt.edu

Admission Requirements

SHRS's General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Prerequisite Courses

Basic Athletic Training, ATHLTR 1811	*Transfer credit not accepted*
Basic Athletic Training Lab, ATHLTR 1812	*Transfer credit not accepted*
Seminar in Composition*	1 course
Writing Intensive	1 course (*ENGCMP 0400 recommended*)
Oral Communication	1 course (COMMRC 0520 preferred; COMMRC 0500*, COMMRC 0510, COMMRC 0530 acceptable*)
College Algebra	1 course (MATH 0031 or higher math required. *Exemption accepted*)
Statistics	1 course (STAT 0200 or STAT 1000 required)
Foundations of Biology 1	BIOSC 0150
Foundations of Biology 1 Lab	BIOSC 0157, BIOSC 0050, BIOSC 0057 or BIOSC 0058
General Chemistry 1 and Lab	CHEM 0110
Introduction to Physics	PHYS 0110
Introduction to Psychology	PSY 0010
Developmental Psychology (PSY 0310) or other upper level Psychology	3 credits
Cross-Cultural Awareness*, Global Issues* or Specific Geographic Region*	1 course
Diversity*	1 course
Social Sciences*	1 course

* See the Dietrich School of Arts and Sciences General Education Course Catalog.

Additional Requirements

- Required credits for admission: 60 (Applications may be submitted while prerequisite coursework is in progress).
- Grades of C- or better (C for transfer) in all prerequisite coursework with the exception of ATHLTR 1811 and ATHLTR1812, where a grade of B or better must be earned.
- EMT certification is required either through a course for credit or another qualified course leading to NR-EMT credential.
- Minimum cumulative GPA of 3.0 GPA (based on 4.0)
- Submit admissions application including technical standards for admission document.
- Personal interview with athletic training faculty (as needed).

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- The ability to record the physical examination results and a treatment plan clearly and accurately.
- The capacity to maintain composure and continue to function well during periods of high stress.
- The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
- Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
- Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: March 1

Transfer Student Information

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Athletic Training as their intended field of study. International transfer students click here. Transfer students must also provide application materials directly to SHRS.

All admission criteria applies to transfer students in the same way as students enrolled at the Pittsburgh campus. Students with prior athletic training experience seeking to transfer to the University of Pittsburgh for admission to the Athletic Training Program must complete the same prerequisite requirements as all other candidates including the Basic Athletic Training (ATHLTR 1811) and Basic Athletic Training Lab (ATHLTR 1812) courses and all observation hours. If admitted to the program, all students must complete University of Pittsburgh core athletic training courses. In some instances, credit may be given for other coursework taken at another institution and will be evaluated on an individual case basis. International transfer students click here.

Curriculum

Coursework for the professional BS-MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase. Students applying for the Accelerated BS-MS in Athletic Training program will complete prerequisite coursework during the first two years of their undergraduate degree. At the conclusion of their sophomore year, students will apply to the Accelerated BS-MS in Athletic Training program. Upon successful application and acceptance into the program, students will complete one year (two semesters) of pre-professional curriculum. During their last two years, students will complete the professional (graduate) curriculum.

Pre-professional Phase

During the pre-professional phase students complete prerequisite and general education courses along with specific Athletic Training-related prerequisites.

First Semester (Fall)

- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY
- REHSCI 1235 - MEDICAL TERMINOLOGY
- NUTR 1005 - INTRODUCTION SPORTS NUTRITION

- ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1
- ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT
- ATHLTR 1816 - MEDICAL ETHICS
  16 Credits

Second Semester (Spring)

- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- ATHLTR 1800 - PRINCIPLES OF RESEARCH METHODOLOGY
- ATHLTR 1805 - EXERCISE PHYSIOLOGY
- ATHLTR 1806 - EXERCISE PHYSIOLOGY LAB
- ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2
- ATHLTR 1833 - STRENGTH AND CONDITIONING
  15 Credits

Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY
- ATHLTR 2820 - PRIMARY CARE IN ATHLETIC TRAINING

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS
  15 Credits

Third Semester (Fall)

- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING
- ATHLTR 2823 - CLINICAL PRACTICUM 3- CLINICALLY IMMERSIVE SEMESTER
  15 credits

Fourth Semester (Spring)

- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE

- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR 2824 - CLINICAL PRACTICUM 4
  and an ATHLTR elective, 3 credits
  15 credits

Dietitian Nutritionist Program, Accelerated BS-MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! All Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the accelerated program as juniors.

For more information, please contact:

Trisha A. Cousins, EdD, RDN, LDN
Program Director, Dietitian Nutritionist Program
3396 Fifth Avenue

Floor 6, Room 6177
412-383-6532
E-mail: tcousins@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an accelerated BS/MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Coordinated Program (CP). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This program offers points of entry for:

- qualified undergraduates
- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Undergraduate students will earn both Bachelor of Science and Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for Year 2 and Year 3 of the program. Please review the experiential learning information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate, a post-baccalaureate, or as a graduate of a DPD. The application deadline for the DPD entry point is February 1. The application deadline for the undergraduate and post-baccelaureate entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Undergraduate Students to the Accelerated MS Program

Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus, courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- General Chemistry 1 with lab, CHEM 0110
- General Chemistry 2 with lab, CHEM 0120
- Foundations of Biology 1, BIOSC 0150
- Foundations of Biology 2, BIOSC 0160
- Biology Lab, BIOSC 0157, BIOSC 0050, BIOSC 0057 or BIOSC 0058
- Organic Chemistry, CHEM 0350 or CHEM 0310
- Biochemistry, BIOSC 1000*
- Introduction to Microbiology, BIOSC 1850
- College Algebra, MATH 0031 or higher math required. Exemption accepted.
- Statistics, STAT 0200 or STAT 1000
- Seminar in Composition, ENGCMP 0200 or equivalent
- English Writing, any "W" or upper-level writing course
- Oral Communication, COMMRC 0520 preferred; COMMRC 0310, COMMRC 0500, COMMRC 0510, and COMMRC 0530 are also accepted.
- Social Science, any
- Psychology, PSY 0010
- Introduction to Nutrition, NUTR 1006*
- Introduction to Dietetics, NUTR 1600+
- Cultural Influences in Food and Nutrition, NUTR 1090+

*These courses need to have been completed within the past five years.
+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- 60 credits are required to begin the program

Application Requirements

- Complete the application for admission. Please visit the SHRS website to access information about applying.
- All applications require a personal statement.
    - This statement should reveal the applicant's personality, values, character and creativity, and describe how those experiences would promote empathy and a sense of belonging for future patients and colleagues in the Dietitian Nutritionist Program. Applicants may also include sharing how these experiences contribute to promoting compassion and wellness in healthcare. Please also discuss your professional goals as a registered dietitian. Maximum of 500 words
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.

SHRS General Education Requirements are included in our upper-level program prerequisites and curriculum requirements.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accomodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (Academy), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDNs) to enhance the health and wellbeing of individuals and diverse populations. Graduates become leaders in advancing the knowledge, skills and evidence-based practice of nutrition and dietetics.

Program Goal 1:

Graduates are competent to practice effectively as entry-level RDNs.

Objectives:

1. At least 80% of program students complete program requirements within 3 years (150% of the program length).
2. Eighty percent of program graduates take the CDR credentialing exam within 12 months of program completion.
3. The program's one-year pass rate (graduates who pass the registration exam within one year of first attempt) on the CDR credentialing exam for dietitian nutritionists is at least 80%.

Program Goal 2:

Graduates have advanced knowledge and skills to contribute to the evidence-based practice of nutrition and dietetics.

Objectives:

1. Of graduates who seek employment, at least 80% are employed in nutrition and dietetics or related fields within 12 months of graduation.
2. Ninety percent of employers of graduates will rate the performance of the graduates as being at or above that of other entry-level dietitians they have employed.
3. Employers will rate 100% of graduates as demonstrating culturally competent evidenced-based practice.

Program outcomes are available upon request.

Curriculum

Students entering as a junior will complete the program 156 credits.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1020 - NUTRITION ASSESSMENT
- NUTR 1030 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

Spring Term

- NUTR 1045 - FOOD APPLICATION LAB
- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1090 - CULTURAL INFLUENCES IN FOOD & NUTRITION (if not previously taken)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
- HRS 2680 - EVIDENCE BASED PROFESSIONALISM IN DIETETICS
- Elective, 3 credits - Advisor approved

Spring Term

- HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2625 - COUNSELING METHODS
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- Elective, 3 credits (Introduction to Functional Nutrition with Lab or Advanced Maternal and Pediatric Nutrition preferred)

Undergraduate students will receive a BS in Nutrition Science after successful completion of the Year 2.

Third Year

Fall Term

- HRS 2675 - PRACTICUM IN DIETETICS 1
- HRS 2676 - EXPERIENTIAL PRACTICE 1
- HRS 2658 - CAPSTONE PROJECT

Spring Term

- HRS 2659 - PRACTICUM IN DIETETICS 2
- HRS 2672 - EXPERIENTIAL PRACTICE 2
- HRS 2652 - EXPERIENTIAL PRACTICE 3
- HRS 2674 - CAPSTONE PROJECT
  Credits / Units: 15

Master's

Athletic Training, MS

The Accelerated BS-MS in Athletic Training was developed for students enrolled at the University of Pittsburgh and is designed as a 4+1 financial model. In addition to the Accelerated BS-MS in Athletic Training degree, a second point of entry for the MS degree in Athletic Training was developed for students who already have obtained a bachelors degree. This 2-year degree is called the MS in Athletic Training degree (Entry Point 2).

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004, 2012, and 2024 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness and Health Literacy; (2) Assessment, Evaluation and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The professional academic curriculum includes such courses as Injury Evaluation, Therapeutic Interventions, Functional Anatomy, Evidence Based Practice in Athletic Training, General Medical and Pharmacological Principles, among others. The course work privides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the professional program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

Admissions Requirements

Prerequisite Courses for MS in Athletic Training Degree (Entry Point 2)

- Successful completion of a Baccalaureate degree from a regionally accredited institution. Undergraduate coursework must have been completed no longer than 10 years prior to application. Applications may be submitted while baccalaureate degree is in progress.
- Minimum cumulative overall and prerequisite grade point average (GPA) of 3.0 (based on 4.0).
- EMT certification is required either through a course for credit or another qualified course leading to NR-EMT credential.
- At this time observation hours under the direct supervision of a certified athletic trainer are recommended but not required.
- Completion of Technical Standards for admissions document.
- Verification of English Language Proficiency is required unless the following apply:
    - the applicant is a citizen of a country whose official language is English
    - the applicant has completed a degree program at a regionally accredited institution in the U.S., or
    - the applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.
- Successful completion of interview (virtual, phone or in-person).

Prerequisites must be completed for a letter grade, minimum grade of C. Applications may be submitted while prerequisite coursework is in progress. Prerequisites coursework for admission include:

- Human Anatomy, 4 credits minimum
- Human Physiology, 4 credits minimum
- Exercise Physiology, 3 credits minimum
- Introduction to Biology, 4 credits minimum
- Introduction to Physics, 3 credits minimum
- Introduction to Chemistry, 4 credits minimum
- Kinesiology or Biomechanics, 3 credits minimum
- Statistics, 3 credits minimum
- English Composition, 6 credits minimum
- Psychology, 6 credits minimum, must include Introduction to Psychology
- Public Speaking, 3 credits
- Humanities and Social Sciences Electives, 6 credits minimum
- Nutrition, 3 credits minimum

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- The ability to record the physical examination results and a treatment plan clearly and accurately.
- The capacity to maintain composure and continue to function well during periods of high stress.
- The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
- Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.

- Effective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: May 1

Application Platform: Complete the ATCAS application which includes:

- Application fee
- An essay discussing when and how you became interested in the field and program to which you are applying, any work or volunteer experience you have that will demonstrate your awareness of the field and your long-term professional goals
- A current copy of your Curriculum Vitae or Resume;
- A letter of recommendation from a college instructor/professor, academic advisor, supervisor or employer, etc
- Official transcripts from all U.S. colleges/universities attended
- A course by course evaluation with GPA conversion for all higher level institutions attended outside the US. The evaluation may be from World Education Services, Inc. (WES) or Educational Credential Evaluators, Inc. (ECE).
- *Graduate Record Examination (GRE)* **not** *required*

If applicable:

- Request official English Language Proficiency test scores be sent to the University of Pittsburgh from one of the following options. Minimum scores accepted and instructions for sending official test scores follow:
    - Duolingo English Test: 120. Scores should be made available electronically to "University of Pittsburgh - School of Health and Rehabilitation Sciences"
    - International English Language Testing System (IELTS): 6.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences"
    - Test of English as a Foreign Language (TOEFL): 80. New scale as of Janury 2026: 4.0 with all sub-scores of 4.0 or higher. Scores should be submitted electronically through ETS to institution code "2927".

Program Curriculum

Coursework for the professional MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase.

Preprofessional Phase

In the summer, prior to the start of the professional phase, students enrolled in the MS in Athletic Training Degree Program (Entry Point 2) will be required to successfully complete a 1-credit course titled - ATHLTR 1815 Foundations in Evaluation and Treatment.

- ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

Third Semester (Fall)

- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING
- ATHLTR 2823 - CLINICAL PRACTICUM 3- CLINICALLY IMMERSIVE SEMESTER

Fourth Semester (Spring)

- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE
- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR 2824 - CLINICAL PRACTICUM 4
- ATHLTR Elective (3 Credits)

Total Credits: 61

Dietitian Nutritionist Program, MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! All Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the program as graduate students in Fall Term.

For more information, please contact:

Trisha A. Cousins, EdD, RDN, LDN
Program Director, Dietitian Nutritionist Program
3396 Fifth Avenue

Floor 6, Room 6177
412-383-6532
E-mail: tcousins@pitt.edu

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Coordinated Program (CP). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong

foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This program offers points of entry for:

- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Students will earn a Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for the program. Please review the experiential learning information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate (accelerated BS/MS), a post-baccalaureate (MS), or as a graduate of a DPD (MS). The application deadline for the DPD entry point is February 15. The application deadline for the undergraduate and post-baccelaureate entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Post Baccalaureate Students to the MS Program

Prerequisites must be completed for a letter grade, minimum grade of C. Coursework will be evaluated at time of application for equivalency to Pitt courses.

- General Chemistry 1 with lab
- General Chemistry 2 with lab
- Foundations of Biology 1
- Biology Lab
- Biochemistry*
- Introduction to Microbiology
- Statistics or higher math
- Introduction to Nutrition
- Introduction to Dietetics+
- Cultural Influences in Food and Nutrition+

+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Baccalaureate degree from an accredited institution
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

Application Requirements

- Complete the GradCAS application;
- Submit a personal statement that reveals the applicant's personality, values, character and creativity, and describe how those experiences would promote empathy and a sense of belonging for future patients and colleagues in the Dietitian Nutritionist Program. Applicants may also include sharing how these experiences contribute to promoting compassion and wellness in healthcare. Please also discuss your professional goals as a registered dietitian. Maximum of 500 words
- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit one letter of recommendation. This letter should address the academic, professional, and personal attributes and potential for graduate study;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.
- Additional requirements for international applicants
    - Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
    - English Language Proficiency scores. Minimum scores accepted:
        - TOEFL: 100. New scale as of January 2026: 5.0 with all sub-scores of 4.0 or higher. Submit electronically to institution code 2927.
        - IELTS: 7.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
        - Duolingo: 140. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".

Entry Point for DPD Graduates to the MS Program

The program is looking for a verification statement from an ACEND accredited undergraduate program. No other prerequisites are required.

Additional Requirements

- Baccalaureate degree from an accredited institution
- Verification Statement from accredited program
- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty

Application Requirements

- Complete the DICAS application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Submit resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit one letter of recommendation. This letter should address the academic, professional, and personal attributes and potential for graduate study;
- Submit official transcripts from all colleges and universities attended;
- Additional requirements for international applicants
    - Academic Credential Evaluation from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. A course by course evaluation with GPA conversion is required for baccalaureate degree or higher completed at an institution outside of the United States.
    - English Language Proficiency scores. Minimum scores accepted:

- Duolingo: 140. Scores should be made available electronically to "University of Pittsburgh - Health and Rehabilitation Sciences".
- IELTS: 7.5. Scores should be made available electronically to "University of Pittsburgh Health and Rehabilitation Sciences".
- TOEFL: 100. New scale as of January 2026: 5.0 with all sub-scores of 4.0 or higher. Submit electronically to institution code 2927.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accomodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDNs) to enhance the health and wellbeing of individuals and diverse populations. Graduates become leaders in advancing the knowledge, skills and evidence-based practice of nutrition and dietetics.

The program goals are:

Program Goal 1:

Graduates are competent to practice effectively as entry-level RDNs.

Objectives:

1. At least 80% of program students complete program requirements within 3 years (150% of the program length).
2. Eighty percent of program graduates take the CDR credentialing exam within 12 months of program completion.
3. The program's one-year pass rate (graduates who pass the registration exam within one year of first attempt) on the CDR credentialing exam for dietitian nutritionists is at least 80%.

Program Goal 2:

Graduates have advanced knowledge and skills to contribute to the evidence-based practice of nutrition and dietetics.

Objectives:

1. Of graduates who seek employment, at least 80% are employed in nutrition and dietetics or related fields within 12 months of graduation.
2. Ninety percent of employers of graduates will rate the performance of the graduates as being at or above that of other entry-level dietitians they have employed.
3. Employers will rate 100% of graduates as demonstrating culturally competent evidenced-based practice.

Program outcomes are available upon request.

Curriculum

Students entering with a baccalaureate degree that is not from a Didactic Program in Dietetics (DPD) will complete 93-95 credits during this three-year program. Didactic Program in Dietetics (DPD) graduates will complete Year 2 & Year 3 of the program fulfilling a 60-credit course of study.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1020 - NUTRITION ASSESSMENT
- NUTR 1030 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

Spring Term

- NUTR 1045 - FOOD APPLICATION LAB
- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1090 - CULTURAL INFLUENCES IN FOOD & NUTRITION (if not previously taken)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION

Spring Term

- HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2625 - COUNSELING METHODS

- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS
- Elective, 3 credits (Introduction to Functional Nutrition with Lab or Advanced Maternal and Pediatric Nutrition preferred)

Third Year

Fall Term

- HRS 2675 - PRACTICUM IN DIETETICS 1
- HRS 2676 - EXPERIENTIAL PRACTICE 1
- HRS 2658 - CAPSTONE PROJECT

Spring Term

- HRS 2659 - PRACTICUM IN DIETETICS 2
- HRS 2672 - EXPERIENTIAL PRACTICE 2
- HRS 2652 - EXPERIENTIAL PRACTICE 3
- HRS 2674 - CAPSTONE PROJECT

Sports Science, MS

The Sports Science concentration in the Master of Science in Health and Rehabilitation Sciences program is designed for students seeking graduate training to advance their knowledge and skills related to understanding and improving sports performance.

Primary areas of focus pertaining to education and training in sports science, strength and conditioning, nutrition, sports medicine, and research. The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance. All students will complete a 1-year sports science practical experience with a designated sports team or organization and will also have access to the Sports Medicine and Nutrition research facilities and faculty.

For more information, please contact:

Timothy Suchomel, PhD, CPSS, *D, CSCS,*D, RSCC,*D, FNSCA, mlSCP Program Director, MS in Sports Science

Department of Sports Medicine and Nutrition

Fifth and Halket, Room 6196

E-mail: TIS125@pitt.edu

https://www.shrs.pitt.edu/academics/smn/msss/

About

The Sports Science (SS) concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a one-year graduate program housed within the Department of Sports Medicine and Nutrition.

Program Summary

33 credits (Full or part-time)
1-3 years (varies)
Program starts fall term only

Admission Requirements

Prerequisites (satisfactory grades must be earned in all courses)

- Exercise Physiology (3 credits)
- Introduction to Nutrition (3 credits)
- Introduction to Statistics (3 credits)
- Human Anatomy and Physiology I (3 credits)

Applications may be submitted while prerequisite coursework is in progress.

Additional Requirements

Bachelor's degree from an accredited institution.

Minimum undergraduate GPA of 3.0 (out of 4.0). Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

An interview may be required.

Application Procedures

Application Deadline: July 15. If spots are available after the deadline applications will be considered on a rolling basis until the class is full.

All applicants must:

- Complete the GradCAS application
- Submit the application fee of $50 (U.S.)
- Submit an essay - a description of professional and educational goals that are realistically attainable during enrollment in the graduate program
- Submit two letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study.
- Submit official transcripts from all colleges/universities you **have attended**
- Additional requirements for international applicants may be found on the SHRS website

Fall Term

- SPSCI 2110 - SPORTS SCIENCE PRACTICUM 1
- SPSCI 2151 - ADVANCED ASSESSMENT OF ATHLETIC PERFORMANCE
- SPSCI 2200 - ADVANCED STRENGTH & CONDITIONING I
- SPSCI 2650 - EXERCISE PHYSIOLOGY
- HRS 2655 - RESEARCH METHODOLOGY AND APPLIED STATISTICS

Spring Term

- SPSCI 2120 - SPORTS SCIENCE PRACTICUM 2
- SPSCI 2160 - SPORTS NUTRITION

Choose one

- SPSCI 2140 - SPORTS SCIENCE DATA ANALYTICS
- SPSCI 2210 - ADVANCED STRENGTH AND CONDITIONING 2

Choose one

- SPSCI 2170 - CURRENT TOPICS IN SPORTS SCIENCE AND DATA ANALYTICS RESEARCH
- SPSCI 2270 - CURRENT TOPICS IN STRENGTH AND CONDITIONING RESEARCH

Choose one
Advisor approved course

- SPSCI 2250 - COACHING THEORY AND PHILOSOPHY

Summer Term

- SPSCI 2130 - SPORTS SCIENCE PRACTICUM 3

Total Credits: 33

Rehabilitation Science Doctor of Philosophy (PhD)

Doctoral

Rehabilitation Science, PhD

The mission of the PhD program in Rehabilitation Science is to advance the frontiers of knowledge underlying the practice of rehabilitation disciplines and professions through research, teaching, and professional development.

This PhD is an interdisciplinary degree. Students enter the program through the following SHRS departments or programs: Counseling and Behavioral Health, Health Information Management, Occupational Therapy, Physical Therapy, Rehabilitation Science and Technology, and Sports Medicine and Nutrition. Upon degree completion, you will have mastered a specific area of expertise in rehabilitation science and carry an expansive core of related knowledge.

Contact Information:

Courtney Fleck
Assistant to the Associate Dean of Graduate Studies
3396 Fifth Avenue
Phone: 412-624-6538
Fax: 412-383-6535
Email: courtney.fleck@pitt.edu
www.shrs.pitt.edu

Program Summary

Program starts in the fall term.

- Statute of limitation is 8 years (with approved credit transfer) or 10 years (without credit transfer)
- Minimum of 72 credits required to graduate (some areas of focus may require more credits)

The Primary Goals of the PhD program in Rehabilitation Science are to:

1. Provide core content in theories and models of rehabilitation, disability and/or assistive technology that underpin rehabilitation science;
2. Provide in-depth, state of the science, content in basic, clinical, social, medical and/or engineering sciences that support the dissertation research;
3. Provide mentorship opportunities for immersion in rehabilitation science research laboratories, projects, and/or ongoing studies;
4. Prepare students to conduct and disseminate original research that will advance rehabilitation science;
5. Promote interdisciplinary research in preparation for becoming a research team member;
6. Promote knowledge, behaviors and skills consistent with the responsible conduct of research;
7. Provide opportunities to teach content in an area of expertise.

The doctoral degree in Rehabilitation Science is an interdisciplinary research degree offered by SHRS and not by individual departments within the school. Graduates of this program will have a specific area of expertise in rehabilitation science as well as a core of interdisciplinary knowledge related to this specific area. They will become the researchers, scholars, teachers, thinkers, and planners in the demanding and changing field of rehabilitation science.

Areas of Study

- Assistive technology
- Biomechanics
- Evidence-based practice and epidemiology of disability
- Functioning, disability and health
- Psychosocial, cultural, and behavioral aspects of rehabilitation and disability
- Health information systems and information technology related to health and rehabilitation sciences
- Neural basis of sensory and motor function and dysfunction
- Neuromuscular aspects of sports injuries
- Health Services Research in Rehabilitation

Admission Requirements/ Application Process

Applicants should have a strong interest in rehabilitation research as well as a master's degree in an area related to rehabilitation science. The exceptional student with a bachelor's degree, six or more credits of graduate course work, and compelling clinical/research experience in rehabilitation science will be considered.

Resources, including research mentors, must be available to enable the student to engage in a plan of study in the student's major area of interest in rehabilitation research. Therefore, it is important that there is a match between the research interests of an applicant and an SHRS graduate faculty member.

Admission Requirements

Successful applicants will have a minimum GPA of 3.0 (based on a 4.0 scale) in all college work. We do not require the GRE in our admissions applications. Students for whom English is a foreign language must have a minimum Duolingo English Test score of 140, IELTS score of 7.5 or TOEFL score of 100, new scale as of January 2026: 5.0 with all sub-scores 4.0 or higher.

Application Requirements

Applicants are required to submit the following:

- Completed GradCAS application
- An essay stating career goals, specific research interests and experience, and clinical interests and experience
- Three to five academics or work-related letters of recommendation (at least one academic reference must be included as well as a letter of support from the identified Research Mentor. The Research Mentor's letter should indicate how the student is known to

the Mentor, a description of the student's potential for success in the program and as a rehabilitation scientist, and how the Mentor will support the student's dissertation research project (funding/resources))

- A résumé, including work history, formal education, continuing education, licensing and certification, professional organizations, honors and awards, publications, presentations, and grants
- Transcripts from all U.S. institutions attended
- A course-by-course evaluation with GPA conversion for all higher institutions attended outside the U.S. The evaluation may be from World Education Services (WES), Inc. or Educational Credential Evaluators, Inc. (ECE)
- Verification of English language proficiency. (Duolingo English Test, TOEFL or IELTS scores (for candidates whose native language is not English)
- At least one example of written work (class project, course assignment, publication for which candidate is first author, etc.)

The application deadline for a fall enrollment start date is May 1.

Applicants are evaluated by the PhD Admissions Committee. Admission to the program requires (1) the applicant to meet the standards for a PhD student in SHRS, and (2) that a faculty member of the PhD program has an opening for an additional PhD student and agrees to be the Academic Advisor for that applicant.

For more information about admission to the PhD program contact:

Office of Admissions
School of Health and Rehabilitation Sciences
3396 Fifth Avenue
412-383-6558
Fax: 412-383-6535
E-mail: admissions@shrs.pitt.edu
Website: www.shrs.pitt.edu

Financial Aid

Applicants interested in financial support should indicate this on their applications for admission.

Transfer Credits

If a student wishes to transfer credits, the student and the student's Academic Advisor must submit a Credit Transfer Request Form to Student Services during the first year of study. Transcripts verifying the graduate courses and course descriptions must accompany the petition. The student and student's Academic Advisor will be informed by the Associate Dean of Graduate Studies which courses are acceptable as transfer credits, and this information will be placed in the student's file. Based on University guidelines, students who transfer any credits from a master's degree must complete the PhD within 8 years; students who do not transfer credits must complete the PhD within 10 years.

Academic Advisor

Students admitted to the PhD program are assigned an Academic Advisor who is a member of the Graduate Faculty in SHRS. He/she will have research interests similar to the student's interests and will have agreed to be the student's Research Mentor.

The Academic Advisor and student will determine the Plan of Study for the student. They will also plan course work or other experiences to enable the student to demonstrate competency in the proposed content supporting the dissertation, as well as statistics/research methodology content in preparation for the Comprehensive Examination and Dissertation Proposal Defense. It is the responsibility of the Academic Advisor to provide advice to the student during the PhD program, especially with the following steps.

1. Petitioning the Associate Dean of Graduate Studies for transfer of credits
2. Preparing a Plan of Study outlining course work and dissertation credits leading to the PhD Degree
3. Locating research opportunities
4. Revising the Plan of Study as needed as the dissertation topic is formulated
5. Finding a Primary Research Mentor

Plan of Study

The student and Academic Advisor will prepare a tentative Plan of Study within the first term of enrollment. If a Plan of Study has not been submitted by the end of the first term, the student will not be permitted to enroll in the subsequent term. The Plan of Study Form can be obtained on-line on the SHRS website. The Plan of Study should include transfer credits, course work to date, future course work, and dissertation credits leading to the PhD degree. A copy of the Plan of Study will be placed in the student's file. The Plan of Study should be reviewed each term at registration and updated as needed by the student and Academic Advisor. A final updated Plan of Study must be on file in the student's permanent file in Student Services in the term in which the student graduates, or the student cannot be certified by the Registrar for graduation.

More information regarding the following can be found in the PHD handbook on the SHRS website:

- SHRS Student Statistical Support
- Annual Review/Progress Reports
- Preliminary Examination
- Primary Research Mentor
- Comprehensive Examination
- Dissertation Proposal Defense
- Admission to Candidacy
- Dissertation
- Electronic thesis and Dissertation (ETD)
- Final Oral Defense of Dissertation
- Continued Use of Data After Leaving the University of Pittsburgh

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree at the University of Pittsburgh. Some areas of focus within the PhD Program may require more than 72 credits. Up to 30 credits taken at the graduate level towards a master's degree may be accepted for transfer. In recognition of graduate study beyond the master's degree, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. Credit transfer requests are evaluated by the Associate Dean of Graduate Studies after matriculation.

In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No undergraduate credits (1000 level courses) may be applied towards the doctoral degree. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of SHRS. To carry out this responsibility, each student has an Academic Advisor who, in consultation with the student, plans a program of study and research in accordance with SHRS guidelines.

Course and Competency Requirements

The following requirements apply to all PhD in Rehabilitation Science students:

HRS 3000 - **Doctoral Seminar: 4 credits**

Core Areas

There are two Core Areas which are required for all students in the PhD in the Rehabilitation Science Program - Methods of Inquiry for Rehabilitation Sciences and Core Concepts in Disability and Rehabilitation Sciences.

All students pursuing a Doctor of Philosophy in Rehabilitation Science degree will be required to demonstrate basic competency in designing and appraising research studies and to demonstrate basic competency in understanding the fundamentals of disability and rehabilitation sciences.

CORE: Methods of Inquiry for Rehabilitation Sciences

Upon completion of the courses, students will be able to design a research study to answer a specific research question, including the best design for the question asked, sampling, controls for bias or confounding, and basic statistical analysis. They will be able to critically appraise research and apply it to clinical practice.

CORE: Core Concepts in Disability and Rehabilitation Sciences

Upon completion of the modules, students will be able to describe and discuss core concepts in disability and rehabilitation sciences, and analyze and synthesize multiple perspectives on the current and future state-of-the science.

A grade of B or better for each term of the Methods of Inquiry for Rehabilitation Scientists Core and Core Concepts in Rehabilitation and Disability Core (2 terms, 2 credits)

- HRS 3002 - Methods of Inquiry I - 1 credit
- HRS 3003 - Core Concepts I - 2 credits
- HRS 3004 - Methods of Inquiry II - 1 credits
- HRS 3005 - Core Concepts II - 2 credits
- HRS 3001 - **Dissertation Research: 18 credits**

Preliminary Examination for the Methods of Inquiry Core and the Core Concepts in Rehabilitation and Disability Core requires an unconditional PASS

Comprehensive Written and Oral Examinations in the content area of the dissertation requires an unconditional PASS

Content in the areas of research design and statistics: 9 credits

Participate in the teaching of at least one course

Successful completion of manuscript submission requirement

Manuscript Submission Requirements

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum amount of experience in manuscript writing and submission by completing:

- 1 co-author manuscript accepted for publication
- 1 first author manuscript submitted and reviewed by a peer-reviewed journal
- Data-based manuscripts are strongly preferred.

Successful completion of grant application submission requirement

Grant Submission Requirement

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum experience with grant writing and submission by completing one of the following:

- Submission and peer-review of a Doctoral Research or Research Fellowship Grant applications (SHRS Doctoral Scholarship Award or NIH or Private Foundations)
- Submission and peer-review of Pilot study grant applications (e.g., foundations, professional societies, the UPMC Rehab Institute Pilot Award)
- Completion of a grant writing course
- Submission of a provisional and non-provisional patent application
- Submission and peer-review of an SBIR like applications, or other options to secure funding for technology development (pitching an idea for commercial development, etc.)

Note: The peer-review may be internal or external peer review. A copy of the summary report from the review should be submitted with a copy of the grant application to Courtney Fleck (Courtney.fleck@pitt.edu) to be kept in the student's file.

Also, note: Submission to the $1,000.00 SHRS scholarship award will NOT qualify for satisfying the grant submission requirement.

Successful defense of the dissertation research

Note: PhD students are required to maintain a 3.000 Cumulative GPA and receive a grade of C or better in all courses required by their program curriculum.

Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received **if an authorization to repeat the course is given by the student's adviser/faculty.**) Students will not be permitted to register for a course until they attain a C or better in its prerequisites. Failure to receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

Department of Community Health Services and Rehabilitation Science

Doctoral

Doctor of Chiropractic

The goal of the DC curriculum is to prepare students to become self-directed, self-accountable chiropractors who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance spine and musculoskeletal function using evidence-based practice principles. Graduates of the Doctor of Chiropractic program will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of chiropractic care. The degree to be awarded will be the Doctor of Chiropractic , which will prepare graduates to sit for the licensure examinations in all 50 states, the District of Columbia, the US Virgin Islands, and Puerto Rico. Upon successful completion of the curriculum, graduates of the program are eligible for the national certification examination through the National Board of Chiropractic Examiners (NBCE), which is required to practice as a chiropractor.

The chiropractic curriculum is designed around four longitudinal curricular tracts:

1. 1. Structure and function of the human body in health and disease.
2. 2. Chiropractic studies: the knowledge, skills, and attitudes to practice chiropractic.
3. 3. Diagnosis and clinical reasoning.
4. 4. Clinical education: training and practice in appropriate supervised clinical settings.

The addition of eight program outcomes consistent with the meta-competencies of the Council on Chiropractic Education results in a two-dimensional curriculum structure, providing for integration of accreditation-required professional competencies and the broad areas of knowledge and skill required of healthcare professionals.

Basic Science Core

- DC - 3111 - Spinal Anatomy
- DC - 3112 - Human Function and Metabolism
- DC - 3115 - Neuroscience
- DC - 3116 - Gross Anatomy
- DC - 3117 - Microbiology and immunology

- DC - 3118 - Pathology

Diagnosis and Management

- DC - 3132 - The Patient Interview
- DC - 3136 - Clinical Pain Classification and Phenotyping
- DC - 3332 - Case Studies in Differential Diagnosis
- DC - 3151 - Clinically Relevant Palpation
- DC - 3155 - Manual Therapy Skill Development
- DC - 3156 - Spinal and Tissue Biomechanics
- DC - 3157 - Soft Tissue Manipulation
- DC - 3232 - Clinical Laboratory Diagnosis
- DC - 3233 - Clinical Pharmacology
- DC - 3235 - Clinical Neurology
- DC - 3241 - Special Populations
- DC - 3256 - Nutrition in Chiropractic Practice
- DC - 3137 - Medical Screening and Diagnosis: Chest and Abdomen
- DC - 3159 - Thoracic and Lumbopelvic Spine-Related Disorders
- DC - 3160 - Examination of the Thoracic and Lumbopelvic Spine
- DC - 3161 - Thoracic and Lumbopelvic Mobilization and Manipulation
- DC - 3162 - Rehabilitative Exercise: Thoracic and Lumbopelvic Spine
- DC - 3234 - Medical Screening and Diagnosis: Head and Neck
- DC - 3251 - Cervical Spine-Related Disorders
- DC - 3252 - Examination of the Cervical Spine
- DC - 3253 - Cervical Mobilization and Manipulation
- DC - 3254 - Rehabilitative Exercise: Cervical Spine
- DC - 3257 - Extremity disorders
- DC - 3258 - Examination of the extremities
- DC - 3259 - Extremity Mobilization and Manipulation
- DC - 3260 - Rehabilitative Exercise: Extremities

- DC - 3263 - Special Topics in Manual Therapy I
- DC - 3351 - Special Topics in Manual Therapy II
- DC - 3261 - Spinal Manipulation Review
- DC - 3264 - Advanced Topics in Rehabilitation
- DC - 3265 - Taping and Bracing
- DC - 3267 - Physical Agents and Modalities
- DC - 3131 - Intro to Diagnostic Imaging
- DC - 3133 - Diagnostic imaging I
- DC - 3135 - Diagnostic imaging II
- DC - 3231 - Diagnostic Imaging III
- DC - 3236 - Diagnostic Imaging IV
- DC - 3240 - Cases in Diagnostic Imaging

Clinical Reasoning

- DC - 3153 - Evidence-based Practice I
- DC - 3158 - Evidence-Based Practice II
- DC - 3164 - Evidence-based Practice III
- DC - 3266 - Evidence-Based Practice IV
- DC - 3154 - Introduction to Clinical Reasoning
- DC - 3163 - Clinical Reasoning for the Primary Spine Provider I
- DC - 3255 - Clinical Reasoning for the Primary Spine Provider II
- DC - 3262 - Clinical Reasoning for the Primary Spine Provider III
- DC - 3331 - Outcomes Accountability Capstone I
- DC - 3333 - Outcomes Accountability Capstone II

Clinical Experience

- DC - 3171 - Clinical practicum I
- DC - 3172 - Clinical practicum II
- DC - 3173 - Clinical practicum III and Comprehensive Clinical Exam I
- DC - 3271 - Clinical practicum IV

- DC - 3272 - Clinical practicum V
- DC - 3273 - Pre-clerkship and Comprehensive Clinical Exam II
- DC - 3371 - Clinical Clerkship I
- DC - 3372 - Clinical Clerkship II

Professional Practice

- DC - 3152 - Introduction to the Chiropractic Profession
- DC - 3237 - Review of systems and interprofessional collaboration
- DC - 3238 - Emergency Care
- DC - 3239 - Public Health and Epidemiology
- DC - 3361 - Chiropractic Practice

The essential mission of the University of Pittsburgh School of Law is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment. Pitt Law excels in teaching the next generation of diverse legal professionals producing research of impact, and contributing to society through public service.

In serving its students, the school is committed to an active and inclusive spirit of community and to the effective, efficient, and congenial provision of service. In teaching, research, and public service, the School of Law aspires to conduct all of its programs at a nationally prominent level of quality that adds luster to the legal and business communities of Pittsburgh; that makes the school relevant to the key needs of this region's private, public, and nonprofit sectors; and that distinguishes it as one of the finest public urban law schools in the United States.

For more than 130 years, the School of Law has prepared students to become excellent attorneys and leaders in both the legal profession and in society. Today, Pitt Law builds on this proud history by training lawyers to take on the opportunities and challenges of 21st century legal practice in the United States and around the world.

At Pitt Law we turn out practice-ready lawyers by providing students with both traditional law school classroom experiences designed to develop and hone analytical and communication skills and with experiential learning opportunities in one of our six clinics, which range in subject area from Environmental Law to Family Law to Securities Arbitration. Students who wish to focus their studies can enjoy the numerous benefits of enrolling in one of our five certificate or concentration programs, with their opportunities for international externships, instruction in litigation skills by teams of top practicing litigators, or membership on a moot court team. Seven joint degree programs, including four partnerships with Carnegie Mellon University, permit students to craft discipline-bridging courses of study in areas including public health, business administration, and international affairs. And Pitt Law students can serve as editors at the award-winning website JURIST, the world's only Web-based, student-powered legal news source, which is viewed weekly by 100,000 viewers and is based right here at the School of Law.

Among its first-professional degrees, the School of Law offers the Juris Doctor (JD) degree; a number of joint degree programs with other schools of the University and Carnegie Mellon University, leading to both a JD and a master's degree; and LLM degrees for foreign law graduates as well as several certificate programs. The School of Law also offers graduate programs leading to a Master of Studies in Law (MSL) and a Doctor of Jurisprudence (SJD) degree. *For further information on the graduate programs, see the School of Law-Graduate Programs section of this bulletin.*

Contact Information

Financial Aid and Admissions are located in the same office at the University of Pittsburgh School of Law.

Office of Admissions and Financial Aid
Barco Law Building
3900 Forbes Avenue
Pittsburgh, PA 15260

Website: www.law.pitt.edu

Admissions Information: ((412) 648-1413
Financial Aid Information: (412) 648-1415

Email Admissions: admitlaw@pitt.edu
Email Financial Aid: lawfa@pitt.edu

Office Hours: 8:00 a.m. - 5:00 p.m. Monday through Friday

Walk in appointments are available during office hours; however, scheduling an appointment is encouraged. To schedule an appointment, please email, schedule online, or call our office.

Admissions

Pitt Law accepts JD applications from September 1 through May 1, with a priority deadline of February 1 for full scholarship consideration. There is a $65 non-refundable application fee (waivers available by contacting admissions). Applications are submitted through LSAC and reviewed for fall enrollment, with the committee weighing undergraduate coursework, GPA, graduate work, and professional experience.

Testing: Pitt Law accepts the LSAT, GRE, or JD-Next exam. The GRE requires a 3.5 GPA and 85th percentile score. The JD-Next is an eight-week online course culminating in a four-hour exam. The highest LSAT score is used if taken multiple times; scores older than four years are not considered.

Required materials include:

- Official transcripts from all post-high school institutions
- Personal statement (max two double-spaced pages)
- Current resume (professional experience, activities, and awards)
- One letter of recommendation (up to three accepted; academic letters preferred for recent graduates)

Optional materials include addenda addressing community service intent, additional context for the application, or explanations for LSAT scores or grades that don't reflect true academic ability.

A Character & Fitness addendum is required if any related questions are answered "yes."

Key dates: Applications open September 1, first decisions go out in early November, the priority scholarship deadline is February 1, FAFSA is due March 1, seat deposits are due April 15, and the final application deadline is May 1.

Transfer Students

The University of Pittsburgh School of Law will accept transfer students after those students have successfully completed the first year of academic study at another law school, and students may apply to visit Pitt Law if he/she has completed two years of law study at another law school and have the permission of the dean of their current school. For more information, visit our website.

Tuition

Tuition Rates and Fees can be found on the University's website at https://www.tuition.pitt.edu/graduate/tuition/school-law. In addition to standard tuition, JD students are subject to several law-specific fees: an exam fee, a Public Service Interest fee, a Bar Success fee, and a one-time laptop fee for first-year students.

Financial Aid

Financial aid resources available to students include merit scholarships, endowment scholarships, fellowships, and loans. Students can borrow through both federal and private educational loans. Please visit the Pitt Law website for more details on financial aid available to law students.

Academic Standards

The School of Law Policy on Written Work for Credit, its Standards of Academic Integrity, the Grading Guidelines, and other academic policies of the school are included in the Policies and Procedures page on the School of Law web site, at https://www.law.pitt.edu/resources/policies-procedures.

Professional and Career Development

The Professional Development Office is dedicated to providing JD students and graduates with the information and tools necessary for successful career development and advancement. Our office assists JD students and graduates in their pursuit of careers in a wide variety of settings, including private law firms, public interest organizations, government agencies, corporate and business environments, judicial clerkships, academia, and non-traditional careers.

Through an extensive array of services including individual counseling, educational programming, interviewing opportunities, printed and online resources, job posting databases, and a substantial alumni network, the PDO helps educate students and graduates for a lifetime of successful career management.

The PDO also serves as an intermediary between prospective employers and JD students. By posting job vacancies, scheduling on-campus interviews, sponsoring programs, and participating in and promoting off-campus job fairs, we provide a range of employment prospects. Through ongoing outreach, the PDO Staff endeavors to create ever-increasing employer interest in Pitt Law students and graduates.

Each student will meet with a Career Counselor during their first year and is encouraged to meet with the counselor as often as needed. As a students begins to develop his or her legal career path they are able to work with an PDO counselor whose background mirrors the student's desired path. Our office is open Monday- Friday 8:30 a.m. - 5:00 p.m. Additionally, PDO has daily walk-in hours.

Programs and Course Offerings

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

School of Law's Programs

You expect the Juris Doctor (JD) program at Pitt Law to offer a solid foundation in the basics of legal education. You might not expect the opportunity to specialize in areas like environmental and energy law, health law, International law, and intellectual property, technology, and innovation law.

You might not expect to be able to pursue both a JD and a second master's degree at another Pitt school-in an area such as bioethics, business, public health, and social work-or at nearby Carnegie Mellon University in less time than it would normally take to complete two consecutive degrees.

You might not expect a 30-credit Master of Studies in Law advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree, which includes online Certificates in Sports and Entertainment Law, Corporate Compliance, Health Care Compliance, Human Resources Law, Business Law, and International

Business Law. Or a Master of Laws degree to provide foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year.

And you might not expect how quickly and the extent to which you'll get to apply those classroom lessons. Assisting the public through work with a clinic (health law, elder law, the environment, immigration, and more); serving as a full-time extern on Capitol Hill or throughout Washington, D.C., as part of the Semester in D.C. Program; interning with a federal agency, nonprofit, or corporation; and participating in a national or international moot court competition are just some of the opportunities you'll have to practice your skills and hone your expertise even before you graduate.

Certificate

Law - Health Law Certificate - JD Program

Students enrolled in the JD program at the University of Pittsburgh School of Law can develop an expertise in the rapidly changing, steadily growing field of health law through the Law School's Health Law Certificate Program.

Pitt Law's Health Law Program, one of the oldest in the country, provides students with a basic grounding in the healthcare field, complemented by clinical experience and more in-depth study of advanced topics and closely related areas of law. Students are encouraged to obtain the same broad background in law expected of all graduates from Pitt Law.

The Health Law Program provides students with a strong foundation in health law that will enable them to practice in various contexts, including law firms, health care management firms and insurers, government, and health care institutions. A combination of classroom and skills components acquaints students with everything from complex business and legal transactions to bioethics and patient care issues to the variety of legal issues that arise in the operation of a healthcare institution. Students gain hands-on experience in these areas through their work in the Law School's clinics, externships, and summer jobs available in the health care setting.

To sign up for, drop or verify your continuation in the Health Law Certificate Program, please complete the Certificate/Concentration Form.

Requirements

The Health Law Certificate Program is an educational program of concentration in health law for students in their second and third years of the JD curriculum. Admission is available to all students entering their second year in the JD program.

Complete a minimum of 18 credits in courses in health law.

A paper in satisfaction of the Upper-Level Writing Requirement
Students must earn a grade of B+ or higher on a paper that both satisfies the Upper Level Writing (ULW) and addresses a topic that falls within the health law spectrum.
Students must have the topic of their paper approved by the Health Law Certificate Program Director

Additional Related Courses: Other Graduate-Level Courses
Students may take a maximum of 6 credits of graduate-level courses outside the School of Law for credit toward the Health Law Certificate with permission of the program director. Especially relevant courses are those offered by the Department of Health Services Administration in the Graduate School of Public Health, the Center for Bioethics and Health Law, and the Heinz School of Public Policy and Management at Carnegie-Mellon University.

1 required Upper-Level Course:

- LAW 5395 - HEALTH LAW AND POLICY

2 of the following Core Elective Courses

- LAW 5089 - PUBLIC HEALTH LAW
- LAW 5464 - BIOETHICS AND LAW
- LAW 5673 - HEALTH CARE FRAUD, ABUSE, AND COMPLIANCE
- LAW 5811 - HEALTH CARE BUSINESS TRANSACTIONS

At least 1 Additional Elective

- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5155 - EHEALTH LAW
- LAW 5201 - ADMINISTRATIVE LAW
- LAW 5212 - BUSINESS PLANNING, ENTREPRENEURSHIP AND TECHNOLOGY
- LAW 5251 - BIOTECHNOLOGY LAW
- LAW 5283 - MENTAL HEALTH LAW
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5391 - ELDER LAW CLINIC
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5672 - IMPLICIT BIAS IN HEALTH CARE
- LAW 5721 - FDA LAW & POLICY
- LAW 5731 - CURRENT ISSUES IN HEALTH LAW
- LAW 5735 - AI - PRACTICALITY & GOVERNANCE
- LAW 5760 - HEALTH JUSTICE SEMINAR
- LAW 5764 - STREET MEDICINE PRACTICUM
- LAW 5865 - ELDER LAW SEMINAR

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 18

Law - International and Comparative Law Concentration - JD Program

The International & Comparative Law Concentration is intended to provide JD students a foundation for careers and further study in the application of legal regimes to transnational and international relationships. Students should keep in mind that in order to be a good international or comparative lawyer, one must first be a good domestic lawyer. Thus, JD students in this concentration are expected and encouraged to obtain the same broad background in law expected of all graduates of the University of Pittsburgh School of Law.

Expected Learning Outcomes

In completing their coursework for the Certificate, students will:

- Learn and understand the substantive and procedural law in the area of international and comparative law;
- Produce substantial written work in the area of international and comparative law, generally in the form of a seminar paper supervised by a professor in the discipline; and
- Acquire the ability to apply subject matter expertise in international and comparative law in experiential settings such as clinics and externships or through classroom simulations.

Requirements

To receive the International & Comparative Law Concentration upon graduation, students must complete:

- the required courses (below);
- satisfy the Upper Level Writing Requirement (ULW) with a paper focused on international or comparative law content;

- complete twelve credits of elective courses (below);
- and attend two designated CILE programs in each of the candidate's 2L and 3L years at the School of Law.

The courses that qualify as international and comparative law electives for purposes of the Concentration requirements are determined annually. In general, a course will satisfy the elective requirement if at least 25 percent of its content is in the areas of international or comparative law. Listed below are courses offered in recent years that have satisfied this elective requirement. You should consult the schedule of courses for any given term to determine what courses are being offered and the credits awarded. For new course offerings, you should contact CILE to determine if a given course will satisfy the elective requirement. Courses in the School of Law that do not have a predominantly international or comparative law subject matter may be approved for elective purposes on a case-by-case basis at the discretion of the CILE Academic Director if, in practice, the student's work in the class included that element in a particularly substantial manner; for example, the student satisfies the written requirement of a "W" course with a paper using a comparative law approach. (Note this would not be permitted if the given paper was also being used to satisfy the ULW requirement.)

Coursework outside the School of Law may also be eligible to satisfy up to 3 elective credits if the CILE Academic Director determines that at least 25 precent of its content is in international topics, that it otherwise is an appropriate course for these purposes, and the use of these credits has been approved by the Vice Dean of the School of Law as qualifying under School policy for the six credits of non-School of Law coursework permitted to be credited towards the JD degree. Proposed elective courses outside the School of Law must be approved in advance by the CILE Academic Director as well as in accordance with general School of Law policies.

Required Courses

- LAW 5226 - INTERNATIONAL LAW
- LAW 5225 - INTERNATIONAL BUSINESS TRANSACTIONS

Example Electives

- LAW 5204 - COLONIALISM & INTERNATIONAL LAW
- LAW 5165 - COMPARATIVE LAW: THE US AND EUROPEAN UNION
- LAW 5622 - COMPARATIVE PROFESSIONAL RESPONSIBILITY
- LAW 5304 - COMMERCIAL TRANSACTIONS
- LAW 5213 - CONFLICT OF LAWS
- LAW 5986 - INTERNATIONAL ARBITRATION SEMINAR
- LAW 5043 - INTERNATIONAL COMMERCIAL ARBITRATION
- LAW 5871 - INTERNATIONAL CRIMINAL LAW SEMINAR
- LAW 5275 - INTERNATIONAL AND FOREIGN LEGAL RESEARCH
- LAW 5653 - INTERNATIONAL HUMAN RIGHTS
- LAW 5680 - CAPITAL MARKETS/INTERNATIONAL BANKRUPTCY
- LAW 5547 - INTERNATIONAL INTELLECTUAL PROPERTY LAW
- LAW 5841 - INTERNATIONAL TAX
- LAW 5087 - INTERNATIONAL TRADE LAW AND REGULATION
- LAW 5149 - LAW OF ARMED CONFLICT
- LAW 5475 - SPANISH FOR LAWYERS
- LAW 5476 - SPANISH FOR LAWYERS 2
- LAW 5694 - TRADEMARK LAW

Registration

To register for the International & Comparative Law certificate program, complete the Registrar's online form anytime during the school year.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - John P. Gismondi Civil Litigation Concentration - JD Program

Pitt Law's John P. Gismondi Civil Litigation Concentration offers a special curriculum for JD students devoted exclusively to training the trial lawyers of tomorrow. Are you drawn to the real-life drama of the courtroom? Do you have dreams of becoming a trial attorney? If so, then the University of Pittsburgh School of Law may just be the place for you. Through its John P. Gismondi Civil Litigation Concentration, Pitt Law can provide you with a curriculum devoted to training the trial lawyers of tomorrow.

JD students who wish to register for the Gismondi program do so at the beginning of their second year of study. All students enrolled in the program will take specific required foundational core courses, a clinic or practicum, and several specialized classes during their second and third years.

At the Program Director's discretion, JD students may register for the program after their third semester of law school if there is a reasonable likelihood that they can complete the program requirements on time. Please review the requirements carefully before enrolling in the program and be aware of course prerequisites. Enrolling in Evidence in the Fall semester of the second year is advised to give you ample opportunity to complete the requirements.

Class size is kept small in each specialized skills course to enrich the learning experience. Students are not only taught legal rules and principles in a typical lecture format but are, more importantly, assigned to "role-play" in various real-world litigation scenarios, each designed to develop specific skills essential to successful trial work.

Students complete their training by taking a required litigation skills clinic or practicum selected from this group of options. In all of these clinics, students have the potential to represent real clients in actual court proceedings.

The students in the John P. Gismondi Civil Litigation Concentration will complete their law school education having developed a set of skills that better prepares them to do courtroom work than traditional law school graduates, and that advantage, in turn, makes the Gismondi concentration students more attractive to law firms seeking to hire young and enthusiastic litigation associates.

Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this certificate, students must complete the Core Courses and Required Specialized Skills Courses listed below. In addition, students must take a litigation skills clinic or practicum, or a combination thereof, approved by the Director of the Civil Litigation Program for a minimum of four credits.

Students must participate in the Murray S. Love Trial Moot Court Program during their second or third year or the Interscholastic Mock Trial Team (enroll in the attendant seminar Mock Trial Strategy and Practice).

Students must participate in the Program's Court Observation. Students will spend a day organized by the Academy of Trial Lawyers of Allegheny County observing court proceedings. Students will fulfill this requirement in their third year. Students must sign up with the Program Director in order to participate on one of these dates.

Core Courses

- LAW 5103 - EVIDENCE
- LAW 5407 - TRIAL ADVOCACY
- LAW 5616 - MOCK TRIAL STRATEGY AND PRACTICE

Specialized Skills courses

Students must take three of these courses for six credits. One of the courses marked with * may be substituted for one of the specialized skills courses upon request to the Director.

- LAW 5197 - ADVANCED PENNSYLVANIA TORT PRACTICE
- LAW 5295 - EXPERT WITNESS
- LAW 5236 - PRE-TRIAL PRACTICE-PLEADINGS AND DISCOVERY
- LAW 5223 - ADVANCED TRIAL EVIDENCE
- LAW 5320 - LITIGATION STRATEGY AND PLANNING
- LAW 5422 - ALTERNATIVE DISPUTE RESOLUTION *
- LAW 5630 - FEDERAL CIVIL LITIGATION SKILLS *

Clinic or Practicum

Students must take a minimum of three credits in experiential learning courses

- LAW 5391 - ELDER LAW CLINIC
- LAW 5398 - FAMILY EMPOWERMENT & LEGAL ACCESS CLINIC

- LAW 5425 - LOW-INCOME TAX CLINIC
- LAW 5429 - COMMUNITY LAWYERING
- LAW 5880 - IMMIGRATION LAW CLINIC
- LAW 5883 - ENVIRONMENTAL LAW & POLICY CLINIC
- LAW 5874 - SECURITIES ARBITRATION CLINIC
- LAW 5937 - PA PRACTICE ANTI-EVICTION PRACTICUM
- LAW 5939 - CRIMINAL DEFENSE PRACTICUM
- LAW 5952 - CRIMINAL PROSECUTION PRACTICUM
- LAW 5393 - HEALTH LAW CLINIC

Registration

Please review the above requirements carefully before enrolling in the Gismondi Civil Litigation Concentration. Be aware of course prerequisites. Enrollment generally occurs at the end of the first year or within the first week of the second year (before the add-drop period ends). Enroll by completing the Concentration Program form. At the Program Director's discretion, students may register for the program after their third semester of law school if there is a reasonable likelihood that they can complete the program requirements. Taking Evidence in the fall semester of the second year is advised to give you ample opportunity to complete the requirements. A student who wants to disenroll from the Concentration must complete the Concentration Program form, choosing the "Drop" option.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Public Policy Concentration - JD Program

JD studetns can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program in the spring semester of your 2L or 3L year.

While JD students learn many skills that are useful for policy-related work, they do not typically learn how to apply those skills in a policy context, for example by analyzing a government agency report, mapping the stakeholders on a particular issue, preparing questions for a Senate hearing, writing a short policy brief, or developing an advocacy campaign.

The Semester in DC Program Policy Track is designed to fill this gap by teaching you how to apply your legal advocacy, research, and writing skills in the policy context, so that you can successfully engage in policy-related work after graduation. The Policy Track is offered each spring semester jointly with the Graduate School of Public and International Affairs (GSPIA) at Pitt's Washington Center in downtown Washington, DC.

Highlights of the Semester in DC Program Policy Track include:

- A policy-related externship with a government or nonprofit organization in Washington, DC
- Classes that are focused on learning from policy experts who regularly visit as guest speakers and on attaining pragmatic policy advocacy, analysis, and writing skills
- Joint classes with GSPIA students, so that both policy and law perspectives are represented in each class
- An individual alumni mentor for each student, as well as connections with Law and GSPIA's alumni network of hundreds of attorneys and policy practitioners in the Washington, DC area

By completing the Public Policy Concentration, students are expected to achieve the following Learning Outcomes:

- Students will understand and be able to describe the processes by which law and policy are developed, contested, and implemented. They can identify and explain factors and dynamics affecting these processes.
- Students will learn how to apply their research, analysis, and writing skills in a policy context by regularly practicing their informal writing skills and by researching and writing a policy issue brief.
- Students will improve their proficiency in policy skills, such as stakeholder mapping, preparing for and summarizing Congressional hearings, or designing advocacy campaigns.

- Students will explore and be able to describe the professional roles of lawyers and policymakers in lawmaking and policy development.
- Through policy-related externships and classroom simulations, students can apply their subject matter expertise, legal knowledge, and professional skills in real-life policy settings. This will benefit them as they enter a policy career or another field in which knowledge of law and policy is important.

Requirements

You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program after taking the required 1L Legislation and Regulation course.

The Public Policy Concentration requires students to earn 15 credits in the policy-related classes listed below. Students will have already completed the 3-credit foundational course in Legislation and Regulation in their 1L year. Students can complete the 12 remaining credits by participating in the Semester in DC Program Policy Track, which offers the listed courses. Only the courses listed below may be used to fulfill the requirements of this concentration; other courses may not be substituted.

Foundational Course (3 credits)

- LAW 5032 - LEGISLATION AND REGULATION

Electives (up to 7 credits Required)

- LAW 5877 - PUBLIC POLICY SEMINAR
- LAW 5666 - LOBBYING AND ADVOCACY
- LAW 5668 - POLICY COLLOQUIUM
  or
- LAW 5954 - D.C. SEMINAR
  (Students may apply 1 credit from the DC Seminar to the Public Policy Concentration if their seminar papers are approved in advance as policy-focused.)

Skills Component (5 credits required)

- LAW 5667 - POLICY EXTERNSHIP *
- LAW 5955 - D.C. EXTERNSHIP *
  * must be approved in advance as policy focused.

Registration

Students who wish to earn the Public Policy Concentration by participating in the Semester in D.C. Program Policy Track should complete the Certificate/Area of Concentration Registration Form. This form should be filled out by the first week of the semester in which the student participates in the Semester in D.C. Program Policy Track to effectively enable Professor Baylis to oversee the student's completion of the requirements.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Tax Law Program - JD Program

The Area of Concentration in Tax Law is intended to provide JD students with a solid foundation in tax law that can be used either to enter a career in tax law, as a basis for pursuing further study in tax law, or as an adjunct to a career in another area of law. Tax law is unique in that it intersects with every area of the law-from energy and environmental law to corporate law to health law to personal injury law, just to name a few examples. Knowledge of tax law is thus important whether one wishes to specialize in tax law or whether one wishes to gain a deeper knowledge of tax law to improve skills in another area of law (e.g., in advising corporations, partnerships, and other businesses).

JD students may pursue this concentration by taking a foundational course in tax law, six credits of elective courses, and three credits of skills-based courses.

Requirements

The Tax Law Area of Concentration requires a minimum of 13 credits. The program requirements are divided into foundational, elective, and skills. Students must take a foundational course in tax law, 6 credits from among the listed elective courses, and 3 credits from among the listed skills courses.

By completing these courses, it is expected that students enrolled in the concentration will learn and understand the substantive and procedural law in the area of federal tax law and will acquire the ability to apply subject-matter expertise in the area of federal tax law in experiential settings (e.g., clinics and externships or through classroom simulations) that will benefit them as they enter a career in the tax field or in another field in which knowledge of tax law is essential.

Foundational Course (Required)

- LAW 5105 - FEDERAL INCOME TAXATION

Elective Courses (6 credits required)

- LAW 5817 - CORPORATE TAXATION
- LAW 5371 - PARTNERSHIP TAXATION
- LAW 5259 - ESTATE AND GIFT TAX
- LAW 5414 - ESTATE PLANNING
- LAW 5200 - INTRODUCTION TO ACCOUNTING FOR LAWYERS
- LAW 5841 - INTERNATIONAL TAX *
- LAW 5325 - FEDERAL TAX PRACTICE AND PROCEDURE
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5273 - STATE AND LOCAL TAX
- LAW 5511 - TAX LAW & POLICY SEMINAR
- LAW 5818 - LAW INTERSESSION
- LAW 5931 - PITTSBURGH TAX REVIEW
  Please note: A maximum of one credit from the *Pittsburgh Tax Review* will count toward satisfying the requirements for the concentration.

Skills Component (3 credits required)

- LAW 5425 - LOW-INCOME TAX CLINIC
  Tax Law Moot Court Competition
- LAW 5414 - ESTATE PLANNING
- LAW 5955 - D.C. EXTERNSHIP
  Externship in area of Tax Law

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Registration

To register for the Tax Law concentration, complete the Registrar's online form anytime during the school year.

Concentration

Law - Environmental and Energy Law Concentration - JD Program

Law - Environmental and Energy Law Concentration

Pitt Law offers JD students who wish to explore the Environmental and Energy law field a flexible concentration with courses designed to equip them with the skills necessary for success. Students can study the key laws and regulations they will apply in their future legal practice. They can choose to take courses that cover any - or all - of the following substantive areas of law: pollution control, energy, oil and gas (including the law of shale plays), electrical utilities, land and natural resource use and conservation, renewable energy, and climate change.

By completing this program, it is expected that JD students enrolled in the concentration will gain a comprehensive understanding of the substantive and procedural law of environmental and energy law. They will also acquire the ability to apply subject-matter expertise in environmental and energy law in experiential settings (e.g., clinics and externships or through classroom simulations) that will benefit them as they enter a career in the environmental or energy field or in another field in which knowledge of environmental or energy law is important.

Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students are required to take a foundational course in environmental law, 5-6 credits of electives, and 4-6 skills-based credits.

Please note that this program may require that you complete an internship, externship, or other field work at a facility or facilities external to the University and that such facility or facilities may require a criminal background check, an Act 33/34 clearance (if applicable), and perhaps a drug screen to determine whether you are qualified to participate.

Required Course

- LAW 5340 - ENVIRONMENTAL LAW

Elective Courses (5-6 credits required)

- LAW 5201 - ADMINISTRATIVE LAW
- LAW 5038 - ENERGY LAW
- LAW 5082 - CLIMATE CHANGE AND THE LAW
- LAW 5295 - EXPERT WITNESS
- LAW 5198 - ANIMAL LAW

Skills Component (4-6 credits required)

- LAW 5883 - ENVIRONMENTAL LAW & POLICY CLINIC
- Environmental Moot Court Competition
- Externship in the area of Environmental Law or Energy Law
- LAW 5955 - D.C. EXTERNSHIP

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - IP, Tech, & Innovation Law Concentration - JD Program

Intellectual property law encompasses patents, copyrights, and trademarks as its core subjects, along with specialized bodies of law for designs, plants, and geographical indications, among other things. "Innovation law" is meant to deal broadly with IP issues and with related business law, employment law, technology law, trade law, and free speech law questions-among many others-for individuals, firms, and

governments in the arts, entertainment, privacy and security, software and computer networks, life sciences, and technology development and commercialization. Today, Pitt Law is building on its distinguished tradition of scholarship and teaching in these disciplines.

The IP, Tech, and Innovation Law Concentration is designed to give JD students a focused introduction to these bodies of law and practice while getting a broad grounding in modern law practice. No scientific or technical background is required to pursue the Area of Concentration or practice law in any related field. However, students who wish to practice law as a patent prosecutor do need to have an engineering degree or other similar technical qualification.

JD students may pursue this concentration by taking foundational courses in intellectual property law, 5-6 credits of electives, and 4-6 skills-based credits. These skills-based credits will equip students with the practical skills necessary to excel in their future careers.

Concentration Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students must have a minimum of 14 credits and meet the below course requirements. In addition, students can opt to use one of the following as a Skills Component:

- Giles Sutherland Rich Moot Court Competition (1 credit)
- Cardozo/BMI Moot Court Competition (1 credit)
- Externships with government agencies or other organizations that focus on intellectual property and/or technology law, practice, and/or policy (4 credits)
- Semester in DC externship with a focus on intellectual property and/or technology law, practice, and/or policy (13 credits)

Foundational Courses (2 courses totaling 5-6 credits required)

- LAW 5210 - PATENT LAW
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5328 - COPYRIGHT
- LAW 5694 - TRADEMARK LAW

Elective Courses (5-6 credits required)

- LAW 5126 - CORPORATE & VENTURE FINANCE
- LAW 5212 - BUSINESS PLANNING, ENTREPRENEURSHIP AND TECHNOLOGY
- LAW 5251 - BIOTECHNOLOGY LAW
- LAW 5352 - LAW & ECONOMICS
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5547 - INTERNATIONAL INTELLECTUAL PROPERTY LAW
- LAW 5690 - BLOCKCHAIN FOR LAWYERS
- LAW 5719 - APPLIED LEGAL DATA ANALYTICS AND AI
- LAW 5722 - TECHNOLOGY, RACE & THE LAW
- LAW 5735 - AI - PRACTICALITY & GOVERNANCE
- LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP
- LAW 5763 - ANTIRACIST INTELLECTUAL PROPERTY LAW

Skills Component (4-6 credits required)

- LAW 5135 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5242 - PATENT LAW PRACTICE
- LAW 5276 - PATENT LITIGATION
- LAW 5481 - INTELLECTUAL PROPERTY LICENSING
- LAW 5647 - INTRODUCTORY ENTERTAINMENT LAW
- LAW 5695 - TRADEMARK LAW PRACTICE
- LAW 5839 - LAW ENTERTAINMENT AND SOCIAL ENTERPRISE PRACTICUM

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Doctoral

Law - Juridical Science, SJD

Program Information

The Doctor of Juridical Science (SJD) is the Law School's most advanced degree, which is designed for legal academics who wish to pursue advanced independent study, research and writing. The Law School's SJD program offers candidates the opportunity to become active members of a vibrant legal community.

Degree Requirements

The SJD is a research degree. There is no formal requirement for candidates to pursue course work, whether for credit or otherwise, other than required participation in a non-credit, ungraded colloquium for SJD students during their first year in the program. However, a candidate may be required by his advisor to take or audit courses and participate in seminars and discussions which will further the student's understanding of his or her field of knowledge and its relation to other fields. Each candidate will be allowed 2-4 years to complete the program, the first year of which must be spent in residency at the University of Pittsburgh School of Law. The year of residency is in addition to the LLM year for Pitt Law LLM graduates. A candidate is required to conduct rigorous research and produce an original dissertation that will contribute significantly to legal scholarship and further understanding of the law. Specifically, a candidate is required to submit a dissertation overview, defend that overview, submit a doctoral dissertation, and successfully defend the dissertation. The SJD degree must be completed under the supervision of a faculty member who has consented to serve as the faculty advisor.

Graduate Certificate

Law - Corporate Compliance Certificate - MSL Program

Law - Corporate Compliance Online Certificate - MSL Program

The Graduate Certificate in Corporate Compliance is an 11-month, accredited, online program that fills a growing need for compliance professionals and leverages the University of Pittsburgh School of Law's reputation and expertise in this area.

As international trade and globalization continue to grow, U.S. corporations doing business abroad and foreign corporations doing business with U.S. corporations find themselves subject to a multitude of U.S. legal compliance requirements. Organizations recognize reputational risk can be as great as or greater than strategic, financial or operational risks. As a result, compliance programs are growing as many organizations implement them to prevent and detect misconduct and to protect the interests of employees, shareholders, and businesses and to guard against reputational risk.

Compliance professionals are key to ensuring that organizations are complying with their own policies and procedures as well as applicable legal statutes, regulations, and judicial decisions.

The Graduate Certificate in Corporate Compliance is designed for U.S. and foreign corporate employees who work or wish to work in the corporate compliance area, such as lawyers, paralegals, and other compliance professionals in finance, internal audit, human resources and environmental sustainability, in order to enhance their careers by expanding their knowledge, skills, and professional understanding of corporate compliance.

The program covers key foundational topics in corporate compliance, and it enhances the ability of students to understand the fundamentals of corporate compliance, to design a compliance program as well as related policies and procedures, and to evaluate the effectiveness of ethics and compliance programs. Faculty - both full-time and part-time - who teach or practice corporate compliance teach the four mandatory and one elective 3-credit courses over the course of the 40-week program. The required curriculum covers legal aspects of corporate compliance; ethics and compliance; designing, measuring effectiveness, and auditing compliance programs; and conducting investigations and risk assessments. In addition, several electives are available to students who wish to specialize in a particular area of compliance such as Foreign Corrupt Practices Act, Antitrust, International Trade and Export, Pharmaceutical and Medical Devices, and Securities compliance.

Students learn how to establish an effective program to monitor organizational misconduct; to ensure that employees and third parties have mechanisms in place to report misconduct and seek advice; to audit compliance and ethics risks; and to evaluate the effectiveness of the ethics and compliance program as well as other issues around public company disclosures and compliance programs. The potential clientele discussed includes individuals, as well as for-profit and nonprofit corporations, and hybrid and governmental entities.

The program helps position students for leadership in:

- Corporate compliance and ethics
- Regulatory affairs
- Compliance program training
- Policy development, including CSR (Corporate Social Responsibility) and ESG (Environmental, Social, and Governance)
- Auditing and monitoring
- Financial fraud
- Environmental and other corporate compliance

Curriculum:

- LAW 2011 - Introduction to Corporate Compliance
- LAW 2012 - Ethics and Compliance
- LAW 2013 - Designing, Measuring Effectiveness, and Auditing Compliance Programs (Based on US DOJ Guidance)
- LAW 2014 - Conducting Investigations and Risk Assessments
- LAW 2015 - Special Topics in Corporate Compliance

Law - Health Care Compliance Online Graduate Certificate - MSL Program

The Health Care Compliance Graduate Certificate Program is a fully online, accelerated 11-month graduate certificate program designed for working professionals. This advanced, accelerated program will support you as you take on more strategic compliance roles. In this program, you will:

- Learn the relevant law, practical applications of compliance, best practices and explore current issues;
- Interact with expert faculty-professors from the School of Law and School of Public Health, current and former federal regulators, and compliance industry experts;
- Network and collaborate with your peers in other industries and locations through innovative online applications; and
- Work on weekly assignments when and where you choose.

This program is designed for:

- Compliance professionals who wish to enhance their understanding and professional development;
- Attorneys who wish to acquire an appreciation of the compliance industry, client needs, and issues;
- Health care professionals who must understand compliance;
- Industry administrators and leaders; and/or
- Those interested in an exciting career change.

HCC Online course work is asynchronous, meaning there are no scheduled meeting times or locations. You will complete each course in the program within eight weeks, working through weekly modules, based on your own schedule and from any location.

The objectives of the Health Care Compliance Online program are to:

- Provide an understanding of the laws that shape the health care industry in general, and compliance in particular;
- Help students acquire a deeper understanding of the regulatory context of compliance;
- Help students develop the skills and knowledge necessary to identify compliance issues, guide change, and navigate complexity while supporting an ethical culture;
- Identify best practices in compliance management;
- Enhance critical thinking and problem solving skills in a compliance context;
- Help students acquire knowledge and skills to manage conflict;
- Improve students' communication and presentation skills; and
- Facilitate peer-to-peer learning and networking opportunities.

Required Courses (15 credits):

- LAW 2061 - LEGAL ASPECTS OF HEALTHCARE COMPLIANCE
- LAW 2062 - INTRODUCTION TO LEGAL SYSTEM FOR HEALTHCARE AND COMPLIANCE
- LAW 2968 - EFFECTIVE COMPLIANCE PROGRAM DEVELOPMENT AND SKILLS
- LAW 2969 - PROFESSIONAL JUDGEMENT AND ETHICS, THE CANVAS OF COMPLIANCE
- LAW 2970 - SELECT APPLICATIONS IN COMPLIANCE

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Human Resources Law Online Graduate Certificate - MSL Program

The Human Resources Law Graduate Certificate program is an 11-month, accelerated program. It offers five courses designed to be taken in order. Each is eight weeks in length. At the completion of the program, students will be eligible to sit for some of the industry-based human resources certification exams offered by the Society for Human Resource Management (SHRM) and the HR Certification Institute.

The Human Resources (HR) Law Certificate program provides students the legal and ethical tools to take on workplace challenges in a world of rapid technological, social and legal change. Students learn best practices and practical applications of the law to human resource situations and explore current issues that they may come across in their current position.

The certificate in HR Law is ideal for:

- HR professionals who want to enhance their understanding of HR laws and regulations
- Graduates of business administration programs who wish to develop a more thorough understanding of HR law and practices
- Professionals interested in an exciting career change
- College graduates interested in entering the HR field
- Attorneys who wish to acquire an appreciation of the HR field, client needs, and issues
- The HR Law Certificate cohort is comprised of professionals working in various roles in an array of industries. Certificate courses are taught by industry experts and Pitt Law Faculty.

Students may elect to combine their certificate studies with the Online MSL core courses to earn both a Master's Degree and a professional certificate in as little as two years, studying part-time.

Required Courses

- LAW 2070 - INTRODUCTION TO THE LEGAL SYSTEM FOR HUMAN RESOURCES; HIRING AND FIRING
- LAW 2071 - WAGES, HOURS AND BENEFITS
- LAW 2072 - WORKING CONDITIONS
- LAW 2073 - ANTI-DISCRIMINATION LAW
- LAW 2074 - SELECTED TOPICS IN HUMAN RESOURCES LAW

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - International Business Law Online Graduate Certificate - MSL Program

Pitt Law's Online International Business Law Certificate program helps students advance or begin their careers in international commercial law. The curriculum focuses on key foundational topics in U.S. and international business law applied to business transactions, and to the resolution of cross-border disputes through litigation, mediation, and/or arbitration.

After completing the International Business Law Certificate, students will have a solid working knowledge of the complexities of cross-border business transactions, a roadmap of the potential pitfalls and most likely areas where disputes will arise, and the framework for how to either avoid those issues, or work toward resolving them if a formal dispute arises.

The IBL Certificate is an 11-month, accelerated program. It consists of five courses designed to be taken in order. Each is eight weeks long. The IBL courses are taught by experienced legal professionals serving as part-time professors, and by Pitt Law Faculty.

Students may elect to combine their certificate studies with the Online MSL core courses to earn both a Master's Degree and a professional certificate in as little as two years, studying part-time.

Required Courses

The following five courses are required for the certificate.

- LAW 2001 - INTRODUCTION TO US & INTERNATIONAL BUSINESS LAW
- LAW 2002 - COMMERCIAL ASPECTS OF CROSS-BORDER TRANSACTIONS
- LAW 2003 - SPECIALTY AREAS IN CROSS-BORDER TRANSACTIONS
- LAW 2004 - FOUNDATIONS OF INTERNATIONAL DISPUTE RESOLUTION & LITIGATION
- LAW 2005 - SPECIAL TOPICS IN INTERNATIONAL OR DISPUTE RESOLUTION

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Sports, Entertainment & Arts Law Online Graduate Certificate - MSL Program

The graduate certificate in Sprots, Entertainment & Arts Law (SEAL) fills a gap in the legal education market and leverages the strengths of the University of Pittsburgh School of Law, the larger University and its alumni, and the region. Our University and region have long produced leaders in sports, entertainment, and arts, from Panther to Steeler Nation, Fred Rogers to George Romero, and August Wilson to Andy Warhol. In today's rapidly changing, increasingly intersecting, and highly competitive sports, entertainment, and arts industries, leaders also need legal skills, knowledge, understanding, and connections to succeed. By launching the SEAL certificate program, Pitt Law is helping to ensure that our graduates, the University, and the region will receive their cultural, social, and economic return on investment.

The SEAL certificate is an 11-month, accelerated program that targets the market of business, legal, and creative professionals who are currently working or planning to work in sports, entertainment, and or arts/sectors, and who wish to expand their legal skills, knowledge and understanding of these industries. These three synergistic sectors present similar legal issues, involving labor and employment, intellectual property, corporate, and commercial transactions law. Pitt Law Faculty with expertise in these fields oversees the development and implementation of the SEAL courses, which are taught by regular and adjunct Pitt Law faculty with industry experience.

By combining the study of sports, entertainment, and arts law into one program, the SEAL certificate seizes an opportunity to fill a gap left in the fields of sports, entertainment, and arts law education. Currently, the only programs offered by U.S. law schools that cover all three sectors are costly, in-person, full-time programs limited to lawyers or law students seeking degrees. Although a few part-time, online programs in these legal fields do now exist, these programs force students to choose one or two sectors, despite the increasing intersection of all three of these competitive industries.

SEAL students can apply their credits towards fulfilling the requirements in our Master of Studies in Law (MSL) degree.

Students may elect to combine their certificate studies with the Online MSL core courses to earn both a Master's Degree and a professional certificate in as little as two years, studying part-time.

Course Requirements: 15 Credits

Applicants must have earned a baccalaureate degree at an accredited institution. Admissions decisions will be made based on professional experience, academic credentials, and a personal statement. In some instances, an interview (online or via phone) may be required. Students must complete the entire curriculum to earn the certificate.

- LAW 2006 - INTRODUCTIO TO THE LAW & BUSINESS OF SPORTS, ENTERTAINMENT, & ARTS LAW
- LAW 2007 - LABOR & EMPLOYMENT LAW IN SPORTS, ENTERTAINMENT AND ART LAW
- LAW 2034 - SPORTS, ENTERTAINMENT AND ART INTELLECTUAL PROPERTY LAW
- LAW 2035 - ORGANIZATIONS, FINANCE & DISTRIBUTION LAW IN SEAL
- LAW 2036 - SPECIAL TOPICS IN SEAL

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Joint Degree

Law and Arts Management (Carnegie Mellon), JD/MAM

The University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which arts management and law overlap. This program, spanning four years, prepares you for careers in which arts management and law overlap. You must satisfy both schools' degree requirements, but some credit is given by each school for completing the other school's program.

The joint degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Law Arts Management Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To

fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MAM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MAM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Bioethics, JD/MA

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students participate in rounds with residents, physicians, and other healthcare professionals, attend twice-weekly seminars, and observe ethics consultations and clinical ethics teaching sessions.

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs. For a list of law school courses considered to be appropriate for students in this joint degree program, consult the courses listed as electives for the Health Law Certificate Program.

Advising

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

Credits

Students enrolled in the joint degree program accomplish this in three to four years. The degree requires 99 credits and includes 34 credits of specifically prescribed law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy the requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Joint degree students must be coded by the University Registrar as "primary law" for at least five semesters. During these semesters, they pay tuition at the Law School rate and enroll in at least 10 credits of law school courses.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Business Administration (Carnegie Mellon), JD/MBA

The daily interaction of Law and Business in our society presents attorneys, entrepreneurs, and other professionals with a diverse set of challenges arising from public and private institutions, policies, and practices. A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from Carnegie Mellon University Tepper School of Business, which is in the top 20 of all U.S. business schools according to the the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the appropriate School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Tepper School of Business

To graduate with a JD/Tepper MBA degree students must acquire a total 88 credits from the School of Law and 64 credits (or 192 units) from Tepper. However, completing the MBA degree entitles the student to 15 credits of advanced standing at the School of Law, resulting in an actual total of 73 credits; and completing the JD degree entitles the student to 10 credits (or 30 units) at Tepper, resulting in an actual total of 54 credits (or 162 units). This means that, after a year at the School of Law and a year at Tepper, a student must acquire at least 40 additional credits from the School of Law and 22 credits (or 66 units) in electives from Tepper to graduate with a JD/MBA.

More information can be found on their website.

MBA Degree Requirements

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a student's academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Elective Courses

Students in the MBA program must complete a minimum of 19.5 elective credits from any area of study offered at the School of Business.

Taking electives at other Professional Schools at Pitt

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information

Micro-credentials and Graduate Certificates

Students wishing to add additional specialization to the MBA program may be able to declare one or more micro-credentials or graduate certificates, many of which are stackable within the elective portion of the programs. Not all micro-credentials or graduate certificates will be feasible for every MBA program. Students should discuss their interest in micro-credentials and graduate certificates with their academic advisor to see how those requirements might be stackable within their degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Business Administration, JD/MBA

The daily interaction of Law and Business in our society presents attorneys, entrepreneurs, and other professionals with a diverse set of challenges arising from public and private institutions, policies, and practices. A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from the University of Pittsburgh Katz Graduate School of Business, which is in the top 50 of U.S. public business schools according to the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

School of Business

To graduate with a JD/Katz MBA degree students must acquire a total of 76 credits from the School of Law and 33 credits from Katz. This means that, after a year at the School of Law and a year at Katz, a student must normally acquire at least 43 additional credits from the School of Law and 3 credits from Katz to graduate with a JD/MBA.

More information can be found on their website.

MBA Degree Requirements

The Katz MBA curriculum requirements may be found on the Katz School of Business website

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Information Security Policy (Carnegie Mellon), JD/MSISPM

Pitt Law and Heinz College offer a joint degree program to train students for careers in which management, information security, and law overlap. Participants will emerge with a broad knowledge of the fundamental intersections of law, government, privacy and information security, and management. The multidisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

Cybersecurity, information privacy, intellectual property law, cybercrime, and other IT-related sectors are growing rapidly. There are many job opportunities in this emerging space, many with legal dimensions. Joint degree program graduates will be better prepared to compete for and succeed in those jobs.

Curriculum & Requirements

The joint degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students can pursue both programs simultaneously. During the first year, students study at either Heinz College or Pitt Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. To graduate with both degrees, students must fulfill both schools' degree requirements.

Heinz College and Pitt Law have different degree requirements. CMU's courses are counted in units, and the University of Pittsburgh's in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill Pitt Law's program requirements, students must complete 88 credits, while Heinz College requires 198 units. Students in the joint degree program can transfer 30 units to the Heinz College degree after completing their JD degree and 14 credits to the JD degree after completing their Heinz College degree.

Students must register for at least one class per semester at Heinz College during years 3 and 4 to qualify for credit transfer between institutions.

Before selecting courses, students must meet with their Academic Advisors at both programs. In addition to the coursework for both programs, Heinz College students must complete a summer internship after their first year at Heinz College. The Professional Development Office can assist students in securing an internship.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and International Development, JD/MID

This program provides rigorous, integrated training for students preparing for a professional career that combines law and public and international affairs. Increasingly, lawyers in the public and nonprofit private sectors work in managerial and policy-making capacities for which legal training alone does not prepare them. At the same time, legal considerations impinge more than ever on the work of public managers and planners, although most of them have had no exposure to legal training. Students in the joint-degree program gain a broadened knowledge base and a cross disciplinary approach to solving problems involving the intersection of law, policy, and management. They also develop more marketable professional skills than are usually acquired through single-degree programs.

Professionals trained in both law and public and international affairs thus enjoy expanded career opportunities. The University of Pittsburgh's program is unique because of the range of master's degree options available.

Curriculum & Requirements

The structuring of this four-year degree program is flexible. A student may begin study in either school. The only requirement in this connection is that the first year in the School of Law be taken in its entirety, with no outside courses. GSPIA also expects joint-degree program students to complete the required master's degree core courses early in their program in GSPIA.

Degrees in the joint-degree program are awarded concurrently. Therefore, it is important to note that a student who resigns from one program and elects to remain in the other will be subject to all the requirements of that particular degree program. The previously described arrangement for awarding advanced-standing credits will no longer be in effect.

Each student must satisfy both schools' requirements as modified by participation in the joint-degree program. The credit requirements are as follows:

Program	Joint Degree Credits
Juris Doctor (JD)	79 Credits
Master of International Development	36 Credits
Total Credits for Joint Degree	115 Credits

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Administration, JD/MPA

This program provides rigorous, integrated training for students preparing for a professional career that combines law and public and international affairs. Increasingly, lawyers in the public and nonprofit private sectors work in managerial and policy-making capacities for which legal training alone does not prepare them. At the same time, legal considerations impinge more than ever on the work of public managers and planners, although most of them have had no exposure to legal training. Students in the joint-degree program gain a broadened knowledge base and a cross disciplinary approach to solving problems involving the intersection of law, policy, and management. They also develop more marketable professional skills than are usually acquired through single-degree programs. Professionals trained in both law and public and international affairs thus enjoy expanded career opportunities. The University of Pittsburgh's program is unique because of the range of master's degree options available.

The MPA degree offers three fields of study, which includes majors in Urban and Regional Affairs, Public and Nonprofit Management, and Policy Research and Analysis.

Curriculum & Requirements

The structuring of this four-year degree program is flexible. A student may begin study in either school. The only requirement in this connection is that the first year in the School of Law be taken in its entirety, with no outside courses. GSPIA also expects joint-degree program students to complete the required master's degree core courses early in their program in GSPIA.

Degrees in the joint-degree program are awarded concurrently. Therefore, it is important to note that a student who resigns from one program and elects to remain in the other will be subject to all the requirements of that particular degree program. The previously described arrangement for awarding advanced-standing credits will no longer be in effect.

Each student must satisfy both schools' requirements as modified by participation in the joint-degree program. The credit requirements are as follows:

Program	Joint Degree Credits
Juris Doctor (JD)	79 Credits
Master of Public Administration	36 Credits
Total Credits for Joint Degree	115 Credits

Note

Law and Public and International Affairs, JD/MPIA

The University of Pittsburgh School of Law and Graduate School of Public and International Affairs (GSPIA) provide rigorous, integrated training for students preparing for a professional career that combines law and public and international affairs. Increasingly, lawyers in the public and nonprofit private sectors work in managerial and policy-making capacities for which legal training alone does not prepare them. At the same time, legal considerations influence the work of public managers and planners more than ever, although most have had no exposure to legal training.

Students in the joint degree program gain a broadened knowledge base and a cross-disciplinary approach to solving problems involving the intersection of law, policy, and management. They develop marketable professional skills that are usually acquired through single-degree programs. Professionals trained in both law and public and international affairs enjoy expanded career opportunities.

This program is unique because of the range of master's degree options. The MPA degree offers three fields of study, including urban and Regional Affairs majors, Public and Nonprofit Management, and Policy Research and Analysis. Students in the MPIA degree program pursue majors in Global Political Economy or Security and Intelligence Studies. Students interested in international development choose two significant fields: Development Planning and Environmental Sustainability or Non-Governmental Organizations and Civil Society.

Curriculum & Requirements

The structuring of this four-year degree program is flexible. A student may begin study in either school. The only requirement in this connection is that the first year in the School of Law be taken in its entirety, with no outside courses. GSPIA also expects joint-degree program students to complete the required master's degree core courses early in their program in GSPIA.

Degrees in the joint-degree program are awarded concurrently. Therefore, it is important to note that a student who resigns from one program and elects to remain in the other will be subject to all the requirements of that particular degree program. The previously described arrangement for awarding advanced-standing credits will no longer be in effect.

Each student must satisfy both schools' requirements as modified by participation in the joint-degree program. The credit requirements are as follows:

Program	Joint Degree Credits
Juris Doctor (JD)	79 Credits
Master of Public and International Affairs	36 Credits

Program	Joint Degree Credits
Total Credits for Joint Degree	115 Credits

***The Masters program at GSPIA may be either in Public and International, Public Administration, or International Development**

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Health, JD/MPH

The University of Pittsburgh Schools of Law and Public Health offers students an interdisciplinary curriculum in law and public health, health policy, and management. Students in this integrated joint degree program learn to address the legalities and challenges affecting individual health care and the health of entire populations. The joint Juris Doctor and Master of Public Health in Health Law Policy and Management (JD/MPH) recognizes the connections between law and the broad range of health services and provides students with an interdisciplinary curriculum in law and public health, health policy, and management. Students learn to address the legalities and challenges affecting individual health care and the health of entire populations.

Graduates pursue careers serving governmental agencies at the federal, state, and local levels, practicing law representing private clients, serving as in-house counsel or on the management team at healthcare organizations and systems, and working with non-profit and community-based organizations.

Many contemporary issues - from the threat of bioterrorism to health care reform to the opioid epidemic - create a need to balance individual rights with public protection and demand expertise in law and public health, making public health law an exciting and vital focus for attorneys.

For Additional Information

For information regarding entrance examinations, tuition and financial aid, writing requirements and field experience, please visit the GSPH website.

Curriculum & Requirements

Students enrolled in the joint degree program take Pitt Law and Pitt Public Health classes. In the ordinary course, the first year of law school must be completed in a single academic year before embarking on studies in public health. Students must complete 76 credits in the JD curriculum. Neither degree may be granted before fulfilling all requirements for the joint degree program.

Joint degree students earn their credentials faster (8 semesters instead of 10) and with fewer course requirements than if each degree were completed separately.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Policy and Management (Carnegie Mellon), JD/MSPPM

The University of Pittsburgh School of Law and Heinz College offer a joint-degree program designed to train students for careers in which management, public policy and law overlap. A successful partnership that has been in existence for over a decade, this program offers students a comprehensive education that marries the analytic and quantitative strength of the Heinz School with the rigorous legal training afforded by the School of Law. This joint degree offering is particularly beneficial to many students' careers since legal considerations

affect many public management and policy decisions, and the practice of law is enhanced by a clear understanding of public policy and management concerns. Participants of the program emerge with a broad knowledge of the fundamental intersections of law, government, policy analysis and management. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Curriculum & Requirements

Master's

Law - Foreign Law Graduates, LLM

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition, the U.S. legal system, and the global practice of law during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study common law legal tradition and the U.S. legal system from within the United States.

Degree Requirements

The LLM program is completed in one academic year from August to May, and students must complete a minimum of 24 credits to graduate. Part-time admission is considered on a case-by-case basis. The CILE Academic Director, Executive Director, and Program Administrator take an active role in personally counseling each LLM student on their course selections, helping you to plan a year of study that is uniquely tailored to your personal needs. Courses taken must include:

- LAW 5076 - LEGAL ANALYSIS AND WRITING
- LAW 5386 - FOUNDATIONS OF LEGAL RESEARCH
- LAW 5820 - LL.M COLLOQUIUM
  Writing Requirement - Choose one of the following:
- LAW 5902 - INDEPENDENT STUDY
  or a Seminar Course (Usually 3 credits-various courses are offered each semester). In seminars, the class will meet once a week for two hours with the guidance of a faculty member. The students will conduct research on the seminar topic and prepare drafts

of their paper throughout the semester. Each student will present their paper in class and submit a final paper at the end of the semester.

- LAW 5977 - INTRODUCTION TO AMERICAN LAW

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 24

Law - Foreign Law Graduates, LLM - Hybrid

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition, the U.S. legal system, and the global practice of law during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study common law legal tradition and the U.S. legal system from within the United States.

Degree Requirements

A Virtual to In-Person LLM option can be completed by students in as little as a year and a half. A student will complete the LLM requirements by doing a one-year Online Certificate Program in International Business Law, and after the completion of the certificate program, the student will be required to spend the Fall semester doing coursework on campus.

Courses taken must include:

- LAW 5820 - LL.M COLLOQUIUM
- LAW 5977 - INTRODUCTION TO AMERICAN LAW

Online Certificate Program Courses

Students must complete the International Business Law 15-credit online graduate certificate.

International Business Law

- LAW 2001 - INTRODUCTION TO US & INTERNATIONAL BUSINESS LAW
- LAW 2002 - COMMERCIAL ASPECTS OF CROSS-BORDER TRANSACTIONS
- LAW 2003 - SPECIALTY AREAS IN CROSS-BORDER TRANSACTIONS
- LAW 2004 - FOUNDATIONS OF INTERNATIONAL DISPUTE RESOLUTION & LITIGATION
- LAW 2005 - SPECIAL TOPICS IN INTERNATIONAL OR DISPUTE RESOLUTION

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Total Credits: 24

Law - Professional Master of Studies in Law - Online Option

The Professional Master of Studies in Law ("MSL") at the University of Pittsburgh School of Law is a 30-credit online advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree.

Professional Master's students gain essential, specialized knowledge of laws and legal systems. Law is a pervasive influence on almost all aspects of life across the globe, but higher education often ill-prepares students and professionals for navigating laws and legal dynamics in business and life. The degree addresses this critical knowledge gap.

Pitt Law commands one of the oldest and most established Professional Master of Studies in Law programs in the country. The degree is now online. The Online MSL program is a popular and fast-growing program, providing efficiency, flexibility, and affordability. Students can earn their master's degree in two calendar years in a flexible part-time schedule.

The 15-credit Online MSL series of core courses consists of 7 short courses of between 5 and 8 weeks in length. Online students take one course at a time along with their starting cohort. The courses are designed as an asynchronous learning opportunity, so students work largely at their own pace, week by week. Course materials are created specifically for professional master's students. All courses are carefully designed to combine essential legal and policy content with practice in applying that content in the workplace.

Professors guide students through the core course series, provide personalized feedback to students, offer a weekly optional synchronous session, and are available for online, one-on-one meetings and review sessions.

International students are welcome and encouraged to apply. They must have completed the equivalent of a U.S. bachelor's degree, and they must submit a TOEFL, IELTS, or Duolingo score. International students are encouraged to apply as early as possible because of the greater amount of time needed to process their application.

Degree Requirements

Applicants must have completed at least an undergraduate bachelor's degree. Applicants need to provide official transcripts of all college, graduate, and professional studies, whether a degree was obtained or not. No standardized test is required.

Curriculum

Students must complete 30 course credits of School of Law coursework to receive the MSL degree. Students are required to take the entire Online MSL 15-credit core course series, which includes:

- LAW 2008 and 2009 - Constitutional Law (I & Ii)
- LAW 2017 - Torts
- LAW 2016 - Property
- LAW 2018 - Criminal Law
- LAW 2019 - Legislation & Regulation
- LAW 2021 - American Legal System
- LAW 2022 - Contracts

Students can then complete the master's degree entirely online by taking 15 additional credits through one of our online specializations. These specializations include Healthcare Compliance, Human Resources, Law, Corporate Compliance, International Business Law, and Sports, Arts and Entertainment Law. A Business Law specialization is expected to be added in Fall 2027. Students who successfully complete the MSL core courses and a specialization will earn a master's degree plus a certificate in their specialization.

Students can then complete the master's degree entirely online by taking 15 additional credits through one of our online specializations. Total Credits: 30

Micro-Credential

Law - Cyber Law and IT, Micro-Credential - LLM Program

The Micro-credential in Cyber and IT Law will focus on subjects relating to the regulation of technology and cyberspace, privacy law, and intellectual property. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Cyber Law:

Classes focusing on cyber law, including, for example, Cybersecurity, Privacy, and Democracy, Cyber Law and Policy Seminar, Cyberspace and the Law, or similar courses approved by the CILE Director.

IT Law:

Courses focusing on IT Law, including, for example, Information Privacy Law and Practice, Commercializing New Technologies, Technology, Law, and Leadership, Intellectual Property, Technology and Employment Law, Applied Legal Analytics and AI, or similar courses approved by the CILE Director.

Law - Energy and Environmental Law, Micro-Credential - LLM Program

The Micro-credential in Energy and Environmental Law will focus on subjects relating to energy regulation and environmental policy. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Energy Law:

Energy Law and Regulation, Climate Change and the Law, or similar courses approved by the CILE Director.

Environmental Law:

Environmental Law, Environmental Law, Policy, and Politics, Environmental Justice Law Seminar, Environmental Policy & Practice, Land Use, or similar courses approved by the CILE Director.

Law - Health Care Law and Regulation, Micro-Credential - LLM Program

This program requires a minimum of nine credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School. Credits taken in this micro-credential will also count toward the student's general LL.M. degree.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses drawn from each of the following 2 rubrics:

The Landscape of US Health Care Law:

Current Issues in Health Law, Health Law & Policy, or an equivalent course approved by the CILE Director if neither is offered during a student's time in residence.

US Health Law Issues Encountered by Foreign Counsel:

Health Care Business Transactions, Biotechnology Law, Law of Disability Discrimination, or similar courses approved by the CILE Director.

Law - Human Rights Law, Micro-Credential - LLM Program

The Micro-credential in Human Rights Law will focus on subjects relating to the protection of human rights under domestic and international law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, out of the following list of courses: Philosophy of Crime and Punishment - National and International Perspective, Legal Institutions and the Holocaust, Conflict of Laws, International Human Rights Law, International Law, Law of Slavery, Abolition & Freedom Seminar, Federal Hate Crimes, Islamic Law and Jurisprudence Seminar, or similar courses approved by the CILE Director.

Law - Intellectual Property Law, Micro-Credential - LLM Program

The Micro-credential in Intellectual Property Law will focus on subjects relating to technology policy, patent, trademark, and copyright law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, out of the following list of courses: Foundations of Intellectual Property Law Seminar, Commercializing New Technologies, Technology, Law, and Leadership,

Foundations of Intellectual Property Seminar, Copyright Law, Patent Law Practice, Trademark Law, or similar courses approved by the CILE Director.

Law - International Arbitration, Micro-Credential - LLM Program

The micro-credential in International Arbitration will focus on subjects relating to the settlement of disputes outside of national courts and before arbitral fora, and will include specific courses on how to structure international transactions to prepare for arbitration, the practice and theory of international arbitration, and substantive international law related to state-to-state and investor-state arbitration. Credits taken in this micro-credential will also count toward the student's general LL.M. degree.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses drawn from each of the following two rubrics as well as an internship/externship:

Commercial Law:

International Business Transactions or, if not offered in a given term, another course approved by the CILE Director that provides a comparable introduction to commercial and business law.

Dispute Resolution:

International Arbitration Seminar, The Practice of International Litigation and Arbitration, or another course approved by the CILE Director that provides a comparable introduction to one or more forms of alternative dispute resolution.

International Law

Public International Law or, if not offered in a given term, or another course approved by the CILE Executive Director that provide a comparable introduction to commercial and business law.

Internship/Externship:

The completion of a topical externship for credit as approved by the CILE Director.

Law - International Commercial Law and Dispute Resolution, Micro-Credential - LLM Program

This program requires a minimum of nine credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses from each of the following two rubrics:

Commercial Law:

International Business Transactions or, if not offered in a given term, another course approved by the CILE Director that provides a comparable introduction to commercial and business law.

Dispute Resolution:

International Commercial Arbitration, the practice of International Litigation and Arbitration, or, if not offered in a given term, another course approved by the CILE Director that provides a comparable introduction to one or more forms of alternative dispute resolution.

Law - Tax Law, Micro-Credential - LLM Program

The Micro-credential in Tax Law will focus on subjects relating to personal and corporate, domestic and international tax law. Credits taken in this micro-credential will also count toward the student's general LL.M. degree. 9 required credits for the micro-credential.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, out of the following list of courses: Corporate Taxation, Federal Income Taxation, Low-Income Tax Clinic, Nonprofit Exempt Organizations, Pittsburgh Tax-Review, State and Local Tax, Estate and Gift Tax, Partnership Tax, International Tax, or similar courses approved by the CILE Director.

Law - U.S. Business and Entrepreneurial Law, Micro-Credential - LLM Program

This program requires a minimum of nine credit hours of coursework chosen from a menu of courses currently offered on a regular basis by the School.

Curriculum:

Completion of this micro-credential requires that students take at least nine credit hours, with a grade of C or higher, in courses of which at least one is drawn from each of the following two rubrics:

Commercial Relations:

Courses focusing on the contractual relations of business entities, including, for example, Contracts, Commercial Transactions in Goods, Secured Transactions, International Business Transactions, or similar courses approved by the CILE Director.

Structures of Business:

Courses focusing on the law of business entities and their ownership, including, for example, Business Organizations, Agency & Partnership, Securities Regulation, or similar courses approved by the CILE Director.

Professional

Law - Juris Doctor (JD)

Pitt Law offers the Juris Doctor (JD) degree as well as several joint degree programs with other Pitt schools that lead to both a JD and a second master's degree.

In all of these programs, Pitt Law's essential mission is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment.

The program's first-year curriculum offers a solid foundation in legal analysis and reasoning through courses in subject areas traditionally viewed as basic for legal education.

Pitt Law JD students enjoy a large degree of latitude in designing courses of study that meet their individual goals and interests, with only a handful of graduation requirements beyond the first year.

Pitt Law offers particularly rich opportunities in:

- **International Law**, featuring prominent international/comparative law faculty, a rich international and comparative law curriculum, several courses each year taught by visiting foreign law professors, internships abroad, internationally focused scholarships and fellowships, Languages for Lawyers courses, strong University programs (including area studies certificate programs), and international moot law competitions.
- **"Live-Client" Clinics** in a range of substantive areas and practice settings, giving students opportunities to develop valuable lawyering skills in the context of real-life, not simulated, legal disputes and transactions. Students grapple with legal, ethical, and practical issues under the supervision of - and in close counsel with - a seasoned attorney faculty member.
- **The Semester in D.C. Program**, during which students spend a semester in Washington, D.C., earning a full semester's worth of academic credit while working full-time as an extern with a non-profit organization or government agency.
- **Seven Juris Doctor Specializations** enabling students to concentrate their studies in particular areas of law. These programs include specialized advanced courses that incorporate lawyering skills relevant to particular areas of practice.
- **Joint Degrees** Pitt Law students may take courses in other schools at Pitt or other local colleges and universities (up to six non-law graduate credits can be used toward the JD requirements).

Some Pitt Law courses incorporate multiple disciplines, such as Law & Economics Seminar, or are jointly taught by law faculty and faculty from other disciplines to classes comprising both law and other graduate/professional students.

Pitt Law joint degree programs enable students to earn the JD as well as a master's degree in another discipline through an integrated program, more quickly than earning the two degrees separately.

Degree Requirements

Admission applications for the Pitt Law JD program will be accepted starting September 1 through our deadline of May 1. Applications are considered only for the current year for the fall semester. We require all applicants to submit their applications online through the Law School Admission Council (LSAC). Pitt Law is highly competitive, and decisions are based upon many factors. Once your application is complete, our Admissions Committee will review your application. Once we are able to make a decision, you will be notified by email. You can also verify your application status with LSAC's online application status checker. We ask for your patience during the admissions cycle, as it can become very busy during key times of the year.

Application Requirements:

- Applicants must submit a $65 application fee
- Applicants must have completed a bachelor's degree from a regionally accredited college or university in the United States before the first day of law school.
- In cases where an applicant has completed studies outside the United States, the requirement is education deemed by the University of Pittsburgh to be comparable to a bachelor's degree from a regionally accredited college or university in the United States. Click here for more information
- When evaluating an undergraduate degree, the committee pays careful attention to the strength of the major field of study, as evidenced by the courses listed on the undergraduate transcript. Pitt Law is looking for applicants who have demonstrated the discipline and ability to handle a rigorous and demanding program. The admissions committee carefully evaluates graduate work and professional experience, although it utilizes the undergraduate GPA.

- Applicants are required to register with the Credential Assembly Service (CAS) through LSAC and must take the LSAT, JD-Next, or the GRE. If an applicant takes the LSAT more than once, the highest score is considered by the admissions committee when making a decision. The latest test score that will be considered for entrance is the score from the previous February examination. Scores from tests taken more than four years prior to the current admissions year will not be considered. More information can be obtained from the Law School Admission Council (LSAC).
- A required personal statement gives the committee a view into the non-academic world of the applicant and serves as the interview. This is critical in our ability to enroll a diverse class. We ask that you keep your personal statement to no more than two pages, typed, double-spaced.
- Letters of recommendation play an equally important role in this process, as they can reveal the strengths of the applicant's academic achievements. The Admissions Committee requires one letter of recommendation, but will accept up to three letters of recommendation. Academic letters of recommendation are strongly preferred for those students who are currently in school or have graduated within the past three years. Letters should be submitted through the LSAC letter of recommendation service.
- We encourage applicants to submit a Resume, as they highlight for the admissions committee a broader view of their achievements.
- In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

In order to graduate, a student pursuing a JD must complete 88 credits, including the following:

- A prescribed first-year curriculum, as follows: Contracts, Criminal Law, Legislation and Regulation, Torts, Civil Procedure, Constitutional Law, Property, and Legal Analysis and Writing, Foundations of Legal Research as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the Pitt Law Academy speaker series
- The upper-level writing requirement
- A course in Legal Profession
- Six credits in a course designated as satisfying the professional skills requirement
- The one-credit Foundations of Legal Research course
- A course designated as satisfying the international/comparative law requirement
- A course designated as satisfying the writing ("W") requirement

Academic requirements are described in the Academic Policies and Procedures and Graduation sections of the School of Law's website.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

First-Year Curriculum

The first-year curriculum is comprised of the following required courses, as well as attendance at a minimum of five programs in the **Pitt Law Academy**:

Fall:

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5028 - TORTS

School of Medicine

School of Medicine

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to his or her fullest potential.

School of Medicine Faculty

Certificate

Clinical Translational Sciences Certificate

Clinical Translational Sciences Certificate

This certificate program in Clinical Translational Sciences provides students within MS or PhD programs in the health sciences the opportunity to develop expertise in conducting clinical and translational research. Though the majority of courses are in person, the certificate is considered hybrid because one course is offered online only. The core curriculum provides trainees with the basic set of skills that are required by clinical and translational investigators in all fields of interest. It is made up of 2 curricular cores: the first is the Research Core, which consists of 8 credits of courses in computer methods, clinical research methods and biostatistics. The second is a Regression and Ethics Core, which includes 3 credits of courses in Regression and ANOVA, Logistical Regression and Ethics in research. Combined with the mentorship from their graduate programs, this certificate provides added expertise and develops students' ability to conduct clinical and translational reserach.

Detailed Admissions Requirements

Students must first be admitted into a doctoral or masters degree granting program in one of the Schools of the Health Sciences prior to their acceptance into the clinical translational sciences graduate certificate program. Once admitted for graduate study within a program, students may apply to the Institute for Clinical Research Education for admission to the certificate program. Students must be in good academic standing and possess a strong interest in clinical and translational science

Contact Information

Institute for Clinical Research Education
200 Meyran Ave, Suite 300
Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672

Email: icre@pitt.edu

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates must be in a graduate program (PhD or MS) in the health sciences
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical and translational research as a major focus of their career plan.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE scores are not accepted

Timeline

The Certificate in Clinical Translational Sciences accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Clinical Translation Sciences Certificate - Course Curriculum

Research Core (8 Credits)

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS

*CLRES 2020 (Biostatistics) may be substituted for an alternative graduate level biostatistics course up to 6 credits

Regression & Ethics Core (3 Credits)

- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Total Credits: 11

Doctoral

Cell, Molecular and Systems Biology

Cell, Molecular and Systems Biology

The Cell, Molecular and Systems Biology (CMSB) Program

The proposed CMSB program brings together faculty in basic and translational sciences, including researchers from the University of Pittsburgh School of Medicine (Departments of Cell, Microbiology and Molecular Genetics, Magee-Womens Research Institute, Aging Institute, Rangos Research Center at the Children's Hospital of Pittsburgh, and the University of Pittsburgh Cancer Center (e.g., Cancer Virology Program).

CMSB will be an innovative program in graduate education that aims to train highly motivated PhD students as self-reliant scholars in an environment with ready access to the breadth of expertise, approaches, and sub-disciplines that constitute the diverse fields of molecular, cellular and systems biology. This unique program will rapidly immerse students into a research environment that will train them to become independent and creative scientists.

I. Key features of the CMSB include:

- Providing didactic, lecture-based instruction in fundamental and contemporary aspects of systems and computational biology, structural biology, molecular biology, cell biology and cellular signaling.
- Reinforcement of formal didactic teaching with small group discussions led by faculty experts through workshops that are in place in the Foundations of Biomedical Science course.
- Providing courses with cohesive themes to facilitate students' interest in the material, promoting gradual conceptual progression in the classroom with laboratory-based skill building that includes computational approaches.
- Engaging students early in research in core competencies of mentors' laboratories with emphasis on multidisciplinary approaches to important research questions.

II. Faculty research interests in the proposed CMSB can be broadly divided into the following areas:

Aging

Cell Biology

Developmental Biology

Evolution

Genetics

Molecular Physiology

Stem Cell and Regenerative Biology

Quantitative Systems Pharmacology

Reproductive Biology

Systems Biology

Admissions and Recruiting. The current structure of the IBGP and ISB will serve as the admissions process for the CMSB program. A program admissions committee will be convened annually to review student applications to the program, schedule interviews, and make recommendations to the dean of graduate studies regarding admission. A committee with nine voting members (including a chair) will be established. It is anticipated that the makeup of this program will include at least three faculty from the prior graduate programs, CBMP, MGDB, and ISB.

First-year curriculum and time to candidacy. First-year students admitted into the CMSB program will be enrolled in Foundations of Biomedical Sciences and Bioinformatics (Introduction using Python) courses.

Impact on trainee education and preparedness. The CMSB program will significantly improve the training of graduate students with the fundamental molecular underpinnings of modern biomedical science combined with systems biology. This training will provide opportunities to engage in computational analyses and interpret large datasets. This core skill is increasingly crucial for future success as a post-graduate scientist. We will accomplish this in many ways, but will highlight a few of these below:

Training in fundamental principles of biomedical science: The fundamental molecular biology principles underpinning biomedical research are essential core knowledge for CBMP, MGDB, and ISB students and lay the foundations for more specialized training in individual research disciplines. This will be accomplished in the combined CMSB program through students' participation in Foundations of Biomedical Science course. Currently, ISB students do not participate in a foundational course outlying these fundamental molecular principles at the beginning of their training.

Training in Computational and Systems Biology: The application of both these disciplines has in the past decade been important in the discovery of new concepts in biomedical research. The application of big data analyses has offered new insights and methods for understanding important questions in biomedical research. This includes understanding cell and developmental biology, aging, reproductive biology and stem cell and regenerative medicine. We believe all scientists in these fields should have some exposure and training in Systems Biology and be familiar with programming languages such as R and Python. In the current IBGP, students who eventually track to the CBMP and MGDB program receive no instruction in computation in their first semester of the IBGP. Enrolling in a 3-credit course in Bioinformatics using Python and adding other computational courses as electives will provide a pathway for students to gain experience and knowledge in Systems Biology. Courses in Machine Learning, Systems Genomics, Proteomics, and Computational methods exist at Pitt but are not taken by MGDB and CBMP students in the IBGP.

Core CMSB Curriculum

- ISB 2020 - SYSTEMS BIOLOGY 1
- ISB 2035 - SYSTEMS BIOLOGY II
- ISB 2070 - THE BEDSIDE TO BENCH
- ISB 2080 - DIRECTED STUDY
- MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC
- MSCBMP 2870 - HISTOLOGY
- MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY
- MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS
- MSCBMP 2895 - CELLULAR PHYSIOLOGY OF THE KIDNEY

- MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE
- MSMGDB 2535 - MODEL ORGANISMS
- MSMGDB 3530 - GENOME INSTABILITY AND HUMAN DISEASE
- MSMGDB 3540 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS
- MSMGDB 3560 - MOLECULAR MECHANISMS OF LONGEVITY & AGING

CMSB Electives

- ISB 2020 - SYSTEMS BIOLOGY 1
- ISB 2035 - SYSTEMS BIOLOGY II
- ISB 2070 - THE BEDSIDE TO BENCH
- ISB 2080 - DIRECTED STUDY
- MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC
- MSCBMP 2870 - HISTOLOGY
- MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY

First Professional Program (MD)

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to their fullest potential.

UPSOM has a well-developed curricular infrastructure that combines a case-based curriculum with early and in-depth clinical experiences. The clinical years are characterized by an integrated clerkship structure and an emphasis on student flexibility. The UPSOM educational objectives, which are used to guide course content and learning objectives, underwent a school-wide review and update in 2023.

UPSOM introduced the Three Rivers Curriculum (3RC) in 2023. This is a case-based curriculum with more frequent assessment, greater integration across the curriculum, and enhanced coverage of priority areas of four key threads: clinical reasoning, interprofessional education, leadership, and social medicine. Students will also participate in other activities (which includes observation of and appropriate participation in patient care, community-site visits, experiences with standardized patients, high-fidelity simulations, patient conferences, laboratory exercises, and other activities). A longitudinal performance-based assessment program provides formative support as students hone their clinical skills.

The patient focus of the UPSOM curriculum begins on day one, in the Introduction to Being a Physician course. Students interview patients about their experience of illness and experiences with their physicians, to develop an understanding of their roles as medical professionals. Medical interviewing and physical examination courses follow, along with exercises examining the many facets of physician life-in society, ethical and legal settings, and at the patient bedside.

Throughout the Foundations phase, students apply their new skills in local practices and hospitals one afternoon per week.

The Keystone Fundamentals course runs through the fall of the first year and provides language and concepts that underlie the scientific basis of medical practice. Organ Systems block courses integrate physiology, pathophysiology, pharmacology, and introduction to medicine with concurrent courses in the Patient-Centered Care and Patient, Physician and Society blocks. Weekly discussions, patient interviews, and examination of patients reinforce essential clinical skills. In addition, three progress tests will both help students and their coaches track progress through curricular subjects and gauge Step 1 readiness.

There are a number of other learning activities students participate in during their time in the Three Rivers Curriculum. The Longitudinal Alliance Program is designed to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system. The Community Alliance Program is a uniquely innovative program that aims to partner with community organizations to engage students and faculty in communities of practice to address social and structural determinants of health. The Streams are a unique way students can do a deeper dive into select areas such as advocacy or innovation. Flex Weeks are dedicated time for independent learning and remediation, shadowing, research, and personal activities.

The third-year curriculum consists **of required clerkships (ten in Legacy and eight in 3RC)**. They are designed to optimize the balance between out-of-hospital and inpatient learning opportunities, eliminate unintentional curriculum redundancy, and optimize opportunities for student- designed curricula in the junior and senior years**. The third year begins with a one-week clinical focus course**. Every student engages in a mentored longitudinal research project conducted longitudinally throughout the four-year curriculum.

Completion and presentation of the longitudinal research project is due in the spring of the senior year and is a requirement for graduation. An innovative system of web-based learning portfolios facilitates learner-mentor communication and enriches the possibilities for collaboration within and beyond the University.

The information above details the school's MD program.

The MD Curriculum was modified in Spring 2023. Students enrolled in the Legacy curriculum will have until Fall 2031 to complete the previous program requirements. For more information on the legacy curriculum, please reference the First Professional Program, MD in the archived catalogs.

Requirements for Admission

Admission Process

The admissions process is described in great detail on the Office of Admissions and Financial Aid web site. The by-laws of the Admissions Committee specifically state the school's criteria for selecting students for admissions. The by-laws are reviewed and updated at the year-end business meeting of the UPSOM Admissions Committee.

Financial Aid

Financial aid for medical students is available in the form of scholarships, need-based grants, and loans (federal, private, and institutional resources). For maximum consideration of all resources, students should complete the CSS Profile and the Free Application for Federal Student Aid (FAFSA). These applications should include the student's information, spouse's information (if applicable), and both parents' information. Signed copies of federal tax returns (for student/spouse and parents) must be provided to the financial aid office. Aid is awarded on the basis of financial need, as determined from the financial aid applications and supporting documentation.

Newly admitted students should apply by March 1, or if admitted after February 15 no later than two weeks after acceptance, to ensure that an award letter is provided prior to the national decision date of April 15th.

Upperclassmen should provide all required information no later than March 1. The Free Application for Federal Student Aid (FAFSA) should be submitted prior to March 1 to ensure results are available prior to the deadline.

Students who do not wish to provide parental information are still considered for Federal Direct Unsubsidized loans, Federal Direct Graduate PLUS loans, and private loans; these students should complete the FAFSA and provide a signed copy of their federal tax return but do not have to submit parent information or the CSS Profile.

The financial aid process is described in detail on the Office of Financial Aid's website

Academic Standards

The University of Pittsburgh School of Medicine offers a centrally governed, integrated, interdisciplinary curriculum that emphasizes problem solving and self-directed learning. The academic year is in session between 10 and 12 months, depending on the level of study. Academic calendars specific to each year can be found on the Office of Medical Education's web site. The first three years is a set curriculum and the fourth year is a combination of both set and elective offerings. To be considered to be making satisfactory academic progress, the student must complete the first two years of the curriculum by the end of the third year after initial enrollment. The full text of the guidelines for student promotion can be found in the medical student handbook on the Office of Student Affairs web site. Students are governed by a Code of Professionalism, which seeks to support and sustain respect for each other as well as for patients. The full text of the Code can be found in the student handbook.

Grading

The UPSOM makes use of a 2-tiered grading system. The Foundations Phase of the curriculum are graded as Satisfactory/Unsatisfactory. In the second two years of the curriculum, all clinical rotations and most electives are graded using a five-tiered grading system, with narrative comments: Honors, , High Satisfactory, Satisfactory, Low Satisfactory, or Unsatisfactory.

Degree Requirements

To receive the MD degree, students must:

Successfully complete curricular requirements for each of the four years.

The Foundations Phase courses include: introduction to being a physician; keystone fundamentals; cardiology; nephrology; pulmonology; digestion and nutrition; rheumatology; dermatology; evidence, discovery, and reasoning; patient, physician and society;medical interviewing; physical examination, and introduction to clinical medicine 1.

Second year: Courses include: endocrinology; reproduction, sexual health, and gynecology; musculoskeletal; neuroscience, psychiatry; oncology; and introduction to clinical medicine 2.

Third year: **Rotations in inpatient medicine; family medicine; pediatrics; obstetrics and gynecology; neurology; psychiatry; surgery, anesthesiology; and outpatient medicine; emergency medicine; otolaryngology; and ophthalmology**. The third and fourth year schedule is viewed as a continuum and designed so students may enroll in clinical or research electives at any time during the third or fourth years.

Fourth year: An acting internship in either **internal medicine, pediatrics, family medicine, cardiothoracic surgery, physical medicine and rehabilitation, medical intensive care unit, NICU, or surgery;** four weeks of an integrated life science course of the student's selection; a boot camp; and seven to eight months of clinical and/or research elective experiences.

Pass the United States Medical Licensing Examination, both Steps 1 and 2 CK, as well as an internal clinical skills competency assessment.

Complete a Longitudinal Research Project and waiver training for buprenorphine prescribing.

Degree Options

In addition to the MD program, the UPSOM offers a structured MD/PhD dual degree program, an MD/MA in Bioethics, a certificate program in Clinical Research, and a five-year non-degree- granting program for physician-scientists. Students can also participate in a joint degree program with the School of Public Health, earning a MPH, MMPH, or MS degree. The school encourages and facilitates students completing other degree programs during the MD curriculum, such as a MBA or MPA. [Add MS in not graduating here].

Professional Enrichment Courses

Professional Enrichment Courses (PECs) provide increased opportunities for preclinical medical student exploration and growth. Examples of PECs include Medical Spanish, Culinary Medicine, Introduction to Ophthalmology, and Plastic Surgery. Students have the opportunity to enrollin PECs during their Flex Weeks or as longitudinal experiences.

Doctoral

First Professional Program, MD Curriculum

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to their fullest potential.

UPSOM has a well-developed curricular infrastructure that combines a case-based curriculum with early and in-depth clinical experiences. The clinical years are characterized by an integrated clerkship structure and an emphasis on student flexibility. The UPSOM educational objectives, which are used to guide course content and learning objectives, underwent a school-wide review and update in 2023.

UPSOM introduced the Three Rivers Curriculum (3RC) in 2023. This is a case-based curriculum with more frequent assessment, greater integration across the curriculum, and enhanced coverage of priority areas of four key threads: clinical reasoning, interprofessional education, leadership, and social medicine. Students will also participate in other activities (which includes observation of and appropriate participation in patient care, community-site visits, experiences with standardized patients, high-fidelity simulations, patient conferences, laboratory exercises, and other activities). A longitudinal clinical skills assessment program provides formative support as students hone these skills.

The patient focus of the UPSOM curriculum begins on day one, in the Purpose and Practice of Becoming a Physician course. Students interview patients about their experience of illness and experiences with their physicians to develop an understanding of their roles as medical professionals. Medical interviewing and physical examination courses follow, along with exercises examining the many facets of physician life-in society, ethical and legal settings, and at the patient bedside.

Throughout the Foundations phase, students apply their new skills in local practices and hospitals one afternoon per week.

The Keystone Fundamentals course runs through the fall of the first year and provides language and concepts that underlie the scientific basis of medical practice. Organ Systems block courses integrate physiology, pathophysiology, pharmacology, and introduction to medicine with concurrent courses in the Patient Centered Care; Evidence, Discovery, and Reasoning; and Patient, Physician and Society blocks. Weekly discussions, patient interviews, and examination of patients reinforce essential clinical skills. In addition, three progress tests will both help students and their coaches track progress through curricular subjects and gauge Step 1 readiness.

There are a number of other learning activities students participate in during their time in the Three Rivers Curriculum. The Longitudinal Alliance Program is designed to create meaningful relationships between patients and medical students to develop empathetic, compassionate physicians and increase awareness of what a patient goes through in today's health care system. The Streams are a unique way students can do a deeper dive into select areas such as advocacy or innovation. Professional Development Weeks are dedicated time for independent learning and remediation, shadowing, research, and personal activities.

The Clerkship Phase consists of eight required clerkships. They are designed to optimize the balance between out-of-hospital and inpatient learning opportunities, eliminate unintentional curriculum redundancy, and optimize opportunities for student-designed curricula in the third and fourth years. The Clerkship Phase begins with a two-week preclerkship course prior to clerkship rotations. The clerkship phase will also contain three Discovery Weeks that will offer student the ability to expand their knowledge in a variety of ways.

The Bridge phase consists of an acting internship, an integrated life science course, and a residency preparation boot camp. In addition, students have the opportunity to take electives throughout the clinical portion of the curriculum for further career development and exploration. There will also be two Discovery Weeks for students to take in the fourth-year curriculum (3RC)

Every student engages in a mentored longitudinal research project conducted longitudinally throughout the four-year curriculum. Completion and presentation of the longitudinal research project is due in the spring of the senior year and is a requirement for graduation. An innovative system of web-based learning portfolios facilitates learner-mentor communication and enriches the possibilities for collaboration within and beyond the University.

• Purpose and Practice of Becoming a Physician

• Keystone Fundamentals - MED 5102

• Patient, Physician, and Society 1 -MED 5103

• Medical Interviewing - MED 5104

• Evidence, Discovery, and Reasoning 1 - MED 5105

• Physical Examination - MED 5108

• Cardiology - MED 5109

• Nephrology - MED 5120

• Pulmonology - MED 5140

• Digestion & Nutrition - MED 5118

• Rheumatology - MED 5130

• Dermatology - MED 5136

• Patient, Physician, and Society 2 - MED 5125

• Evidence, Discovery, and Reasoning 2 - MED 5129

• Introduction to Clinical Medicine 1 - MED 5139

• Endocrinology - MED 5235

• Reproduction, Sexual Health, and Gynecology - MED 5237

• Musculoskeletal - MED 5239

• Neuroscience - MED 5241

• Psychiatry - MED 5242

• Oncology - MED 5243

• Introduction to Clinical Medicine 2 - MED 5246

• Patient, Physician, and Society 3 - MED 5244

• Longitudinal Alliance Program - MED 5106

• Community Alliance Program - MED 5107

• Longitudinal Research Project - MED 5134

- 6 Professional Development Weeks

Clerkship Phase

The Preclerkship Course is an introduction that is presented immediately prior to the start of the Clerkship Phase. It includes aspects of clinical, humanistic, and administrative preparation for clinical experiences.

Required clerkships form the core of this phase. The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. In addition, students may take up to 6 weeks of electives during this phase.

- Adult Inpatient Medicine
- Family Medicine
- Neurology
- Obstetrics and Gynecology
- Pediatric
- Psychiatry
- Surgery
- 3 Discovery Weeks

Bridges Phase

- Eight electives
- Adult Outpatient Medicine

- One acting internship
- Integrated Life Science
- One boot camp course
- Two recess/interview periods
- Acting Internship
- Two Discovery Weeks

An acting internship (sub-internship) of four-week duration is required during the senior year. An AI is a clinical rotation offered on an in-patient service in which one or more attending physicians have overall responsibility for coordinated patient care. The service will be structured with both attending staff and house staff.

The acting internship should include the assignment to the student of specific groups of patients upon whom they complete an initial history and physical examination, constructs a differential diagnosis, formulates a treatment plan, writes orders, and carries out necessary therapy, all under careful supervision.

Acting internships that fulfill this requirement are offered in:

- Family Medicine
- Internal Medicine
- Medical Intensive Care Unit
- NICU
- Pediatrics
- Physical Medicine and Rehabilitation
- Surgery

Search the Course Catalog for more information on Acting internships.

Acting internships in other departments or out of the city will not fulfill the AI requirement.

Integrated Life Science Course

One Integrated Life Science Course will take place in-person and will be offered to all students in February of year four.

Boot Camp

A Residency Boot Camp of four-week duration is required during the senior year.

Boot Camps that fulfill this requirement are offered in:

- Anesthesiology
- Emergency Medicine
- Internal Medicine

- Obstetrics, Gynecology, and Reproductive Sciences
- Pediatrics
- Psychiatry
- Surgery

Recommended Electives

In order to provide diversity, it is strongly recommended that you take at least one elective in each of the following blocks:

- Medicine or neurology
2. Pediatrics, pediatric neurology, pediatric pathology, pediatric surgery
3. Surgery or surgical subspecialties, obstetrics and gynecology
4. Ambulatory care, community medicine, or psychiatry.

Foundations Phase

• Introduction to Being a Physician - MED 5111

• Keystone Fundamentals - MED 5102

• Patient, Physician, and Society 1 -MED 5103

• Medical Interviewing - MED 5104

• Evidence, Discovery, and Reasoning 1 - MED 5105

• Physical Examination - MED 5108

• Cardiology - MED 5109

• Nephrology - MED 5120

• Pulmonology - MED 5140

• Digestion & Nutrition - MED 5118

• Rheumatology - MED 5130

• Dermatology - MED 5136

• Patient, Physician, and Society 2 - MED 5125

• Evidence, Discovery, and Reasoning 2 - MED 5129

• Introduction to Clinical Medicine 1 - MED 5139

• Endocrinology - MED 5235

• Reproduction, Sexual Health, and Gynecology - MED 5237

• Musculoskeletal - MED 5239

• Neuroscience - MED 5241

• Psychiatry - MED 5242

• Oncology - MED 5243

• Introduction to Clinical Medicine 2 - MED 5246

• Patient, Physician, and Society 3 - MED 5244

• Longitudinal Alliance Program - MED 5106

• Community Alliance Program - MED 5107

• Longitudinal Research Project - MED 5134

MS-3

The Preclerkship Course is an introduction that is presented immediately prior to the start of the third year. It includes aspects of clinical, humanistic, and administrative preparation for clinical experiences.

Required clerkships form the core of the combined clinical years (ten required in Legacy, eight required in Three Rivers Curriculum). The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. Together, the clerkships, and all other clinical experiences, share a fundamental set of objectives.

Overall, the objectives of the required clerkships are for students to be able to:

• Integrate basic science concepts with clinical reasoning.

• Establish and maintain appropriate therapeutic relationships with patients.

• Obtain a sensitive and thorough medical history.

• Perform a sensitive and accurate physical examination.

• Perform general clinical procedures.

• Participate in discussions and decision-making with patients and families.

• Clearly communicate medical information in spoken and written form.

• Develop knowledge, skills, and attitudes to practice the basic principles of prevention.

• Demonstrate sound clinical reasoning.

• Appropriately assess patients with common signs and symptoms.

• Appropriately use testing to guide diagnostic and therapeutic decisions.

• Diagnose and demonstrate basic understanding of common diseases and conditions.

• Describe therapeutic options and participate in the care of patients with common problems.

• Recognize acute life-threatening medical problems and initiate care.

• Develop the knowledge and exhibit the skills necessary to assist in the management of chronic diseases.

• Participate in care in a variety of settings.

• Develop the knowledge, skills and attitudes necessary to provide culturally competent care.

• Recognize and develop approaches to mitigate bias, social inequities, and systemic racism that undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.t undermine health and create challenges to achieving health equity at individual, organizational, and societal levels undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.

• Use information and educational technology to facilitate research, education and patient care.

• Incorporate ethical and legal principles in clinical practice and research.

• Demonstrate professional behaviors.

• Work effectively with others as a member or leader of a health care team or other professional group.

• Develop an understanding of the impact of nonmedical determinants of health on health outcomes and health equity.

Clerkships

- Adult Inpatient Medicine
- Adult Outpatient Medicine
- Anesthesiology (Required in third year for Legacy only)Family Medicine
- Neurology
- Obstetrics and Gynecology
- Pediatric Medicine
- Psychiatry
- Specialty Care (Legacy only)
- Surgery

Clinical Clerkships

Ten required clerkships form the core of the combined clinical years. The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. Together, the clerkships, and all other clinical experiences, share a fundamental set of objectives.

Overall, the objectives of the required clerkships are for students to be able to:

• Integrate basic science concepts with clinical reasoning.

• Establish and maintain appropriate therapeutic relationships with patients.

• Obtain a sensitive and thorough medical history.

• Perform a sensitive and accurate physical examination.

• Perform general clinical procedures.

• Participate in discussions and decision-making with patients and families.

• Clearly communicate medical information in spoken and written form.

• Develop knowledge, skills, and attitudes to practice the basic principles of prevention.

• Demonstrate sound clinical reasoning.

• Appropriately assess patients with common signs and symptoms.

• Appropriately use testing to guide diagnostic and therapeutic decisions.

• Diagnose and demonstrate basic understanding of common diseases and conditions.

• Describe therapeutic options and participate in the care of patients with common problems.

• Recognize acute life-threatening medical problems and initiate care.

• Develop the knowledge and exhibit the skills necessary to assist in the management of chronic diseases.

• Participate in care in a variety of settings.

• Develop the knowledge, skills and attitudes necessary to provide culturally competent care.

• Recognize and develop approaches to mitigate bias, social inequities, and systemic racism that undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.t undermine health and create challenges to achieving health equity at individual, organizational, and societal levels undermine health and create challenges to achieving health equity at individual, organizational, and societal levels.

• Use information and educational technology to facilitate research, education and patient care.

• Incorporate ethical and legal principles in clinical practice and research.

• Demonstrate professional behaviors.

• Work effectively with others as a member or leader of a health care team or other professional group.

• Develop an understanding of the impact of nonmedical determinants of health on health outcomes and health equity.

MS-4

General Schedule for Fourth Year

Clerkship Period	1	2	3	4	5	6	7	8	9	10	11	12	12.5
Length (in Weeks)	4	4	4	4	4	4	4	4	4	4	4	4	4

During the combined clinical years (MS-3 & MS-4) students rotate through required clerkships in any sequence. Additional requirements are 1 Acting Internship, 1 Integrated Life Sciences Selective, 1 Boot Camp Selective, and 8 electives.

What do the 12.5 Periods in the MS-4 year include?

- Eight electives
- One acting internship
- One integrated life science course
- One boot camp course

- Two recess/interview periods
- One recess week in the fall

Acting Internship

An acting internship (sub-internship) of four-week duration is required during the senior year. An AI is a clinical rotation offered on an in-patient service in which one or more attending physicians have overall responsibility for coordinated patient care. The service will be structured with both attending staff and house staff.

The acting internship should include the assignment to the student of specific groups of patients upon whom he or she completes an initial history and physical examination, constructs a differential diagnosis, formulates a treatment plan, writes orders, and carries out necessary therapy, all under careful supervision.

Acting internships that fulfill this requirement are offered in:

- Cardiothoracic Surgery
- Family medicine
- Internal Medicine
- Medical Intensive Care Unit
- NICU
- Pediatric
- Physical Medicine and Rehabilitation
- Surgery

Search the Course Catalog for more information on Acting internships.

Acting internships in other departments or out of the city will not fulfill the AI requirement.

Integrated Life Science Course

The fourth year Integrated Life Science (ILS) Program includes a choice of courses that revisit some aspect of basic science after students have had several years of clinical experience. Because of the level of sophistication that students have developed by this stage in their medical education, they can better understand the relevance of basic science to clinical problems. Each student is required to complete one ILS course.

ILS Courses

- Changing Science, Changing Society: A Guide to 21st Century Medicine - MSELCT 5700
- Clinical Pharmacology - MED 5710
- Immunization, Immune Deficiency, and Inflammation in Kids - PEDS 5710
- Infectious Disease in Obstetrics, Gynecology and Reproductive Medicine - OBGYN 5725
- Neoplasia and Neoplastic Disease - MED 5715
- Neurosurgery and Head and Neck Dissection - NSURG 5705
- Science of Resuscitation - EMED 5735

Boot Camp

A Residency Boot Camp of four-week duration is required during the senior year.

Boot Camps that fulfill this requirement are offered in:

- Anesthesiology

- Emergency Medicine
- Internal Medicine
- Obstetrics, Gynecology, and Reproductive Sciences
- Pediatrics
- Psychiatry
- Surgery

Recommended Electives

In order to provide diversity, it is strongly recommended that you take at least one elective in each of the following blocks:

1. Medicine or neurology
2. Pediatrics, pediatric neurology, pediatric pathology, pediatric surgery
3. Surgery or surgical subspecialties, obstetrics and gynecology
4. Ambulatory care, community medicine, or psychiatry.

Clinical Competency Assessment (CCA)

- Clinical Competency Assessment Orientation Handbook

Joint Degree

Bioethics, MD/MA

Students enrolled in the University of Pittsburgh School of Medicine may elect to earn the Master of Arts in Bioethics in conjunction with their medical degree. This allows the 30 credit MA degree to be earned in an accelerated program, taking a year away from the MD program, usually between the second and third years of medical school. During this one year, the student will follow the Dietrich School of Arts and Sciences calendar for the fall and spring terms, pay tuition at the in-state tuition rate set for Dietrich School graduate students, and must adhere to the rules, regulations, policies, and procedures of the Dietrich School. Applicants must complete the on-line application and provide official transcripts from their undergraduate and graduate studies, 3 letters of recommendation, a personal statement, and writing sample. Inquires about the MD/MA program, the MA curriculum, and the Center for Bioethics & Health Law, which runs the Bioethics Program may be directed to bioethics@pitt.edu.

Core Course Requirements

The following courses are required for the degree:

- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS
- BIOETH 2664 - BIOETHICS

OR

- LAW 5464 - BIOETHICS AND LAW

Clinical Practica

The following courses are required for the degree:

- BIOETH 2604 - CLINICAL PRACTICUM 1

Thesis Research

Students must complete a research project and write a thesis under the supervision of and advisor, and defend it before a committee. Students may register for up to 6 course credits related to their thesis research.

Restrictive Electives

Students choose one elective from a list of "restricted elective" courses. Courses placed on this pursue ethical issues related to a particular area in substantial depth, than or employ a particular disciplinary perspective to explore issues in medicine and research. In recent years, restricted electives have included:

- Ethics and Aging
- Gender, Ethics, and the Body
- Medical Anthropology
- Medical Sociology
- Mental Health Law
- New Reproductive Practices and Law
- Philosophy of Psychiatry
- Public Health Law and Ethics
- Special Topics in Bioethics

Electives

The remaining credits may be taken in electives approved by the program director. Students work with the program director and their thesis advisor to pursue their particular interests. Students may take a Special Topics in Bioethics or Directed Reading in Bioethics course, or may identify relevant elective courses from various departments and schools of the University, including:

- Anthropology
- Communication
- Cultural Studies
- English
- Film Studies
- Gender, Sexuality, and Women's Studies
- History and Philosophy of Science
- Law

- Philosophy
- Psychology
- Public Health
- Sociology
- Women's Studies

In addition, through the Pittsburgh Council on Higher Education, full-time students may take courses at consortium-affiliated institutions, including including Carnegie Mellon University.

Core Course Requirements

The following courses are required for the degree:

- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS
- BIOETH 2664 - BIOETHICS

Clinical Science Training Program, MD/MS

The Clinical Scientist Training Program (CSTP) offers clinical research training and scholarships to University of Pittsburgh medical students who are committed to careers in clinical investigation. Students may complete the dual MD/MS in clinical research or the MD/Certificate in clinical research.

The CSTP involves a research year between third and fourth year of medical school, typically scheduled July 1 - June 30. We expect students to take their research year after completing their core clerkships in the third year of medical school in order to ensure that their research will be informed by their clinical knowledge. The research year includes:

- Formal coursework: Students complete the ICRE core curriculum (11 credits). Those completing the MD/Certificate complete 7 additional elective credits. Those completing the dual MD/MS program complete 6 units of thesis research and 10 additional track-specific required and elective credits.
- Mentored clinical research: Students complete a mentored clinical research project with their SP mentor.
- Financial support: During the research year, students receive a living stipend, health insurance, and travel funds. Additionally, they receive a full tuition scholarship for the cost of the Certificate. The cost of the additional credits for the MS are the student's responsibility to pay. Students who successfully complete their research year objectives additionally receive a substantial tuition scholarship toward the fourth year of medical school upon returning from the research year.

For more information, contact us.

For more information, contact us.

Core Curriculum

All CSTP students complete the core curriculum during the CSTP research year.

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
- CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH
- CLRES 2075 - SEMINAR FOR UNDERSTANDING PRINCIPLES AND PRACTICES OF RESEARCH TECHNIQUES (SUPPORT)
- MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)

or

- NROSCI 2014 - SPEAKING OF SCIENCE

MD/Certificate

Students completing the dual MD/Certificate register for 18 units during their CSTP research year (9 units in Summer, 4.5 units in Fall, and 4.5 units in Spring). These credits include the 11-credit core curriculum and 7 credits of elective credits.

MD/MS

Students completing the dual MD/MS degree receive 3 credits from pre-clinical courses in the MD curriculum MED 5180, MED 5181, & MED 5265) toward the 30-credit MS degree. Students register for the remaining 27 credits during their CSTP research year (9 credits in Summer, 6 credits in Fall, and 6 credits in Spring) and after returning to medical school.

Core Curriculum

All CSTP students complete the core curriculum during the CSTP research year.

MD/MS

Students completing the dual MD/MS degree receive 3 credits from pre-clinical courses in the MD curriculum MED 5180, MED 5181, & MED 5265) toward the 30-credit MS degree. Students register for the remaining 27 credits during their CSTP research year (9 credits in Summer, 6 credits in Fall, and 6 credits in Spring) and after returning to medical school.

Law and Bioethics, JD/MA

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics.
The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students participate in rounds with residents, physicians, and other healthcare professionals, attend twice-weekly seminars, and observe ethics consultations and clinical ethics teaching sessions.

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs. For a list of law school courses considered to be appropriate for students in this joint degree program, consult the courses listed as electives for the Health Law Certificate Program.

Advising

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

Credits

Students enrolled in the joint degree program accomplish this in three to four years. The degree requires 99 credits and includes 34 credits of specifically prescribed law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy the requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Joint degree students must be coded by the University Registrar as "primary law" for at least five semesters. During these semesters, they pay tuition at the Law School rate and enroll in at least 10 credits of law school courses.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Program Overview

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Greer Donley, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

Credits

Students enrolled in the joint degree program accomplish this in three to four years. The degree requires 99 credits and includes 34 credits of specifically prescribed law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy the requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Joint degree students must be coded by the University Registrar as "primary law" for at least five semesters. During these semesters, they pay tuition at the Law School rate and enroll in at least 10 credits of law school courses.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Medical Scientist Training Program, MD/PhD

The Medical Scientist Training Program (MSTP) offers exceptionally talented individuals the opportunity to undertake a physician-scientist training program tailored to their specific research interests. Our primary directive is to create future biomedical investigators by providing the highest quality graduate medical training. This program offers a range of special services and opportunities to facilitate the completion of a dual degree (MD/PhD). In addition to efficiency, the close integration of clinical and basic science training better reflects the future careers of biomedical scientists. Information regarding the application process can be found on the MSTP web site.

Admissions Process: Prospective students must apply individually to the University of Pittsburgh School of Medicine through the American Medical College Application Service (AMCAS) and complete the MSTP online application. The criteria for acceptance to the MSTP include an outstanding academic record and letters of recommendation, positive personal interviews, and significant prior research experience. Admission to the MSTP is competitive, as is admission to graduate school, with students applying to the PhD programs of their choice after the first year of medical school.

Every year the program receives approximately 600 applications for a maximum of 15 available positions. The application review committee screens each completed application and well-qualified applicants are invited for an interview in Pittsburgh. Students recently enrolled in the MSTP have an average undergraduate GPA of 3.78 (This is for general assessment purposes only; applications are considered holistically.) We also review the letters of recommendation that are submitted to the medical school as part of candidates' School of Medicine application. Please be sure to include two letters of recommendation from faculty and/or scientists who are conversant with your research training. Previous research experience and commitment to a career as a physician-scientist are crucial in the evaluation of applications. Please convey your anticipated research interests and plans as well as past work. Additionally, a bachelor's degree or equivalent must be completed prior to matriculating.

1. MSTP Application Deadline: Applicants must submit an initial application through AMCAS by October 1. In order to be considered for the MSTP, your MD application along with the supplemental application for Pitt-CMU MSTP and all supporting documents, including letters of recommendation, are due no later than 11:59 PM on **OCTOBER 15.** We do not grant application deadline extensions. Early applications is strongly encouraged, as interview offers are made on a rolling basis. Our MSTP admits only U.S. citizens and U.S. permanent residents; international students are ineligible for the MSTP.
2. Acceptances: We accept students on a rolling basis; therefore, it is very important to complete the application, including recommendation letters, as early as possible. Applicants must complete their MD secondary application as soon as possible. Starting October 17, those who were chosen for interviews will be informed of their acceptance status to our program within roughly three weeks of their interview date. Applicants are ranked and notified of the following action:
    1. Acceptance into MSTP with full funding for all years of medical school and graduate school (including tuition and stipend)
    2. Wait-listed for acceptance into MSTP with funding
    3. Not accepted into MSTP

A second group of students is placed on the wait list that is considered depending on spots available after admitted student decisions. The University of Pittsburgh MSTP also accepts a small number of matriculated second-year medical students into the dual-degree program based upon their outstanding performance and developing interest in research pursuits during their medical school experience. Once admitted to the program, we do not accept any transfer credits from undergraduate or graduate courses to fulfill the MSTP course requirements.

The University of Pittsburgh and Carnegie Mellon University MSTP recognizes that our training environment is positively enriched by trainees with diverse backgrounds and needs. Our program considers all eligible applicants and does not discriminate on the basis of race, color, sex, veteran status, disability, national origin, creed, marital status, age, disability, gender identity, or sexual orientation.

Degree and Program Requirements

The MSTP program has many unique aspects of the curriculum, designed to integrate MSTP education through courses such as molecular medicine, the research basis of medical knowledge, professional development, ethics, and longitudinal clinical clerkships. MSTP students begin training to become physician-scientists from the very first week, and are well advised about possible courses and research opportunities. Descriptions of additional MSTP courses are listed below:

- MSTP 5015 - MSTP LABORATORY RESEARCH ROTATION
- MSTP 5010 - CAREER AND INVESTIGATIVE SCIENCE SKILLS
- MSTP 5290 - TRANSLATING DISCOVERY INTO THE CLINICAL REALM
- MSTP 5973 - STATISTICS, CODING, AND DATABASE ANALYSIS
- MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
- MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
- MSTP 5990 - LONGITUDINAL CLINICAL COURSE
- MSTP 5993 - LONGITUDINAL CLN CLERKSHIP 3
- MSTP 5975 - CAREER-RELATED RESEARCH

Degree and Program Requirements

The MSTP program has many unique aspects of the curriculum, designed to integrate MSTP education through courses such as molecular medicine, the research basis of medical knowledge, professional development, ethics, and longitudinal clinical clerkships. MSTP students begin training to become physician-scientists from the very first week, and are well advised about possible courses and research opportunities. Descriptions of additional MSTP courses are listed below:

- MSTP 5015 - MSTP LABORATORY RESEARCH ROTATION
- MSTP 5010 - CAREER AND INVESTIGATIVE SCIENCE SKILLS
- MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSTP 5973 - STATISTICS, CODING AND DATABASE ANALYSIS
- MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
- MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
- MSTP 5990 - LONGITUDINAL CLINICAL COURSE
- MSTP 5993 - LONGITUDINAL CLN CLERKSHIP 3
- MSTP 5955 - MSTP WORKSHOPS
- MSTP 5975 - CAREER-RELATED RESEARCH

Master's

Medical Science, MS

Medical Science, MS The academic requirements for this degree will include successful completion, i.e., passing grades, of all courses in the Preclerkship Years (MS 1-2) and submission a scholarly project that incorporates the student's medical knowledge. The scholarly project would represent a mentored capstone project rather than be a credit bearing course. The scholarly project would culminate in a document structured as a research report or literature view. The written product will be at least 5-page summary demonstrating the knowledge gained through the engagement in the project. Together, these requirements would meet the criteria defined by the Program Committee for the Master of Medical Science. No additional courses will be required, and no additional tuition will be required for completion of the scholarly project. The Program Committee for the Master of Medical Science will decide on the acceptability of the project. The student must also submit a letter voluntarily withdrawing from the University of Pittsburgh School of Medicine MD program.

Non-Degree

Physician Scientist Training Five-Year Non-Degree Program

Physician Scientist Training Five-Year Non-Degree Program

Overview: The Physician Scientist Training Program (PSTP) at the University of Pittsburgh School of Medicine is a five-year tuition assistance non-degree granting program through which students with a strong basic/translational research interest can start to build careers as physician-scientists. The PSTP website is located at pstp.pitt.edu.

Tuition Assistance: Medical school tuition is partially covered by the program ($10,000 for each of the four years of medical school). Students do not pay tuition during their research year between MS2 and MS3.

Admissions Process: Applicants invited for an interview at the University of Pittsburgh School of Medicine are eligible to apply to the PSTP. A completed PSTP application consists of both the PSTP supplemental application and two research-focused letters of recommendation.

The PSTP interviews approximately 20 qualified candidates per year. Qualified applicants demonstrate a high degree of scholastic excellence, a sincere commitment to a career in academic medicine, and the potential to be a leader in biomedical research.

Program Completion Requirements

All PSTP students successfully complete paid research rotations during the summer before and after the first year of medical school, and a paid research year between the second and third years of medical school. PSTP students also participate in a longitudinal enrichment curriculum of research-oriented classes:

- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
- MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
- MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR
- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
- MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
- MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE
- MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR

Program Completion Requirements

All PSTP students successfully complete paid research rotations during the summer before and after the first year of medical school, and a paid research year between the second and third years of medical school. PSTP students also participate in a longitudinal enrichment curriculum of research-oriented classes:

Graduate Programs

The University of Pittsburgh School of Medicine has a long tradition of research excellence and training by world-class faculty committed to mentoring the next generation of scientists. The School of Medicine offers a variety of programs leading to the Doctor of Philosophy, the Master of Science, or a certificate. In addition, it works with other schools of the University through collaborative graduate programs. The School of Medicine also offers an MD degree as well as a joint MD/PhD program enabling exceptionally able students to earn both degrees simultaneously. These programs are described in the First Professional Program section of the School of Medicine catalog.

Degree Requirements

In addition to School of Medicine requirements, all University requirements as detailed in the *Regulations Governing Graduate Study at the University of Pittsburg*h section of this catalog apply.

Graduate Programs (PhD, MS, Certificate)

Biomedical Informatics (PhD, MS, Certificate)

Biomedical Sciences (MS)

Cancer Biology and Oncology (PhD)

Computational Biology (PhD)

Computational Biomedicine and Biotechnology (MS)

Hearing and Vision Sciences (Certificate)

Institute for Clinical Research Education

Clinical & Translational Science (PhD)
Clinical Research (MS, Certificate)
Medical Education (MS, Certificate)

Integrative Systems Biology (PhD)

Interdisciplinary Biomedical Graduate Program

Cell Biology & Molecular Physiology (PhD)
Cellular & Molecular Pathology (PhD)
Molecular Genetics & Developmental Biology (PhD)
Molecular Pharmacology (PhD)

Microbiology and Immunology (PhD)

Molecular Biophysics and Structural Biology (PhD)

Neurobiology/Neuroscience (PhD)

Cancer Biology and Oncology, PhD

Certificate

Biomedical Informatics Certificate

Biomedical informatics is the science and engineering of information handling in health care delivery and biomedical research, studying and developing models of the various aspects of health care delivery and biomedical research in order to better understand how they operate. Those models suggest interventions that may improve health care delivery and biomedical research, including new methods for capturing, organizing, analyzing, and conveying clinical information to clinicians and researchers. Experiments are performed in which the effect of promising interventions on health care delivery or biomedical research are observed and compared to existing methods, which serve as controls. The analysis of the results of such experiments can lead to greater understanding of health care delivery and biomedical research, and thereby to methods with which to improve them.

Example research areas include (1) use of cause modeling to tailor psychiatric treatments, (2) machine learning tools to detect potential cardiac events during surgery, (3) prediction of potentially adverse events for pediatric intensive care patients, (4) using deep learning to predict medication response for cancer patients, (5) novel methods for interpreting spatial transcriptomics data, (6) natural language processing and visualization tools for extracting and interpreting longitudinal patient care histories, and (7) deep learning methods for studying cell signaling within the tissue microenvironment.

This program offers both master's and doctoral degrees. Most students choose to follow a general course of study in biomedical informatics; some, however, elect a specialization in one of the following areas: bioinformatics, clinical informatics, image informatics, or public health informatics. The specific curricula for the specializations, which are variations of the general course of study in biomedical informatics, can be found on the Training Program Web site at http://dbmi.pitt.edu.

Individuals who want less intensive exposure to informatics may seek a 15-credit certificate in lieu of an academic degree. The biomedical informatics certificate can be a means of augmenting professional training in fields related to informatics and/or fulfilling educational needs associated with a professional position. Trainees across all health professions are welcome.

More information on Admissions, Financial Aid, Curriculum, Courses, Degree Requirements, and Faculty, can be found at http://dbmi.pitt.edu.

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure includes 11 credits of required core courses, 3 credits of certificate research, and 1 or more credits from additional courses, independent study, directed study, etc.

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Additional Requirements for Doctoral, Master's, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at https://ctsi.pitt.edu.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Certificate in Hearing and Vision Sciences

Certificate in Hearing and Vision Sciences
The Certificate in Hearing and Vision Sciences (HVS Doctoral Certificate) is designed to train the next generation of hearing and vision researchers both in basic and translational research. This goal will be accomplished by offering additional coursework and opportunities for collaborative research and mentorship with basic and translational researchers. The certificate will be available to students who are pursuing a doctoral degree in any relevant graduate program at the University of Pittsburgh. This program will attract and train top graduate students and leverage the strengths of our world-class hearing and vision sciences programs. As such, this program will train new graduate students, serve the needs of our faculty, and further promote the highly collaborative academic research environment that is a hallmark of our school and university. The purpose of the Hearing and Vision Sciences Certificate (HVS Doctoral Certificate) is to allow students in existing doctoral programs in the University of Pittsburgh to obtain additional training in Hearing and Vision research and methodology, and to stimulate involvement in translational research. This goal will be accomplished by offering additional coursework and opportunities for collaborative research and mentorship with translational researchers. Admission Requirements: Students must first be admitted into a doctoral degree granting program in one of the graduate programs of the University of Pittsburgh prior to applying to the graduate certificate program. Once admitted for graduate study within a program, students may apply to the PHVC for admission to the Hearing and Vision Sciences Certificate program. Students must be in good academic standing (i.e., not in probation and must have successfully completed all the required courses and program milestones for their current year of studies) and demonstrate a strong interest in clinical and translational science. Students will enroll in the program after the successful completion of their comprehensive examination.
Course Requirements The certificate has two main components: (1) A set of core courses that provide students with standardized skills that are fundamental to hearing and vision research (2) Research support and training through the Center Successful completion of the required curriculum and elective courses will lead to the granting of the certificate. The requirements for the certificate are expected to be spread over years 2-4 of graduate study. Support will be provided for one year, but requests for

extension will be considered. It is estimated that students who complete this certificate will add a maximum of six months to their overall graduate studies.

A. Required Courses

- The Neuroscience of Hearing and Vision (3 credits) - The goal of this course will be to discuss the neurobiology of hearing and vision, starting from the cochlea and retina to cortex and back.
- Methods for Assessing Hearing and Vision (3 credits) - The goal of this course is to cover fundamental concepts and basic methods pertaining to quantify and assess hearing and vision in animal models and humans.
- Recent Advances in Therapy in Hearing and Vision (3 credits) - This course is designed to introduce students who have no significant clinical experience to the recent advances in treatment and cures in hearing and vision pathology. Surgeon- and physician-scientists along with our basic scientist faculty will participate in teaching this course.

B. Research

Within the PHVC, our over 50 world-class faculty and trainees are investigating hearing and vision sciences. The PHVC also promotes the translation of findings from basic research into applications for new treatments in hearing and vision pathology. This certificate program is open to students pursuing PhDs in PHVC-affiliated departments and graduate programs. Students may apply for membership upon admission to a PHVC-affiliated doctoral program.

Students involved in basic and translational research will be mentored by accomplished investigators who are actively involved in basic or translational research, have active NIH funding, have established track records of mentoring, and are committed to the career development of students.

Total Credits: 10

Clinical Research (Certificate)

Clinical Research (Certificate)

The Certificate in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaboration among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over a year of part-time study.

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Certificate in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Degree Requirements

Coursework Requirement:

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

CLRES 2010 - CLINICAL RESEARCH METHODS

CLRES 2020 - BIOSTATISTICS

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Electives

Students collaborate with your academic advisor to enroll in ICRE courses that most benefit their research and future career goals. Certificate students take a minimum of 6 elective credits.

Responsible Conduct of Research (RCR) Requirement:

Clinical Research Certificate students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

More Information:

For additional program details, please visit the certificate program page and review the program handbook.

Comparative Effectiveness Research (Certificate)

The Certificate in Comparative Effectiveness Research aims to teach trainees the skills necessary to design and conduct high quality comparative effectiveness research. The program is for advanced clinical researchers who have already completed the Institute for Clinical Research Education core curriculum. Since this program is highly specialized, please contact the ICRE using the contact information below for further program details.

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a clinical appointment within UPMC (faculty, fellow, or resident) and/or an academic appointment within a University of Pittsburgh Health Sciences school. Since successful participation in and completion of our courses depend on having clinical and classroom environments in which to teach, concurrent with the program.
- Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.
- Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- We do not accept GRE or MCAT scores

Timeline

The Certificate in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Degree Requirements

The Certificate in Medical Education offers a very flexible curriculum. Students are required to complete 15 credits, but are able to choose courses based on their individual educational interests and research goals. A minimum of 9 credits out of the 15 must be Medical Education courses. Please see the ICRE courses page for a complete list of our courses.

More information on Admissions, Financial Aid, Curriculum, Courses, Degree Requirements, and Faculty, can be found at http://dbmi.pitt.edu.

PhD Requirements

Credits: To earn the PhD degree in biomedical informatics, a student must complete a program of study approved by a committee of biomedical informatics faculty. The program requirements include a minimum of 72 credits consisting of a required Foundations course (15 credits); Research Skills (5 credits); Teaching Practicum (3 credits); doctoral dissertation research (18 credits), elective courses (12

credits); additional electives and/or independent study (19 credits); successful completion of a preliminary evaluation; successful completion of a doctoral comprehensive examination; and research work leading to an acceptable dissertation. All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertations studies (to be determined by the faculty advisors). A minimum "B" grade is required in all graduate courses.

Admission to Candidacy/Dissertation: To qualify for admission to candidacy, a student must have completed formal coursework with a 3.3 GPA or higher, passed the comprehensive examination, and received approval of the proposed subject and plan for the dissertations from their dissertation committee following a prospectus meeting. The dissertation committee usually includes the principal dissertation advisor and three additional faculty (a majority of the committee must be biomedical informatics core faculty and have University graduate faculty status).

An appropriate dissertation project involves a substantive piece of original and independent biomedical informatics research, grounded in an appropriate mode of literature and providing a significant contribution to the field. The dissertation must be successfully defended in a public oral defense. The dissertation process will follow the applicable regulations and procedures of the University and the School of Medicine, as described in the Regulations Pertaining to Doctoral Degrees section of this document.

MS Requirements

Credits: The Master of Science in Biomedical Informatics requires a minimum of 36 credits consisting of required biomedical informatics core Foundation (15 credits); Research Skills (4 credits); electives/independent study (14 credits); and Research (3 credits).

All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertation studies (to be determined by faculty advisors). A minimum "B" grade is required in all graduate courses.

Research Project or Thesis: A key element of the program is a research project with two key deliverables: (1) the writing and submission of a paper of publishable quality based upon the research and (2) the completion of an oral examination on its contents. A master's project committee will oversee the student's research progress, including the oral comprehensive examination. Students have the option of developing their projects into a formal master's thesis.

Successful completion of the oral examination on the research project satisfies the comprehensive examination requirement of the University's Committee on Graduate Studies. Final certification of the completion of the master's degree requires submission of the hard copy of the master's research project to the program coordinator.

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Additional Requirements for Doctoral, Master's, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at https://ctsi.pitt.edu.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Cell Biology and Molecular Physiology (PhD)

The graduate program in Cell Biology and Molecular Physiology (CBMP) has a rich scientific training and discovery tradition. Graduates of the Ph.D. program have become chairs of departments at six major U.S. medical schools and are represented at all levels of academic and biomedical research. The program combines basic and clinical research faculty who are dedicated to the training of students. Faculty employ an integrative cell biology focus: combining tools of imaging, genetics, biochemistry, molecular biology, structural biology, computational modeling and, physiological approaches to understand the functions of cells, tissues and organisms. The program is home to the Center for Biologic Imaging, a state-of-the-art imaging center, and the NIH-supported O'Brien Kidney Center. Students in CBMP are supported in part by a T32 training grant from NIGMS. Areas of expertise in the program include the cellular trafficking of proteins and lipids, genetic disorders of ion channels, fundamental mechanisms of cell-cell adhesion and cell polarity, DNA damage repair and cancer, models of neurodegeneration and aging, signal transduction in diabetes, cell biology and physiology of renal diseases, and molecular mechanisms of aging.

Core Courses

Apart from the general degree requirements for all IBGP students, CBMP students are required to take the following core courses:

- MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS

And one of the following imaging courses

- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

OR

Other electives include:

- MSCBMP 2870 - HISTOLOGY
- MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC
- MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY
- MSCBMP 2852 - RESEARCH SEMINAR IN CELLULAR BIOLOGY

Core Courses

Apart from the general degree requirements for all IBGP students, CBMP students are required to take the following core courses:

- MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
And one of the following imaging courses
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

OR

Other electives include:

- MSCBMP 2870 - HISTOLOGY
- MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC
- MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY
- MSCBMP 2852 - RESEARCH SEMINAR IN CELLULAR BIOLOGY

Cellular and Molecular Pathology (PhD)

Overview

The Cellular & Molecular Pathology (CMP) graduate program integrates cell biology, molecular biology, genetics, immunology, and computational approaches to investigate the mechanisms underlying human disease and tissue repair. The program combines basic science and translational research to address fundamental questions in tissue growth and development, regenerative medicine, and the cellular and molecular pathways that drive disease initiation, progression, and recovery.

Research areas within CMP span a broad range of disciplines, including liver biology and regeneration, developmental neuroscience and neurological disease, cancer biology, pulmonary disease, inflammation and autoimmunity, angiogenesis, gene regulation, bioinformatics, molecular diagnostics, gene editing, vision and hearing research, women's health, and artificial intelligence applications in pathology and biomedical science. Faculty are closely aligned with major institutional initiatives, including the Center for Transcriptional Medicine and the Computational Pathology & AI Center of Excellence, fostering collaborative and technology-driven approaches to biomedical discovery.

CMP trainees work in a highly interactive research environment that emphasizes innovation, interdisciplinary science, and translational impact. Research laboratories are located throughout the medical center campus and include both basic research scientists and clinician-scientists, providing trainees with exposure to a broad spectrum of experimental and clinically relevant investigation. The program is equally committed to training the next generation of scientific leaders through rigorous graduate education, individualized mentorship, and collaborative research experiences that bridge discovery science and clinical application.

Core Courses

In addition to the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, CMP requires four lecture-based courses:

Course 1:

- MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN

Course 2: Select one of the following

- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY
- MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Courses 3 and 4: Select two elective courses from courses throughout the School of Medicine on diverse topics of interest to students, such as the following CMP-sponsored courses (partial listing):

- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY

In addition to the four lecture-based courses, CMP students are required to take at least 5 terms of:

- MSCMP 2750 - RESEARCH SEMINAR

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses for the Cellular and Molecular Pathology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCMP 2280 - BASIC UNDERSTANDING OF PROFESSIONALISM AS RELATED TO GRADUATE EDUCATION
- MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN and EITHER
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS OR
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY OR
- MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Additionally we require at least 5 terms of:

- MSCMP 2750 - RESEARCH SEMINAR

As well as two electives of your choice

from either the above electives or from courses throughout the School of Medicine on diverse topics of interest to students such as the following CMP-sponsored courses (partial listing):

- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY

Clinical and Translational Science (PhD)

Clinical and Translational Science (PhD)

The Institute for Clinical Research Education at the University of Pittsburgh has designed the PhD Program in Clinical and Translational Science to train researchers in this emerging field that aims to close the gap between basic science and clinical research. This rigorous and advanced training program is intended primarily for clinicians, and aims to substantially enhance the capabilities of scientists to conduct high-quality clinical and translational research.

Contact Information

Institute for Clinical Research Education

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.5 on a 4.0 scale
- TOEFL, IELTS, or Duolingo scores (when applicable)
- MCAT or GRE scores are not accepted

Timeline

The PhD Program in Clinical and Translational Science accepts applications from September 1 through January 31 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by January 31. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Degree Requirements

The PhD in Clinical and Translational Science curriculum is organized into 4 categories of coursework: Core, Advanced Selectives, Research Specialization, and Dissertation Research. While students advance through the program they will also complete the Preliminary Evaluation, Comprehensive Exam, and Dissertation Milestone.

To view the curriculum in detail, please visit this page.

Non-credit Requirements/Milestones

Responsible Conduct of Research (RCR) Requirement

PhD in CTS students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

Comprehensive Examination

PhD in CTS students are required to complete a Comprehensive exam. This exam consists of a written examination in the form of an NIH R01-style proposal (including, at a minimum, specific research aims, background and significance, and research methods) and an oral defense of the written portion.

Doctoral Prospectus and Dissertation

PhD in CTS students must complete both a Doctoral Prospectus and successfully complete and defend a Doctoral Dissertation.

- Individuals must prepare a dissertation proposal for presentation to a doctoral dissertation committee at a formal dissertation overview meeting. At this meeting, the dissertation committee members will provide guidance in shaping the conceptualization and methodology for the individual's Doctoral Dissertation.
- The proposal, writing, and defense of a culminating research project. The written work must conform to the University of Pittsburgh style manual. The Final Oral Defense is a public defense of the Doctoral Dissertation.

More information:

Please view the PhD in CTS Program Handbook for complete program details.

Computational Biology (PhD)

Computational Biology (PhD)

Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavioral science.

The Joint Pitt-CMU PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

*NIH Working Definition, July 17, 2000.

Program Website:

www.compbio.pitt.edu

Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences are ideal candidates.

Recommended Prerequisites

For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91.

Application

REQUIRED MATERIALS - Deadline December 10, 2019

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts (submitted online)
- Conversion of GPA (for international students only)
- Unofficial TOEFL Scores (submitted online)
- Application Fee

Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.

For more information on application process, see www.compbio.pitt.edu/?page_id=163

Curriculum

The curriculum is designed to train students who will shape the next generation of discovery in computational biology in academia and industry. Students are required to complete 72 credit hours of academic work toward partial fulfillment of the requirements for completion of dissertation study. Of these, 30+ are formal coursework, and the remaining to be completed with full-time research.

All students are required to take five core graduate courses. The core courses aim at providing a strong common background in computational biology before they specialize in particular research areas

Core Courses

- Machine Learning
- Introduction to Computational Structural Biology
- Computational Genomics
- Cellular and Systems Modeling
- Laboratory Methods for Computational Biologists

In addition, all students are required to take three graduate elective courses: a life science/physical science course; an advanced interdisciplinary elective specified for the student's chosen area of specialization; and one general elective.

Specialization Areas

- Computational Genomics
- Computational Structural Biology
- Cellular and Systems Modeling
- Bioimage Informatics

For more information on the curriculum, see www.compbio.pitt.edu/?page_id=87

Other Courses

In addition to core and elective courses, students take complementing courses, if needed, and participate in program seminar, journal clubs, ethics courses and directed studies toward their dissertation projects.

Program Seminar Series

Students enrolled in the program are expected to attend scientific seminars during all years of training. Beginning in their second year and ending in the year before their thesis defense, students present their research progress to fellow students and the faculty on at least an annual basis.

CPCB Course

Effective presentation of scientific data is an invaluable aspect of graduate training. Therefore, all first- and second-year students must present a scientific article on a topic (selected by a faculty member) that introduces students to the methodology and applications of computational biology. The talk is made in a format that allows the student to develop basic presentation skills.
Students subsequently receive feedback on their talks, thereby improving their presentations skills as their graduate training advances.

Training in Ethics

Ethical conduct and scientific integrity is an essential aspect of research. This is especially important given the competitive nature of funding processes and the high demand for productivity. Hence, the program instructs students on the significance and practice of ethical conduct.

Directed Study

Credits are given for laboratory projects (wet or computer labs) under the direction of the dissertation advisor prior to admission to candidacy for the doctorate.

Scheduling

We anticipate two types of course schedules for students in the program. The default for students who have taken the prerequisites will be to take three courses in each of the first two terms (50-75% time) and spend the remaining time on research. Such students would normally take the core courses in the first year along with one additional course. The third and fourth terms would be split between taking electives and doing research.

Students who enter with some biology or computer science or physical science background but not with sufficient background to take all of the core courses would take a mix of missing prerequisites and core courses in each of the first two terms (approx. 90% time) and spend 10% time on research. These students would then take a mix of remaining core courses and electives in the third and fourth terms (along with 30% research) and finish electives in the fifth and/or sixth terms.

Comprehensive Examination

Students are required to pass a comprehensive examination after completion of their courses, prior to being officially admitted to candidacy to the PhD degree. Students are expected to complete this examination no later than the beginning of the spring term of their third year. The comprehensive examination consists of two parts: a 12-page "grant-style" written proposal of the proposed research, followed by an oral defense of the proposed research.

Post-Comprehensive Qualifying Examination

Students who have been accepted to PhD candidacy conduct research on a full time basis, and are required to complete a minimum of 40 credit hours (9-14 credits per term) of full-time dissertation study in order to meet the criteria for dissertation defense. Hence, all students will have completed at least 72 credit hours of study prior to graduation, including 29 credit hours of core + elective courses, and at least 40 credit hours of dissertation research.

Completion of Degree

The program is structured in such a way that students can finish their degree within four years of entering their dissertation laboratory. However, it is recognized that the actual time required to attain the degree depends on the specific type of research undertaken and how quickly progress is made in completing the experimental program.

Terminal Master's Degree

The Program does not admit students whose goal is to attain a MS degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

For more information on the program, such as list of training faculty, please see www.compbio.cmu.edu/?page_id=31615

Health Professions Education, PhD

Overview

The PhD in Health Professions Education (HPE) is a 72-credit interprofessional doctoral program designed to train clinician-educators and educational scholars capable of leading innovation, research, and curriculum reform across the health professions. Tailored for working professionals, the program combines rigorous foundational coursework with flexible, applied specialization and scholarly research. Designed as a flexible part- or full-time program, the program allows for individual pacing. In the program, each student will work closely with a faculty advisor and a dissertation committee to guide and support their research and professional development. A cohort model encourages peer collaboration and sustained engagement through journal clubs, teaching practicums, and professional development seminars.

Major Program Components

1. Core curriculum

- Advanced epistemology and learning theory in health professions education
- Research design and qualitative/quantitative inquiry methods
- Measurement, assessment, and program evaluation
- Leadership, organizational change, and policy in academic health professions
- Ethics, equity, and interprofessional collaboration in academia

2. Electives

- Customized with an advisor and mentor to support students' individual interests, deepen methodological expertise, and support dissertation research

- Options include advanced research methods courses in qualitative methods, logistic regression modeling, clinical trials, cost-effectiveness and decision analysis, implementation science, mixed methods, and data visualization

3. Responsible Conduct & Professional Development

- Dedicated training in educational ethics, culturally responsive teaching, mentorship, grant writing, and faculty development-structured to support scholar-practitioner growth and aligned with professional standards

4. Comprehensive qualifying review

- Midway through the program, students complete a comprehensive project demonstrating mastery of core content and readiness to engage in dissertation-level research.

5. Dissertation research

- Students complete an original, sustained research project in health professions education (e.g., curriculum implementation study, assessment validity research, leadership impact evaluation), culminating in a defended dissertation. Works may include three peer-reviewed articles.

Required Coursework

- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)
- CLRES 2071 - ADVANCED GRANT WRITING PART 1
- CLRES 2072 - ADVANCED GRANT WRITING PART 2
- HPM 3010 - SEMINAR ON ORGANIZATIONAL STUDIES: HEALTHCARE ORGANIZATIONS AND ENVIRONMENTS
- MEDEDU 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- MEDEDU 2010 - CLINICAL RESEARCH METHODS
- MEDEDU 2020 - BIOSTATISTICS
- MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH
- MEDEDU 2045 - SURVEY DESIGN AND DATA ANALYSIS
- MEDEDU 2085 - HEALTH PROFESSIONS EDUCATION INDEPENDENT STUDY
- MEDEDU 2100 - ENHANCING TEACHING SKILLS
- MEDEDU 2111 - FUNDAMENTALS OF ADULT LEARNING PART 1
- MEDEDU 2125 - ASSESSMENT OF MEDICAL LEARNERS
- MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN
- MEDEDU 2150 - MANAGEMENT OF EDUCATIONAL PROGRAMS
- MEDEDU 2185 - STRATEGIC LEADERSHIP IN ACADEMIC MEDICINE
- MEDEDU 2325 - FUNDAMENTALS OF ADULT LEARNING IN MEDICAL EDUCATION PART 2
- MEDEDU 2400 - QUALITATIVE RESEARCH METHODS 1 : THEORY & DESIGN
- MEDEDU 2401 - QUALITATIVE RESEARCH METHODS 2: APPLICATIONS
- PHARM 3306 - INTRODUCTION TO THE UNITED STATES HEALTHCARE SYSTEM AND PHARMACEUTICALS

Integrative Systems Biology (PhD)

Integrative Systems Biology (PhD)

Print-Friendly Page (opens a new window)

ISB is an innovative program in graduate training that rapidly immerses students into a research environment, then mentors them to become independent scientific practitioners, skilled not only in the art of technical execution but in the creative multidisciplinary thinking required to address important questions in systems biology. Students receive a PhD in Integrative Systems Biology.

Integrative Systems Biology is a field of study that has emerged within the last decade as a unifying discipline that focuses on placing the molecules that comprise living systems within functional and organism contexts. The goal of ISB is to utilize all of our available resources to create a training and research environment to answer challenging questions of fundamental importance in biomedical and life sciences. The ISB faculty are drawn from cellular, developmental, molecular and systems biologists across the University of Pittsburgh campus and are distributed between research foci:

- Quantitative Biology
- Translational Medicine

Contact Information

Integrative Systems Biology Program

Shari Murphy - Program Administrator

Biomedical Science Tower 3, 5th floor, 5061

3501 5th Avenue

University of Pittsburgh

Pittsburgh, PA 15213

412-383-4318

Fax: 412-383-2211

E-mail: sas101@pitt.edu

http://www.isb.pitt.edu

Admission Requirements and Procedures

Students most likely to gain admittance will have a baccalaureate degree from a natural science, physical science, or engineering program, a grade point average of 3.0 (on a scale of 4), and three letters of recommendation. As this is an accelerated program, students should have prior immersive experience in research studies. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 650 (paper), IELTS score of at least 7.50 or iBT score of at least 100 is required for admission to the Program.

Additional information and a link to the online application can be found at http://www.isb.pitt.edu/how-apply

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the program in the fall session, and after performing three rotations identify an advisor and area of research dissertation research project. Areas of research focus include Cell, Development, and Molecular Biology, Quantitative Biology, Translational Medicine, and Genes and Evolution. Required course work is completed during the first two years. After Spring of the students' second year, they take a comprehensive examination that includes the generation of a research proposal ready for submission to national fellowship programs.

Students receive career mentoring throughout their ISB training to ensure a seamless transition to the postdoctoral level. Additional information can be found in the Student Handbook: https://www.isb.pitt.edu/curriculum/student-handbook.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

- ISB 2000 - LABORATORY RESEARCH ROTATION
- ISB 2070 - THE BEDSIDE TO BENCH
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- ISB 2020 - SYSTEMS BIOLOGY 1
- ISB 2035 - SYSTEMS BIOLOGY II
- ISB 2060 - ISB CONFERENCE
- ISB 3090 - PHD DISSERTATION RESEARCH

Microbiology and Immunology (PhD)

Microbiology and Immunology (PhD)

The Program in Microbiology and Immunology (PMI) is an innovative program in graduate education that is administered through the School of Medicine of the University of Pittsburgh. The program aims to train highly motivated PhD students as self-reliant scholars in an environment where they have ready access to the breadth of expertise, approaches and sub-disciplines of microbiology and immunology. Students in this program will gain broad knowledge of diverse fields within microbiology and immunology, which is supplemented by seminars, journal clubs and laboratory rotations. The program rapidly immerses students into a research environment, and mentors them to become independent and creative scientists.

PMI brings together faculty in basic and translational sciences, including researchers from the University of Pittsburgh School of Medicine (Departments of Microbiology & Molecular Genetics and Immunology; Center for Vaccine Research; Microbiome Center), Magee-Women's Research Institute, Rangos Research Center at the Children's Hospital of Pittsburgh, and the University of Pittsburgh Cancer Center (e.g. Cancer Virology and Cancer Immunology Programs).

Faculty research interests in the PMI can be broadly divided into the following areas:

- Autoimmunity
- Basic immunological mechanisms
- Bacteriology
- Cancer immunology
- Discovery and development of novel antimicrobial therapies
- Host-pathogen interactions
- Immunology of organ transplantation
- Innate Immunity
- Parasitology
- Viral and bacterial pathogenesis
- Virology

Admission Requirements and Procedures

Students with at least a baccalaureate degree in biological or physical science or in mathematics, computer science or engineering are encouraged to apply. Admissions are based upon the student's academic record, letters of recommendation, previous research experience, written statement of interest and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official

results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) or Duolingo. A minimum result of 100 iBT TOEFL, a minimum result of 7.0 on the IELTS or a minimum result of 120 on Duolingo is required for admission to the program. Scores must be less than two years old (24 months) from September 1st. Applicants who have earned a bachelor's degree or a higher degree from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Additional information and a link to the online application can be a found at https://www.pmi.pitt.edu/admissions

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4-6 years. Students enter the program in the fall sessions and perform four research rotations during their first year. It is expected that four rotations of seven weeks each will be performed in different laboratories of members of the PMI training faculty, but there are several circumstances where the requirement for four rotations or laboratories might be relaxed. Additional information can be found in the Student Handbook on our website by clicking here.

Handbook | Microbiology and Immunology | University of Pittsburgh

A minimum of 72 credits is required for graduation with a PhD. Of these, 32 credits must come from approved courses, both required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination, to be held during the fall term of the second year and advancing to candidacy. Required course work includes the following:

- MSMI 2100 - FIRST PMI LABORATORY ROTATION and
- MSMI 2110 - SECOND PMI LABORATORY ROTATION (taken during fall and spring terms of the first year)
- MSMI 2000 - PRINCIPLES OF MICROBIOLOGY AND IMMUNOLOGY (taken during the fall of the first year)
- MSMI 2200 - COMPREHENSIVE MICROBIOLOGY: MOLECULAR VIROLOGY & MOLECULAR PATHOGENESIS and/or
- MSMI 2210 - ADVANCED IMMUNOLOGY (taken during the spring of the first year)
- MSMI 2250 - TA: MEDICAL MICROBIOLOGY (taken during the spring of the second and third years)
- MSMI 2300 - SCIENTIFIC WRITING IN MICROBIOLOGY AND IMMUNOLOGY (taken during the summer of the first year)
- INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

(taken during the summer of the first year)

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH (taken during the summer of the first year)
- MSMI 2450 - IMMUNOLOGY RESEARCH SEMINAR (taken every fall and spring term from the second year through graduation)
- MSMI 2460 - MICROBIOLOGY AND RELATED TOPICS SEMINAR SERIES (taken every fall and spring term from the second year through graduation)
- MSMI 3220 - CONTEMPORARY TOPICS - IMMUNOLOGY (taken during the fall and/or spring terms of the second and/or third years)

- MSMI 3230 - MICROBIOLOGY RESEARCH IN PROGRESS (taken every fall and spring term from the second year through graduation)

Admission Requirements and Procedures

Students with at least a baccalaureate degree in biological or physical science or in mathematics, computer science or engineering are encouraged to apply. Admissions are based upon the student's academic record, letters of recommendation, previous research experience, written statement of interest and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. Applicants who have earned a bachelor's degree or a higher degree from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Molecular Biophysics and Structural Biology (PhD)

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

Degree Requirements

All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first two years. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

- MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE or
- MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE -

Fall first year

- MSMBPH 2010 - Directed Study
- MOLBPH 2010 - Directed Study

Taken until 72 credits earned and admitted to Candidacy

- MSMBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS or
- MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS -

Spring first year

- MSMBPH 2013 Molecular Biophysics 3: Theory and Simulation
- MOLBPH 2013 Molecular Biophysics 3: Theory and Simulation

Spring first year

- MSMBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOLOGY SEMINAR or
- MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR

Every fall and spring through graduation

- MSMBPH 2030 - DATA AND LITERATURE CLUB or
- MOLBPH 2030 - DATA AND LITERATURE CLUB - beginning with the spring term of the first year, D&L Club is taken every fall and spring term through graduation

- MSMBPH 2051 - LABORATORY RESEARCH ROTATIONS or
- MOLBPH 2051- LABORATORY RESEARCH ROTATIONS

First year - 1 in fall, 2 in spring

- MSMBPH 2055 PRINCIPLES AND PRACTICES OF SOLUTION-BASED BIOMOLECULAR NMR
- MSMBPH 2050 SPECIAL TOPICS IN MBSB: CRYOEM O

One of these two classes offered alternately each spring

- MBMBPH 3000 Research and Dissertation Ph.D.
- MOLBPH 3000 Research and Dissertation Ph.D.

  Taken after 72 credits and admittance to candidacy

- 09763 - MOLECULAR MODELING AND COMPUTATIONAL CHEMISTRY (at CMU)

Spring first year

- INTP 2000 Foundations of Biomedical Science

Fall first year

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Summer first year

- INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

Summer first year

- INTBP 3000 Foundations of Biomedical Science
- INTBP 3005 Foundations Journal Club

fall of first year

Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. Course must be related to expanding knowledge of MBSB topics and approved by Andy Hinck. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at http://www.mbsb.pitt.edu/index.php/training/curriculum.

Molecular Genetics and Developmental Biology (PhD)

The Molecular Genetics and Developmental Biology (MGDB) graduate program provides an exciting and vigorous academic environment for highly motivated and qualified students to prepare for a rewarding career in biomedical research. The MGDB program brings together faculty in both basic and translational sciences, including researchers from the Magee-Womens Research Institute, the Aging Institute, the UPMC Hillman Cancer Center, the Children's Hospital of Pittsburgh and the Department of Biological Sciences. MGDB faculty are pursuing research projects that address fundamental, contemporary issues in biology and medicine using molecular genetic, genomic and computational tools in a spectrum of models from yeasts, worms, flies and mice to human studies. MGDB research is centered at the cutting edge of evelopmental & Reproductive Biology, Geroscience & Aging Biology, Stem Cells & Regeneration, and DNA Damage & Repair. Our work has direct relevance to cancer, diabetes, heart disease, fertility/infertility, and age-related diseases and regenerative medicine. We are committed translating our bench discoveries to the bedside and graduate students are fully integrated in all aspects of our investigative work.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the Molecular Genetics and Developmental Biology program:

- MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE

- MSMGDB 2535 - MODEL ORGANISMS

- MSMGDB 2550 - RESEARCH SEMINAR

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the Molecular Genetics and Developmental Biology program:

- MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE
- MSMGDB 2535 - MODEL ORGANISMS
- MSMGDB 2550 - RESEARCH SEMINAR
- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS

Molecular Pharmacology (PhD)

Biomedical research in the Molecular Pharmacology program is focused on cutting-edge discovery of molecular and cellular mechanisms of intracellular signaling using a combination of biochemical, molecular biological, biophysical, ultrastructural, and imaging approaches. Basic research into cellular communication in health and disease is the main emphasis of the program with the added advantage of an array of translational opportunities into the development and testing of novel therapeutic agents. Applications of this common theme are directed toward research in molecular biology of cancer, neuropharmacology, cell and organ system pharmacology, signal transduction, neurodegenerative diseases and drug discovery. Formal collaborative interactions with the Pittsburgh Cancer Institute, the Center for Neuroscience, the Pittsburgh Institute for Neurodegenerative Diseases (PIND), the Division of Clinical Pharmacology, the University of Pittsburgh Drug Discovery Institute, University of Pittsburgh Structural Biology Imaging Center, the Vascular Medicine Institute and the Center for Biological Imaging provide a broad multidisciplinary approach to training in modern molecular pharmacology.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the molecular pharmacology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 3360 - MOLECULAR PHARMACOLOGY
- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION
- MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS

OR

- MSMPHL 3375 - NEUROPHARMACOLOGY

OR

- MSMPHL 2370 - DRUG DISCOVERY

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the molecular pharmacology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 3360 - MOLECULAR PHARMACOLOGY

- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION
- MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS
  OR
- MSMPHL 3375 - NEUROPHARMACOLOGY
  OR

Neurobiology/Neuroscience (PhD)

Neurobiology/Neuroscience (PhD)

Neurobiology/Neuroscience (PhD)

Print-Friendly Page (opens a new window)

The Center for Neuroscience (CNUP) Training Program is an interschool PhD degree-granting program offered cooperatively by the School of Medicine (Neurobiology, MSNBIO) and the Dietrich School of Arts and Sciences (Neuroscience, NROSCI). The program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

CNUP is highly invested in enhancing diversity, which is expressed in multiple forms - race, ethnicity, gender and gender identity, sexual orientation, socioeconomic status, language, culture, national origin, religious commitments, age, (dis)ability status and political perspective. In addition, it strives to create a community that is equitable, so that all persons have equal opportunity, and inclusive, so that everyone feels welcome, and hopes new members share these values and goals.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Admission Requirements and Procedures

Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those who are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, test scores, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics, neuroscience, or psychology with a cumulative grade point average (GPA) of at least 3.40 (on a 4.00 scale). Applicants with a GPA below 3.0 will not be considered.

Additional information and a link to our on-line application can be found at:

PhD Degree Requirements

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

Core courses:

- MSNBIO 2020 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 1 or
- NROSCI 2020 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 1

- MSNBIO 2021 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 2 or
- NROSCI 2021 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 2

- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY

Other requirements:

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; participate in research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense.

PITT-RCSI Cooperative Degree PhD Program in Precision and Regenerative Medicine, PhD

Graduate Program in Precision and Regenerative Medicine (PRM)

The proposed PRM program will bring together faculty in basic and translational sciences from Pitt and RCSI, including researchers from the UPSOM, SSOE, McGowan Institute for Regenerative Medicine, Magee-Women's Research Institute, Institute for Precision Medicine, as well as other departments/schools at Pitt. A novel component of PRM is that it will be a cooperative PhD program with the Royal College of Surgeons in Dublin, Ireland. This will be the first such program for Pitt where the PhD degree will be granted by two institutions.

PRM will be a unique and innovative program in graduate education that aims to train highly motivated PhD students as self-reliant scholars with ready access to the breadth of expertise, approaches, and sub-disciplines that constitute the diverse fields of precision and regenerative medicine. This unique program, where students will do their research on two continents, will rapidly immerse students into diverse research environments that will train them to become independent and creative scientists.

Key features of the PRM include:

- Providing didactic, lecture-based instruction in fundamental and contemporary aspects of precision and regenerative medicine, utilizing the complementary strengths of two international institutions.
- Reinforcement of formal didactic teaching with highly interactive small group discussions facilitated by faculty experts and based on primary scientific literature in PRM.
- Providing courses at two different institutions with cohesive themes to facilitate students' understanding of the material, promoting gradual conceptual progression in the classroom with laboratory-based skill building.
- Engaging students early in laboratory research in core competencies of mentors' laboratories with emphasis on multidisciplinary approaches to important research questions.
- Annual Research Symposium alternating between Pittsburgh and Dublin where students and faculty will present their research and discuss ideas for improving the program and strengthening collaborations between the two institutions.

While the PRM program will be independent, we will be integrated with other graduate programs in the UPSOM and Bioengineering Department, and we aspire to a model wherein elective courses are shared between all programs.

Curriculum

- BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING
- BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING
- BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY
- BIOENG 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- ISB 2035 - SYSTEMS BIOLOGY II
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY
- MSCMP 2760 - TISSUE ENGINEERING: FROM DESIGN TO CLINICAL TRANSLATION
- MSCMP 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS
- MSCMP 3770 - CELL THERAPY
- MSMGDB 2535 - MODEL ORGANISMS
- MSMI 2240 - INTRODUCTION TO IMMUNOBIOTHERAPEUTICS
- MSOGP 2004 - Cancer Immunology and Immunotherapy
- MSOGP 2005 - Big Data Science
- PC 02 - Biostatistics/RSCI
- PC 04 - Research Ethics and Integrity/RSCI
- PRM 01 - Fundamentals of Precision and Regenerative Medicine
- PRM 02 - Laboratory Rotation
- PRM 03 - Journal Club
- PRM 04 - Grant Writing

Joint Degree

Bioimaging Informatics Specialization, PhD

Curriculum

The curriculum is designed to train students who will shape the next generation of discovery in computational biology in academia and industry. Students are required to complete 72 credit hours of academic work toward partial fulfillment of the requirements for completion of dissertation study. Of these, 30+ are formal coursework, and the remaining to be completed with full-time research.

All students are required to take five core graduate courses. The core courses aim at providing a strong common background in computational biology before they specialize in particular research areas

Core Courses

- Machine Learning
- Intro to Computational Structural Biology
- Computational Genomics

- Cellular and Systems Modeling
- Laboratory Methods for Computational Biologists

In addition, all students are required to take five graduate elective courses: a life science/physical science course and an advanced interdisciplinary elective specified for the student's chosen area of specialization; a quantitative elective from a program-wide menu; and two general electives.

Specialization Areas

- Computational Genomics
- Computational Structural Biology
- Cellular and Systems Modeling
- Bioimage Informatics

For more information on the curriculum, see www.compbio.pitt.edu/curriculum.html.

Other Courses

In addition to core and elective courses, students take complementing courses, if needed, and participate in program seminar, journal clubs, ethics courses and directed studies toward their dissertation projects.

Program Seminar Series

Students enrolled in the program are expected to attend scientific seminars during all years of training. Beginning in their second year and ending in the year before their thesis defense, students present their research progress to fellow students and the faculty on at least an annual basis.

Journal Club

Effective presentation of scientific data is an invaluable aspect of graduate training. Therefore, all first- and second-year students must present a scientific article on a topic (selected by a faculty member) that introduces students to the methodology and applications of computational biology. The talk is made in a format that allows the student to develop basic presentation skills. Students subsequently receive feedback on their talks, thereby improving their presentations skills as their graduate training advances.

Training in Ethics

Ethical conduct and scientific integrity is an essential aspect of research. This is especially important given the competitive nature of funding processes and the high demand for productivity. Hence, the program instructs students on the significance and practice of ethical conduct.

Directed Study

Credits are given for laboratory projects (wet or computer labs) under the direction of the dissertation advisor prior to admission to candidacy for the doctorate.

Scheduling

We anticipate two types of course schedules for students in the program. The default for students who have taken the prerequisites will be to take three courses in each of the first two terms (50-75% time) and spend the remaining time on research. Such students would normally take the core courses in the first year along with one additional course. The third and fourth terms would be split between taking electives and doing research.

Students who enter with some biology or computer science or physical science background but not with sufficient background to take all of the core courses would take a mix of missing prerequisites and core courses in each of the first two terms (approx. 90% time) and spend 10% time on research. These students would then take a mix of remaining core courses and electives in the third and fourth terms (along with 30% research) and finish electives in the fifth and/or sixth terms.

Comprehensive Examination

Students are required to pass a comprehensive examination after completion of their courses, prior to being officially admitted to candidacy to the PhD degree. Students are expected to complete this examination no later than the beginning of the spring term of their third year. The comprehensive examination consists of two parts: a 12-page "grant-style" written proposal of the proposed research, followed by an oral defense of the proposed research.

Post-Comprehensive Qualifying Examination

Students who have been accepted to PhD candidacy conduct research on a full time basis, and are required to complete a minimum of 40 credit hours (9 credits per term) of full-time dissertation study in order to meet the criteria for dissertation defense. Hence, all students will have completed at least 72 credit hours of study prior to graduation, including 29 credit hours of core + elective courses, and at least 40 credit hours of dissertation research.

Completion of Degree

The program is structured in such a way that students can finish their degree within four years of entering their dissertation laboratory. However, it is recognized that the actual time required to attain the degree depends on the specific type of research undertaken and how quickly progress is made in completing the experimental program.

Terminal Masters Degree

The Program does not admit students whose goal is to attain a MS degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Training Faculty

The program provides students with cross-disciplinary training in established as well as newly emerging fields of computational biology. Students have access to a community of faculty mentors from the University of Pittsburgh and Carnegie Mellon University, which not only provides a breadth of research areas for investigation, but also offers the technical and intellectual resources to make rapid progress toward their doctoral degree.

For a list of training faculty, see http://www.compbio.pitt.edu/?page_id=50/

Master's

Biomedical Informatics - Biosurveillance/Infectious Disease Informatics Specialization, MS

MS Degree

http://www.dbmi.pitt.edu/training-programs/degree

Credits: The Master of Science in Biomedical Informatics requires a minimum of 36 credits consisting of required biomedical informatics core Foundation Series (9 credits); required computational competency Research Methods Series (6 credits); biomedical informatics distribution Research Skills Series (7 credits minimum); electives (11 or more credits); and Master's Thesis/Project Research (BIOINF 2480 or 3 or more credits).

All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertation studies (to be determined by faculty advisors). A minimum "B" grade is required in all graduate courses.

Research Project or Thesis: A key element of the program is a research project with two key deliverables: (1) the writing and submission of a paper of publishable quality based upon the research and (2) the completion of an oral examination on its contents. A master's project committee will oversee the student's research progress, including the oral comprehensive examination. Students have the option of developing their projects into a formal master's thesis.

Successful completion of the oral examination on the research project satisfies the comprehensive examination requirement of the University's Committee on Graduate Studies. Final certification of the completion of the master's degree requires submission of the hard copy of the master's research project to the program coordinator.

Additional Requirements for Master's, Doctoral, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at http://www.ctsi.pitt.edu/RCR/index.shtml.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Biomedical Sciences (MS)

Biomedical Sciences (MS)

The Biomedical Master's Program (BMP) is designed to develop critical scientific thinking skills and train students for successful application to professional degree programs in the health sciences. Biomedicine is the centerpiece of the health sciences, interconnecting everything from medicine and dentistry, to clinical and biomedical research. The field of Biomedicine ultimately studies and advances understanding of the human body, how it works in health and how it goes awry in disease. The BMP at the University of Pittsburgh School of Medicine offers educational and experiential training in Biomedicine as preparation for successful careers in the health sciences within a faculty mentored community individualizing each student's success.

Contact Information

Biomedical Master's Program
3500 Fifth Avenue, Suite 206

Pittsburgh, PA 15213 USA

Admissions

Admissions Criteria:

The BMP welcomes candidates who are U.S. Citizens, non-citizen nationals, or lawfully admitted permanent residents of the U.S., or individuals who already hold, or can obtain a J-1, H1-B, or F1 transfer visa.

The program is designed for applicants with long-term goals of entering careers in the health sciences, or applying to DO and MD, PA, DMD/DDS, PhD, other health science degree programs or seeking a master's degree in the Biological Sciences.

Candidates must have distinguished personal qualifications of past academic ability and references. Application requirements include a bachelor's degree with at least a cumulative 3.0 GPA; a 3.3 or higher GPA is preferred. Completion of pre-requisite courses for application to future professional degree programs are required. MCAT, DAT, PCAT, or GRE scores are not required for admission, but should be reported by any applicant who has taken one of these tests. Candidates with community service, clinician shadowing, patient care, clinical or basic research experiences, and strong academic performance will be viewed very favorably.

Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) and are seeking their first degree in the United States are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), an IELTS score of at least 7.00, or a Duolingo score of 120 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Application Process:

- The online application process starts October 1st and closes on June 1st the following year. Admissions is conducted on a rolling basis. Students matriculate for the beginning of the fall semester. A focus on ensuring student success is employed in the admissions process.

- Admissions are based upon the student's academic record, letters of recommendation, previous experience, written statement of interest, an updated resume/CV, and an interview.

The online application is available at: https://admissions.gradbiomed.pitt.edu/

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: https://financialaid.pitt.edu/graduate-students The BMP offers scholarships to select students. Awards are determined based on a holistic evaluation and amounts are based on financial need. All students are responsible for ensuring their tuition is paid.

Degree Requirements

All requirements detailed in the Regulations Governing Graduate Study at the University of Pittsburgh will be met. The MS in Biomedical Sciences requires the completion of a minimum of 32 credits with a GPA of 3.0 or higher. Maximum credits allowed per term will be 15, and a typical course load will be 15 credits for the fall and spring terms and 2 credits for the summer term.

Foundational Components:

The Curriculum: The BMP employs science-based instruction designed to improve student preparation for professional degree programs in medicine, dentistry, research, and other related health science professions. By emphasizing understanding and how to think in addition to what to know, the BMP promotes the development of study habits that enable our students to excel and thrive in the first two years of these demanding professional degree programs. These goals will be achieved through an integrated series of required core courses and elective courses and experiential training opportunities together with dedicated one-on-one advising and mentorship that will enable students to successfully apply to and perform well in their chosen professional school.

Experiential Training. The BMP affords opportunities for experiential training specifically tailored to the strengths and weaknesses of each individual student. The areas selected correspond to the typical aspects considered in the review of standard professional school applications: community service, patient volunteering, clinical shadowing, and research training.

Mentoring and Coaching. The BMP provides a multi-tiered mentoring and coaching model to all students. Each student will meet with their assigned faculty advisor during the initial phase of the program in order to identify strengths and weaknesses of the previous training received by the student. The student and faculty advisor will identify the best selection of academic courses and experiences to maximize long term student learning and success. Career and professional development coursework and access to an internal International Coaching Federation career coach will support individual growth including many of the AAMC Core Competencies. Access to an external International Coaching Federation life coach is also provided to address broader challenges such as limiting beliefs. In addition, near-peer mentoring is facilitated by the BMP Alumni Mentor Network. Students also engage in large group lectures, larger group discussions, small group discussions, and peer-to-peer writing-and-reflection coursework, with a focus on developing competencies in written and verbal professional communication skills. These activities are specifically targeted to develop the quality of students' professional program application materials.

Expanding on these three components, the BMP enables the student to differentiate with elective courses, experiential opportunities and mentoring to focus on specialized interests. These Areas of Concentration (AOCs) are in Medicine, Dentistry, or Biomedical Research. The AOCs are designed to individualize the program for students seeking future professional programs leading to the MD, DMD, or PhD degree, respectively.

Successful completion of the BMP results in conferral by the University of Pittsburgh of the Master of Science (MS) degree in the major of Biomedical Sciences. The BMP is a 12-month program. Applicants who are working may complete the program part-time over the course of two academic years

Curriculum

The BMP curriculum includes three major components: core, electives, and experiential activities. The "Core Course Requirements" have been designed to provide the foundational sciences for students who have a minimal level of basic science training as well as advanced education in health science thinking skills to serve students well into the first two years of professional degree programs. These courses are complemented by electives and experiential activities that are chosen based on each student's interests in his/her AOC.

Core Courses: Biochemistry and Physiology; Method and Logic in Biomedicine; Cell Signaling and Pharmacology; Comprehensive Analysis of Disease; Organ Systems Physiology; Professional Communications Reflections 1 and 2; Scientific Communication

Elective Courses: Human Anatomy; Histology and Cell Function in Health and Disease; Cell Biology Pathways in Treatment of Disease; Neurophysiology; Clinical Pharmacology; Biomedical Career Planning 1 & 2, Health Equity & Diversity Awareness; Experiential Learning.

Additional Elective Courses: Additional graduate level courses are available with written approval from the student's academic advisor and permission from the instructor and/or department offering the course.

Experiential Courses: The BMP provides ample opportunities for students to engage in community service, hospital volunteering, and clinical shadowing. Research training experiences are also available in a wide range of biomedical and clinical research laboratories. Students are expected to take the initiative, guided by their faculty advisor, to find suitable matches and schedule experiential education and training sessions during the Fall, Spring, and/or Summer terms.

Academic Standards

All graduate students must maintain a minimum cumulative GPA of 3.0 to stay in good academic standing and be eligible for graduation.

Admissions

Admissions Criteria:

The BMP welcomes candidates who are U.S. Citizens, non-citizen nationals, or lawfully admitted permanent residents of the U.S., or individuals who already hold, or can obtain a J-1, H1-B, or F1 transfer visa.

The program is designed for applicants with long-term goals of entering careers in the health sciences, or applying to DO and MD, PA, DMD/DDS, PhD, other health science degree programs or seeking a master's degree in the Biological Sciences.

All graduate students must maintain a minimum cumulative GPA of 3.0 to stay in good academic standing and be eligible for graduation.

Clinical Research (MS)

Clinical Research (MS)

The Master of Science in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaborations among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over 2 years of part-time study.

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Master of Science in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Degree Requirements

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

CLRES 2010 - CLINICAL RESEARCH METHODS

CLRES 2020 - BIOSTATISTICS

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Advanced Grant Writing Course

This course focuses on research design and development and is a two-part course offered during the fall and spring terms. The Advanced Grant Writing course is taken by MS students during year 2.

CLRES 2071 ADVANCED GRANT WRITING PART 1

CLRES 2072 - ADVANCED GRANT WRITING PART 2
