Students who enter the Master of Science in Clinical Research Program will select a curriculum track that offers specialized training in a specific clinical research area. Each specialty track offers a different curriculum of required courses, which can be viewed in the Program Handbook. The MS program has 5 specialty tracks:

- Clinical Trials Research Track
- Comparative Effectiveness Research Track
- Health Services Research Track
- Translational Research Track
- Innovation Track
- Implementation Science Track
- Data Science Track

Each of these tracks has a distinct set of required courses that allow students to specialize in an area of clinical research. All MS students will also take a selection of elective courses to reach the 30 credit minimum required for this degree.

Comprehensive Competency Review:

The Comprehensive Competency review is a program check-in completed at the midpoint of a student's degree progress. The MS in Clinical Research Program is designed to train students in the skills, knowledge, and professional norms for clinical researchers and the Comprehensive Competency Review helps students be confident that they are on track to develop competence in all key areas.

Thesis or Substantive Research Project:

The MS in Clinical Research requires each student to complete a formal thesis or substantive research project. Students are able to write a standard thesis, grant proposal, or 2 manuscripts to fulfill this requirement.

Students must successfully defend their research project to a review committee as required by the University's Committee on Graduate Studies.

Responsible Conduct in Research (RCR) Requirement

Clinical Research Master of Science students are required to attend eight 1-hour CTSI Responsible Conduct in Research workshops or enroll in the ICRE course CLRES 2050: Ethics and Responsible Conduct of Research. At the time of graduation, students must have at least 8 hours of RCR training through CTSI or have successfully completed CLRES 2050 in order to be eligible to graduate.

More Information:

For additional program details, please visit the Master of Science in Clinical Research Program page and review the Program Handbook.

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.

- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, and Duolingo scores (when applicable)
- GRE and MCAT scores are not accepted

Timeline

The Master of Science in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Degree Requirements

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

CLRES 2010 - CLINICAL RESEARCH METHODS

CLRES 2020 - BIOSTATISTICS

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Advanced Grant Writing Course

This course focuses on research design and development and is a two-part course offered during the fall and spring terms. The Advanced Grant Writing course is taken by MS students during year 2.

CLRES 2071 ADVANCED GRANT WRITING PART 1

CLRES 2072 - ADVANCED GRANT WRITING PART 2

Specialty Track Requirements:

Students who enter the Master of Science in Clinical Research Program will select a curriculum track that offers specialized training in a specific clinical research area. Each specialty track offers a different curriculum of required courses, which can be viewed in the Program Handbook. The MS program has 5 specialty tracks:

- Clinical Trials Research Track
- Comparative Effectiveness Research Track

Computational Biomedicine and Biotechnology (MS)

Computational Biomedicine and Biotechnology (MS)

Computational Biomedicine and Biotechnology (MS)

Print-Friendly Page (opens a new window)

The Computational Biomedicine and Biotechnology (CoBB) Master of Science trains students in translating cutting-edge computational technologies into real-world advances in biomedicine and biotechnology. Seated in the School of Medicine's Department of Computational and Systems Biology, the program focuses on the interface between computer science and applied biology. Our courses are well-suited for students with a variety of backgrounds, such as those in biological sciences or quantitative disciplines. Students in the CoBB program will learn to develop and apply novel computational, mathematical, statistical, and in silico techniques to meet current challenges in biotechnology. Our graduates are equipped with the necessary skills for successful biomedical data science and biocomputing technology careers in the health care and biotechnology industry, government, and academia.

Executive Director:

Mert Gur, PhD

ama251@pitt.edu

cobb@pitt.edu

Executive Committee:

Mert Gur, PhD

Joseph Ayoob, PhD

James Faeder, PhD

Frederick (Fritz) Roth, PhD

Program Website:

www.csb.pitt.edu/cobb/

Admissions

CoBB welcomes students from various backgrounds, including but not limited to life science, computer science, physical science, mathematics and statistics, and engineering majors, students with interdisciplinary or multi-disciplinary backgrounds.

Application

Required Materials:

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts
- Unofficial TOEFL Scores/IELTS/Duolingo Scores (for international applicants)
- Application Fee

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: https://financialaid.pitt.edu/graduate-students/. All students are responsible for their own tuition.

Degree Requirements

To receive the CoBB MS, all students are required to complete a minimum of 30 credits of masters-level coursework and to maintain an overall GPA of 3.0 or higher. Additionaly information can be found in the Student Handbook.

Curriculum

- At least four research credits of independent study with a research mentor
- A summer internship or additional directed study, worth three credits
- 3 credits of Fundamentals of Computational Biology
- A Professional Development Course and a Faculty Seminar course
- One course (taken or waived) from each of the six core areas of study

- Data Science, Programming, Probability, and Statistics
- Artificial Intelligence, Machine Learning and Bioimage Analysis
- Genomics and Precision Medicine
- Molecular and Cell Systems Modeling
- Drug Discovery and Quantitative Pharmacology
- Specialized Courses, based on the student's interests, can be selected from a wide range of offerings at the University of Pittsburgh, including the Schools of Medicine, Engineering, and Health Sciences, among others.

Directed Study

Gaining hands on experience in solving problems in computational biology is an essential part of CoBB training. Each student is therefore required to take a minimum of 4 credits of directed study with a University of Pittsburgh faculty member. Students are expected to select a research mentor for the directed study in their first semester, and to complete the research requirement in the second and/or third semesters.

Internship

To gain experience in the professional application of computational biology, students are encouraged to participate in a 2-to-3 month summer internship at a company of their choosing. Acceptable internship sites include industrial labs, biotech/pharma companies, and governmental organizations.

Students will present a written report with well-defined structure and content at the end of their internship to summarize their experience and the skills they acquired during their experiential training, and to make recommendations for future work. They will also make an oral presentation to share their experience with others.

Completion of Degree

The program is structured in such a way that students can finish their degree within 12-20 months, depending on the background of the student. To complete the degree in one year, students must demonstrate proficiency in programming, calculus and linear algebra.

For more information on the program, please visit www.csb.pitt.edu/cobb/

Health Professions Education, MS

Health Professions Education, MS

The Master of Science in Medical Education Program is designed to help academically oriented health care professionals enhance their education, strengthen their teaching skills, and expand their ability to facilitate the learning process of students and residents in a variety of clinical teaching environments. This program is typically completed over 2 years of part-time study. Alumni of this program have gone on to make valuable contributions to the field of medical education, many of them through leadership positions in top training programs across the country.

Institute for Clinical Research Education
200 Meyran Ave., Suite 300

412-586-9632
Fax: 412-586-9672

Email: icre@pitt.edu
Learn more.

Admissions

Admissions Criteria

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a clinical appointment within UPMC (faculty, fellow, or resident) and/or an academic appointment within a University of Pittsburgh Health Sciences school, since successful participation in and completion of our courses depend on having clinical and classroom environments in which to teach, concurrent with the program.
- Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.
- Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL, IELTS, or Duolingo scores (when applicable)
- GRE and MCAT scores not accepted

Timeline

The Master of Science in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The University requires the successful fulfillment of a minimum of 30 credits for awarding a Master of Science in Medical Education. The degree is granted upon the completion of a tightly integrated curriculum with three components: (1) coursework plus observed teaching activities focusing on adult learning, classroom and clinical teaching skills, curriculum development, innovation in medical education, professional development, and medical administration; (2) additional courses to provide trainees with fundamental research skills; and (3) a project on curriculum development or a mentored research project.

Core Curriculum

All Master of Science trainees in the Medical Education Program enroll in 11 required courses that cover the fundamental aspects of the field of medical education. Below are the required courses:

MEDEDU 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

MEDEDU 2010 - CLINICAL RESEARCH METHODS

MEDEDU 2020 - BIOSTATISTICS

MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH

MEDEDU 2080 - MASTERS RESEARCH

MEDEDU 2100 - ENHANCING TEACHING SKILLS

MEDEDU 2111 - FUNDAMENTALS OF ADULT LEARNING PART 1

MEDEDU 2120 - PROFESSIONAL DEVELOPMENT

MEDEDU 2125 - ASSESSMENT OF MEDICAL LEARNERS

MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN

MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)

Electives

Trainees choose elective coursework to reach the required 30 credits. These courses may be offered through the Medical Education or Clinical Research program.

Independent Research Project

Trainees pursuing the Master of Science in Medical Education are required to complete a substantive research project. This thesis requirement can take the form of a curriculum development project, survey research, qualitative research, or other type of research project. The trainee must be the principal investigator for their thesis project and plan to publish their research in a peer-reviewed journal.

More Information

To learn more about the Medical Education Academic Programs, please visit the program page and review the program handbook

Non-Degree

Institute for Clinical Research Education

The Institute for Clinical Research Education (ICRE) is the home for the University of Pittsburgh's premier clinical and translational research training programs. The ICRE offers a variety of educational, training, and career development programs for researchers in clinical and translational science as well as medical education. The degree programs of the ICRE emphasize the multidisciplinary nature of clinical research, translational science, and medical education while engaging adult learners through the use of applied approaches to build skills. Learn more.

Graduate Training Programs:

- **Clinical and Translational Science (PhD)**
- **Clinical Research (MS)**
- **Clinical Research (Certificate)**
- **Health Professions Education, MS**
- **Health Professions Education, Certificate**
- **Certificate in Clinical and Translational Science for Doctoral Students in the Health Sciences**

PhD

Cancer Biology and Oncology, PhD

Oncology Graduate Program (OGP)

The OGP is led by Hillman Faculty in Hillman Cancer Center and the newly refurbished Ford Assembly Building (5KB) at 5051 Centre Avenue in Shadyside. On a student's diploma it will be a PhD with a major in Cancer Biology and Oncology. The OGP is used to market the cancer focus of the program to students, faculty, and the public.

The OGP is an innovative program in graduate education that aims to train highly motivated PhD students as self-reliant scholars in an environment with ready access to the breadth of expertise, approaches, and sub-disciplines that constitute the diverse fields of Oncology. This unique program rapidly immerses students into a research environment that will train them to become independent and creative scientists.

Key features of the OGP include:

- Providing didactic, lecture-based instruction in fundamental and contemporary aspects of Oncology.
- Reinforcement of formal didactic teaching with informal small group discussions led by faculty experts and based on primary scientific literature.

- Providing courses with cohesive themes to facilitate students' understanding of the material, promoting gradual conceptual progression in the classroom with laboratory-based skill building.
- Engaging students early in laboratory research in core competencies of mentors' laboratories with emphasis on multidisciplinary approaches to important research questions.

Faculty research interests in the proposed OGP can be broadly divided into the following areas:

- Cancer Biology Program (CBP)
- Cancer Epidemiology and Prevention Program (CEPP)
- Cancer Immunology and Immunotherapy Program (CIIP)
- Cancer Therapeutics Program (CTP)
- Cancer Virology Program (CVP)
- Genome Stability Program (GSP)

Admission Requirements

1. A baccalaureate degree in a biological or physical science or in mathematics, computer science or engineering.
2. A minimum grade point average of 3.2 (on a scale of 4) or its equivalent from an accredited institution.
3. A minimum of three letters of recommendation. Letters from faculty familiar with the applicant's research accomplishments are of particular value to the evaluation process.
4. A personal statement.
5. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duo Lingo. A minimum overall TOEFL score of 90 (within a minimum score of 22 in each section), 100 iBT, 7.0 on the IELTS, or 120 on Duo Lingo is required for admission to the program. Scores must be less than two years old. To submit TOEFL scores, use Institution Code 2927 and Department Code 45. Applicants who have earned a bachelor's degree or higher from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Course Curriculum

In line with University requirements, students will be required to earn 32 course credits and 40 PhD dissertation credits in order to be eligible for graduation from the program.

Laboratory Rotations

Laboratory rotations are important for helping to ensure a good fit between a student and PhD mentor. Rotations in the OGP will run for 12 weeks. This is sufficient time for the student and potential mentor (and the mentor's lab personnel) to interact, while still allowing time to perform a short-term research project. Each student is required to complete three lab rotations. Students will be expected to complete a short rotation report (2-3 pages), to be turned in within 1 week of the end of the rotation, detailing the goal(s) of the project and its rationale, as well as any results obtained and potential future directions. At the end of each rotation, students will be evaluated by the faculty member supervising the rotation; these evaluations will be forwarded to the Program Directors and will become part of the student's academic record. Rotations will be graded, and each rotation will receive 3 credits.

Course Instruction

Courses will be taught by Oncology Graduate Program Faculty who will be chosen from existing Hillman Cancer Center members. This will fulfill their existing teaching requirement and therefore have no workload impact.

First Year

Fall

All first year OGP students will take a newly developed common courses in the fall semester, to be titled "Fundamentals in Biology" to be directed by Dr. Katherine Aird as well as "Cancer Biology & Therapeutics" an existing course directed by Drs. Laura Stabile and Roderick O'Sullivan (MSCMP3710). These will be three credit courses.

All first-year students will be offered a newly developed common course "Classic Manuscripts in Cancer Biology and Oncology. In this course, students will be taught how to read and analyze scientific literature, with an emphasis on current and classic papers in Oncology. This will be a two-credit course.

Students will also attend one of HCC's research program's work-in-progress conferences where they will learn how to present state-of-the-art research in Oncology.

Finally, students in the fall of year 1 will complete a laboratory rotation of 12 weeks each (three credits).

- MSOGP 2000 - FUNDAMENTALS IN CANCER BIOLOGY
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSOGP 2060 - ONCOLOGY GRADUATE PROGRAM JOURNAL CLUB

Spring

All first-year students will be required to take a newly developed common course "Fundamentals of Clinical Oncology" to be directed by Dr. Chris Bakkenist. This will be a three-credit course.

All first-year students will be required to take three elective courses in the Spring of the first year (two or three credits). These may be electives offered by OGP or other Graduate Programs. For example, we imagine that some OGP students will elect to take an existing course, Comprehensive Immunology MSMI 2210 with PMI (two credits) prior to taking a new course, Cancer Immunology and Immunotherapy (three credits) in the summer of their first year. Some OGP students may take an existing course, Principles of Pharmacology MSMPHL 2310 (two credits) and/or Drug Discovery MSMPHL 2370 (two credits) prior to a new course, Women's Cancer (three credits) in the summer of their first year. While the OGP will be an innovative, contemporary, and comprehensive Graduate Program to train the next generation of cancer researchers, we do not propose that it be exclusive. We will integrate with existing Graduate Programs who offer electives that interest our students, and our electives will be open to Graduate Students in other programs. Students will also complete a second laboratory rotation.

- MSOGP 3000 - FUNDAMENTALS OF CLINICAL ONCOLOGY
- MSMI 2210 - COMPREHENSIVE IMMUNOLOGY
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 2370 - DRUG DISCOVERY

Summer

In the summer concluding their first year in the Program, OGP students will take the same Scientific Ethics (one credit) and Statistics (three credits) courses currently required of all students in the IBGP and other SOM PhD programs. Many of the faculty who will participate in OGP have participated in the aforementioned courses and will continue to do so once the OGP is established. OGP students will also take an elective (two or three credits).

Students will also complete a third laboratory rotation.

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- STATISTICS COURSE

Second Year

Fall

Upon completion of rotations, students will confer with their first-year advisor, rotation mentors, and/or the members of the OGP executive committee to identify a mentor and laboratory in which to conduct their thesis research. Students will commence or continue work in their chosen thesis laboratory, depending on when their laboratory rotations were completed.

If a thesis laboratory is not chosen at the end of the third rotation, a fourth rotation may be offered at the discretion of the Program Directors. These situations will be reviewed on a case by case basis.

- MSMPHL 2300 - MS THESIS RESEARCH

Spring

All second-year students will be required to take a course in scientific writing (one credit). Our experience examining written comprehensive exams is that some students need intensive training in scientific writing as they start working on their comprehensive exams.

- MSOGP 2003 - SCIENTIFIC WRITING

OGP Electives

To be completed during the first two years of study.

OGP students will be required to complete 6 credits of Cancer elective courses based upon their particular area of interest. We anticipate that these will generally be of the following:

- MSMPHL 3330 - GENOME INSTABILITY AND HUMAN DISEASE
- MSOGP 2004 - CANCER IMMUNOLOGY AND IMMUNOTHERAPY
- MSOGP 2005 - BIG DATA SCIENCE
- MSOGP 2006 - WOMEN'S CANCER

Research Credits

Lab Rotations (Fall/Spring/Summer First Year, 9 credits): Students will be required to complete three lab rotations of 12 weeks each for 3 credits per rotation. These rotations will commence in early September. After the rotations, students will sign up for Directed Study (Spring/Summer/Fall First/Second Year, 23/24 credits) or Dissertation Study (after completion of the qualifying exam and advancing to candidacy; until graduation).

Total Credits: 72

Admission Requirements

1. A baccalaureate degree in a biological or physical science or in mathematics, computer science or engineering.
2. A minimum grade point average of 3.2 (on a scale of 4) or its equivalent from an accredited institution.
3. A minimum of three letters of recommendation. Letters from faculty familiar with the applicant's research accomplishments are of particular value to the evaluation process.
4. A personal statement.
5. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or Duo Lingo. A minimum overall TOEFL score of 90 (within a minimum score of 22 in each section), 100 iBT, 7.0 on the IELTS, or 120 on Duo Lingo is required for admission to the program. Scores must be less than two years old. To submit TOEFL scores, use Institution Code 2927 and Department Code 45. Applicants who have earned a bachelor's degree or higher from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Course Curriculum

In line with University requirements, students will be required to earn 32 course credits and 40 PhD dissertation credits in order to be eligible for graduation from the program.

Laboratory Rotations

Laboratory rotations are important for helping to ensure a good fit between a student and PhD mentor. Rotations in the OGP will run for 12 weeks. This is sufficient time for the student and potential mentor (and the mentor's lab personnel) to interact, while still allowing time to perform a short-term research project. Each student is required to complete three lab rotations. Students will be expected to complete a short rotation report (2-3 pages), to be turned in within 1 week of the end of the rotation, detailing the goal(s) of the project and its rationale, as well as any results obtained and potential future directions. At the end of each rotation, students will be evaluated by the faculty member supervising the rotation; these evaluations will be forwarded to the Program Directors and will become part of the student's academic record. Rotations will be graded, and each rotation will receive 3 credits.

Course Instruction

Courses will be taught by Oncology Graduate Program Faculty who will be chosen from existing Hillman Cancer Center members. This will fulfill their existing teaching requirement and therefore have no workload impact.

First Year

Fall

All first year OGP students will take a newly developed common courses in the fall semester, to be titled "Fundamentals in Biology" to be directed by Dr. Katherine Aird as well as "Cancer Biology & Therapeutics" an existing course directed by Drs. Laura Stabile and Roderick O'Sullivan (MSCMP3710). These will be three credit courses.

All first-year students will be offered a newly developed common course "Classic Manuscripts in Cancer Biology and Oncology. In this course, students will be taught how to read and analyze scientific literature, with an emphasis on current and classic papers in Oncology. This will be a two-credit course.

Students will also attend one of HCC's research program's work-in-progress conferences where they will learn how to present state-of-the-art research in Oncology.

Finally, students in the fall of year 1 will complete a laboratory rotation of 12 weeks each (three credits).

- MSOGP 2000 - FUNDAMENTALS IN BIOLOGY
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSOGP 2001 - CLASSIC MANUSCRIPTS IN CANCER BIOLOGY AND ONCOLOGY

Spring

All first-year students will be required to take a newly developed common course "Fundamentals of Clinical Oncology" to be directed by Dr. Chris Bakkenist. This will be a three-credit course.

All first-year students will be required to take three elective courses in the Spring of the first year (two or three credits). These may be electives offered by OGP or other Graduate Programs. For example, we imagine that some OGP students will elect to take an existing course, Comprehensive Immunology MSMI 2210 with PMI (two credits) prior to taking a new course, Cancer Immunology and Immunotherapy (three credits) in the summer of their first year. Some OGP students may take an existing course, Principles of Pharmacology MSMPHL 2310 (two credits) and/or Drug Discovery MSMPHL 2370 (two credits) prior to a new course, Women's Cancer (three credits) in the summer of their first year. While the OGP will be an innovative, contemporary, and comprehensive Graduate Program to train the next generation of cancer researchers, we do not propose that it be exclusive. We will integrate with existing Graduate Programs who offer electives that interest our students, and our electives will be open to Graduate Students in other programs. Students will also complete a second laboratory rotation.

- MSOGP 2002 - FUNDAMENTALS OF CLINICAL ONCOLOGY
- MSMI 2210 - ADVANCED IMMUNOLOGY
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 2370 - DRUG DISCOVERY

Summer

In the summer concluding their first year in the Program, OGP students will take the same Scientific Ethics (one credit) and Statistics (three credits) courses currently required of all students in the IBGP and other SOM PhD programs. Many of the faculty who will participate in OGP have participated in the aforementioned courses and will continue to do so once the OGP is established. OGP students will also take an elective (two or three credits).

Students will also complete a third laboratory rotation.

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- STATISTICS COURSE

Second Year

Fall

Upon completion of rotations, students will confer with their first-year advisor, rotation mentors, and/or the members of the OGP executive committee to identify a mentor and laboratory in which to conduct their thesis research. Students will commence or continue work in their chosen thesis laboratory, depending on when their laboratory rotations were completed.

If a thesis laboratory is not chosen at the end of the third rotation, a fourth rotation may be offered at the discretion of the Program Directors. These situations will be reviewed on a case by case basis.

- MSMPHL 2300 - MS THESIS RESEARCH

Spring

All second-year students will be required to take a course in scientific writing (one credit). Our experience examining written comprehensive exams is that some students need intensive training in scientific writing as they start working on their comprehensive exams.

- MSOGP 2003 - SCIENTIFIC WRITING

OGP Electives

To be completed during the first two years of study.

OGP students will be required to complete 6 credits of Cancer elective courses based upon their particular area of interest. We anticipate that these will generally be of the following:

- MSMPHL 3330 - GENOME INSTABILITY AND HUMAN DISEASE
- MSOGP 2004 - CANCER IMMUNOLOGY AND IMMUNOTHERAPY
- MSOGP 2005 - BIG DATA SCIENCE
- MSOGP 2006 - WOMEN'S CANCER

Research Credits

Lab Rotations (Fall/Spring/Summer First Year, 9 credits): Students will be required to complete three lab rotations of 12 weeks each for 3 credits per rotation. These rotations will commence in early September. After the rotations, students will sign up for Directed Study (Spring/Summer/Fall First/Second Year, 23/24 credits) or Dissertation Study (after completion of the qualifying exam and advancing to candidacy; until graduation).

Total Credits: 72

Interdisciplinary Biomedical Graduate Program

Interdisciplinary Biomedical Graduate Program

Interdisciplinary Biomedical Graduate Program

Through the Interdisciplinary Biomedical Graduate Program, students may be admitted into one of the following 2 PhD degree-granting programs in the School of Medicine:

- Cellular and Molecular Pathology (PhD)
- Molecular Pharmacology (PhD)

Students will not be admitted to pursue a master's degree. However, students who cannot complete the PhD program due to extenuating personal, financial, academic, or medical reasons may be awarded a master's degree.

The Interdisciplinary Biomedical Graduate Program is flexible and accommodates students whose research interests are still evolving by introducing them to a variety of fields through interdisciplinary courses and laboratory experiences. For those students who have a clearly defined research interest, the program offers the opportunity to move quickly into a laboratory and accelerate their study.

For more information on Admissions, Financial Assistance, Training Faculty, etc. please visit www.gradbiomed.pitt.edu

Academic Standards

Students must maintain a minimum overall cumulative GPA of 3.00. In addition, a minimum of a B grade must be earned in each of the required courses and in each of the degree-granting program core courses.

General Degree Requirements - All Interdisciplinary Biomedical Graduate Students

The first term core course, Foundations of Biomedical Science, is required of all students and is followed by increasingly specialized course work in the discipline-specific program the student has chosen. A course in biomedical experimental design and analysis and a course in research ethics are also required of all students. The first year includes three laboratory research rotations. (See listing of Required Courses below.) Students are guided through their first year of graduate study by a faculty mentor assigned by the program.

The mentor helps to identify rotation laboratories, provides advice on classes, and ensures that students reach appropriate milestones in the first year of the program. At the end of the first year, a preliminary student performance evaluation is conducted by the Program Steering Committee. When a student has successfully completed the preliminary evaluation and chosen a dissertation advisor, the student transfers into one of the degree-granting programs.

Evaluation following the first year is undertaken by the degree-granting program and includes course performance and a comprehensive exam at the end of the second year of study. The comprehensive exam is in the form of an original research proposal followed by an oral examination before a faculty committee. Upon successful completion of the comprehensive exam, the student nominates a dissertation advisory committee composed of a minimum of 5 members. A majority of the committee (including the major advisor) must have graduate faculty status. The student then presents a dissertation proposal to the committee and is admitted to candidacy. The training program is completed by execution of an original and independent research project and defending a dissertation. Please see Regulations Pertaining to Doctoral Degrees.

Required Courses-All Students

The following courses are required of all students in the Interdisciplinary Biomedical Graduate Program:

INTBP 3000 - FOUNDTNS OF BIOMEDICAL SCIENCE

INTBP 3005 - FOUNDATIONS JOURNAL CLUB

MSCMP 2280 BASIC UNDERSTANDING OF PROFESSIONALISM AS RELATED TO GRADUATE EDUCATION

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

INTBP 3010 - LABORATORY RESEARCH ROTATION

A minimum of 72 credits (32 course credits and 40 PhD dissertation research credits) beyond the baccalaureate degree is required for the PhD degree.

Cellular and Molecular Pathology (PhD)

Core Courses

The Cellular and Molecular Pathology graduate program offers an exciting, interdisciplinary training environment at the intersection of cell biology, molecular biology, immunology, and artificial intelligence, all focused on understanding human disease. With a strong emphasis on translational research and regenerative medicine, CMP bridges basic science and clinical investigation to address fundamental questions about tissue development and homeostasis, disease mechanisms, and innovative therapeutic strategies. Students engage in cutting-edge research using the latest technologies, exploring topics such as cellular reprogramming at the Center for Transcriptional Medicine (CTM); liver development, disease, and therapy; developmental neuroscience; gene regulation; cancer biology; angiogenesis and the vasculature; pulmonary disease; inflammation and autoimmunity; genetics; and molecular diagnostics. The integration of computational tools and machine learning through the Computational Pathology & AI Center of Excellence (CPACE) further expands the scope of discovery. Research takes place in state-of-the-art laboratories across the medical center campus, fostering collaboration between basic scientists and clinician-investigators (MD's, PhD's, and MD/PhD's), preparing students to become leaders in biomedical research.

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses for the Cellular and Molecular Pathology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSCMP 2280 - BASIC UNDERSTANDING OF PROFESSIONALISM AS RELATED TO GRADUATE EDUCATION
- MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN and EITHER
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS OR
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY OR
- MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Additionally, we require at least 5 terms of:

- MSCMP 2750 - RESEARCH SEMINAR

As well as two electives of your choice

from either the above electives or from courses throughout the School of Medicine on diverse topics of interest to students such as the following CMP-sponsored courses (partial listing):

- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY

Molecular Pharmacology (PhD)

Biomedical research in the Molecular Pharmacology program is focused on cutting-edge discovery of molecular and cellular mechanisms of intracellular signaling using a combination of biochemical, molecular biological, biophysical, ultrastructural, and imaging approaches. Basic research into cellular communication in health and disease is the main emphasis of the program with the added advantage of an array of translational opportunities into the development and testing of novel therapeutic agents. Applications of this common theme are directed toward research in molecular biology of cancer, neuropharmacology, cell and organ system pharmacology, signal transduction, neurodegenerative diseases and drug discovery. Formal collaborative interactions with the Pittsburgh Cancer Institute, the Center for Neuroscience, the Pittsburgh Institute for Neurodegenerative Diseases (PIND), the Division of Clinical Pharmacology, the University of Pittsburgh Drug Discovery Institute, University of Pittsburgh Structural Biology Imaging Center, the Vascular Medicine Institute and the Center for Biological Imaging provide a broad multidisciplinary approach to training in modern molecular pharmacology.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the molecular pharmacology program:

- INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS
- MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- MSMPHL 3360 - MOLECULAR PHARMACOLOGY
- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION
- MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS
- OR
- MSMPHL 3375 - NEUROPHARMACOLOGY
- OR
- MSMPHL 2370 - DRUG DISCOVERY
- OR
- MSMPHL 3330 GENOME INSTABILITY AND HUMAN DISEASE

Additionally, we require MSMPHL 2350 (F & Sp) 1 Cr. RESEARCH SEMINAR and MSMPHL 3320 (F & Sp) 1 Cr. JOURNAL CLUB

Admission Requirements and Procedures

Students with at least a baccalaureate degree in biological or physical science or in mathematics, computer science or engineering are encouraged to apply. Admissions are based upon the student's academic record, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), IELTS score of at least 7.00, or a minimum score of 120 on the Duolingo is required for admission to the IBGP. Applicants who have earned a bachelor's degree or a higher degree from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Additional information and a link to the online application can be a found at

https://www.gradbiomed.pitt.edu/

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Academic Standards

Students must maintain a minimum overall cumulative GPA of 3.00. In addition, a minimum of a B grade must be earned in each of the required courses and in each of the degree-granting program core courses.

General Degree Requirements - All Interdisciplinary Biomedical Graduate Students

The first term core course, Foundations of Biomedical Science, is required of all students and is followed by increasingly specialized course work in the discipline-specific program the student has chosen. A course in biomedical experimental design and analysis and a course in research ethics are also required of all students. The first year includes three laboratory research rotations. (*See listing of Required Courses below*.) Students are guided through their first year of graduate study by a faculty mentor assigned by the program.

The mentor helps to identify rotation laboratories, provides advice on classes, and ensures that students reach appropriate milestones in the first year of the program. At the end of the first year, a preliminary student performance evaluation is conducted by the Program Steering Committee. When a student has successfully completed the preliminary evaluation and chosen a dissertation advisor, the student transfers into one of the degree-granting programs.

Evaluation following the first year is undertaken by the degree-granting program and includes course performance and a comprehensive exam at the end of the second year of study. The comprehensive exam is in the form of an original research proposal followed by an oral examination before a faculty committee. Upon successful completion of the comprehensive exam, the student nominates a dissertation advisory committee composed of a minimum of 5 members. A majority of the committee (including the major advisor) must have graduate faculty status. The student then presents a dissertation proposal to the committee and is admitted to candidacy. The training program is completed by execution of an original and independent research project and defending a dissertation. *Please see Regulations Pertaining to Doctoral Degrees*.

Required Courses-All Students

The following courses are required of all students in the Interdisciplinary Biomedical Graduate Program:

INTBP 2000 - FOUNDTNS OF BIOMEDICAL SCIENCE

INTBP 2005 - FOUNDATIONS CONFERENCE

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

INTBP 2010 - LABORATORY RESEARCH ROTATION

A minimum of 72 credits (32 course credits and 40 PhD dissertation research credits) beyond the baccalaureate degree is required for the PhD degree.

School of Nursing

School of Nursing

The School of Nursing was established as an independent school of the University by action of the Board of Trustees in April 1939 and was opened in September of the same year. The University conferred the degree Bachelor of Science in Nursing Education for the first time in August 1939. The University conferred the first Bachelor of Science in Nursing degrees in February 1942.

The first Master's degree was awarded in 1944, and the first Doctor of Philosophy degree in 1957. The first Doctorate of Nursing Practice degree was awarded in 2008.

Mission

The University of Pittsburgh School of Nursing, founded in 1939, is one of the oldest programs in baccalaureate and doctoral education in nursing in the United States. As one of the nation's distinguished schools of nursing, the resources of the School of Nursing constitute an invaluable asset for the intellectual, scientific, and economic enrichment of health care in Pennsylvania, the nation, and throughout the world.

The School of Nursing's mission is to:

- provide high-quality undergraduate education in nursing;
- maintain and develop superior graduate programs in nursing that respond to the needs of health care in general and nursing in particular within Pennsylvania, the nation, and the world;
- engage in research and other scholarly activities that advance learning through the extension of the frontiers of knowledge in health care;
- cooperate with health care, governmental, and related institutions to transfer knowledge in health sciences and health care;
- offer continuing education programs adapted to the professional upgrading and career advancement interests and needs of nurses in Pennsylvania; and
- make available to local communities and public agencies the expertise of the School of Nursing in ways that are consistent with the primary teaching and research functions and contribute to the intellectual and economic development in health care within the commonwealth, the nation, and the world.

Master's Program Admission Process and Admission Criteria

Applications are available on our website. Admission criteria and application deadlines are also provided on the school's website. Complete applications will be reviewed, and interviews may be conducted (virtual) prior to an admission decision. Applicants must apply online.

Applications to the Master of Science in Nursing Program are reviewed using a standardized process. Applicants must meet the criteria listed below. Qualified applicants are considered without regard to race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era.

Applicants must have:

- Official transcripts for all undergraduate and graduate work
    - A baccalaureate degree in nursing from an ACEN, NLN, or CCNE-accredited program
    - International applicants must provide evidence of a degree comparable to an American baccalaureate degree.
- Current RN license in a U.S. state/territory or location where the student will complete clinical requirements
- GPA of 3.0 or higher from a previous nursing degree
- Pre-admission interview (pre-admission interviews may be conducted virtually)
- Three letters of recommendation attesting to the applicant's capacity and potential for master's study from each of the following:
    - the director or a faculty member from the most recent academic program attended (if the applicant has been a nursing student in the last 5 years)
    - a recent employer
    - a person who can speak to the applicant's professional work.
- Personal essay (limit to 2-3 pages, single-spaced)
- Completed applicant survey
- Current CV or resume
- Non-refundable application fee.

Doctor of Nursing Practice (DNP) Program Admission Process and Admission Criteria

Application Instructions

Pitt Nursing accepts applications for admission to all areas of the DNP Program. Each applicant must complete and submit the following:

1. Application form
2. Non-refundable application fee
3. Complete official transcripts of all undergraduate and graduate education
4. Admission test scores, if applicable
5. Three letters of professional recommendation indicating the reviewer's support of the student's ability to successfully complete a demanding graduate-level academic and clinical program.
   At least one recommendation should come from a current or recent direct supervisor. These letters will be submitted by the reviewer through the application software.
6. Personal essay (limit to 2-3 pages, single-spaced)
7. Current CV or resume.

All completed applications must be submitted to the SON Admissions Office, which will forward them to the SON Admissions Committee or Nurse Anesthesia Admissions Committee for review and appropriate action.

The SON Admissions Committee or the Nurse Anesthesia Admissions Committee completes the decision assignment in the online system and submits it to the SON Admissions Office, which will notify applicants of the admission decision. Applicants who do not qualify for admission to full graduate status may be considered for provisional status except for international applicants.

Admission Criteria

You may apply to the DNP program at various points in your educational career. The school offers both **BSN to DNP** and **MSN to DNP** pathways; your choice will depend on the degrees you previously earned and the majors/concentrations you select.

Students currently enrolled in their final year of a BSN program may apply to the BSN-to-DNP focus areas that do not require clinical experience beyond the BSN program. If offered admission, it would be contingent on the student's (1) successful completion of the BSN and (2) obtaining the RN license.

BSN-prepared students, who are currently enrolled in their last year of an MSN or master's program in a related focus, may apply to the MSN to DNP pathway. If offered admission, it would be contingent on the student's (1) successful completion of the MSN or master's program in a related focus and (2) fulfillment of all admission criteria.

The University of Pittsburgh School of Nursing only admits a **Fall Term Cohort** to all DNP Program majors/concentration except the Nurse Anesthesia BSN to DNP major, which only admits a **Spring Term Cohort**, which can matriculate in Fall Term if desired. Application deadlines are provided on the school's website.

Applicants must apply online.

Admission to the DNP Program

The DNP Program admits BSN graduates, advanced practice nurses, and nursing administrators who have completed a nursing degree from a ACEN, NLN, or CCNE-accredited program.

BSN to DNP

- Current RN license in a U.S. State/Territory or location where the student will complete clinical requirements
- GPA ≥ 3.0 in BSN or entry-level MSN from an ACEN, NLN, or CCNE-accredited program
- Applicants for the DNP program must satisfy a statistics prerequisite. There are two ways in which the requirement can be satisfied:
    - Applicants who have completed a relevant course and earned a grade of B or higher within five (5) years of starting their studies will be considered as having met this requirement.
    - Applicants who have been admitted into the program but finished their coursework more than five (5) years ago and/or earned below a B will need to complete the School of Nursing-developed Statistics Modules prior to beginning the program. These modules cover essential foundational concepts that our faculty identified as critical to success.
    - Separately, any admitted student who has already satisfied the prerequisite but would like additional preparation may also opt to complete the modules as a refresher.
- Clinical experience for select focus areas** (*required or preferred for selected majors and concentrations*)
- Pre-admission interview (if the applicant resides at a great distance, a virtual interview may be conducted)
- Evidence of ability to communicate in writing through the required personal essay

MSN to DNP

- Current RN license in a U.S. State/Territory or location where student the will complete clinical requirements
- GPA ≥ 3.0 in MSN from an accredited program or master's in a related field (must have BSN from an ACEN, NLN, or CCNE-accredited program)
- Applicants for the DNP program must satisfy a statistics prerequisite. There are two ways in which the requirement can be satisfied:
    - Applicants who have completed a relevant course and earned a grade of B or higher within five (5) years of starting their studies will be considered as having met this requirement.
    - Applicants who have been admitted into the program but finished their coursework more than five (5) years ago and/or earned below a B will need to complete the School of Nursing-developed Statistics Modules prior to beginning the program. These modules cover essential foundational concepts that our faculty identified as critical for success.
    - Separately, any admitted student who has already satisfied the prerequisite but would like additional preparation may also opt to complete the modules as a refresher.
- Clinical experience for select focus areas** (*required or preferred for selected majors and concentrations*)
- Pre-admission interview (if the applicant resides at a great distance, a virtual interview may be conducted)
- Evidence of ability to communicate in writing through the required personal essay
- Nurse Anesthesia MSN to DNP (*additional requirements*)

- Current Nurse Anesthetist certification in a U.S. State/Territory or location where the student will complete the DNP Scholarly Project
- Minimum of 3.0 GPA in MSN or MS in Nurse Anesthesia from an accredited program

****Clinical Experience for Select Focus Areas**

- **Neonatal NP**: Equivalent of 2 years full time (within last 5 years) nursing experience in the care of critically ill newborns, infants, and children in critical care inpatient settings (preferably Level III NICU). Students may enroll in pre-clinical courses while obtaining practice experience.
- **Health Systems Executive Leadership:** a minimum of 2 years of leadership or management experience.
- **Nurse Anesthesia BSN to DNP:** Minimum 1-year full-time ICU/critical care nursing experience (within last 5 years) by start of program (may apply if employed in ICU/critical care and will have required experience before admission term). Taking the GRE is optional but may be considered supplemental information in the holistic admission process.

Doctor of Philosophy (PhD) Admission Process and Admission Criteria

The Doctor of Philosophy (PhD) program follows a **Fall Term Cohort Only** admissions process. Applications to the PhD program are accepted as a cohort. Application decisions will be communicated electronically by email. See Application Deadlines for more information. Applicants must apply online.

The School of Nursing offers BSN-PhD and MSN-PhD options. The School of Nursing offers BSN-PhD and MSN-PhD options. A baccalaureate or a master's degree in nursing is preferred. Applicants who do not have a baccalaureate or master's degree in nursing as their first professional degree will be considered on an individual basis. The School of Nursing also offers a currently matriculating BSN to PhD option, in which a student who has not yet completed the BSN can be admitted conditionally into the PhD program pending successful completion of their BSN. Interested applicants should contact the Center for Student Success at 412-624-4586 or PittNursing@pitt.edu for further information.

Admission to the PhD Program

Admission to the PhD program is assessed through interviews, references, and an essay that provides a written statement of goals, a research focus, and implications for global health. Documentation of academic success is required.

The doctoral faculty strongly recommends that students develop knowledge of and experience with word processing, database management, and computerized literature searches prior to applying to the PhD program.

Length of Program

The post-master's full-time curriculum (MSN to PhD) comprises a minimum of 48 credits, and students may complete the program in approximately 2.5 years, depending on the nature and complexity of their dissertation research. Twenty-four credits are granted from the prior master's program. For prior courses taken elsewhere, an evaluation of the course content must be approved by the Director of the PhD Program to determine its comparability with the coursework at the University of Pittsburgh. Students entering the MSN to PhD program will work with their academic advisor to conduct a gap analysis of prior research-related coursework to determine whether additional research core coursework is needed beyond that specified in the MSN to PhD curriculum plan. The part-time student may complete the program in three to four years. The statute of limitations for completing the MSN to PhD track is eight (8) consecutive calendar years from the first term of registration for credits in the required curriculum plan for the doctoral degree.

The BSN to PhD program requires a minimum of 72 credits. Students admitted to the BSN to PhD track are expected to enroll full-time, and the program can be completed in a minimum of three years, depending on the complexity of the dissertation research. Students are also encouraged to consider obtaining a simultaneous master's degree. The statute of limitations for completing the BSN to PhD track is ten (10) consecutive calendar years from the first term of registration for credits in the required curriculum plan for the doctoral degree.

For more information, see Policy 208.

Doctor of Philosophy (PhD)

The Doctor of Philosophy (PhD) program prepares nurse scholars who will discover and extend scientific knowledge that advances the science and practice of nursing and contributes to other disciplines. Graduates can assume leadership roles in research teams, health care systems, industry, and nursing schools within academic institutions.

The PhD program of study provides a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of content, methods, and values of the discipline of nursing and its relation to other fields. The curriculum includes courses on the philosophical underpinnings and theoretical foundations of research, as well as research design, measurement, and intervention development. Courses also include advanced statistics, advanced quantitative methods, the responsibilities and activities of scientists, and the art and science of teaching and learning. Students work closely with research faculty members from nursing and other disciplines. Each student also participates in two mentored research experiences. The first is the Apprenticeship Practica, wherein students affiliate with a mentor's established research team over time to explore the scientific literature, develop, plan, and implement an apprenticeship research project, and disseminate findings. This experience provides the opportunity to acquire individualized, tangible research skills within a mentored application environment, which is additive to and precedes the dissertation experience. The second mentored research experience is the students' development and implementation of their independent dissertation project, culminating in a dissertation defense. Students prepare and submit applications for competitive research funding.

Admission of International Students (MSN, DNP, and PhD)

Students who reside outside the United States and are applying to the School of Nursing should use the same admissions process and criteria described above. The application should be completed in English and be accompanied by official academic credentials with notarized English translations. Applicants must successfully complete the TOEFL, IELTS, or Duolingo English Test (DET) if English is a second language.

Applicants must also have a professional nursing license in Pennsylvania or a compact state. The following links specify the licensure requirements for the MSN, DNP, and PhD programs. Applicants seeking a professional nursing license are encouraged to visit the Pennsylvania State Board website, which provides information for internationally educated nurses applying to take the NCLEX-RN examination.

Insurance and Health Care Requirements

All admitted students are required to submit a School of Nursing Initial Health Form with documentation of health insurance, COVID-19 vaccination or completion of exemption request form, and Act 33, 34, and 73 clearances prior to beginning their program of study. Once enrolled, students must submit the School of Nursing's annual health insurance verification and obtain an annual influenza vaccination (unless a requested exemption is approved). Individual students must meet additional health requirements of clinical agencies, such as TB screening and drug testing. Current CPR certification is required prior to enrollment or teaching in all clinical courses.

Students are required to maintain health insurance for the duration of their studies to cover treatment and follow-up for injuries or medical problems incurred during graduate study. The University of Pittsburgh offers insurance programs to graduate students (see: https://www.hr.pitt.edu/students).

Financial Assistance

The sources of awards and aid may include professional nurse traineeships, school scholarships, federal Stafford Loans, private loans, and emergency aid. See Scholarships & Financial Aid for more information.

Academic Policies

All students in the School of Nursing are governed by the School of Nursing and University policies. Therefore, it is essential that students regularly review and familiarize themselves with both general and graduate policies. Questions about policies should be directed to the academic advisor or to the director or coordinator for the program, major, or area of concentration. Policies of particular importance address admission criteria, registration processes, credit transfer, clinical requirements, acceptable academic status, warnings and probation, readmission, degree completion requirements, academic integrity, unsafe clinical performance, and impaired clinical performance. View the School of Nursing Policies.

Advising

Each new student admitted to the graduate program is assigned a faculty advisor from the specific program, major, or area of concentration to which the student is admitted. The faculty advisor provides initial orientation to the school, the University, and the program requirements. Each student is required to meet with their advisor prior to course selection and enrollment for each term. It is also recommended that they meet with their advisor at least once during the term to review their academic progress and address any questions or concerns about their program of study. The advisor is actively involved if there are academic concerns.

Students also have access to a professional staff advisor in the Center for Student Success in the School of Nursing. The staff advisor should be consulted for information about sources of financial aid, scholarships, school policies, registration, course availability, expected graduation dates and requirements, University and School resources, and community resources for help with personal issues. A general orientation program is mandatory for all new students.

General Degree Requirements

To earn the Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP), and the Doctor of Philosophy (PhD), the student must demonstrate satisfactory academic achievement in required coursework prescribed by the curriculum with an overall academic achievement of a minimum Grade Point Average (GPA) of 3.00. Successful completion of a comprehensive examination is also required for the MSN, BSN-to-DNP, and PhD in nursing. The DNP requires successful completion of a DNP project, and the PhD requires successful defense of a dissertation.

Application for Graduation

Each candidate for graduation must file an official Application for Graduation with the professional staff advisor in the School of Nursing Center for Student Success at least three months before the degree is to be completed. A fee will be assessed after the application deadline. All students must be registered for at least one credit during the 12 months prior to graduation and for at least one credit in the term in which they take their preliminary and comprehensive examinations. International students must be registered in accordance with the conditions of their visas.

Major and Degree Options

The School of Nursing offers the following graduate degrees:

- The Master of Science in Nursing (MSN) with majors and areas of concentration in the following areas:
    - Nurse Practitioner
        - Adult-Gerontology Acute Care Nurse Practitioner
        - Family (Individual Across the Lifespan) Nurse Practitioner
        - Neonatal Nurse Practitioner
        - Psychiatric Mental Health Nurse Practitioner
    - Nurse Specialty Role
        - Nursing Informatics *(not currently accepting admissions)*
        - School Nursing *(not currently accepting admissions)*
- The Doctor of Nursing Practice (DNP)

    - MSN to DNP Options
        - Nurse Practitioner *(not currently accepting admissions)*
            - Adult-Gerontology Acute Care Nurse Practitioner
            - Adult-Gerontology Primary Care Nurse Practitioner
            - Family (Individual Across the Lifespan) Nurse Practitioner
            - Pediatric Acute Care Nurse Practitioner
            - Pediatric Primary Care Nurse Practitioner
            - Neonatal Nurse Practitioner
            - Psychiatric Mental Health Nurse Practitioner
        - Clinical Nurse Specialist *(not currently accepting admissions)*
            - Adult-Gerontology (CNS)
        - Nurse Specialty Role
            - Health Systems Executive Leadership
        - Nurse Anesthesia
    - BSN to DNP Options
        - Nurse Practitioner *(not currently accepting admissions)*
            - Adult-Gerontology Acute Care Nurse Practitioner
            - Adult Gerontology Primary Care Nurse Practitioner
            - Family (Individual Across the Lifespan) Nurse Practitioner
            - Pediatric Primary Care Nurse Practitioner
            - Neonatal Nurse Practitioner
            - Psychiatric Mental Health Nurse Practitioner
        - Clinical Nurse Specialist *(not currently accepting admissions)*
            - Adult-Gerontology (CNS)
        - Nurse Anesthesia
- The Doctor of Philosophy (PhD) in Nursing
    - BSN to PhD option
    - MSN to PhD option
    - Doctor of Nursing Practice and Doctor of Philosophy (PhD) Dual program *(not currently accepting admissions)*
        - Adult-Gerontology Clinical Nurse Specialist

Special Academic Opportunities/Programs

The School of Nursing offers a variety of special programs within its master's and doctoral programs:

Minors

Students in the master's program, the DNP program, and the PhD program have the option of completing a minor in:

- Nursing Informatics
- Nursing Administration
- Gerontology for Nurse Practitioners
- Health Care Genetics

The minimum number of credits required to obtain a minor is 8-12.

Post-Professional Certificates

Post-professional certificates are available in:

- School Nursing
- Health Care Genetics

- Nursing Informatics
- Gerontology for Nurse Practitioners
- Adult-Gerontology Acute Care Nurse Practitioner
- Pediatric Acute Care Nurse Practitioner
- Neonatal Nurse Practitioner
- Psychiatric Mental Health Nurse Practitioner

The certificate options require a minimum of 10 credits; additional credits may be required depending on the certificate program and previous graduate course work. All students admitted to a nurse practitioner certificate program must meet the full graduate degree program's curriculum requirements, either through prior coursework or credits earned during the certificate program. Individual review of transcripts will determine the exact number of credits needed to meet curriculum requirements.

Admission criteria for master's level certificate programs include:

- Evidence of successful completion of MSN, DNP, or other relevant first professional degree
- Relevant work experience
- Satisfactory interview with program faculty
- Current RN license if the certificate program includes clinical experiences.

Program and Course Offerings

Certificate

Adult-Gerontology Acute Care Nurse Practitioner Certificate

Full-Time Curriculum

- NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
  OR
- NURNP 2100D - MANAGEMENT OF ADULT WITH EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
- NURNP 2101 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE CLINICAL
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
  OR
- NURNP 2104D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
  OR
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2028 - ROLE PRACTICUM *
- NURNP 2102 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITCALLY ILL ADULT 2

OR

- NURNP 2102D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2
- NURNP 2109 - CLINICAL EMPHASIS - DIRECTED STUDY

Notes

Successful completion of the AG-ACNP Specialty Comprehensive Exam is required.

*Dependent on the individual's previous role, population of patients, and years of experience as a nurse practitioner in an acute or critical care setting with adult/gerontology patients, up to 300 clinical hours may be completed through the option of credit by course examination.

The total credits required will vary based on evaluation of the student's previous coursework. Applicants must have completed courses in their prior MS, MSN, or DNP NP or CNS program that meet the core course requirements to sit for the AG-ACNP certification examination (Advanced Pathophysiology across the Lifespan, Advanced Pharmacology across the Lifespan, Advanced Health Assessment across the Lifespan, and Health Promotion). Additional coursework may be required and/or credit may be given for previous coursework that meets the core curriculum requirements.

Total Credits: 24

*Courses with a "**D**" are delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Certificate in Gerontology for Nurse Practitioners

Curriculum

Core Advance Nursing Practice (Required): 5 Credits

- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
  OR
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
  OR
- NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES

Electives: 6 Credits

Choose two courses from the following:

- GERON 2001 - ETHICS AND AGING
- GERON 2002 - PREVENTION AND HEALTHY AGING
- GERON 2004 - MENTAL HEALTH AND MENTAL ILLNESS IN LATE-LIFE
- GERON 2005 - PERSPECTIVES IN AGING
- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING
- GERON 2009 - AGING AND COMMUNICATION
- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Total Credits: 11

*Courses with a "**D**" can be delivered synchronously via distance technology. Such courses are open only to qualified onsite students as per Policy 438.

Certificate in Health Care Genetics

Curriculum

- Electives (per approval of Coordinator) - **9 cr.**
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 15

Neonatal Nurse Practitioner Certificate

Curriculum

- NURNP 2570 - COMPREHENSIVE NEONATAL ASSESSMENT THEORY
- NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY
- NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL
- NURNP 2028 - ROLE PRACTICUM
- NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY
- NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY
- NNP Clinical Specialty Comprehensive Exam is required.

Total Credits: 25 (minimum)**

**Additional coursework may be required depending upon previous education.

Nursing Informatics Certificate

Curriculum

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT
- NURSP 2085 - NURSING INFORMTCS PRACTICUM 1
- NURSP 2086 - NURSING INFORMTCS PRACTICUM 2

Total Credits: 15

Pediatric Acute Care Nurse Practitioner Certificate

Full-Time Curriculum

- NURNP 2531 - PEDIATRIC ACUTE CARE 1
  OR
- NURNP 2531D - PEDIATRIC ACUTE CARE 1
- NURNP 2533 - MANAGEMENT: PEDIATRIC ACUTE CARE CLINICAL 1
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NURNP 2532 - PEDIATRIC ACUTE CARE 2
  OR
- NURNP 2532D - PEDIATRIC ACUTE CARE 2
- NURNP 2534 - MANAGEMENT: PEDIATRIC ACUTE CARE CLINICAL 2
- NURNP 2028 - ROLE PRACTICUM

Notes:

The Pediatric Acute Care Nurse Practitioner Clinical Specialty Comprehensive Exam is required.

Additional coursework may be required depending upon previous education.

Total Credits: 18-21

*Courses with a "**D**" can be delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Psychiatric-Mental Health Nurse Practitioner Graduate Certificate

The Psychiatric-Mental Health Nurse Practitioner (PMHNP) is prepared to treat individuals with psychiatric disorders across the lifespan in a variety of settings. In this role, the PMHNP assumes responsibility for diagnosing mental health problems, and treating mental health problems with a combination of psychotherapy and psychopharmacological interventions. Our PMHNP graduates work in collaboration with other healthcare professionals in a variety of settings, spanning from outpatient to inpatient settings.

We currently offer a full-time plan of study. This innovative hybrid program is presented in a hybrid format, with online learning activities and intermittent on-campus immersive activities. A sample program plan for full-time study is provided below.

Graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners Certification Board (AANPCB),and for licensure as a nurse practitioner and prescriptive authority through State Boards of Nursing

Psychiatric Mental Health NP

Year 1 - Fall

- NURNP 2330 - PSYCHIATRIC DIAGNOSIS THEORY
- NURNP 2331 - PSYCHIATRIC DIAGNOSIS PRACTICUM
- NURNP 2028 - ROLE PRACTICUM
- NURNP 2325 - PSYCHOPHARMACOLOGY

Year 1 - Spring

- NURNP 2340 - MANAGEMENT OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS
- NURNP 2341 - MANAGEMENT PRACTICUM OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS
- NURNP 2320 - NEUROBIOLOGY OF PSYCHIATRIC DISORDERS

- NURNP 2318 - CHILD AND ADOLESCENT PSYCHIATRIC MANAGEMENT
- NURNP 2327 - PRINCIPLES OF SUBSTANCE USE TREATMENT
- NURNP 2305 - PSYCHOTHERAPEUTIC INTERVENTION

Year 1 - Spring

- NURNP 2345 - MANAGEMENT OF CHRONIC HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS
- NURNP 2346 - MANAGEMENT PRACTICUM CHRONIC HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS
- NURNP 2028 - ROLE PRACTICUM

School Nurse PK-12 Certificate

Curriculum

Fall Term

- NUR 2176 - SEMINAR SCHOOL NURSE
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
  OR
- NUR 2010D - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Spring Term

- NUR 2174 - LEADERSHIP IN SCHOOL NURSING
- NUR 2179 - PRACTICUM SCHOOL NURSE
- NUR 3120 - DIVERSITY, EQUITY, AND INCLUSION IN HEALTHCARE

Summer Term

- NURNP 3025 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE
  OR
- NURNP 3025D - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Total Credits: 15

*Courses with a "**D**" can be delivered synchronously via distance technology for qualified onsite students as per Policy 438.

Doctoral

Adult-Gerontology Acute Care Nurse Practitioner BSN to DNP Concentration

Full-Time Curriculum

Fall Term (YR 1)

- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

OR

- NUR 2011D - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 3012 - PUBLIC POLICY IN HEALTH CARE
- NURNP 2026 - ROLE SEMINAR 1
  OR
- NURNP 2026D - ROLE SEMINAR 1

Spring Term (YR 1)

- NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
  OR
- NUR 2000D - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
- NUR 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
  OR
- NUR 2004D - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
  OR
- NUR 2682D - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY
  OR
- NUR 3099D - THE SCIENCE OF HEALTH CARE DELIVERY
- NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT

Summer Term (YR 1)

- NUR 2031 - THE DIAGNOSTIC PHYSICAL EXAM ACROSS THE LIFE SPAN *
- NUR 2034 - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN
  OR
- NUR 2034D - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN
- NUR 3031 - METHODOLOGIES FOR DNP PROJECTS
  OR
- NUR 3031D - METHODOLOGIES FOR DNP PROJECTS
- NURSP 2092 - LEADERSHIP DEVELOPMENT
  *NOTE: (NUR 2031 is not offered as a Distance Education Course)

Fall Term (YR 2)

- NUR 2032 - DIFFERENTIAL DIAGNOSIS CLINICAL
  OR
- NUR 2032D - DIFFERENTIAL DIAGNOSIS CLINICAL
- NUR 2033 - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN
  OR
- NUR 2033D - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN

Dual

Doctor of Nursing Practice (DNP) and Doctor of Philosophy (PhD) Dual Program

Curriculum

BSN-DNP/PhD for AG-CNS Concentration

Students are expected to enroll Full Time.

The BSN Track consists of a minimum of 121 credits (cr):

- 104 cr. of Didactic courses from the Nursing PhD and AG-CNS DNP Curriculum
- 17 cr. of Clinical Hours (1020 hours)

Fall Term (YR 1)

- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1

Spring Term (YR 1)

- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3010 - PHD DISSERTATION

Summer Term (YR 1)

- NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- NUR 3288 - RESEARCH MEASUREMENT
- NUR 3289 - INTERVENTION DEVELOPMENT
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- NUR 3010 - PHD DISSERTATION

Fall Term (YR 2)

- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 3290 - ADVANCED QUANTITATIVE ANALYTIC METHODS SEMINAR
- CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR
- CLRES 2120 - COST EFFCTVNS ANAL HLTH CARE
- NUR 3010 - PHD DISSERTATION

Spring Term (YR 2)

- NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY
- NURSP 2098 - HEALTHCARE QUALITY
- NUR 2682 - HUMAN GENETICS AND CLINICAL APPLICATIONS
- NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2
- Clinical Research Cognate (CLRES)

Summer Term (YR 2)

- NUR 2034 - ADVANCED PHARMACOLOGY ACROSS THE LIFESPAN
- NUR 2031 - THE DIAGNOSTIC PHYSICAL EXAM ACROSS THE LIFE SPAN
- NUR 3031 - METHODOLOGIES FOR DNP PROJECTS
- NURCNS 2850 - CNS ROLE IMPLEMENTATION
- NUR 3010 - PHD DISSERTATION

Fall Term (YR 3)

- NUR 2033 - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN
- NURSP 2062 - ORGANIZATIONAL AND SYSTEMS MANAGEMENT FOR HEALTHCARE LEADERS
- NURCNS 2851 - CNS CLINICAL PRACTICUM 1
- NUR 3010 - PHD DISSERTATION

Spring Term (YR 3)

- NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
- NURCNS 2852 - CNS CLINICAL PRACTICUM 2
- NURSP 2099 - FINANCIAL, BUSINESS, AND ECONOMICS DRIVERS IN HEALTHCARE MANAGEMENT
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
- NUR 3010 - PHD DISSERTATION

Summer Term (YR 3)

- NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
- NURSP 3096 - DATA ANALYTICS AND CLINICAL SYSTEMS DESIGN
- NUR 3010 - PHD DISSERTATION

Fall Term (YR 4)

- NURSP 2388 - DATABASE MANAGEMENT
- NURCNS 2853 - CLINICAL EMPHASIS SPECIALTY
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURCNS 3039 - DNP-CNS ROLE PRACTICUM
- NUR 3010 - PHD DISSERTATION

Spring Term (YR 4)

- NURCNS 3039 - DNP-CNS ROLE PRACTICUM
- NUR 3037 - DNP PROJECT CLINICAL

- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NUR 3032 - DATA ANALYSIS FOR DNP PROJECTS
- NUR 3010 - PHD DISSERTATION

Optional Breakout

YR 04 OPTIONAL breakout for Full-Time Dissertation (FTDS). If so, insert last 2 Dissertation Credits scheduled for YR 04 into YR 03.

PhD MILESTONE ORAL DEFENSE IN SUMMER TERM. Clinical practice clerkship - 1 day per week

Total Credits: Minimum of 121 Credits

Preliminary and Comprehensive Examinations

The preliminary examination is taken after completing the following required courses.

- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- and Statistics Courses
- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2

By following the established curriculum plan, all full-time students should sit for their Preliminary Examination in their third term of study. The examination is designed to assess the student's breadth of knowledge of the discipline of nursing and potential ability to apply research methods independently. Remediation work may be required if deficiencies are identified that may impede the student's success in program completion. See School of Nursing Policy 230.

The comprehensive examination assesses the student's mastery of the general field of doctoral study, acquisition of depth and breadth of knowledge in a focused area of study, and the ability to use the research methods of the discipline. The comprehensive examination is taken after completion of all required course work and concurrent with the dissertation overview. See School of Nursing Policy 235.

Master's

Neonatal Nurse Practitioner BSN to MSN Concentration

Full-Time Curriculum

Fall Term (YR 1)

PhD

Nursing - BSN to PhD Track, PhD

Curriculum

Students are expected to enroll full time.

The BSN to PhD Track consists of a minimum of 72 credits (cr.):

- 22 cr. from the Research Core
- 9 cr. from the Statistics Core
- 41 cr. for Personalized Scientific Inquiry (PSI) courses (PSI consists of 12 cr. Dissertation, 6 cr. Apprenticeship Practicum, and 23 cr. additional PSI credits, which foster knowledge and skills in the students research focus area and are chosen by the student in conjunction with the academic adviser.)

Fall Term (YR 1)

- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
  OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry (2 cr)

Spring Term (YR 1)

- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
  OR
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3287 - RESEARCH DESIGN & METHODS
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: (2-4 cr)

Summer Term (YR 1)

- NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- NUR 3288 - RESEARCH MEASUREMENT
- NUR 3289 - INTERVENTION DEVELOPMENT
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: (2-4 cr)

Fall Term (YR 2)

- NUR 3290 - ADVANCED QUANTITATIVE ANALYTIC METHODS SEMINAR
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry (3-6 cr)

Spring Term (YR 2)

- NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2
- NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry (4 cr)

Summer Term (YR 2)

- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry (6 cr)

Fall Term (YR 3)

- NUR 3010 - PHD DISSERTATION
- Personalized Scientific Inquiry as needed

Spring Term (YR 3)

- FTDP Full Time Dissertation

Summer Term (YR 3)

- FTDP Full Time Dissertation

Fall, Spring and Summer Term (YR 4)

- FTDP Full Time Dissertation as needed to complete dissertation

Total Credits: Minimum of 72 Credits

Note:

- See School of Nursing Policy 230 regarding the taking of the Preliminary Examination and School of Nursing Policy 235 regarding the Comprehensive Examination/Overview
- FTDP (full-time dissertation 0 credits) can only be taken after passing the Comprehensive Examination, the Dissertation Overview, and completing the minimum 12 credits of NUR 3010 - PHD DISSERTATION

Preliminary and Comprehensive Examinations and Dissertation Overview

The preliminary examination is taken after completing the following required courses.

- NUR 3285 Philosophical Underpinnings (3 cr)
- NUR 3286 Theoretical Foundations for Research (3 cr)
- NUR 3287 Research Design & Methods (3 cr) **
- NUR 3071 Apprenticeship Practicum (2 cr)
- NUR 3288 Research Measurement (2 cr) **
- NUR 3289 Intervention Development (2 cr)
- and Statistics Courses
- NUR 3112 Applied Parametric and Non-Parametric Statistics for the Health Sciences 1
- NUR 3113 Applied Parametric and Non-Parametric Statistics for the Health Sciences 2

**MSN-PhD students may have completed these courses in their prior degree program

By following the established curriculum plan, all full-time students should sit for their Preliminary Examination early in their fourth term of study. The examination is designed to assess the student's breadth of knowledge of the discipline of nursing and potential ability to apply research methods independently. Remediation work may be required if deficiencies are identified that may impede the student's success in program completion. See School of Nursing Policy 230.

The *comprehensive examination* assesses the student's mastery of the general field of doctoral study, acquisition of depth and breadth of knowledge in a focused area of study, and the ability to use the research methods of the discipline. The comprehensive examination is taken after completion of all required course work and concurrent with the dissertation overview. See School of Nursing Policy 235.

The *dissertation overview* requires the student to formulate a research plan and to justify the selected approach for studying the topic before the student's dissertation committee.

Dissertation Committee

Prior to the comprehensive examination and the dissertation overview, the student and research advisor propose, subject to approval by the director of the PhD program and the Dean, a committee of four or more members, one of whom must be from another school within the University and the majority of whom must be from the School of Nursing. A majority, including the major advisor, must also be full members of the Graduate Faculty of the University.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees of the University bulletin.

Admission to Candidacy for the Doctor of Philosophy

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary examination, have completed formal courses and the minimum dissertation credit requirements with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed dissertation research by the dissertation committee. Admission to candidacy is granted by the Dean.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study (nine credits), which excludes any other employment except as approved. The doctoral student must notify the PhD program director in writing the term that this occurs.

Dissertation and Abstract

The date and title of the dissertation defense must be submitted to the PhD program director one month prior to the final defense. *For definitions and detail on what constitutes an acceptable dissertation, please see Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees of this bulletin.*

Personalized Scientific Inquiry (BSN to PhD)

The University of Pittsburgh values personalization of students' educational experiences. To that end, the PhD program allows students to develop a personalized approach to choosing additional coursework congruent with knowledge and skill development in their chosen areas of focal research concentration.

Students are encouraged to take Personalized Scientific Inquiry (PSI) courses to develop an understanding of essential knowledge to a focused area of study in nursing.

- Consists of a minimum of 23 credits in the BSN to PhD track.
- Students are encouraged to take PSI courses outside of the School of Nursing and outside of the nursing discipline.
- It is suggested that one PSI course be an advanced statistics or research methods course.
- No more than one of the PSI courses is recommended to be taken as NUR 3060 Independent Study, so as to provide for a richer experience in the presence of other students and other disciplines.

Research Apprenticeship Model

The PhD program includes an apprenticeship model of research training that combines rigorous coursework and an apprenticeship with successful research mentors. This model includes a formalized series of Apprenticeship Practica (minimum of 6 credits under the direction of a research mentor), with recommended experiences and a series of defined deliverables. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored research application environment, which is additive to and precedes the dissertation experience.

All mentors are experienced nurse researchers. During their apprenticeships, students acquire tangible skills in research methodology, grantsmanship, professional skills, the responsible conduct of research, and dissemination of research findings through publications and presentations. Students receive an intense and comprehensive research experience resulting in publications and pilot data to support applications for independent research funding and dissertation work.

Nursing - Post-MSN to PhD Track, PhD

Curriculum

The MSN to PhD Track consists of a minimum of 48 credits (cr.):

- 13 cr. from the Research Core
- 9 cr. from the Statistics Core
- 26 cr. for Personalized Scientific Inquiry (PSI) courses (PSI consists of 12 cr. Dissertation, 6 cr. Apprenticeship Practicum, and minimum 8 cr. additional PSI credits)

The advisor and MSN to PhD Track student will, upon admission to the program, prepare a gap analysis based on review of the prior master's program to determine the nature of the 8 additional PSI credits (and possibly more if necessary), and also if additional Research Core coursework is needed. The student's prior preparation in their master's program (research focused or clinically focused) will drive the gap analysis.

Fall Term (YR 1)

- NUR 2112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
  OR
- NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1
- NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH
- NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: (2 cr)

Spring Term (YR 1)

- NUR 2113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
  OR
- NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2
- NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH
- NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP

Summer Term (YR 1)

- NUR 2114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
  OR
- NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: Intensive Methods (2 cr)
- Cognate (3 cr)

Fall Term (YR 2)

- NUR 3290 - ADVANCED QUANTITATIVE ANALYTIC METHODS SEMINAR
- NUR 3010 - PHD DISSERTATION
- NUR 3071 - PHD RESEARCH APPRENTICESHIP
- Personalized Scientific Inquiry: Intensive Methods (2 cr)
- Personalized Scientific Inquiry: (2 cr)

Spring Term (YR 2)

- FTDP Full Term Dissertation

Summer Term (YR 2)

- FTDP Full Time Dissertation

Fall Term (YR 3)

- FTDP Full Time Dissertation

Total Credits: Minimum of 48 Credits

(in addition to 24 credits from master's degree)

Note:

- See Policy 230 regarding the taking of the Preliminary Examination and Policy 235 regarding the Comprehensive Examination/Overview.
- FTDP (full-time dissertation, 0 credits) can only be taken after completing the minimum 12 credits of NUR 3010 - PHD DISSERTATION

Preliminary and Comprehensive Examinations and Dissertation Overview

The preliminary examination is taken after completing the following required courses.

Students receive an intense and comprehensive research experience resulting in publications and pilot data to support applications for independent research funding and dissertation work.

Phd Program

Department of Acute and Tertiary Care

Graduate Certificate

Palliative and End-of-Life Care and Communication Certificate Program

This certificate will provide a theoretical grounding in the principles of patient- and family-centered care for individuals with serious illness across the illness trajectory and at end-of-life, including a general overview of various aspects of EOL care, including pain and symptom management, social and spiritual support, communication skills, basic insurance coverage information, and legal aspects of end-of-life care.

Fall Term

- NUR 2220 - PRINCIPLES OF PALLIATIVE AND END-OF-LIFE CARE

Spring Term

- NUR 2221 - PROMOTING COMFORT THROUGH PAIN AND SYMPTOM MANAGEMENT
- SWINT 2004 - GRIEF AND LOSS: INTERVENTIONS, IMPLICATIONS & UNDERSTANDING

Summer Term

- NUR 2222 - CONVERSATION & COLLABORATION: COMMUNICATION WITH PATIENTS, FAMILIES, AND COLLEAGUES
- SWINT 2004 - GRIEF AND LOSS: INTERVENTIONS, IMPLICATIONS & UNDERSTANDING

Fall Term

- SWINT 2004 - GRIEF AND LOSS: INTERVENTIONS, IMPLICATIONS & UNDERSTANDING

Total Credits: 12

Note: SWINT 2004 - Grief and Loss: Interventions, Implications & Understanding is offered every term in-person but it is also offered hybrid in Spring and Summer term. To complete the certificate students will complete this course once after taking NUR 2220 - Principles of Palliative and End-of-Life Care, totaling 12 credits.

Major

Adult-Gerontology Acute Care Nurse Practitioner MSN

Department of Health Promotion and Development

Certificate

Family Nurse Practitioner Graduate Certificate

Graduates from the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) Post-Professional Certificate are prepared as generalist, principal providers of primary health care across the lifespan. In this role, the FNP assumes responsibility for promoting, maintaining, and restoring health to individuals across the lifespan, from newborns through older adults. This role involves identifying health risks, promoting wellness, diagnosing and managing acute and chronic illnesses, and referring patients to specialty services as needed. Our FNP graduates work in collaboration with other health care professionals in a variety of primary care and subspecialty settings.

We currently offer a full-time plan of study. This innovative hybrid program is presented in a hybrid format, with online learning activities and intermittent on-campus immersive activities. A sample program plan for full-time study is provided below.

Graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) or the American Academy of Nurse Practitioners Certification Board (AANPCB) and for licensure as a nurse practitioner and prescriptive authority through State Boards of Nursing

Department of Nurse Anesthesia

School of Pharmacy

School of Pharmacy

Chartered in 1878, the School of Pharmacy has a tradition of developing leaders and innovators that drive the future of pharmacy. We investigate, discover, and create ways to improve patient health and, through partnerships, change practice and improve efficiency of care. We also use computational and bench research methods to discover and develop drugs and drug delivery, systems, and other novel approaches to optimize therapy. The School of Pharmacy (Pitt Pharmacy) leads the way in education, encouraging learners to personalize their education. Pitt Pharmacy is among the oldest pharmacy schools in the country. Pitt Pharmacy is in the top tier of schools of pharmacy in US News & World Report rankings and NIH-funded research.

Mission

The School of Pharmacy develops pharmacists and pharmaceutical scientists as innovators and leaders to improve the health and well-being of the world around us.

Through inclusive excellence, innovation, and leadership, **we achieve pioneering and exemplary:**

- Pharmacy and pharmaceutical sciences education,
- Research and scholarship, and
- Patient care and service.

Vision

To be an outstanding school of pharmacy renowned for excellence in the discovery and advancement of science-based use of medicines and other interventions to enhance the vitality and quality of life.

Values

Integrity guides our daily work. We foster:

Professionalism
Integrity
Teamwork
Trust
Passion
Health Equity
Accountability
Responsibility
Mutual Respect

Doctor of Pharmacy (PharmD) Program

Mission
The Pitt Pharmacy Doctor of Pharmacy Program inspires students to personalize their education and become medication experts, interprofessional collaborators, and leaders who advocate, champion, and act to improve health, well-being, and quality of life for individuals and communities.

The Doctor of Pharmacy Program emphasizes a problem-based approach to learning from the design of our curriculum to teaching and assessment strategies so that knowledge deepens the real world problem solving abilities of our students. This encourages our students to seek out those pharmacy roles and develop needed expertise that is most meaningful to them, while also providing them with a thorough understanding of generalized pharmacy.

Our innovative curriculum integrates science and practice, emphasizes student-centered learning, and gives our students the best possible preparation for pharmacy practice in any setting they choose.

The professional curriculum is composed of a course of study requiring sixty-two (62) credits of pre-professional study followed by four years of professional courses. The four-year professional curriculum blends active learning in large group classrooms, small group team-based activities, and laboratories with "hands on" experiential learning in diverse practice settings.

Experiential Learning is a foundation of the curriculum, beginning within the first weeks of the first professional (P1) year and sequentially building practice experiences and culminating in eight "full-time" five-week advanced practice experiences in the fourth professional (P4) year. Students progress from early stages of meaningful connections with patients to caring for complex patients with acute and chronic diseases. Practice activities occur in communities, in hospitals and health care settings, and in many unique learning environments that encourage students to personalize their professional development towards career goals.

Accreditation Council for Pharmacy Education (ACPE)

The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 3000, Chicago, IL 60603-3446, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

The University of Pittsburgh Doctor of Pharmacy Program received ACPE accreditation status for 8 years, the maximum period allowable, through June 30, 2033.

Special Academic Opportunities

Pitt Pharmacy provides opportunities for students to personalize their education and achieve personal and professional goals and careers.

Areas of Concentration
Areas of Concentration (ARCOs) provide structured paths for students to focus personal and professional interests while developing specialized knowledge and skills in practice areas. During pharmacy school, students may competitively apply for admission to an ARCO, completing specialized coursework, a scholarly project, and practice experiences, while receiving individualized mentoring by faculty experts in the practice area. Current ARCO specialties include:

- Community Leadership, Innovation, and Practice
- Geriatrics and Palliative Care
- Global Health
- PharmacoAnalytics
- Pharmacotherapy Scholars
- Pharmacy Business Administration
- Research

International Pharmacy Travel
Pitt student pharmacists have opportunities to gain exposure to diverse practices of pharmacy and global cultures through coursework and international practice experiences in countries including Germany, Ireland, Italy, Namibia, and others.

Student-Driven Independent Study
Students have the opportunity to work directly with a faculty member to design an elective Mentored Research or Mentored Inquiry course experience, completing a specific project or inquiry. Students assume active roles in establishing project goals and methods, generating a quality product at its conclusion, such as a research presentation, poster, or other creative scholarly work.

Selecting Experiential Rotations
Students are able to design an individualized program of introductory and advanced pharmacy practice choosing from over 1,800 local, national or international rotations including but not limited to focus areas in health system and ambulatory patient care, community and health system practice, pharmacy administration/management, managed care, and industry.

Admissions

The Pitt Pharmacy PharmD program admits students to PharmD programs through one of two pathways - guarantee or open. Those two admission pathways are detailed below:

Pharmacy Guarantee First Year Admission

The School of Pharmacy does not directly admit first year students to the professional program. All high school students should first submit an application to the University of Pittsburgh Office of Admissions and Financial Aid. The School offers a guaranteed acceptance to a number of high school seniors who enroll at one of the University of Pittsburgh campuses.

Applicants to the Pittsburgh campus should select the Dietrich School of Arts and Sciences as the first-year admitting school. All applicants can select pharmacy in the Guaranteed Admissions drop-down box on the Application for Undergraduate Admissions to be considered for the guarantee as part of the comprehensive individual review for admissions conducted by the University of Pittsburgh Office of Admissions. Students who receive the guarantee are expected to perform well in the pre-professional courses in the Dietrich School of Arts and Sciences or regional campus. To secure a seat in the PharmD Program, students must earn:

- a letter grade of a C or better in all preprofessional courses
- a combined 3.25 or greater overall GPA in PharmD preprofessional courses
- a combined 3.25 or greater GPA in the required math and science preprofessional courses

NOTE: Required math and science courses must be taken at the University of Pittsburgh. AP, dual enrollment, and college in high school credits may be used to fulfill preprofessional credits.

Test optional applicants are eligible for the pharmacy guarantee.

To exercise the Pharmacy guarantee, all applicants must complete the pharmacy admissions process and requirements typically in the second year of study in the Dietrich School of Arts and Sciences or at the regional campus:

- submit a completed application and fee in the Pharmacy College Application System (PharmCAS)
- The PharmCAS application must include three letters of evaluation with two from college faculty in any subject area, math and science are recommended. Letters are NOT accepted from graduate students. The third letter can be from any employer, faculty advisor, pharmacist, health care professional, or supervisor.
- participate in a satisfactory interview, when invited, during the admissions process

- complete standardized writing assessment, when invited

Pharmacy guarantee students who meet these criteria will be admitted into the PharmD Program. Those not meeting these criteria will be considered as part of the open admissions pool that is holistically reviewed by the PharmD Admissions Committee. More information about PharmCAS and application deadlines can be found at www.pharmcas.org.

Open Admission

Students admitted to the program through the open admission pathway compete for remaining spaces in the class. The requirements to be considered a competitive applicant for the Pitt Pharmacy PharmD program are:

- completion of the pre-professional requirements
- Applicants can apply while courses are in progress
- competitive math and science GPA of 3.0 in preprofessional courses
- submission of a verified PharmCAS application and fee
- The PharmCAS application must include three letters of evaluation with two from college faculty in any subject area, math and science are recommended. Letters are NOT accepted from graduate students. The third letter can be from any employer, faculty advisor, pharmacist, health care professional, or supervisor.
- selected applicants will be required to participate in a satisfactory interview (interviews are by invitation only)
- complete standardized writing assessment (selected applicants who are invited for an interview)

More information about PharmCAS and deadlines for application can be found at www.pharmcas.org.

Visit the School of Pharmacy Web site.

Application Procedures and Deadlines

PharmCAS (Pharmacy College Application Service): This service enables students to generate one primary application that can be submitted to multiple PharmD degree programs. All applicants must file an application through PharmCAS, www.pharmcas.org by the application deadline.

The application process, application deadlines, and other admission requirements are summarized on the School of Pharmacy Web site.

Throughout the application process, it is the student's responsibility to follow all instructions and meet all deadlines. Failure to do so might result in their application being canceled. It is highly recommended that students apply early to ensure that all application materials are received by the deadline.

Preparing to Complete the Application

Pitt Pharmacy recommends that students thoroughly review the application process before entering data or filling out forms so that they are aware of all the information they will need to gather and how much time the entire process will take. Visit the PharmCAS Web site at www.pharmcas.org and review the "Preparing to Apply" tab. Then review the Checklist, PharmCAS Instructions, and the Applicant Code of Conduct links. Review the time line for the application process: Admissions Calendar

Complete Preprofessional Courses and Minimum Eligibility Requirements: All required math & science courses must be completed by the end of Spring term of the year of entry in the professional program. All remaining courses should be completed by the end of the Spring term and must be completed prior to the Fall term entry into the professional program.

Tuition and Financial Aid

Tuition rates and fees for the current academic year for the Pittsburgh campus can be found on the University's site at www.tuition.pitt.edu with details for Pennsylvania residents and out-of-state residents. Those without a previous college degree should view information for undergraduates and those who have earned a previous college degree should view the information for graduate students.

The University also offers a wide range of financial support through the Office of Financial Aid and the Financial Wellness Center, where students can receive coaching and advice on financial needs. We encourage all students to explore these options as well.

Pitt Pharmacy is grateful to the many donors who make our scholarships possible each year. The School of Pharmacy has an appointed committee who reviews each individual applicant each year. Scholarships are awarded based on financial need with consideration of merit and service. The needs of the applicant pool change annually, and scholarships are awarded based on an individual's application with regard to the overall needs of the entire applicant pool.

Pitt Pharmacy also provides additional mechanisms to support student achievement by supporting student organizations and student travel.

Academic and Professional Standards

Academic Integrity

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

Enrollment in the School of Pharmacy carries with it obligations of conduct within and outside of the classroom. Professional students are expected to maintain the highest standards of personal integrity and conduct themselves in a manner that is a credit to themselves, the school, and the profession. Students must review and affirm their commitment to ethical and professional behavior to meet the School of Pharmacy Professional Code of Conduct each year.

Academic Standing

Pitt Pharmacy complies with the University Policy regarding Academic Standing Graduate and Professional Students. An exception was granted by the Office of the Provost to allow at least a 2.00 grade point average (GPA) and making satisfactory progress towards the degree to denote students enrolled in the PharmD program are in good academic standing.

The School's policy PharmD Academic Progression of Students governs the academic progression of each PharmD student. Students must review and affirm their understanding of this, and other, policies each year. Good Academic Standing in the program is determined by term and cumulative GPA as well as progress toward a degree, which is defined as successful completion of program requirements such as milestones, clinical experiences and lab/research experiences.

At the end of each term, GPA calculations will be made, including all required professional courses and approved professional electives taken while enrolled in the PharmD program. Students must maintain both term and cumulative GPA of 2.00. Students who fail to maintain a term or cumulative GPA of 2.00 or above will be placed on academic notice and must participate in an academic intervention plan developed by the Academic Performance Committee and PharmD Program Director. Students failing to achieve a term or cumulative GPA of 2.00 or above by the specified deadline or fail to successfully complete the Academic Intervention Plan may be dismissed from the PharmD program. Academic dismissal is a final action within the School.

It is the responsibility of students to monitor their academic progress and become familiar with the program degree requirements and academic regulations.

Clearance and Immunization Policy

The Office of Experiential Learning manages learning experiences in communities and professional practice environments that are embedded across all four years of the PharmD program. Because these experiences involve direct patient contact, the practice sites where students are placed require proof of immunization to communicable diseases, fingerprinting, background checks, select training programs, and drug screens. Students who fail to complete these prerequisites no later than two weeks prior to the start of classes will not be able to fulfill their experiential learning requirements. Pitt Pharmacy works with DISA Healthcare, a background screening and compliance tracking solutions company, to collect and manage the documentation of all such prerequisites. Each student has access to his or her

information through the secure DISA Healthcare web site both as a student and after graduation. The site is a secure site to which only the Office of Experiential Learning Office and the student have access.

A positive criminal history and/or positive drug screen may disqualify a student from completing required experiential learning and may prevent successful completion of the PharmD program. All sites used for experiential learning require students to meet certain prerequisites. These prerequisites may include showing proof of immunization to communicable diseases, undergoing criminal background checks, and drug screening. Failure to meet these prerequisites can result in students being unable to complete their experiential learning requirements.

Additionally, in order to become a licensed pharmacist, many states will inquire as to whether the applicant has been convicted of any misdemeanor, felony, or any illegal act associated with alcohol and/or substance abuse. A criminal history may delay or prevent licensure.

Pharmacy Intern License

Students must obtain their Pennsylvania (PA) Pharmacy Intern License to participate in our Experiential Learning Program. Students may need to obtain their home state intern license if they choose to complete rotations outside of PA. Students also will obtain their PA Authorization to Administer Injectables (aka "Student Immunizer License") in the Spring of the first academic year.

Combined Programs

Pitt Pharmacy offers combined degree pathways for students in the PharmD program who are committed to extending their education to pursue graduate studies. See full details for Doctor of Philosophy (PhD) and Master of Science (MS) programs below.

PharmD/PhD in Pharmaceutical Sciences*

For students interested in pursuing a professional PharmD degree and a research-based PhD degree in pharmaceutical sciences, we offer a combined PharmD/PhD option.

The average time to complete a PhD is 5 years. Students in the combined PharmD/PhD program can reduce this time to 1 year by taking required PhD courses during their PharmD training.

- Students complete the 4-year PharmD professional degree as outlined above.
- Students may apply for the PhD program in the fall of the third professional (P3) year via PharmGRAD. See application instructions outlined below.
- Admission to the PhD program is not guaranteed
- Students in a combined program will begin working with graduate Research Faculty Advisors and become immersed in the research environment during their PharmD training

PharmD/MS in Pharmaceutical Sciences*

For students interested in pursuing a professional PharmD degree and a research-based MS degree in pharmaceutical sciences, we offer a combined PharmD/MS option.

The average time to complete a Thesis MS is 2 years and a non-thesis MS is 3 semesters. By committing to a PharmD/MS, the time to complete the MS can be reduced by up to a year.

- Students complete the 4-year PharmD professional degree as outlined above.
- Students may apply for the Thesis or non-thesis MS program in the fall of the second or third professional (P2 or P3) year via PharmGRAD. See application instructions outlined below.
- Admission to the MS program is not guaranteed
- Students in a combined program will begin working with graduate Research Faculty Advisors and become immersed in the research environment during their PharmD training

*PharmD/PhD or PharmD/MS Pharmaceutical Sciences students can choose between 6 different research focus areas (or tracks): 1) Medicinal chemistry, 2) Biochemical Pharmacology, 3) Pharmaceutics, 4) Clinical Pharmaceutical Science, 5) Pharmacometrics and Systems Pharmacology (PSP), and 6) Pharmaceutical Outcomes Policy and Research.

Some specific courses taken in the PharmD program that can meet credit requirements in the MS and PhD programs, but are not limited to:

- PHARM 3040 Statistical Methods
- PHARM 5218 Pharmacokinetics and Drug Response
- PHARM 3042 Research Practicum
- Journal clubs: examples PHARM 3048 Drug Design and Development Journal Club and PHARM 3072 Topics in Pharmacokinetics/Pharmacodynamics Journal Club
- PHARM 3074 Intro to Regulatory Aspects of Drug Development
- PHARM 3002 Advanced Pharmacokinetics
- PHARM 2003 Pharmacoepidemiology
- PHARM 3049 Scientific Writing Skills

PharmD/MS and non-thesis MS in PharmacoAnalytics - Pharmaceutical Outcomes Research (PA-POR):

For students interested in pursuing a professional PharmD degree and a research-based MS degree in Pharmacoanalytics - Pharmaceutical Outcomes Research, we offer a combined PharmD/MS PA-POR option.

The average time to complete a Thesis MS is 2 years and a non-thesis MS is 3 semesters. By committing to a PharmD/MS PA-POR, the time to complete the MS can be reduced by up to a year.

- Flexible, self-paced and 100% online courses
- Hybrid of synchronous and asynchronous content
- Students complete the 4-year PharmD professional degree as outlined above.
- Students may apply for the Thesis or non-thesis MS program in the fall of the second or third professional (P2 or P3) year via PharmGRAD. See application instructions outlined below.
- Admission to MS program is not guaranteed

Doctor of Philosophy (PhD) or Master of Science (MS) in Pharmaceutical Sciences

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to prepare students to be scientists, leaders, and innovators who think critically, solve complex problems, and advance science and healthcare. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

Training consists of required core courses, elective courses, journal clubs, research presentations, and an original faculty-advised research project leading to a final thesis or dissertation. Students may select to enroll in six focus areas (tracks): 1) Medicinal chemistry, 2) Biochemical Pharmacology, 3) Pharmaceutics, 4) Clinical Pharmaceutical Science, 5) Pharmacometrics and Systems Pharmacology (PSP), and 6) Pharmaceutical Outcomes Policy and Research.

Application Process

Applications must be submitted electronically at the Pharmacy College Application Service for Graduate Programs (PharmGrad). An application fee of $50.00 is required and to cover the cost of the application platform - application fees cannot be waived.

Applications for the Fall term must be submitted no later than January 3, 2026. Visit the School of Pharmacy application page for additional application deadline information, request information link, and other application details.

- Applications require 3 letters of reference written on official letterhead and signed.
- In lieu of personal statements, applicants must answer specific questions within the application.
- Applicants must indicate in which of the six research focus areas (tracks) they are most interested.
- Completed applications submitted before the deadline will be reviewed by faculty within the selected track(s).
- Applicants are strongly encouraged to submit applications as early as possible and email the faculty members whose research aligns with their interests.
- Completed applicants will be invited for virtual interviews, at which time official transcripts will also be required.
- Competitive PhD applicants have research experience and a published research manuscript and/or a MS, PharmD or MD degree
- Competitive thesis MS applicants have some research experience
- Applicants without research experience but want to explore a research career in pharmaceutical sciences are best suited for the non-thesis MS degree
- **IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT.**
- All applicants are for fall term admission only.

International Students

If English is the official language of your country or if you have graduated from a U.S. institution, proof of English proficiency is not required. For all other students, the Test of English as a Foreign Language (TOEFL) is required. The minimum score for consideration for admission is a 100+ composite score with subscores of 20+. The new TOEFL scale as of January 2026 is a 5.0+ composite score with subscores of 4.0+. For IELTS the minimum acceptable score is a 7.0+ composite score with subscores of 6.0+. We are now accepting Duolingo scores if you are not able to take the TOEFL or IELTS. The minimum score for Duolingo is 130 and the test can be found https://englishtest.duolingo.com/applicants Any application with a lesser score will not be reviewed. You must submit TOEFL (or IELTS) scores to PharmGRAD; institution code is 2927.

Tuition

Tuition Rates and Fees can be found at www.tuition.pitt.edu. Visit the School of Pharmacy Scholarships and Awards for more information on financial support offerings.

Length of Programs

The PhD Program requires a minimum of 72 credits. Most students complete the PhD degree within five years. Visit Regulations Governing Graduate Studies for more information on credit requirements, Statute of Limitations, Transfer credits, and Leaves of Absence.

The Thesis-based MS program requires a minimum of 40 credits. Most students complete the MS degree in two academic years. Visit Regulations Governing Graduate Studies for more information on credit requirements, Statute of Limitations, Transfer credits, and Leaves of Absence.

The non-thesis MS program requires a minimum of 34 credits and is usually completed within one calendar year (three semesters). Visit Regulations Governing Graduate Studies for more information on credit requirements, Statute of Limitations, Transfer credits, and Leaves of Absence.

Academic Standards

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

MS in PharmacoAnalytics and Pharmaceutical Outcomes Research

This MS program in PharmacoAnalytics-Pharmaceutical Outcomes Research provides students the opportunity to develop expertise in the application of data science and technology to optimize pharmaceutical use and enhance patient care and outcomes. The program will provide students with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will be competent with identifying big data sources, managing data, using various data analytic techniques from experience with statistical and analytics software to apply towards decision-making processes in the pharmacy field, including drug development, drug pricing and acquisition, and patient care outcomes. Students will work directly with highly accomplished, well-funded research faculty; will have multidisciplinary training opportunities; and gain experience with cutting-edge technologies.

Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); secondary data sources, methods and tools are preferred prior to enrollment.

School of Pharmacy Faculty

Program and Course Offerings

Concentration

Doctor of Pharmacy - Community Leadership, Innovation, and Practice ARCO

The Area of Concentration in Community Leadership, Innovation, and Practice (ARCO-CLIP) provides students with mentoring and learning experiences to cultivate advanced patient care, develop health service innovations, acquire leadership and management skills, and enhance community health. Students completing the ARCO-CLIP will be well prepared to enter leadership and patient care roles in community practice and will be highly competitive for residencies and other advanced practice training opportunities.

ARCO-CLIP Academic Requirements

The ARCO-CLIP consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 21 credits of coursework and rotations in the ARCO-CLIP are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)
- PHARM 5845 - COMMUNITY PHARMACY LEADERSHIP AND MANAGEMENT

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Geriatrics & Palliative Care ARCO

The purpose of the Area of Concentration in Geriatrics and Palliative Care (ARCO-GPC) is to allow students to pursue an area of emphasis with geriatrics and palliative care consistent with their professional interests during their Doctor of Pharmacy (PharmD) education. The ARCO-GPC is intended to give students an in-depth exposure to geriatrics and palliative care pharmacy practice.

ARCO-GPC Academic Requirements

The ARCO-GPC consists of six (6) credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-GPC are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH
- BIOETH 2001 - ETHICS AND AGING
- EPIDEM 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- EPIDEM 2900 - ADVANCED EPIDEMIOLOGY OF AGING
- GERON 2001 - ETHICS AND AGING
- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING
- GERON 2011 - NAVIGATING GRIEF AND LOSS IN OLDER ADULTS
- GERON 2002 - PREVENTION AND HEALTHY AGING
- GERON 2013 - EVIDENCE-BASED APPROACHES TO SUPPORT FAMILY CAREGIVERS
- GERON 2014 - CAREGIVING IN AGING
- GERON 2016 - DIVERSITY IN AGING
- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
- PHARM 2003 - PHARMACOEPIDEMIOLOGY
- PHARM 5840 - PALLIATIVE CARE PHARMACOTHERAPY

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Global Health ARCO

The purpose of the Area of Concentration in Global Health (ARCO-GH) is to allow students to pursue an area of emphasis within global health consistent with their professional interests and while completing their PharmD degree. The ARCO-GH is intended to give students an in-depth exposure to global health pharmacy practice.

ARCO-GH Academic Requirements

The ARCO-GH consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs) in global health, and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-GH are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS
- PHARM 5801 - PHARMACEUTICAL CARE TO UNDERSERVED POPULATIONS
- PHARM 5814 - GLOBAL HEALTH: DETERMINANTS AND APPLICATION
- PHARM 5892 - GLOBAL HEALTH: INTERNATIONAL PHARMACY EXPERIENCE
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - PharmacoAnalytics ARCO

The purpose of the Area of Concentration in Pharmacoanalytics (ARCO-PA) in the School of Pharmacy is to allow students to learn and implement data analysis techniques while completing their PharmD degree. The ARCO-PA is designed to help students utilize data and technology to enhance pharmaceutical use, operations, and outcomes and drive better quality patient care while also providing pharmacists with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will become acquainted with big data sources, managing data, data analytic techniques from experience with statistical and analytics software to apply towards decision-making processes in the pharmacy field, including drug development, drug pricing and acquisition, and patient care outcomes.

ARCO-PA Academic Requirements

The ARCO-PA consists of six credits of approved elective classroom-based courses, two Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credit hours of coursework and rotations in the ARCO-PA are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- PHARM 3045 - ADVANCED STATISTICAL METHODS
- PHARM 3052 - TOPICS AND METHODS IN PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH
- PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES
- PHARM 3301 - SECONDARY DATABASE APPLICATIONS
- PHARM 3302 - CONDUCTING RESEARCH WITH LARGE BIOMEDICAL DATABASES
- PHARM 3303 - TOPICS AND METHODS FOR SECONDARY DATABASE EVALUATIONS
- PHARM 3304 - RESEARCH METHODS FOR PHARMACEUTICAL PRACTICE AND POLICY
- PHARM 3310 - SECONDARY DATA SOURCES, METHODS AND TOOLS
- PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Pharmacotherapy Scholars Program ARCO

The purpose of the Area of Concentration - Pharmacotherapy Scholars Program (ARCO-PT) is to prepare pharmacy students to become highly proficient patient care providers and for a successful transition into competitive post-graduate residency training programs.

ARCO-PT Academic Requirements

The ARCO-PT consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-PT are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 5813 - ACUTE CARE PHARMACOTHERAPY SIMULATION
- PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)

AND minimum 1 credit of additional pre-approved courses inside or outside the School of Pharmacy accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Pharmacy Business Administration ARCO

The purpose of the Area of Concentration in Pharmacy Business Administration (ARCO-PBA) is to allow students to pursue an area of emphasis within management consistent with their professional interests and expose students to an area of pharmacy practice that may best suit their interests. Student leaders and informal organizers may discover that pharmacy leadership provides an energizing career path.

ARCO-PBA Academic Requirements

The ARCO-PBA consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-PBA are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- BCHS 2558 - HEALTH PROGRAM EVALUATION
- PHARM 5815 - CONCEPTS OF MANAGED CARE PHARMACY

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctor of Pharmacy - Research ARCO

The purpose of the Area of Concentration in Research (ARCO-RES) in the University of Pittsburgh School of Pharmacy Doctor of Pharmacy (PharmD) program is to provide students exposure to research fundamentals, cultivate an appreciation for clinical and translational research, and to help position students as highly competitive candidates for formal post-PharmD research education and training.

ARCO-RES Academic Requirements

The ARCO-RES consists of six (6) credits of approved elective classroom-based courses, four Advanced Pharmacy Practice Experiences (APPEs), and an approved project conducted under the guidance of an advisor. A minimum of 16 credits of coursework and rotations in the ARCO-RES are required. It does not require the student to take additional credits, but rather is a way for students to concentrate their classroom and experiential learning experiences in a focused way to meet the intent of the area of concentration.

Choose six credits from pre-approved courses inside and outside of the School of Pharmacy:

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 2003 - PHARMACOEPIDEMIOLOGY
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3034 - TOPICS IN TRANSLATIONAL RESEARCH
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY
- PHARM 3069 - PHARMACOMETRICS
- PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB
- PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)

OR Additional courses inside or outside the School of Pharmacy may also be accepted on a case-by-case basis with prior approval of the oversight group, the course instructor, and the School of Pharmacy Curriculum Committee

Doctoral

Pharmaceutical Sciences - Biochemical Pharmacology Track, PhD

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

PhD Core Curriculum

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES
- PHARM 3053 - FOUNDATIONS IN BIOCHEMICAL PHARMACOLOGY

  A minimum of four credits of focus area (track) approved journal clubs.

  A minimum of forty-five credits of focus area (track) approved electives including but not limited to PHARM 3042 (Research Practicum)
- FTDQ 0000 - FULL-TIME DISSERTATION STUDY

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, PhD

The Clinical Pharmaceutical Scientist Program is a specialty track/program in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

The specific course sequence is determined based on whether students have a previous professional clinical degree (e.g., PharmD or other degree in the health sciences).

PHARM CPS Previous Clinical Degree

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2021 - REGRESSION AND ANOVA
- CLRES 2022 - LOGISTIC REGRESSION
- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3002 - ADVANCED PHARMACOKINETICS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES

  A minimum of four credits of focus area (track) approved journal clubs.

  A minimum of thirty-nine credits of focus area (track) approved electives including but not limited to PHARM 3042 (Research Practicum)
- FTDQ 0000 - FULL-TIME DISSERTATION STUDY

PHARM CPS No Previous Clinical Degree

In addition to above, students entering the program without a clinical degree will also be required to take PHARM 3067 (Clinical Pharmacy Environments) and PHARM 5218 (Pharmacokinetics & Drug Response) in place of 5.5 credits of electives/research practicum.

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a minimum of 72 credit hours to fulfill the requirements for the PhD. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Governing Graduate Study for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Pharmaceutical Sciences - Medicinal Chemistry Track, PhD

The medicinal chemistry track encompasses drug discovery and prepares you with the means to study the behavior of chemical substances at the molecular level.

- You will use computational, biochemical and cell-based screening technologies to identify natural and synthetic compounds with pharmacological activity.
- You will study structure-activity relationships to understand the mechanisms of drug action.
- Your research will be directed towards the identification, synthesis and development of new chemical molecules suitable for biological studies and eventually therapeutic use.

PhD Core Curriculum

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES
- PHARM 3053 - FOUNDATIONS IN BIOCHEMICAL PHARMACOLOGY

  A minimum of four credits of focus area (track) approved journal clubs.

  A minimum of forty-five credits of focus area (track) approved electives including but not limited to PHARM 3042 (Research Practicum)
- FTDQ 0000 - FULL-TIME DISSERTATION STUDY

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a minimum of 72 credit hours to fulfill the requirements for the PhD. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Governing Graduate Study for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Pharmaceutical Sciences - Pharmaceutical Outcomes and Policy Research Track, PhD

Pharmaceutical Outcomes and Policy Research (POPR) is a specialty track/program in Pharmaceutical Sciences. The POPR track will train students to investigate the impact and outcomes of pharmaceutical products, pharmacy services, and pharmaceutical policies across health care systems. The core mission of POPR is the advancement of knowledge about the safety and effectiveness of medicines, and pharmacy's role in improving population health. POPR students most often focus on patient-centered outcomes such as access, safety, quality of care, costs, and patient-reported health. Graduates will be trained to work in a broad range of settings, including: academia; pharmaceutical industry; government organizations such as FDA, AHRQ, NIH; contract research organizations; and health care systems

- You will learn epidemiological study designs, data management, data analysis, and data interpretation.
- You will develop strong quantitative methodological skills in pharmaceutical outcomes and health services research.
- You will apply social/behavioral theory to the study of patient, provider, and organizational behaviors as it relates to pharmaceuticals and pharmacy practice.
- You will learn how pharmaceutical outcomes research is used to inform clinical practice and guide health policy decisions.

PhD Core Curriculum

Pharmaceutical Sciences - Pharmaceutics Track, PhD

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.
- You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.
- Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

Pharmaceutical Sciences - Pharmacometrics and Systems Pharmacology Track, PhD

The Pharmacometrics and Systems Pharmacology (PSP) is an interdisciplinary science to study drug actions and rational development of new drugs through network analysis, multitype-multiscale modeling and simulations "**mechanism-driven**", as well as data analysis "**data-driven**". The PSP track focuses on applying Pharmacometrics and System Pharmacology techniques to facilitate the development of novel drug candidates that are less likely to fail during clinical trials and to provide a better understanding of drug mechanisms of action and therapeutic effects at the systems pharmacology level.

- You will develop a broad knowledge of pharmacometrics and systems pharmacology to develop drug candidates that are less likely to fail during clinical trials.
- You will develop strong computational modeling and simulation expertise from drug target fishing, to drug lead identification, to drug profile optimization.
- You will develop strong computational expertise on pharmacokinetics (PK) and pharmacodynamics (PD) modeling and simulation.
- You will develop skills on multiscale modeling of biological processes at the molecular, gene, organ and organism levels.
- Your will have opportunities to study with faculty from a variety of background including computer-aided drug design, computational and systems biology/pharmacology, population PK/PD modeling, computational chemical genomics, computational biophysics, etc.

- Candidates with programming experience, basic/intermediate knowledge in statistics and/or hands-on modeling experience are highly desired.

This program is associated with the Computational Chemical Genomics Screening Center. More about this program track is here.

Master's

Pharmaceutical Sciences - Biochemical Pharmacology Track, MS

Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

MS Core Curriculum

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3053 - FOUNDATIONS IN BIOCHEMICAL PHARMACOLOGY
- PHARM 3049 - SCIENTIFIC WRITING SKILLS
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES

And pre-approved track electives and minimum of 2 credits of approved journal clubs.

Requirements:

The Thesis-based MS program requires a minimum of 40 credits. The non-thesis MS requires a minimum of 34 credits. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

- PHARM 2010 - MASTER OF SCIENCE THESIS
- PHARM 2041 - MS THESIS RESEARCH PRACTICUM 1
- PHARM 2042 - MS THESIS RESEARCH PRACTICUM 2
- PHARM 2043 - MS THESIS RESEARCH PRACTICUM 3
- PHARM 2044 - RESEARCH PRACTICUM 4

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, MS

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

MS Core Curriculum

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3053 - FOUNDATIONS IN BIOCHEMICAL PHARMACOLOGY
- PHARM 3049 - SCIENTIFIC WRITING SKILLS
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES

And pre-approved track electives and minimum of 2 credits of approved journal clubs.

Requirements:

The Thesis-based MS program requires a minimum of 40 credits. The non-thesis MS requires a minimum of 34 credits. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

- PHARM 2010 - MASTER OF SCIENCE THESIS
- PHARM 2041 - MS THESIS RESEARCH PRACTICUM 1
- PHARM 2042 - MS THESIS RESEARCH PRACTICUM 2
- PHARM 2043 - MS THESIS RESEARCH PRACTICUM 3
- PHARM 2044 - RESEARCH PRACTICUM 4

Pharmaceutical Sciences - Medicinal Chemistry Track, MS

Medicinal Chemistry

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

MS Core Curriculum

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3053 - FOUNDATIONS IN BIOCHEMICAL PHARMACOLOGY
- PHARM 3049 - SCIENTIFIC WRITING SKILLS
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES

And pre-approved track electives and minimum of 2 credits of approved journal clubs.

Requirements:

The Thesis-based MS program requires a minimum of 40 credits. The non-thesis MS requires a minimum of 34 credits. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. - PHARM 2044 - RESEARCH PRACTICUM 4

Pharmaceutical Sciences - Non -Thesis, MS

The School of Pharmacy offers graduate level training to highly motivated individuals.

Why choose the non-research based thesis?

Most students complete the non-thesis MS degree within one calendar year (three semesters). Our MS in Pharmaceutical Sciences attracts students interested in drug discovery, delivery, and metabolism in addition to pharmacology, pharmacokinetics, and pharmacodynamics. Graduating with the MS in Pharmaceutical Sciences will prepare you for employment in pharmaceutical manufacturing plants and labs. Pharmaceutically-trained professionals are involved in biotechnology, research, synthesizing and testing new compounds, in marketing and sales of pharmaceuticals and biomedical devices, and in pharmaceutical benefit management. Some areas where graduates with degrees in Pharmaceutical Sciences are sought after are Cosmetic Science, Industrial Pharmacy, and University-based laboratory areas.

- PHARM 2044 - RESEARCH PRACTICUM 4

Pharmaceutical Sciences - Pharmaceutical Outcomes and Policy Research Track, MS

Pharmaceutical Outcomes and Policy Research (POPR) is a specialty track/program in Pharmaceutical Sciences. The POPR track will train students to investigate the impact and outcomes of pharmaceutical products, pharmacy services, and pharmaceutical policies across health care systems. The core mission of POPR is the advancement of knowledge about the safety and effectiveness of medicines, and pharmacy's role in improving population health. POPR students most often focus on patient-centered outcomes such as access, safety, quality of care, costs, and patient-reported health. Graduates will be trained to work in a broad range of settings, including: academia; pharmaceutical industry; government organizations such as FDA, AHRQ, NIH; contract research organizations; and health care systems

- You will learn epidemiological study designs, data management, data analysis, and data interpretation.
- You will develop strong quantitative methodological skills in pharmaceutical outcomes and health services research.
- You will apply social/behavioral theory to the study of patient, provider, and organizational behaviors as it relates to pharmaceuticals and pharmacy practice.
- You will learn how pharmaceutical outcomes research is used to inform clinical practice and guide health policy decisions.

Pharmaceutical Sciences, MS (thesis-based)

MS in Pharmaceutical Sciences

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to prepare students to be scientists, leaders, and innovators who think critically, solve complex problems, and advance science and health care. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

Training consists of required core courses, elective courses, journal clubs, research presentations, and an original faculty-advised research project leading to a final thesis or dissertation. Students may select to enroll in six focus areas (tracks): 1) Medicinal chemistry, 2) Biochemical Pharmacology, 3) Pharmaceutics, 4) Clinical Pharmaceutical Sciences, 5) Pharmacometrics and Systems Pharmacology (PSP), and 6) Pharmaceutical Outcomes Policy and Research.

Length of Programs

The MS (thesis-based) program requires a minimum of 40 credits. Most students complete the MS degree in two academic years. The non-thesis MS program requires a minimum of 34 credits and is usually completed within one calendar year (three semesters).

Academic Standards

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

Required Courses

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 2010 - MASTER OF SCIENCE THESIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3042 - RESEARCH PRACTICUM
- PHARM 3049 - SCIENTIFIC WRITING SKILLS
- PHARM 3053 - FOUNDATIONS IN BIOCHEMICAL PHARMACOLOGY
- PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES
- PHARM 3XXX - Journal Club (2 credits)
- PHARM - Track-Specific - Electives (1-16 credits)

PharmacoAnalytics - Pharmaceutical Outcomes Research, MS

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to train the next generation of leaders and decision makers seeking to improve the health of the community through outstanding basic and clinical research. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

This MS degree offers healthcare professionals an opportunity to bring data science to the real-world databases with emphasis on using pharmacoanalytic applications. Students will utilize data and technology to enhance pharmaceutical use, operations, and outcomes that drive better quality patient care while also providing pharmacists with the tools and knowledge necessary to analyze trends from large data sets and then interpret these trends in a way that allows them to improve their daily practice. Students will be competent with identifying big data sources, managing data, determining pharmacoepidemiologic observational study designs, data interpretation. Students will apply various data analytic techniques using statistical and analytic software to inform decision-making processes in the pharmacy practice that is driven by patient-centerd outcome assessments.

Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); secondary data sources, methods and tools are preferred prior to enrollment.

Core Courses PharmacoAnalytics

Core Courses PharmacoAnalytics (19.5 credits)

- PHARM 2003 - PHARMACOEPIDEMIOLOGY
- PHARM 3040 - STATISTICAL METHODS
- PHARM 3045 - ADVANCED STATISTICAL METHODS
- PHARM 3049 - SCIENTIFIC WRITING SKILLS
- PHARM 3301 - SECONDARY DATABASE APPLICATIONS
- PHARM 3302 - CONDUCTING RESEARCH WITH LARGE BIOMEDICAL DATABASES
- PHARM 3304 - RESEARCH METHODS FOR PHARMACEUTICAL PRACTICE AND POLICY
- PHARM 3306 - INTRODUCTION TO THE UNITED STATES HEALTHCARE SYSTEM AND PHARMACEUTICALS
- PHARM 3308 - DATA PRIVACY AND SECURITY
- PHARM 3310 - SECONDARY DATA SOURCES, METHODS AND TOOLS
- PHARM 3312 - COMMUNICATING DATA
- PHARM 3303 - TOPICS AND METHODS FOR SECONDARY DATABASE EVALUATIONS
- PHARM 3052 - TOPICS AND METHODS IN PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH

Electives

Choose Electives (minimum 10.5 credits)

- PHARM 3042 - RESEARCH PRACTICUM

- PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES
- PHARM 3300 - CONCEPTS IN PHARMACOECONOMIC AND OUTCOME EVALUATIONS IN HEALTH AND MEDICINE

Professional

Doctor of Pharmacy, PharmD

Doctor of Pharmacy (PharmD) Program

The professional curriculum is composed of a course of study requiring sixty-two (62) credits of pre-professional study followed by four years of professional courses. The four-year professional curriculum blends active learning in large group classrooms, small group team-based activities, and laboratories with "hands on" experiential learning in diverse practice settings.

Experiential Learning is a foundation of the curriculum, beginning within the first weeks of the first professional (P1) year and sequentially building practice experiences and culminating in eight "full-time" five-week advanced practice experiences in the fourth professional (P4) year. Students progress from early stages of meaningful connections with patients to caring for complex patients with acute and chronic diseases. Practice activities occur in communities, in hospitals and health care settings, and in many unique learning environments that encourage students to personalize their professional development towards career goals.

Program Accreditation

The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 3000, Chicago, IL 60603-3446, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

The University of Pittsburgh Doctor of Pharmacy program received ACPE accreditation status for 8 years, the maximum period allowable, through June 30, 2033.

Pre-Professional Requirements

Applicants to the professional pharmacy program must have successfully completed, or be in the process of completing, all prerequisite mathematics and science subjects no later than the spring term of the year of admission. All other pre-professional courses should be completed no later than the first day of the fall term of admission. Pre-professional courses must be taken for a letter grade.

Pre-Professional Courses:

- General Biology (with lab) - 8 credits
- General Chemistry (with lab) - 8 credits
- Organic Chemistry (with lab) - 8 credits
- English Composition - 6 credits
- Calculus - 3-4 credits
- Statistics - 3-4 credits
- Elective courses+ - 24 credits

Total: 60-62 credits

+At least 9 credits must be in the humanities and 9 credits in the social sciences. A course in Public Speaking is recommended.

Non-native English-speaking applicants must supply evidence of their proficiency in the English language.

Degree Requirements

To earn the degree of Doctor of Pharmacy, the student must demonstrate satisfactory achievement in required course work prescribed by the curriculum (*detailed below under Program Description*), earning an overall GPA of 2.00 or higher. Refer to the school's Student Handbook for the guidelines for academic progress.

Program Description

The professional curriculum leads to the Doctor of Pharmacy (PharmD) degree and requires completion of 134.5 credits (note: this curriculum is subject to change):

Fall Term-First Professional Year (P-1)

- PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS
- PHARM 5114 - ANATOMY AND PHYSIOLOGY 1
- PHARM 5120 - THE EMERGING PROFESSIONAL
- PHARM 5122 - CASE CONFERENCE SERIES 1
- PHARM 5124 - BIOCHEMISTRY 1: FUNDAMENTALS
- PHARM 5126 - DOSAGE FORM DESIGN AND DELIVERY
- PHARM 5128 - WHOLE PERSON PHARMACY CARE 1: EXPLORING COMMUNITY, CULTURAL & SOCIAL DETERMINANTS OF HEALTH

Total: 16 credits

Spring Term-First Professional Year (P-1)

- PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS
- PHARM 5115 - ANATOMY AND PHYSIOLOGY 2
- PHARM 5121 - CASE CONFERENCE SERIES 2
- PHARM 5125 - BIOCHEMISTRY 2: DNA, PHARMACOGENOMICS & BIOTECHNOLOGY
- PHARM 5127 - PRINCIPLES OF DRUG ACTION
- PHARM 5129 - WHOLE PERSON PHARMACY CARE 2: EXPLORING POPULATION AND STRUCTURAL DETERMINANTS OF HEALTH
- PHARM 5133 - PROFESSIONAL AND CAREER DEVELOPMENT 1

Total: 16 credits

Fall Term-Second Professional Year (P-2)

- PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE
- PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS
- PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE
- PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE
- PHARM 5220 - CASE CONFERENCE SERIES 3
- PHARM 5222 - FUNDAMENTALS OF IMMUNOLOGY

Total: 15 credits

Spring Term-Second Professional Year (P-2)

- PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION
- PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT- IMMERSION IN PRACTICE
- PHARM 5223 - GASTROENTEROLOGY/NUTRITION
- PHARM 5227 - CASE CONFERENCE SERIES 4
- PHARM 5229 - FUNDAMENTALS OF NEPHROLOGY/PULMONOLOGY
- PHARM 5231 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1: COMMUNITY-BASED
- PHARM 5233 - PROFESSIONAL AND CAREER DEVELOPMENT 2
- PHARM 5235 - DRUG DISCOVERY AND DEVELOPMENT

Total: 15.5 credits

Fall Term-Third Professional Year (P-3)

- PHARM 5318 - ENDOCRINOLOGY
- PHARM 5320 - POPULATION HEALTH AND MANAGEMENT
- PHARM 5322 - PHARMACY LAW
- PHARM 5324 - CASE CONFERENCE SERIES 5
- PHARM 5328 - ADVANCED THERAPEUTICS: IMMUNOLOGY
- PHARM 5330 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING
- PHARM 5332 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2: HEALTH-SYSTEMS-BASED
- PHARM - Professional Elective - 3 credits

Total: 16.5 credits

Spring Term-Third Professional Year (P-3)

- PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS
- PHARM 5315 - ONCOLOGY/HEMATOLOGY
- PHARM 5321 - CRITICAL CARE AND ADVANCED NEPHROLOGY
- PHARM 5323 - CASE CONFERENCE SERIES 6
- PHARM 5325 - NEUROLOGY/PSYCHIATRY
- PHARM 5331 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT
- PHARM 5333 - PROFESSIONAL AND CAREER DEVELOPMENT 3
- PHARM - Professional Electives - 3 credits

Total: 15.5 credits

Fourth Professional Year (P-4)

Spans 3 semesters (SUMMER, FALL, SPRING) with several options for credits earned per semester, for a total of 40 weeks

- PHARM 5401 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 1
- PHARM 5402 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 2
- PHARM 5403 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 3
- PHARM 5404 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 4
- PHARM 5405 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 5
- PHARM 5406 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 6
- PHARM 5407 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 7
- PHARM 5408 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 8

Total: 40 credits

Total Professional Credits: 134.5 credits

The mission of the University of Pittsburgh School of Public and International Affairs (SPIA) is to prepare students to make significant contributions to society through leadership in public service in government, nonprofit organizations, or the private sector. We accomplish this mission through quality teaching, rigorous research, and service to communities and constituencies-at the highest standards of ethical and professional conduct-domestically and around the world.

Contact Information

Recuitment & Admissions Office
Suite 3601 Posvar Hall
412-648-7640
E-mail: spia@pitt.edu
www.spia.pitt.edu

Admissions

SPIA admits persons who have demonstrated intellectual competence and high motivation in an academic and/or professional environment and who will enrich the quality of life in the school. Individuals from varied cultural, academic, and social backgrounds provide an exciting frame of reference for the stimulating exchanges so vital to a dynamic academic process. The following are required of all Master applicants: transcripts, application and fee, TOEFL, Duolingo or IELTS score (if international), letters of recommendation, essays, and resume.

You can begin any of our master's degree programs (MPA, MID, or MPIA) in either the fall or spring terms. Applications to the PhD program are for the fall term only. Applications to the mid-career master's degree (MPPM) and non-degree programs are accepted for the fall, spring, or summer terms.

Admission Prerequisites

It is desirable, but not mandatory, that PhD applicants have an earned a master's degree in public and international affairs or a degree in one of the social sciences and work experience prior to undertaking doctoral study.

Admission Requirements

All applicants must have earned a bachelor's degree from a regionally accredited U.S. institution or a degree that is equivalent to a four-year U.S. bachelor's degree. Applicants are expected to have a B+ or better average (3.0 GPA) in their work to date. To be competitive for

merit scholarships, applicants normally need at least a 3.5 GPA. The admissions committee also takes into consideration GPA within the major, GPA within the last two years, extenuating circumstances, length of time since graduation from college, rigor of the undergraduate program, and other factors.

Doctoral applicants are only eligible for admission to full-time status in the Fall Term.

Application Requirements

Online Application

Complete and submit the online application in its entirety. All application materials can be submitted electronically using the online system, with the exception of official academic transcripts.

Application Fee

The non-refundable application fee may be paid by credit card. You will be prompted to pay the fee at the end of the online application process. The application fee is waived for Returned Peace Corps Volunteers, AmeriCorps Volunteers, Truman Scholars, Pickering Fellows, Coro Fellows, Rangel Fellows, McNair Fellows, Teach for America alumni, City Year alumni, Payne Fellows, Catholic Volunteer Network alumni, and veterans/active duty members of the US Armed Forces.

TOEFL, IELTS, or Duolingo English Language Test Scores (International Applications Only)

International applicants must submit a score from one of three possible English tests: the TOEFL, the IELTS, or the Duolingo English Test.

Score reports must be sent directly from the testing agency to SPIA. SPIA's institutional code for TOEFL score reports is 2574.

Effective January 21, 2026, the University of Pittsburgh, the minimum TOEFL score of 80 will shift to a minimum score of 4.0 (CEFR B2) with all subscores also at 4.0 or higher. An overall score of 4.0 on the new scale corresponds to previous scores in the 72-85 range. Requiring all subscores to meet the 4.0 threshold ensures that applicants demonstrate proficiency in each language skill at the CEFR B2 level. The minimum Duolingo English Test score required for admission is 120.

Exceptions: International students who have completed a degree at a regionally accredited college or university in the United States are not required to submit a TOEFL, IELTS, or Duolingo English Test score. International students who are citizens of certain English-speaking countries are also exempt.

GRE or GMAT scores

For all of our master's programs, GRE or GMAT scores are optional and not required for admission. If you're applying to the MPA, MPIA, MID, or PhD program, you may choose to submit scores from one of these tests as supplemental material, if you feel that they show evidence of your abilities beyond what the rest of your application reflects.

If you're applying to the mid-career MPPM program (online or on campus) or the non-degree program, you should not submit GRE or GMAT scores. Supplemental materials submitted to those programs will not be reviewed.

If you are submitting test scores, you must order an official score report, sent directly from the testing agency to us. (GRE reports can be ordered at www.gre.org; GMAT reports can be ordered at www.mba.com.) Copies of your own score report are not acceptable. Our institutional code for the GRE is 2574.

Résumé

All applicants should upload a current résumé/curriculum vitae, showing relevant awards, academic achievements, full- and part-time job experience, internships, and volunteer work.

Personal Essay - (Master & PhD applicants)

Fall PhD Applicants:
For doctoral applicants, identify the broad topic and research questions you envision as the focus of your doctoral dissertation research. Explain the importance of your research questions and identify the SPIA faculty member with whom you'd like to work. There is a limit of 5,000 characters (approximately two double-spaced, typed pages).

Master's Applicants:

Use your essay to introduce yourself to the admissions committee. Share your professional goals and explain why a SPIA degree can help you achieve them. In your response, address:
1. The motivation behind your interest in public and international affairs.
2. The unique skills, perspectives, and problem-solving approaches you would contribute to our community.
3. The aspects of SPIA's programs, faculty, resources, or opportunities that are most compelling to you.

Essay Tip: Include at least one specific example from your academic, professional, or volunteer experience that demonstrates how you have approached a complex challenge, contributed to a team, or advanced an initiative. Be as detailed and personal as possible-avoid using generic or pre-written responses. There is a limit of 5,000 characters (approximately two double-spaced, typed pages).

Optional Essay (Master's Applicants) and Research Proposal/Writing Sample (PhD Applicants)

Master's Applicants: If there are any special circumstances you would like the admissions committee to consider, highlight them in the optional essay. Use this essay to include information that you feel is important, but that you're unable to include elsewhere on the application. There is no penalty for leaving this blank.

PhD Applicants: As an applicant to the Ph.D. program, you are required to submit an additional essay that discusses your potential dissertation research. Describe the idea and why it is important. Further, discuss the main questions to be investigated and the types of evidence that would be needed to support conclusions. Finally, identify the SPIA faculty with whom you would like to work. There is a 5,000 character limit (approximately two double-spaced, typed pages). PhD Applicants are also asked to upload a single-authored writing sample in English that is 25 pages or less. The writing sample does not need to be a published paper but should demonstrate academic or professional research.

Academic Transcripts

When completing the online application, you will be asked to upload unofficial transcripts from all colleges and universities you have attended, whether or not you earned a degree. Unofficial transcripts must clearly display your name, the institution's name, courses taken, grades received, and (if applicable) your degree in progress.

Hard copies are not required at the time of application as long as your unofficial transcripts are uploaded successfully.

If you are admitted, you will be required to submit a final, official transcript, showing your conferred degree, sent directly from your institution's registrar to the School of Public and International Affairs. The official copy must match the academic records you submitted during the application process.

If you do not have access to technology that allows you to upload an unofficial transcript, you may request that your institution send an official transcript by mail directly to: School of Public and International Affairs, 3601 Posvar Hall, Pittsburgh, PA 15260.

Two Letters of Recommendation

Letters should be written by professors who have taught you or supervisors who have overseen your work, either professionally or in a volunteer capacity. If you graduated from college less than three years ago, at least one, if not both, of your letters should be from professors. Letters written by friends, family members, work colleagues, or anyone who has not taught or supervised you are not acceptable.

All letters must be submitted online. When you complete the online application, you will be prompted to enter the names and email addresses of your recommenders. The system will automatically send them an email explaining how they can upload their letters.

Admission Deadlines: Fall Term

US Citizens/Permanent Residents:

- MPA, MPIA, MID (First Priority) - February 1
- MPA, MPIA, MID (Second Priority) - April 15
- MPA, MPIA, MID (Third Priority) - June 1
- MPPM - June 1
- Non-degree - August 1
- PhD - January 15

International Students:

- All applications - January 15

Application Deadlines: Spring Term

US Citizens/Permanent Residents:

- MPA, MPIA, MID, MPPM - November 1
- Non-degree - December 1

International Students:

- MPA, MPIA, MID, MPPM - August 1

Application Deadlines: Summer Term

US Citizens/Permanent Residents:

- MPPM - March 1
- Non-degree - April 1

International Students:

- MPPM - January 15

School-Based Funding

Applicants to the Master of International Development, Master of Public Administration, and Master of Public and International Affairs programs are automatically considered for partial tuition scholarships if they apply by the February 1st priority deadline. These scholarships are highly competitive, not guaranteed, and limited to full-time students. There is no separate application required for merit scholarships; decisions are made based on the strength of your application. While full funding is not available for our master's programs, we encourage all applicants to explore external funding opportunities and complete the FAFSA to determine eligibility for federal aid.

For those pursuing the Master of Public Policy and Management program, we offer a 20% tuition discount for specified government employees. Additionally, we partner with a number of organizations to offer specialized scholarships. For details, please visit our Scholarship Partners page.

Admission Information

Application Process
SPIA only accepts online applications. Payment for the application fee can be made by credit card. The application fee, if not waived, is non-refundable; it does not apply toward the payment of tuition.

Tuition Deposit
Once admitted to SPIA, a student is required to submit a US$200 tuition deposit to secure their place in the incoming class. The deposit is applied to the tuition and is non-refundable. Payment can be made by credit card.

Admission Status
Admission to degree programs in the School are competitive and based on the relative strength of all credentials required in support of the application. Admission may be granted or denied only by the dean of the school or his or her designee. However non-immigrant students may be denied visa documents for non-academic reasons by the Office of International Services. Acceptable students are admitted to SPIA with "full", "provisional", or "non-degree" status, depending on their qualifications and objectives. The qualifications described below represent SPIA's minimum standards.

Full Graduate Status
For admission with full graduate status, an applicant must demonstrate, in the judgment of the admissions committee, that they clearly possess the skills, aptitude, and academic preparation necessary to succeed in graduate study. The judgment of the admissions committee is based on a holistic review of all application materials submitted, including, but not limited to, undergraduate grade point average, letters of recommendation, full- or part-time work experience, and the student's personal essay(s). Only students with full graduate status will be considered for School-based funding or be graduated.

Provisional Status
Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate program or their academic achievement may be considered for provisional graduate status if strong evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward the completion of graduate degree requirements. Transfer from provisional to full graduate status is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work. A student on provisional status is not eligible to be considered for School-based funding or to be graduated.

As a requirement of provisional status, a student must complete 6 (for part-time students) or 12 (for full-time students) SPIA credits with a minimum cumulative GPA of 3.0 or better by the end of their first term (for full-time students) or by the end of their second term (for part-time students). By meeting these requirements, status will be changed to full graduate status, which will allow the student to become eligible for graduation. The student will not be eligible to pursue any joint degree programs until they have obtained full graduate status. If a student fails to meet the conditions of your provisional admission, the student will be dismissed from the school. If a student defers their admission to a future term, the same conditions will apply.

Non-Degree Status
Applicants to the non-degree program must have a bachelor's degree and are held to the same admissions standards as anyone applying to a degree program. In most cases, only U.S. citizens/permanent residents are eligible. International students may not apply as non-degree students unless they are participating in one of SPIA's exchange partnerships with foreign universities.

Non-degree students are typically admitted for one semester only, to take a specific class or classes. Most often, they are graduate students at other universities who want to transfer the SPIA credits into their home schools. Some non-degree students are taking classes for professional training or for personal enrichment. In their essays, non-degree applicants should explain what courses they intend to take and for what purpose.

The non-degree program is not appropriate for students who are trying to improve their credentials so that they may apply to a SPIA degree program. Students who are not yet qualified for a degree program would not be admitted to the non-degree program. If a non-degree student wishes to enter a degree program, they must submit a new application to SPIA. No more than 6 credits earned under non-degree status can be applied to a degree program.

Part-Time Status
Admission procedures for part-time students are the same as those for full-time students.

Guaranteed Admission Program (University of Pittsburgh Undergraduate Students only)
Prospective undergraduates who apply to the University of Pittsburgh may be offered guaranteed admission to SPIA at the time they are admitted to the university's undergraduate program. The decision to offer this guaranteed rests entirely with the undergraduate admissions committee. To be considered for graduate/professional school guarantees, prospective freshmen must be U.S. citizens or eligible non-citizens (i.e. permanent resident aliens, refugees, or legal immigrants), apply to the School of Arts and Sciences or a regional campus, unless otherwise noted, and indicate the pre-professional field of study on their admissions application. The guarantee is void if the student does not enroll in/graduate from the University of Pittsburgh's undergraduate program or does not apply to SPIA within three years of graduating from the University of Pittsburgh with a bachelor's degree.

Additional requirements:
- A separate application is not necessary for consideration. All first-year applicants to the Dietrich School of Arts and Science who choose a social science major will be considered for the guarantee. In addition, applicants who chose "Public and International Affairs" in the Guaranteed Admission Program dropdown box on the Application for Undergraduate Admission will also be considered for the guarantee. Only prospective first-year students can be considered for the guarantee.
- Maintain a minimum 3.5 grade point average while satisfying the minimum course work requirements for the Dietrich School of Arts and Sciences.
- Demonstrate a commitment to public service through internships, volunteer, and/or work experience in the fields of public and international affairs.
- Apply to the Master of Public Administration, Master of Public & International Affairs, or Master of International Development programs. The offer of guaranteed admission remains in effect for three years after graduation from Arts & Science with a bachelor's degree.

Accelerated Bachelor's/Master's Program (4+1 for University of Pittsburgh Undergraduate Students only)
Exceptionally able undergraduate students from the Deitrich School of Arts and Sciences or the College of General Studies may be admitted to SPIA with full-graduate status. These students may use 12-24 credits based on SPIA degree program to satisfy their requirements for the baccalaureate degree. Eligible students must be in good academic standing with a minimum overall GPA of 3.5, have completed at least 108 credits to be admitted for the MPIA degree or have completed at least 96 credits to be admitted for the MPA and MID degrees, have a cumulative GPA of 3.5 or better for all three SPIA degrees, have completed all General Education and major requirements and have no "g" grades.

For the MPIA and MID degree, students will spend their last term in their senior year as an undergraduate student, taking 12 SPIA credits while finishing any remaining undergraduate requirements (ideally no more than 3-6 credits). At the end of that term, students will graduate with their bachelor's degree on schedule. In year five, students will finish their remaining 24 SPIA credits and graduate with their master's degree.

For the MPA degree, students will spend their last two terms in their senior year as an undergraduate student, taking 24 SPIA credits while finishing any remaining undergraduate requirements (ideally no more than 3-6 credits). At the end of the second term, students will graduate their bachelor's degree on schedule. In year five, students will finish their remaining 24 SPIA credits as a graduate student and graduate with their master's degree.

Deferred Admission
Students accepted to a degree program at SPIA may request deferral of their term of entrance for a period of up to academic term. The

request for deferral must be made in writing and must be received by May 1. If approved, the student is sent a new letter confirming the deferral and stating the new term for beginning their course of study. If the student has been awarded School-based funding, the award will not be deferred.

Readmission
If a student wishes to return to SPIA and complete the degree after being made inactive, the student must file a complete application for readmission (and fulfill all current application requirements). Readmission is not guaranteed, nor does it necessarily reinstate the student to the status enjoyed prior to being dismissed/becoming inactive. To be readmitted, the student must demonstrate proper preparation to meet all current admission and degree requirements. If curriculum and/or policies have changed since a student's prior term of enrollment, the student will be held to the new set of requirements and standards. Readmission is automatic, however, for students who receive prior approval for a formal leave of absence. Leaves of absence may not exceed 12 months.

Statute of Limitations

There is a six-year statute of limitations on returning to SPIA to resume a degree. If a student terminates their enrollment for any reason prior to graduating, or becomes inactive for any reason, that student must re-enroll at SPIA within six years of the final term of enrollment to resume progress toward the degree. After six years have passed, any credits a student has previously earned can no longer be applied toward a SPIA degree.

Tuition

Visit the following page, https://www.tuition.pitt.edu/ for up-to-date tuition and mandatory fee rates. Note that there are different tuition rates for Pennsylvania residents and non-residents.

Academic Standing

In addition to those University-wide regulations and standards detailed in the Academic Standing for Graduate and Professional Students, https://www.provost.pitt.edu/academic-standing-graduate-and-professional-students, each student in SPIA is expected to be familiar with these school-specific regulations and academic standards.

Students are in good academic standing when they earn acceptable grades for graduate work and make normal progress toward the degree. Specifically, full-time students must earn a minimum of 9 credits per term with a minimum cumulative GPA of 3.5 in all courses. Part-time students are held to the same standards. However, they are expected to do so while carrying less than 9 credits per term.

Students receiving school-based funding are held to higher standards. Master's students must earn, after two terms, 24 credits and a cumulative GPA of 3.0. Doctoral students must earn 24 credits and a cumulative GPA of 3.0.

Provisional Status

Students admitted with provisional status must complete 6 (for part-time students) or 12 (for full-time students) SPIA credits with a minimum cumulative GPA of 3.0 or better by the end of their first term (for full-time students) or by the end of their second term (for part-time students). By meeting these requirements, status will be changed to full graduate status, which will allow the student to become eligible for graduation. If a student fails to meet the conditions of your provisional admission, the student will be dismissed from the school.

Academic Notice

Students are automatically placed on academic notice when they fail to maintain a minimum GPA of 3.00 and earn the appropriate number of credits for their status. Students are also placed on academic notice automatically if they receive two G or I grades in one term and/or earn a grade of U, C- or lower.

Academic Dismissal

Students who fail to correct the deficiencies of their academic notice within a specified time period (normally one term) are subject to academic dismissal.

For additional information on academic standing and procedures, students are referred to SPIA's Handbook of Academic Policies and Procedures for Master's Degree Programs, SPIA's Handbook of Academic Policies and Procedures for the Doctor of Philosophy, and the University's Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Advanced Standing Credits - Acceptance of Transfer Credits from Outside Institutions

Students who have completed graduate courses in degree-granting graduate programs at other accredited institutions within the past seven (7) years prior to admission to SPIA should submit official transcripts from those institutions at the time they apply so that the courses can be evaluated for transfer credits or waivers. If the source institution is located in the United States, the institution must be regionally accredited in order for the credits to be transferrable. Graduate-level courses taken while a student was enrolled in an undergraduate program are generally not eligible to be transferred into SPIA. Under normal circumstances, only graduate-level courses taken after a student has earned a bachelor's degree may be evaluated as transfer credits. (See "Enrollment in Graduate Courses as an Undergraduate" above.) A maximum of 12 credits can be transferred for students enrolled in the MPA and MID degree programs. A maximum of 9 credits can be transferred for students enrolled in the MPIA degree program. A maximum of 6 credits can be transferred for students enrolled in the MPPM program. Students admitted with provisional status cannot transfer credits until full graduate student status has been granted.

Official transcripts certifying graduate courses completed at another regionally accredited institution can be evaluated for acceptability as transfer credits, provided grades of B or better (GPA = 3.0) or its equivalent has been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. The documents must prove that the course(s) are substantially similar in content to existing SPIA course(s) in order for the transfer to be approved. Transfer (advanced standing) credits are entered as block transfer credits (advanced standing) on the student's transcript. Grades and quality points are not recorded for credits accepted by transfer.

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University. Graduate students already enrolled, may, when approved in advance by the director of student services, spend a term or more at another graduate institution, to obtain training or experience not available at the University, and transfer those credits toward the requirements for a SPIA degree. In such instances, neither the University nor SPIA is responsible for any financial assistance to the graduate student.

No credits will be granted toward a SPIA degree for work completed in extension courses, correspondence courses, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has a regionally accredited program.

For further detail on University requirements on advanced standing credits, see Advanced Standing Credits, https://www.provost.pitt.edu/advanced-standing-credits

Advanced Standing Credits - Acceptance of Transfer Credits from Other Graduate Schools at the University of Pittsburgh

With the exception of students enrolled in formal joint-degree programs, students who earn/have earned credits while enrolled as a graduate student at another University of Pittsburgh school may petition for some of their credits to count toward the SPIA degree. Typically, no more than six credits earned while enrolled in another graduate program at the University of Pittsburgh may be counted toward the SPIA degree. In most cases, such credits will not be listed as transfer credits on the student's SPIA transcript, and will count only as free electives. The final decision on course acceptability rests with the SPIA director of academic programs & advising and the University of Pittsburgh Registrar.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from SPIA represents mastery of current knowledge in the student's field of study.
Requirements for the professional master's degrees must be completed within a period of five consecutive calendar years from the students' initial registration for graduate study. Joint degrees that require coursework in excess of 50 credits may be granted a longer statute of limitations.

Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the division director and submitted to the dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Advising and Career Development

Academic Advising: Each student is assigned a faculty and academic advisor based on, whenever possible, the compatibility of student and faculty academic interests. Faculty advisors are responsible for counseling their advisees about career opportunities in the student's area of study; for counseling advisees who have been placed on probation; and for approving the advisee's school-wide required and elective courses, proposed thesis or dissertation topics, and supervised internships. Academic, faculty advisors and students monitor academic progress and identify areas where corrective action on the part of students may be required. It is essential, therefore, that students consult periodically with their advisors. Unless students subsequently request a change, faculty members originally assigned will continue as advisors throughout the students' program of study. If, however, a change in faculty advisor is requested, students must obtain the signed approval of the new advisors. Based on a student-focused approach, we provide students with a academic advisor who serves as the first point of contact for class registration, counseling advisees who have been placed on probation, and preparation for graduation. Additionally, academic advisors support students by providing information necessary to navigate the logistical challenges of graduate school and connect students to resources at the University of Pittsburgh.

Career Development: SPIA places great emphasis on assisting students in determining the best and most appropriate positions available. In addition to faculty advisors, the school provides resources and guidance for students throughout their course of study as they devise strategies to identify professional opportunities. Among the many services offered through Career Development are individual career advising, internship and job search assistance, and a series of career-related workshops and special events. Extensive reference materials on jobs, fellowships, and internships are made available in a variety of ways, including SPIA Career Launch, SPIA's online career management system for students and alumni. Workshops cover such topics as resume preparation, job search strategies, negotiation skills, networking, and using technology in securing employment. Special events include Foreign Service information sessions, mock interviews for the Presidential Management Fellowship Program, an internship fair, and networking events with alumni, foundations, and agency representatives on campus and in Washington, D.C.

Concentration and Degree Options

SPIA offers the following degrees:

Master of Public Administration (MPA) Public Administration, MPA , including concentrations in:

- Energy & Environment
- Governance & International Public Management
- Policy Research & Analysis
- Public & Nonprofit Management
- Social Policy
- Urban Affairs & Planning

Master of Public and International Affairs (MPIA) Master of Public and International Affairs, MPIA , including concentrations in:

- International Political Economy
- Security and Intelligence Studies

- Human Security

Master of International Development (MID) Master of International Development, MID , including concentrations in:

- Energy & Environment
- Governance & International Public Management
- Human Security
- Nongovernmental Organizations & Civil Society
- Social Policy
- Urban Affairs & Planning

Master of Public Policy and Management (MPPM) Public Policy and Management, MPPM

- Traditional accelerated mid-career master program
- Online accelerated mid-career master program

Doctor of Philosophy (PhD)

Minors

Students have the flexibility to customize their education as any concentration can be taken as a minor. Adding a minor will help differentiate your education, deepen your knowledge base and broaden professional marketability. Each minor consists of a 9-credit sequence of courses within your chosen subject area. This is taken in addition to general required courses and courses for your area of concentration. Any course taken to fulfill a requirement for your degree or concentration cannot count towards your minor. A course my not be double-counted. An approved course must be substituted.

For SPIA minors, click on this link:

SPIA Minors

Joint Degrees

SPIA students may pursue two graduate degrees simultaneously, through SPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements (including entrance exams like the GRE, GMAT, and LSAT, where applicable). If admitted to both schools, students spend one full year in SPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in SPIA, earning a total of 36 SPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year or, in the case of current law students, two years of full-time study.

Full-time students in the MPA, MPIA, or MID programs may be eligible to participate in the following joint programs:

Juris Doctor with University of Pittsburgh School of Law: The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues such as refugee services and the Department of Justice.

Master of Business Administration with University of Pittsburgh Katz Graduate School of Business - MPIA and MID students only: Combining a SPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or

multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

Master of Public Health with University of Pittsburgh School of Public Health: Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Master of Social Work with University of Pittsburgh School of Social Work: Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between SPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Master of Science in Information Science with University of Pittsburgh School of Information Science: The joint MSIS degree allows SPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Master of Quantitative Economics with University of Pittsburgh's Dietrich School of Arts & Sciences: The joint MQE/MPA degree allows a student to pursue two graduate degrees simultaneously between the Department of Economics and the School of Public and International Affairs. This streamlined, 2 ½ years joint degree program is built for students seeking training in public policy, public administration, and data analytics. It is ideally suited for students looking to enter mid-career positions as policy/data analysts in both the public and private sectors.

J**oint Degrees at Kobe University, Japan:** Through a special partnership, students may combine their SPIA degrees with one of several degrees offered by the Graduate School of International Cooperative Studies at Kobe University: the Master of International Affairs, Master of Laws, Master of Economics, or Master of Political Science. The Kobe GSICS curriculum is in English.

Pitt Student - Accelerated Bachelor's/Master's Program (4+1) for University of Pittsburgh Undergraduate Students only)

The Accelerated Bachelor's/Master's Program for Pitt undergraduate students to complete their bachelor's degree while working on a master's degree at SPIA.

Exceptionally able undergraduate students from the Deitrich School of Arts and Sciences or the College of General Studies may be admitted to SPIA with full-graduate status. These students may use 12-24 credits based on SPIA degree program to satisfy their requirements for the baccalaureate degree. Eligible students must be in good academic standing with a minimum overall GPA of 3.5, have **completed at least 108 credits to be admitted for the MPIA & MID degrees or have completed at least 96 credits to be admitted for the MPA degree**, have a cumulative GPA of 3.5 or better for all three SPIA degrees, have completed all General Education and major requirements and have no "g" grades.

For the MPIA & MID degrees, students will spend their last term in their senior year as an undergraduate student, taking 12 SPIA credits while finishing any remaining undergraduate requirements (ideally no more than 3-6 credits). At the end of that term, students will graduate with their bachelor's degree on schedule. In year five, students will finish their remaining 24 SPIA credits and graduate with their master's degree.

For the MPA degree, students will spend their last two terms in their senior year as an undergraduate student, taking 24 SPIA credits while finishing any remaining undergraduate requirements (ideally no more than 3-6 credits). At the end of the second term, students will graduate their bachelor's degree on schedule. In year five, students will finish their remaining 24 SPIA credits as a graduate student and graduate with their master's degree.

Interested in applying? First, talk to your undergraduate advisor to make sure you are eligible, and make an appointment with a SPIA admissions counselor to discuss the program (spia@pitt.edu). Submit a complete application to SPIA by February 1 of your junior year, and be sure to check the box to indicate that you are applying for the Accelerated Bachelor's/Master's program. One of your two letters of recommendation must be written by Susan Crain in the Arts & Sciences Dean's Office, confirming that you are eligible for the program.

Special Academic Opportunities/Programs

SPIA offers a variety of academic programs to complement the degree programs offered, including area studies, exchange programs, and research and travel grants.

Centers, Institutes and Initiatives

The Matthew B. Ridgway Center for International Security Studies - educates the next generation of security analysts and produces scholarship and impartial analysis that informs the options available to policymakers who must confront diverse challenges to international and human security on a global scale.

The Ford Institute for Human Security - conducts research that focuses on a series of transnational threats to the human rights of civilian populations and makes independent research and policy papers available to both domestic and international policymakers.

The Johnson Institute for Responsible Leadership - reaffirms SPIA's commitment to creating ethical leaders and provides an institutional platform from which to launch an innovative program of teaching, research, and public service on issues of ethics and accountability in all areas of public life.

Center for Governance and Markets - to understand the diverse institutions and governance arrangements that affect social order and human well-being in the United States and around the world. Generating knowledge of ways in which individuals and communities overcome challenges to living free, prosperous, and peaceful lives.

The Gender Inequality Research lab (GIRL) - is an interdisciplinary research forum for scholars and practitioners collaborating on policy-relevant research on gender inequality.

Area Studies

The University of Pittsburgh is home to several internationally recognized area studies centers. Many of these centers have been designated National Resource Centers (NRCs) by the US Department of Education, certifying their status as leading centers of their kind in the United States. The NRCs sponsor numerous programs and offer Foreign Language and Area Studies (FLAS) Fellowships for which SPIA students (U.S. citizens only) are eligible.

UCIS offers graduate certificates that SPIA students can pursue concurrently with their degrees, allowing them to focus their studies on a particular region or theme. It is normally possible to complete the requirements for a SPIA master's degree and a UCIS certificate in two years. For further information, click here, https://www.ucis.pitt.edu/main/graduate-students

SPIA Programs Abroad

SPIA has developed a number of international partnerships that offer students the possibility to study abroad for a regular academic term, during the summer, or-in a double degree program-for an entire year or more. Program availability is subject to change.

International Development and Asian Affairs in Kobe, Japan

This program enables students to earn a Certificate in International Development and Asian Affairs from GSICS at Kobe University while completing their masters degree from SPIA.

Public Administration and/or International Studies in Seoul, Korea

The exchange program enables students to earn credits toward their SPIA degree by taking courses in the Graduate School of Public Administration and/or the Graduate School of International Studies at Seoul National University. SPIA and Seoul National University also offer a dual-degree program that will give students the option to earn both a Master of Public Administration from Seoul National University and one of SPIA's four master's degrees.

Public Policy and International Affairs in Paris, France

This program enables students to earn credits toward their SPIA degree by taking courses at the Institut d'Etudes Politiques de Paris (in French), or at its English-language wing, the Paris School of International Affairs.

Government or Political Science in Bogota, Colombia

This program enables students to earn credits toward their SPIA degree by taking courses at the Department of Political Science at the University of the Andes, one of Latin America's leading institutions. Coursework is in Spanish.

Public Management in Nanjing, China

This program enables students to earn credits toward their SPIA degree by taking courses at Nanjing University's School of Public Management. Coursework is in Chinese.

International Relations, Madrid, Spain

This program allows students to earn credits toward their SPIA degree by taking courses at the School of International Relations, IE University. Coursework is in English.

Budget permitting, each year the Office of the Dean and the school's academic programs make available small grants to students. Uses for these grants can include attending professional development conferences, presenting papers, and supporting internships and study abroad activities. These grants are awarded through a highly competitive selection process.

Faculty

Lisa S. Alfredson, Professor, PhD, London School of Economics

Luke Condra, Assistant Professor, PhD, Stanford University

George W. Dougherty, Assistant Professor, PhD, University of Georgia

Nicola Foote, Professor, PhD, University College London

Muge Kokten Finkel, Assistant Professor, PhD, University of Virginia

Shanti Gamper-Rabindra, Associate Professor, Phd, Massachusetts Insitute of Technology

Ryan Grauer, Assistant Professor, PhD, University of Pennsylvania

Melinda Haas, Assistant Professor, JD, PhD, University of Pennsylvania Law School, Princeton University

Gary Hollibaugh, Assistant Professor, PhD, University of Rochester

Daniel Jones, Assistant Professor, PhD, University of Pittsburgh

Michael Kenney, Associate Professor, PhD, University of Florida

So Jin Lee, PhD, Duke University

Michael Lewin, Senior Lecturer, PhD, Johns Hopkins University

Huafang Li, Assistant Professor, PhD, Rutgers University

Siyao Li, Assistant Professor, PhD, University of Pennsylvania

Sera Linardi, Assistant Professor, PhD, California Institute of Technology

Jennifer B. Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison

Ilia Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison

Julie Santucci, Senior Lecturer, MA, University of Arizona

Nicholas Croce, Visiting Assistant Teaching Professor, PhD, Syracuse University

Program and Course Offerings

Certificate

Cybersecurity, Policy and Law Certificate

To be a leader in cybersecurity requires more than just technical knowledge - it also requires a deeper understanding of the of the cyber challenges surrounding law, policy, regulations, and ethics. We are offering a Graduate Certificate in Cybersecurity, Policy and Law from three schools within the University of Pittsburgh: the School of Public & International Affairs, School of Law and the School of Computing and Information.

Cybersecurity is a multidisciplinary field that involves technical issues, security policies, regulation and law. Our integrated curriculum provides students with the skills to develop comprehensive cybersecurity policies and strengthen cybersecurity environments to minimize risk.

As part of the certificate's multidisciplinary approach, the certificate requires courses to be taken from all three Pitt schools. Students must complete a minimum of three courses from the School of Computing and Information, one course from the Graduate School of Public and International Affairs, and one course from the School of Law to earn the certificate.

Applicants must have a Bachelor's degree. All students are expected to complete the progrma within one to two years.

Students enrolled in the School of Public & International (SPIA) degree program may count no more than six (6) of of the certificate credits (two courses) toward their degrees.

Students will need to contact the School of Law or School of Comuting & Information to obtain permission to take courses from those schools.

The Certificate curriculum, comprising of 15 credits, follows:

Program Requirements

Courses

School of Computing and Information courses

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- TELCOM 2821 - NETWORK SECURITY
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- TELCOM 2811 - INNOVATING FOR PUBLIC IMPACT
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY

Graduate School of Public and International Affairs courses

- PIA 2156 - LAW, POLICY & TECHNOLOGY
- PIA 2379 - INTRODUCTION TO CYBER CRIMES
- PIA 2360 - CYBER SECURITY POLICY
- PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE
- PIA 2365 - TRANSNATIONAL SECURITY & ILLICIT FINANCE
- PIA 2041 - POLICY ANALYSIS FOR CYBERSECURITY AND INTELLIGENCE STUDIES

School of Law courses

- LAW 5623 - CYBER POLICY, CRIME & NATIONAL SECURITY
- LAW 5380 - CYBERCRIME
- LAW 5404 - CYBERSPACE AND THE LAW
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5877 - PUBLIC POLICY SEMINAR

Global Sustainable Development

This Certificate provides graduate students with tools to engage with complex challenges of global sustainable development. Global sustainable development involves the pursuit of a better world for all through the elimination of chronic poverty, discrimination & injustice, and environmental degradation, in order to ensure a sustainable future of well-being for the earth and its peoples. Worldwide, a common framework used to pursue sustainable development is found in the United Nations Sustainable Development Goals (SDGs), which promotes 17 inter-related, comprehensive, and universally applicable sustainability goals spanning economic, social, political, and

environmental issues. This Certificate provides theoretical knowledge, interdisciplinary approaches, and practical skills needed to tackle chronic problems and achieve sustainable development goals on issues including poverty, hunger, health, inequality, gender empowerment, the environment, peace and justice, governance, NGO and civil society participation, and global cooperation. Learn how to solve global problems in comprehensive, sustainable, and ethical ways appropriate to diverse national and regional realities, capacities, and priorities.

The curriculum provides in-depth theoretical understanding of global sustainable development as well as practical skills to engage with complex challenges targeted through the 2030 UN Agenda for Sustainable Development, which encompasses the "5 P's": People, Planet, Prosperity, Peace, and Partnership. Students complete 12 credits and a Digital Portfolio. Courses include two required foundational courses, and two elective courses from an approved course list which addresses a wide range of SDG topics including poverty, hunger, health, education, gender inequality, the environment and natural resources, water and sanitation, energy, employment, development planning and management, global inequalities, peace/inclusion/and justice, governance and global partnerships.

Requirements: Graduate students complete 12 credits (6 credits in GSD foundation courses, and 6 credits of approved GSD electives), as well as a Digital Portfolio which can be shared with future employers and graduate schools. Students may take up to 2 approved Certificate courses (6 credits) that simultaneously fulfill other Degree requirements, including up to 2 approved courses outside GSPIA. Minimum of grade of C required for all Certificate courses; courses may not be taken on S/NC basis.

Required Foundation Courses: 6 credits

- PIA 2510 - ECONOMICS OF DEVELOPMENT
- PIA 2501 - DEVELOPMENT POLICY & PRACTICE
- PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT

Digital Portfolio

Students are required to create and submit a Digital Portfolio which can be shared with future employers and graduate schools. Students must meet and work with Elaine Linn (Global Studies, University Center for International Studies) to create the portfolio using the Digication platform.

Approved Elective Courses: 6 credits

Please note that not all GSD elective courses are offered every year.

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2117 - PROGRAM EVALUATION
- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2307 - HUMAN SECURITY
- PIA 2310 - MARKETS AND STATES
- PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT
- PIA 2473 - STRATEGIES OF GLOBAL INQUIRY
- PIA 2476 - NONVIOLENT RESISTANCE MOVEMENTS
- PIA 2478 - ASYLUM POLITICS & POLICY
- PIA 2496 - GOVERNING TECHNOLOGY
- PIA 2502 - ENVIRONMENTAL POLICY: LOCAL & GLOBAL
- PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE
- PIA 2508 - NGO ADVOCACY & INTERNATIONAL COALITIONS
- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT

- PIA 2551 - GENDER AND DEVELOPMENT
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2590 - LOCAL AND GLOBAL FOOD POLICY & SUSTAINABILITY
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BSEO 2033 - MANAGING THE NATURAL ENVIRONMENT
- BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT IN THE ERA OF GLOBALIZATION, INNOVATION AND ESG
- BSEO 2578 - SUSTAINABLE BUSINESS STRATEGY
- CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT
- ENGR 2007 - SUSTAINABILITY CAPSTONE
- ENGR 2905 - CURRENT ISSUES IN SUSTAINABILITY
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2173 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

Doctoral

Public and International Affairs, PhD

Whether you want to teach, conduct research, or work in a policy environment, our Ph.D. program will equip you with the skills, tools, and knowledge to succeed in highly competitive environments such as leading universities, government agencies, and nonprofit and nongovernmental organizations around the world.

To apply to the PhD program, you must have a bachelor's degree; however, we strongly encourage that students complete a relevant master's degree prior to joining our program - either in public and international affairs or in one of the social sciences. Once you're accepted, you must complete 67 hours of coursework and a six-credit dissertation. If you have earned a master's degree, as many as 30 credits from that degree may be applied to your total credit requirement for our program (or 36 credits if your master's degree was earned at the School of Public and International Affairs at Pitt).

Embedded within an interdisciplinary school, our newly redesigned program structure is aimed at exposing students to multiple methods and offering the flexibility to conduct research from the perspectives that best fit the topic. We have also redesigned the program to facilitate a faster transition from coursework into dissertation research. To achieve these goals:

- All students are trained in advanced Qualitative and Quantitative methods.
- Some of our required courses are aimed at supporting PhD student development, including a professional development workshop, dedicated time for comprehensive exam preparation, and a research design workshop.
- Students are encouraged to seek out electives in other academic units in the University of Pittsburgh to expand the set of available doctoral-level courses and gain exposure to ideas and faculty in other disciplines.
- Our comprehensive examination is individualized to each student so that the exam prepares students for their own dissertation research and as experts in their field.
- We limit the number of students we admit to ensure that virtually all admitted students will receive at least four years of financial support, contingent on their academic performance.

Most students who are accepted for our doctoral program are awarded four years of funding. This allows you to complete your required coursework and your doctoral dissertation.

Requirements

Students must earn 73 credits to graduate, including advanced standing (transfer) credits, 19 credits from required core course, 18 credits from elective course, and 6 dissertation credits (PIA 3099). Full-time students are expected to complete the required core and elective courses with in the first two years of study (see also "Expected Degree Progress for Full-time Students" below). Failure to do so may be grounds for dismissal. Comprehensive examinations may only be taken after all courses are completed with a grade of "B" or better.

The required courses are:

Doctoral Core Courses: 19 credits

- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS
- PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS
- PIA 3026 - PHD PROFESSIONAL DEVELOPMENT WORKSHOP (1 credit)
- PIA 3050 - QUALITATIVE RESEARCH DESIGN & METHODS
- PIA 3097 - INDEPENDENT STUDY PHD (Full-time students are required to register for three credits of Independent Study (PIA 3097) to prepare for their Comprehensive Exam in the Fall Semester of their Second Year in the program. Part-time students must do so two terms before they intend to take their comprehensive exam)
- PIA 3121 - POLICY THEORY

Electives: 48 credits (including transfer credits)

Note that students can transfer up to 30 credits from a relevant master's program (and up to 36 for a graduate from SPIA).

Must include PIA 2023 Intermediate Quantitative Methods (pre-requisite for PIA 2032) if the student does not have similar coursework from a prior degree.

Students will use electives to fill remaining credits.

PIA 3099 Dissertation: 6 credits

Students must be admitted to candidacy and must be writing their dissertation to be eligible to register for PIA 3099 Disseration. Six (6) credits of PIA 3099 Disseration are required to graduate.

- PIA 3099 - DISSERTATION PHD

Minimum Required Credits: 73 credits

Students must earn 73 credits to graduate, including advanced standing (transfer) credits, 19 credits from required core courses, 18 credits from elective courses, and 6 dissertation credits (PIA 3099), with a minimum GPA of 3.0. Students must meet this requirement in order to qualify for final approval of their comprehensive examinations. Students are required to maintain full-time status while completing the 67 credits of coursework. Full-time students are expected to complete the required core and elective courses within the first two years of study (see also "Expected Degree Progress for Full-time Students" below). Failure to do so may be grounds for dismissal. Comprehensive examinations may only be taken after all courses are completed with a grade of "B" or better.

Additional Information

Additional Information

Students may register for additional individualized course work or guided research under the direct supervision of a SPIA faculty member if the following conditions are met: all required course work in the School-wide core has been completed or will be completed in the term PIA 3097 will begin; the student must be in good academic standing and making normal progress toward the degree; and a summary study

or research design must be submitted in writing by the students and signed by the faculty member supervisor and Doctoral Program Director.

FTDK (Full-time Dissertation Study)

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for full-time dissertation study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, student health service, and activity fees. Students must consult with the Office of Academic Advising for permission to register for full-time dissertation study.

Full-Time and Part-Time Study

Students must be officially admitted to SPIA to be eligible to register for classes. Students who register for 9-16 credits in the fall or spring term are full-time students and are assessed the full-time SPIA tuition rate. SPIA requires students who receive School-based funding to register for 12 credits. Students who register for fewer than 9 credits are part-time students and are billed on a per-credit basis. During the summer term and summer sessions, SPIA students are billed on a per-credit basis regardless of the number of credits taken.

Maximum Allowable Credits per Term

No SPIA student is permitted to register for more than 16 credits in a term without permission from the student's advisor and the director of student services. Graduate students who receive approval to register for more than 16 credits will be billed for each additional credit that exceeds their full-time tuition rate.

Independent Study

Full-time students are required to register for three credits of Independent Study (PIA 3097) to prepare for their Comprehensive Exam in the Fall Semester of their Second Year in the program. Part-time students must do so two terms before they intend to take their comprehensive exam.

Students may register for additional individualized course work or guided research under the direct supervision of a SPIA faculty member if the following conditions are met: all required course work in the School-wide core has been completed or will be completed in the term PIA 3097 will begin; the student must be in good academic standing and making normal progress toward the degree; and a summary study or research design must be submitted in writing by the students and signed by the faculty member supervisor and Doctoral Program Director.

FTDK (full-time dissertation study)

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for full-time dissertation study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, student health service, and activity fees. Students must consult with the Office of Academic Advising for permission to register for full-time dissertation study.

Adding and Dropping Courses

A registered student may add and drop courses only during the "add/drop period." The dates for the "add/drop period" are listed in the University's Schedule of Classes and on the University's Academic Calendar at www.pitt.edu/~provost/calendar.html. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course or Resigning from the University.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing Monitored Withdrawal Request form in the Office of Academic Advising. The grade of W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses. Withdrawing may jeopardize satisfactory academic progress, School-based funding, and external sources of funding.

Resigning from the University

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling (412)624-7588, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After 60 percent of the term or session has passed, students who wish to terminate their registration may process withdrawal from all classes only with the permission of the associate or assistant dean. If the reason for withdrawal is medical or psychological in nature, the associate or assistant dean may consult with the director of Student Health Services prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Students who stop attending a course or courses and do not initiate add/drop, withdrawal or resignation procedures, or who withdraw from a course without authorization, will be assigned an F grade and will incur financial obligations.

Registering in Other Schools and Departments within the university

Students may register for graduate courses in other Schools and departments in the University with the prior approval of their faculty advisor and the approval of the department offering the course.

Cross-Registration outside the university

During the fall and spring terms, full-time students may earn credits by cross-registering in graduate courses at Carlow University, Carnegie Mellon University, CCAC, Chatham University, Duquesne University, LaRoche University, the Pittsburgh Theological Seminary, Point Park University, and Robert Morris University, when approved in advance by their faculty advisor. Credits earned by cross-registration are accepted as University credits for the purpose of calculating the grade point average and the completion of degree requirements. Students normally register for no more than one course at another institution in a given term.

Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course, such as books and the like. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid delays in the receipt of course credit needed to graduate.

Inactive Status

Students who have not registered for at least one credit during a 12-month period are transferred to inactive status and must file an application for readmission to SPIA (application fee required) before being permitted to register again. Students on inactive status cannot apply to graduate; are not eligible to use University facilities, and should not expect to receive counseling from the faculty or active supervision by their advisor and committee.

Registration Status at Graduation

All graduate students are required to register for at least one credit during the 12-month period preceding graduation and must be registered for the term in which they plan to graduate. Students who complete all degree requirements at the end of a term, but for procedural reasons are graduated the next, may ask the Office of Academic Advising to petition the University Registrar for a waiver of this requirement. Waivers will not be granted to students who are inactive.

While students are permitted to earn credits at other institutions, the final 12 credits prior to graduation must be earned at the University of Pittsburgh.

Grading and Recording

Grading Policy

SPIA's grading policy recognizes the grade of B or better as representing adequate graduate-level attainment. Although C or lower grades may be given, these are not considered as indicating acceptable performance. Under no circumstances will any grade of U or C- or lower be counted among the minimum total number of credits required for the degree.

Other Grades: Incomplete, Audit, Withdraw, Resign

G Grade

The G (incomplete) grade is a temporary grade used when extenuating circumstances (such as illness on the day of the final exam) prevent a student from finishing a class on time. It represents a contract between the faculty member and the student to continue working together after the end of the semester to finish any incomplete course requirements. Students should not be given a G grade if, in actuality, they need to repeat the course.

Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Once the deadline has passed, the G grade will automatically change to an NG and will no longer appear as in progress on the student record. The student will be required to reregister for the course if it is needed to fulfill requirements for graduation. SPIA students are strongly encouraged to remove the G grade within six weeks after the beginning of the term following the one in which the G grade was reported.

If a student wishes to request a G grade, the student should submit the Incomplete (G) Grade Agreement Form request directly to the faculty member before the end of the semester.

Faculty may choose to give a G grade (or not) at their sole discretion. If a faculty member approves a student's request for a G grade, both must complete and sign this form and submit a copy to the academic advisor.

It is the responsibility of the faculty member and the student to make sure the new grade is submitted in the deadline period. If the instructor does not submit a change of grade request, the G grade remains on the transcript for three terms (including the term it was assigned) and then automatically reverts to an NG grade. If the student graduates in the time period, the student will not be able to receive their diploma or transcript until the grade has been changed.

If the student does not complete the agreed upon work. The grade must be changed. For a G grade the choice of grading is up to the instructor. All G grades revert to a Non-Grade (NG) after one academic year. The Registrar's Office automatically assigns this grade. The instructor should act to change the grade before that time. It is up to the instructor to determine if they should assign an NG grade or assign the grade that should have been given at the end of the term. Once an NG grade is automatically assigned, the grade is final.

If the instructor is no longer teaching or no longer with the university, it will be up to the Program Director or Associate Dean to decide what final grade to assign. Adjuncts or faculty who are not teaching the following term should NOT assign a G grade.

All graduating students must have final grades in all courses in order to receive their diploma and transcript. The degree will be awarded based on the schools' certification lists but will place diploma & transcript holds on any graduate missing final grades. G grades are not considered final grades, just placeholders or missing grades. This means that the record is not accurate/complete until the G grade/s are changed. If an instructor has assigned a G grade, the instructor is required to enter a grade at some point for the student even if the student has not completed the work. This applies to all courses that the student has enrolled in even if the course is not required for the degree.

A G grade will affect school-based funding.

I Grade

This grade is assigned in SPIA for research that faculty members and students know, during course registration, will extend beyond the term. I grades are only permissible in the following courses: PIA 3097: Independent Study, PIA 3098: Practicum, and PIA 3099: Dissertation.

All graduating students must have final grades in all courses in order to receive their diploma and transcript. The degree will be awarded based on the schools' certification lists but will place diploma & transcript holds on any graduate missing final grades. I grades are not considered final grades, just placeholders or missing grades. This means that the record is not accurate/complete until the I grade/s are changed. If an instructor has assigned an I grade, the instructor is required to enter a grade at some point for the student even if the student has not completed the work. This applies to all courses that the student has enrolled in even if the course is not required for the degree.

It is the responsibility of the faculty member and the student to make sure the new grade is submitted in the deadline period. If the instructor does not submit a change of grade request, the I grade remains on the transcript for three terms (including the term it was assigned) and then automatically reverts to an NG grade. If the student graduates in the time period, the student will not be able to receive their diploma or transcript until the grade has been changed.

If the instructor is no longer teaching or no longer with the university, it will be up to the Program Director or Associate Dean to decide what final grade to assign. Adjuncts or faculty who are not teaching the following term should not assign an I grade.

Doctoral students are required to remove all incomplete grades (G or I grades) in order to be eligible to sit for the Comprehensive Examinations.

Repeating Courses

Students may repeat any course in which a grade of B- or lower is received and an authorization to repeat the course is given by the student's advisor and proper paperwork is filed. Students earning a B- in a core course or in a required course for the degree will have the option of repeating that course after discussion with his advisor. Students earning a C- or lower in a degree required course will be required to repeat that course.

The grade earned by repeating a course is used in lieu of the grade originally earned, although the original grade is not erased from the transcript. No course may be repeated more than twice. No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a B or higher grade. The repeated course must be the same as that in that the original grade was earned. In extenuating circumstances, a division director, with the assistant dean's approval, may substitute another course of similar content. Grades of W, R, or N reported for the repeated course will not be counted as a course repeat.

To ensure that only the last course grade is included in the GPA calculation, a Course Repeat Form must be filed by the student with the Office of Academic Advising.

Acceptable Academic Standards, Probation, AND Dismissal

Acceptable Academic Standards

Once admitted to SPIA, students must maintain acceptable academic standards as a condition of their right to continue their graduate studies and or/receiving funding from the School. Students who do not maintain acceptable performance are considered to be academically deficient and not making normal progress toward the successful completion of their degree. See also Appendix B in PhD Student Handbook.

Aside from maintaining acceptable performance on their coursework, Doctoral students must also meet expected degree milestones in a timely manner. Part-time students should consult Appendix B for relevant standards. Failure to meet the expected degree milestones carries a risk of dismissal from the program. The following chart illustrates what constitutes expected degree progress for full-time students (see also the Doctoral Milestones section).

Probation

A student is automatically placed on academic probation when any of the following occurs: (1)The student fails to maintain a minimum 3.0 cumulative and/or current (term) GPA in all courses;(2) The student fails to earn a minimum of 9 credits per term if full-time or 3 credits per term if part-time; (3) The student earns two G or I grades in one term, or maintains two G or I grades at any one time; (4)The student earns a grade of U, C-or lower; or (5) the student fails to meet expected doctoral milestones. Please refer to complete policy in Appendix B.

Dismissal

Students are dismissed from SPIA if after 1 term they do not meet their probation requirements. In the event that a student is dismissed from SPIA, they are notified in writing by the Office of Student Services. All appeals to dismissal must be made to the Associate Dean by the stated deadline. Appeals can only be made on procedural grounds. Lack of notification of status is not a basis for appeals.

Obtaining a master's degree upon dismissal

SPIA PhD students who leave the doctoral program early without completing the doctoral degree do not automatically receive a master's degree for the work that they have completed. However, a PhD student who leaves the program prematurely may petition to receive a master's degree for completed work. If a student leaves the PhD program prematurely but has completed the requirements for a master's degree while pursuing the PhD, the student may be approved to graduate with a master's degree with the consent of the appropriate SPIA master's program director, associate dean, director of student services, and PhD program director. Approval is not guaranteed, and SPIA will evaluate whether the student has in fact completed all of the requirements (including the internship requirements, where applicable) for the Master of Public Administration, Master of International Development, Master of Public and International Affairs, or Master of Public Policy and Management.

Under no circumstances will a master's degree be awarded to students who complete their SPIA PhD program. If a student receives a terminal master's degree, that student may not return to the doctoral program or continue pursuing the PhD without first applying and being readmitted.

Doctoral Milestones

The first two years of the PhD program are structured by coursework and preparation for comprehensive examinations. Students are strongly encouraged to explore dissertation possibilities early in the program. To earn a PhD, students must pass the following milestones.

Plan of Study Meeting

Every student is assigned a first-year advisor at program entry. The student should consult with the first-year advisor to identify coursework for the first semester. Prior to the end of the student's first year the student should meet with their first-year advisor regarding the plan of study. This meeting's aim is to structure a program that best serves the student's interests and ensure that the degree requirements are met in a timely and stipulated manner.

Annual Progress Evaluation: First and Second Years

The annual evaluation serves the filling purposes:

- To monitor the student's progress in the program
- To identify any necessary adjustments to the student's original plan of study
- In exceptional circumstances, to signal that a student's performance points to a reconsideration of their doctoral status

In their first two years in the doctoral program, students must meet with their faculty advisor as part of their annual progress evaluation. The relevant advisor for these meetings is the first-year advisor until the student has identified a dissertation advisor, at which point that individual becomes the relevant advisor. During these meetings, the faculty advisor should revisit the plan of study to assess student progress and, if necessary, suggest corrective actions and/or adjust the plan. The student is responsible for scheduling this meeting near the end of the Spring term and should be fully aware that many professors may be unavailable after the end of the term. Failure to schedule this meeting in a timely manner may lead to the evaluation being undertaken without student participation.

Aside from the evaluation undertaken with the faculty advisor, the Doctoral Program Director may also solicit comments from faculty with whom the student has taken coursework during the year, especially in relation to courses in which the student did not perform adequately (i.e. received a G, I or lower than B grade). Unsatisfactory progress may lead to students being put on probation, suspension of financial aid and/or dismissal from the program.

Annual Dissertation Progress Evaluation: Third and Fourth Years

At the end of the third and later years, the student must undergo an annual evaluation of their progress toward the dissertation. The dissertation advisor is the relevant advisor for these meetings. The student is responsible for scheduling this meeting and should be fully aware that many professors may be unavailable during the summer. Failure to schedule this meeting in a timely manner may lead to the evaluation being undertaken without student participation. As stated in the Regulations Governing Graduate Study at the University of Pittsburgh, "meetings of the doctoral candidate and their dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the committee should assess the student's progress toward the degree and discuss objectives for the following year an a timetable for completing degree requirements."

The student's dissertation committee will undertake the evaluation. Students' full dissertation committees must sign off on normal progress for each academic year following defense of the proposal. This will normally occur for the first time at the end of the third academic year. If the committee decides that insufficient progress has been made, one semester will be permitted for correction prior to removal from the program.

The annual review should be schedule at least once every academic year.

Unsatisfactory progress may lead to students being put on probation, suspension of financial aid and/or dismissal from the program.

Comprehensive Examination

The comprehensive examination is designed to assess the student's mastery of their intended field of research. The examination is based on a reading list jointly written by the student and two faculty advisors in the end of the first year of doctoral study (more detail below). Unless an exception is granted by the Doctoral Program Director, comprehensive examinations are taken in May following a student's fourth semester, after the student completes all required courses and earns at least 67 credits (including advanced student credits). In addition, all incomplete grades must be removed by meeting the requirements to complete the courses: even if the course is viewed by the student as not being relevant to their degree program.

The process for the comprehensive examination is as follows:

One month prior to the last day of the Spring semester of the student's first year, the student identifies two faculty members to serve as advisors (a "chair" and a "reader") for the exam and second year research paper. Ideally, the student would seek out individuals who would go on to serve as members of the dissertation committee in following years, but there is no commitment to do so at this stage on either end. The chair must be a SPIA faculty member. The reader should also be a a SPIA faculty member but may be external to SPIA with permission from the PhD Program Director.

After identifying advisors, the student and advisors discuss the student's initial dissertation research interests and plans and would collaboratively form a reading list around those interests. This process should be complete by the last day of the Spring semester of the student's first year. The reading list will form the basis of material that may be covered on the comprehensive exam at the end of the year. The reading list must contain readings in three categories.

- Core readings in the student's field (where "field" is defined on an individual basis), even it not directly related to the student's specific research plans, to ensure that the student is well-read in the field that the student will be working in
- Topical readings specific to the student's research interests
- Methodological read ins specific to the student's research plans

All readings should be aimed towards providing knowledge and expertise necessary to execute the planned dissertation research. This does not presume that the student has solidified specific research questions(s) for their dissertation at the time that the list is being formed; indeed, part of the aim of this process should be to help the student identify where there are gaps in the literature which will then help them pose or refine their research questions.

Individualized reading lists will be reviewed by the PhD director (with assistance from members of the PhD committee in relevant fields as necessary) to ensure sufficient coverage of each of the three categories described above. No changes may be made to the reading list within six months of the comprehensive examination date.

Students will register for an independent study in the first semester of the second year, supervised by the comprehensive exam chair, to facilitate absorbing material on the reading list.

The chair and reader will then write an exam based around the reading list with six questions, asking the student to respond to three. However, we will require that the questions cover the three broad categories noted above. That is, the student must respond to one question on "core readings", one on topic-specific readings, and one on methodology.

Each exam will be 60-hour take-home exam. Answers are limited to 3,000 words per question (not including references or footnotes). During the 60-hour period, students cannot communicate with others about the exam questions.

Students will take the exam in May and will receive either a "high pass", "pass", or "fail". If a student fails, they must retake the exam prior to the start of the following Fall semester. A second failure will result in dismissal from the program. Faculty readers are expected to complete their evaluation and return the evaluation form to the PhD Director within two weeks of the student completing the exam.

Second Year Paper

In addition to an exam, students will complete a second-year research paper. A second-year paper will require students to complete a research project which could (though it not required to) become a chapter of their dissertation and/or could be submitted to a peer-reviewed journal for publication. The student will pose an original research question, review relevant literature, outline the methods used to answer their question, employ those methods, report their results, and provide a conclusion.

The timeline for the paper is as follows: students will submit a short proposal for their planned paper to their chair and reader no later than the last day of the Spring semester of the second year; students can and could be encouraged to complete the proposal sooner. Approval of the proposal by chair and reader will be submitted to the PhD director. Students must then submit a complete paper by the first day of the following Fall semester of the third year. Student should present their research in a venue with their chair, reader, and the PhD program director present by the end of October of their third year. The presentation should incorporate feedback provided by reader and chair following submission of the draft. The paper (and presentation) will then be evaluated as "high pass", "pass", or "fail". As with comprehensive exam, a "fail" can result in dismissal from the program.

Establishing the Dissertation Committee

During the fifth semester (typically the fall of the third year of studies), and before admission to candidacy for the PhD degree, the academic advisor proposes, for the approval of the director of the school's doctoral program and the dean, a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the dissertation committee. The majority of the committee, including the advisor, must be full or adjunct members of the Graduate Faculty. This committee must review and approved the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated three times a year. *Only a SPIA faculty member is eligible to serve as the chair of the committee.*

This dissertation committee has the responsibility to advise the student on their research and has the authority to require high-quality research and/or the rewriting of any portion or the entire dissertation. It conducts the final oral examination and determines whether the dissertation meets accepted standards. The student must meet with their dissertation committee at least once a year (see Annual Dissertation Progress Evaluation above).The membership of the dissertation committee may be changed whenever it is appropriate or necessary, subject to the approve of the Doctoral Program Director and the Dean.

When a dissertation committee member leaves the University, the member must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed from within the department, and the restructured committee requires the approval of the dean and either the department chair or the director of the school's doctoral program. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.

Retired faculty members may remain as members or chairs of committee if they are spending considerable time in Pittsburgh or the vicinity and are still professionally active. Retired faculty who meets these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the dean and either the department chair or the school's director of doctoral programs.

The completed and signed Dissertation Committee Approval Form and/or the Change in Dissertation Committee Form should be submitted to the Academic Advising office for posting and filing.

All coordination between Dissertation Committee members is the responsibility of the student.

Dissertation Proposal

Immediately after passing the comprehensive examinations, and establishing the dissertation committee, the students should meet with the chair to discuss the development of a dissertation proposal, which outlines the goals and objectives, theoretical argument, policy implications, literature, research design, and timetable for the dissertation research. Students must defend their dissertation proposal within two semesters after having completed comprehensive exams, which will normally correspond to the end of Fall semester of the third year of studies. Students who do not defend their proposal by the end of the semester after their comprehensive exams will be placed on probation; students who do not defend their proposal by the end of the following semester (the probationary semester) are removed from the program.

The student will submit the Announcement of Dissertation Proposal Meeting Form to the Academic Advising office or the Doctoral Program Director ten days prior to the proposal meeting. The announcement will be sent to the faculty and graduate student email lists. Proposal defense meetings are open to all faculty and students.

There must be a minimum of three members present for the meeting to be convened, and the absent member is required to submit a written evaluation of the proposal to the Committee Chair. Under no circumstances can the meeting be held without the Chair. If the Committee accepts the proposal, all Committee members will sign the Approval of Dissertation Proposal Form. The completed and signed form is then submitted along with a copy of the approved proposal to the PhD.D. Program Director, who has final approval. According to University guidelines, only after the proposal has been accepted as final by the Doctoral Program Director does the student advance to candidacy. The signed and completed form is to be returned to Academic Advising office for posting and filing.

Dissertation

The Dissertation Committee must meet a minimum of once a year; however, students are strongly encouraged to schedule more frequent committee meetings.

An appropriate dissertation should be a substantive piece of original and independent research grounded in an appropriate body of literature. The characteristics which a dissertation should demonstrate are:

- the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution,
- a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base,
- a well-defined research design,
- clarity in composition and careful documentation,
- results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph,
- sufficient detail so that other scholars can build on it in subsequent work, and
- the preparation of the author to assume a position within the profession.

Oral Defense of the Dissertation

At the oral defense, the student will be asked to explain and justify dissertation research and to assess its relation and contribution to the literature and policy in the field. The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the University Times. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the dissertation committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the dissertation committee, must be sent to the Office of Academic Advising for posting and filing. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the dissertation committee should ensure that the dissertation is in final form, i.e., all required changes have been made, before requesting signatures of the members of the committee

Electronic Thesis and Dissertation (ETD)

After approval of the dissertation, all candidates are required to publish the document electronically via d-scholarship. For access to more information on ETD and training, go to www.pitt.edu/~graduate/etd/training.html.

General Academic Regulations in SPIA

Applying for Advanced Standing (Transfer Credits)

At the Plan of Study Meeting students who have completed a master's degree from an accredited institution prior to admission to SPIA must submit official transcripts certifying graduate courses completed. They can then be evaluated for acceptability as advanced standing, provided grades of B (or its equivalent) or better have been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. All accepted course credits will be entered as block credits on the student's transcript. Grades and GPAs are not recorded for transfer credits.

The required 72 credits of coursework may include credits obtained through meeting Advanced Standing requirements. In no cases, however, will accepted credits be used to waive required core courses. For students with master's degrees, a maximum of 30 credits for coursework may be applied to the PhD degree. For those students who have a master's degree from SPIA, a maximum of 36 credits for coursework may be applied.

In recognition of relevant doctoral study completed at a school other than SPIA, a maximum of 12 additional credits may be applied to the minimum credit requirement. In no case, however, can the total of all credits accepted through advanced standing exceed 36 credits (master's degree and relevant doctoral degree credits together, regardless of where the credits were obtained). Course Credit Acceptance forms are available through the Academic Advising office. When completed and signed, this form and supporting documentation must be submitted to the Academic Advising office for further evaluation, approval, posting and filing.

Acceptance of Transfer Credit

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University; however, graduate students already enrolled may, when approved in advance by the Doctoral Program Director, spend a term or more at another graduate institution to obtain training or experience not available at the University, and transfer those credits toward the requirements for a SPIA degree. In such instances, neither the University nor SPIA is responsible for any financial assistance to the graduate student.

Credit acceptance will not be granted for courses in which a grade lower than a B (GPA=3.0) or its equivalent has been received. No credits will be granted toward a SPIA degree for work completed in extension courses, correspondence courses, courses delivered electronically, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has an accredited program.

Course Work Acceptable as Graduate Credit

Courses at the University of Pittsburgh numbered 2000-2999 and 3000-3999 are acceptable graduate courses. No undergraduate language courses, courses numbered below 2000, or language acquisition courses may be applied toward SPIA degree requirements.

Substituting Non-SPIA Courses for Degree Requirements

Required courses for the individual degree programs are considered by the School as essential to the study of public and international affairs. Accordingly, students are required to take these courses in SPIA. In exceptional cases, and on a case-by-case basis, students may be permitted to substitute comparable courses offered in other Schools and departments, provided they obtain prior approval from the Doctoral Program Director *and* the faculty advisors for either or both the fields of specialization.

Statute of Limitations

The purpose of the statute of limitation is to ensure that a graduate degree from SPIA represents mastery of current knowledge in the student's field of study.

Requirements for the doctoral degrees must be completed within a period of eight consecutive calendar years from the students' initial registration for doctoral study.

Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the program director and submitted to the assistant dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Leaves of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance and approved by the dean or his/her designee. Only students in good academic standing will be approved for a leave of absence. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the students. Readmission following an approved leave of absence is a formality.

Students who take an unapproved leave of absence may, at the discretion of the dean and the program director, be readmitted to the School, but must finish their degree requirements within the statute by their original matriculation.

Parental accommodation. Consistent with the University's efforts to be inclusive and to support academic personal life balance, the University believes it is important to provide accommodations for graduate and professional students who become new parents, whether by childbirth or adoption, so that they may contribute to their family responsibilities while continuing to make progress towards their degree. This practice will help develop students who can successfully integrate their academic and personal pursuits. In recognition of the challenges of balancing the demands of graduate study and parenting a new child, these guidelines aim to improve the academic environment for student parents. The Graduate and Professional Student Parental Accommodation Guidelines assist graduate students immediately following the birth or placement for adoption of a child. The purpose of these guidelines is to make it possible for a student to maintain registered full-time student status, along with all the benefits of such status, while facilitating the return to full participation in courses, research and teaching.

Eligibility: The Parental Accommodation Guidelines apply only to full- and part-time students enrolled in graduate and professional programs who are in good academic standing and who are making satisfactory progress toward completion of a graduate degree. Students must have completed at least one full-time semester of their degree program to become eligible for coverage under these guidelines. The guidelines cover the situation of students who experience a childbirth, who adopt a child who is unable to be enrolled in full-day public school due to age or other developmental reasons, or who is a partner of someone who has experienced a childbirth or an adoption for whom the student has parental responsibilities. These eligibility requirements cover all provisions of the guidelines.

Graduation

Certification Requirements for Graduation

SPIA doctoral program requires the satisfactory completion of:

- Minimum of 67 credits of coursework (includes transfer credits)
- Dissertation credits (PIA 3099) - 6 credits

Successful completion of the following milestones:

- Plan of Study Meeting
- Annual Progress Evaluations
- Comprehensive Examinations
- Approval of Dissertation Committee
- Dissertation Proposal
- Dissertation Defense
- Electronic Dissertation Submission

Moreover, all candidates for graduation must be in good academic standing and registered in the term in which they wish to graduate.

The following must also be completed and submitted.

Complete the Required Surveys
- Survey of Earned Doctorate
- AAUDE Doctoral Exit Survey
- Forward the confirmation emails or certificate to korade@pitt.edu

Submit final ETD in ETD Administrator
- Review the instructions for submitting ETDs
- Submit your final ETD in ETD Administrator

Submit your Receipt for ETD Processing Fee
- Initiate the ETD Processing Fee by emailing payments@pitt.edu and provide the following information: your student ID, the dollar amount ($50), and the academic term (ex: spring 2025)
- Once the fee is posted, you will see the charge in PittPAY on the Account Activity tab; the payment can be processed on the Make

Payment tab.

- PittPAY will email you a receipt as soon as the payment is made.
- Forward a copy of your receipt to korade@pitt.edu

Application for Graduation

Students must complete an electronic application for graduation early in the term in which graduation is expected. To apply for graduation, complete the online application by logging into my.pitt.edu and following the instructions. As noted above, students should be registered in the term in which they are to graduate; in exceptional circumstances, students who complete all the degree requirements at the end of a term but graduate in the next term may petition the assistant dean of SPIA for a waiver of this registration requirement.

Master's

Master of International Development, MID

The Master in International Development (MID)is dedicated to achieving social, economic, and political progress and equality for all. Students gain training from experts in sustainable approaches that fundamentally promote well-being, empowerment and participation, dignity and human rights, of people everywhere. Our multidisciplinary and comprehensive program combines foundational knowledge and an essential balance of theory, applied skills, and experiential learning. Students experience a cutting-edge curriculum and gain professional opportunities needed to meet career aspirations and to be leaders and innovators as the field international development continues to grow and evolve. SPIA alumi live and work in the USA and over 120 countries around the world, doing impactful work in diverse employment sectors that include NGOs and nonprofits, research institutes and thinktanks, local and state public sectors, inter-governmental organizations such as the UN and World Bank, and the private sector.

MID students follow their passions to develop effective and collaborative responses to critical issues and the UN Sustainable Development Goals, for which we provide core training through numerous areas of specialization. Students gain essential development skills and insights, with emphasis on application to vulnerable and discriminated groups and to critical world problems such as impoverishment, climate change, ill health and disease, gender inequality, racial and ethnic discrimination, human rights violations, education gaps, migration, and urbanization. They put their knowledge and skills to work as practitioners, consultants, researchers, policymakers, diplomats, and social entrepreneurs on these an many other issues of global importance and in local to global contexts.

MID students complete 36 credits (3 terms at full time) including foundation and innovation courses; a specialized area of concentration; either a Thesis (independent research on a development problem), or a Capstone project focusing on a real world problem with an external partner such as an NGO or public sector agency; an internship experience; and free electives which may be applied to a minor, language study, area studies certificate, or dual degree. Areas of Concentration (choice of major and minor) include: NGOs & Civil Society, Governance & International Public Management, Social Policy, Energy & Environment, Urban Affairs & Planning, and Human Security. Optional regional studies certificates include Africa, Latin America and the Caribbean, Europe/EU, Asia, Russia & Eastern Europe. The University offers over 32 languages and a variety of study abroad opportunities. MID students can pursue joint degrees with other professional schools at the University. SPIA additionally offers a semester in DC option where students can network with key organizations and actors in the field.

MID Core (15 credits)

The MID degree requires 36 credits of course work. The 36 credits include a total of 15 MID degree core credits.

- PIA 2501 - DEVELOPMENT POLICY & PRACTICE
- PIA 2533 - SOCIAL INNOVATION FOR INTERNATIONAL DEVELOPMENT

One of the following:

- PIA 2510 - ECONOMICS OF DEVELOPMENT

OR

- PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT

One of the following:

- PIA 2003 - QUALITATIVE RESEARCH DESIGN & METHODS

OR

- PIA 2117 - PROGRAM EVALUATION

OR

- PIA 2022 - QUANTITATIVE METHODS

Take one of the following. Students may complete a one-term capstone (for 3 credits) or a two-term thesis option (for a total of 6 credits):

- PIA 2096 - CAPSTONE SEMINAR:

OR

- PIA 2099 - THESIS (to begin in second term, requires 6 credits to complete, using 3 credits of electives in addition to required core)

All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisor in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

MID Areas of Concentration (12 credits)

Students take four courses (12 credits) in one of the six MID Areas of Concentration, selecting courses from Concentration required course options and Concentration electives with annually updated courselists. MID Areas of Concentration:

- Governance & International Public Management
- Social Policy
- Nongovernmental Organizations & Civil Society
- Energy and Environment
- Urban Affairs and Planning
- Human Security

Electives/Minor Courses (9 credits)

Students take three electives/minor courses.

Master of Public and International Affairs, MPIA

The MPIA degree is a multidisciplinary program designed to prepare students for careers of influence in the international arena - as government policymakers, diplomats, intelligence officials, global business leaders, analysts, and policy researchers. The program emphasizes the practical skills and knowledge necessary to participate in international policy processes and shape their future. The MPIA curriculum includes traditional courses on international economics and international affairs, along with practical courses on intelligence collection and analysis, diplomacy, and international finance and professionalization. It also includes one of the country's few graduate specializations in Human Security - a unique field that focuses on the security of civilian populations and human rights.

Students must complete at least 36 credits in public and international affairs and may choose one of three majors: International Political Economy, Human Security, or Security & Intelligence Studies. Students may also pursue a minor in any area of concentration offered at SPIA (e.g., policy research and analysis), as well as a multidisciplinary one in cybersecurity. Students wishing to study a language or earn a university certificate can do so (though we note that could extend the time to degree beyond 18 months). Students can also choose to specialize in a region or area studies or design their own specialization. Students are encouraged to meet with an academic advisor to plan their course of study.

MPIA Core Requirements: 15 credits

- PIA 2022 - QUANTITATIVE METHODS
- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2042 - SKILLS FOR GLOBAL POLICY PROFESSIONALS

- PIA 2043 - INTERNATIONAL ECONOMICS

  Take one of the following. Students may complete a one-term capstone (for 3 credits) or a two-term thesis option (for a total of 6 credits):
- PIA 2096 - CAPSTONE SEMINAR:

  OR
- PIA 2099 - THESIS (to begin in second term, requires 6 credits to complete, using 3 credits of electives in addition to required core)

  All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisor in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Concentration Core Course: 3 credits

Take one of the following courses based on Concentration plan.

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY
- PIA 2307 - HUMAN SECURITY
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES

Concentration Courses: 9 credits

Take three approved Concentration courses based on Concentration plan.

- PIA 2xxx Approved Concentration course
- PIA 2xxx Approved Concentration course
- PIA 2xxx Approved Concentration course

Electives: 9 credits

- Take three (9 credits) graduate-level electives

Public Administration, MPA

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

Required Courses: 21 credits

Along with the 48 credits of Required MPA courses, all students must complete a 300-hour internship with approval from SPIA career development team.

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2022 - QUANTITATIVE METHODS
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2104 - FINANCIAL MANAGEMENT

- PIA 2117 - PROGRAM EVALUATION

  Take one of the following. Students may complete a one-term capstone (for 3 credits) or a two-term thesis option (for a total of 6 credits):
- PIA 2096 - CAPSTONE SEMINAR:

  OR
- PIA 2099 - THESIS (to begin in third term, requires 6 credits to complete, using 3 credits of electives in addition to required core)

  All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisor in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Energy and Environment Concentration: 12 credits

Energy & Environment explores the politics and policies of the worldwide energy industry, examining ways to meet global energy needs in a sustainable, environmentally conscious way. Pittsburgh is a global epicenter of one of the biggest energy revolutions of the 21st century - the shale gas boom. New technologies like "fracking" are making billions of dollars of natural gas accessible to world markets for the first time, generating thousands of new jobs from Europe to North America. Western Pennsylvania sits atop one of the largest and most productive shale deposits anywhere on the planet, raising major questions about how to extract the gas responsibly, how to protect communities from environmental harm, and how to tax and regulate the rapid growth. SPIA students study the economics of the global energy industry, environmental sustainability, and regulatory policy in one of the world's best living laboratories. Graduates are prepared for jobs at environmental protection agencies, energy corporations, and a host of local, state, and national government offices that make energy policy.

Take **two** of the following five courses:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: LOCAL & GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL

  Plus two additional Approved E&E Concentration Courses:
- PIA 2xxx Approved E&E Concentration Course
- PIA 2xxx Approved E&E Concentration Course

Governance and International Public Management Concentration (12 credits)

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Take one of the following five courses:

- PIA 2310 - MARKETS AND STATES
- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

  Plus take an additional three Approved GIPM Concentration Courses:
- PIA 2xxx Approved GIPM Concentration Course
- PIA 2xxx Approved GIPM Concentration Course
- PIA 2xxx Approved GIPM Concentration Course

Public & Nonprofit Management Concentration (12 credits)

Public service is a discipline practiced at many levels: local, national and international often with ripple effects across each. Through grassroots contributions and global applications, SPIA students pursuing a public & nonprofit management major acquire a deep understanding of the many contexts in which public and nonprofit organizations operate. Many look forward to the opportunity to leverage change in a mixed economy.

Our curriculum stresses responsible leadership and our students develop the skills to diagnose leadership challenges and opportunities from a variety of ethical and moral frameworks. Our interdisciplinary approach draws from a variety of fields such as philosophy, law, organizational design and political science. Our approach gives students the skills they need to meet the challenges of a world in which services increasingly span boundaries among business, government and nonprofit organizations.

- PIA 2103 - TALENT MANAGEMENT IN THE PUBLIC & NONPROFIT SECTOR
- PIA 2185 - STRATEGIC MANAGEMENT

Plus take an additional two Approved PNM Concentration Courses:

- PIA 2xxx Approved PNM Concentration Course
- PIA 2xxx Approved PNM Concentration Course

Policy Research and Analysis Concentration (12 credits)

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

- PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS

Plus take an additional three Approved PRA Concentration Courses:

- PIA 2xxx Approved PRA Concentration Course
- PIA 2xxx Approved PRA Concentration Course
- PIA 2xxx Approved PRA Concentration Course

Social Policy Concentration (12 credits)

Gain the quantitative, political, administrative and legal skills to analyze social needs and policy impact on human lives worldwide. You'll learn to monitor, evaluate, and communicate data to convey the consequences of policy development and implementation.

Take one of the following two courses:

- PIA 2210 - RACE, GENDER, LAW AND POLICY
- PIA 2216 - ECONOMICS OF SOCIAL POLICY

Take one of the following four courses *(the course chosen above may not be counted a second time)*:
PIA 2210 - RACE, GENDER, LAW AND POLICY
PIA 2216 - ECONOMICS OF SOCIAL POLICY
PIA 2223 - CITY OF WHITE SUPREMACY
PIA 2224 - REPARATIONS: POLICY, THEORY AND HISTORY
Plus take an additional two Approved SP Concentration Courses:

- PIA 2xxx Approved SP Concentration Course
- PIA 2xxx Approved SP Concentration Course

Urban Affairs and Planning Concentration (12 credits)

The concentration in Urban Affairs and Planning takes a city-focused perspective on urban development. More than half of the world's people now live in urban areas, raising important questions about how governments should meet the public's needs for transportation, health and sanitation, education, and other essential services.

As the developing world urbanizes, and the developed world undergoes redevelopment, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face critical challenges, including poverty, homelessness, and pollution, while other cities in developed countries, like Newcastle and Pittsburgh, face similar challenges of their own. The concentration prepares students to confront those problems while developing valuable skills in Geographic Information Systems (GIS), regional economic planning, sustainable development management, and social justice in the context of urban development.

Students must take two of the following six courses:

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES
- PIA 2223 - CITY OF WHITE SUPREMACY
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2720 - APPLIED GIS IN THE LOCAL GOVERNMENT
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS

Plus take an additional two Approved UAP Concentration Courses:

- PIA 2xxx Approved UAP Concentration Course
- PIA 2xxx Approved UAP Concentration Course

Elective/Minor Courses (15 credits)

Students may take five additional elective/minor graduate-level courses for a total of 15 credits.

48 Credits

MPA Joint Degrees

Students pursing an MPA have the option to do a Joint Degree:

MPA/JD

MPA/MIS

MPA/MPH

MPA/MSW

Quantitative Economics/Public Administration, MS/MPA

Public Policy and Management, MPPM

Master of Public Policy and Management (MPPM)

Accelerated Mid-Career Masters (Traditional)

The accelerated mid-career, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners.

The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study. Students may specialize in security & intelligence, global political economy, human security, development planning & environmental sustainability, non-governmental organizations & civil society, urban & regional planning, public & nonprofit management, and policy research & analysis.

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs.

Online Accelerated Mid-Career Masters

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

The program provides mid-career professionals with an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. It is designed to help enhance and advance the careers of working professionals in the public and nonprofit sectors, but is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service.

Online Program Structure

As an online MPPM student, you will enroll in two web-based courses (for a total of 6 credits) per term. You will be able to complete the 30-credit degree in just five terms. By taking courses during the spring, summer, and fall terms, you can earn your degree in just 20 months. You may, if you prefer, complete the program at a slower pace by taking just one course at a time.

You will follow a set curriculum of online courses, all of which are taught by regular GSPIA faculty who are dedicated to your success, wherever you are. You will complete your coursework using the Pitt Online Website, where you can login at your convenience to view course material and submit assignments.

In addition to the professors teaching your courses, you will be assigned to a faculty advisor and a full-time enrollment counselor who will be able to assist you by phone, Skype, or email with any questions you may have. Your advisor and enrollment counselor will help you navigate the registration process and work with you throughout your time at GSPIA to ensure your success.

Traditional Requirements:

MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
  OR
- PIA 2021 - INTERNATIONAL AFFAIRS
  OR
- PIA 2501 - DEVELOPMENT POLICY & PRACTICE

- PIA 2185 - STRATEGIC MANAGEMENT

- PIA 2117 - PROGRAM EVALUATION

- PIA 2896 - MPPM POLICY SEMINAR

Specialization Courses (six courses): 18 credits

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course

Minimum Required Credits: 30 credits

Online Requirements

Online MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2117 - PROGRAM EVALUATION
- PIA 2185 - STRATEGIC MANAGEMENT
- PIA 2896 - MPPM POLICY SEMINAR

Online specialization courses (six courses): 18 credits

Online MPPM students must take an additional 18 credits beyond the core.

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course

Minimum Required Credits: 30 credits

Micro-Credential

Public Policy

The "Public Policy" micro-credential consists of three SPIA courses on Public Policy. It is aimed at attracting PhD students from other units on campus who are interested in supplementing their disciplinary training with some exposure to theory and practice of the Public Policy process. We anticipate that students will primarily use required elective credits in their own programs to fulfill the requirements of this Micro-credential.

Required Course 1:

- PIA 3121 - POLICY THEORY

Required Course 2:

- PIA 2028 - PUBLIC POLICY ANALYSIS

Required Course 3: Choose one from a list:

- Any SPIA 3000-level course (except for PIA 3004 - Seminar in Research Design and Methods)
- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS
- PIA 3050 - QUALITATIVE RESEARCH DESIGN & METHODS
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: LOCAL & GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
- PIA 2216 - ECONOMICS OF SOCIAL POLICY
- PIA 2210 - RACE, GENDER, LAW AND POLICY
- PIA 2224 - REPARATIONS: POLICY, THEORY AND HISTORY
- PIA 2743 - URBAN AND LOCAL POLICY MAKING IN THE UNITED STATES
- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2510 - ECONOMICS OF DEVELOPMENT
- PIA 2501 - DEVELOPMENT POLICY & PRACTICE
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2460 - LATIN AMERICA SOCIAL & PUBLIC POLICY
- PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE
- PIA 2429 - THE WAR ON DRUGS
- PIA 2327 - TERRORISM AND COUNTER TERRORISM

Minor

Social Policy Minor

The requirements for the Social Policy (SP) Minor are:

One of the following SP concentration courses*:

PIA 2210 - RACE, GENDER, LAW AND POLICY

PIA 2216 - ECONOMICS OF SOCIAL POLICY

PIA 2512 - POVERTY AND INEQUALITY

PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT

PIA 2551 - GENDER AND DEVELOPMENT

PIA 2553 - GLOBAL HEALTH POLICY

PIA 2590 - LOCAL AND GLOBAL FOOD POLICY & SUSTAINABILITY

* MPA students may substitute PIA 2510 for PIA 2512

Plus:

PIA 2xxx Approved SP concentration course

PIA 2xxx Approved SP concentration course

Total credits = nine (9)

Public Administration Program

Master of Public Administration (MPA)

Public administration is a field practiced at the intersection of the government, nonprofit, and private sectors. SPIA's MPA program trains managers to balance the needs of each community with its resources, promoting neighborhood development, effective local government, ethical leadership, and responsible business practices. Students gain an incredibly diverse and flexible set of professional skills that will prepare you for leadership in nonprofit agencies, government offices, and private businesses worldwide.

Students will development professiona skills in neighborhood development, data interpretation, advocacy for effective local government, ethical leadership, responsible business practices and critical thinking and problem solving.

Degree Requirements

All MPA students are required to complete the SPIA core & MPA Degree Core courses along with the required Concentration courses and Electives.

Degree Core required courses (12 credits):

PIA 2022 Quantitative Methods

PIA 2025 Microeconomics

PIA 2028 Public Policy Analysis

PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisors in advance. Students with at least three years of relevant full-time work experience may peitition their career advisor for a waiver of this requirement during their first semester.

MPA Degree Core required courses (9 credits):

PIA 2020 Administration of Public Affairs

PIA 2117 Program Evaluation

PIA 2104 Financial Management

MPA Concentrations (12 credits):

Applicants will select from one of the following concentrations. Please click on this link for concentration details, Public Administration, MPA

Energy & Environment

Governance & International Public Management

Policy Research & Analysis

Public & Nonprofit Management

Social Policy

Urban Affairs & Planning

Free Electives/Minor Courses (15 credits)

Total MPA degree credits = 48

Minor

MPA students may also pursue a minor. Please click on the following link: SPIA Minors

Joint Degree Options

MPA students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MPA/law degree (JD), MPA/Master of Public Health (MPH), MPA/Master of Science in Information Science (MSIS), and MPA/Master of Social Work (MSW). They may also pursue a joint master's degree through the Graduate School of International Cooperative Studies at Kobe University in Japan. An accelerated, five-year bachelor's/master's degree program is available to select University of Pittsburgh undergraduates.

Master of Public Administration/JD

Master of Public Administration/MPH

Master of Public Administration/MSW

Master of Public Administration/MIS

Quantitative Economics/Public Administration, MS/MPA

Accreditation

SPIA's Master of Public Administration degree is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA). NASPAA accreditation recognizes that a master's program in public affairs has gone through a rigorous process of voluntary peer review conducted by the Commission on Peer Review and Accreditation (COPRA) , and has met NASPAA's Standards for Professional Master's Degree Programs in Public Affairs, Policy, and Administration.

Public and International Affairs Program

Master of Public and International Affairs (MPIA)

From the halls of the United Nations to the streets of war-torn conflict zones, the modern international system is in a state of rapid flux that demands versatile, well-educated professionals. The MPIA degree is a multidisciplinary program designed to prepare students for careers of influence in the international arena - as government policymakers, diplomats, intelligence officials, global business leaders, nonprofit managers, and policy researchers. The program emphasizes practical skills and knowledge necessary to participate in the world policy process and shape its future.

The MPIA curriculum includes traditional courses on world history, economics, and international relations theory, along with practical courses on intelligence collection and analysis, diplomacy, and international finance. It also includes one of the country's only graduate specializations in Human Security - a unique field that focuses on the security of civilian populations and human rights. Students will gain

professional skills in human security and rights, intelligence collection and analysis, international relations, diplomacy and international trade and finance.

Degree Requirements

All MPIA students are required to complete the SPIA core & MPIA Degree Core courses along with the required Concentration courses and Electives.

Degree Core required courses (15 credits):

PIA 2022 Quantitative Methods

PIA 2021 International Affairs

PIA 2043 International Economics

PIA 2042 Skills for Global Policy Professionals

PIA 2096 Capstone Seminar OR PIA 2099 Thesis

All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by teh student's career advisors in advance. Students with at least three years of relevant full-time work experience may peitition their career advisor for a waiver of this requirement during their first semester.

MPIA Core (3 credits):

Applicants will select from one of the following concentrations. Please click on this link for concentration details, Master of Public and International Affairs, MPIA. Based on Concentration, students must take one of the following courses:

PIA 2303 Security & Intelligence Studies or

PIA 2307 Human Security or

PIA 2301 International Political Economy

Concentration Core (9 credits):

Three approved courses based on concentration program.

PIA 2xxx Approved concentration course

PIA 2xxx Approved concentration course

PIA 2xxx Approved concentration course

Free Electives/Minor Courses (9 credits)

Total MPIA degree credits = 36

Minor

Minimum Requied Credits: 48 credits

International Development Program

Master of International Development (MID)

SPIA's Master in International Development (MID)-one of the oldest programs of its kind in the country-is dedicated to achieving social, economic, and political progress in countries worldwide, through means that fundamentally promote human dignity, well-being, empowerment, and rights. Distinguished by a multidisciplinary and comprehensive approach, our degree program combines cutting-edge knowledge and an essential balance of theory and practice.

We offer a flexible curriculum including six **concentration** options and numerous minor concentrations, valuable capstone and **internship** experiences, and **joint degree** and **regional certificate** options. Students gain essential development skills and insights, with emphasis on application to vulnerable and discriminated groups and to critical world problems such as impoverishment, climate change, ill health and disease, gender inequality, racial and ethnic discrimination, education gaps, migration, and urbanization.

Our program enables students to follow their passions and to develop effective and collaborative responses to critical issues and the UN Sustainable Development Goals. Graduates go on to pursue valuable careers and participate in meaningful processes of social change in diverse local contexts and at global levels.

Degree Requirements

Degree Core required courses (15 credits):

The MID degree required 36 credits of course work. The 36 credits include a total of 15 MID Degree Core credits.

Students must take the following:

- PIA 2501 Development Policy & Practice
- PIA 2533 Social Innovation for Global Development
- PIA 2510 Economics of Development OR PIA 2448 Political Economy of Development
- PIA 2003 Qualitative Research Design & Methods OR PIA 2117 Program Evaluation OR PIA 2022 Quantitative Methods
- PIA 2096 Capstone Seminar (3 credits) OR PIA 2099 Thesis (6 credits)

All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by teh student's career advisors in advance. Students with at least three years of relevant full-time work experience may peitition their career advisor for a waiver of this requirement during their first semester.

MID Concentrations Core(12 credits):

Applicants will select and complete 12 credits from one of the following concentrations. **Please click on this link for concentration details, Master of International Development, MID**

Energy & Environment

Governance & International Public Management

Human Security

Nongovernmental Organizations & Civil Society

Social Policy

Urban Affairs & Planning

Free Electives/Minor Courses (9 credits)

Master of International Development/MIS

Master of International Development/MSW

Master of International Development/MBA

Concentration

Social Policy Concentration

The concentration in Social Policy appeals to students who are committed to the study of social issues of public importance, who would like to pursue careers analyzing social needs and policy impacts as well as advocating for improved policies and implementation. To that effect, the curriculum offers courses on pressing social problems both in the U.S. and other parts of the world, and highlights linkages between inequality and discrimination, conflict, poverty, political and community participation, and social mobility. Students are trained in essential methods such as policy analysis and other rigorous tools of social science to bear on these important policy questions.

This concentration enables International Development students to address core development problems in diverse contexts worldwide, including those highlighted in the UN Sustainable Development Goals, by taking courses on topics such as poverty and inequality, food insecurity, global health, gender and development, economic growth, human rights and the SDGs, and environmental sustainability.

The concentration curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements) 12 credits:

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY & PRACTICE
- PIA 2510 - ECONOMICS OF DEVELOPMENT

Concentration Courses: 12 credits

Two of the following five courses:

- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT
- PIA 2551 - GENDER AND DEVELOPMENT
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2590 - LOCAL AND GLOBAL FOOD POLICY & SUSTAINABILITY
- PIA 2xxx Approved SP Concentration Course
- PIA 2xxx Approved SP Concentration Course

Electives: 18 credits

Minimum Requied Credits: 48 credits

Joint Degree

Governance & International Public Management, MID/MBA

Requirements for the joint degree MID/MBA

SPIA Core Requirements: 15 credits

- PIA 2501 - DEVELOPMENT POLICY & PRACTICE
- PIA 2533 - SOCIAL INNOVATION FOR INTERNATIONAL DEVELOPMENT

Take one of the following:

- PIA 2510 - ECONOMICS OF DEVELOPMENT

OR

- PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT

Take one of the following:

- PIA 2003 - QUALITATIVE RESEARCH DESIGN & METHODS

OR

- PIA 2117 - PROGRAM EVALUATION

OR

- PIA 2022 - QUANTITATIVE METHODS

Take one of the following. Students may complete a one-term capstone (for 3 credits) or a two-term thesis option (for a total of 6 credits):

- PIA 2096 - CAPSTONE SEMINAR:

OR

- PIA 2099 - THESIS (12 credits prior + Approved Research Methods course + approval by academic advisor) (12 credits prior + Approved Research Methods course + approval by academic advisor)(to begin in second term, requires 6 credits to complete, using 3 credits of electives in addition to required core)

Internship Requirement: All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisor in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Concentration Courses: 12 credits

Taken from a list of Approved Concentration Courses.

Electives: 9 credits

Minimum Required SPIA Credits: 36 credits

Master of Business Administration requirements: 33 credits

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Professional Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 7.5 elective credits of School of Business courses.

Total Number of Credits for Joint Degree: 69

Concentration Specific Requirements:

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Governance & International Public Management

Students must take one of the following five courses:

- PIA 2310 - MARKETS AND STATES
- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

  Plus three additional Approved GIPM Concentration Courses:
- PIA 2xxx Approved GIPM Concentration Course
- PIA 2xxx Approved GIPM Concentration Course
- PIA 2xxx Approved GIPM Concentration Course

Master of International Development/MBA

Requirements for the joint degree MID/MBA

SPIA Core Requirements: 15 credits

- PIA 2501 - DEVELOPMENT POLICY & PRACTICE
- PIA 2533 - SOCIAL INNOVATION FOR INTERNATIONAL DEVELOPMENT

  Take one of the following:
- PIA 2510 - ECONOMICS OF DEVELOPMENT

  OR
- PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT

  Take one of the following:
- PIA 2003 - QUALITATIVE RESEARCH DESIGN & METHODS

  OR
- PIA 2117 - PROGRAM EVALUATION

  OR
- PIA 2022 - QUANTITATIVE METHODS

  Take one of the following. Students may complete a one-term capstone (for 3 credits) or a two-term thesis option (for a total of 6 credits):
- PIA 2096 - CAPSTONE SEMINAR:

  OR
- PIA 2099 - THESIS (12 credits prior + Approved Research Methods course + approval by academic advisor) (12 credits prior + Approved Research Methods course + approval by academic advisor)(to begin in second term, requires 6 credits to complete, using 3 credits of electives in addition to required core)

Internship Requirement: All students must complete an approved internship of at least 300 hours while enrolled at SPIA. The internship must be approved by the student's career advisor in advance. Students with at least three years of relevant full-time work experience may petition their career advisor for a waiver of this requirement during their first semester.

Concentration Courses: 12 credits

Taken from a list of Approved Concentration Courses.

Electives: 9 credits

Minimum Required SPIA Credits: 36 credits

Master of Business Administration requirements: 33 credits

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Professional Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 7.5 elective credits of School of Business courses.

Total Number of Credits for Joint Degree: 69

Concentration Specific Requirements:

This concentration explores the politics and policies of environmental sustainability and environmental protection, climate change and climate emergencies, natural resource governance and the worldwide energy industry, and ways to meet global energy needs in an ethical and sustainable way. International Development students are equipped to confront the global climate emergency that threatens human survival, especially the in the poorest countries. Students study efforts to achieve a just and equitable transition to renewable energy,

thereby cutting global greenhouse gas emissions, while securing affordable and resilient energy systems and investing in economic diversification of traditional fossil fuel reliant regions. Students learn about international, national, state and local policy strategies to govern and protect the environment. Successes such as the Montreal Protocol for the protection of the ozone layer inform current efforts to address climate change, biodiversity loss, and transboundary air, water and waste issues.

Energy and Environment

Take two of the following five course options:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: LOCAL & GLOBAL
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL

Plus take an additional two Approved E&E Concentration Courses:

- PIA 2xxx Approved E&E Concentration Course
- PIA 2xxx Approved E&E Concentration Course

Concentration Specific Requirements:

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Governance & International Public Management

Take one of the following five courses:

- PIA 2310 - MARKETS AND STATES
- PIA 2519 - COMPARATIVE GOVERNANCE
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Plus take an additional three Approved GIPM Concentration Courses:

- PIA 2xxx Approved GIPM Concentration Course
- PIA 2xxx Approved GIPM Concentration Course
- PIA 2xxx Approved GIPM Concentration Course

Concentration Specific Requirements:

Human security threats are wide-ranging, manifesting in critical problems of deprivation, indignity, and fear that are also deeply interconnected. Human Security students learn to develop forward-thinking solutions to such problems by using analytical tools that are people-centered, and that tackle linkages between threats through comprehensive interdisciplinary analysis and innovative multi-sectoral collaboration across the fields of development, human rights, and security. By focusing on people as the central unit of analysis, human security approaches mark a shift away from traditional state-centered threats and responses, instead emphasizing peoples' lived experiences,

as well as participatory or "bottom-up" solutions that foster resilience and sustainability. Students benefit from SPIA's multidisciplinary faculty and its highly regarded Ford Institute for Human Security, one of the oldest human security programs in the country.

The flexible design of this concentration enables International Development students to use SPIA's comprehensive course offerings in order to study how development intersects with other issues, for example: the empowering tools offered by human rights for achieving Sustainable Development Goals such as education, poverty, hunger, and inequality; the importance of environmental sustainability goals for development work to prevent root causes of human displacement and ill-health; the role of development in fostering peace, reducing interpersonal violence such as human trafficking and gender-based violence, as well as political violence and armed conflict; and the value of intersectional and gender analysis across human security threats.

Human Security

Students must take PIA 2307 Human Security plus three additional Approved HS Concentration Courses.

- PIA 2307 - HUMAN SECURITY

  Plus an additional three Approved HS Concentration Courses:
- PIA 2xxx Approved HS Concentration Course
- PIA 2xxx Approved HS Concentration Course
- PIA 2xxx Approved HS Concentration Course

Concentration Specific Requirements:

The explosive growth of non-governmental organizations (NGOs) worldwide has fostered demand for deeply committed staff with solid development policy and organizational management skills. This concentration focuses on how NGOs and civil society drive social change and enable participation and empowerment, especially among vulnerable and excluded groups. It gives students the skills they need for careers in NGOs and social-change organizations including foundations, social movement coalitions, community organizations, non-profit associations, and social enterprises. Key topics of study include NGO management, program design and evaluation, advocacy, community participation and social movements, rights-based approaches, project and financial management, fundraising and grant writing, and policy analysis. Students apply such learning to wide-ranging policy issues at the heart of NGO work, for example food security, health policy, poverty and inequality, environmental sustainability, migration and refugees, human rights, and other UN SDGs. NGOCS students learn to apply essential organizational and management skills to address these and other important policy issues in diverse contexts around the world. Students also develop valuable direct experience through NGO internships, benefiting from the SPIA-to-DC pathway for internships with national and international organizations in the nation's capital and the option to study at SPIA's DC Center, SPIA's dedicated support for a wide range of international NGO internships and study abroad experiences, and local opportunities within our own vibrant nonprofit community.

Nongovernmental Organizations & Civil Societies

Students must take one of the following courses:

- PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE
- PIA 2508 - NGO ADVOCACY & INTERNATIONAL COALITIONS
- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Plus three Approved NGOCS Concentration Courses:

- PIA 2xxx Approved NGOCS Concentration Course
- PIA 2xxx Approved NGOCS Concentration Course
- PIA 2xxx Approved NGOCS Concentration Course

Concentration Specific Requirements:

The concentration in Social Policy appeals to students who are committed to the study of social issues of public importance, who would like to pursue careers analyzing social needs and policy impacts as well as advocating for improved policies and implementation. To that effect, the curriculum offers courses on pressing social problems both in the U.S. and internationally, and highlights linkages between

inequality and discrimination, conflict, poverty, political and community participation, and social mobility. Students use essential methods such as policy analysis and other rigorous tools of social science to bear on these important policy questions. Master of International Development students address social policies that are core to development problems in diverse contexts worldwide, including those highlighted in the UN Sustainable Development Goals (SDGs), such as poverty, food insecurity, health, gender inequality, human rights, and environmental sustainability.

Social Policy

Take two of the following five course options:

- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT
- PIA 2551 - GENDER AND DEVELOPMENT
- PIA 2553 - GLOBAL HEALTH POLICY
- PIA 2590 - LOCAL AND GLOBAL FOOD POLICY & SUSTAINABILITY

Plus an additional two Approved SP Concentration Courses:

- PIA 2xxx Approved SP Concentration Course
- PIA 2xxx Approved SP Concentration Course

Concentration Specific Requirements:

This concentration gives students a city-focused perspective on international development. More than half of the world population now resides in urban areas, raising important questions about how governments should meet public needs for transportation, health and sanitation, education, and other essential services within complex and often massive urban contexts. Worldwide, cities face similar challenges of development and redevelopment. As urbanization continues to grow at a rapid pace, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face particularly critical challenges including poverty, homelessness, and pollution. Students confront and compare problems and approaches from the local to the global, developing valuable skills in Geographic Information Systems (GIS), regional economic planning, sustainable development management, and social justice in the context of urban development.

Urban Affairs & Planning (UAP)

Take two of the following five course options:

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES
- PIA 2223 - CITY OF WHITE SUPREMACY
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS

Plus take an additional two Approved UAP Concentration Courses:

- PIA 2xxx Approved UAP Concentration Course
- PIA 2xxx Approved UAP Concentration Course

Public Policy and Management Program

Master of Public Policy & Management (MPPM)

Traditional Master of Public Policy and Management (MPPM)

The accelerated, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. The program is designed to help enhance and advance the careers of professionals in the public and nonprofit

sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study.

Online Master of Public Policy and Management (MPPM)

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that SPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

Special Admissions Requirements

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of SPIA's other, 36 or 48-credit master's degree programs. The flexible curriculum of the MPPM program is ideal for full-time and part-time students, as it allows them to take any of the courses offered at SPIA. Students are free to study international affairs, international development, or public administration, and may focus their course selection on any of the fields of study offered under SPIA's traditional, 36 or 48-credit master's degree programs.

School of Public Health

School of Public Health

History & Mission

Pitt's School of Public Health was founded in 1948 with a $13.6 million grant from the A. W. Mellon Educational and Charitable Trust. When the school opened its doors two years later in 1950, it was the 13th public health school in the nation. With an initial focus on occupational health and hygiene, the school was naturally influenced to address local public health needs within the industrialized City of Pittsburgh. Later, as Pittsburgh transformed into an economy driven by education and research, so did Pitt Public Health.

Mission

Through excellence in research, education and practice, the University of Pittsburgh School of Public Health generates knowledge, trains public health professions and partners with communities locally and globally to promote health, prevent disease and achieve health equity.

Looking Forward

The school now focuses its research on global health, health equity and premature mortality. Research also continues in such traditional Pitt Public Health study areas as infectious diseases, workplace and environmental health, strokes and heart disease, and radiation safety. Learn more about how emerging challenges have shaped our current priorities.

Admissions

Application instructions differ depending on whether applying for a degree, certificate, or non-degree coursework. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid.

Each department has specific admissions requirements linked below.

- Behavioral and Community Health Sciences
- Biostatistics and Health Data Science
- Environmental and Occupational Health
- Epidemiology
- Health Policy and Management
- Human Genetics
- Infectious Diseases and Microbiology
- Multidisciplinary Master of Public Health

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years per regulations. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Non-Degree Status

Whether you're considering a degree program and want to start off with a few courses, or you're a public health professional looking for additional training - you can enroll at Pitt Public Health as a non-degree student.

Non-degree students can take up to 12 credits (cumulative maximum) that can be applied to a Pitt Public Health degree or certificate program pending program approval. More information including admissions requirements and application instructions can be found by visiting Non-Degree Courses.

Note: *Pitt Public Health encourages non-degree students to apply to a degree or certificate program, but acceptance as a non-degree student does not guarantee admission to a degree or certificate program.*

Definitions Related to Distance Education

Individual academic programs may be governed by other definitions related to distance education that are required by their accrediting bodies. However, schools and units must follow the university's definitions for institutional reporting.

Please visit Definitions Related to Distance Education for full policy.

Registration

After being admitted to a graduate program, students may register for classes during the enrollment period. The enrollment period for a term or session is published in the University's Academic Calendar. Students registering for the first time are advised to complete the enrollment process well before the beginning of the term. More information may be found at www.registrar.pitt.edu/enrollment.

Once students have enrolled, they may view their class schedules online via PeopleSoft/HighPoint CX. For additional registration information, visit the Office of the University Registrar website: www.registrar.pitt.edu.

A student must be officially admitted, readmitted, or reinstated to the University before they may register for courses.

Registration Status

This policy establishes the criteria used to determine registration status, including full-time/part-time and active/inactive status.

Please visit Registration Status for the full policy.

International students may have additional registration and enrollment requirements. Information can be found on the Office of International Services Resources page.

Registration Add/Drop

This policy establishes the responsibilities and regulations regarding the Registration and Add/Drop processes and applies to all campuses of the University.

Please visit Registration Add/Drop for full policy.

Fees and Tuition

This policy establishes that tuition and mandatory fees are approved by the Board of Trustees and other fees and deposits are approved by the Office of the Provost. Some mandatory fees may not be applicable to all campuses; however, if assessed, the rate must be consistent with the current approved rates established at all campuses.

Please visit Fees and Tuition for full policy.

Maximum Credits per Term

No student is permitted to register for more than 15 graduate credits without written permission from the dean of the academic center in which the student is pursuing a degree. Graduate students who register for more than 15 credits will be billed for each additional credit that exceeds their full-time tuition rate. Individual schools and departments may restrict the maximum program of any or all of their graduate students.

Termination of Registration

This policy establishes Termination of Registration, a process that allows students to drop all their courses during the Add/Drop period, after which time a student resignation is required. It includes the resulting grade assignments, and academic and nonacademic financial adjustments associated with a Termination of Registration by the resignation process. This policy also documents administrative termination of registration resulting from disciplinary sanctions.

Please visit Termination of Registration for full policy.

Cross Registering via the Pittsburgh Council on Higher Education (PCHE)

Cross registration is a program through the Pittsburgh Council on Higher Education (PCHE) that provides an opportunity for enriched educational programs by permitting students to attend courses at any of ten participating colleges and universities: Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, LaRoche University, Pittsburgh Theological Seminary, Point Park University, Robert Morris University, and the University of Pittsburgh.

Please vist PCHE Cross Registration for more information.

Full-time and Part-time Study

Please visit Part-time and Full-time Enrollment for detailed information.

Registration for Full-time Dissertation Study Course (FTDR 3999)

This policy establishes the requirements for registration in the "Full-Time Dissertation Study" course.

Please visit Registration for the "Full-Time Dissertation Study" Course for full policy.

Course Withdrawal

This policy establishes regulations for course withdrawal and assignment of the Withdrawal (W) grade.

Please visit Course Withdrawal for full policy.

Specific resources related to registration and enrollment deadlines and processes include:

- The Office of the University Registrar maintains an Enrollment Resources website with information and tutorials related to registration, add/drop, withdrawal, and resignation.
- The Enrollment Calendar is made up of important dates surrounding enrollment/registration into classes at the University of Pittsburgh.

Required Training for All Graduate and Professional Students

Any graduate or professional student enrolled in a graduate program requiring more than 10 credits of in-person instruction or in any other graduate program designated by the Provost is required to complete training in the recognition, prevention and reporting of sexual misconduct, harassment and sexual violence (often known as Title IX training). The Title IX training program created by Pitt's Office of Institutional Engagement and Well-being satisfies this requirement. Under some circumstances, students may be allowed to complete special versions of the training designed to meet their specific needs. Requests for alternative training should be submitted to the Vice Provost for Graduate Studies. An approved version of the training must be completed in the student's first semester at the University.

Advising

The School of Public Health considers effective academic advising an essential component of educating students. Departments have the primary responsibility for identifying and assigning to each student a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. Departments are expected to provide students with a copy of school and departmental regulations appropriate for their program, and students are expected to become familiar with University, school, and department regulations concerning graduate study and to accept responsibility for the completion of all degree requirements.

The student's academic advisor is to direct and assist the student in the selection of classes and the conduct of research. Waivers from program requirements are processed at the program level, and waivers from school requirements by the Office of Student Affairs provided the student has met CEPH competencies. The Application for Graduation is processed through the Pitt Public Health Office of Student Affairs after clearance has been received from the academic advisor. A student will be certified for graduation only after the academic advisor has confirmed that all degree requirements have been met.

For students required to take preliminary, comprehensive, or defense examinations, the academic advisor, in consultation with the student, designates faculty members to act as the examining committee.

Each doctoral student is required to complete an Independent Development Plan per year and to submit it to his/her advisor. A suggested template is provided.

Each doctoral student, together with the student's doctoral committee, is responsible for assuring accomplishment of all elements of the student's course of studies, including the core requirements, the research tools requirement, course work in the field of specialization, advanced standing, the qualifying and comprehensive examinations, and the dissertation overview and its final oral defense.

No person should expect to receive guidance and direction from members of the Graduate Faculty unless they are registered in accordance with the program of study they are carrying.

Allowable Credits

Advanced Standing Credits

This regulation establishes the criteria for the acceptance of advanced standing credits, which are credits toward a University of Pittsburgh degree or credential through mechanisms other than credits earned through course registration at the University. Any exceptions to this regulation must be approved by the Office of the Provost and posted in the University Catalog.

Please visit Advanced Standing Credits for full policy.

Course Repeat

This document establishes regulations on course repeats. All schools and regional campuses are required to adhere to this regulation. Any exceptions to this regulation must be approved by the Office of the Provost and posted in the University Catalog.

Please visit Course Repeat for full policy.

Credential Overlap

This regulation establishes guidelines for credit overlaps occurring between multiple degrees or credentials being pursued at the University of Pittsburgh. All schools and regional campuses are required to adhere to this regulation. Any exceptions to this regulation must be approved by the Office of the Provost and posted in the University Catalog.

Please visit Credential Overlap for full policy.

Coursework Acceptable as Graduate Credit

A substantial proportion of courses acceptable toward a graduate degree should be designed explicitly for graduate students. Introductory graduate level (master's level) courses are numbered 2000-2999, those at an advanced graduate level (doctoral level) are numbered 3000-3999. To be eligible for a master's degree, a student must have completed at least 30 credits at the graduate level with at least an average grade of B (3.00). A doctoral student must complete additional graduate level courses as determined by his or her department or school. No lower-level undergraduate course (numbered 0001-0999 or 7000-7999) may be applied toward a graduate degree.

At least four courses (12 credits) or one-half the master's degree program, whichever is greater, must be at the graduate-level (the 2000 or 3000 series) and must be completed with an average grade of B (3.00). Additionally, the Commonwealth of Pennsylvania requires that master's degrees include a minimum of 30 semester credit hours beyond the baccalaureate level. The Commonwealth requires that a first professional degree, except those for the preparation of professional educators, must require the satisfactory completion of a minimum of 60 semester credit hours or 90 quarter credit hours for admission to the degree program and the satisfactory completion of a total minimum of 150 semester credit hours for the program.

Grading

Grade Changes

This policy establishes the responsibilities and regulations regarding the grade change process.

Please visit Grade Changes for full policy.

Quality Point Average (QPA) and Grade Point Average (GPA)

This policy establishes the University Cumulative Quality Point Average (QPA) and Grade Point Average (GPA).

Please visit University Cumulative Quality Point Average (QPA) and Grade Point Average (GPA) for full policy.

University Grading

This establishes the official University grades and symbols, including any corresponding grade points and definitions.

Please visit University Grading for full policy.

Incomplete (I) Grade

This document establishes regulations regarding submitting and resolving an Incomplete (I) for a class. Any exceptions to this regulation must be approved by the Office of the Provost and posted in the University Catalog.

Please visit Incomplete Grade for full policy.

Students are responsible for being honest and behaving ethically while pursuing academic studies. All individuals (students, faculty, post-doctoral researchers, and staff) at Pitt Public Health abide by the University's policy on academic integrity as well as the Pitt Public Health academic integrity procedures.

Academic Standing and Satisfactory Academic Progress

While enrolled at the University of Pittsburgh, students are expected to meet certain cumulative GPA standards and maintain progress towards their degree. The University of Pittsburgh makes use of multiple levels of academic standing to identify students at risk of jeopardizing successful completion of their degree and to provide multiple opportunities for intervention and coaching towards successful completion.

Academic Standing for Graduate and Professional Students

This regulation establishes the criteria for determining academic standing for graduate and professional students, and includes Academic Notice, Academic Program Change, and Academic Dismissal. Any exceptions to this policy must be approved by the Office of the Provost and posted in the University Catalog.

The University of Pittsburgh is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. Students' academic standing is maintained and monitored each term by the school, department or program in which the student is enrolled. Schools must provide graduate students with a written description of the implementation of this policy.

Note: While different from academic standing, Satisfactory Academic Progress (SAP) may impact the financial aid eligibility of students.

Please visit Academic Standing for Graduate and Professional Students for full policy.

Financial Aid Satisfactory Academic Progress

This policy establishes Satisfactory Academic Progress for students used in determining financial aid eligibility. It applies to most aid programs at the University of Pittsburgh. If a financial aid program has eligibility criteria that differ from this policy, then refer to the specific requirements of that program. The Satisfactory Academic Progress requirements for individual academic programs are separate from this policy.

Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid.

Please visit Financial Aid Satisfactory Academic Progress for full policy.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all requirements for professional master's degrees (MPH, MHA), in five years. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of ten years or eight years if the student has received credit for a master's degree appropriate to the field of study. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Career Services

Pitt Public Health Career Services is dedicated to providing informative programs, individualized career counseling services, and networking opportunities to help masters and doctoral students effectively prepare for, develop and manage a career related to their field of study. We offer a broad range of resources to achieve these goals including participation in Handshake, Pitt's comprehensive career services platform and job board. A career counselor is available to meet with students and alumni on a daily basis. Appointments can be scheduled online.

Ombudsperson

The ombudsperson assists SPH students with resolving conflicts and issues that arise in the course of their education and training that they believe have not or cannot be addressed within their academic department or program. The ombudsperson can help mediate conflicts and provides information about institutional policies related to the student's issues, including the University's grievance procedures. The

ombudsperson directs students to further resources on campus as appropriate. The SPH ombudsperson is a neutral contact person for students with whom they can engage in informal discussions.

The Pitt Public Health ombudsperson is Mike Dolinger, Director of Student Services. He can be reached at mikedolinger@pitt.edu to make an appointment.

Program and Course Offerings

A number of courses of general interest to all departments are offered and linked below. A list of course offerings by department can be accessed through the departmental sections of this catalog.

Graduate Certificate

Disaster Preparedness Certificate

This certificate program is designed to link the University and community in practical applied evaluation initiatives at the community level. As a student in this program, you will:

- Demonstrate a solid working knowledge of public health preparedness policies and practice
- Demonstrate mastery of skills needed for public health emergency preparedness that ensure equity and enhance community resilience in emergency preparedness and disaster response

Academic Requirements

Students must complete 15 credits, of which 12 are required and three are elective. Non-listed elective course options may be substituted for certificate electives with approval of the certificate director. Students are also encouraged to complete 12.5 contact hours of online asynchronous modules offered by the National Incident Management System prior to enrolling in their first class for the certificate.

Required Courses (12 Credits)

- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2572 - RISK COMMUNICATION
- EOH 2140 - CLIMATE CHANGE AND HUMAN HEALTH
- HPM 2130 - HEALTH LAW AND ETHICS

OR

- HPM 2131 - PUBLIC HEALTH LAW AND ETHICS
- IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES

Elective Courses (3 Credits)

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- EOH 2260 - ENVIRONMENTAL JUSTICE AND HEALTH EQUITY: REGULATIONS, POLICIES, AND PRACTICES
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2037 - ADVANCED VECTOR-BORNE INFECTIOUS DISEASES
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY
- PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
- PIA 2553 - GLOBAL HEALTH POLICY
- PUBHLT 2350 - NAVIGATING PUBLIC HEALTH COMPLEXITIES IN SURINAME: IMPLICATIONS FOR POPULATION HEALTH

Total Credits: 15

Global Health Certificate

Global health refers to health issues that transcend national boundaries and have global impact. Unprecedented challenges brought on by shifting migration patterns, climate change, conflict, pandemics, technological advancement, global commerce, among other issues are at the center of today's work. A certificate in Global Health will prepare you to work in settings that increasingly demand interdisciplinary and global thinking skills and develop global solutions to the world's most pressing challenges and complex health problems.

The certificate emphasizes an integrative problem-solving approach to global health based in health equity. The certificate provides a global perspective to the degree through focused coursework and a field practicum. Certificate course content covers a range of issues relevant to global health such as community-engaged research and practice, health education, health equity, health policy, ethics, human rights, epidemiologic trends, infection prevention and control, evaluation of global health programs, international affairs, development, among many others.

Required Courses

8 Credits

Certificate-required courses cannot overlap with any other program-required course. Overlap is permitted for the remaining elective courses.

- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2173 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION
- One of the following 3 credit courses. Students can request a substitute SPIA course with approval of the certificate director.
    - PIA 2448 - POLITICAL ECONOMY OF DEVELOPMENT
    - PIA 2502 - ENVIRONMENTAL POLICY: LOCAL & GLOBAL
    - PIA 2522 - CLIMATE POLICY - LOCAL & GLOBAL
    - PIA 2551 - GENDER AND DEVELOPMENT
    - PIA 2553 - GLOBAL HEALTH POLICY

Field Practicum

1 Credit (40 Hour) Minimum

Students must complete a field experience, which can be combined with the required practicum for their degree program provided that the experience is relevant to global health. Students have the opportunity to complete this global health practicum in the form of local opportunities or in an international setting. A minimum of 40 practicum hours required.

Elective Courses

1-6 Credits

Students select electives with guidance from the certificate director from a list of approved course recommendations for the certificate. Students select electives to align with their specific area of interest and intended skillset. Students can substitute electives with approval of the certificate director.

Total Credits: 15

Health Equity Certificate

Designed to increase the cultural competency of public health and other professionals, this innovative graduate certificate program addresses the systemic root causes of health disparities. While racial and ethnic health disparities are examples of the consequences of social and economic disadvantages, disparities may also be related to sexual orientation, religion, gender, native language, age, and disability status. Certificate students will:

- Assess the complexity of inequities among diverse groups of marginalized populations.
- Mobilize communities where disparities exist.
- Develop culturally tailored interventions and advocate for health public policy.
- Evaluate the impact/potential impact of policy measures on overall health, health care access, and quality of care for these populations.

Academic Requirements

The 15-credit certificate comprises 10 credits of required courses, 5 credits of approved electives, 6 hours of seminar, and an approved applied experience with a health equity component.

Required Courses

10 Credits

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS
  S*tudents enrolled in the certificate are encouraged to substitute an approved methods course in their own discipline to satisfy this requirement.*
- PUBHLT 2500 - INTEGRATIVE SEMINAR IN HEALTH EQUITY *(6 hour minimum)*

Approved Substitutes for Methods Course

Behavioral and Community Health Sciences:

- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Biostatistics:

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE

Epidemiology:

- EPIDEM 2144 - AGENT-BASED EPIDEMIOLOGICAL MODELING OF SOCIAL DETERMINANTS OF HEALTH
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES
- EPIDEM 2221 - GEOSPATIAL MAPPING AND SPATIAL ANALYSIS IN EPIDEMIOLOGY

- EPIDEM 2230 - SECONDARY DATA ANALYSIS: A CAPSTONE COURSE
- EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS

Health Policy and Management:

- HPM 2064 - HEALTH POLICY ANALYSIS *(master's students)*
- HPM 3064 - HEALTH POLICY ANALYSIS *(doctoral students)*
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- HPM 3125 - INTERMEDIATE HEALTH ECONOMICS

School of Public and International Affairs:

- PIA 2022 - QUANTITATIVE METHODS
- PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS
- PIA 2250 - WORKING WITH PUBLIC INTEREST TECHNOLOGIES AND CIVIC DATA
- PIA 2715 - GIS FOR PUBLIC POLICY

School of Nursing:

- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Elective Courses

5 Credits

- BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH
- BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS
- BCHS 2993 - MODELING HEALTH BEHAVIOR CHANGE
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- EPIDEM 2143 - SOCIAL EPIDEMIOLOGY
- EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
- EPIDEM 2162 - INFECTIOUS DISEASES AND GLOBAL HEALTH
- EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL
- EPIDEM 2709 - EPIDEMIOLOGY OF WOMEN'S HEALTH
- EPIDEM 2719 - REPRODUCTIVE EPIDEMIOLOGY
- EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- CLRES 2200 - INTRODUCTION TO RESEARCH DISPARITIES ON HEALTH CARE
- MEDEDU 2240 - CULTURAL COMPETENCE MEDICAL EDUCATION
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS
- NUR 3013 - ETHICS IN HEALTHCARE
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES
- PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH
- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- HPS 2245 - EUGENICS AND SOCIAL DARWINISM
- PIA 2210 - RACE, GENDER, LAW AND POLICY
- SOC 3493 - TOPICS IN SOCIOLOGY OF RACE & ETHNICITY

Applied Experience

Certificate students are required to complete an approved applied experience with a health equity component.

Total Credits: 15

Lesbian, Gay, Bisexual, and Transgender (LGBT) Health and Wellness Certificate

This certificate is designed for post-baccalaureate and graduate students like you who desire a focus on public health perspectives concerning the social, cultural and individual factors that influence the health and well-being of LGBTQIA+ communities. Conceptual and practical skills such as the design, implementation, and evaluation of programs are utilized to improve health levels among LGBTQIA+ populations. As a student in this program, you will:

- Learn from and work with leading faculty and researchers in the field of LGBTQIA+ health including faculty of the Center for LGBT Health Research.
- Apply interventional research, epidemiological research, and policy analysis to enhance the health and well-being of individuals related to sexual orientation and/or gender identity/presentation.
- Demonstrate how provision of health and wellness services to LGBTQIA+ populations results in overall lower health care costs in a larger community.
- Understand the process of affecting change or influencing policy decision making.
- Apply ethical principles to research and program practices with a specific focus on confidentiality and a primary responsibility to securing a healthier and safer future for the community.

- PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH

Elective Courses

10 Credits

Other electives may be taken with the approval of the certificate director.

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3002 - HEALTH SURVEY METHODS
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Practicum

Students must complete a practicum which can be combined with the required practicum for their degree program provided that the experience is relevant to LGBT health and wellness.

Essay/Thesis or Research Project

Certificate students must complete and essay/thesis or research project related to LGBT health and wellness with an oral presentation of the essay/thesis or research for peers and members of the Center for LGBT Health Research, or at approved scientific meeting. Students enrolled in degree programs typically fulfill this requirement with the essay, thesis, or dissertation required for their degree program.

Total Credits: 15

Maternal and Child Health (MCH) Certificate

The graduate certificate in Maternal and Child Health (MCH) prepares students to lead in advancing the health and equity of women, children and families. Engage in a vibrant, equity-focused MCH student community and develop methodological skills and a core knowledge base in the unique health needs facing MCH populations. Gain the ability to demonstrate knowledge, skills and abilities in identifying and addressing health inequities/disparities through experiential learning opportunities.

- 300+ hours of training including 15 credits didactic learning (core coursework plus electives)
- participation in Maternal and Child Health Equity Scholars
- writing labs and skill building workshops
- doctoral students present work at a conference or author a manuscript
- annual symposium participation

- ECON 3430 - TOPICS IN LABOR AND HEALTH ECONOMICS

Experiential Learning

Certificate students will engage in 300 hours of experiential learning under the mentorship of faculty or community partners specializing in maternal and child health equity.

Total Credits: 15

Joint Degree

Infectious Diseases and One Health, MPH/MD

The joint degree program requires students to complete all the core requirements for the MD and Infectious Diseases and One Health MPH (IDM-OH MPH) degrees allowing students to blend clinical training with training in Infectious Diseases and One Health. Students complete coursework for the MPH core during summer terms (online asynchronous) and MPH core and electives embedded within the fall and spring terms (in-person) in the MD program. Students are required to complete a 200-hour minimum practicum (fulfilled by Family Medicine Clerkship) that will integrate public health concepts into clinical practice and prepare an essay (fulfilled by the longitudinal research project) that addresses an issue of public health significance that demonstrates the ability to synthesize information from numerous sources.

The MD/IDM-OH MPH program is designed to be completed in four years of full-time study. The IDM-OH MPH requirements for the joint degree are listed below. Students should refer to the School of Medicine for the most current MD requirements.

- 42 Public Health Credits
- Practicum (200-hour minimum)
- Essay

Admissions

Students must apply separately to the School of Medicine and School of Public Health.

MPH Core Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

  OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS *(preferred)*
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH

- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

IDM-OH MPH

- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM *(1 credit)*
  Family Medicine Clerkship can be taken in place of IDM 2007; students are required to complete and submit all Pitt Public Health practicum requirements.
- IDM 2010 - PATHOGEN BIOLOGY
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY *(2 credits)*
  The longitudinal research project can be taken in place of IDM 2021; students are required to complete and submit all Pitt Public Health essay requirements.
- IDM 2025 - MICROBIOLOGY SEMINAR
- IDM 2103 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Elective Courses

Students select graduate-level electives as recommended and approved by their academic advisor.

Total Joint Degree Credits: 42

Multidisciplinary, MPH/MD

The joint degree program requires students to complete all the core requirements for the MD and Multidisciplinary MPH (MMPH) degrees allowing students to blend clinical training with population-based approaches to improving health. Students complete coursework for the MPH core during summer terms (online asynchronous) and MPH core and electives embedded within the fall and spring terms (in-person) in the MD program. Students are required to complete a 200-hour minimum practicum (fulfilled by Family Medicine Clerkship) that will integrate public health concepts into clinical practice and prepare an essay (fulfilled by the longitudinal research project) that addresses an issue of public health significance that demonstrates the ability to synthesize information from numerous sources.

The MD/MMPH program is designed to be completed in four years of full-time study. The MMPH requirements for the joint degree are listed below. Students should refer to the School of Medicine for the most current MD requirements.

- 42 Public Health Credits
- Practicum (200-hour minimum)
- Essay

Admissions

Students must apply separately to the School of Medicine and School of Public Health.

MPH Core Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
  OR

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

MMPH Required Courses

- PUBHLT 2002 - ESSAY-MMPH *(1-2 credits)*
  The longitudinal research project can be taken in place of PUBHLT 2002; students are required to complete and submit all Pitt Public Health essay requirements.
- PUBHLT 2029 - MMPH PRACTICUM *(1-3 credits)*
  Family Medicine Clerkship can be taken in place of PUBHLT 2029; students are required to complete and submit all Pitt Public Health practicum requirements.

Elective Courses

Students select graduate-level electives as recommended and approved by their academic advisor.

Total Joint Degree Credits: 42

Master's

Multidisciplinary, MPH

The mission of the Multidisciplinary Master of Public Health (MMPH) program is to prepare doctoral level health professionals to blend clinical or other professional training with population-based approaches to improving health. This MPH degree gives students the flexibility to pursue customized competencies tailored to their career goals.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The program is designed to be completed in one year of full-time study. The requirements for the MMPH degree are listed below.

- 42 Credits
- Practicum (200-hour minimum)
- Essay

Department of Behavioral and Community Health Sciences

The Department of Behavioral and Community Health Sciences at the University of Pittsburgh examines the social determinants of health, that is, the set of social and behavioral factors that either promote or threaten public health. Our interventions alter these social and behavioral factors (such as housing, health literacy, or care management) to assess effects on community health. The BCHS mission statement summarizes our approach:

Vision

Healthy people living in thriving and equitable communities.

Mission

Improve and promote health and equity by engaging individuals, communities, and systems through our research, teaching, and practice.

Values

Open communication; active collaboration; integrated and strength-based approaches; social justice and health equity; application of knowledge in the context of people's lives.

The primary educational mission of the Department is to prepare students for positions of responsibility and leadership in public health practice, research, and training. Our students learn to employ the most current health behavior theories and community development strategies in approaching public health challenges. They develop applied research skills in community health assessment and planning, program implementation and evaluation, health education, and health communication. They learn how to design programs and conduct community-based research, and to work as part of interdisciplinary teams examining behavioral interventions and community assessment strategies. These educational and practice experiences prepare our graduates to move into leadership positions at the local, national, and international levels.

The department has a world-class faculty that is involved in teaching, research, and community service on the local, national, and international level. We collaborate with local and regional public health systems, and many of the leadership staff in these organizations also have faculty appointments and teach classes in the department.

Please visit Behavioral and Community Health Sciences Admissions for department and program-specific application requirements.

Joint Degrees

Students in the BCHS MPH program can pursue two graduate degrees simultaneously, through partnerships with other schools and departments at the University of Pittsburgh. Joint programs typically reduce the number of credits needed for each degree, allowing students to earn two degrees in three years for master's programs and four to five years for MPH/PhD programs.

To participate in a joint degree program, students apply separately to both schools and must meet all of the usual admissions requirements.

Although it is possible to apply to both schools at the same time, currently enrolled students can still apply for a joint degree as long as they have not yet completed one year of full-time study.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Certificate

Evaluation of Public Health Promotion and Health Education Programs Certificate

This certificate program is designed to link the University and community in practical applied evaluation initiatives at the community level. As a student in this program you will:

- Acquire skills to participate in various types of evaluation projects in the public health arena.
- Work on evaluation projects with support from an expert in the field of program evaluation.

Academic Requirements

15 credits is required, including a 3-credit applied evaluation internship experience under the supervision of evaluation faculty or the certificate program director and in collaboration with a community preceptor.

Required Courses

9 Credits

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2503 - PRACTICUM *(3 credits, 320-400 hours minimum)*

Elective Courses

6 Credits

Master's students must choose six credits of electives from the following list of options within and outside of BCHS.

Doctoral students must choose one of the following courses:

- BCHS 2511 INDEPENDENT STUDY *(3 credits with approval of certificate director)*
- BCHS 3003 SEMINAR IN ADVANCED EVALUATION TECHNIQUES

Additionally, doctoral students must choose three credits of electives from the following list of options within and outside of BCHS.

An updated list is available each year, and students are welcome to propose additional electives from elsewhere in the University.

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES

Total Credits: 15

Doctoral

Behavioral and Community Health Sciences, PhD

The Doctor of Philosophy (PhD) program prepares students to conduct research and teach in the social and behavioral sciences areas of public health and in academic settings. The PhD is focused on training researchers in the behavioral and community health sciences to integrate state-of-the art theory, designs, and analysis approaches to examine current problems in public health.

The program is designed to be completed in four years. The requirements for the BCHS PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy
- Final Oral Examination - Dissertation Defense

BCHS PhD Requirements

Theories of Behavior & Community

6 Credits

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Research Design & Methods

12 Credits

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
  OR
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3200 - SCALE DEVELOPMENT AND SURVEY DESIGN IN SOCIAL AND BEHAVIORAL SCIENCES
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Elective: Theory & Methods

3 Credits

3 credits from the list below or 3 credits of relevant graduate-level coursework as recommended by academic advisor.

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
  AND
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
  AND
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS

Statistical Analysis

9 Credits

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Interventions

5-6 Credits

- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
  OR
- CLRES 2214 - FOUNDATIONS OF IMPLEMENTATION SCIENCE PT 1 & 2

Integration of Public Health Research & Practice

5-10 Credits

- BCHS 3100 - GRANT WRITING
- HPM 3501 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 1
- FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING
  OR
- BCHS 2511 - INDEPENDENT STUDY *Students must complete 6 UCTL Workshops (1-3 credits)*
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH *students with MPH from CEPH-accredited school are eligible to waive*

Milestones

2-4 Credits

- BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION *(up to 3 credits)*
- BCHS 3010 - RESEARCH AND DISSERTATION PHD *(up to 1 credit)*
  OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Electives

1-6 Credits

As recommended by academic advisor.

Other Requirements

Preliminary (Qualifying) Evaluation

Occurs at the end of the 1st year of full-time study (2 semesters); for part-time students, typically occurs at the end of the 2nd year of part-time study.

- **Requirements, general:**
- GPA >= 3.3
- Completion of first IDP
- Completion of no more than 30 credits in the program
- Completion of online ethics modules
- Submission of final transcript from Master's degree (if admitted pending receipt)
- **Requirements, coursework:**
- BCHS 2525 INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2558 HEALTH PROGRAM EVALUATION
- BCHS 3007 ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3555 DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS
- BIOST 2041 INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 PRINCIPLES OF EPIDEMIOLOGY
- **Format of evaluation:** Written paper with oral defense
- **Other information, outcomes:**
- Pass without changes
- Pass with revisions

- Fail (one additional attempt allowed)

Comprehensive Examination

Occurs after 2nd year of full-time study (4 semesters); for part-time students, typically occurs at the end of 3rd or 4th year of part-time study.

- **Requirements, general:**
- Passed Preliminary Evaluation
- **Format of evaluation:** Written paper with oral defense
- **Other information, outcomes:**
- Pass without changes
- Pass with revisions
- Fail (one additional attempt allowed)

Overview/Prospectus Meeting

Occurs after 2nd year of full-time study (4 semesters); for part-time students, typically occurs at the end of 3rd or 4th year of part-time study. May be completed at the same time or after the Comprehensive Examination

- **Requirements, general:**
- Passed Preliminary Evaluation
- Passed Comprehensive Examination (if completed together, Comprehensive Examination is evaluated first)
- Completion of all required coursework
- **Format of evaluation:** Written paper with oral defense
- **Other information, outcomes:**
- Pass without changes
- Pass with revisions
- Fail (one additional attempt allowed)

Admission to Candidacy

Occurs after successful defense (pass) of the dissertation overview.

Final Oral Examination - Dissertation Defense

Occurs at a minimum of 8 months after successfully passing the dissertation overview.

- **Requirements, general:**
- Passed dissertation overview.
- **Format of evaluation:** Written paper with oral defense
- Format option 1: traditional single integrated document
- Format option 2: three articles of publishable quality with an overarching introduction and discussion/conclusion

Total Credits: 72

Joint Degree

Behavioral and Community Health Sciences, MPH/MID

This program is a collaboration between the School of Public and International Affairs and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/MID joint degree program prepares students for careers as public health practitioners in emerging economies where health issues are closely linked to social, political, and economic problems.

Students are required to complete a 300-hour field placement practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The BCHS MPH/MID joint degree is designed to be completed in three years of full-time study. The BCHS requirements for the MPH/MID joint degree are listed below. Students should refer to the School of Public and International Affairs for the most current MID requirements.

- 45 Public Health Credits *(6 credits of public health-relevant electives taken in SPIA can be applied to the 45-credit requirement)*
- 78 Total Credits
- Practicum (300-hour minimum)
- Essay or Thesis

Behavioral and Community Health Sciences, MPH/MSW

This program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both Master of Social Work and Master of Public Health degrees and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The BCHS MPH/MSW joint degree typically is completed with a three-year curriculum plan for Direct Practice or COSA. The BCHS requirements for the MPH/MSW joint degree are listed below. Students should refer to the School of Social Work for the most current MSW program requirements.

- 45 Public Health Credits *(9 credits taken in Social Work can be applied to the 45-credit requirement; 3 credits of field placement in place of BCHS 2503 and 6 credits of public health-relevant electives)*
- 33 Social Work Credits *(plus 18 field placement credits)*
- Practicum (200-hour minimum)
- Essay or Thesis

Behavioral and Community Health Sciences, MPH/PhD, Anthropology

This program is a collaboration between the Dietrich School of Arts and Sciences, Department Anthropology and the School of Public Health, Department of Behavioral and Community Health Sciences. The MPH/PhD joint degree program prepares anthropologists for

research, teaching, and program planning/evaluation for specialization in the cultural, social, and behavioral aspects of health and health care in either a domestic or international setting.

Students are required to complete a 200-hour practicum in a public health setting (Anthropology fieldwork fulfills this requirement) and prepare an essay or thesis (Anthropology dissertation fulfills this requirement) that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH/PhD joint degree is designed to be completed in four to five years including time for dissertation research. The BCHS requirements for the MPH/PhD joint degree are listed below. Students should refer to the Department of Anthropology for the most current PhD requirements.

- 45 Public Health Credits *(6 credits of public health-relevant electives taken in Anthropology can be applied to the 45-credit requirement)*
- 87 Total Credits *(reduction in total credits to 81 expected to be approved for AY 26-27)*
- Practicum (200-hour minimum)
- Essay or Thesis

Behavioral and Community Health Sciences, MPH/PhD, Social Work

This joint program with the University of Pittsburgh's School of Social Work prepares students to fulfill leadership roles in public health systems or academic settings with a particular focus on maternal and child health. Students in this program have opportunities to work with local organizations on a variety of planning, evaluation, and research activities.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis (fulfilled by the social work dissertation) that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH/PhD joint degree is designed to be completed in four to five years including time for dissertation research. The BCHS requirements for the MPH/PhD joint degree are listed below. Students should refer to the School of Social Work for the most current PhD requirements.

- 45 Public Health Credits *(6 credits of public health-relevant electives taken in Social Work can be applied to the 45-credit requirement)*

Admissions

Students must apply separately to the School of Social Work and the School of Public Health.

MPH Core Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING OR
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/PhD Social Work Required Courses

- BCHS 2503 - PRACTICUM (1-3 credits)
- BCHS 2521 - ESSAY (1-3 credits)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2519 - APPLYING THEORY AND SYSTEMS THINKING IN PUBLIC HEALTH

Elective Courses

Minimum 6 credits from list below. Additional electives must be added, as recommended by academic advisor, to earn total number of credits required for degree program. Students can apply a maximum of 6 credits of public health-relevant coursework taken in Social Work to meet elective requirements.

- BCHS 2504 - THEORY AND PRACTICE OF HEALTH COMMUNICATIONS
- BCHS 2516 - VIDEO FOR HEALTH PROMOTION
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- BCHS 2551 - SOCIAL NETWORKS & HEALTH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2572 - RISK COMMUNICATION
- BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
- BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS
- BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Total School of Public Health Credits: 45

Total Joint Degree Credits: 72

Master's

Behavioral and Community Health Sciences, MPH

The MPH in Behavioral and Community Health Sciences (BCHS) program prepares students for an applied public health career. In the MPH program you will learn and apply:

- community-engaged strategies
- social and behavioral concepts to assess the health status of populations
- applied social/behavioral theory
- social/behavioral science research methods to evaluate health promotion programs
- how to communicate with other researchers, communities, and policymakers.

The program emphasizes student learning and practicing assessment and research skills in the context of social and behavioral change at the individual, organizational, and community levels.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters. The requirements for the BCHS MPH degree are listed below.

- 45 Credits
- Practicum (200-hour minimum)
- Essay

- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3021 - SOCIAL NETWORKS AND HEALTH II: COMPUTER METHODS
- BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH
- PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Total Credits: 45

Department of Biostatistics and Health Data Science

Biostatistics is an innovative field that involves the design, analysis, and interpretation of data for studies in public health and medicine. Biostatistics experts play a crucial role in drawing insightful conclusions about disease and health risks by applying, adjusting, and developing mathematical and statistical methods to address factors that impact health.

Our students benefit from collaboration as statisticians with the renowned University of Pittsburgh School of Medicine and UPMC, Pennsylvania's largest academic medical center, and have access to real-world research opportunities and extensive University computing facilities. Through rigorous courses, students will

- gain a comprehensive understanding of statistical methods in the context of public health and medical problems;
- work with faculty on developing new and innovative methodologies and analytical techniques;
- have the opportunity through both research and service to apply these methods to current and pressing concerns in medicine and public health.

Mission

Our departmental mission is to (i) tackle contemporary biostatistical and health data science through innovative methodological research, (ii) advance biomedical and public health research and practice through multidisciplinary collaborations, (iii) cultivate the next generation of leaders in biostatistics and health data science through high-quality, inclusive education.

Vision

Leading data-driven science in public health via innovative methodology, interdisciplinary collaboration and impactful education.

Admissions & Aid

All new applicants must apply through SOPHAS. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid. Please visit Biostatistics and Health Data Science Admissions for department and program-specific application requirements.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Doctoral

Biostatistics, PhD

The PhD in biostatistics is an academic degree program for students with a background in mathematics and a strong interest in public health and medicine. The program emphasizes statistical theory and methods so that students are prepared to be effective statistical collaborators in interdisciplinary studies; lead the design and execution of studies; and develop biostatistics methodology.

The program is designed to be completed in four to five years. The requirements for the Biostatistics PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy

- Final Oral Examination - Dissertation Defense

guy24@pitt.edu

Required Courses

- BIOST 2025 - BIOSTATISTICS SEMINAR *(3 terms)*
- BIOST 2141 - BIOSTATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS
  OR a minimum 2-credit course in statistical programming
- BIOST 2179 - BIOSTATISTICS CONSULTING PRACTICUM
- BIOST 3000 - TEACHING PRACTICUM
- BIOST 3011 - INTRODUCTION TO STATISTICAL INFERENCE 1
- BIOST 3012 - INTRODUCTION TO STATISTICAL INFERENCE 2
- BIOST 3021 - ADVANCED STATISTICAL INFERENCE 1
- BIOST 3022 - ADVANCED STATISTICAL INFERENCE 2
- BIOST 3025 - LINEAR MODELS
- BIOST 3042 - MIXED MODELS
- BIOST 3050 - SURVIVAL ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(2 terms)*
- BIOST 3010 - RESEARCH AND DISSERTATION PHD *(3 credits)*
  OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY *(1 term)*

Elective Courses

In situations where a student's research interests or needs indicate alternative statistics, data science or machine learning courses outside the department are more appropriate, it may be substituted with the permission of the student's academic or dissertation advisor. Such courses should cover topics not already addressed by the electives listed below or may be considered if the listed courses are not offered during the desired term.

BIOST Elective Courses

Eighteen (18) credits of the following courses:

- BIOST 2067 - APPLIED META-ANALYSIS
- BIOST 2080 - ADVANCED STATISTICAL LEARNING
- BIOST 2151 - BAYESIAN DATA SCIENCE
- BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA
- BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE
- BIOST 2165 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS
- BIOST 2168 - INTRODUCTION TO CAUSAL INFERENCE
- BIOST 2174 - ADVANCED R COMPUTING
- BIOST 2181 - HEALTH DATA SCIENCE: DATA MANAGEMENT AND PROGRAMMING
- BIOST 2182 - HEALTH DATA SCIENCE: DATA VISUALIZATION AND BIG DATA
- BIOST 2183 - HEALTH DATA SCIENCE: STATISTICAL LEARNING AND ARTIFICIAL INTELLIGENCE
- BIOST 3065 - ANALYSIS OF DATA WITH MISSING VALUES
- STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS
- STAT 2240 - APPLIED SAMPLING
- STAT 2320 - APPLIED TIME SERIES
- STAT 2651 - BAYESIAN ANALYSIS

Domain Knowledge and Career Development Electives

Students must complete at least three (3) credits outside of the Department of Biostatistics and Health Data Science, in an area that best aligns with their research domain or career goal.

Other Requirements

Preliminary (Qualifying) Evaluation

Students are expected to take the preliminary examination at the end of the first year if they enter the program with a prior graduate degree in related fields, or at the end of the second year if they enter without a graduate

degree in related fields.

The PhD preliminary examination is a written exam consisting of two separate components: theory and application (including public health based on epidemiology). In order to pass the preliminary examination, students must receive passing scores for both components of the examination.

Required Coursework

Theory (Part 1 of 2)

BIOST 3021 ADVANCED STATISTICAL INFERENCE 1

BIOST 3022 ADVANCED STATISTICAL INFERENCE 2

BIOST 3025 LINEAR MODELS

BIOST 3042 MIXED MODELS

Application (Part 2 of 2)

BIOST 2141 BIOSTATISTICAL METHODS

BIOST 2142 APPLIED REGRESSION ANALYSIS

BIOST 2143 LONGITUDINAL AND CLUSTERED DATA ANALYSIS

BIOST 3042 MIXED MODELS

EPIDEM 2110 PRINCIPLES OF EPIDEMIOLOGY

Comprehensive Examination

The comprehensive examination should be passed at least one academic term before scheduling the dissertation defense. The examination is oral and attended only by the student and the doctoral committee. The student takes the comprehensive examination after presenting a dissertation overview to members of the doctoral committee and all interested members of the Department of Biostatistics and Health Data Science.

Overview/Prospectus Meeting

The dissertation overview should be passed at least one academic term before scheduling the dissertation defense. Doctoral students must prepare and present a dissertation proposal to members of the doctoral committee and all interested members of the Department of Biostatistics and Health Data Science. The purpose of the overview is for a student to demonstrate that he/she is prepared to complete a dissertation by showing a general breadth of biostatistical knowledge and deep understanding of particular area(s) of biostatistics, demonstrating the ability to use biostatistical research methods and presenting a carefully formulated plan of novel dissertation research.

An announcement advertising the time and location of the dissertation overview should be disseminated to the Department at least one week prior to the presentation. The doctoral committee must unanimously approve the dissertation topic and research plan before the student is admitted to candidacy for the doctoral degree.

Admission to Candidacy

Admission to candidacy should occur at least one academic term before the defense of the dissertation in order to provide an opportunity for the dissertation committee members to review, criticize, and monitor the proposed research.

To qualify for admission to candidacy a student must:

- be in full graduate status
- have satisfied the requirement of preliminary examination
- have completed all required coursework with a minimum quality point average (QPA) of 3.00
- shown proficiency in a research or investigative tool
- have received approval of the proposed dissertation subject and plan following successful completion of the dissertation overview and comprehensive examination requirements

Students are informed of admission to candidacy by written notification from the Pitt Public Health Office of Student Affairs.

Final Oral Examination - Dissertation Defense

The final oral examination in defense of the doctoral dissertation is conducted by the student's dissertation committee. One copy of the dissertation must be submitted to each member of the dissertation committee at least two weeks before the scheduled doctoral defense. The defense may not be scheduled earlier than two weeks following submission of the dissertation but must be held at least two weeks before the degree is conferred.

At least one month before the scheduled defense, the student must provide the department registrar with the defense time, date, place, dissertation title and abstract for school-wide advertisement. The final copy of the dissertation must be prepared and submitted according to University requirements.

Total Credits Required for Degree: 72

Master's

Biostatistics, MS

The MS in Biostatistics is an academic degree program for students with a background in math and a strong interest in public health. The program emphasizes statistical theory and methods so that students are prepared to be effective statistical collaborators in interdisciplinary studies; and lead the design and execution of studies.

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months). The requirements for the Biostatistics MS degree are listed below.

- 40 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

anb61@pitt.edu

Required Courses

- BIOST 2025 - BIOSTATISTICS SEMINAR
- BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
- BIOST 2131 - FOUNDATIONS OF STATISTICAL THEORY
- BIOST 2141 - BIOSTATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2150 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE
- BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS
  OR SAS programming equivalent
- BIOST 2179 - BIOSTATISTICS CONSULTING PRACTICUM
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- BIOST 2198 - MS THESIS PREPARATION
  FOLLOWED BY (in the next term)
- BIOST 2199 - MS THESIS

Elective Courses

Students add electives from the list below to earn total credits required for the degree program. In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor. BIOST 2025 cannot be used to fulfill elective credits.

- BIOST 2067 - APPLIED META-ANALYSIS
- BIOST 2080 - ADVANCED STATISTICAL LEARNING
- BIOST 2151 - BAYESIAN DATA SCIENCE
- BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA
- BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE
- BIOST 2165 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS
- BIOST 2168 - INTRODUCTION TO CAUSAL INFERENCE
- BIOST 2174 - ADVANCED R COMPUTING
- BIOST 2181 - HEALTH DATA SCIENCE: DATA MANAGEMENT AND PROGRAMMING
- BIOST 2182 - HEALTH DATA SCIENCE: DATA VISUALIZATION AND BIG DATA
- BIOST 2183 - HEALTH DATA SCIENCE: STATISTICAL LEARNING AND ARTIFICIAL INTELLIGENCE

Other Requirements

Comprehensive Examination

MS students must pass a written comprehensive examination offered annually at the end of the first year of study in early May. The MS comprehensive examination covers applied methods as well as theoretical concepts in a 3-hour exam. The examination is a proctored closed book exam.

A student is eligible to take the comprehensive examination if the student:

- is enrolled in the MS Program in Biostatistics with good standing (3.00 QPA or greater)
- did not fail the comprehensive examination more than once
- completed the required courses (listed below) with a B or better, or equivalent coursework which the student has obtained transfer credits or exemption
- BIOST 2131 FOUNDATIONS OF STATISTICAL THEORY
- BIOST 2141 BIOSTATISTICAL METHODS
- BIOST 2142 APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 PRINCIPLES OF EPIDEMIOLOGY

Oral Examination - Thesis Defense

After successful completion of the MS Comprehensive Examination requirement, MS students must complete for two semesters (three credits total) of faculty-guided thesis research (BIOST 2198 and BIOST 2199). Thesis work includes analysis, writing, and defending a master's thesis.

Total Credits: 40

Biostatistics, MS - Health Data Science (HDS) Concentration

The MS in Biostatistics with area of concentration in Health Data Science (HDS) is designed for students with a background in math, some experience with a programming language, and a strong interest in public health and data science. The HDS concentration emphasizes biostatistical theory and statistical computational methods for analyzing, processing and interpreting large-scale data sets so that students are prepared to clean, store, manage, manipulate, visualize and process high dimensional data as well as be effective statistical collaborators in interdisciplinary studies; and lead the design and execution of studies.

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months). The requirements for the Biostatistics MS degree with HDS concentration are listed below.

- 40 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

Department of Environmental and Occupational Health

The Department of Environmental and Occupational Health at Pitt Public Health is dedicated to understanding the health effects of biological, chemical, and physical agents through cutting-edge research in molecular and biochemical toxicology, epigenetics, gene-environment interactions, and computational toxicology. Embracing the concept of the exposome, our faculty investigates environmental and occupational exposures and their interactions with genetic and epigenetic factors over a lifetime. Beyond theoretical research, we emphasize environmental health practice, pollution prevention, policy or management with a focus on applied science and more practical

problem solving. The department engages in active collaborations with community partners, other faculties, and national and global research centers, enriching our teaching and research endeavors. Our academic programs, characterized by rigorous mentoring and a flexible curriculum, offer students hands-on research opportunities and practical experiences, shaping them for careers in public health policy, consulting, risk assessment, academia, regulatory compliance & enforcement, industry, and beyond. Our graduates are well-equipped to work collaboratively with multidisciplinary professionals and are often employed in leading health organizations, contributing significantly to the field of environmental and occupational health.

Mission and Vision Statement

To lead visionary ventures in education, research, and practice that ensure a safe and healthy environment for all, now and in the future.

Goals

- Train an outstanding and empowered environmental and occupational health workforce
- Lead paradigm-shifting fundamental, applied, and community-engaged research
- Apply our teaching and transdisciplinary research excellence to promote practices and policies that advance equitable community and global environmental health
- Foster an equitable, collaborative, inclusive culture for students, staff, and faculty

Admissions & Aid

All new applicants must apply through SOPHAS. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid. Please visit Environmental and Occupational Health Admissions for department and program-specific application requirements.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Certificate

Environmental Health Risk Assessment Certificate

Risk assessment, a process developed in 1983 by the National Academy of Sciences, provides the framework for most current studies of environmental health concerns. As a student in this certificate program, you will be provided concentrated graduate education that will enable you to:

- Specify/measure the magnitude, duration and route of human exposure to selected hazardous environmental/occupational agents.
- Describe methods for quantifying dose and specify how this knowledge can be used to estimate probability of developing environmental/occupational disease outcomes.

Required Courses

11 Credits

- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

Suggested Elective Courses

Minimum 4 credits

A statistics course is not required, however experience in statistical applications will assist students in understanding some of the program concepts.

- BCHS 2572 - RISK COMMUNICATION
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Total Credits: 15

Doctoral

Environmental and Occupational Health, PhD

The PhD in Environmental and Occupational Health (EOH) offers a comprehensive theoretical and hands-on education designed for individuals pursuing advanced careers in academia, industry, or government within the diverse discipline of environmental health sciences. The program integrates instruction in toxicology, environmental exposure pathways, environmental epidemiology, and risk assessment, and remains at the cutting edge by incorporating the continuously evolving fields of cellular and molecular pathobiology related to environmental diseases.

Our PhD training program is committed to nurturing research proficiency and science communication skills. We achieve this through the use of laboratory-based model systems or population-based analyses. The objective is to foster a deep understanding of how exposures of relevance, in conjunction with social and genetic factors, can be deciphered and applied to the investigation of disease causation. This enriching approach equips our graduates with the skills necessary to confront the environmental health challenges of the 21st century.

The program is designed to be completed in four years. The requirements for the EOH PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy
- Final Oral Examination - Dissertation Defense

wat23@pitt.edu

Required Core Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2109 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH SCIENCES JOURNAL CLUB *(four terms)*
- EOH 2110 - ROTATION/PRACTICUM *(Students with established dissertation research program are exempt with approval)*
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 2605 - MOLECULAR ENVIRONMENTAL BIOLOGY
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EOH 3111 - PROFESSIONAL DEVELOPMENT
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2223 - INTRODUCTION TO ENVIRONMENTAL EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 3100 - GRANT AND THESIS PROPOSAL WRITING FOR PUBLIC HEALTH
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Research & Dissertation

- EOH 3010 - RESEARCH AND DISSERTATION PHD *(up to 17 credits)*

Elective Courses

Students must register for at a minimum of 12 elective credits in consultation with their advisor to earn the total number of credits required for the degree program.

Total Credits: 72

Environmental and Occupational Health, PhD, Public Health Practice (PHP)

The PhD with concentration in Public Health Practice (PhD PHP) emphasizes environmental health practice, policy or management with a focus on applied science and more practical problem solving. The PhD PHP provides a broad education for individuals who may desire positions in academia, industry, consulting, non-governmental or government organizations, education & advocacy, regulatory & legislative design, and regulatory compliance & enforcement. Some major emphases are on the environmental origin of human disease and disease susceptibility, pollution prevention, and integration of environmental health considerations into economic and social decision-making. This professional degree emphasizes a practice-oriented, interdisciplinary approach to research that encompasses in its coursework the competencies of the five core areas of public health: environmental health, biostatistics, epidemiology, health policy and management, and behavioral and community health.

The program is designed to be completed in four years. The requirements for the PhD degree with PHP concentration are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy
- Final Oral Examination - Dissertation Defense

  AND/OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program.

Total Credits: 72

Master's

Environmental and Occupational Health, MPH

The MPH in Environmental and Occupational Health (EOH) program provides an opportunity for students interested in environmental and occupational health to become familiar with the relevant concepts as they apply to public health practice. The program will also be an opportunity for working health professionals to achieve an in-depth environmental perspective as well as a degree in public health. The degree may be tailored towards the desires of individual students, focusing on various aspects of environmental health science, such as risk assessment, occupational hygiene, global environmental health or other emerging topics within environmental and occupational health.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. The requirements for the EOH MPH degree are listed below.

- 47 Credits
- Practicum (200-hour minimum)
- Essay or Thesis

Add electives as recommended by academic advisors to earn total credits required for the program.

Total Credits: 47

Environmental and Occupational Health, MS

The emphasis of the MS in Environmental and Occupational Health (EOH) is directed towards the theoretical underpinnings of environmental health sciences and toxicology with more limited involvement in laboratory-based research. The program is designed as an integrated modern curriculum combining the training in the toxicological and environmental biophysics disciplines that are traditional to the Department of Environmental and Occupational Health with the new and continually developing fields of cellular and molecular pathobiology of environmental disease and gene environment interactions.

The program provides an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations.

The program typically takes approximately 2 years to complete. The requirements for the EOH MS degree are listed below.

- 42 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2605 - MOLECULAR ENVIRONMENTAL BIOLOGY
- EOH 3111 - PROFESSIONAL DEVELOPMENT
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE

Elective Courses

Students add electives from the list below to earn total credits required for the degree program. In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor.

Other Requirements

Comprehensive Examination

The comprehensive examination must be scheduled for the end of the term prior to graduating term or the beginning of the graduating term and must be taken at least one month prior to the last day of the term in which the degree is to be conferred.

The format of the comprehensive examination is a written document consisting of the first draft of the thesis, including the introduction and methods. The written examination serves as a formal assessment of the student's ability to formulate a substantive research question and address it through rigorous laboratory or non-laboratory analysis.

Oral Examination - Thesis Defense

The MS thesis defense consists of a final written thesis and an open oral examination.

The oral examination should be scheduled at least two weeks prior to the SPH deadline for the term. During the oral examination, the student will present their thesis research, and the committee will judge the adequacy of the research and its findings. A final copy of the written thesis must be submitted to the thesis committee at least one week before the oral examination.

Total Credits: 42

Department of Epidemiology

Epidemiology is the application of the scientific method to the study of disease in populations for the purpose of prevention or control. It is a key basic science of public health and preventive medicine. Epidemiologists play a fundamental role in public health and preventive medicine by identifying variabilities in human situations that may have a critical influence on the occurrence of disease within populations.

The epidemiological method for studying a problem involves three approaches:

- Description of the frequency and determinants of a disease in a defined population;
- Evaluation of factors that may cause a disease; and
- Experimental studies of the effects of modifying risk factors on the subsequent frequency of a disease.

Mission

The Department of Epidemiology strives to improve local, national and global public health through the generation of knowledge which can be used to prevent and reduce disease, infection and injury. This is accomplished through high quality, interdisciplinary research, hands-on training of the next generation of epidemiologists, and providing a broad range of expertise to organizations that promote public health. Our work is based on the belief that all people are entitled to a healthy life.

Admissions & Aid

All new applicants must apply through SOPHAS. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid. Please visit Epidemiology Admissions for department and program-specific application requirements.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Doctoral

Epidemiology, PhD

The Epidemiology PhD program provides students with an advanced level of academic preparation to conduct research, teach, and mentor students. This includes concentrated training in epidemiological concepts and methodology and the completion of a research-based dissertation. Due to the wide range of ongoing faculty research within the department, students have the ability to select an area of emphasis on which to focus and to conduct research under the mentorship of an epidemiology faculty member.

Please note that the Epidemiology PhD program can be adapted to have an applied focus. Through elective coursework, internship opportunities, and the dissertation, PhD candidates can obtain the essential skills required for public health practice.

The program is designed to be completed in four years. The requirements for the Epidemiology PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy
- Final Oral Examination - Dissertation Defense

- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- **One advanced quantitative course is required.** Choose one from the following:
  BCHS 2991, BCHS 3002, BCHS 3015, BIOST 2016 , BIOST 2143, BIOST 2150, EFOP 3408, HPM 3505, HUGEN 2080
- EPIDEM 3100 - RESEARCH AND DISSERTATION PHD *(3 credits)*
  OR
- FTDR 3999 - FULL-TIME DISSERTATION STUDY

These training requirements must also be completed:

- Pitt Public Health Academic Integrity Module
- Internal Review Board (IRB) Training
- Independent Development Plan (IDP) Requirement
- Primary Data Collection & Management Requirement
- Presentation Training-Competency in Communication Requirement

Elective Courses

Select electives as recommended by academic advisors to earn total credits required for the program.

Other Requirements

Preliminary (Qualifying) Evaluation

The preliminary evaluation is a written examination generally administered at the end of the first year of doctoral study.

Completion of the following (or equivalent) courses is required before sitting for the preliminary evaluation:

- EPIDEM 2110 PRINCIPLES OF EPIDEMIOLOGY
- BIOST 2041 INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2180 FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- BIOST 2142 APPLIED REGRESSION ANALYSIS

Prior completion of EPIDEM 3183 READING, ANALYZING, AND INTERPRETING THE PUBLIC HEALTH AND MEDICAL LITERATURE strongly recommended

Comprehensive Examination

All Doctoral candidates must have their dissertation topic and outline of proposed research approved by their doctoral committee. The Comprehensive Meeting is the first official meeting of students with their doctoral committees. The Comprehensive Exam may or may not be combined with the Overview Exam. Combining the two exams is advised only when:

- The student has worked closely with all doctoral committee members, and
- All committee members are familiar with and have approved the dissertation aims.

The student should present the dissertation topic and research plan. The meeting should allow for the committee members to approve the dissertation aims and provide guidance in the conceptualization and methodology of the plan.

Eligibility

- Preliminary Exam must have been passed.
- The doctoral committee for the Comprehensive exam must be formed and approved.
- A general research area for the dissertation must have been chosen.
- A basic literature review for the chosen research area should be completed.
- Academic advisor must agree that the student is ready for this exam.

Minimum required written material submitted to the approved Dissertation Committee two weeks before the Comprehensive include:

- A basic literature review to demonstrate how the proposed research fills a void in the existing literature in the topic area. The length and format are at the discretion of the dissertation chair; however, it is expected that it should be at least 10 pages.
- Suggested dissertation aims, hypothesis, and methods to be discussed and finalized with the dissertation committee.

Exam parameters:

- Oral format.
- A basic literature review should be submitted to the committee at least two weeks prior to the oral exam to demonstrate how the proposed research fills a void in the existing literature in the topic area.
- Relationship of student project to ongoing departmental projects (if any) must be explained.
- Data may be included in this exam, but is not required. Where applicable, the use of data to demonstrate feasibility or support for proposed evaluations is encouraged.
- Proposal may be to carry out research elsewhere under direct supervision of person selected by dissertation committee, under special circumstances. This alternative should be discussed with committee chairperson prior to proposal presentation.

Overview/Prospectus Meeting

During the Overview exams, students must present material to demonstrate mastery of the general topic of study and depth and breadth of knowledge in the area of specialization in that topic area. They must also show the ability to use the research methods of epidemiology appropriately for the dissertation plan.

Eligibility

- Preliminary Examinations must have been passed.

- Students must have obtained Dissertation Comprehensive Exam approval.
- Overview Exams may be combined with Dissertation Comprehensive or Prospectus Meetings at committee chair discretion (please see Comprehensive Exam above).
- Exam cannot be taken in the same term in which graduation will occur.

Minimum required written material submitted to the Dissertation Committee at least two weeks before the Overview Exams include:

- A completed literature review addressing strengths and weaknesses of the topic area and identifying gaps in knowledge (in 2024, the average length of the literature review of dissertations submitted was 62 pages, with a median length of 59 pages).
- Dissertation aims, hypothesis, and how they address gaps in knowledge in the topic area.

Exam parameters:

- Oral format.
- Focus is primarily on student knowledge in the area of the dissertation topic.
- The literature review in the Overview Exam should address strengths and weaknesses of the topic area and identify gaps in knowledge in this topic area.
- If a systematic review is performed, it may count as one of the three papers in the 3-paper dissertation format, provided that it is of publishable quality.

Admission to Candidacy

Students are required to meet the following criteria for Admission to Candidacy:

- Be in full (not provisional) graduate status
- Successfully complete the Preliminary Evaluation
- Successfully complete the Comprehensive Examination
- Successfully complete the Overview Examination
- Committee approval of dissertation proposal
- All formal course work completed with minimum 3.0 grade point average

Final Oral Examination - Dissertation Defense

Students are required to be admitted to candidacy before advancing to the Dissertation Defense stage.

During the Dissertation defense, doctoral candidates must present the completed dissertation project and defend the validity of the work under examination from the committee members. The completed dissertation document can follow one of two formats:

- Traditional format: In the traditional format, students prepare a dissertation proposal to describe the background, methods, results, and interpretation of one research project. The written dissertation document should include an introduction, a meaningful literature review, a clear presentation of the methods and results of the project, and an appropriate discussion of the meaning of the results.
- Three Paper format: In the three-paper format, students prepare a dissertation proposal focused on the development of three research papers addressing original research in a chosen topic area. The document should include the relevant background to the dissertation work, the results of the work accomplished by the student (presented in the document as the three individual research papers), and a general discussion of the meaning of the work.

Students should present results of the dissertation and a discussion of the meaning of these results in the topic area of study.

The Dissertation defense may be scheduled no earlier than two weeks following submission of the dissertation and must be held at least two weeks prior to the end of term of graduation and degrees are awarded.

Total Credits: 72

Master's

Epidemiology, MPH

The MPH in Epidemiology program provides students with an epidemiological approach to public health, which includes a broad overview to epidemiology, biostatistics, and the environmental influences on health, public health planning, and health services.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in as few as three semesters of full-time study (excluding 4+1 students). The requirements for the Epidemiology MPH degree are listed below.

- 45 Credits
- Practicum (200-hour minimum)
- Essay

Epidemiology, MS (30 Credit)

The MS in Epidemiology program provides concentrated training in epidemiological concepts, skills, and methodology with a research focus. It includes a flexible mix of courses in epidemiology and biostatistics. For those who hold a professional health degree or a related doctoral degree from the U.S. (with some exceptions for non-U.S. trained students), the department offers this 30-credit condensed MS program.

The program typically takes approximately one year to complete. The requirements for the Epidemiology 30-credit MS degree are listed below.

- 30 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

- Oral Presentation Communications Competency Requirement

Elective Courses

Select electives as recommended by academic advisor to earn total credits required for the degree program.

Other Requirements

Comprehensive Examination

The comprehensive examination is completed approximately two months before the last day of the graduation term. Students must select committee members before the end of term prior to graduation term.

Students are required to submit a written document of the first chapters of their Master's thesis, including expanded Introduction and detailed Methods sections. The Master's thesis must be original research (using primary or secondary data). Literature review papers are not acceptable. Best practice is for students to submit their written document to their committee two weeks prior to the oral portion of the Comprehensive Examination but can be later with prior committee approval.

If the candidate passes, committee members sign the Report on Requirements for Master's Degree form certifying the milestone has been satisfactorily completed.

Thesis

Students are required to successfully complete the Comprehensive Examination before advancing to the Thesis stage. The Final Oral Defense of the master's thesis is approximately three weeks prior to the school-wide graduation final paperwork deadline. The written master's thesis should be submitted to the committee at least two weeks prior to the oral defense date, or closer to the defense date with prior committee approval.

If the candidate passes the thesis defense, committee members sign the Report on Requirements for Master's Degree form certifying the successful oral defense and approval of the final written document.

Total Credits: 30

Epidemiology, MS (45 Credit)

The MS in Epidemiology program provides concentrated training in epidemiological concepts, skills, and methodology with a research focus. It includes a flexible mix of courses in epidemiology and biostatistics.

The program typically takes up to 2 years to complete. The requirements for the Epidemiology 45-credit MS degree are listed below.

- 45 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

412-383-1006

scw86@pitt.edu

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2142 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2185 - INTRODUCTION TO SAS

  OR
- EPIDEM 2186 - INTRODUCTION TO R
- EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES

  OR *one of the following approved alternative courses:*
- BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2150 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE
- EPIDEM 2210 - SPECIAL STUDIES - ESSAY *(3-5 credits, credits may be split over multiple terms)*
- EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH

- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*

These training requirements must also be completed:

- Pitt Public Health Academic Integrity Module
- Human Subjects Internal Review Board (IRB) Module
- Oral Presentation Communications Competency Requirement

Elective Courses

Select electives as recommended by academic advisor to earn total credits required for the degree program.

Other Requirements

Comprehensive Examination

The comprehensive examination is completed approximately two months before the last day of the graduation term. Students must select committee members before the end of term prior to graduation term.

Students are required to submit a written document of the first chapters of their Master's thesis, including expanded Introduction and detailed Methods sections. The Master's thesis must be original research (using primary or secondary data). Literature review papers are not acceptable. Best practice is for students to submit their written document to their committee two weeks prior to the oral portion of the Comprehensive Examination but can be later with prior committee approval.

If the candidate passes, committee members sign the Report on Requirements for Master's Degree form certifying the milestone has been satisfactorily completed.

Thesis

Students are required to successfully complete the Comprehensive Examination before advancing to the Thesis stage. The Final Oral Defense of the master's thesis is approximately three weeks prior to the school-wide graduation final paperwork deadline. The written master's thesis should be submitted to the committee at least two weeks prior to the oral defense date, or closer to the defense date with prior committee approval.

If the candidate passes the thesis defense, committee members sign the Report on Requirements for Master's Degree form certifying the successful oral defense and approval of the final written document.

Total Credits: 45

Department of Health Policy and Management

The Department of Health Policy and Management (HPM) prepares individuals to assume roles of leadership, policy development, and management within the health industry and in the broader field of public health. Its educational programs are grounded in the faculty's contributions in advancing the state of knowledge and professional practice in health system leadership and in the development, advocacy, analysis, and implementation of health policy. The HPM Faculty are engaged in interdisciplinary research addressing a range of problems relevant to public policy, organization, and management as applied to health care organizations and systems and in various professional and community service activities.

Mission

The Department of Health Policy and Management's mission is to educate and advance policy and research to improve health and health care.

Vision

The Department of Health Policy and Management aspires to transform population health, health care, and health policy through equitable research, education and practice.

Values

Inclusion, Collaboration, Curiosity, Integrity

Admissions & Aid

All new applicants must apply through SOPHAS. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid. Please visit Health Policy and Management Admissions for department and program-specific application requirements.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Doctoral

Health Services Research and Policy, PhD

The Health Services Research and Policy (HSRP) PhD program meets an ongoing need for public health researchers who focus on cost, access and quality of the health care system. Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

The program is designed to be completed in four years. The requirements for the HSRP PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy
- Final Oral Examination - Dissertation Defense

- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Elective Courses

Minimum of 12 elective credits recommended by academic advisor. Must include one methods focused course.

Other Requirements

Preliminary (Qualifying) Evaluation

Timing The preliminary exam must be completed before the start of year two and typically begins in March of year one. Students have from March 1st through September 1st to complete the written component of the exam.

Requirements Before Sitting for the Milestone Students must have full academic status (any admissions provisions must be cleared before sitting for the exam), a minimum GPA of 3.3, and have completed all required Year One courses: BIOST 2041, BIOST 2142, EPIDEM 2110, HPM 2028, HPM 2905, HPM 3000, HPM 3001, HPM 3064, and HPM 3501. Students must also have completed the required CITI online training modules, at minimum "Research Integrity" and "Human Subjects Research in Social and Behavioral Sciences," and submitted the certificate of completion to the program coordinator.

Form of Evaluation The preliminary exam consists of two components: a 4,000-6,000 word research paper and a 15-minute oral presentation to the Examination Committee. The oral presentation is scheduled within approximately one to two weeks of paper submission.

Comprehensive Examination

Timing The comprehensive exam must be completed before the start of year three and is typically administered in late May or early June, following four semesters of full-time study or the equivalent in part-time credits (approximately 48-52 credits).

Requirements Before Sitting for the Milestone Students must have passed the preliminary examination, completed all required departmental and school core courses, achieved a minimum GPA of 3.3, and be registered during the semester in which they take the exam.

Form of Evaluation The exam is a proctored, in-person, open-note, timed assessment spanning two days, drawing on core coursework completed during the first two years of the program. It is designed to evaluate students' knowledge and analytical abilities.

Other Pertinent Information The use of generative AI is not permitted on the comprehensive exam, as responses must reflect each student's individual understanding and synthesis of core HSRP coursework.

Overview/Prospectus Meeting

Timing Students should aim to complete the Dissertation Overview by Spring of Year 3 or Fall of Year 4. The committee should receive a final draft of the dissertation proposal at least two weeks before the scheduled Overview Presentation.

Requirements Before Sitting for the Milestone Students must have completed all required coursework and planned electives and passed both the preliminary and comprehensive examinations before scheduling the Dissertation Overview.

Form of Evaluation The Dissertation Overview has three components: committee formation, development of a written dissertation proposal, and an Overview Presentation. The presentation is an in-person oral presentation to the Dissertation Committee, typically scheduled for two hours, with the student presenting for no more than 30-45 minutes. The committee may require revisions to the proposal before granting approval.

Other Pertinent Information Upon successful completion, the student is admitted to candidacy for the Ph.D. The dissertation proposal should outline the conceptualization, rationale, and methodology for three manuscripts and typically ranges from 20 to 60 pages. IRB clearance must be in place before research begins, though it is not required prior to the Overview itself. The Overview is scheduled through the program coordinator.

Admission to Candidacy

Timing Admission to candidacy is granted upon successful completion of the Dissertation Overview, provided the student has completed at least 72 credits. This is typically accomplished in Spring of Year 3 or Fall of Year 4.

Requirements Before Sitting for the Milestone To be admitted to candidacy, students must have completed all required coursework, accumulated at least 72 credits, and successfully completed all prior milestones: the preliminary examination, comprehensive examination, and dissertation overview.

Form of Evaluation Admission to candidacy is conferred upon successful completion of the Dissertation Overview. For details on the form of evaluation, see the Overview/Prospectus section above.

Final Oral Examination - Dissertation Defense

Timing The dissertation defense typically takes place in year four or five of the program, after all other milestones have been met and the student's committee determines they are ready to defend. A final draft of the dissertation must be provided to each committee member at least two weeks prior to the scheduled defense.

Requirements Before Sitting for the Milestone Students must have committee chair approval to schedule the defense and must have submitted a final draft of the dissertation to all committee members at least two weeks prior. IRB clearance must be in place before research commences. All written work must conform to the University of Pittsburgh style manual and be submitted electronically through the Electronic Theses and Dissertations (ETD) system.

Form of Evaluation The dissertation defense is a public, oral presentation and examination conducted by the doctoral dissertation committee. Students should provide an overview of the three thematically linked manuscripts that form the dissertation and highlight the thematic connections between them. All committee members must be present, though only committee members may participate in final deliberations and voting. A Report on Requirements for a Doctoral Degree form must be completed, signed by the committee, and submitted to the department chair and Office of Student Affairs.

Other Pertinent Information

- The dissertation consists of three thematically linked manuscripts with an introductory overview, and must represent original, independent research.

- Students may use a professional editor for language only, not subject matter or interpretation, and must acknowledge all editorial assistance in the document.
- If the written dissertation or defense performance does not meet committee expectations, the student will have one additional opportunity to revise and defend.
- Appeals of committee decisions may be directed to the doctoral program director(s), department chair, or Dean in accordance with school and University policy.

Total Credits: 72

Joint Degree

Health Policy and Management, JD/MPH

The joint juris doctor and master of public health in health policy and management (JD/MPH) program between Pitt Public Health and Pitt's School of Law (LAW) provides students with an interdisciplinary curriculum in law and public health, integrating law, health policy, and management. The program emphasizes the relationship between the legal system and the protection and promotion of population health. Graduates are well prepared for careers at the intersection of law and public health, in government settings, private practice, health care institutions, and beyond.

JD/MPH students complete a 200-hour practicum in a practice-based, public health setting as well as an essay or thesis addressing a significant public health issue that uses empirical data and/or valid references to demonstrate their ability to critically examine and synthesize information from existing sources. The JD/MPH joint degree is designed to be completed in four years of full-time study. The HPM requirements for the JD/MPH joint degree are summarized below. Students should refer to the School of Law for the most current JD requirements.

- 45 Public Health Credits *(3 credits of public health-relevant electives taken in LAW can be applied to the 45-credit requirement)*
- Practicum (200-hour minimum)
- Essay
- Note: Combined with LAW coursework/requirements, JD/MPH students complete a total of 121 credits

Admissions

Students must apply separately to the School of Law and the School of Public Health.

MPH Core Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM JD/MPH Required Courses

- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2
- HPM 2025 - HPM PRACTICUM *(1 credit)*
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2037 - ESSAY-HA *(LAW Upper-level Legal Writing requirement, with appropriate modifications/revisions to meet MPH essay requirements, satisfies this course requirement.)*
- HPM 2055 - MANAGING HEALTH PROGRAMS AND PROJECTS
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2082 - PUBLIC HEALTH AGENCY MANAGMENT
- HPM 2100 - HEALTH ANALYTICS
- HPM 2131 - PUBLIC HEALTH LAW AND ETHICS

Elective Courses

Add electives as recommended by academic advisors to earn total credits required for the program. Students can apply a maximum of 3 credits of public health-relevant coursework taken in LAW to meet joint degree requirements.

Total School of Public Health Credits: 45

Total Joint Degree Credits: 121

Health Policy and Management, MHA/MBA

The MHA/MBA program offers students a competency-based curriculum and an array of professional development resources and activities to prepare graduates for managerial roles in a broad array of health industry settings. Uniting the strengths of the University of Pittsburgh's School of Public Health and School of Business, the program builds 20 management competencies that serve as a foundation for ongoing

career growth and professional development. Upon completion of the MHA/MBA program, our graduates obtain full-time employment, including post-graduate fellowships, in health industry organizations such as health systems, physician practices, durable medical equipment, biotechnology, pharmaceutical companies, health insurance plans, and consulting firms. The MHA/MBA also prepares graduates for specialized roles such as finance, human resources, marketing, strategy, etc.

Students must complete applications for, and be accepted into, both the School of Public Health and the Joseph M. Katz Graduate School of Business. Application to Pitt Public Health must be submitted through SOPHAS at www.sophas.org. Application to the School of Business should be made at www.business.pitt.edu/katz/apply.

Our highly trained graduates will be fully prepared to assume fast-track leadership positions in a variety of health industry organizations. The Bureau of Labor Statistics estimates that the demand for health industry managers will grow by 17 percent in the next decade. The U.S. health system is the largest industry in the United States, currently consuming nearly 18 percent of GDP. At the same time, there remain significant problems with access to care and quality of care. The joint training in business and health administration should provide a strong foundation for long-term career success.

The curriculum is a 73-credit course of study leading to the joint degree. The MHA/MBA can be completed within three years as a full-time student and five years as a part-time student. The competency-based curriculum emphasizes both professional and leadership development, as well as functional management skills, blending courses across both the School of Business (MBA) and Pitt Public Health's Department of Health Policy and Management (MHA) in six academic terms.

Students are required to complete a management residency. These supervised placements in health industry organizations are an invaluable integrative experience that also provides many opportunities for professional development and networking. The student must complete applied management projects at the residency site.

Health Policy and Management, MPH

The Master of Public Health (MPH) in Health Policy and Management (HPM) trains students as public policy analysts, advocates, and professionals in health policy development. Through coursework, a year-long professional development seminar, a 200-hour practicum experience, and guest speakers and networking events, HPM students build new skills and receive comprehensive professional development. This two-year, 45-credit program prepares graduates for careers in health policy analysis, advocacy, and program management across various economic sectors. Graduates are well-prepared for employment in public health practice (nationally and globally) or to pursue further educational training, including clinical and doctoral programs.

MPH students complete a 200-hour practicum in a practice-based, public health setting as well as an essay or thesis addressing a significant public health issue that uses empirical data and/or valid references to demonstrate their ability to critically examine and synthesize information from existing sources. The MPH program is designed to be completed in two years of full-time study. The requirements for the HPM MPH degree are summarized below.

- 45 Credits
- Practicum (200-hour minimum), plus final report
- Essay (completed over two semesters)

Health Services Research and Policy, MS

The Master of Science in Health Services Research and Policy (HSRP) program prepares graduates for positions in health services research and policy, analytics and also prepares them for higher level education (such as a PhD). This MS program is primarily intended for students interested in pursuing a PhD, but who would benefit from additional preparation before beginning doctoral studies. Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

The MS program is designed to be completed in two years of full-time study. The requirements for the HSRP MS degree are listed below.

- 42 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

Area of Focus Courses

Students work with their academic advisor to identify an area of focus with at least 11 credits that focuses on a discipline or area of interest.

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree program.

Other Requirements

Comprehensive Examination

Timing The comprehensive exam is administered during the first semester of the second year of the program.

Requirements Before Sitting for the Milestone Students must be in good academic standing and enrolled in the program during the semester in which they sit for the examination.

Form of Evaluation Students must select a journal article relevant to Health Services Research and Policy, prepare a critical review, and deliver an oral presentation to their peers and department faculty.

Other Pertinent Information In the event of a failure, a student may apply to the Department Chair for re-examination. Students who are not permitted to retake the examination, or who do not pass the re-examination, will be released from the program.

Thesis

Timing The first thesis committee meeting must be held within five months of passing the comprehensive examination. A final draft of the thesis must be submitted to all committee members at least two weeks prior to the scheduled defense.

Requirements Before Sitting for the Milestone Students must have passed the comprehensive examination and received approval of their thesis committee from the school before any committee meetings can be held. Prior to each committee meeting, students must submit their research proposal or progress report to all committee members at least two weeks in advance.

Form of Evaluation The thesis is a written policy paper of publishable quality that reports on original scholarly research and incorporates analytic methodologies used during the program. Upon completion, the student presents their work in a seminar and defends it in an oral examination before the thesis committee.

Other Pertinent Information The thesis committee is selected by the student in consultation with their faculty advisor, in accordance with Pitt Public Health and University of Pittsburgh guidelines. The student is responsible for notifying the MS program coordinator of committee members and for scheduling all committee meetings. All theses must be submitted electronically through the Electronic Theses and Dissertations (ETD) system in accordance with university guidelines.

Total Credits: 42

Department of Human Genetics

Mission

The Department of Human Genetics at the University of Pittsburgh School of Public Health is dedicated to genetics research, teaching, and services. The department has three major research missions:

- To develop and use genetic methods to investigate the causes and treatment of hereditary and acquired human illness.
- To understand and explore the impact of genetics on public health, education, and disease prevention.
- To appreciate the role of genetic diversity within human populations.

The department offers degrees at both the master's and PhD level in human genetics, as well as a Master of Science degree in genetic counseling, a Master of Science degree in genome bioinformatics, and a Master of Public Health in public health genetics. Students gain a strong background in all aspects of human genetics as a result of a broad-based curriculum and research opportunities in basic, applied, or clinical genetics. The program emphasizes the study of genetic mechanisms related to the transition from normal to disease states, and how genes and the environment interact to affect the distribution of health and disease in human populations

Admissions & Aid

All new applicants must apply through SOPHAS. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid. Please visit Human Genetics Admissions for department and program-specific application requirements.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Certificate

Public Health Genetics Certificate

Advances in genetics are occurring at a pace that challenges our collective ability to respond to the many social, legal, ethical, and public health policy implications generated by this revolution of knowledge. The purpose of this certificate is to provide graduates with a basic grounding in public health genetics that will enable them to function as public health professionals at the cutting edge of this important new area. You will be trained to incorporate knowledge of how genes, together with the environment and behavior, influence health and apply this insight into their area of practice or research. Additionally, you will:

- Demonstrate basic knowledge of the role that genetics plays in the development of disease
- Identify the limits of your genetic expertise
- Identify ethical and medical limitations to genetic testing, including uses that don't benefit the individual
- Determine the role that cultural, social, behavioral, environmental, and genetic factors play in the development and prevention of genetic-related diseases

Required Courses

10 Credits

- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2059 - CURRENT TOPICS IN PUBLIC HEALTH

Basic Science of Genetics Competency Courses

At least 6 credits from the following six courses are required to achieve competency in the basic science of genetics.

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES

Elective Courses

5 Credits

Maximum 2 Credits

The following courses can be taken to fulfill the certificate program, but a maximum of 2 credits may come from these courses.

- HUGEN 2021 - SPECIAL STUDIES
  → Can be taken if a student's essay/thesis/dissertation project is related to Human Genetics or Public Health Genetics or if the student wishes to conduct a small independent research project on a topic in Public Health Genetics. A final written document

must be submitted and reviewed. This can be in the form of the student's essay/thesis/dissertation or a research paper on the independent project.

→ If a public health genetics HUGEN course is being offered as a "current topics" course under HUGEN 2021 - Special Studies, students may take the course and have all special studies credits count towards the certificate.

- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM

→ Can be taken if the student's practicum or other practice-based experience is related to Human Genetics or Public Health Genetics. A written document summarizing the experience and the Human Genetics competencies that the student worked on must be submitted to Certificate Leadership.

Additional Courses to Fulfill 15 Credit Requirement

Additional courses permitted for the certificate to fulfill the 15 credit requirement include, but are not limited to, the following courses. Other courses may be permitted but must be pre-approved by the Director of the Public Health Genetics Certificate Program in the Department of Human Genetics.

- ALL OTHER HUGEN COURSES
- EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH
- EPIDEM 2600 - INTRODUCTION TO MOLECULAR EPIDEMIOLOGY
- BCHS 2572 - RISK COMMUNICATION
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2010 - PATHOGEN BIOLOGY
- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH

Total Credits: 15

Certificate Requirements for Students in a HUGEN Degree Program

Students in a HUGEN degree program other than the MPH are eligible to receive the Public Health Genetics Certificate by meeting the requirements below:

- Students must complete six credits of coursework not already required by the student's degree program
- Students must complete the following courses:
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2059 - CURRENT TOPICS IN PUBLIC HEALTH
- The additional two credits of coursework can come from any of the following:
- The list of HUGEN core courses, the list of approved additional courses, or must be approved by the Public Health Genetics Certificate Program Director in the Department of Human Genetics.
- Up to two credits of a project or practicum work (HUGEN 2050 or HUGEN 2021). A paper (8-10 double-spaced pages, plus references) describing the project or practicum is required to receive a grade for these credit hours. Writing guidelines will be provided to students.
- If a public health genetics HUGEN course is being offered as a "current topics" course under HUGEN 2021 - Special Studies, students may take the course and have all special studies credits count towards the certificate.

Total Credits for Students in a HUGEN Degree Program: 15

Doctoral

Human Genetics, PhD

The doctoral program in human genetics prepares students for careers leading genetics and genomics research in academia or industry. The flexible curriculum provides a broad background in the field while allowing customized emphasis on molecular genetics/genomics, statistical genetics and genetic epidemiology, or genetic counseling. In addition to core coursework and advanced classes in a chosen area of concentration, doctoral students pursue mentored research projects culminating in the production and defense of a dissertation.

The program is designed to be completed in four years. The requirements for the HSRP PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy
- Final Oral Examination - Dissertation Defense

Contact Information

Program Director

John R Shaffer

3120 PUBHLT

130 DeSoto St.

412-624-3018

john.r.shaffer@pitt.edu

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2025 - HUMAN GENETICS SEMINAR *(four terms)*
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES
- HUGEN 3020 - DOCTORAL RESEARCH AND PROFESSIONAL SKILLS DEVELOPMENT *(two terms, must present at least once)*
- HUGEN 2021 - SPECIAL STUDIES
  AND/OR
- HUGEN 3010 - RESEARCH AND DISSERTATION PH.D.
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

Students must complete one of the following electives. In situations where a student's special interests or needs indicate an alternative course is more appropriate, it may be substituted for an elective course with the permission of the student's academic advisor.

- HUGEN 2080 - STATISTICAL GENETICS
- HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE
- HUGEN 2072 - GENOMIC DATA PIPELINES AND TOOLS
- HUGEN 2073 - GENOMIC DATA VISUALIZATION AND INTEGRATION
- HUGEN 2051 - INBORN ERRORS OF DEVELOPMENT

Additional Elective Courses

In addition to the courses listed above, students are expected to select, in consultation with their academic advisor and research mentor, additional courses appropriate for their areas of concentration. In addition, a student's Dissertation Committee may require that a student register for elective courses within or outside the Department of Human Genetics to gain knowledge in an area relevant to the student's area of concentration. Furthermore, students who are not fluent in English are strongly recommended to take a University course in conversational English.

Other Requirements

Preliminary (Qualifying) Evaluation

The qualifying exam comprises two parts. The first part is a written exam covering the foundational knowledge in the field, which takes place after completion of the introductory courses (HUGEN 2010, HUGEN 2020, HUGEN 2040, HUGEN 2060, EPIDEM 2110, BIOST 2041), usually after then first year of study. The second part is a presentation and oral exam that assesses the transfer of foundational knowledge to the interpretation of research from the primary literature and evaluates intellectual profundity and capacity for doctoral-level depth of thought. The presentation and oral exam occurs in the same semester following successful completion of the written exam. Satisfactory performance in both parts is required to pass the qualifying exam. The PhD qualifying exam follows a format similar to the MS Comprehensive Examination but uses different criteria and applies more rigorous grading standards.

Comprehensive Exam & Overview/Prospectus Meeting

The comprehensive exam and prospectus take place concurrently, usually after completion of the required coursework and after development of the dissertation research project. The format of the example is a written research proposal followed by a presentation and oral examination.

Admission to Candidacy

To qualify for admission to candidacy, students must:

- be in full graduate status
- have satisfied the requirement of the preliminary evaluation
- have completed formal coursework with a minimum grade point average of 3.00
- have passed the comprehensive examination
- received approval of the proposed subject and plan of the dissertation from the doctoral committee following the overview/prospectus meeting

Final Oral Examination - Dissertation Defense

The dissertation defense takes place when the student has completed the mentored research project and submitted the written document to the dissertation committee for review. The defense comprises a public seminar presenting the research followed by a closed-door oral examination with the dissertation committee.

Total Credits: 72

Joint Degree

Genetic Counseling and Public Health Genetics Dual-Degree Program, MS/MPH

The Master of Public Health in Public Health Genetics and Master of Science in Genetic Counseling is a first-of-its-kind program building on two decades of excellence. The dual degree program enables students to build upon the clinical skills that they acquire through the Genetic Counseling Program to understand the importance of genetics, genomics, and genetic counseling in the field of public health.

Given the rapid expansion of available genetic and genomic testing, the current focus on precision medicine, and the increasing interest of national organizations, state public health offices, and hospitals in the application of genomics to public health, there is a growing need for professionals with skills in both disciplines. Graduates of the dual degree program are well-prepared to integrate public health genetics into clinical, research, public health, and industry settings. The dual degree program also benefits students by broadening their areas of expertise and career qualifications in other areas of public health including program development, evaluation, and policy.

There are a variety of options for completing the dual degree, but most students are able to complete the dual degree program in 22 months, just one additional term beyond the typical time to complete the MS. The requirements for the MPH in Public Health Genetics and MS in Genetic Counseling joint degree are listed below.

- 62 Credits
- Practicum (200-hour minimum)
- Essay
- Comprehensive Examination
- Oral Examination - Thesis Defense

Dual-Degree Requirements

Students interested in both genetic counseling and public health genetics can pursue both degrees in a combined 62-credit program. All requirements for each individual program must be completed. All required courses for both degrees must be taken by dual degree students, with the exception of PUBHLT 2011 Essentials of Public Health and HUGEN 2062 Ethical Issues in Public Health Genetics and Research.

Given that some of the curriculum overlaps, the dual degree requires the completion of a minimum of 62 credits. In addition to completing all rotation and thesis requirements of the MS in Genetic Counseling degree, students enrolled in the dual degree will fulfill the MPH practicum and MPH essay requirements. Students using their clinical rotations for their practicum do not need to take HUGEN 2050 Practicum as these credits are represented in HUGEN 2036 Genetic Counseling Internship.

The required courses for the dual-degree program are outlined below. Schedules are discussed on an individual basis with Program Leadership in the MPH in Public Health Genetics and MS in Genetic Counseling Programs.

MPH Core Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Required Human Genetics Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2012 - WRITING IN CLINICAL AND PUBLIC HEALTH GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES *(1-3 credits)*
- HUGEN 2025 - HUMAN GENETICS SEMINAR *(two terms)*
- HUGEN 2032 - GENETIC TECHNIQUES
- HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2036 - GENETIC COUNSELING INTERNSHIP *(two terms - fall and spring of 2nd year)*
  Fulfills the MPH practicum requirement, students must complete and submit all materials required for the MPH practicum
- HUGEN 2037 - GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
- HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
- HUGEN 2039 - GENETIC COUNSELING RISK ASSESSMENT AND APPLICATION
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE *(two terms)*
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2052 - ETHICAL ISSUES IN GENETIC COUNSELING
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS
- HUGEN 2063 - GENETIC COUNSELING IN PRACTICE: SIMULATION AND SKILL BUILDING

At Least 3 Credits from the Following Courses

- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2061 - CANCER GENETIC COUNSELING
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2056 - GENETIC CONDITIONS AND PUBLIC HEALTH PROGRAMS

Elective Courses

Add electives as needed recommended by academic advisor to earn total credits required for the degree program.

Other Requirements

Comprehensive Examination

The written comprehensive examination occurs at the end of the first year of study. Students must complete the following courses to be eligible to sit for the exam:

- BIOST 2041 INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2020 INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2040 MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2035 PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2025 HUMAN GENETICS SEMINAR *(2 terms)*
- HUGEN 2047 CLINICAL GENETICS CASE CONFERENCE
- PUBHLT 2011 ESSENTIALS OF PUBLIC HEALTH *(2 terms)*
- HUGEN 2032 GENETIC TECHNIQUES
- HUGEN 2060 CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2038 INTERVENTION SKILLS FOR GENETIC COUNSELING
- HUGEN 2052 ETHICAL ISSUES IN GENETIC COUNSELING
- HUGEN 2010 BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2061 CANCER GENETIC COUNSELING
- PUBHLT 2011 ESSENTIALS OF PUBLIC HEALTH
- HUGEN 2063 GENETIC COUNSELING IN PRACTICE: SIMULATION AND SKILL BUILDING
- HUGEN 2037 GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
- HUGEN 2039 GENETIC COUNSELING RISK ASSESSMENT AND APPLICATION

A student failing a minimum score of 70% must repeat the written examination within 90 days and/or undergo a series of supervised tutorial sessions to overcome areas of deficiencies. For the student who undergoes the tutorial sessions, they must retake the exam and achieve a minimum score of 70% after completion of the sessions.

Failure to pass the comprehensive examination in two attempts may lead to dismissal from the program.

Oral Examination - Thesis Defense

Students being writing their thesis in Spring of the 1st year and it must be completed before graduation. Students must complete the following courses before their thesis defense:

- HUGEN 2037 GENETIC COUNSELING PROFESSIONAL DEVELOPMENT AND RESEARCH SERIES
- HUGEN 2021 SPECIAL STUDIES
- HUGEN 2012 WRITING IN CLINICAL AND PUBLIC HEALTH GENETICS

A final copy of the thesis must be submitted to the Thesis Advisory Committee for evaluation at least one week prior to the thesis defense. The Thesis Advisory Committee will judge the adequacy of the thesis by an open oral examination covering the subject of the thesis. Successful completion of the MS thesis requires unanimous agreement by the Thesis Advisory Committee.

Must register for at least one credit during the term in which they intend to graduate. Students intending to graduate must file an application to graduate by the deadline specified in the University Calendar. The final copy of the MS thesis must be prepared and submitted according to the University guidelines for Electronic Theses and Dissertations (ETD).

Thesis and Essay Requirements

Students in the dual degree program will complete both the thesis requirement for the MS in Genetic Counseling degree and the Essay requirement for the MPH in Public Health Genetics degree. Depending on the thesis and essay topics, sometimes these documents can be combined into one document comprising the student's thesis project with additional background on public health genetics relevance and, at least one additional, extensive chapter focusing on an application of public health genetics. The student's thesis committee and the Program Director for the MPH in Public Health Genetics will work with the student to identify the additional components or topics that are needed to satisfy the MPH Essay requirement.

Total Credits: 62

Master's

Genetic Counseling, MS

The MS in Genetic Counseling is committed to providing cutting edge training in the complex science of genetics while fostering a strong foundation in counseling. This unique program is constantly evolving to ensure the continued success of graduates entering a dynamic workforce. We welcome 10 and 12 students per year to be trained by world-renowned faculty in an exciting and challenging program.

The program is grounded in three important elements: scientific training in human genetics and genomics, comprehensive clinical experience, and understanding the psychological and social aspects of counseling-with an added focus on integrating up to the minute discoveries in genetics and genomics as well as valuable concepts from other academic disciplines.

The Genetic Counseling Program is accredited by the Accreditation Council for Genetic Counseling and our comprehensive program helps students to achieve and often surpass the practice based competencies outlined by the ACGC.

The MS in Genetic Counseling program is designed to be completed in two years of full-time study. The requirements for the MS in Genetic Counseling degree are listed below.

- 45 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

Clinical Rotations

Genetic counseling students have the opportunity to participate in patient care at world-renowned medical facilities. They typically see 100 cases or more and are exposed to a variety of genetic referral types as well as diverse medical systems.

All students participate in rotations in Cancer genetics, Prenatal genetics, Pediatric genetics, Adult/Specialty genetics, Primary Care, Precision Medicine and a thesis focused block. In addition, students spend three weeks at an optional rotation site. This allows students the opportunity to select specific training experiences to develop a higher level of expertise based on their interests.

Other Requirements

Comprehensive Examination

The written comprehensive examination occurs at the end of the first year of study. Students must complete the following courses to be eligible to sit for the exam:

The final copy of the MS thesis must be prepared and submitted according to the University guidelines for Electronic Theses and Dissertations (ETD).

Total Credits: 45

Genome Bioinformatics, MS

The Master of Science in Genome Bioinformatics (MSGB) program prepares students for careers analyzing the human genome both in academia and in pharmaceutical and genomic testing industries. Graduates will meet the growing need for computational analysts with expertise in manipulating, annotating, and interpreting human genome data.

Students can take advantage of resources and research opportunities afforded by other health science schools, especially Pitt Medicine, where researchers are carrying out cutting-edge genomic studies using next-generation sequence data and bioinformatics tools and methods.

Graduates are experts in applying computation tools for studying and interpreting the human genome in a future where genomics is central to precision medicine and biomedical research.

The MS program is designed to be completed in two years of full-time study. The requirements for the MSGB degree are listed below.

- 45 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

HUGEN Elective Courses

5 or more credits

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING

- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES

Additional Elective Courses and Internship

In addition to the required courses listed above, MS in Genome Bioinformatics students are expected to select at least 6 additional credits of elective courses approved by the Program Director and must complete an internship in an industry, academic, or governmental setting after the first year.

Other Requirements

Comprehensive Examination

The written comprehensive examination occurs at the end of the first year of study. Students must complete the following courses to be eligible to sit for the exam:

- HUGEN 2010 BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2020 INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2040 MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2071 GENOMIC DATA PROCESSING AND STRUCTURE
- HUGEN 2072 GENOMIC DATA PIPELINES AND TOOLS
- HUGEN 2073 GENOMIC DATA VISUALIZATION AND INTEGRATION
- BIOST 2041 INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 PRINCIPLES OF EPIDEMIOLOGY

Oral Examination - Thesis Defense

The written thesis oral defense occurs in the final term of study. Students must complete the following courses before their thesis defense:

- HUGEN 2075 GENOME BIOINFORMATICS THESIS AND WRITING
- HUGEN 2076 GENOME BIOINFORMATICS CAPSTONE

A final copy of the thesis must be submitted to the Thesis Advisory Committee for evaluation at least one week prior to the thesis defense. The Thesis Advisory Committee will judge the adequacy of the thesis by an open oral examination covering the subject of the thesis. Successful completion of the MS thesis requires unanimous agreement by the Thesis Advisory Committee.

Must register for at least one credit during the term in which they intend to graduate. Students intending to graduate must file an application to graduate by the deadline specified in the University Calendar. The final copy of the MS thesis must be prepared and submitted according to the University guidelines for Electronic Theses and Dissertations (ETD).

Total Credits: 45

Human Genetics, MS

The MS in Human Genetics (MSHG) program prepares students for careers as contributing members of genetics and genomics research teams in academia or industry. Graduates of the program often go on to PhD level study and become independent scientists. The flexible curriculum provides a broad background in the field while allowing customized emphasis on laboratory genetics or genetic data analysis. In addition to core coursework and advanced classes in a chosen area of concentration, MS students pursue mentored research projects culminating in the production and defense of a thesis.

The MS program is designed to be completed in two years of full-time study. The requirements for the MSHG degree are listed below.

- 36 Credits
- Comprehensive Examination
- Oral Examination - Thesis Defense

Program Director

John R Shaffer

3120 PUBHLT

130 DeSoto St.

412-624-3018

john.r.shaffer@pitt.edu

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES *(two credits)*
- HUGEN 2025 - HUMAN GENETICS SEMINAR *(two terms)*
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

HUGEN Elective Courses

3 or more credits

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES

Additional Elective Courses

In addition to the required courses listed above, students must complete at least 11 credits through elective courses within or outside the Department of Human Genetics, HUGEN 2021 Special Studies research credits, or transfer credits from previous graduate level coursework. Elective courses and transfer credits counting toward the degree must be discussed and approved by the student's academic

and research advisors. Students who are not fluent in English are strongly recommended to take a University course in conversational English.

Other Requirements

Comprehensive Examination

The Comprehensive exam comprises two parts. The first part is a written exam covering the foundational knowledge in the field, which takes place after completion of the introductory courses (HUGEN 2010, HUGEN 2020, HUGEN 2040, HUGEN 2060, EPIDEM 2110, BIOST 2041) usually after then first year of study. The second part is a presentation and oral exam that assesses the transfer of foundational knowledge to the interpretation of research from the primary literature. The presentation and oral exam occur in the same semester following successful completion of the written exam. Satisfactory performance in both parts is required to pass the comprehensive exam.

Oral Examination - Thesis Defense

The thesis defense takes place when the student has completed the mentored research project and submitted the written document to the thesis committee for review. The defense comprises a presentation of the research followed by a closed-door oral examination with the thesis committee.

Total Credits: 36

Public Health Genetics, MPH

The Master of Public Health (MPH) in Public Health Genetics program integrates human genetics and the public health science disciplines of epidemiology, behavioral and community health sciences, biostatistics, environmental health, and health services research with ethics, social sciences, public affairs, and law to prepare students for a career in the evolving field of public health genetics. Public health genetics encompasses issues at the forefront of promoting diversity, equity, and inclusion in the implementation of genetic initiatives including access to genetic services, genetic literacy, genetic policy, and patient advocacy. It addresses society's legal, ethical, financial, regulatory, and organizational responsibilities in offering genetic services and conducting genetic resources.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in two years of full-time study. The requirements for the MPH degree in Public Health Genetics are listed below.

- 47 Credits
- Practicum (200-hour minimum)
- Essay

MPH Core Required Courses

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Human Genetics Required Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2020 - INTRODUCTION TO POPULATION GENETICS AND GENETIC EPIDEMIOLOGY
- HUGEN 2021 - SPECIAL STUDIES *(4 credits) Students can take up to 3 credits for their essay/thesis, but only 1 credit is required*
- HUGEN 2025 - HUMAN GENETICS SEMINAR *(two terms)*
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM *(1 credit)*
- HUGEN 2054 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS
- HUGEN 2062 - ETHICAL ISSUES IN PUBLIC HEALTH GENETICS AND RESEARCH

At Least 3 Credits from the Following Courses

- HUGEN 2090 - MOLECULAR BASIS OF COMPLEX DISEASES
- HUGEN 2091 - GENETICS OF COMPLEX DISEASES
- HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION
- HUGEN 2061 - CANCER GENETIC COUNSELING
- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2056 - GENETIC CONDITIONS AND PUBLIC HEALTH PROGRAMS

Additional Elective Courses

Students fulfill the remaining credits with electives from the School of Public Health based on their interests and future career goals. Elective courses outside of the School of Public Health are permitted with Program Leadership approval.

Total Credits: 47

Department of Infectious Diseases and Microbiology

Mission

Our mission is to advance the understanding and control of infectious diseases through cutting-edge research, comprehensive training programs, and exceptional public health services.

Vision

We strive to be a world-renowned center of excellence in infectious diseases research, training, and public health solutions.

Strategic Priorities

- **One Health:** Promote interdisciplinary collaboration to combat zoonotic diseases and play a key role in the development of One Health strategies that drive policy changes at the national and international levels.
- **Emerging and Vector-Borne Infectious Diseases:** Publish influential research on emerging and vector borne-pathogens, develop innovative prevention strategies, and contribute to reducing disease burden in vulnerable populations.
- **HIV and Tuberculosis (TB):** Become a recognized center of excellence for HIV and TB research and prevention, generate impactful research outcomes, foster innovative prevention strategies, and contribute to measurable public health outcomes.
- **Climate Change and Global Health:** Conduct groundbreaking research on the impact of climate change on infectious diseases and influence policies and interventions that enhance resilience and adaptation to climate-related health challenges.
- **Pandemic Prevention and Preparedness:** Enhance pandemic preparedness by developing early detection systems, novel surveillance approaches, and strong partnerships with public health agencies.

Degree programs in IDM integrate molecular biology, immunology, epidemiology, medicine, health education, and community intervention. Through these collaborative approaches, our students are provided with opportunities for engaging in cross-disciplinary research.

Program graduates pursue careers in academia, industry, government, NGOs and community service. You will find IDM graduates working with prestigious employers in the USA and worldwide. Examples include the National Institutes of Health, the Centers for Disease Control and Prevention, state and local health departments, pharmaceutical companies, hospitals, and major universities and other academic institutions.

Admissions & Aid

All new applicants must apply through SOPHAS. Instructions on how to apply, deadlines and requirements, information for international applicants, frequently asked questions, and financial aid information can be found by visiting Pitt Public Health Admissions and Aid. Please visit Infectious Diseases and Microbiology Admissions for department and program-specific application requirements.

Accelerated Bachelor's/Master's Program

Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Qualified Pitt undergraduates can apply to an accelerated program in their third year. Accelerated program details, application instructions, and requirements can be found by visiting Pitt Public Health Accelerated Bachelor's/Master's Program.

Doctoral

Infectious Diseases and Microbiology, PhD

The PhD program in the Department of Infectious Diseases and Microbiology prepares students for competitive research and teaching careers in academia, government agencies, and private industry. PhD students complete coursework that emphasizes the fundamentals of pathogen biology, immunology, cell biology, and molecular biology, which provides the necessary educational basis to conduct independent research mentored by faculty.

The program is designed to be completed in four to five years. The requirements for the IDM PhD degree are listed below.

- 72 Credits
- Preliminary Evaluation
- Comprehensive Examination
- Overview/Prospectus Meeting
- Admission to Candidacy

- Final Oral Examination - Dissertation Defense

hartman2@pitt.edu

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY *(six terms)*
- IDM 2024 - PRINCIPLES OF MOLECULAR METHODS
- IDM 2025 - MICROBIOLOGY SEMINAR *(four terms)*
- IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES
- IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION
- IDM 2103 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 3440 - VACCINES AND IMMUNITY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree program.

Total Credits: 72

Other Requirements

Preliminary (Qualifying) Evaluation

- Taken at end of first year (generally June after 1st year)
- Must have GPA of 3.0 or higher
- Format: Students are assigned a published manuscript that is outside of their current lab research area. Students must be able to present and critique the manuscript to a committee of 3 faculty.

- Through the exam, the student must show an ability to analyze and interpret data and breadth and depth of understanding of associated concepts.

Comprehensive Examination

- Taken at end of second year (generally July after 2nd year)
- Must have GPA of 3.0 or higher
- Format: Students must write an R21-style proposal of original research related to their dissertation work. The exam consists of an oral presentation and defense of the proposal to a committee of 3 faculty.
- Through the comprehensive examination, the student must demonstrate mastery of the general field of doctoral study, acquisition of both breadth and depth around specialization within the general fields, and the ability to use the research methods of the discipline.
- Upon passing the exam, students enter FTDR status.

Overview/Prospectus Meeting

After passing the Comprehensive Examination, students must form their dissertation committee in accordance with University and school guidelines and have it approved by the school. The Overview/Prospectus must occur by January following the Comprehensive Examination. The overview requires the student to carefully formulate a plan and permits the doctoral committee members to provide guidance in shaping the conceptualization and methodology of that plan. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal. The student is responsible for ensuring that all appropriate regulatory approvals are obtained for the proposed research. The dissertation committee is required to meet yearly to monitor dissertation progress.

Admission to Candidacy

To qualify for admission to candidacy a student must:

- be in full graduate status
- have satisfied the requirement of the preliminary evaluation
- have completed formal course work with a minimum grade point average of 3.00
- have passed the comprehensive examination
- have received approval of the proposed subject and plan of the dissertation from the doctoral committee following an overview or prospectus meeting of the committee

Final Oral Examination - Dissertation Defense

Students are required to have at least 1 first author publication with original research. Each student must write a dissertation that presents the results of a research project carried out by the student. The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and need not be confined to materials in and related to the dissertation. The doctoral committee confers with the student before providing approval to schedule the dissertation defense. The doctoral dissertation defense must be announced at least 3 weeks in advance in accordance with school policy. final copy of the dissertation must be prepared and submitted according to University requirements.
.

Master's

Infection Prevention, MPH

The MPH in Infection Prevention (IDM-IP MPH) aims to equip students to function as infection preventionists in clinical and community settings by providing a tailored educational experience in infection prevention and infectious diseases prevention, treatment, and response. The program fosters competencies for practice, research, and education in infectious diseases and related public health issues. Students take coursework in infection prevention, global and domestic infectious diseases, HIV, STIs, emerging pathogens, neglected tropical diseases as well as response and mitigation of outbreaks, epidemics and pandemics through design of interventions, approaches, and policies to reduce the burden of infectious diseases in the US and internationally. Coursework paired with hands-on internships in infection prevention prepares students for careers in infection prevention, and in public health positions where prevention and treatment of infectious diseases is critical.

Students are required to complete a 200-hour practicum/internship in infection prevention specifically infection prevention in a clinical setting including hospitals, clinics and community settings. Students prepare an essay or thesis that addresses an issue related to infectious diseases that demonstrates the ability to synthesize information from numerous sources. The MPH-IP program is designed to be completed in four semesters of full-time study. The requirements for the IDM-IP MPH are listed below.

- 42 Credits
- Practicum (200-hour minimum)
- Essay

- IDM 2069 - INFECTION PREVENTION AND CONTROL IN HEALTH CARE SETTINGS
- IDM 2134 - PREVENTION AND CONTROL OF SEXUALLY TRANSMITTED INFECTIONS

Electives

4-5 elective credits are required. The courses below are suggestions; students are encouraged to select electives from Pitt Public Health or other Pitt schools relevant to their research area. Students work with their academic advisor to identify electives that fulfill the total credits required for the degree program.

- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2180 - FUNDAMENTALS OF EPIDEMIOLOGICAL METHODS
- EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL
- PUBHLT 2173 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2029 - HEALTH MANAGEMENT INFORMATION SYSTEMS
- HPM 2108 - LEADERSHIP
- LAW 2089 - PUBLIC HEALTH LAW
- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC
- PIA 2640 - HUMANITARIAN ACTION: CHALLENGES, RESPONSES, RESULTS (WASHINGTON DC)

Total Credits: 42

Infectious Diseases and Microbiology, MS

he Master of Science in Infectious Diseases and Microbiology program provides students with a unique education in basic science within the School of Public Health. Trainees in the MS program develop expertise in laboratory skills and analytic techniques that prepare them to become competitive applicants for medical school, doctoral programs, and research positions in academia, government, and industry.
This two-year program emphasizes coursework in immunology, cell biology, microbiology, and virology, as well as hands-on experience in these disciplines as students conduct research under the supervision of a faculty advisor. At the end of the program, MS students prepare a thesis based on their research for presentation to their faculty advisory committee and department members.

The requirements for the IDM MS degree are listed below.

- 36 Credits
- Comprehensive Examination

- Oral Examination - Thesis Defense

Program Director

Joshua T. Mattila

2137 PUBHL

130 DeSoto St.

412-648-2341

jmattila@pitt.edu

Required Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY *(every term)*
- IDM 2022 - SPECIAL TOPICS *(3 credits)*
- IDM 2024 - PRINCIPLES OF MOLECULAR METHODS
- IDM 2025 - MICROBIOLOGY SEMINAR *(four terms)*
- IDM 2037 - ADVANCED VECTOR-BORNE INFECTIOUS DISEASES
- IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION
- IDM 2103 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 3440 - VACCINES AND IMMUNITY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS *(two terms)*

Elective Courses

Students add electives as recommended by academic advisors to earn total credits required for the degree. Recommended electives can be found below.

- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS

Other Requirements

Comprehensive Examination

The MS Comprehensive Exam is designed to assess a student's ability to understand the intellectual and technical framework of a recently published scientific paper. Students are given a paper to read and are expected to apply knowledge gained through their coursework and

laboratory training to interpret its results while answering questions from a faculty committee about the significance and technical merit of the study. For full-time MS students, the Comprehensive Exam is typically taken at the end of the first year, between the conclusion of the spring semester and the start of the second year, allowing time to complete the coursework needed to understand the assigned paper. Part-time MS students are eligible to take the Comprehensive Exam after completing the core MS requirements (BIOST 2041, IDM 2022 (one term), IDM 2024, IDM 2103, IDM 3440) and after giving a journal club presentation in IDM 2025, which usually places the exam at the end of their second year.

Thesis

At the end of the MS program, students synthesize their research results in the MS thesis. Students form a committee of at least two IDM faculty members and one non-IDM faculty member who can provide advice on the direction of their research project. The student presents their thesis proposal to the committee for input on their specific aims and overall research plan. After giving a departmental research-in-progress talk, the student can ask their committee for approval to begin writing the thesis. The student then works with their advisor to prepare a document that comprehensively details the hypothesis and specific aims that drive their research, and their results and interpretation. The student's thesis cohesively describes their work and situates it within a broader public health research priority. Upon completion, the student gives an oral presentation of their thesis research to their committee, peers, and the department in a public venue, followed by a closed session with committee members. Successful defense of the thesis and submission to the school for inclusion in the Electronic Theses and Dissertations (ETD) system are required for graduation.

Total Credits: 36

Infectious Diseases and One Health, MPH

The MPH in Infectious Diseases and One Health combines a broad education in Public Health with a rigorous curriculum in pathogen biology, infectious disease epidemiology, and immunology with a One Health focus, while leaving plenty of scope for students to choose electives that combine to produce an MPH degree that is uniquely tailored to each student's interests. It also provides a wide range of practicum and research opportunities in basic laboratory, clinical, health authority, and community settings. Students graduate from this program with the skills and competencies that enable them to go into medical school, PhD or DrPH programs, infectious disease epidemiologist positions, or other Public Health careers at the local, state, or federal levels.

Students are required to complete a 200-hour practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. The requirements for the Infectious Diseases and One Health MPH are listed below.

- 42 Credits
- Practicum (200-hour minimum)
- Essay

School of Social Work

School of Social Work

University of Pittsburgh School of Social Work

The School of Social Work at the University of Pittsburgh, established in 1918, is one of the oldest and most respected social work programs in the country. From its founding, the School has been committed to advancing knowledge through education, research, and community engagement.

An academic unit within the University, the School of Social Work offers undergraduate, master's, and doctoral programs, along with continuing education for practicing professionals. The Bachelor of Arts in Social Work (BASW) and Master of Social Work (MSW) programs are accredited by the Council on Social Work Education (CSWE), Board of Accreditation. Students and graduates are eligible for full membership in the National Association of Social Workers (NASW).

Visions of School of Social Work

Transforming our world, our future, ourselves

- Prepares courageous leaders to transform social work practice, policy, research, and education in a community-engaged and inclusive environment
- Develops and advances innovative approaches to understand, prevent, and ameliorate complex social problems
- Builds collaborative partnerships to promote social justice

Goals of the School of Social Work:

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities, to critically analyze personal, familial and environmental factors affecting practice settings and practice techniques, and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

Graduate Degree Options

The School of Social Work awards Master of Social Work (MSW) and Doctor of Philosophy (PhD) degrees.

MSW Program

Students can earn their MSW through two formats: **face-to-face and online**. Students may pursue their MSW through our standard program or with advanced standing (after successful completion of a Council on Social Work Education-accredited undergraduate social work degree)

The face-to-face **MSW program** option allows students to pursue full-time or part-time study.. Students may specialize in Direct Practice or in Community, Organization, and Social Action (COSA), and may be able to earn a certificate in one of the following areas:

- Direct Practice - Children, Youth and Families
- Direct Practice - Gerontology
- Direct Practice - Home and School Visitor/School Social Work
- Direct Practice - Integrated Healthcare
- Direct Practice - Mental Health
- COSA - Gerontology
- COSA - Human Services Management
- COSA - Community Organizing Practice
- MA Gender, Sexuality, and Women's Study

Face-to-Face may also elect to pursue joint or cooperative degrees. Students must apply and be admitted separately to each academic unit. Approved joint degree options include:

- Master of Social Work / Master of Divinity (MSW/MDiv)
- Master of Social Work / Master of Public Administration (MSW/MPA)
- Master of Social Work / Master of Public and International Affairs (MSW/MPIA)
- Master of Social Work / Master of International Development (MSW/MID)
- Master of Social Work / Doctor of Philosophy in Social Work (MSW/PhD)
- Master of Social Work / Master of Public Health (MSW/MPH)
- Master of Social Work / Master of Business Administration (MSW/MBA)

The **online MSW program** option offers is designed for part-time study in an asynchronous format. Online MSW students specialize in Direct Practice and may be able to earn a certificate in one of the following areas: Children, Youth and Families; Integrated Healthcare; or Mental Health.

PhD Program

The full-time PhD program prepares students for research and teaching careers in the field of Social Work. Students must hold an MSW degree to be eligible to apply directly to the PhD program. Applicants without an MSW degree, who wish to seek training to become full-time faculty or researchers in the field of Social Work, may apply to the joint MSW/PhD program.

Students may elect to pursue joint or cooperative degrees. Students must apply and be admitted separately to each academic unit. Approved joint degree options include:

- Master of Social Work / Doctor of Philosophy in Social Work (MSW/PhD)
- Master of Public Health / Doctor of Philosophy in Social Work (MPH/PhD)

Admissions

MSW Admissions

Applications are accepted both for our standard MSW program and for our Advanced Standing MSW program for students who have successfully completed an undergraduate social work degree from a CSWE-accredited BSW program.

All applicants to the MSW Program must meet the following criteria:

- A baccalaureate degree from a regionally accredited college or university
- A minimum GPA of 3.0 on a 4.0 scale in all undergraduate coursework
- Successful completion of a 3-credit course in statistics or quantitative analysis

Applicants with a GPA below 3.0 may be considered for provisional admission.

Required application materials include:

- A personal statement (3-5 pages) responding to specific prompts
- Twp references (one academic and one professional recommended)
- A signed praticum education participation agreement
- Official transcripts from all institutions of higher education attended

Applicants are also encouraged to have 30 undergraduate (or combined undergraduate and graduate) credits in credits in liberal arts and 30 in social sciences. These are recommended but not required.

Liberal arts areas include:

- Humanities (English, languages, literature, philosophy, religion, communication)
- Fine arts (art, photography, dance, theater)
- Natural sciences (biology, chemistry, physics, mathematics, statistics)

Social science areas include:

- Psychology, sociology, anthropology, economics, political science, social work, history, criminal justice

International Applicamts

The School of Social Work welcomes applications from students in other countries whose credentials meet the requirements and the standards of the School of Social Work and the Office of lnternational Services of the University.

MSW applican s from other countries must apply directly to the School of Social Work. Applicants must submit the completed application form, additional required forms, and other required materials in English. Additional University of Pittsburgh application procedures for international students are described at http://www.socialwork.pitt.edu/admissions-aid/international-students. Other information and assistance for international students can be found online at www.ois.pitt.edu/intladmissions.html.

International students who hold a baccalaureate degree in social work from a program that is not accredited by the Council on Social Work Education and who are interested in obtaining advanced standing credit must submit their transcript to the council for a determination of equivalency. Further Information can be found online at www.cswe.org.

MSW Financial Assistance

Students interested in financial assistance to meet tuition and/or living costs should direct inquiries to both the Office of Admissions of the School of Social Work and the University's Office of Admissions and Financial Aid.

Students should be advised that limited resources often preclude any one funding source from granting awards that meet total financial needs. As a result, students are strongly encouraged to seek financial aid packages consisting of partial awards (including loans and scholarships) from a variety of sources.

Applications for financial assistance are accepted only after an admissions decision has been made. Awards are made for a one-year period. New applications are required for each succeeding period

PHD Admissions

Persons seeking admission to the PhD Program must demonstrate the potential for doctoral studies. The doctoral program is open to applicants who have demonstrated intellectual capacity, critical thinking skills, and potential for research and scholarship.

Admission to the program is for the fall term only, and the application deadline is December 15. All applicants to the Doctoral Program in Social Work must provide the following (further details are provided on our PhD Admissions webpage):

- Completion of the PhD Application.
- Official copies of all official undergraduate and graduate transcripts.
- A personal statement
- A social justice statement
- A writing sample
- Three letters of reference from professors and others who have known the applicant in a professional capacity. Do not include personal references.

SSW Policy on Re-Admissions

Students who have not been registered in the school for one calendar year or longer for any reason are required to apply through the Admissions Office for re-admission. Re-admitted students enter the school under the curriculum requirements current at the time of their re-admission.

Academic Standards

MSW Academic Standards

Embodying the standards of professional social work, the School of Social Work has established expectations for student and faculty conduct in its **Academic and Professional Behavior Policy.** This policy, which outlines the professional behavior standards for MSW students and processes for addressing and resolving any violations of these standards, can be found in the MSW Student Handbook.

Students in the School of Social Work are required to adhere to the NASW Code of Ethics. Professional ethics are at the core of social work. The profession has an obligation to articulate its basic values, ethical principles, and ethical standards. The NASW Code of Ethics sets forth these values, principles, and standards to guide social workers' conduct. The Code is relevant to all social workers and social work students, regardless of their professional functions, the settings in which they work, or the populations they serve. The NASW code of ethics can be viewed online at www.naswdc.org/pubs/code/default.asp.

The School of Social Work maintains an Academic Integrity Policy that applies to all students and faculty members. The policy is designed to ensure that both students and faculty uphold the ethical standards expected of them in fulfilling their academic and professional responsibilities.

PhD Academic Standards

The PhD program abides by prevailing principles of academic integrity, research responsibility, and social work ethics. Doctoral students are viewed as professionals and colleagues who share in the collective responsibility for promoting, exemplifying, and continuing the ethical, professional, and academic standards of the profession, school, university, and academy. Students are expected to adhere to Pitt's Academic Integrity Guidelines, the School of Social Work's Academic and Professional Behavior Policy, the Pitt Student Code of Conduct, the principles of ethical and responsible research and standards set by the Office of Research Integrity and the Guidelines for the Responsible Conduct of Research, and the NASW Code of Ethics.

Advising

MSW Advising

Students are assigned an academic advisor when they matriculate into the MSW program. Academic advisors help students understand the overall course of study and the semester-by-semester coursework required to successfully meet academic requirements for graduation. Academic advisors also serve as the primary point of contact for navigating available resources and supports and support students with the problem-solving process when needed.

Practicum advising is provided through the Practicum Office and complements academic advising. While similar in structure and purpose, practicum advising supports students in securing internship placements that will support social work educational competencies.

PhD Advising

The PhD Program Director serves as academic advisor for all first- and second-year students. Doctoral students admitted to candidacy are advised by their faculty dissertation chair.

Special Academic Opportunities

The school offers several special opportunities for student learning and engagement, including New Student Orientation, student events and activities, and community lectures. Additional opportunities include:

Student Participation on School Committees

Students have opportunities to participate in the governance of the School of Social Work by volunteering to serve on school committees as full members of those committees. Information about the purposes and functions of the committees is distributed during the beginning of each fall term.

Student Executive Council (SEC)

All degree students in the School of Social Work comprise the membership of the student organization that elects the Student Executive Council. The council focuses on student life and serves as a liaison with the administration and faculty.

The Student Executive Council relies heavily on student participation, to be of service to the student body. Activities include publication of a student newsletter, developing discussion sessions around critical social issues, providing of opportunities for social action, helping to plan for orientation, and planning a variety of social events.

ISEC members, representing the student body, are also appointed to serve in the following organizations and/or committees: Black Action Society; Student Chapter, NASW; Student Chapter, NABSW; Alumni Association (Liaison); BASW Club; and Graduate and Professional Student Association (GPSA).

VanKirk Career Center

The VanKirk Career Center prepares students for the social work job market by providing contemporary workshops, individual consultation, and technical support. The center's services are constructed to develop greater self-confidence, expand awareness of career opportunities, and foster effective job search practices. All students can easily take full advantage of the professional development and career service opportunities offered by the VanKirk Career Center.

Center for Race and Social Problems

In 2002, then Dean of the School of Social Work Larry E. Davis established the Center on Race and Social Problems (CRSP) at the University of Pittsburgh to help lead America further along the path to social justice by conducting race-related research, mentoring emerging scholars, and disseminating race-related research findings and scholarship. CRSP is multidisciplinary in its approach and multiracial in its focus and was the first race-related research center to be housed in a school of social work.

Buhl Social Work Collection

The Buhl Social Work Collection is located on the first floor of Hillman Library. The Buhl Library is staffed by a part-time Social Work Librarian, whose office is located in Buhl Library.

School of Social Work Faculty

- TBD- Dean
- Yodit Betru, MSW, DSW - Director, MSW Program; Assistant Professor
- Jaime Booth, PhD - Associate Dean for Research; Associate Professor
- Laura Borish, MSW - Clinical Assistant Professor; CWEB/CWEL Agency Coordinator
- Cathy Breneman, Ph.D.- Director of Practicum
- Melvin Cherry, MSW, EdD - Practicum Assistant Professor
- Stevara Haley Clark, PhD - Director of Online Programs and Distance Education and Clinical Associate Professor
- Kyaien O. Conner, PhD - Donald M. Endowed Chair, Director of the Center on Race and Social Problems, Associate Dean for Justice, Equity, Diversity, and Inclusion, Professor
- Quinton D. Cotton, PhD - Assistant Professor
- John Dalessandro, MSW - Practicum Assistant Professor
- Amy DeGurian, MSW - Practicum Assistant Professor
- Aliya Durham, MSW, MPIA . PhD- Assistant Professor; Director of Community Engagement, Center on Race and Social Problem
- Shaun M. Eack, PhD - James and Noel Browne Endowed Chair; Professor of Social Work and Psychiatry
- Stephanie Eckstrom, MSW - MSW Regional Program Director, Pitt-Bradford MSW Program
- Rafael Engel, PhD - Associate Professor
- Victor Figuereo, PhD - Assistant Professor
- Rachel Gartner, PhD - Assistant Professor
- Sara Goodkind, PhD - Professor; PhD Program Director
- Catherine Greeno, PhD -Associate Professor
- Amy Herschell, PhD - Professor: Principal Investigator, Child Welfare Education Research Programs
- James Huguley, EdD - Associate Professor
- Ron Idoko, EdD - Associate Director, Center on Race and Social Problems; Founding Director of the Racial Equity Consciousness Institute, and Research Assistant Professor
- Leah Jacobs, PhD - Associate Professor
- Alicia Johnson, MSW, PhD - Clinical Assistant Professor; CWEL Academic Coordinator
- Nev Jones, PhD - Associate Professor
- Toya Jones, PMSW EdD - Assistant Professor; Dierctor BASW Program
- Travis Labrum, PhD - Associate Professor
- Hung-Peng Lin, PhD - Research Assistant Professor, Child Welfare Education and Research Programs
- Deborah Moon, PhD - Associate Professor
- Elizabeth Mulvaney, MSW - Clinical Assistant Professor; Direct Practice Chair
- Mary L. Ohmer, PhD - Professor; COSA Chair
- Marlo Perry, PhD - Research Associate Professor, Child Welfare Education and Research Programs
- Sarah Fateman Porter, PhD - Assistant Professor
- Shannon Powers, PhD - Assistant Professor
- Suzanne Pritzker, PhD - Professor; Associate Dean of Academic Affairs
- Brooke Rawls, MSW - Assistant Professor; Academic Coordinator, CWEB Program
- Deborah Robinson, MSW - Practicum Assistant Professor
- Jeffrey Shook, PhD - Professor
- Fengyan Tang, PhD - Professor

- John Wallace, PhD - David E. Epperson Chair; Professor; Vice Provost for Faculty Diversity and Development, David E. Epperson Chair and Professor, Joint Appointments: Kats School of Business, Department of Sociology, Dietrich School of Aars and Sciences
- Misha Zorich, MSW - Assistant Professor; MSW Regional Program Director, Pitt-Johnstown; Director of Student Engagement

Program and course Offerings

Master of Social Work Program

MSW Mission and Goals

The MSW Program's mission is grounded in the purpose and values of the social work profession as well as an understanding of the program's context. In furtherance of the University's and School's missions, the MSW Program strives to prepare graduates with the specialized knowledge and skills needed to engage in evidence-informed and culturally responsive advanced social work practice - either Direct Practice with Individuals, Families, and Small Groups)DP) or Community, Organization, and Social Action (COSA) - that promotes human and community well-being and is guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry. The MSW Program's mission reflects the social work profession's values of service, social justice, the dignity and worth of the person, the importance of human relationships, integrity, competence, human rights, and scientific inquiry.

The goals of the MSW Program are to prepare students to:

- Engage in evidence-informed advanced specialized social work practice within a multicultural society.
- Practice according to the principles, values, and ethics that guide the social work profession.
- Influence social policies with the goal of alleviating poverty, oppression, and social injustice as well as advocating for human rights
- Practice in a manner that enhances the quality of life for all persons, locally and globally, and that advances the struggle for social, economic, and environmental justice.
- Practice with cultural humility.

MSW Degree Requirements

The MSW Program requires a minimum of 60 credits for graduation, including coursework and practicum requirements.

Students can earn their MSW through two formats: **face-to-face and online**. Students may pursue their MSW through our standard program or with advanced standing (after successful completion of a Bachelors of Social Work degree).

The **Face-to-Face MSW program option** allows students to pursue full-time or part-time study (completion within four years) . Face-to-face students may specialize in Direct Practice or in Community, Organization, and Social Action (COSA), and may be able to earn a certificate in one of the following areas:

- Direct Practice: Children, Youth and Families; Gerontology; Home and School Visitor/School Social Work; Integrated Healthcare; Mental Health.; or MA Gender, Sexuality and Women's Study
- COSA: Human Services Management; Community Organizing Practice; Gerontology; or MA Gender, Sexuality and Women's Study.

Face-to-face students may elect to pursue joint or cooperative degrees. Students must apply and be admitted separately to each academic unit. Approved joint degree options include:

- Master of Social Work / Master of Divinity (MSW/MDiv)
- Master of Social Work / Master of Public Administration (MSW/MPA)
- Master of Social Work / Master of Public and International Affairs (MSW/MPIA)
- Master of Social Work / Master of International Development (MSW/MID)
- Master of Social Work / Doctor of Philosophy in Social Work (MSW/PhD)
- Master of Social Work / Master of Public Health (MSW/MPH)
- Master of Social Work / Master of Business Administration (MSW/MBA)

The **online MSW program option** is designed for part-time study in an asynchronous format. Online MSW students specialize in Direct Practice and may be able to earn a certificate in one of the following areas: Children, Youth and Families; Gerontology; Integrated Healthcare; or Mental Health.

Statute of Limitations and Leaves of Absence

There is a four-year limitation on the earning of the MSW degree. The four-year period is counted from the date of entry into the program for four full academic calendar years. Under extenuating circumstances, including the following, a student may complete a Leave of Absence Request form:

- extended illness of the student,
- extended personal emergency,
- involuntary mobilization into a U.S. military unit, and
- death of a close family member.

In these circumstances, one leave of absence may be approved, with a maximum leave of one full academic year. If approved, the time of the leave will not count against the total time allowed for the degree being sought by the student.

MSW Curriculum

The MSW curriculum emphasizes evidence-informed practice, cultural responsiveness, interdisciplinary collaboration, and public engagement. Graduates are equipped to lead and serve in a range of public and private settings, addressing complex social issues that promote social justice.

The MSW Program prepares students for advanced practice in two specialized practice areas: **Direct Practice with Individuals, Families, and Small Groups or in Community, Organization, and Social Action (COSA).**

Faculty in the School are nationally recognized scholars whose work informs policy and practice. Their research spans areas such as racial justice, child and family well-being, health equity, and economic justice. Their work is done in partnership with communities, agencies, and organizations across Pittsburgh and beyond.

Students, alumni, and faculty actively engage in collaborations with social agencies, grassroots organizations, government partners, and foundations, supporting the School's mission to create a more just and equitable society while training professionals who can lead in a rapidly changing world.

Certificate

COSA Community Organizing and Practice Certificate

The **COSA Community Organizing and Practice Certificate** acknowledges community as a social environment that is broadly defined and rich in diversity. MSWs often find themselves working in community organizing and practice settings addressing a variety of planning, development, and social change issues. To prepare students to become leaders in this field, the School of Social Work offers a national Community Organizing and Practice Certificate, through a partnership with the Association for Community Organization and Social Action (ACOSA). Building on the School of Social Work's historic strength as the first and longest-standing program in Community Organizing (CO), this national certificate helps to define and affirm community organizing and practice competencies that have become increasingly important to the careers and advancement of MSW professionals.

Students complete COSA specialization requirements as well as those of the certificate. COSA students pursuing this certificate complete 12 course credits and 12 practicum credits in the areas of community organizing; community planning; community development; and community social change. Students must complete a COSA specialization practicum placement in a community organizing and practice setting.

Certificate Requirements

COSA Skills Courses

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

COSA Skill Electives

- SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
- SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

Practicum

The COSA specialization practicum placement (SWCOSA 2099; 12 credits - 720 clock hours) must be in a community organizing and practice setting.

COSA Gerontology Certificate

The **COSA Gerontology Certificate** prepares students with the knowledge and skills necessary to work and innovate in an aging society. An aging focus area has been a part of the school's curriculum since 1980. All Gerontology Certificate students are exposed to various roles and settings that constitute contemporary social work practice in aging. Emphasis is placed on understanding strengths and diversity among the aging population and the social, cultural, community, and policy contexts of aging including the opportunity that an aging society presents. COSA Gerontology Certificate students develop skills to work with task groups, programs, organizations, and communities to serve older adults and their families. The certificate offers a focus on leadership and advocacy.

Students complete COSA specialization requirements as well as those of the certificate. COSA students pursuing this certificate complete 12 course credits and 12 practicum credits focused on serving older adults and their families.

Certificate Requirements

2nd Level Gerontology Courses

- SWBEH 2060 - HUMAN BEHAVIOR: HEALTH & AGING
- SWWEL 2050 - POLICY ANALYSIS AND PRACTICE: HEALTH AND AGING SYSTEMS

COSA Skills Electives

Students must select two electives from this list and complete a project or assignment with gerontology with a focus in each of their selective electives. Students must submit a form with information about the assignment and topic to the Certificate Chair:

- SWCOSA 2040 - GRANT PROPOSAL WRITING
- SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
- SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT
- SWCOSA 2086 - MANAGING FINANCIAL AND HUMAN RESOURCES

Practicum

The COSA specialization practicum placement (SWCOSA 2099; 12 credits - 720 clock hours) must be in a program, unit, or agency that has a primary focus on aging. COSA students work with programs, organizations, or community groups that serve older adults. These options include, but are not limited to, long-term facilities, hospitals, hospices, area agencies on aging, community-based family service agencies, senior centers, residential settings, mental health settings, advocacy organizations, and community-based specialized day health centers that have activities relevant to the student's specialization and interests.

COSA Human Services Management Certificate

The **COSA Human Services Management Certificate** prepares students to pursue leadership opportunities in supervisory, management, and executive positions in a range of social work settings. Pitt School of Social Work is one of a number of leading macro social work programs to offer a management certificate in collaboration with the Network for Social Work Management (NSWM), a national organization supporting education and practice for human services management competency. Students pursuing this certificate must complete 12 credits covering NSWM competencies (https://socialworkmanager.org/competencies) in the areas of:

- Social Administration/Human Services Management
- Community Organizing and Community Collaboration
- Human Resources & Financial Management with Supervision
- Grants, Proposals, and Funding Development

Students complete COSA specialization requirements as well as those of the certificate. COSA students pursuing this certificate complete 12 course credits and 12 practicum credits in the areas of executive leadership; resource management; strategic management and community collaboration. Students must complete a COSA specialization practicum placement in a community-based or human services organization to apply course knowledge, values, and skills in the organizational setting.

Certificate Requirements

COSA Skills Courses

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

COSA Skills Electives

- SWCOSA 2086 - MANAGING FINANCIAL AND HUMAN RESOURCES
- SWCOSA 2040 - GRANT PROPOSAL WRITING

Practicum

The COSA specialization practicum placement (SWCOSA 2099; 12 credits - 720 clock hours) must be in a community-based or human services organization. This may be a private nonprofit organization or a public/government organization.

DP-Children, Youth, & Families Certificate

The **DP Children, Youth, and Families Certificate** prepares students to provide services and interventions to children, youth, young adults, and families through a wide range of public and private settings.

Students complete Direct Practice specialization requirements as well as those of the certificate. DP students in this certificate complete 12 course credits and 12 practicum credits focused on children, youth and families

Required Courses

- SWWEL 2059 - CHILD AND FAMILY POLICY
- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK

Direct Practice Skill Electives

Students must complete two courses from the following list:

- SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES
- SWINT 2035 - INTIMATE PARTNER VIOLENCE
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
- SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
- SWINT 2063 - ISSUES IN CHILD MALTREATMENT
- SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS

Practicum

The DP specialization practicum placement (SWINT 2099; 12 credits - 720 clock hours) must be in a community-based setting (program, unit, or agency) with a primary focus on providing direct services and interventions to children, youth, young adults, and families. This may be within a public agency or a private provider agency.

DP-Gerontology Certificate

The **DP Gerontology Certificate** prepares students with the knowledge and skills necessary to work and innovate in an aging society. An aging focus area has been a part of the school's curriculum since 1980. The goals of the DP-Gerontology Certificate are to enhance students' understanding of the aging process and to provide them with the specialized skills relevant to practice with and/or on behalf of older adults and their family members. Knowing how to work with older adults and their family members as a social work professional offers many opportunities in an era when that segment of the population continues to increase rapidly.

Students complete Direct Practice specialization requirements as well as those of the certificate. DP students in this certificate complete 12 course credits and 12 practicum credits focused on aging. Students must complete a DP specialization practicum placement in a program, unit, agency, or community with a primary focus on aging.

Certificate Requirements

DP Second-Level HBSE

- SWBEH 2060 - HUMAN BEHAVIOR: HEALTH & AGING

DP Second-Level Policy

- SWWEL 2050 - POLICY ANALYSIS AND PRACTICE: HEALTH AND AGING SYSTEMS

Required DP Skill Elective

Students also must complete the following course:

- SWINT 2030 - DIRECT PRACTICE WITH OLDER ADULTS

DP Skills Electives

Students also must complete one of the following four courses:

- SWINT 2007 - INTRO PSYPHMCLGY SOCL WRK PRACT
- SWINT 2004 - GRIEF AND LOSS: INTERVENTIONS, IMPLICATIONS & UNDERSTANDING

- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
- SWINT 2073 - INTEGRATED HEALTHCARE AND PHARMACOLOGY

Practicum

The DP specialization practicum placement (SWINT 2099; 12 credits - 720 clock hours) must be in a program, unit, or agency that has a primary focus on aging. Placement options include, but are not limited to, long-term facilities, hospitals, hospices, area agencies on aging, community-based family service agencies, senior centers, residential settings, mental health settings, advocacy organizations, and community-based specialized day health centers that have activities relevant to the student's specialization.

DP-Home and School Visitor/ School Social Worker Certificate

The **Home and School Visitor/ School Social Work Certificate** enhances professional competency in the development and delivery of high-quality social work services to diverse student populations in both public and private elementary and secondary schools. The HSV/SSW is an interprofessional Educational Specialist certificate, operated jointly with University of Pittsburgh School of Education and by the Pennsylvania Department of Education, intended for students who plan to deliver social work services in elementary or secondary schools.

In the Commonwealth of Pennsylvania, the HSV/SSW state certificates are recognized and required by school districts. In the 1930s, the School of Social Work was the first university to offer a Home and School Visitor certificate, a program started by Pitt faculty member and social work practitioner Marion Hathway.

Students complete Direct Practice specialization requirements as well as those of the certificate. DP students in this certificate complete 15 course credits, including four courses from the School of Education, and 12 practicum credits focused on school social work.

DP Second-Level HBSE

- SWWEL 2059 - CHILD AND FAMILY POLICY

DP Second-Level Policy:

- SWWEL 2059 - CHILD AND FAMILY POLICY

Direct Practice Skill Elective

Students must complete the following course:

- SWINT 2058 - SOCIAL WORK EDUCATIONAL SETTINGS

Required School of Education Courses

- TLL 2101 - PENNSYLVANIA SCHOOL LAW
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2500 - FOUNDATIONS OF SPECIAL EDUC
- TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM

- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

Practicum

The DP specialization practicum placement (SWINT 2099; 12 credits - 720 clock hours) must be in an educational setting.

DP-Integrated Health Care Certificate

The **DP Integrated Health Care Certificate** prepares students with the knowledge and skills necessary to work with individuals, families, groups, and communities in a variety of institutional and community-based health-related settings. With a focus on preparing students to deliver evidence-informed services to diverse client populations, the goal of the DP-Integrated Healthcare Certificate is to increase the number of advanced social work professionals capable of providing direct client care as well as leadership and advocacy to eliminate health inequities and to improve the health of all people. MSW students completing the DP-Integrated Healthcare Certificate program acquire a deeper understanding of the relationship between behavioral health (i.e., mental health, substance use) and physical health and the impact of larger social systems on that relationship; they also develop the skills to act on that knowledge to create positive health outcomes.

Students complete Direct Practice specialization requirements as well as those of the certificate. DP students in this certificate complete 12 course credits and 12 practicum credits focused on integrated healthcare.

Certificate Requirements

DP Second-Level HBSE

- SWBEH 2060 - HUMAN BEHAVIOR: HEALTH & AGING

DP Second-Level Policy

- SWWEL 2050 - POLICY ANALYSIS AND PRACTICE: HEALTH AND AGING SYSTEMS

DP Skill Electives

Students must complete the following course:

- SWINT 2040 - SOCIAL WORK DIRECT PRACTICE: HEALTH AND AGING

DP Skill Electives

Students must also complete one of the following two courses:

- SWINT 2007 - INTRO PSYPHMCLGY SOCL WRK PRACT
- SWINT 2073 - INTEGRATED HEALTHCARE AND PHARMACOLOGY

DP Skill Electives

Students completing the IHC certificate are encouraged to consider the following electives as they are often beneficial for practice in integrated health settings. These are not required:

- SWINT 2004 - GRIEF AND LOSS: INTERVENTIONS, IMPLICATIONS & UNDERSTANDING
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS

Practicum

The DP specialization practicum placement (SWINT 2099; 12 credits - 720 clock hours) must be completed in a program, unit, or agency with a primary focus on direct practice related to healthcare.

DP-Mental Health Certificate

The **DP Mental Health Certificate** prepares students for professional practice with individuals, families, and/or small groups who experience mental health/behavioral health challenges. Social work practice in mental health services, or what used to be referred to as "psychiatric social work," is a long-standing area of practice in the profession. Social workers today are the primary providers of services to clients with mental health needs, particularly in resource poor areas.

Students complete Direct Practice specialization requirements as well as those of the certificate. DP students in this certificate complete 12 course credits and 12 practicum credits focused on mental health.

Certificate Requirements

DP Second-Level HBSE

- SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH

DP Second-Level Policy

- SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY

DP Skill Electives

- SWINT 2007 - INTRO PSYPHMCLGY SOCL WRK PRACT
- SWINT 2018 - CLINICAL SKILLS IN SOCIAL WORK PRACTICE FOR MENTAL HEALTH RECOVERY
- SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS
- SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
- SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS
- SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL
- SWINT 2033 - ADV DRCT PRAC: PSYCHODYNAMIC

Practicum

The DP specialization practicum placement (SWINT 2099; 12 credits - 720 clock hours) must be in a mental/behavioral health setting working with individuals, families and/or small groups who face challenges associated with mental health or other behavioral health-related issues. This may be a public agency or a private provider agency, excluding private practice type settings.

Master's

Social Work - Community, Organization, and Social Action, MSW

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). After completing Generalist curriculum requirements (or receiving the equivalent social work Advanced Standing credit), MSW students are required to complete class and practicum requirements for one of these two areas of specialized practice.

The Community, Organization, and Social Action (COSA) specialization develops advanced knowledge and skills required for leadership careers in community human services, community development, and community change/social policy practice as professional social workers. COSA students acquire the ability to engage, assess, intervene, and evaluate practice with groups, organizations, and communities, incorporating evidence-informed approaches; a deep and abiding respect for diversity and difference; an emphasis on the strengths, assets, and empowerment of client systems; and a commitment to the social work profession's values. Students develop specialized skills in community organizing and mobilization as well as organizational management and administration, bringing an understanding of how social work practice can contribute to securing human rights and social,

economic, and environmental justice for all people. They also hone their critical thinking and self-reflective skills through their practicum and coursework.

The University of Pittsburgh School of Social Work has the first and longest-standing program in Community Organizing (CO) in any social work or professional school in the country. In fall 1958, the School launched its first two-year curriculum in Community Organizing (read more about the history of our community organizing program). Pitt was also one of the first schools of social work to offer a focus in social administration, now more commonly called human services or social work management.

Graduates pursue established and emerging professional opportunities in public, private, profit, nonprofit and community-based organizations in such fields as health, children and youth, family services, disability services, community revitalization and development, philanthropy, policy and advocacy, community and social planning, community/neighborhood centers, human resources and community affairs, and more. In COSA, we see our work as:

- Community Organizing, Planning, Development, and Change
- Organizational Leadership and Human Services Management
- Social Policy & Advocacy Practice in the Social Policy Arena
- Action as Activist social workers leading change in communities, organizations, & policy arenas

The COSA specialization is offered to MSW students in our Face-to-Face program option.

Certificates

COSA students may choose to pursue a certificate to acquire greater depth of knowledge and skills in a particular practice focus area:

- Community Organizing and Practice
- Gerontology
- Human Services Management

Each COSA certificate incorporates courses and field placement experiences that enable students to tailor their education and professional preparation. To earn a COSA certificate, students must fulfill all specialized COSA requirements, as well as those of their certificate.

COSA students are not required to pursue a certificate. In fact, some students may have practice goals that do not neatly fit into any of the certificates and may benefit from planning a unique course of study within the requirements of the COSA specialization with their academic advisor.

Curriculum

The COSA specialization requires two COSA Skills Courses, a COSA human behavior course, a COSA policy analysis course, and an advanced applied research course. Students also complete two COSA skills electives and two open electives. They develop practice skills through twelve (12) credit hours of specialized COSA practicum.

Required Core Generalist Courses

- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVRNMNT
- SWWEL 2081 - SOCIAL WELFARE
- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2099 - GENERALIST FIELDWORK

Required Specialization Courses

COSA Skills

- SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT

MSW Courses

Social Work - Direct Practice with Individuals, Families, and Groups, MSW

The MSW Program at the School of Social Work is accredited to offer two advanced specializations: Direct Practice with Individuals, Families, and Small Groups (DP) and Community, Organization, and Social Action (COSA). After completing Generalist curriculum requirements (or receiving the equivalent social work Advanced Standing credit), MSW students are required to complete class and practicum requirements for one of these two areas of specialized practice.

The **Direct Practice (DP)** specialization develops students' advanced practice skills to prepare them for autonomous practice, grounded in the values and ethics of the social work profession using a strengths-based, person-in-the-environment perspective. Through course work and practicum education, students are equipped with the knowledge and skills needed to engage in direct practice with individuals, families, and small groups with diverse backgrounds and identities. The specialization focuses on evidence-based modalities and provides students with community-based learning opportunities. Consistent with an emphasis on strengths perspective, students become skilled at assisting clients/patients/consumers to address their needs and realize their potential.

The Direct Practice specialization is offered to MSW students in both our Face-to-Face and Online program options.

Certificates

Direct Practice students may choose to pursue a certificate to acquire greater depth of knowledge and skills in a particular practice focus area:

- Children, Youth and Families
- Gerontology
- Home and School Visitor/School Social Work
- Integrated Health Certificate
- Mental Health

Each Direct Practice certificate incorporates courses and field placement experiences that enable students to tailor their education and professional preparation. To earn a DP certificate, students must fulfill all specialized direct practice requirements, as well as those of their certificate.

Direct Practice students are not required to pursue a certificate. In fact, some students may have practice goals that do not neatly fit into any of the certificates and may benefit from planning a unique course of study within the requirements of the DP specialization with their academic advisor.

Curriculum

The Direct Practice specialization requires two Direct Practice Skills Courses, a DP human behavior course, a DP policy analysis course, and an advanced applied research course. Students also complete two DP skills electives and two open electives. They develop practice skills through twelve (12) credit hours of specialized direct practice practicum.

Required Core Generalist Courses

- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVRNMNT
- SWWEL 2081 - SOCIAL WELFARE
- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2099 - GENERALIST FIELDWORK

Required Specialization Courses

Direct Practice Skills

- SWINT 2021 - DIRECT PRACTICE WITH FAMILIES AND GROUPS
- SWINT 2020 - DIRECT PRACTICE WITH INDIVIDUALS

Second-Level HBSE

- SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK
- SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH

Second-Level Policy:

- SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY
- SWWEL 2059 - CHILD AND FAMILY POLICY

Second-Level Research

- SWRES 2040 - ADVANCED APPLIED RESEARCH

Practicum Placement

- SWINT 2099 - FIELD WORK

PhD in Social Work Program

We are committed to training the next generation of scholars in social work, whose research will inform policy and practice addressing society's most pressing problems.

Doctoral education in Social Work prepares students for leadership roles in social work research, social work education, social policy, planning, and administration. We provide students with advanced academic training that will allow them to contribute to the knowledge base of our profession.

Our faculty includes nationally recognized leaders in every area of social work practice and research, and we take a hands-on, supportive approach to doctoral education.

The doctoral program is open to applicants who have demonstrated intellectual capacity, critical thinking skills, and potential for research and scholarship.

Why Pitt?

- Nationally recognized leaders in every area of social work practice and research

- Supportive, hands-on approach to doctoral education
- Opportunities to collaborate through three world-class centers that address race and social problems, behavioral health practice in community settings, and child welfare

The University of Pittsburgh's social work doctoral program is among the oldest and most-respected in the United States. Our full time program is highly competitive, and we accept 6-8 students each year. Our wonderful Social Work Library is part of Pitt's world-class University Library System.

The doctoral program is open to applicants who have demonstrated intellectual capacity, critical thinking skills, and potential for research and scholarship.

Please visit our PhD Admissions webpage for admissions-related information.

In addition to the description of the PhD in Social Work given below, doctoral students should consult the Regulations Pertaining to Doctoral Degrees in the General Academic Regulations section of this document.

Admission to Doctoral Program

Persons seeking admission to the PhD Program must demonstrate the potential for doctoral studies. All applicants to the Doctoral Program in Social Work must provide the following:

- Completion of the PhD Application.
- Official copies of all official undergraduate and graduate transcripts.
- Personal Statement:
- Why do you want to pursue a social work PhD?
- Describe your experiences with research and how they prepared you for pursuing a PhD.
- What research questions or social issues do you want to study?
- How might you approach studying them?
- Describe why Pitt SSW would be a good place for you to pursue your research interests. Note potential faculty mentors at Pitt and other campus resources you might engage.
- What career would you like to pursue?
- How will a social work PhD contribute to your career goals?
- Social Justice Statement:
- What aspects of your personal and/or professional history have informed how you have come to understand social justice?
- How does your history and understanding of social justice connect to your career goals?
- Anti-racism and anti-oppression are core values in the Pitt SSW. How do you see your time in the Pitt SSW PhD program, current and/or future work (eg. research, teaching, mentoring, community organizing, advocacy, activism, etc.) as aligning with anti-racist and anti-oppressive praxis?
- Writing sample: Please provide a writing sample that is solely authored by you. You may choose anything that will show us that you can write clearly and coherently about topics relevant to social work, ideally research topics relevant to social work. Your writing sample should be approximately ten to fifteen pages.
- Three letters of reference from professors and persons who have known the applicant in a professional capacity. Do not include personal references.
- We require a course-by-course evaluation completed for any internaitonal college courses taken. An evaluation is also needed for any transcripts not provided in English. We accept evaluations form any members of the National Association of Credential Evaluation Services (NACES) organization. Find a list of NACES members.
- $50 application fee.

Apply to the School of Social Work PhD Program

Application components should be sent to:

Admission to the program is for the fall term only and the deadline for the application is December 15. To apply to the program, please access our online application. Log into your online application frequently to monitor your progress.

Certificate in Gender, Sexuality, and Women's Studies

In addition, the University Of Pittsburgh School Of Social Work is one of a few schools to offer doctoral students the option to simultaneously obtain a certificate in Certificate in Gender, Sexuality, and Women's Studies and a PhD in social work.

This certificate is based on a strong interdisciplinary program focusing on new scholarship concerning women and gender. The University of Pittsburgh Gender, Sexuality, and Women's Studies Program provides opportunities for students to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

Program Transfer Credits

Students who have earned doctoral-level credits at the University of Pittsburgh or at another accredited institution within seven years preceding entry to the doctoral program may be eligible for advanced standing. Advanced standing consists of awarding academic credit toward the degree for post-master's work completed when such work is evaluated as entirely comparable. Official transcripts certifying graduate course work completed in a degree-granting graduate program should be submitted at the time of application. The maximum number of credits that can be transferred and accepted for advanced standing is 12.

See Allowable Credits in the General Academic Regulations section of this bulletin for more details on requirements for transfer credits.

Doctoral Curriculum Objectives

The program curriculum strongly emphasizes social problem areas, as well as coordinating themes in theory, research methodology, and social policy courses. The overall goal is to integrate the acquisition of basic advanced knowledge, methods of empirical testing, and

application to real-world situations. Course materials draw heavily on several priority areas of social work concern, including aging, mental health, income maintenance, child welfare, women's issues, child and family policy, and health services, and social justice. diversity issues.

By the time students have completed the program, they should have acquired the following:

- Knowledge of relevant social science theory
- Advanced skills in research methodology and statistics
- Advanced knowledge of social welfare policy (historical and contemporary) and policy analysis
- Knowledge of relevant fields of practice, theoretical and policy perspectives, and research findings
- Exposure to an interdisciplinary frame of reference through mechanisms provided internally by the doctoral program and externally through access to other disciplines and professions in the wider University

Although entering students are not required to have completed course work or other experience relevant to computer literacy, possessing basic computer skills will be an asset to students beginning the program.

PhD in Social Work Program

We are committed to training the next generation of scholars in social work, whose research will inform policy and practice addressing society's most pressing problems.

A doctoral education in Social Work prepares students for leadership roles in social work research, social work education, social policy, planning, and administration. We provide students with advanced academic training that will allow them to contribute to the knowledge base of our profession.

Our faculty includes nationally recognized leaders in every area of social work practice and research, and we take a hands-on, supportive approach to doctoral education.

The doctoral program is open to applicants who have demonstrated intellectual capacity, critical thinking skills, and potential for research and scholarship.

Why Pitt?

- Nationally recognized leaders in every area of social work practice and research
- Supportive, hands-on approach to doctoral education
- Opportunities to collaborate through world-class centers that address race and social problems, behavioral health practice in community settings, and child welfare

The University of Pittsburgh's social work doctoral program is among the oldest and most respected in the United States. Our program is highly competitive. Our wonderful Social Work Library is part of Pitt's world-class University Library System.

PhD Curriculum Objectives

The program curriculum strongly emphasizes social problem areas, as well as coordinating themes in theory, research methodology, and social policy courses. The overall goal is to integrate the acquisition of advanced knowledge, research methods, and application to real-world situations. Course materials focus on several priority areas of social work concern, including aging, mental health, income inequality, child welfare, child and family policy, health services, and social justice.

By the time students have completed the program, they should have acquired the following:

- Knowledge of relevant social science theory
- Advanced skills in research methodology and statistics
- Advanced knowledge of social welfare policy (historical and contemporary) and policy analysis
- Knowledge of relevant fields of practice, theoretical and policy perspectives, and research findings
- Exposure to an interdisciplinary frame of reference through mechanisms provided internally by the doctoral program and externally through access to other disciplines and professions in the wider University

PhD Degree Requirements

The PhD program consists of the completion of 50 credit hours of coursework, a comprehensive exam, a doctoral dissertation, and the successful defense of the dissertation with all revisions completed.

Coursework

During the first two academic years in the program, full-time students complete required courses in the three essential areas of study: social welfare/policy, social science theory, and research methods. Students take courses in the fall and spring terms; summer courses are necessary if a student is enrolled in one of our joint degree programs .

Comprehensive Examination

Students take a comprehensive examination after satisfactory completion of all required and elective coursework in the doctoral program. The Comprehensive examination is taken in the summer of the second year. For students in the MSW/PhD program, the comprehensive examination is taken in the summer of the 3rd year. Students may delay the examination for one year, contingent on approval by the PhD Program Director based on a request in writing submitted by the student that outlines the rationale for the requested delay.

Doctoral Dissertation

Students must successfully complete the comprehensive examination to proceed to the dissertation. The doctoral dissertation involves:

- Dissertation Research: begins after passing the comprehensive examination
- Defense of a Dissertation Overview: occurs after a committee review of the dissertation overview and includes an introduction to the problem, a literature review, and a detailed methodology (admission to PhD candidacy)
- Final Dissertation Defense: occurs at least one year following admission to candidacy

A minimum of two years of full-time study is required for doctoral program completion.

Statute of Limitations

There is an eight-year statute of limitations for the completion of the PhD degree for students who enter with an MSW and who are not pursuing an MPH. There is a 10-year statute of limitations for students in the MSW/PhD program or the MPH/PhD program. Coursework and the comprehensive examination should be completed within five years and the dissertation within three additional years.

Under exceptional circumstances, candidates may apply for an extension of the statute of limitations. The student must submit a formal written request to the doctoral program director, and the request must be reviewed and approved by the doctoral program committee and

then submitted to the dean for final action. Requests for extensions must be accompanied by a departmental assessment of the work required of the student to complete the degree, as well as documented evidence of the extenuating circumstances leading to the request. Students who request an extension of the statute of limitations must demonstrate a feasible plan and timeline for the completion of all current degree requirements.

PhD Curriculum

Required Research Methods Courses

- SWRES 3020 - RESEARCH METHODS
- SWRES 3029 - INFERENTIAL STATISTICS FOR SOCIAL WORKERS
- SWRES 3021 - MULTIVARIATE STATISTICS
- SWRES 3022 - RESEARCH METHODS: CAPSTONE SEMINAR 1
- SWRES 3023 - RESEARCH METHODS: CAPSTONE SEMINAR 2
- SWRES 3097 - QUALITATIVE RESEARCH
- DOCTORAL SEMINAR - 0 credits

Required Theory Courses

- SWGEN 3044 - THEORY 1
- SWGEN 3053 - THEORY 2

Required Policy Courses

- SWWEL 3030 - EVALUATION OF AMERICAN SOCIAL WELFARE HISTORY
- SWWEL 3037 - SOCIAL POLICY ANALYSIS

Required Education Course

- SWGEN 3066 - SEMINAR IN SOCIAL WORK EDUCATION

Elective Courses

In addition to the above core course requirements, the student selects a minimum of 18 elective course credits to pursue more specialized interests. These electives must be graduate-level courses and meet the following requirements:

- 3 credit Research Methods elective (select from offerings outside the School)
- 3 credit Advanced Data Analysis or Statistics elective (select from offerings outside the School)
- 3 credit Advanced Policy elective (select from offerings in or outside of the School)
- 9 credits of open electives

Although some doctoral elective courses may be offered within Social Work, students are encouraged to take relevant course work from graduate programs in other schools and departments at the University. Many social welfare-related fields are open: sociology, economics, women's studies, political science, law, urban affairs, public health, and others. Students may take no more than two MSW courses for elective credit. All electives must be approved by the student's advisor as contributing to the student's area of specialization.

Certificate in Gender, Sexuality, and Women's Studies

The University of Pittsburgh School of Social Work is one of a few schools to offer doctoral students the option to simultaneously obtain a certificate in Certificate in Gender, Sexuality, and Women's Studies and a PhD in social work.

This certificate is based on a strong interdisciplinary program focusing on scholarship concerning women and gender. The University of Pittsburgh Gender, Sexuality, and Women's Studies Program provides opportunities for students to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

Grades in Course Work

A grade point average of 3.00 or better in all course work is required in the PhD program. A student is automatically placed on probation whenever their cumulative GPA falls below 3.00. A student on probation is not eligible to take the comprehensive examination.

A student who receives a grade of B- or lower in a required course must repeat the course. Students with two grades of C+ or lower in elective and/or required courses will be referred to the doctoral program committee.

Cooperative Degrees Program

Dual/Joint/Cooperative Degrees

Some students seek to complement their social work education and training by earning a degree in another discipline or profession. Others wish to further their education within the field of social work. The dual, joint, and cooperative degree programs offered by the University of Pittsburgh School of Social Work afford students a unique way to complete their MSW studies while also pursuing another graduate degree.

No student will be permitted to enroll or engage in more than one dual, joint, or cooperative degree program within the School of Social Work or between the School of Social Work and any other school or program during the course of earning that dual, joint, or cooperative degree.

Master of Social Work/Master of Business Administration

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the Joseph M. Katz Graduate School of Business.

Adjusting to Market Demands

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

The MSW/MBA dual-degree program is only available for students in the SSW's Community Organization and Social Action (COSA) program.

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools. Specific questions may be addressed to:

Daniel Rosen
Professor
School of Social Work
University of Pittsburgh
2117 Cathedral of Learning
Pittsburgh, PA 15260
Email address: dar15@pitt.edu

Requests for further information concerning the Katz Graduate School of Business, see http://www.business.pitt.edu. Specific questions may be addressed to:

Dr. Rabikar Chatterjee, Ph.D.
Associate Dean
Katz Graduate School of Business
University of Pittsburgh
301 Mervis Hall
Pittsburgh, PA 15260
Email address: rabikar@katz.pitt.edu

MSW/MBA Joint Degree Admissions Criteria

A. SSW Requirement

- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.
- Undergraduate students with social work and human service backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).

- Paid work experience is preferred but not required.

- GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business (KGSB), by the admission deadline.

- Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.

- Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)

- Applicants will submit their current resume.

- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)-- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.

- Non-refundable application fee is $40.

- Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.

- Submission of online MSW application form by the admissions deadline data of **May 31**.

B. Katz GSB Requirement

- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.
- Undergraduate students with strong analytical backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Work experience is not necessary, though highly desirable.

- GMAT/GRE scores: Applicants must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business, by the admission deadline. In general, we would expect a GMAT score of 600 or higher for admission. (Corresponding GRE scores will be equivalent to these levels, after conversion.).

- Applicants will submit a 250 word essay describing their post-graduate career goals, skills in which they excel, and key accomplishments.

- Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)

- Applicants will submit their current resume.

- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
- TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
- IELTS Minimum acceptable score: 7.0

- $50 non-refundable application fee.

- Prospective candidates, domestic or international, may be interviewed before admission, in person or by Skype.

Learning Outcome Goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

- Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.

- Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.

- Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.

- To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program Requirements

- A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.

- The MBA program requires 51 credits for the part-time or one-year program, of which at least 34 credits must be from KGSB courses, while the balance maximum of 17 credits may be from other graduate programs.

- The following MBA "core" courses (total of 22. 5 credits) are required:
- BACC 2401 Financial Accounting (3 credits)
- BECN 2401 Economic Analysis for Managerial Decisions (3 credits)
- BQOM 2401 Statistical Analysis (3 credits)
- BFIN 2409 Financial Management 1 (1.5 credits)
- BMKT 2409 Marketing Management (1.5 credits)
- BOAH 2409 Organizational Behavior (1.5 credits)
- BQOM 2421 Decision Technologies (1.5 credits)
- BSPP 2409 Strategic Management (1.5 credits)
- BMIS 2409 Information Systems (1.5 credits)
- BSEO 2401 Business Ethics & Social Performance (1.5 credits)
- BIND 2444 Management Simulation Capstone (3 credits)

- All MSW/MBA joint degree students will be required to take at least 34.5 credits of KGSB credits, consisting of the above 22.5 credits of core courses plus an additional 12 credits of KGSB electives. Thus, up to 16.5 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 51 credits required for the completion of the Katz MBA degree.

- All MSW/MBA joint degree students will be required to take a course entitled Social Entrepreneurship (1.5 credits) from the KGSB.

- The following KGSB courses will count as credits towards the MSW degree:
- BACC-2401 Financial Accounting (3 credits) will qualify as equivalent to SWCOSA-2085 Financial Management (3 credits), and will count as 3 credits for both the MSW and MBA programs,
- BOAH-2409 Organizational Behavior (1.5 credits) and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
- SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN-2401 Economic Analysis for Managerial Decisions, 3 credits), which will count as 3 credits for both the MSW and MBA programs, and
- SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g., BIND-2444 Competitive Management Simulation, 3 credits), which will count as 3 credits for both the MSW and MBA programs.

Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two degree programs separately.

- It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will

count towards completion of the MSW program.

- Thus, full-time COSA students with advanced standing must earn grand total of 64.5 credits for CO students, and 61.5 credits for SA students (adding all MSW and MBA courses). This means total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

- Full-time COSA students **without** advanced standing must earn grand total of 85.5 credits for CO students, and 82.5 credits for SA students (adding all MSW and MBA courses). This means total of 51 social work credits to be taken by CO students and 48 credits to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

Master of Social Work/Master of Divinity

Pittsburgh Theological Seminary and the Graduate School of Social Work at the University of Pittsburgh present the unique opportunity to receive a joint degree in Master of Divinity (M.Div.) and Master of Social Work (M.S.W.) for those students passionate about pursuing their call to social work both inside and outside of a church setting.

What Makes Us Special?

As the oldest continuous joint degree program in the country, established in 1967, the MDiv/ MSW joint Masters degree program allows students to complete their coursework and graduate in four years of post-baccalaureate study instead of the usual five. Within the joint program students will still be provided a full course of study in both theology and social work, along with the academic support and one-on-one attention given by our excellent faculty. In order not to skip any required courses and still graduate in the four years, the MDiv/MSW program counts certain courses taught in one school as electives in the other and vice-versa, along with developing specialized practicum placements.

Who Is This Program For?

This joint masters program is built for those seeking to integrate their love of theology with their heart for social work and to make a change, along with those interested in pursuing a career in pastoral counseling or other forms of counseling. Positions that have been held by MDiv/MSW graduates in the past include: chaplain/clinical pastoral education supervisor for a health care facility, associate director of campus ministry, chaplain/chair committee holder at a nursing home, executive director of a pastoral institute, Christian counseling, various work with nonprofits, and so many more.

With the Seminary's campus located in the East Liberty / Highland Park neighborhood of Pittsburgh, PTS is within driving distance of other cities in Pennsylvania like Johnstown, Harrisburg, Philadelphia, State College, Allentown, Scranton, and other rural regions as well. Pitt classes meet at the University of Pittsburgh in Oakland.

How the MDiv/MSW Degree Works

Candidates for the joint degree who enter the program through the Seminary will concentrate on theological studies during the first two years. Application should be made to the University of Pittsburgh Graduate School of Social Work during the first term of the second year at the Seminary. The third and fourth years will be spent predominantly at the School of Social Work. Being that degrees in the joint program will be awarded concurrently, it is important to note that a student who resigns from one program will be subject to all requirements for graduation from the remaining degree program.

The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

Please note that you will also need to complete an application with the Pittsburgh Theological Seminary.

After earning her joint Master of Divinity/Master of Social Work degrees in 2005 from Pittsburgh Theological Seminary and the University of Pittsburgh, alumna Elizabeth Trexler went on to be a missionary in Southeast Asia and then served as associate director of Catholic

campus ministry at Bloomsburg University. She says, "The joint degree program with masters in social work and masters in divinity is something that you can't put a price on. It just works so well together."

MDiv Program Curriculum Sequence

Courses are generally three credit hours. When followed on a full-time basis (12-13 credits), the program is completed in three academic years. Student pastors are encouraged to spread their degree work over four academic years.

Joint Degree Programs with the Graduate School of Public and International Affairs

- Master of Social Work/Master of Public Administration
- Master of Social Work/Master of Public and International Affairs
- MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Graduate School of Public and International Affairs

Complex and emerging issues influence us, our towns, our countries, and our world: Fair housing. Economic and community development. Environmental sustainability. Emergency preparedness. Disaster response. Human rights. International security.

We live in a world both illuminated by great hope and darkened by great conflict. Make a difference and take the lead. Prepare yourself with a comprehensive education from the Graduate School of Public and International Affairs (GSPIA) at the University of Pittsburgh.

Your academic options begin with GSPIA's integrated academic structure of three distinct master's degree programs offering eight different majors. Master of Social Work/Doctor of Philosophy in Social Work

An MSW degree from an accredited school of social work is required to be considered for admission to the PhD program. Applicants without an MSW degree who wish to pursue a social work academic career may apply to the joint MSW/PhD program. Such applicants typically are interested in grounding themselves in the practice base of the social work profession, while also seeking to develop their advanced research and teaching skills. Preference is given to MSW/PhD applicants who have prior social work-related professional experience.

Separate applications are required for admission to each program. Those seeking further information regarding this dual degree program are encouraged to contact SSWPhDAdmissions@pitt.edu

Master of Social Work/Public Health

What is the MSW/MPH joint degree program?

The joint degree program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both a Master of Social Work and Master of Public Health degrees and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community. Students participate in class work, practicum placements, and leadership seminars to acquire the knowledge and skills to address health problems.

White Paper Stemming from the National Public Health Social Work Summit

What principles guide this program?

The program has a strong commitment to social justice, the elimination of health disparities, and a holistic definition of community and population health, including individuals' physical health conditions and the behavioral and social ecological determinants of health. Moreover, both social work and public health share a commitment to involving consumers/community members in the development of policies and in the planning, delivery and evaluation of health promotion interventions, health behavior change, and health education.

What are the advantages of the program?

- Students develop knowledge, values and skills for *both* professional social work practice and (e.g. direct practice or community organization/social administration) and community public health practice (e.g. primary, secondary, and tertiary prevention).
- Advising and mentoring focuses on supporting students to achieve their professional goals (e.g., selection of practicum placements, papers written as part of course-work, leadership training activities, focus of final thesis/essay in the MPH program).
- Students increase their career marketability as a result of being able to work from a cross disciplinary perspective. Students have gone on to jobs, for example, in various social service organizations, health departments, other government agencies, academic institutions, think tanks, and the Centers for Disease Control and Prevention.

What competencies will individuals gain as a result of the program?

- Application of theoretical principles to primary, secondary, and tertiary health interventions targeting the promotion of health behavior change, enhancement of the environment, and the elimination of risk factors in neighborhoods and communities that contribute to disease and poor health status outcomes
- Application of principles of community-based participatory research and practice to community health assessment
- Application of quantitative and qualitative skills to program planning and evaluation research
- Processes involved in community health planning, program implementation, and program evaluation
- Written communication to inform the public, policymakers, and other key-stakeholders

- Develop skills in micro practice with individuals, families, and groups or macro practice

What are the requirements of the program?

Typically a three-year curriculum plan for Direct Practice or COSA (2.5 years for advanced standing students)

- MSW/MPH DP Course Requirements
- MSW/MPH COSA Course Requirements
- 33 Social Work credits (plus 18 practicum placement credits)
- 36 Public Health credits

Some highlights of the program are:

- 18 practicum placement credits representing two separate practicum placement experiences, foundation and concentration, coordinated by the School of Social Work, Office of Practicum Education.
- Several certification programs are offered at each School
- Public Health final essay or thesis

Note: Students register for two years (two fall and spring semesters) through the School of Social Work and one year (one fall and spring semester) through the Graduate School of Public Health. You are eligible for funding through the School of Social Work for a maximum of 2 years (these are the two years you register through that school). You must be registered for **at least 9 credits** in the School of Social Work during the two years you register in that school to be eligible for funding from the School of Social Work. **You must have both school advisors approve your course schedule each term. Your advisor in the School of Social Work will lift your "hold" to register each term.**

Application Process

Students must apply separately to the School of Social Work and the Graduate School of Public Health's Office of Admissions. The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application, and to apply to the Master's Degree of Public Health in Behavioral and Community Health Sciences, School of Public Health use online application.

Master of Social Work/Doctor of Philosophy in Social Work

An MSW degree from an accredited school of social work is required to be considered for admission to the PhD program. Applicants without an MSW degree who wish to pursue a social work academic career may apply to the joint MSW/PhD program. Such applicants typically are interested in grounding themselves in the practice base of the social work profession, while also seeking to develop their advanced research and teaching skills. Preference is given to MSW/PhD applicants who have prior social work-related professional experience.

Separate applications are required for admission to each program. Those seeking further information regarding this dual degree program are encouraged to contact SSWPhDAdmissions@pitt.edu

Joint Degree

Social Work, JD/MSW

Master of Social Work/Juris Doctorate

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of

legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

Neither degree may be granted prior to fulfillment of all requirements for the joint degree program.

Social Work, MID/MSW

Joint Degree Programs with the Graduate School of Public and International Affairs

Master of Social Work/Master of Public Administration
Master of Social Work/Master of Public and International Affairs
MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-

time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Social Work, MPH/MSW

MSW/MPH

MSW/Master of Public Health Program

What is the MSW/MPH joint degree program?

The joint degree program is collaboration between the School of Social Work and the School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both a Master of Social Work and Master of Public Health degrees and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community. Students participate in class work, field placements, and leadership seminars to acquire the knowledge and skills to address health problems.

White Paper Stemming from the National Public Health Social Work Summit

What principles guide this program?

The program has a strong commitment to social justice, the elimination of health disparities, and a holistic definition of community and population health, including individuals' physical health conditions and the behavioral and social ecological determinants of health. Moreover, both social work and public health share a commitment to involving consumers/community members in the development of policies and in the planning, delivery and evaluation of health promotion interventions, health behavior change, and health education.

What are the advantages of the program?

- Students develop knowledge, values and skills for *both* professional social work practice and (e.g. direct practice or community organization/social administration) and community public health practice (e.g. primary, secondary, and tertiary prevention).

- Advising and mentoring focuses on supporting students to achieve their professional goals (e.g., selection of field placements, papers written as part of course-work, leadership training activities, focus of final thesis/essay in the MPH program).

- Students increase their career marketability as a result of being able to work from a cross disciplinary perspective. Students have gone on to jobs, for example, in various social service organizations, health departments, other government agencies, academic institutions, think tanks, and the Centers for Disease Control and Prevention.

What competencies will individuals gain as a result of the program?

- Application of theoretical principles to primary, secondary, and tertiary health interventions targeting the promotion of health behavior change, enhancement of the environment, and the elimination of risk factors in neighborhoods and communities that contribute to disease and poor health status outcomes

- Application of principles of community-based participatory research and practice to community health assessment

- Application of quantitative and qualitative skills to program planning and evaluation research

- Processes involved in community health planning, program implementation, and program evaluation
- Written communication to inform the public, policymakers, and other key-stakeholders
- Develop skills in micro practice with individuals, families, and groups or macro practice

What are the requirements of the program?

Typically a three-year curriculum plan for Direct Practice or COSA (2.5 years for advanced standing students)

- MSW/ MPH DP Course Requirements
- MSW/MPH COSA Course Requirements
- 33 Social Work credits (plus 18 field placement credits) **NOTE: Beginning 2019-20 academic year, the required BCHS 2525 Applied Research Methods course(3crs.) fulfills the SWRES 2021 Foundation of Social Work Research course (3crs.) In addition, MSW/MPH students who are pursuing the IHC certification are not permitted to take SWBEH 2066HB as a second-level HBSE course. The content of SWBEH 2066HB significantly overlaps with the course content of BCHS2520. Students are required to choose another second-level HBSE course.**
- 36 Public Health credits

Some highlights of the program are:

- 18 field placement credits representing two separate field placement experiences, foundation and concentration, coordinated by the School of Social Work, Office of Field Education.
- Several certification programs are offered at each School
- Public Health final essay or thesis

Note: Students register for two years (two fall and spring semesters) through the School of Social Work and one year (one fall and spring semester) through the School of Public Health. You are eligible for funding through the School of Social Work for a maximum of 2 years (these are the two years you register through that school). You must be registered for **at least 9 credits** in the School of Social Work during the two years you register in that school to be eligible for funding from the School of Social Work. **You must have both school advisors approve your course schedule each term. Your advisor in the School of Social Work will lift your "hold" to register each term.**

What types of careers do graduates of the MSW/MPH joint degree program engage in?

- Patient Services Managers
- Research Scientist
- Policy Advocates
- Program Directors
- Communication Directors
- Adjunct and Part-time faculty in MSW and BSW degree programs
- Bridging the gap between the public's health and social work practice
- Program Planners

Application Process

Students must apply separately to the School of Social Work and the School of Public Health's Office of Admissions (GSPH). The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application, and to apply to the Master's Degree of Public Health in Behavioral and Community Health Sciences, School of Public Health (GSPH) use online application.

Social Work, MPH/PhD

The joint MPH/PhD program, is designed for social workers seeking administrative, policy, and/or academic positions.

Objectives

The program's overall educational objective is to train social workers for leadership positions in public health systems and prepare them for research and teaching posts.

This involves:

- a primary focus on populations at risk rather than individuals
- use of an interdisciplinary approach
- a focus on primary prevention of social and health problems
- reliance on systematic data collection and analysis for administrative decision making

The learning objectives include:

- Understanding incidence, prevalence, prevention, treatment, and epidemiological trends of the health and social needs of vulnerable populations
- Becoming aware of the health and social work systems available for prevention, treatment, and rehabilitation
- Understanding the interrelationship of the identified population-at-risk with other populations
- Understanding the impact of socioeconomic, racial, cultural, geographical, and financial factors on health service delivery and use
- Understanding the technical and legal issues related to service delivery to the population-at-risk
- Understanding the implications of legislation and policy on program funding, planning and development, and patterns of service delivery

It is expected that graduates also will be prepared through the educational experience to:

- Coordinate population specific health services within primary, secondary, and tertiary sites
- Develop social work consultation and training skills and apply them to interdisciplinary settings
- Use epidemiological data and statistics, and conduct community needs assessments to support program and policy development
- Prepare technical reports, proposals, and publications

Academic Curriculum

The MPH/PhD curriculum comprises core courses in public health and social work, with a heavy emphasis on research methods and statistics. The following list of courses is provided as an example, as the exact course requirements may vary by student.

GSPH Core & BCHS Core Courses (minimum 33 credits):

BIOST 2011 Principles of Statistical Reasoning (3 credits)
EOH 2013 Environmental & Occupational Health (2 credits)
EPID 2110 Principles of Epidemiology (3 credits)
HPM 2001 Health Policy & Management in Public Health (3 credits)
PUBHLT 2033 Foundations in Public Health (1 credit)
PUBHLT 2015 Public Health Biology (2 credits)

PUBHLT 2034 Public Health Communications (2 credits)

PUBHLT 2035 Applications in Public Health (2 credits)
BCHS 2520 Theories of Health Behavior and Health Education (1 credit)

BCHS 2992 Systems Theories and Approaches (1 credit)

BCHS 2990 Social Dynamics (1 credit)
BCHS 2525 Applied Research Methods (3 credits)

BCHS 2554 Intro to Community Health (3 credits)
BCHS 2521 Master's Essay/Thesis (1-3 credits)
BCHS 2503 Practicum (3 credits)

SSW Courses (50 credits):

SWRES 3029 Inferential Statistics (3 credits)
SWRES 3021 Multivariate Methods (4 credits)
SWRES 3020 Research Methods I (3 credits)
SWRES 3022 Capstone I (1 credit)
SWRES 3023 Capstone II (3 credits)
SWGEN 3053 Social Science Theory I (3 credits)
SWGEN 3044 Social Science Theory II (3 credits)
SWWEL 3030 Evaluation of American Social Welfare History and Policy (3 credits)
SWWEL 3037 Social Policy Analysis (3 credits)
SWGEN Seminar in Social Work Education (3 credits)
One additional policy course (2-3 credits)

One additional statistics course

One additional methods course

General electives (12 credits)

Frequently Asked Questions

How long does it take to complete the program?

It takes two to three years for the PhD/MPH course work, and approximately two additional years to complete doctoral research.

What are the research areas of the faculty?

Read about the School of Social Work faculty or visit the School of Public Health web site for information about faculty research interests.

Admissions

Those students seeking the MPH/PhD are admitted to both the School of Public Health **and** the School of Social Work as joint students. Therefore, applicants must also meet the admission requirements of the doctoral program of the School of Social Work, and formal applications must be submitted to **both** programs.

Those seeking further information regarding the requirements and processes for this joint degree program are encouraged to contact:

Valire Carr Copeland
Professor
School of Social Work
University of Pittsburgh
2117 Cathedral of Learning
Pittsburgh, PA 15260
Email address: sswvcc@pitt.edu

or

Steven M. Albert
Professor and Chair
Behavioral and Community Health Sciences
6126 Public Health
Pittsburgh, PA 15261
412-383-8693
smalbert@pitt.edu

Requirements:

This joint degree requires the completion of a minimum of 81 credits, a comprehensive examination and successful defense of a dissertation. Graduate Students in the joint MPH/PhD program generally apply 12 credits from the MPH curriculum toward their elective course work for the PhD.

Social Work, MPIA/MSW

Joint Degree Programs with the School of Public and International Affairs

Master of Social Work/Master of Public Administration
Master of Social Work/Master of Public and International Affairs
MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Social Work, MSW/MBA

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the Joseph M. Katz Graduate School of Business.

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students. Upon successful execution of this initiative, the school plans to open the program to all MSW full-time students (COSA and Direct Practice students).

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools. Specific questions may be addressed to:

Daniel Rosen
Professor
School of Social Work
University of Pittsburgh
2117 Cathedral of Learning

Pittsburgh, PA 15260

MSW/MBA Joint Degree Admissions Criteria

• SSW Requirement

- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.
- Undergraduate students with social work and human service backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Paid work experience is preferred but not required.
- GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, School of Business, by the admission deadline.
- Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.
- Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
- Applicants will submit their current resume.
- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.
- Non-refundable application fee is $40.
- Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.
- Submission of online MSW application form by the admissions deadline data of **May 31**.

• School of Business Requirement

- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.

- Undergraduate students with strong analytical backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Work experience is not necessary, though highly desirable.
- GMAT/GRE scores are optional, but reccommended.
- Applicants will submit application essays addressing questions related to experience, professional goals, and reasons for pursue the program.
- Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
- Applicants will submit their current resume.
- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
- TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
- IELTS Minimum acceptable score: 7.0
- $50 non-refundable application fee.
- Prospective candidates, domestic or international, will be interviewed before admission, in person or virtually.

Learning outcome goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

- Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.
- Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.
- Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.
- To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program requirements

- A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.

- The MBA program requires a minimum 45 credits,, of which at least 33* credits must be from School of Business courses, while the balance of 12 credits are accepted from School of Social Work courses.

Master of Business Administration Core Courses

The following core courses are required of all MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS

- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Required Courses

To supplement the MBA Core Curriculum, MBA students also complete additional required coursework. The content of these courses is designed to accelerate a students' academic and personal development as a business professional.

- BIND 2404 - QUANTITATIVE FUNDAMENTALS: STATISTICS
- BIND 2406 - QUANTITATIVE FUNDAMENTALS: BUSINESS MATH
- BIND 2506 - QUANTITATIVE FUNDAMENTALS: FINANCE
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

MBA Elective Courses

Students in the joint degree program must complete an additional 7.5 elective credits of School of Business courses.

Program requirements

- All MSW/MBA joint degree students will be required to take at least 33 credits of KGSB credits, consisting of the above 25.5 credits of core courses plus an additional 7.5 credits of School of Business electives. Thus, up to 12 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 45 credits required for the completion of the School of Business MBA degree.
- The following School of Business courses will count as credits towards the MSW degree:
- BACC 2401 - FINANCIAL ACCOUNTING will qualify as equivalent to SWCOSA 2085 - FINANCIAL MANAGEMENT SOCIAL SERVICE INSTITUTIONS (3 credits), and will count as 3 credits for both the MSW and MBA programs,
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
- SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS), which will count as 3 credits for both the MSW and MBA programs, and
- SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g.,BIND 2444 - MANAGEMENT SIMULATION CAPSTONE), which will count as 3 credits for both the MSW and MBA programs.

Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two-degree programs separately.

- It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will count towards completion of the MSW program.

- Thus, full-time COSA students with advanced standing must earn a total of 63 credits for CO students, and 60 credits for SA students (adding all MSW and MBA courses). This means a total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 33 credits of MBA courses, which includes 25.5 and 7.5 credits of required and electives, respectively.

- Full-time COSA students without advanced standing must earn a total of 84 credits for CO students, and 81 credits for SA students (adding all MSW and MBA courses). This means a total of 51 social work credits to be taken by CO students and 48 credits to be taken by SA students. Additionally, they must take minimum of 33 credits of MBA courses, which includes 25.5 and 7.5 credits of required and electives, respectively.

Social Work, MSW/MDiv

Pittsburgh Theological Seminary and the Graduate School of Social Work at the University of Pittsburgh present the unique opportunity to receive a joint degree in Master of Divinity (M.Div.) and Master of Social Work (M.S.W.) for those students passionate about pursuing their call to social work both inside and outside of a church setting.

What Makes Us Special?

As the oldest continuous joint degree program in the country, established in 1967, the MDiv/ MSW joint Masters degree program allows students to complete their coursework and graduate in four years of post-baccalaureate study instead of the usual five. Within the joint program students will still be provided a full course of study in both theology and social work, along with the academic support and one-on-one attention given by our excellent faculty. In order not to skip any required courses and still graduate in the four years, the MDiv/MSW program counts certain courses taught in one school as electives in the other and vice-versa, along with developing specialized field placements.

Who Is This Program For?

This joint masters program is built for those seeking to integrate their love of theology with their heart for social work and to make a change, along with those interested in pursuing a career in pastoral counseling or other forms of counseling. Positions that have been held by MDiv/MSW graduates in the past include: chaplain/clinical pastoral education supervisor for a health care facility, associate director of campus ministry, chaplain/chair committee holder at a nursing home, executive director of a pastoral institute, Christian counseling, various work with nonprofits, and so many more.

With the Seminary's campus located in the East Liberty / Highland Park neighborhood of Pittsburgh, PTS is within driving distance of other cities in Pennsylvania like Johnstown, Harrisburg, Philadelphia, State College, Allentown, Scranton, and other rural regions as well. Pitt classes meet at the University of Pittsburgh in Oakland.

How the MDiv/MSW Degree Works

Candidates for the joint degree who enter the program through the Seminary will concentrate on theological studies during the first two years. Application should be made to the University of Pittsburgh Graduate School of Social Work during the first term of the second year at the Seminary. The third and fourth years will be spent predominantly at the School of Social Work. Being that degrees in the joint program will be awarded concurrently, it is important to note that a student who resigns from one program will be subject to all requirements for graduation from the remaining degree program.

The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

Contact Information

Students who prefer to apply through the mail may contact:

John Wallace
David E. Epperson Chair and Professor, Center on Race and Social Problems Senior Fellow for Research and Community Engagement
School of Social Work

Email address: kjc45@pitt.edu

After earning her joint Master of Divinity/Master of Social Work degrees in 2005 from Pittsburgh Theological Seminary and the University of Pittsburgh, alumna Elizabeth Trexler went on to be a missionary in Southeast Asia and then served as associate director of Catholic campus ministry at Bloomsburg University. She says, "The joint degree program with masters in social work and masters in divinity is something that you can't put a price on. It just works so well together."

MDiv Program Curriculum Sequence

Courses are generally three credit hours. When followed on a full-time basis (12-13 credits), the program is completed in three academic years. Student pastors are encouraged to spread their degree work over four academic years.

Social Work, MSW/PhD

An MSW degree from an accredited school of social work is required to be considered for admission to the PhD program. Applicants without an MSW degree who wish to pursue a social work academic career may apply to the joint MSW/PhD program. Such applicants typically are interested in grounding themselves in the practice base of the social work profession, while also seeking to develop their advanced research and teaching skills. Preference is given to MSW/PhD applicants who have prior social work-related professional experience.

Separate applications are required for admission to each program. Those seeking further information regarding this dual degree program are encouraged to contact SSWPHDAdmissions@pitt.edu.

University Center for International Studies

University Center for International Studies

The University Center for International Studies (UCIS) is the primary resource for initiating and managing international studies and global programs and support services while promoting the University's reputation as a global leader in research and education. A key goal of UCIS is to cultivate globally capable and engaged students toward lives of impact in their community and beyond. This is achieved by certificate programs, study abroad, professional development opportunities, support for research and teaching, and a wide array of co-curricular offerings. UCIS offers 11 graduate certificates at both a masters and Ph.D. level to meet the needs of students from any school or department. Certificates are academic credentials that attest to acquisition of international knowledge about a particular world region or global theme, cross-cultural understanding, and language proficiency relevant for international careers or for advanced degrees.

Certificates are available in:

- African Studies
- Asian Studies
- European Union Studies
- Global Studies
- Latin American Social and Public Policy Studies
- Latin American Studies
- Mediterranean Studies
- Russian, East European and Eurasian Studies
- Transatlantic Studies
- Transnational Asia Studies
- West European Studies

The certificates are administered through the African Studies Program, Asian Studies Center, European Studies Center, Global Studies Center, Center for Latin American Studies, and the Center for Russian, East European and Eurasian Studies. All six centers are designated by the federal government as National Resource Centers and can offer federal Foreign Language and Area Studies (FLAS) Fellowships for both academic year and summer study.

UCIS certificates evidence language proficiency, regional knowledge and cultural competency that students find useful for international careers.

Admission to Certificate Programs

For admission, graduate students must first apply to a graduate program at one of the Schools. Applicants are encouraged to contact a UCIS international advisor as early as possible with questions about their interest in a world region or global theme. Formal admission to the UCIS certificate programs is accomplished by completing a simple application form. Generally, no additional tuition is charged for enrollment as a certificate student. Students holding a master's degree from an accredited institution may obtain any of the UCIS graduate certificates without enrolling in a graduate degree program at the University of Pittsburgh. They may apply directly to the UCIS center or program if they wish to enroll only in the certificate program.

Certificate Requirements

UCIS Graduate certificates are awarded after completion of all certificate requirements *as well as* completion of all requirements for the master's degree, or *after* the student has passed the comprehensive examinations for the doctorate. Upon graduation, both the academic degree and the certificate are posted on the student's transcript. Specific certificate requirements for each international studies certificate are listed under the program offerings below.

Advising

All UCIS certificate programs provide personalized advising services to students interested or registered in its programs in addition to those routinely offered by the students' major advisors. Center advisors assist in selecting courses, language training, and arranging internships or study abroad to fit the students' academic and personal interests. See the program offerings below for contact information.

The Graduate Certificate

The Center for African Studies offers the graduate certificate in African Studies designed to provide students the opportunity for the interdisciplinary study of Africa. Students seeking a graduate degree at any school within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. The Graduate Certificate program is specifically designed for graduate students who desire an opportunity to intensify their study of Africa and develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, and workshops on Africa. They are also encouraged to participate in internship opportunities with a specific focus on Africa.

Admission to the Certificate Program

Although formal admission to the program is allowed at any point in the student's academic career, students are encouraged to apply for admission early enough to allow them ample time to complete all the requirements in a timely manner. Application information can be obtained from the African Studies Web site or students can apply for admission to the program at our office.

The Graduate Certificate

The Center for African Studies offers the graduate certificate and the Advanced certificate in African Studies designed for students who wish to intensify their study of Africa as a world region. Students seeking a graduate degree at any school or department within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. This certificate is specifically designed for graduate students who desire to develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines and professions. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, fellowships, internships and workshops on Africa. Successful completion of a certificate in African Studies can provide an important building block for careers in international development, foreign service, government, business, law, academia and public service.

Certificate Requirements

Course Work

18 Credits of course work are required:

- 15 credits can overlap with your major but
- 3 credits must be outside your major
- In country experience is required and this can be fulfilled with a 3 credit research project or internship in Africa

Language Requirement

2 years language requirement for equivalent for an African language or European language spoken in Africa*

* Language proficiency: Those with intermediate proficiency or Native speakers of an African language, or European language can have the language requirement waived.

Capstone Research Paper & Presentation

Capstone paper: This research paper/project is the culmination of the student's learning experience and clearly demonstrates in-depth knowledge of African studies issues in at least one academic discipline. The capstone must be an assignment submitted as part of coursework, such as a final term paper and must have received a B or above grade.

Graduation Presentation: The student will present on the culmination of their African Studies Certificate through sharing a PowerPoint about their capstone project and African studies experiences in a mini-forum to students, friends and family. Each student will have 5 minutes to present. They are allowed no more than five power point slides of talking points and pictures to guide their presentation. Presentations happen in December or April of the graduation year.

Academic Opportunities

Internships: There are several internship opportunities locally and in Africa for student internships. Meet with the academic advisor to learn about these opportunities and sources of funding.

Events & Volunteering: The center hosts various lectures each semester and always has opportunities for students to get involved and use their talents in various events that happen throughout the year.

UCIS International Career Toolkit Series: The Career Toolkit introduces students to the multitude of careers available by meeting and interacting with professionals in a variety of fields. Many of the guests are Pitt alumni and those that graduated with an International Studies Certificate. By attending one of these panels students will gain insight on career choices, what specific careers entail, how to articulate and prepare for short and long term career goals, and utilize resources at Pitt to make their goals a reality. Each year, students enrolled in the certificate program will have the opportunity to visit Washington, DC to interact with professionals and learn about a variety of opportunities for employment possibilities.

The African Studies Program offers the Graduate Certificate in African Studies and the Advanced Certificate in African Studies designed for students who wish to intensify their study of Africa as a world region. Students seeking a graduate degree at any school or department within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. These certificates are specifically designed for graduate students who desire to develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines and professions. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, fellowships, internships, and workshops on Africa. Successful completion of a certificate in African Studies can provide an important building block for careers in international development, foreign service, government, business, law, academia, and public service.

Language Proficiency

Students must complete either:

- 1 year of the study of either an indigenous African language **or**
- 2 years of a European language that is relevant to African studies **or**
- The language requirement can be waived if the student is at an intermediate level in either a European language spoken in Africa or an Indigenous African language

Content Courses

12 credits of content coursework are required:

- 9 credits can overlap with the major.
- 3 credits must be outside the student's major

Students may contextualize non-credit-bearing internships that are required in various graduate degree programs as credit-bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.

Research Paper

This research paper/project is the culmination of the student's learning experience and clearly demonstrates in-depth knowledge of African studies issues in at least one academic discipline. The capstone must be an assignment submitted as part of coursework, such as a final term paper and must have received a B or above grade. The paper must be at least 7 to 10 pages long and contain a minimum of 10 references.

Graduation Presentation

The graduation presentation is an opportunity for students to reflect on the African Studies Certificate and how their years of study have culminated into enhancing their knowledge and understanding of Africa. The presentation contains 4 slides, where students are asked to reflect on their research paper, experiential learning, and growth in African Studies. They are asked to submit a 1-page reflection on their presentation. The ASP uses the presentation to evaluate the certificate program to examine if the students have enhanced their knowledge and understanding of Africa. Students can choose to do an online portfolio instead of the presentation and paper if they so wish.

The Asian Studies Center at the University of Pittsburgh is widely recognized as being among the best and most comprehensive in the country in research, public service, and teaching about East Asia. The center aims to enhance the understanding of East Asia, South Asia, Southeast Asia, and the Pacific Islands through exceptional undergraduate and graduate academic programs, strong interdisciplinary faculty development, and energetic community outreach. ASC has nationally recognized programs in Chinese and Japanese language and culture studies, with growing strengths in Indian and Korean studies. Its affiliated faculty spans disciplines. More than 3,500 graduate and undergraduate students enroll each year in Asia-related courses. Undergraduate students from any field or school interested in Asia can supplement and strengthen their major field of study by enrolling in the Asian Studies certificate program.

The East Asian Library (EAL)

http://www.library.pitt.edu/east-asian-library

Located in Hillman Library, the EAL contains significant collections of books and periodicals in both the Chinese and Japanese languages, in addition to materials in English and other Western languages housed in the general collections. Those pursuing research on current topics concerned with Japan can make use of the Japan Information Center (JIC), which gives users direct access to a wide array of government documents, economic reports, and a wide range of data related to social and economic issues.

Financial Assistance

Graduate Certificate

Advanced Asian Studies Certificate

U.S. and international doctoral students from any department may earn the Advanced Certificate in Asian Studies. The certificate combines language training and multidisciplinary area studies to foster communicative and cultural competence. Students pursuing the certificate wish to intensify their study of Asia, either because they would like to be able to use their knowledge of that critical part of the world in their careers after graduation, or because they recognize the importance of an understanding of Asian history, language, and culture for all well-informed people.

University of Pittsburgh

Jessica Sun, Undergraduate & Graduate Advisor and Assistant Director for Academic Affairs
4109 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-7370
jhs141@pitt.edu

Advanced Certificate Requirements

Students seeking the Certificate of Advanced Asian Studies must fulfill the following requirements:

- **A minimum of five upper-level courses or graduate seminars dealing with Asia, in at least two departments.** The five courses must include one seminar outside the student's major department. Courses for the certificate are allowed to count towards other credentials (i.e. majors, minors, certificates).
- In consultation with the academic advisor, students may fulfill these standards through one of the following options:

- Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
- Students who can add content courses without affecting their tuition bill will be encouraged to do so.
- Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
- Language Proficiency Requirements

Demonstrate proficiency in reading and speaking an approved Asian language related to one of the student's countries or regions of interest. Proficiency is interpreted to mean at least three years of study or the equivalent and may be demonstrated by completing courses or by passing a special examination.

Capstone: Research Paper, Presentation, or Project

· Students must submit a significant research paper, project, or presentation to represent their work in Asian area studies. Papers must demonstrate engagement with issues, regional concerns, and/ or languages of Asia. They can be used to complete departmental requirements for a graduate
degree and the certificate, but it must include research using the student's approved Asian language. Students should consult with the advisor for Asian Studies about questions regarding the research paper, presentation, or project.

- **A research paper.** The student can fulfill this requirement by presenting either an interdisciplinary seminar paper or thesis (which draws upon more than one scholarly discipline). The paper can be used to complete departmental requirements for a graduate degree as well as for the certificate, but must include research using the student's approved Asian language.

- **GPA requirement** is 3.0 for all courses to be counted towards the Asian Studies Certificate.

Financial Assistance

Asian Studies Certificate Students are eligible for a variety of scholarships. For information visit http://www.ucis.pitt.edu/asc/students/grad-funding.

Asian Studies Certificate

U.S. and international students from any department may earn the Certificate in Asian Studies. The certificate combines language training and multidisciplinary area studies to foster communicative and cultural competence. Students pursuing the certificate wish to intensify their study of Asia, either because they would like to be able to use their knowledge of that critical part of the world in their careers after graduation, or because they recognize the importance of an understanding of Asian history, language, and culture for all well-informed people.

4109 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-7370
jhs141@pitt.edu

Language Proficiency

Students must demonstrate language proficiency in an Asian language equivalent to two years of a college language or higher. This can be demonstrated through language courses at Pitt, the student's undergraduate transcript, transcripts from other reputable language programs, or language proficiency examination.

Content Courses

Students must complete four courses with significant Asian Studies content. At least one of these courses must be taken in a discipline outside the student's major.

Students exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree. Students may contextualize non-credit-bearing internships required in various graduate degree programs as credit-bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue these options.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use third-year or above (i.e., grammar, conversation, etc.) courses taught in the target language towards the content course requirements. Additionally, introductory courses in a second or third language (with a clear and stated relevance to their research or professional goals) will count.

Research Paper, Presentation, or Project

Students must submit a significant research paper, project, or presentation to represent their work in Asian area studies. Papers must demonstrate engagement with issues, regional concerns, and/ or languages of Asia. Students should consult with the advisor for Asian Studies about questions regarding the research paper, presentation, or project.

Alternatively, students may prepare a digital portfolio detailing courses and co-curricular experiences related to Asian studies and offering reflections on developing specific competencies associated with a detailed rubric.

12 Credits

Transnational Asia Advanced Certificate

U.S. and international doctoral students from any department may earn the Advanced Certificate in Transnational Asia. It will focus on the expansive mobility, connectivity, and communication between Asia and the world, and the impact of these relationships in fields such as economics, history, business, anthropology, political science, and public policy, among others. This graduate certificate program prepares students for international careers with a global or Asian focus. It also allows students with a strong linguistic background or working intensively on more than one Asian language to document their advanced skills in Asian languages and flows. Furthermore, it complements graduate programs in traditional academic disciplines, making certificate coursework more attainable and desirable for graduate students in professional programs.

University of Pittsburgh
University Center for International Studies
Asian Studies Center
Jessica Sun, Undergraduate & Graduate Advisor and Assistant Director for Academic Affairs
4109 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-7370
jhs141@pitt.edu

Course Requirements

An interdisciplinary understanding of transnational Asia can help build a sense of broad trends and ideas from many different perspectives. When students apply for an Advanced Certificate in Transnational Asia, they will work with the Asian Studies Center advisor to choose an appropriate theme. Students will, for their remaining semesters, take a minimum of five courses (15 credits) approved by the Asian Studies Academic Advisor to fit around the theme. Popular themes include: Asian Diaspora Studies (including Asian American Studies), Asian Public Health, Transnational Asian Popular Culture, Transnational Supply Chains, and many others. Thus, students seeking the Certificate of Advanced Transnational Asia must fulfill the following requirements:

A minimum of five upper-level courses or graduate seminars dealing with the mentioned theme, in at least two departments. The five courses must include one seminar outside the student's major department. Courses for the certificate are allowed to count towards other credentials (i.e. majors, minors, certificates).

Language Proficiency Requirements

Demonstrate proficiency in reading and speaking approved Asian language(s) related to the chosen theme. Students must complete one of the two language tracks to earn the Advanced Transnational Asia Certificate:

Track A: Proficiency in an Asian Language equivalent to three years of college courses, relevant to the certificate theme. This can be fulfilled by 6 semesters of college language courses or proficiency proven via examination.

Track B: Proficiency in an Asian Language equivalent to two years of college courses and proficiency equivalent to one year in a comparative language relevant to the certificate theme. This requirement can be fulfilled by coursework at the college level, university language management,
and/or proficiency proven via examination.

Capstone: Research Paper, Presentation, or Project

· Students must submit a significant research paper, project, or presentation to represent their work in the theme mentioned above in the previous section. Papers must demonstrate engagement with issues, regional concerns, and/ or languages of that theme. They can be used to complete departmental requirements for a graduate degree and the certificate, but it must include research using the student's approved Asian language. Students should consult with the advisor for Asian Studies about questions regarding the research paper, presentation, or project.

· GPA requirement is 3.0 for all courses to be counted towards the Asian Studies Certificate.

Transnational Asia Graduate Certificate

The Transnational Asia certificate focuses on the expansive mobility, connectivity, and communication between Asia and the world, and the impact of these relationships in fields such as economics, history, business, anthropology, political science, and public policy, among others. This Transnational Asia graduate certificate program will help students prepare for international careers with a global or Asian focus. It complements graduate programs in traditional academic disciplines, making certificate coursework more attainable and desirable for graduate students in professional programs.

The interdisciplinary and transnational nature of the certificate encourages students to take courses in multiple departments and thus increases student exposure to departmental offerings outside of their majors and minors. Similarly, the policy and professional orientation encourage Dietrich School of Arts and Sciences students to explore graduate offerings in professional schools such as business, education, or SPIA, while increasing the visibility of UCIS programs for students in those schools.

Required Courses

Language Proficiency

Students must demonstrate proficiency in an Asian language through several methods. This can be shown through a combination of language courses at Pitt, the student's undergraduate transcript, transcripts from other reputable language programs, or language proficiency examination. Students may complete one of the three language tracks to earn the Transnational Asia Certificate:

Track A: Proficiency in an Asian Language equivalent to two years of college courses, relevant to the certificate theme. This can be fulfilled by 4 semesters of college language courses or proficiency proven via examination.

Track B: Proficiency in an Asian Language equivalent to one year of college courses and proficiency equivalent to one year in a comparative language relevant to the certificate theme. This requirement can be fulfilled by coursework at the college level, university language management, previous college-level coursework, and/or proficiency proven via examination.

Track C: Proficiency in two different Asian languages, each equivalent to one year of college language courses.

Content Courses

An interdisciplinary understanding of transnational Asia can help build a sense of broad trends and ideas from many different perspectives. When students apply for a Transnational Asia Certificate, they will work with the Asian Studies Center advisor to choose an appropriate theme. Students will, for their remaining semesters, take a minimum of four courses (12 credits) approved by the Asian Studies Academic Advisor to fit around the theme. Popular themes include Asian Diaspora Studies (including Asian American Studies), Asian Public Health, Transnational Asian Popular Culture, Transnational Supply Chains, and many others.

Required courses for the Transnational Asia certificate may overlap with major requirements and study abroad courses. More specifically, students must take courses in at least two different departments, one of which (3 credits) should be outside the student's major.

Students exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree. Students may also contextualize non-credit-bearing internships required in various graduate degree programs as credit-bearing experiences toward the certificate program. Prior approval from the academic advisor must be received to pursue these alternate options.

Capstone: Research Paper, Presentation, or Project

Students must submit a significant research paper, project, or presentation to represent their work in the theme mentioned above in the previous section. Papers must demonstrate engagement with issues, regional concerns, and/ or languages of that theme. Students should consult with the advisor for Asian Studies about questions regarding the research paper, presentation, or project.

Alternatively, students may prepare a digital portfolio detailing courses and co-curricular experiences related to Asian studies and the theme. The portfolio provides an opportunity for reflection on developing specific competencies associated with a detailed rubric.

Since 1984, the European Studies Center formerly (ESC) has offered a strong curriculum on Europe by bringing together the rich assets of a major research university to create a unique learning community. The ESC has developed an international scholarly reputation in European Union studies and was selected by the European Commission to host one of only ten European Union Centers of Excellence in the United States.

Hillman Library at the University of Pittsburgh has been a depository library for EU publications since 1974. Dr. Phil Wilkin, the West European bibliographer, has developed the Archive of European Integration that provides a wide array of EU-related documents through the Web. Please visit http://aei.pitt.edu for details.

Financial Assistance

The ESC offers several possible scholarship opportunities to students in its certificate program. Please visit http://www.ucis.pitt.edu/euce/content/graduate-student-funding-opportunities for further details.

Graduate Certificate

Advanced European Union Studies Certificate

Graduate Advisor: Steve Lund
European Studies Center
4200 Wesley W. Posvar Hall
slund@pitt.edu

The Certificate of Advanced Study-European Union Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to the EU and proficiency in a relevant language. Students may enroll in the Certificate through the European Studies Center (ESC) or the Center for Russian and Eastern European Studies(REES).

Requirements:

Students seeking the Certificate of Advanced Study-European Union Studies must fulfill the following requirements:

- Complete **18 credits of EU studies courses** in at least two schools or disciplines, with at least nine credits from outside the student's home department or school. Six credits must be selected from the list of core courses. Courses must be approved by the ESC. Courses for the certificate are allowed to count towards other credentials (i.e. majors, minors, certificates).
- For the approved course list, click here.
- Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.
- **Language proficiency**: Students must have three years of progressive college-level instruction in an official EU Member State or official EU candidate country language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.
- Participate in an EU-related cocurricular activity approved by the ESC's Graduate Advisor.
- Be awarded a graduate or professional degree.

Advanced West European Studies Certificate

Graduate Advisor: Steve Lund
European Studies Center
4200 Wesley W. Posvar Hall
slund@pitt.edu
http://www.ucis.pitt.edu/esc/

Certificate of Advanced Study

The Certificate of Advanced Study-West European Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to Western Europe and proficiency in a relevant language.

Requirements:

Students seeking the Certificate of Advanced Study-West European Studies must fulfill the following requirements:

- Complete **18 credits of West European Studies courses** in at least two schools or disciplines, with at least nine credits from outside the students home department or school. Distribution of these 18 credits is tailored to each academic program. Courses must be approved by the ESC. Courses for the certificate are allowed to count towards other credentials (i.e. majors, minors, certificates).
- Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.
- **Language proficiency**: Students must have three years of progressive college-level instruction in a West European language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.
- Be awarded a graduate or professional degree.

European Union Studies Certificate

The University of Pittsburgh has long been a leader throughout the U.S. and the world in European Union Studies. Students interested in the politics, policies, or institutions of the EU, or in the history of and prospects for European integration can obtain a Pitt credential that signals to others a unique understanding of the EU and broad competence in international studies. The European Union Studies Certificate enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to the EU or European integration, as well as proficiency in a relevant world language. The requirements for this certificate are tailored specifically to allow graduate students in 2- and 3-year Masters programs to complete the program without adding any additional time to degree completion.

Language Proficiency

Students must have two (2) years of progressive college-level instruction in an official EU Member State or official EU candidate country language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to satisfy the requirement.

Content Courses

Students must complete 15 credits of EU studies related courses in at least two departments, with at least 3 credits of the course work in addition to the credits used to complete the student's major.

In consultation with the academic advisor, students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use third year or above (i.e. grammar, conversation, etc.) courses taught in the target language towards the content course requirements. Additionally, introductory courses in a second or third language (with a clear and stated relevance to their research or professional goals) will count.

Research Paper

Write an interdisciplinary research paper of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind. Alternatively, students may choose to prepare a digital portfolio detailing courses and co-curricular experiences related to European Union studies and offering reflections on the development of specific competencies related to a detailed rubric.

15 Credits

Mediterranean Studies Advanced Certificate

The Advanced Certificate in Mediterranean Studies provides students with interests in Mediterranen history, culture, politics, and languages to complement their major with a regional specialization, and to explore the interconnectedness of North Africa, the Levant, Anatolia, Southern Europe, and the Balkans. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes immigration, regional politics and security, ancient civilations, and Mediterranean arts and architecture.

Required Courses

- CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1
- FR 2761 - FRENCH STUDIES GENDER STUDIES
- GREEK 2220 - GREEK SEMINAR: PHILOSOPHERS
- HIST 2729 - SEAS, PEOPLES, AND EMPIRES
- PHIL 2070 - ANCIENT PHILOSOPHY
- THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

- PHIL 2070 - ANCIENT PHILOSOPHY
- THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

Transatlantic Studies Advanced Certificate

The Transatlantic Studies Advanced Certificate lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Required Courses

- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- ANTH 2516 - CHIEFDOMS
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- EDUC 2100 - EDUCATION AND SOCIETY
- FR 2765 - COMPARATIVE FRANCOPHONE CULTURE
- HAA 2025 - HISTORY AND ETHICS OF COLLECTING
- HPS 2522 - SPECIAL TOPICS IN THE HISTORY OF SCIENCE
- LAW 2910 - LAWYERS IN AMERICAN SOCIETY
- LING 2235 - LANGUAGE, GENDER AND SEXUALITY
- MUSIC 2038 - MUSIC, CULTURE & TECHNOLOGY
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PS 2312 - COMPARATIVE PARTIES AND ELECTIONS
- SOC 2035 - RACE & ETHNICITY
- SPAN 2410 - DISCOVERY AND CONQUEST
- THEA 2207 - WORLD THEATRE: 1890-PRESENT

Transatlantic Studies Certificate

The Transatlantic Studies Certificate lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Requirements

- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- ANTH 2516 - CHIEFDOMS

- THEA 2207 - WORLD THEATRE: 1890-PRESENT

West European Studies Certificate

The Certificate in Western European Studies provides students with strong interests in predominantly Western European history, culture, politics, and languages to complement their major with a regional specialization. The certificate is self-designed, and students may organize their courses around themes and countries relevant to their broader career and research interests. Students in 2- and 3-year graduate degree programs with only basic understanding of a relevant foreign language can complete the certificate with no additional time to degree or expense. Contact the advisor to get started as soon as possible.

Language Proficiency

Two years or equivalent proficiency of a relevant West European language. Students whose first language is English must choose a language other than English. Students for whom English is a second language can use English proficiency or coursework to meet this requirement. (English is unarguably a language of Western Europe, but the purpose of the certificate is to showcase foreign language proficiency, so it is not an appropriate choice for native English speakers.)

Content Courses

15 credit hours; 9 within the major; 6 interdisciplinary credits from two different departments outside of the major.

Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for unique credits in addition to the degree program.
Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue theses options.

Research Paper

A 15-25 page research paper showing evidence of interdisciplinary and the use of foreign language sources and overseen by an Affiliated Faculty member of the European Studies Center in consultation with the graduate advisor of the European Studies Center. Alternatively, students may choose to complete an e-portfolio detailing courses and co-curricular experiences related to West European studies and offering reflections on development of specific competencies related to a detailed rubric. Students pursuing this second option are those likely to be considering careers outside of academia after graduation.

E-mail: global@pitt.edu
www.ucis.pitt.edu/global

The Global Studies Program provides students with a "global competence," the ability to communicate effectively across cultural and linguistic boundaries and to focus on issues that transcend cultures and continents. The global studies graduate certificate is a joint offering of the University Center for International Studies (UCIS) and the Graduate School of Public and International Affairs (GSPIA), and is open to all students enrolled in a graduate program at the University.

The Global Studies Program draws on the strengths of the Area Studies Centers within the University Center for International Studies and the departments and schools at the University of Pittsburgh. The Asian Studies Center, the Center for Latin American Studies, the Center for Russian and East European Studies, and the Center for West European Studies have been designated by the U.S. Department of Education as National Resource Centers. The University Library System possesses extensive holdings of books and journals to support research and study in these world areas.

Admission to Global Studies Program

Applications to the Global Studies Program may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, students cannot be accepted until they have received notification of admission to the University of Pittsburgh.

Students holding a master's degree from an accredited institution may obtain the Graduate Certificate in Global Studies. They may apply directly to the program if they wish to enroll only for the graduate certificate.

Pittsburgh, PA 15260
Phone: 412-648-2113
eel58@pitt.edu
http://www.ucis.pitt.edu/global/

Global Studies is an exciting - and evolving - interdisciplinary field. It is concerned with transnational structures, processes, and interactions, and how these affect social, economic, cultural, political, and ecological environments. Scholars of Global Studies understand and analyze how these structures, processes, and interactions both connect people and places and disrupt established norms, communities, institutions, and relationships. That is, they think globally about these processes.

Within the Global Studies Certificate, graduate students from the Dietrich School of Arts and Sciences can tailor a unique plan of interdisciplinary study within their field of interest drawn from more than 200 courses across 6 global concentrations. The certificate allows students to adopt a transnational lens that can inform their research projects, and to conduct research in one of 35 languages offered at Pitt.

Global Concentrations: To complete the certificate, student choose one of five global concentration/themes:

- **Cultural Dynamics**
- **Peace, Conflict, and Security**
- **Ecology and Sustainability**
- **Health and Well-Being**
- **Politics and Economy**

In addition to the certificate, the Global Studies Center offer numerous complementary programs and opportunities that support students' intellectual and personal development: research skills, career exploration and career readiness, experiential education and civic engagement, and a critical understanding of current events. The center offers tuition remission for students studying less commonly taught languages and internship positions.

Certificate Requirements

Six Global Thematic Courses (18 credits): After students select a global concentration, they choose from a comprehensive and dynamic list of courses ensuring three disciplines are represented to provide an interdisciplinary perspective on their chosen global concentration. Courses for the certificate are allowed to count towards other credentials (i.e., majors, minors, certificates).

- In consultation with the academic advisor, students may fulfill these standards through one of the following options:
- Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
- Students who can add content courses without affecting their tuition bill will be encouraged to do so.
- Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree.
- **Language Proficiency:** Building on Pitt's vast offering of over 30 languages, a minimum of three years of college-level study (six semesters) in a foreign language is required. Students can fulfill this requirement by passing a proficiency exam at the Intermediate mid proficiency level.

Global Studies Capstone Research Paper: This research paper is the culmination of a student's learning experience related to their global concentration. It demonstrates analytical skills within a transnational context. It must be written as part of a course and graded by a faculty member.

Global Studies Certificate

Global Studies Center

bravo@pitt.edu
www.ucis.pitt.edu/clas

The Center for Latin American Studies (CLAS), established in 1964, is internationally recognized for excellence in undergraduate, graduate, and professional education. In 1979 the U.S. Department of Education designated CLAS as a comprehensive National Resource Center (NRC) on Latin America-a distinction it has retained continuously to the present.

CLAS' programs cover the entire Latin American and Caribbean region. Two academic programs are especially noteworthy: The Latin American Archaeology Program, housed in the Department of Anthropology, involves research, training, and publications and emphasizes collaboration between North American and Latin American archaeologists. Fellowships and a bilingual publication series (funded by the Howard Heinz Endowment and The Andrew W. Mellon Foundation) further enhance this exceptional program. The Latin American Social and Public Policy Program draws on the impressive array of faculty and student expertise on Latin American policy issues available at the University of Pittsburgh. The program brings together researchers from different fields with the goal of contributing information of relevance to policy decisions facing Latin America. Social and Public Policy Fellowships are annually awarded to scholars interested in

studying various dimensions of social policy at the University of Pittsburgh. The Latin American Social and Public Policy Graduate Certificate is available to students in this more specialized program.

Admission to the Center for Latin American Studies

http://www.ucis.pitt.edu/clas/grad_admissions

Applications to the Center for Latin American Studies may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, the center cannot accept students until they have received notification of admission to the University.

Latin American Library Collection

http://www.library.pitt.edu/eduardo-lozano-latin-american-collection

One of the major resources on Latin America available to students at the University of Pittsburgh is the Eduardo Lozano Latin American Library Collection. Its resources include exceptional collections on Bolivia and Cuba as well as extensive holdings on Argentina, Brazil, Ecuador, Guatemala, Mexico, Peru, and Venezuela.

Financial Assistance

Latin American Studies offers a variety of scholarships to students in its certificate programs. Please visit http://www.ucis.pitt.edu/clas/grad_funding for further details.

University Center for International Studies
Center for Latin American Studies

The **Advanced Graduate Certificate in Latin American Social and Public Policy** is a multidisciplinary program of study designed to train future leaders, public officials, and analysts capable of designing social and public programs that meet the needs of countries in Latin America and the Caribbean.

Engaging with Latin American Studies Scholars and Communities

Graduate students have numerous opportunities to engage with faculty, peers, and scholars locally, nationally, and internationally through lectures, colloquia, monthly discussions, cultural programs, community-engaged initiatives, and other events designed to foster intellectual exchange and professional development related to Latin American/Latinx, Caribbean, and diasporic studies.

Latin American/Latinx and/or Caribbean (including Caribbean diaspora) courses

a. Students are required to complete a minimum of **18 credits** in Latin American/Latinx and/or Caribbean content courses (including Caribbean diaspora studies) **taken from at least three different departments.**

b. Courses for this certificate are allowed to count towards other credentials (i.e., majors, minors, certificates).

c. There is no specific set of courses you are required to take. Any course with at least 25% of its content related to Latin America and the Caribbean may count toward our credentials.

Please review the list of pre-approved courses* here:

https://www.global.pitt.edu/clas/students/student-resources/course-list

*Note: If a course does not have a clear focus on Latin American/Latinx, and/or Caribbean (including diasporas) and is not included in our approved course list, it may still qualify through supplemental readings and a final paper focused on related regional or diasporic topics. To determine whether a course counts toward our certificate, please contact the CLAS academic advisor for approval *prior* to enrolling in the course using this link: https://www.global.pitt.edu/clas/students/student-resources/academic-advising

d. Students must earn a grade of at least C in courses counted toward the certificate. Courses taken through study abroad or transferred from another institution require a minimum grade of B.

Language Proficiency

a. Students will be required to take **3 years (six terms)** of college-level Spanish, Portuguese, Quechua, or Haitian Creole.

b. Students should contact the language departments listed below for information about language courses and placement tests. Placement tests may be used to demonstrate an equivalent level of language proficiency.

https://www.spanport.pitt.edu/

https://lctl.pitt.edu/languages/quechua

https://lctl.pitt.edu/languages/haitian-creole

Note: Students who are native speakers of one of the languages above may request a waiver from the CLAS Academic Advisor.

Research Paper

An interdisciplinary research paper of 15-25 pages that reflects the use of materials in a language used in the historical or contemporary Latin American, Caribbean and/or Diaspora (including Latinx). The paper could be prepared for a course that is counted toward the coursework requirement, but students are encouraged to conceptualize it with the certificate requirements in mind and to consult with the Center's Advisor while writing it. The paper will be evaluated by CLAS affiliated faculty member.

Students in the certificate are encouraged to meet once a semester with the CLAS academic advisor, Ana Paula Carvalho, to check on their progress.

University Center for International Studies

University of Pittsburgh

The **Graduate Certificate in Latin American Social and Public Policy** is a multidisciplinary program of study designed to train future leaders, public officials, and analysts capable of designing social and public programs that meet the needs of countries in Latin America and the Caribbean.

Engaging with Latin American Studies Scholars and Communities

Graduate students have numerous opportunities to engage with faculty, peers, and scholars locally, nationally, and internationally through lectures, colloquia, monthly discussions, cultural programs, community-engaged initiatives, and other events designed to foster intellectual exchange and professional development related to Latin American/Latinx, Caribbean, and diasporic studies.

Content Courses

Latin American/Latinx and/or Caribbean (including Caribbean diaspora) courses

a. Students are required to complete a minimum of **12 credits** in Latin American/Latinx and/or Caribbean content courses (including Caribbean diaspora studies) **taken from at least three different departments.**

b. Courses for this certificate are allowed to count towards other credentials (i.e., majors, minors, certificates).

c. There is no specific set of courses you are required to take. Any course with at least 25% of its content related to Latin America and the Caribbean may count toward our credentials.

Please review the list of pre-approved courses* here:

https://www.global.pitt.edu/clas/students/student-resources/course-list

*Note: If a course does not have a clear focus on Latin American/Latinx, and/or Caribbean (including diasporas) and is not included in our approved course list, it may still qualify through supplemental readings and a final paper focused on related regional or diasporic topics. To determine whether a course counts toward our certificate, please contact the CLAS academic advisor for approval *prior* to enrolling in the course using this link: https://www.global.pitt.edu/clas/students/student-resources/academic-advising

d. Students must earn a grade of at least C in courses counted toward the certificate. Courses taken through study abroad or transferred from another institution require a minimum grade of B.

ENROLL IN THE CERTIFICATE

Language Proficiency

a. Students will be required to take **2 years (four terms)** of college-level Spanish, Portuguese, Quechua, or Haitian Creole.

b. Students should contact the language departments listed below for information about language courses and placement tests. Placement tests may be used to demonstrate an equivalent level of language proficiency.

https://www.spanport.pitt.edu/

https://lctl.pitt.edu/languages/quechua

https://lctl.pitt.edu/languages/haitian-creole

Note: Students who are native speakers of one of the languages above may request a waiver from the CLAS Academic Advisor.

Research Paper

An interdisciplinary research paper of 15-25 pages that reflects the use of materials in a language used in the historical or contemporary Latin American, Caribbean and/or Diaspora (including Latinx). The paper could be prepared for a course that is counted toward the coursework requirement, but students are encouraged to conceptualize it with the certificate requirements in mind and to consult with the Center's Advisor while writing it. The paper will be evaluated by CLAS affiliated faculty member.

Students in the certificate are encouraged to meet once a semester with the CLAS academic advisor, Ana Paula Carvalho, to check on their progress.

Latin American Studies Certificate

The Graduate Certificate in Latin American Studies is a multidisciplinary program of study designed for students who want to graduate with a credential that indicates a specialization on this region of the world in addition to their graduate degree. Students who complete this certificate will demonstrate advanced knowledge and a dimension of expertise on Latin America, Caribbean and Diaspora (such as Latinx Studies).

Engaging with Latin American Studies Scholars and Communities

Graduate students have numerous opportunities to engage with faculty, peers, and scholars locally, nationally, and internationally through lectures, colloquia, monthly discussions, cultural programs, community-engaged initiatives, and other events designed to foster intellectual exchange and professional development related to Latin American/Latinx, Caribbean, and diasporic studies.

Latin American/Latinx and/or Caribbean (including Caribbean diaspora) courses

a. Students are required to complete a minimum of **15 credits** in Latin American/Latinx and/or Caribbean content courses (including Caribbean diaspora studies) **taken from at least three different departments.**

b. Courses for this certificate are allowed to count towards other credentials (i.e., majors, minors, certificates).

c. There is no specific set of courses you are required to take. Any course with at least 25% of its content related to Latin America and the Caribbean may count toward our credentials.

Please review the list of pre-approved courses* here:

https://www.global.pitt.edu/clas/students/student-resources/course-list

*Note: If a course does not have a clear focus on Latin American/Latinx, and/or Caribbean (including diasporas) and is not included in our approved course list, it may still qualify through supplemental readings and a final paper focused on related regional or diasporic topics. To determine whether a course counts toward our certificate, please contact the CLAS academic advisor for approval *prior* to enrolling in the course using this link: https://www.global.pitt.edu/clas/students/student-resources/academic-advising

d. Students must earn a grade of at least C in courses counted toward the certificate. Courses taken through study abroad or transferred from another institution require a minimum grade of B.

Language Proficiency

a. Students will be required to take **2 years (four terms)** of college-level Spanish, Portuguese, Quechua, or Haitian Creole.

b. Students should contact the language departments listed below for information about language courses and placement tests. Placement tests may be used to demonstrate an equivalent level of language proficiency.

https://www.spanport.pitt.edu/

https://lctl.pitt.edu/languages/quechua

https://lctl.pitt.edu/languages/haitian-creole

Note: Students who are native speakers of one of the languages above may request a waiver from the CLAS Academic Advisor.

Research Paper

An interdisciplinary research paper of 15-25 pages that reflects the use of materials in a language used in the historical or contemporary Latin American, Caribbean and/or Diaspora (including Latinx). The paper could be prepared for a course that is counted toward the coursework requirement, but students are encouraged to conceptualize it with the certificate requirements in mind and to consult with the Center's Advisor while writing it. The paper will be evaluated by CLAS affiliated faculty member.

Students in the certificate are encouraged to meet once a semester with the CLAS academic advisor, Ana Paula Carvalho, to check on their progress.

Center for Russian and Eastern European Studies

Contact Information

Graduate Advisor: Andrew Behrendt
Associate Director
Center for Russian and Eastern European Studies
4402 Wesley W. Posvar Hall
Phone: 412-648-7403
aeb72@pitt.edu
www.ucis.pitt.edu/crees

Established in 1965, the Center for Russian and Eastern European Studies (REES) at the University of Pittsburgh is designated by the U.S. Department of Education for Title VI funding as a National Resource Center.

There are three broad focus areas for the research conducted by faculty and graduate student specialists in the REES program. They are (1) contemporary Russian, East European, and Eurasian cultures, (2) politics, economics, and societies of Russia, Eastern Europe, and Eurasia (3) foreign policy issues as they relate to the REES world area.

The Center for Russian and East European Studies offers graduate certificates in East European Studies, Russian Studies, or Soviet Studies to students who successfully combine second language expertise and multidisciplinary area-focused courses.

Admission Information

Application for admission to graduate study is made directly to the academic department or graduate/professional school of the student's choice. The applicant should include a statement requesting admission to the REES certificate program.

To enroll in one of the certificate programs, admitted students should make an appointment with the REES graduate advisor as soon as possible after their arrival at the University.

Financial Assistance

The Center for Russian and East European Studies offers scholarships to students in its certificate program. Please visit http://www.ucis.pitt.edu/main/scholarships for further details.

Overview

REEES is one of a select few National Resource Centers for Russian, East European, and Eurasian Studies funded by the US Department of Education. REEES has 72 affiliated faculty members and has programs with 14 Arts and Sciences departments and five professional schools. Our many areas of focus include subjects such as the transformations of post-communist societies, history, foreign policy and international relations, anthropology, music, film, and contemporary culture and literatures. Recognizing that regional boundaries are constantly contested and redefined, our geographic scope includes Russia, Ukraine, Belarus, the Baltic states, Central Asia and the Caucasus, the Western Balkans, Poland, Hungary, Slovakia, Czech Republic, Romania, Bulgaria, Moldova, Mongolia, and Turkey. REEES currently offers Certificates in Advanced East European Studies, Russian Studies, or Soviet Studies, which may be earned in conjunction with most masters and doctoral programs in the School of Arts and Sciences and a number of professional schools.

Requirements for REEES Certificates

The requirements for each of the REEES graduate certificates are as follows:

- Completion of **six approved Russian, East European, and Eurasian area studies courses**, including four courses from at least two departments other than the student's home department, for a total of 18 credits. Courses for the certificate are allowed to count towards other credentials (i.e. majors, minors, certificates).
- Demonstration of **language proficiency** equivalent to three years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish).
- Completion of a **research paper** of at least 15 pages in length, based substantially on primary sources in one or more languages of the REEES world area.
- Students must maintain a minimum GPA of 3.0 in REEES-related coursework.

Russian, East European & Eurasian Studies Certificate

The Graduate Certificate in Russian, East European, and Eurasian Studies (REEES) may be earned in conjunction with most master's and doctoral programs in the School of Arts and Sciences and a number of professional schools. In order to receive the Graduate Certificate in Advanced REEES, students must complete area studies coursework and demonstrate proficiency in a language spoken in Russia, East Europe, and/or Eurasia. REEES is one of a select few National Resource Centers for Russian, East European, and Eurasian Studies funded by the US Department of Education. Our many areas of focus include subjects such as the transformations of post-communist societies, history, foreign policy and international relations, anthropology, music, film, and contemporary culture and literature's. Recognizing that regional boundaries are constantly contested and redefined, our geographic scope includes but is not limited to Russia, Eastern and East Central Europe, the Baltic states, Central Asia, the Caucasus, the Balkans, and Turkey.

Language Proficiency

Demonstration of language proficiency equivalent to two years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish and Greek).

Content Courses

Completion of five approved Russian, East European, and Eurasian area studies courses, including four courses from at least two departments other than the student's home department, for a total of 15 credits. Courses for the certificate are allowed to count towards other credentials (i.e. majors, minors, certificates).

Digital Portfolio

Creation of a personal website to highlight the student's research, coursework, co-curricular activity, and other certificate-related accomplishments.

15 Credits

Special Academic Opportunities

Special academic opportunities provide students with ways to augment their education and experience with expanded study programs both on and off campus, in both university and professional settings.

Area of Concentration (subplans) and Minors (plans)

Some graduate programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. A graduate minor offered by the faculty at the Pittsburgh campus is available to any graduate student enrolled in an academic degree program on the campus provided that the school from which the student is graduating recognizes this minor. See the Schools, Departments, and Programs section of this bulletin for available areas of concentration and minors.

Certificate Programs

Students may enrich their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed at the start of the Schools, Departments, and Programs section of this bulletin.

A certificate program at the graduate level is a coherent set of courses and related work in a particular area. Most certificate programs require a minimum of 15 credits, of which 12 credits must be earned at the University of Pittsburgh. The certificate may appear on the transcript as a degree goal and will appear on the final transcript as an awarded certificate.

A student must be formally admitted into a certificate program. The requirements for each certificate vary and students should contact the certificate program director.

Cross-Registration

Carnegie Mellon University, Duquesne University, the Pittsburgh Theological Seminary, Robert Morris University, and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the five institutions in the fall and spring terms. See Cross-Registration in the Registration section of this bulletin for further details.

Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. These programs may result in a student earning two separate master's degrees, a master's and a first-professional degree, or a master's or first-professional degree and a doctoral degree, but never result in a student earning

two separate doctoral degrees. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. The same course, examination, or thesis may be used to fulfill requirements only if so specified in the documents formally establishing the joint- or dual-degree program approved by the University.

Students must be admitted to both academic programs offering the dual or joint degrees being sought and must graduate from both degree programs at the same time. Students are advised to see the individual school for other specific requirements that apply.

Course Information

Please note, when searching courses by Catalog Number, an asterisk (*) can be used to return mass results. For instance a Catalog Number search of " 2 " can be entered, returning all 2000-level courses.*

Accounting

BUSACC 0030 - FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
Helps students become informed users of firms' external financial accounting reports. The basic structure and contents of such reports and the process by which they are prepared will be studied. Discussion will involve what items are included in financial accounting reports, how such items are measured, and how various economic events affect the reports. An understanding of what can be inferred from the reports about the past performance, present position, and future prospects of the firm will be developed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECON 0100 or 0102 or 0103 or 0105 or 0110 or 0115; PROG: College of Business Administration

BUSACC 0040 - MANAGERIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
Introduces students to the basic terminology and concepts of cost accounting, including product costing, budgetary control, responsibility accounting, and the use of cost information in resource allocation and other managerial decisions. Textbook material and various applications in actual organizations are used to engage students in applying the concepts and methods that have been developed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or ACCT 0115 or ACCT 0201; PROG: College of Business Administration

Aero-Space Studies

AFROTC 1000 - AIR FORCE ROTC INDEPENDENT STUDY

Minimum Credits: 3
Maximum Credits: 3
This independent study course offers Air Force ROTC cadets the ability to complete pre-approved AFROTC coursework outside of the standard academic term or regularly scheduled class times. This option is designed for cadre-approved students pursuing early graduation or those participating in study abroad programs, and it ensures continued progress toward program requirements. Eligibility is limited to students currently enrolled in the AFROTC program and with cadre approval. Coursework and evaluation methods are determined at the discretion of cadre.

Grade Component: Letter Grade

Africana Studies

AFRCNA 0540 - SWAHILI 1

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to Kiswahili (Swahili), a language that unites a vibrant community of more than 200 million speakers across East and Central Africa and elsewhere around the world. In this proficiency-oriented course, students will explore the basic sound patterns of the language, its fundamental sentence patterns, and basic vocabulary, forming a solid foundation for speaking, listening, writing, and reading skills in Kiswahili. Emphasis is placed on communication and the cultural context within which Kiswahili is used. Classes are interactive and engaging, and emphasize the use of language as a tool for real-life communication skills. Students will be provided many opportunities to practice and use Kiswahili in meaningful contexts and to interact with authentic materials like music, movies, and print media. By the end of this course, students should be able to understand and use basic words, memorized phrases, and simple sentences, ask and answer simple yes/no questions and some simple information questions, and engage in simple, slow-paced conversations about topics regularly encountered in daily life.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 2031 - CRITICAL AFRICANA PEDAGOGY

Minimum Credits: 3
Maximum Credits: 3
This seminar examines the arts of teaching and learning in Africana Studies. Students are introduced to Africana-centered pedagogical tools while also being exposed to resources from the University's Center for Teaching and Learning. In the process of learning the fundamentals of Africana pedagogy and being introduced to the pioneers of Africana pedagogy, students learn how to weave African and African diasporic politics, economics, history, philosophy, psychology, religion, literature, arts, music, and culture to create different Africana-centered syllabi.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

AFRCNA 2083 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Different sub-topics for individual sections will be denoted in notes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

AFRCNA 2230 - TRANSNATIONAL CONNECTIONS AFRICAN AMERICAN AND AFRO-LATINOS

Minimum Credits: 3
Maximum Credits: 3
The study of the African American and Afro-Latinos experience is organically related to studies of the wider African Diaspora and Global Africa, of which the past and present trajectories of African Americans and Afro-Latinos are an integral part. Over the years, some of the department's faculty and postdoctoral fellows have undertaken various projects that examine the navigation of diasporic landscapes of ethno-racial difference, social inequality, and struggles for the dignity of full humanity.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2309 - AFRICAN FEMINISMS, MOVEMENTS AND CONTENTIONS

Minimum Credits: 3
Maximum Credits: 3
The African Feminisms course is designed to introduce students to the strands African feminisms, their evolution, the debates and thoughts that shaped them and what they all embody. The course will explore both the intellectual and the movement dynamics that have shaped the

political project of African feminisms as a label that coalesce a multiplicity of ideas rooted in Africa's position shaped by imperialism colonialism, capitalism, religion, culture and patriarchy. In particular, the course will stimulate students to think beyond labels to identify individual and group actions that embody the feminist ethos of equality, equity, human rights sovereignty of the state and women's bodies among others. The course will deepen understanding of African feminisms through a contextualization of the emergence of the intellectual projects that characterized them and the movements that articulate the various strands. Through history and contemporality, the course will create the space for the discussion of contentions and contestations of African feminisms and how they push the boundaries for understanding feminism in general.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2340 - LITERARY PAN-AFRICANISM

Minimum Credits: 3
Maximum Credits: 3
At the intersection of history and literature, this course is a study of the phenomenon of Pan-Africanism, or global unity, cooperation, and mutual cultural and political kinship among people of African descent, as it appears in Africana literatures. Students will explore the three primary theoretical orientations to Literary Pan-Africanism, contextualize Pan-Africanism in tandem with related concepts of transnationalism and internationalism, and explore both fiction and nonfiction genres that represent Diasporan and African experiences of return, heritage travel, and multidirectional migration.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2345 - INEQUALITIES IN AFRICAN DIASPORA LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course explores literary portrayals of inequalities in fiction by African American, Caribbean, and African women writers. Using contemporary novels, the course focuses particularly on inequalities associated with people's class position. Class has been at the center of a number of debates due to recent dramatic (and traumatic) fluctuations in global economic transactions. Using a range of critical perspectives, we will examine how women writers within the African Diaspora portray the impacts of class and its interconnections with matters such as employment, housing, and education. Students will conduct analyses of the cultural, historical, and theoretical contexts surrounding the literary works while also evaluating key literary features, such as voice, language, structure, and style, to better comprehend the depictions of characters' quest for self-fulfillment. The course uses a variety of pedagogical approaches.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2405 - MENTAL HEALTH IN THE BLACK COMMUNITY

Minimum Credits: 3
Maximum Credits: 3
This course explores the mental health of Black individuals from an Afrocentric perspective and worldview. We will examine how historical, social, and political factors have influenced their mental health, with a particular focus on the transatlantic slave trade, systemic racism, and decolonization. Our analysis will draw on empirical research, literature, historical records, and multimedia. We will also explore the intersection of race, culture, and mental health, further examining the impact of gender role socialization, cultural resilience and resistance, communal support, and systemic racism on mental wellness within the Black community. The course will cover current topics and modern practices.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2450 - AFRICANA CULTURAL MEMORY

Minimum Credits: 3
Maximum Credits: 3
In the academy, in both national and international contexts, cultural memory/ transcultural memory studies are orientations to memory from the perspectives of Holocaust, war, migration, trauma, and exile, but there are gaps in the scholarship that do not yet deliberately or coherently address the Africana experience. As a new contribution to intellectual discourse in the discipline of Africana Studies, this course corresponds to innovative, ground-breaking, and emergent ideas and scholarship on Africana Cultural Memory Studies as a sub-field of Africana Studies.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2728 - TRANSNATIONAL ISSUES IN AFRO-LATIN AMERICAN AND AFRO-LATINX STUDIES

Minimum Credits: 3
Maximum Credits: 3
This seminar course will address hemispheric themes in Afro-Latin American and Afro-Latinx Studies. These will include conceptual frameworks that center human agency alongside political and social constraints in the transnational processes of migration; community formation, linked issues including invisibility, representation, civil rights, and social and environmental justice; the intersectionality of race, gender, and ethnicity in identity adaptation, and the use of information, the arts, and technology/digital spaces to foster knowledge, understanding, and diasporic connectivity. Students will be encouraged to make connections with African American and/or other diasporic populations. Students will conduct research and present their findings and analysis in an array of formats, such as via a traditional research paper, an exhibition of select archival materials, a short documentary-style video, or a curriculum development project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

AFRCNA 2750 - AFRICANA STUDIES PROSEMINAR 1

Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to familiarize graduate students with some of the key texts and debates in Africana Studies concerning the relationship between racial slavery, colonialism, and freedom movements in Africa and the African diaspora. Beginning with the Haitian Revolution, much of black freedom movements have advocated for group solidarity and cohesion in the face of often overwhelming conditions of servitude, enslavement and coercion within the political economy of slavery and the moral economy of white supremacy. Ideas and practices of freedom, however, articulated by political actors and intellectuals alike, have been as varied as the routes to freedom itself. As expressed by C.L.R. James, W.E.B. Dubois, Aime Cesaire, Frantz Fanon, and others' ideas and practices of liberty, equality, and citizenship within many African and Afro-descendant communities have revealed multiple, often competing forms of socio-political imagination. Students will engage these and other authors in an effort to understand and craft a genealogy of Africana thoughts and practices.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2850 - AFRICANA STUDIES PROSEMINAR II

Minimum Credits: 3
Maximum Credits: 3
As a result of migration processes, Black subjects have challenged and reconfigured local, global, and national identities. This seminar will introduce students to a range of theories about diaspora, transnational migration, and globalization from the perspective of Africana Studies. Students will explore how Africana methodology complicates these theories and paint a much more complex idea of what is understood as migrant communities, displaced communities, exiles, enclaves, ghettos, and refuge communities.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2860 - AFRICANA RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3
This seminar explores how Africana scholars formulate their research questions and design their methodologies. It explains how they use a variety of methodological approaches for conducting research in Black communities worldwide and creating new ideas that contribute to the advancement of Africana Studies scholarship. Students will explore how humanities and the social sciences research methodologies complement the interdisciplinary characteristic of Africana Research Methods. Students will be exposed to a variety of award-winning manuscripts and research projects that followed an Africana-centered research methodology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

AFRCNA 2880 - COMPREHENSIVE RESEARCH PAPER

Minimum Credits: 3
Maximum Credits: 3
This course grants credit for supervised research on an approved comprehensive paper. Students may earn up to 3 credits in any term before or during final paper submission for the comprehensive requirement. Guidance should be provided by the student's committee chair or co-chair.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

AFRCNA 2881 - CANDIDACY EXAM HOURS PREP

Minimum Credits: 1
Maximum Credits: 9
This course provides credit for supervised research associated with preparation and completion of candidacy exams. Students can earn up to 9 credits, typically during the semester when they take their candidacy exam. Guidance is provided by the Candidacy chair, committee chair, or committee members.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

AFRCNA 2882 - DISSERTATION PROSPECTUS RESEARCH

Minimum Credits: 1
Maximum Credits: 12
This course supports students preparing their dissertation prospectus defense, with guidance provided by the dissertation chair or co-chair.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

AFRCNA 2883 - DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 12
Students work on a dissertation research project guided by their dissertation chair or co-chair.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad LG/SNC Basis

AFRCNA 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 12
Graduate students desiring to research or carry out a project in an area not normally available in a regular course or to study a subject not dealt with thoroughly in a seminar may take AFRCNA 2902 under the supervision of a faculty member. Students must see the Department of Africana Studies advisor for special permission.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

AFRCNA 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 12
Graduate students who are preparing for required exams, such as the comprehensive examination, or who want to pursue an independent program of study, research, or reading with a faculty member may register for AFRCNA 2990. Students must see the Department of Africana Studies for special permission
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

American Sign Language

ASL 2909 - SPECIAL TOPICS IN ASL

Minimum Credits: 3
Maximum Credits: 3
This course will be a topics course, meaning that the specific content of the course will change each time the course is offered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Anthropology

ANTH 1563 - PEOPLES OF THE NORTH: PAST AND PRESENT

Minimum Credits: 3
Maximum Credits: 3
This seminar will examine key social, cultural, and technological developments that occurred in the far north. We will explore a range of case studies from early occupations of the north to later prehistoric and historic developments. We will critically examine the dynamic nature of the environment and ecology of the north and the creative ways that human societies have adapted to these challenging conditions. Case studies will include early hunter-gatherer-fisher lifeways across North America, mobility and colonization processes of the Vikings in Iceland and Greenland, ritual and monument construction of early farming communities in northern Europe, and early hunters and herders across Siberia and Mongolia. The final section of the course will focus on present day populations of the north and examine the ways in which geopolitical stresses, climate change, and territorial loss are impacting the lifeways of these populations and what strategies are being implemented to counter these dramatic changes.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1737 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1
Maximum Credits: 9
This course involves directed research and writing oriented towards the completion of a master's thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ANTH 2001 - NAVIGATING THE DISCIPLINE

Minimum Credits: 1
Maximum Credits: 1
This is the first part of a two-course sequence (one credit per term) required of all first-year anthropology graduate students. In the fall term, students will learn how to navigate the first years of the graduate program at Pitt, get to know the faculty and each other, begin discussing research interests and practicing presentation skills, learn some of the ins and outs of grants and publishing, and consider possible professional trajectories after the Ph.D.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2002 - ANTHROPOLOGICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This is the second part of a two-course sequence (one credit per term) required of all first-year anthropology graduate students. In the fall term, students will learn how to navigate the first years of the graduate program at Pitt, get to know the faculty and each other, begin discussing research interests and practicing presentation skills, learn some of the ins and outs of grants and publishing, and consider possible professional trajectories after the Ph.D.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2490 - LINGUISTICS ANTHROPOLOGY CORE COURSE

Minimum Credits: 4
Maximum Credits: 4
This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Specific topics include: approaches to signs and significance; linguistic relativity (relationships between habits of speech, thought, and action); analysis of conversation and interaction; relationships between meaning and intention; models of variation and change; linguistic dimensions of cultural stereotypes; and the means by which languages, styles, and other aspects of cultural patterning, can be mapped onto populations. Throughout the course we pay particular attention to how tools from linguistic and semiotic anthropology can be applied to the study of topics other than language ' as a framework for ethnography, for textual research, and for the study of material culture.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2491 - LINGUISTICS ANTHROPOLOGY CORE COURSE

Minimum Credits: 3
Maximum Credits: 3
This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Specific topics include: approaches to signs and significance; linguistic relativity (relationships between habits of speech, thought, and action); analysis of conversation and interaction; relationships between meaning and intention; models of variation and change; linguistic dimensions of cultural stereotypes; and the means by which languages, styles, and other aspects of cultural patterning, can be mapped onto populations. Throughout the course we pay particular attention to how tools from linguistic and semiotic anthropology can be applied to the study of topics other than language ' as a framework for ethnography, for textual research, and for the study of material culture.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2501 - ARCHAEOBOTANY LAB METHODS: PLANTS, PEOPLE, & PLACES

Minimum Credits: 3
Maximum Credits: 3
This class introduces you to the objectives, methodologies, and applications of archaeobotany and provides you with hands-on experience working with plant remains found in archaeological sites. Archaeobotanists study plant remains to understand how ancient people interacted with their surroundings, sustained themselves, and used food to express social and political relationships. This course is designed as a practical laboratory experience, where each week, you will participate in seminars and laboratory sessions to develop the necessary skills for independent archaeobotanical research. We will analyze macrobotanical remains such as seeds, nuts, wood, and other tissues, which are often visible under low-powered microscopes. Students will learn basic identification skills, create a comparative collection, and analyze archaeobotanical samples from an archaeological site. In addition to sorting the samples, we will analyze the data, prepare interpretive reports, and discuss the results of our analyses.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

ANTH 2510 - LITHIC ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
For roughly 3 million years before the use of metals, human populations relied on making and using stone tools to survive-and thrive- in environments all over the world. Stone tools both compose a huge percentage of the archaeological record and serve as a direct reflection of human activities, making their analysis fundamental to studying the past. This course engages students with the practical and statistical methodologies and approaches archaeologists use to identify stone tools and to extract behavioral information from them. We will examine knapping mechanics, raw material economy, mobility, technological strategies, tool use, and discard behavior. Students learn how to identify the stone tools that characterize major prehistoric periods and discuss controversies about stone tools' role in human evolution, behavioral complexity, origins of agriculture, and craft specialization. By combining hands-on replication experiments, lab analysis, methods coursework on quantitative and qualitative statistical analyses, and discussion, students will learn everything necessary to carry out stone tool analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2513 - SELECTED ARCHEOLOGICAL PROBLEM

Minimum Credits: 3
Maximum Credits: 3
Examines current topics and controversies in anthropological archaeology. Special problem areas vary from year to year.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2516 - CHIEFDOMS

Minimum Credits: 3
Maximum Credits: 3
Chiefdoms are defined more by what they are not than by what they are: societies whose hierarchical organization makes them non-egalitarian, but that lack the bureaucratic institutions of the state. Seen as stepping stones in the evolution of states or as part of another evolutionary trajectory entirely, chiefdoms are the subject of debate, including just in what sense, or even whether, the word "chiefdom" has any utility. This seminar discusses how chiefdoms can be investigated and understood archeologically, using materials from all the Americas, Polynesia, Europe, and other areas.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies, Global Studies, Latin American Studies

ANTH 2517 - ARCHEOLOGICAL METHOD AND THEORY

Minimum Credits: 3
Maximum Credits: 3
This course surveys contemporary method and theory in anthropological archeology. It begins with varieties of high level theoretical approaches to a study of prehistory, including cultural historical, cultural evolutionary, cultural ecological systems-oriented, Marxist and post-Procession Archaeologies. It covers several methodological problems; construction of research designs, uses of analogy, style, classification and site level or regional level spatial analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2518 - INTRODUCTION TO ANTHROPOLOGY OF WATER (IN)SECURITY

Minimum Credits: 3
Maximum Credits: 3
Water is essential to life, yet billions worldwide experience water insecurity. This course is concerned with the cultural, political, and biological dimensions of water scarcity, access, and (in)justice. The goal of this course is to introduce students to the many ways that water insecurity impacts humans around the world. We will explore why there is such a variety in water insecurity worldwide and the influences on access to water. We will discuss what the international recommendations for safely managed water are and the social consequences of water insecurity. Using ethnographic case studies, selected interdisciplinary readings, and documentaries, students will learn how communities around the world understand, manage, and struggle over water through topics including, but not limited to, health, gender and inequality, governance and infrastructure, climate, and Indigenous perspectives of water as a living being. Learning Objectives and Outcomes By the end of the semester, students will be able to: * Define key concepts such as water insecurity, water justice, and political ecology. * Analyze how cultural, political, and environmental factors shape experiences of water insecurity. * Connect water to broader anthropological themes such as identity, inequality, colonialism, climate change, and governance. * Evaluate interventions and policies addressing water insecurity * Communicate anthropological insights about water insecurity to public audiences. * develop critical thinking and writing abilities to reflect on the multi-dimensional causes and consequences of water insecurity and the appropriateness of potential solutions.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ANTH 2524 - ARCHELOGICAL DATA RECOVERY AND ANALSIS 2

Minimum Credits: 4
Maximum Credits: 4
Advanced analysis of archeological data, primarily quantitative. This course carries on where ANTH 1534 leaves off. Topics include sampling, design of variable sets, advanced database management, computer graphics (plotting, contouring, fishnet surfaces), multivariate statistics (factor analysis, cluster analysis, multi-dimensional scaling), and analysis of spatial distributions (nearest neighbor, clustering, and graphical approaches).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2531 - HOUSEHOLD ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the role of the household as an important analytical unit in anthropological archaeology. Topics to be addressed include: archaeological definition of residential units, modeling the evolution of domestic life, analysis of spatial patterns at the household level, and proxemic and symbolic approaches to the prehistoric dwelling. The seminar will also consider the relationship between households and larger societal structures and the cross-cultural compositional and dynamic characteristics of households will be examined.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Latin American Studies

ANTH 2532 - ADVANCED TOPICS IN GIS: ANALYSIS OF REGIONS AND RESOURCES

Minimum Credits: 3
Maximum Credits: 3
A brief introduction to GIS techniques in the context of archaeological analysis. The focus will be on how to accomplish analytical tasks of proven utility in archaeology, using autocad map when a vector-based program is most useful and Idris when a raster-based is better. The course is designed to complement ant 2541: regional settlement patterns, although the GIS techniques dealt with are applicable to other scales of analysis as well.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2533 - ANCIENT STATES IN THE NEW WORLD

Minimum Credits: 3
Maximum Credits: 3
Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among pre-Hispanic states in MesoAmerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4
Maximum Credits: 4
An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2536 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 1

Minimum Credits: 1
Maximum Credits: 1
A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the fall term, and is concluded during the spring term in ANTH 2537: special topics in comparative archaeology ii. In order to receive credit students must complete both parts of the seminar (I and II).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2537 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 2

Minimum Credits: 2
Maximum Credits: 2
A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the spring term, and is the conclusion of ANTH 2536: special topics in comparative archaeology i offered during the preceding fall term. In order to receive credit students must complete both parts of the seminar I and II).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2539 - BASIC ARCHAEOLOGICAL LABORATORY METHODS

Minimum Credits: 3
Maximum Credits: 3
In this course we focus on learning basic laboratory techniques in archaeology. Field techniques are the primary means by which archaeologists acquire data. Laboratory techniques consist of methods for the coding and analysis of data. We will not emphasize statistical techniques, but rather practical experience in basic methods for the analysis of lithic, ceramic, and other archaeological materials. We will also place especial emphasis on research design, synthesis of data, and interpretation of results. In much of the course, you will work with actual archaeological material from various prehistoric sources.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2541 - REGIONAL SETTLEMENT PATTERNS

Minimum Credits: 3
Maximum Credits: 3
This seminar will take up both theoretical and methodological aspects of regional settlement pattern studies in archeology. Appropriate objectives for settlement patterns will be discussed. Advantages and disadvantages of different field and analytic methodologies in terms of their effectiveness in achieving clearly defined goals will be explored. This exploration will be pursued primarily through critical examination and reanalysis of data from primary reports of regional settlement patterns studies from different parts of the world.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Latin American Studies

ANTH 2550 - ETHNOARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will focus on issues in ethnoarchaeology and archaeological implications. Some of these issues have to do with theory and the role of analogy in understanding the past. Others concern how we can use material remains to make inferences about social groups including kinship, organization, ethnicity, work groups, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2551 - PEOPLES IN CONTACT

Minimum Credits: 3
Maximum Credits: 3
This course examines patterns of cultural, economic, biological, and linguistic exchange and interaction through major historic and pre-historic population migrations. We aim to assess how interactions between diverse communities at a micro-scale shape broader population movements. Multidisciplinary data sets are employed to detect and discuss evidence for the emergence of new group identities and strategies in contact and frontier zones. We discuss the long-term archaeological and anthropological implications for these instances of "ethnogenesis" and challenge traditional unilinear models for tracing and understanding migrations in the human past.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2553 - ARCHAEOLOGICAL CERAMICS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide you with a broad introduction to archaeological ceramics. We will cover a number of topics during the course so that you will be conversant in the archaeological literature on pottery and will have a greater understanding of the types of research problems that are most readily investigated through the analysis of archaeological ceramics. You will also gain experience in handbuilding pottery vessels so you have an understanding of pottery from the perspective of the potter and will know how the limitations and possibilities within this medium affect both the manufacture and processes used in creating pottery. We also discuss a variety of archaeological analyses of pottery. Readings drawn from archaeological, ethnoarchaeological, and material culture literature are an important component of this course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2555 - WORKSHOP IN PUBLISHING

Minimum Credits: 2
Maximum Credits: 2
This one-credit graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2556 - ZOOARCHAEOLOGY

Minimum Credits: 4
Maximum Credits: 4
Animal remains are often some of the most frequently encountered material remains recovered from archaeological sites and therefore provide crucial information relating to subsistence strategies, animal husbandry patterns, paleoenvironments and a wide range of other human behaviors. This course provides an introduction to the main elements of Zooarchaeology research and will focus on the recovery,

identification and contextual analysis of animal remains. The course will provide both laboratory training as well as seminar discussions in order to evaluate the significance of Zooarchaeology within archaeological research. Participants will therefore have the opportunity to gain practical laboratory skills in identification and analysis and to learn how this information can be applied to the study of complex societies in both the Old and New World.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

ANTH 2563 - PEOPLES OF THE NORTH: PAST AND PRESENT

Minimum Credits: 3
Maximum Credits: 3
This seminar and writing intensive course will examine key social, cultural, and technological developments that occurred in the far north. We will explore a range of case studies from early occupations of the north to later prehistoric and historic developments. We will critically examine the dynamic nature of the environment and ecology of the north and the creative ways that human societies have adapted to these challenging conditions. Case studies will include early hunter-gatherer-fisher lifeways across North America, mobility and colonization processes of the Vikings in Iceland and Greenland, ritual and monument construction of early farming communities in northern Europe, and early hunters and herders across Siberia and Mongolia. The final section of the course will focus on present day populations of the north and examine the ways in which geopolitical stresses, climate change, and territorial loss are impacting the lifeways of these populations and what strategies are being implemented to counter these dramatic changes.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2565 - ARCHAEOLOGY OF FOODWAYS

Minimum Credits: 3
Maximum Credits: 3
What counts as food? Food is a universal requirement for humans to survive. Although universal, different cultures across the globe have developed cuisines that are diverse in forms, tastes, and meanings. Beyond production and sustenance, the acts of cooking, eating, and drinking bind people together through symbolism, shared experiences, and status. Through both inclusionary and exclusionary strategies, food and drink serve to define identity, strengthen social bonds, and enact memory. In this course, we will learn about the origins of cooking over 1 million years ago, the 'real' Paleodiet, how early states used beer to cement social alliances, and how Columbus's discovery of the Americas spurred global-scale shifts in food and agriculture. The course begins with an overview of how anthropologists and archaeologists study food and then moves through time, beginning with our early hominid ancestors and ending with colonialism.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2575 - UNRAVELING THE ANTHROPOCENE

Minimum Credits: 3
Maximum Credits: 3
Our current moment in planetary history is one in which Earth's environmental systems are dominated by humans. Scientific consensus is that this period - called the Anthropocene - can (and should) be distinguished from what went before and what will come after. Still debated, however, are questions about the timing, nature, and outcomes of the Anthropocene. This course offers a critical introduction the Anthropocene, and explores the ways that archaeology offers insights into interactions between human societies and their environments. We will cover the underlying theoretical issues, survey the methodologies employed, and critically examine cross-cultural narratives about past human-environment interactions that archaeologists produce. Drawing on these conceptual tools, we will examine debates about the origins and antiquity of the Anthropocene, its identification in the archaeological record, and the uses of the concept by in the present. Finally, we will use our discussions about the Anthropocene to answer important question facing humanity today: How sustainable are the current ecologies of this planet? What kinds of changes can we expect in our own lifetimes?
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2587 - ARCHAEOLOGY CORE COURSE

Minimum Credits: 3
Maximum Credits: 3
A broad introduction to current archaeological thinking on cultural evolution, focusing on early hunters and gatherers, the rise of agriculture and settled village life, the growth of complex societies, and the development of cities. Examines the recent intellectual controversies surrounding these topics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2603 - HUMAN SKELETAL ANALYSIS

Minimum Credits: 4
Maximum Credits: 4
Make no bones about it--the human skeleton provides a range of information about the individual, such as their biological sex, activity level and health. The extraction of this information rests on the identification of each skeletal element. This methods course traces the development and growth of the human skeleton until it is fully mature. Participants will learn how to: identify complete and fragmentary adult bones; identify complete nonadult bones; and distinguish between animal and human bones. Additional topics may include normal and abnormal variation; the identification of muscle insertion sites and their implications for physical activity; the effect of disease on bone and the methods used to estimate the individual's profile (age at death, biological sex, stature and ancestry). This course is essential for students considering anthropological careers in forensic anthropology, bioarchaeology and paleontology, as well as students pursuing careers in health sciences, biomechanics and biology. The course features lectures and required lab time with written and practical exams.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

ANTH 2603 - THE HUMAN SKELETON

Minimum Credits: 4
Maximum Credits: 4
The human skeleton provides a range of information about individuals, such as their lived experiences, activity level, and health. The extraction of this information rests on the understanding of the dynamic biology of bone and its many functions, and the identification of skeletal elements and fragments. This course in human osteology includes lecture and lab components to facilitate student understanding of bone biology and morphology. Real and cast bone is used in the lab. In this course, participants learn: bone biology and histomorphology - cellular and macro levels; the function of bone; processes of bone and dental development, growth, and senescence; and the basics of bone biomechanics. Students also learn how to identify complete bones and teeth and their distinguishing features and landmarks. Students apply knowledge of complete adult bones to identify bone fragments and child bones. This course is foundational for students considering anthropological careers in forensic anthropology, bioarchaeology, paleontology and paleopathology, as well as students pursuing careers in health sciences, medicine, biomechanics and biology.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

ANTH 2612 - EVOLUTIONARY THEORY 1: A HISTORY OF ALTERNATIVE IDEAS 18TH CENTURY UNTIL THE SYNTHESIS

Minimum Credits: 3
Maximum Credits: 3
This course will be an in-depth survey of the historical development of evolutionary thought, with emphasis on the alternatives to theories that became incorporated into the grand evolutionary synthesis and those alternatives that have emerged since. Students will read and annotate original works in comparative anatomy, embryology, paleontology, genetics and lead class discussion based on this literature.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2617 - PALEOPATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Paleopathology is the study of disease and its process among ancient peoples using primary evidence from Human Skeletal remains. Additional lines of inquiry draw on archaeological, ethnographical, clinical and documentary sources to aid in our interpretation. In this course you will learn how to recognize abnormal bone, differentiate between disease processes, describe abnormal bone changes, evaluate recording methods and investigate the epidemiological history of various disease processes. The impact of disease upon the individual and ancient societies will be considered throughout the course and in student research. The combined lecture, seminar and laboratory format provides a comprehensive foundation of skeletal pathology, experience with recording methods and an understanding of the relationship between disease, environment, the individual and their community.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2619 - ADVANCED SKELETAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course provides the student with an in-depth understanding of the skeletal features used to develop the osteobiographic profile (e.g., Age, sex, stature, ancestry, handedness, etc.) Of an individual. This analysis is essential for forensic identification and forms the foundation for the reconstruction of ancient individuals and their life-ways. Each student will select some aspect of skeletal analysis and present an overview of the bone biology, the history of the analytical methods, the problems and advantages of each method, modifications that others have made to address these issues, and the current state of knowledge. In the past, some students have proposed new methods of analysis. This will be complemented by a lab exercise designed by the student that will provide data for interobserver analysis of various techniques. The results of this lab will be presented as posters which will be posted on CW at the end of the term. Prior osteological experience is required.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2620 - SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
Examines current topics and controversies in physical anthropology. Special problem areas vary from year to year.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2620 - SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
Examines current topics and controversies in physical anthropology. Special problem areas vary from year to year.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2625 - BIOARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its

response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an impression on the deceased. The individual is not just a biological shell to be cleaved from its cultural context, but rather forms a social package contingent upon culture during life and in death. We will examine social change and behavior from the perspective of the deceased within geographically diverse funerary contexts. We will evaluate factors that may influence the funerary context, such as differential burial practices and preservation. We will examine traditional labels to explore the topics of gender, biological vs. chronological age, and life course thresholds. Lectures will be supplemented with a practical component as well as writing exercises.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ANTH 2626 - WOMB TO TOMB

Minimum Credits: 3
Maximum Credits: 3
This course will address basic theories and principles pertaining to the human lifecycle from both a biological and cultural point of view. It will also discuss evolutionary changes in human growth patterns and assess environmental and genetic influences on human populations both past and present.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ANTH 2630 - PHYSICAL ANTHROPOLOGY RESEARCH

Minimum Credits: 3
Maximum Credits: 3
The student conducts independent research developed in consultation with, and carried out under the supervision of, a faculty member in biological anthropology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ANTH 2688 - BIOLOGICAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 3
Maximum Credits: 3
This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2715 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2
Maximum Credits: 2
Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Asian Studies, Global Studies

ANTH 2720 - POETICS AND POLITICS OF ETHNOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
The 1980s was described as "an experimental moment" in the human sciences and as a time of "crisis of representation" when anthropology has taken a literary, experimental, reflexive, modern, late-modern, postmodern, textualist turn. This seminar examines this experimental moment, its history and anthropological precursors, the critiques that have followed, and the suggestions for the future of ethnography and anthropological writing that have ensued. Readings include a number of recent experimental ethnographies as well as a sample of older "classics".
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2724 - THE ANTHROPOLOGY OF SCIENCE: GLOBAL PERSPECTIVES

Minimum Credits: 3
Maximum Credits: 3
Science and technology are integral to contemporary societies. Understanding how science is produced and how it shapes daily life is a crucial challenge for anthropologists, who have studied the production of scientific knowledge in labs, hospitals, field sites, and elsewhere. While early studies of science as a cultural practice focused primarily on the U.S. and Europe, science and technology are produced and consumed globally. Through analyses of case studies of biotechnology, medicine, genetics, conservation, agriculture, energy, climate science, and computing around the world, this class will investigate the global dynamics of science and technology. Juxtaposing readings on different scientific fields from around the globe, we will look for recurring themes that connect these studies. What happens when science and technology travel, and how do new places emerge as centers of knowledge production? How are culture, identity, technology, and science linked?
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: MCSI - Sustainability Focused

ANTH 2725 - GLOBAL PHARMACEUTICALS

Minimum Credits: 3
Maximum Credits: 3
This course examines pharmaceuticals as cultural and social phenomena, following their development, production, marketing, and use around the globe. We will investigate a number of issues, including the growing number of drugs prescribed to Americans each year, the lack of access some populations have to essential medicines, the increasingly global nature of clinical trials, and the role of pharmaceutical companies in the opioid crisis. We will use the study of drugs and medicines to analyze the production of medical knowledge, changing perceptions of health and illness, and the role of the state and the market in the development and distribution of therapeutics. Pharmaceuticals bring together science, clinical practice, marketing, and consumerism, and this course will draw on anthropological research to trace the role they play in global flows of knowledge, capital, commodities, and people.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2730 - ENVIRONMENTS, HEALTH AND POWER

Minimum Credits: 3
Maximum Credits: 3
This graduate seminar examines anthropology that illuminates the connections between capitalism, colonialism, environmental crisis, land dispossession, and toxic exposure. Focusing on conservation, exploitation, contamination, and re-imagination, we will consider with how power operates in and through environment at a moment when human/nature relationships have become matters of life and death. Topics include Anthropocene/Plantationocene studies, coloniality & decolonization, infrastructure, affect, resistance, and repair.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ANTH 2731 - MEDICAL ANTHROPOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This course deals with topics surveyed in medical anthropology 1, looking at them in more ethnographic depth and with greater attention to current research findings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ANTH 2732 - THEORIZING FROM EX-CENTRIC SITES

Minimum Credits: 3
Maximum Credits: 3
In a recent essay, anthropologist Faye Harrison (2016, 170) calls on anthropologists to theorize from "ex-centric sites"-"Southern" locations, "particularly the peripheral zones where critical intellectual trajectories have been sustained despite trends toward erasure." Taking up Harrison's call, this advanced graduate seminar engages decolonial theories advanced by scholars from Southern locations or peripheralized social groups. We will critically engage the works of scholars like Anibal Quijano, Amie Cesaire, Christina Sharpe, David Scott, Faye Harrison, Franz Fanon, Jean Casimir, Michel-Rolph Trouillot, Nelson Maldonado-Torres, Walter D. Mignolo, Catherine E. Walsh, Yanick Lahens, Valentine Y. Mudimbe, Ramon Grosfoguel, Ng¿g¿ wa Thiong'o, and others. We will also explore how these scholars' ideas and methods may inform how we engage our research praxis.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2741 - ANTHROPOLOGY OF LAW

Minimum Credits: 3
Maximum Credits: 3
This course will examine anthropological analyses of law and law-like phenomena in a number of different societies, concentrating on the development of theory in this field. Since this theory reflects larger theoretical developments in anthropology and in post-war social science, the study of the anthropology of law is a case study in the development of modern theoretical paradigms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies

ANTH 2744 - GRANTS AND RESEARCH DESIGN

Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the formulation of individual research problems and research designs in preparation for thesis research. Course requirements center around the development of a research proposal which will include a research design, area and theoretical background, field techniques and procedures, methodology, data analysis, and significance of the research. Grantsmanship, including how to submit proposals to various agencies, will be explored.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2750 - CONTEMPORARY ANTHROPOLOGICAL THEORY

Minimum Credits: 3
Maximum Credits: 3

This seminar surveys recent developments in anthropological theory, with emphasis on social and cultural anthropology. Topics covered vary with interests of students and the instructor. The course centers on the close reading of several contemporary texts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: African Studies, Global Studies

ANTH 2755 - THE ART OF PUBLICATION

Minimum Credits: 3
Maximum Credits: 3
This graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.
Academic Career: Graduate
Course Component: Seminar

ANTH 2755 - THE ART OF PUBLICATION

Minimum Credits: 3
Maximum Credits: 3
This graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

ANTH 2763 - FIELD METHODS

Minimum Credits: 4
Maximum Credits: 4
Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2770 - PRECARITY AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
Crisis seems to have become the normalized condition in which we live our lives and make sense of the world around us. Each new iteration of this condition, caused by wars, natural disasters, and recently the Covid-19 pandemic, further cement our perception that crisis has become permanent. This perception is further fueled by neoliberal globalization that builds on what Naomi Klein conceptualized as disaster capitalism. Governments that adopt neoliberal economic policies, Klein notes, tend to exploit crises to introduce structural adjustment plans during times when populations are too beaten down to mount an efficient opposition. By doing so, neoliberalism

intensifies our sense of crisis as it grinds down our sense of security. Whereas theories of neoliberalism focus on the role of the economy in generating conditions of precarity, in recent years, scholars also started examining the social lives and cultures of this condition. Furthermore, they began exploring how conditions of precarity give us hope and galvanize our desire to reform our lives, reach out to others, and build new communities. This course will introduce students to theories and ethnographies of precarity, as well as works that analyze transformations in the ways we participate in the political domain to fight locally specific conditions of precarity. We will read texts by David Harvey, Isabell Lorey, Wendy Brown, Judith Butler, Michael Hardt and Antonio Negri, Sara Ahmed, Kathleen Stewart, Silvia Federici, Elizabeth Povinelli, Deva Woodly, and Susan Buck-Morss, among others. The course will be divided into three units that will build on each other: Theories of Precarity, Ethnographies of Precarity, and Theories and Ethnographies of Precarity Politics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2771 - GENDER AND THE STATE

Minimum Credits: 3
Maximum Credits: 3
This course will critically engage with scholarship that theorizes the relationship between gender and the state. We will discuss such topics as pronatalism as a form of governance, low birth society, the governmental regulation of sexuality, alternative economic practices, women's role in maintaining various forms of the commons, women's systemic mobilization to various genres of reproductive labor, and the reproductive justice movement. The course inquires whether we could think of declining fertility rates in the advanced capitalist world as both an effect and an expression of an enduring crisis in familial productivism, the social factory, and the prevalent system of wage labor, which no longer serves as fair mechanism of redistribution. We will examine governmental responses to these developments and feminist strategies to intervene in them. We will discuss how invisible labor is increasingly integrated into formal processes of capitalist accumulation through harnessing the unremunerated labor of communication and sociality especially in the service industries or through extracting surplus value from "the labor of love" in the context of reproduction. We will explore what forms of feminist activism and feminist politics emerge in the wake of chronic care deficit and women's growing unwillingness to assume the responsibility for filling in the void created by the neoliberal dismantling of the welfare state and, more recently, failures in the delivery of public services and breakdowns in global supply chains due to the COVID-19 pandemic.

ANTH 2782 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

ANTH 2788 - CULTURAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the anthropological study of human culture and society. We will examine how different modes of description and explanation in contemporary cultural anthropology are applied to various domains (e.g., How different peoples feed themselves, mate and have children, cooperate and fight with one another, deal with the inevitability of death, etc.). By comparing the ways the human beings cope with the natural environment and each other, we will seek a better understanding of ourselves and what it is to be human.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2807 - COMMUNITY ARCHAEOLOGY AND PUBLIC ENGAGEMENTS

Minimum Credits: 3
Maximum Credits: 3
Why and for whom do we study the past? Is community archaeology the new "New Archaeology"? Archaeology is performed in a variety of political and economic settings and for a range of reasons. In this class, we will examine the multiple stakeholders involved in the archaeological enterprise, and the often-conflicting demands they place on archaeologists as academics and citizens, with the goal of developing strategies that can improve diversity in the subfield and communication to non-academic groups. At a basic level, this class explores two interrelated questions: What "should" be the ultimate goals of archaeology? To what degree do we need to change what archaeology does to accomplish what it "should"? To address these concerns, we'll examine major criticisms of how archaeologists have interacted with communities and publics, but much of our time will focus on correctives that seek to overcome these limitations. In particular, we will consider calls for diverse "archaeologies" which incorporate alternate models and experiences of the past but sometimes challenge our basic notions about the field. We will also discuss the responsibilities that archaeologists have to communities and how we might envision future collaborative community archaeologies, even when the past is a painful topic. This is also a writing-intensive course. Writing assignments, revisions, and presentations are designed to help you practice and polish your writing. I will give you detailed feedback on drafts, and we will also peer-review sections in class. I strongly encourage you to pay attention to the feedback you receive from your professor and colleagues in your revised drafts and beyond this class.

Architectural Studies

ARC 2118 - ARCHITECTURE SINCE 1945

Minimum Credits: 3
Maximum Credits: 3
Treats the key developments in architecture throughout the world since World War II, including theory as well as practice. The course will focus on such figures as frank Lloyd Wright, Miles Van der Rohe, Le Corbusier, James Stirling, Eeko Saarinen, Louis Kahn, Kenzo Tange, Robert Venturi, Richard Rogers, and Norman Foster.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ARC 2137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Minimum Credits: 3
Maximum Credits: 3
By 1880 traditional American architectural values had broken down under a barrage of ornament and imported European styles. But at the same moment a new American architecture was taking shape to express the new wealth of post-Civil War America and its new social order. The next hundred years would see a succession of brilliant architects in Sullivan, Wright, Mies, Johnson and the pluralists of today. These individual successes only partially mask some major problems; both constitute the underlying themes of this course.

Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

ARC 2138 - BLACK BUILT AMERICA: ARCHITECTURES OF BLACK RESISTANCE IN THE UNITED STATES

Minimum Credits: 3
Maximum Credits: 3
This course offers a critical history of the Black labor, creativity, craftsmanship, engineering, and activism that built the United States of America. It is undeniable that Black Americans and African Americans have been brutally marginalized by the instruments of systemic racism including segregation, redlining, eviction, and more recently gentrification. In this class, however, that very real and continuing history of oppression is studied as the fuel for the creative agency of Black individuals and communities. Appropriating, intervening, and shaping the built environment became one of the many forms of Black resistance to racism and systemic injustices. In doing so, Black hands and Black minds shaped the very fabric of America's landscape. Our class begins and ends in Washington DC, posing important questions about the hidden and overt symbols of Black heritage in the nation's capital.

ARC 2152 - ROMAN ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
The course will examine the development of roman architecture from its origins in Etruria and central Italy to the middle empire (ca. 150 Ad). Special attention will be given to the relationship of architectural forms, types and functions to changes in roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between roman architectural forms and local traditions in the provinces to create a roman imperial "koine" will be treated only in passing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

ARC 2158 - ARCHITECTURE AND ENLIGHTENMENT

Minimum Credits: 3
Maximum Credits: 3
This course will examine architecture, city planning, interior design, and gardening in eighteenth-century Europe as the product of social, industrial, administrative, and intellectual transformations that began to radically challenge traditional spatial configurations and conventional approaches to building. In cosmopolitan centers like London and Paris, an unprecedented explosion of print media, rapid rises in literacy, and the development of a public sphere outside official power structures opened debate in the arts to previously marginal figures. A range of new voices thus emerged that impacted policy decisions in the urban realm and proffered advice and guidance in

thinking about aesthetics and artistic production. The rise of science held out the possibility that cities and institutions could be reshaped to improve human welfare through better hygiene and the expansion of commerce. Influential new classes defined by wealth or specialized knowledge generated the creation of building types for a range of new activities. Elite domestic space in particular reflects a wholesale transformation of social priorities motivated by the novel concept of privacy. Narrowly defined Renaissance discourses on the arts founded exclusively on the model of ancient Rome collapsed under an avalanche of data gathered in remote sites around the Mediterranean and through contact with more far-flung civilizations around the world. New intellectual paradigms reconfigured the relationship between individual and nature, between modern present and historical past. Consequently, the purpose of architecture mutated in the course of the eighteenth century as a bewildering range of new possibilities for shaping building and reshaping social relations were explored. Well before political revolution rocked European governments and toppled traditional hierarchies, the built environment served as a laboratory for experimentation and as a forum for reimagining society.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ARC 2162 - CAMPUS-COMMUNITY WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
Architects and designers have a vital role to play as thinkers and advocates who work with organizations and communities to help imagine ways to reshape the environments in which we live and interact. Over the course of the term, students will investigate the Pitt campus and surrounding Oakland neighborhoods, conduct original research using primary and secondary sources, and think critically and creatively about ways the environment can be shaped to make positive change. Each student will develop an original, written proposal for either [1] an intervention that responds to a need, enhances the experience of being at the university, or improves the quality of life on campus or in an adjacent neighborhood; or [2] a research project that could be continued in a subsequent term for independent study credit.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad Letter Grade

ARC 2181 - PITTSBURGH ARCHITECTURE/URBANISM

Minimum Credits: 3
Maximum Credits: 3
The course studies the physical environment of Pittsburgh; the topography, early settlement, the expansion of its industrial center, the post-war renewal, and the current shift from production to a service-based economy. A parallel study in the architectural history of Pittsburgh focuses on images of individual buildings from fort Pitt to the new skyscrapers. Student papers either expand research in building categories (industrial, domestic, etc.) or integrate the physical development of the region with its political and social history.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ARC 2182 - PITTSBURGH NEIGHBORHOODS

Minimum Credits: 3
Maximum Credits: 3
Pittsburgh Neighborhoods is a course where students learn about people, culture, history, and current issues that confront under-represented communities and neighborhoods in Pittsburgh. Throughout the semester, with direction from the instructor, students learn about and employ ways to see, document, and interpret a neighborhood by engaging the built environment, historical documents, and community members in storytelling. They approach the built environment as a cultural product, explore place as a fusion of material culture and human perceptions and practices, and frame questions of power around the politics of the built environment. In this class, we will employ methods that help us transcend the realm of the visual and explore the experiential and ephemeral. We will learn to observe with all our senses, listen to community members, and document life when in the field, and excavate and explore visual and textual records when in the archive. In doing so, we will adopt theories and methodologies from multiple fields, including urban/architectural history, cultural geography, anthropology, public history, and material culture studies.

ARC 2330 - GLOBAL PRESERVATION

Minimum Credits: 3
Maximum Credits: 3
The late-nineteenth and early-twentieth century debates regarding the role of the architectural monument as a signifier of the past, as a container of memory and more importantly authenticity, were the definitive moment in the institutionalization and professionalization of architectural preservation around the world. In a 1903 essay titled 'the modern cult of monuments,' art historian alois reigl claimed that while the creation of monuments (i.e. structures built to memorialize certain events or persons) had a long history that predates modernity, the 'cult of the monument' (i.e. the allocation of the monument as a unique and original object in a pre-ordained historical narrative of social and cultural evolution) came about as recently as the nineteenth-century. It is this coupling of the advent as well as the progress of modernity along with the formalization of systems of historic preservation that this course seeks to explore.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ARC 2340 - HERITAGE SITES

Minimum Credits: 3
Maximum Credits: 3
According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), heritage sites encompass sites of "outstanding universal value from the historical, aesthetic, ethnological or anthropological point of view." This course will develop the fundamental themes, ideas, and case studies required to analyze, understand and critically engage with heritage sites in a comparative and global perspective. We will begin charting the European origins of the western understandings of heritage and exploring the development of national and international heritage legislation, charters and organizations. The course will then explore emerging trends that challenge Eurocentric notions of heritage: from critical heritage studies to approaches that specifically focus on minorities, women, and indigenous groups, and the broader issues of human rights and development. Starting from the second third of the semester, case studies from different geographic areas, time periods and themes will be discussed: heritage sites and national identity; heritage sites and tourism; heritage sites and sustainable development; threats to heritage; negative and difficult heritage; heritage and human rights; heritage futures. Finally, we will discuss the increasing interest in bottom-up initiatives that focus on grassroots, people-centered approaches to foster community engagement and participation in the management, programming and interpretation of heritage.

Arts and Sciences

ARTSC 2200 - PRACTICUM ON UNIVERSITY TEACHING

Minimum Credits: 1
Maximum Credits: 3
This course in university teaching is designed for people who are teaching independently for the first time, or who have the flexibility in a recitation to design course materials and teach subject matter. It features the application of instructional principles to course development and materials.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

ARTSC 2901 - INTRODUCTION TO GRANT WRITING

Minimum Credits: 1
Maximum Credits: 1
This course will provide a hands-on introduction to the process of crafting a successful grant application, with students working to find funding opportunities based upon their individual research interests and ultimately putting together a final proposal document in a project-based environment.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

Astronomy

ASTRON 0413 - HONORS INTRODUCTION TO ASTRONOMY

Minimum Credits: 4
Maximum Credits: 4
This course will be an introduction to astronomy and astrophysics. The 4-credit honors course will consists of all aspects of the 3-credit course, including lectures and homework with additional problems tailored for this course. ASTRON 0413 includes an additional 50-minute class session each week. In these extra sessions, basic topics will be covered in more detail than in ASTRON 0113. These extra sessions will also involve significant problem solving and discussions of the derivations of fundamental results in astronomy and astrophysics. Students considering a major in physics, astronomy, or physics and astronomy are strongly encouraged to take ASTRON 0413 instead of ASTRON 0113.
Academic Career: Undergraduate

Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (MATH 0230 or 0235 or 0150 or 0231) and (PHYS 0110 or 0174 or 0475 or 0140 or 0150 or 0201)

ASTRON 3550 - STELLAR STRUCTURE

Minimum Credits: 3
Maximum Credits: 3
Stars are the most common astrophysical objects. They create most of the atomic elements and most of the observable optical light in the sky. This class provides an overview of the physics of stars and the interstellar medium. Topics will include hydrostatic equilibrium, nuclear processes, radiative transfer, metallicity and opacity, convection, stellar evolution, stellar explosions, properties of the interstellar medium, and energy feedback from stars.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3580 - GALACTIC AND EXTRAGALACTIC ASTRONOMY

Minimum Credits: 3
Maximum Credits: 3
Galaxies are the fundamental building blocks of the present universe. This class will give an overview of galaxies, their properties, and their formation and evolution with an emphasis on current research areas. Topics will include observational properties (morphology, masses, colors, concentrations), scaling relations, evolution with redshift, stellar populations, gas and dust, dynamics and dark matter, evolution and mergers, and active galaxies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3705 - STATISTICS AND DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This class will expose students to the basics of astronomical data analysis, with an emphasis on statistical techniques and the development of practical programming skills. Topics may include the nature of random and systematic errors, fitting and likelihood techniques, hypothesis testing, astronomical instrumentation and data reduction, and the use of large survey data sets.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3785 - COSMOLOGY

Minimum Credits: 3
Maximum Credits: 3
This class will give an overview of the standard cosmological model and the wide range of observational tests. Topics include the expansion history of the universe, thermodynamic history, nucleosynthesis, recombination, inflation, perturbations and the microwave background, structure formation, evidence for dark matter and dark energy, and future probes of dark energy.

Athletic Training

ATHLTR 1800 - PRINCIPLES OF RESEARCH METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1805 - EXERCISE PHYSIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculosketetal, in individuals with disabilities.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN REHSCI (BS, BS-H, BPH); SUBPLAN: BSPATH

ATHLTR 1806 - EXERCISE PHYSIOLOGY LAB

Minimum Credits: 1
Maximum Credits: 1
Required lab component for REHSCI 1215 Exercise Physiology: This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculosketetal, in individuals with disabilities.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PLAN REHSCI (BS, BS-H, BPH); SUBPLAN: BSPATH

ATHLTR 1811 - BASIC ATHLETIC TRAINING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide the student with an introduction to the athletic training profession. Topics to include medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ATHLTR 1812 - BASIC ATHLETIC TRAINING LAB

Minimum Credits: 1
Maximum Credits: 1
An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive

strappings and paddings for immediate care and competition are presented as well as basic joint evaluation procedures, assessment of vital signs, and crutch fitting.
Academic Career: Undergraduate
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: CREQ: ATHLTR 1811

ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1

Minimum Credits: 1
Maximum Credits: 1
This course is designed to help prepare students for the demands associated with experiential learning and future clinical placements in the Athletic Training Education Program (ATP). The course will have a combined in-person meetings and associated class assignments that will include field observations at approved clinical education sites through the University of Pittsburgh. This course is a prerequisite for the Practicum I-IV Courses in the ATP.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2

Minimum Credits: 1
Maximum Credits: 1
INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to introduce and develop fundamental understanding of the component for evaluation and acute care. Specific objectives are to introduce the student to concepts related to patient interaction in regards to the evaluation process; the components and general principals of the evaluation process (patient observation, history, range of motion, strength, neurovascular, special tests, palpation, and diagnostics); a basic understanding and ability to perform range of motion and strength assessments and apply the appropriate grading tools. This course is a prerequisite for Therapeutic Interventions I-II courses in the Athletic Training Program.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1816 - MEDICAL ETHICS

Minimum Credits: 2
Maximum Credits: 2
This course addresses legal and ethical issues encountered by athletic trainers and other healthcare professionals who are part of the Sports Medicine team. Strong emphasis is placed on legal and ethical issues that occur within the realm of direct patient care. Additionally, the course will expose students with legal and institutional positions and examine relevant case studies. Students will also practice developing concrete logical arguments in support of a chosen ethical stance.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ATHLTR 1833 - STRENGTH AND CONDITIONING

Minimum Credits: 2
Maximum Credits: 2
Instruction is provided describing the physiological basis for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and technique of operating contemporary isotonic, isokinetic and isometric strength training equipment.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 2020 - ATHLETIC TRAINING HEALTHCARE FOR YOUTH AND SPECIAL POPULATIONS

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth exploration of athletic training healthcare for physically active youth and special populations. Anatomical and physiological differences of a variety of special populations will be explored. For this course, the term special populations does not just pertain to intellectual disabilities but also age, pregnancy, para-sport, etc. Athletic training healthcare challenges will be addressed that include evaluation, treatment, and rehabilitation of injuries and illness unique to special populations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: AT-MS

ATHLTR 2801 - CLINICAL PRACTICUM 1

Minimum Credits: 3
Maximum Credits: 3
This 3-credit practicum is designed to supplement the first clinical experience presented in seminar fashion to address the curricular standards as presented in the Core Curricular Competencies as presented in the 2020 Standards for Accreditation of Athletic Training Programs. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on these proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)
Course Attributes: Undergraduate Research

ATHLTR 2802 - CLINICAL PRACTICUM 2

Minimum Credits: 3
Maximum Credits: 3
This 3-credit practicum is designed to supplement the second clinical experience presented in seminar fashion to address the curricular standards as presented in the Core Curricular Competencies as presented in the 2020 Standards for Accreditation of Athletic Training Programs. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on these proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)
Course Attributes: Undergraduate Internship

ATHLTR 2804 - CLINICAL PRACTICUM 4

Minimum Credits: 3
Maximum Credits: 3
CLINICAL PRACTICUM 4
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY

Minimum Credits: 4
Maximum Credits: 4
This 4-credit course is designed to present the techniques used in lower extremity injury evaluation. An in-depth analysis of lower extremity injury mechanics, the theory and application of orthopedic and neurological evaluation are included. Students learn the mechanical and physiological basis of injury and injury evaluation techniques for conditions of the foot, ankle, lower leg, knee, thigh, hip, pelvis, and lumbar spine. Students will be instructed on the proper methods of documentation, patient interview, history, observation, palpation, strength testing, neurovascular assessment, and special tests. This course includes a lab component.
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY

Minimum Credits: 4
Maximum Credits: 4
INJURY/EVAL 1 - LOWER EXTREMITY
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad Letter Grade

ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY

Minimum Credits: 4
Maximum Credits: 4
This 4-credit course is designed to present the techniques used in upper extremity injury evaluation. An in-depth analysis of upper extremity injury mechanics, the theory and application of orthopedic and neurological evaluation are included. Students learn the mechanical and physiological basis of injury and injury evaluation techniques for conditions of the head, cervical and thoracic spine, thorax, and upper extremities. Students will be instructed on the proper methods of documentation, patient interview, history, observation, palpation, strength testing, neurovascular assessment, and special tests. This course includes a lab component.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY

Minimum Credits: 4

INJURY/EVAL 2 - UPPER EXTREMITY
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1

Minimum Credits: 4
Maximum Credits: 4
The instruction and participation of this 4-credit course aim are to educate the student on intervention strategies for pre-operative, post-operative, and non-operative healthcare conditions. Students will develop the ability to implement an evidence-based care plan to address physical and social determinants of health needs through the introduction of therapeutic modalities and therapeutic exercise intervention for the lower extremity. The development of these skills will optimize the student's ability to critically think and apply skills to address a patient's or client's individual healthcare needs through prescription, administering, and assessment of therapeutic interventions. Topics in this course include but are not limited to tissue healing, pain control theory, lower extremity rehabilitation exercise, and foundations of therapeutic modalities. A combination of learning strategies from individual and group activities will allow students to establish and refine a clinical practice philosophy for injury/illness rehabilitation and prevention for the lower extremity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1

THERAPEUTIC INTERVENTIONS 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2

Minimum Credits: 4
Maximum Credits: 4
The instruction and participation of this 4-credit course aim are to supplement the student on traditional and complementary therapeutic intervention strategies for pre-operative, post-operative, and non-operative healthcare conditions for the spine and upper extremity. Students will refine the ability to implement an evidence-based care plan to address physical and social determinants of health needs through the introduction of therapeutic intervention for the spine and upper extremities. The development of these skills will build and further optimize the student's ability to critically think and apply skills to address a patient or client's individual healthcare needs through prescription, administering, and assessment of therapeutic interventions. Topics in this course include but are not limited to manual therapy, spine and upper\ extremity rehabilitation exercise, complementary healthcare intervention, and psychology of sport rehabilitation. A combination of learning strategies from individual and group activities will allow students to evaluate and evolve their clinical practice philosophy to injury/illness rehabilitation and prevention for the spine and upper extremity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2

Minimum Credits: 4
Maximum Credits: 4
THERAPEUTIC INTERVENTIONS 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course utilizes the basic structural knowledge provided in Human Anatomy and concepts learned in Kinesiology and Biomechanics to develop an understanding of the functional significance of the structures of the musculoskeletal system, within a movement setting (covering mechanical properties and functional characteristics). In addition to normal function, mechanisms of and adaptations to, common injuries, disease and rehabilitation is discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY

Minimum Credits: 2
Maximum Credits: 2
FUNCTIONAL HUMAN ANATOMY
Academic Career: Graduate

ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

Minimum Credits: 2
Maximum Credits: 2
EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2811 - GRADUATE RESEARCH 1

Minimum Credits: 3
Maximum Credits: 3
This 3-credit course consists of lectures, group discussion, and assignments aimed to develop understanding of the principles of research and application to clinical practice. It will expand concepts of Research Methods and Evidence Based Practice in Athletic Training by allowing the student to gain a more in-depth knowledge of methodologies utilized in the field of athletic training. In class, students will be exposed to research instrumentation and methodology for the assessment of anthropometrics, strength, flexibility/postural testing, proprioception, balance/neuromuscular control, electromyography, kinetics, and kinematics. Further the student will apply principles from previous courses by conducting a critical appraisal. This project will encompass: 1. Developing and answering a clinically relevant question; 2. Conducting a search to find and appraise the best evidence; 3. Synthesize the evidence and come to a clinical recommendation. This course includes a lab component.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2812 - GRADUATE RESEARCH 2

Minimum Credits: 3
Maximum Credits: 3
This 3-credit course consists of in field experiences and assignments aimed to apply evidence-based practice through integration of outcomes and patient care. Students will apply and demonstrate proficiency of concepts from Research Methods and Evidence Based Practice in Athletic Training by using outcomes collected through patient care to answer a clinical research question. Students will gain hands on experience in conducting a literature review related to their clinical question, data reduction/processing, data analysis, and dissemination of their findings. These outcomes will be completed in conjunction with ATHTLR 2804 and their immersive clinical

experience.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

Minimum Credits: 4
Maximum Credits: 4
This 4-credit course will provide didactic knowledge and clinical medical skills to provide the athletic training students with an opportunity to understand and identify epidemiology, etiology, pathogenesis, and signs and symptoms to common illness and disease to the body systems. Examination of basic principles of pharmacology comprising knowledge, skills, and values that the entry-level certified athletic trainer should possess. Examination of the indications, contraindications, precautions, and interactions of medication as well as governing regulations relevant to treating and caring for common illnesses and diseases to the body's systems will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL PRINCIPLES

Minimum Credits: 4
Maximum Credits: 4
GENERAL MEDICAL AND PHARMACOLOGICAL PRINCIPLES
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES

Minimum Credits: 3
Maximum Credits: 3
This 3-credit course introduces students to advanced clinical practice in athletic training and affords them an opportunity to learn and practice emerging clinical skills in the practice. Specific techniques will be modified as needed based upon the current Athletic Training Practice Analysis, core competencies as outlined by the CAATE, and current literature. Additionally, students will explore strategies for life-long learning as it pertains to awareness, knowledge, and acquisition of emerging evidence-based skills, techniques, and treatments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE

Minimum Credits: 2
Maximum Credits: 2
The purpose of this 2-credit course is to present case-based, cutting-edge medical information on sports medicine and sports related injuries that health care professionals can directly apply to the care of their patients. Topics may include advanced orthopedic biomechanical assessment methods, surgical procedures, post-operative rehabilitative options, advanced understanding of musculoskeletal pathology and treatments as well as updates in position and consensus statements.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

Minimum Credits: 4
Maximum Credits: 4
This 4-credit course provides the athletic training student with knowledge and skills needed to manage an athletic training facility. This course presents current organizational and administrative topics in athletic training, including policy and procedure development, athletic training facility design and management, ethical and legal considerations, insurance and reimbursement, budgetary strategies, emergency planning and preparticipation screenings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This 3-credit course is designed to introduce the student to the knowledge and skills essential as a healthcare professional in clinical practice rooted in inter-professional care and collaboration. Students will learn critical communication skills, task management strategies and work-life balance techniques. Specific attention will be placed upon lifestyle leadership and learning as a healthcare provider, the importance of professional and personal advocacy and strategies to achieve success. Lastly, students will develop preliminary professional development plans that can be used to map their continuing education and growth as young professionals and life-long learners.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION

Minimum Credits: 1
Maximum Credits: 1
This 1-credit course aims to aid each athletic training student in the final stages of preparation for the Board of Certification (BOC) examination.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 2819 - MENTAL HEALTH CONSIDERATIONS IN SPORTS MEDICINE

Minimum Credits: 3
Maximum Credits: 3
This course examines the psychological factors involved in sport, sport-related injuries, the rehabilitation process, as well as examining the mental health aspects of the athletic trainer working in the sports setting. Course topics include: sport participation, psychological responses to injury, the relationship between injury and stress, recognizing and referring mental health related issues, pain tolerance, rehabilitation adherence, and returning to sport after injury, critical incident stress management, psychological first aid, workplace mental health policy & procedures, and peer support.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Athletic Training (AT-MS)

ATHLTR 2820 - PRIMARY CARE IN ATHLETIC TRAINING

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course introduces athletic training students to common primary care conditions encountered in clinical practice. Emphasis is placed on the recognition, evaluation, and management of conditions across body systems. Students will develop clinical decision-making skills related to referral, interdisciplinary collaboration, and appropriate care within the scope of athletic training practice. The course prepares students to integrate primary care concepts into patient-centered care and optimize health outcomes across diverse patient populations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Athletic Training (AT-MS) or SUBPLAN: (BSPATH-SP)

ATHLTR 2821 - BOARD OF CERTIFICATION (BOC) PREPARATION

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course aims to aid each athletic training student in the final stages of preparation for the Board of Certification (BOC) examination.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

ATHLTR 2823 - CLINICAL PRACTICUM 3- CLINICALLY IMMERSIVE SEMESTER

Minimum Credits: 5
Maximum Credits: 5
This 5-credit practicum is designed to supplement the third clinical experience and includes a clinical immersion experience. The course addresses the curricular standards outlined in the current version of the Standards for Accreditation of Athletic Training Programs and the associated Core Curricular Competencies. Content is delivered by Athletic Training Program faculty and reinforced through clinical application and evaluation in live patient-care situations when available, or through simulated experiences when live opportunities are not feasible.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

ATHLTR 2824 - CLINICAL PRACTICUM 4

Minimum Credits: 3
Maximum Credits: 3
This 3-credit practicum is designed to supplement the fourth clinical experience by addressing the curricular standards outlined in the current version of the Standards for Accreditation of Athletic Training Programs and the associated Core Curricular Competencies. Content is delivered by Athletic Training Program faculty and reinforced through clinical application and evaluation in live patient-care situations when available, or through simulated experiences when live opportunities are not feasible.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

Behavioral & Communty Hlth Sci

BCHS 2503 - PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Short term field placement relevant to the student's area of interest in an operating organization or agency.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2504 - THEORY AND PRACTICE OF HEALTH COMMUNICATIONS

Minimum Credits: 3
Maximum Credits: 3
This course equips public health professionals with the knowledge and skills to develop and implement effective health communication strategies. Through a mix of theory, case studies, and practical applications, students will learn how communication shapes health behaviors, influences policy, and impacts public health outcomes, culminating in developing a health communication product for an organization. This course is ideal for graduate students in public health and associated fields pursuing careers in health education, health promotion, program evaluation, or communication and for students preparing for the CHES exam.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH

Minimum Credits: 3
Maximum Credits: 3
The core course provides an overview of the social and behavioral sciences and their importance in the inter-disciplinary field of public health. A primary emphasis is on the social-ecological model, its application to public health issues, and its use in the development of policies, strategies, interventions and programs. The course content will introduce students to several relevant social and behavioral theories as well as a range of community health assessment and planning models used by public health professionals in both domestic and international venues. Through a series of assigned readings, discussion exercises, group projects, quizzes and written assignments, students will enhance their knowledge and awareness of the role of social and behavioral sciences in public health and its relevance to their specific discipline. At the conclusion of the course students will be able to: identify the important social and behavioral determinants of health; describe the inter-relationships between the social, behavioral, bio-medical, physiological, and environmental factors related to individual and community health; identify the major health disparities related to social, behavioral and economic factors; describe the role of culture and socio-economic status in health behavior, access to services, and decision-making; and understand the importance of community partnerships and participatory approaches in the development, implementation, management and evaluation of community policies and programs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: All Public Health MPH degrees
Course Attributes: MCSI - Sustainability Focused

BCHS 2511 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
Students with major interests in specialty areas participate in courses of individual study, research activities, or advanced readings with a specified faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

BCHS 2516 - VIDEO FOR HEALTH PROMOTION

Minimum Credits: 3
Maximum Credits: 3
Video is an increasingly important media for the distribution of health promotion messages. The purpose of this class is to provide students with basic principles of script development and the video production process to be able to produce educational and persuasive short-form videos for health promotion. Students will develop, direct, and produce short-form health promotion videos for distribution on social media platforms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2519 - APPLYING THEORY AND SYSTEMS THINKING IN PUBLIC HEALTH

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to apply theoretical perspectives and systems thinking to analyze and address complex public health problems, particularly for populations who are marginalized and oppressed. Students will investigate several theories used in public health research, practice, and policy, including foundational frameworks as well as contemporary, critical perspectives. Systems thinking provides students with a framework for examining how interconnected theory-driven factors across individual, community, and structural/societal levels interact to shape health outcomes and perpetuate health inequities. The integration of theory, systems thinking, and empirical scientific literature will allow learners to identify critical intervention points at multiple social ecological levels to promote health and foster health equity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BCHS-MPH

BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION

Minimum Credits: 1
Maximum Credits: 1
The course is designed as an introduction to the major theories that are the foundation for most health promotion and health education interventions. It will provide the student with exposure to the current theories that are being used in health behavior and health promotion educational interventions. Also it will provide students with a theoretical foundation for designing, implementing and evaluating health promotion and education programs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)
Course Attributes: Global Studies

BCHS 2521 - ESSAY

Minimum Credits: 1
Maximum Credits: 3
The essay requirement is designed to provide the student with an opportunity to integrate the major components of the public health learning experience. The student is expected to demonstrate verbal and technical proficiency in expository writing.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to expose students to critical health program planning, implementation and evaluation tools and strategies in a

format that models actual program implementation. This class complements other BCHS coursework in that it gives the student the opportunity to apply theories and models learned in other classes. In particular, the socio-ecological theory heavily influences the content of this course. Through discussions, presentations, written assignments, and in-class activities, students will learn resources for, and gain practice in, the stages of program development, including budgets and use of logic models. Students will learn how to present their program proposals in both written and oral formats.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, PHD)

BCHS 2524 - OVERVIEW OF HEALTH EQUITY

Minimum Credits: 3
Maximum Credits: 3
Achieving health equity and understanding health disparities involve a critical analysis of historical, political, economic, social, cultural, and environmental conditions that have produced an inequitable health status for vulnerable populations in the United States. Eliminating health disparities and achieving health equity are primary goals of are primary goals of Healthy People and the US Office of Disease Prevention and Health Promotion, in order to 'improve the health and well-being of all'. The purpose of this class is to introduce basic issues that underlie health disparities. This course will include an overview of current data and literature, foster discussions that will examine health disparities, explore social, structural and environmental determinants of those disparities, critically review measurement issues, and determine public health's response to addressing these disparities and achieving health equity. Students should seek to critically reflect on their professional roles in eliminating health disparities and achieving health equity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: MCSI - Sustainability Focused

BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

Minimum Credits: 3
Maximum Credits: 3
The goal of the course is to give students a basic understanding of social and behavioral sciences research principles, as well as how these methods are implemented in the field of public health. Relationship of applied research to program evaluation, the link of theory to research, and the translation of research information to applied public health programs and policies will be emphasized. Participatory research will be highlighted. Quantitative and qualitative strategies, research designs, data collection methods, participant selection, and data analysis will be covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH, PHD)

BCHS 2528 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Minimum Credits: 1
Maximum Credits: 1
This one credit seminar serves as the integrative course for the health equity certificate. Students build upon and apply the knowledge and experiences gained from all of the previous certificate core and elective courses to specific public health problems while considering a health policy framework. The seminar is designed to expose students to the critical analysis of a health policy as it affects health equity, as well as provides an opportunity for students to network with a variety of academic and community leaders that can potentially further their knowledge and practical skills in this area.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2
Maximum Credits: 2
Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Asian Studies, Global Studies

BCHS 2534 - CLINICAL ASPECTS OF DEMENTIA CARE

Minimum Credits: 2
Maximum Credits: 2
This course is designed as an independent study for students in the public health and aging program. Its focus is on the methods and technology for diagnosis and treatment of Alzheimer's Disease.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2551 - SOCIAL NETWORKS & HEALTH

Minimum Credits: 1
Maximum Credits: 1
This course is an introduction to the theory, methods, and procedures of network analysis with emphasis on applications to health and social behavior. The goal of the course is to provide a working knowledge of concepts and methods used to describe and analyze social networks so that professionals and researchers can understand the results and implications of this body of research. The course also provides the training necessary for scholars to conduct network analysis in their own research and practice careers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH

Minimum Credits: 3
Maximum Credits: 3
This course uses strengths-based and social ecological approaches to prepare students for practicing public health with communities. Through in-class activities, discussions, community-based experiences, and written assignments, students will learn ways to engage communities and assist them in building their own capacity to identify and address health issues. Students will also learn techniques for conducting community health needs assessments using both primary and secondary data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD, DPH, MPH)
Course Attributes: Community Element - Building Understanding

BCHS 2558 - HEALTH PROGRAM EVALUATION

Minimum Credits: 3
Maximum Credits: 3
Surveys the evaluation and policy research methods applied to health. Students learn to critically assess the adequacy of evaluations and how to plan and pilot test an evaluation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS

Minimum Credits: 3
Maximum Credits: 3
The impact of population growth, distribution, and change on social, economic, environmental, and health relationships is presented with a focus on the sociopolitical responses to population dynamics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Attributes: Global Studies, MCSI - Sustainability Focused

BCHS 2562 - SEMINAR IN FAMILY PLANNING

Minimum Credits: 3
Maximum Credits: 3
Participants explore the history of contraception and the birth control movement. Issues related to contraceptive care and the broader concerns of women's health are discussed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2572 - RISK COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Course focuses on risk communication within the context of terrorism and natural disasters. The didactic and experiential course will include core principles of risk communication, examine special challenges of risk communication with diverse audiences and media, and prepare students to create risk and crisis communication campaigns.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2575 - SEMINAR MATERNAL AND CHILD HEALTH

Minimum Credits: 3
Maximum Credits: 3
Seminar deals with current issues in society affecting the health of children and their families. For example, problems of adolescent pregnancy, child abuse and neglect, emotional abuse and sexual abuse; prevailing attitudes and responses; etiology and risk factors; and multidisciplinary preventive strategies.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2599 - PUBLIC HEALTH APPROACHES TO WOMEN'S HEALTH

Minimum Credits: 3
Maximum Credits: 3
Public health problems affecting women, i.e., Alcoholism, smoking, occupational health, reproductive health, aging and cancer, as well as health and social problems relating primarily to women are discussed. Etiology of health problems, prevention and treatment, high-risk groups, and controversies related to care are covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Minimum Credits: 1
Maximum Credits: 1
This workshop introduces students to the focus group as a data collection strategy and prepares them to use focus groups as a research tool. The workshop uses lectures, discussions and interactive exercises to familiarize students with all aspects of focus groups. Topics covered include the theoretical basis of focus groups, formulating questions, recruiting participants, designing sampling schemes, facilitating the discussion, taking notes and applying/reporting out on the data. Students will complete a series of assignments designed to sharpen their listening, facilitating and analytical abilities. Critical components of the class will be observation of and hands-on experience with facilitating discussions, taking notes and reporting. Ability to role play highly desirable.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course is organized around themes central to the conceptualization and implementation of community-based participatory research (CBPR). The goal of this course is to familiarize students with CBPR. Students will become conversant in seminal CBPR literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in translating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in kt as an aspect of community-partnered research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Minimum Credits: 1
Maximum Credits: 1
This course provides hand-on training in the participatory research method known as concept mapping (cm). Cm gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data

collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cm and the associated strengths and limitations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH

Minimum Credits: 2
Maximum Credits: 2
The purpose of the course is to prepare students to effectively manage a range of public health projects. The course is lecture/discussion/laboratory/application based. Project management software is used including Microsoft Project and Visio. Industry standard body of knowledge is the foundation of the course further illustrated with case studies and examples. There are no pre-requisite courses or software skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2660 - HARM REDUCTION APPROACHED IN HEALTH & PUBLIC HEALTH SETTINGS

Minimum Credits: 1
Maximum Credits: 1
The aims of this seven week course are to introduce students to harm reduction (HR) principles as a conceptual approach to care rather than simply as a set of strategies, like syringe exchange, and to challenge them to consider how HR-informed approaches to care may improve participant and provider outcomes. The approach to care builds on lessons learned from community and provider settings that have demonstrated success in engaging and caring for marginalized populations including those who use substances. However, this course extends the conversation about harm reduction to aspects of care that can promote health improvement among all patient and client populations, not just those who use drugs. Concepts that will be discussed include universal harm reduction and herd harm reduction. The course will incorporate a number of speakers who will address the application of HR in specific settings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
This course is an introduction to historic and current concepts about complex, dynamic systems in public health research and practice. We will discuss the rationale for adopting systems thinking - an approach to analyzing the impact of systems within their social, spatial, and temporal context - in behavioral and community health research and practice and illustrate how this approach is critical for the development of public health policy. The course will include didactic sessions, guest lectures, hands-on engagement with tools that allow us to represent dynamic social systems, as well as seminar-style discussions of studies that examine dynamic social systems in public health. (Note: BCHS 2520 is recommended.)
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate Sch of Public Health

BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
Multilevel analysis is an essential statistical tool in public health that can simultaneously investigate the effects of factors at multiple social ecological levels on individual-level outcomes. In this course, students will learn to identify scientific problems that necessitate the use of

multilevel statistical modeling techniques and understand the essential theoretical underpinnings of multilevel analysis. Students will conduct multilevel statistical modeling procedures using Stata and interpret the statistical and practical meaning of fixed and random effect coefficients from the output of these models. Special emphasis will be placed on the strengths and limitations of multilevel analysis in investigating social and group-level determinants of health. BIOST 2041, PSYED 2018, or permission to enroll from the instructor required. Knowledge of linear regression, logistics regression or ANOVA strongly preferred.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Minimum Credits: 1
Maximum Credits: 1
Systems science approaches were developed to understand connections between a system's structure and its behavior over time. The use of such approaches within public health research and practice has grown tremendously over the past decade. Identifying and understanding the dynamic relationships between individuals and their social and physical environments can help us identify potential leverage points for intervention. This course provides an introduction to systems thinking and models in public health, explores the importance of associated theories and underscores the utility of systems science approaches within public health research and practice. We will highlight current systems science public health research and encourage students to think critically about the utility of systems theories and approaches within public health.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2993 - MODELING HEALTH BEHAVIOR CHANGE

Minimum Credits: 3
Maximum Credits: 3
In this class, we focus on the dynamics of health behavior change: (i) the ways social interaction and community factors affect individual health behavior, and (ii) how changes in the behavior of individuals may in turn reorganize larger networks or communities. These dynamics involve temporal processes, but they may also involve spatial processes. In the class we will examine very simple behaviors relevant for health and develop models to predict how behavior changes and what patterns may emerge. Even simple behaviors and artificial social situations can quickly become complex. We use computer representations to "model" these relationships. With this approach we acknowledge complexity and dynamics in health behavior.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3002 - HEALTH SURVEY METHODS

Minimum Credits: 3
Maximum Credits: 3
Introduces techniques for the collection of health data through survey methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
Evaluates theory and methodology with emphasis upon human service organizations.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING

Minimum Credits: 1
Maximum Credits: 1
Every graduate of a doctoral program needs to know how to write a successful grant application to fund their work. Whether you are a senior manager leading a public health program in the public or non-profit sectors or you are a researcher working in an academic setting, you will need funding to support your work! We begin this doctoral seminar by asking the question, "how do you write a grant proposal that will attract the attention of a funding agency and convince them that your application is significant and should be a priority for funding?" building on the ideas articulated in BCHS doctoral students" preliminary examination, we will focus on writing the specific aims and significance sections for an NIH grant proposal. The students" written work will be shared with and critiqued by other students and faculty participating in the seminar. Finally, we will review and critique examples of successful and unsuccessful grant applications "both program and research grants (especially research grants that the students will most likely be writing at the beginning of their academic careers" namely, ro-3s or r-21s).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Attributes: Global Studies

BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION

Minimum Credits: 1
Maximum Credits: 1
The Integrative Research Seminar: Writing for Publication focuses on the process of developing a manuscript for publication in a peer-reviewed journal. All doctoral students must develop the skills to enable them to write and publish the results of their work. The goal of this seminar is to provide students with the requisite knowledge and skills to develop a manuscript for submission to an appropriate journal for publication. As part of this process students will also learn about the peer review process and how reviewers rate manuscripts submitted for publication. It is expected that students in this seminar will work closely with their academic mentor(s) on the development of manuscripts throughout their doctoral program. And, this seminar will assist students in fulfilling the requirement to submit at least one first-authored manuscript-- ideally based on their dissertation research, before they graduate. The seminar content will be delivered via a series of faculty presentations and discussions. There are no prerequisites for this seminar.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Behavioral & Community Hlth Sc (PhD or DPH)

BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS

Minimum Credits: 3
Maximum Credits: 3
Students will be introduced to the basic principles of ethnographic research and their application to the evaluation of human service and health care programs. They will become familiar with research design in ethnographic studies; the process of fieldwork in urban settings; the methodology of participant observation and ethnographic interviewing; recording ethnographic data; ethnographic writing; and ethical questions surrounding ethnographic research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the use of spatial data in public health. The two main goals are (1) to familiarize students with the use of geographic data in public health research and practice; and (2) to introduce basic spatial analytic skills applied to geographic and spatial data. Students will be taught how to use geographic information systems (GIS) to inform both community practice and research. They will learn how to create, manage, and analyze geographic data and gain hands-on experience applying these techniques to research questions. No previous knowledge of mapping or GIS is assumed. One lecture and one lab per week.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

BCHS 3021 - SOCIAL NETWORKS AND HEALTH II: COMPUTER METHODS

Minimum Credits: 1
Maximum Credits: 1
This course provides hands-on training in social network analysis using 3 different software packages: UCINet, R, and Gephi. It is intended for those students who are interested in conducting their own social network studies using the latest available software. It is a time-intensive lab and project course. Topics to be covered include: -How to use UCINet to conduct intermediate and advanced SNA -How to use R to use custom SNA packages -How to use Gephi to conduct basic SNA and generate descriptive network graphs This course consists of in-class examples using SNA software, designing a network analysis plan in consideration of software features, and a final project. Assignments are designed to build components of a full network study, using specific analytic features from available software, visualizing network(s), and culminating in the final project. Individual projects will use data that can be provided or is collected by the student themselves.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES

Minimum Credits: 2
Maximum Credits: 2
The goal of this two-credit course is to provide you with fundamental skills to identify, use and create scales and indices for research and evaluation. The course will be primarily based on classical measurement theory, yet we will discuss item response theory as well. We will also cover good measurement processes, including establishing and evaluating validity and reliability. We will address communication of measurement principles and applications to lay and scientific audiences. Throughout the course, materials will highlight the influence that culture and socio-demographics have on measurement tools and their validity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3100 - GRANT WRITING

Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to write a grant proposal in the format of a National Institutes of Health (NIH) research grant application. The research topic should be a student's dissertation topic and/or build on their BCHS doctoral preliminary examination. The grant application will include specific aims and a research plan that includes significance, innovation, and approach. Students will participate in small-group discussions to provide and receive peer feedback and will be expected to present and defend their research plan to peers. Additionally, students will learn about the other components required for an NIH fellowship (F31) grant proposal. They will also critique an NIH R01 grant using the same approach that is currently used by NIH study sections.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3200 - SCALE DEVELOPMENT AND SURVEY DESIGN IN SOCIAL AND BEHAVIORAL SCIENCES

Minimum Credits: 3
Maximum Credits: 3
The course provides a comprehensive introduction to survey methods and psychometrics for the social and behavioral sciences. The course covers both theory and practical application. This course will provide a basis for designing and implementing surveys to collect information for administrative purposes or for scientific investigation. Through class time, course assignments, and practical firsthand experience, you will learn the appropriate use of the survey approach, sampling, development of survey instruments, data collection, processing, and analysis. Moreover, the course will explore good measurement processes, such as establishing and evaluating validity and reliability, along with procedural, administrative and ethical contingencies in planning for, and conducting health surveys.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BCHS-MPH or BCHS-PHD; PREQ: BIOST 2041

BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide a solid grounding in basic concepts, theories, practical approaches and methods associated with prevention (defined here as both problem prevention and health promotion). The course will focus on behavioral and psyco-social areas including substance abuse, mental health, victimization, and sexually transmitted infections, including HIV.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to prepare students with the knowledge and skills to conduct implementation science within the field of public health. Although evidence-based interventions are widely available, they are underutilized to address a wide variety of public health challenges. We will examine barriers that exist with respect to the implementation of evidence-based interventions (EBIs) and strategies to overcome these barriers. Specific topics include strategies to identify EBIs, assessing and strengthening organizations' and communities' readiness to utilize EBIs, dissemination and scaling up, cultural adaptation of EBIs, and implementation science theories and conceptual frameworks.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Minimum Credits: 3
Maximum Credits: 3
This course is a requirement for students in the doctoral program in the department of behavioral and community health sciences. The seminar is designed to stimulate critical thinking about specific public health issues from within the framework of various behavioral and community theories and models. The purpose of this doctoral seminar is to critically apply and evaluate specific conceptual models and theoretical frameworks to particular significant public health problems or issues. This requires that seminar participants acquire close

working familiarity with various conceptual tools and substantive issues. One goal underlying the selection of the substantive issues has been to select those which challenge, provoke, confront, excite, and stimulate seminar participants about economic and political controversies in contemporary healthcare and public health. Similarly, the selection of issues and reading materials dealing with those issues, challenge taken-for granted assumptions with respect to health and illness, public health and medical care as well as health policies and health politics. A final objective of the seminar is to challenge participants to reassess their conception of the field of public health and their place in it. Is it a profession? A discipline? An applied social science? What are the implications/consequences of each?
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The purpose of the executive management practicum is to provide a structure for students in the DRPH program to gain experience in the application of the core set of competencies in high level practice settings. The association of schools of public health has identified seven competencies that students are expected to master during their doctoral study. Four of these are the focus of the practicum: advocacy, communication, leadership, and management. Practicum sites will be chosen based on the mission of the organization and the opportunity for the student to be able to exercise and refine their skills in the areas of management, leadership, communication and advocacy.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Minimum Credits: 3
Maximum Credits: 3
This course equips advanced graduate students with the skills necessary to conduct statistical regression analyses on real-world data. Students will learn to formulate clear research questions, develop statistically testable hypotheses, and design robust statistical analysis plans incorporating causal modeling frameworks. Through hands-on experience with statistical software, students will gain proficiency in programming, analyzing, and interpreting data in a transparent and reproducible manner. The course emphasizes the creation of high-quality tables and figures for publication, clear and concise reporting of statistical results, and strategic composition of methods sections for scientific manuscripts. Additionally, students will engage in peer critique, refine their ability to respond to reviewers' comments with professionalism, and critically evaluate the strengths and limitations of studies. Students will be required to identify and obtain a dataset ready for analysis by the beginning of the course. By the end of the course, students will be well-prepared to conduct and publish quantitative research in peer-reviewed journals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (DPH or PhD)

BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION

Minimum Credits: 1
Maximum Credits: 3
This course is designed to be an independent study for BCHS doctoral students in order for them to be able to read and prepare for their comprehensive exam. The purpose of the BCHS comprehensive examination is to "to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline".
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

Bioengineering

BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3
Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. Upon completing the two course sequence, BIOENG 1070 and BIOENG 1071, students should be able to (1) demonstrate understanding of the principles of cell structure and function, (2) describe the experimental tools used to understand cellular function such as molecular genetic techniques, biochemical analysis, and microscopy, and (3) use systems approaches to understand how cellular processes are integrated.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ENGR 0012 or ENGR 0016) and (CHEM 0120 or 0420 or 0720 or 0780) and PHYS 0174; CREQ: PHYS 0175; PROG: SWANSON SCHOOL OF ENGINEERING

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
Continuation of BIOENG 1071. Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. Upon completing the two course sequence, BIOENG 1070 and BIOENG 1071, students should be able to (1) demonstrate understanding of the principles of cell structure and function, (2) describe the experimental tools used to understand cellular function such as molecular genetic techniques, biochemical analysis, and microscopy, and (3) use systems approaches to understand how cellular processes are integrated.

BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE

Minimum Credits: 3
Maximum Credits: 3
The course will cover topics related to applied electromagnetics in medicine. Topics such as Maxwell equations, wave equations, transmission lines, electromagnetic theorems, introduction to antennas, and introduction to computational electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications such as MRI, biological sensors, RF ablation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

BIOENG 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE

Minimum Credits: 3
Maximum Credits: 3
Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family

of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology. Introduction to materials science and engineering would be preferred but is not a prerequisite.

BIOENG 2023 - BIOENGINEERING SEMINAR SERIES

Minimum Credits: 1
Maximum Credits: 1
Selected, bioengineering-related topics are presented in a one hour lecture format by members of the bioengineering community of both the university of Pittsburgh and other institutions.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2024 - BIOENGINEERING SEM FOR PROF MS

Minimum Credits: 0
Maximum Credits: 0
One hour lecture format by members of the bioengineering community of both the university of Pittsburgh and other institutions.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

BIOENG 2027 - GRAND ROUNDS SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students in the bioengineering community can attend weekly grand rounds in participating clinical departments.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

BIOENG 2028 - BIOENGINEERING IN PSYCHIATRY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This is a multidisciplinary seminar series, "Bioengineering in Psychiatry," that aims at educating and introducing students with backgrounds in engineering and other quantitative sciences to mental health and psychiatric research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS

Minimum Credits: 4
Maximum Credits: 4
Biomedical and chemical engineering graduate students require a similar comprehensive understanding of the underlying principles of heat transfer, chemical species transfer, and momentum transfer or fluid mechanics. This graduate course provides a unified treatment to heat, mass, and momentum transfer at the graduate level. The first part of the course covers the constitutive relations that describe the diffusive

flux of material properties, including thermal energy, chemical species concentration, and momentum. Conservation principles and boundary conditions are covered for these material properties and numerous example paradigm problems of steady-state unidirectional (1-D) transport in biomedical and chemical engineering applications are reviewed. The second part of the course covers more advanced concepts including non-Newtonian rheology, unsteady state and 2-D transport, convective transport processes, turbulence, and creeping flow. The focus throughout is on extensive problem-solving and computer simulation using Comsol multi-physics using both biomedical and chemical engineering examples.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2045 - COMPUTATIONAL CASE STUDIES IN BIOMEDICAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Bioengineering 2045 computational case studies in Biomedical Engineering this is an interdisciplinary course that will combine: basic sciences such as electromagnetics and thermodynamics applied sciences such as numerical methods and simulations biomedical research and applications such as magnetic resonance imaging, hypothermia, heat transfer in biological bodies, and cardiac action potential, and mathematical concepts such as optimizations, linear and nonlinear equations. This course will be based on solving computational biomedical engineering problems using simulations. Some of the numerical topics will include: numerical solutions of matrices, finite element and finite-difference methods. These topics will be described with emphasis on their use in solving these problems. The course will cover setting up the mathematical description of the models and solving these problems using advanced computer codes and the supercomputer center at Pittsburgh. There will be 1d, 2d, and 3d modeling projects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS

Minimum Credits: 3
Maximum Credits: 3
Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Bioengineering(PHD, MBE)

BIOENG 2095 - GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 6
Individual study program under guidance of faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

BIOENG 2150 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3
Maximum Credits: 3
A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be

able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by fad and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 2150; PLAN: Medical Product Innovation or Medical Product Engineering

BIOENG 2152 - MEDICAL PRODUCT PROTOTYPING I

Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on frequently utilized tools and techniques used in medical product design, conceptualization, and early prototyping. This is a foundational course, where no prior (or assumed) knowledge of design or prototyping is required. Students will be introduced to a series of commonly utilized prototyping techniques including sketching, foam core modeling, 3d modeling, digital fabrication, and electronics building blocks. This immersive course introduces students to the fundamental principles of device prototyping through engaging team projects and guided technical workshops, empowering them with crucial foundational skills to bring their ideas to life. In parallel with learning the tools and techniques, students will also be placed in teams and challenged to implement these tools into an innovative and creative wearable technology that can augment human performance. The focus on the design project will be to harness students' creative potential, exercise flexible thinking skills, and to learn to implement the design process and project management software and strategies. Although this course was designed specifically for the bioengineering MS-MPE program, it is open to other graduate level students that have had minimal exposure to hands-on and/or foundational skills for medical device prototyping.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2154 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY

Minimum Credits: 1
Maximum Credits: 1
Design for Manufacturability (DFM) provides a systematic methodology that can be used to analyze product design for improvements in assembly and manufacturing. Students will use DFM to redesign current products for changes in manufacture that lead to reduction in production cost and improved operability/ customer satisfaction. Students will employ modem software tools that accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements. Course Objectives : Students will gain hands-on experience incorporating the

DFM concepts in a project. Upon completing the course, the students should be able to describe the utility of DFM in product development and early manufacturing design, be able to quantitatively evaluate the impact of design choices on manufacturing cost, and be able to use modem quality control concepts and approaches.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
Medical product ideation, prototyping, and development are cornerstones for identifying unmet clinical needs and navigating the complexities of the development process. But how does one translate new medical products into the marketplace? Entrepreneurship is a discipline with established tools and methods that must be properly harnessed in order to translate medical products into a startup or an incumbent company (big or small.) After the completion of this course students will be able to understand and differentiate between 'right sized' entrepreneurial methodologies for both startups and existing companies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2166 - MANAGING MEDICAL PRODUCT RESEARCH AND DEVELOPMENT

Minimum Credits: 4
Maximum Credits: 4
This course will provide the student a theoretical and practical knowledge of professional project management for medical product development in industry. Through lectures, workshops, and industry seminars, students will acquire skills in the following areas: 'project engineering, project management, and innovation management. 'Managing product portfolios. Strategic planning and product planning. 'Creating and managing effective project teams. 'Stage gate process and lean methodology. 'Concurrent engineering. 'Project management tools, including: 'systems engineering 'work breakdown structures' budgeting' resource allocation and scheduling 'monitoring and control of product development students will be introduced to project management tools developed by PDMA (product development and management association) and the PMI (project management institute). The course will be taught by industry professionals with long experience in the medical products industry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION

Minimum Credits: 3
Maximum Credits: 3
This course will provide the student theoretical and practical knowledge of product management and product development. The introduced principles and tools are used today in the creation of products, software, and services in healthcare businesses and other industries. The course covers the entire innovation process from Business Strategy, through Product Development, and into Product Launch. Knowledge is communicated using dynamic lectures, case studies, team exercises, and guest speakers from industry. Focus of exercises and homework will be the application of learned tools and methods to a clinician sponsored project. Students will acquire knowledge and skills in the following areas: Business Strategy Market Research Portfolio Management Process New Product Innovation Process Culture, Teams, Leadership Life Cycle Management Design and Development Tools Even though some class content may overlap with other courses that the student may take, this course will provide different and unique perspectives. The course will convey large parts of the PDMA (Product Development and Management Association) Body of Knowledge and students will receive a PDMA issued certificate.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Medical Product Innovation or Medical Product Engineering

BIOENG 2170 - CLINICAL BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on the early stages of the innovation process; strategic analysis of complex clinical problem solving through the needs finding, concept generation and refinement. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), interview and observe clinical personnel at the University of Pittsburgh school of medicine performing clinical work in order to rigorously define and document clinical needs in the environment of use. Using principles articulated in BIOENG 2150 (medical product ideation), the students produce a document that clearly defines and communicates one or more clinical problems and prioritized feasible solution paths.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 2150; PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING 2

Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on the later stages of the innovation process; prototyping, market analysis, strategic planning, intellectual property protection, and business planning. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), will apply the principles and techniques from BIOENG 2151 (medical product development) and prioritize clinical needs identified in BIOENG 2170 (clinical bioengineering) and, using the resources of the swanson innovation center, create a prototype for pre-clinical and clinical evaluation. Students will use basic principles of intellectual property (IP) for engineers and publicly available search tools to determine patentability, freedom to operate, and patent strength. Students will then produce a medical device/product prototype and complete documentation set suitable for technology transfer.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 2170; PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2173 - MEDICAL DESIGN FOR LOW RESOURCE ENVIRONMENTS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on designing medical products, systems, and solutions for resource-poor settings using creative problem-solving tools in the face of extreme limits. Tools include Human-Centered Design, Frugal Innovation and Design for Extreme Affordability. The course is primarily project-based, where students' projects will focus on a unique and specific challenge identified by a low resource hospital, partner, or the Engineering World Health (EWH) Design Competition. Student teams will work with their partner to implement the design thinking process to define the problem and iteratively ideate, prototype, and test their proposed solution. Student teams will also be partnered with a local domain expert to ensure they have access to the expertise needed to successfully complete the design within the constraints of the course. Throughout the semester, students will also receive hands-on experience and exposure to ongoing efforts to address the problems of medical device accessibility, usability, and feasibility in low resource environments and actively participate in regular classroom projects and discussions about low resource conditions, regulatory concerns, and engineering ethics amongst other topics. During this course, students will rigorously define and document a clinical need in a low resource environment, clearly define and communicate the clinical problem, prioritize feasible solution paths, and create a prototype for pre-clinical and clinical evaluation. After completing this course, students will have a deeper understanding of why empathy is so important to designing solutions that (actually) work for people and the benefits of applying the concepts of Frugal Innovation and Reverse Innovation to all their design and entrepreneurial efforts regardless of the problem or environment (globally or in their own backyard).
Academic Career: Graduate

Grade Component: Grad Letter Grade
Course Requirements: PLAN: Medical Product Engineering or Medical Product Innovation

BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES

Minimum Credits: 3
Maximum Credits: 3
Human Factors Engineering (HFE) is the application of knowledge about human behavior, abilities and limitations to the design and evaluation of products and systems. HFE draws upon a number of disciplines, such as biomechanics, anthropometry, design, physiology and psychology to improve performance, reduce human error and enhance safety. The application of HFE to medical devices is critical to their effective and safe use. This is recognized by industry and regulatory agencies. In fact, all medical devices that are used by patients or clinicians are required to have a human factors evaluation in order to be approved by the Food and Drug Administration (FDA). This course focuses on the application of HFE in design, development and evaluation of medical devices. The educational goals are: a) to learn the fundamentals of HFE relevant to medical devices, and b) to understand the HFE process in medical device design and evaluation according to the Food and Drug Administration (FDA). The course will include didactics and hands-on experience.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2195 - SPECIAL TOPICS IN BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
A graduate level course in special topics of current interest in bioengineering.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2230 - CARDIO ORGAN REPLACEMENT

Minimum Credits: 3
Maximum Credits: 3
A one semester course in which three organ replacement systems will be discussed - vascular prostheses, artificial hearts/ventricular assist devices, and extracorporeal/ intravenous oxygenators.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC

Minimum Credits: 3
Maximum Credits: 3
As professionals who will ultimately contribute to research on and design of biomedical processes and devices, students should understand that ethical dilemmas are part of the design process-not separate from it. Students in the course will be presented with a combination of case-based discussion, guest and instructor lectures, small group exercises and a final presentation and paper analyzing a bioengineering focused ethical dilemma. At the end of this course, our goal is that students will be able to identify, analyze, and resolve the ethical dilemmas that arise in a professional bioengineering career. An overarching goal is to enable students to become "comfortable talking about the uncomfortable". Course topics include, but are not limited to research ethics, regulatory considerations of bioengineering projects, stakeholder analysis, ethical approaches, professional standards, and codes of ethics relevant to the profession.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2250 - CARDIO CLINICAL INTERNSHIPS

Minimum Credits: 1
Maximum Credits: 6
Professional application training in cardiovascular medicine and surgery. Students will spend three months each in bioengineering practice

training programs within cardiology, cardiothoracic surgery, and vascular surgery.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2265 - BIOMEDICAL FLUID MECHANICS

Minimum Credits: 3
Maximum Credits: 3
Biomedical Fluid Mechanics is an upper-level undergraduate and graduate course designed for students that have already had some undergraduate exposure to fluid mechanics through a biotransport, transport or similar course. The course studies how momentum (i.e. fluid flow) principles arise and are applied to biomedical flow systems. The course is not exhaustive but focuses instead on systems in which 1) the application of fluid mechanics enhances understanding of the underlying biomedical process; and/or 2) the biomedical process itself teaches an important and sometimes novel fluid mechanical principal. The principal means of analyzing biomedical fluid mechanics in this course will be through the application of differential mass and momentum balances. These principles will be applied to take the student from a qualitative understanding to a quantitative understanding of a biomedical flow process. The course will primarily study principles of fluid mechanics in the cardiovascular system, including arterial flow and pressure and microcirculatory flow. Non-Newtonian blood rheology and flow will also be covered. Students also will have the opportunity to propose biomedical flow processes that may be relevant to their research projects (e.g. respiratory, ocular, micro-devices). Prerequisite: undergraduate fluid mechanics or transport.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2270 - BIOMEDICAL MICROFLUIDICS

Minimum Credits: 3
Maximum Credits: 3
By accurately controlling the movement of fluids at the microscale, microfluidics presents a unique opportunity to accurately establish mechanical and biochemical conditions that mimic the dynamic microenvironment in healthy and diseased tissue states. This course covers principles of biofluid mechanics and mass transport that are applied for the design and analysis of biomedical microfluidic systems. Microfluidic models of both healthy and diseased tissue microenvironments will be presented. Topics include tissue morphogenesis (e.g., epithelial layer and vascular pattern), tissue homeostasis (e.g., regeneration and wound healing) and cancer (angiogenesis and interactions with inflammatory cells). Lectures, in-class journal paper, research proposal discussion, and projects will focus on microfluidics approaches to mechanistically understand basic cellular functions or advance drug screening and personalized medicine.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2330 - BIOMEDICAL IMAGING

Minimum Credits: 3
Maximum Credits: 3
Biomedical imaging introduces the major imaging modalities (x-ray, cat-scan, MRI, ultrasound) used in clinical medicine and biomedical research, as well as the fundamentals of images, from a signals and systems standpoint.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2335 - BIOIMAGING, ANALYSIS AND SPATIAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to micron, nanometer, and sub-nanometer scale imaging-based approaches in experimental,

computational and systems biology. Emphasis will be placed on understanding the fundamentals of image formation, processing, and analysis of brightfield, phase-contrast, highly multiplexed, super-resolution, live-cell, cryo-EM, and computational imaging, along with imaging-based spatial transcriptomic methods. Applications of these methods in studying biological phenomena in space and time will also be discussed. Python will be the programming language in which image processing, machine learning, and system biology methods introduced in the course will be implemented. Students are expected to know Python basics. It is also expected that students have a basic understanding of linear algebra and calculus.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Introduction to Medical Imaging and Image Analysis presents the physics of image formation as well as methods for tomographic image reconstruction for major medical imaging modalities, including X-ray Computed Tomography (CT) and Magnetic Resonance Imaging (MRI). Also introduced are fundamentals of digital image processing, with particular emphasis on medical applications, including basic techniques to enhance image quality, image de-noising, methods for extracting, classifying, and tracking features of and objects in images, etc. Students will learn how to implement these techniques in MATLAB (The MathWorks Inc., Natick, MA) to solve practical image processing problems. MATLAB exercises will demonstrate to students how filtering operations applied in the image domain or the Fourier domain affect medical images. In addition to these fundamentals, more advanced algorithmic approaches for image segmentation and image as well as point-cloud registration techniques will also be reviewed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2351 - BIOSIGNAL ACQUISITION AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to develop data acquisition interfaces that include software and hardware to interact with and sample real world phenomena with bioengineering applications. Students will be expected to have basic MATLAB programming experience before joining this course; basic circuits knowledge is also advantageous. Students will build circuits, and will learn to work with several toolboxes and advanced features in Matlab to build graphical user interfaces (GUIs), communicate with data acquisition systems (DAQs) for measuring signals with sensors and/or controlling actuators to interact with the physical world, and perform signal processing and analysis functions to extract meaningful information from electrical and/or biological measurements. Practical applications may include measuring and analyzing bioelectric phenomena related to heart rate or tissue impedance, processing and analyzing neural signals collected from implanted electrodes in the brain, etc. Students will be able to create solutions for real world engineering problems after completing this course successfully.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Bioengineering (MBE, PHD)

BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN

Minimum Credits: 3
Maximum Credits: 3
Computational simulation is increasingly utilized as a method to assess the performance of medical devices. The course provides students with a hands on learning experience on how to use computational simulation in the modeling and design of medical devices. The course details the important steps in computational simulations from preprocessing to solution to post-processing and data presentation. Commercially available software programs are introduced and used to simulate a variety of physical phenomena (solid, fluid, transport) pertinent to medical device design. Upon completing the course, the student should be able to simulate the solid, fluid, and transport phenomena that are useful in medical device design. Particular attention will be placed on avoiding common mistakes in the preprocessing and interpretation of computational results. Topics covered: geometry creation; discretization; appropriate assignment of material

properties; solver management; error mitigation and debugging; post-processing and data presentation; data interpretation; introduction to design optimization.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2383 - BIOMEDICAL OPTICS

Minimum Credits: 3
Maximum Credits: 3
The advancement of modern optical technologies has provided unprecedented opportunities for the detection and understanding of various human pathologies. Applications of photonics hardware span a wide range of temporal and spatial domains and support multiscale imaging from the microscopic to macroscopic level. This course is a comprehensive introduction to biomedical optical imaging methods for identifying and evaluating various human diseases and pathological conditions in cells, tissue samples and in vivo settings. Basic concepts in optics are covered in the context of hardware design and light interaction with tissues. The goal is to understand the advantages and limitations of the various types of optical approaches and to apply the appropriate technique to solve specific biomedical problems. Upon this course completion the student should have a working knowledge of the common optical techniques in biomedical research such as bright field, fluorescence, confocal and two photon imaging, optical coherence tomography and near infrared imaging. The student should also be able to design basic optical research approaches and perform simple quantitative image analysis. Introductory optical physics, trigonometry, matrix algebra, and a solid foundation in signals are central for the success in this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2385 - ENGINEERING MEDICAL DEVICES FOR QUANTITATIVE IMAGE ANALYSIS AND VISUALIZATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Artificial Intelligence Applications in Bioengineering is a hands-on exploration of linear to non-linear modeling paradigms for biomedical data. In this course students will learn about aspects of information processing including data pre-processing, visualization, regression, dimensionality reduction (PCA, ICA), feature selection, classification (logistic regression, SVM, neural networks, etc.) and their usage for decision support in the context of healthcare. The course will provide an overview of the basics of scientific computing on local and cloud-based resources (i.e. relevant DevOps and MLOps) and scientific programming fundamentals, in addition to covering machine learning techniques for classification as well as regression modeling from biomedical datasets in tabular forms, including time series data. Students will additionally learn how to address classification and regression modeling tasks starting with 2D/3D medical imaging data. The course is designed to be practical with computer based tutorials and assignments on machine learning in general including popular kernelized models and deep neural networks.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2411 - MATHEMATICAL METHODS IN CHEMICAL ENGINEERING 1

Minimum Credits: 3
Maximum Credits: 3
Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
In this course some newly evolving multi-modal imaging techniques and analysis methods in biomedical applications will be introduced. The course will briefly cover the fundamental physics, core signal processing, image reconstruction of a variety of current standalone imaging modalities such as X-Ray, computer tomography (CT), magnetic resonance imaging (MRI), nuclear imaging (PET, SPECT), optical imaging (fluorescence, optical diffuse tomography, bioluminescence), and ultrasound. Subsequently, the concept, fundamental physics, and image analysis of some exemplary multi-modal imaging techniques and systems will be introduced. Their applications in Biomedicine in different scales from organ to cellular and molecular level, and from structural to functional imaging will be discussed. The course will also briefly address the issues related to image-based diagnosis, intervention and therapy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING

Minimum Credits: 3
Maximum Credits: 3
The mechanical behavior of the cardiovascular system will be explored in a quantitative manner. The goal is to understand the behavior of each component in isolation and the interactions among various components. Mathematical modeling will be used with an emphasis on model development, validation, and application. The function of the intact organ will be correlated with underlying structural and cellular processes, both for normal and pathological states. Student projects will contribute to the existing library of cardio vascular models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2520 - MOLECULAR CELL BIOLOGY

Minimum Credits: 6
Maximum Credits: 6
Topics covered in this course are bio-macromolecules, protein purification and microscopic techniques, genetics (chromatin organization, DNA replication, recombination, transcription, translation and control of gene expression), molecular perturbation, membrane biophysics and bioenergetics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Bioengineering (MBE or PhD)

BIOENG 2525 - APPLIED BIOSTATISTICS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide an understanding of basic statistics through application. Descriptive and inferential statistics, encompassing both parametric and non-parametric methods will be taught.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to an advanced understanding of biomaterials and tissue engineering specialized in neural applications. It will review biomaterials used for neural prosthesis, drug delivery devices, and tissue engineering scaffold. The student will gain a fundamental understanding of the biocompatibility issues relevant to a variety of neural implantable devices and the current strategies to solve these issues. Topics will include basic material science, neural tissue biocompatibility with implant, BBB and CNS drug delivery, tissue engineering and regenerative medicine for PNS, tissue engineering and regenerative medicine for CNS, neural electrode/tissue interface (including both simulating and recording electrodes, both peripheral and cortical neural interface). The student should have some exposure to biomaterials and tissue engineering before taking this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2585 - QUANTITATIVE CELLULAR NEUROSCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to be a comprehensive introduction to cellular neuroscience for engineers. Modern cellular neuroscience is an interdisciplinary field that seeks to understand the function of single cells and populations in the context of the thinking brain. This course provides a survey of cellular brain science ranging from molecules to simple neural circuits. In addition to principles and theory this class will also cover basic quantitative concepts and provide opportunity to analyze real-life data from molecular and cellular neural engineering. In the context of each cellular brain function we will also address cellular dysfunction with translational engineering applications to neurological brain disease. Required software is MATLAB. Enrolled students should have a working knowledge of matrix algebra, first order dynamic systems and programing in MATLAB environment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2586 - QUANTITATIVE SYSTEMS NEUROSCIENCE

Minimum Credits: 3
Maximum Credits: 3
Systems neuroscience is the field that attempts to explain perception, cognition, and behavior in terms of the activity of populations of neurons. This course examines major scientific results in systems neuroscience, and the computational principles of brain function they illustrate. Neuroscience topics include sensory processing, motor control, and memory. Computational and engineering principles include signals and systems, statistics, machine learning, and control theory. Brain-Computer Interfaces are highlighted as an example of the convergence of basic neuroscience and engineering applications. Course format consists of interactive lectures, student-led discussions of important publications, guided analysis of neuroscience data, and designing an original set of experiments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2601 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlining each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application

BIOENG 2615 - INTRODUCTION TO NEURAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to tissue engineering. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Tissue engineering is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology and cell. Be familiar with the general types of biomaterials used in tissue engineering. Understand techniques utilized to design, fabricate, and functionally assess tissue engineering systems. Apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution. This five part course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT

Minimum Credits: 3
Maximum Credits: 3
Biodynamics, the area of focus in biomechanics 3, is the study of large-scale movements in biologic systems. As such, the course focuses on the analysis of human movement, which is used in clinical and research settings to understand how various pathologies impact movement and how interventions can be implemented to aid those affected by movement disorders. We cover the fundamentals of biomechanics of human movement using mechanical modeling techniques. The major focus is kinematic analyses in three dimensions using matrix techniques. Some fundamentals of kinetics are covered as well, 2D and 3D inverse dynamics. Upon completing the course, the student should be able to describe basic methods of kinematic/kinetic analysis used in multi-link systems and be able to implement the methods in the analysis of human movement. Students should also be able to apply the methods to study common human movements, e.g. gait analyses, eye movement analyses, etc. Finally, students should be able to use the computer programming language, matlab, to perform computations on kinematic data.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS

Minimum Credits: 3
Maximum Credits: 3
This is the second part of a two semester advanced graduate course that uses the application of bio solid mechanics to describe the mechanical behavior living structures. The course will be separated into the following: 1) fundamental concepts: a. Kinematics, stress, strain b. Balance principles, objectivity c. Hyperelastic materials 2) biological applications a. Mechanical properties of specific tissues, (e.g. Tendon, muscle, heart, vascular) b. Growth and remodeling using mixture theories c. Approaches used to model cells (e.g. Blood cells, myofibroblasts)
Academic Career: Graduate

BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT

Minimum Credits: 3
Maximum Credits: 3
The course will blend robotics, probability, and neuroscience to better understand the human motor system, particularly motor learning and control of movement. While motor control will be discussed as a feedback control problem, these theories will be compared during the entire course to what we know about the motor system. We will begin by studying muscle activation and forces, muscle sensory organs, spinal control structures, and inertial dynamics of a multi-joint limb. This will give us a sense of the machinery that the nervous system must control in order to generate coordinated movements. Probability foundations will be used as a framework to model how the nervous system updates estimates of limb position and sensory feedback during movements. Finally we will consider how disease can inform us about principles of movement control and motor learning. The course material and associated homework will require the students to use matlab to simulate control of biomechanical systems. This will allow students to appreciate the value of models to generate hypothesis and possible explain biological behaviors.
Academic Career: Graduate
Course Component: Lecture

BIOENG 2671 - IMAGING IN REGENERATIVE MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Imaging is an essential analytical technique widely used in regenerative medicine. Imaging tools range from microscopy to validate by histology that regenerative therapies repaired damaged tissues, but non-invasive modalities, such as magnetic resonance imaging, are also used to define implantation coordinates and monitor tissue restoration in patients. This course will provide an overview of the applications of imaging in regenerative medicine. It will detail the rationale for using specific imaging techniques by contrast their advantages and disadvantages in particular applications. The student will learn to choose appropriate imaging methods for different questions that arise in regenerative medicine.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES

Minimum Credits: 3
Maximum Credits: 3
This team-taught course is designed as the second course in graduate biomechanics that applies and builds on the concepts of finite elasticity to study the constitutive response of various soft tissues. Course topics will include kinematics of large deformation, concepts of stress, thermodynamic principles, and development of constitutive relationships for hyperelastic materials. Isotropy, transverse isotropy, incompressibility, viscoelasticity as well as isotropic damage will be discussed. Specific application areas will include the mechanics of three general types of primary load-bearing soft tissues: vascular, orthopedic, and reproductive.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 1633/2633; PROG: Swanson School of Engineering (PENGR)

BIOENG 2704 - FUNDMS REHAB ENGR AND TECHN 1

Minimum Credits: 3
Maximum Credits: 3
Introduction to fundamental principles and practices related to multiple areas of assertive technology. The technology area include: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomic and man/machine modeling. In addition, common terminology, disability, ethics and models of service delivery related to assistive technology are discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2724 - ASSISTIVE TECHN FUNDING & POLICY

Minimum Credits: 3
Maximum Credits: 3
Students to develop knowledge and skill in the process and strategies necessary to acquire assistive technology devices and services for people with disabilities. Course content will focus on the process of gathering information, assessment procedures, documentation, and funding sources. Advocacy and procedures for due process will also be reviewed for situations when funding sources are limited.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2731 - MOLECULAR MECHANISMS OF TISSUE GROWTH AND DIFFERENTIATION

Minimum Credits: 3
Maximum Credits: 3
The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2800 - NEUROTECHNOLOGY: CONCEPTS, PATIENTS, AND DEVICES

Minimum Credits: 3
Maximum Credits: 3
This survey course will introduce students to biomedical devices that interface with the nervous system. Course instructors and guest lecturers will discuss fundamental neurostimulation and recording concepts, patients who may benefit from these devices, and both existing and in-development technologies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2805 - TRANSLATIONAL NEURAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the intersection of neurosurgery and neural engineering, with a focus on developing translational solutions to real-world clinical problems. Through clinician-led lectures, student-driven discussions, and project-based learning, students will explore the current landscape of neural engineering and identify paths for innovation in neurosurgery. Guided reading of state-of-the-art neuroscience and neural engineering literature will train students to critically evaluate emerging technologies and translate research findings into clinically meaningful applications. Class will meet twice a week, with one session dedicated to a lecture and the other typically in student-led exercises such as a literature discussion or project planning. Outside-class exercises will include a final project, homework assignments, and literature summaries.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY

Minimum Credits: 3
Maximum Credits: 3
Chemical and physical properties of Orthopaedic and Cardio Vascular Biomaterials, wear and corrosion of implant materials; fracture healing, inflammatory response; fixation and loosening of permanent implants; protein absorption; coagulation cascade, bacterial adhesion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2811 - MICROFABRICATION AND CHARACTERIZATION OF NEURAL INTERFACE DEVICES

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide graduate students an advanced understanding of a) photolithography process for microfabrication of neural devices (with clean room training and hands-on experience), b) the biocompatibility considerations for the materials used for the fabrications and the device configuration, and c) the standard electrochemical and biocompatibility characterization of the microelectrodes for neural applications (including both simulating and recording electrodes, both peripheral and cortical neural interface). The students will learn in detail the fundamentals of lithography processes and MEMS in neurotechnology applications (in parallel with hands on clean room lab experience at the Nano Fabrication and Characterization Facility (NFCF)). Materials science for neural prosthesis (on both insulating and conducting materials) and contemporary and future directions of the nano/micro neural devices will also be reviewed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An introduction to the engineering of biological systems with synthetic biology tools. Emphasis on synthetic biological networks and biological control. Design and analysis of computational and experimental tools in synthetic biology including microfluidic systems. Applications of synthetic biology in biomedical, chemical, and environmental engineering problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2821 - MICROPHYSIOLOGICAL SYSTEMS AND TISSUE MIMICRIES

Minimum Credits: 3
Maximum Credits: 3
Microphysiological systems (MPS) are a growing area of focus for bioengineers as well as basic scientists, biopharmaceutical industry and regulatory agencies. They offer enormous potential in accelerating and lowering cost of preclinical drug development, allowing pathophysiological modeling of biological and disease processes in a human-relevant manner, and enabling translational discoveries to benefit the human health and the society. MPS are commonly referred to Organs-on-Chips, but also cover three-dimensional (3D)-Bioprinted Tissue and Organ Mimicries. Organs-on-Chips are biomimetic, microfluidic, cell culture devices created with microchip manufacturing methods that contain continuously perfused hollow microchannels inhabited by living tissue cells arranged to simulate organ-level physiology. By recapitulating the multicellular architectures, tissue-tissue interfaces, chemical gradients, mechanical cues, and vascular perfusion of the natural organ, these devices produce levels of tissue and organ functionality not possible with conventional 2D or 3D culture systems. They also enable high- resolution, real-time imaging and in vitro analysis of biochemical, genetic and metabolic activities of living human cells in a functional human tissue and organ context. 3D-Bioprinting is an additive manufacturing technique that is applied to biological materials and allows creation of cell-free and cell-laden scaffold for a diverse array of applications including regenerative medicine and preclinical pathophysiological modeling. In this course, we will cover advances made over the past two decades on these emerging technologies (Human Organs-on-Chips and 3D-Bioprinting). In addition, we will other methods of cellular, tissue and organ engineering that traditionally do not fall into MPS categories. These include decellularization and recellularization of natural scaffolds (e.g., heart, lung), stem cell-based tissue engineering approaches (e.g., iPSCs-derived tissues, spheroids, and organoids) and precision-cut organ slices (e.g., lung, liver). Moreover, this course includes workshops where trainees would have a chance to fabricate simple microfluidic organ-on-chip devices (to be carried out at Dr. Benam's labs) and 3D-bioprint sample matrices (need to identify available resources in BIOE Department; if none is available, Dr. Benam will use inexpensive 3D bioprinters for training purpose at his labs).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2901 - TECHNICAL WRITING WORKSHOP II: OUTLINE ORGANIZATION, PUBLISHING PAPERS, AND PREPARING FOR PRELIMS

Minimum Credits: 1
Maximum Credits: 1
Communication is the most crucial skill in Science and Engineering and written communication has the potential to be the most far reaching medium of communication. This course will explore the ways that engineering students can develop their own technical writing from an engineering perspective. Lectures will cover the structure modules and technical elements that go into publishing journal articles as well as identifying and writing to your specific audience, including non-experts. Assignments are designed to develop your ability to understand, analyze, summarize, and reformulate hypotheses (scientific methods) or design criteria (engineering method) for journal articles, reports, and manuals. Students will also learn how to apply the philosophy and principles behind technical writing into effective project planning including the prelim exam. Lastly, we will debunk some common myths and misconceptions of technical writing including for the prelim exam.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

BIOENG 2901 - TECHNICAL WRITING WORKSHOP II: OUTLINE ORGANIZATION, PUBLISHING PAPERS, AND PREPARING FOR PRELIMS

Minimum Credits: 1
Maximum Credits: 1

BIOENG 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOENG 3095 - GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 6
Individual study program under guidance of faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

BIOENG 3195 - ADVANCED TOPICS IN BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
A Ph.D level course in advanced topics of current interest in bioengineering.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOENG 3760 - REGENERATIVE MEDICINE RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Research seminar in regenerative medicine is geared towards providing updates information on topics in the field of regenerative medicine, tissue engineering and stem cell applications. Through biweekly seminars, the students will be acquainted to the recent advances in the ever-growing field of regenerative medicine. Experienced faculty will deliver lectures in this seminar series.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 3780 - HUMAN FACTORS OF AGING

Minimum Credits: 3
Maximum Credits: 3
Research often leads to ideas and findings that can be developed into new medical devices or interventions. One limiting step in the development of these new ideas into action is the incorporation of the human factors components in the design. This is particularly true for devices/interventions meant to be used by older adults. This course provides an introductory understanding of how human factors is used in medical device design with a focus on older adults. The target audience for this course is broad, encompassing anyone that wants to learn how to design, test and evaluate medical devices or interventions used by older adults. This includes investigators (faculty, scientists, post-docs), engineers, and clinicians. The course will be at the graduate level, but general in scope. No pre-requisites are required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 3944 - COMPOSITION, STRUCTURE, AND FUNCTION OF MINERALIZED TISSUES

Minimum Credits: 3
Maximum Credits: 3
Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease.

Bioethics

BIOETH 2001 - ETHICS AND AGING

Minimum Credits: 3
Maximum Credits: 3
This course offers an overview of ethical issues in aging. Early sessions will explore the ethical implications of stereotypes and myths regarding aging. Turning to the context of health care, students will identify and analyze moral dilemmas that arise in the long-term and end-of-life care of older adults. Concepts and topics to be critically examined include: autonomy, dependency, elder abuse, and just resource allocation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOETH 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to topics in research ethics and the responsible conduct of research particularly pertinent to basic and non-clinical, population-based research employing a variety of methods. Students will learn key concepts and methods of ethical reasoning and requirements of human subjects' protection and nonhuman animal research, and will analyze historical and contemporary examples of research misconduct, as well as ethical concerns arising in their own work. Using lecture and small group discussion of assigned readings and participants' research, the course will develop students' skills requisite to design and conduct ethical research, avoid research misconduct, and ethically negotiate the tasks and milestones of academic education and careers (e.g. issues of mentorship and publication). Students will be evaluated (by letter grade) on the basis of the quality of their discussion contributions and quiz/exam responses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOETH 2604 - CLINICAL PRACTICUM 1

Minimum Credits: 3
Maximum Credits: 3
Placements in different clinical settings to observe clinical ethics and medical sociology discussions.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOETH 2606 - CLINICAL PRACTICUM 2

Minimum Credits: 3
Maximum Credits: 3
Intensive observation experience in one clinical setting.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOETH 2658 - PHILOSOPHY OF MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Issues in philosophy of medicine, with reference to American health care, including concepts of health and disease, normativity, causation, error, clinical diagnosis, prevention, and epidemiological risk.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2661 - THEORETICAL FOUNDATIONS OF APPLIED ETHICS

Minimum Credits: 3
Maximum Credits: 3
Survey of contemporary ethical thought with reference to its historical bases, intended to prepare students to read and think critically and creatively about the literature in applied ethics, especially bioethics and health policy.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2664 - BIOETHICS

Minimum Credits: 3
Maximum Credits: 3
Survey of major topics and methods in bioethics, including informed consent, treatment refusal, transplantation, resource allocation, genetics, and public health.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2667 - BIOPOWER: BIOPOLITICAL READINGS OF THE BODY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOETH 2668 - SUSTAINABILITY IN LATIN AMERICA

Minimum Credits: 3
Maximum Credits: 3
Latin America hosts some of the most biologically diverse and productive ecosystems on Earth, yet economic and social development are frequently at odds with efforts to conserve and use these ecosystems sustainably. This upper-level seminar focuses on the issues surrounding environmental sustainability in Latin America from a holistic, interdisciplinary perspective. The course will start with a general introduction to the three legs of sustainability and sustainable development theory, as well as the ecology and evolution of Neotropical biodiversity. We will use published primary literature to explore the particular complexities of Latin American sustainable

development, and analyze case studies of moments through history in which environmental issues were either championed or de-emphasized. The course will feature several guest lectures, optional seminars for extra credit, and discussions of current sustainability news. Students will be responsible for a final research project and presentation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Attributes: MCSI - Sustainability Focused

BIOETH 2698 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Seminar on particular topics in bioethics; topics vary from term to term.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOETH 2902 - DIRECTED READING IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 3
Students discuss with instructor set readings in bioethics. Topics and readings may vary.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

BIOETH 2904 - MA THESIS IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 6
Research under the supervision of the advisor which culminates in the master's thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOETH 2905 - MA THESIS PROSPECTUS IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

BIOETH 2906 - MA THESIS RESEARCH IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

BIOETH 2907 - MA THESIS DEFENSE IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

BIOETH 2990 - INDEPENDENT STUDY IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 3
Students pursue a course of independent study under the supervision of a faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

Biomedical Informatics

BIOINF 2000 - BIOMEDICAL INFORMATICS LABORATORY ROTATION

Minimum Credits: 1
Maximum Credits: 1
Each doctoral student should choose a research mentor and start working on the research that will eventually become the focus of their dissertation. Research rotations provide students and mentors with the opportunity to experience and assess potential mentor-trainee relationships by working on time-limited projects. BIOINF doctoral students must complete at least two, and possibly three ten-week rotations during their first year. Following a set schedule: October 1 - December 15 January - mid March (first day of semester) Mid-March - late May
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad SN Basis

BIOINF 2010 - BIOMEDICAL INFORMATICS COLLOQUIUM

Minimum Credits: 1
Maximum Credits: 1
The Biomedical Informatics Colloquium is a weekly series of seminars focused on current research in biomedical informatics. Guest speakers come primarily from universities, but also government labs and the private sector. Registration is not required for seminar attendance but is required to take the course for credit. Grading is based on the extent of active participation throughout the semester.
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad HSU Basis

BIOINF 2011 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, tele health, decision theory, and decision support, human-computer interfaces, system integration, the digital library, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2014 - BIOMEDICAL INFORMATICS PROJECT COURSE

Minimum Credits: 3
Maximum Credits: 3
The course consists of three main parts. In the first part of the course the projects are conceived. In the middle part, the projects are defined and designed. In the final part, the projects are carried out, analyzed, and reported. In all three phases, students will first have classroom discussions among themselves and the instructor about their ideas for that phase of the project. Next, they will work outside of the classroom on that project phase and write a report. Finally, they will orally present the main ideas of their report to the class. The instructor will provide written and oral feedback on each stage of the project, as it occurs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2016 - FOUNDATIONS OF TRANSLATIONAL INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
The field of translational bioinformatics emerged because of the recent advances in biotechnology with which several new types of patient and disease specific data are being created for large subpopulations. Computer science methods are being rapidly adapted to process and analyze this data, with the goal of drawing biologically and medically-relevant inferences. By analyzing these different types of data individually or integratively, it is now feasible to attempt deciphering biological root cause of a disease (at least the 'why' of the disease if not 'how'), to identify biomarkers, and to design personalized medicine.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2018 - INTRODUCTION TO R PROGRAMMING FOR SCIENTIFIC RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Science is increasingly inter-disciplinary, and programming has become a valuable skill in many investigations. This course is designed to empower you with the ability to solve scientific problems through writing computer programs. Emphasis is placed on using the R language to solve biology problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2019 - BIOMEDICAL DATA STREAMING

Minimum Credits: 1
Maximum Credits: 3
In this project students and a faculty mentor will explore data streaming technologies to implement scalable and distributed biomedical data ecosystems. In particular, students and a faculty mentor will conduct a project to learn how biomedical data processing can be enhanced with processing power of modern data-streaming infrastructures to enable continuous biomedical data acquisition and analysis. Upon completion of this project students will be able to understand major principles and trade-offs in design and development of a comprehensive biomedical data processing pipeline for data-intensive applications. Students will gain practical skills in selecting, applying, and developing data streaming solutions appropriate for specific data processing and data analysis tasks.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2032 - BIOMEDICAL INFORMATICS JOURNAL CLUB

Minimum Credits: 1
Maximum Credits: 1
This course meets once each week for one hour. The research being presented will be taken from recent journal papers.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BIOINF 2051 - FOUNDATIONS OF BIOINFORMATICS

Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2061 - SINGLE-CELL AND SPATIAL GENOMICS DATA ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Students could work on a wide range of projects centered on the themes of preprocessing, analysis, integration, interpretation, visualization, manipulation and design of single-cell and spatial genomics data and experiments in life sciences and biomedicine. Ideas for potential projects will be suggested, and students are also free to choose their own topics. We will meet twice a week (class and recitation). Class time will be used to introduce necessary concepts from biology and computational methodology. Recitation time will be used to discuss students' progress in their projects. For most projects, knowing R or Python will be necessary, and students should be ready to pick it up in the first few weeks of the seminar. Students may pair to work on more ambitious projects, or on complementary aspects of a project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2062 - FOUNDATIONS OF ALGORITHMS

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in algorithms. Course content will include the traditional key components of an algorithm course, together with a flavor of newer technologies such as advanced data structures. Time complexity analysis is an important matter and will be discussed where it fits throughout the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2070 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 1

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (people, data and knowledge, and evaluation).
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 1501 and CS 2710

BIOINF 2071 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (challenges and analysis and interpretation to create knowledge).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2071 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (challenges and analysis and interpretation to create knowledge).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2103 - DESIGN AND ANALYSIS OF BIOMARKER STUDIES

Minimum Credits: 2
Maximum Credits: 2
The objective of this course is to identify, describe, and apply the statistical and epidemiological knowledge, tools, and perspectives necessary for effectively designing, analyzing, and interpreting biomarker studies (which may include diagnostic and medical tests, prognostic markers for prediction of future disease outcomes, and/or predictive markers for treatment response). The course will also focus on writing a funding proposal; students will develop a 3-4 page concept proposal as the class project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOINF 2118

BIOINF 2105 - ARTIFICIAL INTELLIGENCE FOR BIOMEDICAL INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This course provides the required introduction to artificial intelligence (AI) for all Biomedical Informatics students in the Department of Biomedical Informatics. It is designed to complement the two Foundations of Biomedical Informatics courses by providing a rigorous and practical education on fundamental AI topics. While the lessons are on AI subjects that not specific to the biomedical domain, the course will point the students to problems and applications from biomedicine relevant to each AI subject. The course is practical in the sense that the homework assignments will give students hands-on experience applying the AI methods covered throughout the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2110 - CONCP SOFTWR PROJ ENGR HLTH CARE

Minimum Credits: 3
Maximum Credits: 3
This course examines how health care organizations implement both clinical and financial information systems. The course will study the implementation process and how to integrate systems to create the computerized patient record (CPR). Students will have the opportunity to learn about the industry-wide implementation data standards and how to manage them.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2117 - APPLIED CLINICAL INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide an overview of the field of applied medical informatics. Students will learn about the myriad issues that arise when deploying information technology into clinical environments. Practical, real world solutions to the challenges of hit will be addressed by experts involved in the day-to-day operations of these types of systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This is an introductory probability and statistics course intended primarily for biomedical informatics students. The first part of the course covers probability, including basic probability, random variables, univariate and multivariate distributions, transformations, expectation, numerical integration, and approximations. The second part of the course covers statistics, including study design, classical parametric inference, hypothesis testing, Bayesian inference, non-parametric methods, classification, ANNOVA, and regression. We will use r for statistical computing and applications. Examples and applications will focus on biomedical informatics and related discipline.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2119 - PROBABILISTIC METHODS IN ARTIFICIAL INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3
This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations artificial intelligence methods in search, probabilistic knowledge representation and reasoning, and machine learning with applications to biomedical informatics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2120 - SYMBOLIC METHODS IN ARTIFICIAL INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3
This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations of artificial intelligence methods in logical knowledge representation and reasoning, biomedical ontologies and terminologies and information retrieval. Prerequisites for this course include introductory mathematics and programming.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIOINF 2012 and 2015

BIOINF 2121 - HUMAN-COMPUTER INTERACTION AND EVALUATION METHODS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects. Topics include: critical success factors, test plan development and user interface design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2122 - CRITL REFLCTN BIOMD INFORMTCS

Minimum Credits: 3
Maximum Credits: 3
This course will showcase presentations from DBMI researchers and invited speakers from across campus and beyond. Session will be videotaped and presented as weekly one-hour recording. The on-site Q/A session afterwards will be substituted by a facilitated asynchronous online discussion in blackboard. Special emphasis will be put on peer- and self-assessment of the contributions to the online discussion which will promote higher-level thinking among the students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This course explores challenges and opportunities in developing and supporting health information systems in developing-world settings by examining differences, and ways to both integrate and sustain systems in an appropriate way in low-resource settings. The course will review the current "state-of-the-art" in this field by looking at examples of systems currently deployed in the developing world, and explore opportunities for advancing this work through a series of case studies and hands-on exercises based on real-world scenarios.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: MCSI - Sustainability Focused

BIOINF 2125 - INFORMATICS AND INDUSTRY

Minimum Credits: 1
Maximum Credits: 1
The focus of the class is to provide an opportunity for students to interact with leading industry representatives and to learn techniques/tools that would enable them to market their skills in non-academic environments. We will invite speakers from various local, regional, national, and international industry relationships that we have established.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BIOINF 2129 - INTERNSHIP IN GLOBAL HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3

The internship in global health informatics will be expanded to accommodate 5 students from the US. Students will travel to Malawi to study global health informatics in low-resource settings alongside Malawian health and technology professionals. Students will have an opportunity to propose, design and develop a product or intervention relevant to solving a particular problem the group has identified.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2131 - PRACTICUM IN ADV BIOMEDICAL IT

Minimum Credits: 1
Maximum Credits: 6
This course is designed for people who want a practical experience in working with advanced information technology in the center for biomedical informatics.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2132 - SPECIAL TOPIC SEMINAR IN MEDICAL INFORMATICS

Minimum Credits: 1
Maximum Credits: 3
This course is designed for faculty to offer small groups of students a study course on a topic of mutual interest and concern in the faculty member's area of expertise.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2133 - PRACTICUM IN ADVANCED INFECTIOUS DISEASE AND PUBLIC HEALTH SURVEILLANCE (BIOSURVEILLANCE) TECHNOLOGY

Minimum Credits: 1
Maximum Credits: 6
This course is designed for people who want a practical experience in working with advanced bio surveillance technology in the real time outbreak and disease surveillance (rods) laboratory.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2134 - PUBLICATION AND PRESENTATION IN BIOMEDICAL INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This course provides a practical overview of how to write a research manuscript and how to give a scientific talk. It is usually taken after completing the project course (BIOINF 2014). Students taking this course must have a completed research project that can be used to complete the course exercises. Each week, we will target a specific section of the manuscript or scientific talk. Didactic sessions describing common problems and approaches will alternate with student presentation and peer critique. The course also covers the details of the publication process. At the end of the course, a special presentation workshop gives students the opportunity to improve their talks using videotaping and debriefing methods. By the end of the course, students will have completed a research paper and a finalized colloquium presentation.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2204 - INT HLTH INFORMTCS TEC DENTY

Minimum Credits: 3
Maximum Credits: 3
An introduction to health information technology (HIT) for dentists, dental team members and others involved in dentistry with three objectives: (1) understand how hit can support the activities and processes of clinical dental care; (2) select and evaluate hit applications; and (3) plan, administer and manage hit implementations. Course covers topics such as dental care workflow and analysis; electronic dental records; dental data and their representation; controlled vocabularies and terminologies; human computer interaction; information design; computer-based decision support; strategic planning; requirements analysis; evaluating technology; managing human resources for it; planning and implementing hit; basics of hardware and software; and privacy, confidentiality and security of patient information.

Biological Sciences

BIOSC 0353 - GENETICS LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This authentic research-based laboratory course will use a model genetic system, such as Drosophila, to advance our understanding of gene

function and regulation. Students will learn how to perform genetic analyses in the system being used, for example, setting up crosses, generating mutants, analyzing mutant phenotypes, using molecular genetic techniques, and making transgenics. Students will also learn how to devise hypotheses, design experiments, record experimental results, and then interpret these so that they can be communicated in the form of a poster, presentation, and/or written report.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

BIOSC 0359 - GENOMICS LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This course guides students through the design and evaluation of a data-driven research project in the area of genomics and metagenomics. In the first half of the course students apply methods of molecular biology to collect data about the studied system that are used as the starting point for scientific questions and hypotheses. In the second half they analyze the data and test their hypotheses using comparative and functional genomics approaches.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

BIOSC 0825 - SPECIAL TOPICS IN BIOLOGY FOR NON-MAJORS

Minimum Credits: 1
Maximum Credits: 3
A major topic in biology will be developed and explored by students.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

BIOSC 0860 - HUMAN SEX AND GENDER: AN INTERDISCIPLINARY APPROACH

Minimum Credits: 3
Maximum Credits: 3
This course examines human anatomy and physiology through the principles of gender-inclusive biology. Utilizing a systems-based methodology to study function and maintenance, we explore how human physiology transcends traditional binary sex classifications. By analyzing the intersection of biology with contemporary socio-political landscapes, students synthesize biological data and gender studies to recognize diverse physical patterns. Ultimately, the course interrogates how "normal" bodies are socially and scientifically constructed, equipping students with the vocabulary required to engage with these complex and timely discourses.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BIOSC 1003 - BIOCHEMISTRY LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This course immerses students in biochemistry through a hypothesis-driven, authentic research project. Students develop technical competence and scientific reasoning by applying fundamental biochemical techniques such as protein expression, purification, and functional characterization, while emphasizing experimental design, troubleshooting, quantitative data analysis, and record keeping. The course highlights critical thinking, collaboration, professional scientific communication, and the iterative nature of scientific discovery. This course may not be taken by Biochemistry majors; see BIOSC 1823 instead.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

BIOSC 1523 - DEVELOPMENTAL BIOLOGY LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This authentic research-based laboratory course will introduce students to a classic system in developmental biology. Students will become familiar with the chosen species and participate in a project devised to advance our understanding of development. Students will master techniques such as microscopy, antibody staining, in situ hybridization, and experimental manipulation of embryos. Students will also learn how to devise hypotheses, design experiments, record experimental results, and then interpret these so that they can be communicated in the form of a poster, presentation, and/or written report.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

BIOSC 1823 - BIOCHEMISTRY LABORATORY FOR BIOCHEMISTRY MAJORS

Minimum Credits: 3
Maximum Credits: 3
This authentic research-based laboratory course is specifically designed for Biochemistry majors in the Department of Biological Sciences. The hypothesis-driven project is part of scientific investigations of a research lab in the department. Students learn classical and fundamental biochemical laboratory techniques, the theory behind the techniques, troubleshooting, analysis and interpretation of experimental results, and record keeping. Students will learn to plan experiments to test scientific ideas, to communicate scientific theories and results, and become more independent in scientific thinking.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BIOSC 1857 - MICROBIAL GENETICS LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This authentic research-based laboratory course focuses on the genetic analysis of prokaryotic and eukaryotic microbes. Projects typically employ both classical and molecular genetic approaches, for example, generating mutants and determining the resulting phenotype.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

BIOSC 1859 - VIROLOGY LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This course is designed to give students practical experience with the methods and techniques used in the study of viruses while conducting original research involving genetically engineering bacteriophages.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

BIOSC 1905 - HONORS RESEARCH WRITING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213 or 0214) or FP (0003 or 0006) *Applies to all WRIT Courses*

BIOSC 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1
Maximum Credits: 15
Students working on their early research requirement may (but are not required to) register for BIOSC 2000. A grade of Incomplete is automatically given for this course until the Comprehensive exam is passed.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2025 - RESEARCH ROTATION 1

Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk. Students in the MCDB Program do three rotations, those in the EE Program do 2 or 3. Each rotation is worth a single credit.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOSC 2026 - RESEARCH ROTATION 2

Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOSC 2027 - RESEARCH ROTATION 3

Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOSC 2050 - STUDENT RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
In this course, students present their research to faculty, students and postdocs.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2055 - SCIENCE COMMUNICATION: PREDOCTORAL FELLOWSHIPS & GRANTS

Minimum Credits: 1
Maximum Credits: 1
The goals of this course are to inform students about the tools and background needed to prepare for seminar and poster presentations and submit pre-doctoral fellowships and grants.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2056 - SCIENCE COMMUNICATION: SEMINAR & POSTER PRESENTATIONS

Minimum Credits: 1
Maximum Credits: 1
The goals of this course are to prepare students for oral and written presentation of their work. Topics will include seminar preparation, maintaining linear train of thought, balancing data with context, data presentation as a reinforcement tool, preparing for 15-, 30- and 45-minute talks, preparing for broad and narrow scientific audiences, speaking with the general public, preparation of useful abstracts, assembly of effective posters, effective presentation of posters, tips and tricks for fielding questions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2057 - SCIENCE COMMUNICATION: PAPERS

Minimum Credits: 1
Maximum Credits: 1
This course covers the process of writing scientific papers, including primary data papers, review articles, and general opinion pieces. Topics include strategies for data organization, figure preparation, targeting the introduction for the audience, logic flow in the results, and focusing the discussion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2058 - ETHICAL PRACTICES IN SCIENTIFIC RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course familiarizes students with areas of ethical concern in scientific research, including data integrity, intellectual property, plagiarism, collaboration and cooperation, data sharing, treatment of animal and human subjects, and responsibilities to the general public.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2075 - MOLECULAR EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2090 - ADVANCED DEVELOPMENTAL BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will examine selected topics in developmental biology at an advanced level. Topics may include pattern formation in insects, cell lineage analysis, cell-cell interactions and the specification of cell fates, cell adhesion molecules, genetic approaches to mammalian embryo genesis and the extracellular matrix in development. Emphasis will be placed on the critical reading of papers and classroom discussion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2100 - CELLULAR STRUCTURE AND MORPHOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will explore biological processes within eukaryotic cells. Topics include: mechanotransduction/biomechanics; cellular interactions; polarity; cytoskeletal dynamics; cell-matrix interactions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2110 - MICROBIAL DIVERSITY

Minimum Credits: 2
Maximum Credits: 2
This course will survey important genetic, genomic, physiological, cell biological and developmental processes that distinguish viral, prokaryotic and unicellular eukaryotic organisms. Topics include: bacteriophages, plants and animal viruses; bacterial intracellular pathogens, parasites and symbionts of plants and animals; eukaryotic pathogens.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOSC 2115 - MRNA-BASED PRODUCT DESIGN

Minimum Credits: 1
Maximum Credits: 1
This course provides a comprehensive introduction to the principles of mRNA vaccines and therapeutics and practices of designing, characterizing, and preclinically testing mRNA-based therapeutic and vaccine products within a practical, industry-relevant framework. Students will learn the molecular, cellular, biochemical, pharmacological, and immunological foundations necessary to design a product

using a web-based portal. The course culminates in the design, ordering, and in-lab testing of a student-designed mRNA product.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2121 - BIOSTATISTICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2130 - GENETICS OF MODEL ORGANISMS

Minimum Credits: 2
Maximum Credits: 2
This course will compare genetic approaches in a variety of model systems. Topics include: genetics screens and selections; linkage mapping; genetic manipulation in haploid and diploid model systems; epigenetics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2140 - GENOMICS

Minimum Credits: 2
Maximum Credits: 2
Advances in molecular biology have enabled the collection of a great deal of sequence data. Genomic studies seek to understand the organization of, and information embedded within, entire genomes. Students will learn a variety of techniques in structural genomics (finding information within genomes), functional genomics (describing gene function and interaction), comparative genomics (assessing how that information changes) and metagenomics (assessing the gene content of multiorganism communities) directed at using genome sequence data to address questions of interest.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2145 - PROTEIN LIFE HISTORY

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the fate of proteins within cells. Topics include: protein synthesis; building blocks of protein structure; domains and protein folding; mechanisms of protein sorting; protein trafficking; directional transport and secretion; exo- and endocytosis; autophagy, ER targeting.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2150 - NUCLEIC ACIDS

Minimum Credits: 2
Maximum Credits: 2
BIOSC 2150 focuses on the molecular biology of DNA and RNA, and how biological information is stored, replicated, recombined, and processed. Topics to be discussed include: DNA replication and its regulation; DNA segregation; homologous, illegitimate and site-specific recombination; DNA repair; structural and functional roles of RNA in the activity and regulation of telomerase; small nuclear rnas and the

spliceosome; processing of ribosomal and transfer RNAs; regulation by micro RNAs and long non-coding RNAs. There will be an emphasis on the primary literature.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2155 - GENE EXPRESSION

Minimum Credits: 2
Maximum Credits: 2
This course will examine the regulation of gene expression from a variety of standpoints. Topics to be discussed include: transcriptional mechanisms and regulation in prokaryotes and eukaryotes; MRNA splicing; RNA processing; RNAI; chromatin.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2220 - ADVANCED BIOSTATISTICS

Minimum Credits: 2
Maximum Credits: 2
This course provides an advanced, model-driven survey of statistical methods in the biological sciences. The first part of the course, led by the instructor, will cover general and generalized linear models, maximum likelihood, model selection, model validation, and mixed models. The second part of the course, co-led by students and the instructor, will cover other advanced topics of interest to be selected by the students. We will use R extensively throughout the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2351 - ADVANCED EVOLUTION

Minimum Credits: 2
Maximum Credits: 2
This course explores factors that influence inheritance. Topics include: gene-by-environment interactions; polymorphism and polyphenism; sexual dimorphism; causes and consequences of individual variation; extended phenotypes; nutrition and the phenotype; fitness landscapes; mutation and novelty; trait mapping onto phylogenies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2355 - SPECIES INTERACTIONS

Minimum Credits: 2
Maximum Credits: 2
This course examines the interactions between species in a variety of contexts. Topics include: coevolution, mutualism & parasitism; plant-herbivore coevolution; cospeciation; hybridization and signaling of species identity; predation, predator-avoidance and aposematism; predator-prey interactions; foraging ecology; competition; tri-tropic level interactions; herbivory; context-, condition- and trait-dependent species interactions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2361 - ADVANCED ECOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course examines the relationship between organisms and their environment. Topics include: colonization strategies; succession; biogeography; climate change; trait-mediated assemblages; spatial models; trophic cascades.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: MCSI - Sustainability Focused

BIOSC 2370 - EVOLUTIONARY GENETICS

Minimum Credits: 2
Maximum Credits: 2
This course will cover a wide variety of traits and model organisms in which genetic and developmental studies of evolution have been performed. Topics and concepts will include phylogenetics, population genetics, the evolution of novelty, host-pathogen interactions, and multicellularity. The course will consist of lectures, journal article discussions, and essays relevant to the lecture topic.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2405 - ADVANCED GLOBAL CHANGE BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This advanced course focuses on the ecological and evolutionary impacts humans have on the environment, explores the interconnectedness between humans and the natural world, and evaluates options for mitigating environmental problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS

Minimum Credits: 3
Maximum Credits: 3
This course in ecophysiology is a physiology course taught from an ecological and evolutionary perspective. The organismal, ecological, and evolutionary significance of physiological function will be emphasized along with molecular and cellular mechanisms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2450 - BIOLOGICAL SCIENCES SEMINAR

Minimum Credits: 2
Maximum Credits: 2
Papers to be selected from current periodicals in the biological sciences for presentation. Emphasis will be placed on a critical evaluation of experimental procedures, data, and the interpretation of data.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2500 - CURRENT TOPICS IN ECOLOGY

Minimum Credits: 1
Maximum Credits: 3
This course will cover population ecology, community ecology, and ecosystem ecology. A strong undergraduate background in ecology will be assumed. Some lectures will be included, but most emphasis will be placed on reading and discussing papers from the primary literature, including papers of both historical and current interests.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Attributes: MCSI - Sustainability Focused

BIOSC 2540 - SEMINAR IN ECOLOGY AND EVOLUTION

Minimum Credits: 2
Maximum Credits: 2
Students will participate in the critical review of the current literature relating to a topic in ecology. Specific topic is to be selected later.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, MCSI - Sustainability Focused

BIOSC 2545 - THE MATHEMATICS OF BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course uses examples from across biology to illustrate how simple mathematical models can increase our understanding of biological systems. We will focus on several foundational modeling approaches, including systems of difference equations, matrix models, probability, and statistical data analysis. Students will discover how these approaches are used, their strengths and limitations, and how they could be extended to more complex problems. Students should be prepared to use both spreadsheet programs and scripts, written in a language such as Python or R, to explore these models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2570 - ENVIRONMENTAL SCIENCE TEACHER'S WORKSHOP

Minimum Credits: 1
Maximum Credits: 3
Teachers spend five days at Pymatuning Laboratory of Ecology exploring the relationship between land use, water quality and aquatic community structure. Lectures, field work, data analysis, interpretation of results. Includes development of modules for classroom use.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

BIOSC 2810 - MACROMOLECULAR STRUCTURE AND FUNCTION

Minimum Credits: 3
Maximum Credits: 3
Course is concerned primarily with the structure and functions of proteins and nucleic acids. These are large polymers where structure and function are determined by the sequence of monomeric units. Topics will include the physical and chemical properties of the monomer units (amino acids/nucleotides); the determination of the linear sequence of these units; the size, shape and general properties of the biopolymers in aqueous systems; and the relation between structure and function, particularly in transport (hemoglobin) and in catalysis (enzymes).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2840 - REGULATION OF MEMBRANE TRAFFIC

Minimum Credits: 2
Maximum Credits: 2
Course analyzes membrane/protein traffic along both the biosynthetic and endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g proteins (both heterotrimetric and small), coat proteins (coatamer 1 and 2 and adaptors), signal transduction cascades (pkc, pka, ip3, etc), and snare complexes in protein trafficking.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2940 - MOLECULAR BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Course will examine the molecular basis of life processes, with a primary emphasis on genes (what they are, what they do, how they determine the properties of an organism). Topics covered will include replication of DNA, transcription of DNA into MA, and translation of RNA into protein. Much of the course will be concerned with how these processes are regulated in response to changes in the environment, and how this regulation relates to the observed properties and behavior of the organism.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2950 - SEMINAR JOURNAL CLUB

Minimum Credits: 1
Maximum Credits: 1
Research papers will be discussed prior to departmental seminar.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BIOSC 2960 - DEPARTMENTAL SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students will attend lectures on selected topics of current research in the biological sciences. The lecturers will primarily be invited scientists from outside the university, with a few lectures by faculty from within the department or other departments in the university.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2970 - TEACHING OF BIOLOGICAL SCIENCES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2972 - TEACHING MINOR BIOLOGCL SCIENCES

Minimum Credits: 1
Maximum Credits: 4
Graduate students in the department of biological sciences have the option of completing the requirements for a teaching minor, to be awarded concomitant with receipt of their advanced degree from this department.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 3001 - PREPARATION FOR THE STEM CLASSROOM

Minimum Credits: 1
Maximum Credits: 1
This seminar series is designed for Ph.D. students and post-doctorate fellows interested in pursuing an academic career and wish to gain didactic knowledge and skills related to teaching in a science, technology, engineering and mathematics (stem) classroom. Experienced faculty provide topics and discussion based seminars.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOSC 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING

Minimum Credits: 1
Maximum Credits: 1
Designed for graduate students and postdocs preparing for academic careers in the stem disciplines, this course provides an introduction to the scholarship of teaching and learning (SOLT). This is the second course in a series; however, the former course (3001) is not a required prerequisite. The course will utilize material presented in a massive open online course (MOOC) available through coursera.org and sponsored by the center for the integration of research, teaching and learning (CIRTL). Participants will learn about effective teaching strategies and the research that supports them in addition to learning how to collect, analyze, and act upon their own evidence of student teaching. Topics include but are not limited to: 1. Learning through diversity, 2. Cooperative learning/peer instruction, 3. Inquiry-based labs, 4. Problem-based learning, 5. Flipped classroom pedagogy. Further, participants will learn the process for developing a teaching as research plan as well as the role of human subjects consent for classroom based research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

BIOSC 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

Biomedical Sciences

MSBMS 2010 - BIOCHEMISTRY AND PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2028 - COMPREHENSIVE ANALYSIS OF DISEASE 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to give the students the opportunity to integrate all the knowledge accumulated during the program and in the fall session of CAD in a comprehensive study of disease states. Faculties will present lectures on various diseases with particular emphasis on the physiology and pharmacology. At the end of term there will be Special Topic Session in which students will present short lectures on current and interesting topics. The students will identify the topics and discuss them in advance with the course director. Participation to these sessions is not mandatory but will be considered in the final grade.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: BMP (BIOSCI-MS)

MSBMS 2029 - COMPREHENSIVE ANALYSIS OF DISEASE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to give the students the opportunity to integrate all the knowledge accumulated during the program into a comprehensive study of disease states. Small groups of students will work collaboratively to develop an in-depth analysis of a specific disease, from the diagnosis to the pathogenesis, the molecular and cellular basis, and the treatment options currently available. Each group of students will work in a web-based platform under faculty supervision to develop an interactive, knowledge-based teaching/research study.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSBMS 2030 - HISTOLOGY AND CELL FUNCTION IN HEALTH AND DISEASE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: BMP (BIOSCI-MS)

MSBMS 2040 - METHOD AND LOGIC IN BIOMEDICINE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2055 - HUMAN ANATOMY

Minimum Credits: 2
Maximum Credits: 2
This course explores human structure and the organization of organ systems. Lectures are organized by anatomical regions, with the surface anatomy (surface landmarks for finding deeper structures) presented before the discussion of each region. The students will be provided learning tips to assist in retaining anatomical information and they will be introduced to the terms needed for effective communication in describing the body for understanding the anatomical basis of disease and clinical problem-solving.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2056 - INTENSIVE COLLABORATIVE GROUP GROSS ANATOMY LABORATORY LEARNING EXPERIENCE: LEARNING ANATOMY FROM CA

Minimum Credits: 1
Maximum Credits: 1
A novel learning approach that combines collaborative group project learning and traditional lectures/lab experiences will be used in the course to optimize student comprehension and retention of human anatomy. Cadavers, specimens, constructed models, and interactive 3D Anatomy virtual imaging programs will be used in gross anatomy laboratory setting to give the student a comprehensive view of anatomy.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOSCI-MS

MSBMS 2061 - FOUNDATIONS OF SUCCESSFUL BIOMEDICAL CAREER PLANNING AND DEVELOPMENT II

Minimum Credits: 1
Maximum Credits: 1
The course provides foundational training in career planning and professional development. Key skills that students build are: Increasing your capacity for self-directed career development; Fostering life-long career management habits; Maximizing your scholarly training success; Shaping positive career outcomes Students will engage in experiential learning, small-group discussions, and peer mentoring. These different approaches enable individually relevant and self-constructed understandings of career development, consistent with expectations of independence in scholarly activities. Areas for discussion include: self-assessments, exploration of different career options, how to set goals, career adaptability, and other topics identified by students. A final self-authoring paper will be required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2061 - FOUNDATIONS OF SUCCESSFUL BIOMEDICAL CAREER PLANNING AND DEVELOPMENT II

Minimum Credits: 1
Maximum Credits: 1

MSBMS 2063 - PROFESSIONALISM AND NON-COGNITIVE AND DEVELOPMENT PART 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

MSBMS 2074 - EXPERIENTIAL LEARNING

Minimum Credits: 1
Maximum Credits: 10
The bmp offers experiential learning activities in the areas of community service, patient volunteering, laboratory research and clinical shadowing. For this course, the bmp student and instructor plan onsite experiential learning activities designed to provide goal oriented outcomes for the student. Students are expected to take initiative to find suitable matches and schedule several experiential sessions. Available opportunities are posted on the bmp website and matches are made each term to optimize the experiential benefit for all bmp students. Students are responsible for documenting all experiential dates and hours, along with what was learned in each activity. Students are also responsible for ensuring all activities are approved by the instructor. Students will also provide a five page maximum reflect on the experiences at the end of the term and a laboratory report for any research conducted, both of which are graded. Students are also required to ensure they complete the appropriate onsite requirements for the number of credits they are registered for.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: RESTRICT TO MSBMS

MSBMS 2075 - INDEPENDENT STUDY TOPIC EXPLORATION

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

MSBMS 2080 - CELL BIOLOGY PATHWAYS IN TREATMENT OF DISEASE

Minimum Credits: 2
Maximum Credits: 2
This course will explore how basic cell biology and genetic investigations have revealed the theoretical underpinnings of, and

revolutionized approaches to the understanding of, the basis of selected diseases and uncover tractable approaches to treatments or cures. A set of major cell pathways will be used to illustrate how new drug targets can be identified and can lead to dramatic advances in medical treatments. The course blends traditional lectures with self-directed student activities to prepare the students for interactive lecture discussions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: RESTRICT TO BMP

MSBMS 2090 - CELL SIGNALING AND PHARMACOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course examines the principles of drug action. The course covers the basic priciples of pharmacodynamics and pharmacokinetics. Particular emphasis is placed on the concept that the rational use of drugs is based on the understanding of the interactions, signaling mechanisms, and functional outcomes at the modular and cellular level.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: RESTRICT TO BMP

MSBMS 2102 - BMP PROFESSIONAL COMMUNICATION REFLECTION 1

Minimum Credits: 1
Maximum Credits: 1
The course will explore professional communication skills and strategies for written applications and interviews in the health sciences specifically, and professionalism generally. The object of study will focus on a practical summation of individual student educational and experiential activities in the BMP. Large group lectures, collaborative student think-pair-sharing, and team-based small group and large-group discussion workshops will be used to analyze and evaluate student educational and experiential activities in the context of professional competencies and goals. Faculty and staff mentored, collaborative team-based, and self-directed learning activities will continue to develop student skills and strategies for narrative, analytic and interpretative professional narratives including professional school application experiences and essays, and interviews.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2103 - BIOMEDICAL MASTERS PROGRAM PROFESSIONAL COMMUNICATION REFLECTION 2

Minimum Credits: 1
Maximum Credits: 1
This course will explore professional communication skills and strategies for written applications and interviews in the health sciences specifically, and professionalism generally. The object of study will focus on a practical summation of individual student educational and experiential activities in the BMP. Large group lectures, collaborative student think-pair-sharing, and team-based small group and large-group discussion workshops will be used to analyze and evaluate student educational and experiential activities in the context of professional competencies and goals. Faculty and staff mentored, collaborative team-based, and self-directed learning activities will continue to develop student's skills and strategies for narrative, analytic and interpretive professional narratives including professional school application experiences and essays and interviews.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: RESTRICT TO BMP

MSBMS 2105 - BMP SCIENTIFIC COMMUNICATION

Minimum Credits: 1
Maximum Credits: 1
The Scientific Communication course will explore the different ways science is described and communicated. Topics will include methods and techniques for efficient and clear scientific writing; the different types of publications (research papers, reviews, abstracts, letters, commentaries); the structure and organization of grants (especially research and fellowships); scientific posters and presentations, and peer review. The class will include presentation by faculty to introduce the most important concepts. Students will use their own research (current or past) as a basis for writing assignments on the various topics. Students will also review each other's work and significant time will be devoted to discussion, both in class and online.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2110 - ORGAN SYSTEMS PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course discusses the integrative physiology of all of the major organ systems, including the cardiovascular system, respiratory system, renal system, gastrointestinal system, and reproductive system. The systems will be considered in the context of the function of the body as a whole, and how they respond during challenges (e.g. exercise) and pathological states. Current research related to the functioning of these systems will be emphasized throughout the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2200 - CLINICAL PHARMACOLOGY

Minimum Credits: 2
Maximum Credits: 2
This is an elective course in Clinical Pharmacology mostly based on clinical cases. These will include cases in clinical (applied) pharmacokinetics, drug-drug interactions and evidence-based pharmacotherapy. This course uses a combination of pre-class preparation and in-class discussion and analysis of each case.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: RESTRICT TO MSBMS

MSBMS 2210 - SYSTEMS NEUROPHYSIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will provide an overview of the neuroanatomy and functions of the major brain systems. Topics covered will include neural mechanisms for motor control, sensory processing and perception, cognition and memory, and higher cerebral functions. Major neurological diseases will also be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: RESTRICT TO MSBMS

MSBMS 2360 - BIOMEDICAL CAREER PLANNING 1

Minimum Credits: 1
Maximum Credits: 1
"Students will engage in a group coaching format. Together, we will critically examine and discuss questions pertaining to career planning

and implementation. Course topics are rooted in research and practical application. The underlying theories and research stem from positive psychology, neuroscience, applied practice, and one's own lived experience. Students will create artifacts that facilitate their career development. Common areas of interest include burnout, imposter phenomenon, sociocultural medicine, boundaries, and gap year preparation. Students will gain skills and perspectives to thrive in their career and life. Upon completion of this course, students will be able to: Implement research and self-reflection to enhance the individual career planning process. Summarize a variety of models, theories, and frameworks to achieve individual career and life satisfaction. Demonstrate skills such as oral and written communication, resilience, and adaptability. Sustain habits that facilitate career success and wellbeing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2361 - BIOMEDICAL CAREER DEVELOPMENT 2

Minimum Credits: 1
Maximum Credits: 1
The first two months of the course will be conducted asynchronously; materials and assignments will be available on Canvas. In person classes will resume in March and be facilitated in a coaching format. Together, we will critically examine and discuss career planning and development. Course topics are rooted in research and practical application. The underlying theories and mechanisms stem from career construction, positive psychology, neuroscience, applied practice, and one's own lived experience. Scholars will practice ongoing reflection, planning, and action. During the course scholars will create artifacts that will be used throughout their career.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

MSBMS 2365 - HEALTH EQUITY AND DIVERSITY AWARENESS

Minimum Credits: 2
Maximum Credits: 2
"We will critically examine and discuss overarching questions that focus on health equity within the biomedical sciences. We will pose, examine, and discuss questions to help understand the relationship between and among health and systems. Cultivating diversity awareness is a lifelong process. This course will build on existing knowledge and lay the groundwork for further exploration and action. Student interests and relevant research will drive course topics. Upon completion of this course, students will be able to: Summarize a variety of models, theories, and frameworks of health disparities and apply these in their biomedical science endeavors (research, medicine, etc). Translate health disparity research into interventions that can be used in biomedical science professions. Utilize discourse and dialogue skills to improve health equity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Biostatistics

BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

Minimum Credits: 3
Maximum Credits: 3
Acquaints students with the concepts of statistical reasoning as applied to the study of public health problems. Students learn the general principles of statistical analysis and acquire the ability to utilize a statistical software package as a tool to facilitate the processing, editing, storing, displaying, analysis and interpretation of health research related data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Graduate School of Public Health; PLAN: Excluded Plans = Biostatistics(DPH, PHD, MPH, MS, MSH)
Course Attributes: Global Studies

BIOST 2021 - SPECIAL STUDIES

Minimum Credits: 1
Maximum Credits: 15
Qualified students may undertake advanced work or research with the approval and under the guidance of a member of the staff.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

BIOST 2025 - BIOSTATISTICS SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Biometry seminars introduce the students to current health problems involving the application and development of biostatistics methods and theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

BIOST 2040 - ELEMENTS OF STOCHASTIC PROCESSES

Minimum Credits: 3
Maximum Credits: 3
Covers generating functions and convolutions of random variables, the poison and compound poison distributions, branching processes, random walk, and the gambler's ruin problem, Markov chains, and simple birth and death processes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2043 or 3011

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
Discusses techniques for the application of statistical theory to actual data. Topics include probability theory, estimation of parameters, and tests of hypothesis for both the discrete and continuous case.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BIOST 2067 - APPLIED META-ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
Meta-analysis (MA) is a quantitative approach that provides a systematic way of integrating the findings of individual research studies. The purpose of this course is to familiarize attendees with statistical techniques and R packages specific to MA, to enable them to use these techniques in the execution of their own MA and equip them to interpret and critique existing MAs. This course is then designed to present an overview of MA from the theoretical models to their implementations in the popular publicly available free software R with a variety of examples. These examples are compiled from real applications in medical and public health literature and the analyses are illustrated in a step-by-step fashion using appropriate R packages. Topics include an overview of systematic literature review, fixed- and random-effects MA, MA for binary data, MA for continuous data, heterogeneity in MA, meta-regression, publication bias, and R packages for MA. It is strongly recommended that all students have taken an introductory course in biostatistical methods (e.g., BIOST 2039, or BIOST 2041, or equivalent). Prior programming knowledge of R is not required for this course.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 or BIOST 2041

BIOST 2068 - INTRODUCTION TO CASUAL INFERENCE

Minimum Credits: 3
Maximum Credits: 3
With the increasing demand for identifying causal effects, causal inference methods have been greatly developed in the last decades. In public health, most studies require more or less causal inference due to the prevalence of confounding and selection bias. This course will introduce 1) the concepts of causal effects, causal assumptions, and causal graphs, 2) widely-used causal inference methods (e.g., propensity score, instrumental variables, and causal mediation analysis), and 3) methods implementation and applications in public health. Students enrolling in this course are expected to have taken an introductory biostatistical course (BIOST 2038, 2039, or 2049) and familiar with programming. The course will be taught through lectures, followed by homework and a final project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2069 - STATISTICAL METHODS FOR OMICS DATA

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is a graduate level course to cover popular statistical and computational methods for high-throughput omics data analysis. With the rapid advances of many omics technologies, the course will focus on the fundamental concepts of various topics (e.g. data preprocessing, association analysis, causal mediation analysis, differential analysis, statistical learning, pathway analysis, etc.) and their specific applications to different omics data types (e.g. microarray, next-generation sequencing, single cell sequencing, mass spectrometry, microbiome, etc.). The major target audience is graduate students (master or PhD students) interested in omics data analysis and related research. Through homework problem sets, computer labs and a final project, students train with hands-on materials to understand the methods, implement the algorithms and interpret results in real omics applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2080 - ADVANCED STATISTICAL LEARNING

Minimum Credits: 2
Maximum Credits: 2
This is a 2-credit course in advanced statistical learning, covering topics related to the statistical interpretation and theory behind machine learning models/methods. Emphases will be given to in-depth derivation of models/algorithms from topics covered in BIOST 2079 (Introductory Statistical Learning for Health Sciences) as well as additional topics on modern statistical learning methodologies, with special focus on methods for health science applications. This course is designed for graduate students in the Department of Biostatistics and other interested graduate students who already have sufficient statistical and programming background. Students are expected to be familiar with R. Experience in C/C++, Python or Matlab may be helpful, but is not required. Programming skills/training shall be demonstrated by previous programming (or programming heavy) courses in R, Python, Matlab, C/C++, etc.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2049 or 2142) and (BIOST 2079 or 2155);

BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS

Minimum Credits: 3
Maximum Credits: 3
Differentiation and integration of functions of several variables. Infinite sequences and series. Fundamentals of matrix algebra. Class examples and homework problems will emphasize applications to probability and statistics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biostatistics (PHD, MS, MPH)

BIOST 2099 - CAPSTONE

Minimum Credits: 2
Maximum Credits: 2
The capstone course is a heavily directed and mentored statistical data analysis project course leading to an ETD formatted thesis and formal oral presentation of the work. This course will be an intense data analysis and writing course with the goal of producing an ETD formatted thesis document containing rigorous analytic methods, appropriately summarized analysis results with logical, statistically and scientifically valid conclusions. The Capstone course will ensure that the written thesis milestone demonstrates the student's competency in biostatistics (and area of concentration if applicable) as well as oral and written communication skills in general.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Biostatistics (MS); Required to have passed MS comprehensive exam.

BIOST 2131 - FOUNDATIONS OF STATISTICAL THEORY

Minimum Credits: 4
Maximum Credits: 4
The course covers the basic theory of probability and statistical inference with a focus on the appropriate use of standard methods and on the construction of new statistical inference tools. Topics covered in the first half include joint, marginal, and conditional probabilities; random variables and functions thereof; distribution characteristics of random variables; basic asymptotic theory and univariate theorems including Chebyshev's inequality, the law of large numbers, and the central limit theorem. Topics covered in the second half include principles and methods of constructing estimators (e.g., MLE, MME, CRLB), confidence intervals, and hypothesis testing (including Neyman-Person and generalized likelihood ratio tests); data reduction principles and techniques, and their relationship to optimal statistical inference (including sufficiency and Rao-Blackwell principle); basic likelihood-based, exact, conditional, and asymptotic statistical inference. The course is taught through lectures and recitation sessions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-MS or BIOST-PHD

BIOST 2137 - FOUNDATIONS OF STATISTICAL THEORY

Minimum Credits: 4
Maximum Credits: 4
The course covers the basic theory of probability and statistical inference with a focus on the appropriate use of standard methods and on the construction of new statistical inference tools. Topics covered in the first half include joint, marginal, and conditional probabilities; random variables and functions thereof; distribution characteristics of random variables; basic asymptotic theory and univariate theorems including Chebyshev's inequality, the law of large numbers, and central limit theorem. Topics covered in the second half include principles and methods of constructing estimators (e.g., MLE, MME, CRLB), confidence intervals, and hypothesis testing (including Neyman-Person and Generalized Likelihood Ratio tests); data reduction principles and techniques, and their relationship to optimal statistical inference (e.g., sufficiency, Rao-Blackwell principle); basic likelihood-based, exact, conditional, and asymptotic statistical inference. The course is taught through weekly series of two lectures and one recitation session clarifying the typical theoretical problems and proving computational examples illustrating theoretical concepts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2141 - BIOSTATISTICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
BIOST 2141 is an introductory applied biostatistics course for biostatistics graduate students, other quantitative public health students, and health career professionals who will make use of statistical methods in research projects, interpreting literature and possibly develop new biostatistical methods in the future. This class is intended for students needing a more research-oriented approach than that provided in BIOST 2011 (Principles of Statistical Reasoning) and an approach with a greater emphasis on mathematical foundation than provided in BIOST 2041 (Introduction to Statistical Methods I). Students in BIOST 2141 are expected to have a working knowledge calculus including multivariable differentiation and integration. Topics covered in this course include exploratory and descriptive analyses, both quantitative and graphical. Probability is discussed, including sample spaces, probability measures, probability calculus, and popular continuous and discrete distributions. Estimation and hypothesis testing are discussed in detail for one- and two-sample problems for both continuous and discrete data. One-way ANOVA, ANCOVA, simple linear regression, and correlation methods are explored. Nonparametric and computationally intensive resampling and simulation-based methods are discussed in addition to classical parametric approaches. Broad goals include: the use of R to analyze data sets and answer research questions; recognition of situations when procedures are and are not appropriate; and intuitive understanding of the rationale used in creating the statistical procedures presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-MS or BIOST-PHD

BIOST 2142 - APPLIED REGRESSION ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in statistical modelling intended for Masters or PhD students in biostatistics or other disciplines who have already had basic training in statistical methods. The course focuses on all types of regression methods with the following learning objectives: To fit and interpret linear regression models with multiple continuous and/or categorical predictors. To fit and interpret generalized linear models (GLMs) with emphasis on logistic and Poisson regression. To justify and apply standard modelling procedures using data, including model interpretation and assessment of model adequacy. To analyze data sets taken from the fields of medicine and public health. To develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2041 or BIOST 2039 or BIOST 2141

BIOST 2143 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Course topics include linear mixed models; generalized estimating equations (GEEs); and generalized linear mixed models for analyzing longitudinal and clustered data, from an applied perspective. Students will learn the justification and applicability of standard procedures, model interpretation, and assessment of model fit.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049 or BIOST 2142

BIOST 2146 - INTRODUCTION TO HEALTH DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course focuses on teaching basic data science concepts and data analysis methods that are motivated by dealing with real life problems in public health. Students will become familiar with data science terms such as data wrangling and data visualization. Key topics include exploratory data analysis, data cleaning, and visualization and communicating results. Students will learn how to prepare data for visualization, select appropriate visualization types, and develop efficient workflows for data presentation. This course will mainly use the

R programming language. The course lectures will cover the following general themes: data structures and representation, data wrangling and processing, computational tools and techniques, and case studies illustrating steps of analysis of real data, including examples from public health.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2141 or 2041

BIOST 2150 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course covers fundamental concepts and methods important for the analysis of datasets where the outcome is the time to an event of interest, such as death, disease occurrence, or disease progression. An important feature of survival data is censoring and truncation. Topics include quantities for summarizing and presenting time-to-event data; non-parametric estimation and hypothesis testing methods such Kaplan-Meier estimator and (weighted) log-rank tests; semi-parametric Cox proportional hazards model and other commonly used parametric models; methods for model development and diagnostics, and sample size considerations. Statistical theory is presented in the context of informing practical data analysis; homework assignments and examinations emphasize appropriate analysis strategy and model interpretation. Students are expected to be familiar with fundamental statistical concepts such as probabilities, distributions, likelihood, hypothesis testing, estimation, and inference. Basic knowledge of either SAS or R programming is also required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049 or BIOST 2142

BIOST 2151 - BAYESIAN DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This is a course in Bayesian methods for applied statistics and data science whose broad goal is to provide students with the skills needed to be able to select, conduct, report and interpret appropriate Bayesian analyses for a wide variety of applied problems. General topics covered include Bayesian concepts of statistical inference, Markov chain Monte Carlo and other computational methods, linear, hierarchical and generalized linear models, model selection and diagnostics, and Bayesian learning. The course explores the use of the popular and free software packages R, JAGS and Stan for conducting Bayesian analyses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 or BIOST 2141 or BIOST 2041 and BIOST 2049 or BIOST 2142

BIOST 2154 - STATISTICAL METHODS FOR OMICS DATA

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is a graduate level course to cover popular statistical and computational methods for high-throughput omics data analysis. With the rapid advances of many omics technologies, the course will focus on the fundamental concepts of various topics (e.g. data preprocessing, association analysis, causal mediation analysis, differential analysis, statistical learning, pathway analysis, etc.) and their specific applications to different omics data types (e.g. microarray, next-generation sequencing, single cell sequencing, mass spectrometry, microbiome, etc.). The major target audience is graduate students (master or PhD students) interested in omics data analysis and related research. Students are trained with hands-on materials to understand the methods, implement the algorithms and interpret results in real omics applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2049 or BIOST 2142) and (BIOST 2037 or BIOST 2131 or BIOST 2043 or BIOST 3011)

BIOST 2155 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is a graduate level course to introduce basic concept and methods for statistical learning with emphasis on modern health science applications. The syllabus includes: linear regression with regularization, supervised machine learning, unsupervised clustering and dimension reduction. Target audience will be second year Biostatistics master students or early PhD students with interests in statistical learning techniques for health science data. Students will be trained with hands-on materials to understand the methods, implement the algorithms and interpret results in real applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2039 or BIOST 2141) and (BIOST 2049 or BIOST 2142)

BIOST 2160 - DATA VISUALIZATION FOR HEALTH DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare students to learn the principles and best practices of data visualization. Students will learn how to use data visualization to communicate and interpret health data, as well as to guide exploratory analyses of health datasets. In this course, students will learn how to best tailor data visualizations to effectively communicate and tell stories to a wide range of audiences and outputs, from presentations to scientific publications. Additionally, students will learn how to identify misleading health data visualizations from public resources, and to create visualizations that accurately reflect the data, helping audiences make sense of the information. A substantial component of this class will be dedicated to learning how to generate data visualizations in R. Traditional and modern plots will be explored in this course, including bar plots, scatterplots, line plots, heatmaps, dendrograms, choropleth maps, contour maps, mosaic plots, and density plots.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2041 or BIOST 2141

BIOST 2162 - CLINICAL TRIALS: METHODS AND PRACTICE

Minimum Credits: 3
Maximum Credits: 3
The course lectures integrate web-based material covering fundamental concepts in the design and conduct of modern clinical trials. Topics include: experimental designs, interim monitoring, analysis methods for comparative clinical trials, ethical, organizational and practical considerations of design, case studies, and international guidelines for publication of trials in major journals and meta-analyses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 or BIOST 2141 and BIOST 2041

BIOST 2165 - STATISTICAL EVALUATION OF BIOMARKERS AND CLASSIFICATION TOOLS

Minimum Credits: 3
Maximum Credits: 3
The course provides an introduction to the concepts and approaches for statistical evaluation of classification markers and tools applied in various detection and prediction tasks. Topics include evaluation of the accuracy of classifiers and diagnostic tests, biomarkers and classification/prognostic models, ROC curves, decision-theoretic approaches, combining multiple markers for improved classification, the accuracy of future event prediction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2037 or BIOST 2131) and (BIOST 2039 or BIOST 2141)

BIOST 2168 - INTRODUCTION TO CAUSAL INFERENCE

Minimum Credits: 3
Maximum Credits: 3
This 3-credit course is a graduate-level course that will cover modern statistical methods for estimating causal effects. With the emerging statistical literature on causal inference in the last decades, the course will first introduce the fundamental concepts of causal effects, causal assumptions, and causal diagrams. We will then focus on popular statistical methods such as propensity score, instrumental variables, and causal mediation analysis and their applications in public health. The target audience is graduate students with statistical background and interests in causal inference and related research. Students will be trained with hands-on materials to understand causal inference methods, implement them with R packages, and interpret results in real data applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 or BIOST 2141

BIOST 2173 - SAS FOR DATA MANAGEMENT AND ANALYSIS

Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to provide students with an understanding of the SAS program environment as well as the skills needed to use SAS as a tool to conduct research, prepare data, and perform analyses. Upon completion of the course the student will have an understanding of SAS at the intermediate level and will be adequately equipped to take the SAS base programming certification. The course covers the utility of SAS as a data management, data manipulation, and data analysis tool. The focus will not be statistical analysis, but rather how to use SAS as a programming tool. Emphasis will be placed on program code writing. Concepts will be illustrated with numerous examples from basic descriptive analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PREQ: BIOST 2041 or BIOST 2039 or BIOST 2141

BIOST 2174 - ADVANCED R COMPUTING

Minimum Credits: 2
Maximum Credits: 2
BIOST 2174 is an advanced statistical computing course using R designed for graduate level biostatistics students with basic R programming background. The course will cover topics, including but not limited to, R in modeling and optimization, advanced R graphics, functional programming, object-oriented field guide, efficient computing in R, GUI for R-shiny, embedding C/C++, R package/documentation, Github, etc. The course will also include real life application for students to practice the programming techniques learnt in class.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2037 or BIOST 2131) and (BIOST 2039 or BIOST 2141)

BIOST 2175 - PYTHON FOR AI IN HEALTH DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This is a 3-credit course that will introduce Python programming basics and provide instruction on frequently used programming patterns, concepts, and libraries used by data scientists and statistical analysts working in Python, with emphasis on artificial intelligence (AI) and machine learning (ML) applications in health data science. Through this course, students will learn good coding, documentation, and workflow habits in Python and learn AI/ML tools for public health-oriented data. Through three health data-focused case studies, students will learn to apply the Python-based skills learnt in this course to real-world health data.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-MS or BIOST-PHD

BIOST 2179 - BIOSTATISTICS CONSULTING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
The Biostatistics Consulting Practicum provides advanced students (second-year masters and doctoral) with exposure and practical experience in consulting on the biostatistical aspects of research problems arising in the biomedical or other allied fields. Students, initially under the supervision of a faculty member, participate in discussions with investigators leading to the design and/or analyses of a current research problem. Students taking the course provide consultation to clients (i.e., faculty, residents, fellows, and students in the Health Science Schools or University of Pittsburgh). Sessions are held between the faculty instructor and students taking the course to review and discuss the problems brought to the consulting service.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

BIOST 2181 - HEALTH DATA SCIENCE: DATA MANAGEMENT AND PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to foundational data science concepts and methods of data analysis, with an emphasis on real-world problems in public health. Students will learn key terminology such as data wrangling, exploratory data analysis, and data visualization. Throughout the course, students will develop skills in preparing data for analysis, cleaning and transforming datasets, selecting effective visualization techniques, and communicating analytical results clearly. The course will emphasize developing efficient, reproducible workflows for data presentation and interpretation. The primary programming language used will be R, though some basic Python will be introduced. Lectures will cover a range of topics, including data structures and representation, data manipulation and processing, computational tools and techniques, and case studies that illustrate the complete analysis pipeline using real-world public health data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2041 or BIOST 2141

BIOST 2182 - HEALTH DATA SCIENCE: DATA VISUALIZATION AND BIG DATA

Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare students to learn the principles and best practices of data visualization. Students will learn how to use data visualization to (1) best communicate complex health data and (2) guide exploratory analyses and the interpretation of big health data. In this course students will learn how to use data visualization as a means to communicate and tell stories to a wide range of audiences and for various outputs, from presentations to scientific publications. Students will learn by working directly with large health datasets from various sources, including electronic health records, genomics experiments, and national health surveys. A substantial component of this class will be dedicated to learning how to generate data visualizations in R.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2181 and (BIOST 2141 or BIOST 2041)

BIOST 2183 - HEALTH DATA SCIENCE: STATISTICAL LEARNING AND ARTIFICIAL INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3
This course will introduce artificial intelligence (AI) and machine learning (ML) tools with special emphasis on biomedical data. The

course starts with a review of basic coding skills and builds up to implementation of state-of-the-art artificial intelligence tools at the end of the course, focusing on both classical ML as well as modern deep learning techniques. The syllabus includes three modules: the first module explains basic ML techniques for classification and regression, the second module covers ML techniques support vector machines, and random forests, and the third module introduces state-of-the-art AI concepts and provides PyTorch tutorials alongside theoretical insights. Students will be trained with hands-on materials to understand the methods, implement algorithms, and interpret results in real applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2041 or BIOST 2141 or BIOST 2142 or BIOST 2181) and BIOST 2081

BIOST 2198 - MS THESIS PREPARATION

Minimum Credits: 1
Maximum Credits: 1
This course is preparation necessary to complete BIOST 2199: MS Thesis. It will involve brainstorming a thesis topic, discussing possible data sets, writing an outline for a possible data analysis plan, thinking of potential research questions, writing a project prospectus, and identifying faculty thesis committee members.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis
Course Requirements: PLAN: BIOST-MS

BIOST 2199 - MS THESIS

Minimum Credits: 1
Maximum Credits: 2
This course involves data analysis and writing with the goal of producing an ETD formatted thesis document containing rigorous analytic methods, appropriately summarized analysis results with logical, statistically and scientifically valid conclusions.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis
Course Requirements: PREQ: BIOST 2198; PLAN: BIOST-MS

BIOST 3000 - TEACHING PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
Hands-on teaching practicum course for graduate students to learn about university-level teaching.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: BIOST-PHD

BIOST 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: BIOST-PHD

BIOST 3011 - INTRODUCTION TO STATISTICAL INFERENCE 1

Minimum Credits: 3
Maximum Credits: 3
The course covers basic theory of probability and mathematical statistics. Topics include sample space, probability, random variables and expectation of a random variable; joint distribution, conditional distribution, independence and transformations for random variables; a few representative and popular distributions, including binomial, multinomial, Poisson, normal, t- and F-distributions; statistical inference on data: statistics, confidence intervals, hypothesis testing, test statistics, Monte Carlo and Bootstrap; Convergence in probability, convergence in distribution, central limit theorem.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 3012 - INTRODUCTION TO STATISTICAL INFERENCE 2

Minimum Credits: 3
Maximum Credits: 3
This course focuses on theory of statistical inferences. Topics covered include principles and methods of constructing and evaluating point estimators, sufficiency and completeness concepts and their applications, methods of constructing interval estimators, and approaches for developing and evaluating statistical hypothesis tests.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2037 or BIOST 2131 or BIOST 2043 or BIOST 3011

BIOST 3021 - ADVANCED STATISTICAL INFERENCE 1

Minimum Credits: 3
Maximum Credits: 3
This is the first course of the sequence that covers advanced topics in probability theory and statistical inference. This course introduces large sample theories, including basic modes of convergence in point estimation and distributions. It covers several point and interval estimation methods, including the Newton-Raphson and Expectation-Maximization algorithms, hypothesis tests, and their asymptotic properties, with particular attention to maximum likelihood estimation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-PHD; PREQ:(BIOST 2141 or BIOST 2039 or BIOST 2049 or BIOST 2142) and (BIOST 2044 or BIOST 3012)

BIOST 3022 - ADVANCED STATISTICAL INFERENCE 2

Minimum Credits: 3
Maximum Credits: 3
This is the second course of the sequence that covers advanced topics in probability theory and statistical inference. It covers various methods for parameter estimation and statistical inference, hypothesis testing, Monte Carlo simulations, resampling based inference procedures, and other related large sample theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-PHD; PREQ: BIOST 2051 or BIOST 3021

BIOST 3025 - LINEAR MODELS

Minimum Credits: 3
Maximum Credits: 3
This course is providing an introduction to the theory of linear models. In this class, we will discuss various topics including least squares estimation, the Gauss Markov model, the Aitken model (Generalized linear model), BLUEs, distributional theory such as multivariate

normal and noncentral distributions, inference in linear models (linear hypothesis testing, likelihood ratio test, confidence intervals, multiple comparisons), Cochran's Theorem, sequential SS, and model checking of underfitting and overfitting. This is a theoretical course and requires knowledge of statistical theory and linear algebra.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2044 or 3012); PLAN: Biostatistics (BIOST-PHD)

BIOST 3042 - MIXED MODELS

Minimum Credits: 3
Maximum Credits: 3
This is a PhD level course in Mixed Models. Students are expected to be comfortable and familiar with linear algebra (e.g., matrix notation and computation) and have taken courses in linear/generalized linear models. Using a mixed model allows one to relax the usual independence assumptions from linear/generalized linear models and take into account complicated data structures. This course will cover mainly theoretical aspects of various types of mixed models, together with practical implications of their use. Topics covered will include linear mixed models, generalized mixed models, mixed models for categorical data, repeated measures data analysis and cross-over trials with mixed models. Mathematical formulations and statistical assumptions of the fitted models will be covered. Key concepts of the theories and estimation methods behind these mixed models will also be illustrated. The main software used for fitting the mixed models will be SAS or R.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-PHD; PREQ: BIOST 2083 or BIOST 3025

BIOST 3050 - SURVIVAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
The problem of analyzing time-to-event data, often referred to as survival data, arises in many fields such as medicine, public health, engineering, economics, and demography. An important feature with survival data is censoring and truncation. The materials covered in this course include introduction of basic concepts and terminologies, estimation of summary statistics for survival data, hypothesis testing of comparing time-to-event distributions under censoring and/or truncation, regression methods for survival data, and multivariate models for survival data. The statistical techniques will be exemplified mainly through medical or biological data. The course will focus on both theories and applications. Students are expected to be familiar with fundamental statistical concepts and theories such as probabilities, distributions, likelihood, hypothesis testing, estimation and inference. Knowledge on using SAS and R programming for data management and analysis is also required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: (BIOST 2039 or BIOST 2141) and (BIOST 2044 or BIOST 3012)

BIOST 3065 - ANALYSIS OF DATA WITH MISSING VALUES

Minimum Credits: 3
Maximum Credits: 3
This course will present missing-data problems in statistics and discuss naive methods such as complete-case analysis, available-case analysis and imputation; standard likelihood-based methods, theory and application of multiple imputation, data augmentation, Gibbs sampler, and some recently developed methodologies in the missing data literature and related fields.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 3012 or BIOST 2044) & (BIOST 2051 or BIOST 3021)

Business Accounting

BACC 2060 - INDEPENDENT STUDY IN ACCOUNTING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2100 - MACC INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
To enroll for an IFC through the MACC program, you must be a MACC student and work for a minimum of 10 hours a week for 10 weeks during the semester you intend to take the internship for credit. You may receive up to six internship credits, but only three per semester, and no more than three credits for an experience. The grade for these credits will be pass/fail (satisfactory/unsatisfactory). The deadline to apply for an internship for credit is the date the add/drop period ends for that given semester. All internship offers must be approved by the MACC office prior to enrollment for that experience. Performance appraisals must be submitted to your faculty advisor and to career services and your employer must complete a midpoint and final performance appraisal.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

BACC 2236 - ACCOUNTING INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Focuses on the design and implementation of accounting information systems and their ability to: collect data on the activities of an organization, accumulate and summarize the data, and make the information available to managers for analysis, decision-making and control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2238 - AUDITING

Minimum Credits: 3
Maximum Credits: 3
Introduces auditing process and profession. Main topics include nature and purpose of auditing, auditing standards, professional conduct, auditor legal liability and approaches in auditing financial statements. Emphasizes a risk-based approach to selecting appropriate auditing techniques. Examines auditor's decision process relating to internal control assessment, audit decision process relating to internal control assessment, audit sampling and obtaining audit evidence about financial accounts. Examines extent of auditor's responsibility to uncover fraud.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2251 - FORENSIC ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3

"Fraud is extremely costly to our society, and the costs seem to be growing. The AICPA recently called forensic accounting one of the seven hot, new, "sizzling" career areas in accounting. It is estimated that there will be a shortage of between 25,000 and 50,000 professionals working in this area in the next few years in the U.S., So there are many opportunities for students knowledgeable in fraud to work in various federal agencies (e.g. FBI), major corporations, and professional service firms. The objectives of the forensics course are to familiarize students with several forms of fraud and the methods that fraud examiners use to prevent and detect it. Students will develop expertise in detecting financial statement fraud from the external auditor perspective, and learn how to use technology to detect fraud. They will acquire a basic understanding of how interviews are conducted in order to detect deception. The class will also provide a historical view of financial statement fraud. The tools used in the class will include interviewing, document examination, and public records searches, which will be helpful to students wanting to become consultants, auditors, tax professionals, managers, etc. The class, of course, includes an ethics component. It will help students to understand the common ethical dilemmas that they might encounter in the business world, and will help prepare them to resist pressure to commit fraud."
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2252 - TAXATION FOR ENTITIES

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to help students understand how important features of the internal revenue code influence decisions regarding how to organize and structure business operations and select the most appropriate form of doing business. After beginning with a general discussion of regulations governing practice before the Internal Revenue Service (IRS), the course continues with a comparison of the issues surrounding the choice of taxable business entity, comparing the regular corporation (c corporation), the small business corporation (s corporation), the partnership, and the sole proprietorship. Further lectures incorporate determinations of entity tax bases and resulting tax obligations with special emphasis placed upon differences for each entity type. Tax planning is an integral part of the course. Income shifting, tax deductions, tax credits, income exclusions, book (GAAP) vs. taxable income, and mergers and acquisitions (M&A) are discussed in detail. The course uses case studies and tax return preparation to help students to apply the theory and details of the tax code. Course materials are updated as tax laws change.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: ACCT-MS or ACCTBA-MS

BACC 2254 - ADVANCED FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
This course covers topics that are of particular interest to financial report preparers and auditors. Special emphasis is placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Accounting (MS)

BACC 2255 - ACCOUNTING DISCLOSURES FOR DERIVATIVES

Minimum Credits: 1
Maximum Credits: 1
This accounting elective will focus on derivative instruments and their impact on accounting and internal controls. The course will cover various topics tied to derivative instruments including the benefits, hedging, the risks, cash flow implications, internal controls, accounting & reporting requirements, taxation, and regulations. The course will analyze various incidents where internal controls were compromised and the implications. Upon successful completion of this course, the student will have the knowledge and background required to account for, audit, and monitor the use of derivative products. This course will also help those students who plan on sitting for the CPA

examination.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BUSACC 1238

BACC 2256 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will include cost measurement issues in both conventional and modern manufacturing environments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Accounting (MS)

BACC 2258 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
The quality, timeliness and credibility of the cost information used in corporate decision-making can have a significant impact on value creation. This is because cost information is important not only in strategy formulation and in the development and implementation of action plans that link strategies to value creation, but also because such data serve as measures of financial performance for products, processes, organizational sub-units and managers. In particular, product and service cost estimates have a major influence on corporate strategic decisions such as pricing, resource allocation, product development, supply chain design and customer focused management. In addition, product costs are informative signals of operational efficiency. Therefore, they constitute financial measures of the success of management actions such as continuous improvement and business process reengineering. Over-aggregate or obsolete cost systems can have a significant adverse impact on cost reduction in particular and overall corporate strategy and competitiveness in general. The objective of this course is to develop an integrated approach to analyzing these issues. In particular, we will study (a) how product cost measurement affects strategy and resource allocation decisions; (b) how to be sophisticated users of cost feedback and how to understand the strategic distortions that are induced by flaws in cost system design; (c) the strategic role of value-driver information and the relationship between process improvement and cost reduction; (d) the use of budgetary control systems and financial measures in performance evaluation and management and (e) incentive conflicts in organizations and their mitigation through appropriate mechanisms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: RESTRICTED ACCT-MS,ACCTBA-MS

BACC 2270 - PERSONAL WEALTH AND TAXES

Minimum Credits: 3
Maximum Credits: 3
Personal Wealth and Taxes introduces personal wealth management and tax implications of various approaches including: 1. Budgets and taxes: Understanding financial statements, budgets, and tax returns 2. Asset management: Managing cash and savings and making auto and housing decisions 3. Managing credit and consumer loans: Understanding what impacts a credit report and how to structure credit to improve credit worthiness and lower cost of capital. 4. Managing insurance needs: Learning about life, health, and property insurance. 5. Managing investments: Planning and investments in stocks and bonds, mutual funds, ETFs, and real estate. 6. Retirement planning: Maximizing retirement savings, employer matching, and preserving your estate.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2401 - FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view. This includes what is (and what is not) included in the reports, how and when events affect the statements, and what can be inferred from these reports about the firm's past activities, present position and the future prospects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2402 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS

Minimum Credits: 1
Maximum Credits: 1
This course will be valuable to MBA and mac students interested in working for global businesses, regardless of their desired career paths. As business organizations continue to seek growth in markets outside the United States and Western Europe, they will face increasingly complex and difficult challenges, including compliance with U.S. And foreign criminal and civil laws in places that are corrupt. Compliance with the U.S. Foreign corrupt practices act, which forbids businesses from providing certain benefits to government officials, is essential for global organizations, as penalties are severe. And to succeed in their careers, auditors will need to understand that businesses in certain geographic areas maintain multiple sets of books and hide bribery and tax fraud schemes. Strategic planners and supply-chain professionals will face cross-border risks, including demands by government customs and tax inspectors for bribe payments. Energy executives will confront violence, corruption and supply-chain problems in many oil and gas-producing areas. Sales professionals will confront demands for kickbacks. The course will cover these issues, and will provide students with the knowledge and compliance tools necessary to advance their professional careers in a global economy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2510 - ANNUAL REPORTS TO SHAREHOLDERS

Minimum Credits: 1
Maximum Credits: 1
This financial accounting elective covers the rules for financial disclosures under the U. S. Securities and Exchange Commission (SEC) and exposes students to the annual financial reporting processes followed by public companies in the United States. In our study, we will focus on the fundamentals of the important filings made by public companies with the SEC, including these important disclosures: Management's Discussion and Analysis, Critical Accounting Estimates, Overview of Business, Quantitative and Qualitative Disclosures about Market Risk, the report of the Independent Auditors and the full set of company financial statements themselves. Our study covers the material accounting judgements that companies make in their financial statements as well as the discretionary disclosures made to help stakeholders better understand the business environment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

BACC 2511 - GOING PUBLIC & PROXY STATEMNTS

Minimum Credits: 1
Maximum Credits: 1
A continuance of BACC 2510 and includes topics such as understanding current reports on Form 8-K, the company's annual Proxy statement solicitations and the process of going Public (filed on Form S-1). The course also covers going public through direct listing and through the use of a Special Purpose Acquisition Company (SPAC). These advanced topics in SEC Reporting touch on the various ways that companies can list shares to the public and the differing regulatory requirements under each method. In our study of proxy solicitation materials, we cover the various elements of executive compensation and the disclosures regarding the pay philosophy made by the board of directors. Shareholder advocacy as well as the responsibility of the outside auditors are included in this section of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2510; PROG: Joseph M. Katz Grad Sch Bus

BACC 2523 - ACCOUNTING DATA ANALYTICS

Minimum Credits: 3
Maximum Credits: 3
Accounting data analytics exposes macc students to the role of big data in accounting and the information technology tools and techniques used by accountants and auditors to produce more timely and accurate reports. Topics include advanced excel, data modeling, statistical sampling and cluster analysis, business intelligence, and xbrl generation and analysis.The course will cover data analytics covering four major themes: financial reporting, performance evaluation, audit analytics, and tax. Each theme will include hands-on instruction using commercial and open source software and requires students to complete a related data analysis project. Accounting data analytics is different from other database and information systems courses in that it will show students how to use specific tools to complete projects and develop an analytical mindset with a specific focus on accounting and auditing processes. This is primarily a project-based course. The students will complete three projects, showing their mastery of the tools, decisions, and the steps they followed to reach their conclusions. The final exam would be used to evaluate general understanding of the concepts discussed throughout the semester. There is potential for additional ebl components including field trips if we can work out logistics. I'm currently developing relationships with the accounting firms to bring in local experts and to work on real-world cases.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2524 - INTERNAL AUDIT: RISK & ADVISORY

Minimum Credits: 1
Maximum Credits: 1
Students are introduced to generally accepted auditing standards (GAAS). Internal control is studied in detail with emphasis on how to test for its effectiveness. Audit objectives, planning and sampling techniques are developed as a basis for the audit opinion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2525 - FINANCIAL STATEMENT ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: PLAN: Accounting (MS)

BACC 2528 - MANAGERIAL ACCOUNTING

Minimum Credits: 1
Maximum Credits: 1
Students learn how the costs of products and services are determined in cost accounting systems and how this data is used in managerial decisions and in planning and control of business operations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401; PROG: Katz Graduate School of Business

BACC 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING

Minimum Credits: 3
Maximum Credits: 3
Accelerated intermediate financial reporting fulfills the prerequisites of intermediate financial reporting 1 and intermediate financial reporting 2 for students who are entering the MACC program. This course studies the preparation, communication, interpretation and analysis of financial data with emphasis on the information needs of users of financial information prepared under us GAAP. General topics covered in this course include revenue recognition, inventory accounting, long term assets and impairment, investments, current liabilities and contingencies, long term liabilities, capital and retained earnings, leases, pensions and postretirement benefits, income taxes, and preparation of the statement of cash flows. Students are expected to have an accounting background. This course is designed to sit on top of an existing foundation in accounting and will assume students already have taken several financial accounting courses or knowledge obtained through work experience. It is expected that students are fluent with accrual accounting and the accounting cycle and that they have already studied some of the topics in the course in depth. The course will move quickly.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2534 - CONTROLLERSHIP

Minimum Credits: 1
Maximum Credits: 1
This accounting elective is designed for MAcc students seeking a role in corporate accounting and controls. The course will cover the changing role of the controller and the major functions managed by the controller of a typical company. Topics covered include: role of the controller, general accounting, cash management, accounts receivable, accounts payable, payroll, financial planning and budgeting, management reporting and designing well-controlled financial processes and systems. The content will focus not only on the processes managed by the controller, but also the optimization of these processes, policies and procedures and leadership issues. The use of experts from the accounting community will be used as a complement to the theoretical materials presented to illustrate the practical applications and challenges of controllership. Because the course is practical in nature, an experience-based learning group project will be a large part of the curriculum and learning experience offered to students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2537 - TAXES AND MANAGEMENT DECISIONS

Minimum Credits: 1
Maximum Credits: 1
Designed as an introduction to business taxation for majors in areas such as finance or financial planning. Focuses on how managers and analysts can recognize tax problems, consequences and opportunities associated with common business events.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401; PROG: Katz Graduate School of Business

BACC 2542 - ACCOUNTING AND FINANCE LAW

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide macc and mba candidates with advanced legal information that is necessary for effectuating management level responsibilities in the contemporary business environment. This course will enhance a business student's knowledge of the law (past that of the three credit business law elective course that is offered) in a manner that strategically is consistent with the content of the CPA exam.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BSEO 2315 or 2528; PROG: Joseph M. Katz Grad Sch Bus

BACC 2543 - TAX POLICY 1

Minimum Credits: 1
Maximum Credits: 1
Our nation was born from a revolution over taxation without representation. Nearly 250 years later, the debate over tax policy continues to dominate political debates and presidential campaigns. Why the tax system attracts all this attention is no mystery. It is the aspect of government that directly affects more people than any other. This course will explore the history of tax policy in the united states, the tax legislative process in congress, how our tax policies influence people's decisions and behavior, international tax considerations, and ideas for future tax reform. Students will discuss what factors are important in designing a good tax system and survey the social justices and injustices that arise from how the government raises its revenue. Upon completion of this course, students should be able to think critically about our tax system and form opinions grounded in facts and policy. This course is for any student that wants to become a more educated citizen (and voter!) With respect to our nation's ongoing debate over tax reform.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

BACC 2549 - STRATEGIC COST ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401 and 2528; PROG: Katz Graduate School of Business

BACC 2557 - ACCOUNTING RESEARCH AND WRITING

Minimum Credits: 1
Maximum Credits: 1
This course focuses on improving students' writing, deductive reasoning, and problem-solving skills as they conduct research to make a recommendation on the accounting treatment for transactions for which no direct or clear guidance currently exists. Weekly writing assignments are evaluated on both content and the quality of the writing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on financial reporting and disclosure for not-for-profit and governmental entities based on the standards and principles promulgated by the financial accounting standards board (FASB) and the governmental accounting standards board (GSAB). Students will learn how such entities prepare their financial reports and how to interpret and use such information. The course covers financial reporting for not-for-profit entities, balancing the focus on internal operations with fiduciary responsibility. In addition, the course examines the objectives of financial reporting for governmental units and the preparation and use of the financial statements for such entities. A sample of specific entities will be reviewed to illustrate the preparation and use of their financial statements. In addition, accounting software for governmental transactions will be introduced.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: RESTRICTED ACCT-MS,ACCTBA-MS

BACC 2559 - TAXES AND DECISION MAKING

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a comprehensive foundation of Federal Income Tax policy and an understanding of how it applies to Individuals, sole proprietorships, partnerships, S-Corps, C-Corps, and property transactions. The course uses a textbook, tax return simulations, chapter examples, and class assignments to help students learn the most important features of the Internal Revenue Code. Students also identify and evaluate the tax issues associated with a variety of business and personal transactions, the tax implications for different taxable entities, and how to calculate the regular federal tax and additional taxes and tax credits associated with these transactions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 2560 - VOLUNTEER INCOME TAX ASSISTANCE

Minimum Credits: 3
Maximum Credits: 3
The course provides training to students related to basic tax return preparation and more complex issues facing this client population, including the availability of government assistance and refundable tax credits. In addition to assisting the local Pittsburgh community, we also assist students and scholars enrolled/employed at the University of Pittsburgh and Carnegie Mellon University. Therefore, student preparers get exposure to international tax return preparation. Significant use of technology and virtual preparation methods are used in the course. Students are trained to use tax preparation software, tax research methods on the Internal Revenue Service website, and virtual document storage using the IRS secured website. Students will work with clients in person as well as virtually, and therefore, must be proficient in all platforms. Students will also guide taxpayers about to how to navigate these methods.
Academic Career: Graduate

BACC 2561 - SUSTAINABILITY REPORTING

Minimum Credits: 1
Maximum Credits: 1
In today's world, businesses, governments, and consumers are increasingly recognizing the importance of transparent reporting to hold companies accountable for their environmental, social, and governance practices. Sustainability reporting has emerged as a powerful tool for measuring, disclosing, and communicating a company's sustainability story and performance while driving continued business success. This course will provide you with an understanding of sustainability reporting and its significance in today's business landscape. We will explore the key principles, frameworks, and guidelines that companies use to report their sustainability metrics for internal and external use. You will also gain insights into the benefits, challenges, and best practices associated with managing and reporting on environmental, social, and governance topics. By the end of this course, students will be able to: 1) Understand how to measure environmental, social, and governance data and incorporate insights into corporate decision-making 2) Identify relevant regulatory requirements related to non-financial disclosures and analyze impacts on an organization 3) Communicate an effective and transparent sustainability story using quantitative and qualitative metrics and disclosures 4) Assess sustainability performance as an external user of sustainability reporting

BACC 2562 - VOLUNTEER INCOME TAX ASSISTANCE

Minimum Credits: 3
Maximum Credits: 3
This course is 3.0 credits. Students must be enrolled at Pitt Business pursuing an accounting degree. Pitt Business students must have completed or be concurrently enrolled in BUSACC 0030. Financial Accounting. Students performing a supervisory role must have completed a prior year as a preparer. The Volunteer Income Tax Assistance (VITA) program exposes undergraduate and graduate students to the preparation of federal, state, and local tax returns for individuals and families in lower socio-economic circumstances. The course provides training to students related to basic tax return preparation and more complex issues facing this client population, including the availability of government assistance and refundable tax credits. In addition to assisting the local Pittsburgh community, we also assist students and scholars enrolled/employed at the University of Pittsburgh and Carnegie Mellon University. Student preparers may get exposure to international tax return preparation. Significant use of technology and virtual preparation methods are used in the course. Students are trained to use tax preparation software (Taxslayer for U.S. citizens and resident aliens; Sprintax for nonresident aliens), tax research methods on the Internal Revenue Service website, and virtual document storage using the IRS secured site GetYourRefund.org. Students will work with clients in person as well as virtually, and therefore, must be proficient in all platforms. Students will also guide taxpayers about to how to navigate these methods. By the end of this course, first year student preparers will be able to: 1) Understand the basics of individual tax law 2) Prepare simple tax returns 3) Communicate effectively with taxpayers from diverse backgrounds In addition, students returning for a second year in a supervisory role, will develop skills supervising the work of first year preparers and providing constructive feedback.

Grade Component: Grad SN Basis

BACC 2801 - FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view. This includes what is (and what is not) included in the reports, how and when events affect the statements and what can be inferred from these reports about the firm's past activities, present position and the future prospects.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2802 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2802 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 3001 - INTRODUCTION TO ACCOUNTING RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to provide new accounting doctoral students with an overview of accounting research. The course will discuss the variety of topics and methods addressed by accounting scholars, and will seek to provide insight into the characteristics that distinguish the highest quality research. Analytical research methods and topics, as well as applications in managerial accounting, will receive particular emphasis in the first half of the course. In the second half, we will read and analyze representative accounting research employing capital markets, archival managerial and experimental methods.
Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3010 - INDEPENDENT STUDY IN ACCOUNTING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

BACC 3014 - EXPERIMENTAL RESEARCH IN ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
The course covers recent experimental studies that apply behavioral decision theory, psychology, and economics to address a variety of accounting research questions. The course focuses most heavily on recent work. The goals of this course are to (1)familiarize students with recent experimental research in accounting, (2) help students develop the skills necessary to critically evaluate such research, and (3) generate ideas for future experimental research topics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3017 - ACCOUNTING WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
Presentation of research papers in various aspects of accounting and related areas by faculty and distinguished visitors. The student is expected to attend the workshop, participate in discussions, and present a workshop paper.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3021 - ARCHIVAL RESEARCH IN MANAGERIAL ACCOUNTING

Minimum Credits: 1
Maximum Credits: 1
This seminar will focus on studying management control and performance measurement issues largely from an economics perspective using archival methods. Topics discussed will include, but not be limited to, analysis and economic impact of cost systems, use of financial measures for performance evaluation and compensation, impact of incentive systems on organizational performance, non-financial measures and balanced scorecard. The course materials will consist of papers in accounting. Course requirements include active class participation, presentations/discussions/summary reports of papers, replication of earlier studies (where data are available), and a final examination.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BACC 3025 - CAPITAL MARKETS RESEARCH IN ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3

This course provides students with a solid understanding of capital market research in accounting and empirical research training. The class will cover topics such as the relation between stock prices and earnings, stock market anomalies, and analyst and management forecasts. Students will also replicate some classic finance and accounting papers in order to provide them with some hands-on experience working with compustat, crsp, ibes, and sdc data using sas statistical programming. The class will help students to better evaluate research in workshops, develop new ideas and do empirical tests.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3052 - CRITICAL THINKING IN ACCOUNTING II

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BACC 3053 - CRITICAL THINKING IN ACCOUNTING 3

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BACC 3099 - READINGS IN ACCOUNTING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

BACC 3114 - BEHAVORIAL RESEARCH IN ACCOUNTING 1

Minimum Credits: 1
Maximum Credits: 1
In this course we will discuss experimental studies that apply behavioral decision theory, psychology, and economics to address a variety of accounting issues.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BACC 3115 - EXPERIMENTAL RESEARCH IN ACCOUNTING 2

Minimum Credits: 1
Maximum Credits: 1
In this seminar, PhD students will be exposed to research examining financial accounting and auditing questions using experimental methods. The seminar is also a continuation of experimental behavioral decision-making research in accounting, critically evaluating experimental research and generating future research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BACC 3571 - ACCOUNTING RESEARCH

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide students with the theory and concepts underlying budgeting practices (i.e., what has existed, is currently in use, and has been proposed for contemporary purposes). It will focus on research related to budgeting and controls, how these topics relate to a firm's strategy, management motivation, performance measures and risk management. Topics will include budgeting in uncertain times, the balanced scorecard, and "beyond budgeting" approaches, as well as others. The pedagogical approach is to address these topics through case studies and to introduce and apply relevant research findings.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

Business Administration

BUSADM 3001 - BEHAVIORAL RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3
This doctoral seminar is designed to be among the first in your program, and is oriented towards conducting quality research in whatever your business discipline, with an eye towards becoming a respected scholar in that discipline. The course covers both classic and recent research in a carefully-chosen set of topics, and with a bias toward articles in high-quality business journals. We will examine several characteristics of ¿good¿ research, critique the work of others, and learn from critiques of our work along with what I call ¿steering¿ rather than harsh judgments and discouragement. Research methods differ somewhat for each discipline. While behavioral research in business is focused on people more than organs or organizations, there are some studies of organs like the brain in some ¿neuro¿ behavioral studies, and there are studies of people in the context of their organizations in some field studies. Therefore, there is overlap in many cases. Because the course focuses on research methods, our bias will be on empiricism, which represents gathering of data for support of some theory. While most fields accept research from a variety of perspectives, behavioral fields have a staggering diversity of points of view, such as argumentation, theory-building, experimentation, field studies, case studies, and archival studies, to mention just a few.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3011 - INTERNATIONAL MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This doctoral seminar will cover the foundations of the field of international management drawing on multiple theoretical perspectives: economics, strategic management, and organizational behavior and theory. The goal of the course is to provide students with an understanding of the intellectual lineage and behavioral assumptions underlying the different approaches to studying international management. We will explore why firms choose to invest overseas and what determines their selection of location and ownership structure. We will look at the role that firm capabilities play in the international context, the influence of regional differences on organization design choices, as well as the nature of comparative management. The goals of the course will be to explore the intellectual foundations of key questions in the international management literature and to explore the ways in which the theories can be useful in undertaking empirical studies. Additional time will be devoted to specific international management topics that most closely match students' interests.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3013 - WORK AND ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This seminar is intended for Ph.D. students who wish to develop an understanding of the theoretical underpinnings of research on the management of knowledge and work in organizations. It reviews the major theoretical perspectives, but places a particular emphasis on the current empirical literature related to human resource management. Because of the multi-disciplinary nature of this research space, readings draw on a broad range of material including studies from sociology, organization theory, strategy, economics, and policy. These are used to develop an integrative understanding of the underpinnings of work and employment-related research published in top tier management journals.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BUSADM 3030 - MANAGING THE TRIPLE BOTTOM LINE

Minimum Credits: 3
Maximum Credits: 3
Issues such as climate change and global warming, human rights, and health and sanitation for all have garnered significant attention in recent years. Leading businesses realize that it is no longer enough to maximize profits and cater to shareholders but as well critical to integrate the wellbeing of the planet and its people into their business models. Such a transformation to managing the triple bottom line of people, planet and profit requires us to look at business and its operations through a new lens. This doctoral seminar will focus on theories, concepts and methodologies that we can use to understand the role of the firm in 21st century society and develop strategies for long run sustainability. The course will be interdisciplinary, drawing on literatures in strategy, marketing, organizational behavior, operations, and finance as well as methods spanning lab experiments to structural equation models to understand the conditions under which creating social and environmental value can drive business value. The course will feature academic guest speakers from the aforementioned disciplines of business to highlight the interdisciplinary nature of sustainability research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Attributes: MCSI - Sustainability Focused

BUSADM 3040 - RESEARCH AND THEORY ON DIVERSITY, EQUITY AND INCLUSION

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on research, theory and applications related to diversity, equity and inclusion (DE&I) within organizations. We will examine DE&I across three levels of analyses - individual, group and organizational. Our primary goal is to better understand the ways in which research and theory has addressed topics, processes and outcomes related to diversity and its impact on key outcomes studied by organizational scholars. To accomplish this, we will review a wide array of research and theory that will provide the necessary lens for you to connect this work to your own fields of study and future research. We will also explore a variety of frameworks, strategies and research tools used to advance our understanding of this dynamic and critically important topic.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BUSADM 3199 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BUSADM 3501 - QUANTITATIVE RESEARCH METHODS 1

Minimum Credits: 3
Maximum Credits: 3
Quantitative Research Methods I (Topics: Hypothesis Testing and Analytical Modeling) This course will help develop the concepts and skills needed for effective analysis of data and the interpretation of results for decision making. Course will review inferential statistics: confidence interval, hypothesis tests, and regression. Cover optimization (LP review, DEA, Network Modeling, Integer Programming, Nonlinear programming, and Simulation), as well as, Management Science and Operations Research techniques: - Build analytical and modeling skills for both deterministic & stochastic optimizations. - Understand Simulation, Decision - and Queueing-Theory to assist in better management decisions. - Develop skills needed for effective analysis of data and the interpretation of results for decision making. Possible software package for the course are Excel, Tableau, SPSS, SAS-JMP.

BUSADM 3502 - QUANTITATIVE RESEARCH METHODS 2

Minimum Credits: 3
Maximum Credits: 3
This course is designed to broaden and enrich students' knowledge and understanding of statistical concepts. Multivariate statistical techniques can be used to analyze data in many fields such as Finance, Production and Operations, Accounting, Marketing, Personnel Management, etc. Through overviewing actual applications in various fields and in-class exercises involving real-world data, students can apply the techniques to topics such as consumer and market research, supply chain analytics, creditworthiness and risk assessment, stress test, and early warning signals outside pre-set limits, and make better business decisions. The second half of this class will dive deeper into the statistical techniques, tools, and processes necessary to solve analytic problems in a multitude of business domains. In this class, we will conduct an overview of data mining techniques, focusing primarily on business-oriented datasets and examples.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3503 - BEHAVIORAL RESEARCH METHODS 1

Minimum Credits: 1
Maximum Credits: 1
This doctoral seminar is intended to be taken in the first semester, first year of the program, and prepares students to continue to Behavioral Research Methods 2 (BUSADM 3507). Topics focus on behavior rather than macroeconomic or archival research models. We focus on defining the scientific method, knowledge, and theories and frameworks; understanding theory and modeling; conducting effective sampling; formulating research questions; designing and carrying out true and quasi-experiments; choosing among types of research (quantitative and qualitative); and testing for validity and reliability in measures.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3503 - BEHAVIORAL RESEARCH METHODS 1

Minimum Credits: 1.5
Maximum Credits: 1.5
Behavioral Research Methods (Topics: Inquiry Strategies, Measurement, and Sampling) Reviews options for performing quantitative and qualitative research studies in firms that focus on individuals' attitudes, intentions, and behaviors. Firms can investigate research questions concerning employees, customers, and trading partners. For quantitative methods, the course will cover topics such as how to create a behavioral study strategy, formulate research questions based on theory, design questionnaires and surveys, design experiments, carry out the studies, and assess the results. Qualitative topics to be covered include methods for designing and conducting studies involving interviews, focus groups, and archival documents such as filings, news reports, and social network posts. Methods for analyzing unstructured data will be covered, using software such as Dedoose, NVIVO, and/or LIWC. Machine learning concepts will also be discussed. Co/Prerequisite: Quantitative Research Methods I.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3504 - QUANTITATIVE RESEARCH METHODS 1A

Minimum Credits: 1
Maximum Credits: 1
This course will show you how to interpret and extract information from data, and to use your experience and judgment to make decisions in complex environments in a systematic and consistent manner. It will also provide the necessary tools to carry out the correct analyses needed in other disciplines. The emphasis in this course is not on memorization or mimicking text examples. In real applications, your computer is the best tool for number crunching. Your function is to think and reason about the types of analyses to do. Statistical thinking is more an art than a science. While there are guidelines, and there are wrong ways to do things, in general, there is no flowchart you can use to figure out the "right" way to handle a set of data.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3505 - QUANTITATIVE RESEARCH METHODS 1B

Minimum Credits: 1
Maximum Credits: 1
This course is a combination of management-science/operations research (MS/OR) and Decision Analysis Techniques. The MS/OR portion of the course develops and builds modeling skills using optimization methodologies. The topics covered include: Linear programming (review), Integer programming and Non- Linear programming. The decision analysis under uncertainty will be discussed using optimistic, pessimistic, most likely and expected value criteria. Decision making under conflict/game theory concepts will be discussed briefly. Other topics covered may include Queuing Theory and Simulation. By the end of the course, the students should be able to identify, formulate and solve a real-life problem using the above techniques.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3506 - BEHAVIORAL DECISION-MAKING AND CHOICE

Minimum Credits: 1
Maximum Credits: 1
In this course, you will develop a broad foundation of key topics in the decision-making research arena and critically evaluate theoretical and empirical aspects of articles (conceptual). This course will assist you to strengthen your ability to apply this research to identify, develop, and present your research ideas (practical). Each session, we will discuss a key topic in the decision-making literature (that is, how people really make choices in the real world). The topics covered in this seminar will range from normative utility maximization theory to heuristics and biases, to applications in the marketplace.
Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3507 - BEHAVIORAL RESEARCH METHODS 2

Minimum Credits: 1
Maximum Credits: 1
This doctoral seminar is designed to be taken in the second semester of the first year in the DBA program. It is oriented towards collecting meaningful behavioral data for a research project. The course covers pragmatic issues of how to design factorial and correlational studies, how to perform qualitative research at a basic level, how to integrate judges' scores, and how to design (using the Dillman method) and implement questionnaires on Qualtrics. The tools will be very useful in the third year of the program.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3508 - QUANTITATIVE RESEARCH METHODS 2A

Minimum Credits: 1
Maximum Credits: 1
This course is designed to broaden and enrich students' knowledge and understanding of statistical concepts. Multivariate statistical techniques can be used to analyze data in many fields such as Finance, Production and Operations, Accounting, Marketing, Personnel Management, etc. Through overviewing actual applications in various fields and in-class exercises involving real-world data, students can apply the techniques to topics such as consumer and market research, supply chain analytics, creditworthiness and risk assessment, stress test, and early warning signals outside pre-set limits, and make better business decisions. The course will teach students to better derive insights from data, ask questions to shape business vision and to drive value. They will also be able to improve business processes by using the right data insights as decision makers and incorporating these insights into management decisions. The main purpose of this course is to enhance students' statistical and analytical skills to the level necessary to deal with Data Mining and other essential material in the Business Analytics domain.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3509 - QUANTITATIVE RESEARCH METHODS 2B

Minimum Credits: 1
Maximum Credits: 1
Business Analytics is a strategic initiative for many companies and organizations. Many organizations use data analysis and decision science techniques to drive strategic decisions and to solve critical problems. This class will dive deeper into the statistical techniques, tools, and processes necessary to solve analytic problems in a multitude of business domains. The amount of data available to companies and other organizations has grown and continues to grow, exponentially. Companies that manage to successfully incorporate data analysis in their decision-making are both more productive and more profitable. As a result, a professional's ability to use data to extract insights and generate predictions has become increasingly valuable. In this class, we will conduct an overview of data mining techniques, focusing primarily on business-oriented datasets and practical examples.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BUSADM 3510 - QUANTITATIVE RESEARCH METHODS 3

Minimum Credits: 1
Maximum Credits: 1
In this unique statistics course, students will receive personalized guidance tailored specifically to their individual projects. Instead of traditional class meetings, the instructor will hold one-on-one or small group consulting sessions, providing targeted feedback and expert advice on their project's statistical design, data analysis, and interpretation. This approach ensures that all students receive dedicated attention to their specific challenges and goals, making the learning experience highly relevant and practical. The instructor's insights will

help students apply the statistical methods appropriate to their projects, which should yield more robust and insightful findings.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BUSADM 3511 - RESEARCH DESIGN

Minimum Credits: 1
Maximum Credits: 1
The purpose of this seminar is to workshop the DBA research practicum projects. Each student will present their project, and the class and the instructor will offer suggestions for strengthening the project. We will draw on previous content knowledge to develop and refine research questions and hypotheses, as well as knowledge of research methods developed throughout time in the program. Relevant guests (such as the primary advisor) will be invited to attend.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BUSADM 3598 - PRACTICUM RESEARCH PROJECT

Minimum Credits: 1
Maximum Credits: 15
DBA students are required to demonstrate their capacity to engage in a sustained research effort by completing a Practicum Research Project (PRP). The PRP entails an independent investigation of a problem of acknowledged significance and size in a management-related area. Generally accomplished at the conclusion of coursework, the DBA candidate would formulate a research problem, review the literature, devise a research plan, collect and analyze meaningful data to draw appropriate conclusions from their findings. The PRP is designed to allow students to investigate a problem relevant to a current issue in the business world. An ideal problem would involve rigorous processes that identify and apply existing theory.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

Business Economics

BECN 2019 - ECONOMICS FOR INTERNATIONAL BUSINESS

Minimum Credits: 3
Maximum Credits: 3
Investigates key aspects of the international economics environment. The first half introduces the international monetary system. Reviews the balance of payments, foreign exchange rate systems, adjustment mechanism, the foreign exchange market, and international money and capital markets. In the second half, topics include theories of international trade and investment restrictions on trade, commercial policies of the United States.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BECN 2401; PROG: Katz Graduate School of Business
Course Attributes: Russian & East European Studies

BECN 2060 - INDEPENT STUDY IN MANAGERIAL ECONOMICS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS

Minimum Credits: 3
Maximum Credits: 3
This course develops an understanding of how market-based economic systems reconciles the separate needs of consumers and producers, and provides an economic framework for managerial decisions. Topics include: pricing, output, and quality decisions; the impact of productivity improvements on costs; quality-cost tradeoffs; transactions costs as a determinant of the boundaries of the firm; market imperfection and the role of regulation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2509 - GLOBAL MACROECONOMICS: INSTITUTIONS AND POLICY

Minimum Credits: 1
Maximum Credits: 1
This elective course focuses on the forces which drive or determine overall national/global economic activity. The course is organized around the progressive development of an "open economy" macroeconomic model which is capable of handling a number of key policy and other variables.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2510 - MACROECONOMICS AND GROWTH IN EMERGING ECONOMIES

Minimum Credits: 1
Maximum Credits: 1
This follow-up course continues the focus on the forces which drive or determine overall national/global economic activity. This course expands the "open economy" macroeconomics framework developed in BECN 2509."
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BECN 2509; PROG: Katz Graduate School of Business

BECN 3531 - ADVANCED TOPICS IN APPLIED MICROECONOMICS A

Minimum Credits: 1
Maximum Credits: 1
This course will consist of various applications of microeconomics in the field of Industrial Organization. The field of Industrial Organization focuses on the conduct of firms as implied by the competitive structure of the market in which they operate and the welfare implication of such conduct. Several dimensions of firm conduct are addressed, including various pricing mechanisms, product mix selection, advertising strategies, internal organization of the firm, and the implication of asymmetry of information on firm behavior and market outcomes.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

BECN 3532 - ADVANCED TOPICS IN APPLIED MACROECONOMICS B

Minimum Credits: 1
Maximum Credits: 1
Economic events shape global policy and strategic decision making for businesses. These factors drive overall national economic activity, movements in major macroeconomic variables, especially interest rates and exchange rates, and influence the performance of national and global financial markets. A keen understanding of the 'macro'-economic environment is key to analyzing such factors. The course will introduce students to the empirical analysis of the growth forces by providing numerous hands-on opportunities using real-world data. The students are expected to build a thorough econometric analysis using available World Bank Data to determine elements that are responsible for driving growth and advancement. This will enable students to handle cross-country panel data sets, visualize data, perform descriptive analysis, create econometric model specifications that requires comprehensive statistical analysis and interpret results that would help readers gain deeper insight.

Business Finance

BFIN 2015 - SHORT-TERM FINANCING

Minimum Credits: 1
Maximum Credits: 1
Focuses on short-term financial management. Major topics include cash management, investment in money market instruments, banking regulations, liquidity policy, financial statement forecasting and simulation credit policy and credit management, and working capital management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2030 - VALUATION 1

Minimum Credits: 1
Maximum Credits: 1
This course provides students with the skills and framework for measuring and managing the value of companies. The course begins by describing how firms create value and then develops the tools required to measure value. Students are required to demonstrate their facility with the techniques.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2031 - CREATING VALUE THROUGH RESTRUCTING

Minimum Credits: 1
Maximum Credits: 1
Building on concepts developed in valuation (BFIN 2030), this course examines how and why different types of corporate restructuring affect firm value. The course uses both case studies and readings from the applied corporate finance literature.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2030; PROG: Katz Graduate School of Business

BFIN 2035 - VALUATION

Minimum Credits: 3
Maximum Credits: 3
This course examines the topic of value: what it is, how to measure it, and how to use it to guide managerial decisions. This is done by accomplishing three objectives: 1) providing students with a conceptual framework for thinking about value; 2) providing students with tools for estimating value and measuring value creation and destruction; and 3) teaching students how to apply valuation models in different settings. Prerequisites: BFIN 2409 Financial Management 1, BFIN 2410 Financial Management 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BFIN 2036 - CORPORATE FINANCE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to corporate financial management. The course builds on BFIN 2006 (introduction to financial management) to provide students with the conceptual framework and analytical tools necessary to appreciate, understand, and analyze the problems facing corporate financial managers. The course consists of four main parts. The first part develops the tools necessary to conduct the analysis of corporate finance problems. These tools include the analysis of data reported on financial statements, building pro-forma financial statements, the basics of put and call options, and an introduction to corporate valuation techniques. The second part of the course examines how managers set the two primary corporate financial policies: capital structure and payout policy (e.g. Dividends and share repurchases), and the process of restructuring in financial distress and bankruptcy. The third part of the course analyzes the process of issuing securities in the capital markets, including the role of the investment banker. Finally, the fourth part explores several aspects of mergers and acquisitions, including the motives for these transactions, the structure of the deal, and the role of private equity firms.

Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BFIN 2039 - INVESTMENT MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Focuses on security analysis, portfolio analysis, and the fundamentals of investment theory. Topics include bond and stock valuation, determination of interest rates, effects of inflation and taxes on security values.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410 ; PROG: Katz Graduate School of Business

BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES

Minimum Credits: 1
Maximum Credits: 1
The course will provide an introduction to the acquisition of privately held companies along with strategies for value creation in the acquired business. The course, which is exclusively taught using the case method, takes lessons taught in the valuation courses extending these concepts to the valuation of privately held business, the structuring of the acquisition balance sheet and the execution of the acquisition process. While a discussion of secured financing alternatives will be included, the application of junior capital, both mezzanine debt and equity will be the focus of the course. A risk analysis of the target will be performed and an investment thesis intended to illustrate value creation techniques will be central to each class discussion. Upon completion, students will be better prepared how to assess both operational and financial forms of risk, develop techniques intended to reduce both forms of risk, and consider value creation strategies in marketing, operations, finance and management. Each case will involve a real company acquired over the years by PNC equity partner along with actual selling memorandum, diligence prepared by PNC principals, market research firms, accounting firms and law firms employed by PNC as part of their diligence process.

Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Conceptual foundation of international financial management. Begins with a review of foreign exchange markets followed by the asset decision. Analyzes capital budgeting decisions of multinationals and taxation of international transactions. Discusses risk management in a global environment, international sources of financing, analysis of the nature of foreign, money and capital markets; and analysis of international banking.
Academic Career: Graduate

Maximum Credits: 9

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2068 - MARKETS AND TRADING

Minimum Credits: 1
Maximum Credits: 1
This course is designed to give participants a broad understanding of the operations of various financial markets with special focus on liquidity, market structure and trading. With this objective in mind, the course will concentrate on the operations of exchanges, trading systems and broker-dealer intermediaries. Participants will be exposed to a range of issues regarding the formulation of trading decisions and market structure design and regulation. Simulation software will be used to provide hands-on experience with making tactical trading decisions in different market structure environments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2069 - FIXED INCOME SECURITIES

Minimum Credits: 1
Maximum Credits: 1
This course examines the concepts that are most frequently encountered in the market for fixed income securities. Specifically, the course describes the most important fixed income securities and markets and develops tools for valuing these securities and managing their interest rate and credit risk. Historically, "fixed-income" refers to securities which promise fixed cash flows over their lives such as a fixed-rate coupon bond. Now, it is generally accepted that a fixed income instrument is one whose value is driven by the level of interest rates and/or the value of a related underlying asset. This classification would include floating rate bonds, callable bonds, bond futures, bond options, caps, floors and collars, interest rate swaps, credit derivatives and asset-backed securities. The analysis of fixed income securities is quantitative in nature. We will focus on the intuition behind the various concepts presented in class but there will be a fair amount of computation involved. Students should be comfortable with linear algebra, calculus, probability distributions, regression analysis and statistical concepts like mean, variance and correlation (covariance). The course will also assume a high level of familiarity with a spreadsheet package like microsoft excel.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2126 - INVESTMENTS ANALYSIS & STRATEGIES

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide students with thorough practical and theoretical exposure to the credit segment of securities markets. The course covers the major topics of bond pricing, international markets, term structure of interest rates, duration, convexity and their implications for portfolio management, interest rate models, asset-backed securities, interest rate derivatives and credit risk analysis. Real-world examples are utilized to demonstrate connections with the theoretical framework.

BFIN 2130 - VALUATION 2

Minimum Credits: 1
Maximum Credits: 1
This is a continuation of valuation 1.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BFIN 2030; PROG: Katz Graduate School of Business

BFIN 2140 - REAL ESTATE FINANCE

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to real estate with a focus on the valuation and financing of real estate. The following topics are expected to be covered as the course focuses on income producing properties: economic theory of real estate, valuation technique (including pro-forma cash flow projections), financing strategies, risk analysis, taxation, and the securitization of real property interests. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate terminology and real estate markets. Classes are conducted in a standards lecture format with discussion required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2141 - REAL ESTATE FINANCE

Minimum Credits: 3
Maximum Credits: 3
Real estate represents the largest asset class in the world and is historically the asset most closely associated with wealth in every culture and country. Our objective is to understand the financial characteristics of income-producing real estate by focusing on capital costs, cash flow characteristics, discount rates, exit values, and required rates of return. We will explore some of the unique characteristics that shape the economic performance of real estate assets. We will deploy a set of analytical tools to model potential economic outcomes of real estate investments; review the most common sources of capital deployed in income producing properties; and explore how securitization and secondary markets have revolutionized financing approaches, not always with positive results.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BFIN 2410

BFIN 2145 - FINANCIAL MODELING

Minimum Credits: 3
Maximum Credits: 3
The course will apply finance theory to solve various problems in financial management and investments. It will take a hands-on approach in building financial spreadsheet models using Microsoft excel. Students will learn to address issues that arise in various areas of financial analyses. These issues include but are not limited to discounted cash flow valuation, cost of capital estimation, asset return calculations, portfolio theory, index models, option pricing models, bond pricing and investment performance analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: COREQ: BFIN 2409 and 2410; PLAN: Joseph M. Katz Grad Sch Bus

BFIN 2150 - RISK MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course examines financial risk management from the perspective of the corporate manager. We will examine three issues. The first is why a corporation should manage risk. To understand this, we need to consider how corporations create value for shareholders and the frictions they face that create wedges between what the corporation produces and what is ultimately passed through to shareholders. The second issue is how a corporation should manage risk. This requires an understanding of certain financial instruments that are generally

referred to as derivatives - instruments whose values derive from other more fundamental assets such as commodities, currency exchange rates, stocks (equities) and bonds (interest rates). The building blocks for many of these financial instruments are two basic derivative instruments, forwards/futures and options. The third issue is the cost of risk management. We will start by pricing forwards/futures and options under the assumption that markets are efficient and there is no arbitrage. We will then use Monte Carlo simulation as a tool for pricing more exotic derivatives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BFIN 2306 - FINANCIAL MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
An introduction to the tools used in corporate financial decision making. Develops two basic valuation models commonly used in finance--present value models and the capital asset pricing model and focuses on the use of these models in corporate decision making. Examines capital budgeting, corporate structure policy, and corporate dividend policy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2307 - HEALTHCARE AS AN ASSET CLASS - A PRIVATE EQUITY PERSPECTIVE

Minimum Credits: 1
Maximum Credits: 1
The course endeavors to create an understanding of the global private equity market, identify stakeholders, assess evaluation techniques of portfolio companies, examine the financing techniques, review how portfolio companies are managed and evaluate exit realization strategies. The discussion focuses on Healthcare as an asset class and its growing importance.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BFIN 2308 - MERGERS, ACQUISITIONS AND CORPORATE RESTRUCTURING

Minimum Credits: 1
Maximum Credits: 1
This course will examine strategic and practical issues associated with restructurings, including those related to mergers, acquisitions, divestitures, activist investors, governance challenges, financial distress, and leveraged buyouts. We will investigate these issues in the context of a firm's overall strategic goals and discuss how restructuring strategies must be formulated to be consistent with a firm's business strategy and corporate culture. We will focus on the tools for measuring value and value creation/destruction and the economics underlying the value creation process. The goal of this course is to provide a practical overview of the market for corporate assets viewed from the perspective of firms, employees, bankers, consultants, and investors.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BFIN 2342 - ALTERNATE ASSETS: FROM VC TO PE

Minimum Credits: 3
Maximum Credits: 3
The course endeavors to create an understanding of the global private equity market, identify stakeholders, assess evaluation techniques of portfolio companies, examine the financing techniques, review how portfolio companies are managed, and evaluate exit realization strategies. The discussion will also include the importance of private equity in capital markets, current trends in investments, and the type of investors. This course will focus on financial aspects of private equity investing to deepen the understanding of traditional corporate finance, as well as supplement other aspects such as entrepreneurship and management practices. It may be noted that this course is best

suited for students have already undertaken basic finance courses. This course is largely case study based and students need to have a good grounding in the theory of finance. Class participation has significant weightage towards the final grade. Per the McKinsey & Company, Global Private Equity Report 2024, private markets continued to grow. These markets which include, private equity, real estate, infrastructure, natural resources etc., both fund raising ($858 billion of new capital) and assets under management (AUM), at $7.4 trillion worldwide, continued an impressive cycle of expansion that began in 2008. Over the decades, since the early 1950's when this asset class started to form, it is now an important component of funding source for most businesses across the globe, big or small.

BFIN 2409 - FINANCIAL MANAGEMENT 1

Minimum Credits: 1
Maximum Credits: 1
The main objective of this course is to gain understanding of the theory and practice of financial decision making. This course develops the tools and framework necessary to address the question what investment projects should be undertaken to maximize shareholder wealth? To examine this question, we will learn how to value an uncertain stream of cash flows and apply the concept of the time value of money in valuing bonds and equity. The course covers a number of market-based investment criteria and develops an entity valuation model, based on discounted cash flows (DCF) used for standard capital budgeting decisions. We will conclude with a short introduction to the concept of risk and return, resulting in the cost of capital. We will cover a case discussion on capital budgeting to put our framework in a more realistic environment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: BACC 2401 or BQOM 2401; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2410 - FINANCIAL MANAGEMENT 2

Minimum Credits: 1
Maximum Credits: 1
This course builds on financial management i and develops an asset pricing framework used in corporate finance based on the trade-off between risk and return. We use modern portfolio theory to determine a suitable asset pricing model and arrive at determining the relevant discount rate to reflect the risk associated with the cash flow we focused on in financial management i. Finally, we will address how financing and capital structure choices affect project and firm value using the above techniques and methods. The course will conclude with three valuation methods: WACC, APV, and FTE and an extensive case discussion. Financial management i & ii are prerequisite courses for any other finance elective in the curriculum.
Academic Career: Graduate

BFIN 2420 - FINTECH

Minimum Credits: 3
Maximum Credits: 3
This course focuses on applications of new technologies in financial settings. The course introduces FinTech topics such as digital lending, blockchain and cryptocurrency, and digital wealth management. Applications of machine-learning and big-data techniques in finance are also examined. The course also explores various trading technologies, algorithmic trading, and portfolio management tools such as risk/return optimization and value-at-risk. The course leverages current data acquisition tools and statistical software packages to improve students' analytical skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2409 and 2410

BFIN 2430 - CORPORATE FINANCIAL STRATEGY

Minimum Credits: 3
Maximum Credits: 3
This is an advanced course in corporate financial strategies. The objective of the course is to highlight the role of finance in strategic decision-making and to extend, integrate, and apply what students have learned in other courses in the context of complex business cases. The courseexamines the interplay between asset management issues and liability management issues in a variety of different contexts, with an emphasis on situations in which firms find themselves in changing business environments or in situations where change is needed to enhance value. Key strategic and financial choices will be examined in the context of large capital structure changes, mergers, acquisitions, divestitures, LBOs, debt restructurings, activist investor activity, incentive conflicts, and the creation of specialized organizational forms. The course focuses on the role of corporate financial strategies in the value-creation process and discusses how corporate financial strategies and decisions must be optimally formulated in the context of a firm's business strategy and corporate culture.

Business Marketing

BMKT 2031 - MARKETING RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This course provides a comprehensive introduction to the concepts, techniques, and applications of marketing research. Students learn how to design and conduct studies that generate insights for marketing decision-making. Topics include qualitative, quantitative, and mixed research methods; hypothesis development; experimental design; and focus group techniques. Students also develop skills in formulating research questions, collecting and analyzing data, and communicating research findings to diverse audiences.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BQOM 2401; CREQ: BMKT 2409; PROG: Joseph M. Katz Grad Sch Bus

BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE

Minimum Credits: 3
Maximum Credits: 3
A variety of social and psychological theories and concepts related to consumer behavior as well as their practical application to the field of marketing are examined and discussed. Students have the opportunity to further apply what they learn through case presentations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2036 - APPLIED BEHAVIORAL ECONOMICS

Minimum Credits: 1
Maximum Credits: 1
This course will introduce students to the theory and application of "behavioral economics," a sub-domain that has gained considerable practical popularity across a range of fields, including marketing, finance, accounting, human resources and public policy. Popularized by books such as "Predictably Irrational" by Dan Ariely and "Nudge" by Cass Sunstein and Richard Thaler, Behavioral Economics focuses on the ways that humans' natural psychological tendencies can be used or overcome in ways that lead to desirable outcomes. Importantly, behavioral economics acknowledges that humans generally do not conform to the assumptions that underlie classical economics and that the ways in which we fail to be rational, self-interested, perfect information processors can be used to our benefit, rather than to our detriment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BMKT 2060 - INDEPENDENT STUDY IN MARKETING

Maximum Credits: 9
Self designed elective course in marketing management.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2306 - MARKETING MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Topics include the role of marketing in a developed society, consumer behavior, competitive behavior, social and technological change, demand analysis and measurement, marketing research and model building, and marketing planning, strategy, and control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2409 - MARKETING MANAGEMENT

Minimum Credits: 1
Maximum Credits: 1
This course examines the role of marketing in creating value for the firm. It helps students answer the central question of marketing strategy, what value to provide and to whom, using the tools of segmentation, targeting, and positioning (STP) of brands. The course shows how central aspects of marketing mix programs, product, place, pricing, and promotion, all follow from an effective STP program, and how marketing support functions such as marketing research, advertising, and new product development can support effective marketing decisions. Emerging trends in digital marketing, competition and globalization are examined. The course emphasizes experience-based learning to develop the necessary marketing knowledge and skills among students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2513 - CONSUMER BEHAVIOR 1

Minimum Credits: 1
Maximum Credits: 1
Examines a wide variety of social science concepts as they relate to the behavior of consumers. Although consumer research methodology is not a main focus, students will be expected to become familiar with the more common research techniques used to study consumers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BMKT 2411 or BMKT 2409; PROG: Joseph M. Katz Grad Sch Bus

BMKT 2522 - SALES LEADERSHIP AND MANAGEMENT

Minimum Credits: 1
Maximum Credits: 1
This course is somewhat unique in that it stresses hiring characteristics that should be sought by the sales manager and various leadership and management techniques that have proven effective. The entire course will provide assistance to the student in sales positions following graduation and will form the basis for sales management decisions in future years.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course deals with the development of new products. It focuses on the set of decisions that need to be made in the development of new products and tools useful for making these decisions. This course will also introduce the student to a systematic treatment of marketing on a global scale. In addition to examining the problems of performing various market functions in other countries, heavy emphasis will be given to analyzing and understanding the different cultures in which a firm's products might be marketed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

BMKT 2527 - BRANDING IN THE AGE OF AI

Minimum Credits: 1
Maximum Credits: 1
The rapid rise of artificial intelligence has ushered in an era of hyper-digitalization, transforming marketing, technology, and organizational strategy. This course equips modern marketers, entrepreneurs, and managers with frameworks to navigate these shifts and lead cross-functional innovation in the age of AI. Grounded in the six-pillar of strategic brand marketing framework students will explore purpose, phygital experiences, platform, participation, personalization, and partnerships. Through case studies and applied projects, students will learn to design adaptive, ethical, and evidence-based branding strategies for the hyper-digital marketplace.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BMKT 2528 - ADVERTISING

Minimum Credits: 1
Maximum Credits: 1
Advertising is a complex phenomenon - at once leading, lagging and reflecting the values of society. The pragmatic, operational and

decision-making aspects of advertising are emphasized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

BMKT 2530 - SERVICES MKTG:STRATEGIES/TACTICS

Minimum Credits: 1
Maximum Credits: 1
Services account for over 75% of the US GDP and over 75% of US jobs. The primary goal of this course is to prepare students to be effective executives in an increasingly service-oriented and technology-driven economy. The course is designed to help students understand the unique nature and characteristics of service products, the special marketing challenges posed by this intangible core, and the ways to tackle these challenges effectively and efficiently. Students participate in discussion, live cases, and a customer journey mapping project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

BMKT 2532 - PRICING STRATEGIES AND TACTICS

Minimum Credits: 1
Maximum Credits: 1
The course focuses on an important element of the marketing mix. While product, promotion and distribution are aspects of the mix that will help create value to consumers, the price creates value to the firm in the form of profits.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

BMKT 2533 - BUSINESS TO BUSINESS

Minimum Credits: 1
Maximum Credits: 1
Most mba graduates will join organizations that market their products and/or services to other businesses, institutions or government agencies. Such marketing is referred to as business-to-business (b2b) marketing. In this class we will look at those management activities that enable a supplier firm to understand, create and deliver value to other businesses, governments and/or institutional customers.

Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

BMKT 2544 - SHOPPER ANALYTICS

Minimum Credits: 3
Maximum Credits: 3
To achieve the objectives of this course, we will be using several methods during the semester, including lectures, guest speakers, readings, and class assignments/presentations. The philosophy underlying this course may be a bit different than you are accustomed to. While lectures will be a component, the general approach will be that of a practicum. That is, you will be exposed to a concept or database, then apply those concepts and databases via a project which is presented to the class. Readings are drawn from both business publications and academic journals. You are strongly encouraged to bring in other relevant materials that you encounter.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: BMKT 2411 or BMKT 2409; PROG: KATZ Graduate School of Business

BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS

Minimum Credits: 1
Maximum Credits: 1
This course presents a data-driven approach to strategic and tactical marketing decision making in the context of digital and social media. Covering the three main media types of paid, owned, and owned media, students will learn about frameworks and methods that allow them to take data from sources such as google, Facebook, and twitter to be able to generate valuable and actionable managerial insights. The focus is on learning how to use digital and social media activity data to make better decisions, not on statistical methodologies (however, familiarity with excel is needed). The course will involve a combination of lectures, guest speakers, and hands-on workshops. This course is part of the digital marketing certificate and complements the "marketing and social media strategy" course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: BMKT 2515 or 2553

BMKT 2553 - SOCIAL MEDIA STRATEGY

Minimum Credits: 1
Maximum Credits: 1
Social media is changing how business is done around the world in almost every industry. How does social media effect your business? This course provides students with a detailed and up-to-date understanding of social media from a business strategy perspective. Through a series of lectures, case studies, and workshops, students learn how to identify opportunities for using social media in a variety of business areas, including marketing, operations, advertising, services, and human resources. The course takes a broad perspective and considers how social media it can be used successfully for business-to-consumer, business-to-business, and intra-company purposes. A central theme in this course is for students to apply what they learn to their own businesses and industries in order to identify opportunities for strategic, value creating uses of social media in their companies. After taking this course students will see how social media impacts business in many different ways and goes beyond simply using Facebook, twitter, or other popular social platforms for basic marketing purposes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BMKT 2554 - MARKETING DESIGN AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course presents a data-driven approach to strategic and tactical marketing decision making in the context of digital and social media.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BMKT 2569 - BRAND MANAGEMENT

Minimum Credits: 1
Maximum Credits: 1
This course explores the role played by brands in influencing consumers' choices, and investigates how to move effectively manage such brands. The course uses a variety of tools including lectures, cases, simulations, in-class exercises, hands-on, industry visitors and individual pro jects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BMKT 2411 or BMKT 2409; PROG: Katz Graduate School of Business

BMKT 2573 - AI IN MARKETING

Minimum Credits: 3
Maximum Credits: 3
This advanced graduate-level course explores the intersection of marketing research and artificial intelligence. The course aims to equip students with cutting-edge tools and techniques to analyze and interpret diverse data types, including text, images, video, and audio. Through hands-on exercises, students will learn to understand, develop, and implement AI-driven solutions in marketing. The course also emphasizes the importance of ethical and legal considerations in the application of AI technologies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BMKT 2031

BMKT 2609 - BUSINESS DISRUPTION SERIES: MARKETING

Minimum Credits: 0
Maximum Credits: 1
A business disruption course allows students the opportunity to engage with emerging research, technology, and business innovations that may disrupt and revolutionize established business theories, markets, and products. The experience will take the form of a mini-course, experience, or activity and may be a 0.5-credit or 1-credit course, depending on the nature of the experience and stated outcomes of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

BMKT 3001 - CONSUMER BEHAVIOR 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BMKT 3002 - CONSUMER BEHAVIOR 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BMKT 3010 - INDEPENDENT STUDY IN MARKETING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

BMKT 3014 - MARKETING STRATEGY

Minimum Credits: 3
Maximum Credits: 3
Identifies the foundations of all aspects of marketing including product development and management distribution channel activity, sales force management, sales promotion, pricing, planning and strategy, information systems, and marketing organization and management, among other topics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 3017 - MARKETING MODELS

Minimum Credits: 3
Maximum Credits: 3
Examines applications of management science techniques and methodology to improve marketing decision making. Emphasis will be on the use and interpretation of multivariate statistical methods and/or the application and implementation of operations research rather than their theoretical development. Students develop knowledge of at lEast one managerially relevant problem area and apply or critique the application/implementation of management science techniques through real data analysis or simulation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BMKT 3025 - MARKET BEHAVIOR RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 3099 - READINGS IN MARKETING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

BMKT 3551 - RESEARCH IN MARKETING

Minimum Credits: 1
Maximum Credits: 1
The purpose of this seminar is to give you an overview of the foundations of marketing strategy research and familiarize you with recent marketing strategy research. Marketing strategy examines strategic decisions and actions taken by firms in various sub-areas within marketing, and integrates consumer-level perspectives as an input to marketing strategy. This seminar examines marketing strategy from a multidisciplinary perspective and utilizes theories emanating from economics, sociology, psychology, management, as well as marketing. There are many interesting levels of analysis in marketing strategy research, including individual, dyadic, group, firm, inter-organizational, and industry level. In addition, this seminar will introduce you to a variety of research designs and techniques for doing marketing strategy research. Each week we will cover literature on a specific topic.
Academic Career: Graduate

Cardiothoracic Surgery

CTSURG 5461 - PEDIATRIC CARDIOTHORACIC SURGERY

Minimum Credits: 0
Maximum Credits: 0
Four-week elective with clinical experience on pediatric cardiothoracic surgery service. Student will actively participate in care of pediatric cardiac surgery patient and attend weekly med/surg cardiology conference. Covers types of congenital heart disease, physiology and patho-physiology and current methods of operative intervention for palliation or repair. Time can be spent participating in clinical or laboratory research in progress.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CTSURG 5462 - ADULT CARDIAC SURGERY ACTING INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0
This is a four-week (4) elective that offers a student clinical experience on the adult cardiac surgical service at UPMC Presbyterian. The student will participate in the preoperative, intraoperative, and postoperative care of a variety of patients suffering from acquired cardiac diseases, including but not limited to coronary artery disease, valvular and aortic and end stage heart failure. The student will be expected to understand anatomic and physiologic concepts that will be reviewed from preoperative studies and available for intraoperative interpretation. Active participation in the operating room and ICU will be encouraged.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CTSURG 5463 - ADULT THORACIC SURGERY

Minimum Credits: 0
Maximum Credits: 0
Students will be assigned to the thoracic service of UPMC. Participation will be in operative experiences, clinic setting and ward work. Focuses will be on benign and malignant surgical problems of the lungs, esophagus, mediastinum, chest wall and diaphragm. Students will be exposed to minimally invasive approaches including esophagostomy, lobectomy and others.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CTSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CTSURG 5840 - CARDIOTHORACIC SURGERY RESEARCH

Minimum Credits: 0
Maximum Credits: 0
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CTSURG 5900 - EXTRAMURAL CARDIOTHORACIC SURGERY

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in cardiothoracic surgery may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM catalog with all appropriate approvals to be received before the course may be added to the student's schedule for credit.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Cell Biol & Molecular Physio

MSCBMP 2800 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: Graduate

Course Component: Thesis Research
Grade Component: Grad SN Basis

MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC

Minimum Credits: 2
Maximum Credits: 2
Course analyzes membrane/protein traffic along both the biosynthetic & endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g-proteins (both heterotrimetric & small), coat proteins (coatamer 1 & 2 & adaptors), signal transduction cascades (pkc, pka, ip3, etc.), & Snare complexes in protein trafficking. Also, we will discuss the role of the cytoskeleton in transporting cargo & signal transduction. Membrane traffic in several specialized cell types will be covered including polarized epithelial cells, cells of the immune system, & neurons.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2852 - RESEARCH SEMINAR IN CELLULAR BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Advanced research seminar with journal club format specializing in current aspects of membrane trafficking.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSCBMP 2853 - RESEARCH SEMINAR IN REPRODUCTIVE PHYSIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Advanced research seminar with journal club format specializing in current aspects of reproductive physiology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSCBMP 2855 - RESEARCH SEMINAR IN MOLECULAR PHYSIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Advanced research seminar with journal club format specializing in current aspects of molecular and cellular physiology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCBMP 2870 - HISTOLOGY

Minimum Credits: 5
Maximum Credits: 5
The objective of this lecture/lab course is student comprehension of the relationship between cell structure and organ function, and the application of this knowledge to the identification of light and electronmicroscopic images of cells and organs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
The purpose of experiments and logic in cell biology (ELCB) is to engage the students of the cell and molecular physiology graduate program in a self-directed seminar structured to stimulate the students' ability to think scientifically and critically as future scientists. The iterative, collaborative and collegial process of ELCB is the same used by teams of collaborating scientists to develop and solve biomedical projects.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: School of Medicine (PMEDS)

MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES

Minimum Credits: 4
Maximum Credits: 4
This one-term course will explore the cellular basis of multiple disease states. The course, which meets twice a week (two hours each session), will be taught through both lecture and in class discussion of primary literature. Each of seven modules will examine normal cell biology and function and then define how defects in these processes lead to the spectrum of pathologies associated with each disease. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. The seven modules are as follows: the first examines insulin secretion and signaling and how these events are perturbed in diabetes mellitus. The second module focuses on cell-cell adhesion and its role in cancer progression and epithelial barrier function. The third module defines how defects in endocytosis of the low-density lipoprotein receptor leads to hypercholesterolemia. The fourth analyzes the cellular basis of hypertension and how altered internalization of the epithelial sodium channel leads to elevated blood pressure. The fifth module investigates the role of apical membrane recycling and how defects in aquaporin-2 traffic leads to nephrogenic diabetes insipidus. The sixth module appraises the current state of our understanding of cystic fibrosis and how degradation of defective cystic fibrosis transmembrane conductance regulator by the quality control machinery in the endoplasmic reticulum and cell periphery leads to disease. The last module examines cell migration in wound healing and angiogenesis. At the end of the course students will have an increased understanding of normal cellular function and how research in cell biology can lead to a deeper understanding of diseases that impact millions of people each year.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
The focus of this new course will be to study relevant problems in cell biology, immunology, developmental biology and neurobiology and how they have been solved using imaging approaches. For example at the cell level we will investigate how techniques such as TIRF and high speed confocal have addressed basic problems in endocytosis; at the organismal level we will use multiphoton, confocal, fret, and other approaches to understand aspects of cell biology in cell polarity, respiration and organ development in c. Elegans, Drosophila, Zebra fish and mice. In each case the application will focus on how imaging tools are used to study defined problems in living systems. The course will follow a lecture/demo/journal club format. Lectures will be two part, the first 1/3 will be a description of the technology, how it was developed and how it works (10-15 minutes) followed by description of the scientific problem and how it was solved. This will be followed by lab demonstrations showing the approach in action. Lectures will be interspersed with a journal club discussion of a relevant paper on each technology. Students will prepare the journal club presentations in an alternating fashion. Examination will be a combination of class participation, journal club and written exam.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2890 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cell biology or physiology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Cell Biol & Molecular Physio (PHD) or Interdis Biomedical (UNK)

MSCBMP 2895 - CELLULAR PHYSIOLOGY OF THE KIDNEY

Minimum Credits: 2
Maximum Credits: 2
This summer course will provide an introduction to the kidney and lower urinary tract, with emphasis on kidney structure and function. The course, which meets once a week (two hours each session), will be taught through both lecture and in class discussion of the primary literature. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. You will first learn about the specialized cell types that comprise the kidney and lower urinary tract. Subsequently, you will be introduced to renal stem cells and how they lead to kidney development. Next, you will learn the functions of the kidney, including regulation of water and ion balance. This will be followed by a discussion of the lower urinary tract. Finally, you will learn how drugs can be used to treat kidney dysfunction and how kidney transplants can be used to treat those patients with end-stage renal disease.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 3800 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of forty credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Cell Biol & Molecular Physio (PHD)

MSCBMP 3835 - DNA REPAIR JOURNAL

Minimum Credits: 1
Maximum Credits: 1
The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

MSCBMP 3840 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS

Minimum Credits: 2
Maximum Credits: 2

This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INTBP 2000

Cellular & Molecular Pathology

MSCMP 2280 - BASIC UNDERSTANDING OF PROFESSIONALISM AS RELATED TO GRADUATE EDUCATION

Minimum Credits: 1
Maximum Credits: 1
Students will be introduced to the underpinning concepts of Professionalism in the context of graduate education at the University of Pittsburgh School of Medicine. This will include formal training in activities related to Title IX as required by the University of Pittsburgh.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

MSCMP 2306 - SYNTHETIC BIOLOGY JOURNAL CLUB AND INVITED SPEAKERS

Minimum Credits: 1
Maximum Credits: 1
Students will read and discuss top Synthetic Biology related articles for journal club. Some sessions will present invited speakers focusing on Synthetic Biology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

MSCMP 2700 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN

Minimum Credits: 3
Maximum Credits: 3
The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 2740 - MOLECULAR PATHOBIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is structured to introduce students to the integration between basic and clinical research on the molecular pathogenesis of highly relevant human diseases such as diabetes, congestive heart failure, bone disease, neurodegenerative disorders and asthma. The course provides students with an overview of the natural history of the diseases, their diagnosis and clinical management. This will be followed by in-depth discussions concerning the pathologic substrate of the disease, with particular attention focused on the molecular mechanisms of disease progression. In addition to current basic science research, students will be exposed to the clinical impact of basic science discoveries upon the development of new therapeutic interventions. We discuss current research trends and factors that enhance fundability of research projects, the current knowledge gaps of the science and impact of therapeutic development.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 2750 - RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a course faculty advisor. With prior permission, during the spring of their first year or fall of their second year in the program, students may elect to present their thesis project instead, in preparation for their comprehensive exam. The course meets weekly. during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscripts/data as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCMP 2760 - TISSUE ENGINEERING: FROM DESIGN TO CLINICAL TRANSLATION

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to the fields of tissue engineering and regenerative medicine. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Regenerative medicine is a related and overlapping field, focusing on methods that enable the body to heal itself rather than using laboratory made constructs. Tissue engineering and regenerative medicine are highly interdisciplinary and therefore cross numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology, be familiar with the general types of biomaterials used in tissue engineering and regenerative medicine, understand techniques utilized to design, fabricate, and functionally assess tissue engineered systems, including human microphysiological systems. Students should be able to apply the combined knowledge of tissue organization, tissue engineering and regenerative medicine strategies to design a unique, reasonable tissue engineered or regenerative solution to an unmet clinical need. This course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCMP 2770 - BIOMATERIALS AND BIOCOMPATIBILITY

Minimum Credits: 3
Maximum Credits: 3
Synthesis and properties of polymeric biomaterials; surface modification; surface characterization; biodegradation; metallic biomaterials and corrosion; protein adsorption; cell adhesion; coagulation and thrombosis; complement and the foreign body response; biomaterial-centered infection; sterilization; natural biomaterials
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 2780 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Students will focus on a selected topic in cellular and molecular pathology and write a paper under the direction of a faculty advisor.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

MSCMP 2790 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cellular and molecular pathology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Cellular & Molecular Pathology (PHD) or Interdis Biomedical (UNK)

MSCMP 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An introduction to the engineering of biological systems with synthetic biology tools. Emphasis on synthetic biological networks and biological control. Design and analysis of computational and experimental tools in synthetic biology including microfluidic systems. Applications of synthetic biology in biomedical, chemical, and environmental engineering problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCMP 3700 - PHD DISSERTATION RESEARCH (Thesis)

Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS

Minimum Credits: 3
Maximum Credits: 3
This course presents biochemical and clinical aspects of cancer biology and therapy, designed for graduate students training in the basic sciences or medicine. The lectures cover fundamental topics in cancer biology and pathology, the biology of major cancer types, viral oncogenesis, and an overview of cancer therapeutics including chemotherapy, DNA repair-based therapies, targeted therapies, hormonal therapies, and immunotherapy. This course also covers experimental models and databases used in cancer research and the process of cancer drug development.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3715 - BIOINF CANCER BIOL & THERPUTCS

Minimum Credits: 1
Maximum Credits: 1
Reading and discussion on bioinformatics resources available to enhance research on cancer biology and therapeutics. We will discuss bioinformatics databases and other resources related to: regulatory networks and signal transduction pathways, genes associated with cancer risk and the progression of cancer; cytogenomics, sources of information on the distribution of cancer occurrence and trends in the us population, databases DNA repair genes, their structure & function, models of cancer progression & responses to therapy, biomarkers for cancer detection, treatment & prevention.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCMP 3730 - TOPICS IN EXPERIMENTAL NEUROPATH

Minimum Credits: 1
Maximum Credits: 1
This course critically evaluates the latest scientific literature concerning diseases of the central nervous system. Emphasis will be placed on methodologies as they are applied to the study of human neurologic diseases. Participants will present their own research data or scientific papers and lead the classroom discussions. This course is open to students of all levels and will include both basic scientists and clinicians (residents, faculty).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Extracellular matrix (ECM) is a fundamental structural and signaling component of all tissues and plays a defining role in cellular and tissue responses to homeostatic cues, regeneration, inflammation, wound healing, and disease. Indeed, virtually every aspect of tissue biology and function is influenced by ECM composition, organization, and dynamics. The objective of this course is to provide students with a comprehensive understanding of the fundamental biology of ECM, its role in tissue function, and its emerging applications in bioengineering and regenerative medicine. The course will begin with an overview of the structure, biosynthesis, and gene regulation of the major protein and glycosaminoglycan components of the ECM. This will be followed by lectures on ECM-cell interactions, with emphasis on integrin-mediated adhesion, intracellular signaling cascades, and allosteric protein interactions that transmit extracellular signals to intracellular targets regulating cell proliferation, differentiation, function, and cell-cell communication. Because TGF-ß is a central regulator of ECM synthesis and remodeling, a dedicated lecture will focus on ECM gene regulation and TGF-ß-dependent signaling pathways. Subsequent lectures will cover histologic and imaging techniques for visualization of ECM and will examine specific tissue models in which ECM remodeling defines biological outcomes. Liver regeneration will be used as a detailed example, highlighting early ECM remodeling, re-synthesis during regeneration, and the role of ECM signaling in regulation of liver size and termination of the regenerative response. Additional focused lectures will address ECM function in wound healing, central nervous system repair, and bone and cartilage biology. The role of ECM as a barrier and regulator of cancer invasion will be examined, along with the cellular and molecular mechanisms by which cells invade and remodel ECM during tumor progression, organogenesis, and embryonic tissue morphogenesis. The course will conclude with cellular and bioengineering approaches that leverage ECM for tissue reconstruction and modeling, including decellularized organs, hyaluronic acid-based biomaterials and signaling, ECM in vascular, joint, and muscle reconstruction, and the use of ECM in microphysiological systems (organ-on-chip platforms), three-dimensional culture systems, and 3D bioprinting technologies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3740 - STEM CELLS

Minimum Credits: 3
Maximum Credits: 3
The course will provide a comprehensive overview on this intriguing and timely topic. The course will focus on the biology of stem cells and their role in health and disease with emphasis on development, carcinogenesis, aging and tissue engineering. Lectures on various aspects of stem cells from renowned experts will cover embryonic, adult, and induced pluripotent stem cells. Specific lectures will include stem cells in the blood, placenta, bone, liver, brain, adipose, pancreas, gonads, lung, gut, skin, breast, dental/oral tissues and eye. Students will also be educated on therapeutic cloning, bio-ethical issues, synthetic and systems biology, and existing laws governing stem cell research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3750 - ANGIOGENESIS

Minimum Credits: 3
Maximum Credits: 3
Angiogenesis is one of the important research areas in biomedical sciences. Formation of new and remodeling of existing blood vessels are fundamental processes involved in organism tissues homeostasis. Aberrant angiogenesis and vascular remodeling contribute to the development and progression of major cardiovascular and non-cardiovascular diseases. This course will provide extensive knowledge of developmental and pathological angiogenesis, as well as most recent advances in its clinical applications. Topics include: 1. Angiogenesis and vascular remodeling in physiological and pathological processes; 2. Molecular and cellular regulation of angiogenesis and vascular remodeling; 3. Methodologies and techniques for angiogenesis studies; 4) Current advances in angiogenic therapies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCMP 3760 - REGENERATIVE MEDICINE RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
The seminar in regenerative medicine provides exposure to cutting-edge research in the broad fields of regenerative medicine, tissue engineering, and synthetic biology. The course blends lectures by experienced faculty, work-in-progress talks by graduate students, and professional development seminars (e.g., alternative careers in science, grant writing, and scientific communication). Lectures are held approximately twice per month, and student engagement is strongly encouraged. Grades are based on attendance and participation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCMP 3770 - CELL THERAPY

Minimum Credits: 3
Maximum Credits: 3
This course showcases cell therapy from theory to practice, from the bench to the bedside and is meant to be unlike any other graduate course. In each area of cell transplantation lectures are provided by those who have implemented cell transplantation techniques and have moved it to a clinical therapy. Most of the lectures in the course are given by those who actually do the patient transplants. Immunology and pharmacology and cellular engineering & edition will be addressed as it directly relates to cellular therapy. Stem cell biology will not be addressed individually but will be raised in the context of specific applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3780 - SYSTEMS APPROACH INFLAMMATION

Minimum Credits: 2
Maximum Credits: 2
This course is focused on particular topics of great biologic complexity in critical illness, where modeling has the potential to translate in improved patient care. Lectures are provided by basic (biological and mathematical sciences) and clinical faculty, in conjunction with members of industry and speakers from outside institutions. This information will be communicated within the framework of defined themes that describe the complexity of inflammation in acute and chronic illnesses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Personalized (or Precision) medicine is rapidly becoming a clinical reality, driven by ongoing discoveries in cell biology, genomics, proteomics, and metabolomics coupled with greater understanding of disease processes. The translation of these discoveries-particularly in diagnostic, prognostic, and theragnostic applications-has accelerated dramatically. As personalized medicine continues to evolve, its successful implementation will increasingly require close collaboration between physicians and basic scientists. However, a major obstacle to this integration is the limited training of basic scientists in the principles of clinical test development and validation. This course is designed to close that gap by providing students with a foundational understanding of clinical development, testing, and validation, and by fostering an appreciation for how these processes differ from traditional investigational research. Through focused topic areas, the course explores key concepts and practical considerations in personalized medicine. The first part of the course introduces the core principles and overarching concepts of clinical test development, emphasizing the qualitative differences between clinical assays and research-based studies. Topics include entrepreneurial considerations, advanced molecular techniques, diagnostics, and ethical considerations. The remainder of the course is dedicated to distinct testing modalities targeting either nucleic acids or proteins and other external effectors. Topics include inherited genetic diseases and predispositions; acquired genetic alterations in cancer; metabolomic profiling of endocrine disorders; immune network analysis in transplantation and rejection; proteomic profiling in blood disorders; and advanced 3D bioprinting and non-animal model systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Chemical Engineering

CHE 2013 - MOLECULAR MANUFACTURING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE METALLIC ALLOYS

Minimum Credits: 3
Maximum Credits: 3
Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CHE 2017 - CHEMICAL ENERGY AND THE NATURE OF THE CHEMICAL BOND

Minimum Credits: 3
Maximum Credits: 3
An overview of energy transformations arising from chemical bonding in chemical catalysis, electrocatalysis, and combustion. Students will be introduced to qualitative quantum chemistry concepts: potential energy and kinetic energy operators, wave functions, electron correlation, and GVB diagrams for analysis of chemical bonds and molecular structures in energy transformations. Students are expected to have completed Undergraduate physical chemistry course on quantum mechanics or equivalent or have prior consent from the instructor.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CHE 2018 - INTRODUCTION TO SURFACE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Surface and interface engineering is critical to many important applications, e.g., coating, composite, biomedical device and membrane. With the fast growth of nanotechnology, understanding the surface properties becomes even more important since nano-sized materials, e.g., graphene, have no bulk phase but surfaces. This course combines elements of physical chemistry and materials of surface and interface in order to serve as the introduction to the surface engineering. The course spans from surface tension, capillary, superwettability to lubrication as well as 2D materials, allowing a comprehensive view to both classic surface science and cutting-edge surface technology. By the end of this class, students will understand both the fundamental principles of surface science and engineering approaches on tailor a given solid surface.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2043 - ELECTRON MICROSCOPY IN MATERIALS SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, Laue conditions, structure factor, Ewald construction, double diffraction, twinning, Kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS

Minimum Credits: 3
Maximum Credits: 3
In-depth development of basic thermodynamic relations for macroscopic systems is covered. Emphasis on mathematical foundation and application of free energy concepts to system analysis. Topics in solution theory are covered.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2201 - FUNDAMNTL OF REACTION PROCESSES

Minimum Credits: 3
Maximum Credits: 3
The basic principles for the analysis of reaction rates in heterogeneous reacting systems will be discussed with special emphasis on three-phase reaction systems. The fundamentals of multiphase reactor design will also be presented as time permits.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2250 - CARDIO CLINICAL INTERNSHIPS

Minimum Credits: 1
Maximum Credits: 6
Professional application training in cardiovascular medicine and surgery. Students will spend three months each in bioengineering practice training programs within cardiology, cardiothoracic surgery, and vascular surgery.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1

Minimum Credits: 4
Maximum Credits: 4
A systematic development of the basic concepts and equations for heat, mass, and momentum transfer. Extensive problem solving of fundamental and practical natures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

Minimum Credits: 3
Maximum Credits: 3
Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2540 - PRACTICAL ELECTROCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This graduate-level elective focuses on the practice of electrochemistry in laboratory analysis and in a wide range of technological applications. We will begin with a brief overview of the fundamentals of electrochemistry in terms of thermodynamics, kinetics, and transport processes. We will then dive immediately into practical concepts with a survey of laboratory methods and technological/industrial

applications of electrochemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2545 - PROCESS INTENSIFICATION - REACTION ENGINEERING FOR THE 21ST CENTURY

Minimum Credits: 3
Maximum Credits: 3
What is PI? "Process intensification" (PI) refers to the design and implementation of novel manufacturing processes to achieve drastic improvements in energy efficiency, productivity, and safety, while strongly reducing emissions, cost, and physical footprint. To put it simply: it's a reaction engineer's contribution to making the chemical industry more sustainable by "making more with less". While the historical roots of PI date back to the 1970s, it has only emerged as a technological trend over the past two decades and is now gaining rapid momentum across all sectors of the chemical industry. What will you learn? In this course, we will discuss various approaches to achieve process intensification, identify overarching principles that underlie PI, and learn about current drivers and barriers for implementation of PI across the chemical industry. Students will learn about novel "intensified" equipment and operating modes, approaches to decarbonize chemicals processing, and graduate students will be challenged to apply PI principles to their own realm of research. Who should enroll? The course is tailored for senior undergraduate and graduate students with a solid foundation in reaction engineering fundamentals, i.e. either ChE400 (Reactive Process Engineering) or an equivalent "Kinetics & Reactor Design" course is a minimum prerequisite. This class will be especially valuable to students with interest in clean and sustainable manufacturing, or the circular economy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2550 - SOLVING ENGINEERING PROBLEMS WITH COMPUTATIONAL CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course will discuss theoretical and computational methods in chemistry and their applications to chemical engineering problems. Emphasis will be given on performing computational chemistry calculations for the prediction of chemical structures, properties, reaction mechanisms, etc., connecting molecular with macroscopic level behavior. This course will keep a balance between lectures on basic computational chemistry theories/models and hands-on experience with computational chemistry calculations. Students will have a class project, and will be encouraged to identify a project related to their own research interests.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2600 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlining each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2631 - DESIGN FOR CIRCULAR ECONOMY

Minimum Credits: 3
Maximum Credits: 3
The current linear consumption model of raw material extraction, production, use, and disposal has dominated the global economy for hundreds of years. While an extremely wasteful approach to resource management, the linear model was tractable so long as it was employed by a small fraction of the global population, namely the developed world, so that both raw material acquisition and waste management remained economically viable. Today, we clearly see that this linear model has led to serious unintended global consequences. Circular economy (CE) offers promising solutions. CE principles are based on efficient use of resources and eliminating waste from product life cycles through clever design. Valuable material either moves in loops through the economy, or, if biologically derived, returns to the ecosystem to serve as nutrients; a truly circular economy thus keeps material in continuous use by design. The goal of this course is to provide students a thorough introduction to circular economy, along with integrating design. This course will provide students with skills and knowledge related to CE. Through experiential and project-based learning, the students will develop circular economy affinity groups that will tackle a pressing challenge including design for degradation solutions for ocean plastics and design for reuse of construction materials.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2754 - PRINCIPLES OF POLYMER ENGINEERNG

Minimum Credits: 3
Maximum Credits: 3
This course deals with the elements of polymer science and engineering necessary for entry-level understanding of polymer technology. While the chemistry determines macromolecular microstructure, an understanding of polymer manufacture and processing requires the addition of physical chemistry and transport phenomena. The essential material covered in this class includes the elements of polymers thermodynamics, rheology, mechanical behavior, and equipment design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2811 - BIOMATERIALS & BIOCOMPATIBILITY

Minimum Credits: 3
Maximum Credits: 3
Chemical and physical properties of orthopaedic and cardiovascular biomaterials. Wear and corrosion of implant materials; fracture healing; inflammatory response; fixation and loosening of permanent implants; protein absorption; coagulation cascade, bacterial adhesion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2822 - ADVANCED TOPICS IN CHEMICAL ENGINEERING

Minimum Credits: 2
Maximum Credits: 2
This course introduces the fundamentals of capillarity via canonical problems in surface tension and wetting phenomena. Topics include static wetting phenomena (e.g. contact angles, shapes of menisci and drops), dynamic phenomena in which viscosity plays a role (e.g. rupture of menisci, coating operations), and thermodynamics (e.g. capillary condensation, nucleation).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

CHE 2901 - VIBE CODING FOR ENGINEERS

Minimum Credits: 1
Maximum Credits: 1
In this course, students learn how to use new AI-centric coding techniques to quickly complete simple projects, but also to tackle projects that would normally be considered too ambitious for a single person. The course will cover (1) installation, (2) theory of vibe coding, (3) beautiful visualization of data, and (4) deployment. No coding experience is required although students may need to cover a modest amount of AI-service fees (~$50).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2910 - SPECIAL PROJECTS

Minimum Credits: 1
Maximum Credits: 12
Individual study programs at MS Level.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

CHE 2980 - MS RESEARCH METHODOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2982 - ISSUES IN RESEARCH AND TEACHING

Minimum Credits: 2
Maximum Credits: 2
This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 3001 - GRADUATE SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3004 - PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3910 - INDIVIDUAL STUDY

Minimum Credits: 1
Maximum Credits: 3
Individual study program at Ph.D. Level.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

CHE 3980 - PHD RESEARCH METHODOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of Ph.D. dissertation research.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3990 - ADVANCED GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 15
Preliminary work for Ph.D. Dissertation.
Academic Career: Graduate

Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 3999 - PH.D. DISSERTATION

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Chemistry

CHEM 0755 - ORGANIC CHEMISTRY LAB: RESEARCH EXPLORATION

Minimum Credits: 2
Maximum Credits: 2
In this course students will work in teams to write original research proposals. They will then design and carry out appropriate experiments, collect and interpret data and ultimately report results in both oral and written formats.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

CHEM 1490 - MOLECULAR DRIVING FORCES

Minimum Credits: 3
Maximum Credits: 3
This course introduces the foundational principles of physical chemistry as they apply to complex biological systems. Students will explore how core concepts from thermodynamics, statistical mechanics, kinetics, and intermolecular forces govern the behavior of biomolecules such as proteins, nucleic acids, and lipids. The course will bridge macroscopic observations with microscopic molecular driving forces, providing a quantitative framework for understanding and predicting biological phenomena. Topics will include the role of entropy in determining equilibrium, the thermodynamics of biomolecular interactions, the kinetics of enzyme catalysis, and the molecular basis of self-assembly and recognition. Through a combination of theoretical principles and case studies in chemical biology, students will develop the analytical skills necessary to address contemporary research questions at the chemistry-biology interface.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 1820 - CHEMICAL BIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to cutting-edge approaches in chemical biology that reveal how small molecules can precisely control biological processes and how biological systems can be engineered to create entirely new molecules. Students will explore modern strategies such as CRISPR-Cas genome editing, genetic code expansion, optochemical biology, and targeted protein degradation. A second area focuses on how to perform chemistry inside living cells, highlighting Nobel Prize-winning technologies like bioorthogonal and bioconjugation chemistry that have enabled breakthroughs such as antibody-drug conjugates. The course concludes with an exploration of biocatalysis and enzyme engineering for the synthesis of natural products, pharmaceuticals, and other high-value chemicals. By the end, students will understand how to harness chemical biology to drive innovation in research, therapeutics, and biotechnology.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 1825 - CHEMICAL BIOLOGY II LAB: SYNTHETIC BIOLOGY LAB

Minimum Credits: 2
Maximum Credits: 2
This synthetic biology Course-Based Undergraduate Research Experience (CURE) transforms the lab into a discovery space where students design and test real biological systems while contributing to authentic research. In the inaugural theme, every student enrolled in this lab will engage in authentic research through the design and validation of novel biosensors for detection of biologically significant analytes. Such sensors have wide-ranging potential applications in areas such as precision medicine (diagnosing disease), environmental science (monitoring toxic algae blooms), and agriculture (protection of crops from pathogens). Towards their proposed biosensor, students will gain experience with DNA design, CRISPR base editing, protein engineering, and AI-guided molecular design, supported by modern biophysical and analytical tools. Students work in teams to develop original research proposals, collect preliminary data, and present a final proposal for their idea.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

CHEM 1840 - HIGH-THROUGHPUT AND OMICS METHODS IN CHEMICAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
In this course students will discover how chemistry powers the next generation of biological discovery. This course connects analytical chemistry, organic chemistry and biochemistry to systems biology, showing how advances in analytical and organic chemistry have transformed our ability to study entire genomes, proteomes, and metabolomes at once. Students will learn how high-throughput techniques such as next-generation sequencing, mass spectrometry, library screens and selections, and flow cytometry to reveal how networks of biomolecules shape cellular behavior. Through case studies in drug discovery, protein interaction mapping, and signaling analysis, students will see how omics methods are driving breakthroughs in biology. By combining chemical insight with systems thinking, this course equips students with the conceptual and technical foundation to innovate in research fields from synthetic biology to precision medicine.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1
Maximum Credits: 12
Course designed to be taken by master's degree students who are writing their thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHEM 2090 - SEMINAR IN CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
This course is created for graduate students to register for their thesis seminar when they do not declare a division or do not satisfy divisional requirements. Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING

Minimum Credits: 3
Maximum Credits: 3

Group theory and molecular symmetry, with emphasis on their application to the theoretical aspects of bonding in inorganic and organometallic complexes, as well as to the experimental techniques (electronic, vibrational, and photoelectron spectroscopy) typically used to elucidate the nature of intramolecular interactions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course is intended to provide a solid background in modern inorganic chemistry for those doing research in all branches of chemistry. Much of the course material is descriptive, but the objective of the selection and presentation of the material will be to develop an understanding of the principles controlling the structures and reactivity of inorganic materials. Aspects of all areas of inorganic chemistry will be discussed, including main group, transition metal, and organometallic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2130 - PHYSICAL METHODS IN INORGANIC AND MATERIALS CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Inorganic and materials chemistry encompasses vast classes of chemical compounds spanning the solution and solid state which necessitate a diverse collection of physical characterization methods for understanding their chemical constitutions, structures, and physical properties. This course presents the most common and relevant methods of characterization from both a theoretical and practical perspective, which are introduced in the context of topical areas in inorganic and materials chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2180 - INORGANIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Modern bonding theories are developed to the level that permits some understanding of the effects of structure and bonding on chemical properties. Periodic relationships are discussed and applied to selected families of elements. Emphasis is placed on those aspects of structure, bonding and periodic relationships that are helpful in unifying a large body of chemical knowledge. Selected topics of current interest in inorganic chemistry are discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2190 - SEMINAR IN INORGANIC CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2210 - ELECTROANALYTICAL CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Fundamental electrode processes common to all electrochemical cal methods; thermodynamics and kinetics of electrode processes; reaction coordinate diagrams for faradaic currents; exchange current and activation polarization; non-faradaic currents and electric double layer. Mass transfer processes. Linear sweep, cyclic and pulse voltammetric methods and their application to analysis as well as the study of reaction mechanisms and problems in battery technology, electrocatalysis, photovoltaic cells and chemically modified electrodes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2220 - CHEMICAL SEPARATIONS

Minimum Credits: 3
Maximum Credits: 3
A broad thermodynamic and kinetic framework encompassing all chemical separations is used to classify techniques. Concepts such as separation efficiency are generalized. The most powerful and widely used separations techniques are chromatographic, thus solution chemistry will be discussed to provide a chemical framework for chromatography. The use of gas and liquid chromatography will be presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2230 - ANALYTICAL SPECTROSCOPY

Minimum Credits: 3
Maximum Credits: 3
This course will be broken into two sections. In the first section we will discuss different components of spectrometers, with a focus on optical spectroscopy. In the second section we will focus on understanding what we can learn from using spectroscopy and what sort of dynamical processes can be observed with different spectroscopic techniques. Topics to be covered include: spectrometer design, selection rules, line shapes, time-dependent perturbation theory, and the time-dependent approach to spectroscopy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2240 - MASS SPECTROMETRY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CHEM 2290 - SEMINAR IN ANALYTICAL CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2310 - ADV ORGANIC CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
A qualitative discussion of modern mechanistic interpretations of relations between structure and reactivity. Special emphasis is placed on the roles of reactive intermediates such as Carbonium ions, carbanions, carbenes and radicals. Study of the factors that influence the equilibria and reaction mechanisms of organic molecules.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2320 - ADV ORGANIC CHEMISTRY 2

Minimum Credits: 3
Maximum Credits: 3
A course designed to cover modern synthetic methods for the assembly of complex organic molecules (stereospecific olefin synthesis, cycloaddition reactions, sigmatropic rearrangements, organometallic chemistry, natural product synthesis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2330 - ORGANOMETALLIC CHEMISTRY

Minimum Credits: 2
Maximum Credits: 2
A single-semester two-credit lecture course focusing on the mechanistic and synthetic aspects of state-of-the-art organometallic chemistry will be offered. Understanding how organometallic structure and electronics influence reactivity patterns will provide students with predictive tools for interpreting and exploiting organometallic reactivity. The course will focus on the thermodynamics, kinetics and stereoselectivity of main group- and transition metal-mediated reactions having applications in organic synthesis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2370 - SYNTHETIC ORGANIC CHEMISTRY

Minimum Credits: 2
Maximum Credits: 2
This early graduate level course builds onto sophomore organic I and II courses by applying the learned principles to the synthesis of FDA-approved drug molecules. The emphasis of the course will be on analyzing the molecular structures of drugs in a retrosynthetic fashion, followed by developing suitable synthetic routes to these molecules. The reaction mechanisms of key steps of theses syntheses will be discussed in detail. Further discussion will include fundamental functional group interconversions, chemoselectivity, and protecting group use, enantioselective synthesis, and organometallic chemistry. Students will learn about the complexities of modern drug molecules, how their structures can be analyzed, and how they are synthesized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH

Minimum Credits: 2
Maximum Credits: 2
A course which serves as a guide to the interpretation of ultraviolet, infrared, nuclear magnetic resonance and mass spectra of organic compounds.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2390 - SEMINAR IN ORGANIC CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2430 - QUANTUM MECHANICS AND KINETICS

Minimum Credits: 3
Maximum Credits: 3
Basic quantum mechanics, with emphasis on the theory of chemical structure and dynamics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2440 - THERMODYNAMICS & STATSTCL MECHNC

Minimum Credits: 3
Maximum Credits: 3
Development of equilibrium statistical mechanics and thermo dynamics. Applications to chemical systems. These applications include solutions, phase transitions (Ising Model) and reaction theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2490 - SEMINAR IN PHYSICAL CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2600 - SYNTHESIS & CHARCTRZTN POLYMERS

Minimum Credits: 3
Maximum Credits: 3
Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (Ft-Ir, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2620 - ATOMS, MOLECULES AND MATERIALS

Minimum Credits: 3
Maximum Credits: 3

This course will use qualitative molecular orbital theory to understand the design and performance of new materials. A link will be made between "small molecule" intuition and the solid-state perspective on large molecules, clusters and solids.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2700 - GRADUATE RESEARCH SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Seminar given by faculty on graduate research opportunities in chemistry. This course is designed especially to help students in their selection of a research adviser.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CHEM 2710 - CHEMISTRY RESEARCH ROTATION EXPERIENCE

Minimum Credits: 1
Maximum Credits: 1
First year graduate students will spend a term carrying out research in various laboratories in order to make a well informed decision about choosing a PhD research adviser.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

CHEM 2810 - BIOLOGICAL CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
This course considers the chemical properties of amino acids, oligopeptides, and proteins; the biosynthesis of proteins; the physical interactions that determine the proper ties of proteins; the conformational properties of polypeptide chains and biomacromolecules, integral membrane proteins and ion channels; interactions between proteins and other molecules; enzyme kinetics; catalytic antibodies; and biosynthesis of small molecules.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2820 - BIOLOGICAL CHEMISTRY 2

Minimum Credits: 3
Maximum Credits: 3
This course will discuss select biological systems and problems and the chemical tools that are being developed in order to study and address them. In addition to an introduction to cell biology and molecular and cell biological techniques, topics may include: conditional control of gene editing, forward and reverse chemical genetics, sensors of cellular processes, protein bioconjugation, small molecule inhibitors of kinase function, activity-based probes, small molecule dimerizers of proteins, and targeted protein degradation. This will lead to the following expected learning outcomes: basics of cell biology, biological techniques and vocabulary relevant to the field of chemical biology, important research topics and research areas in the field of chemical biology, navigating and critical reading of chemical biology primary articles and review articles, and knowledge of key labs that are major contributors to the field of chemical biology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2830 - SYNTHETIC BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2890 - SEMINAR IN BIOLOGICAL CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2970 - TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Hands-on teaching practicum course for graduate students to learn about university-level teaching.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

CHEM 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 12
Research credits towards a MS and Ph.D. degree.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

CHEM 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 12
Research credits for the Ph.D. Degree.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHEM 3001 - PREPARATION FOR THE STEM CLASSROOM

Minimum Credits: 1
Maximum Credits: 1
PREPARATION FOR THE STEM CLASSROOM
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING

Minimum Credits: 1
Maximum Credits: 1
This course consists of a MOOC offered by Coursera, jointly developed at Boston University, Vanderbilt, Michigan State and Wisconsin-Madison, combined with in-person class meetings of the local learning community at the University of Pittsburgh. Students will meet with the facilitator for the course, Dr. Mary Besterfield-Sacre, four times during the semester to go over the material in the online sessions, and to relate it to their teaching experiences in labs, discussions, and classrooms. The course will draw on the expertise of experienced stem faculty, educational researchers, and staff from University teaching centers, many of them affiliated with the center for the integration of research, teaching and learning (CIRTL), a network of 22 research universities collaborating in the preparation of stem graduate students and post-docs as future faculty members.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Hybrid

CHEM 3100 - ADVANCED TOPICS INORGANIC CHEM 1

Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term, but all focus on some aspect of inorganic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1

Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all consider some specific aspect of organic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2

Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term but all consider some specific aspect of organic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3380 - ORGANIC GROUP MEETING

Minimum Credits: 1
Maximum Credits: 1
A weekly meeting to discuss the most recent advances in organic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3390 - SYNTHETIC ORGANIC COLLOQUIUM

Minimum Credits: 1
Maximum Credits: 1

A weekly workshop on current synthetic organic chemistry literature and state of the art research.
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad LG/SNC Basis

CHEM 3410 - ADVANCED TOPICS PHYSICAL CHEM 2

Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term but all consider some specific aspect of physical chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3460 - INTRO MODERN COMPUTATIONAL SCI

Minimum Credits: 3
Maximum Credits: 3
This course will emphasize the application of microcomputers and numerical methods for solving problems of importance in chemistry. Methods to be studied include solving systems of linear and differential equations, lEast squares fitting, eigenvalue problems, solution of nonlinear equations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3700 - SCIENTIFIC PROPOSAL WRITING

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CHEM 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 12
Directed study in a specific area of chemistry to enhance preparation for graduate research.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

Chinese

CHIN 1089 - THE WORLD OF CHINA

Minimum Credits: 3
Maximum Credits: 3
This course will survey the wax and wane of pop culture through disparate phases of social and political developments of modern china. The readings will introduce students to works of literature, art, and film to see how tradition and modernity, elite and mass cultures, East and West conflict and converge; how china absorbs, adapts as well as resists capitalistic modernity while embracing global market economy; how china grapples with urban alienation, social flux, moral laxity and other negative aspects of industrialization and urbanization. The course will make available to students a host of art images, dvd clips and e-texts to enhance and expand their perception

of modern china.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1
Maximum Credits: 6
This course recognizes work performed in the course of preparing the thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Attributes: Asian Studies

CHIN 2025 - ASPECTS OF THE CHINESE LANGAUGE

Minimum Credits: 3
Maximum Credits: 3
Aspects of the chinese language will offer a linguistic introduction to Chinese. No prior knowledge of linguistics is assumed although familiarity with linguistic analysis is a plus. The Chinese language is substantially different from English or other Indo-European languages. It is also distinct from some other East Asian languages. For instance, it has a logographic writing system and is a tonal language. Its word order is more flexible than English and is a topic-prominent language. It does not have rich grammatical inflections but has a limited number of aspectual markers. The course serves the following purposes: (1) introduce the basic facts of the Chinese language including its development, the phonology, morphology, the semantic and syntactic aspects of Mandarin Chinese, and the interactions of the language with Chinese culture and the society; (2) introduce elementary linguistic concepts relevant to Chinese to enable students to use the right tool to describe and critically analyze the features of a language; (3) encourage students to reflect on their language learning experience or knowledge of other languages to conduct reasoning, such as analyzing the sources of difficulty in their studying of Chinese; (4) to inspire interest in a range of topics including differences in modern and classical chinese, philosophical belief embodied in the language, Chinese culture manifested in the language (such as the notion of politeness, face, etc.), and to lay a foundation for further studies in linguistics as well as in those relevant topics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM

Minimum Credits: 3
Maximum Credits: 3
The course introduces students to research methods and findings on Chinese as a Second Language (CSL) and it familiarizes students with pedagogical and issues of learning in CSL. The course content includes (1) linguistic perspectives of CSL and second language learners' grammatical knowledge development, including how key structures are acquired and typically dealt with in language classroom; (2) psycholinguistic experimental methods and cognitive development of bilingual speakers of Chinese and English, including in character recognition/production, vocabulary acquisition, morphological awareness development, etc.; (3) corpus approaches in CSL and applications; (4) pragmatics in L2 Chinese; (5) other CSL topics such as learner motivation, Chinese as a heritage language, proficiency assessment, and technologies in CSL. The course will use a combination of lectures, discussions, and presentations. Class will be conducted largely in English, while enrolled students are expected to have an intermediate or above level Chinese proficiency.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM

Minimum Credits: 3
Maximum Credits: 3

CHIN 2040 - LITERARY CHINESE 1 CLASSICAL

Minimum Credits: 3
Maximum Credits: 3
This is a course in classical Chinese whose purpose is to acquaint the student with the language and syntax of classical Chinese.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2041 - LITERARY CHINESE 2 CLASSICAL

Minimum Credits: 3
Maximum Credits: 3
A continuation of Chinese 1040, this course will further develop the student's knowledge of vocabulary and syntactical patterns of classical Chinese.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2041 - LITERARY CHINESE 2 CLASSICAL

Minimum Credits: 3
Maximum Credits: 3
A continuation of Chinese 1040, this course will further develop the student's knowledge of vocabulary and syntactical patterns of classical Chinese.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2045 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Minimum Credits: 3
Maximum Credits: 3
The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge regarding the linguistic features of the Chinese writing system, including its historical development, acquire an insight into the cultural aspect of the script, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CHIN 0001 or instructor permission

CHIN 2045 - THE CHINESE WRITING SYSTEM IN EAST ASIA

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2047 - CHINESE AND WESTERN POETRY

Minimum Credits: 3
Maximum Credits: 3
A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds: china and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies, West European Studies

CHIN 2059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Film Studies

CHIN 2083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN

Minimum Credits: 3
Maximum Credits: 3
This course is devoted to the study of Chinese literature from ancient times to the end of the 19th century. Lectures and readings include prose (historical, philosophical and literary texts, legends and myths of the remote past, ancedotes, short stories and fantastic tales of ghosts and love) and poetry (from the book of songs to the poetry of the T'ang and Sung periods).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2084 - MASTERPIECES OF CHINESE LITERATURE: MODERN

Minimum Credits: 3
Maximum Credits: 3
A critical analysis of some of the most representative literary works in modern China from a literary and socio-political perspective.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

CHIN 2085 - INTRODUCTION TO EAST ASIAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

CHIN 2086 - LOVE IN CHINESE AND WESTERN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
The course will explore and compare expressions of love in Chinese and Western literature. The course will examine a succession of theories and ideas of love such as platonic, religious, courtly, romantic and post-romantic from the Western tradition; love in Confucianism, Mohism, Taoism, and Buddhism.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Gender, Sexuality & Women's Studies

CHIN 2088 - NEW CHINESE CINEMA

Minimum Credits: 3
Maximum Credits: 3
Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

CHIN 2089 - THE WORLD OF CHINA

Minimum Credits: 3
Maximum Credits: 3
Various topics are covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2090 - GREAT MINDS OF CHINA

Minimum Credits: 3
Maximum Credits: 3
First segment on Confucianism, including the Analects and Menicus, will be studied with relevant commentaries, stressing implications for chinese cultre, especially in ethical and socio-political dimensions. Second segment on Taoism, Lao Tzu and Chuang Tzu, will be studied

with emphasis on im pact on the arts and literature. Final segment on Buddhism will concentrate on representative sutras of the tradition, diamond sutra and texts from the Chan (Zen) master's.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2700 - CHINESE TRANSLATION THEORY AND PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course is intended for speakers of English who possess advanced Chinese proficiency. It is an overview of theory and practice of translation from Chinese to English, including the training on hands-on translation practices. Students will use real-life translation materials such as news articles, legal documents, commercial flyers, financial reports, and technical manuals to simulate a professional translation process. Basic techniques and strategies that are practiced commonly in the translation field will be introduced and further reinforced through lectures, and research and analysis of Chinese-English bilingual websites.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHIN 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
Tutorial for advanced graduate study.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

Civil & Environmental Engineer

CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2105 - ADV CIVIL ENGRNG MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Advanced topics in material behavior - fatigue, creep, fracture, etc. - As applied to high performance civil engineering materials; high strength low alloy steel, high strength concrete, composite materials, laminated timbers, etc., With special emphasis upon infrastructure rehabilitation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2106 - NONCONVENTIONAL ENGINEERING MATERIALS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on materials science topics relevant to the application of nonconventional materials in [civil] engineering structures, infrastructure and products. Increasingly, engineers are looking to [often locally-sourced] nonconventional materials to augment or replace resource-intensive conventional engineered materials, such as steel and concrete. This is especially true in resource-scarce regions of the planet. This course will address a broad range of nonconventional materials falling into three categories: i. advanced reinforced polymer composites (GFRP, CFRP, BFRP, pGFRP) and metals (Al and Ti); ii. traditional and vernacular materials such as earth-based materials and bamboo; iii. historic materials (and the repair and restoration thereof); Course deliverables are partially project driven, allowing students to pursue materials issues of interest to their plan or study or research. This course is open to all Engineering and Architecture students (as a technical elective).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CEE 1105 or ENGR 0022; CEE and ENGR Undergraduates must have at least 75 credit hours completed and a GPA greater than 3.2.; BS (Architecture) students may take course with permission

CEE 2201 - CONSTRUCTION COST ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course teaches the methodology for estimating construction costs. The course covers all types of costs and all types of construction. The student is introduced to standard reference materials and to computerized estimating systems. The course teaches methods and procedures for developing accurate estimates and the basis for follow-on cost control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2202 - CONSTRUCTION SCHEDULING

Minimum Credits: 3
Maximum Credits: 3
This course teaches the student the theory and practice of planning, scheduling, and controlling the time and cost of construction projects. The course covers various advanced techniques such as cost duration analysis, critical resource analysis, stochastic modeling, and cost control. The course teaches the use of contemporary computerized software systems with hands-on application.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2203 - CONSTRCT METHODS AND EQUIPMENT

Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, organize, and execute construction operations. The course includes typical operations in both building construction and engineering construction. The course describes how to properly construct in order to achieve quality and productivity objectives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the legal and risk management issues in construction. The course covers the principles of contract law and various legal areas affecting construction such as environmental regulations, insurance, bonds, tort liability, dispute resolution, and professional services.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2205 - CONSTRCT FINANCE & COST CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the company level financial and accounting systems which are used in the construction industry, and to project control systems which are used to manage cost and time. The course includes such topics as financial accounting, cost accounting, financial statements, and variance analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY

Minimum Credits: 3
Maximum Credits: 3
This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2213 - CONSTRUCTION SAFETY

Minimum Credits: 3
Maximum Credits: 3
Safety is an integral and essential element of the construction industry. This course will teach students the role all personnel play in establishing an effective safety culture in order to achieve a goal of reducing and eliminating worker injuries and illnesses. Industry standards established by OSHA and ANSI will be highlighted. Additionally, the financial impact that accidents have on a company will be taught.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2230 - BUILDING INFORMATION MODELING

Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to introduce the students to building information modeling (BIM) and other new and evolving technologies which are revolutionizing the building and horizontal infrastructure construction industry. Students will learn how BIM and other innovative technologies are being adopted currently by progressive builders to streamline the construction process through enhanced coordination, visualization, logistical planning, cost estimation and analysis. They will also learn how these new tools are enabling (and in some instances requiring) new highly integrated processes that are redefining architecture, engineering, construction and operations (AECO) business relationships and delivery contracts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
Course Attributes: MCSI - Sustainability Related

CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

Minimum Credits: 3
Maximum Credits: 3
This course provides first-year graduate students with the fundamentals regarding mathematical derivations, mechanical models and numerical analyses in elasticity, plasticity and fracture mechanics. It is aimed at laying the foundations for the students for their future study and research in advanced mechanical problems. The main topics of this course includes: 1) equilibrium and compatibility in elastic domains; 2) complex potential method for elasticity problems; 3) plasticity fundamentals; 4) linear elastic fracture mechanics; 5) stress intensity factors; 6) cohesive crack model and crack band model; 7) size effect and scaling; 8) probabilistic fracture mechanics; and 9) micromechanics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Swanson School of Engineering (PENGR)

CEE 2323 - PRACTICAL DATA SCIENCE AND MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course will introduce data science and machine learning concepts to engineering students and professionals with emphasis on practical engineering applications. Key approaches and techniques for working with applied data science and machine learning with many step-by-step engineering examples, illustrations, and exercises will be presented. The course will cover a range of machine learning methods for classification, clustering and regression including k-nearest neighbors, logistic regression, Naive Bayes, support vector machines, decision trees, neural networks, support vector machines, genetic programming, and deep learning.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2325 - INTRODUCTION TO GENERATIVE ARTIFICIAL INTELLIGENCE FOR CIVIL ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth exploration of large language models and their applications in the field of civil engineering. Large language models, such as GPT-3.5, have revolutionized various domains, and this class will equip undergraduate and graduate students

with the knowledge and skills to leverage these powerful tools for innovative solutions in civil engineering. From natural language understanding to data analysis and decision support, students will learn how to harness the potential of large language models to tackle real-world civil engineering challenges.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

Minimum Credits: 3
Maximum Credits: 3
Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2340 - DESIGN OF CONCRETE STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
A course covering the behavior, strength, and design of reinforced concrete structures using the ACI design code. Fundamental topics related to the design of reinforced concrete beams, one-way slabs, short columns, and footings are treated. Two-way slabs, reinforced walls, and strut-and-tie modeling are introduced.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2341 - DESIGN OF STEEL STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
A course on the design of steel structures based on the load and resistance factor design (LRFD) philosophy. Fundamental topics related to the design of tension members, columns, beams, beam-columns, floor systems, plate girders and steel connections are treated. Issues in stability, fracture and fatigue are also introduced.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2345 - DESIGN OF TIMBER STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
An introductory course focusing on the design of light-frame timber and 'mass' (or 'heavy') timber structures. Material characterization and properties of wood are addressed including aspects of durability and long-term performance. Fundamental topics related to design of linear (beams and columns) and planar (plates, panels and floors) structural elements are covered. More advanced topics addressed include stability and design of connections. An introduction to fire performance of building structures is included. The course will be focused toward a student-driven design project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2347 - BRIDGE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Introduce concepts of bridge engineering by providing the students with the necessary knowledge and skills to apply the AASHTO lRFD specifications for the analysis and design of highway bridge superstructure components.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2360 - DYNAMICS OF STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of free and forced vibration of one and multi degree of freedom structures, including damping. Matrix formulation of multi-degree of freedom structures. Analytical and numerical methods for determining response; deflection and stress evaluation including damping effects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2370 - NONDESTRUCTIVE EVALUATION

Minimum Credits: 3
Maximum Credits: 3
The course introduces students to the most common Nondestructive Evaluation (NDE) methods use in civil, industrial, and aerospace engineering to keep structures safe and to characterize materials properties such as strength and stress. The methods to be covered in class are (in alphabetical order): acoustic emission, eddy current, liquid penetrant testing, magnetic particle testing, microwave, thermography, and ultrasonic testing. The course will include laboratory demonstrations using YouTube videos that enable students to connect NDE methods to the current practice in the industry. Students from any engineering discipline from Swanson School are welcome to attend this class.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2371 - STRUCTURAL HEALTH MONITORING

Minimum Credits: 3
Maximum Credits: 3
The course introduces Honors students to the modern paradigm of Structural Health Monitoring (SHM) as it applies to engineering infrastructures and systems with a specific focus on bridges. SHM refers to the implementation of 24/7 nondestructive evaluation (NDE) techniques to detect damage, characterize materials, or to determine non-invasively the static and dynamic response of a given structure to external load such traffic and wind. Typical SHM systems receive and elaborate data from sensors bonded or embedded to the infrastructure or material of interest to establish whether the structure is damaged or if it operates according to design specifications. SHM is a multidisciplinary field that embraces knowledge in areas that include but are not limited to sensors fabrication, signal processing, NDE, materials science, hardware design, and soft computing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2401 - OPEN CHANNEL HYDRAULICS

Minimum Credits: 3
Maximum Credits: 3
Basic theories and principles of open channel flows (including flows in rivers and streams). Methods of calculating uniform flow, gradually varied flow, rapidly varied flow, and unsteady flow. Design of open channels.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate Engineering Students

CEE 2410 - WATER RESOURCES ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course addresses fundamental and practical issues of water resources engineering. The increasing demand for sufficient water quantity and quality that is distributed in time and space forces engineers and policy makers to develop more comprehensive, complex, and ambitious plans for environmental and water systems. This course emphasizes understanding, formulating, and approaches of solving problems of water resources engineering. Quantitative overview of the water resources development, water resources problems, impacts of climate variability and global warming on water resources, and the fundamental principles and basic tools to solve these problems will be covered. Topics to be discussed also include introduction to basic concepts of hydrology, GIS (Geographic Information Systems) applications, theory of unit hydrograph, frequency analysis, flood routing through reservoirs and rivers, introduction to rainfall-runoff analyses, and watershed modeling.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students
Course Attributes: MCSI - Sustainability Related

CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

Minimum Credits: 3
Maximum Credits: 3
This course covers a wide range of topics related to current issues and challenges related to water resources, especially those associated with climate changes. Through this course, the students are expected to gain in-depth understanding of the fundamentals as well as the up-to-date advances. Students are required to study selected research articles and participate in guided discussions. Topics covered include floods, droughts, winter storms, accurate forests of precipitation and streamflow, urban hydrology and its sustainability. Contemporary and new frontiers in modeling and data processing are also part of the curriculum.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2500 - ENVRNMNTL ENGRG MICROBIOL

Minimum Credits: 3
Maximum Credits: 3
Biological fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: MCSI - Sustainability Related

CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3

Chemical fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Basic principles and applications of thermodynamics, reaction kinetics, equilibria, diffusion, and mass transfer.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2505 - WATER TREATMENT AND DISTRIBUTION SYSTEMS DESIGN

Minimum Credits: 3
Maximum Credits: 3
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for water treatment, storage and distribution systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: MCSI - Sustainability Related

CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 2515 - WATSTEWATER COLLECTWASTEWATER COLLECTION AND TREATMENT PLANT DESIGNION AND TREATMENT PLANT DESIGN

Minimum Credits: 3
Maximum Credits: 3
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for wastewater collection and treatment systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies, MCSI - Sustainability Related

CEE 2522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
An introduction to the thermodynamic and kinetic drivers of chemical fate in the environment. Processes governing the diffusion, advection and transformation of chemicals in air, water and soil. Inter-media exchange, environmental degradation and uptake into biotic systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2531 - AIR POLLUTION AND CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course covers terminology, scientific principles, control options, regulatory requirements, permitting procedures, testing/modeling techniques and current topics associated with air pollution and control. This course requires quantitative understanding and covers design considerations associated with air pollution and control. It also covers environmental issues and requires an appreciation of the non-technical aspects of air quality management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2605 - SUSTAINABLE MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Materials are the building block of the natural and built environment. You rely on and interact with materials every day, but have you ever stopped to consider, what is a material? What does it mean to design a material more sustainably? How can you make materials more sustainable and better performing? Answers to these questions, and more, are the foundation for the course. In this course you will learn about sustainable design frameworks (e.g., Green Chemistry, Green Engineering, Cradle-to-Cradle, Biomimicry, Circular Economy) and existing examples of their successful application in markets ranging from consumer electronics, clothing, and personal care products. In addition to these case studies, we will discuss material classes relevant to civil and environmental engineering. The course will be collaborative and highly participatory. In addition, a cornerstone of the class will be a material challenge project. You will work in groups applying what you learn in the course to uncover innovative solutions to currently unsustainable material practices.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3
Maximum Credits: 3
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: MCSI - Sustainability Focused

CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: MCSI - Sustainability Focused

CEE 2612 - DESIGN AND ANALYSIS OF EXPERIMENTS

Minimum Credits: 3
Maximum Credits: 3
Principles of designing experiments, analysis of variance techniques for hypothesis testing, simultaneous confidence intervals, robust design and Taguchi methods, block designs, factorial experiments, random effects and mixed models, split plot designs, analysis of covariance, response surface design
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION

Minimum Credits: 3
Maximum Credits: 3
This course first provides an overview all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The course then focuses on energy modeling, indoor environmental quality monitoring, and post-occupancy evaluations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: MCSI - Sustainability Focused

CEE 2630 - DESIGN FOR CIRCULAR ECONOMY

Minimum Credits: 3
Maximum Credits: 3
The current linear consumption model of raw material extraction, production, use, and disposal has dominated the global economy for hundreds of years. While an extremely wasteful approach to resource management, the linear model was tractable so long as it was employed by a small fraction of the global population, namely the developed world, so that both raw material acquisition and waste management remained economically viable. Today, we clearly see that this linear model has led to serious unintended global consequences. Circular economy (CE) offers promising solutions. CE principles are based on efficient use of resources and eliminating waste from product life cycles through clever design. Valuable material either moves in loops through the economy, or, if biologically derived, returns to the ecosystem to serve as nutrients; a truly circular economy thus keeps material in continuous use by design. The goal of this course is to provide students a thorough introduction to circular economy, along with integrating design. This course will provide students with skills and knowledge related to CE. Through experiential and project-based learning, the students will develop circular economy affinity groups that will tackle a pressing challenge including design for degradation solutions for ocean plastics and design for reuse of construction materials.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2700 - TRAFFIC MGMNT AND OPERATIONS

Minimum Credits: 3
Maximum Credits: 3
Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2710 - TRAFFIC CONTROL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
A range of traffic control systems including the analysis and design of traffic signals are discussed along with traffic signal systems. Other topics covered include data collection for traffic control systems, optimization software and models; traffic signal hardware design; traffic signal systems selection (adaptive traffic signal systems versus traditional systems) and design and implementation. Pre-requisite CEE 1703 for 1710 and CEE 2700 for 2710
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

CEE 2711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES

Minimum Credits: 3
Maximum Credits: 3
This is a management-oriented course that covers key aspects of how government transportation agencies operate their transportation systems. Focus is on the strategies that are used to improve public safety and mobility, including traffic incident management, traffic management, traveler information and pricing. Emphasis is also placed on processes, including planning, performance management and systems engineering, that agencies apply in advancing programs and projects. The course concludes with a look at the future, including the effects that automated vehicles and Smart City concepts will have on the future of transportation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2713 - DIGITALIZATION IN CIVIL ENGINEERING: FROM CAD TO VIRTUAL REALITY

Minimum Credits: 3
Maximum Credits: 3
Course Description: This course will introduce students to the fundamentals of technical drawing and the modern tools utilized in drafting, modeling, and 3-D visualization for Civil Engineering applications. Topics will include technical drawing and engineering graphics, Computer-Aided Design (CAD), Building Information Modeling (BIM) and modern Virtual Reality (VR) applications in Civil Engineering. More specifically, students will: 1. Gain fundamental knowledge in technical drawing and engineering graphics. 2. Become proficient in modern drafting and modeling software tools for Civil Engineering applications. 3. Gain an understanding of the required workflows for data exchange between 3-D modeling software and immersive Virtual Reality simulations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2714 - PAVEMENT DESIGN AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Concepts and principles in the structural design of pavements for highways and airfields including: traffic loads, climatic factors, soil and material characterization. Application of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2715 - PAVEMENT MAINTENANCE AND REHAB

Minimum Credits: 3
Maximum Credits: 3
Engineering concepts and information needed to maintain and rehabilitate pavements. Project evaluation, testing and analysis. Design of rigid and flexible overlays, and other methods of rehabilitation. Selection of rehabilitation alternatives. Analysis of the effects of maintenance activities on pavement performance. Initial and life cycle cost analysis of various rehabilitation alternatives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2716 - PAVEMENT CONSTRUCTION

Minimum Credits: 3
Maximum Credits: 3
This course teaches the students the theory and practice of constructing highway and airfield pavements and associated construction management responsibilities. The students will learn how pavements are constructed, including earthwork, base and subbase construction, and the paving of the concrete and asphalt surface layers. The course also covers the impact of construction quality on long-term pavement performance and modern methods utilized for construction quality control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

Minimum Credits: 3
Maximum Credits: 3
Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2720 - URBAN TRANSPORTATION PLANNING

Minimum Credits: 3
Maximum Credits: 3
All aspects of the transportation planning process including transportation planning and decision making, transportation modeling, demand and supply analysis, transportation studies, environmental issues and project implementation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering
Course Attributes: MCSI - Sustainability Related

CEE 2725 - PUBLIC TRANSPORTATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to give seniors and graduate students a basic background in the planning, operations and development of public transportation systems within the context of the overall transportation system.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering (PENGR)

CEE 2730 - HIGHWAY ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Highway administration, classification, planning and programming. Geometric design of highways. Traffic characteristics and capacity analyses. Traffic operations and control. Highway design project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

Minimum Credits: 3
Maximum Credits: 3
Project development and implementation - 3 credits: this course provides overview of the process used in project programming and planning, design, construction and operation. The course will emphasize the process used for implementation of major projects with emphasis on construction management and how that task interfaces with other aspects of project development. Students will be involved in a team effort to conceptualize the project, plan alternatives, determine the environmental impact, examine design alternatives, prepare the project for construction documents, recommend award of the contract, manage the contract during construction and determine operational needs of the project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2800 - ENGINEERING GEOLOGY

Minimum Credits: 3
Maximum Credits: 3
Review of basic geologic principles with emphasis on the importance and influence of geology and geologic processes on engineering projects such as dam sites, foundations, tunnels, mine subsidence, landslides, highways, groundwater problems, and seismic studies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering
Course Attributes: Global Studies

CEE 2801 - ADVANCED SOIL MECHANICS

Minimum Credits: 3
Maximum Credits: 3
Mathematical and graphical operations on stress and strain, seepage analysis and flow net, consolidation theory, upper and lower bound analysis, earth pressure theory, bearing capacity, and plasticity based soil models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2802 - GEOTECHNICAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2805 - EARTHQUAKE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Earthquake hazard assessment, time domain and frequency domain analysis of multi-degrees of freedom systems, response spectrum, material nonlinearity, stochastic response and failure assessment, soil-structure interaction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2809 - HYDRAULIC FRACTURING MECHANICS

Minimum Credits: 3
Maximum Credits: 3
This class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2814 - SLOPES & EARTH RETAINING STRUCT

Minimum Credits: 3
Maximum Credits: 3
Conventional methods and recent advances in slope stability analyses; classical and modern earth pressure theories; design of rigid and flexible retaining structures; earth dams, their design and stability.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

CEE 2996 - SPEC INVSTGTN FOR M.S. STUDENTS

Minimum Credits: 1
Maximum Credits: 9
A special project course in which students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

CEE 2997 - RESEARCH, M.S.

Minimum Credits: 1
Maximum Credits: 15
Non-thesis option research project for the MS Degree under the guidance of a civil engineering faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

CEE 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 15
Scheduled discussion periods with the student's advisor. Literature survey, selection of thesis topic, development of research methods and procedures, and preparation of thesis under the guidance of a civil engineering faculty member.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CEE 3333 - ADVANCED FINITE ELEMENT METHODS

Minimum Credits: 3
Maximum Credits: 3
This second course in the finite element method focuses on the challenges and solution strategies for nonlinear boundary value problems in mechanics. Topics include nonlinear heat transfer as well as geometric and material nonlinearity in solid mechanics. In addition, an overview is presented of various transient analysis techniques (i.e. time integration) within the finite element method.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Civil & Environmental Engineer (PHD)

CEE 3414 - ADVANCED HYDROLOGY

Minimum Credits: 3
Maximum Credits: 3
Fundamental and advanced theories and processes of hydrology. Topics to cover include processes of water in the atmosphere, over land surface, and within soil; advanced representation of infiltration and evapotranspiration processes; partitions of water and energy budgets at the land surface; snow and snowmelt processes; applications of remote sensing (e.g., Satellite and radar), and flood and drought analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 3501 - ENVRNMTL ENGRG PROCESSES 1

Minimum Credits: 3
Maximum Credits: 3
Theory and applications of physical and chemical principles to water and wastewater treatment and disposal. Mixing, equalization, coagulation, sedimentation, filtration, disinfection and solids handling.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 3502 - ENVRNMTL ENGRG PROCESSES 2

Minimum Credits: 3
Maximum Credits: 3
Theory and applications of aerobic, anoxic and anaerobic biological processes in environmental quality control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering or (PREQ: CEE 1503 or CET 1141; PROG: Undergraduate School of Engineering)
Course Attributes: Global Studies

CEE 3609 - ADVANCED TOPICS IN LIFE CYCLE ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: MCSI - Sustainability Related

CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL

Minimum Credits: 3
Maximum Credits: 3
Theoretical models for analysis of pavement systems. Design and analysis of pavements through the use of transfer functions relating pavement response to pavement performance. Evaluation of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 3996 - SPECIAL INVSTGTN FOR PH.D. STDNT

Minimum Credits: 1
Maximum Credits: 6
A special project course in which advanced students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

CEE 3997 - RESEARCH, PH.D

Minimum Credits: 1
Maximum Credits: 15
Directed research and study for the preparation of the Ph.D. Dissertation proposal.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CEE 3999 - PH.D. DISSERTATION

Minimum Credits: 1
Maximum Credits: 15
Scheduled discussion periods with the student's advisor. Literature survey, selection of dissertation topic, development of research methods and procedures, and preparation of the dissertation, under the guidance of a civil engineering graduate faculty member.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Classics

CLASS 1050 - DIGITAL METHODS FOR HUMANISTIC RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Texts hide secrets from us humans that are manifestly obvious to computers: all we need to do is crack the code. This course teaches students with zero coding experience to use computers to reveal hidden insights from digitized texts. Students will learn to make those texts "speak" by transforming them into dynamic visuals and interactive websites: in this manner, Hamlet becomes a chart of gender-coded language; a history of Rome becomes a map of the empire's most frequently referenced battles; and much more. Over the course of the semester, students will apply digital methods to a research project of their own choosing. In addition to adding a valuable tool to their research repertoire, students will leave with coding and web design skills highly sought after in other career contexts.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1

Minimum Credits: 1
Maximum Credits: 1
This course represents the first half of a two-semester graduate proseminar introducing students to global issues through ancient Greek and Roman sources in translation. The course proposes that global issues are not only transnational but in fact transhistorical: that is to say, the processes of connection and disruption, inequality, precarity, and violence, associated with the uneven flows of people and power through space and over time can be found operating around the ancient world as much as in the modern. Consequently, not only can ancient texts, sources, and ideas be used to enrich our understanding of today's global issues, but methods from Global Studies can also be usefully applied to probe these same processes in antiquity. Topics may include: poverty and inequality; war, peace, and diplomacy; citizenship and xenophobia; indigeneity and nationalism; migration and mobility; center versus periphery; terrorism; imperialism; conceptions of race and ethnicity; and the organization of knowledge and circulation of information. Students are expected to complete weekly readings of ancient texts, and to prepare materials for discussions of ancient and contemporary global issues.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2020 - GLOBAL ISSUES THROUGH CLASSICS 2

Minimum Credits: 2
Maximum Credits: 2
This course is the continuation of a two-semester graduate proseminar investigating contemporary global issues through ancient Greek and Roman sources in translation. The course proposes that global issues are not only transnational but in fact transhistorical: that is to say, the processes of connection and disruption, inequality, precarity, and violence, associated with the uneven flows of people and power through space and over time can be found operating around the ancient world as much as in the modern. Consequently, not only can ancient texts, sources, and ideas be used to enrich our understanding of today's global issues, but methods from Global Studies can also be usefully applied to probe these same processes in antiquity. Topics may include: poverty and inequality; war, peace, and diplomacy; citizenship and xenophobia; indigeneity and nationalism; migration and mobility; center versus periphery; terrorism; imperialism; conceptions of race and ethnicity; and the organization of knowledge and circulation of information. Students are expected to complete weekly readings of ancient texts, to prepare materials for discussions of ancient and contemporary global issues, and to develop an independent research project or paper.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2090 - TOPICS IN CLASSICS

Minimum Credits: 3
Maximum Credits: 3
Close study of selected topics in classical studies. Course may be repeated for credit provided material covered is different.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2140 - ANCIENT POETRY AND RECEPTION

Minimum Credits: 3
Maximum Credits: 3
Students will read, in translation, a selection of Greek and Roman poets and the reception of their works across varying genres, cultures and timeframes. Particular focus will be placed on the specific literary, cultural and historical contexts, those in which the authors wrote and those in which their works were received.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLASS 2301 - ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2319 - FROM PHILO TO PHILOPONUS: AN INTRODUCTION TO THE HISTORY OF PHILOSOPHY IN LATE ANTIQUITY

Minimum Credits: 3
Maximum Credits: 3
This course is designed thematically and historically to expand the course offerings of the Departments of Classics and Philosophy. The history of philosophy in Late Antiquity is lamentably neglected by historians of ancient philosophy, even though the thinkers of this period made crucial and formative contributions to the development of Western philosophy, theology, and science. The aim of this course is to provide students with a clear sense of the cultural and social forces that shaped the doctrinal and philosophical debates and concerns of the first six centuries CE, and to familiarize them with the roots of what was to become medieval and Renaissance philosophy.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2320 - CLASSICS, PHILOSOPHY, AND ANCIENT SCIENCE GREEK AND LATIN SEMINAR 1

Minimum Credits: 3
Maximum Credits: 3
Bringing together students and faculty members, the aim of this course is to read and discuss a variety of Ancient Greek and Latin authors in their original language. The format of the course is flexible. Each participant translates a portion of text and singles out topics for discussion, whether philological, philosophical or methodological in nature. All members are encouraged to interrupt and participate as the mood strikes. We attempt to cover authors both central and at the margins of the curriculum, depending on students' interest. The course alternates weekly between Greek and Latin authors.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CLASS 2321 - CLASSICS, PHILOSOPHY, AND ANCIENT SCIENCE GREEK AND LATIN SEMINAR 2

Minimum Credits: 3
Maximum Credits: 3
Bringing together students and faculty members, the aim of this course is to read and discuss a variety of Ancient Greek and Latin authors in their original language. The format of the course is flexible. Each participant translates a portion of text and singles out topics for discussion, whether philological, philosophical or methodological in nature. All members are encouraged to interrupt and participate as the mood strikes. We attempt to cover authors both central and at the margins of the curriculum, depending on students' interest. The course alternates weekly between Greek and Latin authors.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CLASS 2390 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

CLASS 2392 - ARISTOTLE'S CONCEPT OF NATURAL SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims, methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

CLASS 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2975 - TEACHING CLASSICAL LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to methods, strategies, and best practices for teaching the languages and cultures of the ancient Mediterranean. In this course, students will build both theoretical knowledge and practical skills for the classroom, exploring different methodologies for teaching while also developing their own personal teaching philosophies. Students will create a variety of materials for use in the classroom and academic job market and develop classroom strategies to improve their effectiveness as educators.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CLASS 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Independent study on classical topics for graduate students.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

CLASS 2992 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Directed study on classical topics for students in the graduate program.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CLASS 2995 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Directed study on classics topics for students in the graduate program.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Clinical Nurse Specialist

NURCNS 2161 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

NURCNS 2352 - FAMILY THEORY/THERAPY TECHNIQUES

Minimum Credits: 2
Maximum Credits: 2
This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURCNS 2352D - FAMILY THEORY/THERAPY TECHNIQUES

Minimum Credits: 2
Maximum Credits: 2
This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURCNS 2353 - FAMILY THERAPY ROLE SEMINAR AND CLINICAL PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This clinical practicum is taken concomitantly with NURCNS 2352 and includes clinical experiences as a family therapist. Experiential seminars are held. Knowledge gained from theory course is applied and synthesized into a conceptual framework for advanced nursing practice.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURCNS 2354 - INDIVIDUAL PSYCHOTHERAPY THEORY

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2355; PROG: Graduate School of Nursing

NURCNS 2354D - INDIVIDUAL PSYCHOTHERAPY THEORY

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2355; PROG: Graduate School of Nursing
Course Attributes: Distance Education

NURCNS 2355 - INDIVIDUAL PSYCHOTHERAPY PRACTCM

Minimum Credits: 1
Maximum Credits: 1
The goal of this practicum is to provide the student with an opportunity to gain skills in the practice of individual psychotherapy with patients across the life span and in different populations. The student will be expected to provide psychotherapy to patients through the beginning, middle, and end phases of treatment, utilizing concepts learned in NURCNS 2354 individual psychotherapy theory.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2354

NURCNS 2361 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
An in-depth study in a particular area of interest by arrangement with a designated faculty member.
Academic Career: Graduate

Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

NURCNS 2850 - CNS ROLE IMPLEMENTATION

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide a framework for clinical nurse specialist (CNS) practice that is organized around the three spheres of influence (patient, nursing personnel, organization/network) that encompass consumers of CNS services. Students are introduced to unique competencies in each sphere of influence as operationalized in acute care. Emphasis will be placed on acquisition of skills needed to develop population-based programs of care; facilitate systems that promote innovative, cost-effective and comprehensive care; develop and implement evidence-based practice initiatives; and collaborate with health team members to improve health care delivery and patient outcomes. Using model cases and problems derived from their practice, students examine how leadership, consultation and collaboration skills can be used to solve problems for patients/populations, health team members, and organizations/systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

NURCNS 2851 - CNS CLINICAL PRACTICUM 1

Minimum Credits: 1
Maximum Credits: 5
This practicum is the first of two clinical practicums designed to provide experience in role development for the Clinical Nurse Specialist (CNS). Emphasis is placed on enhancing competencies within the three spheres of influence of the CNS (patient, nursing personnel, organization/network) and developing characteristics essential to CNS practice.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PREQ: NUR 2850

NURCNS 2852 - CNS CLINICAL PRACTICUM 2

Minimum Credits: 1
Maximum Credits: 4
This practicum is designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on further refinement of characteristics essential to CNS practice and competencies
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURCNS 2850

NURCNS 2853 - CLINICAL EMPHASIS SPECIALTY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with dysfunctions/alterations in the selected area of clinical specialization. The course integrates the pathophysiology of dysfunctions/alterations in the selected area with appropriate diagnostic parameters and management strategies. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2004; PROG: NURS

NURCNS 3039 - DNP-CNS ROLE PRACTICUM

Minimum Credits: 1
Maximum Credits: 10
This course is designed to provide a culminating practicum experience for the DNP clinical nurse specialist (CNS). Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies within the three spheres of influence of the cans (patient, nursing personnel, and systems) and further development of characteristics essential to CNS practice at the doctoral level.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

Clinical Rehab and Mental Health Counseling

COUN 2714 - MEDICAL, PSYCHOSOCIAL, AND ASSISTIVE TECHNOLOGY CONSIDERATIONS IN DISABILITY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to allow counseling professionals to understand, interpret, and apply medical information relevant to the counseling relationship. Students examine major chronic illnesses and disabilities to obtain a theoretical and practical understanding of the implications of these conditions on all areas of functioning and participation, including psychosocial adaptation, interpersonal relationships, sexuality, education, employment, and independent living. Course content will explore individual response to disability, including the role of families, communities, other social networks , and the role of integrated behavioral healthcare in facilitating outcomes. Technology interventions for major functional areas will be discussed and demonstrated.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2716 - MEDICAL & PSYCHOSOCIAL ASPECTS OF DISABILITY

Minimum Credits: 2
Maximum Credits: 2
This course is designed to prepare counseling professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2716 - MEDICAL & PSYCHOSOCIAL ASPECTS OF DISABILITY

Minimum Credits: 2
Maximum Credits: 2
This course is designed to prepare counseling professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2720 - FOUNDATIONS OF COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is an investigation of the historical, philosophical, legislative, and clinical dimensions, scope, and practice of counseling. Through interactive discussions and practical exercises, students will understand the roles of counselors and the various settings and systems in which they work. The course also underscores the importance of developing a counselor identity, encouraging students to reflect on personal values, strengths, and areas for growth to become effective and authentic practitioners.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2721 - CULTURAL CONSIDERATIONS IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to examine the practice of multicultural counseling, emphasizing awareness, knowledge, and skills development. Through rigorous self-examination, students will explore their own cultural identities, biases, and belief systems. Topics covered include foundational theories and models in multicultural counseling, the intersections of identity and oppression, strategies for promoting social justice and advocacy within counseling contexts, recognition and mitigation of implicit bias, effective cross-cultural communication techniques, and understanding the pervasive impact of microaggressions and generational trauma. Throughout the course, an emphasis is placed on fostering cultural humility and its importance in developing connections with clients from diverse backgrounds. Evaluation of learning outcomes will be conducted through a blend of theoretical exploration, experiential learning opportunities, and critical analysis of historical and contemporary cultural events.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2723 - ASSISTIVE TECHNOLOGY TO PROMOTE MENTAL & PHYSICAL FUNCTIONING

Minimum Credits: 2
Maximum Credits: 2
This course will address aspects of assistive technology for use at home, in education and the workplace. Topics will include legislation, computer access, ergonomics, mobility, and adaptations for visual, auditory, motor, cognitive and mental health impairments. Field trips and guest speakers will provide unique experiences and insights.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on theory and practice of career and vocational counseling. This course reviews culturally responsive models of career development theories and career counseling practices. Students learn to incorporate theory into career-specific and mental health counseling practice. Students will learn to conceptualize the interrelationships among and between work, socioeconomic standing, wellness, disability, trauma, relationships, and other life roles and factors. The course also emphasizes vocational issues including job placement, client-readiness, job development, job modification, and workplace culture and attitudes. Content includes applied practice analyzing transferable skills, functional assessments, and work-related supports for achieving and maintaining meaningful employment.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on theory and practice of career and vocational counseling. Module 1 of this course focuses on models of theories of career development and career counseling, with cultural considerations taken into account. Students learn to incorporate theory into career counseling practice. Module 2 emphasizes vocational issues including job placement, pre-placement analysis, client-readiness, job development, job modification, and employer culture and attitudes. Module 2 content includes sources of occupational data, labor market analysis, job analysis, job seeking skills, and procedures for analyzing transferable work skills. Students learn various employment alternatives including competitive employment, supported employment, self-employment, etc.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2725 - FOUNDATIONS OF COUNSELOR ROLES & RESPONSIBILITIES

Minimum Credits: 1
Maximum Credits: 1
This course provides additional instructional material regarding counselor roles and responsibilities. Various practice settings and functions of counselors, as well as organizational structures, standards, and case management, will be highlighted.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2725 - FOUNDATIONS OF COUNSELOR ROLES & RESPONSIBILITIES

Minimum Credits: 1
Maximum Credits: 1
This course provides additional instructional material regarding counselor roles and responsibilities. Various practice settings and functions of counselors, as well as organizational structures, standards, and case management, will be highlighted.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to substance abuse counseling. The expected student outcomes of the course include: develop understanding of substance use disorders; develop evidence-based addiction counseling competencies; and increase competence in providing substance abuse evaluation, education, and treatment services. Students are introduced to the theories of etiology and intervention for alcohol and substance use, abuse, and addiction. Students explore community resources proving substance use intervention.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to substance abuse counseling. The expected student outcomes of the course include: develop understanding of substance use disorders; develop evidence-based addiction counseling competencies; and increase competence in providing substance abuse evaluation, education, and treatment services. Students are introduced to the theories of etiology and intervention for alcohol and substance use, abuse, and addiction. Students explore community resources proving substance use intervention.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2730 - CULTURAL CONSIDERATIONS IN COUNSELING

Minimum Credits: 2
Maximum Credits: 2
This course is designed to increase multicultural awareness, knowledge, and skills in the competencies necessary to effectively work with and relate to ethnically and culturally diverse clients. Students will examine their own culture, attitudes, beliefs and internalized messages. Knowledge and skills in the area of multicultural counseling will be explored and practiced. Application of these skills and knowledge will be evaluated through direct observation in the community. Students will learn about a variety of topics including theories and models of multicultural counseling, intersectionality, social justice and advocacy, implicit bias, cross-cultural communication, microaggressions and generational trauma. Cultural humility will be introduced as a process to help build authentic relationships with clients of different cultural and ethnic backgrounds. The course will also expose students to historic and current cultural events.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2731 - FOUNDATIONS OF REHABILITATION & MENTAL HEALTH COUNSELING

Minimum Credits: 3
Maximum Credits: 3
The course provides an overview of the professional practice of counseling. The content includes the origins of counseling and rehabilitation, the professions associated with rehabilitation and mental health counseling through the philosophy, legislative, and clinical history of the disciplines. The goal of studying history and foundations is to gain perspective on the nature and scope of counseling practice. Students are exposed to the requisite knowledge and skills for effective practice. Students understand need for, and develop skills for professional and sociopolitical advocacy for the counseling professions and service recipients. The course also provides fundamental knowledge about psychosocial aspects of disability, including models of disability and adjustment to disability.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2732 - HUMAN DEVELOPMENT ACROSS THE LIFESPAN

Minimum Credits: 3
Maximum Credits: 3
This course explores human development across the lifespan, by reviewing theories encompassing physical, cognitive, social, cultural, and emotional dimensions. From the prenatal period through aging and death, students will engage with the intricate processes and milestones of human growth and change. Clinical approaches tailored to each developmental stage will be examined, providing insight into effective interventions and therapeutic strategies. Students will acquire an understanding of the intersectionality between human development and cultural contexts to guide their case conceptualization and treatment approaches with clients of diverse identities and lived experiences.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2733 - COUNSELING SKILLS & TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This is an experiential course where students will learn advanced counseling skills and apply them into clinical practice. The class will consist of three themes, including: (1) listening skills, building trust and rapport, and multicultural competencies; (2) development and application of counseling skills; (3) clinical documentation and progress reports. Class time will be utilized for practicing counseling techniques and styles through class activities, demonstrations, and role-plays. This course requires students to conduct, video-record, and document ongoing counseling sessions with a simulated client. Students are expected to effectively conduct 50-minute goal-directed counseling sessions with a cross-theoretical approach by the end of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2734 - COUNSELING THEORIES AND TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth overview of major counseling theories, principles, and techniques. Theories and techniques are explored with an emphasis on multicultural considerations. Emphasis is on both theory and practical applications of the various approaches. Students are encouraged to learn the theoretical principles of counseling theories and begin to integrate various theories to develop their personal understanding and approach to counseling. Instruction includes experiential learning, such as in-class role-plays.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2736 - CRISIS COUNSELING, RISK MANAGEMENT AND DISASTER PREPAREDNESS

Minimum Credits: 2
Maximum Credits: 2
The course provides guidelines and parameters for risk assessment and risk management of harm to self and/or others. Students will demonstrate proficiency in establishing risk assessment/management plans for clinical practice. Students examine research on crisis theory, resolution, and resilience. Students will learn the effects of crises, disasters, and other trauma-causing events on persons of all ages. The course examines diverse crisis situations and the assessment and treatment strategies used by counselors to assist individuals, groups, and organizations in managing and resolving crises. Students learn how people deal with crises, explore personal crisis experiences, and develop crisis intervention competency.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2737 - CLINICAL, DIAGNOSTIC AND FUNCTIONAL ASSESSMENT IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is focused on the psychometric qualities, indications for use, administration and interpretation of various assessment procedures. Procedures include interview and mental status examination, psychological and neuropsychological testing, functional assessment, vocational testing and vocational evaluation, and specialized assessments such as EMA. Professional and ethical standards and the effect of culture and disability on assessment are included. Students learn to apply assessment findings to goal setting and intervention planning through a series of case studies that require interpretation of test data in the context of a client's life (as presented in the case study). Students are required to demonstrate proficiency in written and oral reporting and communicating assessment results to professionals and clients. The course includes a lab where student teams develop, norm administer and interpret naturalistic assessment tool.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2738 - DIAGNOSIS & TREATMENT OF COGNITIVE AND MENTAL HEALTH DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on three inter-related areas: 1) using the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, Text Revision (DSM-5-TR) to classify mental health and cognitive disorders, as well as differential diagnoses, 2) conducting semi-structured diagnostic interviews, and 3) identifying the practice standards for treating mental health and cognitive disorders across delivery modalities within the continuum of care, including psychopharmacology. Students learn about the diagnosis of cognitive, behavioral, and mental health disabilities through extensive review of the current edition of the Diagnostic and Statistical Manual and case studies. Students will then apply this knowledge about diagnostic criteria to clinical interviewing, practicing diagnostic interviews with the Structured Clinical Interview for DSM-5 Disorders (SCID-5-CV). Students will also learn about first-line treatments for cognitive, behavioral, and mental health disorders according to existing practice standards and guidelines. The influence of cultural factors in diagnosis and multicultural identity treatment are integrated into all aspects of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2739 - GROUP COUNSELING

Minimum Credits: 3
Maximum Credits: 3
In this course, students will learn the basic issues and key concepts of group process. Students will learn how to apply these concepts in working with a variety of groups. The following CACREP standards are addressed in this course: a) theoretical foundations of group counseling and group work, b) dynamics associated with group process and development, c) therapeutic factors and how they contribute to group effectiveness, d) characteristics and functions of effective group leaders, e) approaches to group formation, including recruiting, screening, and selecting members, f) types of groups and other considerations that affect conducting groups in varied settings, and g) ethical and culturally relevant strategies for designing and facilitating groups. Students will research a group intervention and develop an evidence-based group proposal. Participation in an experiential group for a minimum of 10 hours is required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2740 - CLINICAL APPLICATIONS IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students with basic skills needed for 1) clinical interviewing for intake, assessment, and case conceptualization purposes, 2) application of an evidence-based counseling intervention: Cognitive Behavior Therapy (CBT), and 3) an understanding of other contemporary cognitive and behavioral interventions. Throughout the semester, students will practice counseling skills in and outside of class. Practices outside of class will be recorded for self-, peer-, and instructor-evaluation. At the end of the semester, students will conduct a full CBT session with a standardized patient (SP). Student performance will be assessed to determine competency for entry-level practice and specific detail for remediation will be provided if needed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2741 - CASE CONCEPTUALIZATION & TREATMENT PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course presents the process of synthesizing relevant client information including client history, interview, and assessment results, along with contextual information (environmental and demand information) in order to achieve accurate case conceptualization. Students learn and demonstrate proficiency in goal setting, treatment planning, case monitoring, and measurement-based care using individual, evolving client case studies. Students explore and develop a compendium of community resources.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2742 - LEGAL, ETHICAL & PROFESSIONAL ISSUES IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to legal, ethical, and professional issues pertaining to the practice of clinical mental health counseling. This course will offer an in depth focus on the relevant knowledge, awareness and skills necessary to practice safely and responsibly in counseling. Students will examine a variety of complex legal and ethical issues that confront clinical mental counselors as they work with clients and colleagues within difference counseling systems. Codes of ethics for clinical mental health counselors will be examined, as well as decision making models that will facilitate students informed decision making when faced with ethical and legal issues in the workplace. Clinical mental health counselor standards of practice will be examined.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2743 - FAMILY AND COUPLES COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course will introduce advanced graduate students to utilizing empirically supported approaches and skills-based strategies when conducting counseling with couples and families. Students will expand their clinical competencies in case conceptualization from interventions with individuals to dynamic systems, learn techniques for identifying and setting goals for treatment, rehearse introducing communication and problem-solving strategies in sessions, and demonstrate competency in conflict management, emotion regulation, and using directive approaches with clients in sessions. This course will expose students to the dynamics of contemporary family structures, living patterns and lifestyles, and the challenges experienced by counselors when working with couples and families in distress. The learning environment will be active and student-directed, relying more on students' participation in class discussions, and small group discussions, case-studies, and role-plays, and less on passive learning strategies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2744 - EVIDENCE BASED PRACTICE IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to be competent counselors that utilize evidence-based practice in their clinical practice. Students will learn to (1) understand the rationale for using evidence-based practice, (2) use guidelines for determining acceptable evidence, (3) effectively locate free access ebp articles, and (4) create program evaluation plans. At the end of the course, students are required to make evidence-based practice recommendations for clinical case studies. Students also must effectively design a program evaluation protocol for a complex counseling intervention.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: HRS PLAN: Clinical Rehab & Mental Health Counseling (CRMHC-MS) or Rehabilitation Counseling (MSRC-SP)

COUN 2746 - COUNSELING PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
Students participate in a minimum of 100 hours of counseling practicum with at least 40 hours of direct clinical service. Students receive supervision from an assigned on-site clinical supervisor and clinical supervision from a designated faculty clinical mentor. Practicum students increase their awareness and understanding of the differences in values, beliefs, and behaviors of individuals from diverse populations.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2747 - CONCEPTUALIZATION, TREATMENT PLANNING, & CASE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course reflects a paradigm for integration of assessment data, diagnoses, and models of case conceptualization to establish client goals and formulate treatment plans. The course incorporates academic training, experiential learning, and feedback from both peers and instructor in the context of individual work, group projects and simulated treatment team meetings. Students learn and demonstrate proficiency in diagnostic and clinical formulation, contextual and cultural assessment, and goal setting followed by pragmatic construction of treatment plans that incorporate components of case management and caseload management. Course materials and assignments are based on case studies that require consideration of evidence-based practice and measurement-based care. It is expected that students will enhance clinical and diagnostic assessment and problem-solving skills, teamwork, and professional clinical competencies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2748 - EVIDENCE BASED PRACTICE AND RESEARCH METHODS IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to be competent counselors who utilize evidence-based practice in their clinical practice. Students will learn to (1) understand the basic statistical and methodological concepts that underlie clinical research, (2) understanding ethical and cultural considerations in research, (3) understand the rationale for using evidence-based practice, (4) use guidelines for determining acceptable evidence, (5); (6) effectively communicate with clients regarding evidence-based practice, and (7) create program evaluation plans.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2749 - CLINICAL COUNSELING INTERNSHIP

Minimum Credits: 1
Maximum Credits: 6
Students participate in a minimum of 600 hours of counseling internship with at least 240 hours of direct clinical service. Students receive supervision from an assigned on-site clinical supervisor with requisite credentials, and clinical supervision from a faculty clinical mentor with the requisite credential and/or license. Internship students increase their awareness and understanding of the differences in values, beliefs, and behaviors of individuals from diverse populations. The internship reflects the comprehensive work experience of a mental health counselor. This course is the final preceptorship prior to the completion of the degree.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2751 - CLINICAL COUNSELING CAPSTONE EXAM

Minimum Credits: 1
Maximum Credits: 3
The clinical counseling capstone courses serve as the comprehensive examination. The courses focuses on student demonstration of knowledge and skills that reflect the competencies of the mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approachto demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. Successful completion of this comprehensive examination is needed for the student to demonstrate mastery of graduate study in mental health counseling.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2752 - SPECIAL TOPICS IN COUNSELING

Minimum Credits: 1
Maximum Credits: 1
A special topics course. Content will vary from term to term depending on instructor.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2753 - SPECIAL TOPICS IN COUNSELING 1

Minimum Credits: 1
Maximum Credits: 1
A special topics course. Content will vary from term to term depending on instructor.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2755 - CLINICAL COUNSELING MENTORSHIP

Minimum Credits: 1
Maximum Credits: 3
This course provides a structure for clinical oversight and guidance through structured student-advisor interaction over the course of the program's first year of study. The objective of the course is to facilitate the clinical application of knowledge and skills students have acquired from didactic coursework. This course involves mentoring and ongoing formal and informal evaluation to ensure that students achieve the required level of competency for clinical counseling practice.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2756 - CRISIS COUNSELING, RISK MANAGEMENT AND DISASTER PREPAREDNESS

Minimum Credits: 3
Maximum Credits: 3
Students review research on crisis theory, resolution, and resilience, and the impact of crises, disasters, and other traumatic events on persons across the lifespan. The course examines diverse crisis situations and the assessment and intervention strategies used by counselors to assist individuals, groups, and organizations in managing and resolving crises, including skill development for immediate responses to crises (Psychological First Aid) and skills for meeting needs of clients in the more extended aftermath (Skills for Psychological Recovery). Skills in prevention and response to community violence are also explored, including training in Counseling on Access to Lethal Means (CALM). Factors related to counselor resilience and burn-out assessment is also incorporated. The course reviews models for safety/risk assessment and management of harm to self and/or others; students demonstrate their competence in risk/safety assessment and in safety plan development via video recordings with simulated clients.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2760 - CLINICAL COUNSELING CAPSTONE

Minimum Credits: 0
Maximum Credits: 3
The clinical counseling capstone courses serve as the comprehensive examination. The courses focus on student demonstration of knowledge and skills that reflect the competencies of the clinical rehabilitation and mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approach. Students are providing real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. The courses are delivered over two terms with the first course (Clinical Counseling Capstone) focusing on preparation and practice. If students do not demonstrate readiness for competency evaluation, remediation will be prescribed and deficiencies resolved prior to proceeding. The second course will serve as their competency evaluation (Clinical Counseling Capstone Exam). Successful completion of this comprehensive examination is needed for the student to demonstrate mastery of graduate study in clinical rehabilitation and mental health counseling.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2760 - CLINICAL COUNSELING CAPSTONE

Minimum Credits: 0
Maximum Credits: 3
The clinical counseling capstone courses serve as the comprehensive examination. The courses focus on student demonstration of knowledge and skills that reflect the competencies of the clinical rehabilitation and mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approach. Students are providing real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. The courses are delivered over two terms with the first course (Clinical Counseling Capstone) focusing on preparation and practice. If students do not demonstrate readiness for competency evaluation, remediation will be prescribed and deficiencies resolved prior to proceeding. The second course will serve as their competency evaluation (Clinical Counseling Capstone Exam). Successful completion of this comprehensive examination is needed for the student to demonstrate mastery of graduate study in clinical rehabilitation and mental health counseling.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

COUN 2761 - CLINICAL COUNSELING CAPSTONE EXAM

Minimum Credits: 0
Maximum Credits: 0
The clinical counseling capstone courses serves as the comprehensive examination. The courses focuses on student demonstration of knowledge and skills that reflect the competencies of the clinical rehabilitation and mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approach. Students are providing real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. The courses are delivered over two terms with the first course (Clinical Counseling Capstone) focusing on preparation and practice. If students do not demonstrate readiness for competency evaluation, remediation will be prescribed and deficiencies resolved prior to proceeding. COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Minimum Credits: 0
Maximum Credits: 0
This course provides a structure for clinical oversight and guidance through structured student-advisor interaction over the course of the program's first year of study. The objective of the course is to facilitate the clinical application of knowledge and skills students have acquired from didactic coursework. This course involves mentoring and ongoing formal and informal evaluation to ensure that students achieve the required level of competency for clinical counseling practice.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Clinical Mental Health Counsel

COUN 2765 - CLINICAL COUNSELING MENTORSHIP

Minimum Credits: 0
Maximum Credits: 0

COUN 2766 - INTRODUCTION TO ASSESSMENT AND TREATMENT FOR CHILDREN AND ADOLESCENTS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on three inter-related areas: 1) using the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5TR) to classify mental health disorders in children and adolescents, as well as differential diagnoses, 2) employing a developmental perspective and a focus on the interaction of risk and protective factors in the child's multisystemic context (e.g., family, school, neighborhood), and 3) identifying evidence based interventions for treating mental health disorders in children and adolescents across delivery modalities within the continuum of care, including psychopharmacology. Readings will frequently be supplemented with audio or video clips of actual cases, and case studies for students to present and stimulate class discussions. Factors that influence the helping processes with children, including age, gender, and ethnic differences, and verbal and nonverbal behaviors, will be explored.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

COUN 2767 - TRAUMA AND GRIEF COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course introduces professional counseling students to the field of traumatic stress studies. The history of the field, prevalence of trauma exposure, and current trauma theory and practice will be reviewed. Consideration is given to responses to a variety of types of traumatic experiences including childhood trauma, race-based trauma, adult sexual assault, combat, domestic violence, homicide, witnessed violence, and others. Trauma responses will be explored in detail, as will societal, cultural, and historical influences on our understanding of the impact of trauma. Prominent treatment approaches will be presented. This course will also examine grief and loss, as well as the grieving process across the lifespan in a variety of cultural contexts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Mental Health Counsel (CMHC-MS)

Clinical Research

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
The course provides instruction on the use of computerized methods for clinical research. Dataset manipulation, descriptive statistics, and the graphical presentation of data will be presented using a standard statistical package.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2010 - CLINICAL RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3
Clinical research methods provides an overview of the basic research strategies, methods, and goals of clinical research. Topics include study design, data analysis and interpretation, and determination of appropriate methodologies to answer different research questions. Bias and confounding in observational research, the clinical value of diagnostic tests, appropriate use of cross-sectional, case control and cohort study designs, and various statistical modeling used in clinical research will be presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2011 - ADVANCED OBSERVATIONAL EPIDEMIOLOGICAL METHODS

Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce students to advanced observational study design and analysis and to provide students with tools and resources to carry out independent research using observational study design. Lectures will focus on case-control, cohort, case-cohort, nested case-control, and case-crossover design and methods. We will discuss recent manuscripts and apply statistical concepts in hands-on computer sessions to aid in the learning of concepts covered in class. The following goals are proposed to teach investigators to: 1.Critically evaluate literature using case-control, cohort, case-cohort, nested case-control and case-crossover design. 2.Understand and address concepts of study design, bias, matching, stratification, propensity score matching, and inverse probability weighting. 3.Identify methods for handling missing data, rare outcomes and count data. 4.Understand modern techniques for addressing confounding, mediation, and effect modification. 5.Conduct and interpret results from appropriate statistics using Stata.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2021, CLRES 2022, CLRES 2023

CLRES 2020 - BIOSTATISTICS

Minimum Credits: 4
Maximum Credits: 4
This course focuses on basic concepts and statistical methods and their application to problems in the health and biomedical sciences. Topics include data description and summarization, basic probability theory, estimation, and hypothesis testing with emphasis on one- and two-sample comparisons involving continuous and categorical data. Linear regression and analysis of variance will be introduced. Students will develop their analytic skills through the analysis and discussion of large clinical studies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2005; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2021 - REGRESSION AND ANOVA

Minimum Credits: 1
Maximum Credits: 1
The course is designed for medical researchers who are not biostatistics majors. Topics covered include multiple linear regression, regression diagnostics, ANOVA, analysis of covariance, confounding, mediation, moderation, and model selection. At the completion of the course, trainees should be able to understand the appropriate uses of ANOVA and linear regression, to assess their appropriateness and

adequacy, to analyze simple datasets taken from the fields of medicine and public health, and to summarize results from regression models via written communication.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2005 and 2020; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2022 - LOGISTIC REGRESSION

Minimum Credits: 1
Maximum Credits: 1
This introductory course in logistic regression modeling is intended for physicians in fellowship training programs and other researchers with a limited background in statistics. The course focuses on regression methods for binary data and on the basics of maximum likelihood inference. At the completion of the course, trainees should be able to understand how logistic regression can be used to address a variety of epidemiologic and clinical questions; to interpret models and assess their appropriateness and adequacy; to develop analytic skills through the analysis of datasets taken from the fields of medicine and public health; and to develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2005 and 2020 and 2021; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2023 - SURVIVAL ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
This is an introductory course in regression modeling of time-to-event data. It is intended for physicians in fellowship training programs and other researchers with a limited background in statistics. The course focuses on descriptive methods for survival data, survival analysis, and issues pertaining to time-dependent covariates. At the completion of the course, trainees should be able to recognize when it is necessary to account for time in the analysis of yes/no outcomes and appropriately summarize time-to-event data; be able to interpret the survival analysis model and assess the appropriateness and adequacy of the model; be familiar with issues in the design, analysis, and interpretation of studies involving time-dependent covariates; be able to apply analytic skills to the analysis of datasets taken from the fields of medicine and public health; and be able to develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: (CLRES 2005 and 2020 and 2021 and 2022) or (MEDEDU 2005 and 2020 and CLRES 2021 and 2022); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2026 - ANALYSIS OF CORRELATED DATA

Minimum Credits: 1
Maximum Credits: 1
CLRES 2026 will provide information on statistical methods for analyzing data arising from multilevel or longitudinal studies. The first half of the course lectures will focus on models for continuous data, including mixed effects models, fixed effects models, and generalized estimating equations. The second half of lectures will extend to analysis in the generalized linear model setting (binary outcomes, count data, etc.) We will show students how to investigate data graphically and descriptively before beginning statistical modeling and will introduce students to topics on missing data, group trajectory modeling, and sample size estimation. We will use homework assignments and articles from multilevel and longitudinal studies to facilitate learning of concepts discussed in class.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: CLRES 2005 and CLRES 2020 and 2021 and 2022; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2035 - FUNDAMENTALS OF MACHINE LEARNING IN CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
In this introductory-level course we will cover the main concepts of statistical machine learning, including the theoretical aspect of generalization properties where a model is applied to unseen data, and the practical aspect of applying state-of-the-art models to static and dynamic problems in classification, regression or density estimation. Examples of real-life applications in health and biomedical sciences will be used to illustrate the interest in statistical machine learning. The course does not require advanced knowledge in mathematics or programming. All computations will be done in Stata. The lectures will focus on the essential elements of modern data analysis methods with minimum use of mathematical formulars. Real-life applications will be used to illustrate the interest of causal inference in clinical research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2021 and CLRES 2022

Grade Component: Grad LG/SNC Basis

CLRES 2036 - INTRODUCTION TO CAUSAL INFERENCE

Minimum Credits: 1
Maximum Credits: 1
The course will present an introduction to the concepts and framework in causal inference. In the lectures, causal models will be depicted using directed acyclic graphs (DAG) and defined with nonparametric structural equation models (NPSEM) while target causal parameters will be defined using counterfactuals, principle stratification, and marginal structural models. We will also introduce propensity score modeling, g-computation estimators, and inverse probability weighted estimators. Students will gain practical experience implementing these estimators and learn how to interpret results through in-class discussions and Stata assignments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2036 - INTRODUCTION TO CAUSAL INFERENCE

Minimum Credits: 1
Maximum Credits: 1
The course will present an introduction to the concepts and framework in causal inference. CLRES 2037 - PRACTICAL MACHINE LEARNING: APPLICATIONS IN CLINICAL RESEARCH USING STATISTICAL PACKAGES

Minimum Credits: 1
Maximum Credits: 1
The aim of this course is to provide hands-on experience using statistical machine learning concepts and software to analyze real datasets. It is intended to be a partner course to CLRES 2035: Fundamentals of Machine Learning in Clinical Research, in order to provide an opportunity to further develop the skills and concepts explored there. We will first cover the basics of opening and exploring datasets in R and RStudio (both freeware). Then we will have one class dedicated to each of the topics covered in CLRES 2035. Students will either bring their own computers to class. The instructors will provide a set of instructions for the students to follow, usually involving R code, and the students and instructors will work through this code and discuss together. This includes actually running the code on students' designated machines, discussing the code's components, reviewing the output together, and interpretation. The course does not require advanced knowledge in mathematics or computer programming. All required concepts involving the execution of statistical software code will be learned as part of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2038

CLRES 2038 - R PROGRAMMING ESSENTIALS FOR DATA SCIENCE

Minimum Credits: 1
Maximum Credits: 1
This introductory course aims to provide students with a solid foundation in using R for data analysis and visualization in the context of data science. Students will gain hands-on experience with R programming, data manipulation, exploratory data analysis, and basic statistical techniques. The course will consist of a combination of lectures, interactive coding sessions, and practical exercises to ensure that students can apply their knowledge effectively. The focus will not be theoretical underpinnings of the analytical methods, but rather how to use R as a programming tool. No prior R programming experience is required, but experience in using other statistical packages may be helpful.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
The course focuses on properties of good measurement that are integral to the research process. Specific objectives are to analyze methods for testing psychometric properties (reliability and validity) of psychological instruments and physiological instruments; to evaluate the adequacy of selected scaling methodologies used in research; to apply knowledge of instrumentation to the description of a psychosocial instrument and a physiological instrument for a research proposal; and to synthesize course content with statistical criteria for scale evaluation and make decisions regarding scale revision. The domain sampling model is presented as the major theory of measurement error, with the parallel test model presented as a special case of the domain sampling model. The construct, criterion, and content validity of psychosocial instruments are explored, and methods for evaluating each of these relative to specific instruments are presented. A variety of scaling methodologies, as well as the principles involved in the design and formatting of questionnaires, will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2045 - SURVEY DESIGN AND DATA ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
Survey design and data analysis will provide information on the skills and resources needed to design and conduct survey and techniques of analyzing survey data. The skills include identifying and developing specific survey objectives, designing survey studies, sampling respondents, developing reliable and valid self-administered questionnaires, and administering surveys. The techniques of analyzing survey data include both classic methods such as factor analysis and advanced methods such as item response theory. A majority of lectures will focus on survey research, constructing surveys, response set, survey administration methods, questionnaire construction and programming surveys, sampling and power calculation, maximizing response rates, data coding and entry, reliability and validity, survey data analysis, factor analysis and item response theory. The students will be introduced to the internet based survey and the computerized adaptive testing to broaden their scope of the current survey design and collection. I will use manuscripts of survey data and protocols of completed studies to facilitate learning of concepts discussed in class.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2040 or MEDEDU 2040; PLAN: Medical Education (ACM or MS) or Clinical Research (ACM or MS) or Clinical and Translational Sci (PHD)

CLRES 2048 - DATA VISUALIZATION AND COMMUNICATION

Minimum Credits: 1
Maximum Credits: 1
This course equips students with the skills to interpret, evaluate, and create effective data visualizations. By the end of this course, students will be able to clearly and accurately explain the key takeaways from graphs they did not create, while understanding the scope of conclusions that can be drawn from visual analyses. They will develop the ability to objectively and professionally critique visualizations, assess the strengths and weaknesses of design choices, and assess the integrity of a graph to the underlying data. Students will also learn to communicate key insights from their own statistical graphics through writing and presentations tailored to research audiences. They will practice incorporating appropriate statistical language and integrating statistical tests into graphics. In addition, the course emphasizes the creation of readable, accurate, and effective data visualizations using R software. Students will distinguish between data types, select appropriate graph formats and color schemes, label visuals clearly, and apply best practices to create publication-quality graphics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Minimum Credits: 1
Maximum Credits: 1
It's far too easy to relegate egregious ethical violations to the past. We reassure ourselves these could never happen now. After all, we have IRBs and rules and regulations we have to follow when conducting research on human subjects and animals. IRBs, and those rules and regulations, like the Belmont Report and the Declaration of Helsinki, are important, helpful, and a good start, but researchers need more. Many of the problems researchers will face during their careers will not be black and white, and it's really important to learn to navigate through the shades of gray. In this fully online, asynchronous course, we will read important foundational texts and a work of fiction, and we'll engage with case studies. You'll interact with fellow course participants on discussion boards, and submit written answers to questions taken from the readings. This course presents an in-depth examination of ethical issues in the conduct of clinical research. Topics include issues related to privacy, confidentiality, protection of human and animal subjects, informed consent and the role of the IRB in ensuring the responsible conduct of research. NOTE: This course meets the NIH Responsible Conduct of Research requirement for 8 hours of Responsible Conduct of Research (RCR) training.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2071 - ADVANCED GRANT WRITING PART 1

Minimum Credits: 3
Maximum Credits: 3
The purpose of the integrated methods course is to build on the skills learned in the methodological core and provide a hands-on research experience. Trainees will learn the phases of the research process from conception to design and, ultimately, to implementation of the research. Through a combination of group sessions and independent work, trainees will use a research topic of their choice to develop their own research proposal in the form of an NIH grant application. The application will include sections on specific aims, background and significance, previous work, and methods. In addition, trainees will review and critique the work of their peers. Mentor must be identified prior to enrollment.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2005, 2010, 2020 and 2040; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2072 - ADVANCED GRANT WRITING PART 2

Minimum Credits: 1
Maximum Credits: 1
The purpose of the integrated methods course is to build on the skills learned in the methodological core and provide a hands-on research experience. Trainees will learn the phases of the research process from conception to design and, ultimately, to implementation of the research. Through a combination of group sessions and independent work, trainees will use a research topic of their choice to develop their own research proposal in the form of an NIH grant application. The application will include sections on specific aims, background and significance, previous work, and methods. In addition, trainees will review and critique the work of their peers. Course Requirements: CREQ: (CLRES 2005 and 2010 and 2020 and 2040 and 2071) or (MEDEDU 2005 and 2010 and 2020 and CLRES 2040 and 2071); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2075 - SEMINAR FOR UNDERSTANDING PRINCIPLES AND PRACTICES OF RESEARCH TECHNIQUES (SUPPORT)

Minimum Credits: 0
Maximum Credits: 0
The SUPPORT Seminar is a mandatory twice-monthly series for medical students in the Clinical Scientist Training Program. The purpose of SUPPORT is to provide a forum for medical students to learn about careers in clinical investigation, to present their research in oral and written form, to explore case studies in the responsible conduct of research and the ethics and regulation of human subjects research, and to consecutively peer review colleagues' research products.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2076 - INTRODUCTION TO GRANT WRITING

Minimum Credits: 1
Maximum Credits: 1
Obtaining peer-reviewed grant support is one of the most critical determinants to academic and career success, yet the process is highly challenging. Through select readings and podcasts, the writing of a draft grant application to request funds from one of the many seed programs available to Pitt students and faculty, and class discussions led by a long-time NIH-funded clinical investigator, Introduction to

Grant Writing CLRES 2076 will provide CEED trainees, clinical fellows, post-doctoral students, and junior faculty without any prior grant writing experience with useful knowledge, insights, and skills in the grant writing process to improve their chances of later funding and subsequent career success. Please note that this course is NOT INTENDED for Master's Degree students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Medical Education (ACM or MS) or Clinical Research (ACM or MS) or Clinical and Translational Sci or Graduate Career Development (GCD-ND)

CLRES 2077 - STRATEGIC LEADERSHIP IN ACADEMIC MEDICINE

Minimum Credits: 1
Maximum Credits: 1
Health care professionals regularly occupy leadership roles in research, educational, and clinical arenas, and leadership opportunities abound in academic settings. Yet clinicians have been described as "accidental administrators," lacking training in skills necessary to be an effective to leader. Given the current challenges facing healthcare, increasing reliance on interdisciplinary teams to provide care, and greater emphasis on cost control and quality improvement, the need for clinicians to develop effective leadership skills is paramount. This course is designed for clinician-educators and researchers who want to understand the basics of leadership and management. Through selected readings, this course will develop participants' leadership skills across a variety of domains. Topics covered include understanding how academic medical centers function and how to set team culture, run a meeting, manage time, lead across difference, and create/maintain a five year plan. At the completion of the course, trainees will understanding of the basic principles of leadership and management in the context of academic medicine. *Please note in previous terms, this course was titled "Managing Your Career in Clinical & Translational Science" and "Strategic Leadership".
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2080 - MASTERS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 6
Trainees may register for this course with approval from the mentor and selected faculty of the Degree Granting Programs in Clinical Research Curriculum Committee. The course is designed for trainees who are prepared to undertake their thesis or substantive research project.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2085 - DIRECTED RESEARCH/INDEPENDENT STUDY IN CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 3
For Master of Science and Doctoral Certificate in Clinical and Translational Science students. An independent study project is designed by the student to pursue an area of study within clinical research that is not covered by the established curriculum. It cannot be used to replace required or core courses. The project is designed by the student and requires that an Institute for Clinical Research Education (ICRE) faculty member supervise the project. The student will complete the directed research independent study form, and the faculty preceptor and Director of Academic Programs must approve it. An independent study project may carry 1-3 graduate semester credits, assigned at the faculty member's discretion based on the project proposed. Doctoral CTS students may only register for a maximum of 2 credits.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2086 - CLINICAL RESEARCH TEACHING PRACTICUM

Minimum Credits: 0
Maximum Credits: 3
The objective of this teaching practicum is to provide students the opportunity to design and/or implement a curriculum. This practicum involves curriculum development and implementation (i.e instruction). Each year the course directors will assess whether substantive curriculum development/refinement is necessary prior to instruction.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2106 - ASKING AND ANSWERING QUESTIONS USING HEALTH CARE DATA

Minimum Credits: 1
Maximum Credits: 1
This course will allow students to explore the use of different data sources for clinical and health services research. Students will gain an understanding of different data sources, ranging from patient registries to large administrative datasets, and will compare the strengths and weaknesses of each type of data in answering different research questions. We will discuss the use of data with both identifiable and de-identified data, including related ethical issues. We will review at a broad level different considerations when analyzing diverse datasets. We will use case studies to facilitate the learning of concepts discussed in class. *Please note in previous terms, this course was titled "Patient Registries and Electronic Health Records in CER."
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR

Minimum Credits: 2
Maximum Credits: 2
This course will define Comparative Effectiveness Research (CER) and Patient-centered Outcomes Research (PCOR) and highlight the history and current national efforts in promoting CER/PCOR for drugs, devices and other interventions. The curriculum will include topics on the conceptualization, outcome measurements, engagement of patients and stakeholders, study designs, and analysis methods used in CER/PCOR studies. The course is project based and students learn how to define their own CER/PCOR research question and design a research project to answer the question.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2108 - PATIENT REGISTRIES & ELECTRONIC HEALTH RECORDS IN CER

Minimum Credits: 1
Maximum Credits: 1
This course explores the role of research registries that include electronic health record data in comparative effectiveness research. Students will gain an understanding of different registry models, including establishing a registry, evaluating a registry, using registry data and the strengths and weaknesses of different registry models. We will discuss the use of registries with both identifiable and de-identified data. Ethical issues surrounding the use of these data sources for research will be discussed. We will use case studies to facilitate the learning of concepts discussed in class.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2120 - COST EFFCTVNS ANAL HLTH CARE

Minimum Credits: 1
Maximum Credits: 1
CLRES 2120 provides an introduction to the methods used in the economic analysis of health care programs. The course will discuss economic principles that serve as the foundation of cost-effectiveness analysis, will describe the various ratios and methodologies used in cost-effectiveness studies, will highlight the current controversies in cost-benefit analysis, and will explore issues regarding the appropriate use of cost-effectiveness in making medical decisions concerning patients and populations. Additional topics include concepts of perspective, utility analysis, discounting, and the definition of various costs and benefits.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2121 - CLINICAL DECISION ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to the use of decision sciences in health care. In addition to developing a conceptual understanding of medical decision-making, the course will develop technical skills in decision analysis including the creation/evaluation of decision trees, the use of sensitivity analysis, and the incorporation of specific patient preferences through the use of utility analysis. The advantages and disadvantages of formal mathematical models for the analysis of clinical conditions will be presented. Examples from current medical literature will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2122 - COMPUTER METHODS IN DECISION AND COST-EFFECTIVENESS ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
This course expands upon topics introduced in CLRES 2120 (cost effectiveness analysis) and CLRES 2121 (clinical decision analysis) and provides additional guidelines for using decision sciences in larger, more complex applications. Topics include modeling clinical processes and systems; discrete event simulation; advanced sensitivity analysis and confidence limits; controversies surrounding the use of cost-effectiveness analyses; and multi-attribute utility theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2120 and 2121; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2123 - ADVANCED TOPICS IN DECISION AND COST-EFFECTIVE ANALYSIS IN HEALTHCARE

Minimum Credits: 3
Maximum Credits: 3

This is an intermediate/advanced level course on using simulation models in health decision sciences and cost-effectiveness analyses. Decision and cost-effectiveness analyses have been used widely in healthcare to address important policy questions, such as cancer screening recommendations and efficient organ allocations among transplant patients. The emphasis of this course is on applications and methods that are particularly applicable to issues of medical decision making and public health. Students will learn how to choose a model that best fits their applications. They will learn how to construct, parameterize, and analyze complex decision models. In addition, the student will be introduced to state-of-the art methods in uncertainty analysis, value-of-information analysis, and calibration. Although advanced topics will be discussed, the focus will not be on programming and mathematical notations will be kept to a minimum. Proficiency with programming and linear algebra are helpful, but not required. Class sessions will be a combination of lecture format, case discussion, and computer labs with expectations of class participation. It is expected that all students will keep up with the required readings and homework assignments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2124 - DIRECTED STUDY IN DECISION ANALYSIS AND COST EFFECTIVENESS ANALYSIS

Minimum Credits: 1
Maximum Credits: 3
There are no formal class meetings. Each student will meet independently with their chosen faculty members; develop a timeline and schedule of meetings and milestones for various components of the particular project, or topic review. It is expected that the trainee and faculty member will meet every one-two weeks during the duration of the course.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2120, 2121, and 2122; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2140 - BEST PRACTICE OF CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
CLRES 2140 covers the basic operations of conducting a health services research project, from developing realistic timelines and schedules to building tracking databases, training interviewers and data collectors, monitoring data collection and budgets, reporting, and closing out a study.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2141 - SCIENTIFIC WRITING AND PRESENTATION SKILLS (ONLINE)

Minimum Credits: 1
Maximum Credits: 1
Medical educators and researchers must be able to present their work clearly and effectively. However, important educational material and research data are sometimes obscured by poorly delivered presentations or poorly written manuscripts. The main objective of this fully online, asynchronous course is to help students develop excellent scientific writing and presentation skills. This objective will be achieved through a combination of videos, readings, individual assignments, and team projects in which students will practice specific skills. Students will craft an abstract, write a discussion section of a manuscript, practice methods of disseminating their science to the lay public, create a poster, construct a table or figure, and develop a PowerPoint presentation and record themselves delivering a 10-minute talk.
*Please note in previous terms, this course was titled "Medical Writing and Presentation Skills."
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2155 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3
Maximum Credits: 3
A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2156 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by fad and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2155

CLRES 2170 - MAKING THE MOST OF MENTORING

Minimum Credits: 1
Maximum Credits: 1
We strongly believe that effective mentoring is the cornerstone of a successful academic career, whether it be in education, research, or clinical work. Good mentors are able to guide mentees as they attempt to navigate through the course of their careers. This course is designed to provide a basis for understanding the mentor-mentee relationship and to provide strategies for making the most out of the experience. Topics will include communication and negotiation, the use of mentoring contracts, providing and accepting feedback, evaluating the mentoring relationship, and solving problems and meeting challenges. Fellows, postdocs, other Institute for Clinical Research Education (ICRE) trainees, and junior faculty will discover useful ways to enhance the mentoring relationship and make it a rewarding experience both for the mentees and the mentors.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2200 - INTRODUCTION TO RESEARCH DISPARITIES ON HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
This course will provide knowledge and skills to understand and apply the basic principles of healthcare disparities research. Students will be introduced to a variety of healthcare disparities that have been identified in the literature. They will learn about a 3-phase conceptual framework for advancing disparities research that involves detecting (phase 1), understanding (phase 2), and reducing/eliminating (phase 3) disparities. They will become familiar with methodological and conceptual issues that pertain to research designed to detect healthcare disparities, understand multi-level factors that contribute to disparities, and reduce or eliminate healthcare disparities. Students will use their knowledge and skills from the course to develop and present a research proposal focused on a healthcare disparities topic of their choice. The course will consist of didactic lectures, interactive discussions, and homework assignments to establish basic knowledge of research on disparities in health care. It will also include guest presentations by faculty with experience conducting research focused on disparities in health care.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's, MS, Not Candidate for Degree), Clinical Research (CERT-Master's, MS, Not Candidate for Degree) , Clinical and Translational Sci (PHD)

CLRES 2214 - FOUNDATIONS OF IMPLEMENTATION SCIENCE PT 1 & 2

Minimum Credits: 2
Maximum Credits: 2
This two-part course presents a survey of the field of Implementation Science with a specific focus on improving health care. In the first part, we focus on terminology, theories, and frameworks. These basic concepts will provide the building blocks for learners to apply theories and frameworks to their own intervention development and implementation work. In this portion of the course, learners will be exposed to short presentations by Implementation Science researchers on campus, to provide an appreciation of real-life applications of the theories as they learn them. This part of the course will emphasize theory, the translational research continuum, and proposal development. The 2nd part will focus on presenting a survey of the field of implementation science with a specific focus on healthcare practice and innovation. In this second course, we will expand on the content covered in Part 1 but have a greater focus on applied implementation, with lectures on specific implementation science research methods and concepts, such as organizational and systems-level change strategies, community engagement, and hybrid trial designs. An emphasis on mixed (quantitative and qualitative) methods approaches will be featured throughout the course. Guest lecturers will present relevant examples from their own work of research programs in implementation science as well as real-world examples of implementation strategies in the healthcare setting. The course also provides practical guidance on grant writing and advice on how to get implementation science grant applications funded.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2215 - FUNDAMENTALS OF IMPLEMENTATION SCIENCE FOR HEALTHCARE PRACTICE AND INNOVATION PART I

Minimum Credits: 1
Maximum Credits: 1
This two-part course presents a survey of the field of Implementation Science with a specific focus on improving health care. In the first part, we focus on terminology, theories, and frameworks. CLRES 2217 - ADVANCED TOPICS IN IMPLEMENTATION SCIENCE

Minimum Credits: 1
Maximum Credits: 1
This is the 3rd course in the Implementation Science track and requires completion of CLRES 2215 and 2216 - Foundations of Implementation Sciences: Bedsides to Health Systems Parts I and II. The purpose of this third course is to provide an interactive experience for students to learn and apply foundational theories underlying the pragmatic methods, outcomes, and strategies employed in implementation research and practice across diverse health disciplines. Specifically, the course will engage students in the fundamental

theoretical concepts, constructs, models, and frameworks essential for translating research into practice through a flipped classroom environment that emphasizes student teach-backs of course readings, interactive discussions, and group-based application of content through a case-study that will provide an opportunity for groups to assess a research-to-practice gap and develop a theory-based implementation intervention and evaluation plan based on effective individual- and organizational-change concepts. Guest lectures and brief didactic presentations by course instructors will provide real world examples of how theories are employed in medical and public health practice.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2220 - APPLYING QUALITY IMPROVEMENT METHODS IN THE CLINICAL CONTEXT

Minimum Credits: 1
Maximum Credits: 1
Over the course of eight 2hr sessions, we aim to build knowledge of basic quality improvement (QI) concepts and apply QI methods to the clinical setting, to facilitate an integration of the front-line perspective into translating research into practice. More specifically, this includes problem definition and contextual inquiry concepts and tools, including process mapping, value stream modeling, selection of measures, Pareto analysis, understanding of variability of quality measures, and design of sustainable interventions. This content will be interwoven with concepts of healthcare workplace culture, leadership, and health system science, such as Just Culture and human factors engineering, which in turn facilitate stakeholder engagement in the improvement process and lead to successful and sustainable interventions.

CLRES 2300 - INTRODUCTION TO SYSTEMIC REVIEWS AND META ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
The course is an overview of the concepts necessary for performing systematic reviews and meta-analyses, covered in sufficient detail to enable students to conduct their own reviews and analyses after completion of the course. Students will learn about the individual steps involved in conducting systematic reviews and meta-analyses, including developing a focused research question, assembling a team to perform the study, designing a study protocol, defining inclusion and exclusion criteria, identifying relevant literature databases (including Cochrane databases and Medline), developing literature search strategies, performing the literature search, creating a data abstraction form, handling data abstraction and management, and using statistical methods for meta-analysis. We will discuss important topics such as criteria for meta-analysis, exploration of heterogeneity, choice of a meta-analytic method, study quality assessment, sensitivity and subgroup analysis, evaluation of potential sources of bias, presentation of results, and application of review results. Each class will have both a didactic component and a hands-on component that allows students to immediately apply the concepts introduced during the session. Students will use concepts learned in this course to evaluate and update a published systematic review and meta-analysis.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (CLRES 2005 or MEDEDU 2005) and (CLRES 2020 or MEDEDU 2020); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2320 - CLINICAL TRIALS PRACTICUM

Minimum Credits: 2
Maximum Credits: 3
The purpose of the clinical trials practicum is for trainees (fellows and junior faculty) who are (or want to be) involved with a clinical trial to obtain course credit for their research experience. Each trainee is required to work with an experienced clinical researcher (investigator) who formally agrees to provide the trainee mentorship. The investigator must be planning a clinical trial, conducting a clinical trial, or have conducted a clinical trial. Trainees are expected to become part of the research team and learn how studies or trials are actually designed, implemented, managed, and analyzed. Trainees are expected to provide an outline of readings relevant for the practicum objectives and at the end of the practicum provide summaries of their experiences and reading materials. They may also receive credit by taking a specific question and analyzing a dataset from the trial. They can write up their findings for possible publication under the supervision of the investigators and are expected to provide a written summary of their involvement that is validated by their mentors at the end of the experience. Please see the link below for the NIH's definition of clinical trials: http://grants.nih.gov/grants/peer/tree_glossary.pdf. (Prerequisites: CLRES 2800, CLRES 2810, and CLRES 2820 or instructor permission)
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2800 and 2810 and 2820; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2400 - QUALITATIVE RESEARCH METHODS I : THEORY & DESIGN

Minimum Credits: 1
Maximum Credits: 1
What are the study designs, data collection methods, analytical approaches, and theoretical frameworks used by qualitative researchers? How should the quality and rigor of qualitative research be assessed? In this course, we will analyze a range of qualitative studies and discuss principles that should guide the selection of qualitative research strategies (e.g., sampling, data collection methods, analytical approaches, theoretical models). By the end of the course, you will be equipped to review a qualitative manuscript, respond to reviewer comments, and work effectively with qualitative methodologists. This course provides necessary background for students new to qualitative research and prepares students for Qualitative Research Methods II (CLRES 2401), which offers hands-on practice using qualitative methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2401 - QUALITATIVE RESEARCH METHODS II: APPLICATIONS

Minimum Credits: 1
Maximum Credits: 1
In this course, you will develop and hone the skills of a qualitative researcher. You will practice designing qualitative and mixed methods research studies, creating interview guides and focus group protocols, applying different data collection methodologies, developing a codebook, and conducting thematic analysis. Finally, you will write a thorough and compelling methodology section for a grant or manuscript. The focus throughout the course will be applying the tools of qualitative research and reflecting on your experience. Prerequisite: Qualitative Research Methods I: Theory and Design (or equivalent).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CLRES 2400

CLRES 2401 - QUALITATIVE RESEARCH METHODS II: APPLICATIONS

Minimum Credits: 1
Maximum Credits: 1
In this course, you will develop and hone the skills of a qualitative researcher. You will practice designing qualitative and mixed methods research studies, creating interview guides and focus group protocols, applying different data collection methodologies, developing a codebook, and conducting thematic analysis. Finally, you will write a thorough and compelling methodology section for a grant or manuscript. The focus throughout the course will be applying the tools of qualitative research and reflecting on your experience. Prerequisite: Qualitative Research Methods I: Theory and Design (or equivalent).
Academic Career: Graduate
Course Component: Lecture

CLRES 2430 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course is organized around themes central to the conceptualization and implementation of community-based participatory research and practice (CBPRP). The goal of this course is to familiarize students with community-based participatory research and practice. Students will become conversant in seminal community-based participatory research and practice literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cbpr and the associated strengths and limitations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)

CLRES 2431 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in transLating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in KT as an aspect of community-partnered research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)

CLRES 2432 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Minimum Credits: 1
Maximum Credits: 1
This course provides hand-on training in the participatory research method known as concept mapping (CM). Cm gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data

collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)

CLRES 2600 - SOCIAL NETWORKS & HEALTH

Minimum Credits: 1
Maximum Credits: 1
This course is an introduction to the theory, methods, and procedures of network analysis with emphasis on applications to health and social behavior. The goal of the course is to provide a working knowledge of concepts and methods used to describe and analyze social networks so that professionals and researchers can understand the results and implications of this body of research. The course also provides the training necessary for scholars to conduct network analysis in their own research and practice careers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2601 - PRINCIPLES AND PRACTICES OF PALLIATIVE CARE PART 1

Minimum Credits: 1
Maximum Credits: 1
The broad objectives of this course are to provide trainees with an overview of the basic and clinical sciences underlying the professional care of dying patients, and to introduce them to the primary reference sources in the field of palliative medicine. The course will be taught in a small-group, discussion format, with faculty drawn from content-experts throughout the medical center. Discussions will combine analysis of the evidence base for a wide range of palliative care interventions with clinical case discussions. Cases will be drawn from the literature, faculty experience, and current clinical activities of the trainees themselves.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2602 - PRINCIPLES AND PRACTICES OF PALLIATIVE CARE PART 2

Minimum Credits: 1
Maximum Credits: 1
The broad objectives of this course are to provide trainees with an overview of the basic and clinical sciences underlying the professional care of dying patients, and to introduce them to the primary reference sources in the field of palliative medicine. The course will be taught in a small-group, discussion format, with faculty drawn from content-experts throughout the medical center. Discussions will combine analysis of the evidence base for a wide range of palliative care interventions with clinical case discussions. CLRES 2605 - COMPUTER METHODS FOR SOCIAL NETWORKS

Minimum Credits: 1
Maximum Credits: 1
This course provides hands-on training in social network analysis using 3 different software packages: UCINet, R, and Gephi. It is intended

for those students who are interested in conducting their own social network studies using the latest available software. It is a time-intensive lab and project course. Topics to be covered include: -How to use UCINet to conduct intermediate and advanced SNA -How to use R to use custom SNA packages -How to use Gephi to conduct basic SNA and generate descriptive network graphs This course consists of in-class examples using SNA software, designing a network analysis plan in consideration of software features, and a final project. Assignments are designed to build components of a full network study, using specific analytic features from available software, visualizing network(s), and culminating in the final project. Individual projects will use data that can be provided or is collected by the student themselves.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2610 - RESEARCH METHODS IN PALLATIVE CARE

Minimum Credits: 1
Maximum Credits: 1
This special methods course will provide the critical bridge between the more general research skills and the particular challenges of doing patient-oriented research in palliative care. It consists of the following components: discussion of the use of specific research methods and their strengths and limitations in palliative care and review OIF landmark research articles in palliative care and a critical appraisal of the methodologies. The course is taught in a graduate seminar fashion with an emphasis on discussion and critical analysis. Sessions are often co-moderated by a palliative care physician and a researcher with the particular methodological expertise under discussion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2700 - FUNDAMENTALS OF BENCH RESEARCH

Minimum Credits: 2
Maximum Credits: 2
The course is designed to teach fellows in training and future clinician scientists the core principles of scientific investigation. The course is organized such that fellows can learn the theory behind most of the common research approaches as well as new and innovative approaches of current scientific endeavors. In addition, participants acquire laboratory technical skills via a "learning by doing" approach in a two-week period.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2725 - TRANSLATIONAL RESEARCH PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The major objective of the Translational Research Practicum is to obtain individualized laboratory-based training and acquire proficiency in scientific methodology, experimental design, data presentation, and analysis tailored to achieve pre-defined goals within the scope of the student's thesis work. The Translational Research Practicum must define a translatable component originating from the laboratory training (i.e., application of laboratory-based methodologies/techniques, gain proficiency with pre-clinical studies) with the ultimate goal of addressing questions pertaining to human studies. This work is usually conducted within the research mentor's laboratory.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2729 - IDEA 2 IMPACT

Minimum Credits: 1
Maximum Credits: 1
This practical course guides academic researchers step by step through the experience of developing an entrepreneurial idea. It is designed for early-career scientists (e.g., MDs, PhDs, fellows, medical students, faculty, post docs) who are new to entrepreneurship and commercialization, but interested in translating research into practical applications. Each week, participants will focus on one discrete stage of the translational process as they identify a problem, analyze stakeholders, define a solution, describe its benefits, research the competition, articulate differentiators, and create an action plan. The course will be taught in a hybrid format, with self-paced, online modules to provide participants with key concepts and information, and class meetings where they present specific deliverables, receive feedback from colleagues, and engage in focused discussion. On the last day of class, participants will present their fully formed idea to an invited audience.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CLRES 2730 - FROM BENCHTOP TO BEDSIDE

Minimum Credits: 3
Maximum Credits: 3
This 12-week course, commonly known as B2B, is offered by the Innovation Institute, which encourages and supports innovation and entrepreneurship across campus to all faculty, staff and students. More information on B2B can be found on the Innovation Institute website. B2B is designed to give research scientists, clinicians, graduate students, and other interested parties the basic information necessary to assess the business potential of basic science research discoveries. The B2B course will help scientists develop additional focused information, including proof of concept and validation experiments, that increase the value of the technology and reduce the investment risk. B2B will also provide insight into how intellectual property and other differentiators can create a barrier to entry for the competition. The course will cover the fundamentals of investment from the private sector to help finance the climb over regulatory hurdles and meet critical developmental milestones. The course is designed to give graduate students, research scientists, faculty and clinicians the basic information necessary to assess the commercial potential of basic science discoveries.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2731 - FROM BENCHTOP TO BEDSIDE (B2B)

Minimum Credits: 2
Maximum Credits: 2
This 12-week course, commonly known as B2B, is offered by the Innovation Institute, which encourages and supports innovation and entrepreneurship across campus to all faculty, staff and students. More information on B2B can be found on the Innovation Institute website. B2B is designed to give research scientists, clinicians, graduate students, and other interested parties the basic information necessary to assess the business potential of basic science research discoveries. CLRES 2750 - SEMINAR IN HEALTH SYSTEMS LEADERSHIP

Minimum Credits: 1
Maximum Credits: 1
This course will consist of a series of cased-based examinations of specific managerial and leadership problems and decisions that have faced local health systems leaders in Western Pennsylvania. Health care reimbursement, licensing and accreditation, and measuring health care quality has become both more complicated and more important as pressures to reduce expenses and improve quality increase. Simultaneously, there has been a steady increase in the number of clinicians who have assumed managerial positions, such as medical directors of clinical units, directors of quality measurement and improvement programs, utilization review and many others, as well as the appearance of clinicians in the "C-suite" of many hospitals and health care organizations. Utilizing adjunct faculty who are currently (or very recently have been) executive leaders in health systems, this course will examine a series of collaborations, problems, conflicts and solutions that developed between health system administrators and clinical leadership in health care organizations in the Western PA area. The mechanics of the course will be a series of cases, based on an actual recent issue in health care management in which the senior adjunct faculty member was involved. Students (individually or in groups) will evaluate the case, prepare a response, and make a short presentation of their "solution" to the problem to the health system executive and clinical leader involved in that case. An interactive discussion will follow.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2800 - FUNDAMENTALS IN CLINICAL TRIALS

Minimum Credits: 1
Maximum Credits: 1
Fundamentals in clinical trials course will provide information on the first three phases (phases i-iii) of drug development and fundamental components of randomized clinical trials. A majority of lectures will focus on aspects of phase iii parallel group designs with discussions on topics including developing research questions and defining endpoints, recruitment, randomization, blinding, data management and quality, monitoring, study closeout, and presentation/interpretation of results. The student will be introduced to the good clinical practice guidelines and the principles of planning and implementing clinical research protocols including: ethical issues and regulatory imperatives designed to protect human subjects in clinical research, adverse event reporting, protocol/proposal development, and publications. We will use manuscripts on clinical trials and protocols of completed studies to facilitate learning of concepts discussed in class. It is highly recommended that you have taken ANOVA and logistic regression courses before taking this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (CLRES 2005 and CLRES 2020) or (MEDEDU 2005 and MEDEDU 2020) and CLRES 2021 and CLRES 2022; PLAN: Medical Education (ACM, MS), Clinical Research (ACM, MS), or Clinical Translational Science (PHD)

CLRES 2810 - STATISTICAL METHODS AND ISSUES IN CLINICAL TRIALS

Minimum Credits: 1
Maximum Credits: 1
The course will provide in-depth information about conducting randomization, planning sample size, analyzing clinical trials (including phase I, II, and III designs), and reporting and interpreting results of studies. We will use manuscripts on clinical trials and protocols of completed studies to facilitate learning of concepts discussed in class. We highly recommend that students take analysis of variance (ANOVA) and logistic regression courses before taking this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: [CLRES 2005 and CLRES 2020 and CLRES 2800] or [MEDEDU 2005 and MEDEDU 2020 and CLRES 2800; PLAN: Medical Education (ACM, MS), Clinical Research (ACM, MS), or Clinical Translational Science (PHD)

CLRES 2820 - SPECIAL TOPICS IN CLINICAL TRIALS

Minimum Credits: 1
Maximum Credits: 1
The special topics course will provide information on the different types of clinical trials beyond the phase III superiority parallel group design. We will use manuscripts on special types of clinical trials to facilitate learning of concepts discussed in class. We highly recommend that students take analysis of variance (ANOVA) and logistic regression courses before taking this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: [CLRES 2005 and CLRES 2020 and CLRES 2800 and CLRES 2810] or [MEDEDU 2005 and MEDEDU 2020 and CLRES 2800 and CLRES 2810]; PLAN: Med Education (ACM, MS), Clinical Research (ACM, MS), or Clin Translational Sci (PHD)

CLRES 2981 - EPIDEMIOLOGY OF AGING-METHODS

Minimum Credits: 2
Maximum Credits: 2
This course will introduce the methodological aspects of epidemiologic research in the field of aging and to critically evaluate research in older adults. The course will focus on: demography, study design, sampling, recruitment, retention, measurement of key variables and special populations. Students will write a critical review of a published article and comment on proposed future directions for epidemiologic studies addressing these questions in older populations. Throughout the course, a Problem Solving Learning Method will be applied by prompting the students to solve pragmatic issues. Examples include: How to measure a specific outcome? What type of chronic health conditions may be related to the research question? How to operationalize specific measures of interest (e.g.: how to create a composite score for co-morbidity assessment?). The course has been formulated to provide the students with the building blocks of the

epidemiological study of aging. By the end of the course, the students will be able to critically evaluate various components of a study to further address the research questions in aging populations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 3010 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Independent Study provides an opportunity for the student to pursue/research a subject in more depth and in a more independent manner than would be possible in a traditional course. Students completing an Independent Study must identify a sponsor faculty member who will closely work with the student in meeting defined learning objectives and goals
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 3020 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific project in any area of interest in clinical and translational science.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Clinical and Translational Sci

CLRES 3040 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14
Dissertation research credits towards Ph.D. in clinical and translational science.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Clinical and Translational Sci

CLRES 3780 - HUMAN FACTORS OF AGING

Minimum Credits: 3
Maximum Credits: 3
Research often leads to ideas and findings that can be developed into new medical devices or interventions. One limiting step in the development of these new ideas into action is the incorporation of the human factors components in the design. This is particularly true for devices/interventions meant to be used by older adults. This course provides an introductory understanding of how human factors is used in medical device design with a focus on older adults. The target audience for this course is broad, encompassing anyone that wants to learn how to design, test and evaluate medical devices or interventions used by older adults. This includes investigators (faculty, scientists, post-docs), engineers, and clinicians. The course will be at the graduate level, but general in scope. No pre-requisites are required. The course introduces the concept of human factors as applied to medical devices and interventions. Special emphasis will be on the specific issues associated with older adults. Characteristics of older adults relevant to usability of devices and capabilities in interventions are developed in detail, with numerous examples (successful and unsuccessful) provided. The course considers FDA approval requirements and evaluation methods for specific populations (in this case older adults). Topics relevant to design include within the course include: i. Principles of ethnography and anthropometry ii. Characteristics of older adult users considered in design (e.g. functional abilities, sensory/perception changes with age, cognition, diversity in the older population, cultural and ethnic interactions with age) iii. Ergonomics and aging (strength

changes across the body with age, mobility and dexterity in design for older adults) iv. Aging and cognitive change (e.g. Alzheimer's disease and dementia) v. Human factors design principles such as user interface design, visual displays, training and instructions, and environmental considerations. vi. Usability testing methods to improve design (task analysis, formative evaluation methods, summative methods, subject choices) vii Regulatory requirements, such as FDA and EU human factors requirements.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Comm Science and Disorders

CSD 2000 - RESEARCH & THESIS MASTER'S DEGR

Minimum Credits: 1
Maximum Credits: 6
Students may elect to become master of science candidates. A thesis is required for the MS. Degree. During the planning, execution, writing, and defense of the thesis, the student may register for thesis credits under the supervision of thesis committee chair person.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a grade C or higher.

CSD 2010 - AUDIOLOGY CLINIC 1 - MEDICAL

Minimum Credits: 1
Maximum Credits: 1
University supervised clinical practice experience in hearing screening and amplification for health care communication. Experience will be obtained within an interprofessional medical setting.
Academic Career: Graduate

Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

CSD 2011 - AUDIOLOGY CLINIC 1 - BASIC EVALUATION

Minimum Credits: 1
Maximum Credits: 1
University supervised clinical practice experience in basic audiologic battery and specialized tests. Experience will be obtained within an outpatient setting with patients experiencing auditory and non-auditory symptoms.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

CSD 2012 - AUD SCREENING AND PREVENTION PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
University supervised clinical practice experience in hearing screening and basic audiologic battery tests. Experience will be obtained from within an outpatient setting with patients experiencing auditory and non-auditory symptoms and from local preschools.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

CSD 2018 - CLINICAL SERVICE DELIVERY

Minimum Credits: 1
Maximum Credits: 1
This required course is designed to enhance the skill and knowledge base of service delivery within medical and clinical speech language pathology settings. Topics include, but are not limited to, reimbursement in medical and clinical settings, medical terminology, and team-based clinical service delivery.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2020 - AUDIOLOGICAL ASSMNT SLP STUDENTS

Minimum Credits: 1
Maximum Credits: 1
Students will learn basic audiologic assessment techniques, interpretation of test findings and investigate the impact of hearing loss on communication.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2021 - CLINICAL PROCEDURES LAB 1-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2022 - CLINICAL PROCEDURES LAB 2-2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2028 - AUTISM

Minimum Credits: 1
Maximum Credits: 1
This course focuses on evidence-based assessment and intervention strategies for individuals with autism spectrum disorder (ASD). Major emphasis will be placed on the diagnostic criteria for ASD and core communication (speech and language) and behavioral characteristics of individuals with ASD. Guidelines for the assessment and intervention of communication across the lifespan will be addressed with focus on functional assessments, meaningful intervention, and transactional supports to provide effective learning and multi-disciplinary teaming that includes the family.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD) and Course CSD 2064 must be passed with a grade C or higher.

CSD 2029 - IMPLANTABLES IN CLINICAL PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with hands on opportunities to select, fit, map/program, and assess implantable devices in a lab setting. Cases will be used to promote critical thinking related to decisions related to test selection, signal procession selection, feature selection, mapping and programming, counseling, and auditory training. Students will be able to identify appropriate candidates for implantable technology and have a basic understanding of the components of selection, fitting, and delivering these technologies in a patient-centered manner.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2029 - IMPLANTABLES IN CLINICAL PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with hands on opportunities to select, fit, map/program, and assess implantable devices in a lab setting. Students will be able to identify appropriate candidates for implantable technology and have a basic understanding of the components of selection, fitting, and delivering these technologies in a patient-centered manner.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2030 - CLINIC SKILLS SIMULATION LAB 1

Minimum Credits: 1
Maximum Credits: 1
This course provides students with a simulated environment to practice beginning clinical skills in speech-language pathology. Clinical skills simulations support students to demonstrate and integrate clinical and professional skills.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

CSD 2031 - CLINIC SKILLS SIMULATION LAB 2

Minimum Credits: 1
Maximum Credits: 1
This course provides students with a simulated environment to practice beginning clinical skills in speech-language pathology. Clinical skills simulations support students to demonstrate and integrate clinical and professional skills.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

CSD 2036 - EVALUATION AND TREATMENT OF TINNITUS AND SOUND INTOLERANCE

Minimum Credits: 1
Maximum Credits: 1
This course will provide the evidence-based standard of practice in the evaluation of tinnitus and sound intolerance conditions including hyperacusis and misophonia. Treatment approaches for these conditions will be presented in light of current research and clinical protocols will be presented to prepare students for clinical activity.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CSD 2039 - MOTOR SPEECH DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with an understanding of the nature of dysarthria and apraxia of speech. Material will include anatomy and pathophysiology, common neurologic diseases, structure and function of the speech production mechanism, instrumental assessment, diagnosis and prognosis, and development of treatment goals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a C grade or higher.

CSD 2040 - AUDIOLOGICAL ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Basic orientation to audiology for speech pathology majors. Introduction to audiological concepts and audiometry including pure-tone audiometry, speech audiometry, impedance and hearing screening.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2041 - MANAGEMENT OF HEARING LOSS

Minimum Credits: 3
Maximum Credits: 3
Audiologists and Speech-Language Pathologists provide therapeutic, consultative, and referral services for adults with hearing loss. This course provides students with the foundation and technical skills to offer these services. Specifically, the areas of hearing assistance technology, evidence based auditory rehabilitation and related legislation will be covered, in the context of patient and family centered care.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB

Minimum Credits: 1
Maximum Credits: 1
Lab for Audiological Assessment.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2043 - FUNDAMENTALS OF SPEECH-LANGUAGE PATHOLOGY FOR AUDIOLOGISTS

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide audiology students with an understanding of the nature of speech, language, cognition and swallowing disorders across the lifespan. Students will acquire a basic understanding of the diagnosis and treatment of these disorders by speech-language pathologists, and the role of audiologists in early identification and referral. Students also will develop the resources and skills necessary to more effectively evaluate and adapt their communication strategies during audiological assessment, treatment and counseling, in order to ensure the highest quality of service delivery for patients and their families.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2044 - DIFFERENTIAL DIAGNOSIS

Minimum Credits: 4
Maximum Credits: 4
Introduction to immittance audiometry, traditional special tests for diagnosing cochlear and retrocochlear site of lesion, non-organic hearing loss, and evaluation of central auditory disorders.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2045 - PHYSIOLOGICAL ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Study of auditory evoked potentials with emphasis on the auditory brainstem responses (ABR). Use of ABR in audio logic and neurologic diagnosis.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2046 - PEDIATRIC EVALUATION

Minimum Credits: 3
Maximum Credits: 3
The mission of this course is to familiarize students with factors associated with heavy loss in infants and children as well as the application of audiology diagnostic procedures with this population.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2047 - AMPLIFICATION 1

Minimum Credits: 3
Maximum Credits: 3
This course provides an initial look at hearing aid evaluation, selection, validation, and orientation. Students will discuss historic as well as current topics in hearing aid selection and validation techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2051 - CLINICAL PROCEDURES LAB 1-2

Minimum Credits: 1
Maximum Credits: 1
Laboratory experience covering clinical procedures addressed in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2052 - CLINICAL PROCEDURES LAB 2-3

Minimum Credits: 1
Maximum Credits: 1
Laboratory experience covering clinical procedures addresses in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2053 - CLINICAL PROCEDURES LAB 2-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILITATION

Minimum Credits: 3
Maximum Credits: 3
This course is for students interested in the treatment of infants and children with hearing loss. The course focuses on the speech, language, and auditory characteristics of infants and children with hearing loss, their rehabilitative needs, and the effectiveness of various types of treatment approaches.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: students with a subplan MACSLP-SP to enroll only with a C or better in CSD 2064 OR students with a subplan of MACAUD-SP WITHOUT the CSD 2064 pre-req.

CSD 2056 - AUDIOLOGY CLINIC 1

Minimum Credits: 1
Maximum Credits: 6
University supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience will be obtained within the speech and hearing clinic network of the department of communication disorders.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2057 - AUDIOLOGY CLINIC 2

Minimum Credits: 1
Maximum Credits: 6
Supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience may be obtained within the university speech and hearing clinic network or in community clinic facilities associated with the department.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Communication Science and Disorders MA, Communication Science and Disorders MS, Audiology

CSD 2059 - AUDIOLOGY PRACTICUM NETWORK - SLP

Minimum Credits: 1
Maximum Credits: 6
University supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience will be obtained within the speech and hearing clinic network of the department of communication disorders.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2060 - PROSEMINAR - MA

Minimum Credits: 0
Maximum Credits: 0
Variable content. Speakers from the communication department, other areas of the university and the general professional community present issues of concern to speech pathologists and audiologists.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2062 - INTRODUCTION TO CLINICIAN-CLIENT COMMUNICATIONS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Audiology (AUD) or Speech-Language Pathology (CSD) or SBPLAN: Audiology (Comm Science and Disorders-MA, or MS) or Speech-Language Pathology (Comm Science and Disorders-MA or MS)

CSD 2063 - DEVELOPING CLINICIAN-CLIENT COMMUNICATIONS

Minimum Credits: 1
Maximum Credits: 1
This course builds upon CSD 2062 and is designed to develop the graduate student's knowledge and skills in clinician-client communications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2064 - INTRO CLINICAL DECISION-MAKING

Minimum Credits: 3
Maximum Credits: 3
This course prepares students for their first clinical practicum, by orienting them to the principles and procedures underlying assessment, remediation and documentation activities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2065 - CLINIC PRACTICUM 1 FOUNDATIONS IN ASSESSMENT AND TREATMENT IN SPEECH LANGUAGE PATHOLOGY

Minimum Credits: 1
Maximum Credits: 4
This course provides students with the opportunity to build basic clinical skills in speech-language pathology through clinical experiences in community settings. Students learn about diagnostic and therapeutic clinical processes as they relate to persons of various ages and disorder types.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2066 - CLINIC PRACTICUM 2 SPEECH LANGUAGE PATHOLOGY IN HEALTHCARE

Minimum Credits: 1
Maximum Credits: 9
This course provides students with the opportunity to practice advanced clinical skills in speech-language pathology through clinical experiences in healthcare settings. Students develop clinical reasoning for diagnostic and therapeutic clinical processes as they relate to persons of various ages and disorder types in healthcare settings.
Academic Career: Graduate
Course Component: Practicum

Grade Component: Grad HSU Basis
Course Requirements: PREQ: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD) and Course CSD 2064 must be passed with a C grade or higher.

CSD 2067 - CLINIC PRACTICUM 2 SPEECH LANGUAGE PATHOLOGY IN EDUCATION

Minimum Credits: 1
Maximum Credits: 6
This course provides students with the opportunity to practice advanced clinical skills in speech-language pathology through clinical experiences in educational settings. Students develop clinical reasoning for diagnostic and therapeutic clinical processes as they relate to persons of various ages and disorder types in education settings.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PREQ: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD) and Course CSD 2064 must be passed with a C grade or higher.

CSD 2068 - SPEECH PRACTICUM NETWORK - AUD

Minimum Credits: 1
Maximum Credits: 3
Student clinicians assess clients presented with various communication disorders, under supervision of certified speech-language pathologists in the University speech and hearing clinic.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2069 - SLP SUMMATIVE ASSESSMENT PROJECT

Minimum Credits: 1
Maximum Credits: 1
Successful completion of this course is a fundamental component of the MA-SLP degree program. The purpose of the experience is to ensure that graduates are able to accurately review a clinical case and evaluate the relevant literature that supports their clinical decisions. This course will help you successfully fulfill the requirements by giving you the opportunity to prepare your case study and analysis, practice giving a succinct and clear oral presentation, and thoughtful and accurate responses to questions that demonstrate both your knowledge and critical thinking.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PREQ: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD) and Course CSD 2064 must be passed with a grade "C" or higher

CSD 2070 - SPEECH SOUND DISORDERS

Minimum Credits: 3
Maximum Credits: 3
Students learn the principles and procedures needed to identify, evaluate and remediate articulation and phonological disorders.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2071 - CHILD LANGUAGE DISORDERS 1

Minimum Credits: 3
Maximum Credits: 3
This course will advance students' knowledge of models of normal and impaired language development. Students will learn to evaluate the underlying bases, the merits, the limitations of, and the empirical support for various approaches to the evaluation and management of childhood language disorders.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2072 - STUTTERING

Minimum Credits: 3
Maximum Credits: 3
An introduction survey of basic information about stuttering. Course content includes theories of stuttering, diagnostic and measurement procedures, and treatment approaches for stuttering across the lifespan.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only. Course CSD 2064 must be passed with a C grade or higher.

CSD 2073 - VOICE DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course covers information regarding the nature and causes of common pathologies affecting voice, voice measurement, and treatment approaches for voice disorders. Traditional as well as non-traditional approaches are emphasized. The course uses a problem-based learning methodology, in which students are required to adopt critical thinking in solving clinical problems based on material covered in the course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a C grade or higher

CSD 2076 - DYSPHAGIA

Minimum Credits: 3
Maximum Credits: 3
Principles and practices necessary to provide counseling, evaluation and treatment to clients with alaryngeal speech and/or swallowing disorders.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2077 - AUGMENTATIVE COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Serving the needs of nonspeaking individuals by augmenting their residual communication skills or by providing alternate systems of communication is the focus of this course. Considered in the course are the history of augmentative communication, the evaluation and assessment of nonspeakers, the fitting of nonspeakers with augmentative communication devices, the training of nonspeakers who have been fitted with devices, and the team approach to meeting the needs of nonspeakers. Implementation is by lecture, discussion, and

demonstration.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a C grade or higher.

CSD 2078 - PHYSICS, PHYSIOLOGY AND PSYCHOLOGY OF SOUND

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2079 - PEDIATRIC FEEDING AND SWALLOWING

Minimum Credits: 1
Maximum Credits: 1
This course will explore development of the aerodigestive tract from the embryonic and fetal stages of gestation to full-term and childhood, with emphasis on the development of and interactions between the aerodigestive (respiratory and digestive) systems and swallowing function. Other topics include: typical neonatal and pediatric oropharyngeal swallowing and feeding function during postnatal growth and development, comparisons and contrasts between neonatal and pediatric swallowing anatomy and physiology and those of adults, the range and natural histories of medical, surgical, and developmental conditions leading to feeding and swallowing disorders in children, factors leading to delayed or disordered feeding in children, clinical and instrumental assessment of swallowing and feeding in children, and management/treatment of pediatric feeding disorders. The interdisciplinary nature of managing pediatric feeding disorders will be explored along with the role of parent/caregiver counseling/education and parental/caregiver involvement in management and treatment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2080 - CLEFT PALATE AND CRANIOFACIAL DISORDERS

Minimum Credits: 2
Maximum Credits: 2
An overview of communication problems associated with palatal clefting and interdisciplinary treatment including embryology, anatomy, classification, neonatal problems, hearing, surgery, speech, and social, mental, and emotional development.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2080 - CLEFT PALATE AND CRANIOFACIAL DISORDERS

Minimum Credits: 2
Maximum Credits: 2
An overview of communication problems associated with palatal clefting and interdisciplinary treatment including embryology, anatomy, classification, neonatal problems, hearing, surgery, speech, and social, mental, and emotional development.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2081 - RESEARCH STRATEGIES AND TACTICS

Minimum Credits: 3
Maximum Credits: 3
This course will advance students' knowledge of scientific approaches to the study of communicative processes and disorders. Students will learn a variety of strategies that guide scientific inquiry, and will examine tactics for implementing those strategies. This course will teach students skills needed to be wise consumers and potential producers of research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: students with a subplan MACSLP-SP to enroll only with a C or better in CSD 2064 OR students with a subplan of MACAUD-SP WITHOUT the CSD 2064 pre-req.

CSD 2082 - PROFESSIONAL ISSUES 1

Minimum Credits: 1
Maximum Credits: 1
Students address practical and current issues necessary for ethical and informed professional services in the field of speech-language pathology and audiology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2083 - PROFESSIONAL ISSUES 2

Minimum Credits: 1
Maximum Credits: 1
Students address practical and current professional issues, including interprofessional practice and intercultural competence, in preparation for employment and professional practice in the field of speech-language pathology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a C grade or higher.

CSD 2084 - SCIENCE OF IMPLANTABLES

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the underlying physiology and psychoacoustics that contribute to the development and implementation of electrical and bone conducted stimulation as an input to the hearing system. A historical perspective will inform current research and clinical application in this area. Students will leave this course able to compare and contrast current signal processing strategies used in implantable devices. In addition, students will be able to critically evaluate future signal processing strategies in a patient-center manner based on the the underlying knowledge provided through this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2084 - SCIENCE OF IMPLANTABLES

Minimum Credits: 2
Maximum Credits: 2

This course will focus on the underlying physiology and psychoacoustics that contribute to the development and implementation of electrical and bone conducted stimulation as an input to the hearing system. A historical perspective will inform current research and clinical application in this area. Students will leave this course able to compare and contrast current signal processing strategies used in implantable devices. In addition, students will be able to critically evaluate future signal processing strategies in a patient-center manner based on the the underlying knowledge provided through this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2085 - AUD SCREENING AND PREVENTION PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Supervised clinical practicum experience in screening and prevention in audiology and speech-language pathology.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2085 - AUD SCREENING AND PREVENTION PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Supervised clinical practicum experience in screening and prevention in audiology and speech-language pathology.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

CSD 2086 - SLP SCREENING AND PREVENTION PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
Supervised clinical practicum experience in screening and prevention in audiology and speech-language pathology.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

CSD 2086 - SLP SCREENING AND PREVENTION SKILLS LAB

Minimum Credits: 1
Maximum Credits: 1
Skills lab providing students knowledge and experiential activities related to screening and prevention in audiology and speech-language pathology.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2087 - HEARING CONSERVATION AND RESTORATION

Minimum Credits: 2
Maximum Credits: 2
Trauma to the ear from sound and ototoxic agents can be preventable. This course will focus on 1) understanding mechanisms that damage the inner ear 2) selection and implementation of hearing protection methods including physical hearing protection and pharmaceuticals, 3)

implementing national guidelines for hearing protection and overseeing medical-based ototoxic monitoring programs, 4) exploring the emerging area of hearing restoration post trauma.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CSD 2090 - CHILDREN WITH DISABILITIES: CLIN 1

Minimum Credits: 2
Maximum Credits: 2
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

CSD 2091 - CHILDREN W/DISABILITIES: CLIN 2

Minimum Credits: 2
Maximum Credits: 2
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

CSD 2092 - MATERNAL AND CHILD HEALTH LEADERSHIP 1

Minimum Credits: 2
Maximum Credits: 2
This interdisciplinary leadership course addresses specific knowledge, skills, personal characteristics, and values necessary for maternal and child health (MCH) leadership. There is a primary focus on the members of the interdisciplinary team who work with children with disabilities and their families. Skills that enhance effective teamwork to provide evidence-based, family- and patient-centered care are addressed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CSD 2093 - MATERNAL AND CHILD HEALTH LEADERSHIP 2

Minimum Credits: 2
Maximum Credits: 2
This interdisciplinary leadership course addresses specific knowledge, skills, personal characteristics, and values necessary for maternal and child health (MCH) leadership. There is a primary focus on leadership development and styles through examination of public policy, advocacy, ethics, and social determinants of health across systems of care with diverse populations.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CSD 2101 - DATA AND STATISTICAL LITERACY

Minimum Credits: 3
Maximum Credits: 3
This course is designed for health professionals who will make use of statistical methods in research projects or in interpreting literature. The course provides an overview of methods for understanding data, including visualization approaches, descriptive statistics, and statistical modeling and inference. Methods will be motivated by real-world data, and students will gain hands-on experience using the free, open-source R statistical programming environment. The course will focus on practical application and conceptual understanding of statistical approaches. The foundation achieved through this training will assist students as they conduct their own research and/or engage in evidence-based practice in their clinical careers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2102 - STATISTICAL METHODS CLINICAL RESEARCH 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-course series for students in the health professions who will make use of statistical methods in research projects or when interpreting literature. Topics covered include one and two-way analysis of variance, analysis of covariance, correlation, simple linear regression, multiple regression, and logistical regression, regression diagnostics, confounding and effect modification and model selection. Students will develop analytic skills through the use of clinical datasets where they will learn to analyze data and explain their findings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CSD 2101; PROG: SHRS

CSD 2103 - PROFESSIONAL WRITING FOR AUDIOLOGISTS

Minimum Credits: 1
Maximum Credits: 1
Audiologists are called upon to produce a variety of professional writing including, for example, clinical notes/reports, letters to professionals and funding agencies to advocate for patients, and summaries of evaluations of listening spaces. Audiologists should be competent in producing concise manuscripts suitable for publication and effective presentations for professional audiences. This course will provide guided practice in producing the myriad of professional writing expected from an Audiologist using a case-based approach.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2103 - PROFESSIONAL WRITING FOR AUDIOLOGISTS

Minimum Credits: 1
Maximum Credits: 1
Audiologists are called upon to produce a variety of professional writing including, for example, clinical notes/reports, letters to professionals and funding agencies to advocate for patients, and summaries of evaluations of listening spaces. Audiologists should be competent in producing concise manuscripts suitable for publication and effective presentations for professional audiences. This course will provide guided practice in producing the myriad of professional writing expected from an Audiologist using a case-based approach.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2110 - NEUROSCIENCE OF COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2120 - PRINCIPLES OF AUDIOLOGY FOR SPEECH-LANGUAGE PATHOLOGISTS

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide Speech-Language Pathology students with a foundation for understanding the impact of hearing loss on speech, language, cognition and swallowing. Students will develop the knowledge and skills necessary for preventing hearing loss, screening and appropriately referring for hearing loss, interpreting and providing counseling of audiologic reports, conducting listening checks and trouble-shooting hearing technology, and appropriately adapting clinical procedures and home environments for patients with hearing loss, as defined within the Scope of Practice for SLPs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and Course CSD 2064 must be passed with a grade C or higher.

CSD 2121 - AURAL REHAB ACROSS THE LIFESPAN

Minimum Credits: 3
Maximum Credits: 3
This course will provide graduate students in Speech-Language Pathology (SLP) a foundation for understanding the impact of hearing loss on speech, language, and cognition. As defined within the American Speech-Language-Hearing Association Scope of Practice for SLP, students will develop the knowledge and skills necessary to prevent hearing loss; screen and appropriately refer for hearing loss; interpret audiologic reports and provide counseling regarding hearing loss; conduct listening checks of and troubleshoot hearing instruments; adapt procedures and environments for clients who have hearing loss. They also will acquire a basic knowledge of the diagnosis and treatment of communication disorders in infants, children, and adults with hearing loss in relation to the role of the speech-language pathologist.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2130 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 1

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and Course CSD 2064 must be passed with a C grade or higher.

CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP

Minimum Credits: 2
Maximum Credits: 2
This course will provide an introduction to counseling for individuals with communication, balance and swallowing disorders and their families, consistent with the defined Scopes of Practice for Audiology and Speech-Language Pathology. Student will develop essential counseling skills, acquire knowledge of key approaches and frameworks, and learn best practices for referral and coordination of care with mental health professionals.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: students with a subplan MACSLP-SP to enroll only with a C or better in CSD 2064 OR students with a subplan of MACAUD-SP WITHOUT the CSD 2064 pre-req.

CSD 2230 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 2

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and Course CSD 2064 must be passed with a C grade or higher.

CSD 2250 - CHILD LANGUAGE DISORDERS 2

Minimum Credits: 3
Maximum Credits: 3
This course concerns advanced topics in the etiology, diagnosis, and remediation of developmental and acquired language disorders in children.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a C grade or higher.

CSD 2251 - VESTIBULAR ASSESSMENT AND REHABILATATION

Minimum Credits: 3
Maximum Credits: 3
Evaluation of the functioning of the vestibular system and its associated neural pathways. Special attention is given to differentiation of peripheral and central vestibular disorders.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2252 - ADVANCED PHYSIOLOGICAL ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Lectures and discussions on advanced topics in auditory evoked potentials including auditory brainstem response, middle latency and late evoked potentials.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE

Minimum Credits: 1
Maximum Credits: 1
AUDIOLOGY MASTERS COMPREHENSIVE

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2454 - AMPLIFICATION 2

Minimum Credits: 3
Maximum Credits: 3
This course allows for in depth discussion of topics related to hearing aid evaluation, fitting, and selection and signal processing. This course takes a seminar format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2456 - SPEECH PERCEPTION ACROSS THE LIFESPAN

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on the development and potential decline of speech perception across the life span. The relationships between speech perception and audition, vision, speech production, cognitive function, language, and literacy will be explored for typically developing and aging populations. The implications of hearing loss and auditory therapies and technologies on speech perception will be explored, as well as common clinical tests of speech perception.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2479 - SEMINAR IN SPEECH-LANGUAGE PATHOLOGY

Minimum Credits: 1
Maximum Credits: 3
Content varies across the spectrum of speech and language disorders. Each term has a special and specific focus. Students view the literature and present and discuss specific topics of interest.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Speech-Language Pathology (CSD) or SBPLAN: Speech-Language Pathology (Comm Science and Disorders-MA) or Speech-Language Pathology (Comm Science and Disorders-MS)

CSD 2500 - MEDICAL SPEECH-LANGUAGE PATHOLOGY 3

Minimum Credits: 1
Maximum Credits: 1
The course is designed to enhance the skill and knowledge base of medical speech language pathology. Topics include, but are not limited to, pathophysiology of neurogenic communication and swallowing disorders, tracheotomy management, neurological assessment and advanced applied neuroscience, pediatric feeding assessment and management, structure and function of respiratory and digestive systems, and medical ethics. Active participant learning is essential and performance is judged based on regular participation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: School of Health and Rehabilitation Sciences students only and course CSD 2064 must be passed with a grade C or higher.

CSD 2507 - PROFESSIONAL WRITING 3

Minimum Credits: 1
Maximum Credits: 1
This course will be composed of two 1-credit didactic classes on the art of succinct professional writing. The nature of "the readership" will be examined and how writing style must be modified to suit a specific audience. Assessment will be based on the production of several items including a scientific abstract for conference peer review, an administrative work such as an evidence based business plan for specific service development, and an information leaflet for careers (lay language use). Some of these may require submission to an outside body if appropriate. The third credit in this series will be a scholarly work in which the student will be mentored by a departmental faculty member on the development of a specific project. . It is a requirement that this scholarly component be submitted to an outside institution for peer review. Class waivers will be considered on an individual basis, provided the student can demonstrate writing skills consistent with the outcomes of this course.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2508 - RESEARCH AND CLINICAL FORUM

Minimum Credits: 0
Maximum Credits: 0
This component encourages residents (and clinical fellows) to attend clinical and research meetings offered by CSD/Pitt/UPMC/VA etc. to gain experience of the various aspects of clinical and research fields relevant to the discipline of communication science and disorders. (Residents and clinical fellows) will attend 4 documented events per semester from the full range of activities available throughout the University of Pittsburgh and its associated medical center's extensive network of institutional and regional clinical, research, and scientific educational offerings.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2513 - NON SLP CLINICAL ROTATIONS

Minimum Credits: 1
Maximum Credits: 7
This course provides the csc.d student with the opportunity to develop theoretical and clinical knowledge and skills through observation, discussion, and participation with other health professionals via the completion of three 10-week half-time clinical rotations. These experiences may include such disciplines as physical medicine and rehabilitation, neurology, and other related clinical services.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2514 - EDUCATIONAL SERVICE DELIVERY

Minimum Credits: 1
Maximum Credits: 1
This course is designed to enhance the skill and knowledge base of speech language pathology services provided in an educational setting. Content focuses on current educational topics and issues encountered in school-based settings that may impact professional decision-making and service delivery. Topics include, but are not limited to, educational terminology, federal and state laws and legal mandates, educational reform initiatives, designing specialized services aligned with educational curriculum and standards, service delivery models, and intervention considerations.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2520 - MENTORED CLINICAL INTERNSHIP

Minimum Credits: 1
Maximum Credits: 6
The focus of these internship assignments is to further develop, refine and enhance the CScD student's knowledge, skills and abilities as they pertain to the assessment and management of communication and swallowing disorders in the context of their weekly caseload. Mentoring will be facilitated through weekly interactions with designated faculty members.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2521 - CLINICAL EDUCATION 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2522 - CLINICAL EDUCATION 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2523 - CLINICAL EDUCATION 3

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2525 - INTEGRATED CASES 1

Minimum Credits: 1
Maximum Credits: 1
This required course will use a case-based learning format to explore cases with a variety of diagnoses and characteristics encountered across settings in the field of speech-language pathology. Cases will involve various speech, language, communication, hearing, and swallowing diagnoses across the age range. The course will focus on clinical decision making and integration of content from other courses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2526 - INTEGRATED CASES 2

Minimum Credits: 1
Maximum Credits: 1
This optional course will use a case-based learning format will be used to explore cases with a variety of diagnosis and characteristics encountered across settings in the field of speech-language pathology. Cases will involve various speech, language, communication, hearing, and swallowing diagnoses across the age range. This course will build on content from Integrated Cases 1 include integration of recently learned content in courses from Summer 1.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2572 - COMPREHENSIVE EXAMS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2600 - INTER-PROFESSIONAL ROTATION

Minimum Credits: 1
Maximum Credits: 1
This course includes a clinical rotation where students accompany physicians engaged in clinical examination, diagnosis, and treatment of otology/vestibular patients. Students meet with medical residents in otology conferences and grand rounds. This course exposes students to basic ear anatomy and surgical procedures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2601 - SUPERVISION

Minimum Credits: 1
Maximum Credits: 1
Students will explore activities associated with supervising students through readings and examples presented in class. This course provides future professionals with tools to be effective audiology supervisors. Material is presented in a manner to convince students that supervising future practitioners is a professional responsibility.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2602 - EDUCATIONAL AUDIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course takes a lifespan approach to educational audiology. Laws, working within the educational environment and with other educators, developmental needs, room acoustics, and technology will be explored in this course.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2604 - PRINCIPLES OF CLINCAL INSTRUCTION AND PEER TEACHING

Minimum Credits: 1
Maximum Credits: 1
Students will explore activities associated with supervising students through readings and examples presented in class. This course provides future professionals with tools to be effective audiology supervisors. Material is presented in a manner to convince students that supervising future practitioners is a professional responsibility.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2652 - ADVANCED CLINICAL SEMINAR 3-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2654 - PRACTICE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Students will investigate the professional, legal, and ethical issues related to practice management. In-depth exposure and critical discussion will be focused on professional issues that impact licensure, occupational codes, and reimbursement. Students will understand CMS and other government agencies that impact how they manage their audio logy practices. Billing as it relates to CPT codes, ICD-9 CM codes, third party payment, etc. will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Audiology (AUDIO-AUD; MACAUD-SP; MSCAUD-SP) or Comm Science and Disorders (PHD)

CSD 2655 - ADVANCED CLINICAL SEMINAR 4-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2656 - ADV AUDLGY CLN PRACTICE-NETWORK

Minimum Credits: 1
Maximum Credits: 4
Third year audiology students engage in advanced clinical practicum under the supervision of university faculty. Practicum activities target the development of independence in higher level clinical skills such as clinical decision making, diagnostic and treatment planning, case management, and professional oral and written communication skills.
Academic Career: Graduate
Course Component: Practicum

Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2657 - ADVANCED CLINICAL SEMINAR 3-3

Minimum Credits: 1
Maximum Credits: 1
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3

Minimum Credits: 1
Maximum Credits: 1
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning. Participants will access the course via the chat function on course web.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2659 - AUDIOLOGY EXTERNSHIP

Minimum Credits: 1
Maximum Credits: 9
Consists of full-time supervised work at sites offering di agnostic and rehabilitative audiology within and outside the Pittsburgh region. Students are expected to gain at lEast 2000 hours of clinical activity through the internship.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Under the direct supervision of a faculty member, the student carries out specific research (library or experimental) pertinent to the student's and/or faculty member's interests.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2970 - TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Student is supervised in gaining experience in various aspects of university classroom instruction, including preparation of materials, lecturing and discussion, test construction and evaluation and student evaluation.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2971 - RESEARCH PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
This variable credit experience provides opportunities for students to be involved in research studies under the supervision of faculty members.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2972 - EXAMINATION

Minimum Credits: 1
Maximum Credits: 3
Examination credit registration gives official registration status to a student who will be taking an examination but who may not be registered for any other courses.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2973 - PRACTICUM IN CLINIC SUPERVISION

Minimum Credits: 1
Maximum Credits: 3
This course provides advanced graduate students with the opportunity to obtain experience supervising first year masters students. The advanced students, in turn, will work in consultation with the director or the assistant director of the university speech-language and hearing clinic.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders (CSD-MA; CSD-MS; CSD-PhD; SLPATH-CSD)

CSD 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Independent study credits are taken without supervision by students who propose projects that complement their academic goals, and projects whose substance is not covered in the division's regular course offerings.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 3000 - DISSERTATION RESEARCH PHD DEGREE

Minimum Credits: 1
Maximum Credits: 9
Students will formulate, design, propose, carry out, analyze, interpret, and write up an approved research project, under the direction of a dissertation committee, and in particular the chairperson.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 3048 - INTRODUCTION TO PHD STUDIES

Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on professional concerns such as the scientific method, research design and evaluation, effective scientific writing and presentation, funding sources, and the grant writing process. Among the options for a final product are a research proposal, or a publishable paper.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 3049 - PH.D. SEMINAR IN AUDIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Audiology Ph.D. students will participate in this seminar series.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 3050 - TRANSLATION CHALLENGES IN CSD

Minimum Credits: 3
Maximum Credits: 3
This seminar explores the challenges of translating basic research findings in model systems to studies in humans (T0-T1) in communication science and disorders. The seminar covers various focus areas including hearing, speech, and voice.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CSD 3060 - PHD PROSEMINAR

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD) or Audiology (AUD)

CSD 3061 - RESEARCH ROUND TABLE (RRT)

Minimum Credits: 1
Maximum Credits: 1
This seminar provides graduate students the opportunity to interact with world-class researchers in the field of communication science and disorders.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CSD 3479 - RESEARCH SEMINAR IN SPEECH AND LANGUAGE PATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Content varies across the spectrum of research issues in speech and language disorders. Each term has a special and specific focus. Students will review research literature and present and discuss specific topics of interest.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

CSD 3480 - TRANSLATION CHALLENGES IN CSD (T2-T4 RESEARCH)

Minimum Credits: 3
Maximum Credits: 3
This seminar explores research challenges related translating research to humans, practice and communities. The seminar covers various focus areas including hearing, speech and voice.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CSD 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Students will explore theoretical or applied questions related to their area of interest by analyzing relevant literature under the direction of an appropriate faculty advisor.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

CSD 3971 - RESEARCH PRACTICUM FOR PHD STUDENTS

Minimum Credits: 1
Maximum Credits: 9
A prerequisite to CSD 3000; doctoral students are involved in research projects under the super vision of faculty members.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

Communication: Rhet & Comm

COMMRC 2000 - THESIS FOR MASTERS DEGREE

Minimum Credits: 1
Maximum Credits: 6
After successful completion of the master's level comprehensive examinations, students may elect to write a master's thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

COMMRC 2014 - ARGUMENTATION

Minimum Credits: 3
Maximum Credits: 3
This course interrogates argument as a product, process, and method of inquiry, using a variety of theoretical approaches as points of departure, including pragma-dialectics, speech act theory, controversy studies, informal logic, visual communication, and forensics, as well as critical perspectives such as invitational rhetoric and feminist argumentation theory.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2201 - RHETORICAL CRITICISM

Minimum Credits: 3
Maximum Credits: 3
This course is focused on the history and practice of rhetorical criticism in America during the twentieth century. The student writes several in-depth criticisms of a significant message designed to influence belief and action.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2212 - VISUAL RHETORIC

Minimum Credits: 3
Maximum Credits: 3
This seminar concentrates on scholarship concerning visual rhetoric and its various synonyms, primarily produced in the United States during the last few decades. Through classroom exercises, readings, and writings, graduate students will become familiar with various practices of message analysis and evaluation pertaining to pictorial persuasion. Seminar participants prepare and present original research concerning visual rhetoric, including the formulation of research questions, developing an appropriate literature review, and, ultimately, inventing sustained argumentation for a thesis concerning the rhetoric of pictorial works.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2215 - RHETORIC AND HUMAN RIGHTS

Minimum Credits: 3
Maximum Credits: 3
This graduate course focuses on key concepts which are useful for describing, analyzing, and interpreting significant public texts and symbols concerning human rights controversies domestically and internationally. The central objective is to strengthen the seminar participants' awareness of qualitative techniques for interpretive and critical studies of public advocacy about human rights. It concentrates on 20th-century controversies within the US concerning "hate" or bias crimes. Considerations of race, sexuality, gender, sex, and economic class will be interwoven throughout the materials and discussions.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2218 - CONTEMPORARY RHETORICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Study of selected theorists from roughly the last fifty years who explicitly thematize rhetoric or whose work helps to shape the intellectual landscape for thinking about rhetoric. Key theorists would include Kenneth Burke, Chaim Perelman, Michael McGee, Celeste Condit, Michel Foucault, Martha Nussbaum, Michael Billing, Richard Weaver, Jeanne Fahnestock, Thomas Farrell, Lloyd Bitzer, and Stephen Toulmin. Specific content will vary. Short response papers and one longer research paper required.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2220 - READINGS IN CRITICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/ knowledge, desire and the subject. Each year a different area or topic is chosen.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2230 - COMMUNICATION RESEARCH 1

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce rhetoric and communication students to empirical research methods. Examined will be historical and philosophical contexts, observation, hypothesis formulation, hypothesis testing (research methods), and the rationales underlying statistical tests.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2296 - APPROACHES TO COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Introduction to graduate study in communication. Required for all new graduate students.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2297 - RESEARCH FORUM

Minimum Credits: 1
Maximum Credits: 1
Each week different faculty members discuss their research agendas and how they place their work in scholarly fields.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

COMMRC 2298 - RESEARCH COLLOQUIUM

Minimum Credits: 0
Maximum Credits: 0
The research colloquium provides a forum in which graduate students, faculty, and invited lecturers present research in progress.
Academic Career: Graduate
Course Component: Colloquium
Grade Component: No Grade Required

COMMRC 2299 - RESEARCH COLLOQUIUM SEMINAR

Minimum Credits: 3
Maximum Credits: 3
The research colloquium provides a forum in which graduate students, faculty, and invited lecturers present research in progress with a Seminar component. Please see section course description.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2299 - WRITING WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
The research colloquium provides a forum in which graduate students, faculty, and invited lecturers present research in progress with a Seminar component. Please see section course description.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

COMMRC 2902 - DIRECTED STUDY FOR MA STUDENTS

Minimum Credits: 3
Maximum Credits: 3
This course, for individual instruction under a research faculty member, must be within an identifiable area of study in the fields of rhetoric and/or communication. Topics vary. May be taken only once. Open only to students yet to take ma comprehensive examinations.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

COMMRC 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Independent study is taken without supervision by students who propose projects that complement their academic goals, and projects whose substance is not covered in the division's regular course offerings. Topics vary.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

COMMRC 3000 - DISSERTATION RESEARCH PHD DEGREE

Minimum Credits: 1
Maximum Credits: 12
The student will propose and design a research project and then carry out that project through research and writing. The project must be approved by a dissertation committee and executed under the direction of the chair of the committee.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

COMMRC 3001 - PROSPECTUS RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Under individual guidance of a designated research faculty member, students design, propose, and execute a research and writing project related to their prospective dissertation topic. May be used for prospectus preparation.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

COMMRC 3002 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
Under individual guidance of a designated research faculty member, students design, propose, and execute a major professional development activity (e.g., Article, conference paper, or grant proposal) or related set of them, not necessarily related to their dissertation topic.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

COMMRC 3306 - SEM IN RHETORIC AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course examines the role rhetoric plays in the formation of culture, reading some interdisciplinary texts (rhetorical, philosophical, historical, literary) which represent the intellectual elite of a specific time period. These texts will furnish us with an occasion to inquire into the ways in which intellectuals mobilize rhetoric to perpetuate or transform existing socio-political formations: the kinds of cultural self-understanding shaping their dis course and the kinds of spaces their discourse opens to their audiences. Topics vary.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 3314 - SEMINAR IN PUBLIC ARGUMENT

Minimum Credits: 3
Maximum Credits: 3
This is an advanced course dealing with specialized topics in the employment of argument in the public sphere. Textual analysis will serve as the primary mode of analysis for dis cussing the way policy issues are considered in the public realm.
Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 3316 - SEMINAR ON RHETORIC OF SOCIAL MOVEMENTS

Minimum Credits: 3
Maximum Credits: 3
Social movements have been perennial subjects of rhetorical inquiry. What are social movements? How and why do movements form, grow, and dissipate? Can approaches to rhetorical inquiry traditionally reserved for the analysis of lone speakers and single texts shed useful light on the process through which movements attempt to persuade various audiences? This seminar considers the manner in which early social movement scholars in the field of rhetoric grappled with these and other controversial questions. After developing working knowledge of the rhetorical tradition of social movement scholarship, students will engage other theoretical viewpoints from fields such as sociology and political science to illuminate aspects of movement activity that may be less apparent from within the rhetorical horizon. Consideration of specific case studies will anchor such explorations, and the pedagogical approach guiding such study will privilege direct engagement with movement actors. The goals of the course are to provide students with a grasp on the tradition of social movement inquiry in the field of rhetoric, familiarize them with fruitful interdisciplinary perspectives on movement study, and stimulate reflexive awareness of their own status as agents in the field of social action.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 3317 - SEMINAR IN RHETORICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 3326 - SEMINAR IN MEDIA STUDIES

Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to familiarize students with some of the core issues being debated within contemporary media studies. A number of theoretical perspectives will be incorporated, and topics will vary.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

COMMRC 3384 - TEACHING PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
This course focuses on principles and methods for teaching public speaking. It covers such matters as syllabus design; diversity and inclusion in the classroom; lecture preparation and presentation; small and larger group discussions; speech assignments, evaluation and feedback; general classroom management; and techniques for referring troubled students to counseling; and surveys the instructional team approach to teaching large lecture courses and recitations.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

COMMRC 3902 - DIRECTED STUDY FOR PHD STUDENTS

Minimum Credits: 3
Maximum Credits: 3
This course, for individual instruction under a research faculty member, must be within an identifiable area of study in the fields of rhetoric and/or communication. Topics vary. May be taken only twice. Open only to students yet to defend their Ph.D. comprehensive examinations.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Community Dentistry

CDENT 2113 - DENTAL RESEARCH METHODOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
The focus of this course will be applied and, as such, students will be required to employ statistical software packages for the analysis of dentally relevant data files. Students will be encouraged to develop, collect, encode and analyze their own data sets. Particular emphasis will be placed on analysis of variance techniques involving repeated measures and factorial designs. The interpretation of computer printouts will be paramount. A very brief introduction to the concept of multivariate analysis will also be presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 2114 - DENTAL RESEARCH METHODOLOGY 2

Minimum Credits: 2
Maximum Credits: 2
Course familiarizes students with concepts and methods of research design and measurement in dental medicine. Various systems employed for classifying types of research are presented, including biological and behavioral science approaches. Particular emphasis will be placed on proper design of clinical trials, research paradigms, scientific writing, and methods that can be employed to control for sources of extraneous variance. As a result, students will understand how clinical research becomes a foundation for clincal practice, be able to critically review dental research literature.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 2183 - SCIENTIFIC WRITING

Minimum Credits: 1
Maximum Credits: 1
The component parts of the research paper will be presented and the differences between writing for the thesis or dissertation and a journal manuscript will be presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 2900 - INDEPENDENT STUDY

Minimum Credits: 2
Maximum Credits: 2
This course will provide the opportunity for dental residents to pursue the independent study of topics of interest in Dental Public Health.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

CDENT 5174 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION 1: COMMUNITY OUTREACH

Minimum Credits: 1.5
Maximum Credits: 1.5
Mission statement: To increase the workforce of dental professionals who treat underserved and at-risk patients by creating a learning environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. The SCOPE program is designed to help cultivate health care professionals who are caring, socially responsible and capable of behaving as patient advocates in all practice environments. The SCOPE service-learning model helps to enable 1) development of relationships and interactions with others, 2) the defining of community, and 3) the maintenance of a balance between personal and professional life. It also aims at developing student cultural competence, communication skills, and enabling a sense of "giving back" to the community as a crucial part of professional development. Course goals include the following: creating an atmosphere of community-minded oral-health professionals; creating more empathic, personally committed dentists; and improving the willingness of students to treat underserved and at-risk patients.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

CDENT 5241 - PRINCIPLES AND PRACTICE OF DENTAL PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
The course will familiarize students to the subject and specialty of Dental Public Health. Dental Public Health will be reviewed and discussed in relation to general public health, prevention, the community, access to care, and the profession of dentistry.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

CDENT 5272 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 1: COMMUNITY OUTREACH

Minimum Credits: 3
Maximum Credits: 3
Mission statement: To increase the workforce of dental professionals who treat underserved and at[1]risk patients by creating a learning environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. The SCOPE program is designed to help cultivate health care professionals who are caring, socially responsible and capable of behaving as patient advocates in all practice environments. The SCOPE service-learning model helps to enable 1) development of relationships and interactions with others,2) the defining of community, and 3) the maintenance of a balance between personal and professional life. It also aims at developing student cultural competence, communication skills, and enabling a sense of ¿giving back¿ to the community as a crucial part of professional development. Course goals include the following: creating an atmosphere of community-minded oral-health professionals; creating more empathic, personally committed dentists; and improving the willingness of students to treat underserved and at-risk patients. The mission and goals also reflect the fostering and development of some of the fifteen core skills identified by Community-Campus Partnerships for Health. These skills are considered minimally necessary for health professionals to effectively meet the needs of the public and include the following*: caring for the community¿s health; promoting healthy lifestyles; participating in racially and culturally diverse society; understanding the role of the physical environment; involving patients and families in the decision-making process; continuing to learn; improving the health care system; and developing cultural competence.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

CDENT 5274 - SCOPE 2: COMMUNITY OUTREACH

Minimum Credits: 1.5
Maximum Credits: 1.5
The course is a continuation of activities started in SCOPE 1 of the first year. Mission statement: To increase the workforce of dental professionals who treat underserved and at-risk patients by creating a learning environment in the School of Dental Medicine where students expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. The SCOPE program is designed to help cultivate health care professionals who are caring, socially responsible and capable of behaving as patient advocates in all practice environments. The SCOPE service-learning model helps to enable 1) development of relationships and interactions with others, 2) the defining of community, and 3) the maintenance of a balance between personal and professional life. It also aims at developing student cultural competence, communication skills, and enabling a sense of "giving back" to the community as a crucial part of professional development. Course goals include the following: creating an atmosphere of community-minded oral-health professionals; creating more empathic, personally committed dentists; and improving the willingness of students to treat underserved and at-risk patients. The mission and goals also reflect the fostering and development of some of the fifteen core skills identified by Community-Campus Partnerships for Health. These skills are considered minimally necessary for health professionals to effectively meet the needs of the public and include the following*: caring for the community's health; promoting healthy lifestyles; participating in racially and culturally diverse society; understanding the role of the physical environment; involving patients and families in the decision-making process; continuing to learn; improving the health care system; and developing cultural competence.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

CDENT 5312 - PRINCIPLES AND PRACTICE OF DENTAL PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
The course will familiarize students to the subject and specialty of Dental Public Health. Dental Public Health will be reviewed and discussed in relation to general public health, prevention, the community, access to care, and the profession of dentistry.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

CDENT 5372 - ETHICS AND BEHAVIORAL DENTISTRY

Minimum Credits: 2
Maximum Credits: 2
In this course, we will provide students with the communication and behavioral skills and the foundation in ethical principles needed to become successful clinicians. Communication and interpersonal skills, more than technical expertise, result in the most satisfied patients. In addition, students who acquire these interpersonal and behavioral skills have easier dentist-patient interactions and are able to provide care ethically. There is an ethical component in all patient care; until you have been exposed to it, it is easy to be unaware. In this course, we provide evidence-based, behavioral solutions to a range of common oral health problems and tools to analyze the ethical dimensions of patient care. We incorporate hands-on practice to build skills in these areas and emphasize their application. We designed this upper-level course to be taken in conjunction with clinical practice, which provides you opportunities to practice with your patients the behavioral and ethical reasoning skills discussed in class. The course consists of readings and videos, lectures, practice with standardized patients, assignments, small group discussion sessions, and class discussion. Because class sessions are discussion-based, if we are remote, we expect that you will keep your camera on during the class period. Our overall goals are to 1) increase your awareness of the behavioral and ethical components of oral health care; and 2) strengthen the behavioral and ethical reasoning skills you use to provide oral health care.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5411 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 2 (FALL)

Minimum Credits: 1.5
Maximum Credits: 1.5
Mission statement: To increase the workforce of dental professionals who treat under-served and at-risk patients by creating a learning

environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. SCOPE 2 is an experiential process whereby students are able to shape and develop their clinical skills by providing clinical dentistry to patients in Federally Qualified Health Centers (FQHCs) and non-profit clinics throughout western Pennsylvania and parts of Ohio. The selected extramural clinics provide opportunities to work with patients in under-served communities, where both professional and personal growth are enabled, along with the development of other culturally competent skills.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

CDENT 5440 - STUDENT COMMUNITY OUTREACH AND EDUCATION PROGRAM (SCOPE) 2

Minimum Credits: 3
Maximum Credits: 3
Mission statement: To increase the workforce of dental professionals who treat underserved and at[1]risk patients by creating a learning environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. SCOPE 2 is an experiential process whereby students are able to shape and develop their clinical skills by providing clinical dentistry to patients in Federally Qualified Health Centers (FQHCs) and non-profit clinics throughout Pennsylvania and parts of the tristate area (Ohio and West Virginia). The selected extramural clinics provide opportunities to work with patients in underserved communities, where both professional and personal growth are enabled, along with the development of other culturally competent skills, At the SCOPE sites, students deliver patient care in a role that takes on most responsibilities of a general dentist, including restorative procedures, treatment planning, preventive treatment, and routine surgical extractions. Continued development of professionalism and a sense of community service are enabled and emphasized.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

CDENT 5441 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 2 (SPRING)

Minimum Credits: 1.5
Maximum Credits: 1.5

CDENT 5810 - MEDICAL INTERPROFESSIONAL GERIATRICS

Minimum Credits: 1
Maximum Credits: 1
The course builds on dental students' understanding of older patients and development of interprofessional team skills necessary for patient care.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5810 - MEDICAL INTERPROFESSIONAL GERIATRICS

Minimum Credits: 1
Maximum Credits: 1
The course builds on dental students' understanding of older patients and development of interprofessional team skills necessary for patient care.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5811 - HEALTH LAW CLINIC IPE SELECTIVE

Minimum Credits: 1
Maximum Credits: 1
The overall goal of this selective is to provide students with an interesting and relevant interprofessional experience that explores the legal aspects of health care. Nursing, medical and law students, and now dental students, read and discuss the impact of law, ethics, and policy on social determinants of health and design a project to address an identified area of concern. This course is designed to reinforce dental students' knowledge of social determinants of health, relevant dental law, and professional ethics. The interprofessional experience will help students further develop their professional identity as a member of the interprofessional health care team. Students may also realize their professional responsibilities in regards to development of health care policy and implications on addressing population-level oral health disparities.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

Grade Component: Grad HSU Basis

CDENT 5812 - THE INTERPROFESSIONAL NEPHROLOGY TEAM

Minimum Credits: 1
Maximum Credits: 1
The goals of this course are for 1) dental students to participate in an interprofessional health care team and 2) gain an increased understanding of kidney diseases and treatments, along with their impact on oral health and patient care in a dental setting.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5812 - THE INTERPROFESSIONAL NEPHROLOGY TEAM

Minimum Credits: 1
Maximum Credits: 1
The goals of this course are for 1) dental students to participate in an interprofessional health care team and 2) gain an increased understanding of kidney diseases and treatments, along with their impact on oral health and patient care in a dental setting.
Academic Career: Dental Medicine

Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
This independent externship is for a senior dental student who seeks a dental school approved rotation which is individually prescribed to address a particular interest the student wants to pursue within dentistry. The program which is often tailored to one aspect of dentistry allows enrichment to the student's education which none of our established programs in school or externships provide.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

CDENT 5910 - LITERATURE AND FILM TO UNDERSTAND PATIENT-PRACTITIONER EXPERIENCES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

CDENT 5916 - CONTEMPORARY ISSUES IN DENTAL PUBLIC HEALTH

Minimum Credits: 2
Maximum Credits: 2
This course is for students wishing to expand their knowledge of the current issues in dental public health. Students will be given directed reading assignments and will search the literature for information on current and controversial topics in dentistry so that group discussions, debates and presentations may successfully be done in class. Topics covered may include: new oral health care delivery and management models, prevention and primary care systems, and dental health services research. Emphasis on evidence-based methodology is highlighted.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

CDENT 5930 - OVERVIEW AND PRACTICE OF DENTAL PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
This selective course will be available for second, third, and fourth year students. The course material will cover common primary preventive interventions and its incorporation at a community level such as fluoridation, school-based programs, health promotion, sealant programs, health policy initiatives, etc. It will also include discussion on an interdiscliplinary approach to community level preventive practices. Finally, the course will also discuss the role of dental public health outside traditional dental practice - such as in federal and national health organizations, as well as underserved areas.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5930 - OVERVIEW AND PRACTICE OF DENTAL PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
This selective course will be available for second, third, and fourth year students. The course material will cover common primary

preventive interventions and its incorporation at a community level such as fluoridation, school-based programs, health promotion, sealant programs, health policy initiatives, etc. It will also include discussion on an interdiscliplinary approach to community level preventive practices. Finally, the course will also discuss the role of dental public health outside traditional dental practice - such as in federal and national health organizations, as well as underserved areas.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5931 - DENTAL PUBLIC HEALTH POLICY AND ADVOCACY

Minimum Credits: 1
Maximum Credits: 1
In this selective course, students will have an opportunity to expand on concepts discussed in the second year public health course. Specifically, students will have an opportunity to discuss current oral health policy issues, including opportunities for advocacy.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5931 - DENTAL PUBLIC HEALTH POLICY AND ADVOCACY

Minimum Credits: 1
Maximum Credits: 1
In this selective course, students will have an opportunity to expand on concepts discussed in the second year public health course. Specifically, students will have an opportunity to discuss current oral health policy issues, including opportunities for advocacy.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5932 - INTERSECTION OF PUBLIC HEALTH AND CAREER GOALS

Minimum Credits: 0
Maximum Credits: 0
To help facilitate the student's ability to assess personal career goals and public health advocacy positions while concentrating on the oral health needs of the community in which they choose to establish their dental practice. Importantly, the student will be able to reflect on appropriate solutions relative to the specific community needs and prepare them for their role as a health care provider. Also, through participation in this program, the student will further recognize the multi-/inter-disciplinary nature of public health policies within the community and the need to establish partnerships with other health care providers.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5942 - IMPROVISATION FOR CLINICIANS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

CDENT 5973 - BIOSTATISTICS, HUMAN GENETICS, AND PUBLIC HEALTH FOR ORAL HEALTH PRACTITIONERS

Minimum Credits: 0
Maximum Credits: 0

This course will reinforce biostatistical, epidemiological, and public health principles and provide tools for proper analysis of research and journal manuscripts. Students will learn to better apply fundamental biostatistical principles used to critically evaluate evidence in medical/dental decision-making. Within the genetic epidemiology section of the course, there will be an emphasis on balancing genetic and familial studies with traditional epidemiology, biostatistical information, and public health outcomes. Content will also address the importance of ethically increasing diversity in genetic epi studies to achieve more equitable outcomes.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

Community Org and Soc Admin

SWCOSA 2040 - GRANT PROPOSAL WRITING

Minimum Credits: 3
Maximum Credits: 3
Provides students with some insight into the operation of several primary sources of funds for social welfare programs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 2052 - SOCIAL ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
Social Entrepreneurship is an elective course in the Community Organization and Social Action (COSA) specialization. Social entrepreneurship infuses models of sustainable business and management practice in social work education and practice. This course is designed to immerse students in the fundamental theoretical and applied social enterprise development process and to equip students with the mindset, tools and techniques to apply the tools of business to address pressing social problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

SWCOSA 2054 - LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership and provides students with feedback on their own leadership styles. Leadership skills are defined and applied. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. The course combines theory with practical application. It is highly participative and students are expected to join in a wide range of exercises and simulations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: SWCOSA 2084 or 2088 (MIN GRADE 'B-' for Listed Courses)

SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course seeks to train professionals to develop, manage, and lead community and human service organizations that address human service needs and revitalize communities. This course will address the social work leadership and management competencies as defined by the Network of Social Work Management, which include: (1) social and public policy context; (2) advocacy; (3) public/community relations and marketing; (4) governance, (5) planning; (6) program development and management; (7) financial development and

management; (8) program and organizational evaluation; (9) human resource management and (10) staff development.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063 and SWWEL 2081 and SWGEN 2098

SWCOSA 2086 - MANAGING FINANCIAL AND HUMAN RESOURCES

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the knowledge, values, and skills for human service management and leadership roles. The course reviews a macro framework for systems as well as organizational theories key to social administration, organizational management, and leadership as they apply in a nonprofit agency. It prepares students to develop, manage, and lead organizations that address community human service needs, advocate for community change, and revitalize communities. Social work values provide a critical framework for leadership and mission in human service organizations, and the class will draw upon the NASW Code of Ethics among others as they guide macro systems and organizations. This course explores critical issues in personal, professional, and organizational contexts, especially the nonprofit context historically associated with the human services arena.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: SWBEH 2063 and SWWEL 2081 and SWGEN 2098

SWCOSA 2087 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
Given the changing nature of social work practice, the MSW program occasionally offers courses in new and/or unique content areas. When offered, this course is designed to provide skill and knowledge content not covered in other community organization and social administration skill courses
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course seeks to train professionals to develop, manage and lead community service organizations that address human service needs and revitalize communities. This course will provide a framework of systems, power, and inter-organizational network theories, and will define communities in terms of issues, identity and place. Social work values of social and economic justice, participation, democratic practices, social inclusion, empowerment and capacity building will serve as a foundation for this course. This course will explore models of community organizing, including: locality development, social planning and social action, as well as transformative, participatory, feminist, community building and power-based models. Students will examine consensus, campaign, and contests strategies and tactics relative to these models and the techniques for recruiting and mobilizing citizens and constituencies to address social issues and build on local assets. In addition, students will learn: 1) frameworks and tools for assessment, analysis and planning; 2) development of human, social, and economic capital; 3) community capacity building for leadership, organizational, and partnership development; 4) settings of community practice, including unions, environmental, community and faith-based organizations, community development corporations, collaborations and coalitions, enabling and intermediary organizations, and policy and social action groups; 5) roles and skills in community organizing; 6) concepts and issues related to urban communities, including racism, poverty, neighborhood/commercial revitalization, workforce development, housing, and crime. Students will produce a major field project to demonstrate community assessment, analysis and action planning competencies and frameworks learned in class.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081
Course Attributes: MCSI - Sustainability Related

SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION

Minimum Credits: 3
Maximum Credits: 3
Organizers and administrators must be able to work with a range of group processes and interpersonal relationships in community and organizational practice. This course focuses on enhancing student knowledge and skills of group dynamics and processes, as well as the individual relationship management that can be challenging for macro practice. It will also provide a social work values and ethical context for practicing these skills. Three over-arching skill areas will comprise the knowledge and practice base of this modular course: 1) facilitation of task group processes of all types and sizes, 2) negotiating and bargaining, 3) mediation, including conflict mediation and resolution.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWGEN 2098 and SWGEN 2034 and SWBEH 2063

SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course will introduce the student to a community participation approach to local economic development carried out by a nonprofit organization. It would focus on the practical steps for putting together nonprofit housing developments and commercial and industrial business enterprises under participation conditions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081
Course Attributes: MCSI - Sustainability Related

SWCOSA 2097 - DIRECTED STUDY - COSA

Minimum Credits: 1
Maximum Credits: 3
This course is designed for those students who are interested in exploring a specific administration and/or policy issue of their choice. The course is appropriate for students with a new and developing interest area or for the student prepared to do advanced work. The course assumes the student's capacity for independent work under the guidance of a faculty member with extensive knowledge and experience in the subject area.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWCOSA 2099 - FIELD WORK

Minimum Credits: 1
Maximum Credits: 8
The field practicum emphasizes the integration and application of social work values, knowledge and skills in practice settings. Placements are in community service delivery systems and are individualized to combine the student's choice of concentration area, certification program and specialized skill interest.
Academic Career: Graduate
Course Component: Practicum

Grade Component: Grad SN Basis
Course Requirements: PREQ: SWGEN 2099; SBPLAN: COSA (Social Work-MSW)

Computational Biomedicine and Biotechnology

COBB 2010 - FOUNDATIONS OF COMPUTATIONAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the essential concepts, tools and techniques of modern computational biology, with real-world examples. It covers mathematical concepts, such as linear algebra, differential equations, and statistics, that are central to modeling biological systems. Students will learn the basic theory behind widely-used techniques like automated clustering, parameter estimation, sampling, and numerical integration. Project-based assignments in R and Python center around real-world computational biology problems from genomics, structural biology, and systems modeling. Prerequisites: Although there are no official prerequisites, it is highly recommended that students wishing to enroll in this course have an understanding of differential calculus and at least one semester of programming. This course is open to graduate students and upper-level undergraduates.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2020 - SYSTEMS BIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to genomic data and basic analytical principles pertaining them. Students will learn about high-throughput sequencing methods and applications, genomic variation, transcriptomics and epigenomic data. At the end of the course, the students will be able to analyze efficiently these types of data sets using existing algorithms or algorithms they will develop.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2021 - INTRODUCTION TO GENOMICS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to genomic data and basic analytical principles pertaining them. Students will learn about high-throughput sequencing methods and applications, genomic variation, transcriptomics and epigenomic data. At the end of the course, the students will be able to analyze efficiently these types of data sets using existing algorithms or algorithms they will develop.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2030 - COMPUTATIONAL STRUCTURAL BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
Topics covered include: applying computational and statistical methods to the analysis of DNA and protein structures representing protein, DNA and RNA structure; homology modeling and protein structure prediction; theoretical description of basic interactions, along with computational methods to estimate them; statistical mechanical theory of molecules; molecular dynamics and other sampling methods; modeling protein flexibility, from side chains to loops to slow modes; reaction paths and basics of path sampling; protein-protein and protein-small molecule docking; supramolecular assembly; introduction to Quantitative Structure Activity Relationship (QSAR) in drug design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2035 - MODERN METHODS IN STRUCTURE-BASED DRUG DISCOVERY

Minimum Credits: 4
Maximum Credits: 4
This course introduces students to the modern computational approaches and governing physical and chemical principles that underpin structure-based drug discovery. The course explores how biomolecular structure and dynamics inform the rational design of therapeutics and how machine learning can be harnessed to improve drug discovery. Topics include molecular interactions, statistical mechanics and thermodynamics, molecular simulations, coarse-grained and enhanced sampling techniques, free energy calculations, protein structure prediction, protein design, molecular docking, and virtual screening. Students will engage with methods for structure-based drug discovery in hands-on assignments and recitations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2041 - CELLULAR AND SYSTEMS MODELING

Minimum Credits: 4
Maximum Credits: 4
A graduate-level introduction into mathematical modeling and analysis of biological systems on the cellular and other levels. This condensed and broad course conveys the unity of the modeling methodology in biology. It spans a range of perspectives derived from the different disciplines from which this new area of research originated: biology, mathematics, engineering, and computer science. The systems covered include quantitative physiology, quantitative cell biology, biological networks, dynamic systems, cell mechanics, and systems modeling of critical illness. The quantitative physiology topics to be covered include hemodynamics, musculoskeletal systems, endocrinology, neuroendocrinology, gastrointestinal/renal, transport phenomena, and pathophysiological conditions. Quantitative cell biology topics surveyed are mathematical models of the cytoskeleton dynamics, intracellular transport, cell locomotion, spatially-distributed models of cell signaling, approaches to whole-cell modeling, and role of modeling in cell-biological research. Models of cellular mechanics will also be addressed. Mathematics of dynamic systems is presented in application to enzyme reactions, bistability in cellular signaling, programmed cell death, and the mechanisms behind the circadian and cell-division rhythms. Biological network theory is presented as it applies to metabolism, protein interactions, regulation of gene expression, and reverse engineering of the biological systems. Theoretical aspects of application of systems modeling to clinical research are also presented on an example of quantitative systems approach to inflammation, sepsis, and trauma. In addition, the course will survey computational methods and models that are broadly useful across the various system types examined. These will include random walk models, master equations, and continuous and discrete models of chemistry within the cell. Finally, the course will include a presentation of general discrete and continuous models broadly useful in cell and systems modeling as well as computational methods for optimization and parameter tuning on such models. Across the entire range of topics, the universality of the systems modeling methodology and its role in biomedical research are emphasized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

COBB 2055 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 1
Maximum Credits: 1
This course addresses aspects of skills essential for establishing and maintaining a career in computational biomedicine and biotechnology. Topics covered include preparation of a CV and resume, interview skills, research ethics, mentoring, and communicating with managers and team members
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2060 - MACHINE LEARNING FOR BIOMEDICAL APPLICATIONS

Minimum Credits: 4
Maximum Credits: 4
High-throughput techniques are revolutionizing biomedical research. From whole genome sequencing, to RNA-Seq transcriptome profiling, to high-throughput mass spectrometry for protein profiling, to high-throughput biochemical screening, to flow cytometry for cell profiling, to high-content screening, to literature analysis and electronic medical records, from molecule to patient, modern techniques generate vast quantities of data. In order to be effective, biomedical researchers require the appropriate computational tools to correctly interpret and utilize this data. As machine learning is the science of finding and applying patterns in data, it is an essential tool for turning data into knowledge and actionable insights and has been rising in prominence in biomedical research. This course will focus on the practical aspects of effectively applying state-of-the-art machine learning methods to biomedically relevant datasets. Topics covered include mathematical foundations, practical coding skills, classical machine learning, deep learning, and generative modeling.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2066 - SCALABLE MACHINE LEARNING FOR BIG DATA BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
Machine learning(ML) has become an integral part of computational thinking in the era of big data biology. This course will focus on understanding the statistical structure of largescale biological data sets using ML algorithms. We will cover the basics of ML and study their scalable versions for implementation on a distributed computing framework. We will pursue distributed ML algorithms for: matrix factorization, convex optimization, dimensionality reduction, clustering, classification, graph analytics and deep learning, among others. The course will be project driven (3 to 4 mini projects) with source material from genomic sciences, structural biology, drug discovery, systems modeling and biological imaging. There will be one final project, along with a presentation. Students will be expected to design, implement and test their ML solutions in Apache Spark.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

COBB 2070 - COMPUTATIONAL GENOMICS

Minimum Credits: 3
Maximum Credits: 3
Dramatic advances in experimental technology and computational analysis are fundamentally transforming the basic nature and goal of biological research. The emergence of new frontiers in biology, such as evolutionary genomics and systems biology is demanding new methodologies that can confront quantitative issues of substantial computational and mathematical sophistication. This course introduces classical approaches and the latest methodological advances in the context of the following biological problems: 1) Computational genomics, focusing on gene finding, motifs detection and sequence evolution. 2) Analysis of high throughput biological data, such as gene expression data, focusing on issues ranging from data acquisition to pattern recognition and classification. 3) Molecular and regulatory evolution, focusing on phylogenetic inference and regulatory network evolution, and 4) Systems biology, concerning how to combine sequence, expression and other biological data sources to infer the structure and function of different systems in the cell. From the computational side this course focuses on modern machine learning methodologies for computational problems in molecular biology and genetics, including probabilistic modeling, inference and learning algorithms, pattern recognition, data integration, time series analysis, active learning, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2080 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 7
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in computational biology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

COBB 2085 - COBB INTERNSHIP

Minimum Credits: 1
Maximum Credits: 4
To gain experience in the professional application of computational biology, students are required to participate in a 2-to 3-month internship at a company of their choice. Acceptable internship sites include industrial labs, biotech/pharma companies, and governmental organizations. It is the student's responsibility to contact the company and secure the internship. Students wishing to perform the internship in a semester other than summer may petition the Executive Committee for an exception, but must still complete all required coursework. Students who are unable to secure internships may be permitted to substitute additional Independent Study research credit to fulfill the internship requirement, upon approval by the Executive Committee.Upon completion of the internship, each student will submit a written report summarizing the experience and the skills acquired. Students will additionally make an oral presentation to share their experience with others. Supervisors at the internship sites will be asked to provide a written evaluation of the students' performance.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

COBB 2100 - CURRENT TOPICS IN COMPUTATIONAL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Students in this course will attend weekly seminars by internationally recognized researchers, and they will provide critical analyses of the talks.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

COBB 2110 - COBB FACULTY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students in this course will attend weekly seminars by CoBB Faculty. The goal of the course is to introduce our students to our faculty's research through weekly faculty talks.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

COBB 2150 - COMPUTATIONAL DRUG DISCOVERY

Minimum Credits: 4
Maximum Credits: 4
This course introduces students to the essential methods of computational drug discovery, from structural analysis of small molecules, to

molecular dynamics simulations, to systems pharmacology. Students will learn to use software for accessing, viewing, and comparing small molecule structures. They will gain experience with molecular dynamics simulations, small molecule docking, virtual screening and pharmacophore modeling. Students will additionally learn how pathway inference and reaction network modeling are use in quantitative systems pharmacology (QSP). Basic programming proficiency (e.g., in Python) is required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

Computational Biology

CMPBIO 2010 - SEMINAR IN COMPUTATIONAL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Seminar series of the joint Pitt-CMU Ph.D. program in computational biology. Nationally and internationally recognized researchers in the field of computational biology present scientific findings. Students meet informally with each speaker to discuss key areas of computational biology, including: computational structural biology, computational genomics, cellular and systems modeling, bio image informatics, and computational neurobiology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CMPBIO 2015 - COMPUTATIONAL IMAGING FOR SPATIAL SYSTEMS BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
The recent explosion of next-generation, high-content, high-throughput spatial imaging technologies for intact tissues measuring protein expressions, DNA and RNA probes for investigating systems biology challenges has attracted the interest of NIH and other international agencies in funding precision medicine efforts, including Human Tumor Atlas Network (HTAN), Immuno-Oncology Translation Network (IOTN), Human BioMolecular Atlas Program (HuBMAP), Human Cell Atlas (HCA) and Human Protein Atlas (HPA). In this course, we will study these spatial imaging technologies in greater depth, from low-resolution, spatially barcoded approaches for spatial transcriptomics to high-resolution in situ approaches for imaging proteins, DNA and RNA (CODEX, MIBI, IMC-CyTOF, Seq-FISH, MERFISH) expressions. We will focus on several key aspects of these technologies requiring evaluation and benchmarking in the context of spatial approaches: validation of reagents; comparison to gold-standard methods; comparison between related techniques; and relation to analyses on dissociated cells. We will discuss the technologies in terms of: tissue preparation and reagent validation, imaging development and optimization, and computational inference to allow for high-resolution systems biology analysis of large tissues sections. We will include experimental hands-on lectures using in-house hyperplexed immunofluorescence imaging apparatus. Prerequisites: No biological background is expected. The assignments will cover the necessary biology. Experience in programming and some software engineering is preferred. Knowledge of probability, statistics, linear algebra and algorithms will be useful. Prior introduction to machine learning and imaging is a bonus. Strong interest in cancer imaging informatics is a plus. The class is open to senior year undergraduates and graduate students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CMPBIO 2020 - GENE EXPRSN REGLN DATA ALGRTHM

Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level course designed primarily for those students who want to learn about the computational methods and tools that are used in the analysis of promoter regions and transcription regulation data. Students with a biological background and knowledge of introductory level statistics can participate as well as students of quantitative background. The course will primarily focus on the methods that are used for the identification of transcription factor binding sites in the promoter regions of the genes. Both sequence-based and structure-based methods will be discussed. Various technologies for data collection will also be presented, including DNA arrays, SELEX,

CHIP, and their derivatives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. There will be two 1.5 hour lectures a week which will often include an in-class practical exercise. There are weekly programming assignments and a final project and presentation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CMPBIO 2027 - BIOIMAGING, ANALYSIS AND SPATIAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to micron, nanometer, and sub-nanometer scale imaging-based approaches in experimental, computational and systems biology. Emphasis will be placed on understanding the fundamentals of image formation, processing, and analysis of brightfield, phase-contrast, highly multiplexed, super-resolution, live-cell, cryo-EM, and computational imaging, along with imaging-based spatial transcriptomic methods. Applications of these methods in studying biological phenomena in space and time will also be discussed. Python will be the programming language in which image processing, machine learning, and system biology methods introduced in the course will be implemented. Students are expected to know Python basics. It is also expected that students have a basic understanding of linear algebra and calculus.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2030 - INTRODUCTION TO COMPUTATIONAL STRUCTURAL BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2041 - CELLULAR AND SYSTEMS MODELING

Minimum Credits: 4
Maximum Credits: 4
A graduate-level introduction into mathematical modeling and analysis of biological systems on the cellular and other levels. This condensed and broad course conveys the unity of the modeling methodology in biology. It spans a range of perspectives derived from the different disciplines from which this new area of research originated: biology, mathematics, engineering, and computer science. The systems covered include quantitative physiology, quantitative cell biology, biological networks, dynamic systems, cell mechanics, and systems modeling of critical illness. The quantitative physiology topics to be covered include hemodynamics, musculoskeletal systems,

CMPBIO 2050 - LABORATORY METHODS FOR COMPUTATIONAL BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
Computational biologists frequently focus on analyzing and modeling large amounts of biological data, often from high-throughput assays or diverse sources. It is therefore critical that students training in computational biology be familiar with the paradigms and methods of experimentation and measurement that lead to the production of these data. This one-semester laboratory course gives students a deeper appreciation of the principles and challenges of biological experimentation. Students learn a range of topics, including experimental design, structural biology, next generation sequencing, genomics, proteomics, bio imaging, and high-content screening. Class sessions are primarily devoted to designing and performing experiments in the lab using the above techniques. Students are required to keep a detailed laboratory notebook of their experiments and summarize their resulting data in written abstracts and oral presentations given in class-hosted lab meetings. With an emphasis on the basics of experimentation and broad views of multiple cutting-edge and high-throughput techniques, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have and are looking for introductory training in more advanced approaches. Touches upon a range of topics, including structural biology, genomics, proteomics, and bio imaging a different laboratory method is covered each week, in the lab of a host faculty member who uses that method. The theory and practical aspects of each method are covered during a lecture session prior to each lab session. Students are required to submit a short lab report each week, summarizing the goals of the experiment, the critical steps and sources of error, and the analysis of the resulting data. With an emphasis on instrumentation and high-throughput data collection, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have.

CMPBIO 2060 - CURRENT TOPICS IN COMPUTATIONAL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course will offer an overview of faculty research in computational biology, a field of tremendous growth and excitement. It will also offer a sampling of current literature in this field, as well as an opportunity for students to develop and practice their presentation skills. The course will meet once a week, and will follow a seminar-style format, with a PowerPoint presentation, followed by a question-and-answer session. To familiarize students with alternative presentation formats, and to allow for more flexibility, the course may also include one or more webinar/teleconference sessions. Throughout the semester, students will take turns serving as introducer, presenter, and moderator of question-and-answer sessions. The topics covered in this course will be in line with the five specialization areas of the joint CMU-Pitt Ph.D. program in computational biology: computational genomics, computational, structural biology, cellular and systems modeling, bio image informatics, and computational neurobiology. The initial meeting will feature an icebreaker exercise and a refresher on professional presentation skills.

Grade Component: Grad Letter Grade

CMPBIO 2066 - SCALABLE MACHINE LEARNING FOR BIG DATA BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
Machine learning(ML) has become an integral part of computational thinking in the era of big data biology. This course will focus on understanding the statistical structure of largescale biological data sets using ML algorithms. We will cover the basics of ML and study their scalable versions for implementation on a distributed computing framework. We will pursue distributed ML algorithms for: matrix factorization, convex optimization, dimensionality reduction, clustering, classification, graph analytics and deep learning, among others. The course will be project driven (3 to 4 mini projects) with source material from genomic sciences, structural biology, drug discovery,

systems modeling and biological imaging. There will be one final project, along with a presentation. Students will be expected to design, implement and test their ML solutions in Apache Spark.

CMPBIO 2066 - SCALABLE MACHINE LEARNING FOR BIG DATA BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
High-throughput techniques are revolutionizing biomedical research. From whole genome sequencing, to RNA-Seq transcriptome profiling, to high-throughput mass spectrometry for protein profiling, to high-throughput biochemical screening, to flow cytometry for cell profiling, to high-content screening, to literature analysis and electronic medical records, from molecule to patient, modern techniques generate vast quantities of data. In order to be effective, biomedical researchers require the appropriate computational tools to correctly interpret and utilize this data. As machine learning is the science of finding and applying patterns in data, it is an essential tool for turning data into knowledge and actionable insights and has been rising in prominence in biomedical research. This course will focus on the practical aspects of effectively applying state-of-the-art machine learning methods at scale to large, biomedically relevant datasets. Topics covered include traditional machine learning algorithms, distributed machine learning, cloud and distributed computing, and deep learning. A strong programming and mathematical background is required.
Academic Career: Graduate

CMPBIO 2070 - COMPUTATIONAL GENOMICS

Minimum Credits: 3
Maximum Credits: 3
Dramatic advances in experimental technology and computational analysis are fundamentally transforming the basic nature and goal of biological research. The emergence of new frontiers in biology, such as evolutionary genomics and systems biology is demanding new methodologies that can confront quantitative issues of substantial computational and mathematical sophistication. In this course we will discuss classical approaches and latest methodological advances in the context of the following biological problems: 1) computational genomics, focusing on gene finding, motifs detection and sequence evolution. 2) Medical and populational genetics, focusing on polymorphism analysis, linkage analysis, pedigree and genetic demography, 3) analysis of high throughput biological data, such as gene expression data, focusing on issues ranging from data acquisition to pattern recognition and classification. 4) Molecular and regulatory evolution, focusing on phylogenetic inference and regulatory network evolution, and 5) systems biology, concerning how to combine sequence, expression and other biological data sources to infer the structure and function of different systems in the cell. From the computational side this course focuses on modern machine learning methodologies for computational problems in molecular biology and genetics, including probabilistic modeling, inference and learning algorithms, pattern recognition, data integration, time series analysis, active learning, etc.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2075 - MOLECULAR EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2080 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in computational biology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

CMPBIO 2085 - COMPUTATIONAL BIOLOGY INTERNSHIP

Minimum Credits: 1
Maximum Credits: 1
This course allows a student to gain computational biology experience in a real-world setting. Internships vary widely in scope, but common to all is the chance to practice computational biology skills acquired in the classroom. Typically, students seek and secure their own internships. Internships must be approved by CPCB Program Directors.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

CMPBIO 2090 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CMPBIO 3090 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Computational Biology (PHD)

MSCBIO 2010 - SEMINAR IN COMPUTATIONAL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Seminar series of the joint Pitt-CMU Ph.D. program in computational biology. Nationally and internationally recognized researchers in the field of computational biology present scientific findings. Students meet informally with each speaker to discuss key areas of computational biology, including: computational structural biology, computational genomics, cellular and systems modeling, bio image informatics, and computational neurobiology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSCBIO 2012 - CRITICAL THINKING IN COMPUTATIONAL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
This is an upper level critical paper reading and discussion course in the areas of experimental genomics. Introductory lectures will be interspersed within the topic blocks, with most of the meeting time devoted to critical discussion of assigned journal articles. Students will be responsible for leading class discussions and fielding questions on those articles. There will be written and oral presentations of final student proposals at the end of the semester.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBIO 2013 - ADVANCED COMPUTATIONAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This is a graduate-level course that will explore cutting-edge biophysical/computational methods for analyzing and predicting the structure, dynamics, and function of biological macromolecules. Designed for students with at least one graduate level course on computational structural biology or similar. Student is expected to know MD simulations (any forcefield); sequence alignment; and foundational knowledge on the biophysics of biomolecules, as well as coding of simple analytical tools of protein properties. The course integrates biophysics with molecular dynamics simulations, and AI/ML-driven tools (e.g., AlphaFold) to address challenges in drug discovery, protein engineering, and systems biology. Emphasis is placed on bridging theoretical models with real-world applications, such as rational drug design and understanding disease mechanisms at atomic resolution.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBIO 2015 - COMPUTATIONAL IMAGING FOR SPATIAL SYSTEMS BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
The recent explosion of next-generation, high-content, high-throughput spatial imaging technologies for intact tissues measuring protein expressions, DNA and RNA probes for investigating systems biology challenges has attracted the interest of NIH and other international agencies in funding precision medicine efforts, including Human Tumor Atlas Network (HTAN), Immuno-Oncology Translation Network (IOTN), Human BioMolecular Atlas Program (HuBMAP), Human Cell Atlas (HCA) and Human Protein Atlas (HPA). In this course, we will study these spatial imaging technologies in greater depth, from low-resolution, spatially barcoded approaches for spatial transcriptomics to high-resolution in situ approaches for imaging proteins, DNA and RNA (CODEX, MIBI, IMC-CyTOF, Seq-FISH, MERFISH) expressions. We will focus on several key aspects of these technologies requiring evaluation and benchmarking in the context

of spatial approaches: validation of reagents; comparison to gold-standard methods; comparison between related techniques; and relation to analyses on dissociated cells. We will discuss the technologies in terms of: tissue preparation and reagent validation, imaging development and optimization, and computational inference to allow for high-resolution systems biology analysis of large tissues sections. We will include experimental hands-on lectures using in-house hyperplexed immunofluorescence imaging apparatus. Prerequisites: No biological background is expected. The assignments will cover the necessary biology. Experience in programming and some software engineering is preferred. Knowledge of probability, statistics, linear algebra and algorithms will be useful. Prior introduction to machine learning and imaging is a bonus. Strong interest in cancer imaging informatics is a plus. The class is open to senior year undergraduates and graduate students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBIO 2019 - CPCB WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
The CPCB Writing Workshop is designed to introduce students to the basics of descriptive scientific writing, grantsmanship, the grant review process, and other related topics that will help them present their research and ideas in an impactful and persuasive way. This summer mini-course held in the second 4-week summer session is a required 1-credit, pass/fail course for CPCB students.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

MSCBIO 2020 - GENE EXPRESSION REGULATION: DATA AND ALGORITHMS

Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level course designed primarily for those students who want to learn about the computational methods and tools that are used in the analysis of promoter regions and transcription regulation data. Students with a biological background and knowledge of introductory level statistics can participate as well as students of quantitative background. The course will primarily focus on the methods that are used for the identification of transcription factor binding sites in the promoter regions of the genes. Both sequence-based and structure-based methods will be discussed. Various technologies for data collection will also be presented, including DNA arrays, SELEX, chip, and their derivatives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. There will be two 1.5 hour lectures a week which will often include an in-class practical exercise. There are weekly programming assignments and a final project and presentation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBIO 2027 - BIOIMAGING, ANALYSIS AND SPATIAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to micron, nanometer, and sub-nanometer scale imaging-based approaches in experimental, computational and systems biology. Emphasis will be placed on understanding the fundamentals of image formation, processing, and

analysis of brightfield, phase-contrast, highly multiplexed, super-resolution, live-cell, cryo-EM, and computational imaging, along with imaging-based spatial transcriptomic methods. Applications of these methods in studying biological phenomena in space and time will also be discussed. Python will be the programming language in which image processing, machine learning, and system biology methods introduced in the course will be implemented. Students are expected to know Python basics. It is also expected that students have a basic understanding of linear algebra and calculus.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBIO 2030 - INTRODUCTION TO COMPUTATIONAL STRUCTURAL BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBIO 2041 - CELLULAR, SYSTEMS, AND MOLECULAR MODELING

Minimum Credits: 4
Maximum Credits: 4
Cellular, Systems, and Molecular Modeling undertakes the ambitious task of studying the dynamics of biological modeling.png and biomedical processes from a whole system point of view. The observed systems range over orders of magnitude, from tissue to cells to molecular assemblies! Engineering tools are used along with genome-scale information in mathematical and/or computational models that usually adopt a top-down approach. Modeling diseases, entire 'virtual' cells, or subcellular networks of interactions are among typical tasks. Major research topics include the modeling of complex signaling and regulatory networks, transport mechanisms, spatio-temporal evolution of microphysiological events, as well as establishing the links between the development of complex phenotypes and the seemingly unrelated molecular events.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSCBIO 2042 - CRITICAL THINKING IN COMPUTATIONAL BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This is an upper level critical paper reading and discussion course in the areas of experimental genomics. Introductory lectures will be interspersed within the topic blocks, with most of the meeting time devoted to critical discussion of assigned journal articles. Students will be responsible for leading class discussions and fielding questions on those articles. There will be written and oral presentations of final student proposals at the end of the semester.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBIO 2045 - SPECIAL TOPICS IN COMPUTATIONAL BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course will focus on advanced methods for modeling and reasoning about the dynamics of biological systems. Emphasis will be

placed on emerging techniques that complement those based on differential equations and machine learning. Examples include: rule-based modeling, process algebras, hybrid systems, as well as applications of model checking and type theory. Students will be asked to present and provide written summaries of recent papers, and to complete a course project of their own design.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCBIO 2050 - LABORATORY METHODS FOR COMPUTATIONAL BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
Computational biologists frequently focus on analyzing and modeling large amounts of biological data, often from high-throughput assays or diverse sources. It is therefore critical that students training in computational biology be familiar with the paradigms and methods of experimentation and measurement that lead to the production of these data. This one-semester laboratory course gives students a deeper appreciation of the principles and challenges of biological experimentation. Students learn a range of topics, including experimental design, structural biology, next generation sequencing, genomics, proteomics, bio imaging, and high-content screening. Class sessions are primarily devoted to designing and performing experiments in the lab using the above techniques. Students are required to keep a detailed laboratory notebook of their experiments and summarize their resulting data in written abstracts and oral presentations given in class-hosted lab meetings. With an emphasis on the basics of experimentation and broad views of multiple cutting-edge and high-throughput techniques, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have and are looking for introductory training in more advanced approaches. Touches upon a range of topics, including structural biology, genomics, proteomics, and bio imaging a different laboratory method is covered each week, in the lab of a host faculty member who uses that method. The theory and practical aspects of each method are covered during a lecture session prior to each lab session. Students are required to submit a short lab report each week, summarizing the goals of the experiment, the critical steps and sources of error, and the analysis of the resulting data. With an emphasis on instrumentation and high-throughput data collection, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have.

Computer Engineering - Arts and Sciences

COEA 2000 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 6
Master's thesis research.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Computer Engineering (MS or PHD)

COEA 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: PLAN: Computer Engineering (MS or PHD)

COEA 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Directed study.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Computer Engineering (MS or PHD)

COEA 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
This course involves study which is approved by the faculty adviser but carried out independently by student.
Academic Career: Graduate
Course Component: Independent Study

Grade Component: Grad SN Basis
Course Requirements: PLAN: Computer Engineering (MS or PHD)

COEA 3000 - RESEARCH AND DISSERTATION: PHD

Minimum Credits: 1
Maximum Credits: 9
Research and dissertation Ph.D.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Computer Engineering (MS or PHD)

COEA 3893 - GRADUATE SEMINAR

Minimum Credits: 1
Maximum Credits: 1
A weekly series of presentations by engineers and scientists, visiting researchers, faculty, and graduate students.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PLAN: Computer Engineering (MS or PHD)

Computer Science

CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Minimum Credits: 4
Maximum Credits: 4
This course is a rigorous introduction to the fundamental concepts and techniques of computer programming using the java programming language. This is a first course for students who intend to major in computer science.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CS 0441 - DISCRETE STRUCTURES FOR CS

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to understand and use (abstract) discrete structures that are backbones of computer science. In particular, this class is meant to introduce logic, proofs, sets, relations, functions, counting, and probability, with an emphasis on applications in computer science.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: MATH 0220 or 0230 or 0235

CS 0445 - DATA STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using the java language included in this study are programming techniques which use recursion, reference variables, and dynamic memory

allocation. Students in this course are also introduced to various searching and sorting methods and also expected to develop an intuitive understanding of the complexity of these algorithms.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0401 (MIN GRADE 'C')

CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to study the components of computing systems common to most computer architectures. In particular, this class is meant to introduce data representation, types of processors, memory types and hierarchy, and device drivers. The students will learn MIPS assembly language, the design of arithmetic and logic units, and basic designs for RISC processors.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: CS 0445

CS 1510 - ALGORITHM DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC
Course Requirements: PREQ: [(CS 1501 or COE 1501) and CS 1502] or (CS 0458 and CS 1710); MIN GRADE 'C' FOR ALL COURSES LISTED

CS 1511 - INTRODUCTION TO THEORY OF COMPUTATION

Minimum Credits: 3
Maximum Credits: 3
Understanding the theory of computation provides deeper in sights into various topics in computer science. This is an introductory level theory course. The aim of this course is to study the power (or lack of it) of various models of computation. Topics to be covered include: automata, formal languages, computability, and computational complexity.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC
Course Requirements: PREQ: CS 1502 or 1710; (MIN GRADE 'C' FOR ALL COURSES LISTED)

CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Various programming paradigms will be studied using java and scripting languages. The use of java in programming web based applications, network applications, and the use of the extensive java libraries will be studied. The programming paradigm of building software by gluing components will be explored through the use of scripting languages such as perl and JavaScript. Applications include developing guis and internet programming.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: CS 0445 or COE 0445; (MIN GRADE 'C'); PROG: Dietrich Sch Arts and Sciences or Sch Computing and Information

CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An introduction to basic concepts of operating systems, common to most computer systems, which interfaces the machine with upper-level programs. This course will introduce processes as processing unit, process management, concurrency, communication, memory management and protection, and file systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0447 or COE 0447) and (CS 0449 or COE 0449) or (0456 and 1750); MIN GRADE 'C' FOR ALL COURSES LISTED; PROG: Dietrich Sch Arts and Sciences or Sch Computing and Information

CS 1621 - STRUCTURE PROGRAMMING LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
An analytical examination of modern high-level programming language structures; including design specification and implementation. Advanced forms of data types, expressions, and control primitives. Relationship of storage management techniques and language design.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS (0441 and 0445) or (0406 and 0455); (MIN GRADE 'C' FOR ALL COURSES LISTED)

CS 1651 - ADVANCED SYSTEMS SOFTWARE

Minimum Credits: 3
Maximum Credits: 3
To discuss in depth some advanced features of fundamental importance in the design of operating systems. The subjects discussed include interprocess communication, real-time scheduling, advanced file systems, security and protection mechanisms. The objective of the course is to provide an understanding of these advanced issues, as well as to bring awareness of the known solutions to these problems and to the limitations of these solutions.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1550 or 1312 or 1792; (MIN GRADE 'C' FOR ALL COURSES LISTED)

CS 1699 - SPECIAL TOPICS IN COMPUTER SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This is a special topics course that allows the computer science department to test run a course before deciding whether to permanently add it to our curriculum.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CS 2000 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 6

Master's thesis research.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CS 2001 - RESEARCH TOPICS/COMPUTER SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course introduces the students to the research being conducted in the computer science department. Active, state-of-the-art research topics will be covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2002 - RESEARCH EXPERIENCE/COMPUTER SCI

Minimum Credits: 3
Maximum Credits: 3
In this course, each student will perform exploratory research topics covered in CS 2001. The research will be supervised and directed by faculty members working in the area of the topic chosen by the student.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2001

CS 2003 - COMPUTER SCIENCE COLLOQUIUM

Minimum Credits: 1
Maximum Credits: 1
The computer science colloquium is offered as a one unit graduate class, with a satisfactory/no credit (S/NC) grading option. The aim of this weekly meeting is to discuss the most recent advances in computer science.
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad SN Basis
Course Requirements: PREQ: CS 2001 and 2002; PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2012 - ALGORITHM DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2015 - ALGORITHMS AND DATA STRUCTURES 2

Minimum Credits: 3
Maximum Credits: 3

As the second in a two-course sequence on algorithms and data structures, this course covers a broad range of the most commonly used algorithms. Some examples include algorithms for searching, encryption, compression, graphs, and dynamic programming. The students will implement and test several algorithms. The course is programming intensive.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Instructor Consent

CS 2021 - STRUCTURED PROGRAMMING LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
An analytical examination of modern high-level programming language structures; including design specification and implementation. Advanced forms of data types, expressions, and control primitives. Relationship of storage management techniques and language design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CSCI-MS)

CS 2030 - SOFTWARE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide a general survey of software engineering. Some of the topics covered include: software project planning and management, requirements engineering, model-based engineering, design patterns, and testing. Particular emphasis is on a team project in which small teams of students design and implement a software system.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2032 - SOFTWARE QUALITY ASSURANCE

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a broad understanding of modern software testing and quality assurance. Although it will cover testing theory, the emphasis is on providing practical skills in software testing currently used in industry. To that end, it will cover manual and automated tests, test-driven and behavior-driven development, performance testing, and understanding and developing a testing process.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2035 - INTERFACE DESIGN METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce concepts and common practices for building software for user interfaces. Concepts will connect across input, visual layout techniques, and software patterns for responsive user interaction with a focus on mobile platforms (web and native). Emergent interface concepts, such as voice, AR/VR, and IoT will also be explored while building upon the course's software foundation. This course is targeted for students who desire skills in front-end development, interface design and prototyping, and user experience engineering.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2037 - INTRODUCTION TO HUMAN-COMPUTER INTERACTION

Minimum Credits: 3
Maximum Credits: 3
The focus of the course is on the design of human-centered systems that people find usable, desirable, and useful. The course will introduce students to user-centered practices in Human-Computer Interaction. The course will cover the theory and practical application of Human-Computer Interaction concepts and ideas. Students will gain knowledge on diverse methods and tools to understand, improve, and create technology that harmonizes with and improves human capabilities, goals, and social environments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2041 - INTRODUCTION TO COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
Examination of computer architecture and hardware system organization. Topics include: CPU organization, sequential and microprogrammed control, instruction set implementation, memory organizations, input/output structure, peripherals and computer communications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (CS 0447 AND CS 0449) or CSCI-MS or CSCI-PHD

CS 2045 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the architecture of and software techniques for parallel and high performance computing systems. The content includes fundamental aspects of vector processing, shared-memory and distributed-memory systems. Students will be expected to complete a number of projects demonstrating specific applications in parallel processing paradigms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2051 - ADVANCED SYSTEMS SOFTWARE

Minimum Credits: 3
Maximum Credits: 3
To discuss in depth some advanced features of fundamental importance in the design of operating systems. The subjects discussed include interprocess communication, real-time scheduling, advanced file systems, security and protection mechanisms. The objective of the course is to provide an understanding of these advanced issues, as well as to bring awareness of the known solutions to these problems and to the limitations of these solutions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2052 - DATA COMMUNICATION AND COMPUTER NETWORKS

Minimum Credits: 3
Maximum Credits: 3
This course will include basic principles and topics of computer communications. An overview of interfaces that interconnect hardware and software components, describing the procedures and rules involved in the communication process and the software which controls computers communication. Discussion on network architectures, design principles, basic protocol suites, and the concept of internetworking. Proficiency in this course requires a foundation in intermediate Java programming, basic C programming, elementary data structures, as well as knowledge in multithreading and mutexes.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY

Minimum Credits: 3
Maximum Credits: 3
This course will provide the necessary conceptual background and hands-on experience to understand the most common cryptographic algorithms and protocols and how to use them to secure computers networks and distributed applications. Topics include: cryptographic algorithms for data confidentiality, authentication, and integrity, user authentication methods (secure tokens and biometrics), internet security protocols, security in local area networks, firewalls, and intrusion detection systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2055 - DATABASE MANAGEMENT SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide an in-depth knowledge of database systems design. Thus, the emphasis is on how to model one's own data and how to use available database management systems effectively. Towards this end, the relational and the object-relational models are discussed in great detail and object-oriented and other data models are also presented. Commercial database management systems are examined and students get practical experience through the use of such systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2056 - INTRODUCTION TO DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course aims to expose students to different data management, data manipulation, and data analysis techniques. The class will cover all the major data management paradigms (relational/SQL, XML/Xquery, RDF/SPARQL) including NOSQL and data stream processing approaches. Going beyond traditional data management techniques, the class will expose students to information retrieval, data mining, data warehousing, network analysis, and other data analysis topics. Time permitting, the class will include big data processing techniques, such as the map/reduce framework.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2057 - PRIVACY IN THE ELECTRONIC SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Privacy is an increasingly significant concern in our modern, connected society. We all share personal information on a daily basis with a wide range of organizations. Although at times such sharing can be intentional and beneficial for the user, other times information is shared against the user's will, used for purposes that the user did not expect, revealed to entities other than those approved by the user, or used to infer additional information that the user did not intend to reveal. In this course, students will learn to reason about what information is revealed through the use of computer systems. They will study several different scenarios in which information sharing is either unavoidable or to some extent desirable, and discuss the balance between the benefits and costs of sharing. Finally, students will learn

about several privacy-enhancing technologies (PETs), and how these can be put to use by software developers to defend the privacy of their users.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PLAN: CSCI-PHD and CSCI-MS.

CS 2060 - INTRODUCTION TO CLOUD COMPUTING

Minimum Credits: 3
Maximum Credits: 3
Cloud computing has emerged as a new paradigm for efficient and highly elastic delivery of computing services over the Internet to achieve economies of scale. The course will explore the concept of Cloud Computing, considering both its benefits and challenges. The course will also cover the basic design principles and architectures of Cloud Computing, including its usability and utility to deliver efficiently and flexibly infrastructure, platform and software as a service. Topics include types of public, private and hybrid cloud computing services, data centers architecture and deployment, cloud computing programming models, virtualization and virtual networking and storage, and large-scale distributed processing framework to manage, process and store big data applications running in clustered systems. The course will also include hands-on projects focused on developing applications on a MapReduce and Hadoop cluster. Upon successfully completing the course of the course, students will gain an understanding of the goals, benefits, and models of cloud computing, and how storage, processing, and services are designed and managed in a virtualized environment. Through hands-on projects, students will demonstrate proficiency in deploying and evaluating cloud computing applications and services. They will be able to design and deploy data-centered applications and services, and efficiently use frameworks and tools for data analytics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2071 - HUMAN LANGUAGE TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the field of natural language processing (NLP) - the creation of computer programs that can understand, generate, and learn languages used by humans. It will expose students to real-world applications such as speech recognition, information retrieval, dialogue agents, question answering systems, and machine translations by means of computational techniques including search algorithms, dynamic programming, hidden Markov models, probabilistic context free grammars, and related machine learning algorithms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 1501; (MIN GRADE 'C' or TRANSFER) and MATH 0280 or 1180; PLAN: CSCI-MS or CSCI-PHD

CS 2074 - INTRODUCTION TO COMPUTER VISION

Minimum Credits: 3
Maximum Credits: 3
In this class, students will learn the basics of modern computer vision. The course will cover topics such as image filtering, edge detection, feature extraction, description and matching, grouping and clustering, object detection, activity recognition, and recognition with a human in the loop.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2075 - INTRODUCTION TO MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This introductory machine learning course will give an overview of many models and algorithms used in modern machine learning, including linear models, multi-layer neural networks, support vector machines, density estimation methods, Bayesian belief networks, clustering, ensemble methods, and reinforcement learning. The course will give the student the basic ideas and intuition behind these methods, as well as a more formal understanding of how and why they work. Through homework assignments students will have an opportunity to experiment with many machine learning techniques and apply them to various real-world datasets.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2078 - INTRODUCTION TO DEEP LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course will cover the basics of modern deep neural networks. The first part of the course will introduce neural network architectures, activation functions, and operations. It will present different loss functions and describe how training is performed via backpropagation. In the second part, the course will describe specific types of neural networks, e.g. convolutional, recurrent, and graph networks, as well as their applications in computer vision and natural language processing. The course will also briefly discuss reinforcement learning and unsupervised learning, in the context of neural networks. In addition to attending lectures and completing bi-weekly homework assignments, students will also carry out and present a project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: MATH 0230 and (MATH 0280 or MATH 1180) and CS 1501 with a minimum grade of C or TRANSFER.

CS 2084 - BIAS AND ETHICAL IMPLICATIONS IN ARTIFICIAL INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3
Artificial intelligence holds tremendous promise to benefit nearly all aspects of society, including healthcare, food production, economy, education, security, the law, and even our personal activities. The development of AI is creating new opportunities to improve the lives of people around the world. At the same time, these intelligent models may incorporate existing biases or create new biases that can seriously harm society. At its worst, AI can exacerbate misguided old practices and aggravate past social harms with its unprecedented processing powers and the veneer of seemingly objectivity, as humans in various social factions are disparately impacted by the AI-aided decisions. Facing the ethical implications of AI, students need to be prepared with the critical intellectual capacities that allow them to understand and deal with these ethical challenges. These capacities comprise multi-disciplinary concepts ranging from statistical learning theories, model design, and ethical foundation, to psychological and cultural frameworks that are necessary for successfully navigating and evaluating responsible AI practices. Further, "ethical competence" will involve understanding various challenges surrounding AI, such as ethical regulation, fairness assessment, and interpretability of models. Note that this is a technical class. Our focus will be on designing, evaluating, and mitigating bias in machine learning models. You will have three programming assignments in Python.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2099 - SPECIAL TOPICS IN COMPUTER SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This is a special topics course that allows the computer science department to test run a course before deciding whether to permanently add it to our curriculum.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2110 - THEORY OF COMPUTATION

Minimum Credits: 3
Maximum Credits: 3
This course deals with computability theory, automata theory and formal languages. Various models of computation will be examined, their relations to each other and their properties will be studied. Topics include models for computable functions and church's thesis, models for recognizers and their relation to formal grammars, algorithmically solvable and unsolvable problems, and the complexity of computations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

Minimum Credits: 3
Maximum Credits: 3
This course deals with the analysis of algorithms and the relevance of such analysis to the design of efficient algorithms. The derivation of results that are primarily of theoretical significance shares importance with the practical task of designing efficient algorithms. Topics covered: searching and sorting, graph algorithms, arithmetic, np-completeness, and lower bound techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2210 - COMPILER DESIGN

Minimum Credits: 3
Maximum Credits: 3
The design and implementation of current high level languages. Emphasis is placed on the structure of compilers. Lexical, syntax and semantic analysis as well as target code generation and register allocation. Storage management techniques for recursive and retentive control structures. Formal specification techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2310 - SOFTWARE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course will examine the software engineering process in general, the considerations for large software projects in particular, and then will focus on the conversion of software specifications into production code. Topics will include modern design methods, safety-critical software, verification and validation, testing theory and methods, reengineering of legacy software.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2410 - COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
A study of the hardware structure of computer systems and subsystems. Topics include: processor architecture, parallelism and pipelining, cache and main memory organization, i/o controllers and i/o processors, and interconnection structures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2510 - COMPUTER OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An in-depth study of the control abstractions in modern operating systems and the issues involved in efficient implementation of those abstractions. Topics will include concurrency and its control, memory management, resource management, and structure of distributed and parallel operating systems. These topics will be developed through the lectures, assigned readings from the literature, and an examination of actual operating systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2520 - WIDE AREA NETWORKS

Minimum Credits: 3
Maximum Credits: 3
The course provides an understanding of the basic principles of broadband networks. It will introduce protocols suitable for broadband networks, with emphasis on atm. Other technologies, such as frame relay and smds, will be discussed. The course will also address important design issues for high speed networks including characterizations of (a) network traffic and its implications on network design, and (b) application performance objectives, traffic policing, and congestion control algorithms that can meet those diverse objectives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2550 - PRINCIPLES OF DATABASE SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
The main objective of this course is to provide an in-depth knowledge of database management systems design. Topics covered at length are concurrency control including concurrency on structured data, recovery and query optimization. Some important aspects of distributed databases are discussed, including distributed concurrency control and fault tolerance.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2610 - INTERFACE DESIGN & EVALUATION

Minimum Credits: 3
Maximum Credits: 3

This course covers methodology for the modeling, specification, design, measurement, and evaluation of Human-Computer Interfaces (HCI). Included topics are: interaction models and modes, conceptual/logical/physical interface structures, objectively measurable interface patterns, and criteria for interface evaluation. HCI relationships to software engineering and artificial intelligence are highlighted.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2620 - INTERDISCIPLINARY MODELING AND VISUALIZATION

Minimum Credits: 3
Maximum Credits: 3
This course discusses computer graphics, modeling and visualization techniques used to solve scientific problems. Focus falls on identifying scientific problems, proposing solutions involving graphical modeling and visualization, and designing, implementing, and evaluating the solutions. Examples include interactive software systems, quantitative analysis tools, or new applications of existing visualizations methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2637 - FOUNDATIONS OF HUMAN-COMPUTER INTERACTION

Minimum Credits: 3
Maximum Credits: 3
Human-Computer Interaction is the science of building technologies for human use and studying how people use existing technologies. This course provides an introduction to user research methods in Human-Computer Interaction, including the generative methods used to design technologies, evaluative methods used to assess technologies, and human and automated data analysis approaches. The course will discuss applications of these topics to both well-established technologies (websites, mobile apps) and emerging technologies (e.g., brain-computer interfaces, AR/VR) as well as applications to emerging research areas in HCI such as crowdsourcing and human-AI interaction. A strong programming background is expected to take this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2710 - FOUNDTNS OF ARTIFICIAL INTELLGNC

Minimum Credits: 3
Maximum Credits: 3
This course covers the foundational techniques in artificial intelligence, including: problem definition and analysis, heuristic search, adversarial search, knowledge representation, planning and constraint satisfaction, and methods for reasoning under uncertainty. Attention will be given to the roles of these techniques in the design of intelligent agents.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the field of Natural Language Processing (NLP) - the creation of computer programs that can

understand, generate, and learn natural language. Natural language understanding will be used as a vehicle to introduce the three major subfields of NLP: syntax, semantics, and pragmatics. The course will introduce both knowledge-based and statistical methods for NLP, and will illustrate the use of such methods in a variety of application areas.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2750 - MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course will give an overview of many techniques and algorithms in machine learning, beginning with topics such as linear and logistic regression, multi-layer neural networks and ending up with more recent topics such as boosting and support vector machines. The basic ideas and intuition behind modern machine learning methods, as well as, a more formal understanding of how and why they work will be covered. Students will have an opportunity to experiment with various machine learning techniques or apply them to a selected problem or domain in the context of a term project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering Electrical & Computer Engineer (ECE-MSECE, ECE-PHD)

CS 2756 - PRINCIPLES OF DATA MINING

Minimum Credits: 3
Maximum Credits: 3
Data mining is the process of efficient supervised or unsupervised discovery of non-trivial and useful knowledge and patterns from collections of data. This proposed course aims to provide a discussion of multiple common tasks in data mining, including association rules/sequential patterns, classification, anomaly detection, avoiding false discoveries, and clustering. Besides, this course will also introduce the latest advances in data mining and provide extensive hands-on experience via programming projects. Non-CS students interested in enrolling must suggest project ideas and obtain the instructors written permission to override the enrollment requirements.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 1656

CS 2756 - PRINCIPLES OF DATA MINING

Minimum Credits: 3
Maximum Credits: 3
Data mining is the process of efficient supervised or unsupervised discovery of non-trivial and useful knowledge and patterns from collections of data. This proposed course aims to provide a discussion of multiple common tasks in data mining, including association rules/sequential patterns, classification, anomaly detection, avoiding false discoveries, and clustering. Besides, this course will also introduce the latest advances in data mining and provide extensive hands-on experience via programming projects. Non-CS students interested in enrolling must suggest project ideas and obtain the instructors written permission to override the enrollment requirements.

CS 2770 - COMPUTER VISION

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science or Computer Engineering Electrical & Computer Engineer (ECE-MSECE; ECE-PHD)

CS 2893 - MODERN QUANTUM COMPUTING

Minimum Credits: 3
Maximum Credits: 3
This course introduces modern quantum computing theories and experiments for graduate and advanced undergraduate students in Computer Science, SCI, and related fields. It covers essential topics, including 1. basic quantum computing concepts using linear algebra, 2. variational quantum algorithms, 3. quantum optimization and quantum machine learning with coding exercises, 4. practical quantum error correction techniques, and 5. post-quantum cryptography. Students will gain hands-on skills, enabling them to conduct research on real-world quantum applications using emerging quantum technologies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1
Maximum Credits: 1
A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

CS 2905 - COMPUTER SCIENCE COOPERATIVE PROGRAM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

CS 2910 - MS PROJECT

Minimum Credits: 1
Maximum Credits: 3
A project under the supervision of a faculty member or a group of faculty members.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

CS 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
This course involves study which is approved by the faculty adviser but carried out independently by student.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

CS 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9
Any adjunct or full member of the graduate faculty of the department may direct doctoral dissertations.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CS 3410 - ADV TOPICS COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
This course will survey current topics in computer architecture.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2410

CS 3510 - ADV TOPICS IN OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An in-depth study of specific topics of modern operative systems, the theory behind them, and their implementation. Topics may include advanced concepts in distributed systems, multimedia systems, file systems, resource management, distributed shared memory, among others.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2510

CS 3521 - ADV TOPCS SENSING/UBIQUITOUS TEC

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the fundamental issues related to designing and analyzing sensor networks and applications. Topics include but are not limited to: driving applications for sensor nets; wireless networking issues; directed diffusion, aggregation, and data dissemination; power aware routing computing and communication; hardware and software platform and tools.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2520 or TELCOM 2321

CS 3550 - ADV TOPICS IN MANAGEMENT OF DATA

Minimum Credits: 3
Maximum Credits: 3
The course is devoted to a reevaluation of traditional database techniques and the examination of emerging approaches for the reliable and efficient data management in large distributed systems. Examples of such systems include multi databases, mobile and multimedia databases, and advanced OS and AI. Topics include object management, workflows and extended transactions, semantics-based concurrency control and recovery, active and real-time database techniques. The concepts will be examined within the context of a state-of the-art system.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3551 - ADV TOPICS IN DISTBD INFOR SYS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on emerging technologies for large scale, distributed information systems. Topics to be examined include data and information modeling, heterogeneous data integration, data distribution, caching and replication, web databases, distributed query processing and searching, multimodal access, quality of data, content networks, and pervasive data management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2510 and 2550

CS 3570 - ADVANCED TOPICS IN USER INTERFACE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CS 3670 - ADVANCED TOPICS IN THE APPLICATIONS AND TECHNOLOGIES OF VIRTUAL AND AUGMENTED REALITY

Minimum Credits: 3
Maximum Credits: 3
This PhD seminar surveys research frontiers in augmented, mixed, and virtual reality (collectively referred to as `XR'). Seminar activities will have students read and debate landmark and recent papers while building lightweight prototypes and running small empirical studies. Topics include human perception and comfort in XR; tracking and sensor fusion (VIO/SLAM); displays and optics; rendering and performance (OpenXR/WebXR, foveation, edge/cloud); 3D interaction, haptics, and spatial audio; scene understanding and neural rendering (NeRF/gaussians); multi-user systems and synchronization; evaluation methods and analysis; and privacy, safety, and ethics. A semester-long team project culminates in a paper-style write-up, demo, and public presentation. Suitable for students targeting HCI, vision/graphics, systems, and ML for XR.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3710 - ADV TOPICS ARTIFICIAL INTELLGNC

Minimum Credits: 3
Maximum Credits: 3
This course will survey current topics in artificial intelligence.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2710

CS 3720 - ADVANCED TOPICS IN INTERNET OF THINGS

Minimum Credits: 3
Maximum Credits: 3
A practical course in IoT systems, including sensing, data collection, data preparation, data transmission, and AI/Machine Learning

methods. The class will involve discussions of fundamentals of building systems, discussion of open problems, and designing and building a prototype IoT system.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3730 - ADV TOPCS NATURAL LANG PROCSSNG

Minimum Credits: 3
Maximum Credits: 3
Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more deeply, and to discuss recent advances in (NLP).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2731

CS 3750 - ADV TOPICS IN MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2750

CS 3790 - ADVANCED TOPICS IN EDUCATIONAL TECHNOLOGY: PERSONALIZED LEARNING ENVIRONMENTS

Minimum Credits: 3
Maximum Credits: 3
The 2010 National Educational Technology Plan outlined how "The challenge for our education system is to leverage the learning sciences and modern technology to create engaging, relevant, and personalized learning experiences for all learners." While instruction has traditionally been one-size-fits-all, the rise of web-based and mobile technologies provide an opportunity to automatically detect what learners need and adapt instruction to their unique prior knowledge, motivation, and preferences. In this seminar course, we survey different types of personalization in educational technologies (e.g., cognitive, metacognitive, social, motivational), computational modeling techniques for representing learners and their needs, and best practices in designing personalized supports for learners. Students will lead one or more class discussions, participate in the other discussions, and complete a group course project. Students must have a foundational knowledge of algorithms and data structures before enrolling in this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CS 3800 - ADVANCED TOPICS IN COMPUTING

Minimum Credits: 3
Maximum Credits: 3
This course aims to provide students with an introduction to a range of advanced topics in computing. It will explore the current and future challenges facing the emerging computing paradigms. These will also be used to illustrate the many different influences and trade-offs involved in computing and information systems.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

CS 3800 - ADVANCED TOPICS IN COMPUTING

Minimum Credits: 3
Maximum Credits: 3
This course aims to provide students with an introduction to a range of advanced topics in computing. It will explore the current and future challenges facing the emerging computing paradigms. These will also be used to illustrate the many different influences and trade-offs involved in computing and information systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CS 3900 - PHD DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
The course may involve a project under the supervision of a faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

Computing and Information

CMPINF 0401 - INTERMEDIATE PROGRAMMING

Minimum Credits: 4
Maximum Credits: 4
This is an intermediate programming course that focuses on programming via an object-oriented paradigm. Students entering CMPINF 0401 are expected to have some previous concepts and then focus on object-oriented programming, including classes, encapsulation and abstraction, inheritance, polymorphism and interfaces. Some introductory data structures and algorithms will also be covered in this course.This class is a programming-intensive course, and students will be expected to complete several non-trivial programming projects throughout the term.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: ANTI-REQ: Enrollment not permitted if previously enrolled in CS 0401 OR INFSCI 0017.

CMPINF 1207 - WRITING MACHINES

Minimum Credits: 3
Maximum Credits: 3
Large Language Models (LLMs) like ChatGPT promise--or threaten--to upend everything we know about writing. Can machines really write? What do writing machines do to or for human writers? This class approaches the contemporary buzz about ChatGPT and Natural Language Generation (NLG) through a sociotechnical and historical lens, exploring automated writing through historical and contemporary writing machines: 18th century automatons, Ouija boards, combinatorial poetics, procedural algorithms, recurrent neural networks, and the transformer technology that drives cutting-edge LLMs like ChatGPT. The course is organized into units focusing on different methods of automating writing: mechanical; spiritual; procedural; statistical; simulative. Each unit teaches students historical and technical contexts of its associated automation through texts and hands-on projects. Students who take this class will learn to generate text using computational processes and critically examine the text they produce. In so doing, students will engage with the political and ethical implications of large-scale data usage to train machine learning algorithms, including issues of underrepresented languages, bias, hate speech, further marginalizing communities, automating labor, environmental impacts, dirty data, and privacy violations. As we trace the development and commercialization of NLG, we'll consider whose writing is being automated, and for what purposes.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CMPINF 2100 - DATA-CENTRIC COMPUTING

Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to programming, data processing, and data mining, and applied machine learning using Python for highly motivated students with little or no prior experience in programming. The course will focus on learning the basics of Python programming language in the context of working with data, planning and organizing programs, commonly-used algorithms, data management, data cleaning, basic machine learning, data mining, and fundamentals of computational modeling.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2105 - MATHEMATICAL AND STATISTICAL FOUNDATIONS FOR DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course will create the foundational mathematical, statistical, and analytical skills needed for subsequent in-depth courses in data science. Students will be introduced to important calculus, matrix, statistics and probability fundamentals important in data science. These topics are taught in a hands-on manner to focus on the practical application rather than a purely theoretical treatment of the material. No programming experience is required as all concepts are demonstrated with Excel. "Pen and paper" exercises are completed in Jupyter notebooks to familiarize students with Jupyter and to introduce LaTeX.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2110 - MANAGING, QUERYING, AND PRESERVING DATA

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the practical methodologies of data management, storage, and querying in the context of relational, document, and graph database management systems. This course covers fundamental concepts of data organization and retrieval, including the relational model, structured query language (SQL), graph/network concepts, and Cypher. In addition to building skills and understandings for managing data in a database system, this course will examine strategies and important concepts for continued access and preservation of data. This course considers the technical infrastructure for storing, publishing, discovering and preserving research data. It will address the importance of data documentation in data science, disciplinary metadata standards, file formats that support long-term preservation of data, and strategies for sharing data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CMPINF 2100 Introduction to Data-Centric Computing

CMPINF 2120 - APPLIED PREDICTIVE MODELING

Minimum Credits: 3
Maximum Credits: 3
The ability to collect, store and process large amounts of detailed data in a variety of fields has led to a surge in the use of data in various decision making tasks, ranging from governmental policy making to drafting players in sports. Data literacy is thus important and in this first introductory course we will focus on shifting the traditional mode of deterministic (yes/no) thinking to probabilistic thinking. In this course, we will review concepts from applied probability and statistics and explore how they can be used in building a data-driven infrastructure with applications ranging from understanding a variety of everyday phenomena (e.g., descriptive modeling) to making decisions based on data (e.g., predictive modeling). In particular, we will focus on the principles and best practices in dealing with data,

including understanding (a) the bias-variance tradeoff, (b) how to avoid overfitting, (c) how to choose the most appropriate model for your data and (d) how to evaluate your model's performance. While the main focus of the course is on supervised learning, we will also introduce unsupervised learning and in particular the problem of clustering. We will also explore the concept of Monte Carlo simulations and resampling, and how they can be used to make predictions for systems that are too complicated to be solved in closed form. We will also provide an overview of analytical methods for specialized form of data including time series and relational data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CMPINF 2100 Introduction to Data Centric Computing

CMPINF 2130 - THE ART OF DATA VISUALIZATION

Minimum Credits: 3
Maximum Credits: 3
Visualization is a language of art to discover, understand, and communicate meanings. This course introduces how to speak in the visual style in the era of big data by programming on the elements of arts: lines, forms, and colors. This course is designed to break the boundaries between art, science, and engineering and teach creative coding to students of all kinds of backgrounds.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2140 - RESPONSIBLE DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
"Data are a form of power" and the ways that data scientists use data have an impact on individuals and communities. In this course, we will interrogate the work of data scientists through a social justice lens and develop a personal statement that articulates responsible data science. Responsible data practices cut across the lifecycle of a dataset, and a responsible data scientist will ask questions about the decisions and people behind the data collection, people represented or ignored in the dataset, and the people impacted by tools and algorithms that use the data. In this course, we will engage with social justice, policy, and people-oriented dimensions of data work. Each module will introduce a case study or vignette that illustrates these dimensions across different aspects of data work. Through these modules, we will develop cognitive approaches for examining data, our positionality, and the implications of data collection, analysis, and algorithms on communities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2211 - FOUNDATIONS OF CLOUD COMPUTING

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to some of the core concepts of cloud computing. Students will gain both the foundational knowledge and hands-on practical experience required for understanding cloud computing from historical, software engineering, and business perspectives. The course will cover the essential characteristics of cloud computing, including its history, business uses, and technology use cases enabled by the proliferation of cloud platforms. Students will learn about the different cloud computing service models, as well as some of the key components of a cloud information technology infrastructure.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2221 - APPLIED BAYESIAN ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
In this course students will learn the foundational assumptions, concepts, and popular tools for applying Bayesian techniques to solve

challenging data related problems. This course is hands-on and demonstrates the key concepts and skills through numerous programming examples in lectures, homework assignments, and projects. The course begins by reviewing probability distributions with a special emphasis on how distributions communicate uncertainty. The Bayesian "mindset" is introduced by showing how probability distributions allow subjective information to be used in modeling tasks via Prior distributions. Students will be shown the connection between Bayesian Priors and Non-Bayesian regularization/penalization methods which they have been introduced to in previous courses. From there, students are taught how to properly train, validate, and communicate the Bayesian modeling results for linear, generalized linear models, and multi-level (hierarchical) models using popular open-source libraries. Special emphasis is made to diagnose the Bayesian inference procedure to ensure the models are adequate and trustworthy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2222 - APPLIED DEEP LEARNING

Minimum Credits: 3
Maximum Credits: 3
In this course students will learn the foundational assumptions, concepts, and popular tools for applying deep learners to a wide variety of supervised and unsupervised learning problems. The course is hands-on and demonstrates the key concepts and skills through numerous programming examples in lectures, homework assignments, and projects. The course begins by introducing various optimization strategies which underlie how deep learners are trained, before moving to the proper training, validating, and tuning of deep learning methods for supervised learning problems. This portion of the course stresses how the fundamental optimization concepts impact model training. Students will also learn how deep learners relate to and are extensions of generalized linear models in order to reinforce essential supervised learning concepts. The course concludes by focusing on applying deep learning techniques to unsupervised learning problems via variational autoencoders. Multiple autoencoder architecture strategies and training approaches are demonstrated.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPINF 2223 - LARGE LANGUAGE MODELS (LLMs) AND THEIR APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
From social media posts to open government materials, LLMs are pervasive in current human society. This course traces the evolution of natural language processing from traditional rule-based systems to modern Large Language Models. Students will explore the limitations of early NLP approaches, understand the breakthroughs that enabled neural language models, and discover how the revolutionary Transformer architecture transformed the field. Students will engage in discussions on social and ethical issues associated with using LLMs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CMPINF 2105 and 2120

CMPINF 2910 - CASE STUDIES IN DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course is a project-based capstone for the Master of Data Science degree. A case study approach is taken to structuring analysis of data, communicating findings, and informing decision-making processes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CMINF 2105, 2140, 2110, 2120, 2130, and (CMPINF 2221 or CMPINF 2222 or CMPINF 2211 or CMPINF 2223); PLAN: DS-MDSC

CMPINF 2999 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Various advanced topics in computing and information will be covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Critical Care Medicine

CCM 5430 - CRITICAL CARE MEDICINE

Minimum Credits: 0
Maximum Credits: 0
The goal of this elective is to provide a multi-disciplinary experience in care of the critically ill. Rounds conducted each morning result in a plan of treatment for each day. The medical student will participate in all aspects of care of the patients in ICU. Emphasis is placed on bedside titration of care. Recognition and appropriate treatment of respiratory failure, arrhythmias, and hyperalimentation are emphasized. The student participates in cardiopulmonary resuscitations. Students participate in night call.
Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 4

CCM 5460 - 2-WEEK CRITICAL CARE MEDICINE ELECTIVE

Minimum Credits: 0
Maximum Credits: 0
This elective provides a comprehensive overview of Critical Care Medicine, featuring rotations through various ICU sub-specialties including Neuro Trauma, Neurovascular, Surgical Trauma, Abdominal Transplant, and Cardiothoracic care. Students will shadow CCM attendings during rounds and interact with key members of the critical care team, including rapid response teams (RRT), critical care nurses (CCRN), respiratory therapists (RT), and critical care pharmacists (PharmD). The goal is to offer a thorough understanding of critical care practices and team dynamics, illustrating the complexities of managing critically ill patients.
Academic Career: Medical School
Course Component: Clinical
Grade Component: S/U Basis

CCM 5475 - PICU MULTIDISCIPLINARY 2-WEEK ELECTIVE

Minimum Credits: 0
Maximum Credits: 0
This is a 2-week rotation in which students will be exposed to the invaluable interprofessional relationships and education inherent to patient care of critically ill pediatric patients in the hospital setting.
Academic Career: Medical School
Course Component: Clinical
Grade Component: S/U Basis

CCM 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CCM 5840 - CRITICAL CRE MEDICINE RESEARCH (DIRECTED STUDIES)

Minimum Credits: 0
Maximum Credits: 0
Independent Study
Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CCM 5899 - INDEPENDENT STUDY IN CRITICAL CARE MEDICINE

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

CCM 5900 - EXTRAMURAL CRITICAL CARE MEDICINE

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in critical care medicine may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM catalog with all appropriate approvals to be received before the course may be added to the student's schedule for credit.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Critical European Culture Studies

CECS 2250 - EUROPEAN SECURITY: A TRANSDISCIPLINARY SEMINAR

Minimum Credits: 3
Maximum Credits: 3
In a world shaken by war, climate change, pandemic, inflation, hunger, and rapid forced migration, questions of security take on a new level of urgency. Rather than be overwhelmed by polycrisis, this seminar will provide an opportunity to grapple actively with questions of security in a European, Transatlantic, and global context. The course will survey literature on security and securitization. As its object it will focus on the EU and European security questions, understood broadly. Participants will consider state and military questions, but we will also consider security in relation to topics like climate, economy, gender, migration, populism, among others. The goal of the seminar is to incubate a transdisciplinary research community taking up a problem, method/s, or emerging field that cuts across disciplines and that develops research on security in European and/or international context. It will intersect with a faculty research group. It will entail a combination of activities: common readings, guest speakers, a master class, teleconferences, and sharing work in progress. Participants will have the option of writing a seminar paper, developing an annotated bibliography, or undertaking a relevant project upon consultation with the instructor.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CECS 2500 - FOUNDATIONS OF CRITICAL EUROPEAN CULTURE STUDIES

Minimum Credits: 3
Maximum Credits: 3
The EU aspires to political, economic, and cultural union, making it unique among the world's globalist projects. Yet the mechanisms of cultural union remain seldom explored in the studies of the EU and within the field of Cultural Studies in general. The University of Pittsburgh is one of the few places in the world that introduce students to the methods of critical European culture studies. The course will begin by exploring the processes of European unionization that have emerged in the post-WWII era, the institutions that drive political, economic and cultural union in the contemporary EU. It will introduce students to the study of cultural policy and ask them to consider a variety of cultural forms. It will set the contemporary project of the EU in relation to longer histories of Europeanization and it will set them in relief to other models like Paneurope, the Europe of Nations, Eurasia, Eurafrica, and so on. Specific attention will be given to border regimes, migration histories, (post)colonial and broad geopolitical relations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CECS 3000 - PH.D. DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 15
Students work individually under the guidance of their faculty advisor in preparation for and during the writing of the dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Cross-Disciplinary Dental Education

DMED 5001 - DIRECTED STUDY IN PERSON-CENTERED CARE

Minimum Credits: 1
Maximum Credits: 1
A customized course of study in concepts related to person-centered care for students who transfer to the School of Dental Medicine.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DMED 5110 - FOUNDATIONS OF PERSON-CENTERED CARE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5112 - PRINCIPLES OF PROFESSIONAL PRACTICE

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5113 - FOUNDATIONS OF PERSON-CENTERED CARE LAB (BIOMEDICAL MASTERS PROGRAM)

Minimum Credits: 1
Maximum Credits: 1
This course is the lab component of course DMED 5111 Foundations of Person-Centered Care and is limited to students enrolled in the Biomedical Masters Program.
Academic Career: Graduate
Course Component: Practicum
Grade Component: ABCF

DMED 5130 - PROFESSIONALISM AND ETHICS 1

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5142 - FOUNDATIONS OF PERSON-CENTERED CARE 2

Minimum Credits: 2
Maximum Credits: 2
In this course, students will build upon foundational knowledge of person-centered care, including social and cultural factors in oral health, interpersonal communication skills, disease prevention, and evidence based care. The goal of the course is to prepare students for clinical dental practice by introducing principles of person centered care for oral health care in a clinical setting and throughout a career in dentistry. Concepts that are introduced in this course will be reinforced and expanded upon in the Foundations of Person Centered Care course series, which is also offered in the predoctoral curriculum. This course includes lectures, laboratory sessions, small group discussions, small group exercises, in-class and homework assignments. COVID-19 Modifications Due to the nature of the COVID-19 (coronavirus) pandemic, changes to this syllabus may occur. Any course modifications (such as class schedules, rotation assignments, assignments, examination formats, etc.) will be communicated to students by the course director or the Office of Academic Affairs. Students are expected to check their University email account regularly for updates. For assistance with technical difficulties, please submit an Educational Technology Services help ticket at sdmteaching@pitt.edu. Any student experiencing personal issues should contact the Office of Student Affairs for information on University support services.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5143 - PRINCIPLES OF PROFESSIONAL PRACTICE 2

Minimum Credits: 2
Maximum Credits: 2
The primary goal of the Principles of Professional Practice course series is to teach students how essential practice management concepts contribute to the development and maintenance of a successful professional dental practice. This first- and second-year course series will focus on integrating the new student practitioner into their first practice, which begins with their clinical exposure at the School of Dental Medicine. Corollaries will be made from School practice-to[1]practice opportunities as an entry-level dental professional. Noting these essential components of dental practice are multifaceted and stretch across a varied spectrum of domains, emphasis will include presenting topics from the following subjects: professional and ethical behavior and decision-making; legal and regulatory concepts; communication and behavioral management skills; customer service; models of healthcare delivery; leadership and office policy; and the dental record. Concepts that are introduced in this course series will be reinforced and expanded upon in the Successful Practice Management course series, which is offered in the third- and fourth-years of the predoctoral curriculum. Course material will be presented through lectures, in-class discussions, and assignments that relate to the clinical application of presented topics.
Academic Career: Dental Medicine

Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5144 - CARIOLOGY AND CARIES MANAGEMENT 1

Minimum Credits: 2
Maximum Credits: 2
In this course, students will be introduced to current concepts of the etiology, epidemiology, and clinical 2 prevention and management strategies of dental caries. Students will be provided with actual clinical experience in diagnosing caries in subsequent courses. Successful completion of this course will provide students with the foundational knowledge for prevention and conservative management of caries appropriate for the general dental practitioner. In addition, the students will be prepared with the operative dentistry knowledge and techniques to successfully restore the dentition utilizing composite resin materials and amalgam. Additionally, the student will learn adjunctive esthetic information and alternative treatment modalities. This course will provide the foundational knowledge to allow the student to understand and apply the basic principles of preparation design, adhesion, and finishing of composite restorations and amalgam restorations. This course includes lectures and class discussions. The accompanying laboratory course, DMED 5145, provides an opportunity for hands-on experiences in a pre-clinical environment. Attendance is mandatory for all lectures. Rationale: Caries is the most prevalent disease of children and one of the most prevalent diseases at all ages. The majority of dentists spend the majority of their patient contact time addressing caries-associated problems. Having an in-depth understanding of caries etiology, prevention, and management strategies is the foundation for ethical and appropriate patient care. This course provides for a contemporary understanding of these issues and reflects currently updated approaches to caries prevention and management (such as those now being disseminated under the title of: The International Caries Classification and Management System).
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5145 - CARIOLOGY AND CARIES MANAGEMENT 1 LAB

Minimum Credits: 3
Maximum Credits: 3
This pre-clinical lab course is given in conjunction with the lecture course (DMED 5140) in which the student will learn how to accurately diagnose and stage caries as well as restore teeth to their proper form and function. 2 In this course, students will acquire the psycho motor and instructional skills in treating Non-Cavitated, Moderate Cavitated and Extensive Cavitated (Class I, II, III, IV, V) lesions using Flouride varnish, SDF, bonded composite restorative materials and amalgam. Students will also learn how to place sealants and bases.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DMED 5146 - CONTEMPORARY CARIOLOGY: FOUNDATIONS OF PREVENTION AND INTERVENTION

Minimum Credits: 1
Maximum Credits: 1
In this course, the students will be introduced to the study of dental caries, including its etiology, pathophysiology, diagnosis, prevention, and management. Students will explore factors influencing caries development and learn evidence-based strategies for promoting oral health and effective treatment approaches. Practical sessions will include hands-on experience in collaboration with the Cariology and Caries Management 1 Lab course, allowing students to apply their knowledge in a real-world context.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5160 - PROFESSIONALISM AND ETHICS 2

Minimum Credits: 1
Maximum Credits: 1

This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5170 - CARIOLOGY AND CARIES MANAGEMENT 2

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5171 - CARIOLOGY AND CARIES MANAGEMENT 2 LAB

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DMED 5172 - APPLICATIONS OF PERSON-CENTERED CARE

Minimum Credits: 2
Maximum Credits: 2
n this course, students will work with peers in a clinical setting where they will focus on developing practical skills related to risk assessment, head and neck examination, dental examination, gingival examination, oral disease prevention, and health promotion. This course is the capstone experience of the first year of the dental curriculum, preparing students to enter the second year by applying the foundational skills acquired in Foundations of Person-Centered Care 1 and 2, as well as other courses, such as Caries Management, Practice Management, Periodontics 1, Periodontal Instrumentation, and Head and Neck Anatomy.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5173 - APPLICATIONS OF PERSON-CENTERED CARE

Minimum Credits: 3
Maximum Credits: 3
In this course, students will work with peers in a clinical setting where they will focus on developing practical skills related to risk assessment, head and neck examination, dental examination, gingival examination, oral disease prevention, and health promotion. This course is the capstone experience of the first year of the dental curriculum, preparing students to enter the second year by applying the foundational skills acquired in Foundations of Person-Centered Care 1 and 2, as well as other courses, such as Caries Management, Practice Management, Periodontics 1, Periodontal Instrumentation, and Head and Neck Anatomy.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5190 - PROFESSIONALISM AND ETHICS 3

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5212 - APPLICATIONS OF PROFESSIONAL PRACTICE 1

Minimum Credits: 2
Maximum Credits: 2
This course will build on concepts taught in the first year predoctoral program.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5230 - PROFESSIONALISM AND ETHICS 4

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5243 - APPLICATIONS OF PROFESSIONAL PRACTICE 2

Minimum Credits: 2
Maximum Credits: 2
The Applications of Professional Practice (APP) course series builds on the essential practice management concepts introduced in the Principles of Professional Practice 1 and 2 courses in the first year and contributes to the development and maintenance of a successful professional dental practice. This second-year course series focuses on applying the principles learned in the first-year curriculum to the students' own clinical practice via the submission of compliance reports designed to help their assigned clinical teammates. Team leaders will use the reporting generated from the students in this course to facilitate clinical efficiency within the clinical partnerships. Students

will also learn to navigate the electronic health record (EHR) and provide feedback to their clinical team. Students will assess the impact of key performance indicators and adherence to school compliance policies on clinical productivity metrics. Students will also complete three complete patient record audits of randomly selected patients assigned to their clinical practice team and 5 clinical practice team (CPT) reports due at specified times during the semester. In addition to learning the skills necessary to adequately interpret EHR data regarding their clinical teams, students will be exposed to a number of topics related to practice management. Noting these essential components of dental practice are multifaceted and stretch across a varied spectrum of domains, emphasis will include presenting topics from the following subjects: professional and ethical behavior and decision-making; legal and regulatory concepts; communication and behavioral management skills; customer service; models of healthcare delivery; leadership and office policy; and the dental record. Students must complete all mandated reporting and attend all scheduled team meetings to discuss their reporting with their clinical partners. Students will learn about various models of healthcare delivery and the legal, financial, and contractual obligations associated with each of those models. Students will complete an individual assessment of several employment contracts evaluating each for its beneficial characteristics and drawbacks.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5260 - PROFESSIONALISM AND ETHICS 5

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5290 - PROFESSIONALISM AND ETHICS 6

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5310 - OROFACIAL PAIN AND TEMPOROMANDIBULAR JOINT DISORDERS

Minimum Credits: 1
Maximum Credits: 1
Patients with orofacial pain (OFP) present to dental practices for treatment on a regular basis. In the United States, temporomandibular disorders (TMD) and OFP affect up to 15% of the adult population. As such, the dental student must be able to identify and appropriately manage these patients.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5330 - PROFESSIONALISM AND ETHICS 7

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.

Grade Component: Grad HSU Basis

DMED 5360 - PROFESSIONALISM AND ETHICS 8

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5370 - MULTIDISCIPLINARY CASE STUDIES

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to further develop and refine student's values, knowledge, and skills as they relate to providing person-centered care using an interdisciplinary lens that considers relevant sociocultural, clinical, biomedical, and behavioral facts and risk factors. A hallmark of the course is the integration and synthesis of knowledge learned from the various disciplines. Age, race, sex, and gender-based considerations, as well as social determinants of health, will also be addressed whenever relevant and/or appropriate. The format of the course will be online, synchronous, case-based discussions with a panel of experts from various disciplines, as appropriate to the case. Cases will be presented in a format similar to that used in the Integrated National Board Dental Examination. Opportunities for small group discussions will also be provided. Students may be given preparatory materials to review ahead of the sessions.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

DMED 5390 - PROFESSIONALISM AND ETHICS 9

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine

Grade Component: Grad HSU Basis

DMED 5440 - PRE-TREATMENT EVALUATION AND MEDICAL RISK ASSESSMENT

Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide clinical experiences in communicating with medical providers and other members of the healthcare team for pre-treatment evaluation and medical risk assessment of patients with complex health profiles. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in assessing and recognizing medical circumstances that require pre-treatment medical consultation and communicating with medical colleagues to determine medical risk and modifications to treatment, at the level of a general dentist. Students will participate in a variety of experiences to increase skills in: (a) assessing medical risk factors, (b) preparing medical consultations and communicating pertinent health information with medical colleagues, (c) interpreting the results of medical consultations, and (d) modifying oral health treatment plans based on those results.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DMED 5460 - PROFESSIONALISM AND ETHICS 11

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5490 - PROFESSIONALISM AND ETHICS 12

Minimum Credits: 1
Maximum Credits: 1
This course series will follow student progression each term through all four years of the curriculum and will assess the professional and ethical knowledge, skills, and values that the faculty members of Pitt Dental Medicine deem essential for a successful general dentist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when students are participating in didactic, preclinical, or clinical activities associated with the Pitt Dental Medicine program, including Pitt Dental Medicine activities occurring between terms.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5801 - SINGLE TOOTH DENTAL IMPLANT SURGICAL PLACEMENT

Minimum Credits: 2
Maximum Credits: 2
In this course, students will use foundational knowledge taught in Implantology I (5311) and Implantology II (5346) to effectively diagnose and treatment plan the surgical placement of a single tooth implant in ideal anatomical sites that do not require augmentative procedures. The student will interpret a cone beam CT scan of the edentulous site; plan and print a surgical guide for implant placement; virtually place the dental implant in computer software; physically place the dental implant in a CT-generated printed model of their specific patient; and finally, surgically place the dental implant in the patient, follow the patient's healing postoperatively. This course will include hands-on demonstrations and a weekly review of literature pertaining to dental implants. The course is a limited participation course of 4 students who will be paired for assisting in pre-clinical exercises and implant surgeries.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DMED 5802 - OBSTRUCTIVE SLEEP APNEA AND ORAL HEALTH

Minimum Credits: 1
Maximum Credits: 1
In this course, students will gain knowledge about obstructive sleep apnea (OSA) and upper airway constriction. Students will learn to identify the signs and symptoms associated with a constricted airway, including relevant diagnostic tests and the opportunity to experience the use of a home sleep study device. Students will learn about treatment and management approaches to address airway obstruction, including referral.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5803 - DENTAL PHOBIA CLINIC

Minimum Credits: 1
Maximum Credits: 1
Dental students currently receive comprehensive education on managing dental anxiety through DSANE 5313 (Pain and Anxiety Control) and demonstrate competency in managing anxiety with the nitrous oxide competency through Dental Anesthesiology and Oral and Maxillofacial Surgery. This selective will go further and introduce students to managing patients with moderate to severe dental anxiety using a pharmacologic approach under minimal to moderate sedation. Patients will be screened in screening clinic and OD/TP clinic using the Modified Dental Anxiety Scale and medical questionnaire. Eligible patients with moderate to severe dental anxiety will be assigned to the Dental Phobia Clinic housed in the Center for Patients with Special Needs. Following a comprehensive care model, students will be assigned patients appropriate for treatment by a predoctoral student. Treatment requiring sedation will be provided using oral anxiolysis or nitrous oxide to manage anxiety. Selective students under the supervision of a restorative faculty member will treat patients under minimal and moderate sedation, supported by the Department of Dental Anesthesiology.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DMED 5999 - INDEPENDENT CLINICAL STUDIES

Minimum Credits: 7
Maximum Credits: 7
This course is designed for clinical faculty to engage in a series of independent learning activities related to the provision of dental care.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

Cultural Studies

CLST 2006 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
This course entails the exploration of a special topic chosen by the instructor.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLST 2009 - DIRECTED STUDIES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLST 2050 - CULTURAL STUDIES COMMON SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This annual seminar focuses on a single topic crossing disciplinary and departmental boundaries. Cultural studies faculty with a broad range of research interests participate in weekly talks and discussions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Cultural Studies

Dental Anesthesiology

DSANE 2015 - SCIENTIFIC BASIS FOR CLINICAL THERAPEUTICS

Minimum Credits: 1
Maximum Credits: 1
The basis for dental therapeutics is presented in this graduate course. The course emphasizes the elements of controlled trials by critiquing published articles relevant to dental therapeutics. Pharmacologic agents of interest include local anesthetics, nonsteroidal anti-inflammatory analgesic drugs, opioid analgesics, sedatives/hypnotics and antibiotics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

DSANE 2025 - ADVANCED MODERATE SEDATION

Minimum Credits: 2
Maximum Credits: 2
This 60-hour graduate course provides comprehensive didactic and preclinical training stipulated in the American Dental Association Guidelines for the Use of Sedation and General Anesthesia by Dentists. It is designed for residents enrolled in postdoctoral training programs in periodontics, endodontics, prosthodontics, advanced general dentistry, general practice residencies and other comparable programs. Successful completion of this course, combined with documentation of twenty supervised clinical cases of moderate sedation fulfill the educational requirements for moderate sedation endorsed by the American Dental Association.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DSANE 2114 - PATH AND MANAGEMENT OF MEDICAL EMERGENCY

Minimum Credits: 2
Maximum Credits: 2
This course covers the prevention, recognition, and treatment of medical emergencies that can occur in the dental setting. Differential diagnosis is presented according to the presenting signs and symptomotology. Emphasis is placed on the proper office protocol during an emergency, including the assembly of an emergency drug kit. Experience with IV and IM techniques is included.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2242 - PRINCIPLES OF ANESTHESIA

Minimum Credits: 2
Maximum Credits: 2
This is the second course in a series of three didactic courses dealing with the philosophy and methods of pain and anxiety control in dentistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2243 - POST-DOCTORAL MODERATE SEDATION CLINIC

Minimum Credits: 2
Maximum Credits: 2
This course is designed to integrate with the didactic course series dealing with the philosophy and methods of pain and anxiety control in dentistry. In this clinical course, under the supervision of the anesthesia faculty, students will select and administer the various pain and anxiety control techniques learned in the classroom.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

DSANE 2270 - POST-DOCTORAL MODERATE SEDATION 2

Minimum Credits: 2
Maximum Credits: 2
The course will foster an appreciation for the important role of pain and anxiety control in dentistry. The resident will demonstrate proficiency in technical aspects of nitrous oxide anxiolysis, conscious sedation, patient management, and the pharmacologic use of medications. All aspects of anesthesia will be undertaken in the clinic. The resident will experience hands-on management of intravenous sedation from pre-operative evaluation to discharge.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

DSANE 2400 - INTRODUCTION TO ADVANCED ANESTHESIOLOGY 1

Minimum Credits: 1
Maximum Credits: 1
This course introduces advanced techniques in anesthesiology that apply to the dental anesthesiology resident/student entering the initial segment of advanced, post-doctoral training. This didactic instruction is to provide preliminary instruction concerning hospital and out-patient based anesthesiology that will prepare the student/resident for advanced anesthesiology beyond the pre-doctoral level.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

DSANE 2500 - INTRODUCTION TO DENTAL ANESTHESIOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

DSANE 5241 - ANESTHESIA 1: LOCAL ANESTHESIA

Minimum Credits: 2
Maximum Credits: 2
In this course, students will be introduced to local anesthesia and gain an appreciation for the important role of its use in dentistry. Areas of focus include pain management, pre-operative evaluation, pharmacology, and technique. This course includes lectures and class discussions. An opportunity for hands-on application of concepts will be provided.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5245 - LOCAL ANESTHESIA TECHNIQUE LAB

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5272 - ANESTHESIA 2: MEDICAL EMERGENCIES

Minimum Credits: 1
Maximum Credits: 1
In this course, students are provided with information pertaining to the prevention, recognition, and treatment of selected medical emergencies occurring in the dental office. Emphasis is placed on patient evaluation and prevention. Emergency drugs and equipment are specified, as well as clinical their application. Lifesaving management of the medically compromised patient is incorporated into the dental treatment plan. Course lectures will include concepts endorsed by the American Dental Association and introduce the student to resources available through the Journal of the American Dental Association. This course will offer foundational knowledge in emergency medicine which will enable the student to assess and manage patients experiencing a medical emergency in the dental office.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5311 - PATIENT MANAGEMENT: ENTERAL SEDATION

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be expected to meet the educational requirements for predoctoral dental students set forth in the October, 2007 the American Dental Associations Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students. In combination with course material presented in pharmacology, physiology, and clinical medicine, satisfactory completion of this course, along with subsequent clinical exposures, will place the student in compliance with the ADA guidelines for enteral sedation. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5313 - ANESTHESIA 3: PAIN AND ANXIETY CONTROL

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be presented with methods of pharmacologic management of pain and anxiety. It is presented as essentially two separate sections: 1) anxiety control with nitrous oxide sedation and 2) pain control with analgesic. Anxiety control encompasses current pharmacologic management in anxiety control for dentistry. This section of the course focuses on the techniques that a general practice dentist can provide in an office setting. The methods of anxiety reduction and sedation that will be presented were selected on the basis of efficacy and safety. Inhalation sedation (nitrous oxide) techniques are covered in depth. Sedation and general anesthesia with respect to the role of the dental anesthesiologist is described. Pediatric management techniques are not covered. Pain control encompasses an introduction to prescription writing and establishes prescribing protocols for both non-steroidal anti-inflammatory and opioid analgesics. Often pain medications are prescribed to the dental patient in an empirical sense; the goal of this portion of the course is to impart a clinical rational for prescribing pain medications. A method is established so that the student can make a therapeutic choice based on the needs of the patient and contemporary dental practice. A focus is placed with respect to drug diversion and responsible opiate prescribing. Atypical analgesics for oral-facial neuropathic pain will also be presented. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5315 - NITROUS OXIDE LAB

Minimum Credits: 0
Maximum Credits: 0
In this course, students will reinforce the knowledge of nitrous oxide gained didactically by engaging in hands-on use of the machines and self-experience of the medication, if desired, in a small group educational setting. This course will serve to assess preclinical competence in order to allow students to progress to the administration of nitrous oxide to dental patients. This course includes small group lab sessions.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5342 - CLINICAL MEDICINE

Minimum Credits: 1
Maximum Credits: 1
This is a graduate course in clinical medicine directed to predoctoral dental students. In this course, students will gain a better understanding of common medical conditions and their current treatment. This course will help prepare new dentists for providing dental care to the growing population of aging patients with complex medical conditions and managing these patients in conjunction with our physician colleagues. This course includes class lectures and discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5344 - MEDICAL EMERGENCIES - WISER CENTER

Minimum Credits: 0
Maximum Credits: 0
In this course, students will apply skills and knowledge in order to manage the most commonly occurring medical emergencies that may occur in the dental office. Using simulated scenarios, emphasis will be placed on airway management, medication use, emergency drug kit usage, and recognition and management of medical emergencies. Students will also acquire the experience of a team approach to responding to emergency events. This course will be offered in conjunction with the Peter M. Winter Institute for Simulation, Education & Research (WISER, www.wiser.pitt.edu).
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DSANE 5345 - NITROUS OXIDE SEDATION LAB

Minimum Credits: 0.5
Maximum Credits: 0.5
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5375 - NITIOUS OXIDE SEDATION LAB

Minimum Credits: 0.5
Maximum Credits: 0.5
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5802 - ADVANCED LOCAL ANESTHESIA TECHNIQUES

Minimum Credits: 1
Maximum Credits: 1
In this course, students will gain an appreciation for the important role of local anesthesia in dentistry. Students will develop and practice techniques in advanced and alternative delivery of local anesthesia. This course will include three lectures as well as two lab sessions. One lab session will allow students to practice intraosseous, PDL, and intrapulpal techniques on a pig model. The other lab session, an optional peer to peer experience, will allow students to practice gow gates, akinosi, mental nerve block, and infraorbital techniques. An exam on standard local anesthesia techniques must be passed prior to enrollment.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5810 - RESEARCH & WRITING IN DENTAL ANESTHESIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DSANE 5813 - CLINICAL MEDICINE FOR ORAL AND MAXILLOFACIAL SURGERY/DENTAL ANESTHESIOLOGY CANDIDATES

Minimum Credits: 1
Maximum Credits: 1
This course will provide dental students seeking advanced education in Oral and Maxillofacial Surgery and Dental Anesthesiology a superior foundation in Clinical Medicine and Pathophysiology of Disease.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DSANE 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
An individualized program of advanced studies in anesthesia.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

DSANE 5912 - CLINICAL ANESTHESIOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
This is a one year undergraduate dental course dealing with the philosophy and methods of pain and anxiety control in dentistry. Concepts of pain and anxiety, as well as, the principles of their psychologic and pharmacologic modifications are explored. Modalities ranging from non-drug and regional analgesic to enteral and parenteral sedative medication techniques are administered by the student under the supervision of the anesthesia faculty. The advantages, disadvantages, and complications associated with these techniques are compared.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DSANE 5943 - CLINICAL ANESTHESIOLOGY 3

Minimum Credits: 4
Maximum Credits: 4
This is a one year undergraduate dental course dealing with the philosophy and methods of pain and anxiety control in dentistry. Dental Microbiology

DSMIC 5941 - IMMUNOLOGY ORAL FACIAL COMPLEX

Minimum Credits: 1
Maximum Credits: 1
This course uses literature reviews, student presentation, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections. Microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies, autoimmune diseases and immunodeficiency disorders will also be discussed.
Academic Career: Dental Medicine

DENT 2007 - PROFESSIONALISM & ETHICS 6

Minimum Credits: 1
Maximum Credits: 1
This course series will follow graduate students progression each term through all years of the curriculum and will assess the professional and ethical knowledge, skills, and values by demonstration of following the established policies of SDM and enrolled graduate residency programs that the faculty members of Pitt Dental Medicine deem essential for a successful graduate specialist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when graduate students are participating in didactic and clinical activities associated with the enrolled Residency Program, including Residency activities occurring between terms.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 2008 - PROFESSIONALISM & ETHICS 7

Minimum Credits: 1
Maximum Credits: 1
This course series will follow graduate students progression each term through all years of the curriculum and will assess the professional and ethical knowledge, skills, and values by demonstration of following the established policies of SDM and enrolled graduate residency programs that the faculty members of Pitt Dental Medicine deem essential for a successful graduate specialist. This assessment includes actions displayed in all locations within the School as well as in external curricular locations when graduate students are participating in didactic and clinical activities associated with the enrolled Residency Program, including Residency activities occurring between terms.
Academic Career: Graduate

Course Component: Lecture

DENT 2019 - GRADUATE PATIENT CARE

Minimum Credits: 0
Maximum Credits: 0
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 2029 - GRADUATE PATIENT CARE - FALL

Minimum Credits: 5
Maximum Credits: 5
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 2039 - GRADUATE PATIENT CARE SPRING

Minimum Credits: 5
Maximum Credits: 5
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 2049 - GRADUATE PATIENT CARE

Minimum Credits: 0
Maximum Credits: 0
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SNC Basis

DENT 2059 - GRADUATE PATIENT CARE - SUMMER

Minimum Credits: 5
Maximum Credits: 5
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 2130 - APPLIED HEAD AND NECK ANATOMY

Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce graduate students in clinical specialties to applied (surgical) head and neck anatomy. The course is comprised of didactic and dissection components, in addition to required readings. The dissection portion is planned to meet the specific needs of the various clinical specialties.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

DENT 2150 - ETHICS IN THE DENTAL SPECIALTIES

Minimum Credits: 0
Maximum Credits: 0
The Ethics in the Dental Specialties course is designed to provide the first year advanced education student with a review of the general

principles of ethics and the application of ethical principles in the interactions between general dentists, dental specialists and the patients whose care they share. The students will be provided the opportunity to identify and work through ethical dilemmas specifically involving their chosen dental specialty.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 2201 - MASTERS RESEARCH 1

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2202 - MASTERS RESEARCH 2

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2203 - MASTERS RESEARCH 3

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2204 - MASTERS RESEARCH 4

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data, and submit a final thesis and scientific paper for peer review.

Academic Career: Graduate

DENT 3142 - INTRODUCITON TO TRANSLATIONAL RESEARCH

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

DENT 5000 - FULL-TIME DENTAL MEDICINE STUDY

Minimum Credits: 0
Maximum Credits: 0
Students who are working full-time for their doctor of dental medicine degree may register for this course.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5211 - DIAGNOSIS AND TREATMENT PLANNING 1

Minimum Credits: 1
Maximum Credits: 1
This course parallels the curricular theme of the second year, providing the opportunity to acquire and practice basic clinical skills and to prepare students to conduct comprehensive patient evaluations. Topics include: obtaining and interpreting medical, dental and medication histories; assessing the patient's health status; and assessing risk. The course will utilize previously acquired knowledge related to the examination of oral, dental and periodontal structures. Students will apply knowledge from their periodontology courses to diagnose gingivitis and periodontitis. Students will continue to develop their skills in oral disease prevention and health promotion. This course includes lecture, clinical assignments with an upperclassman, and case-based learning activities.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DENT 5242 - DIAGNOSIS AND TREATMENT PLANNING 2

Minimum Credits: 1
Maximum Credits: 1
In this course, an emphasis will be placed on assimilating historical information, identified risk factors, diagnostic testing, radiologic examination, periodontal examination, and soft and hard tissue examination in order to formulate an evidence-based, sequenced prioritized, comprehensive and individualized treatment plan that takes into account social determinants of heath, prognosis, prevention of disease and maintenance of health.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DENT 5283 - DIAGNOSIS AND TREATMENT PLANNING 3

Minimum Credits: 2
Maximum Credits: 2
In this course, second year students will be provided with an opportunity to apply foundational knowledge in diagnosis and treatment planning to a patient case. The student will work as part of a group to assess, diagnose, treatment plan and present a case to faculty and peers. Students will work within their group to write a written case report. After faculty review of the case report, each group of students will present their case orally during a 20-minute oral presentation. The presentation is followed by faculty questions. Students will also attend one implant conference to gain exposure to multi-disciplinary treatment planning and will then write a journal entry reflecting on this experience. Finally, the student's behavioral skills will be assessed as he/she discusses a treatment plan with a patient through the use of a standardized patient competency examination.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5312 - DENTISTRY FOR PATIENTS WITH SPECIAL HEALTHCARE NEEDS

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be provided with an introduction to the arena of special needs dentistry; the material presented will demonstrate the management and treatment of patients with disabilities/special healthcare needs. The primary goals of this course are to introduce the predoctoral dental student to common developmental and acquired disabilities and to provide an increased understanding regarding barriers to care for individuals with disabilities. The focus of the course is to enable the student to understand the necessary parameters of care and modifications to dental treatment to best accommodate individuals with special healthcare needs. The material presented will aid the student in assessing, planning, implementing, and monitoring treatment for patients with special healthcare needs. Speakers will include faculty members and guests from various disciplines within the University and external organizations. This course includes lectures, required assignments (readings and/or audio-video), and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DENT 5326 - SUCCESSFUL PRACTICE MANAGEMENT 1

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to manage a dental practice by promoting strategies to improve clinical productivity ethically and efficiently. It emphasizes practice management skills tied to patient care, time management, and clinical benchmarks, with a focus on Relative Value Units (RVUs) and Provider-Based Overhead (PBO). Students will self-assess clinical skills, track their progress, and receive structured guidance to meet curriculum goals.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5346 - SUCCESSFUL PRACTICE MANAGEMENT 2

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to manage a dental practice by promoting strategies to improve clinical productivity ethically and efficiently. It emphasizes practice management skills tied to patient care, time management, and clinical benchmarks, with a focus on Relative Value Units (RVUs) and Provider-Based Overhead (PBO). Students will self-assess clinical skills, track their progress, and receive structured guidance to meet curriculum goals.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5347 - SUCCESSFUL PRACTICE MANAGEMENT 2

Minimum Credits: 3
Maximum Credits: 3
The primary goal of the Successful Practice Management (SPM) course series is to teach students the value of developing effective strategies to enhance overall clinical productivity that is ethically balanced with the needs of assigned patients. In doing so, this course will follow and assess student clinical progression in their own SDM clinical practice. The course series will emphasize a business model of dental practice development focused on maximizing educational experiences for the student rather than on traditional financial-driven metrics.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

DENT 5377 - SUCCESSFUL PRACTICE MANAGEMENT 3

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to manage a dental practice by promoting strategies to improve clinical productivity ethically and efficiently. It emphasizes practice management skills tied to patient care, time management, and clinical benchmarks, with a focus on Relative Value Units (RVUs) and Provider-Based Overhead (PBO). Students will self-assess clinical skills, track their progress, and receive structured guidance to meet curriculum goals.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5383 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the areas of oral diagnosis and treatment planning, evidence-based dentistry and the treatment of adult and geriatric patients for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in diagnosing and treatment planning, in providing evidence-based care to patients and in the treatment of adult and geriatric patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in these areas.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5389 - CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of special healthcare needs dentistry for predoctoral dental students. By the end of the clinical course series, students will be able to demonstrate competence in assessing the needs of, and in providing care to, dental patients with special healthcare needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with special healthcare needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5426 - SUCCESSFUL PRACTICE MANAGEMENT 4

Minimum Credits: 6
Maximum Credits: 6
This course prepares students to manage a dental practice by promoting strategies to improve clinical productivity ethically and efficiently. It emphasizes practice management skills tied to patient care, time management, and clinical benchmarks, with a focus on Relative Value Units (RVUs) and Provider-Based Overhead (PBO). Students will self-assess clinical skills, track their progress, and receive structured

guidance to meet curriculum goals.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5440 - SENIOR CASE PRESENTATION

Minimum Credits: 2
Maximum Credits: 2
In this course, students will present a comprehensive patient case to classmates and faculty for feedback and assessment. The presentation will consist of both a written and oral component. The student will be required to provide documentation, including study models and photos, to support their patient care decisions. The student is expected to incorporate Evidenced Based Dentistry prior to establishing a treatment path, utilizing critical thinking to explore multiple treatment modalities. Upon completion of this course, students will have demonstrated the skills needed to competently evaluate treatment modalities as an entry level general dentist and to discuss a case with health professional peers and colleagues. This course includes an orientation lecture and a seminar session in which students present their final project to faculty and peers.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

DENT 5446 - SUCCESSFUL PRACTICE MANAGEMENT 5

Minimum Credits: 6
Maximum Credits: 6
This course prepares students to manage a dental practice by promoting strategies to improve clinical productivity ethically and efficiently. It emphasizes practice management skills tied to patient care, time management, and clinical benchmarks, with a focus on Relative Value Units (RVUs) and Provider-Based Overhead (PBO). Students will self-assess clinical skills, track their progress, and receive structured guidance to meet curriculum goals.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5455 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of oral diagnosis and treatment planning and in assessing outcomes of care for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in diagnosing and treatment planning and in assessing outcomes of care to dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in these areas.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5469 - CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of special healthcare needs dentistry for predoctoral dental students. By the end of the clinical course series, students will be able to demonstrate competence in assessing the needs of, and in providing care to, dental patients with special healthcare needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with special healthcare needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5478 - QUALITIES OF A GENERAL DENTIST 12

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5900 - INDEPENDENT STUDY

Minimum Credits: 0
Maximum Credits: 3
This independent study course is designed for the undergraduate dental student who desires to pursue additional knowledge in specific areas of dentistry. The content of the course is specified by the student and supervising faculty. Format is designed to encourage independent student experiences with the faculty acting in an advisory capacity with limited direct interaction.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

DENT 5905 - DENTAL TERMINOLOGY IN SPANISH

Minimum Credits: 1
Maximum Credits: 1
This Beginner Course is designed to build on an existing introductory-level background in Spanish language skills. The course sessions build on basic skills and introduces students to dental-related terminology. Students will have opportunities to practice their Spanish conversational skills, building toward the goal of being able to conduct a problem-focused dental interview with a Spanish-speaking patient. Students will learn the basics of how to interview patients (in Spanish) about common dental conditions by practicing these conversations with native speakers.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5912 - CLINICAL TEACHING PRACTICUM 2

Minimum Credits: 2
Maximum Credits: 2
Students in the ACT ARCO program will have an opportunity to apply skills learned in the prerequisite didactic courses in a clinical teaching setting.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DENT 5913 - EDUCATIONAL ADMINISTRATION

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

DENT 5915 - INTRODUCTION TO PEER TUTORING IN DENTAL EDUCATION

Minimum Credits: 2
Maximum Credits: 2

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5916 - PEER TUTORING IN DENTAL EDUCATION

Minimum Credits: 1
Maximum Credits: 1
This is a selective course which will allow participants to practice the skills necessary to provide peer tutoring as part of the School of Dental Medicine Peer Tutoring Program. This selective is open to second, third, and fourth year students. Course Goals: This course will provide an opportunity to students to practice skills in a peer-tutoring environment. The goal is to provide students with basic tools and skills necessary for peer-tutoring. Students will be able to consult on their tutoring skills with the selective course director(s), on the content with the tutoring content course director(s).
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

DENT 5920 - PRINCIPLES OF CLINICAL TEACHING

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

DENT 5921 - CLINICAL TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

DENT 5922 - APPRENTICESHIP IN CLINICAL TEACHING

Minimum Credits: 1
Maximum Credits: 1
This course provides an opportunity for fourth-year ACT ARCO students to shadow and learn from a faculty member during clinical teaching about how to create a safe learning environment in the clinic and how to navigate teaching dental students in the presence of patients.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5923 - BEHIND THE SCENES: THE ADMINISTRATIVE SIDE OF TEACHING

Minimum Credits: 1
Maximum Credits: 3
This course provides an opportunity for fourth-year ACT ARCO students to work alongside a faculty member and experience what is involved in teaching "behind the scenes", including preparing and updating instructional materials and working within a learning management system under the supervision of faculty. This course provides an additional optional experience for the ACT ARCO students to learn more about different aspects of an academic career and responsibilities of a faculty member. This experience supplements students' knowledge and experience gained in the following ACT ARCO courses that they complete during their third year: "Fundamentals of Teaching: Principles and Methods," "Principles of Clinical Teaching" and "Clinical Teaching Practicum."

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5924 - CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS

Minimum Credits: 3
Maximum Credits: 3
This is a clinical selective course offered to fourth-year dental students that wish to gain additional hands-on experience treating Patients with Special Healthcare Needs. The time commitment is one clinic session per week for one semester. The selective student will typically function as the primary care provider for patients with varying degrees of Special Healthcare Needs, often including treatment of patients who are receiving various forms of sedation. The student will also be responsible for all discussions and communications with the patient and/or family members/caregivers of these patients.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5925 - ACCELERATED CLINICAL DENTISTRY FOR PATIENTS WITH SPECIAL HEALTH CARE NEEDS

Minimum Credits: 3
Maximum Credits: 3
This is a clinical selective course offered to fourth-year students that wish to gain additional hands-on experience treating Patients with Special Healthcare Needs. The commitment time involves a minimum of 12 clinical sessions (1/2 day sessions) during the weeks between the summer semester of 3rd year and the fall semester of the fourth year (ie, summer "break"). The grade for this course will be recorded during the fall semester of the fourth year. This clinical course will be an intense and condensed version of the semester-long selective in CPSN which is typically offered in the fall or spring. The selective student will typically function as the primary care provider for patients with varying degrees of special needs, often including the treatment of patients who are receiving various forms of sedation. The student will also be responsible for all discussions and communications with the family members/caregivers of these patients.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5926 - TEACHING PRACTICUM - STANDARDIZED PATIENT FACILITATED LEARNING

Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to provide an opportunity for students to gain experience in facilitating small group learning sessions. Students will co-facilitate Standardized Patient (SP) sessions for predoctoral students in the School of Dental Medicine with a faculty mentor. In this course, students receive coaching, support, assistance, and feedback related to their co-facilitator role in first- or second-year SP sessions. Students will receive didactic instruction and complete assignments to prepare them for this role and will receive feedback from the course director as well as teaching evaluations from predoctoral students. This is beneficial for anyone interested in a career in academia.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DENT 5947 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5977 - EDUCATIONAL RESEARCH IN DENTAL MEDICINE (R)

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

DENT 5978 - KEYS TO SUCCESS: DIVERSITY, EQUITY, INCLUSION, AND BELONGING IN DENTAL EDUCATION AND PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with tools to recognize social biases and engage a diverse group of students, colleagues, and practitioners. The course will also provide a safe and welcoming environment for respectful conversations around diversity, equity, inclusion, and belonging and provide resources for understanding inclusive teaching and diversity in the curriculum.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5980 - LEADERSHIP AND CAREER DEVELOPMENT IN DENTAL EDUCATION

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

Grade Component: Grad HSU Basis

DENT 5985 - CHARTING YOUR OWN CAREER PATH IN DENTISTRY

Minimum Credits: 1
Maximum Credits: 1
This selective course is a coaching-based course to provide support as students explore career plans and identify preparatory steps. Coaching is a powerful tool to aid the career decision-making process utilizing tools and best practices from adult development, career counseling, and coaching. Coaching is partnering with student coachees in a thought-provoking and creative process that inspires them to maximize their personal and professional potential. The coaching process honors the student-coachee as the expert in their life. Coaching is different from mentoring and advising in that coaching utilizes powerful questions to elicit answers, perspectives, and strategies from the student-coachee. The course sessions are designed as group and peer coaching sessions and draw on the students' resourcefulness. The course consists of alternating group coaching sessions and peer support meetings. Group coaching sessions are designed to (1) help students discover, clarify, and align with their needs to achieve their goals, (2) encourage student/coachee self-discovery, (3) elicit student-generated solutions and strategies, and (4) offer support, encouragement, perspective, strategies to support students in achieving their desired results. Peer support meetings are designed to follow up on group coaching discussions and to facilitate input, feedback, and advice by peers. In addition to the session and meetings, students will engage in individual reflections.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

Dermatology

DERM 5380 - DERMATOLOGY CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
This elective emphasizes clinical dermatology. The student will participate in the outpatient clinics at Flak Clinic, Childrens Hospital and the VA Hospital. These activities will be complemented by grand rounds, kodachrome conference, dermatopathy conference, and journal club conference. There are lectures in the basic sciences.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

DERM 5420 - BASIC DERMATOLOGY

Minimum Credits: 0
Maximum Credits: 0
This elective emphasizes clinical dermatology. The student will participate in our outpatient clinics at Falk Clinic, Children's Hosp, and the VA Hosp. In addition, the student may participate with hospital consultations, clinical therapeutic trials, the pigmented lesion and melanoma program, the cutaneous ulceration and rehabilitation, and the technique of Mohm's microscopic-controlled excision of skin cancer. These activities will be complemented by weekly grand rounds, Kodachrome conf, dermatopath conf, and journal club conf. There are weekly lectures in basic sciences.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

DERM 5425 - ADVANCED DERMATOLOGY

Minimum Credits: 0
Maximum Credits: 0
Students are expected to develop skills necessary to independently complete a history and physical examination, identify required laboratory studies, develop a rationale differential diagnosis, and articulate and defend an appropriate treatment plan. The didactic portion will include regular participation in all dermatology department conferences and didactic sessions, and a weekly lecture and q and a session with the course director. Students are expected to formally present one patient at grand rounds and are encouraged to write a case report for publication. Evaluation is based on an exam given on the last day of the elective as well as clinical performance.
Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 4

DERM 5440 - DERMATOPATHOLOGY

Minimum Credits: 0
Maximum Credits: 0
Interact with dermatology and pathology residents as well as dermatopathology fellows and participate in lectures and weekly grand rounds. Participation in case review and sign out sessions. Additional slides available for optional independent study. Independently study at microscope available. Students attempt diagnosis of cases & present them to faculty. Students gain understanding of skin as a separate organ having unique pathobiologic responses. Acquire adequate diagnostic proficiency with response processes seen in dermatopathology. Final evaluation on overall performance.
Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

DERM 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of dermatology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

DERM 5810 - DERMATOLOGY RESEARCH

Minimum Credits: 0
Maximum Credits: 0
Research projects in dermatology are available to interested and motivated students. Project areas include 1) various aspects of wound healing; 2) skin microbiology; 3) biological behavior and causes of skin cancer; 4) dermal biochemistry; 5) epidermal cell biology; 6) clinical studies; 7) mycosis fun guides and immune modulation; 8) scleroderma fibroblast study; 9) pigmented lesions and cutaneous immunology. These activities will be complemented by departmental conferences. At the end of the project, the student will present a seminar on his/her results.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

DERM 5900 - EXTRAMURAL DERMATOLOGY

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in dermatology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Diagnostic Sciences

DIASCI 2110 - ADVANCED ORAL PATHOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course in oral pathology is to provide the student a logical approach to the differential diagnosis of oral lesions. The definitive information necessary for the establishment of a final diagnosis is then provided. The course consists of a series of lectures augmented by laboratory sessions and clinical pathologic conferences.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DIASCI 2140 - ADVANCED IMAGING

Minimum Credits: 1
Maximum Credits: 1
The course on advanced imaging reinforces the importance of right way of using technology and understanding the usage of advanced techniques like CT, MRI and ultrasound in dentistry. It also helps them to understand the digital radiography and its advantages and disadvantages over the film based technique. It helps them to choose appropriate imaging modality for treatment planning for procedures like implants. The diagnostic part of the course should help residents in describing, interpreting and developing most relevant differential diagnosis for the systemic and bone pathology that is seen on the radiographs. Literature component of the course will help them in knowing the latest research in the field and promotes ideas to develop research integrating imaging.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DIASCI 2142 - ADVANCED ORAL PATHOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
This conference provides the essential information for histologic diagnosis of oral pathologies. This individualized program provides concentrated instruction in the microscopic aspects of those oral diseases related to the specific clinical specialty in which the resident is enrolled.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DIASCI 2144 - OROFACIAL PAIN AND TEMPOROMANDIBULAR JOINT DISORDERS

Minimum Credits: 0
Maximum Credits: 0
Patients with orofacial pain present to dental practices for treatment on a regular basis. The purpose of the course is to address the knowledge gaps in OFP and TMD. The learning objectives are to provide a foundational knowledge base of orofacial pain and the different TMD, and screening, evaluation and risk assessment of TMDs and OFP. Formulating a differential diagnosis, and enabling

interprofessional, evidence-based treatment decisions and collaboration in clinical practice.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DIASCI 2191 - PATHOBIOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DIASCI 2282 - PATHOBIOLOGY 2

Minimum Credits: 2
Maximum Credits: 2
Applied pathobiology provides the venue wherein residents apply pathobiology to their field of specialization. Utilizing an investigative approach, residents identify a topic of interest and demonstrate by means of a powerpoint presentation pathobiological concepts as they apply to patient care.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DIASCI 5110 - FUNDAMENTALS OF RADIOLOGY 1

Minimum Credits: 1
Maximum Credits: 1
This course introduces the student to the basic principles of radiology. Students will continue to reinforce concepts addressed in other courses, including Dental Anatomy, Periodontics, and Cariology and Caries Management. This course offers the first-year dental student instruction in the fundamentals of theory and practice that includes discussions of the following: dental radiological physics; radiologic safety as it applies to dentistry; factors that affect the image quality of radiographs and how to prevent radiology technique or artifact errors; concepts of, and equipment used in, digital radiography. This course includes a self-paced online component (recommended lecture completion dates and test freezing dates will be posted), and mandatory in-class sessions on select topics.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DIASCI 5110 - FUNDAMENTALS OF RADIOLOGY 1

Minimum Credits: 1
Maximum Credits: 1
This course introduces the student to the basic principles of radiology. Students will continue to reinforce concepts addressed in other courses, including Dental Anatomy, Periodontics, and Cariology and Caries Management. This course offers the first-year dental student instruction in the fundamentals of theory and practice that includes discussions of the following: dental radiological physics; radiologic safety as it applies to dentistry; factors that affect the image quality of radiographs and how to prevent radiology technique or artifact errors; concepts of, and equipment used in, digital radiography. DIASCI 5140 - FUNDAMENTALS OF RADIOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
In this course, students will continue to build on the concepts addressed in the Dental Anatomy, Periodontics and Cariology courses as well as Fundamentals of Radiology 1. This course offers the first-year dental student instruction in the fundamentals of theory and practice that include the following: 1. A working knowledge of the dental radiological technique, safety, and interpretation as they apply to dentistry. 2. Concepts of intra and extra oral radiography, techniques, and anatomy. 3. A pre-clinical laboratory exercise to develop practical skills in dental x-ray procedures. 4. Small group exercises in basic radiographic interpretation of caries and periodontium to serve as the foundation for future radiographic interpretation and patient care. This course includes in-class/virtual lectures, a small group interpretation exercises, and a pre[1]clinical/shadowing exercise on radiology technique. TopHat system may be used in this class. It is the students' responsibility to download, install and register with TopHat using PITT email before start of term. Due to the evolving nature of the COVID-19 (coronavirus) pandemic, changes to this syllabus are likely to occur. Any course modifications (such as class schedules, rotation assignments, assignments, examination formats, etc.) will be communicated to students by the course director or the Office of Academic Affairs. Students are expected to check their University email account regularly for updates. For assistance with technical difficulties, please submit an Educational Technology Services help ticket at sdmteaching@pitt.edu. Any student experiencing personal issues should contact the Office of Student Affairs for information on University support services.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DIASCI 5140 - FUNDAMENTALS OF RADIOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
This course is a continuation of Fundamentals of Radiology 1. In this course, students will continue to build on the concepts addressed in the Dental Anatomy, Periodontics and Cariology courses. This course offers the first-year dental student instruction in the fundamentals of theory and practice that include the following: a working knowledge of the dental radiological technique, safety and interpretation as they apply to dentistry; concepts of intra- and extra-oral radiography, techniques and anatomy;a pre-clinical laboratory exercise to develop practical skills in the area of dental x-ray procedures; self-instruction materials that cover normal radiographic anatomy; and a working knowledge of the dental radiological interpretation as they apply to dentistry. This course includes a self-paced online component (recommended lecture completion dates and test freezing dates will be posted), in-class/online zoom sessions on select topics, and a preclinical radiology technique rotation.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DIASCI 5173 - GENERAL AND SYSTEMIC PATHOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course is organized to present the pathologic processes which underlie a variety of human disease states. Topics in general pathology include cell injury and cell death, inflammation and repair, hemodynamic disorders, neoplasia, and autoimmune, environmental, genetic, and pediatric diseases. Topics in systemic pathology include disease of vasculature, heart, kidneys, lungs, and blood. Oral implications of systemic disease are introduced. This course includes lectures and class discussions. The goal of teaching general pathology is to provide a foundation of the basic processes of disease, such as cellular pathology, inflammation and repair, fluid and hemodynamic derangements, and neoplasia. The study of metabolic deficiencies, environmental, pediatric and genetic disease processes is also included. The student should be able to understand inflammation and repair throughout the body, including the oral cavity. The goal of teaching systemic pathology to the dental student is to educate him/her in the diseases affecting specific organ systems such as cardiovascular, blood, hematopoietic, lymphoreticular and immune systems, respiratory, gastrointestinal, hepatobiliary, pancreatic, genitourinary, male reproductive, breast and female reproductive, endocrine, musculoskeletal and central and peripheral nervous systems. The student should complete the course with a fundamental knowledge of common systemic diseases. They should be able to identify how their patients diseases can affect dental treatment.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DIASCI 5213 - INTRODUCTION TO RADIOLOGY 3

Minimum Credits: 0.5
Maximum Credits: 0.5
In this course, students will continue to build on the concepts addressed in the Dental Anatomy, Periodontics and Cariology courses as well as Introduction to Radiology 1 and 2. This course offers the second year dental student instruction in the fundamentals of theory and practice that include the following: 1) a working knowledge of the dental radiological interpretation as they apply to dentistry; 2) a pre-clinical/shadowing exercise to develop practical skills in the area of dental x-ray procedures; and 3) small group exercises in basic radiographic interpretation of caries and periodontium to serve as the foundation for future radiographic interpretation and patient care. This course includes a self-paced online component (recommended lecture completion dates and test freezing dates will be posted), small group interpretation exercises, and a pre-clinical/shadowing exercise on radiology technique. In-class session is available upon request for any topics that the class would like to review with the course director.
Academic Career: Dental Medicine

Grade Component: Grad HSU Basis

DIASCI 5214 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
The practice of dentistry requires the ability to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment. Oral and Maxillofacial Pathology and Radiology are aimed at the recognition of the etiologic, clinical, radiographic, microscopic features of abnormalities, and disease processes unique to the oral perioral structures, as well as those which reflect systemic disease. Selection criteria for prescribing radiographs and advanced imaging modalities are incorporated to prescribe the right imaging and to be able to diagnose on all appropriate methods of dental related imaging. Where appropriate, treatment of oral diseases will be addressed. The course integrates material learned in the basic science curriculum, including embryology, biochemistry, histology, cell biology, and physiology, and applies it to the diseased state (pathology). Where appropriate, treatment of oral diseases will be addressed. By the end of the course, you will be able to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment, which is essential to the practice of dentistry. This course includes lectures, class discussions, and case-based learning activities.
Academic Career: Dental Medicine

DIASCI 5320 - MANAGEMENT OF DENTAL EMERGENCIES

Minimum Credits: 1
Maximum Credits: 1

In this course, students will learn the principles and procedures for the examination, diagnosis, treatment and documentation of the patient with a dental emergency. Students will be provided with numerous examples of dental emergencies that encompass the various dental disciplines. The goal of this course is to provide students with the foundational knowledge needed to properly evaluate and treat dental emergencies in an expeditious and efficient manner. Students will apply the skills acquired in this didactic course when treating patients during their clinical rotations in the Emergency Care Clinic. This knowledge and experience is intended to help the student manage their patients while in dental school, and after graduation when in a private practice setting. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DIASCI 5341 - SEMINARS IN ORAL PATHOLOGY AND ORAL MEDICINE

Minimum Credits: 1
Maximum Credits: 1
This course will help students develop diagnostic and management skills as they pertain to oral and maxillofacial pathology by building on the basic knowledge acquired in systemic and oral pathology. This course will focus on the recognition, description and management of clinical and radiographic entities which is encountered by general dentists. The course format will be clinical-pathologic correlations (CPCS) seminars. The students will be provided with cases to review.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: ABCF with +/- Values

DIASCI 5345 - SEMINARS IN ORAL PATHOLOGY AND ORAL MEDICINE

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is for the student to develop diagnostic and management skills as they pertain to oral and maxillofacial pathology, to a level of competence deemed appropriate for general dental practice. The course builds on the basic knowledge acquired previously in General and Systemic Pathology (DIASCI 5170) and Oral and Maxillofacial Pathology and Radiology (DIASCI 5214 and 5244). This course focuses on the recognition, description, diagnosis, and management of clinical and radiographic entities that may be encountered by the general dentist in private practice. Age-, race-, sex-, and/or gender-based differences in the prevalence, clinical presentation, pathophysiology, treatment approaches, and prognosis of various lesions and/or conditions will be highlighted when appropriate. Relevant histologic findings may also be discussed. The course format is primarily case-based, to serve as an appropriate substitute for a clinical rotation in oral pathology/oral medicine. Student attendance and participation are required as this will help the student develop the skills necessary to effectively and appropriately describe, diagnose and discuss 2 various pathologic lesions and conditions. Such skills are also deemed necessary for good record keeping and for effective communication with peers, other professionals, and patients.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DIASCI 5389 - CLINICAL EMERGENCY 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of emergency dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with emergent needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with emergent dental needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5459 - CLINICAL RADIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide clinical experiences in the area of oral and maxillofacial radiology for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to oral and maxillofacial radiology patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the oral and maxillofacial radiology patient.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5469 - CLINICAL EMERGENCY 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of emergency dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with emergent needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with emergent dental needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5800 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 1
This directed study course is designed for the predoctoral dental student who desires to pursue additional knowledge in specific areas of diagnostic sciences. These areas may include any of the following, but are not limited to: general, systemic, or oral pathology, or oral medicine. The content of the course is specified by the student and approved by a full-time faculty member. The teaching format is designed to teach the student specific knowledge or skills using enhanced faculty interaction and personal contact.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DIASCI 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
This course provides the student with the opportunity to independently originate, organize and complete a scientific investigation on a topic in dentistry.
Academic Career: Dental Medicine

Digital Studies and Methods

DSAM 3000 - DIGITAL STUDIES AND METHODS: SEMINAR

Minimum Credits: 3
Maximum Credits: 3

This seminar addresses the relationships between digital computing and the humanities and allied social sciences, both as a subject of both historical interest and contemporary practical concern. We engage in ongoing theoretical discussions but also fully engage with what it takes to implement interpretive research in the digital environment. Students leave this class having gained a personally significant understanding of current debates in the field of digitally-oriented interpretive research as well as having built a digital project of their own. This course serves as one of the core requirements for the graduate certificate in digital studies and methods.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

DSAM 3100 - DIGITAL STUDIES AND METHODS: PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
This course provides a studio-based, semi-structured learning environment in which students focus exclusively on producing and sharing their own, more advanced, work using digital computing within the context of the humanities and allied social sciences. In this practicum, the students begin to investigate more fully the particular digital tools and methods that seem most promising to their longer-term research agenda. It is designed as a collaboration with the university library system, co-led by and taught in digital scholarship services. This course serves as one of the core requirements for the graduate certificate in digital studies and methods.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

DSAM 3200 - DIGITAL STUDIES AND METHODS: CAPSTONE

Minimum Credits: 3
Maximum Credits: 3
This course, which serves as the final required course for the graduate certificate in digital studies and methods, will require three major efforts on the part of the student. First, the student will undertake (or substantially add to) a large-scale, independent research project that reflects the mindful use of digital technologies in their field of research that contributes meaningful scholarly knowledge. Second, they will produce an annotated portfolio of the work that they have done during the DSAM certificate that also includes methodological reflections on the use of digital methods in the humanities and allied social sciences. Finally, they will present this portfolio and their capstone work at the end of the term in a DSAM showcase. This course has prerequisites: both DSAM 3000 and DSAM 3100
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

DSAM 3999 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This course allows students to work on individual digital projects under the direction of a faculty advisor. This course requires instructor approval and is used only in exceptional circumstances for the graduate certificate in digital studies and methods.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

Doctor of Chiropractic

DC 3111 - SPINAL ANATOMY

Minimum Credits: 4
Maximum Credits: 4
This is a foundational course for chiropractic students focusing on the regional anatomy of the thoracic, lumbopelvic, and cervical spine. Anatomical structures, function and relationships of the bones, joints, muscles, blood vessels and nerves in each region are examined in

detail from both a gross and histological perspective, and as appropriate, developmental processes will be explored. Clinical correlations and applications, foundational anatomical concepts and terminology are introduced. Prosected cadavers enable observation and review of the anatomy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3112 - HUMAN FUNCTION AND METABOLISM

Minimum Credits: 6
Maximum Credits: 6
This is an integrated course covering the function and metabolism of the human body from molecules to cells to organs and organ systems. It incorporates principles and content from biochemistry, molecular biology and physiology in a continuous framework. The course begins with the nature of macro-molecules as the foundation of living structures, including their synthesis, function and degradation. This is followed by a detailed presentation of amino acids, proteins, enzymes, nucleic acids and carbohydrate and lipid metabolism. Next, the biology and microanatomy of cells and tissue types, their structure and function are discussed as a prelude to the study of homeostasis, homeostatic systems, and the function and physiology of tissue and organ systems. Throughout the course, clinical correlations and examples are included allowing for a deeper understanding and appreciation of the nature of molecular, biochemical and physiological regulation of function and metabolism in health and disease. The goal is to enable students to integrate basic science principles into their understanding of many common clinical conditions and presentations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3113 - GROSS ANATOMY I (FOUNDATIONS OF MUSCULOSKELETAL AND THORACIC ANATOMY)

Minimum Credits: 4
Maximum Credits: 4
This is a foundational course for chiropractic students focusing on the regional anatomy of the back, upper and lower extremities, and thorax, with an emphasis on osteology of the entire skeleton. Anatomical structures, function and relationships of the bones, joints, muscles, blood vessels, nerves, and viscera in each region are examined in detail from both a gross and histological perspective, and as appropriate, developmental processes will be explored. Clinical correlations and applications, foundational anatomical concepts and terminology are introduced. Prosected cadavers enable observation and review of the anatomy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3115 - NEUROSCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth study of the structure and function of the nervous system. It includes the role of the nervous system in regulating human health and homeostasis; the role of the nervous system in maintaining balance and posture, and the pathophysiology involved in disorders of gait, posture and balance; central and peripheral nervous system plasticity; the neurophysiology of pain and pain mechanisms; and essentials of physiological psychology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3116 - GROSS ANATOMY

Minimum Credits: 5
Maximum Credits: 5
This course will be divided into both lectures and laboratories exploring, in detail, the gross anatomy of the human body. Small group facilitated discussions provide for the clinical correlation, context, and relevance of the structures being studied. Clinical examples will be used throughout the course enabling the student to integrate basic science information into a clinical context. Wherever possible, pathologic anatomy will be presented and discussed. The laboratories will include the use of dissected human cadavers and prosections.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3117 - CLINICAL MICROBIOLOGY AND IMMUNOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course has two major components. Clinical microbiology will be presented to cover bacteriology, mycology, and virology, including the major etiological agents responsible for global infectious diseases. The course focuses on key clinical topics such as common viral diseases, meningitis, streptococcal infections, pneumonia, diphtheria, tetanus, enteric infections, anaerobic infections, and tuberculosis. The goal is to provide future chiropractors with the knowledge to enhance their problem-solving diagnostic skills as well as to appreciate their role as health care team members in diagnosing and preventing infectious disease. The immunology section covers principles of immunology including the development of the immune system, immune system disorders, and the role of immunization in the prevention of infectious diseases. Students will explore the role of the chiropractic profession as advocates of the American public health system.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3118 - PATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course covers the general principles of pathology, including the nature of inflammation and healing, and the reaction of cells and tissues to injury, infection, radiation, metabolic disturbances and degeneration. The nature of neoplasms, hypersensitivity reactions, autoimmune disease and deficiency diseases will be covered, as well as organ and tissue-specific pathology. Emphasis will be given to conditions relevant to clinical chiropractic practice. Weekly small group facilitated discussions will provide for the clinical correlation, context, consequences, and relevance of the pathology and pathophysiology being studied.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3119 - GROSS ANATOMY II (VISCERAL, HEAD AND NECK ANATOMY)

Minimum Credits: 5
Maximum Credits: 5
This course will be divided into both lectures and laboratories exploring, in detail, the gross anatomy of the neck, head, abdomen, pelvis, perineum, and posterior abdominal wall. Anatomical structures, function and relationships of the bones, joints, muscles, blood vessels, nerves and viscera are examined in detail from both a gross and histological perspective, and as appropriate, developmental processes will be explored. Clinical examples will be used throughout the course enabling the student to integrate basic science information into a clinical context. Wherever possible, pathological anatomy will be presented and discussed. The laboratories will include the use of prosected cadavers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3131 - INTRODUCTION TO DIAGNOSTIC IMAGING

Minimum Credits: 1
Maximum Credits: 1
A variety of imaging modalities will be discussed, with a focus on the normal appearance of the spine and pelvis on conventional radiography. Conventional radiography is commonly used in chiropractic offices. Foundational understanding of the appropriate clinical use of diagnostic imaging and the fundamental process of how conventional radiographs are produced and interpreted for diagnosis. In addition to the normal radiographic appearance of skeletal structures, this course will also introduce an approach to evaluating imaging studies as well as basic mensuration procedures which are used to aid in the identification and diagnosis of prevalent spine related disorders. Radiography decision-making will be highlighted.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3132 - THE PATIENT INTERVIEW

Minimum Credits: 1
Maximum Credits: 1
Highlighting the biopsychosocial model, this course will focus on the essential elements of the chief complaint, past, social, and family histories in order to form a rational differential diagnosis list. Additionally, the student will learn how taking a thorough history is essential to creating a patient problem list beyond their chief complaint as a holistic approach to health care. Students will become facile in motivational interviewing skills. The use of simulated patients will allow students to receive formative feedback as they develop this essential component of clinical reasoning.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3133 - DIAGNOSTIC IMAGING I

Minimum Credits: 1
Maximum Credits: 1
Identification of soft tissue structures of the head, neck, chest, abdomen, and pelvis seen on plain film radiography. Basic anatomy of these regions seen on computed tomography and magnetic resonance imaging is also studied. Opportunities to practice, self-quiz, and apply knowledge to accurately identify anatomical structures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3134 - PRINCIPLES OF DIFFERENTIAL DIAGNOSIS

Minimum Credits: 2
Maximum Credits: 2
This course will introduce and reinforce the importance of differential diagnosis within the professional responsibilities of the chiropractor. Specifically, this course will place emphasis on the need for chiropractors to differentiate between plausible conditions of the neuromusculoskeletal system that are amenable to conservative care and diseases which may require co-management with or referral to other health care providers. Students will get hands on experience in differential diagnosis through the use of simulated patients.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3135 - DIAGNOSTIC IMAGING II

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with an in-depth understanding of the diagnostic imaging techniques used to assist diagnosis of thoracic and lumbopelvic spine disorders such as fractures, rib joint dysfunction, disc herniation, scoliosis, lumbar disc herniation with radiculopathy, central canal stenosis, and axial spondyloarthritis. Students will learn to interpret x-rays, MRIs, and CT scans, as well as understand the clinical implications of their findings. Through case studies and hands on practice/simulations, students will develop the skills necessary to effectively communicate imaging findings to patients and other health care professionals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3136 - CLINICAL PAIN CLASSIFICATION AND PHENOTYPING

Minimum Credits: 2
Maximum Credits: 2
This course will provide students with a comprehensive understanding of the mechanisms underlying pain perception, modulation, and chronic pain conditions. Through lectures, case studies, and interactive discussions, students will explore the biopsychosocial model of pain, the role of central sensitization in chronic pain, and the impact of psychological and social factors on pain perception. Students will also learn the importance of evidence-based pain classification and treatment approaches for patients with various painful conditions, with a focus on interdisciplinary and collaborative care.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3137 - MEDICAL SCREENING & DIAGNOSIS: CHEST AND ABDOMEN

Minimum Credits: 2
Maximum Credits: 2
This course will introduce students to medical screening and the physical examination of patients, starting with the basics of examination including professionalism, communication (including trauma-informed communication), draping, cultural considerations and vital signs. The proper use of the stethoscope and sphygmomanometer will be taught as well as the skills of percussion and auscultation. This course includes cardiac, vascular, pulmonary and abdominal examinations, with consideration of screening for abnormalities requiring urgent attention or referral. When needed, simulators and simulations will be used to assist in recognizing abnormal heart, lung, and abdominal sounds and clinical findings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3151 - CLINICALLY RELEVANT PALPATION

Minimum Credits: 1
Maximum Credits: 1
This course will teach the foundational examination skills of observation and palpation instructing the student in the identification of clinically relevant osseous landmarks and soft tissues of the spine and extremities. Additionally, palpatory techniques of soft tissues that hold clinical relevance in prevalent conditions of the spine and extremities in chiropractic practice will be taught.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3152 - INTRODUCTION TO THE CHIROPRACTIC PROFESSION AND PRIMARY SPINE CARE

Minimum Credits: 2
Maximum Credits: 2
This is an introductory course to the chiropractic profession. It covers the history of manipulative therapy from antiquity to the present, with an emphasis on the pre-history and history of the chiropractic profession. Also included are a general introduction to the profession and its practice, nationally and internationally; its educational, political and sociological context and relationship to the other health professions; the course includes a discussion of key historical figures in the development of the chiropractic profession, and factors influencing the continued development and evolution of the profession around the world. The course concludes with a discussion of the role of the chiropractor as a primary spine provider.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3153 - EVIDENCE BASED PRACTICE I

Minimum Credits: 2
Maximum Credits: 2
This class will introduce the basic principles of evidence-based practice and promote information mastery by using subject specific databases. Student engagement will focus on translating patient health histories from Clinical Practicum I into a clinical research (PICO) question while employing appropriate types of sources and research. Health literacy will be introduced to students through self-reflection of their role as future practitioners and members of the health care system.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3154 - INTRODUCTION TO CLINICAL REASONING

Minimum Credits: 2
Maximum Credits: 2
This course will introduce students to the clinical reasoning process, through discussions of actual case studies. The course illustrates the steps and logic used in the clinical and diagnostic reasoning process. Occasionally, standardized patients or actual patients may be present during a clinical case conference.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3155 - MANUAL THERAPY PSYCHOMOTOR SKILL DEVELOPMENT

Minimum Credits: 1
Maximum Credits: 1
This laboratory course will promote the development of safe and effective psychomotor adjustive skills to prepare the student for adjusting classes. Instruction will focus on appropriate body mechanics through adjustive speed impulse drills and strength and endurance training of the core and shoulder. The use of adjustive tissue and joint pretension will be presented and force-sensing technology will be incorporated to provide immediate feedback in this and other skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3156 - SPINAL AND TISSUE BIOMECHANICS

Minimum Credits: 2
Maximum Credits: 2
This course will describe the functional anatomy, kinetics, and kinematics of the spine and pelvis. An introduction to gait biomechanics, mechanistic research, and treatment principles will be provided. Focusing on the biomechanical properties of muscles, nerves, and connective tissue, tissue injury and repair will be highlighted. Other topics in this course include stress-strain curves, length-tension relationships, hysteresis, types of loads and forces, and the response of various types of tissue. Additional emphasis is placed on prevalent conditions of the spine in chiropractic practice.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3157 - SOFT TISSUE MANIPULATION

Minimum Credits: 1
Maximum Credits: 1
Basic principles of assessing and treating the soft tissue structures of the body. Micro-lectures present evidence-based rationale, when available, for each of the treatments presented. Hands-on skills include trigger point therapy, instrument-assisted soft tissue manipulation, and muscle stretching techniques. Professional communication skills and management plans as they pertain to acute versus chronic conditions will be introduced.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3158 - EVIDENCE BASED PRACTICE II

Minimum Credits: 2
Maximum Credits: 2
This course will explore the science of health care, beginning with an overview of the types of science and study designs commonly conducted in health services research. Specific focus will be given to primary clinical and systematic reviews of diagnosis and therapeutic effectiveness studies, harm, and prognosis. Specifically, students will demonstrate the ability to search for, select, critically appraise, interpret the results, and ultimately decide the value of primary studies. Students will utilize accepted critical appraisal methods to identify and understand the strengths, limitations, biases, and results of primary data and higher-level designs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3159 - THORACIC & LUMBOPELVIC SPINE RELATED DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course provides the diagnostic and therapeutic knowledge necessary for the assessment and management of injuries, defects, or disorders of the thoracic spine and lumbopelvic spine including those which are associated with upper extremity symptoms. Discussion of mechanical, congenital, or traumatic and neuromusculoskeletal disorders affecting the thoracic spine as well as its adjacent soft tissues are emphasized. Topics will center on conservative management options and the current evidence basis for treatment effectiveness.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3160 - EXAMINATION OF THE THORACIC AND LUMBOPELVIC SPINE

Minimum Credits: 2
Maximum Credits: 2
This hands-on laboratory will focus on learning the physical examination skills necessary to evaluate and diagnose prevalent conditions of the lumbar spine and pelvis. Focus will be placed on learning both low- and high-index neurological examination procedures and high payoff, evidence-based orthopedic tests. Case simulations will be central to enhancing the student's ability to conduct a problem-focused examination with sound clinical reasoning.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3161 - THORACIC & LUMBOPELVIC MOBILIZATION AND MANIPULATION

Minimum Credits: 2
Maximum Credits: 2
This hands-on laboratory develops and applies the anatomical, biomechanical, and pathophysiologic basis for chiropractic adjustive therapy. Topics include adjustive technique terminology, thoracic adjusting mechanics, adjusting contraindications/complications, adjustive therapy decision analysis, adjustive treatment guidelines and safe application of chiropractic adjustments. Adjustive techniques include prone, supine, seated and standing procedures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3162 - REHABILITATIVE EXERCISE: THORACIC & LUMBOPELVIC SPINE

Minimum Credits: 1
Maximum Credits: 1
This hands-on laboratory provides evidence-based approaches related to active care of patients with prevalent thoracic spine related disorders. Supported by Thoracic Spine Related Disorders, this lab will focus on, among other topics, stretching, strengthening, restoration of ideal breathing mechanics and development of core stability, parascapular stabilization, thoracic mobility, postural correction, Schroth exercises, lumbar stabilization, and pelvic floor exercises.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3163 - CLINICAL REASONING FOR THE PRIMARY SPINE PROVIDER

Minimum Credits: 1
Maximum Credits: 1
This course will focus on using standardized patients to teach students the skills necessary for diagnosing and managing common disorders of the lumbar spine and pelvis. Through interactive case studies, students will learn to recognize and interpret clinical signs and symptoms, as well as order and interpret relevant diagnostic tests. Students will also develop treatment plans and management strategies for patients with conditions such as disc herniation with radiculopathy, central canal stenosis, and sacroiliac joint dysfunction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3164 - EVIDENCE BASED PRACTICE III

Minimum Credits: 2
Maximum Credits: 2
In this course, students will focus on critical appraisal of systematic reviews, clinical guidelines, prognosis, and harm studies. This course

will place special emphasis on hands-on practice and the application of key critical appraisal concepts to ensure accurate interpretation of study outcomes. Students will utilize accepted critical appraisal methods to identify and understand the strengths, limitations, biases, and results of primary data and higher-level designs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3171 - CLINICAL PRACTICUM I

Minimum Credits: 1
Maximum Credits: 1
Students begin their clinical education with a half-day per week of observation experience in one of the chiropractic clinical education facilities. This may be augmented with multidisciplinary observation within UPMC and the Pittsburgh VA. The goal of this experience is to become familiar with the nature of chiropractic practice. As a preparation for this experience, students will attain certification in HIPAA and CPR/AED. Students maintain a log of their clinical experiences (throughout the eight terms).
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3172 - CLINICAL PRACTICUM II

Minimum Credits: 1
Maximum Credits: 1
Students continue their clinical education with a half-day per week of observation experience in one of the chiropractic clinical education facilities. This may be augmented with multidisciplinary observation within UPMC and the Pittsburgh VA. The goal of this experience is to become familiar with clinical reasoning in chiropractic practice. Students will be expected to continue to maintain a log of their clinical experiences throughout the 8 terms.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3173 - CLINICAL PRACTICUM III AND COMPREHENSIVE CLINICAL EXAM

Minimum Credits: 1
Maximum Credits: 1
Students continue their clinical education with a half-day per week of observation experience in one of the chiropractic clinical education facilities. This may be augmented with multidisciplinary observation within UPMC and the Pittsburgh VA. The goal of this experience is to develop clinical reasoning skills through observation and occasional clinical assisting. Students will continue to maintain a log of their clinical experiences throughout the 8 terms.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: Restricted to Doctor of Chiropractic (CHIRO-DCH)

DC 3231 - DIAGNOSTIC IMAGING III

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with an in-depth understanding of the diagnostic imaging techniques used to assist diagnosis of prevalent disorders of the cervical spine such as disc herniation with radiculopathy, spondylosis with or without myelopathy. Students will learn to interpret x-rays, MRIs, and CT scans and understand the clinical implications of their findings. Through case studies and hands on practice/simulations, students will develop the skills necessary to effectively communicate imaging findings to patients and other health

care professionals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3232 - CLINICAL LAB DIAGNOSIS

Minimum Credits: 1
Maximum Credits: 1
This course introduces clinical laboratory test interpretation, including hematology, blood chemistry, urinalysis, and serology. Students will learn the appropriate use of clinical laboratory tests that can be performed in the office as well as appropriate methods of specimen collection and handling. Students discuss the interpretation of clinical laboratory findings in selected clinical cases in a weekly seminar. Emphasis is placed on relevancy to chiropractic practice and on clinical reasoning skills. Students will also be asked to select their own cases from the medical literature for small group discussions as part of the weekly activity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3233 - CLINICAL PHARMACOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course is a survey of general pharmacology and toxicology, with particular focus of medications frequently encountered in chiropractic practice, notably anti-inflammatories, analgesics, muscle relaxants, and antibiotics. Additionally, students will be given an overview of commonly prescribed antidepressants, antacids, biologics, and disease modifying anti-rheumatologic drugs. Current issues related to chiropractic and pharmacology (e.g. how chiropractic care can positively impact the opioid crisis) will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3234 - MEDICAL SCREENING & DIAGNOSIS: HEAD AND NECK

Minimum Credits: 2
Maximum Credits: 2
This course continues with the skills of physical examination of the head and neck, including the head, eyes, ears, nose and throat, thyroid gland and regional lymphatic tissue. Students will learn the proper use of an ophthalmoscope and otoscope to recognize common abnormalities of the eyes and ears. The principles of performing a cranial nerve examination will be introduced and practiced during the course. This course also includes an overview of the examination of the skin, hair, and nails, including features of the most common dermatological conditions. Examination findings requiring urgent medical attention or referral are emphasized. When appropriate simulators and simulations will be used to assist in recognizing normal and abnormal findings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3235 - CLINICAL NEUROLOGY

Minimum Credits: 3
Maximum Credits: 3
The lecture portion of this course presents a survey of neurological diseases, focusing on those with lesions of the brain and spinal cord. Diseases will be categorized into cerebrovascular disorders, balance disorders, seizure disorders, sleep disorders, congenital disorders, infections, neoplasms, demyelinating diseases, progressive neurologic disorders, traumatic brain injury, and spinal cord injury. Emphasis will be placed on relevance to chiropractic practice and differential diagnostic skills. The laboratory portion of this course will focus on the advanced neurological examination. When possible, this course will correlate with Clinical Observation V.
Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3236 - DIAGNOSTIC IMAGING IV

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with an in-depth understanding of the diagnostic imaging techniques used to assist diagnosis of prevalent disorders of the extremity joints. Students will learn to interpret x-rays, MRIs, MSK ultrasound, and CT scans and understand the clinical implications of their findings. Through case studies and hands on practice/simulations, students will develop the skills necessary to effectively communicate imaging findings to patients and other health care professionals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3251 - CERVICAL SPINE RELATED DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course will provide the diagnostic and therapeutic knowledge necessary for the assessment and management of injuries, defects, or disorders of the cervical spine including those associated with upper extremity symptoms. Mechanical, congenital, or traumatic and neuromusculoskeletal disorders affecting the cervical spine as well as its adjacent soft tissues will be discussed. Topics will center on conservative management options and the current evidence basis for treatment effectiveness.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3252 - EXAMINATION OF THE CERVICAL SPINE

Minimum Credits: 2
Maximum Credits: 2
Concordant with Cervical Spine Disorders, this hands-on laboratory will focus on learning the physical examination skills necessary to evaluate and diagnose prevalent conditions of the cervical spine. Focus will be placed on learning both low- and high-index neurological examination procedures, including the cranial nerve examination, and high payoff, evidence-based orthopedic tests. Case simulations will be central to enhancing the student's ability to conduct a problem-focused examination with sound clinical reasoning.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3253 - CERVICAL MOBILIZATION AND MANIPULATION

Minimum Credits: 2
Maximum Credits: 2
This hands-on laboratory develops and applies the anatomical, biomechanical, and pathophysiologic basis for chiropractic adjustive therapy. Topics include adjustive technique terminology, thoracic adjusting mechanics, adjusting contraindications/complications, adjustive therapy decision analysis, adjustive treatment guidelines and safe application of chiropractic adjustments. Adjustive techniques include prone, supine, seated and standing procedures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3254 - REHABILITATIVE EXERCISE: CERVICAL SPINE

Minimum Credits: 1
Maximum Credits: 1
This hands-on laboratory will introduce evidence-based approaches related to active care of patients with prevalent cervical spine disorders. Supported by Cervical Spine Related Disorders, this lab will focus on, among other topics, stretching, strengthening, McKenzie principles of classification and therapy, and neuromobilization.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3255 - CLINICAL REASONING FOR THE PRIMARY SPINE PROVIDER 2

Minimum Credits: 1
Maximum Credits: 1
This course will focus on using case simulations to teach students the skills necessary for diagnosing and managing common disorders of the cervical spine. Through interactive case studies, students will learn to recognize and interpret clinical signs and symptoms and order relevant diagnostic tests. Students will also develop treatment plans and management strategies for patients with conditions such as whiplash (sprain/strain), postural syndrome, disc herniation with radiculopathy, and cervical spondylosis with or without myelopathy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3256 - NUTRITION IN CHIROPRACTIC PRACTICE

Minimum Credits: 2
Maximum Credits: 2
This course covers the role of nutrition in the maintenance of health and the prevention and treatment of disease, as well as the role that nutritional supplementation and therapy may play in chiropractic practice. General principles of nutrition and nutrition therapy will be covered, including macronutrients and micronutrients, dietary assessment, and controversies in nutritional therapy. Weekly case-based discussions provide for integration of clinical, laboratory and dietary data in the management of patients with metabolic syndrome, chronic disorders, and degenerative disorders. The emphasis is on relevancy to chiropractic practice and the complementary role of nutritional therapy in chiropractic practice.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DC 3271 - CLINICAL PRACTICUM IV

Minimum Credits: 2
Maximum Credits: 2
Students continue their clinical education with a full day per week of experience in one of the chiropractic clinical education facilities. This will be augmented with multidisciplinary observation within UPMC and the Pittsburgh VA. The goal of this experience is to develop clinical reasoning skills through observation and participation in the history and examination of patients, as well as assisting with the treatment of patients. Students will continue to maintain a log of their clinical experiences throughout the 8 terms.
Academic Career: Graduate
