University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Affirmative Action, Diversity and Inclusion, Pamela W. Connelly, Associate Vice Chancellor, 500 Craig Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this policy, please refer to Procedure 07-01-03.

About the University of Pittsburgh

The University of Pittsburgh is an internationally respected center of learning and research, offering exceptional educational opportunities in the humanities, sciences, and professions. A state-related, coeducational institution, the University of Pittsburgh's Pittsburgh campus offers a multitude of degree-granting and other programs housed in 16 undergraduate, graduate, and professional schools. The University system includes the Pittsburgh campus and four regional campuses at Bradford, Johnstown, Greensburg, and Titusville; the regional campuses offer undergraduate programs only.

Mission

The University of Pittsburgh, founded in 1787, is one of the oldest institutions of higher education in the United States. As one of the nation's distinguished comprehensive universities, the resources of the University constitute an invaluable asset for the intellectual, economic, and social enrichment of Pennsylvania, while the international prestige of the University enhances the image of Pennsylvania throughout the world.

The University's mission is to:

- Provide high-quality undergraduate programs in the arts and sciences and professional fields, with emphasis upon those of special benefit to the citizens of Pennsylvania;
- Offer superior graduate programs in the arts and sciences and the professions that respond to the needs of Pennsylvania, as well as to the broader needs of the nation and the world;
- Engage in research, artistic, and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavor;
- Cooperate with industrial and governmental institutions to transfer knowledge in science, technology, and health care;
- Offer continuing education programs adapted to the personal enrichment, professional upgrading, and career advancement interests and needs of adult Pennsylvanians; and
- Make available to local communities and public agencies the expertise of the University in ways that are consistent with the primary teaching and research functions and contribute to social, intellectual, and economic development in the Commonwealth, the nation, and the world.

The trustees, faculty, staff, students, and administration of the University are dedicated to accomplishing this mission, to which they pledge their individual and collective efforts, determined that the University shall continue to be counted among the prominent institutions of higher education throughout the world.

History

The University began in the Pennsylvania wilderness as the Pittsburgh Academy in 1787, the year the U.S. Constitution was adopted. Thirty-two years later, the Pittsburgh Academy became the Western University of Pittsburgh, and in 1908, the school changed its name to the University of Pittsburgh.

The recognition of graduate study at the University of Pittsburgh began with the awarding of Master of Arts degrees in 1836. By 1870, over 30 MA degrees had been awarded. These degrees were conferred for study beyond the Bachelor of Arts degree. In 1884, Chancellor Milton Goff set up a two-year professional study program leading to either a Master of Philosophy (predecessor of the Master of Science degree) or a Master of Arts degree and a three-year program leading to a Doctor of Philosophy degree. Before admission to these programs, each student was required to show proficiency in three areas of study. Both master's and doctoral candidates were required to prepare and defend theses.

In 1906, new rules were formulated for graduate study, requiring students to be in residence and requiring the completion of one year of study or 30 credits for the master's degree and three years or 90 credits for the doctoral degree. The catalogs of 1908 and 1909 announced the establishment of the Graduate School with five departments offering courses for the Doctor of Philosophy degree. These departments, plus five others, offered courses for the Master of Arts degree.
In 1910, a faculty committee drafted proposals, adopted by the board of trustees in 1913, making the Graduate School an independent administrative unit of the University and authorizing the selection of a Graduate Council. The Graduate School was grouped into three divisions (Humanities, Social Sciences, and Natural Sciences) in 1947. Until 1956, the administration of graduate study was the responsibility of the dean of the Graduate School and the Graduate Council. At that time, the individual schools and the three divisions were given direct administrative responsibility for their graduate programs in accord with the regulations established by the University Council on Graduate Study—formerly the Graduate Council. In 1968, the dean of the Graduate School retired from his administrative role, and the position he had held was discontinued. General responsibility for the University's graduate programs was assigned to the provost pending reorganization of the University's graduate structure. The University Council on Graduate Study, the University administration, and members of the Graduate Faculty cooperated in drafting a proposed reorganization of graduate study, which was approved by written ballot by the entire Graduate Faculty and, in turn, accepted by Chancellor Wesley Posvar. This organizational structure became effective July 1, 1971, and is still the official structure.

Thus, during the 200-plus year history of the University, graduate education has grown to encompass the Dietrich School of Arts and Sciences and all 13 of the professional schools, which share a commitment to meet the nation's need for well-educated researchers, scholars, and leaders of professions and the tri-state region's need for trained professionals.

A private institution for most of its past, the University of Pittsburgh became state-related in 1966, establishing a relationship with the Commonwealth of Pennsylvania that continues to benefit both partners. Today, as an elected member of the prestigious Association of American Universities, the University of Pittsburgh claims its place among the top public research universities in the nation.

**Accreditation**

The University of Pittsburgh is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, (267) 284 - 5000. In addition, programs may be accredited by discipline-specific accrediting bodies. See Schools, Departments, and Programs section of this catalog for this information.

**Web Address**

For more information on the University of Pittsburgh, see the University's Web site at www.pitt.edu.

**Organization of Graduate and Professional Education at the University**

While the University Council on Graduate Study (www.pitt.edu/~graduate/ucgs.html), acting for the Graduate Faculty, develops minimum standards for graduate work throughout the University, the immediate responsibility for developing and administering graduate programs is assigned to the deans and Graduate Faculty members of the several schools and the Dietrich School of Arts and Sciences. This responsibility applies both to the traditional MA, MS, and PhD programs and to programs leading to advanced professional degrees, except for first-professional degrees (i.e., the MD, JD, LLM, PharmD, and DMD). The provost has responsibility for the general supervision of graduate and professional programs, including first-professional degree programs, throughout the University, giving leadership to the deans and faculties in maintaining high standards of instruction and research.

Faculty are appointed to the Graduate Faculty by the provost upon recommendation by the dean on the basis of an appraisal by the faculty of a department or other appropriate faculty group. Graduate Faculty are competent in graduate instruction and in supervision of student research at all levels and are active in advancing knowledge through their own research.
Administrative Officers, Schools, and Campuses

Administrative Officers of the University of Pittsburgh

Patrick D. Gallagher, PhD, Chancellor and Chief Executive Officer
Ann Cudd, PhD, Provost and Senior Vice Chancellor
Eva Tansky Blum, JD, Chairperson of the Board of Trustees
Arthur S. Levine, MD, Senior Vice Chancellor for Health Sciences and Dean of the School of Medicine
Geovette E. Washington, JD, Senior Vice Chancellor and Chief Legal Officer
Arthur G. Ramicone, MBA, Senior Vice Chancellor and Chief Financial Officer
Kathy W. Humphrey, PhD, Senior Vice Chancellor for Engagement, Chief of Staff and Secretary of the Board of Trustees
Cynthia C. Moore, JD, Deputy Secretary of the Board of Trustees
Greg Schuler, MBA, Chief Investment Officer
Paul Lawrence, MBA, Treasurer

Deans and Presidents of the University of Pittsburgh

Lawrence Feick, Interim President, University of Pittsburgh at Bradford and University of Pittsburgh at Titusville
Arjang Assad, PhD, Dean, Joseph M. Katz Graduate School of Business and College of Business Administration
Paul Cohen, PhD, Dean, School of Computing and Information
Bernard Costello, DMD, PhD, Dean, School of Dental Medicine
Anthony Delitto, PhD, Dean, School of Health and Rehabilitation Sciences
Donald S. Burke, PhD, Dean, Graduate School of Public Health
Kathleen Blee, PhD, Dean, Kenneth P. Dietrich School of Arts and Sciences and the College of General Studies
Amy Wildermuth, JD, Dean, School of Law
Elizabeth Farmer, PhD, Dean, School of Social Work
Jacqueline Dunbar-Jacob, PhD, Dean, School of Nursing
James Martin, PhD, Dean, John A. Swanson School of Engineering
John T. S. Keeler, PhD, Dean, Graduate School of Public and International Affairs
Patricia D. Kroboth, PhD, Dean, School of Pharmacy
Valerie Kinloch, PhD, Dean, School of Education
Arthur S. Levine, MD, Dean, School of Medicine
Sharon P. Smith, PhD, President, University of Pittsburgh at Greensburg

Jem Spectar, PhD, President, University of Pittsburgh at Johnstown

Brian A. Primack, PhD, Dean, University Honors College

**Board of Trustees of the University**

The Board of Trustees is responsible for advancing the purposes of the University; promoting and protecting its independence, academic freedom, and integrity; and enhancing and preserving its assets for the benefit of future students and society at large. In addition, because the University of Pittsburgh is a state-related institution, the trustees ensure that Pitt meets its obligations both to the Commonwealth of Pennsylvania and to society generally.

General administrative, academic, and management authority is delegated to the chancellor. However, the board retains ultimate responsibility for all University affairs.

There are three or more regular meetings of the Board of Trustees each year, including an annual meeting. Special meetings also may be called. Much of the board’s work is carried out by committees; many of these committees include faculty, staff, and students as non-voting representatives.

Eva Tansky Blum, Chairperson

Patrick Gallagher, Chancellor of the University of Pittsburgh, Member Ex-Officio (voting)

Academic Regulations

Advising

The quality of education that graduate students receive is greatly enhanced with good academic advising at all stages of their program. Given the diversity of these needs, each school and program must determine the best way to provide these services. Each program should have a document describing its view of good graduate advising practices and a clear policy on how good graduate advising is assessed and rewarded. For more information on academic advising at the graduate level, see Elements of Good Academic Advising. Students are encouraged to consult with the individual school for school-specific advising services.

Allowable Credits

There are certain limitations on the credits that can be earned toward a graduate degree at the University of Pittsburgh. Those limitations are detailed below.

Acceptance of Transfer Credits

Students who have completed graduate courses in degree-granting graduate programs at other appropriately accredited institutions prior to admission to the University of Pittsburgh should submit official transcripts from those institutions at the time they apply so that the courses can be evaluated for transfer credit. In no case may the total number of credits transferred exceed the maximum number stated in the sections of this bulletin pertaining to advanced degree requirements. For more detail, see credit requirement information in the sections on Regulations Pertaining to Master of Arts and Master of Science Degrees, Professional Master's Degrees, or Doctoral Degrees as well as the relevant program information in Schools, Departments, and Programs. Grades (and grade points) are not recorded for credits accepted by transfer.

Transfer credits will not be accepted for courses in which a grade lower than B (GPA=3.00) or its equivalent has been received. No credit will be granted toward an advanced degree for work completed in extension courses, correspondence courses, courses delivered electronically, or those offered in the off-campus center of another institution unless those courses are approved for equivalent graduate degrees at that institution and the institution has an accredited program.

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their department and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components are responsible for providing any financial assistance to the graduate student.

Course Work Acceptable as Graduate Credit

A substantial proportion of courses acceptable toward a graduate degree should be designed explicitly for graduate students. Introductory graduate-level (master's-level) courses are numbered 2000-2999, and those at an advanced graduate-level (doctoral-level) are numbered 3000-3999. To be eligible for a master's degree, a student must have completed at least four courses (12 credits) or one-half the total number of credits submitted for the degree, whichever is greater, at the graduate level (2000 or 3000 series). Doctoral students must complete additional graduate-level courses as determined by their department or school. No lower-level undergraduate courses numbered 0001-0999 may be applied toward a graduate degree.

Credit by Course Examination

Some schools at the University offer credit by course examination. Each school authorized to offer graduate courses clearly specifies whether or not students may obtain credit toward a degree in this fashion and, if so, for which courses. A school granting graduate credit for life or work experience will do so only through the option of credit by examination.
Cross-Registration

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 9 credits as a graduate student) at Pitt while cross-registered. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit www.pchepa.org.

Enrollment in Graduate Courses as an Undergraduate

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Registration (Enrollment)

Registering for Classes

After being admitted to a graduate program, students may register for classes during the enrollment period. The enrollment period for a term or session is published in the University's Academic Calendar.

Students registering for the first time are advised to complete the enrollment process well before the beginning of the term. Typically, the first day of classes is the last day for students to enroll. Students who enroll after the first day of the term will be assessed a late registration fee.

Most students have the ability to utilize self-service enrollment tools available through the Student Portal or Pitt PS Mobile. Continuing students with the ability to utilize self-service enrollment will be assigned an enrollment appointment during the first two weeks of the enrollment period.

Once students have enrolled they may view their class schedules online via the Student Portal or Pitt PS Mobile.

Full-Time and Part-Time Study

Students must be officially admitted to the University to be eligible to register for classes. Graduate students who register for 9 to 15 credits in the fall or spring term are full-time students and are assessed the tuition rate for their school (for detail, see www.ir.pitt.edu/tuition). A school may require students enrolled in a degree program to register for more than 9 credits. Students who register for fewer than 9 credits are part-time students and are billed on a per-credit basis. During the summer term and summer sessions, most students are billed on a per-credit basis regardless of the
number of credits taken. At the Joseph M. Katz Graduate School of Business, full-time MBA students are billed a flat rate in the summer term (since this is a one-year program, tuition is spread over three terms).

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for full-time dissertation study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, wellness, and activity fees. Students must consult with the dean's office of their school for permission to register for full-time dissertation study.

**Maximum Credits Per Term**

No student is permitted to register for more than 15 graduate credits without written permission from the dean of the academic center in which the student is pursuing a degree. Graduate students who register for more than 15 credits will be billed for each additional credit that exceeds their full-time tuition rate. Exceptions include the following:

- The Joseph M. Katz Graduate School of Business allows its full-time MBA students to register for up to 18 credits in the fall and spring terms before additional per-credit tuition charges apply.
- The School of Law has no maximum number of credits in its first-professional programs for billing purposes, but permission of the associate dean is required to register for more than 15 credits per term.
- The Graduate School of Public Health allows students pursuing the Master of Health Administration or the Master of Public Health in environmental and occupational health to take up to 16 credits during their first year of study.
- The School of Social Work allows its students to register for 16 credits in the fall term before additional per-credit tuition charges apply.

Individual schools and departments may restrict the maximum credit load for programs of any or all of their graduate students.

**Registration Status at Graduation**

All graduate students must register for at least 1 credit or full-time dissertation study during the 12-month period preceding graduation (that is, must be on active status). Waivers may be requested by submitting a written request to the University Registrar from the dean of the school. The request should be based on extenuating circumstances, e.g., inability of the student's dissertation committee to meet during the final term when a student has given reasonable notice or the student has completed all degree requirements in a previous term. Waivers will not be granted to students who are inactive.

**Inactive Status**

Students who have not registered for at least 1 credit or full-time dissertation study (eligible doctoral students) during a 12-month period are transferred to inactive status and must file an application for readmission to graduate study (application fee required) before being permitted to register again. Students on inactive status cannot apply to graduate or take preliminary or comprehensive examinations. Also, students on inactive status are not eligible to use University facilities and should not expect to receive counseling from the faculty or active supervision by their advisor and committee.

**Adding and Dropping Courses**

Students may add and drop courses only during the add/drop period. The dates for the add/drop period are listed in the University's Academic Calendar. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course or Resigning from the University.

**Auditing Courses**
With the consent of the school and instructor, students may choose to audit a course. To audit a course, a student must register and pay tuition for the course. The audit grade (N) is not counted toward graduation or the GPA.

Registering for Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Normally, such students should be enrolled for no more than a total of 15 credits per term. Special approvals and regulations apply before a student is allowed to register for courses in pursuit of two independent graduate degrees. See discussion in Special Academic Opportunities for further detail.

Registering for Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. Before registering for courses in pursuit of a cooperative, dual-degree, or joint-degree program, a student must be admitted to both programs. See discussion in Special Academic Opportunities for further detail.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may withdrawal from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Grading and Records

GPA
The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. The value averages the total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

**Academic Standards**

An average of at least B (GPA=3.00) is required in the courses that make up the program for any graduate degree. Students with full graduate status are automatically placed on probation whenever their cumulative GPA falls below 3.00. Each school determines the restrictions placed on a student on probation. See Probation, Suspension, and Dismissal for further detail.

A student on provisional or special status or on probation is not eligible to take the PhD preliminary evaluation or the MA, MS, or PhD comprehensive examination, or to be graduated.

**Grading System**

The University of Pittsburgh has a standard letter grade system (see Letter Grades below). Some additional grading options are available in some courses as determined by the school and the instructor (see sections below on University Grading Options and Other Grades). Students are subject to the grading system of the school in which they are taking the course.

**University Grading Options**

Individual schools may elect to offer one of the following grade options for its courses:

- **LG** Letter Grade
- **H/S/U** Honors/Satisfactory/Unsatisfactory
- **H/HS/LS/U** Honors/High Satisfactory/Satisfactory/Low Satisfactory/Unsatisfactory*
- **S/NC** Satisfactory/No-Credit (Formerly the S/N Option)
- **LG and H/S/U** Letter Grade and Honors/Satisfactory/Unsatisfactory
- **LG and S/NC** Letter Grade and Satisfactory/No-Credit

*This option is available for professional students in the School of Medicine only.

From among the grading options approved by the school, each department identifies those it deems acceptable for its courses. Furthermore, course instructors may specify, within the grading options approved by the school and department, which grading options may be selected by students taking their course.

Students should choose a grading option from those listed with the course in the Class Search function within the University's Student Information system. Grade Option/Audit Request forms for graduate courses are not required. Schools establish their own deadlines and procedures for processing grade option and audit requests.

Students receive the grade H or S for satisfactory work and U for unsatisfactory work. The grades H and S are counted toward graduation but not the student's GPA. The grades NC and U are not counted toward graduation or the GPA. The S grade indicates adequate graduate attainment; in evaluating thesis or dissertation research, an instructor may only use the S/NC grading option.

Students may audit a course and receive an N grade with the consent of the instructor and school offering the course. However, to audit a course, a student must register and pay tuition for the course. The N grade is not counted toward graduation or the GPA.
Letter Grades

The University's letter grade system for graduate and professional courses is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00 Superior Attainment</td>
</tr>
<tr>
<td>A-</td>
<td>3.75</td>
</tr>
<tr>
<td>B+</td>
<td>3.25</td>
</tr>
<tr>
<td>B</td>
<td>3.00 Adequate graduate-level attainment</td>
</tr>
<tr>
<td>B-</td>
<td>2.75</td>
</tr>
<tr>
<td>C+</td>
<td>2.25</td>
</tr>
<tr>
<td>C</td>
<td>2.00 Minimal graduate-level attainment</td>
</tr>
<tr>
<td>C-</td>
<td>1.75</td>
</tr>
<tr>
<td>D+</td>
<td>1.25</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.75</td>
</tr>
<tr>
<td>F</td>
<td>0.00 Failure</td>
</tr>
</tbody>
</table>

Courses in the first-professional programs in law, dental medicine, medicine, and pharmacy may use different attainment standards.

Other Grades: Incomplete, Withdraw, Resign

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor under University Grading Options. None of these grades carries quality points. Students should consult with their individual school for information on any school-specific regulations regarding these grades.

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term in which the course was taken. After the deadline has passed, the G grade will remain on the record, and the student will be required to reregister for the course if it is needed to fulfill requirements for graduation.

I Grade
The I grade signifies incomplete course work due to nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

**W Grade**

The W grade signifies that a student withdrew from the course. See Monitored Withdrawal from a Course for more information.

**R Grade**

The R grade indicates that a student has resigned from the University. See Resigning from the University for more information.

**Repeating Courses**

A student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's advisor and/or department. A school may restrict the type and/or number of different courses that may be repeated during one degree program. The grade earned by repeating a course is used in lieu of the grade originally earned, although the original grade is not erased from the transcript. No course may be repeated more than twice. No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a B or higher grade. The repeated course must be the same as that in which the original grade was earned. In extenuating circumstances, a department chair, with the dean's approval, may substitute another course of similar content. Grades of W, R, or N reported for the repeated course will not be counted as a course repeat. To initiate only the last course grade being computed in the GPA, a Course Repeat form must be filed with the dean's office.

**Grade Changes**

The instructor of a course may change a student's grade by submitting a Grade Change Request Form which can be found on the Faculty Portal. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via Student Portal at my.pitt.edu or via Pitt PS Mobile.

**Transcripts**

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University registrar. Upon graduation, the transcript reflects a student's degree and date, major, minor, or certificate, and, if applicable, honors, area of concentration.

**Academic Record**

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record may display additional course details, certain academic events and detailed advanced standing/placement/transfer credit information. Students can view a copy of their academic record in the Student Center at my.pitt.edu.

**Grade Report**

Students can access their grades online via the Student Center at my.pitt.edu or via Pitt PS Mobile. Grade submission deadlines can be found in the University's Academic Calendar.
Academic Honors

Schools and programs may recognize academic achievement by students through fellowships, scholarships, and other awards. Students should consult with their individual school and/or program for more information.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 9 quality point credits and whose GPA falls below 3.00 will be placed on academic probation by the dean of their school. After a certain period of time on academic probation (the period is determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the school's probation system are available through that school. Students on probation are not eligible to take the PhD preliminary evaluation or the MA, MS, or PhD comprehensive examination, or to be graduated.

Effect on Financial Aid and Scholarships

Conditions for loan eligibility and many scholarships (including those for teaching assistants, teaching fellows, graduate student assistants, and graduate student researchers) usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA: credits counted toward the degree). Questions about the effect of unsatisfactory academic standing on loans should be directed to the Office of Admissions and Financial Aid in Alumni Hall (4227 Fifth Avenue) at 412-624-7488. Questions about the effect of unsatisfactory academic standing on scholarships, including teaching and research assistantships, should be directed to the particular graduate school.

Editorial Assistance and Publication of Theses/Dissertations

All graduate students must follow University regulations regarding editorial assistance and publishing of theses and dissertations as detailed below.

Editorial Assistance

A student preparing a dissertation or other written work as part of academic requirements may, when appropriate, use the assistance of professional editors, provided that the following rules are observed:

1. The student receives the approval of the research advisor or professor of the course in which written work is being submitted.
2. The student receives assistance only in use of language and not in the subject matter of the written work.
3. The student acknowledges and describes all editorial assistance in the report.

Publication of Theses and Dissertations

Any thesis or dissertation may be published, either by the University or through an outside agency, provided due credit is given the University. No form of publication, however, will relieve the student of his or her responsibility to fulfill the University's electronic theses or dissertation (ETD) requirements. Refer to the sections on Thesis Option or Dissertation and Abstract for specific requirements and to the ETD website at www.pitt.edu/~graduate/etd.

The doctoral candidate is required to execute an agreement with Proquest University Microfilms Inc. for the publication of the dissertation in the Proquest/UMI repository.

Advisors should exercise responsibility in approving research topics that will not endanger long-term research projects or the safety or welfare of informants. Dependent upon the circumstances and the research point at which the danger is recognized, the provost's office may authorize a delay in publication of a dissertation for up to a maximum of one calendar year. Similarly, a publication may be withheld for a maximum of one year, if required, for filing a patent application.
Regulations Pertaining to Master of Arts and Master of Science Degrees

The Master of Arts (MA) and Master of Science (MS) degree programs provide an introduction to scholarly activities and research and often serve as preparation for teaching careers. These degrees are awarded for the completion of a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the faculty of the department. To carry out this responsibility, each student must be assigned a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

MA and MS Requirements

The Master of Arts and Master of Science degrees normally require the satisfactory completion of approximately 30 credits of graduate study approved by the department or school. No Master of Arts or Master of Science degree program may require fewer than 24 course credits. No more than 6 credits may be granted toward the completion of the requirements for a master's degree for work completed at another accredited graduate institution or for work previously completed at the University of Pittsburgh. See Acceptance of Transfer Credits section for further information.

At least four courses (12 credits) or one-half the master's degree program, whichever is greater, must be at the graduate-level (the 2000 or 3000 series) and must be completed with an average grade of B (3.00). No course numbered below 1000 may be applied toward graduate degree requirements.

Some master's programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. Such areas of concentration or minors are added to the transcript upon the granting of the degree.

Master's degrees are conferred only on those students who have completed all courses required for the degree with an average grade of B (i.e., a 3.00 GPA).

The requirement of proficiency in second languages is at the discretion of individual departments or schools.

Departments provide students with a copy of school and departmental regulations appropriate for their program and/or maintain current and accurate Web sites covering this information. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Comprehensive Examination

MA or MS degrees are conferred only upon those students who, in one or more comprehensive examinations or the equivalent, show that they have mastered the general field of their graduate study. Each department or similar unit is responsible for specifying the content and procedure for administration of the comprehensive examination and will specify for each candidate the field of his or her examination, which may vary from student to student. When a program substitutes an equivalent requirement for the comprehensive examination, the department should notify the University Council on Graduate Study and describe the substitution.

Students on inactive, special, or provisional status or on probation are not eligible to take a comprehensive examination. These examinations must be taken at least one month prior to the last day of the term in which the degree is to be granted. The results must be reported promptly to the office of the dean but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a two-year period after passing the comprehensive examination may be re-examined at the discretion of the department program director, or dean.

Thesis Option

The requirement of a thesis or its equivalent is at the discretion of individual departments, programs, or schools. If a thesis is submitted, its form must be in accord with specifications stipulated in the ETD Format Guidelines. Each candidate must provide a suitable number of copies of the thesis for review and use as designated by the thesis examining committee, consisting of at least three members of the faculty recommended by the major
advisor and approved by the department chair. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the office of the dean. After the examination, the approved ETD must be deposited to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school and submitted for microfilming by Compucom and deposit in the University Library System. A receipt for the ETD processing/microfilming fees and any necessary paperwork must be submitted to the appropriate ETD Student Services Staff in the Office of the Dean.

Non-Thesis Option

It is typical for a program to require additional course work if a thesis is not required.

For the Master of Arts degree, students must acceptably describe, in writing, one or more substantial intellectual experiences or accomplishments. In programs in which a master's thesis is optional, the student must satisfy this requirement by submitting a paper (or papers), as designated by the major department, and must demonstrate competence in using methods of scholarship.

For the Master of Science degree, a paper or research project is usually required.

Regulations Pertaining to Professional Master's Degrees

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions. The program of study is a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the student's department or school. To carry out this responsibility, each student must be assigned a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

Professional Master's Degree Requirements

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of their general field of study. The professional master's degrees normally require the satisfactory completion of more than 30 credits of graduate study approved by the department. No professional master's degree program may require fewer than 30 credits. No more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another accredited graduate institution. (See Acceptance of Transfer Credits section for further detail.) At least one-half of the credits earned in a master's degree program must be at the graduate level (the 2000 or 3000 series). No courses numbered below 1000 may be applied toward graduate degree requirements. Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers as part of demonstrating their comprehensive mastery of their field of study.

Requirements vary from school to school. Departments provide students with a copy of school and departmental regulations or maintain current and accurate Web sites appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of the general field of study. This includes: (a) satisfactory completion of all course requirements and (b) other performances that indicate comprehensive mastery such as examinations, internships, research projects, theses, and practica. These requirements vary from school to school; students should refer to the specific requirements of their program in the Schools, Departments, and Programs section of this bulletin.

Regulations Pertaining to Doctoral Degrees

While the regulations governing doctoral study in this section represent University-wide policy, students should check the Schools, Departments, and Programs section of this bulletin and with their advisor for any expansions of or exceptions to these rules.
Admission to Doctoral Study

In some doctoral programs, the requirements for admission to graduate study and for admission to doctoral study are identical, while other programs require the completion of a master's degree or its equivalent as a prerequisite for admission to doctoral study. Admission to doctoral study does not include any implication concerning admission to candidacy for the Doctor of Philosophy degree.

Normally, only one major department of graduate study is permitted for the PhD degree. However, a few formal interdisciplinary programs and, under some circumstances, some independently designed interdisciplinary doctoral programs are available (see Interdisciplinary Doctoral Programs section).

Programs of Study

PhD programs offered at the University of Pittsburgh provide a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of the content, methods, theories, and values of a field of knowledge and its relation to other fields. Each program trains the student in the methods of independent research appropriate to the discipline and provides an advisor and a committee to guide the student in an extended investigation of an original and independent research project of significance in the field.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of the department or program. To carry out this responsibility, the departments or programs must ensure that each student has a major advisor who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. The advisor may prescribe additional courses both within and outside the department that are essential and/or appropriate to the student's program.

Some doctoral programs may include approved areas of concentration used to define and describe the student's training and expertise within the broader discipline. Such an area of concentration is added to the transcript upon the granting of the degree.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Normally, courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Students must maintain a minimum cumulative GPA of 3.00 in courses to be eligible to take the preliminary and comprehensive examinations as well as to graduate.

The requirement of proficiency in the use of second languages or other tools of research is at the discretion of individual departments or schools.

Departments or programs provide students with a copy of school and departmental regulations appropriate for their program and/or maintain current and accurate Web sites covering this information. In turn, students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The minimum 72-credit requirement for the PhD degree is met by six terms of registration as a graduate student for 12 or more credits per term or the equivalent number of credits taken in a reduced load over a longer period of time. If the school requires completion of its master's degree program prior to admission into its doctoral program, at least four terms of registration for 12 or more credits per term or the equivalent number of credits in a reduced load are required as a minimum for the PhD degree. No more than 30 credits may be accepted for a master's degree awarded by another institution to meet the minimum credit requirement; some schools have more stringent requirements, including the Dietrich School of Arts and Sciences and the Graduate School of Public Health, both of which will accept only 24 credits for a master's degree awarded by another institution.

In recognition of graduate study beyond the master's degree successfully completed elsewhere, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. (See also Acceptance of Transfer Credits section.) No more than 30 credits may be accepted for a previously earned PhD degree in recognition of master's degree work, though some schools have more stringent requirements.

Graduate students already enrolled may, when approved in advance by their department or program and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for
an advanced degree at the University of Pittsburgh. In all cases, at least three terms, or 36 credits, of full-time doctoral study or the equivalent in part-time study must be successfully completed at the University of Pittsburgh.

**Residency Requirement**

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study, which excludes any other employment except as approved by their departments.

**Preliminary Evaluation**

The preliminary evaluation should be designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently. The form and nature of the evaluation should be approved at the school level and described in the school bulletin. It should be conducted at approximately the end of the first year of full-time graduate study. The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation. Evaluation results must be reported promptly to the dean's office, but no later than the last day of the term in which the evaluation occurs. A student on provisional, inactive, or special status or on probation is not eligible to take the preliminary evaluation.

**Comprehensive Examination**

The comprehensive examination should be designed to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline. In some programs, the comprehensive examination is combined with the overview or prospectus meeting. It should be administered at approximately the time of the completion of the formal course requirements and should be passed at least eight months before the scheduling of the final oral examination and dissertation defense. In no case may the comprehensive examination be taken in the same term in which the student is to graduate. Examination results must be reported promptly to the dean's office but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. A student on provisional, inactive, or special status or on probation is not eligible to take the program comprehensive examination.

**Doctoral Committee**

Before the student is admitted to candidacy for the PhD degree, the student's major advisor proposes, for the approval of the director of the school's doctoral program and the dean, a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the doctoral committee. The majority of the committee, including the major advisor, must be full or adjunct members of the Graduate Faculty. This committee must review and approve the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated three times a year.

This doctoral committee has the responsibility to advise the student during the progress of the candidate's research and has the authority to require high-quality research and/or the rewriting of any portion or all of the dissertation. It conducts the final oral examination and determines whether the dissertation meets accepted standards.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the committee should assess the student's progress toward the degree and discuss objectives for the following year and a timetable for completing degree requirements. It is the responsibility of the dean of each school to determine a mechanism for monitoring the occurrence of these annual reviews.

The membership of the doctoral committee may be changed whenever it is appropriate or necessary, subject to the approval of the department chair, or program director and the dean.

When a doctoral committee member leaves the University, the member must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a cochair must be appointed from within the department, and the restructured committee requires the approval of the dean and
either the department chair or the director of the school's doctoral program. If the defense takes place within a few months of the chair's departure, the requirement of the cochair is usually waived.

Retired faculty members may remain as members or chairs of committees if they are spending considerable time in Pittsburgh or the vicinity and are still professionally active. Retired faculty who meet these criteria may also be appointed as a member or as a cochair (but not chair) of a newly formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the dean and either the department chair or the school's director of doctoral programs.

Overview or Prospectus Meeting

Each student must prepare a dissertation proposal for presentation to the doctoral committee at a formal dissertation overview or prospectus meeting. The overview requires the student to carefully formulate a plan and permits the doctoral committee members to provide guidance in shaping the conceptualization and methodology of that plan. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation; prepared in accord with the proposal or the restriction of the dissertation to this original proposal. The student is responsible for ensuring that all appropriate regulatory approvals are obtained for the proposed research. For example, if the research proposed in the overview or prospectus involves human subjects, that proposed research must be approved by the University Institutional Review Board (IRB) before it may be carried out.

Admission to Candidacy for the Doctor of Philosophy Degree

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must fulfill the following requirements:

- Be in full graduate status
- Have satisfied the requirement of the preliminary evaluation
- Have completed formal course work with a minimum grade point average of 3.00
- Have passed the comprehensive examination
- Have received approval of the proposed subject and plan of the dissertation from the doctoral committee following an overview or prospectus meeting of the committee

In some schools, admission to candidacy is a prerequisite to registration for dissertation credits. Students are informed of admission to candidacy by written notification from the dean, who also states the approved doctoral committee's composition.

Registering for Full-Time Dissertation Study

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for Full-Time Dissertation Study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for the full-time computer and network, security/transportation, student health, and activity fees. Students must consult with the dean's office of their school for permission to register for full-time dissertation study.

Dissertation and Abstract

Each student must write a dissertation that presents the results of his or her research project. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. The dissertation must be relevant to an identifiable field as it is currently practiced, present a hypothesis tested by data and analysis, and provide a significant contribution or advancement in that field. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

A dissertation should demonstrate the following characteristics:
The establishment of an historical context for the presentation of an innovative and creative approach to the problem, analysis, and solution

A clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base

A well-defined research design

Clarity in composition and careful documentation

Results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph

Sufficient detail so that other scholars can build on it in subsequent work

The preparation of the author to assume a position within the profession

If the dissertation is the result of a collaborative research effort, the project should be structured in such a way that the student's dissertation results from one clearly identified piece of work in which the student has unquestionably supplied the major effort. The contributions of the student and the other collaborators must be clearly identified.

Published articles authored by the student and based on research conducted for the dissertation study may be included in the dissertation if the student's department and school have a written policy that this is acceptable. In any case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. The student should be the sole or primary author of the published work. If the published articles were coauthored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. The ETD Format Guidelines gives instructions on incorporating articles into the dissertation.

Candidates for the doctoral degree must provide a suitable number of copies of the dissertation, as determined by the doctoral committee and school policy, for review and use during the final oral examination. The general format of the dissertation and the abstract is determined by the Office of the Provost and is set forth in the ETD Format Guidelines. Specific instructions should be available in the office of the dean of the school. After the final oral examination is successfully completed, the candidate must deposit the approved ETD to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school. At least two additional copies of the dissertation abstract, a receipt for payment of the dissertation processing/microfilm fees and any necessary paperwork must be submitted to the appropriate ETD Student Services Staff in the office of the dean of the student's school. The candidate is also required to execute an agreement with Proquest Information and Learning for the publication of the dissertation on microform and in an electronic format and submit the Survey of Earned Doctorates (Forms are available in the dean's office). Students should check with their school for any additional supporting documents and/or requirements.

**Language of the Doctoral Dissertation**

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's dean with the approval of the dissertation advisor and committee, but only for sound reasons of scholarship. Permission shall never be granted on the grounds of the student's inadequate command of English.

**Final Oral Examination**

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the *University Times* or the *Pitt Chronicle*. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the doctoral committee may be present during the final deliberations and vote on the passing of the candidate. A report of this examination, signed by all the members of the doctoral committee, must be sent to the dean. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the doctoral committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

**Interdisciplinary Doctoral Programs**

A student may be admitted into one of two types of interdisciplinary doctoral programs, generic and individualized.

**Generic Programs**
Generic programs are ongoing, formally structured, and approved doctoral programs. Admission to these programs follows the same procedures as those of departmental programs.

**Individualized Programs**

Individualized programs are specially designed to permit an exceptionally able student who has earned a master's degree or the equivalent to pursue an interdisciplinary doctoral program structured to satisfy his or her unique goals. Such students should apply to the dean of the school if the departments involved in the proposed program are organized within one school or to the Provost if the departments are organized within more than one school. The student must satisfy the admission requirements of each of the departments or schools involved in the proposed program.

If the request is approved, the dean or the Provost, in consultation with the departments concerned, will designate five members from these departments to serve as an advisory committee. After these advisors meet with the student, a chief advisor is selected to assume responsibility for general guidance to the student. These advisors continue their responsibility until the student is admitted to candidacy for the PhD degree and may, if it is appropriate, continue as the doctoral committee for this student.

**Other Research Doctoral Degrees**

The University of Pittsburgh, through its professional schools, offers the following doctoral degrees in professional fields of study: Doctor of Education and Doctor of Public Health.

These doctoral degree programs are similar to those for the PhD in the degree of rigor required; the minimum total credit requirements and permissible transfer credits; the requirements for the successful completion of a preliminary evaluation and a comprehensive examination; the admission to doctoral candidacy; the nomination of a doctoral committee; the preparation of the dissertation and abstract; the publication of the dissertation; and the successful completion of the final oral examination. These doctoral dissertations are usually based on an in-depth empirical research project by the student and are intended to permit the student to apply relevant theory and knowledge as well as to demonstrate skills in analysis of a major problem and to contribute to the improvement of practice in the student's area of specialization.

**Other Professional Doctoral Degrees**

The University of Pittsburgh also offers professional doctoral degree programs for practitioners, including the JSD (Law), DNP (Nursing), AuD (Audiology), DPT (Physical Therapy), PharmD (Pharmacy), and CScD (Clinical Science). These programs provide a coherent curriculum designed to impart the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession. The curriculum should contain a research component to achieve the goal for the research competence of the graduate. Students should deliver a report based on research that demonstrates both mastery of their subject matter and a high level of communication skills. The curriculum should contain an internship, a practicum or a clinical component. Each experience should have associated with it clear goals and objective, a statement of what skills the student should master, at statement how those skills will be assessed objectively by the academic program, and what steps the program will take in response to those assessments. In addition, the program should have an objective way to evaluate the site where internships and/or clinical rotations take place and assure the expertise of those responsible for administering training and instruction. If the program is an accredited program, the standards of the accrediting body for a professional doctorate must be met.

To attain the depth of knowledge and experience required by someone earning a doctorate, a minimum nine semesters of full-time study is required. Of this no more than one-third should be internships or clinical work. A comprehensive examination will be used to assess the student's mastery of a substantial and complex body of knowledge.

The minimum admission requirements must be the same as for all graduate programs at the University of Pittsburgh. In addition, the student must have completed a defined set of prerequisites so that all students will enter with required basic knowledge. A student must attain a 3.00 GPA in order to maintain good standing and be graduated.

**Statute of Limitations/Leaves of Absence**

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more stringent, but not less, than those stated here.
All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all professional master's degrees, within five years. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years, or within eight years if the student has received credit for a master's degree appropriate to the field of study. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full-time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Graduation

Requirements for Graduation

Graduation requirements for MA, MS, professional master's, and doctoral degrees are described earlier in this bulletin under the relevant sections detailing the regulations pertaining to each degree. In order to graduate from the University of Pittsburgh, a graduate student must be an active University of Pittsburgh student registered for at least 1 credit or full-time dissertation study within the past 12 months. See specific schools and programs for detailed information on degree and graduation requirements.

Application to Graduate

Students must file an application for graduation in the dean's office of their school early in the term in which graduation is expected. Each school establishes its own deadline by which students must apply for graduation. Students should check with their dean's office for the deadline. As noted above, students must be active. In exceptional circumstances, students who complete all the degree requirements at the end of a term but graduate in the next term may petition the dean of the school for a waiver of this registration requirement. The requirement that a student be on active status cannot be waived.

Prior to the end of the term in which they graduate, all doctoral candidates must submit to the dean's office a completed Survey of Earned Doctorates.

Certification for Graduation

The Graduate Faculty of the department or program evaluates the performance of the student. If that performance is satisfactory, a report should be submitted to the dean certifying that the candidate has satisfactorily completed all departmental requirements for a graduate degree. The dean, after confirming that the overall school and University requirements have been met, certifies the candidate for graduation.

Commencement

Candidates for graduation are encouraged to appear in person at the Annual Commencement Convocation, usually held the Sunday after the spring term ends. Although the degree is officially conferred at commencement, diplomas are mailed to graduates several weeks later.
Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see www.provost.pitt.edu/information-on/guidelines.html.

The information below summarizes several key University-wide policies affecting graduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. Individual schools have their own academic integrity policies, and students are encouraged to review these school-specific guidelines as well.

Affirmative Action and Non-Discrimination Policy

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, and access to and treatment in University programs and activities. Additional information on this policy is available at http://cfo.pitt.edu/policies/documents/policy07-01-03web.pdf.

Computing Use Policy

Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read Acceptable Computing Access and Use, available in campus computing labs or online at technology.pitt.edu/security/acceptable-computing-access-and-use for details.

Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.

Copyright Policy

The University of Pittsburgh affirms that, except as specifically exempted by this policy, faculty, staff, and students are entitled to claim copyright ownership, including worldwide rights, in the following works authored by them: books, articles, educational course work, similar works that are intended to disseminate the results of academic research or scholarly study, popular fiction or nonfiction works, poems, musical compositions, and other works of artistic imagination.

The University has no proprietary interest in copyrightable materials produced by faculty, staff, or students under contract with entities external to the University (in which the faculty, staff, or students have no controlling or majority interest), except as specifically exempted by this policy.

Additional information on this policy is available at http://cfo.pitt.edu/policies/documents/policy11-02-02.pdf.

Drug-Free School and Workplace Policy
The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law enforcement agency.

Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or Guaranteed Student Loan program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities.

For complete text on this policy, see http://www.hr.pitt.edu/sites/default/files/uploads/DFW/DFW-FY2014.pdf.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, visit http://www.cfo.pitt.edu/policies/policy/09/09-10-01.html.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself or herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition Note: In this policy, the definition of "faculty member" refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see http://www.cfo.pitt.edu/policies/policy/02/02-04-03.html.

Family Educational Rights and Privacy Act

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Graduate Student Researcher Policy Statement

Graduate student researchers (GSRs) at the University of Pittsburgh are graduate students who are receiving financial support from research funds in return for duties performed to meet the goals for which the funds were awarded. The research performed is also normally an integral part of the student's research practicum experience, thesis, or dissertation. A primary goal of the appointment, from the point of view of both the University and the student, is to provide financial support to the graduate student. For additional Graduate Student Researcher Policy information see www.pitt.edu/~graduate/gsr.html.

Harassment Policies
Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment.

Any individual who, after thorough investigation and an informal or formal hearing, is found to have violated the University's policy against sexual harassment, will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion. Any disciplinary action taken will depend upon the severity of the offense. For more information, see http://www.cfo.pitt.edu/policies/documents/policy06-05-01web.pdf.

Human Research Subjects: Institutional Review Board

The University of Pittsburgh is guided by the ethical principles regarding all research involving humans as subjects, as set forth in the report of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (entitled Ethical Principles and Guidelines for the Protection of Human Subjects for Research [the "Belmont Report"]).

All research at the University involving interventions or interactions with living individuals or the obtaining of their identifiable private information must be reviewed and approved by an Institutional Review Board (IRB) before the research will be allowed to proceed. For complete text of the IRB's policies and practices, see www.irb.pitt.edu or contact the IRB at 412-578-3424.

Patent Policy

A University student, during the student's period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Transfer and Intellectual Property at 200 Gardner Steel Conference Center and at http://www.cfo.pitt.edu/policies/policy/11/11-02-01.html.

Research Integrity

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the research of science, and to society as a whole. The University's Research Integrity Policy is available online at http://www.cfo.pitt.edu/policies/policy/11/11-01-01.html.

Smoking Policy
Smoking is prohibited in all University-owned and leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in http://www.cfo.pitt.edu/policies/policy/04/04-05-03.html.

**Student Code of Conduct**

The Student Code of Conduct is an outline of the non-academic rights and responsibilities of University students. The code defines offenses against students. A student or University official may file a complaint of violation of the Student Code of Conduct at the University Student Judicial System Office. For a copy of the code, please contact the Judicial System Office in 738 William Pitt Union at 412-648-7918 or see www.studentaffairs.pitt.edu/studentconduct.

**Student Code of Judicial Procedures**

The Office of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the Student Code of Conduct. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints should be filed here.

Judicial Affairs also conducts a Student Mediation Program and screens requests for contact of students.

**Student Service Holds Policy**

Access to many student services including registration and receipt of grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at http://www.cfo.pitt.edu/policies/policy/09/09-04-09.html.

**Teaching Assistant/Teaching Fellow/Graduate Student Assistant Policy Statement**

Teaching assistants (TAs), teaching fellows (TFs), and graduate student assistants (GSAs) at the University are graduate students who are receiving support in return for specified duties while gaining teaching and teaching-related experience under the guidance of faculty mentors. Their primary objective, from the standpoint of the University and the individual, is to make steady progress toward an advanced degree. TA/TF/GSA appointment status is dependent upon graduate student status. The complete policy statement for TA/TF/GSAs is available at www.pitt.edu/~graduate/tapolicyrev.htm.

**Use of Alcohol Policy**

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, visit http://www.cfo.pitt.edu/policies/policy/04/04-05-02.html.
Regulations Governing Graduate Study at the University of Pittsburgh

History of Graduate Study at the University of Pittsburgh

The recognition of graduate study at the University of Pittsburgh began with the awarding of Master of Arts degrees-two in 1836, one in 1845, three in 1848, and two in 1849. The record does not distinguish between earned and honorary degrees, but apparently 33 MA degrees had been awarded by 1870. These degrees were conferred for study beyond the Bachelor of Arts degree and before specific programs or minimum requirements for advanced degrees had been established.

This system continued until 1884 when Chancellor Goff set up a two-year professional study program leading to a Master of Philosophy or a Master of Arts degree and a three-year program leading to a Doctor of Philosophy degree. Before admission to these graduate programs, each student was required to show proficiency in three areas of study as tested by written and oral examinations. For admission to the Master of Arts program, each student was required to have completed the four-year Bachelor of Philosophy degree in the Scientific course. The Master of Philosophy degree was, in fact, the predecessor of the Master of Science degree. Students were permitted to study in absentia under the direction of the faculty, but were required to submit annually to a rigorous examination in all prescribed courses. In addition, both master's and doctoral candidates were required to prepare and defend theses.

Between 1885 and 1903, there were 25 Master of Philosophy, 34 Master of Arts, and ten honorary Master of Arts degrees awarded. Apparently, no Master of Philosophy degrees have been awarded since 1903. Three Doctor of Philosophy degrees were awarded in 1886 and a total of 31 had been conferred by 1915. Between 1888 and 1900 ten honorary Doctor of Philosophy degrees were awarded, but apparently none have been awarded since then.

In 1906, new rules were formulated for graduate study, requiring students to be in attendance and requiring the completion of one year of study or 30 credits for the master's degree and three years or 90 credits for the doctoral degree.

The catalogues of 1908 and 1909 announced the establishment of the Graduate School with five departments (Psychology and Education, English Literature, Chemistry, History and Political Science, Economics and Sociology) offering courses for the Doctor of Philosophy degree, and these plus five additional departments (Biblical Literature and Comparative Religion, Greek, Semitic Languages and Literatures, Biology, and Astronomy) offered courses for the Master of Arts degree. The program of studies for the MA degree required one major and a minor subject and the program for the PhD degree required one major and one or two minor subjects, one of which must be from outside the department of the major. A good reading knowledge of at least one modern foreign language was required to receive a graduate degree.

Three Master of Science degrees were awarded in 1907 although the first description of the Master of Science degree appeared in the 1910 catalogue: "The Master of Arts degree will be granted only upon completion of a course mainly literary in character; the degree of Master of Science after one mainly scientific." That catalogue lists 16 departments offering courses for master's degrees and ten offering courses for the Doctor of Philosophy degree. The language requirement became more specific: "A good reading knowledge of both French and German and of other modern languages necessary to carry on graduate work is required of each candidate for the PhD" and "of French or German, or both, for Master's degrees."

In 1910, a faculty committee drafted proposals, adopted by the Board of Trustees in 1913, making the Graduate School an independent administrative unit of the University and authorizing the selection of a Graduate Council. This Council was first appointed by the Dean of the Graduate School and later elected by the Graduate Faculty from the departments offering graduate work. It consisted of representatives from the nine departments offering graduate work at the time: education, economics, ancient languages, romance languages, chemistry, botany, mathematics and physics, geology, and physiology. In 1924, a change in procedure for the selection of the Council was instituted so that 13 faculty representatives were drawn from the following groups of departments: English, fine arts, foreign languages, physical sciences, natural sciences, social sciences, psychology, engineering, business administration, medicine, dentistry, and education.

In 1947 the Board of Trustees adopted resolutions recommended by the University Senate and the Graduate Council (1) grouping the schools and departments in the Graduate School into three divisions: the Humanities, the Social Sciences, and the Natural Sciences; (2) establishing criteria for membership in the faculty of the Graduate School; and (3) defining the Graduate Council and its functions as follows: "The Graduate Council shall consist of 12 full members of the faculty of the Graduate School, four from each of the three divisions of the Graduate School, and the Dean of the Graduate School as chairman, ex officio; the faculty members of the Council shall be elected by the full members of the faculty of the Graduate School of their respective divisions for a term of four years; and the Graduate Council representing the faculty of the divisions, shall be the policy-making body of the Graduate School."
Until 1956, the administration of graduate study was the responsibility of the Dean of the Graduate School and the Graduate Council. At that time, the individual schools and the three Divisions of the Academic Disciplines were given direct administrative responsibility for their graduate programs in accord with the regulations established by the University Council on Graduate Study—formerly the Graduate Council.

In 1968, the Dean of the Graduate School retired from his administrative role and the position he had held was discontinued. General responsibility for the University's graduate programs was assigned to the Provost pending reorganization of the University's graduate structure. The University Council on Graduate Study, the University Administration, and members of the Graduate Faculty cooperated in drafting a proposed reorganization of Graduate Study which was approved by written ballot by the entire Graduate Faculty, and in turn, accepted by Chancellor Posvar. This organizational structure became effective July 1, 1971 and is still the official structure. The procedures for nomination and appointment to the Graduate Faculty were approved in 1972 and revised slightly in 1977.

Thus, since the University's founding in 1787, graduate education has grown to encompass the School of Arts and Sciences and all 13 of the professional schools, which share a commitment to meet the nation's need for well educated researchers, scholars, and leaders of professions and the tri-state region's need for trained professionals.

Organization of Graduate Study at the University of Pittsburgh

Objectives

The first objective is to place the responsibility for planning and operating graduate programs in the schools and faculties which offer such programs. This arrangement will put the graduate student and his or her program under the immediate supervision of the teaching staff and administrative officers of his or her field of study.

The second objective is to provide a means of establishing and maintaining basic standards and requirements for graduate work throughout the University. It is believed that the advanced degree programs developed and administered by the various schools and faculties, though differing in details, should conform to certain fundamental principles of good practice.

The third objective is to create effective channels of communication within the graduate community and thus to ensure that all segments of the University are represented in the policy making process.

Definitions

Graduate programs: all programs of study leading to a master's degree, an advanced doctoral degree (e.g. PhD, EdD, DPH), or a graduate certificate.

Advanced degrees: all master's and doctoral degrees awarded upon completion of graduate degree programs as defined above.

Schools: academic units of the University headed by deans, having their own teaching staffs, and offering instructional programs leading to degrees. Interschool programs: programs of graduate instruction and research offered cooperatively by Graduate Faculty members from two or more of the academic units defined above.

Graduate Faculty: members of the various schools who have been recognized and approved as qualified: (1) to teach courses carrying graduate credit, (2) to serve on examining committees for advanced degrees, and (3) to advise graduate students and direct their research.

Graduate student: a student who is enrolled in a graduate program as defined above.

Structure

I. Administration of Graduate Programs
Although the University Council on Graduate Study, acting for the Graduate Faculty, establishes minimum standards for graduate work throughout the University (III.B.1), the immediate responsibility for developing and administering graduate programs is assigned to the deans and Graduate Faculty members of the schools. This responsibility applies both to the traditional MA, MS, and PhD programs and to programs leading to advanced professional degrees. Specifically, the deans and Graduate Faculty members shall be responsible in their areas for graduate admission standards and requirements and the admission of graduate students; for advanced certificate and degree requirements; for selecting and maintaining a distinguished graduate faculty; and for recommending the awarding of advanced certificates and degrees.

The Provost shall have responsibility for the general supervision of graduate programs throughout the University, giving leadership to the deans and faculties in maintaining high standards of graduate instruction and research.

The Provost or a Vice Provost as may be designated shall serve as the administrative officer of the Graduate Faculty (see V.B., below).

II. The Graduate Faculty

FM Members of the graduate faculty have been recognized and approved as qualified to teach courses carrying graduate credit, to serve on examining committees for advanced degrees, and to advise graduate students and direct their research.

1. Membership in the Graduate Faculty shall be of two classes, "Regular" and "Adjunct." Regular membership shall be recommended for full-time faculty members or part-time, tenure stream members of the University faculty who are approved to direct graduate study and research at all levels. Adjunct membership shall be recommended for persons whose primary responsibility is outside the University but who hold a part-time faculty appointment and are approved to direct graduate study and research at all levels. Only Regular members shall be eligible for election to the University Council on Graduate Study, and only Regular members may cast votes in such elections.

2. Members shall be appointed to the Graduate Faculty by the Provost. When a person is recommended for initial appointment to a faculty position, the dean who makes the recommendation will indicate whether, on the basis of an appraisal by a departmental or other appropriate faculty group, the individual should be given Graduate Faculty status. A recommendation for Graduate Faculty membership will carry the implication that the prospective appointee is judged to be: (1) competent in graduate instruction and the supervision of student research and (2) active in advancing knowledge through his or her own research. If approved for Graduate Faculty status, a full-time appointee will become a "Regular" member. A highly qualified part-time appointee whose main employment is outside the University will become an "Adjunct" member. The official contract letter from the Provost to the new faculty member will specify the class of Graduate Faculty membership, if any, that has been awarded.

3. Members shall perform the following functions:
   1. Provide instruction, conduct examinations, and direct student research in graduate programs; and
   2. Serve on faculty committees and councils charged with the development of graduate programs and policies.

4. Prior to Council's taking final action, all legislation must be sent to the deans and the chairs of schools' graduate councils, who will distribute it to appropriate councils and to Graduate Faculty and forward comments back to Council. All members of the Graduate Council shall receive from the chair of the University Council on Graduate Study an annual report of actions taken by Council. On the recommendation of the Council or the Provost or on receipt by the Provost of a request signed by 30 Regular members of the Graduate Faculty, legislation approved by Council which reflects a major change in policy shall be submitted for approval by a mail ballot to all members of the Graduate Faculty. If the proposed legislation is approved by a majority of the members responding within a 30-day period following the mailing of ballots, it will be considered to be approved for recommendation to the Chancellor.

5. All members shall be given notice of meetings of the University Council on Graduate Study through the University Times or other appropriate announcements. They shall be entitled to attend such meetings and to speak, but shall not be permitted to vote unless they are members of the Council.

III. The University Council on Graduate Study

1. Membership
   1. Provost,
   2. Vice Provosts as designated by the Provost, and
   3. Twenty-one Regular members of the Graduate Faculty, distributed according to a formula based on the number of Regular Graduate Faculty members in the schools (one representative for each 100 members and/or fraction of 100). The representation is as follows:
   - School of Arts and Sciences
   - Humanities-one representative
   - Natural Sciences-one representative
   - Social Sciences-one representative
   - At Large-two representatives
   - Joseph M. Katz Graduate School of Business-one representative
Faculty FMFM representatives shall be selected, and their terms of office determined, in accordance with procedures established for this purpose within their respective schools. No representative shall serve for more than four consecutive years, except when a school chooses to designate a representative by reason of the official role of that individual in relation to graduate study within that school.

4. A maximum of six graduate students shall be chosen as representatives in accordance with procedures established for that purpose by the Graduate and Professional Student Association. Academic units which are not directly represented by a student with voting rights on the University Council on Graduate Study may choose one student observer to attend Council meetings with the privilege of speaking but not voting.

2. Functions
1. To develop basic standards, regulations, and policies applicable to all fields for graduate instruction and research;
2. To transmit to the Chancellor legislation originating in the Council after such legislation has been reviewed by the subordinate faculty councils or committees (see IV.A.), and has been submitted to the Graduate Faculty, or has been approved by a majority of those members responding by a mail ballot (see II.D.);
3. To review, evaluate, and make recommendations to the Chancellor concerning proposals for new postbaccalaureate degree and certificate programs throughout the University after such proposals have had prior review and approval by the faculty councils or committees in which the proposals originated, or in the case of interschool proposals, by the councils or committees of all the areas involved (see IV.A., B.);
4. To keep informed regarding the quality of graduate work throughout the University by receiving annual reports from the faculty councils and committees on the current status of all graduate degree and certificate programs within their respective areas, and, when necessary, to conduct its own review of such programs; and
5. To identify and promote creative new approaches to graduate education, whether in defining fields of study, program structure, course content, behavioral objectives, research goals, or other aspects.

3. Procedures
1. The Council shall hold eight monthly meetings during the academic year. Additional special meetings may be called by the Provost or a designated Vice Provost.
2. The Council may appoint ad hoc committees from its own membership or from the Graduate Faculty as a whole to review proposals for new postbaccalaureate degree programs, to evaluate existing programs, or to make such other studies as the Council considers desirable. Each such committee shall include at most two graduate student representatives. The committees may also, at the option of the Council, make use of consultants from outside the University. When formed to evaluate new programs which require substantial library holdings, or computer usage, the review committees shall include one or more representatives of the University Libraries or Computing Services and Systems Development.
3. Prior to Council's taking final action, all legislation must be sent to the deans and chairs of schools' graduate councils, who will distribute it to appropriate councils and to Graduate Faculty and forward comments back to Council.
4. All decisions made by the Council shall be communicated to the faculty, students, and administrative officers of the University.

IV. Faculty Councils and Committees on Graduate Study

1. Faculty councils and committees on graduate study in the various schools shall be responsible for standards and requirements in their respective areas and for reporting on programs and policies to the University Council on Graduate Study.
2. Committees may be formed to supervise interdepartmental and interschool graduate programs. If an interdepartmental program is established within a particular school, the committee in charge of that program will perform those functions normally performed by a department. If the program has broader scope than that of a single school, the committee structure and administrative relationships will be those agreed upon by the cooperating units. Graduate programs will be reviewed by the University Council on Graduate Study and by the Provost.
The basic standards, regulations, and policies approved by the University Council on Graduate Study shall be regarded as minimal standards by the various councils, committees, and faculties.

V. Functions of Administrative Officers in Relation to Graduate Study

1. Deans of Schools
   1. Provide leadership in the development of programs, standards, policies, and facilities for graduate instruction and research in their areas;
   2. Administer the operation of graduate programs in their areas, including admissions, student counseling, record keeping, enforcement of requirements, and recommendation of candidates for advanced degrees; and
   3. Select and maintain a Graduate Faculty of the first quality and encourage the professional growth of its members.

2. Provost or a Vice Provost as Designated
   1. Serves as administrative officer of the Graduate Faculty and Chair of the University Council on Graduate Study;
   2. Represents the central administration in developing, reviewing, and evaluating graduate programs throughout the University;
   3. Reviews the adequacy of the structure for graduate instruction and research and identifies opportunities for improving the structure;
   4. Observes and reports the extent to which the several faculties are complying with the Graduate Faculty's standards for graduate study;
   5. Encourages the development of graduate programs which involve interschool collaboration;
   6. If a designee, advises the Provost regarding appointments to the Graduate Faculty;
   7. Administers graduate fellowship programs which cannot be assigned to specific schools;
   8. Serves as liaison officer between the University and the various professional organizations and other agencies which are concerned with graduate work on the national level;
   9. Keeps informed of developments in graduate education and postdoctoral study at other graduate institutions;
   10. Fosters research and innovation related to graduate study; and
   11. Sees that bulletins, catalogues, and other materials describing the University's graduate programs are published and distributed.

3. Provost
   1. Represents the Chancellor in developing, reviewing, and evaluating graduate programs throughout the University;
   2. Cooperates with deans and department chairs in maintaining a graduate faculty of superior competence, approves appointments to the Graduate Faculty as recommended by the deans, and observes the quality of graduate instruction and research within the several schools; and
   3. Serves as a member of the University Council on Graduate Study.

4. Chancellor
   1. As chief administrative officer, reviews proposals of the University Council on Graduate Study and is responsible for final decisions regarding the structure of graduate instruction and research;
   2. Recommends University Council on Graduate Study proposals for new degrees to the Board of Trustees for final action; and
   3. Confers graduate degrees recommended by the Graduate Faculty of the several schools and approved by the Board of Trustees.

VI. Amendments

Amendments to this plan of organization may be proposed by the University Council on Graduate Study, by joint action of two or more of the faculty councils or committees, or by petition of 50 Regular members of the Graduate Faculty drawn from two or more schools. A proposed amendment shall be regarded as new legislation and shall be handled in accordance with the procedures outlined in Section II.D.

Nomination and Appointment to the Graduate Faculty

I. Qualifications for Membership in the Graduate Faculty

According to the 1971 reorganization of Graduate Study at the University of Pittsburgh, "membership in the Graduate Faculty shall be of two classes, 'Regular' and 'Adjunct.'" Regular membership shall be recommended for full-time faculty members or part-time, tenure stream members of the University faculty or academic staff with faculty status who are approved to direct graduate study and research at all levels. Adjunct membership
shall be recommended for persons whose primary responsibility is outside the University but who hold a part-time faculty appointment and are approved to direct graduate study and research at all levels.

The competence to direct graduate study and research at all levels is the primary qualification for membership in the Graduate Faculty. Hence, each nomination for membership should include documentation of the candidate's experience in research, in the teaching of graduate level courses, in the supervision of graduate research, as well as in scholarly publications and professional employment. The completion of a doctoral dissertation, while highly desirable, is not in itself sufficient evidence of qualification for membership in the Graduate Faculty. At the same time, faculty members without an earned doctorate are not automatically excluded and may be designated if they have exceptional qualifications by virtue of experience and accomplishment.

Appropriately qualified faculty members who are not either Regular or Adjunct members of the Graduate Faculty may be assigned by their department chairs (if approved by the Graduate Faculty of the department) the responsibility for the teaching of graduate courses and the direction of master's level research. In addition, they may serve on doctoral dissertation committees provided that a majority (three or more) of the committee are Regular or Adjunct Graduate Faculty members. These responsibilities provide some of the experience required for later appointment to membership in the Graduate Faculty. Individuals who are candidates for advanced degrees, and especially those seeking a degree from the University of Pittsburgh, do not normally qualify for membership on doctoral dissertation committees and, except in a few professional areas, they should not normally be assigned the responsibility for the teaching of graduate courses.

II. Procedure for Nomination

All FE nominations for Regular or Adjunct membership in the Graduate Faculty must originate in the department or school offering graduate degree programs. All Regular Graduate Faculty members in the department, school, or unit must be polled, and the nomination must be signed by at least six of the Graduate Faculty members, the department chair, and the dean of the school making the nomination. If there are fewer than six Graduate Faculty members in the unit, additional support (including signatures) should be obtained from the Graduate Faculty members in closely related areas of the University.

The Graduate Faculty of any school may determine appropriate discipline sub-clusters to act on nomination procedures, if the total faculty so desire.

If a department or school nominates for Regular membership in the Graduate Faculty, an individual whose primary appointment is in another department, the nomination must include the concurrence of the department of primary appointment.

All nominations for Regular or Adjunct membership in the Graduate Faculty should be submitted on the appropriate form. The required supporting evidence should include a listing of graduate courses taught, service on graduate committees, research supervised, and scholarly publications.

III. Appointment to the Graduate Faculty

Appointment to membership in the Graduate Faculty is made by the Provost of the University.

The Provost utilizes a standard procedure for review of all nominations before final approval and appointment. This review is based upon the qualifications to teach and direct graduate research at all levels in accord with the objectives of the degree programs.

Authority and Responsibility

Authority of the Graduate Faculty

The Graduate Faculty of the University, acting through the University Council on Graduate Study, establishes general regulations and minimal requirements for graduate degrees throughout the University. This responsibility applies to the traditional MA, MS, and PhD degree programs as well as to advanced professional degrees and graduate certificates, except for the first professional degree programs in Medicine, Dental Medicine, Pharmacy and Law. The Provost has final authority in the interpretation and application of the regulations established by the University Council on Graduate Study.
The Graduate Faculty of each department or school establishes the requirements for degrees earned under its jurisdiction provided these requirements are in accord with those established by the University Council on Graduate Study. The dean of each school has final authority in the interpretation and application of these additional requirements and/or regulations.

Responsibility

Each department or school with a graduate program is expected to: (1) establish and maintain a high quality graduate program appropriate for its discipline and in accord with the regulations established by the University Council on Graduate Study; (2) provide each graduate student with a written copy of the regulations concerning graduate study and the requirements for advanced degrees; and (3) designate a faculty member (or a committee) to advise each graduate student concerning all aspects of the graduate program and provide for a thesis or dissertation adviser and the appropriate committees.

Each graduate student is expected to become familiar with the general regulations concerning graduate study and with the specific regulations of his or her major department of graduate study and to accept responsibility for the completion of degree requirements as prescribed.

Admission and Registration

Application

An inquiry from a prospective student concerning graduate study should receive from the department or school a prompt response that includes a description of the program(s), the necessary application forms or information about applying online, and instructions concerning the completion of all forms, including the Application Data form.

The applicant is expected to:

1. Complete the online application and submit the application fee through the online payment system. If the applicant submits a paper application, he or she should return to the department or school the completed application forms and a check (not cash) for the application fee payable to the University of Pittsburgh. This fee is required of all applicants and is non-refundable. It does not apply toward the payment of tuition.
2. Request the registrars of all undergraduate and any graduate schools attended to send official transcripts of their records to the department or school of intended graduate study.
3. Submit any additional material required by the department or school and, if available, other evidence of academic and personal qualifications for graduate study. These materials may include any or all of the following: scores achieved on standardized examinations such as the Graduate Record Examination or the Miller Analogies Test, letters of recommendation, term papers written during previous study, evidence of relevant work/life experience, evidence of motivation for graduate study, and a statement of career objectives.
4. Arrange for a personal interview if requested by the department or school.

No action should be taken on an application for admission to graduate study until the department or school has received: (1) the completed application form; (2) the application fee; (3) official transcripts of all work done in undergraduate and graduate schools; and (4) supporting materials as required by the department or school. (Under the Admission Status section, see Special Status for circumstances in which a student may be granted temporary admission.)

Each department or school has the responsibility to establish deadline dates both for receipt of application for admission and for application for fellowships, assistantships, or other forms of aid and to notify prospective applicants of these dates. A department or school may limit admission to a specific term only or may allow admission in any of the three terms. Each department or school is obligated both to act promptly on completed applications, if submitted before the established deadline date, and to give a thorough and fair review of each completed application. Decisions regarding admission should be based on an overall evaluation of all the credentials submitted by the candidate, and be in accord with the availability of faculty, facilities, and student support necessary to meet the applicant's expressed academic and research needs and interests. Applicants should be notified promptly of decisions concerning their applications. Many departments or programs have a limited number of places available. In cases where the number of qualified applicants exceeds the number of places available, applicants should be judged competitively.

If a department or school so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. The deferral of admission is independent of financial aid.
Officially, admission may be granted or denied only by the dean of the school, and the issuance of visa documents may be granted or denied for non-academic reasons only by the Office of International Services. Registration is permitted only after admission is granted.

Changing the Field of Graduate Study

A student already admitted to graduate study and desiring to change a major department of graduate study must file an application for such a change in the office of the dean or the department of the school the student wishes to enter. The application for admission to the new department should be evaluated in the same manner as an application from a new student.

Admission Status

Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

**Full Graduate Status:** For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. International applicants must meet the admissions guidelines described under "Admission of Students from Other Countries." Qualification for advanced study normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may be considered for the award of an advanced degree.

**Provisional Graduate Status:** Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate course program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department, and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

**Special Status:** Students may be granted temporary admission as "special status" under the following circumstances:

1. Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.
2. Individuals not seeking an advanced degree but with specific qualifications for one or more courses, including courses required for licensing or certification, may register for such courses subject to review by the department and the dean. Schools providing such an opportunity may specify the number of credits or courses for which an individual may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the individual is subsequently admitted to a graduate degree program.

Admission of Students from Other Countries

The University of Pittsburgh welcomes applications from students in other countries. An inquiry from a prospective student from abroad should receive from the department or school a prompt response that includes a description of the program(s), the necessary application forms, including the Application Data form and Supplemental Application for Foreign Students, and instructions concerning the completion of an application, including information about applying online.

When a department or school receives the completed application, including all academic records and letters of reference, it may request an admissions officer in the Office of International Services (OIS) to evaluate the duration of primary, secondary, and university education, the nature of the institution(s) attended, the system of grading in that institution, and to recommend admission or rejection of the candidate. Academic credentials must be originals written in the language in which credentials are normally issued. Certified translations must accompany credentials which are not in English.
Each foreign applicant must provide clear evidence of proficiency in English. (See English Language Proficiency.) In addition, each applicant must provide evidence of adequate financial resources for the estimated length of study at the University of Pittsburgh. The Office of International Services (OIS) will determine whether or not this requirement has been satisfied by the applicant.

When a department or school has completed its evaluation of the credentials of an applicant, it notifies the candidate that he or she is or is not academically qualified for admission. The letter to the applicant must state that the applicant will receive either a visa document or further instructions from the OIS. In all cases, a duplicate copy of the letter of admission and award of financial aid, if any, must be sent to OIS, as must copies of all rejection letters.

Upon satisfaction of all academic and non-academic requirements, the OIS will issue, as appropriate, the Form I-20 Certificate of Eligibility for Non-Immigrant "F-1" Student Status or Form DS-2019 Certificate of Eligibility for Exchange Visitor "J-1" Status. Along with visa documents, OIS will send information concerning arrival and orientation.

The University reserves the right, even after the arrival and enrollment of a student from another country, to require, at his or her own expense, individual curricular adjustments whenever particular deficiencies or needs are found. This could include enrollment without credit in additional course work in English as a foreign language or in courses prerequisite to his or her regular course of study. New students from abroad should be encouraged to use the services of OIS to help them in their adjustment to the United States and to facilitate their total educational experience.

**English Language Proficiency**

Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. The determination that the applicant has sufficient proficiency is made by the admitting department or school, subject to University-wide minimum standards determined by the University Council on Graduate Study. The University's full policy on Assessment for English Language Proficiency for Admission (Policy 09-02-01) can be found at http://www.cfo.pitt.edu/policies/policy/09/09-02-01.html. Any exceptions to this policy must be approved by the Provost or Provost's delegate after review of the entire record and consultation with the Office of International Services.

In keeping with the University policy on Certification of English Language Fluency for Teaching, students who are not native-speakers of English and are appointed as teaching assistants or teaching fellows are required to take a test of their spoken English upon arrival. Individuals are given non-teaching assignments and are required to take special course work until they attain passing scores. An unsatisfactory score at the time of reappointment is sufficient cause for nonrenewal.

**Readmission**

A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her adviser and committee. Readmission is not automatic nor does it necessarily reinstate the student in the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements.

**Registration**

The Office of the Provost publishes the University of Pittsburgh Academic Calendar, which establishes the dates for registration. A student must be officially admitted, readmitted, or reinstated to the University before he or she may register for courses.

Faculty members are responsible for advising students concerning their programs and specific course selections each term. Students are required to follow the registration process outlined by their school, and they must adhere to registration deadlines in order to avoid the assessment of a late registration fee. Students pursuing two degrees or a degree and a certificate simultaneously must list one as the primary academic program and may list the other as a secondary academic program during the registration process. Students are billed at the tuition rate of the primary academic program. It is recommended that such students meet with advisers in both the primary and secondary academic programs. Generally, a certificate program should be listed as a secondary academic program.
Students registering for the first time should be advised to complete registration well before the beginning of the term. After the start of classes, registration is permitted for new and continuing students only with the written approval of the dean in unusual circumstances and with the payment of a late registration fee.

All graduate students are expected to be registered in accordance with the program of study they are carrying. No person should expect to receive guidance and direction from members of the Graduate Faculty unless he or she is so registered. Students must be registered in the term in which they take preliminary and comprehensive examinations.

All graduate students must register for at least one credit during the 12-month period preceding graduation and must be registered for the term in which they are graduated. Waivers may be obtained by submitting a written request to the Registrar from the dean of the school. The request should be based on very extenuating circumstances, e.g., inability of the student's dissertation committee to meet during the final term when a student has given reasonable notice or the student has completed all degree requirements in a previous term.

The Registrar will withhold registration and add/drop services from students who so warrant for financial, academic or disciplinary reasons. The University reserves the right to change registration procedures. For additional registration information, visit the University Registrar's website at http://www.registrar.pitt.edu/enrollment.html.

**Full-Time and Part-Time Study**

Graduate students who register for nine to fifteen credits in the fall or spring term are full-time students and are assessed the current tuition rate for their school. A school may require students enrolled in a degree program to register for more than nine credits. Students who register for fewer than nine credits are part-time students and billed on a per-credit basis. Admission procedures for part-time students are the same as those for full-time students.

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements and are working full-time on their dissertations may register for "Full-time Dissertation Study," which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee.

**Maximum Programs of Study**

No student is permitted to register for more than 15 graduate credits without written permission from the dean of the academic center in which the student is pursuing a degree. Graduate students who register for more than 15 credits will be billed for each additional credit that exceeds their full-time tuition rate. Individual schools and departments may restrict the maximum program of any or all of their graduate students.

**Cross-registration**

Through the Pittsburgh Council on Higher Education (PCHE), Carlow University, Carnegie-Mellon University, Chatham University, Duquesne University, La Roche College, the Pittsburgh Theological Seminary, Point Park University, Robert Morris University and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the fall and spring terms. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 9 credits as a graduate student) at Pitt while cross-registered. Credits earned by cross-registration in graduate courses, when approved in advance by the student's graduate adviser, are accepted as University of Pittsburgh credits for the purpose of the calculation of the grade point average and the completion of degree requirements. Each department at each institution retains the authority to establish the prerequisites for admission and the maximum enrollment in its own courses and to grant priority in registration to its own graduate students.

**Course Withdrawal**

Students may add or drop courses before the end of the Add/Drop period. A student who wishes to withdraw from an individual course after the Add/Drop period but prior to the end of the ninth week of the term or the deadlines noted in the Schedule of Classes for the summer sessions, must complete a Monitored Withdrawal form available from the dean, obtain the signature of the instructor, and return the completed form to the dean's office of the school offering the course. A W grade will then be issued. After the official withdrawal deadline a student may withdraw from a course only in extraordinary circumstances and with the permission of the dean.
Students may terminate their registration in all classes by informing the Office of the Registrar of their intent to do so prior to the end of the Add/Drop period for the term. Students registered for courses scheduled to begin after the end of the Add/Drop period for the term may terminate their registration by informing the Registrar's Office of their intent to do so at any time prior to the first scheduled meeting day of the class.

An official resignation occurs when the student notifies the Office of Student Accounts of the intent to terminate registration for all classes after the end of the term's/sessions' Add/Drop period but no later than the 60th calendar day of the term or the deadlines noted in the Schedule of Classes for the summer sessions. The R grade will be assigned for each course for which the student registered.

A student may withdraw from all courses after the 60th calendar day of the term or by the deadlines noted in the Schedule of Classes for the summer sessions by processing their withdrawal through the office of the student's academic dean. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

A student who stops attending a course and does not initiate the withdrawal or resignation procedures may be assigned an F grade.

Students who plan to return to the University within one calendar year must indicate this when they provide notification of resignation. Students who do not advise the University of their intent to return to the University within one calendar year are classified as permanent resignations. Students who permanently resign and later decide to return to the University must apply for readmission and pay the appropriate fees. This includes cases when the readmission date is less than one year from the effective date of resignation.

**Tuition, Fees and Other Charges**

Tuition rates, fees, and other charges paid by graduate students are established by the Board of Trustees in cooperation with the University Administration.

The University reserves the right to change registration procedures. For additional registration information, visit the University Registrar's website at http://www.registrar.pitt.edu/enrollment.html.

**University Grading Policy for Graduate Courses**

*Introductory (or master's level) graduate courses are assigned the numbers 2000-2999; advanced (or doctoral level) graduate courses are assigned numbers 3000-3999.*

The following policy includes all grades and their corresponding definitions which may be legitimately issued within the schools of the University of Pittsburgh. All available grading options and their uses are also included. Each school uses symbols and grading options consistent with this University Grading Policy. The Registrar will record for a particular course only those grades specified in the Schedule of Classes. An inappropriate grade reported for a student will register as invalid, hence Z. Students will be subject to the grading policy of the school in which a course is given. Graduate students wishing to register for undergraduate courses should contact the dean's office of the Academic Center offering the course to explore grading option requirements and procedures.

**Grading System Definitions and Grade Points**

A+ = 4.00

A  = 4.00 Superior attainment

A- = 3.75

B+ = 3.25

B  = 3.00 Adequate graduate level attainment

B- = 2.75
C+ = 2.25
C  = 2.00 Minimal graduate level attainment
C- = 1.75
D+ = 1.25
D  = 1.00
D- = 0.75
F  = 0.00 Failure

G Course work unfinished because of extenuating personal circumstances
H Exceptional (honors) completion of course requirements
I Incomplete course work, due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars
N Noncredit audit
NC No Credit
R Student resigned from the University
S Satisfactory (successful) completion of course requirements
U Unsatisfactory (failing) completion of course requirements
W Withdrawal
Z Invalid grade reported
** No grade reported

**Grading Options**

LG Letter Grade

H/S/U Honors/Satisfactory/Unsatisfactory

H/HS/S/LS/U Honors/High Satisfactory/Satisfactory/Low Satisfactory/Unsatisfactory*

S/NC Satisfactory/No Credit (formerly the S/N option)

LG and H/S/U Letter Grade and Honors/Satisfactory/Unsatisfactory

LG and S/NC Letter Grade and Satisfactory/No Credit

* This option is available for professional students in the School of Medicine only.
Each Academic Center is responsible for establishing guidelines as to which University-approved grading options are appropriate for courses offered by that Academic Center. Similarly, each department may identify from among the grading options approved by the Academic Center those it deems acceptable for the courses it offers. Furthermore, each course instructor may specify, within the range of grading options approved by the department and the Academic Center, the grading options which may be selected by students taking his or her course. A University Grade Option/Audit Request form is not required to be completed by a student and will not be accepted by the Office of the Registrar for a graduate course. Only the S/NC grading option may be used in evaluating thesis or dissertation research.

Grade Assignments

It is the responsibility of each faculty member of the University to assign a standard letter grade or option grade as listed in the Schedule of Classes to each student enrolled in an approved University course. All other grades will be recorded by the Registrar as a Z, an invalid grade.

N (Noncredit Audit) Option

A student may choose to audit any graduate course on a space available basis. After obtaining the instructor's permission to audit a course, the student follows the same procedures as registering for credit. Tuition is assessed for all audits. An N or W are appropriate grades for courses audited.

G and I Grades

A student may be graduated without removing G and/or I grades from the record provided all degree requirements have been met and the student's department recommends graduation. The individual school's grading policy should be consulted for regulations dealing with the removal of I grades. Students assigned G grades are required to complete course requirements no later than one year after the term in which the course was taken. Once the deadline has passed, the G grade will remain on the record, and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Grade Changes

A faculty member wishing to effect a grade change must complete a Grade Change Request. The dean of the school in which the course is offered or his or her designee must approve a grade change before it will be honored by the Registrar. While each school may determine a time limit for grade changes, they should be processed no later than one year after the initial grade was assessed. There may be reasons that justify a later change of grade, but they must be of an unusual nature and considered most exceptional. Any exception must receive the dean's approval. Changes in I grades are exempt from this policy.

Official University Record: GPA Calculation

A student's graduate Grade Point Average (GPA) is obtained by dividing the total number of letter grade credits taken in the graduate program into the total number of grade points earned in the graduate program. Only letter grades with GPA values will be used in computing the Grade Point Average.

A student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser. A school may restrict the type and/or number of different courses which may be repeated during one degree program. The grade earned by repeating a course is used in lieu of the grade originally earned, although the original grade is not erased from the transcript. No course may be repeated more than twice. No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a B or higher grade. The repeated course must be the same as that in which the original grade was earned. In extenuating circumstances, a department chair or program director, with the dean's approval, may substitute another course of similar content. Grades of W, R, or N reported for the repeated course will not be counted as a course repeat.

To initiate only the last course grade being computed in the GPA, a Course Repeat form must be filed with the dean's office.
General Regulations

Academic Standards

A grade average of at least B (GPA = 3.00) is required in the courses which make up the program for any graduate degree.

A student with full graduate status is automatically placed on probation whenever his or her cumulative GPA falls below 3.00. Each school determines the restrictions placed on a student on probation. A student who remains on probation is subject to dismissal within a time period determined by the school, subject to review by the University Council on Graduate Study. A student on provisional or special status or on probation is not eligible to take the Ph.D. preliminary evaluation, the MA/MS or Ph.D. comprehensive examination, or to be graduated.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more, but not less, stringent than those stated here.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all requirements for professional master's degrees, in five years. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of ten years or eight years if the student has received credit for a master's degree appropriate to the field of study. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Acceptance of Transfer Credits

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their department and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components is responsible for providing any financial assistance to the graduate student.

Official transcripts certifying graduate courses completed in a degree granting graduate program at another appropriately accredited institution prior to admission to the University of Pittsburgh should be submitted at the time of application and should be evaluated for acceptability as transfer credit early in the student's graduate career for acceptability as transfer credit subject to University policy, course equivalencies, and individual school requirements. In no case may the total number of credits transferred for completion of requirements for an advanced degree exceed the maximum number stated in the sections pertaining to advanced degree requirements. The Registrar, after notification by the dean, will enter the transfer (advanced standing) credits as block credits on the student's transcript. Grades (and grade points) are not recorded for credits accepted by transfer.
Transfer credits will not be accepted for courses in which a grade lower than B (GPA = 3.00) or its equivalent has been received. No credit will be granted toward an advanced degree for work completed in extension courses, correspondence courses, or in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution and the institution has an accredited program.

Credit by Course Examination

Each school authorized to offer graduate courses should clearly specify in its school bulletin whether or not students may obtain credit toward a degree by the procedure of "credit by course examination." If such an option is provided, the courses for which this option is appropriate should be designated as such in the school bulletin. A school granting graduate credit for life or work experience should do so only through the option of credit by examination.

Registration of Undergraduate Students for Graduate Courses

Undergraduate students with sufficient preparation are permitted to enroll in graduate courses following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses which will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as Advanced Standing credits on the graduate transcript.

Early Admission Program

Exceptionally able undergraduate University of Pittsburgh students may be admitted to full graduate status if their graduate and undergraduate schools have approved early admission as a permitted option, have established standards and procedures, and provided the student needs no more than 24 credits to complete the baccalaureate degree. Credits earned while enrolled in the graduate program may also be counted toward fulfilling undergraduate degree requirements.

Course Work Acceptable as Graduate Credit

A substantial proportion of courses acceptable toward a graduate degree should be designed explicitly for graduate students. Introductory graduate level (master's level) courses are numbered 2000-2999, those at an advanced graduate level (doctoral level) are numbered 3000-3999. To be eligible for a master's degree, a student must have completed at least 30 credits at the graduate level with at least an average grade of B (3.00). A doctoral student must complete additional graduate level courses as determined by his or her department or school. No lower level undergraduate course (numbered 0001-0999 or 7000-7999) may be applied toward a graduate degree.

Students may register for graduate courses at Carlow University, Carnegie-Mellon University, Chatham University, Duquesne University, La Roche College, the Pittsburgh Theological Seminary, Point Park University, and Robert Morris University under the PCHE cross-registration agreement. Such work, if approved in advance by the student's adviser, will not be considered as transfer credit and may be counted for credit toward a graduate degree; the grade earned will be used in computing the student's grade point average.

Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University or two different departments within the same school. Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.
The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of six credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

**Dual and Joint Degree Programs**

Dual and joint degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. The same course, examination, or thesis may be used to fulfill requirements only if so specified in the documents formally establishing the dual or joint degree program as approved by the University. These programs may result in a student earning two separate masters' degrees, a master's and a first professional degree, or a master's or first professional degree and a doctoral degree, but never result in a student earning two separate doctoral degrees.

Students must be admitted to both academic programs offering the dual or joint degrees being sought and must be graduated from both degree programs at the same time.

**Certificate Programs**

A certificate program at the graduate level is a coherent set of courses and related work in a particular area. The minimum credit requirement for a certificate is 15 credits, of which 12 credits must be completed at the University of Pittsburgh. Normally, a certificate is an award granted at the graduate level only to persons receiving graduate degrees or persons who enter with graduate degrees and wish advanced training in some specific area. It is often an interdisciplinary program and may be entered by students pursuing different degree programs. If earned in conjunction with a degree program, a certificate must require additional work. In some professional schools a particular certificate program may be designed for students who are not pursuing a master's degree. In this case admission requirements must be equivalent to admission requirements for a master's degree. A student must be formally admitted into a certificate program; the certificate may appear on the transcript as a degree goal and will appear on the final transcript as an awarded certificate.

There are three types of certificate programs at the graduate level:

- **Postbaccalaureate certificates** are usually aimed at meeting the needs of working adults searching for changes in careers. To be admitted to a postbaccalaureate certificate program, a student must have earned a baccalaureate degree at an accredited institution and meet the University's minimal requirements for admission to graduate school. Normally all courses are at the graduate level. As a minimum requirement, at least half of the credits required for the certificate must be earned in graduate courses and no lower-level undergraduate courses may count toward the certificate. If a student is subsequently admitted to a master's program, the credits earned in the certificate, if accepted by that program, may count toward completion of the master's program.

- **Graduate certificates** are used to enhance existing degree programs and to enable the student to show a breadth of study to future employers. To be admitted to a graduate certificate program, a student must already have earned a master's degree or be in the process of earning a graduate degree at the University of Pittsburgh. Normally all courses are at the graduate level. As a minimum requirement, at least half of the credits must be earned in graduate courses and no lower-level undergraduate courses may count toward the certificate. In a few fields, separate certificates are offered for master's students and for doctoral students, and in the latter program all courses must be at the graduate level. Certificates are awarded upon successful completion of the required program and the award of the graduate degree. They should require additional work beyond the graduate degree.

- **Post-Professional certificates** usually serve to provide additional and up-to-date expertise to a person who has earned the first professional degree. To be admitted to a post-professional program, a student must have earned a first professional degree or a professional master's degree in a particular professional field. All courses must be at the graduate level.

**Graduate Programs Offered in Off-Campus Locations or via Electronic Communication**

The academic standards set forth in the Regulations Governing Graduate Study apply to graduate programs offered in off-campus locations and offered via electronic communication. Admission criteria should be the same as those used by a school for its on-campus programs.
Editorial Assistance

A student preparing a dissertation or other written work as part of academic requirements may, when appropriate, use the assistance of professional editors, provided that (1) he or she receives the approval of the research adviser or professor of the course in which written work is being submitted; (2) that editorial assistance provided be limited to use of language and not to subject matter, content or meaning; and (3) that all editorial assistance be described and acknowledged in the report.

Publication of Theses and Dissertations

All theses and dissertations submitted at the University of Pittsburgh must be submitted electronically. Electronic Theses and Dissertations (ETDs) are theses or dissertations prepared as text-based PDF files that can contain non-text elements such as multimedia, sound, video, and hypertext links.

All ETDs are made publicly available on the University Library System's online catalog. Students may choose to restrict access to the ETD to University of Pittsburgh IP addresses for a maximum period of five years. After five years, the ETD will automatically become fully accessible. Full access to the ETD may be withheld for a maximum of one year if a patent application has been filed and the student receives appropriate approval from the Provost's Office.

All doctoral candidates are required to execute an agreement with ProQuest/University Microfilms Inc. for the publication of the dissertation in the ProQuest/UMI repository.

Any thesis or dissertation may be published, either by the University or through an outside agency, provided due credit is given to the University. No form of publication, however, shall relieve the student of his or her responsibility for supplying the electronic thesis or dissertation to the University Library System.

University Patent Policy

During enrollment at the University, a student may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, or cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management.

Application for Graduation

Each candidate for graduation must file an official Application for Graduation in the office of the dean early in the term in which graduation is expected. Students are required to be registered for at least one credit at the University in the 12 month period before graduation. Students must be registered in the term in which they are graduated. In exceptional circumstances, students who complete all the degree requirements at the end of a term but are graduated in the next may petition the dean of their school for a waiver of this requirement.

Prior to the end of the term in which they are graduated, all doctoral candidates must submit to the office of the dean a completed Survey of Earned Doctorates Awarded in the United States.

Certification for Graduation

The Graduate Faculty of the department or program evaluates the performance of the student. If that performance is satisfactory, a report should be submitted to the dean certifying that the candidate has satisfactorily completed all departmental requirements for a graduate degree. The dean, after confirming that the overall school and University requirements have been met, certifies the candidate for graduation.

Regulations Pertaining to Master's Degrees
Master of Arts and Master of Science Degrees

Master of Arts (MA) degrees are awarded for completion of graduate programs in various departments within the School of Arts and Sciences, the School of Education, and the Graduate School of Public and International Affairs; the Master of Science (MS) degree is offered in departments within the School of Arts and Sciences, the Joseph M. Katz Graduate School of Business, the School of Dental Medicine, the School of Education, the John A. Swanson School of Engineering, the School of Health and Rehabilitation Sciences, the School of Medicine, the Graduate School of Public Health, the School of Pharmacy, and the School of Social Work. Some of the MA or MS degrees offered are specified as being "in" a particular discipline; e.g., Master of Science in Chemical Engineering.

Programs of Study

The MA and MS degree programs provide an introduction to scholarly activities and research and often serve as preparation for teaching careers. These degrees are awarded for the completion of a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the faculty of the department or program. To carry out this responsibility, each student must be assigned a major adviser, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

At least five courses (15 credits) or one-half the master's degree program, whichever is greater, must be at the graduate level (the 2000 or 3000 series) and must be completed with at least an average grade of B (3.00). No course numbered below 1000 or from 7000 to 7999 may be applied toward graduate degree requirements.

Some master's programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant coursework completed in an area related to the student's specialty. Such areas of concentration or minors are added to the transcript upon the granting of the degree.

Master's degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.00 GPA.

The requirement of proficiency in foreign languages is at the discretion of individual departments or schools.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their program. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The Master of Arts and Master of Science degrees require the satisfactory completion of a minimum of 30 credits of graduate study approved by the department or school. Not more than six credits may be granted toward the completion of the requirements for a master's degree for work completed at another graduate institution. (See Acceptance of Transfer Credits for further information.)

Comprehensive Examination

MA or MS degrees are conferred only upon those students who, in one or more comprehensive examination or the equivalent, show that they have mastered the general field of their graduate study. Each department or similar unit is responsible for specifying the content and procedure for administration of the comprehensive examination and will specify for each candidate the field of his or her examination, which may vary from student to student. Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program should notify the University Council on Graduate Study and describe the substitution.

Students on special or provisional status are not eligible to take a comprehensive examination. These examinations must be taken at least one month prior to the last day of the term in which the degree is to be granted. The results must be reported promptly to the office of the dean but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a two-year period after passing the comprehensive examination may be re-examined at the discretion of the department, program director, or dean.

Thesis Option
The requirement of a thesis or its equivalent is at the discretion of individual departments, programs, or schools. If a thesis is submitted, its form must be in accord with specifications stipulated in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh. The thesis examining committee will consist of at least three members of the faculty recommended by the major adviser and approved by the department chair or program director. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the office of the dean. After the examination, all master's theses must be submitted electronically and will be made available through PITTCat, the University Library System's online catalog.

Non-thesis Option

It is usual for a program to require additional course work if a thesis is not required.

For the Master of Arts degree, each student must describe one or more substantial intellectual experience(s) or accomplishment(s) acceptably in writing. In programs in which a master's thesis is optional, the student must satisfy this requirement by submitting a paper (or papers), as designated by the major department, and must demonstrate competence in using the methods of scholarship.

For the Master of Science degree, a paper or research project is usually required.

Professional Master's Degrees

The University of Pittsburgh, through its professional schools, offers the following master's degrees in professional fields of study: Master of Business Administration, Master of Dental Science, Master of Fine Arts, Master of Education, Master of Science in Geographic Information Systems and Remote Sensing, Master of Health Administration, Master of Health Promotion and Education, Master of Science in Information Science, Master of International Business, Master of International Development, Master of Law, Master of Library and Information Science, Master of Applied Mathematics (MA and MS), Master of Science in Nursing, Master of Occupational Therapy, Master of Physical Therapy, Master of Public Administration, Master of Public Health, Master of Public and International Affairs, Master of Public Policy and Management, Master of Social Work, Master of Arts in Teaching, and Master of Science in Telecommunications.

Programs of Study

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions. The program of study should be a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the student's department or school. To carry out this responsibility, each student must be assigned a major adviser, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

At least one-half of the credits earned in a master's degree program must be at the graduate level (the 2000 or 3000 series) and must be completed with at least an average grade of B (3.00). No courses numbered below 1000 or from 7000 to 7999 may be applied toward graduate degree requirements.

Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The professional master's degrees require the satisfactory completion of a minimum of 30 credits of graduate study approved by the department. No more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another graduate institution. (See Acceptance of Transfer Credits.)

Additional Requirements
Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers.

**Student Assessment**

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of the general field of study. This includes: a) satisfactory completion of all course requirements and b) other performances which indicate comprehensive mastery such as examinations, internships, research projects, theses, practica, and so forth. These requirements vary from school to school.

**Regulations Pertaining to Doctoral Degrees**

**Doctor of Philosophy Degree**

Doctor of Philosophy degrees are awarded for completion of graduate programs in various departments within the School of Arts and Sciences, the Joseph M. Katz Graduate School of Business, the School of Dental Medicine, the School of Education, the John A. Swanson School of Engineering, the School of Health and Rehabilitation Sciences, the School of Information Sciences, the School of Medicine, the School of Nursing, the School of Pharmacy, the Graduate School of Public Health, the Graduate School of Public and International Affairs, and the School of Social Work.

**Admission to Doctoral Study**

In some doctoral programs, the requirements for admission to graduate study and for admission to doctoral study are identical, while other programs require the completion of a master's degree or its equivalent as a prerequisite for admission to doctoral study. Admission to doctoral study does not include any implication concerning "admission to candidacy for the Doctor of Philosophy degree."

Normally, only one major department of graduate study is permitted for the PhD degree. However, a few formal interdisciplinary programs and, under some circumstances, some independently designed interdisciplinary doctoral programs are available (see Interdisciplinary Doctoral Programs).

**Programs of Study**

All PhD programs offered at the University of Pittsburgh should provide a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of the content, methods, theories, and values of a field of knowledge and its relation to other fields. Each program should train the student in the methods of independent research appropriate to the discipline and provide an adviser and a committee to guide the student in an extended investigation of an original and independent research project of significance in the field.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of the department or program. To carry out this responsibility, departments or programs must ensure that each student has a major adviser who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. The adviser may prescribe additional courses both within and outside the department or program that are essential and/or appropriate to the student's program.

Some doctoral programs may include approved areas of concentration used to define and describe the students' training and expertise within the broader discipline. Such an area of concentration is added to the transcript upon the granting of the degree.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Normally, courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Students must maintain a minimum cumulative GPA of 3.00 in courses to be eligible to take the preliminary and comprehensive examinations as well as to be graduated.

The requirement of proficiency in the use of foreign languages or other tools of research is at the discretion of individual departments or schools.
Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their program and, in turn, students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The minimum credit requirement for the PhD degree is met by six terms of registration as a graduate student for 12 or more credits per term or the equivalent number of credits in a reduced load. If the school requires completion of its master's degree program prior to admission into its doctoral program, at least four terms of registration for 12 or more credits per term or the equivalent number of credits in a reduced load are required as a minimum for the PhD degree. No more than 30 credits may be accepted for a master's degree awarded by another institution to meet the minimum credit requirement. In recognition of graduate study beyond the master's degree successfully completed elsewhere, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. (See Acceptance of Transfer Credits) No more than 30 credits may be accepted for a previously earned PhD degree in recognition of master's degree work.

Graduate students already enrolled may, when approved in advance by their department or programs and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In all cases, at least three terms, or 36 credits, of full-time doctoral study or the equivalent in part-time study must be successfully completed at the University of Pittsburgh.

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study, which excludes any other employment except as approved by their departments or programs.

Preliminary Evaluation

The preliminary evaluation should be designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently. The form and nature of the evaluation should be approved at the school level and described in the school bulletin. It should be conducted at approximately the end of the first year of full-time graduate study. The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation. Evaluation results must be reported promptly to the dean's office, but no later than the last day of the term in which the evaluation occurs.

Comprehensive Examination

The Comprehensive Examination should be designed to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline. In some programs, the comprehensive examination is combined with the overview or prospectus meeting. It should be administered at approximately the time of the completion of the formal course requirements and should be passed at least eight months before the scheduling of the final oral examination and dissertation defense. In no case may the comprehensive examination be taken in the same term in which the student is graduated. Examination results must be reported promptly to the dean's office but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department, program, or school.

Doctoral Committee

Before admission to candidacy for the PhD degree, the student's major adviser proposes for the approval of the doctoral program director and the dean a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate
graduate program at another academic institution, to serve as the doctoral committee. The majority of the committee, including the major adviser, must be full or adjunct members of the Graduate Faculty. This committee must review and approve the proposed research project before the student may be admitted to candidacy.

This doctoral committee has the responsibility to advise the student during the progress of the candidate's research and has the authority to require high quality research and/or the rewriting of any portion or all of the dissertation. It conducts the final oral examination and determines whether the dissertation meets acceptable standards.

Meetings of the doctoral candidate and his/her dissertation committee must occur at least annually from the time the student gains Admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward degree and discuss objectives for the following year and a timetable for completing degree requirements. It is the responsibility of the dean of each school to determine a mechanism for monitoring the occurrence of these annual reviews.

The membership of the doctoral committee may be changed whenever it is appropriate or necessary, subject to the approval of the department chair or program director and the dean.

When a doctoral committee member leaves the University, he or she must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed from within the department, and the restructured committee requires the approval of the department chair or director of the school's doctoral program and the dean. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.

A retired faculty member may remain as a member or chair of a committee if he or she is spending considerable time in Pittsburgh or its vicinity and is still professionally active. Retired faculty who meet these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly-formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the department chair or the school's director of doctoral programs and the dean.

**Overview or Prospectus Meeting**

Each student must prepare a dissertation proposal for presentation to the doctoral committee at a formal dissertation overview or prospectus meeting. The overview requires the student to carefully formulate a plan and permits the doctoral committee members to provide guidance in shaping the conceptualization and methodology of that plan. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal. The student is responsible for ensuring that all appropriate regulatory approvals are obtained for the proposed research. For example, if the research proposed in the overview or prospectus involves human subjects, that proposed research must be approved by the University Institutional Review Board (IRB) before it may be carried out.

**Admission to Candidacy for the Doctor of Philosophy Degree**

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary evaluation, have completed formal course work with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed subject and plan of the dissertation from the doctoral committee following an overview or prospectus meeting of the committee. In some schools, admission to candidacy is a prerequisite to registration for dissertation credits. Students are informed of admission to candidacy by written notification from the dean, who also states the approved doctoral committee's composition.

**Dissertation and Abstract**

Each student must write a dissertation that presents the results of a research project carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It presents a hypothesis tested by data and analysis and provides a significant contribution or advancement in that field. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.
Characteristics which a dissertation should demonstrate are: the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution; a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base; a well defined research design; clarity in composition and careful documentation; results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph; sufficient detail so that other scholars can build on it in subsequent work; the preparation of the author to assume a position within the profession.

If the dissertation is the result of a collaborative research effort, the project should be structured in such a way that the student's dissertation results from one, clearly identified piece of work in which the student has supplied the unquestionably major effort. The contributions of the student and the other collaborators must be clearly identified.

Published articles authored by the student and based on research conducted for the dissertation study may be included in the dissertation, if the student's department and school have a written policy that this is acceptable. In any case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. The student should be the sole or primary author of the published work. If the published articles were co-authored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. Instructions on incorporating articles into the dissertation are provided in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh.

Candidates for the doctoral degree must provide a suitable number of copies of the dissertation, as determined by the doctoral committee and school policy, for review and use during the final oral examination. The general format of the dissertation and the abstract is determined by the Office of the Provost and is set forth in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh. Specific instructions should be available in the office of the dean of the school. After the final oral examination is successfully completed, the candidate must electronically submit the approved complete dissertation and abstract in final form. The candidate must submit a dissertation approval form, the required agreement with University Microfilms Inc. for the publication of the dissertation on microfilm and for the publication of the abstract in Dissertation Abstracts, and any appropriate fees to the designated student services representative in the dean's office of the candidate's school.

**Language of the Doctoral Dissertation**

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's dean with the approval of the dissertation adviser and committee, but only for sound reasons of scholarship. Permission shall never be granted on the ground of inadequate command of English.

**Final Oral Examination**

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the University Times. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the doctoral committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the doctoral committee, must be sent to the dean. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the doctoral committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

**Interdisciplinary Doctoral Programs**

A student may be admitted into one of two types of interdisciplinary doctoral programs:

1. **Generic Programs**, which are ongoing, formally structured, and approved doctoral programs, admission into which follows the same procedures as those of departmental programs; and,
2. **Individualized Programs**, which are specially designed to permit an exceptionally able student who has earned a master's degree or the equivalent to pursue an interdisciplinary doctoral program structured to satisfy his or her unique goals. Such students should apply to the dean of the school if the departments involved in the proposed program are organized within one school or to the Provost if the departments are organized within more than one school. The student must satisfy the admission requirements of each of the departments or schools involved in the proposed program. If the request is approved, the dean or the Provost, in consultation with the departments concerned, will designate five members from these departments to serve as an advisory committee. After these advisers meet with the student, a chief adviser is selected to assume responsibility for
general guidance to the student. These advisers continue their responsibility until the student is admitted to candidacy for the PhD degree and may, if it is appropriate, continue as the doctoral committee for this student.

Other Research Doctoral Degrees

The University of Pittsburgh, through its professional schools, offers the following research doctoral degrees in professional fields of study: Doctor of Education offered through the School of Education and the Doctor of Public Health offered through the Graduate School of Public Health.

These doctoral degree programs are similar to those for the PhD in the degree of rigor required, the minimum total credit requirements and permissible transfer credits, requirements for the successful completion of a preliminary evaluation and a comprehensive examination, admission to doctoral candidacy, nomination of a doctoral committee, preparation of the dissertation and abstract, publication of the dissertation, and successful completion of the final oral examination. These doctoral dissertations are usually based on an in-depth research project by the student and are intended to permit the student to apply relevant theory and knowledge as well as demonstrate skills in analysis of a major problem and to contribute to the improvement of practice in the student's area of specialization.

Other Professional Doctoral Degrees

The University of Pittsburgh also offers professional doctoral degree programs for practitioners, including the JSD (Law), DNP (Nursing), AuD (Audiology), DPT (Physical Therapy), PharmD (Pharmacy), and CScD (Clinical Science). These programs provide a coherent curriculum designed to impart the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession. The curriculum should contain a research component to achieve the goal for the research competence of the graduate. Students should deliver a report based on research that demonstrates both mastery of their subject matter and a high level of communication skills. The curriculum should contain an internship, a practicum or a clinical component. Each experience should have associated with it clear goals and objectives, a statement of what skills the student should master, a statement of how those skills will be assessed objectively by the academic program and what steps the program will take in response to those assessments. In addition, the program should have an objective way to evaluate the site where internships and/or clinical rotations take place and assure the expertise of those responsible for administering training and instruction. If the program is an accredited program, the standards of the accrediting body for a professional doctorate must be met.

To attain the depth of knowledge and experience required by someone earning a doctorate, a minimum 9 semesters of full-time study are required. Of this no more than one-third should be internships or clinical work. A comprehensive examination will be used to assess the student's mastery of a substantial and complex body of knowledge.

The minimum admission requirements must be the same as for all graduate programs at the University of Pittsburgh. In addition, the student must have completed a defined set of prerequisites so that all students will enter with required basic knowledge. A student must attain a 3.00 GPA in order to maintain good standing and be graduated.
Application for Admission

Graduate admissions to the University of Pittsburgh are handled by the particular graduate school or program; there is no central admissions office for graduate and professional schools at the University.

This section details only the University requirements and procedures for admission to the University. The Graduate Admissions Office of each school provides admissions information for prospective students to that school.

The admissions information in this section is subject to change at any time. It is intended to serve only as a general source of information.

Graduate Admissions

Decisions regarding admission are based on an overall evaluation of all the credentials submitted by the candidate and in accord with the availability of faculty, facilities, and student support necessary to meet the applicant's expressed academic and research needs and interests. Many departments or programs have a limited number of places available. Interested students should refer to the Schools, Departments, and Programs section of this bulletin in addition to the general admission information provided here.

Application Procedures

Students seeking admission should apply online or call or write to the school or program of intended graduate study for application forms or information about applying online, instructions concerning the completion of all forms including the Application Data Form, and description materials. See the Schools, Departments, and Programs section of this bulletin for contact information and Web site addresses.

The applicant should complete the online application and submit the application fee through the online payment system. If the applicant submits a paper application, he or she should return the completed application and a check for the application fee (payable to the University of Pittsburgh) to the department or school. Cash is not accepted for application fees.

Applicants must also request that the registrars of all undergraduate and any graduate schools attended send official transcripts of their records to the department or school of intended graduate study. In addition, many schools and departments require additional material. These materials may include any or all of the following: scores achieved on standardized examinations such as the Graduate Record Examination or the Miller Analogies Test, letters of recommendation, term papers written during previous study, evidence of work/life experience, evidence of motivation for graduate study, and a statement of career objectives. Applicants should arrange for a personal interview if requested by the department or school.

Application Deadlines

See the Schools, Departments, and Programs sections of this bulletin for information about specific application deadlines, but note that students applying for fellowships and assistantships should file their applications at the earliest possible date. Applicants interested only in admission may be considered up to the deadline dates, but postponing applications may entail the risk that available spaces will be filled. Some programs admit students only for a particular term, so prospective students are encouraged to check with the school and program for specific admissions information.

International Graduate Student Admission

The admission of international graduate and first-professional students is processed by the school or department. Information about graduate and first-professional programs, access to the online application, deadlines, financial aid information, the admission requirements and procedures are available on the Web site of the school or department of intended study Web site addresses may be found in the School, Department, and Programs section of this bulletin or on the Graduate and Professional Website. International students are recommended to start the application process at least 12 months in advance of the intended term of enrollment.

International Student Academic Requirements and Credentials
The minimum requirement for admission to a graduate program is the completion of a bachelor's degree from a regionally accredited institution in the United States or the completion of education that the University of Pittsburgh deems comparable to a bachelor's degree from a regionally accredited institution in the United States.

Applicants are required to submit official original academic credentials. Official original academic credentials that are issued in a language other than English must be accompanied by a certified English translation. In cases where the transcript (grade report, academic record, examination results, mark sheet) does not attest to the awarding of a degree or an academic qualification, a certified copy of the original certificate or diploma awarding the degree or qualification must also be submitted. Certificates or diplomas that are issued in a language other than English must be accompanied by a certified English translation.

**English Language Proficiency Requirements**

International graduate students must possess proficiency in English at a level to enable them to succeed in graduate-level studies. The University of Pittsburgh uses the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) as a measure of having the necessary English language proficiency. Official test results are required if the applicant is a citizen of a country where English is not the official language of that country. The required minimum acceptable score for graduate admission for the TOEFL is 80 for the Internet-based test, 213 on the computer-based version or 550 on the paper-based test; or Band 6.5 on the IELTS (taking the academic writing and reading modules of the test). Some graduate programs may require higher test results. Only officially reported results of the TOEFL or IELTS are accepted in meeting this requirement. Applicants who are citizens of a country where English is the official language are exempt from submitting the results of the TOEFL or IELTS. In addition, applicants who have earned a bachelor's degree or higher degree from a regionally accredited institution in the U.S. are also exempt from submitting the results of the TOEFL or IELTS.

Students with a TOEFL score of less than 600 (250 on the computer-based test or 100 on the Internet-based test) or less than 7.0 on the IELTS must verify English language proficiency prior to completing registration by sitting for an additional Test of English Language Proficiency (TELP) administered through the English Language Institute. Individual schools or departments may require students with higher test scores to sit for this TELP. Based on the test results, students may be required by their academic department or school to take courses in English as a second language as part of their graduate program.

**English Language Fluency for Teaching Assistants/Fellows**

Teaching assistants (TAs) and teaching fellows (TFs) who are non-native speakers of English must be evaluated through a test designed to assess spoken English and English comprehension, approved by the Office of the Provost and administered by the English Language Institute (ELI). The Office of the Provost in consultation with ELI will establish minimum scores acceptable to permit a TA/TF to teach. Individual academic centers or departments may require higher scores than the established University minimums. All TAs/TFs with unsatisfactory scores on this test will be given non-teaching assignments and are required to take special course work until they attain a passing score. An unsatisfactory score at the time of reappointment is sufficient cause for nonrenewal of the student's TA/TF appointment.

**Office of International Services**

The Office of International Services (OIS) advises international students on how to maintain their immigration status and helps to ensure compliance for both international visitors and the University, with respect to federal regulations. OIS also provides generalized support in connecting the University's international community and their hosting departments with resources inside and outside campus. For more information, contact OIS at ois@pitt.edu or call 412-624-7120.

**Process for Issuing Visa Documents for International Graduate Students**

After an international student has been accepted and submitted their enrollment deposit, the school or department will inform the Office of International Services (OIS) of the student's intention to enroll. OIS will then contact the student directly to collect any documents required prior to issuance of the Form I-20 or Form DS-2019.
The deadlines for schools or departments to inform OIS of new students are:

- **Fall Term** - June 1
- **Spring Term** - October 1
- **Summer Term** - March 1

Immigration documents are mailed to the student in his/her home country, usually within 3 weeks of receiving all required information from the student.

### Additional International Student Requirements

The University of Pittsburgh reserves the right, even after arrival and enrollment, to make individual curricular adjustments whenever particular deficiencies or needs of a student are identified. In such instances, students may be required to take, at their own expense and without receiving credit, courses in English language (see English Language Proficiency Requirements above) or courses prerequisite to their course of study to make up deficiencies.

It is strongly recommended that students arrive in Pittsburgh at least two weeks before the start of the term to allow sufficient time to make housing arrangements and to take part in the orientation program conducted by the Office of International Services.

### Admissions Status

Admission may be granted or denied only by the dean of the school or his or her designee. However, non-immigrant students must meet U.S. Department of Homeland Security eligibility requirements for visa document issuance as determined by the Office of International Services. Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

### Full Graduate Status

For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. This normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may take the PhD preliminary evaluation, take the MA/MS or PhD comprehensive examination, be considered for the award of an advanced degree or certificate, or be graduated.

### Provisional Graduate Status

Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

A student on provisional or special status or on probation is not eligible to take the PhD preliminary evaluation, to take the MA/MS or PhD comprehensive examination, or to be graduated.

### Special Status

Students may be granted temporary admission as "special status" under the following circumstances:
1. Students who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.

2. Students who are not seeking an advanced degree but who have specific qualifications for one or more courses, including courses required for learning or certification, may register for such courses subject to review by the department and the dean of the school. Schools providing such an opportunity may specify the number of credits or courses for which a student may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the student is subsequently admitted to a graduate degree program. See Schools, Departments, and Programs section for specific requirements connected to special status students.

Guarantees and Early Admission to Graduate and First-Professional Programs

Undergraduate students receiving an academic merit scholarship who indicate certain professional programs (including communication science, dental medicine, education, law, medicine, physical therapy, and public and international affairs) as their intended field of study on the Freshman Application to the University of Pittsburgh will be automatically reviewed for guaranteed admission into that professional program. Early application is recommended, as spaces are limited.

Exceptionally able undergraduate University of Pittsburgh students may be admitted to full graduate status if their graduate and undergraduate schools have approved early admission as a permitted option and have established standards and procedures, and if the student needs no more than 24 credits to complete the baccalaureate degree.

Tuition Deposit

Once a student is admitted to a program, some of the graduate and professional schools at the University of Pittsburgh require a tuition deposit to secure the student's place in the incoming class. Students should refer to the Financial Issues: Tuition, Fees, Loans, and Scholarships section or to the admissions information for their specific school to determine the amount required for the tuition deposit.

Deferred Admission

If a department or school so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Approval of a student's request to defer admission does not necessarily mean that any financial aid awarded is also deferred. See the Deferred Payments section of this bulletin for more information on deferring financial aid.

Readmission

A student who has not registered for at least one credit or full-time dissertation study during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Inactive students cannot apply to graduate, nor take preliminary or comprehensive exams. Readmission is not automatic nor does it necessarily reinstate the student to the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements. Readmission is automatic, however, for students who receive prior approval for a formal leave of absence.

Changing the Field of Graduate Study

A student already admitted to graduate study and desiring to change a major department or school of graduate study must file an application for such a change in the office of the dean or the department of the school the student wishes to enter. The application for admission to the new department will be evaluated in the same manner as an application from a new student.
Admission to Graduate Study

An undergraduate degree is the minimal requirement for admission to graduate study. Students are admitted to a graduate program and granted one of the following three types of status:

1. **Full graduate status:** when all admission requirements are met;
2. **Provisional graduate status:** when some admission requirements are not (or inadequately) met;
3. **Special graduate status:** to take specific graduate-level courses for one or more terms.

All students, except those with temporary status, must apply either to the MS program or to the PhD program. Students admitted to the MS program are eligible to complete the requirements for that degree. If they wish to transfer to the PhD program, they must apply to the admissions committee, which will make its decision based on the student's performance in the MS program and on faculty recommendations.

Full Graduate Status

For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. International applicants must meet the admissions guidelines described under "Admission of Students from Other Countries." Qualification for advanced study normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may be considered for the award of an advanced degree.

Provisional Graduate Status

Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate course program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department, and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

Special Graduate Status

Students may be granted temporary admission as "special status" under the following circumstances:

1. Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.
2. Individuals not seeking an advanced degree but with specific qualifications for one or more courses, including courses required for licensing or certification, may register for such courses subject to review by the department and the dean. Schools providing such an opportunity may specify the number of credits or courses for which an individual may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the individual is subsequently admitted to a graduate degree program.

Application Instructions and Requirements

Apply Online

Applications for graduate study must be completed and submitted entirely online. You will be asked to set up a free account with the ApplyYourself Application Network, which enables you to work on your application over several sessions. Your information is transmitted through a secured server and is kept confidential until you submit your application.
We require you to upload copies of your undergraduate/graduate transcripts to ApplyYourself. We do not need official transcripts unless you are admitted.

We require at least three letters of recommendation, two of these must be from Professors (preferable with PhD's), especially if you are applying for a PhD degree. ALL LETTERS MUST BE SUBMITTED ONLINE. No paper recommendation letters will be accepted.

Your application will be available for review by the department once all the evaluator's letters are submitted and all the transcripts are uploaded.

We do require the GRE general exam although we do not have a minimum score requirement

The required minimum TOEFL score of 90 (with at least a score of 22 in each of the four sections of speaking, listening, reading and writing) will be required for applicants. The required minimum IELTS score of 7.0 (with at least 6.5 in each of its four sections) will be required for applicants. If you do not meet the minimum TOEFL or IELTS scores, your application will not be considered for admission.

For material that must be sent to the department directly (such as GRE and TOEFL scores) our institution code is: 2927. A department code is no longer required.

Begin the online application process.

**Deadlines**

- **January 15:** Fall admission. All application materials, including TOEFL and GRE results, must be received in the admissions office by February 28. International students cannot be admitted if materials are not received by the deadline.
- **September 15:** Spring admission. All application materials, including TOEFL and GRE results, must be received in the admissions office by September 15. International students cannot be admitted if materials are not received by the deadline.

**BS+MS Program**

The department also offers a five-year BS+MS program.

**Application Status and Inquiries**

Email inquiries about Pitt's graduate programs may be sent to cs-admissions@cs.pitt.edu.
Financial Information

Tuition

Enrollment Fee or Tuition Deposit

Upon acceptance to the University, students may be required to pay a nonrefundable, nontransferable enrollment fee or tuition deposit. If paying an enrollment fee, part of that fee will be considered to be a tuition deposit, and part might be used to pay for new student programming of some nature. The tuition deposit component will be applied toward their first-term tuition. The amount of the deposit ranges from $200-$1,500. Instructions for payment will be specified in the admission letter.

Full-time and Part-time Tuition and Mandatory Fees

Mandatory fees vary by campus, undergraduate and graduate level, and by full-time and part-time enrollment. Tuition rates are campus, level, and school specific. The University's tuition and mandatory fee rates are available on the Tuition Rates - Pennsylvania Residents page or the Tuition Rates - Out-of-State Residents page.

Determining How Full-Time vs Part-Time Students are Billed

In the Fall and Spring Terms:

Undergraduate students registered for 12 to 18 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current undergraduate "flat" tuition rate for their academic center.

Undergraduate students registered for fewer than 12 credits are considered part-time, and are billed on a per-credit basis.

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current graduate "flat" tuition rate for their academic center.

Graduate students registered for fewer than 9 credits are considered part-time, and billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

In the Summer Term:

All students are billed on a per-credit basis in the Summer Term with the exception of students in the School of Dental Medicine Dental Hygiene Certificate Program; the Swanson School of Engineering undergraduate program; the Katz Graduate School of Business Full-time MBA, MBA/MS and EMBA Programs; and the School of Nursing Accelerated Nursing Program.

About Mandatory Fees

Mandatory Fee figures are applicable to students regardless of Pennsylvania or Out-of-State residency. Not listed under Mandatory Fees are:

1. Course/major fees that are based upon registration in specific courses (e.g., lab fees).
2. Academic fees (e.g., application fees, academic program fees for programs such as Cooperative Engineering Program and Study Abroad).
3. Service fees (e.g., late application for graduation and lost ID cards).
4. Professional workshop and professional development fees
5. Specific-student fees such as the Freshman Socialization Fee at the Greensburg Campus.
Residency/Reduced Tuition

Admitted students who are United States citizens and have lived in Pennsylvania for a continuous period of 12 months before enrollment in any institution of higher education may be eligible for Pennsylvania tuition rates. Students who wish to challenge their residency classification may petition for Pennsylvania tuition rates by submitting convincing evidence for review to the Student Appeals Office in Thackeray Hall. The University's policy on Pennsylvania Residency Classification is located online at https://www.cfo.pitt.edu/policies/policy/09/09-05-04.html.

Military affiliated students and students who are not U.S. citizens may be eligible for Pennsylvania tuition rates if they meet the qualifications and provide the documentation required by University of Pittsburgh Policy 09-05-04, Pennsylvania Residency Classification.

For any student younger than 22, both the student and parent(s) or legal guardian(s) must meet the residency requirements to be eligible for reduced tuition.

Financial Obligation

Students establish a financial obligation to the University when they enroll in courses and will be asked to acknowledge that obligation to be permitted to enroll in classes each term. The agreement to pay (Promissory Note) the student electronically agrees to provide detailed information about the student's financial obligation and also the consequences of default of that obligation. Unpaid accounts may be referred to a collection agency, reported to credit bureau(s), and/or the student may be subject to legal action. In either case, the student will be responsible for any and all expenses incurred, including attorney fees. Students will bear the University's costs and fees associated with all collection activity resulting from the student's failure to make payment under the agreement they will sign each term.

Fees

Special Service Fees may be charged for University transactions that are processed beyond deadlines, due dates, and specified time limits. Special service fees are listed each term in the Schedule of Classes.

Course Fees are associated with certain courses and will be charged when the student enrolls in those courses. These courses are identified in the Schedule of Classes and Course Descriptions. Course fee information is also available on the Academic Regulations page.

Late Payment Fees are charged when students make payment after the published due date for their charges for the term.

Payments and Credit Balance Refunds

PittPAY is the University's online financial portal for students and the Authorized Users that students have designated as having access to their financial information.

Payments may be made in PittPAY by electronic check (eCheck) or by credit or debit card. While there is no charge for eCheck transactions, our vendor will charge a non-refundable 2.75% convenience fee for all debit or credit card payments. Check payments can be mailed to the address on the Remittance Form at the bottom of the Term Statement, which students and Authorized Users can generate and print themselves.

International Payments can be processed in PittPAY through the University's partnership with Flywire. Flywire offers a streamlined and cost effective way for students and Authorized Users to make international payments on the student account from almost any country, in most currencies.

PittPAY Payment Plans are available for those who elect to make payments in a series of monthly installments, instead of one payment by the due date. Participation in a payment plan is optional. To view available payment plan offers, go to the Payment Plans tab in PittPAY.

eRefunds are automatic refunds of credit balances from the student account. Credit balances occur when payments to the account, including the disbursement of loans and financial aid, exceed the amount you owe. Students and Authorized Users who are Parent PLUS loan borrowers, go to the eRefund tab in PittPAY to designate the checking or savings account where your credit balances should be directly deposited.
Due Date Schedule

Periodic Balance Due Notifications are sent by email and text to students and their Authorized Users from pittpay@pitt.edu when there is a balance due on the student account. To view and edit your email and mobile phone number settings for these notifications, login to PittPAY, select Actions, then Manage Notifications.

Kenneth P. Dietrich School of Arts and Sciences

Graduate programs in the Dietrich School of Arts and Sciences (A&S) are designed to prepare students for careers in research and teaching in the humanities, natural sciences, and social sciences responsive to the evolving needs of the private and public sectors of society as well as to the particular interests of academia.

A&S Graduate Studies has final approval over all admissions to graduate study in A&S and overall student appointments as teaching assistants, teaching fellows, graduate student assistants, A&S fellows, and graduate student researchers, as well as responsibility for processing all related tuition scholarships. It reviews and records the academic progress of graduate students, including the passing of comprehensive examinations, admissions to doctoral candidacy, and final oral examinations. It verifies the completion of theses and dissertations, and certifies all graduate degrees awarded in the Dietrich School of Arts and Sciences.

Contact Information

Questions regarding admissions, teaching and research appointments, and programs of study should be addressed first to the individual graduate department or program. Questions regarding registration, tuition scholarships for teaching or research assistants, and graduate status should be addressed to:

Dietrich School of Arts and Sciences-Graduate Studies
Student Services
5141 Sennott Square
412-624-6094
Fax: 412-624-6855
E-mail: graduate@as.pitt.edu
www.asgraduate.pitt.edu

Admissions

A&S offers MA, MFA, and PhD degrees and certificate programs in the humanities; MA, MS, and PhD programs in the natural sciences; and MA and PhD programs in the social sciences. Several dual and joint degree programs are available.

Students applying for admission should proceed as follows:

Interested applicants are encouraged to go to the School of Arts and Sciences graduate Web page at www.asgraduate.pitt.edu and to visit Web pages of their departments of interest. Students should complete the online application through the ApplyYourself Application Network from the departments’ Web pages. The online application is automatically sent to the appropriate department for processing.

Deferred Admission

Admission to graduate study is valid for the academic year. If a department so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. The deferral of admission is independent of financial aid.

Transferring Between A&S Departments

A student desiring to change a major department of graduate study in A&S must file an application for admission in the department of intended graduate study. Applications for transfer will be evaluated in the same way as applications for admission to the designated department. An application fee is not required.
Admission of International Students

Before reading the A&S-specific details below, see the Graduate Admissions of International Students section for a complete overview of University admissions requirements, including TOEFL or IELTS scores, for students from other countries.

The Dietrich School of Arts and Sciences minimum TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing) will be required. The required minimum IELTS score of 7.0 (with at least 6.5 in each of its four sections) will be required.

Students should apply online using the ApplyYourself Application Network available from the department's Web site. The online application is automatically sent to the appropriate department for processing. All applicants should take note of specific departmental requirements, in addition to those required of all international students. A&S Graduate Studies, Student Services (in 5141 Sennott Square) will determine whether or not an applicant has sufficient proficiency in English.

International Student Application Deadlines and Application Fee

The deadlines for submitting a completed application and financial aid form are determined by the individual departments, but due to delays in the issuance of visas it is recommended that international students apply as early as possible, preferably at least six months prior to the start of the term of admittance, so that paperwork can be processed in a timely manner.

The application fee for all students is $50. The fee must be submitted in the form of a check or money order made payable to the University of Pittsburgh or may be paid using a credit card when applying online.

Admission Status

For an overview of the requirements for the three admission statuses-full, provisional, and special-see Admissions Status in the application for admission section of this bulletin.

Full Graduate Status

Only students in full graduate status may undergo preliminary evaluations, take comprehensive examinations, be advanced to degree candidacy, or receive teaching assistantships or fellowships.

Provisional Graduate Status

Transfer from provisional to full graduate status is possible only upon formal recommendation of the student's department and after:

1. removal of deficiencies noted at the time of admission, with A or B grades, and/or
2. completion of four courses (12 credits) for which graduate credit is earned with at least a 3.00 average.

Special Status

A special status student who takes courses while not seeking an advanced degree may transfer up to four courses (12 credits) taken while on special status to a degree program if the student is subsequently admitted into one, and if the department recommends the transfer. A transferred course must carry a grade of B or better.

Those special status students who earn graduate credits while on temporary admission may apply those credits toward degree requirements.

Early Admission Program
Exceptionally able students in Arts and Sciences at the University of Pittsburgh (GPA of 3.50 or above) with strong letters of recommendation from faculty in the department to which they are applying may be admitted to full graduate status in a department in A&S. At the time of admission, students must have completed 96 credits toward the baccalaureate degree, the final 30 of which must have been taken in A&S, and must have satisfied the general education requirement, second language requirement (if any), and academic major requirements (as certified by A&S). For additional information regarding requirements for the completion of the baccalaureate degree, see the A&S section in the University of Pittsburgh Undergraduate Bulletin.

Inactive Status/Readmission

For detailed information on what constitutes inactive registration status and requirements for readmission to active status, please see Registration Status and Readmission, respectively.

Applications for readmission to A&S should be received according to the following schedule:

- Fall term readmission applications by August 1
- Spring term readmission applications by December 1
- Summer term and/or sessions by April 1

Financial Assistance

Financial assistance for graduate students is provided in the form of teaching and research appointments, fellowships, traineeships, tuition scholarships, and loans. Application for financial aid should be made on the regular Application for Admission to Graduate Study form except in special cases as noted below. All applications for financial assistance are reviewed at the departmental level and awards are made to the extent of available funds. Admission to graduate study does not carry any implications concerning the award of financial aid. Only students with full graduate status are eligible for teaching assistantships and fellowships.

Information concerning nationally competitive grants and fellowships is available to University of Pittsburgh Students through the Office of Research Web site at http://www.asgraduate.pitt.edu/financial-assistance.

Teaching and Research Appointments

Each year about 665 graduate students receive teaching appointments and fellowships in departments offering graduate degrees in the Dietrich School of Arts and Sciences to assist in undergraduate instruction in Arts and Sciences and the College of General Studies. In addition to financial support and medical coverage, these appointments provide teaching experience and further professional development.

In recognition of academic merit, the University offers teaching assistants (TA), teaching fellows (TF), graduate student assistants (GSA), and graduate student researchers (GSR) full or proportional tuition scholarships, and students are required to register for the number of credits proportional to appointment. If appointed in the summer term, students should register for a minimum of 3 credits (or full-time dissertation study, if eligible), unless additional registration is needed for academic purposes.

Information regarding TA/TF/GSA/GSR policies is available at www.pitt.edu/~graduate/tapolicyrev.htm and at A&S Graduate Studies, Student Services in 5141 Sennott Square. For further information on these positions and general descriptions of each appointment's job requirements, see Financial Aid, Teaching and Research Appointments of this bulletin.

Teaching Assistants (TA)

For completion of services requiring approximately 20 hours per week, a TA receives a salary for two terms. Two-term TAs who want to receive their salary spread out across three terms should contact their department immediately.

Teaching Fellows (TF)
For teaching services, requiring about 20 hours per week, a TF receives a salary for the term of their contract, either one or two terms. Two-term TFs who want to receive their salary spread out across three terms should contact their department immediately.

**Graduate Student Assistants (GSA)**

A few graduate student assistantships are available in A&S. A GSA usually assists a faculty member in library research, editorial duties, or similar academic tasks. For such services, requiring about 20 hours per week, a GSA receives a salary for the term of their contract, either one or two terms. Two-term GSAs who want to receive their salary spread out across three terms should contact their department immediately.

**Graduate Student Researchers (GSR)**

The GSRs work under the direct supervision of and are appointed by the principal investigator (or associate) of a funded research project. Their stipends are determined by the terms of the grant within guidelines set by the associate dean for graduate studies and research.

**Fellowships and Traineeships**

Fellowships and traineeships available to students in the School of Arts and Sciences can be found at www.asgraduate.pitt.edu/financial-assistance.

**Academic Standards**

In addition to those University-wide regulations and standards detailed in the section on General Academic Regulations, each student in A&S is expected to be familiar with these school-specific regulations and academic standards:

**Credits and Grade Points**

Courses for which a G, I, N, R, or W grade is recorded and courses numbered below 1000 (0-0999) do not contribute either credits or grade points toward graduation. When a course is repeated, only the last grade and credits are used to calculate the GPA.

Students must achieve the minimum GPA established by their departments, in no case less than 3.00, in order to be eligible to retain teaching assistantships or fellowships, to undergo the preliminary evaluations, to take comprehensive examinations, to be admitted to candidacy for the PhD degree, and to graduate.

Independent study and individual thesis and dissertation research must be graded using the S/NC option (formerly the S/N option) and thus are not used in the calculation of the GPA required for continuation in good academic standing.

**Academic Probation and Dismissal**

A graduate student who fails to maintain an overall GPA of 3.00 or to make satisfactory progress in a degree program is subject to dismissal from graduate study at the University. When the overall GPA of a student falls below 3.00, the student is automatically placed on academic probation; is not eligible for a teaching assistantship, fellowship, or participation in the department comprehensive examination; and is subject to dismissal at the end of the following term. The department should so warn the student in writing.

In addition, any student who is not making satisfactory progress toward the completion of an advanced degree (completion of an acceptable number of required courses and/or research each term or year) may be placed on academic probation by the department. The student must be informed in writing of this action by the department. Normally, one term will be granted in which to correct the deficiency.

A student whose performance on a preliminary or comprehensive examination is judged to be inadequate may be subject to dismissal at the end of the term.
Withdrawal from Courses

Students may add or drop courses before the end of the add/drop period. A student who wishes to withdraw from an individual course after the add/drop period must complete a Monitored Withdrawal form available from the dean of the school offering the course, obtain the signature of the instructor, and return the completed form to the assistant dean of graduate studies, 5141 Sennott Square. A W grade will then be issued.

Students may terminate their registration in all classes by informing the Office of the University Registrar of their intent to do so prior to the end of the add/drop period for the term. Students registered for courses scheduled to begin after the end of the add/drop period for the term may terminate their registration by informing the Office of the University Registrar of their intent to do so at any time prior to the first scheduled meeting day of the class. A student who stops attending a course and does not initiate the withdrawal or resignation procedures may be assigned an F grade.

Repetition of Courses

A student may repeat any course in which a grade of B- or lower is received if authorization is given by the student's department. When a graduate student repeats a course in which the subject matter has not changed, only the last grade received is counted in computing the grade point average. A Course Repeat form must be filed with A&S Graduate Studies, Student Services, 5141 Sennott Square, to initiate proper computing of the grade point average.

Grade Changes

A grade given by an instructor for completed work will not be changed unless an error has been made in reporting or recording the grade. (Reexamination or extra work may not be used as a basis for a change of grade.) A Grade Change Request form must be filed with A&S Graduate Studies, Student Services, 5141 Sennott Square, and approved by the assistant dean of graduate studies.

Independent Study

Students who are using University facilities to an extent greater than represented by their formal course load (and those students required by a fellowship or other appointment to be full-time students) are required to register for an appropriate number of additional credits of Independent Study to reflect their correct status. All graduate study not under the direct supervision of a specific faculty member is, by definition, Independent Study, course number 2990 in each program. This includes study for preliminary evaluations, comprehensive and overview examinations, the preparation of research proposals, etc. Only the S/NC Grade Option (formerly the S/N option) may be used in a 2990 course.

Directed Study

Registration for Directed Study is limited to students in good academic standing and normally beyond their first year of graduate study who wish to study or carry out a project in an area not available in a formal course. The work must be under the direct supervision of a faculty member who has approved the proposed work in advance of registration. A brief description of the work should be recorded in the student's file in the department. Either a letter grade or the S/NC option (formerly the S/N option) may be used to evaluate the quality of work performed by the student, and both the credits and the grade points (if any) will be used in determining the academic standing of the student.

Transfer Credits

Students may transfer credits earned at another accredited institution in an approved degree-granting graduate program toward the requirements for an advanced degree at the University of Pittsburgh. Students requesting advanced-standing credits by transfer should indicate this within the first year of graduate study and provide official transcripts. The department evaluates each applicant's credentials and indicates to the student at the time of admission its recommendation to the assistant dean of graduate studies concerning advanced-standing credit. Credits for course work taken 10 or more years prior to admission for graduate study at the University of Pittsburgh are not automatically transferred for PhD students. For Master's students, credits for course work taken four or more years prior to admission for graduate study at the University of Pittsburgh are not automatically transferred. Departments must evaluate such coursework in terms of its currency of knowledge in the field when submitting transfer credit requests for approval by A&S. Students admitted with special or provisional status cannot transfer credits until full status has been granted. Graduate students
already enrolled, when approved in advance by their department and the assistant dean of graduate studies, may spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and may transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh.

A maximum of 6 credits may be accepted by transfer toward the requirements for the master's degree. A maximum of 24 credits may be transferred toward the requirements for the PhD degree for course work at the master's level earned in another approved graduate school. A student who transfers 24 credits due to completion of a master's degree at another institution is not eligible to earn a master's degree in that discipline at the University of Pittsburgh. If a student has completed relevant graduate work beyond the master's level at another institution, up to 12 additional credits may be accepted for transfer. (No more than 36 credits can be accepted for transfer from all other graduate institutions.) Acceptance of credits by transfer from other graduate schools does not relieve the student from the requirement to register at the University of Pittsburgh and satisfactorily complete a minimum of 18 credits for a master's degree and a minimum of 36 credits for a PhD degree.

For further detail on University requirements on transfer credits, see Acceptance of Transfer Credits under the allowable credits section of this bulletin.

Registration of Undergraduate Students for Graduate Credit

University of Pittsburgh undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree in A&S may be permitted, during their final term, to register for one or two courses at the 2000 level for credit toward a graduate degree. Students must obtain written permission from an A&S department admissions officer that the course may count when and if they are admitted into the degree program. This privilege should not be granted if the proposed total course program exceeds a normal full-time load or if the courses are required for the undergraduate degree. When students register for graduate study at the University, these graduate credits and grades may be transferred to the graduate transcript upon recommendation of the department and approval by the assistant dean of graduate studies. No more than 6 credits can be transferred in this manner.

Statute of Limitations and Leaves of Absence

All regulations regarding the statute of limitations for completion of degree requirements and leaves of absence are detailed under Statute of Limitation/Leaves of Absence of this bulletin. Variations and additions to those rules within A&S are as follows:

Requirements for the master's degree should be completed within a period of four consecutive calendar years from the student's initial registration for graduate study. Requirements for the PhD degree must be completed within a period of 10 years from the student's initial registration, or within eight years if the student has received a previous master's degree. Some departments may have a more stringent statute of limitations for completion of master's or doctoral degrees. There is also a strictly enforced limit of four calendar years on the master's comprehensive examination or its equivalent for students beginning or readmitted for graduate study in fall 2002 or later, and a seven-calendar-year limit on the PhD comprehensive examination for students entering graduate study programs in fall 1999 or later. (Ten-year limits on PhD comprehensive examinations apply for doctoral students enrolled prior to fall 1999.) If the student has not completed all requirements for the master's or doctoral degrees within the time limits on comprehensive examinations for degrees as specified above, the comprehensive examination for the degree must be retaken in order to graduate.

Under exceptional circumstances a candidate for an advanced degree may apply for an extension of the statute of limitations. Applications are available in the department or in A&S Graduate Studies, Student Services, 5141 Sennott Square. They must state the reason for the delay, provide evidence of continuing progress toward the completion of the degree, and include a detailed plan of study and proposed date for completion. The request must be approved by the chair of the student's doctoral or master's committee and the department chair or director of graduate studies and be submitted to the assistant dean of graduate studies for final action. Each student who requests an extension of the statute of limitations must be able to demonstrate proper preparation for the completion of all current degree requirements. There is no extension on the time limits for the master's and doctoral comprehensive examinations.

Under special conditions, graduate students may be granted a leave of absence. Only one leave of absence can be obtained by students during their graduate career. Readmission following an approved leave of absence is a formality.

Advising and Placement

Advising and placement services in A&S graduate programs are conducted within the various departments and programs. Students should consult department handbooks, their departmental advisor, their departmental director of graduate studies, their departmental graduate administrator, and/or
the chair for details. The A&S Graduate Studies Office makes every effort to keep advising and placement in the forefront of departmental concerns. All departments are responsible, with A&S oversight, for implementing policies and practices consistent with the University's in Elements of Good Academic Advising. Unresolved problems relating to the advising of graduate students at the department level can be taken to the assistant dean of graduate studies and research in A&S Graduate Studies, Student Services, 5141 Sennott Square.

A&S Degree Requirements

The general requirements for the master's degrees and doctoral degrees are detailed under Regulations Pertaining to Master of Arts and Master of Science Degrees, Regulations Pertaining to Professional Master's Degrees (including the MFA), and Regulations Pertaining to Doctoral Degrees. For further A&S-specific requirements, see below. Once the University-wide requirements and the A&S Degree Requirements below have been reviewed, see the relevant departmental description for more specific detail.

Requirements for the MA, MS, and MFA Degrees

The minimum requirement for the Master of Art and Master of Science degrees is 30 credits beyond the baccalaureate degree. Furthermore, the MFA, as a professional degree, requires a minimum of 36 credits. Not more than 6 credits may be granted toward the completion of the requirements for a master's degree for work completed at another accredited graduate institution. Most programs require more than this minimum.

Credit Requirements

In addition to the general credit requirements detailed under MA and MS Requirements at the front of this bulletin, the following requirements must be satisfied:

- Completion of 12 credits from the 2000 or 3000 series with a grade of B or higher.
- All courses from the 2000 or 3000 series must be completed with an average grade of B (3.00)
- Registration for research, independent study, or directed study cannot be included among the minimum of 12 credits that must be taken from the 2000 or 3000 series with a grade of B or higher
- Independent study credits do not count towards the MA/MS/MFA degrees

Second Language Requirement

The requirement of proficiency in second languages is at the discretion of individual departments.

Comprehensive Examination

Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program must obtain prior approval from the A&S Graduate Council and notify the University Council on Graduate Study and describe the situation. Students on inactive, special, or provisional status, or who have a GPA less than 3.00, are not eligible to take the comprehensive examination. See Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees for further detail on requirements for comprehensive exams.

Thesis

The requirement of a thesis or its equivalent is at the discretion of individual departments. If a thesis is submitted, its form must be in accord with specifications available from The ETD Format Guidelines Manual and approved by the assistant dean of graduate studies. A report of the final oral examination in defense of the master's thesis must be filed in 5141 Sennott Square. For further information on thesis requirements, including the make up of the thesis committee, see Thesis Option under Regulations Pertaining to Master of Art and Master of Science Degrees.
Application for Graduation

Each candidate for graduation must file an official Application for Graduation in 5141 Sennott Square, early in the term in which graduation is expected. (See your graduate secretary for deadline dates.) See Graduation under General Academic Regulations for further details on graduation and graduation requirements.

Graduation Certification

The faculty of the department evaluates the performance in course work and on comprehensive examinations. If the candidate's performance is satisfactory and all degree requirements have been met, a letter must be submitted to the associate dean for graduate studies and research, on behalf of the department, certifying that the candidate has completed all requirements for a master's degree and indicating whether or not the candidate is recommended to proceed to doctoral study.

Requirements for the PhD Degree

An overview of the University requirements for the PhD degree is presented in Regulations Pertaining to Doctoral Degrees. A&S-specific requirements are detailed below.

Credit Requirements

The minimum requirement for the PhD degree of 72 credits may be earned in formal course work, directed study, independent study, and/or thesis and dissertation research.

Course Requirements

No course numbered below 1000 may be applied toward a graduate degree and no more than 12 credits of 1000 level can count towards a doctoral degree.

Students must achieve the minimum GPA established by their departments, in no case less than 3.00, to be eligible to undergo the preliminary examination, to take the comprehensive examination, to be admitted to candidacy for the PhD degree, and to be graduated.

Second Language and/or Other Tools of Research

The requirement of proficiency in the use of second languages or other tools of research is at the discretion of individual departments. The second language departments have the capacity to evaluate second language proficiency and will be available to so certify.

Preliminary Examination

The nature of the preliminary examination/evaluation and the time when it is conducted are determined by each department. In some programs, the preliminary doctoral exam/evaluation may be combined with a master's comprehensive examination. See Preliminary Evaluation under Regulations Pertaining to Doctoral Study for further details on regulations pertaining to the exam. Students must be registered in the term they are completing the Preliminary Examination.

Comprehensive Examination

Comprehensive examination results must be reported promptly to A&S Graduate Studies, Student Services, 5141 Sennott Square, and no later than the last day of the term in which the examination is administered. Students must be enrolled in the term in which they are completing the
Comprehensive Examination. See Comprehensive Examination under Regulations Pertaining to Doctoral Study for further detail on regulations regarding the exam.

**Doctoral Committee**

Doctoral dissertation committees are composed of four members, three of whom must be Graduate Faculty with either a primary appointment in the candidate's department or a secondary/joint appointment in the candidate's department and a primary/joint appointment in another relevant department within the University of Pittsburgh ("internal members"). The fourth member must be Graduate Faculty external to the candidate's department within the University of Pittsburgh or a qualified scholar with an equivalent status at another accredited institution ("external member"). The Graduate Faculty Roster for the University of Pittsburgh can be viewed at the following website: https://ir.pitt.edu/graduate-faculty-roster/. Membership in the Graduate Faculty is not automatic and must be formally requested by the faculty member's department and approved by the Associate dean for Graduate Studies before the faculty member can serve on a doctoral dissertation committee. The Chair of the committee must be a current (or recently departed) member of the University of Pittsburgh. Any member may serve as Co-Chair.

**Notification of Committee Membership**

The names of the committee members must be submitted to the Graduate Studies Office as part of the application for candidacy by the graduate student. All requests for subsequent changes to the committee should be submitted for approval to the Graduate Studies Office by the Graduate Administrator for the candidate's department. Any changes to the committee membership, internal or external, after the dissertation proposal/prospectus/overview meeting must be approved by the Assistant Dean for Graduate Studies before the dissertation defense. Forms for admission to candidacy and committee changes can be obtained by the Graduate Administrator in the A&S Graduate Handbook.

**Special Requirements for External**

Faculty from outside the University of Pittsburgh may serve as external committee members, but the qualifications of the proposed committee member must be reviewed and their participation approved by the Assistant Dean for Graduate Studies before the dissertation proposal/prospectus/overview meeting or defense is scheduled. Such a request should be accompanied by the requested committee member's current CV and a brief memo that explains the benefits for the student of the participation of this faculty member on the committee. CVs for external committee members who have been approved previously by the Assistant Dean for a particular department's graduate students need only be resubmitted once every five years. In this case, however, the memo accompanying each request for an external member's participation in a new committee must also note the date on which the CV was last submitted for this individual. If the date is not known, a new CV must be included. Requests for external members must be approved by the Assistant Dean in advance of the requested member's participation on the doctoral committee. The Assistant Dean will review the material and either approve or reject the proposed external member.

**Additional Committee Members**

Additional members may be added to the doctoral committee in cases where additional expertise is needed. Such additional committee members are expected to have significant involvement with the graduate student and to attend both the proposal/prospectus/overview meeting and the defense unless prior approval has been received for remote attendance. For additional committee members only, the Graduate Faculty status (or the equivalent at another institution) requirement may be waived if prior approval from the Assistant Dean is requested and granted. Such a request should be accompanied by a brief memo that explains the benefits for the student of the participation of this faculty member on the committee and, in the case of a member who is not from the University of Pittsburgh, a current CV. The CV need only be provided every five years for committee members serving on multiple committees within the same department.

**Committee Participation by Former Members of the University of Pittsburgh Faculty**

Committee members who leave the university after a graduate student has been admitted to candidacy may stay on the committee in their original capacity, as long as they are willing and able to physically attend the defense (or have requested and received permission to attend remotely as described below), and providing that the defense is scheduled within 12 months of the faculty member's departure. If the departed committee member is the Chair, and continues in this role, a Co-Chair from the department must be designated. The participation of any committee member in this category will not affect the maximum number of remote attendees permitted (two, one of whom must be external as described below).
Committee Participation by Retired Members of the University of Pittsburgh Faculty

Faculty who are retired from the University of Pittsburgh are eligible to serve as members on committees formed both before and after their retirement, as long as they are still active professionally in the academic community as reasonably determined by the Chair of the Department. Retired faculty may serve in any capacity including as Chair of the committee. The participation of any committee member in this category will not affect the maximum number of remote attendees permitted (two, one of whom must be external as described below).

Remote Participation by Candidate and Committee members

The candidate and the Committee Chair must attend in person both the dissertation proposal/prospectus/overview meeting and the defense. All other committee members should also be physically present at both meetings. In exceptional circumstances, however, this requirement may be waived as described below.

External committee member only: Remote attendance may be requested from the Assistant Dean for both the dissertation proposal/prospectus/overview meeting and the defense for the external committee from a distant location if, and only if, remote attendance can be arranged according to the guidelines detailed below.

Other committee members. Remote attendance may also be requested from the Assistant Dean for no more than one of the other committee members. Where an external member from outside the University of Pittsburgh is already attending remotely, however, the request must also be accompanied by a memo from the department explaining the need for this second member to attend remotely. Such a request may not be granted by the Assistant Dean if the situation could easily be resolved by a shift in the meeting date of one month or less. A committee member who participated remotely in the overview meeting must attend the defense in person. It is the responsibility of the student to consult as early as possible with committee members about their availability such that remote attendance by more than one member is avoided if at all possible. Remote attendance by more than two committee members will not be permitted.

Remote Attendance Requirements

To satisfy the requirements of remote attendance, any remotely attending committee member must have full audiovisual interaction. The attendee must be visible to other committee members and the graduate student presenter and must be able to see the presenter as well as others in the room as necessary. The attendee must be able to hear and participate orally in all parts of the discussion and questioning. The candidate's department is responsible for arranging the necessary technology to fulfill the remote attendance requirements and it is recommended that someone with technological expertise be present to resolve difficulties if they arise. The dissertation proposal/prospectus/overview meeting or the defense of the dissertation must be rescheduled (or finished at later time) if -

1. it is not technologically possible to accomplish the required level of audiovisual interaction at the time and place appointed; or
2. the video portion of the connection fails before the defense is 50% completed (reasonably determined by the Committee Chair) and cannot be reestablished; or
3. the audio portion connection fails before 90% of the meeting or defense is completed (reasonably determined by the Committee Chair) and cannot be reestablished.

Chair Certification of Compliance with Remote Participation Requirements

The Chair of a dissertation committee in which any members participate remotely will be required to complete a form ("Remote Attendance Certification"), in which the Chair attests that the requirements for remote attendance have been met. This form must be included with the results of the dissertation proposal/prospectus/overview meeting or defense in the submission to the Graduate Office. If the Chair of the committee signs the student's paperwork in the name of the remotely attending member, a copy of the authorization for this signature (an email from the remotely attending member authorizing the signature is sufficient) must also be provided when the documentation is submitted.

The form is available at: http://www.asgraduate.pitt.edu/forms-policies

Admission to Candidacy for the PhD Degree
After completion of the overview, the student should, in consultation with the student's major advisor, file the application for admission to candidacy for the Doctor of Philosophy degree. Students are informed of admission to candidacy by written notification from the assistant dean of graduate studies. When the topic has been accepted and the proposed doctoral committee has been approved by the department chair and the assistant dean of graduate studies, the student will be informed of admission to candidacy and of the membership of the doctoral committee. Students must be enrolled in the term in which they are completing the overview for candidacy. For a listing of requirements for admission to candidacy, see Admission to Candidacy for the Doctor of Philosophy Degree.

Admission to candidacy must be at least eight months before the defense of the dissertation in order to provide an opportunity for the members of the doctoral committee to review, criticize, and monitor the proposed research.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. A record of such meetings must be maintained in the student's file in the department.

**Dissertation**

See Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees for an overview of requirements and form for the dissertation and abstract. In addition, students in A&S should note that photocopies of journal articles may be used only in the appendix and only if necessary.

**Language of the Doctoral Dissertation**

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted for graduate students in second language departments but only for sound reasons of scholarship. Permission shall never be granted on the grounds of inadequate command of English. Students who wish to write a dissertation in a second language shall apply formally to their department chair for permission. The application must be approved by the assistant dean of graduate studies prior to submission of the paperwork for admission to candidacy. For approval, the following requirements must have been met:

1. The application must be recommended for approval by the department.
2. All members of the doctoral committee must have an adequate command of the language.
3. The student must have demonstrated full proficiency in English to the satisfaction of the assistant dean of graduate studies.

Dissertation abstracts shall in any case be in English. The final oral examination must be conducted in English.

**Final Oral Examination**

Students preparing to take their final oral examination in defense of their dissertation should refer to Final Oral Examination under Regulations Pertaining to Doctoral Degrees for details on the examination. Expansions on and additions to that information are given below.

Candidates for a doctoral degree must provide a suitable number of copies of the dissertation, as designated by their doctoral committee, for review and use during the final oral examination.

One copy of the dissertation must be submitted to each member of the doctoral committee at least two weeks before the date set for the final oral examination. All members of the doctoral committee must attend the examination; exceptions can be made only with the permission of the assistant dean of graduate studies. At least four weeks before the final examination, the chair of the doctoral committee must provide the assistant dean of graduate studies with a typewritten notice, listing the title of the dissertation and the time and place for its defense, for announcement in the University Times and Pitt Chronicle. A report of this examination and a report on approval of the dissertation, signed by all members of the doctoral committee, must be sent to the assistant dean of graduate studies for approval. The report on the approval of the dissertation may be signed concurrently with or subsequently to the report of the final oral examination. If the decision of the committee is not unanimous, the case is referred to the assistant dean of graduate studies for resolution.

When the examination is completed, the candidate must notify the assistant dean if they have uploaded an electronic dissertation and submit three copies of an abstract of the dissertation initialed by the dissertation advisor in the upper right-hand corner. These documents must have been prepared for publication in accordance with instructions furnished by A&S Graduate Studies, Student Services, 5141 Sennott Square. Each candidate must execute an agreement for the publication of the dissertation on microfilm and for publication of the abstract in Dissertation Abstracts; respond to the Survey of Earned Doctorates; and present a Microfilm Processing Fee Receipt when the dissertation is deposited in 5141 Sennott Square. All graduation requirements are in the graduation packet available each term in 5141 Sennott Square.
Multiple Degree Options

Students in A&S have several options for dual and joint degrees that may be pursued as detailed below. Students also may pursue two independent degree programs simultaneously, either in two departments within A&S or in a department within A&S and a department in another school at the University. For information on pursuing two independent degrees simultaneously, see Two Independent Degree Programs Simultaneously under Special Academic Opportunities.

Dual-Degree Programs

A&S dual-degree programs are available only in mathematics and computer science. For further details, contact one of those departments and see Cooperative-, Dual-, and Joint-Degree Programs under Special Academic Opportunities.

Joint-Degree Programs

There are three joint-degree programs involving A&S:

1. The MD/PhD program offers selected students an opportunity to earn MD and PhD degrees simultaneously from the School of Medicine and certain departments in A&S. Interested applicants should contact the MD/PhD program at M211 Scaife Hall, 412-648-2324 for further information.

2. The MBA/MA in area studies program provides students who are admitted to the MBA program in the Joseph M. Katz Graduate School of Business an opportunity to earn a joint MA in area studies with foci in Asian studies, Latin American studies, Russian and East European Studies, or West European studies. Interested students should contact the International Business Center, 355 Mervis Hall, 412-648-1509 for further information.

3. The JD/MA program offers selected students the opportunity to earn the JD and the interdisciplinary MA degree in bioethics. Interested students should see the Bioethics section of this bulletin or call the School of Law at 412-648-1415.

In both the dual- and joint-degree programs, students must be admitted to both academic programs offering the degrees and must be graduated from both degree programs at the same time. For further details, see Cooperative-, Dual-, and Joint-Degree Programs under Special Academic Opportunities.

Certificate Programs

A variety of interdisciplinary programs leading to completion of a certificate may be pursued by students working toward a master's degree or doctorate in A&S.

Composition, Literacy and Pedagogy Certificate
Composition, Literacy and Pedagogy Certificate, MA
Composition, Literacy and Pedagogy Certificate, MFA
Composition, Literacy and Pedagogy Certificate, PhD
Cultural Studies, Doctoral Certificate
Cultural Studies, Master's Certificate
Gender, Sexuality, and Women's Studies Doctoral Certificate
Gender, Sexuality, and Women's Studies Master's Certificate (Suspended)
Medieval and Renaissance Studies Doctoral Certificate
Medieval and Renaissance Studies Master's Certificate
TESOL Certificate
Department and Program Descriptions

The minimal requirements established by the Graduate Faculty of the University, as described under General Academic Regulations, and any additional requirements of A&S Graduate Studies described under A&S Degree Requirements, should be read in conjunction with specific departmental and program requirements.

Courses numbered from 1000 to 1999, inclusive, are primarily advanced undergraduate courses, but under appropriate circumstances they may be taken for graduate credit. All courses numbered 2000 and above are open only to graduate students unless special permission is granted.

Descriptions of graduate courses offered in a particular term in departments of the Dietrich School of Arts and Sciences can be obtained by visiting the following Web site: www.courses.as.pitt.edu.

Arts and Sciences Administration and Staff

http://www.asgraduate.pitt.edu/node/318

Arts and Sciences Faculty

Dietrich School of Arts and Sciences Faculty

Departments/Programs

Department of Anthropology

The Department of Anthropology offers the degrees of Master of Arts and Doctor of Philosophy.

The department also offers several areas of concentration:

- Anthropological Linguistics
- Archeology
- Cultural Anthropology
- Medical Anthropology
- Physical Anthropology

And has several focal study programs:

- Comparative Archeology of Complex Societies
- Ethnicity, Nationalism and the State

Students may combine work for the MA and PhD degrees, including a program in which the student earns an MPH (Master of Public Health in behavioral and community health science), as part of the PhD in anthropology. Students are encouraged to develop a regional specialization that can lead to a certificate in Latin American studies, Asian studies, West European studies, or Russian and Eastern European studies.

Contact Information

Department Chair: Bryan Hanks
Main Office: 3302 Wesley W. Posvar Hall
412-648-7500
Fax: 412-624-5133
E-mail: bkh5@pitt.edu
www.anthropology.pitt.edu
Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Anthropology, Graduate Administrator, 3302 WWPB, Pittsburgh, PA 15260. Phone: 412-648-7504. Fax: 412-624-5133. E-mail: pdeasy@pitt.edu.

Admissions

Entrance into programs leading to the MA and PhD degrees in anthropology requires a baccalaureate degree in one of the arts or sciences from an accredited institution of higher learning. Qualified students from any discipline are considered for admission. Applicants whose first language is English are required to submit Graduate Record Examination (GRE) scores. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service or the IELTS administered by the University of Cambridge (taking the academic writing and reading modules). The department admits students only for the fall term. The deadline for applications is January 15. All applicants are automatically considered for financial aid.

Financial Assistance

Graduate student financial support awarded to graduate students by the Department of Anthropology includes fellowships, teaching assistantships, research assistantships, and Heinz/Mellon Fellowships in Latin American Archeology. The University Center for International Studies is another significant source of financial assistance.

Faculty

Anthropology, PhD

Requirements

Dietrich School of Arts and Sciences requirements for the PhD also apply.

Credit Requirements:

A minimum of 72 course credits in anthropology is required for the PhD (doctoral) degree. Of these, at least 57 credits must be in formal courses (as opposed to readings courses, independent study, or thesis or dissertation credits). The remaining 15 credits may be any combination of formal courses, readings courses, independent study, and/or thesis and dissertation credits.

Core Courses/Preliminary Examinations:

The core course system of the Department of Anthropology fills the role of the preliminary examination in the Dietrich School of Arts and Sciences requirements for the PhD. PhD students are required to pass (with a grade of B or better) at least three of the four core courses (cultural anthropology [ANTH 2789], physical anthropology [ANTH 2687], archeology [ANTH 2588], and linguistics [ANTH 2490]), including the core course in the student's chosen subfield of specialization. Full-time students are expected to pass the required core courses by the end of their second term in residence. A student with an MA from another institution, or with a strong undergraduate background in one or more sub-disciplines, may petition the Committee on Graduate Studies to waive the core course in that/those sub-discipline(s).

Language Requirement:

Before students are advanced to candidacy, they must demonstrate competence in a language other than English that possesses a substantial body of anthropological literature.

Method/Theory Requirements:
Students in archeology must pass with a grade of B or better ANTH 2534 and ANTH 2524 (Archeological Data Analysis 1 and 2). Students in physical anthropology must pass with a grade of B or better: 1) Biostatistics BIOST 2041 and BIOST 2042 (Introduction to Statistical Methods I and II), or, for bioarcheology concentrators with the approval of their advisor, Anthropology ANTH 2534 and Anthropology ANTH 2524 (Archeological Data Analysis I and II); and 2) by the end of the second year, Anthropology ANTH 2614 (History of Paleoanthropology).

Students in cultural anthropology must pass with a grade of B or better ANTH 2763 (Field Methods) and ANTH 2750 (Seminar on Contemporary Theory) or a comparable seminar approved for this purpose by the Committee on Graduate Studies. Students may petition for approval of other courses to satisfy these requirements.

Comprehensive Examinations:

Students must pass two comprehensive examinations designed to test breadth and depth of knowledge in the chosen areas of expertise. The acceptable forms of the exam are described in greater detail on the department's Web site. Each examination is designed and administered by a faculty committee consisting of at least three members of the department. Students generally take their comprehensive examinations at the end of their third year in the program.

Dissertation Overview:

Before actively pursuing dissertation research, the student makes an oral presentation of the intended project to a dissertation committee chosen by the student subject to approval by the department chair and dean. Following committee approval, the student applies for admission to candidacy for the Doctor of Philosophy degree.

Dissertation Defense and Graduation:

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Anthropology, PhD/MPH

Requirements

MPH students enrolled in the MPH/PhD program in anthropology fulfill the course work requirements for both BCHS and anthropology and earn both degrees for a total of 87 credits. The MPH essay/thesis requirement is met by the PhD dissertation. The practicum requirement is met through fieldwork.

Anthropology, MA

Requirements

A minimum of 30 course credits in anthropology and a paper is required for the MA (master's) degree. Of these, at least 21 credits must be in formal courses (as opposed to readings courses, independent study, or thesis credits). Full-time MA students must pass the core course in their declared subfield by the end of their second term in residence (or, for part-time students, before they have completed 18 credits), or petition for a specialized written examination (administered by their MA committee) in lieu of the core course. The MA committee consists of three graduate faculty members. Two must come from the department and include the student's advisor. The third member can be either from the department or outside of the department. All committees are approved by the faculty of anthropology. The language requirement is the same as for the PhD program. Students must pass a designated "methods" course with a B or better.

For the MA paper, students plan an original research paper with their advisory committee. This committee will also evaluate the final paper. Note that the required paper is not necessarily a "thesis" as defined in Dietrich School of Arts and Sciences requirements (although a thesis, as formally defined, would also satisfy the MA paper requirement).
Center for Bioethics and Health Law

The Center for Bioethics & Health Law provides interdisciplinary graduate education leading to the Master of Arts in Bioethics, which is designed for those wanting to incorporate attention to bioethical issues into their academic or professional careers or into their research in the humanities or the health or social sciences. Joint JD/MA and MD/MA programs with the Schools of Law and Medicine permit students to earn the MA along with their professional degrees in less time than would be required to pursue the degrees separately. Faculty of the Center pursue empirical and scholarly research on a range of ethical issues in clinical care, public health, and research. The Center provides extra-curricular educational programming in bioethics and medical humanities throughout the University and continuing education across the region. Its programs are described at http://bioethics.pitt.edu.

Contact Information

Program Director: Lisa S. Parker, PhD
Program Administrator: Beth Ann Pischke
Main Office: 519 Barco Law Building
412-648-7007
Fax: 412-648-2649
bioethics@pitt.edu

Admissions

Applicants for admission must submit digital scans of all undergraduate and graduate transcripts (official transcripts are not required during the application process - applicants who are accepted will be required to submit certified transcripts when they accept the offer of admission and matriculate), three letters of recommendation, a personal statement explaining interest in the program (including plans to use this degree in further professional or graduate education or a career), a sample of written work, and Graduate Record Examination scores (or an applicable substitute for those applying to joint degree programs, e.g., MCAT or LSAT scores). If submitting GRE scores, use the University Code 2927 and the Department Code for Interdisciplinary Programs 5101. International applicants whose first language is not English are required to submit TOEFL scores. Applications for admission to the Bioethics Program in the fall term must be submitted no later than March 31; after that date, interested applicants should contact the program administrator. Joint program students must be admitted by both the Dietrich School and the relevant professional school.

Financial Assistance

Applicants may qualify to receive a Dean's Tuition Scholarship to defray part of the cost of tuition and fees. Applicants may apply for student loans.

Faculty

Faculty of the Center for Bioethics & Health Law, and its affiliated faculty, teach in the MA Program in Bioethics, serve on thesis committees, and provide clinical and research mentorship. These faculty are listed on the Center's website at http://bioethics.pitt.edu/people. They conduct research-empirical and theoretical-on issues across the lifespan, professional issues like conscientious objection, and issues in research including mental health and genomic research. Research by Center faculty is described at http://bioethics.pitt.edu/research.

Dietrich School of Arts and Sciences Faculty

Master of Arts in Bioethics

This interdisciplinary MA program allows students to explore ethical issues in healthcare, public health, and health-related research. Students tailor their course of study to their particular interests and take electives at the intersection of bioethics and cultural and gender studies, history, law, philosophy, public health, religious studies, and the social sciences. Designed for students with background in the humanities or the health or social sciences, as well as clinicians and lawyers, the program emphasizes the philosophical foundation of bioethics and healthcare, and offers opportunities
for clinical experience and in-depth research. Students may complete coursework, including clinical practica, in one calendar year. Joint JD/MA and MD/MA programs are available.

Requirements

The program requires three core courses—BIOETH 2664 - BIOETHICS, BIOETH 2661 - THEORETICAL FOUNDATIONS, and BIOETH 2658 - PHILOSOPHY OF MEDICINE—and two clinical practica in which students observe and analyze ethical concerns arising in clinical settings. For the balance of the program, students tailor their course of study through selection of electives and development of their Master's thesis project, which enables them to pursue their own research while working closely with a faculty advisor and committee members. Students must earn 30 hours of credit with a B average or better. For additional information, consult http://bioethics.pitt.edu/academic-programs.

Department of Biological Sciences

Graduate education in the biological sciences provides individuals with the training, guidance, experience, and opportunity to participate in research that enables their transition from being students of biological knowledge to being fully participating members of their profession. The Department of Biological Sciences offers the degree of Doctor of Philosophy via two areas of concentration:

Molecular, Cellular and Developmental Biology (MCDB)
Ecology and Evolution (E&E)

Contact Information

Department Chair: Jeffrey G. Lawrence, PhD
Main Office: A234 Langley Hall
412-624-4350
Fax: 412-624-4349
E-mail: biophd@pitt.edu
http://www.biology.pitt.edu/

Additional information concerning the department's graduate programs may be obtained from the University of Pittsburgh, Department of Biological Sciences, Graduate Administrator, A234 Langley Hall, Pittsburgh, PA 15260. Phone: 412-624-4268. Fax: 412-624-4349. E-mail: biophd@pitt.edu.

Admissions

Admissions to our graduate programs are competitive, and applications must meet minimum standards (http://www.biology.pitt.edu/graduate/how-apply). Applications should be submitted via online at http://app.applyyourself.com/?id=up-as. Applications are considered for matriculation for the fall term beginning July 1, and must be completed by December 9 for applicants residing within the United States and December 8 for international applicants.

Financial Assistance

Graduate students receive a competitive stipend, health insurance, tuition waivers, and other financial assistance.

Faculty

http://www.biology.pitt.edu/all-faculty

Biological Sciences, PhD
Requirements

http://www.biology.pitt.edu/graduate

A PhD in biological sciences involves four or more years of study and requires the completion of 72 credits. Specific requirements are as follow:

- Graduate Courses. Students in both the MCDB and EE programs are required to take 4 graduate-level courses within the first two years.
- Seminar Courses. MCDB students take two semesters of Biological Sciences Seminar (BIOSC 2450) in the first year. EE students take two semesters of Seminar in Ecology (BIOSC 2540) in the first two years.
- Communications workshops. Students must complete three 1-credit Communication in the Biological Sciences workshops, one each in Grants, Papers, and Seminars.
- Research Rotations. Both MCDB and EE students perform research rotations in the first year in at least two (EE) or three (MCDB) different labs.
- Research Ethics. Students must complete a workshop in the ethical performance of scientific research in the first year.
- Seminars. MCDB and EE students must attend the weekly MCDB Student Research Seminar (BIOSC 2050) and EE Student Research Seminar (BIOSC 2050), respectively. After the first year, students must present their research at these seminars once per year. Students must also attend the weekly Departmental Seminar presented by outside scholars.
- Preliminary Review. Advancement to the second year of study requires successful completion of courses with an overall average of B or better, satisfactory performance in research rotations and the identification of a research mentor.
- Dissertation Research. MCDB students choose a dissertation advisor by the end of the second semester. Typically, students in the E&E program identify a research advisor prior to entry. Each student also has a Dissertation Committee made up of three other members of Department and an outside member and must meet with this committee at least once a year. Students are expected to establish their dissertation research topic during the second year.
- Comprehensive Exam. Taken in the second year, this is designed to test a student's general knowledge of MCDB or EE and their detailed knowledge of one particular area.
- Teaching. Each student must act as a Teaching Assistant for one semester. Students may teach more than this in particular if they take part in the Teaching Minor Program.
- Admission to Candidacy for the PhD Degree. This is based upon research performance and satisfactory completion of the comprehensive exam. Admission to candidacy is decided at a special overview meeting of the Dissertation Committee.
- PhD Defense. The PhD is awarded following successful defense of the dissertation with a public seminar and satisfaction of all other University, department, and program requirements.

Department of Chemistry

The Department of Chemistry provides programs of graduate study leading to the MS and the PhD in chemistry in the fields of analytical, biological, inorganic, organic, material, organic, physical chemistry, and chemical physics. Interdisciplinary research is also currently conducted in the areas of surface science, combinatorial chemistry, natural products synthesis, nanotechnology, biosensors, laser spectroscopy, organometallic chemistry, and theoretical chemistry.

Research

Analytical Chemistry
Biological Chemistry
Inorganic Chemistry
Organic Chemistry
Physical Chemistry

Contact Information
Department Chair: Sunil Saxena
Main Office: 234 Chevron Science Center
412-624-8200
Fax: 412-624-8611
E-mail: gradadm@pitt.edu
www.chem.pitt.edu

Facilities-Department Shared Instrumentation

The Department of Chemistry is housed in a modern chemistry complex that includes Eberly Hall, Chevron Annex, Ashe Lecture Halls and the 15-story Chevron Science Center. The Chemistry Instrumentation Center is an in-house research instrumentation laboratory that includes NMR, mass spectroscopy, and X-ray crystallography facilities. In addition to instrumentation within individual research groups, the department supports a vast array of modern research instruments, including three 300 MHz NMRs, one 500 MHz NMR, one 600 MHz NMR, two high-resolution and two low-resolution mass spectrometers, a light-scattering instrument, a circular dichroism spectrophotometer, a spectropolarimeter, X-ray systems-single crystal, powder, and fluorescence, a scanning electron microscope, an atomic force microscope, a vibrating sample magnetometer, several FT-IR and UV-VIS spectrophotometers, and workstation computer clusters. The Chemistry Library, a unit of the University Library System is a 6,000-square-foot facility that provides access to more than 30,000 monographs, 15,000 bound periodicals and more than 250 maintained journal subscriptions. Additional shared research resources include in-house machine shop, electronics shop, and glassblowing laboratory; helium recovery system and the Dietrich School Scientific Stockroom.

Admissions

A bachelor's degree in chemistry, or closely related discipline, including courses in mathematics through integral calculus, is preferred. In addition, the student must meet the general Dietrich School of Arts and Sciences requirements for admission to graduate study.

Entering students take appraisal exams in each of four areas of chemistry: analytical, inorganic, organic and physical. In discussion with a member of the department's Graduate Student Advisement Committee, scores on the appraisal exams are considered, as each student selects and registers for appropriate coursework. Satisfactory performance in four core courses is required for students to pass the preliminary examination. Midway through the first year in residence, students are assigned to research groups. The remainder of the student's graduate program is developed in consultation with their research advisor. All advanced degree programs require original research and course work. Additional requirements include a comprehensive examination, thesis/dissertation and defense, seminar, and, for the PhD candidate, a research proposal. To earn a PhD, this process typically takes four to five years.

All applicants must submit Graduate Record Examination (GRE) scores. Submission of advanced chemistry GRE test scores is recommended. International applicants must also submit TOEFL or IELTS scores. The minimum acceptable TOEFL score for the Department of Chemistry is 100 with a minimum of 22 in each category. The minimum IELTS score for the Department of Chemistry is a 7.0 with a minimum of 6.5 in each section.

Financial Assistance

All full-time doctoral students in good academic standing receive complete financial support in the form of teaching assistantships, research assistantships or competitive departmental or university fellowships. This support is available throughout a student's graduate career, including summer sessions. High quality UPMC health care coverage is provided with all assistantships and fellowships.

Faculty

http://www.chem.pitt.edu/people/faculty

Chemistry, PhD

Requirements for the PhD
PhD candidates are required to earn 72 graduate credits that include 12 credits of core courses (CHEM 2110, CHEM 2120, CHEM 2210, CHEM 2220, CHEM 2230, CHEM 2310, CHEM 2320, CHEM 2430, CHEM 2440, CHEM 2810, CHEM 2820). In consultation with their research advisor or GSAC, students may take additional courses after they complete the required core selections. Candidates are required to participate in teaching activities, for at least one or two terms, during their doctoral program.

Additional Requirements

**PhD Preliminary Evaluation:** Satisfactory completion of the preliminary exam requires the student to achieve a grade point average of at least 3.00 in 12 credits of core courses selected from two or three of the five chemistry divisions. If the student receives grades below B in two or more core courses, regardless of the overall GPA, that student will have failed the Ph.D. preliminary evaluation and will not be permitted to remain in the Ph.D. program.

**Comprehensive Examination:** The comprehensive examination provides the candidate an opportunity to demonstrate their potential for independent research and scholarship. The student submits a research report on their own work to committee members; the oral exam is a discussion of the student's research to date. The student must be prepared to answer questions related to the theoretical and practical aspects of the research problem. The student is also expected to show a command of graduate course work related to the field of the student's research. The department's comprehensive examination satisfies the Dietrich School of Arts and Sciences requirements for an overview examination. Upon satisfactory completion of the Comprehensive Exam, with approval by the department chair and the assistant dean of graduate studies, the student is formally admitted to candidacy for the PhD program.

**Seminar:** Each student in the doctoral program is required to present at least one seminar, open to the department. The seminar may be given at any time during the student's career and on any topic approved by the student's major advisor, including the results of doctoral research.

**Proposal:** When substantial progress has been made by the student on the dissertation problem a proposal for an original research problem is to be written, presented and successfully defended before the student's faculty proposal committee. The topic of this proposal should differ from that of the student's dissertation problem. The proposal is an important opportunity for the student to display scientific maturity in terms of originality and critical thinking.

**Dissertation and Final Examination:** The PhD dissertation is a report of scientific investigation completed under the supervision of the student's faculty mentor/research advisor. It must represent an original contribution to knowledge and must relate what is found to what was known before. The candidate must defend his/her dissertation in an oral examination before a doctoral committee consisting of the major advisor, at least two additional departmental graduate faculty members, and one graduate faculty member from another department within the University. With prior approval, a qualified faculty member from another institution may also be appointed. The final examination is open to all members of the University community.

**Chemistry, MS**

Requirements for the Master's Degree

Four to six terms of full-time graduate work is generally required to obtain a MS degree in chemistry (a minimum of 30 credits). Special arrangements can be made for individuals who wish to pursue a MS degree as part time students. Each MS student must take a minimum of 12 credits of 2000- or 3000-level chemistry courses. These must include 2 three-credit core courses (CHEM 2110, CHEM 2120, CHEM 2210, CHEM 2220, CHEM 2230, CHEM 2310, CHEM 2320, CHEM 2430, CHEM 2440, CHEM 2810, CHEM 2820); the remaining courses can either be in the student's area of specialization or in other chemistry division areas. Students electing to present a nonresearch thesis must take one laboratory course (CHEM 1250, 1430, 1440, or 1600) for credit, in addition to the preceding requirements. Each student must also demonstrate proficiency in physical chemistry by achieving 65% or higher score on physical chemistry appraisal exam, or earn a grade of B or better in CHEM 1410 and 1420 (or equivalent) or earn a B or better grade in either CHEM 2430 or CHEM 2440.

Additional Requirements

**Comprehensive Examination:** The student must earn a B or higher in all required chemistry courses and must maintain an overall QPA of 3.0 or higher to be in good standing. The comprehensive examination consists of an examination of the student's record in the required core courses and the additional 2000- or 3000-level courses.
Thesis: The thesis for the MS must represent an original research project or a comprehensive and detailed survey of a research topic of current interest in chemistry. It must be defended in an oral examination.

Department of Classics

The Department of Classics focuses on the interpretation of the culture and society of Greco-Roman antiquity in the widest sense of those terms. Our Doctor of Philosophy is integrated into the Joint Graduate Program in Classics, Philosophy and Ancient Science, http://cpas.pitt.edu/. The program is primarily designed to train professional scholars and teachers of the Classics with a specialization in ancient philosophy, and/or ancient science. Students receive intensive training in methodologies appropriate to their special areas of concentration, reading and analysis of Greek and Roman texts, and in the secondary literature. While the students' primary association is with the Department of Classics, they will work closely with graduate students and faculty drawn from the Departments of Philosophy and the History and Philosophy of Science.

Contact Information

University of Pittsburgh, Department of Classics

[F] 412-624-4419

Director of Graduate Studies:

Director of Graduate Studies and Director of the Joint Graduate Program in Classics, Philosophy and Ancient Science (CPAS):

Christina Hoenig, Assistant Professor in Classics, Department of Classics, University of Pittsburgh

Office: 1502A Cathedral of Learning
Phone: 412-624-4485
Email: emh159@pitt.edu

Admissions

Applicants must hold a Master of Arts (MA), or an equivalent qualification, in Classics or Classical Studies upon admission to the degree program, and be prepared to transfer at least 24 credits of relevant coursework. Transfer credit will not be accepted for courses in which a grade lower than B or its equivalent has been received (For more information on transfer credits, please see the Graduate and Professional Bulletin at http://www.bulletins.pitt.edu/graduate/regulations.htm.

Applicants should have a broad exposure to the cultural history of ancient Greece and Rome, and will have demonstrated knowledge of Ancient Greek and Latin appropriate for graduate work. All applicants will also have demonstrated reading knowledge of at least one modern foreign research language besides English (German, French, or Italian) before beginning the program. Applicants from outside the U.S. must show evidence of having completed a program of study equivalent to a Master of Arts degree and be prepared to present certification of the degree or license at the time of registration. If the credentials are incomplete or not familiar, please send a copy of the application to Office of International Services for evaluation. For applicants whose first language is not English, please refer to http://www.asgraduate.pitt.edu/node/315 to ensure fulfillment of the University's language requirements.

Required Application Materials:
- University of Pittsburgh's on-line Application for Admission (note the $50.00 application fee)
- A personal statement indicating your reasons for pursuing a graduate degree at the University of Pittsburgh and your academic and professional goals. You may submit your Statement of Purpose and writing sample in the "Additional Information" section of the online Application for Admission, which allows you to upload your document. Alternatively, you can mail it to the Department of Classics.
- Official or Unofficial College Transcripts. Admitted students will need to send official transcript copies before they can be matriculated.
- Current, official GRE scores
- 3 Letters of Recommendation. You must submit the names of three referees with your online Application for Admission. The recommendation form to be included with each letter of recommendation is available for download as a .pdf file once you begin your online application process. Referees may submit their recommendations either electronically or by mail directly to the Department of Classics.
- 2 samples of academic writing.
- Non-US citizens: TOEFL or IELTS scores. This process must be completed by January 15.

**Financial Assistance**

The Department of Classics expects to admit one graduate student every other year. Students admitted to the program receive a teaching fellowship during years 1-4. During the first year of teaching at the University of Pittsburgh, students receive a teaching assistants hip (TA). If a student's teaching is deemed satisfactory by the graduate faculty based on OMETS and teaching observations, he or she will receive a teaching fellowship (TF) during their remaining years teaching in the department. The expected time to degree in the Department of Classics is 4 years. If additional time is required to complete the degree, students are expected to apply for dissertation funding (both internally and externally). Assistantships include full tuition remission, health benefits at no additional cost, and a stipend. For information on current stipend rates, see http://www.pitt.edu/~graduate/stipends.html. See listing of available fellowships for all graduate students at the Dietrich School of Arts and Sciences http://www.asgraduate.pitt.edu/financial-assistance.

**Faculty**

Dietrich School of Arts and Sciences Faculty

**Classics, PhD**

**Overview of Degree Program**

The Doctor of Philosophy in Classics is integrated into the Joint Graduate Program in Classics, Philosophy and Ancient Science,

http://cpas.pitt.edu/

The program is primarily designed to train professional scholars and teachers of the Classics with a specialization in ancient philosophy, and/ or ancient science. The students' primary association is with the Department of Classics. At the same time, they will work closely with graduate students and faculty drawn from the Departments of Philosophy and the History and Philosophy of Science. The rigorous curriculum is comprised of inter-departamental seminars offered by the graduate faculty from the three participating departments, and complemented by a range of seminars from across the University's thriving intellectual departments and communities. The Ph.D. program mentors students' professionalization by actively supporting publication, conference participation, and membership in professional organizations. It prepares students to participate in and contribute to scholarly conversations nationally and internationally. All Ph.D. students instruct a variety of undergraduate courses under mentorship of the faculty, which include Greek and Latin language classes, Greek and Roman civilization and history. Graduates of the program are well-qualified and competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and non-academic employment sectors

**Requirements for the PhD**

**Degree Requirements**

**Course Requirements:**
Students are required to enroll in the following courses:

- CPAS Proseminar (two terms, during year 1 in the program)
- CPAS Ancient Greek Seminar (four terms, during years 1 and 2 in the program)
- Four courses in Classics, one of which may be completed at the undergraduate level with appropriate graduate components added (e.g. papers and oral examinations, as approved by the DGS). These four must include:
  - at least two Classics graduate seminars in Ancient Science (2000-level)
  - at least two other graduate seminars in Classics or a related subfield (e.g. ancient Greek or Roman literature, history, archaeology, rhetoric, art history) approved by the student's advisor and the DGS.
- Two courses in Philosophy, including Metaphysics and Epistemology.
- One course in History and Philosophy of Science: Part One of the 'History of Science Sequence' (equals one course).
- Remaining credits may be earned through electives, Independent or Directed Study, and up to 12 credits of PhD dissertation research.

**Comprehensive PhD Examinations**

Students are required to demonstrate expertise in both Greek and Latin by passing a translation exam by the beginning of the Fall Term of their second year. As a preparation, students are required to carry out independent work on the departmental reading lists in both Latin and Ancient Greek authors (as specified on the departmental lists and in discussion with the student's advisor). This translation exam will represent the Doctoral Preliminary Examination. Students may petition to retake the exam subject to consensus of the Dissertation Committee (see the section 'The Dissertation Committee', below, p.8).

Before admission to Ph.D. candidacy, students must pass three Comprehensive ("Qualifying") Examinations by the beginning of their third year in the program:

1. Greek and Roman History
2. Greek and Latin Literature
3. Special Topic: either Classical Philosophy or Ancient Science

Students are required to demonstrate expertise in a second modern research language by passing a departmental exam by the beginning of their second year (one modern language qualification must have been obtained upon entry into the graduate program, see the section Admissions Requirements). This second modern research language must be German unless prior qualification in German has already been obtained before entry into the doctoral degree program. The modern foreign language requirement may also be satisfied by earning a 'B' or better in an appropriate reading course offered by the Departments of German and/or French and Italian Languages and Literature.

**The Prospectus**

The prospectus proposes the subject and plan for the completion of the dissertation. It must include the following items:

- Abstract (ca. 200 words). The abstract gives a clear statement of the research topic and the main conclusion(s).
- Proposal (ca. 3000-4000 words).
  1. statement of the research topic, with review of earlier scholarship on the topic. Make clear to the reader how your work fits into the scholarly discussion of the topic. A precise mapping of your own position relative to the views of other scholars will make it easier for you to focus your attention on your own project and to define your contribution to the scholarship.
  2. description of the method(s) you will use in conducting your research. This item is related to the review of scholarship. In the course of the review you may single out the approach of a scholar or scholars that you have decided to follow in your own research; or you may reject previous approaches in favor of your own. Here you may include a specific example or examples of what kinds of evidence you will be using and how you will treat that evidence. A sample of the argumentation you will be using allows readers to see whether your method is adequate to the material you are working with.
  3. statement of the contribution that the dissertation will make to scholarship on the topic. Here you will explain how your work marks an advance in some way on what previous scholars have written.
  4. bibliography (not a comprehensive listing at this stage of all relevant items but rather of the works that at this point have stimulated and influenced your own thinking on the topic).
- A Chapter Outline with a brief summary of contents for each one.
- A Timetable for Completion, setting out a realistic schedule for completing the project.
For the submission of the prospectus, the student must file the Prospectus Form with the Graduate Administrator. A prospectus meeting is then held to discuss the student's completed prospectus. At that meeting the prospectus must be approved by the three members of the Classics faculty plus a member from outside the department (usually drawn from within the university but may, with special permission, be chosen from outside the university). These four members, all of whom must have graduate faculty status, will constitute the student's Dissertation Committee (see the section 'The Dissertation Committee' below, p.8). All these committee members must be present for the prospectus meeting and later for the dissertation defense.

The Dissertation

This written work must demonstrate the student's capacity to carry out independent and original research in the field of Classics, ancient philosophy and/ or ancient science. It must embody an extended original investigation of a problem of significance to these fields, and is the capstone to the research program of a student's education. A specific description of the requirements, and of the final oral examination, which completes the requirements for the PhD, can be found in the Faculty of Arts and Sciences Bulletin http://www.bulletins.pitt.edu/graduate/index.html.

Dissertation Defense

When the student completes the dissertation and the supervisor believes it is ready to be defended, a dissertation defense is scheduled and the date of the defense must be published in advance in the University Times (see the Graduate Administrator about this; also note that the date of the defense must be set at least one month in advance so that it can be published on time). The student must submit to the full Dissertation Committee a complete, polished, copy-edited text with full scholarly apparatus and images. This must be submitted by November 1 at the latest to schedule a defense in the fall semester, or by March 1 at the latest to schedule a defense in the spring semester. There are no defenses in the summer semester. The defense is normally a two-hour conversation with the Dissertation Committee; all four members must be physically present. The defense is open to the public and may thus be attended by other students in the department as well as by family or friends of the student.

Students must submit an application to graduate in the term in which they plan to defend and must be enrolled for at least one credit or for Research and Dissertation for the Ph.D. Degree (CLASS 3000). The university now requires all dissertations to be filed electronically. Complete instructions can be found at http://www.pitt.edu/~graduate/etd/. Students should have their committee members sign the Electronic Theses and Dissertations Approval Form http://www.pitt.edu/~graduate/etd/pdf/ETD_Approval_Form.pdf at the defense.

Note: The defense must be passed no later than seven calendar years after the passage of the comprehensive exams. If a student does not pass their defense in this time limit, they must re-take the comprehensive exams in a format approved by the Dean's Office.

Summary of Milestones towards the PhD Degree

1. Modern Language Exam by beginning of Year Two
2. PhD Preliminary Examination by Beginning of Year Two
3. Three Comprehensive Exams (oral and written) by beginning of Year Three
4. Dissertation Prospectus by end of Year Three Fall Term
5. Admission to PhD candidacy at least 8 months prior to defense
   • # of courses required (list core courses, etc.)
   • PhD Prelim Evaluation
   • Comprehensive Exam
   • Proposal/overview
   • Dissertation and Final Examination

Classics, MA
The Classics Department is currently not accepting applications for the Masters Program.

Requirements for the MA

The course requirements for the MA are a minimum of ten one-term graduate credit courses (30 credits), of which at least four must be at the 2000 level or higher. Included in the program must be CLASS 2010 (Introduction to Classical Studies) and a two-term sequence, consisting of a reading course and a seminar on a single subject. Students may emphasize either Greek or Latin, but they must pass at least one course at the level of 1300 or higher in each language.

A reading knowledge of German is required. This requirement may be met either by taking two appropriate courses and receiving a letter grade of B or higher, or by passing an examination administered by the department.

The MA comprehensive examination consisting of three parts is also required. Students choose, in consultation with the graduate advisor and the department, the three fields in which they will be examined. The three are usually chosen from the following six fields: Greek translation, Latin translation, Greek literature, Latin literature, Greek history, and Roman history. Either Greek translation or Latin translation must be included.

Department of Communication

The department offers the Master of Arts and Doctor of Philosophy in Rhetoric and Communication. Areas of emphasis: history, theory, and criticism of rhetoric; public address and argument; media and cultural studies; and rhetoric of science. Many students conduct work in two or more of these areas. The curriculum emphasizes theoretical, philosophical, critical, cultural, and historical approaches to communication.

Contact Information

Director of Graduate Studies: Dr. Brent Malin
Main Office: 1433 Cathedral of Learning
412-624-6569
Fax: 412-624-1878
E-mail: bmalin@pitt.edu
http://www.comm.pitt.edu/

Additional information concerning the department's graduate program may be obtained by contacting commgrad@pitt.edu or writing to University of Pittsburgh, Department of Communication, Graduate Admissions, 1433 Cathedral of Learning, Pittsburgh, PA 15260.

Admissions

Admission is highly selective, and limited to those who can be funded. The program's focus is on the PhD, and admission for the MA program will be limited to those deemed likely to complete the PhD. In order to be considered for admission to graduate standing, students must meet the requirements of the Dietrich School of Arts and Sciences and supply (by the first business day of the year) all materials called for in the department's application guidelines, including a completed application form, copies of all post-secondary educational records, Graduate Record Examination scores sent directly from the Educational Testing Service, at least three letters of recommendation, a statement of purpose, and writing sample. Non-native speakers of English without a degree from an accredited institution of higher education in the U.S. must also have the Educational Testing Service send TOEFL scores as part of the application. Citizens of other nations follow a separate set of guidelines that include TOEFL requirements and certified/notarized translations of transcripts and diplomas for applicants from countries where English is not the official language. Upon admission, candidates will be assigned an advisor who will assist them in planning a course of study.

Financial Assistance

The department makes every effort to sustain funding and full remission of tuition for five years of doctoral study for students entering directly from undergraduate programs, and four years for students entering with an M.A. or equivalent in Communication or cognate field. In addition to teaching assistantships there are also several non-teaching fellowships, including some dedicated to underrepresented groups, available through the University.
See listing of available fellowships for all graduate students at the Dietrich School of Arts and Sciences http://www.asgraduate.pitt.edu/financial-assistance

William Pitt Debating Union

Graduate students interested in public argument and argumentation theory can pursue co-curricular study and teaching of argumentation practices by working with the William Pitt Debating Union (WPDU), one of the nation’s most venerable debating societies.

Faculty

Dietrich School of Arts and Sciences Faculty

Communication: Rhetoric and Communication, PhD

The aim of the program is to train rigorous researchers and excellent teachers. To this end it offers historical, theoretical, and critical approaches to the study of communication. The curriculum includes traditional and innovative course work drawn from four intersecting areas of emphasis: History, Theory and Criticism of Rhetoric; Media and Cultural Studies; Public Address and Argument; and Rhetoric of Science.

Requirements for the PhD

Complete plan of study within the first year of post-MA enrollment or by the end of the term when MA comps are completed

- choose a faculty adviser
- select a faculty committee in consultation with the adviser
- meet with committee to discuss and/or revise the plan of study
Obtain committee signatures for approval by Director of Graduate Studies (DGS).

Complete 72 course credits, including credits toward MA (up to 24 hours transfer credit)

- Six hours from departmental core requirements, COMMRC 2296 - PROSEMINAR and COMMRC 3384 - TEACHING PRACTICUM
- With compelling reasons and approval from DGS, up to nine of required course credits can be taken outside of the department and count towards required credit.

Must maintain satisfactory progress of completing 18 credit hours a year

Successfully complete PhD Comprehensive exams, during or in the term immediately following term in which course work is completed.

- Written exam followed about 2 weeks later by oral defense, scheduled with committee
- Prepare a dissertation prospectus for approval by adviser and dissertation committee
- Form dissertation committee, requiring 3 departmental faculty and 1 outside member
- Submit prospectus for oral defense
- Secure committee’s approval of prospectus
Complete and successfully defend a dissertation

- Oral defense of dissertation as a culminating event in the student’s graduate program

Final submission must conform to Electronic Thesis And Dissertation (ETD) guidelines.

For any questions contact your advisor, DGS, or Graduate Administrator

Communication: Rhetoric and Communication, MA
The aim of the program is to train rigorous researchers and excellent teachers. To this end it offers historical, theoretical, and critical approaches to the study of communication. The curriculum includes traditional and innovative course work drawn from four intersecting areas of emphasis: History, Theory and Criticism of Rhetoric; Media and Cultural Studies; Public Address and Argument; and Rhetoric of Science.

Requirements for the MA

Complete plan of study within the first year of enrollment

- Choose a faculty adviser
- Select a faculty committee in consultation with the adviser
- Meet with committee to discuss and/or revise the plan of study
- Obtain committee signatures for approval by Director of Graduate Studies (DGS)

Complete 30 course credits (normally, 10 courses)

- This includes six hours from departmental core requirements, COMMRC 2296 - PROSEMINAR and COMMRC 3384 - TEACHING PRACTICUM Teaching Practicum With compelling reasons and approval from DGS, up to six of required course credits can be taken outside of the department and count towards required credit.
- Maintain satisfactory progress of completing 18 credit hours a year

Complete MA Comprehensive exams successfully

Prior to defense, submit two revised seminar papers, to be approved by committee to be recommended to move into PhD Program

Written exam followed about 2 weeks later by oral defense, scheduled with committee.

Program in Computational Biology

Joint Pitt-CMU PhD Program in Computational Biology

James Faeder and Russell Schwartz, Directors

Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavior science.

The Joint CMU-Pitt PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

*NIH Working Definition, July 17, 2000

</table>
Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences, are ideal candidates.

Recommended Prerequisites
For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91

Application

REQUIRED MATERIALS - Deadline December 15, 2017

1. The Online Application
2. Statement of Purpose
3. Three letters of Recommendation
4. Unofficial Transcripts (submitted online)
5. Conversion of GPA (for international students only)
6. Unofficial GRE Scores (submitted online)
7. Unofficial TOEFL Scores (submitted online)
8. Application Fee

Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.

For more information on application process, see http://www.compbio.cmu.edu/?page_id=163

Financial Aid

All students are provided with a stipend and full tuition remission. Assistance is also provided for health insurance.

Teaching Assistantships

Although all students are supported as research assistants throughout their time in the program, there are opportunities to assist in the teaching courses of the program. Students are also encouraged to develop teaching skills by mentoring other students and passing on their knowledge to lab mates and fellow students.

Terminal Masters Degree

The program does not admit students whose goal is to attain a Master's of Science degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Courses

http://www.compbio.cmu.edu/?page_id=87

Training Faculty

The program provides students with cross-disciplinary training in established as well as newly emerging fields of computational biology. Students have access to a community of faculty mentors from the University of Pittsburgh and Carnegie Mellon University, which not only provides a breadth of research areas for investigation, but also offers the technical and intellectual resources to make rapid progress toward their doctoral degree.
Center for Neuroscience Training Program (CNUP), PhD

PhD Degree Requirements

Credits: A minimum of 72 credit hours including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neurobiology and several elective courses.

Specifically, the following core courses are required:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- MSNBIO 2010 - SCIENTIFIC ETHICS or NROSCI 2010 - SCIENTIFIC ETHICS
- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or NROSCI 2102 - SYSTEMS NEUROBIOLOGY
- MSNBIO 2624 - GRANT WRITING

Note:

In addition to University requirements for graduate degrees, students are also required to obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

Integrative Molecular Biology, PhD

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the Program in the summer session, and after performing three rotations identify an advisor and area of research. Areas of research focus include Genomics, Proteomics, and Gene Function and Cellular and Developmental Dynamics. Required course work is completed during the first year. At the end of the first year students take a comprehensive examination that includes the submission of a research proposal to national fellowship programs. Students receive career mentoring during the third and fourth years to ensure a seamless transition to the postdoctoral level. Additional information can be found at the following Web site: www.pimb.pitt.edu/curriculum.php.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

- MSIMB 2000 or IMB 2000 - LABORATORY RESEARCH ROTATIONS - 9 credits - taken in the summer prior to the first year
INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer of the second year

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS I

MSIMB 2050 or
IMB 2050 - PIMB RESEARCH SEMINAR - the Department/Program Seminar and Journal Club/Conference are taken each fall and spring term until graduation

Advanced Elective Courses (6 credits total)

A large number of courses are available and are listed on the following Web site: www.pimb.pitt.edu/curriculum.php - Students are required to select courses in more than one of the following disciplines: molecular genetics, biochemistry, cell biology, and developmental biology.

Critical European Culture Studies Program

The PhD Program in Critical European Culture Studies offers a flexible interdisciplinary curriculum that appreciates the idea of Europe as a historically dynamic discourse. This new graduate program offers students discipline-specific training while fortifying it with a focus on broader issues such as transnationalism, migration, and cultural identity. It allows students to work across disciplinary boundaries to explore in depth the culture of Europe and develop new configurations in European and national cultural studies: European Studies and German/Russian/Polish/English/French/Italian/etc. These may include literary, historical, anthropological, media-based, and other studies.

Contact Information

Program Director: Randall Halle
Main Office: 454 Cathedral of Learning
412-624-6564
E-mail: rhalle@pitt.edu
www.cecs.pitt.edu

Admissions

Admission Requirements:

- a Master's degree in a field related to Critical European Culture Studies
- proficiency in English (for non-native English speakers, TOEFL scores should be provided),
- proficiency in a second European-related language. Proficiency in this European language should be at a level sufficient to study at a European University and may be demonstrated by:
  1) semester-length enrollment in a European University OR
  2) a minimum score of Advanced Low or the equivalent on the ACTFL/OPI or a similar score on a nationally or internationally recognized scale (such as the Common European Framework of Reference for Languages).

Financial Assistance

Graduate student funding would combine both Research Fellowships and Teaching Fellowships for a total of four years of funding from Pitt sources. Research Fellowships will be awarded during the first and last years. In other years, Teaching Fellowships give students experience teaching within specific departments.

In addition, students will receive one summer fellowship to offer research opportunities and language improvement in Europe (students may also supplement traditional summer fellowship amounts with research and travel funds from other sources such as the European Studies Center and the Center for Russian and Eastern European Studies, when necessary).

Affiliated Faculty
Critical European Culture Studies, PhD

Credit Requirement:

The requirements for the PhD are at least 72 graduate-level credits, including language courses, elective courses in a single discipline and five required core courses. The core required courses are an Introduction to Literary and Theory Course, a Theory of Europe Course, a EU Studies Core Course, a Pedagogy Course and a research methodology course (ethnography, digital humanities, oral history, translation studies, or any other suitable methodology course that serves the students research interests and goals).

PhD Qualifying Examination:

Students take the PhD qualification exam during their 3rd semester in the program. They provide a reading list composed of all the texts read in the graduate courses up to this point. In addition to that they also submit two papers, one written in English and the other in their chosen primary European language.

Supervised Teaching Experience:

Supervised teaching experience is an integral part of the doctoral program. All PhD students will be given an opportunity to teach either a language, European history or a European culture course in their second and third years of the PhD program for a total of four semesters. This experience will serve as preparation for scholarly and professional careers. Students will be supported by a pedagogy seminar to prepare and aid them.

Comprehensive Examination:

Supervised teaching experience is an integral part of the doctoral program. All PhD students will be given an opportunity to teach either a language, European history or a European culture course in their second and third years of the PhD program for a total of four semesters. This experience will serve as preparation for scholarly and professional careers. Students will be supported by a pedagogy seminar to prepare and aid them.

Dissertation Overview:

Upon completion of the comprehensive examination and all other requirements, during the 5th semester, the student files an application for admission to candidacy for the Doctor of Philosophy. In consultation with a dissertation advisor the student presents a prospectus of a dissertation to a doctoral committee. The dissertation prospectus (10-15 pages) completed by the student gives a brief introduction to the topic, previous and related research done on the topic, and the specific lines of inquiry, including methodologies and specific skills used, that the dissertation will pursue. In addition, students should address how work on the dissertation will embed them in academic and non-academic networks. Students should also address how the outcome of their dissertation will address non-academic audiences? (for example, Cultural institutions, NGOs, Governmental institutions, the creative and cultural industry). After the advisor approves this prospectus, the student will defend the prospectus to the doctoral committee. Faculty members affiliated with CECS from at least three different departments should constitute the members of the doctoral committee.

Language Requirement:

By the time they defend their dissertation overviews, the students must also demonstrate an intermediate-level proficiency in a third language (in addition to English and the other, primary research language) on one of the following ways:

- passing an intermediate-level language sequence with a grade of "B" or better;
- take a nationally recognized exam such as the OPI, verifying intermediate proficiency;
- or take a departmental exam verifying such proficiency.
Dissertation Defense:

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community. The dissertation should engage a European-related question and include ethnographic, oral historical, digital, or other methodological approaches relevant to the chosen problematic of the research project. Due to the interdisciplinary nature of the program and the dissertation committees, the dissertation must be written in English.

Center for Cultural Studies

The Graduate Program for Cultural Studies is a certificate-granting intellectual center for interdisciplinary cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. In its course offerings and other activities, the program draws upon over one hundred faculty affiliate members and ninety enrolled graduate certificate students from many of Pitt's departments and schools. The program's varied faculty members and students consistently exchange ideas about studying culture, beyond national boundaries and disciplinary divisions. The program stands as an institutional forum for responding to the increasing global need to engage, through interdisciplinary and postdisciplinary lenses, the problematics of culture.

The program addresses debates concerning the theory of texts and their production; the relationship between culture and politics; the formation of disciplines and institutions; and the nature of cultural antagonisms and crises. It features a variety of recent methodologies of historical and textual interpretation, and offers students opportunities to work with faculty and other students from the following departments, programs, and schools: Anthropology, Bioethics, Classics, Communication, East Asian Languages and Literatures, Education, English, Film and Media Studies, French and Italian Languages and Literatures, Gender, Sexuality, and Women's Studies, German Languages and Literatures, Hispanic Languages and Literatures, History, History and Philosophy of Science, History of Art and Architecture, Law, Library Science, Linguistics, Medicine, Music, Philosophy, Political Science, Public and International Affairs, Public Health, Religious Studies, Slavic Languages and Literatures, Social Work, Sociology, and Theatre Arts.

The program offers a master's certificate and doctoral certificate in cultural studies, which enhance MA and PhD degrees in the disciplines.

Contact Information

Director: Dr. Ronald J. Zboray
Main Office: 401C Cathedral of Learning
Phone: 412-624-6492
Fax: 412-624-7232
E-mail: cultural@pitt.edu
www.culturalstudies.pitt.edu/

Admissions

Students who wish to apply to the certificate program must be enrolled in a graduate or professional program at the University of Pittsburgh and must be in good academic standing. A student may earn either a master's certificate or a doctoral certificate, but not both.

Financial Assistance

Two one year fellowships are awarded annually to outstanding resident doctoral students who have passed comprehensive examinations.

Publications

Cultural studies faculty edit journals of international renown, including boundary 2 and Critical Quarterly, leading publications in the study of culture. The Program Director is co-editor of the Oxford History of Popular Print Culture, vol. 5, United States, to 1860.
Affiliated Faculty

http://www.culturalstudies.pitt.edu/faculty

Cultural Studies, Doctoral Certificate

This interdisciplinary program is concerned with cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. The methodologies employed derive from the most advanced historical, social, and literary models. The program, open to students who are and must be discipline-trained and discipline-oriented, provides a transcultural-critical expertise not generally available in specific departments. The faculty is drawn from twenty-five areas of the humanities and social sciences at the University. The program is open to any student enrolled full time in any graduate or professional program at the University of Pittsburgh; certificates are granted at both Master's and PhD levels. Two fellowships are offered annually to outstanding students who have passed their doctoral comprehensive examinations.

Requirements for the Doctoral Certificate

The following are course requirements (27 credits) for the doctoral certificate in cultural studies:

- Common Seminar (CLST 2050)
- Three core courses (one from each group): A, B, or C (courses are listed at http://www.culturalstudies.pitt.edu/courses)
- One designated cultural studies course (D) in the student's home department or school
- One designated cultural studies course (D) outside the student's home department

Students from departments without second language requirements are expected to demonstrate the ability to use primary and secondary texts in one language other than English. Courses are regularly offered in the language departments toward the achievement of this level of reading proficiency and those departments will schedule individual written examinations to demonstrate this ability.

Virtually all of the program's courses are cross-listed with offerings in other departments and schools. Each cross-listed course counts for credit both in its home department and in the cultural studies program. Thus, the certificate program normally requires only one or two extra courses beyond those mandated by students' disciplinary degree program.

Cultural Studies, Master's Certificate

This interdisciplinary program is concerned with cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. The methodologies employed derive from the most advanced historical, social, and literary models. The program, open to students who are and must be discipline-trained and discipline-oriented, provides a transcultural-critical expertise not generally available in specific departments. The faculty is drawn from twenty-five areas of the humanities and social sciences at the University. The program is open to any student enrolled full time in any graduate or professional program at the University of Pittsburgh; certificates are granted at both Master's and PhD levels. Two fellowships are offered annually to outstanding students who have passed their doctoral comprehensive examinations.

Requirements for the Master's Certificate

Following are course requirements (15 credits) for the master's certificate in cultural studies:

- Common Seminar (CLST 2050)
- One core course from group A or B (courses are listed at http://www.culturalstudies.pitt.edu/courses)
- One designated cultural studies course (D) in the student's home department or school
- One designated cultural studies course (D) outside the student's home department or a course from group C

Digital Studies and Methods Program
Graduate Certificate in Digital Studies and Methods

This certificate offers graduate students at the University of Pittsburgh the opportunity to acquire a proactive, mindful engagement with digital methods in the humanities and allied social sciences. While interpretive scholars have been applying computational methods to their work for as long as there have been digital computers, the arrival of the World Wide Web witnessed a more expansive group of humanists and social scientists, armed with a new array of interpretive possibilities, joining the conversation about how computing can productively enrich their research. In these recent years, such scholars have turned to using the computer not only as a revolutionary programmable calculator but also as a medium of connection, capable of supporting a wide number of approaches to scholarly investigation, interpretation, and expression. In sum, they focus on what it means to be human in a world where the dominant force-for-change seems to be technology. The Graduate Certificate in Digital Studies and Methods is designed to welcome students into this community.

Being a mode of inquiry with an expansive set of methods and tools, the use of digital techniques within the humanities and allied social sciences requires a pedagogical approach that relies on not only lecture and seminar time, but also hands-on workshop opportunities where students can apply the techniques they have been learning and discussing. To this end, this certificate includes traditional classroom hours as well as studio-based learning experiences that provide the hands-on, peer- and mentor-supported experience that this digitally-attentive approach to interpretive scholarship requires.

The methods, skills, and techniques that the students enrolled in this certificate might encounter include: network analysis, topic modeling, digital visualization techniques, geographic information systems (GIS), effective data modeling practices, and approaches to text analysis focused on the use of markup languages.

Enrollment

The graduate certificate in Digital Studies and Methods (DSAM) consists of courses totaling 15 credit hours. Any student enrolled in a graduate program at the University of Pittsburgh, and who is in good academic standing according to the guidelines of their unit of matriculation, is eligible to apply.

Digital Studies and Methods Certificate

Department of East Asian Languages and Literatures

The Department of East Asian Languages and Literatures (EALL) offers an interdisciplinary Master of Arts in East Asian Studies (IDMA), focusing on China or Japan.

Contact Information

Department Chair (EALL): Hiroshi Nara
Main Office: 2714 Cathedral of Learning
Graduate Administrator: Keanna Cash
412-624-5227
Fax: 412-624-3458
E-mail: kec176@pitt.edu
http://deall.pitt.edu/graduate

Admission and Application Form: To apply, go to http://deall.pitt.edu/graduate/apply and click on Apply Yourself.

The interdisciplinary Master of Arts degree in East Asian studies (IDMA) combines advanced language training with study in the social sciences and humanities focusing on East Asia. It is designed for graduate students who plan professional careers in government, business, journalism, or pre-
college teaching; or for those who want intensive area training before pursuing a doctoral program in a particular discipline. The IDMA is typically a two-year program. It is designed for students who have already had at least two years of Chinese or Japanese language study. The interdisciplinary nature of the program comes not from specially constructed interdisciplinary courses but from taking a planned complement of graduate-level courses in different departments. The strength of this interdisciplinary approach lies in the fact that students are able to elect to work with faculty in several disciplines, as well as to take courses in different areas in the humanities and social sciences. The applicant's academic interests must be compatible with the expertise of the East Asian faculty at the University of Pittsburgh.

Applicants for admission must submit a two-page career statement in English that identifies the student's academic and intellectual goals. They must submit transcripts of all college-level work, three letters of recommendation in English, a writing sample in English, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit the TOEFL administered by the Educational Testing Service; The required TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing); the required minimum IELTS of 7.0 (with at least 6.5 in each of its four sections). The deadline each year for submitting applications is January 15. Notification can be expected by the middle of March. The program admits students only for the fall term.

Financial Assistance

Current as well as prospective students in Asian Studies are eligible to apply for a variety of scholarships and fellowships administered by the Asian Studies Center. See the Web site http://www.ucis.pitt.edu/asc/funding/graduate for descriptions of awards.

The dean of the Dietrich School of Arts and Sciences has approved Tuition Reduction Scholarships for out-of-state students accepted into the IDMA program each year. As a result, these IDMA students pay in-state tuition rates.

Faculty

The Asian Studies faculty affiliated with the IDMA Program comprise an outstanding group of specialists in the social sciences and humanities. They share a common dedication to teaching and a vigorous commitment to scholarly research as well as service to the profession. Academic disciplines of individual faculty members and their teaching specializations are noted on the website above.

Dietrich School of Arts and Sciences Faculty

Course Note

Not all courses are offered every term. Undergraduate courses at the 1000 level can be carried for graduate credit. No more than 15 credits of undergraduate courses at the 1000 level can be carried for graduate credit.

East Asian Studies, MA/MBA

Admission to the MA/MBA Joint Degree Program

Qualified students may simultaneously earn a master's degree in business administration and an interdisciplinary Master of Arts in East Asian Studies. Students enrolled in the joint degree program take MBA and MA course work concurrently. Students will normally be expected to complete the program in five consecutive terms, beginning in the fall term of the first academic year and ending in the spring term of the following year. Students may, however, extend their program of study in order to pursue further language acquisition or an internship.

Prospective students must meet the full set of admission requirements for MBA study in the Joseph M. Katz Graduate School of Business and for the MA program of graduate study in the Dietrich School of Arts and Sciences. Students should first apply for admission to the MBA program. After admission to the MBA program, applicants to the MA program will be assessed by review panels of appropriate A&S faculty. To obtain MBA application forms, contact: University of Pittsburgh, Joseph M. Katz Graduate School of Business, Office of Admissions, Pittsburgh, PA 15260; phone: 412-648-1700; fax: 412-648-1659; e-mail: mba-admissions@katz.business.pitt.edu.
East Asian Studies, MA

The interdisciplinary Master of Arts degree in East Asian studies (IDMA) combines advanced language training with study in the social sciences and humanities focusing on East Asia. It is designed for graduate students who plan professional careers in government, business, journalism, or pre-college teaching; or for those who want intensive area training before pursuing a doctoral program in a particular discipline. The IDMA is typically a two-year program. It is designed for students who have already had at least two years of Chinese, Japanese, or Korean language study. The interdisciplinary nature of the program comes not from specially constructed interdisciplinary courses but from taking a planned complement of graduate-level courses in different departments. The strength of this interdisciplinary approach lies in the fact that students are able to elect to work with faculty in several disciplines, as well as to take courses in different areas in the humanities and social sciences. The applicant's academic interests must be compatible with the expertise of the East Asian faculty at the University of Pittsburgh. IDMA students are eligible to apply for a variety of scholarships and fellowships administered by Asian Studies. See the Web site www.ucis.pitt.edu/asc and click on Funding for descriptions of awards.

Requirements for the MA

Requirements for the IDMA

The interdisciplinary Master of Arts in East Asian Studies (IDMA) is intended primarily for predoctoral students who want intensive area training before pursuing a doctoral program in a particular discipline, or for those planning professional careers in government, business, journalism, or pre-college teaching.

Credit Requirements:
Students must earn a minimum of 30 credits of course work (excluding language credits) in two or more departments with an overall GPA no lower than 3.0. At least half of these credits must be carried in courses numbered 2000 or above. In addition, EAS 2005 - SOURCES AND METHODS IN EAST ASIA , a research methodology course, must be taken in the first year.

Language Requirement:
Students must have successfully completed two years of Chinese or Japanese, language training in order to apply to the program and must continue their language study as part of their graduate work. A minimum of three years' college-level language study or its equivalent is necessary to fulfill the language requirement for the degree.

Course Specialization:
Students who specialize in China must take at least one 3-credit course on Japan, and those who specialize in Japan must take at least one 3-credit course on China.

History Courses:
Six of the required credits must be taken in course work relating to the ancient and modern history of China or Japan.

Thesis:
The thesis topic must be approved by the student's academic advisor and a faculty committee of three, which regularly included the academic advisor. The faculty committee must present at least two different departments. The thesis must demonstrate an ability to research primary East Asian language materials.

Oral Comprehensive Examination:
When course work and thesis are completed, the student must pass an oral comprehensive examination administered by the student's faculty committee.

Department of Economics

The aim of the doctoral program in economics at the University of Pittsburgh is to prepare students to be professional economists in academia, business, or government.

The normal time to complete the PhD is five years. The Department of Economics does not offer a master's degree program. Nevertheless, graduate students may apply for a Master of Arts (MA) under specific circumstances as described below.

1. Continuing Master's Degree
Continuing students may apply for an MA in economics after they have passed all preliminary examinations and have at least 30 credits in graded coursework at the 2000 or 3000 level. In addition, their GPA must be 3.0 or higher in all courses counting toward the 30-credit minimum.

2. Non-continuing Master's Degree
The Graduate Committee may recommend that a MA in economics be awarded to a student who is leaving the PhD program either voluntarily or
because of dismissal. The requirements for the terminal master's degree are: 1) either passing each of the seven first year courses with a minimum grade of B or passing one of the preliminary exams; and, 2) completing 30 credits of graduate level coursework with a cumulative GPA of 3.0. Continuing students do not qualify for a non-continuing master's degree.

Faculty members have a wide variety of research interests. Currently, the department's strengths are greatest in the following fields:

- Comparative Systems and Development Economics
- Econometrics
- Economic History
- Experimental Economics
- International Economics
- Labor Economics
- Macroeconomics
- Microeconomic Theory
- Public Economics
- Urban Economics

Contact Information

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Economics, Graduate Administrator Brian Deutsch, 4911 Wesley W. Posvar Hall, Pittsburgh, PA 15260. Phone: 412-648-7270. Fax: 412-648-1793. E-mail: brd51@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement that addresses the applicant's personal and professional goals and the reasons for pursuing doctoral study in economics, as well as and scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit official scores from either the TOEFL administered by the Educational Testing Service with a minimum score of 90 on the internet-based test (with at least a score of 22 in all four sections). Applicants may also submit scores from the IELTS administered by the University of Cambridge, Local Examinations Syndicate. The minimum acceptable score is 7.0, with at least a score of 6.5 in each of the 4 sections (taking the academic writing and reading modules). Application must be received by January 15. The department admits students only for the fall term.

Financial Assistance

The department generally offers financial support beginning with the first year of graduate study. Awards are competitive; not all students who are admitted to the program are offered fellowships. All fellowships and assistantships offer full tuition as well as a stipend and some include medical coverage. Students who are admitted without funding may qualify for funding if they pass the preliminary examinations in microeconomics and macroeconomics at the end of the first year of study.

Provided there are adequate funds, students with fellowships or teaching assistantships who make satisfactory progress toward completion of the PhD can expect their financial support to continue for up to four years beyond the first year of study.
Economics, PhD

Requirements for the PhD

Credit Requirement

The minimum requirement is 72 credit hours. Of these, 45 credit hours must be in graded course work. Core courses include

- ECON 2010 - MATHEMATICAL METH ECON ANALYSIS
- ECON 2020 - INTRO TO ECONOMETRIC THEORY
- ECON 2100 - ADVANCED MICROECONOMIC THEORY 1
- ECON 2110 - ADVANCED MACROECONOMIC THEORY 1
- ECON 2120 - ADVANCED MICROECONOMIC THEORY 2
- ECON 2130 - ADVANCED MACROECONOMIC THEORY 2
- ECON 2150 - GENERAL ECONOMETRICS

Additional Requirements

Preliminary Examinations

The PhD preliminary exams consist of a four-hour exam in microeconomic theory and a second four-hour exam in macroeconomic theory. These exams are offered in June after the first year of study. If a student fails either or both preliminary examinations, a second attempt is offered two months later in August. Students must pass both exams by the second attempt to continue in the program.

Minimum GPA

All students must attain a minimum GPA of 3.00 in 2000- and 3000-level course work in economics as well as maintain a minimum GPA of 3.00 in all courses qualifying for graduation to be certified for the PhD in economics, as well as to qualify for continued financial assistance.

Comprehensive Exam Requirement (Research Paper)

All students are required to complete a single authored, original research paper demonstrating their ability to do research in economics. This is typically begun in the latter half of the second year and completed in the first term of the third year. The paper is reviewed by two faculty members, who may ask for revisions or additions. Following their approval of the paper, the student is certified as having completed the comprehensive examination requirement.

Field Requirements

Students are required to take coursework in two major fields, consisting of two graded courses and one graded seminar in each field, and one minor field consisting of two graded courses. The two major fields must be completed within separate areas of research, as follows:

- Microeconomics
- Macroeconomics
- Applied Microeconomics
- Experimental Economics
- International, Comparative, and Developmental Economics
Econometrics
The list of fields offered within each area is periodically updated by supervising faculty members within the relevant area.

Dissertation Overview (Admission to Candidacy)

Following successful completion of the comprehensive examination, the student begins to work full time on the doctoral dissertation. This involves searching for a topic, finding a faculty advisor, and beginning preliminary research. When a topic is selected and preliminary research is underway, the student, in consultation with the advisor, forms a dissertation committee. A dissertation overview is held at which the student presents his proposal for doctoral research, preliminary findings, and a strategy for completing the work to the dissertation committee. If the dissertation committee approves of the topic and research strategy, the student can file an application for admission to candidacy for the Doctor of Philosophy.

Dissertation Defense

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Department of English

The Department of English offers the following degrees and certificate:

- Master of Arts (MA)
- Master of Fine Arts (MFA)
- Doctor of Philosophy (PhD)
- Certificate in Composition, Literacy and Pedagogy

Contact Information

Director of Graduate Studies: Tyler Bickford
Main Office: 526 Cathedral of Learning
412-624-6549
Fax: 412-624-6639
E-mail: engrad@pitt.edu
http://www.english.pitt.edu/graduate/

Additional information concerning the department's graduate program may be obtained from the Graduate Administrator, Department of English, University of Pittsburgh, Pittsburgh PA 15260. Phone: 412-624-6549. Fax: 412-624-6639. E-mail: engrad@pitt.edu. Web site: www.english.pitt.edu/graduate.

Admissions

Applicants for admission must submit an online application, transcripts of all college-level work, three letters of recommendation, a personal statement, a writing sample (which varies by degree-please consult the application requirements link above), and scores on the verbal reasoning, quantitative reasoning, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service with a minimum score of 90 (with a minimum of 22 in each section), or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 7.0 (taking the academic writing and reading modules). Applications to the MA and PhD program will be accepted for fall term admission until December 10, and applications to the MFA program are due, January 7. Newly admitted students enter the program in the fall semester only.

Applicants can apply online at the following site: app.applyyourself.com/?id=up-as.
Financial Assistance

All PhD students are offered a non-teaching fellowship for their first year of study. Students making satisfactory progress are then ordinarily supported with renewable teaching assistantships and teaching fellowships for four more years, with the possibility of a sixth year depending on the availability of funding. All MFA students are offered either non-teaching fellowships or teaching assistantships for their first year of study, and these appointments are renewable as teaching assistantships for two more years if the students are making satisfactory progress. A limited number of graduate student assistantships are available for qualified MFA students. The department does not usually offer support to MA students.

Certificate in Composition, Literacy and Pedagogy

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html.

Faculty

Dietrich School of Arts and Sciences Faculty

English, PhD

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Requirements for the PhD

General Requirements. The PhD requires 72 credit hours, 36 of which must be in courses at the 2000 or 3000 level, with a minimum grade point average of 3.0. Required courses are a one-credit practicum, Introduction to Graduate Study; a two-credit practicum, Introduction to Composition Pedagogy; and Seminar in Pedagogy (3 credits); additionally, three core courses are required. The remaining credits are earned through elective seminars, independent studies in preparation of the PhD project and dissertation research credits. PhD candidates must fulfill a language requirement by demonstrating reading knowledge of two languages other than English, advanced study in one language other than English, or beginning knowledge of a new language. PhD students must teach for at least two terms.

Earning the MA. PhD students may elect to earn an MA as they progress in the PhD program, although they are not required to do so. If they wish to earn the MA, they must successfully complete the two core courses listed above with a grade of B or better, and either complete the master's research paper (outlined above under "Requirements for the MA Degree"), or successfully pass their PhD comprehensive (project) examinations. Application for the MA must be made before the end of the student's fourth year in the PhD program.

The PhD Project. The PhD project fulfills the University requirement for a comprehensive examination prior to admission to doctoral candidacy. It is a historical and theoretical investigation of a topic that can be demonstrated by the student to be of long-term significance for critical study. The
project allows students to examine and synthesize a range of interests that ordinarily lead into the more detailed inquiry of a dissertation. While we no longer insist on comprehensive knowledge of all literature written in English, the project is meant to demonstrate a breadth of knowledge as well as the ability to work on a single problem. For more specific regulations governing the PhD project, please consult the PhD website listed above.

The Dissertation. After students have passed their project examinations, they will register for independent study credits in order to write a prospectus for the dissertation. The student should choose a dissertation director and a committee at this time. Once a dissertation committee has been formed, the student will submit a formal dissertation prospectus to them for approval. When the dissertation committee has approved the prospectus, the dissertation director will submit for the student an application for admission to doctoral candidacy. Once students have had their dissertation prospectus passed and have been admitted to doctoral candidacy, they should begin the work of researching and writing the dissertation. Normally students will complete the dissertation during the fifth and sixth years in the program, the fifth through the eighth terms as a teaching fellow, or the ninth through the 12th terms in residence. Once the dissertation is completed, students must successfully defend the dissertation in order to earn the PhD.

English, MA

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Requirements for the MA

General Requirements. The MA requires the completion of ten courses (30 credit hours). Three of these courses are a one-credit Introduction to Graduate Studies; a core course for one of the programs of the PhD (in Composition, Film, or Literature); and a course in the scholarship of pedagogy. MA students must complete a master's research paper in an elective course of their choice (see below), and must fulfill a language requirement by demonstrating reading knowledge of a language other than English or take the appropriate coursework in the study of a language other than English, undertaking the advanced study of a language, or beginning a new language.

Master's Research Paper. All MA students must also complete a master's research paper in an elective course of their choice. The master's research paper should be of professional article length, defined by the Modern Language Association (MLA) as 6,000-8,000 words not including documentation. Students must engage in primary research beyond course readings and/or what is ordinarily required for a term paper, and the Master's Research paper must reflect that research. Students must consult an instructor, and receive the instructor's approval, no later than the end of the add/drop period if they wish to write their master's research paper for that instructor's seminar. The instructor of the seminar will be solely responsible for evaluating the paper. The master's research paper must be completed no later than the last day of the spring term of a student's second year, or fourth term in residence. In order for the master's research paper to count toward earning the MA, a student must receive a grade of B or better on the paper and as a final grade for the course in which the paper was completed.

English, MFA

Requirements for the MFA

General Requirements. The MFA requires 36 credit hours with a minimum grade point average of 3.0, plus the completion of an acceptable final manuscript. Requirements vary according to the student's area of major interest (fiction, nonfiction, or poetry), but the degree requires a combination of writing workshops, graduate-level readings courses, and English courses outside the Writing Program (in composition, literature, or film). Also
required is ENGLIT 2608: Genres and Genre Theory. Further information about requirements for each MFA genre can be found in the English Department's graduate handbook. There are no language requirements for MFA students.

**The Final Manuscript.** The final manuscript is equivalent to the MA comprehensive examination. It consists of a book-length manuscript of the student's best work in the area of major interest - 150 pages (typed, double-spaced, standard format) for fiction and nonfiction, and 50 pages for poetry. The manuscript shall be submitted to a committee of three English faculty members-two writing graduate faculty in the student's area of major interest and one English graduate faculty member outside the writing program. The student may recommend committee members, but the writing program director has final approval.

**Composition, Literacy and Pedagogy Certificate**

**Graduate and Professional Degrees**

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

**Certificate in Composition, Literacy and Pedagogy**

http://www.composition.pitt.edu/graduate/certificate

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html

**Certificate**

This graduate certificate recognizes sustained, advanced study in composition, literacy, pedagogy and rhetoric at the University of Pittsburgh. It can be awarded to students who have earned the MA, MFA, or PhD degree in the Department of English, and to those earning graduate degrees in other departments, programs, and institutions.

To qualify for the certificate, students must successfully complete ENGLIT 2500 - SEMINAR IN PEDAGOGY (or an equivalent course in writing pedagogy), and a set of additional courses described below: the MA and MFA certificate will require three (3), and the PhD certificate five (5) additional courses. These courses are selected from among an array of seminars that represent intersecting strands of work in the Composition Program:

- **Composition**, including study of the theories and practices of writing, within and beyond the field of Rhetoric and Composition;
- **Literacy**, including research into public rhetorics and the literacies of diverse groups in the larger culture beyond the academy;
- **Pedagogy**, including historical and critical inquiry into issues of schooling, teaching, and the institutions of academic writing;
- **Rhetoric**, including the history and theory of rhetoric and its functioning in institutional, political and literary spheres of communication.

Students interested in the certificate should see the Director of Composition for initial advising. He or she will identify qualifying courses for the certificate in English and may approve courses in other departments at the University of Pittsburgh. One course of Directed Study may also be accepted for the certificate, with the approval of the Director of Composition. In order to graduate with this certificate, students must apply to the certificate program at least one semester in advance of their graduation. The application form can be obtained from the Graduate Administrator in the Department of English (engrad@pitt.edu (mailto:engrad@pitt.edu)).
To qualify for the Graduate Certificate in composition, Literacy, Pedagogy, and Rhetoric, students are further required to produce a teaching portfolio. The portfolio must be submitted to the Director of Composition at least 3 weeks before the end of the semester in which the student plans to graduate. The portfolio assembles materials that document at least one of the following:

- An ability to design and teach an effective undergraduate course or community-based writing workshop;
- Significant work in support of teaching: for instance, as a mentor to beginning teachers, or as an assistant in the administration of the Composition Program, the Western Pennsylvania Writing Project, or the Writing Center;
- Demonstrated ability as a writing tutor in the Writing Center, in other university support services, or in afterschool programs for children.

Portfolios characteristically include teaching materials such as syllabi, assignments, exercises, and observations by peers and faculty members. Administrative documents may include reports, proposals, newsletters, Web pages, and other materials that demonstrate the work of the position, as well as statements of evaluation. Portfolios are reviewed by a committee of the composition faculty.

Notice that students have been awarded the Graduate Certificate in Composition, Literacy, Pedagogy, and Rhetoric appears on their final transcript for the MA, MFA, or PhD degree.

Notes:

MA or MFA candidates without a teaching assistantship may replace ENGLIT 2500 - SEMINAR IN PEDAGOGY with another course in composition, literacy and pedagogy and/or rhetoric. Courses that satisfy this requirement are designated each year by the Director of Composition.

Candidates are urged to consult with a member of the composition faculty while preparing a teaching portfolio.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html

Composition, Literacy and Pedagogy Certificate, MFA

Graduate and Professional Degrees
The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Certificate in Composition, Literacy and Pedagogy

http://www.composition.pitt.edu/graduate/certificate

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html

Composition, Literacy and Pedagogy Certificate, PhD

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. Film and Media Studies Program

The Film and Media Studies Program is an interdisciplinary program offering courses in history, aesthetics, theory, and critical studies. The Film and Media Studies Program offers the following graduate degrees and certificates:

PhD in Film and Media Studies (in conjunction with five Associated Departments)
Terminal MA in Film Studies and Media
Contact Information

Program Director: Randall Halle
Main Office: 454 Cathedral of Learning
412-624-6564
E-mail: rhalle@pitt.edu
www.filmstudies.pitt.edu

Admissions

Applicants will submit an application to the Film Studies and Media PhD program, identifying an Area of Concentration from the list of associated departments (e.g. English, French, Hispanic, History of Art and Architecture, and Slavic). The name of the Associated Department will appear on the student's transcript when the degree is granted. The application will be vetted simultaneously by Film and Media Studies and the Associated Department. Only one application fee is required.

Students who have already entered graduate programs in associated departments are welcome to apply to the Film Studies and Media PhD through the normal application process. If accepted, they are eligible to transfer a maximum of 24 credits towards the Film Studies and Media PhD degree requirements, and can petition to waive required courses that have been fulfilled, following normal University, School, and Program regulations.

Students who wish to enroll in the graduate certificate programs in Film and Media Studies (whether MA or PhD) must be matriculated for a graduate degree in a department of the Dietrich School of Arts and Sciences or in another school within the University. Students interested in pursuing a film studies certificate at any point in their career may do so by filing the appropriate form with the program director of the Film and Media Studies Program.

Financial Assistance

Financial assistance for both the PhD and the certificates will be provided by the associated department (reflecting the student's Area of Concentration). Such aid typically takes the form of scholarships, fellowships, teaching assistantships, and/or graduate student assistantships.

Affiliated Faculty

Dietrich School of Arts and Sciences Faculty

Film and Media Studies, PhD

In the Spring of 2018, the Film Studies, PhD was renamed to Film and Media Studies, PhD. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies PhD or change to the Film and Media Studies PhD. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Requirements for the PhD
General Requirements. The PhD requires 72 credits. All Film and Media Studies PhD students will be required to fulfill the requirements of their associated department as well as the Film and Media Studies requirements. PhD students must take the three core courses in Film and Media Studies, as well as four elective film studies courses. Language and teaching requirements are determined by associated departments, but Film and Media Studies students will be required to serve as TA/TF for at least one Film and Media class.

Comprehensive Exam. The comprehensive exam will be taken in the student's associated department. While the exam structure will differ from department to department, in all cases:

- one component (or more) of the exam will focus on Film and Media Studies
- a second component of the exam will focus on the departmental field (including its relation to cinema)
- at least one member of the exam committee in the student's associated department will be a member of the graduate faculty in Film and Media Studies.

The Dissertation. The dissertation will be completed in the associated department and must involve film and/or media studies as subject matter incorporated with the student's area of concentration (as determined by the dissertation director). The chair of the dissertation committee will be a graduate faculty member in the student's associated department who is also member of the interdisciplinary Film and Media Studies graduate faculty. The external member of the committee will be a member of the Film and Media Studies graduate faculty from outside the associated department.

Film and Media Studies, MA

In the Spring of 2018, the Film Studies, MA was renamed to Film and Media Studies, MA. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies masters or change to the Film and Media Studies master. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Requirements for the MA

General Requirements: The Terminal MA in Film and Media Studies degree will be granted only to those students who have been admitted to the PhD in Film and Media Studies but are subsequently unable to finish the program. The terminal MA provides this group of students the possibility of a terminal degree that acknowledges their time of study. A total of 30 credits are needed, including the three core courses in Film and Media Studies and five electives in film studies.

Master's Research Paper: The Master's paper is required for a terminal MA in Film. This project can be based on a paper prepared for a Film and Media Studies class. It should be between 6,000-8,000 words following MLA format. One Film and Media Studies faculty member will supervise the paper (most likely the instructor for the class in which the paper was written). Two other film faculty members including the student's AOC Department faculty advisor and one other film faculty member will serve as readers. All three must approve the paper for it to fulfill the Film and Media Studies Terminal Master's paper requirement. To pass, a paper should coherently present original research on a topic or issue relevant to the contemporary study of time-based media and/or their histories, incorporating primary research in a cogent, scholarly fashion.

Film and Media Studies Doctoral Certificate

In the Spring of 2018, the Film Studies Doctoral Certificate was renamed to Film and Media Studies Doctoral Certificate. Students who were enrolled prior to the Spring 2018 term have the option to take the Film Studies doctoral certificate or change to the Film and Media Studies doctoral certificate. They will have until the end of the Fall 2017 term to choose to complete the
program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Eligibility

Students engaged in an A&S doctoral program at Pitt can enroll in the Film and Media Studies Doctoral Certificate Program at any point in the course of their study by submitting a completed Graduate Certificate Application Form to filmandmedia@pitt.edu or 454 Cathedral of Learning. The doctoral certificate is awarded only after the completion of all degree requirements for the PhD in the student's home department, school, or program.

Course Work

Six film and Media Studies courses (18 credits) including:

Core Course:

- ENGFLM 2451 - FILM HISTORY/THEORY or
- ENGFLM 2452 - FILM HISTORY/THEORY 2

Five Electives:

Including at least two areas of study (e.g., national cinema, theory/themes, genre, etc.); at least two courses must be outside the student's home department.

Research Paper

The PhD Certificate requires a research paper be written in the field of Film and Media Studies (approx. 25-30 pp. in length) and evaluated by a Film and Media Studies faculty member who teaches one of the seminars that the student takes for his/her Certificate requirements.

The procedure for so doing is as follows:
At the beginning of a Film and Media Studies course that counts for the Certificate the student will inform the faculty member teaching the course that he/she wishes for his/her seminar to count as well as the official Research Paper for the Certificate Program. The faculty member will then require of the student something more ambitious than the normal seminar paper (see Guidelines for Certificate Research Paper below) and meet with the student during the term to advise him/her.

At the end of the course the student has two options: (1) submit the Certificate Research Paper for both the course and Certificate requirements or (2) submit a paper that satisfies the course requirements and continue to work on the expanded Certificate Research Paper over the following semester. The paper should be turned in for the Certificate requirement no later than at the end of the semester following the course in which the paper was conceived.

Guidelines for Certificate Research Paper

The research paper that qualifies for the MA and/or PhD Certificates in Film and Media Studies should go beyond the average seminar paper for a course, though (as per above) it should begin as such a seminar paper in conjunction with a member of the Film and Media Studies faculty. In essence, the research paper should aspire to be one publishable in an academic journal (though there is no requirement that it actually be published).

This paper might go beyond a standard seminar paper in any or several of the following ways: (1) have a demonstrated original point of view or approach to a given topic; (2) articulate a clear and demonstrated argument about a topic that clarifies important issues in media studies; (3) involve substantial research with primary sources; (4) forge new theoretical or historical terrain; (5) consider hitherto ignored media texts. It will be up to the Film and Media Studies instructor/advisor to determine how the paper might meet some of the above standards.
Additional Conditions

- Only two directed study courses (supervised by Film and Media faculty) can be counted toward the doctoral certificate.
- All courses must be passed with a B or higher.
- Students should notify the program director of their intention to file for graduation at the beginning of their final semester.

Film and Media Studies Master's Certificate

In the Spring of 2018, the Film Studies Master's Certificate was renamed to Film and Media Studies Master's Certificate. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies master's certificate or change to the Film and Media Studies master's certificate. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Eligibility

Students engaged in an A&S master's program at Pitt can enroll in the Film and Media Studies Master's Certificate Program at any point in the course of their study by submitting a completed Graduate Certificate Application Form to filmandmedia@pitt.edu or 454 Cathedral of Learning. The master's certificate is awarded only after the completion of all degree requirements for the MA in the student's home department, school, or program.

Course Work

Four Film and Media Studies courses (12 credits) including:

Core Course:

- ENGFLM 2451 - FILM HISTORY/THEORY or
- ENGFLM 2452 - FILM HISTORY/THEORY 2

Three Electives

(one outside home department)

Research Paper

The MA Certificate requires a research paper in the field of Film and Media Studies (approx. 25-30 pp. in length) to be written for and evaluated by a Film and Media Studies faculty member who teaches one of the seminars that the student takes for his/her Certificate requirements.

The procedure is as follows:
At the beginning of a Film and Media Studies course that counts for the Certificate, the student will inform the faculty member teaching the course that he/she wishes for his/her seminar to count as the official Research Paper for the Certificate Program. The faculty member will then require something more ambitious than the normal seminar paper (see Guidelines for Certificate Research Paper below) and meet with the student during the term to advise him/her.

At the end of the course the student has two options: (1) submit the Certificate Research Paper for both the course and Certificate requirements or (2) submit a paper that satisfies the course requirements and continue to work on the expanded Certificate Research Paper over the following semester.
The paper should be turned in for the Certificate requirement no later than the end of the semester following the course in which the paper was conceived.

Guidelines for Certificate Research Paper

The research paper that qualifies for the MA and/or PhD Certificates in Film and Media Studies should go beyond the average seminar paper for a course, though (as per above) it should begin as such a seminar paper in conjunction with a member of the Film Studies faculty. In essence, the research paper should aspire to be one publishable in an academic journal (though there is no requirement that it actually be published). Such a paper might go beyond a standard seminar paper in any or several of the following ways:

1. Have a demonstrated original point of view or approach to a given topic
2. Articulate a clear and demonstrated argument about a topic that clarifies important issues in media studies
3. Involve substantial research with primary sources
4. Forge new theoretical or historical terrain
5. Consider hitherto ignored media texts.

It will be up to the Film and Media Studies instructor/advisor to determine how the paper might meet some of the above standards.

Additional Conditions

- Only one directed study course (supervised by Film and Media Studies faculty) can be counted toward the master's certificate.
- All courses must be passed with a B or higher.
- Students should notify the program director of their intention to file for graduation at the beginning of their final semester.

Department of French and Italian Languages and Literatures

The Department of French and Italian offers programs leading to the MA in Italian, a PhD in French with an MA en route and the PhD in French. Students may also apply for the PhD in Film Studies with a Concentration in French (granted by Film Studies). The following tracks are offered at the MA level in French and Italian:

French Language and Literature
Italian Language and Literature

The following tracks are offered at the PhD level in French:

French Language and Literature
Film Studies with a Concentration in French
French Language and Literature with a Concentration in Romance Languages and Literatures

Students enrolled in the PhD program may take courses in the following thematic clusters:

French Language and Literature: Literature and Politics

In addition, the department encourages students to participate in various interdisciplinary programs, such as African Studies; Cultural Studies; European Union Studies; Film Studies; Gender, Sexuality, and Women's Studies; Global Studies; Medieval and Renaissance Studies; and West European Studies, where students may work toward a graduate certificate in conjunction with their degree.

**Graduate Degree Programs**

**Admissions**

Students accepted into the graduate program must meet the following criteria:

- They should have completed an undergraduate major (or equivalent) in the language and literature they propose to study at the graduate level or substantial coursework in a related field.
- They must be able to enroll in courses that are taught entirely in French and/or Italian. This presupposes a high level of skill in speaking, reading, and writing in their major language.
- It is recommended that incoming students have a reading knowledge of German, a second Romance language, or Latin.

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a personal statement, a sample of their writing in the target second language and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. The GRE is not required for applicants to the MA program in Italian. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service IBT (internet-based test) with a minimum score of 90 (with at least a score of 22 in all of the 4 sections of speaking, listening, reading, and writing), or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 7.0 (with at least 6.5 in each of its four sections). For a complete list of required items for admission, go to www.frenchanditalian.pitt.edu/graduate/about/admissions.php.

Applications for fall term admission will be accepted until April 15. For funding consideration, applications must be completed by December 7th 2017 for French and February 1 for Italian. The department admits students only for the fall term.

**Financial Assistance**

All applicants to the graduate program in French and Italian are considered for departmental funding. The Department of French and Italian offers teaching and research positions to graduate students at all levels. Most teaching assistantships and fellowships are renewable on a year-to-year basis for students in good academic standing. Students in the PhD who adhere to guidelines established in the departmental graduate policy statement may receive up to five years of support as a teaching fellow. Students enrolled in the PhD with MA en route may receive a sixth year of funding through competitive university fellowships.

**Faculty**

http://www.frit.pitt.edu/people/faculty

**French and Italian Languages and Literatures - Film Studies - French Concentration, PhD**

The PhD in Film Studies at the University of Pittsburgh is an interdisciplinary and interdepartmental degree that stresses the history, theory, and aesthetics of international cinema, video, television, and new media. While the student will earn a PhD in Film Studies (granted by the Film Studies Program), he or she will also be a full member of French, fulfilling all requirements for the PhD in French. French will appear as an Area of Concentration on the student's transcript. Thus, the student graduating with a PhD in Film Studies will be doubly qualified: in film studies as well as in French Studies.
Students must fulfill all of the requirements for the PhD in French (listed above) and the following additional requirements:

**Core Courses in Film Studies (7 credits):**

A two-course (6 credit) sequence taken in any order:

- ENGFLM 2451 - FILM HISTORY/THEORY
- ENGFLM 2452 - FILM HISTORY/THEORY 2
- 1 credit Film Studies Proseminar ENGFLM 2905

**Note:**

*This will not count toward seminar credit within the French program and will be given on a Satisfactory/Unsatisfactory basis.*

**Electives in Film Studies (12 credits):**

- Four elective Film Studies courses (in any department).

**Note:**

*Of the total six required seminars, the student must take at least two courses taught by a member of the faculty outside of French. These courses can include the two required core courses as well as any of the four electives.*

**Additional Requirements**

*Teaching:* All film PhD students will be required to serve as TA/TF for at least one film class. If the Department of French and Italian does not offer a film course or has no TA/TF positions for a film course, students will be required to teach one term of the undergraduate course Introduction to Film (or another such introductory course developed in the future) as part of his/her overall experience as a TA/TF.

*Credit Requirement:* Minimum of 72 hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching or dissertation work as detailed elsewhere in this bulletin.

*Preliminary Examination/Evaluation:* The two required core courses in Film Studies (Film History/Theory I and II) will serve as the preliminary exam in Film Studies. Successful completion of these two classes with a grade of B or better will constitute passing the preliminary examination.

To maintain funding, students must also pass the required preliminary evaluation conducted by the French faculty at the end of the first year of enrollment.

*Comprehensive Examination:* The Comprehensive Exam must contain at least one component focusing on Film Studies, and at least one component on French Studies (including its relation to cinema).

At least one member of the exam committee will be a member of the graduate faculty in Film Studies.

*Dissertation Committee:* The dissertation will be completed in the Department of French and Italian and must involve film and/or media studies as subject matter incorporated with French Studies (as determined by the dissertation director).

The Chair of the dissertation committee will be a graduate faculty member in the Department of French and Italian who is also a member of the interdisciplinary Film Studies graduate faculty. The external member of the committee will be a member of the Film Studies graduate faculty from outside the Department of French and Italian. It is expected that students will have been exposed to these faculty members in taking the required Film Studies courses (taught by the interdisciplinary Film Studies faculty), elective Film Studies courses (outside the student's associated Department), and in the Proseminar (taught by the interdisciplinary faculty).
French, PhD

Requirements for the PhD

Before students may be considered for admission to candidacy for the PhD, they must complete successfully a minimum of eight 2000-level courses (24 credits) beyond the MA (a minimum of 72 credits). In addition, the candidates must present an oral *explication de texte* before a faculty committee, satisfy PhD language requirements, and pass written and oral comprehensive examinations. Upon admission to candidacy, the candidate will write and defend a doctoral dissertation. The course work must include:

FR 2710 (if not taken at the MA level) and an additional course in literary or cultural theory.

With the advisors consent students are free to take some of the additional required courses in other departments. Students in French are encouraged to pursue certification in one of the various programs offered by the University (African Studies, Cultural Studies, European Union Studies, Film Studies, Gender, Sexuality and Women's Studies, Global Studies, Medieval and Renaissance Studies, West European Studies). However, only three exterior courses may count towards the degree in French.

With the adviser's consent,

PhD in French with a Concentration in Romance Languages and Literatures

Candidates for this concentration will typically already hold an MA in one of the Romance languages and literatures or the equivalent, and will, upon entering the program, choose two major and one minor linguistic areas from among the four language areas (French, Italian, Portuguese, and Spanish). Portuguese may not be used as one of the major areas, and one of the major areas must be French.

Field of Study

The student will also choose a major and a minor period from among the following four periods: (1) Middle Ages; (2) Renaissance and Baroque; (3) Enlightenment, Romanticism and Realism (18th and 19th centuries to 1848); (4) Modern/Postmodern. If Spanish is one of the major linguistic areas, the student will also choose, as appropriate, between the peninsular and Latin American areas.

Course Work

The candidate will then take at least four 2000-level courses in each of the two major linguistic areas, and at least two 1000-level courses in the third area. At least one of these courses will be a 2000-level course in linguistics in one of the major fields (a course in the history of the language or in comparative Romance linguistics is recommended). At least three of these courses should involve the writing of a long (or seminar-type) paper of 20-30 pages, and one of these papers must be written in English.

Dissertation Committee

The dissertation committee should include one faculty member with expertise in each of the three major periods/areas. In all cases, the choice of linguistic areas and periods will be limited by the availability of faculty and course offerings in the concerned departments.

It is expected that candidates will teach at least one language course in each of their major linguistic areas before completing the degree.

*Credit Requirement:* Minimum of 72 hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching or dissertation work as detailed elsewhere in this bulletin.
Preliminary Examination/Evaluation: Students in the PhD program will undergo a preliminary evaluation at the end of the first full year of residence.

Explication de Texte: Before taking their comprehensive examinations, PhD students must present an oral explication de texte in French before a jury comprising members of the faculty.

Comprehensive Examination: Students must take written and oral comprehensive examinations on a topic with historical coverage and an topic in the area of specialization. Candidates will work with a faculty advisor and a committee to prepare the reading list in the areas chosen. The purpose of the comprehensive examinations is to ensure that the candidate is able to develop a relevant and original approach to the study of French and Francophone literature and culture. These examinations should be passed at least eight months (two terms) before the degree is to be awarded. Students may schedule their examinations only after passing all preliminary examinations and language and other requirements.

Prospectus Presentation: As soon as the comprehensive examinations have been passed, students and their advisor should agree on a dissertation committee including at least three members of the department (including the director) and one member chosen from another department in an area of expertise relevant to the dissertation topic. Usually during the third year, but in no case later than the first term of their fourth year, students must submit a prospectus to the director for circulation among the committee members. The scope, size, organization, and format of the prospectus are specified in a separate departmental document, which PhD students should receive or request as soon as they pass their comprehensive examinations.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

French, MA/PhD

Requirements for PhD with MA en route

This degree is intended for students who wish to pursue the Doctor of Philosophy (PhD) degree in French Language and Literature but who do not already hold an MA in this field or in a closely-related discipline. Students must first successfully complete the requirements for the MA in French Language and Literature listed below, normally within their first two years of full-time enrollment. Students doing the PhD with the MA en route will be awarded an MA degree at the completion of these requirements:

- A minimum of ten one-term courses is required, for a total of 30 credit hours. These courses will include FR 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY, FR 2903 - MA RESEARCH PAPER DIRECTED STUDY, and FR 2910 - COMPREHENSIVE EXAMINATION MA. Students holding Teaching Assistantships are also required to take FR 2970 - TEACHING OF FRENCH, though this does not count toward the required ten.
- Comprehensive examination: the comprehensive examination is a written examination and is given in two sessions on separate days during the fourth semester of the MA en route program. An oral interview is held after completion of the written exams to discuss the results of the exams and the MA research paper.
- Research Paper: each candidate must write a Master's Research Paper of professional quality and length.
- Second language: candidates must demonstrate a reading knowledge of a second Romance Language, or German, or Latin.

To ensure the acquisition of a broad knowledge of French literature and culture, candidates must take at least one course or one exam in each field (Middle Ages, Renaissance, 17th, 18th, 19th, and 20th centuries and African and Caribbean literatures) before they reach candidacy.

Before students may be considered for admission to candidacy for the PhD, they must successfully complete a minimum of five 2000-level courses (15 credits) beyond the MA. In addition, the candidate must present an oral explication de texte before a faculty committee, and pass written and oral comprehensive examinations. The PhD language requirement and explication de texte will normally be satisfied at the MA level. The eight courses must include:

1. FR 2710 (if not taken at the MA level) and an additional course in literary or cultural theory.
2. With the adviser's consent, students are free to take some of the additional required courses in other departments. Students in French are encouraged to pursue certification in one of the various programs offered by the University (African Studies, Cultural Studies, European Union Studies, Film Studies, Gender, Sexuality, and Women's Studies, Global Studies, Medieval and Renaissance Studies, West European Studies). However, only three exterior courses may count towards the degree in French.

Upon admission to candidacy, the candidate will write and defend a doctoral dissertation.
Italian, MA

Requirements for the MA in Italian

A minimum of ten one-term courses is required. These courses will include ITAL 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY, ITAL 2903 - MA RESEARCH PAPER DIRECTED STUDY, and ITAL 2910 - COMPREHENSIVE EXAMINATION MA. Students holding Teaching Assistantships are also required to take ITAL 2970 - TEACHING OF ITALIAN, though this does not count toward the required ten. Candidates must also fulfill the following additional requirements:

- **Comprehensive Examination**
  - The MA comprehensive examination is a written examination and is given in three sessions on separate days during the second year of the MA program; an oral interview is held after completion of the exams to discuss the comprehensive exam results, as well as the student's research paper.

- **Research Paper**
  - Each candidate must write a Master's Research Paper (or tesina) of professional article quality and length (25 pp min.). Students must conduct research beyond the scope of any single graduate term paper, but are encouraged to develop and formulate their topic in the context of one particular seminar (or two, if seminars are thematically or otherwise related). Students will work closely with the faculty member whose field is most relevant to the chosen topic to identify appropriate areas for expansion, additional texts or case studies, and relevant methodologies. The paper must be written in Italian.

- **Second Language Candidates** must demonstrate a reading knowledge of Latin or German or a Romance language other than Italian. Other languages will be considered upon petition.

Gender, Sexuality, and Women's Studies Program

The Gender, Sexuality, and Women's Studies Program offers graduate certificates in Gender, Sexuality, and Women's Studies at both the master's and doctoral levels. The interdisciplinary curriculum draws upon faculty expertise in the arts, humanities, and social sciences; and in business, law, library and information science, nursing, medicine, public and international affairs, public health, and social work. The program provides opportunities for students who wish to focus their study on women, gender, and sexuality or who wish to add these areas as a subspecialty.

Admissions

Interested students must make an appointment with the Director of the Gender, Sexuality, and Women's Studies program for advising.

Financial Assistance

No initial financial aid is available through the GSWS Program. Graduate students who enroll in the program may apply for financial aid through a home department. Each year, the program hires 4-6 advanced graduate students as instructors or lecturer, and offer research grants for work on gender and sexuality.
Faculty

Dietrich School of Arts and Sciences Faculty

Gender, Sexuality, and Women's Studies Doctoral Certificate

Requirements for Doctoral Certificate

The doctoral-level certificate requires 18 credits as detailed below:

- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- At least two other courses must be outside the candidate's home department, including at least one course with a GSWS course number
- At least three courses in one field
- No more than 1 course may be directed study

Note:

All candidates for graduate certificates must maintain a 3.00 average in courses for the certificate and submit a research paper to be read by at least one faculty member affiliated with the program. A short concept statement is also required. Students should notify the program director of their intention to graduate at the beginning of their final term. Students not in the Dietrich School must apply to graduate in A&S Graduate Studies.

Gender, Sexuality, and Women's Studies Master's Certificate (Suspended)

This program is no longer active and accepting student applications, effective Fall 2016. Students currently enrolled in the certificate will either transfer to the new minor or complete the certificate by the end of Spring 2023.

Requirements for Master's-Level Certificate

The master's-level certificate requires 12 credits as detailed below:

- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- At least two courses in one field
- At least one other course outside the student's home department
- No more than 1 course may be directed study

Department of Geology and Environmental Science

The department offers programs that lead to the MS or PhD in Geology and Environmental Science and a Professional MS in Geographical Information Systems and Remote Sensing. The principal objective of the graduate programs is to provide a broad and strong foundation upon which students may base careers. The PhD program is designed to educate scientists for basic or applied research and teaching. Graduate research may involve specialization in geology, geochemistry, geophysics, planetary science, and environmental science.

Contact Information
Research and Facilities

Please visit www.geology.pitt.edu to find out more about research and analytical facilities available in the Department of Geology and Environmental Science

Admissions

Prospective graduate students must meet Dietrich School of Arts and Sciences requirements for entrance into graduate programs.

Financial Assistance

Financial assistance for graduate students is provided in the form of teaching and research appointments, fellowships, tuition scholarships, and loans.

Geology and Environmental Sciences, PhD

Students in MS and PhD programs have opportunities to participate in research programs encompassing many fields of current interest in geology, geochemistry, volcanology, geographic information systems (GIS), remote sensing, planetary geology, paleoclimatology, hydrology, and environmental science. In general, the research is interdisciplinary, collaborative, and employs techniques such as traditional field-based studies, advanced geochemical analytical work, sophisticated remote sensing and GIS analysis, and advanced computer modeling of natural systems. Most students enter the program with an undergraduate degree in the geosciences; however, students with degrees in other natural sciences or in engineering may be admitted in some cases. The department also offers a professional Master's degree in GIS/Remote Sensing. This non-thesis MS is patterned after the MBA degree and is designed to focus on the advanced concepts of GIS and remote sensing in order to give the student a competitive edge in the job market.

Requirements for the PhD

The minimum course requirement for the PhD degree is seventy-two (72) credits. A minimum of thirty-six (36) credits must be from formal courses and at least eighteen (18) of the credits must be taken within the Department of Geology and Environmental Science. Up to twenty-four (24) credits may be accepted from a Master of Science degree or graduate study toward the PhD from another institution. An initial evaluation, designed to explore the student's basic knowledge of the geological sciences and related fields, is required of all PhD degree candidates during their first term of residence.

A graduate student seeking the PhD degree must complete a Comprehensive Examination. The comprehensive examination should take place no later than the Fall term of the student's third year of enrollment, although students are encouraged to complete the examination as soon as possible following completion of most required coursework and after beginning dissertation research. Following successful completion of the Comprehensive Examination, each PhD student must prepare a written dissertation proposal for presentation to the Dissertation Committee (consisting of at least four department members and one outside member) at a formal Dissertation Overview meeting. During this meeting, the Dissertation Committee will critique the research plan and proposed methodology and approve or reject the dissertation topic.

Each PhD candidate must prepare a dissertation demonstrating successful completion of the research project as well as competency in the methods and techniques of scientific investigation in the field of her/his area of specialization. Each student must also submit at least one manuscript to a peer-review journal prior to graduation and present research results at both a departmental colloquium and at a meeting of a national or international scientific organization. The candidate must formally defend her/his submitted dissertation in a public meeting before the full Dissertation Committee. Complete descriptions of the most recent degree requirements are available at www.geology.pitt.edu.
Curriculum & Course Information:

**General Information:** The GIS/RS Professional-M.S. program in the Department of Geology & Planetary Science is a multidisciplinary, multi-departmental, non-research degree. Notionally, designed to be completed in two academic years (plus one summer), the program length can be changed to slightly shorter or longer depending on the student's work limitations. The required courses are centered in the Geology and Planetary Science Department and focus on GIS and RS core proficiencies. Students are also required to take at least one course in the Schools of Business, Law, and Information Sciences. A large degree of flexibility is designed into the 41 credit program so that the student can tailor his/her coursework to fit specific future career goals, personal interests, and time constraints of work/family life.

**First Semester:**

Skill Sets: GIS and Remote Sensing fundamental principles & software use; communication proficiency; exposure to geospatial professionals

- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS  
- GEOL 2461 - ADVANCE REMOTE SENSING  
- COMMRC 1102: Organizational Communication

- GEOL 2015 - GEOLOGY COLLOQUIUM or  
- GEOL 2300 - PRO-M.S. SEMINAR (when offered)

Total Credits: 10

**Second Semester:**

Skill Sets: advanced GIS/RS proficiency; introduction to computer programming

- GEOL 2446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM  
- GEOL 3946 - PYTHON SCRIPTING Python, Advanced Model Builder  
- GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES *

Total Credits: 9

**Summer Semester:**

Skill Sets: work experience utilizing geospatial analysis tools; compilation of digital dossier; oral/written presentation experience

- GEOL 3902 - DIRECTED STUDY

Total Credits: 4

**Third Semester:**

Skill Sets: statistical data analysis; methodology of information science; introduction to business administration

- INFORMATION SCIENCE ELECTIVE: Courses **  
- BUSINESS ELECTIVE: EMBA Courses  
- FOCUSED ELECTIVE #1: Detailed Options
Total Credits: 9

Fourth Semester:

Skill Sets: advanced GIS/RS proficiency; awareness of comparative law; personalized elective expertise; data mining & database management

- LAW ELECTIVE: Detailed Options
- STATISTICS ELECTIVE: Courses **
- FOCUSED ELECTIVE #2: Detailed Options

Total Credits: 9

Note:

* if not offered, student may substitute a Focused Elective Course this semester and take GEOL 2460 in the fourth semester in place of the FOCUSED ELECTIVE #2. See possible options.

** an appropriate equivalent course may be substituted depending on the career goals of the student. See possible options.

Geology and Environmental Sciences, MS

Students in MS and PhD programs have opportunities to participate in research programs encompassing many fields of current interest in geology, geochemistry, volcanology, geographic information systems (GIS), remote sensing, planetary geology, paleoclimatology, hydrology, and environmental science. In general, the research is interdisciplinary, collaborative, and employs techniques such as traditional field-based studies, advanced geochemical analytical work, sophisticated remote sensing and GIS analysis, and advanced computer modeling of natural systems. Most students enter the program with an undergraduate degree in the geosciences; however, students with degrees in other natural sciences or in engineering may be admitted in some cases. The department also offers a professional Master's degree in GIS/Remote Sensing. This non-thesis MS is patterned after the MBA degree and is designed to focus on the advanced concepts of GIS and remote sensing in order to give the student a competitive edge in the job market.

Requirements for the Master's Degree

The minimum course requirement for the MS degree is thirty (30) credits beyond the baccalaureate. A minimum of eighteen (18) credits must be from formal courses. At least twelve (12) of these credits must be numbered 2000 or higher and must be taken within the Department of Geology and Environmental Science. An initial evaluation, designed to explore the student's basic knowledge of the geological sciences and related fields, is required of all MS degree candidates during their first term of residence. Each MS candidate prepares a thesis demonstrating successful completion of the research project as well as competency in the methods and techniques of scientific investigation in the field of her/his area of specialization. The thesis should serve as a source of publishable material, and all MS students must present research results at a meeting of a national or international scientific organization. Each MS student publicly defends her/his thesis before a Thesis Committee consisting of at least three faculty members from the Department of Geology and Environmental Science. Complete descriptions of the most recent degree requirements are available at www.geology.pitt.edu.

Department of German

*German is currently not accepting graduate applications.

The Department of German offers a PhD program that includes the MA degree as a required step toward the PhD. The program trains future scholars in German Studies and prepares them to be competitive on the national job market. It encourages interdisciplinary work and students are required to pursue a certificate or related area in programs such as Cultural Studies, Film Studies, Women Studies, European Studies, or in another related area.
Contact Information

Director of Graduate Studies: Randall Halle
412-648-2614
Fax: 412-624-6318
E-mail: rhalle@pitt.edu
http://www.german.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of German, 1518 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5909. E-mail: grmndept@pitt.edu.

For more on each of the following programs, visit http://www.german.pitt.edu/graduate/.

Admissions

All applicants apply for the PhD program. Applicants should have a BA or MA in German or a related field. Students with training in related fields will be considered for full graduate status if their background in German language and culture is sufficient to succeed in graduate-level courses. For admission to the PhD, students completing their MA at the University of Pittsburgh must pass a preliminary evaluation in their final semester of study. For students entering with an MA from another institution, this evaluation takes place by the end of their first year of study at the University of Pittsburgh.

Applications should include:

- an Application Form;
- a Statement of Intent (Please describe your intellectual background, research interests, and academic goals);
- 3 Letters of Recommendation;
- Official Transcripts from all undergraduate and graduate study (non-US degrees must be accompanied by a notarized English translation);
- an audio recording (Non-native speakers should supply a recording in which they 1) speak freely about a topic and 2) read formally a passage from a literary or academic text);
- a Writing Sample (a research paper or selection from a thesis of about 20 pages that offers an example of the applicant's ability to conduct research and provide evidence of strong writing skills. It may be in either English or German.);
- TOEFL scores (Required of Foreign Students: minimum score of 550 [paper-based test] / 80 [internet-based test]) or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 6.5 (taking the academic and reading modules); and
- an Application fee of $50 (Please contact the Director of Graduate Studies if this represents a financial hardship).

Applicants are required to submit all materials for fall term admissions by January 2. Students who would like to be considered for non-teaching fellowships are encouraged to submit their applications before the New Year. Applications submitted after the deadline will be considered only if space is available. Applications are submitted online at app.applyyourself.com/?id=up-as.

Financial Assistance

Students with a high proficiency in oral German are eligible for teaching assistantships or teaching fellowships for up to five years (three years when entering with the MA). These assistantships/fellowships consist of full tuition scholarships and living expense stipends. Aid is guaranteed for the duration of the assistantship/fellowship provided the student remains in good academic standing and makes satisfactory progress toward the degree. Students may also apply for graduate tuition scholarships, Andrew Mellon Predoctoral Fellowships, the Lillian B. Lawler Scholarship/Fellowship, the Provost's Humanities Fellowships, the Fellowships in Cultural Studies, and Exchange Fellowships with the Universities of Augsburg and Bonn. A number of these fellowships are available for first-year graduate students. Interested candidates should submit their completed applications to the department by the beginning of January.

Faculty
German, PhD

Requirements for the PhD

The requirements for the PhD consist of: (1) at least 72 credits of course work, (2) a language requirement, (3) the PhD comprehensive examination, (4) the dissertation prospectus, (5) the dissertation, and (6) the completion of a certificate program or approved work in a related area. Specific details are:

- minimum 72 credits of course work, broken down as follows:
  - 30 credits from the MA
  - at least 12 seminars total (for students entering Pitt with an MA from another institution) / at least 18 seminars total (for students entering Pitt with a BA—seminars taken at the MA level count towards this requirement)
  - of these seminars, at least 6 seminars (for students with an MA from another institution) / at least 12 seminars (for students entering Pitt with a BA) should be taken in the German department.
  - at least 6 of the above seminars should be in certificate-related courses (see below).
  - at least 2/3 of the seminars taken must be taken for a letter grade;
- Language requirement: High level of oral proficiency in German (superior on OPI scale, 3 on ILR scale); reading knowledge of another language;
- Comprehensive Examination: A written examination, evaluated by a committee of 3 faculty members. Demonstrates the student's foundation in German culture from the Enlightenment to the present, as well as the student's ability to situate a specific focus within this larger context. The PhD comprehensive examination needs to be completed with an average grade of A-. The examination may be retaken only one time and needs to be retaken by the next academic term. Before completing the PhD comprehensive examination, students have to submit to their examination committee two research/seminar papers that demonstrate their scholarly potential;
- Dissertation Prospectus: 10-15 pages, submitted in the semester following the comprehensive examination. After approval by the doctoral committee, students are admitted to PhD candidacy, after which the student meets annually with the dissertation committee;
- Dissertation Defense: The dissertation must be approved by the dissertation committee after a public oral defense; and
- Completion of a certificate program or work in a related area (at least 18 credits). Approved certificates include Cultural Studies, Film Studies, and Women Studies, and West European Studies, and other related areas can be defined by the student in consultation with the Director of Graduate Studies (for example, a recently developed area of concentration is Philosophy and Literature).

German, MA

Requirements for the Master's Degree

The Master of Arts normally takes two years of study. The 30 credits include nine graduate seminars, at least six taken within the department, and a 3 credit MA project (between 35 and 50 pages long). All teaching assistants/fellows must successfully pass German 2970 as a basis for continuing financial support as a teaching assistant or fellow. In addition, all entering students must enroll in GER 2110 - INTRODUCTION TO LITERARY AND CULTURAL THEORY.

In addition to the satisfactory completion of courses, students must demonstrate a high level of proficiency in writing both in German and English by submitting for departmental approval at least one paper written in German and one paper written in English by the time of the preliminary evaluation. They must also demonstrate reading proficiency in an additional language by the end of their last term of study.

Department of Hispanic Languages and Literatures

The Department of Hispanic Languages and Literatures offers a five-year Doctor of Philosophy (PhD) with an en route Master of Arts (MA) sequence. Unlike other Spanish departments, we concentrate on Latin American Literature and Culture, including Brazil. Within that broader context, we also offer an interdisciplinary and interdepartmental PhD in film studies, and field specializations in Peninsular, Brazilian, and cultural studies.
Candidates for both the MA/PhD can also earn certificates in Latin American Studies, Cultural Studies, Film Studies, Global Studies and Gender, Sexuality, and Women Studies.

**Contact Information**

Department Chair: Jerome Branche  
Main Office: 1309 Cathedral of Learning  
412-624-5468  
Fax: 412-624-8505  
E-mail: Branch@pitt.edu  
www.hispanic.pitt.edu

For additional information regarding the department’s graduate program, or responses to questions that are not answered elsewhere, you can write to the University of Pittsburgh, Department of Hispanic Languages and Literatures, Graduate Office, 1309 Cathedral of Learning, Pittsburgh, PA 15260. You can also call 412-624-2055, or e-mail Director of Graduate Studies Prof. Gonzalo Lamana.

**Admissions**

Applicants must submit an online application, application fee of $50, transcripts of all college-level work (along with notarized translations into English, if admitted), three letters of recommendation, a statement of academic goals, and a 15-30-page writing sample (in English, Spanish, or Portuguese; if submitting the sample in English, please also send us a short sample in Spanish).

Applicants whose native language is not English and who have not already completed a degree program in a U.S. college or university are required to submit either the TOEFL (administered by the Educational Testing Service) with a minimum score of 90 (with a minimum score of 22 in each section) or the IELTS (administered by Cambridge University, Local Examinations Syndicate) with a minimum score of 6.5.

Completed applications for admission in the fall term must be received no later than January 18.

**Financial Assistance**

The department awards two types of financial assistance to incoming students: teaching assistantships (to applicants with no previous graduate studies) or teaching fellowships (to applicants who hold a MA degree), which involve teaching duties, and A&S fellowships, which do not. While any student is eligible to apply for financial assistance, departmental awards of financial aid are granted on a competitive basis to those students demonstrating the strongest academic record.

Students entering with a BA are eligible for financial aid in some combination of forms (teaching assistantship/teaching fellowship, A&S fellowship, Mellon Predoctoral Fellowship, etc.) for two years for the en route MA and three additional years for the PhD, for a maximum of five years of support. Students entering the PhD program with an MA from elsewhere are eligible for up to five years of financial aid, under certain conditions.

**Duration of the Program**

It is expected that the MA/PhD program will take five years to complete. As of Fall 2005, incoming students who are offered financial assistance in the form of teaching assistantships, teaching fellowships or non-teaching University fellowships are, assuming that satisfactory academic progress is maintained, entitled to five (5) years of support, whether or not they already have an MA degree when they enter our graduate program. However, students with an MA from another university can elect to receive only four (4) years of funding and will be entitled to transfer up to 24 credits upon successfully passing the MA Comprehensive/PhD Preliminary examinations during their fourth semester. The decision to do so must be submitted to the departmental graduate office in writing by the end of the first week of their second term in graduate program (normally first week of January).

**Faculty**
Hispanic Languages and Literatures, MA/PhD

Requirements for the PhD with En Route MA

The en route MA requires a minimum of 30 credits; 24 credits must be in substantive courses in the department, meeting major field and minor field requirements; the remaining 6 credits can consist of any combination of courses taken outside of the department (including transfer credits), a maximum of 1 Independent Reading and 1 Directed Study course.

Teaching assistants and teaching fellows new to the department are required to take a course in teaching methodology and language learning to assist them in teaching, unless a waiver is obtained.

In addition to the minimum of 30 credits, during the fourth year of full-time study (or its equivalent):

- Students must complete a long paper in the department, which is graded and serves as one part of the MA Comprehensive/PhD Preliminary examination.
- Students must also sit for the two-day MA Comprehensive/PhD Preliminary examination.

Including the MA-level work, a minimum of 72 credit hours must be attained for the PhD. Students who have received the en route MA and are working toward the PhD in the department must take a total of 48 credits of substantive courses in the department. The remaining 24 credits may consist of courses taken outside of the department, credits transferred from other institutions, directed study, or PhD comprehensive exam/overview. Up to a maximum of 12 credits of PhD dissertation research credits are permitted to count toward these 24 credits.

Students who enter the department with an MA in Spanish or a related field from another institution must complete 30 credits of substantive course work out of the 72 total credits required for the PhD. The remaining 42 credits can be distributed among credits transferred from the institution from which they earned their MA's (normally, up to 24 are allowed, in exchange for the fifth year of funding), courses taken in other departments at the University of Pittsburgh, directed study and PhD comprehensive exam/overview credits, and up to 12 credits of PhD dissertation research.

*PhD Preliminary Exam:* Students who enter the department with an MA in Spanish from another institution must pass the two-day PhD Preliminary examination in the fourth term of graduate study in the department, after which they can petition for the transfer of credits and continue on for the PhD.

*Language Requirement:* Candidates for the PhD degree must give evidence of their ability to read a third language (Portuguese, French, Italian, etc.) prior to presenting their dissertation proposal. The Department strongly encourages the learning of the Portuguese language.

*PhD Comprehensive Exam/Dissertation Overview:* After completing 60 credits of coursework and fulfilling the Portuguese requirement, students take the PhD Comprehensive exam made up of questions based on their proposal for doctoral research, which must also be defended before their proposed doctoral committee. Upon successful completion of this two-step exam process, the student is formally nominated to candidacy for the doctoral degree.

*Dissertation Defense:* The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community. The dissertation must be presented in English unless prior permission is obtained for it to be presented in a language other than English.

Department of History and Philosophy of Science

The graduate program in the history and philosophy of science offers MA and PhD degrees through a combination of coursework and dissertation research. The department also offers an area of concentration in classics, philosophy and ancient science. The department supports scholarship in the history and philosophy of general science and in history and philosophy of particular sciences. It has special strengths in the history and philosophy of physical, biological, social, cognitive and neurosciences, and in ancient and 17th-century science. See http://www.hps.pitt.edu/graduate/areas.php.

Contact Information
Admissions

Applicants for admission to the graduate program in history and philosophy of science will be expected to have a suitable undergraduate degree and to have some knowledge of the natural or social sciences. Applications are online. The deadline for completed applications is January 10. While the department awards both PhD and MA degrees, virtually all students are admitted into the PhD program.

Financial Assistance

Students in the PhD program are supported by fellowships or teaching assistantships/fellowships during their first five (5) years. The rates are set annually by the University. The department does not offer financial support to non-continuing MA students.

Degree Requirements

The graduate program consists of a series of seminars (approximately four to six are offered each term). These range from general surveys of the field and methods of research to specialized research seminars on selected topics in history and philosophy of science. These courses are divided into three areas:

- Area 1: Core sequence: a three-term introduction at the graduate level to history and philosophy of science
- Area 2: History of science
- Area 3: Philosophy of science

Faculty

Dietrich School of Arts and Sciences Faculty

History and Philosophy of Science, PhD

The department offers a comprehensive program of study leading to the PhD. It combines core and elective seminars with more advanced, supervised study and encourages continued study of a particular science outside the department. All periods of the history of science are supported, including ancient, and 16th century to present science; as is work in general philosophy of science (confirmation, explanation, realism, scientific change, etc.) and in the philosophy of particular sciences (biology, physics, psychology, cognitive science, social sciences, etc.).

PhD Degree Requirements:

A minimum of 72 credits with an MA in history and philosophy of science or completion of MA requirements.

1. Further distribution of studies requirements: At least nine hours at the 1000 or 2000 level, in one of the following (a maximum of two at the 1000 level, including the two for the MA):
   - Philosophy, exclusive of philosophy of science and logic
   - History, exclusive of history of science
   - A field of natural sciences, social science, or computer science
   (courses taken toward the MA degree may be counted toward the requirement for the PhD)
2. Proficiency in logic (equivalent to PHIL 1500)
3. Language requirement: Good reading knowledge of one foreign language (Latin, Greek, German, French, or approved substitute). The foreign language exam must be passed before the student completes the comprehensive requirements.
4. Satisfactory fulfillment of the comprehensive requirements, which are:
   o Core seminar examinations: A pass in end-of-term examinations in the two history of science core seminars and the philosophy of science core seminar.
   o Students must submit a research paper in the history of science and a research paper in the philosophy of science. Both must pass at the PhD level.
5. Submission of a significant and acceptable dissertation on a topic in history and philosophy of science.
6. All students must acquire some supervised teaching experience during their tenure at the University.

These requirements are specific departmental requirements, in addition to the general requirements for the MA and PhD degrees laid down by the Graduate Dietrich School of Arts and Sciences.

**History and Philosophy of Science, MA**

**MA Degree Requirements**

A minimum 30 credit hours are required for the degree distributed as follows:

**M.A. degree requirements:**

A. Distribution-of-Studies Requirement:

1. Nine hours from Area 1 (Core Seminars). MA students must pass the end-of-term examination in all three core seminars. (See Section III E.1.)

2. Fifteen hours from Areas 2 and 3, with at least six hours in each area.

B. Language Requirement: Good reading knowledge of either French, German, Latin, Greek, or approved substitute language. (Language acquisition courses cannot count toward the degree).

C. Research Paper Requirement: Students must submit a research paper in the history of science and a research paper in the philosophy of science. Evaluations of papers will be limited to a master's pass-fail. A master's pass on both papers is required for the M.A. degree.

D. Course Credit Requirement: A minimum of 30 credit hours. No more than two (non-HPS) 1000-level courses (6 hours total) may count towards the M.A. degree. (No pre-1000 level courses can be used to satisfy the degree requirements. No HPS courses at the 1000-level can count.)

**Department of History of Art and Architecture**

The University of Pittsburgh's PhD program in History of Art and Architecture offers close mentoring from internationally renowned scholars for students admitted through a highly selective admissions process. We fully fund all our doctoral students with generous multiyear packages of financial support, including fellowships and teaching assistantships. Our students also have an excellent record in competing for prestigious external fellowships such as the Fulbright, and in job placement after graduation.

Application is directly to the PhD program. Even though many students earn an MA here before proceeding to the PhD, ours is essentially a PhD program and we do not admit students for a terminal MA. Students who already hold an MA in History of Art and Architecture before matriculating at the University of Pittsburgh may receive credit toward the PhD. We encourage all prospective students to select a potential advisor based on that professor's expertise in a given subject, and to contact that faculty member in their area of interest before applying.

Our program possesses an innovative and exciting structure, in which faculty members and graduate students participate in research constellations. These constellations organize our department not around subject matter, but rather around commonly held interpretative approaches and lines of inquiry ("Visual Knowledge," "Agency," "Identity," etc.). While our students acquire specialized knowledge of a particular art-historical subfield,
they also produce conceptually ambitious and methodologically innovative research for their PhD. We strongly encourage students to explore our web site (www.haa.pitt.edu) for more information on faculty members, graduate program requirements, and the application process.

Contact Information

Linda Hicks
Senior Administrator
104 Frick Fine Arts Building
Pittsburgh, PA 15260
Phone: 412-648-2421
E-mail: lih@pitt.edu

Please consult our department website for further information on our graduate program (http://www.haa.pitt.edu/graduate) or email Linda Hicks at lih@pitt.edu

Admissions

Applicants for admission must submit: an online application, official transcripts of all college-level work, three letters of recommendation, a statement of purpose outlining the applicant's intellectual and professional goals, a writing sample that demonstrates the applicant's scholarly ability, a completed foreign language questionnaire, and GRE scores. International students whose first language is not English must also submit TOEFL scores administered by the Educational Testing Service with a minimum score of 90 on the internet-based test and a minimum score of 22 in each section.

Strong applicants will have completed an undergraduate major in a discipline in the humanities with at least a minor (12 credits / 4 advanced-level courses) in history of art and architecture. Successful applicants will possess strong language skills in the area(s) that they wish to pursue. For example, students wishing to pursue degree work in East Asian art and architecture must have the equivalent of three years of college-level instruction in Chinese or Japanese before entering the program. Students applying to study topics related to Europe and/or the Americas should likewise have relevant language competency (completion through the intermediate college level with a B+ or better). Students in coursework also have opportunities to acquire additional language skills both on campus and beyond. Our program embraces global perspectives on art and architecture, and we welcome applicants who will contribute diverse language skills that are essential to this mission.

The deadline for admissions is December 15. Applicants are notified of their status in the following spring, and admitted students enter the program in the fall.

Financial Assistance

The department offers five-year aid packages to all of its PhD students. These packages consist of full tuition scholarships and living expense stipends. Aid is guaranteed for the duration of the package provided the student remains in good academic standing and makes satisfactory progress toward the degree. Aid takes the form of teaching and research assistantships, including a variety of positions at the University Art Gallery (https://uag.pitt.edu/), the Visual Media Workshop (http://www.haa.pitt.edu/visual-media-workshop), and institutions connected to the Collecting Knowledge Pittsburgh (http://www.haa.pitt.edu/graduate/constellations) initiative. All incoming students receive a fellowship free of teaching and other employment duties for their first year, and are expected to compete for internal and external fellowships as they continue in the program. The department is committed to supporting all students regardless of citizenship status or country of origin. For more financial aid information, please consult our website: http://www.haa.pitt.edu/graduate/financial-aid.

Faculty

Dietrich School of Arts and Sciences Faculty

Film Studies - History of Art and Architecture Concentration, PhD
Degree Requirements

Incoming students are admitted directly into the doctoral program; the MA degree is granted in the second year as a step toward the doctorate. All graduate coursework done before the MA is granted counts toward PhD requirements. Students who have been admitted into the Film Studies PhD with a concentration in History of Art and Architecture must satisfy degree requirements for both programs (for more information please visit the Film Studies website). All graduate coursework done before the MA is granted counts toward PhD requirements. Doctoral students must complete 72 credit hours, of which 30 must be completed in the first two years for the MA, or 24 may be transferred from MA programs at other institutions. At the PhD level, HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP, HAA 2007 - HISTORIOGRAPHY, ENGFLM 2451 - FILM HISTORY/THEORY, ENGFLM 2452 - FILM HISTORY/THEORY 2, FILMG 2905 - PROSEMINAR IN FILM AND MEDIA STUDIES, and either four or seven graduate seminars, depending on student's MA status are required. It is expected that the student will take a substantial proportion of these seminars either with their advisor or within HAA to advance their research program. In addition, students must also complete the HAA seminar in pedagogy theory. All other required credits for the PhD may be fulfilled through additional coursework or independent studies directed toward comprehensive exam and prospectus preparation, and dissertation research. The final requirement for the degree is the successful defense of the dissertation.

Course work

The PhD requires a total of 72 credits.

12 graduate-level classroom courses (for students without an MA)/nine graduate-level classroom courses (for students with an MA) are part of this requirement. Normally, most of these are completed in the first two years. The normal course load is three courses per semester (nine credits). The courses must include:

- HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP and HAA 2007 - HISTORIOGRAPHY (Methods and Historiography are alternated every other fall semester and must be taken in the student's first and second year).
- ENGFLM 2451 - FILM HISTORY/THEORY and ENGFLM 2452 - FILM HISTORY/THEORY 2 (to be taken in any order).
- FILMG 2905 - PROSEMINAR IN FILM AND MEDIA STUDIES.
- Four to seven graduate seminars (depending on MA status), to be determined in consultation with advisor and HAA Director of Graduate Studies.
- HAA 2970 - TEACHING OF ART HISTORY is a required course for all students, however, it does not count toward the required graduate seminars.

The remaining credits may be amassed through various independent study options and additional courses if necessary.

Note: If a student enters the PhD with an MA from an outside institution, some of these requirements may be bypassed. See the Graduate Handbook, Section 2, for more details.

The departmental faculty teach across many areas. In line with the department's newly organized research constellations, students are expected to take courses on many different historical and geographical topics, while at the same time acquiring in-depth knowledge and expertise in one of these. In consultation with the HAA Director of Graduate Studies and the student's individual advisor, students should select their courses with these two requirements in mind.

Languages

Students are required to have reading knowledge of two languages (beyond English) relevant to their particular research area. The relevance of these languages to the student's course of study will be determined in consultation with the academic advisor. All students must be certified in two research languages; only native speakers will be exempted. Prior to admission, students specializing in East Asian film must have at least three years/six semesters of college-level Japanese or Chinese, with a grade of B+ or better, or equivalent knowledge. Similarly, students specializing in other areas must have at least two years/four semesters of college-level instruction, with a grade of B+ or better, or equivalent knowledge of a research language prior to admission.

Certification in research languages may be achieved in the following ways:

- through passage of a departmentally administered exam. Students who wish to take the department exam should register with the Graduate Secretary by the end of the first week of the term; the Secretary will schedule and administer the exam. The Exam Coordinator will choose two
passages in the language to be examined, evaluate the exam, and communicate the results of the evaluation to the student and Graduate Secretary, who will record the results on the Student Record and Tracking Sheet. Students will have a choice of two passages, each about 500 words in length, but are to pick only one text to translate. They may use a dictionary and will have 90 minutes to complete their translation. The translation must communicate an accurate sense of the text content and knowledge of art historical vocabulary.

- completion through the intermediate level (typically the third semester) of a language, taken at the University of Pittsburgh during the period of the student's graduate study, with a grade of B+ or better.
- completion of two graduate level reading courses in a foreign language, taken at the University of Pittsburgh, with a grade of B+ or better.
- completion of an accredited language immersion program, in the United States or abroad.
- certification of language qualification attained at another accredited graduate degree program.

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors.

All students are strongly encouraged to be certified in both languages as soon as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

The MA Paper and Degree

In the case of students who did not earn an MA degree in Film and Media Studies at another institution prior to matriculating in the PhD program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA requires:

- a total of 30 graduate-level credits, including the courses enumerated above.
- at least one foreign language certified.
- an MA paper passed by majority vote of the faculty.

The MA paper is 25-to 30-pages with an argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

Fourth Semester Review

In their fourth semester, all students (with the exception of those who entered with an MA) undergo a review for continuation in the PhD program. Students submit a dossier including:

- their completed MA paper.
- all faculty evaluations of the student's course work to date.
- a one-page form that explains their proposed dissertation field and lists the course requirements and relevant foreign languages they have passed. This last document must be approved and signed by the student's advisor.

The faculty then reviews the dossier to make sure that the student's work demonstrates the ability to carry out a dissertation successfully. More specifically, the faculty looks for evidence of ability to carry out original research in the student's field, to master secondary literature, to frame an original argument, and to write lucidly.

If the faculty makes a positive determination, the MA is granted and the student is officially approved to continue in the PhD program. All graduate coursework done to this date counts toward the PhD degree. A dissertation committee is named, consisting of the student's advisor and two other faculty members drawn from HAA and/or Film and Media Studies at Pitt.

If the faculty determines that the student's work does not merit continuation in the PhD program, the student may be granted a terminal MA degree providing they have met the MA requirements and the faculty by majority vote deems the MA paper creditable.

Preliminary Exam
In the fifth semester, the first of the student's annual PhD committee meetings is held. The student presents a one-page description of the dissertation topic, and the student and committee together decide on comprehensive exam areas and procedures. Once the faculty as a whole reviews and approves the dissertation topic and exam areas, the "prelim" is passed.

Comprehensive Exams

Doctoral students normally take their comprehensive exams in the third or fourth year, (or second year if they are entering with an MA) after they have completed their coursework requirements. While a committee member from outside the department is not required at this stage, it is recommended to have an outside member participate both in the formulation of the exam contents and in the exam itself. The comprehensive exams have two broad goals. The first goal is to test whether the student has sufficient knowledge of the field to carry out the dissertation. The student should be able to articulate "the shape of the field" and should be conversant with current trends in scholarship. The second goal is to test whether the student has sufficient knowledge to teach one or more broadly defined areas.

Teaching Portfolio

Graduate Students must produce teaching portfolios to advance to candidacy. They are encouraged to do so in the context of the required seminar, HAA 2970 Pedagogy Theory. Thereafter, they should include the teaching portfolio with the materials they submit to their PhD committee for their annual meetings. PhD committees are encouraged to give further feedback to the student as appropriate, especially as the student's thinking about pedagogy evolves, as the student readies themselves for the job market, et cetera.

Dissertation

The dissertation is a book-length research project designed to make an original scholarly contribution to the student's field. Ideally, students begin to focus their dissertation topic early in their graduate career, within the first two years. The MA paper can be a piece of the final dissertation. As soon as possible, students should design their curriculum to enrich and advance their dissertation project.

After a successful fourth semester review, a dissertation committee of three faculty (chaired by the student's advisor) guides and mentors the student. Upon passing the comprehensive exams, the student prepares a dissertation prospectus that must be approved by the dissertation committee, including a fourth external committee member. Once the student completes the dissertation itself, the student must pass a dissertation defense, normally a two-hour conversation with the committee (including outside faculty member).

Time to Degree

The PhD degree is designed to take five to seven years to complete, depending on the student's field. Actual time to degree varies depending on many factors, including the language preparation and/or specialized skills needed to conduct dissertation research. Students in East Asian art or architecture, for example, may need to learn classical as well as modern languages, and to learn archaeological methods.

Note: For more details on degree requirements, the student-advisor relationship, and other related matters, please see the Graduate Handbook.  

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors. All students are strongly encouraged to be certified in both languages as soon as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

History of Art and Architecture, PhD

Degree Requirements

Incoming students are admitted directly into the doctoral program. For students entering without a master's degree, the MA is earned in the second year as a step toward the doctorate. Students entering with an MA in history of art and architecture from another institution may have this requirement waived pending approval from their advisor and the Director of Graduate Studies.
All graduate coursework done before the MA counts toward PhD requirements. Doctoral students must complete 72 credit hours, of which 30 must be completed in the first two years for the MA. Students entering with an MA from another institution may transfer 24 credits, but are still required to complete nine graduate-level courses during their first two years. All graduate students entering with an MA must complete HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP , HAA 2007 - HISTORIOGRAPHY , four graduate seminars in HAA, plus three elective courses in any department, for a total of nine courses. In addition, students must also complete the seminar in pedagogy theory. Graduate students without an MA must complete three additional courses. It is expected that students will take seminars that advance their research program. After the first 30 credits have been completed, the remaining required credits for the PhD may be fulfilled through additional coursework or independent studies directed toward comprehensive exam and prospectus preparation, and dissertation research. The final requirement for the degree is the successful defense of the dissertation.

Course work

The PhD requires a total of 72 credits.

12 graduate-level classroom courses (for students without an MA)/nine graduate-level classroom courses (for students with an MA) are part of this requirement. Normally, most of these are completed in the first two years. The normal course load is three courses per semester (nine credits). The courses must include:

- HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP and HAA 2007 - HISTORIOGRAPHY (Methods and Historiography are alternated every other fall semester and must be taken in the student's first and second year.)
- Four or five HAA seminars (depending on MA status)
- Three or five elective courses (depending on MA status), in HAA or in other departments
- HAA 2970 - TEACHING OF ART HISTORY is a required course for all students, however, it does not count toward the required graduate seminars

The remaining credits may be amassed through various independent study options and additional courses if necessary.

Note: If a student enters the PhD with an MA from an outside institution, some of these requirements may be bypassed. See the Graduate Handbook, Section 2, for more details.

The departmental faculty teach across many areas. In line with the department's newly organized research constellations, students are expected to take courses on many different historical and geographical topics, while at the same time acquiring in-depth knowledge and expertise in one of these. In consultation with the Director of Graduate Studies and the student's individual advisor, students should select their courses with these two requirements in mind.

Language Requirement

Students are required to have reading knowledge of two languages (beyond English) relevant to their particular research area. The relevance of these languages to the student's course of study will be determined in consultation with the academic advisor. All students must be certified in two research languages; only native speakers will be exempted. Prior to admission, students specializing in East Asian art and/or architecture must have at least three years/six semesters of college-level Japanese or Chinese, with a grade of B+ or better, or equivalent knowledge. Similarly, students specializing in other areas must have at least two years/four semesters of college-level instruction, with a grade of B+ or better, or equivalent knowledge of a research language prior to admission.

Certification in research languages may be achieved in the following ways:

- through passage of a departmentally administered exam. Students who wish to take the department exam should register with the Graduate Secretary by the end of the first week of the term; the Secretary will schedule and administer the exam. The Exam Coordinator will choose two passages in the language to be examined, evaluate the exam, and communicate the results of the evaluation to the student and Graduate Secretary, who will record the results on the Student Record and Tracking Sheet. Students will have a choice of two passages, each about 500 words in length,
but are to pick only one text to translate. They may use a dictionary and will have 90 minutes to complete their translation. The translation must communicate an accurate sense of the text content and knowledge of art historical vocabulary.

- completion through the intermediate level (typically the third semester) of a language, taken at the University of Pittsburgh during the period of the student's graduate study, with a grade of B+ or better.
- completion of two graduate level reading courses in a foreign language, taken at the University of Pittsburgh, with a grade of B+ or better.
- completion of an accredited language immersion program, in the United States or abroad.
- certification of language qualification attained at another accredited graduate degree program.

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors. All students are strongly encouraged to be certified in both languages as soon as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

The MA Paper and Degree

In the case of students who did not earn an MA degree in history of art and architecture at another institution prior to matriculating in the PhD program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA requires:

- a total of 30 graduate-level credits, including the courses enumerated above.
- at least one foreign language certified.
- an MA paper passed by majority vote of the faculty.

The MA paper is 25 to 30 pages with an argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

Fourth Semester Review

In their fourth semester, all students (with the exception of those who entered with an MA) undergo a review for continuation in the PhD program. Students submit a dossier including:

- their completed MA paper.
- all faculty evaluations of the student's course work to date.
- a one-page form that explains their proposed dissertation field and lists the course requirements and relevant foreign languages they have passed. This last document must be approved and signed by the student's advisor.

The faculty then reviews the dossier to make sure that the student's work demonstrates the ability to carry out a dissertation successfully. More specifically, the faculty looks for evidence of ability to carry out original research in the student's field, to master secondary literature, to frame an original argument, and to write lucidly.

If the faculty makes a positive determination, the MA is granted and the student is officially approved to continue in the PhD program. All graduate coursework done to this date counts toward the PhD degree. A dissertation committee is named, consisting of the student's advisor and two other faculty members drawn from HAA.

If the faculty determines that the student's work does not merit continuation in the PhD program, the student may be granted a terminal MA degree providing they have met the MA requirements and the faculty by majority vote deems the MA paper creditable.

Preliminary Exam

In the fifth semester, the first of the student's annual PhD committee meetings is held. The student presents a one-page description of the dissertation topic, and the student and committee together decide on comprehensive exam areas and procedures. Once the committee as a whole reviews and approves the dissertation topic and exam areas, the "prelim" is passed.

Comprehensive Exams
Doctoral students normally take their comprehensive exams in the third or fourth year, (or second year if they are entering with an MA) after they have completed their coursework requirements. While a committee member from outside the department is not required at this stage, it is recommended to have an outside member participate both in the formulation of the exam contents and in the exam itself. The comprehensive exams have two broad goals. The first goal is to test whether the student has sufficient knowledge of the field to carry out the dissertation. The student should be able to articulate "the shape of the field" and should be conversant with current trends in scholarship. The second goal is to test whether the student has sufficient knowledge to teach one or more broadly defined areas.

Dissertation

The dissertation is a book-length research project designed to make an original scholarly contribution to the student's field. Ideally, students begin to focus their dissertation topic early in their graduate career, within the first two years. The MA paper can be a piece of the final dissertation. As soon as possible, students should design their curriculum to enrich and advance their dissertation project.

After a successful fourth semester review, a dissertation committee of three HAA faculty (chaired by the student's advisor) guides and mentors the student. Upon passing the comprehensive exams, the student prepares a dissertation prospectus that must be approved by a dissertation committee consisting of four members (including one faculty member from outside HAA). Once the student completes writing the dissertation, they must pass a defense, normally a two-hour conversation with the committee (including the outside faculty member).

Time to degree

The PhD degree is designed to take five to seven years to complete, depending on the student's field. Actual time to degree varies depending on many factors, including the language preparation and/or specialized skills needed to conduct dissertation research. Students in East Asian art or architecture, for example, may need to learn classical as well as modern languages, and to learn archaeological methods.

Note: For more details on degree requirements, the student-advisor relationship, and other related matters, please see the Graduate Handbook.

Teaching Portfolio

Graduate students must produce teaching portfolios to advance to candidacy. They will do so in the context of the required seminar, HAA 2970 - TEACHING OF ART HISTORY. Thereafter, they should include the teaching portfolio with the materials they send to their PhD committee for their annual meetings. PhD committees are encouraged to give further feedback to the student as appropriate, especially as the student's thinking about pedagogy evolves, as the student readies themselves for the job market, et cetera.

History of Art and Architecture, MA (for admitted PhD students only)

General requirements

General Requirements
Students who enter the PhD program without a Master's degree in hand are expected to complete an MA as part of their progress toward a PhD. Students who enter the program with an MA from another university may have this requirement waived, pending approval from their advisor and the Director of Graduate Studies.

Master's degree students must successfully complete 36 credit hours (12 courses). 21 of these credits (seven courses) must be seminars in art history, two of which must be the core courses, HAA 2005 Methods and HAA 2007 Historiography. Another 15 credits (five elective courses) may be completed in any department, and at least three credits (one course) must be fulfilled in a cognate discipline outside HAA. The remaining credits may be used to fulfill MA paper and PhD requirements in a combination of independent studies (independent study courses do not count towards the credits required for the MA degree) and relevant classes. Six credits (two courses) may be transferred from another approved graduate program.

Language Requirement
Certified competence in one language (beyond English) relevant to the student's program of research is required for the awarding of the MA degree.
Students must demonstrate such competence by passing a department exam or by providing other verification within the first term of residence. Certified competence in two research languages is required for the PhD and must be demonstrated before the student is admitted to candidacy.

The MA Paper
The final requirement for the MA degree is an original research paper, typically 25 to 30 pages in length, produced under the supervision of two faculty readers and deemed satisfactory by a majority vote of the full faculty in residence. The MA paper is usually a substantially revised version of a paper produced in a research seminar. It must be submitted no later than November 1 or January 15 of the term in which the degree is expected.

Department of History
The Department of History, which offers the degree Doctor of Philosophy (PhD), is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. The graduate program provides training in historical research and teaching to students who wish to find careers in colleges, universities, and other settings where the skills of the historian can be used. To advance this purpose, the department encourages a climate of intellectual inquiry and active research that embraces graduate students and faculty members alike. The hallmark of the program is the high measure of independence and flexibility it allows students in shaping a curriculum that meets their needs, within the limits of faculty expertise and available resources.

Graduate Administrator: Patty Landon (pal14@pitt.edu)
Phone: 412-648-7450
www.history.pitt.edu

Admissions
Admission to the graduate program in history is highly competitive. Candidates must present a career statement, a sample of their written work on a historical topic, undergraduate and/or graduate transcripts and two letters of recommendation. Test of English as Foreign Language scores are required of all applicants whose primary language is not English. Graduate Record Examination (GRE) scores are recommended, especially for applicants seeking to be nominated for university-wide fellowships. Students interested in the graduate program should contact the graduate administrator at the University of Pittsburgh, Department of History, Pittsburgh, PA 15260; by e-mail: pal14@pitt.edu Patty Landon; or apply online at app.applyyourself.com/?id=up-as.

Financial Assistance
The department offers funding to most of its graduate students through a mix of teaching assistantships, teaching fellowships, departmental fellowships, and research assistantships. If students are admitted to program with funding, the University waives tuition fees and offers health benefits or provisions for benefits. While in the program, students have to opportunity to apply for a variety of non-teaching fellowships provided by the University of Pittsburgh or national and international organizations. In addition to the teaching and non-teaching fellowships, the History Department offers summer research funding to graduate students on a competitive basis, which allows students to conduct archival research or language training within the US or abroad. The funding the University of Pittsburgh provides to graduate students is competitive and covers the costs of a graduate student living in Pittsburgh.
Students specializing in East Asian, Latin American, Russian and East European, and Western European history are also eligible to apply for fellowships and research grants offered by the University of Pittsburgh's University Center for International Studies (UCIS).

**Degree Requirements**

The minimal requirements for the degrees established by the Graduate Faculty of the University and by Dietrich School of Arts & Sciences A&S Graduate Studies, as described elsewhere in this bulletin, should be read in conjunction with the specific departmental requirements for these degrees in the following sections.

**History, PhD**

The graduate program in history is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. Close cooperation with the interdisciplinary programs in Latin American Studies, Russian and East European Studies, West European Studies, and Asian Studies, coordinated under the University Center for International Studies, strengthen the international orientation of the program, with graduate students from Europe, Asia, and Latin America joining American students pursuing a PhD degrees.

**Requirements for the PhD**

Prerequisite for admission is a Master of Arts in History or equivalent preparation (plus approval, for those previously enrolled in the department). Students entering the program with an MA from another institution must pass a preliminary examination at the end of the first year in the program. They must complete 9 credits in order to sit for the one-hour oral examination.

The coursework and comprehensive exam portion of the PhD program should take no more than one years beyond the MA. Required doctoral coursework includes successful completion post-MA of two graduate courses in History and the completion of the department pedagogy program.

**Breadth Requirement:** Ph.D. students entering the program with a B.A. must fulfill the Breadth Requirement by the end of their fifth year. This requirement is intended to help students think more broadly about their dissertation and intellectual trajectory as well as future career paths. It may be fulfilled as follows: a) a second foreign language; b) two skill-based courses agreed-upon with their advisor including but not limited to statistics, digital humanities, oral history/ethnography, and computer programing; c) two courses agreed-upon with their advisor that will permit students to enhance their knowledge in an interdisciplinary area including Gender, Sexuality & Women's Studies, Cultural Studies, or an area of the student's design; or d) in consultation with the DGS and their advisor, 6 credit hours or the equivalent accrued from internships and/or courses designed to enhance students' ability to utilize their professional skills in diverse career environments.

**Comprehensive Exam:**

For students entering with a BA, the comprehensive exam needs to take place by February 1 of their third year. At the end of their first year, students must meet with their advisor and the DGS to: a) constitute a comps committee consisting of three members, all of whom need to have Graduate Faculty status; and b) identify any coursework completed in their first year that could be included in the comps portfolio. At the end of their second year, students and their full comps committee will agree upon the contents of the comps portfolio that will form the basis of the oral exam.

Students will work with faculty members who are members of the Graduate Faculty to develop expertise in: a regional field (Asia, Europe, Latin America, or United States); and a transregional or global field defined by the student in consultation with their advisor(s). Students may fulfill this requirement in one of the following ways: a) a field in world or global history; b) a field in a transregional history such as Atlantic history or Eurasian history; or c) a thematic field with transregional scope such as gender or empire.

The portfolio will consist of: a) two to three historiographic essays in the regional field as well as a bibliography of 40-50 books; b) two to three historiographic essays in the transregional or global field as well as a bibliography of 30-40 books; and c) a teachable undergraduate course proposal that demonstrates students' ability to translate their knowledge of the historiography and recent research trends in a given field into the composition of an undergraduate course.

Students complete the comprehensive exam through an oral examination, which will take place no later than February 1 of their third year. The oral examination will be a maximum of two hours in duration, and should focus on the portfolio. Students should be able to discuss the essays, the bibliographies, and the course proposal.
Dissertation overview: After having selected a suitable dissertation topic in consultation with their advisor, students will present a written overview to their Ph.D. committee describing the purpose, scope, and method of the proposed study and the sources upon which it will be based. A PhD committee is composed of at least four members, all of whom must be members of the Graduate Faculty. There must be three graduate faculty members from the candidate's department and at least one graduate faculty member external to the candidate's department. With the acceptance of this prospectus at the overview examination and the approval of the assistant dean of graduate studies, the student is formally admitted to candidacy for the PhD.

Dissertation defense: The doctoral thesis, directed and evaluated by the student's Ph.D. committee, is expected to demonstrate the student's capacity to carry out independent, original research. Only if the dissertation is judged to demonstrate such competence, after formal defense in a final oral examination, does the department recommend the awarding of a degree.

For further details regarding the graduate program in history and the specific exam requirements, please see the latest version of the Handbook of the Graduate Program in History, which can be downloaded from the History Department Website.

History, MA

The graduate program in history is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. Close cooperation with the interdisciplinary programs in Latin American Studies, Russian and East European Studies, West European Studies, and Asian Studies, coordinated under the University Center for International Studies, strengthen the international orientation of the program, with graduate students from Europe, Asia, and Latin America joining American students pursuing a PhD degrees.

Requirements for the Master's Degree

While the History Department does not offer a terminal Master's Degree, for students admitted with funding, graduate students get the Master's Degree while working towards their PhD. The requirements for being awarded the Master of Arts in history should be met within two years. 30 credits are required for the degree. Of these 30 credits, only 6 may be in Arts and Sciences courses numbered 1002 through 1999 series- these are undergraduate courses-subject to the approval of the student's advisor and the Director of Graduate Studies, but students are encouraged to take as much of their work as possible at the graduate seminar level. Students must take six credits in seminars or directed studies in transregional or global fields (the six credits may be in different transregional/global fields); and six credits in seminars or directed studies in a regional field (Asia, Europe, Latin America, or the United States). In addition, students must take three credits of graduate-level coursework outside of the discipline of history.

First Research Tool: The Master's degree requires the completion of the first research tool, which consists of reading proficiency in one foreign language. Students select, in consultation with their advisor, the language most useful to their specialization. Students are urged to complete language preparation before entering graduate school, not only to lighten their workload, but also because some seminars require the use of a second language.

Research paper: To complete their MA degree, students write a research paper of approximately 10,000 words, which is kept as part of their permanent record and is considered equivalent to a master's thesis. This paper, normally developed must be based on original research and should be potentially publishable.

MA committee: In consultation with their advisor, students create a three-person committee for their M.A. examination, usually chaired by their advisor. At least two of the committee members must be members of the Graduate Faculty. Before students can sit for their M.A. exam, the chair of the M.A. committee must approve the final version of the research paper.

MA examination and admission to the Ph.D. program: The M.A. examination will be a one-hour oral examination. Questions will be based on the M.A. research paper. At the conclusion of the examination, the committee will inform the student of its decision as to whether or not it recommends that the student be awarded the M.A. degree. If the student has expressed a desire to enter the Ph.D. program, the committee will also make a determination as to whether or not it recommends admission into the Ph.D. program. At the earliest opportunity, the M.A. committee's evaluation of the examination must be reported to the department, which must approve admission into the Ph.D. program.

Department of Linguistics
The Department of Linguistics offers the degrees of Master of Arts and Doctor of Philosophy in both linguistics and Hispanic linguistics, with areas of concentration in applied linguistics and sociolinguistics. The MA Program requires a minimum of 10 courses (30 credits). The Dietrich School of Arts and Sciences requires a minimum of 72 credits beyond the baccalaureate for a PhD degree.

Master of Arts in Linguistics  
Doctor of Philosophy in Linguistics  
Master of Arts in Hispanic Linguistics  
Doctor of Philosophy in Hispanic Linguistics  
Doctor of Philosophy in Sociolinguistics

Students may fulfill requirements for the TESOL Certificate in conjunction with their graduate study or as a stand-alone post baccalaureate certificate.

**Contact Information**

Department Chair: Scott Kiesling  
Main Office: 2816 Cathedral of Learning  
412-624-5900  
Fax: 412-624-6130  
E-mail: lingpitt@pitt.edu  
www.linguistics.pitt.edu

The best and most current information is at the department website. Potential applicants are encouraged to thoroughly explore this site for further information. See especially the Graduate Handbook.

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Linguistics, Graduate Administrator, Maggie Bupp, 1617 CL, Pittsburgh, PA 15260. Email: maggiebupp@pitt.edu Phone: 412-624-6568. Fax: 412-624-8814.

In addition to graduate and undergraduate education in the field of linguistics, the Department of Linguistics is responsible for the following programs and centers:

- Less Commonly Taught Languages Center  
- Robert Henderson Language Media Center  
- TESOL Certificate Program  
- English Language Institute (non-credit)

**Admissions**

In order to be admitted to graduate standing in linguistics, students must meet the admission requirements of the Dietrich School of Arts and Sciences and have at least two years, or the equivalent, of university-level study of a second language. The Graduate Record Examination is required for all applicants. PhD applicants must also submit samples of written work in linguistics. To be considered for financial aid, complete applications should be received by December 15. Applicants for Hispanic linguistics must be fluent in Spanish in addition to the above admissions requirements (determined by interview following review of other application materials).

**Financial Assistance**

Funding is mainly through teaching assistantships, while occasionally there are research assistantships through grant funding. There are two to five such teaching assistantships each year, usually involving some sort of research work and sometimes teaching or faculty-teaching support. Some of the aid offered by the department is in the form of teaching assistantships in the Department of Linguistics in the English Language Institute, which is offered for both MA and PhD students. There are about two new positions per year. For all assistantships, applicants whose native language is not English may be eligible for two or three of these positions. For all assistantships, applicants are ranked mainly on the basis of their academic
qualifications, but relevant teaching experience or research can help. Students in the Hispanic linguistics program teaching Spanish language courses must be enrolled in Methodology for Teaching Spanish (SPAN 2307). There are a total of 6 funded positions in Applied Hispanic linguistics.

Besides assistantships, there are a limited number of predoctoral fellowships from the Andrew Mellon Foundation and Provost's Humanities Fellowship program, for which PhD applicants in linguistics are eligible. Applicants should realize that these are very prestigious fellowships, granted on the basis of a University-wide competition. Promising applicants are invited to apply based on their admissions materials. The application deadline is February 1. For more information on these fellowships, see Fellowships and Traineeships in the A&S section of this bulletin.

TESOL

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition, materials and curriculum development, and assessment.

The Department of Linguistics offers two certificates in the Teaching of English to Speakers of Other Languages (TESOL).

- Higher Education Course
- ESL Program Specialist Course

Faculty

Linguistics, MA/PhD

The PhD program (also referred to as the MA/PhD program) is a combined program designed for students entering with the intention of earning a PhD. The program consists of core coursework, requirements for specific Areas of Concentration (ARCOs), preliminary exams, comprehensive exams, and dissertation work. The ARCOs available are:

- Applied Linguistics
- Hispanic Linguistics
- Sociolinguistics

Students in the PhD program must choose one of the above ARCOs.

Required Core Courses for the PhD (all concentrations)

The following courses are required of all students in the PhD program. Students entering with an MA degree from another institution may petition to have coursework from that MA degree apply to the PhD degree at Pitt (see also the Preliminary exam requirement for students with an existing MA).

Courses normally required to be taken in the first year

LING 2578  Phonetics (Fall)
LING 2144  Research Methods (Fall)
LING 2773  Morphology (Fall)
LING 2777  Syntax (Spring)
LING 2579  Phonology (Spring)
Required courses that can be taken any time

One course in sociolinguistics/language change, typically fulfilled by one of the following:

LING 2267  Sociolinguistics
LING 2680  Historical Linguistics
LING 2253  Language Contact

Required upper level course: Choose one advanced level core course approved by the student's advisor and Director of Graduate Studies or Chair.

Applied Linguistics ARCO PhD Course Requirements

LING 2146  Second Language Acquisition
LING 2142  Second Language Teaching

A course in psycholinguistics or first language development

A course in statistics

One of the following:

LING 2147  Current Issues in Second Language Learning
LING 2149  Advanced Second Language Acquisition

Hispanic Linguistics ARCO PhD Requirements

Required Courses

LING 2394  Spanish Dialectology
LING 2391  Spanish Phonology

Two Special Topics courses in Hispanic Linguistics

A course in statistics

Other requirements

Entrance requirement: Advanced Low Proficiency in Spanish as measured by an OPI or equivalent. Students are also interviewed by faculty in Spanish during the admissions process.

In core courses, students are encouraged to work on topics in Hispanic linguistics and to use Spanish sources.

Further specialization within Hispanic Linguistics: Students may wish to focus on Applied Spanish Linguistics or Spanish Sociolinguistics, but these are not official ARCOs.

Sociolinguistics ARCO PhD Course Requirements

Sociolinguistics (if not already taken)

Field Methods

SOC 2102: Sociological Theory 2 - Post-Classical
A statistics course

Two of the following:

LING 2271  Discourse Analysis
LING 2274  Language Contact
LING 2269  Variation Analysis
LING 2860  Historical Linguistics

Other MA/PhD Requirements

Language requirement:

Native speakers of English: 1) three semesters of a language taught at the college level plus 2) at least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic.

Non-native speakers of English: 1) English-language proficiency and 2) at least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic.

Candidates for the Hispanic Linguistics ARCO: 1) English-language proficiency, 2) at least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic, and 3) satisfactorily completing the Spanish language proficiency required of candidates.

Preliminary exam

Students entering without an MA: The preliminary exam is fulfilled by attaining a grade of B+ or better on the final exam of all core courses with a B+ grade or better, and by submitting a portfolio of written work from coursework.

Upon completion of all core courses, the students must assemble three course papers from any course taken: one paper to come from the ARCO; and at least one paper from phonetics, phonology, morphology, or syntax. Students are encouraged revise their papers in light of the feedback from their course instructors before submitting the papers for the preliminary evaluation. This portfolio must be submitted by January 15th of the second academic year. A rubric for evaluation is used for evaluation and is available on the graduate student courseweb page. Faculty will review the portfolio and determine by March 15 if the student passes or fails. In addition, faculty may request written evaluations of writing performance from any former instructors. The consequences of failing depend on the nature of the shortcoming. The most extreme consequence is immediate termination from the program, but a student may also be required to remediate knowledge that is lacking in a particular area and resubmit that portion of the preliminary portfolio.

Students entering with an MA: Students entering with an MA degree may petition to have core courses waived. In order to waive phonetics, phonology, morphology or syntax, a student must demonstrate knowledge by providing course syllabi and passing an oral interview. In order to fulfill the portfolio requirement when entering with an MA, a student must submit an identical portfolio as outlined above from their MA coursework by the end of their first semester of study. Students will be notified of the outcome by the end of the next semester.

Comprehensive exam

Two comprehensive papers are required to fulfill the comprehensive exam requirement for the Linguistics PhD. The topics of the two papers must be substantially different. Although the topics can be in the same specialty of linguistics, at least one paper should involve linguistic form or structure (for example, by analyzing the acquisition of a particular syntactic construction, by investigating variation of a phonological variable, or by doing a theoretical analysis in syntax or phonology). Both papers have a paper and presentation portion, but only one of the presentations must be public in department colloquium. The second paper can be presented to the readers only, but it is possible to present it publicly.

Only upon completion of the second comprehensive paper should the milestone card be sent to the Graduate Administrator, who will forward it to the office of the Dean of Graduate Students.

Comprehensive Paper Procedures
The following procedures are for each paper. The student should first discuss the general topics of the two comps papers with their main advisor, and identify likely committee readers for each paper. Readers are strongly encouraged to meet with the student and agree on the scope of the content of the paper, and an appropriate timeline, before the student begins work. It is suggested that students develop comprehensive papers from papers written for a course.

The student must obtain agreement from the faculty members to be readers and set a timeline. One reader must be designated as the primary reader and will have responsibility mentoring the student's research and writing. The readers must be minimally composed of at least two Pitt Department of Linguistics faculty members. The amount of consultation required by readers will vary and should be negotiated with the student and primary reader. The student will work primarily with the primary reader. They should agree on a target presentation date and (if relevant) must notify the committee in charge of scheduling colloquia the semester preceding the semester in which the paper will be presented.

Procedure for the public comps presentation: The student presents the paper in 30 minutes. This presentation is followed by a 15-minute question session in which faculty, students, and other audience members may pose questions to the student. All non-faculty, including the student, then withdraw for 10 minutes as all faculty present discuss the strengths and weaknesses of the presentation and paper, and decide on a grade. The student is then invited in and informed of the grade and, if there is time, to listen to faculty comments and requirements for revision.

Procedure for the non-public comps presentation: The student presents the paper in 30 minutes. This presentation is followed by a 15-minute question session in which readers may pose questions to the student. The student then withdraws for approximately 10 minutes as readers discuss the strengths and weaknesses of the presentation and paper, and decide on a grade. The student is then invited in and informed of the grade and, if there is time, to listen to faculty comments and requirements for revision.

Outcome: The faculty must decide on two grades: one for the presentation and one for the paper. The student can either pass or fail the presentation. For the paper, the student can pass with no revisions, pass with revisions, or fail. The following actions for all combinations are as follows:

- Pass presentation and paper with no revisions. Student gathers signatures from committee and submits.
- Pass presentation and paper with revisions: Student must perform the required revisions under the supervision of the primary reader within four months of the presentation.
- Pass presentation and fail the paper: Student must write a new paper and present it within six months, or as soon thereafter as practical.
- Fail presentation and pass paper with no revisions. Student must present again within one semester.
- Fail presentation and pass paper with revisions: Student must perform the required revisions under the supervision of the committee chair within four months of the presentation and present again within one semester.
- Fail presentation and fail the paper: At the discretion of the faculty, the student must write a new paper and present it within one semester.

If a student fails the paper more than once (total for both comprehensive papers), they will be terminated from the program.

Once the paper is approved, it should be signed on the cover page (available on Graduate Student courseweb site) by the readers and the signed copy given to the Graduate Administrator to place in the student's file. The Graduate Administrator will also record completion of the comprehensive paper.

Once both comprehensive papers have been filed, a "Report of Examination" card is filled out by the Graduate Administrator, approved by the student's principal academic advisor and the DGS and then the Graduate Administrator sends the Examination Card to the Dietrich School Graduate Dean's office. All Examination Cards must be sent to the Dean's office by the Graduate Administrator.

Dissertation proposal

When the student has successfully completed the PhD comprehensive examination, they must prepare a dissertation proposal and present it in a formal dissertation proposal defense. A four-person (minimum) doctoral committee will direct the dissertation and administer the required proposal defense after the proposal has been submitted. Students and advisors are strongly advised to consult the regulations pertaining to the dissertation committee at the Dietrich School level, as outlined in the Graduate Bulletin. The student chooses the chair of the doctoral committee, and together they select the remaining committee members, subject to the approval of the DGS or Department Chair. One of the committee members must be from outside the core faculty of the Department of Linguistics, while three members must be affiliated with the Linguistics Department. The committee may be composed of more than four members, but at least four must be on the graduate faculty of the University of Pittsburgh. The fourth member may be from outside the University, but must be approved by the Graduate Dean. Consult the Graduate Bulletin, the DGS, or the Graduate Administrator for details and procedures.
A dissertation proposal must have at least two main elements: a knowledge essay and a proposal. The dissertation advisor will determine exactly the format for these two elements. For example, the advisor may require the first few literature review chapters of the dissertation for the knowledge essay portion, and then require a student to provide a proposal based on those chapters. Alternately, the advisor may construct a series of questions about the topic that a student must satisfactorily answer (in written essay form) in addition to providing a proposal. Students should confirm in writing the exact expectations of their advisor for the proposal. In addition to these main elements, a proposal must have a proposed timeline for work with deadlines for specific milestones, including the submission of specific chapters.

The advisor and student must schedule a dissertation overview meeting at which all members can attend. It is suggested that this be scheduled at least six months in advance, and the date should avoid the last three weeks of the semester. Overview meetings are only held during the fall and spring terms. Dietrich School regulations dictate that all members of the committee must be physically present at the proposal meeting (in other words, no telephone or Skype participation). There are no dedicated department or Dietrich School funds available for travel of outside members to Pittsburgh for such meetings. As soon as a date is set, the student must inform the Graduate Administrator. The Graduate Administrator will prepare an "Admission to Candidacy" form and the Graduate Administrator will forward it to the advisor prior to the overview meeting. The advisor must obtain committee members' signatures on the form at the conclusion of the defense. If revisions are needed, the committee chair will withhold the form until all committee members are satisfied with the revisions, at which time the form is sent to the Graduate Administrator.

The overview meeting itself is not a defense, but rather a 'meeting of experts.' The student is the only expert in all of the knowledge needed for the dissertation, and the committee has specific expertise and experience to help the student carry out the proposal. There need not be a presentation at the event; the format is determined by the advisor. The overview's purpose is for the committee to work with the student to ensure that the dissertation, if completed as proposed, will be a significant contribution to knowledge in linguistics. In addition, they will determine whether the project is feasible in the timeline. The overview is useful for the student because they will know that if they perform the study as outlined in the proposal, they should successfully pass this requirement.

Note that the Dietrich School requires a delay of at least eight months between the admission to candidacy and the defense, so it is imperative not to delay the overview meeting. (Note that the date of admission to candidacy is not the same as the proposal defense date -- there will be a delay between the two).

Dissertation

After being admitted to candidacy, the student will conduct dissertation research and write a dissertation primarily in consultation with the main advisor, with secondary consultation with committee members when needed. If the dissertation requires more than one year, the committee must meet with the student yearly to discuss progress.

Students are highly encouraged to consult at least monthly with their advisor, and they should be proactive about setting up such meetings - do not wait for the advisor to ask how things are going! Do not write a whole dissertation and give it to an advisor as one lump; rather, send completed chapter drafts for comment. This will avoid headache later on and is the most efficient method. Students who write the entire dissertation and submit it often lose most of that work because it is unacceptable.

A dissertation defense should be scheduled at least six months in advance. The dissertation draft should be submitted to the committee at least one month before the defense, and the defense draft must be approved by the advisor. The date of the defense thus involves some educated guesswork on the part of the advisor and the student. As soon as the defense date is set, the student must notify the Graduate Administrator, who will help the student with other procedures surrounding the defense. (See also the Graduate Bulletin and Policies for regulations governing the dissertation committee and defense).

The dissertation defense is by regulation open to all members of the University community, and all graduate faculty members who attend have the right to pose questions to the candidate.

Required Core Courses for the MA/PhD

The following courses are required of all students in the MA/PhD program. Students entering with an MA degree from another institution may petition to have coursework taken for that MA degree apply to the PhD degree at Pitt. See also the Preliminary exam requirement.

Courses required to be taken in the first year

- LING 2578 - PHONETICS AND PHONEMICS (Fall)
- LING 2579 - PHONOLOGY (Spring)
Required courses that can be taken any time

One course in socio/language change

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Choose one advanced level core course approved by the student's advisor.

Some example courses fulfilling this requirement:

**Linguistics - Applied Hispanic Linguistics Concentration, MA/PhD**

The degree programs in linguistics combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

**Required Core Courses for the MA/PhD**

The following courses are required of all students in the MA/PhD program. Students entering with an MA degree from another institution may petition to have coursework taken for that MA degree apply to the PhD degree at Pitt. See also the Preliminary exam requirement.

Courses required to be taken in the first year

- LING 2578 - PHONETICS AND PHONEMICS (Fall)
- LING 2579 - PHONOLOGY (Spring)
- LING 2773 - MORPHOLOGY (Fall)
- LING 2777 - SYNTACTIC THEORY (Spring)
- LING 2144 - RES METHODS IN APPLIED LING (Fall)

Required courses that can be taken any time

One course in socio/language change

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Choose one advanced level core course approved by the student's advisor.

Some example courses fulfilling this requirement:
PhD Requirements

Courses

- LING 2394 - SPANISH DIALECTOLOGY

Other requirements

Entrance requirement: Advanced Proficiency in Spanish as measured by an OPI or equivalent.

In core courses, students are encouraged to work on topics in Hispanic linguistics and to use Spanish sources.

All papers must have a significant Hispanic element, and a significant number of sources in Spanish.

Students may wish to focus on Applied Spanish Linguistics or Spanish Sociolinguistics, but these are not official ARCOs. The following are suggested courses.

Applied Spanish Linguistics:

Education of Linguistic Minorities
Second Language Acquisition
Approaches and Methods of TESOL
Techniques and Procedures of TESOL

Spanish Sociolinguistics:

Education of Linguistic Minorities
Language Contact
Discourse Analysis
Variation Analysis

Other MA/PhD Requirements

Language requirements:

There are many ways that students come to learning languages; not all of them are covered here. If you have learned another language and have questions about this requirement, you are encouraged, admonished, and requested to ask the DGS about it. Do not rely on rumors from other students.

1. Reading proficiency in two languages other than English is required. Oral proficiency in one language other than English is also required (the language fulfilling the oral requirement may be the same as one of those fulfilling the reading requirement). This requirement is normally satisfied by examination, which is arranged on an ad hoc basis with the DGS. Language course credits may also be used with the approval of the DGS.

2. Students whose native language is not English and who complete their core courses with a grade of B+ or better will be considered to have completed the oral and reading requirements for one language. Such students will still need to demonstrate reading proficiency in another language.

3. If a student speaks two languages natively and one of these is English, the student need only demonstrate proficiency in one further language.

4. In addition to the basic second language requirement above, the department requires one term of study with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic. For a list of languages in these branches, see http://www.danshort.com/ie/iefamilyfull.htm. If a student studies such a language for one of the other language requirements, no extra language need be taken. For applied linguists, however, this requirement must be fulfilled by classroom study. This requirement cannot be fulfilled by Field Methods.

5. Example 1: A student may pass an exam reading Spanish, and then take two years of Vietnamese to allow her/him to pass a reading and oral proficiency exam. In this case all language requirements have been fulfilled.

6. Example 2: A native Spanish-speaking student passes all core courses with an A grade. She/he then takes one semester of Japanese. This student has fulfilled the language requirement.
**Preliminary exam**: The preliminary exam is fulfilled by submitting a portfolio of written coursework and passing the final exam of all core courses with a B+ grade or better. With respect to the thesis, the student is considered to have passed the preliminary exam if the thesis committee recommends the student for doctoral study.

Students entering with an MA degree may petition to have core courses waived. In order to waive phonetics, phonology, morphology or syntax, a student must demonstrate knowledge by providing course syllabi and passing an oral interview. In order to fulfill the preliminary exam requirement when entering with an MA, a student must have written a thesis for the previous MA; in addition, the student must defend the previous thesis in their first year at Pitt. Students are advised to have the MA thesis approved by the faculty and set up a defense committee and date as soon as possible after they begin PhD study. If a student's MA did not require a thesis, then the student must submit a portfolio of written work from their coursework in order to pass the preliminary exam (in addition to the core course requirement).

**Comprehensive exam**: Two comprehensive papers are required to fulfill the comprehensive exam requirement for the Linguistics PhD.

The topics of the two papers must be substantially different. Although the topics can be in the same specialty of linguistics, at least one paper should in some way involve linguistic form or structure (for example, by analyzing the acquisition of a particular syntactic construction, by investigating variation of a phonological variable, or by doing a theoretical analysis in syntax or phonology).

One of the comps papers must be presented publicly in a 30-minute lecture at a department colloquium, and the other may be presented to the committee only (however, if the student wishes, both papers may be presented publicly).

**Dissertation proposal**: When the student has successfully completed the PhD comprehensive examination, she or he must prepare a dissertation proposal and present it in a formal dissertation proposal defense. A four-person doctoral committee will direct the dissertation and administer the required proposal defense after the proposal has been submitted. The student chooses the chair of the doctoral committee, and together they select the remaining committee members, subject to the approval of the department chair. One of the committee members must be from outside the core faculty of the Department of Linguistics, while three members must be affiliated with the Linguistics Department. The committee may be composed of more than four members, but at least four must be on the graduate faculty of the University of Pittsburgh.

A dissertation proposal must have at least two elements: a knowledge essay and a proposal. The dissertation advisor will determine exactly the format for these two elements. For example, the advisor may require the first few literature review chapters of the dissertation for the knowledge essay portion, and then require a student to provide a proposal based on those chapters. Alternately, the advisor may construct a series of questions about the topic that a student must satisfactorily answer (in written essay form) in addition to providing a proposal. Upon approval of the proposal, the student will be admitted to candidacy for the PhD. Up to nine credits of dissertation study credits may count toward the total required number of credits.

The student should obtain an "Admission to Candidacy" form from the Graduate Secretary or DGS prior to the meeting in order to obtain at least committee signatures on the form at the conclusion of the defense. If revisions are needed, the committee chair will withhold the form until all committee members are satisfied with the revisions, at which time the form is sent to the Arts and Sciences Graduate Dean's Office.

**Dissertation**: The student must prepare and submit a dissertation that is a contribution to linguistic knowledge. A four-person doctoral committee will direct the dissertation and administer the required oral defense after the dissertation has been submitted for regulations governing the dissertation committee and defense). The dissertation defense is open to all members of the University community, and all graduate faculty members who attend have the right to pose questions to the candidate. See the bulletin regulations linked above for details.

**Sample progression through MA/PhD program (milestones)**

**Year 1**

Core courses

**Year 2**

Core courses and electives
Submit coursework portfolio
Year 3

Elective courses
Defend comprehensive 1
Present comprehensive paper in colloquium (can wait until year 4)

Year 4

Defend comprehensive 2
Present comprehensive paper in colloquium (if not done in year 3)
Dissertation proposal defense

Year 5

Dissertation research or fieldwork,
Possibly defend dissertation

Year 6

Defend and submit dissertation

Evaluation of Students

**Annual evaluation.** Students must submit an annual report to their main advisor each year by April 1. Advisors then complete an evaluation for each advisee, due to the DGS by the penultimate week of the spring semester for an evaluation meeting of faculty in the final week. Forms for both the annual review and the annual report are in the forms section of the department's graduate handbook, available from the DGS or graduate administrator.

**For progression from MA to PhD in MA/PhD program:** At the end of their first year, a written evaluation is presented to all faculty that assesses the student's work in courses and TA assignments. If unsatisfactory, students are put on notice that they will only be permitted to continue through the next year (i.e. 2nd year). The faculty may also elect to warn the student that unless their performance improves in the next semester, they will only be permitted to finish their MA. A final continuation evaluation will be based on the portfolio review.

For students entering with an MA, the first year is probationary. Students must complete the year with a GPA of 3.5, and their performance will be reviewed in the spring semester.

**For funding:** All currently-funded students, current students without funding, and newly admitted students are evaluated at the funding meeting each January. Students currently funded will also be evaluated at this time for their performance in TA duties.

Linguistics - General and Descriptive, MA/PhD

The degree programs in linguistics combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

**Required Core Courses for the MA/PhD**
The following courses are required of all students in the MA/PhD program. Students entering with an MA degree from another institution may petition to have coursework taken for that MA degree apply to the PhD degree at Pitt. See also the Preliminary exam requirement.

Courses required to be taken in the first year

- LING 2578 - PHONETICS AND PHONEMICS (Fall)
- LING 2579 - PHONOLOGY (Spring)
- LING 2773 - MORPHOLOGY (Fall)
- LING 2777 - SYNTACTIC THEORY (Spring)
- LING 2144 - RES METHODS IN APPLIED LING (Fall)

Required courses that can be taken any time

One course in socio/language change

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Choose one advanced level core course approved by the student's advisor.

Some example courses fulfilling this requirement:

PhD Requirements

Courses

- Field Methods
- One Advanced Core Course in Phonology, Morphology or Syntax (whichever was not taken in core)
- 3000-level Advanced seminar in Phonology, Morphology or Syntax
- Sociolinguistics, or Language Contact (whichever not taken in core)
- Linguistic Typology

Other MA/PhD Requirements

Language requirements:

There are many ways that students come to learning languages; not all of them are covered here. If you have learned another language and have questions about this requirement, you are encouraged, admonished, and requested to ask the DGS about it. Do not rely on rumors from other students.

1. Reading proficiency in two languages other than English is required. Oral proficiency in one language other than English is also required (the language fulfilling the oral requirement may be the same as one of those fulfilling the reading requirement). This requirement is normally satisfied by examination, which is arranged on an ad hoc basis with the DGS. Language course credits may also be used with the approval of the DGS.

2. Students whose native language is not English and who complete their core courses with a grade of B+ or better will be considered to have completed the oral and reading requirements for one language. Such students will still need to demonstrate reading proficiency in another language.

3. If a student speaks two languages natively and one of these is English, the student need only demonstrate proficiency in one further language.

4. In addition to the basic second language requirement above, the department requires one term of study with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic. For a list of languages in these branches, see http://www.danshort.com/ie/iefamilyfull.htm. If a student studies such a language for one of the other language requirements, no extra language need
be taken. For applied linguists, however, this requirement must be fulfilled by classroom study. This requirement cannot be fulfilled by Field Methods.

5. Example 1: A student may pass an exam reading Spanish, and then take two years of Vietnamese to allow her/him to pass a reading and oral proficiency exam. In this case all language requirements have been fulfilled.

6. Example 2: A native Spanish-speaking student passes all core courses with an A grade. She/he then takes one semester of Japanese. This student has fulfilled the language requirement.

**Preliminary exam**: The preliminary exam is fulfilled by submitting a portfolio of written coursework and passing the final exam of all core courses with a B+ grade or better. With respect to the thesis, the student is considered to have passed the preliminary exam if the thesis committee recommends the student for doctoral study.

Students entering with an MA degree may petition to have core courses waived. In order to waive phonetics, phonology, morphology or syntax, a student must demonstrate knowledge by providing course syllabi and passing an oral interview. In order to fulfill the preliminary exam requirement when entering with an MA, a student must have written a thesis for the previous MA; in addition, the student must defend the previous thesis in their first year at Pitt. Students are advised to have the MA thesis approved by the faculty—and set up a defense committee and date—as soon as possible after they begin PhD study. If a student's MA did not require a thesis, then the student must submit a portfolio of written work from their coursework in order to pass the preliminary exam (in addition to the core course requirement).

**Comprehensive exam**: Two comprehensive papers are required to fulfill the comprehensive exam requirement for the Linguistics PhD.

The topics of the two papers must be substantially different. Although the topics can be in the same specialty of linguistics, at least one paper should in some way involve linguistic form or structure (for example, by analyzing the acquisition of a particular syntactic construction, by investigating variation of a phonological variable, or by doing a theoretical analysis in syntax or phonology).

One of the comps papers must be presented publicly in a 30-minute lecture at a department colloquium, and the other may be presented to the committee only (however, if the student wishes, both papers may be presented publicly).

**Dissertation proposal**: When the student has successfully completed the PhD comprehensive examination, she or he must prepare a dissertation proposal and present it in a formal dissertation proposal defense. A four-person doctoral committee will direct the dissertation and administer the required proposal defense after the proposal has been submitted. The student chooses the chair of the doctoral committee, and together they select the remaining committee members, subject to the approval of the department chair. One of the committee members must be from outside the core faculty of the Department of Linguistics, while three members must be affiliated with the Linguistics Department. The committee may be composed of more than four members, but at least four must be on the graduate faculty of the University of Pittsburgh.

A dissertation proposal must have at least two elements: a knowledge essay and a proposal. The dissertation advisor will determine exactly the format for these two elements. For example, the advisor may require the first few literature review chapters of the dissertation for the knowledge essay portion, and then require a student to provide a proposal based on those chapters. Alternately, the advisor may construct a series of questions about the topic that a student must satisfactorily answer (in written essay form) in addition to providing a proposal. Upon approval of the proposal, the student will be admitted to candidacy for the PhD. Up to nine credits of dissertation study credits may count toward the total required number of credits.

The student should obtain an "Admission to Candidacy" form from the Graduate Secretary or DGS prior to the meeting in order to obtain at least committee signatures on the form at the conclusion of the defense. If revisions are needed, the committee chair will withhold the form until all committee members are satisfied with the revisions, at which time the form is sent to the Arts and Sciences Graduate Dean's Office.

**Dissertation**: The student must prepare and submit a dissertation that is a contribution to linguistic knowledge. A four-person doctoral committee will direct the dissertation and administer the required oral defense after the dissertation has been submitted for regulations governing the dissertation committee and defense). The dissertation defense is open to all members of the University community, and all graduate faculty members who attend have the right to pose questions to the candidate. See the bulletin regulations linked above for details.

**Sample progression through MA/PhD program (milestones)**

Evaluation of Students

**Annual evaluation.** Students must submit an annual report to their main advisor each year by April 1. Advisors then complete an evaluation for each advisee, due to the DGS by the penultimate week of the spring semester for an evaluation meeting of faculty in the final week. Forms for both the annual review and the annual report are in the forms section of the department's graduate handbook, available from the DGS or graduate administrator.

**For progression from MA to PhD in MA/PhD program:** At the end of their first year, a written evaluation is presented to all faculty that assesses the student's work in courses and TA assignments. If unsatisfactory, students are put on notice that they will only be permitted to continue through the next year (i.e. 2nd year). The faculty may also elect to warn the student that unless their performance improves in the next semester, they will only be permitted to finish their MA. A final continuation evaluation will be based on the portfolio review

For students entering with an MA, the first year is probationary. Students must complete the year with a GPA of 3.5, and their performance will be reviewed in the spring semester.

**For funding:** All currently-funded students, current students without funding, and newly admitted students are evaluated at the funding meeting each January. Students currently funded will also be evaluated at this time for their performance in TA duties.

**Linguistics - Sociolinguistics Concentration, MA/PhD**

The degree programs in linguistics combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may
choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

**Required Core Courses for the MA/PhD**

The following courses are required of all students in the MA/PhD program. Students entering with an MA degree from another institution may petition to have coursework taken for that MA degree apply to the PhD degree at Pitt. See also the Preliminary exam requirement.

**Courses required to be taken in the first year**

- LING 2578 - PHONETICS AND PHONEMICS (Fall)
- LING 2579 - PHONOLOGY (Spring)
- LING 2773 - MORPHOLOGY (Fall)
- LING 2777 - SYNTACTIC THEORY (Spring)
- LING 2144 - RES METHODS IN APPLIED LING (Fall)

**Required courses that can be taken any time**

**One course in socio/language change**

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Choose one advanced level core course approved by the student's advisor.

Some example courses fulfilling this requirement:

**PhD Requirements**

- Sociolinguistics (if not already taken)
- Field Methods
- SOCI 2102 - SOCIOLGCL THRY POST CLASSICAL
- An appropriate statistics course

Two of:

- Discourse Analysis
- Language Contact
- Sociology of Language
- Variation Analysis

**Other MA/PhD Requirements**

**Language requirements:**
There are many ways that students come to learning languages; not all of them are covered here. If you have learned another language and have questions about this requirement, you are encouraged, admonished, and requested to ask the DGS about it. Do not rely on rumors from other students.

1. Reading proficiency in two languages other than English is required. Oral proficiency in one language other than English is also required (the language fulfilling the oral requirement may be the same as one of those fulfilling the reading requirement). This requirement is normally satisfied by examination, which is arranged on an ad hoc basis with the DGS. Language course credits may also be used with the approval of the DGS.

2. Students whose native language is not English and who complete their core courses with a grade of B+ or better will be considered to have completed the oral and reading requirements for one language. Such students will still need to demonstrate reading proficiency in another language.

3. If a student speaks two languages natively and one of these is English, the student need only demonstrate proficiency in one further language.

4. In addition to the basic second language requirement above, the department requires one term of study with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic. For a list of languages in these branches, see http://www.danshort.com/ie/iefamilyfull.htm. If a student studies such a language for one of the other language requirements, no extra language need be taken. For applied linguists, however, this requirement must be fulfilled by classroom study. This requirement cannot be fulfilled by Field Methods.

5. Example 1: A student may pass an exam reading Spanish, and then take two years of Vietnamese to allow her/him to pass a reading and oral proficiency exam. In this case all language requirements have been fulfilled.

6. Example 2: A native Spanish-speaking student passes all core courses with an A grade. She/he then takes one semester of Japanese. This student has fulfilled the language requirement.

**Preliminary exam:** The preliminary exam is fulfilled by submitting a portfolio of written coursework and passing the final exam of all core courses with a B+ grade or better. With respect to the thesis, the student is considered to have passed the preliminary exam if the thesis committee recommends the student for doctoral study.

Students entering with an MA degree may petition to have core courses waived. In order to waive phonetics, phonology, morphology or syntax, a student must demonstrate knowledge by providing course syllabi and passing an oral interview. In order to fulfill the preliminary exam requirement when entering with an MA, a student must have written a thesis for the previous MA; in addition, the student must defend the previous thesis in their first year at Pitt. Students are advised to have the MA thesis approved by the faculty-and set up a defense committee and date-as soon as possible after they begin PhD study. If a student's MA did not require a thesis, then the student must submit a portfolio of written work from their coursework in order to pass the preliminary exam (in addition to the core course requirement).

**Comprehensive exam:** Two comprehensive papers are required to fulfill the comprehensive exam requirement for the Linguistics PhD.

The topics of the two papers must be substantially different. Although the topics can be in the same specialty of linguistics, at least one paper should in some way involve linguistic form or structure (for example, by analyzing the acquisition of a particular syntactic construction, by investigating variation of a phonological variable, or by doing a theoretical analysis in syntax or phonology).

One of the comps papers must be presented publicly in a 30-minute lecture at a department colloquium, and the other may be presented to the committee only (however, if the student wishes, both papers may be presented publicly).

**Dissertation proposal:** When the student has successfully completed the PhD comprehensive examination, she or he must prepare a dissertation proposal and present it in a formal dissertation proposal defense. A four-person doctoral committee will direct the dissertation and administer the required proposal defense after the proposal has been submitted. The student chooses the chair of the doctoral committee, and together they select the remaining committee members, subject to the approval of the department chair. One of the committee members must be from outside the core faculty of the Department of Linguistics, while three members must be affiliated with the Linguistics Department. The committee may be composed of more than four members, but at least four must be on the graduate faculty of the University of Pittsburgh.

A dissertation proposal must have at least two elements: a knowledge essay and a proposal. The dissertation advisor will determine exactly the format for these two elements. For example, the advisor may require the first few literature review chapters of the dissertation for the knowledge essay portion, and then require a student to provide a proposal based on those chapters. Alternately, the advisor may construct a series of questions about the topic that a student must satisfactorily answer (in written essay form) in addition to providing a proposal. Upon approval of the proposal, the student will be admitted to candidacy for the PhD. Up to nine credits of dissertation study credits may count toward the total required number of credits.

The student should obtain an "Admission to Candidacy" form from the Graduate Secretary or DGS prior to the meeting in order to obtain at least committee signatures on the form at the conclusion of the defense. If revisions are needed, the committee chair will withhold the form until all committee members are satisfied with the revisions, at which time the form is sent to the Arts and Sciences Graduate Dean's Office.
**Dissertation**: The student must prepare and submit a dissertation that is a contribution to linguistic knowledge. A four-person doctoral committee will direct the dissertation and administer the required oral defense after the dissertation has been submitted for regulations governing the dissertation committee and defense. The dissertation defense is open to all members of the University community, and all graduate faculty members who attend have the right to pose questions to the candidate. See the bulletin regulations linked above for details.

**Sample progression through MA/PhD program (milestones)**

**Year 1**
Core courses

**Year 2**
Core courses and electives
Submit coursework portfolio

**Year 3**
Elective courses
Defend comprehensive 1
Present comprehensive paper in colloquium (can wait until year 4)

**Year 4**
Defend comprehensive 2
Present comprehensive paper in colloquium (if not done in year 3)
Dissertation proposal defense

**Year 5**
Dissertation research or fieldwork,
Possibly defend dissertation

**Year 6**
Defend and submit dissertation

**Evaluation of Students**

**Annual evaluation.** Students must submit an annual report to their main advisor each year by April 1. Advisors then complete an evaluation for each advisee, due to the DGS by the penultimate week of the spring semester for an evaluation meeting of faculty in the final week. Forms for both the annual review and the annual report are in the forms section of the department's graduate handbook, available from the DGS or graduate administrator.

**For progression from MA to PhD in MA/PhD program:** At the end of their first year, a written evaluation is presented to all faculty that assesses the student's work in courses and TA assignments. If unsatisfactory, students are put on notice that they will only be permitted to continue through
the next year (i.e. 2nd year). The faculty may also elect to warn the student that unless their performance improves in the next semester, they will only be permitted to finish their MA. A final continuation evaluation will be based on the portfolio review.

For students entering with an MA, the first year is probationary. Students must complete the year with a GPA of 3.5, and their performance will be reviewed in the spring semester.

**For funding:** All currently-funded students, current students without funding, and newly admitted students are evaluated at the funding meeting each January. Students currently funded will also be evaluated at this time for their performance in TA duties.

**Linguistics - Applied Linguistics Concentration, MA**

**Requirements for a terminal MA in Applied Linguistics**

The Department offers a terminal MA degree in Applied Linguistics, with or without the TESOL Certification (see below for TESOL Certificate requirements). 30 credits are required for the MA Degree.

**Required Courses**

- LING 2578 Phonetics
- LING 2579 Phonology
- LING 2777 Syntax
- LING 2144 Research Methods

One course in sociolinguistics/language change. Choose one from:

- LING 2267 Sociolinguistics
- LING 2680 Historical Linguistics
- LING 2253 Language Contact
- LING 2146 Second Language Acquisition

A language pedagogy course

Choose one from:

- A course in psycholinguistics
- A course in First Language Development
- LING 2147 Current Issues in Second Language Acquisition

**Other MA Requirements**

**Course Grades**

Students must attain a B+ in all core courses. If the grade is lower than a B+, in consultation with the DGS and the course instructor, a student must take the final exam the following year and attain a grade of B+ on the exam, or retake the course.

**Language requirement**

Proficiency in one foreign language is required for the MA degree.

Native-English speakers: three terms of a language taught at the college level.
Non-native speakers of English: Completion of the MA coursework with a grade point average of B (3.0) or better.

Comprehensive exam

The comprehensive exam is fulfilled by attaining a grade of B+ or better in all core courses.

Students who do not attain a B+ in a particular course may retake the course or perform remedial work with the approval of the DGS and their advisor. Students must notify the DGS and their advisor immediately upon receiving a deficient grade (ideally, they should notify even earlier if they are performing poorly in a particular course, as advisors may be able to help set up tutoring). Students falling short in multiple core courses may be terminated from the program.

Requirements

Required Courses for all linguistics MA degrees

- LING 2578 - PHONETICS AND PHONEMICS
- LING 2579 - PHONOLOGY
- LING 2777 - SYNTACTIC THEORY
- LING 2144 - RES METHODS IN APPLIED LING

Choose from:

One course in sociolinguistics/language change.

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Requirements for Applied Linguistics

- LING 2146 - SECOND LANGUAGE ACQUISITION
- Language pedagogy course

Choose one:

- LING 2147 - CUR ISSUES IN SECOND LANG LRNG
- LING 2149 - ADV SECOND LANGUAGE ACQUISITION

Other MA Requirements

Comprehensive exam: Students must attain a B+ in all core courses. If the grade is lower than a B+, a student must re-take the final exam the following year-or take an exam through other arrangements-and attain a grade of B+ on the exam, or retake the course.

Language requirement: Proficiency in one second language is required for the MA degree. This requirement is satisfied by examination for students whose native language is English. Students whose native language is not English and who complete their MA work with a grade point average of B (3.0) or better will have fulfilled this requirement automatically.

Portfolio Review: See the department's graduate student handbook.

Linguistics, MA
The degree programs in linguistics combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

Requirements

Required Courses for all linguistics MA degrees

- LING 2578 - PHONETICS AND PHONEMICS
- LING 2579 - PHONOLOGY
- LING 2777 - SYNTACTIC THEORY
- LING 2144 - RES METHODS IN APPLIED LING

Choose from:

One course in sociolinguistics/language change.

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Other MA Requirements

Comprehensive exam: Students must attain a B+ in all core courses. If the grade is lower than a B+, a student must re-take the final exam the following year or take an exam through other arrangements and attain a grade of B+ on the exam, or retake the course.

Language requirement: Proficiency in one second language is required for the MA degree. This requirement is satisfied by examination for students whose native language is English. Students whose native language is not English and who complete their MA work with a grade point average of B (3.0) or better will have fulfilled this requirement automatically.

Portfolio Review: See the department's graduate student handbook.

Required Core Courses for the MA/PhD

The following courses are required of all students in the MA/PhD program. Students entering with an MA degree from another institution may petition to have coursework taken for that MA degree apply to the PhD degree at Pitt. See also the Preliminary exam requirement.

Courses required to be taken in the first year

- LING 2578 - PHONETICS AND PHONEMICS (Fall)
- LING 2579 - PHONOLOGY (Spring)
- LING 2773 - MORPHOLOGY (Fall)
- LING 2777 - SYNTACTIC THEORY (Spring)
- LING 2144 - RES METHODS IN APPLIED LING (Fall)

Required courses that can be taken any time
One course in socio/language change

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Choose one advanced level core course approved by the student's advisor.

Some example courses fulfilling this requirement:

Department of Mathematics

The Department of Mathematics offers programs leading to a Master of Arts in mathematics, Master of Science in mathematics, Master of Arts in applied mathematics, Master of Science in applied mathematics, Dual MS degree in mathematics and computer science. The department also offers a Doctor of Philosophy in mathematics.

Contact Information

Department Chair: Jonathan Rubin
Main Office: 301 Thackeray Hall
412-624-1175
Fax: 412-624-8397
E-mail: hmm79@pitt.edu
www.mathematics.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Mathematics, Graduate Administrator, 301 Thackeray Hall, Pittsburgh, PA 15260. Phone: 412-624-1175. Fax: 412-624-8397. E-mail: hmm79@pitt.edu

Admissions

Official TOEFL scores from the Educational Testing Service are required if you are an international student whose native language is not English. International applicants whose first language is not English must attain either a minimum TOEFL (administered by the Educational Testing Service) score of 577 (paper-based test), 90 (internet-based test), or an IELTS (administered by the University of Cambridge, Local Examinations Syndicate) score of 7.0. All applicants are required to submit official GRE scores and are highly encouraged to submit GRE Mathematics subject test scores.

Financial Assistance

If there are adequate funds, graduate students receiving a fellowship or teaching assistantship/teaching fellowship who have demonstrated high-quality graduate work can expect to have financial aid renewed for up to two years. Renewal beyond the second year occurs only if they have successfully passed the PhD preliminary examination by April of the second year. Renewal beyond the third year similarly depends upon passing the PhD comprehensive exam. Beyond that, additional financial aid from the department will be contingent upon a yearly review assessing progress toward completing the dissertation and, under normal conditions, can continue for five years. A graduate student who has not passed these examinations, as described above, is not eligible for additional financial assistance until these examinations are passed.

Faculty

Dietrich School of Arts and Sciences Faculty
Mathematics, PhD

Requirements for the PhD

A student must maintain a B average over 72 credit hours of course work and pass departmental preliminary and comprehensive examinations. The main requirement for the Doctor of Philosophy (PhD) degree in mathematics is the successful completion and defense of a dissertation embodying a substantial piece of original mathematical research. The main stages are listed below.

PhD Preliminary Examination: Students must pass a written preliminary examination on advanced linear algebra and multivariable calculus. The preliminary examination should be attempted as early as possible and must be passed by April of their second year for support to be extended for a third year.

Comprehensive Examination: Students must pass a PhD comprehensive examination demonstrating their competence in their chosen area of mathematics after approximately one year of course work beyond the preliminary examination or within three years of study.

Dissertation Overview: Following successful completion of the comprehensive examination, students file an application for admission to candidacy for the Doctor of Philosophy. At this stage, students present a proposed topic for doctoral research and a research work plan for its execution to be reviewed by their dissertation committee.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Most candidates will require from three to five years of full-time study to complete the degree. Part-time students may be allowed as many as 10 years to finish all requirements.

Additional information and details concerning examinations, requirements, and the advising system can be found in the departmental handbook.

Mathematics and Computer Science, MA/MS

Requirements for the Dual Degree

The dual degree program requires the completion of a minimum of 45 credits of course work through either a thesis or non-thesis option. The total set of courses taken must include, as a subset, the course requirements for MA degree in mathematics and a MS degree in computer science.

Mathematics/Civil Engineering, MS/MSCE

Joint Master's Degree

A student is able to earn the Master of Science Civil Engineering degree and the Master of Science degree in mathematics at the same time. In general, 42 credits are required, and students must complete the fundamental courses in both areas.

Mathematics, MA

Degree Requirements

http://www.mathematics.pitt.edu/graduate/graduate-handbook

Requirements for the MA
The MA in mathematics requires completion of at least ten mathematics courses (30 credits) and an oral comprehensive examination. Six of the ten courses must be taken at the 2000-3000 level; the remaining ones may be those given by the department at the 1000 level or those cross-listed with other departments. Achievement of an overall course average of B or better is required for all courses.

The master's programs in applied mathematics contain several tracks, each having a selection of required and elective courses. The MA program requires 30 credits (minimum of 7 departmental, with 5 (of the 7) at the 2000 level or above) and an oral comprehensive examination. An MS option is available that requires a total of 30 credits and a thesis (24 course credits + 6 credits-thesis).

Requirements for the MS

The MS in mathematics requires completion of at least eight mathematics courses (24 credits) and the completion and defense of a thesis in mathematics (6 credits). Six of the eight courses must be taken at the 2000-3000 level; the remaining ones may be those given by the department at the 1000 level or those cross-listed with other departments. Achievement of an overall course average of B or better is required for all courses.

The master's programs in applied mathematics contain several tracks, each having a selection of required and elective courses. The MA program requires 30 credits (minimum of 7 departmental, with 5 (of the 7) at the 2000 level or above) and an oral comprehensive examination. An MS option is available that requires a total of 30 credits and a thesis (24 course credits + 6 credits-thesis).

Mathematics, MS

Degree Requirements

Requirements for the MA

Requirements for the MS
Medieval and Renaissance Studies Program

Students doing graduate work in the Medieval and Renaissance periods require a particularly broad interdisciplinary background. To meet this need, the faculty involved in MRST at the University of Pittsburgh have instituted a certificate program that is designed to enrich the student's work in the major department while allowing the student to undertake inventive interdisciplinary projects.

Each year the MRST Program organizes a series of lectures featuring visiting national and international scholars and distinguished speakers from the Pittsburgh area. We collaborate with PCMRS, the Pittsburgh Consortium for Medieval and Renaissance Studies (www.pcmrs.org), in regularly bringing together faculty and graduate students from Pitt, Carnegie Mellon, Duquesne, and many other area universities.

Contact Information

Director: Christopher Nygren
Graduate Administrator: Briar Somerville
Main Office: 454 Cathedral of Learning
Phone: 412-624-6564
E-mail: kbs47@pitt.edu
http://www.medren.pitt.edu/

Admissions

Students who are already enrolled in a graduate degree program at Pitt can apply for the Certificate in Medieval and Renaissance Studies at any time during their graduate studies, but are encouraged to apply as early in their program of study as possible. Contact Graduate Administrator Briar Somerville at kbs47@pitt.edu for a certificate application form.

Requirements for the Certificate

For students wishing to complete the MRST certificate at the graduate level, the most important requirement is a research paper focused on medieval and/or Renaissance Studies. As specified by the University, a MA certificate also requires at least 15 credits (5 courses) and a PhD certificate requires 18 credits (6 courses). Many of these credits may be drawn from coursework already required for the student's degree in the home department (for instance, the requirements for English, HAA, or French and Italian). Working with the Director of MRST, the student will create an individually tailored course of study that gives consideration both to the requirements of home departments and to the importance of interdisciplinary study.

Faculty

Dietrich School of Arts and Sciences Faculty

Medieval and Renaissance Studies Doctoral Certificate

This is a certificate program for MA or PhD students in one of the disciplines who desire to pursue additional interdisciplinary work in Medieval or Renaissance studies.

PhD Certificate Requirements

1. A PhD thesis of an interdisciplinary nature focused on medieval and/or Renaissance studies.
2. At least four graduate courses focused on medieval and/or Renaissance studies. We strongly encourage students to take courses outside of their home departments. In some cases-involving, for instance, infrequent course offerings or research abroad-students may petition the Director to reduce the number of courses required.

3. A reading knowledge of one language other than English. We also strongly recommend (but do not require) that PhD certificate candidates acquire a reading knowledge of Latin.

4. A one-page cover letter attached to the thesis. The letter should be addressed to the Program Director and should use direct language and specific examples. In this letter, we would like you to reflect on what you have learned from earning a certificate from the Program in Medieval and Renaissance Studies.

**Medieval and Renaissance Studies Master's Certificate**

This is a certificate program for MA or PhD students in one of the disciplines who desire to pursue additional interdisciplinary work in Medieval or Renaissance studies.

**MA Certificate Requirements**

1. A major interdisciplinary research paper in medieval and/or Renaissance studies. This may be either an MA thesis or a substantial term paper (20 - 30 pages).

2. At least two graduate courses focused on medieval and/or Renaissance studies. We strongly encourage students to take courses outside of their home departments. In some cases-involving, for instance, infrequent course offerings or research abroad-students may petition the Director to reduce the number of courses required.

3. We strongly recommend (but do not require) that MA certificate candidates acquire a reading knowledge of at least one language other than English.

4. A one-page cover letter attached to the research paper. The letter should be addressed to the Program Director and should use direct language and specific examples. In this letter, we would like you to reflect on what you have learned from earning a certificate from the Program in Medieval and Renaissance Studies.

**Molecular Biophysics and Structural Biology Program**

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer the key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

Program Director: James Conway (UPSOM) and Gordon Rule (CMU)
Admission Requirements and Procedures

Students with at least a baccalaureate degree in physics, chemistry, and mathematics or cellular and molecular biology are encouraged to apply. Admissions are based upon the student's academic record, GRE scores, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 250 (computer) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Additional information and a link to the online application can be found at http://www.mbsb.pitt.edu/index.php/apply-for-the-mbsb-program

Financial Assistance

All students receive complete financial support in the form of stipend, tuition, and health insurance.

Training Faculty

Dietrich School of Arts and Sciences Faculty

Course list

The curriculum stresses an interdisciplinary approach to learning and research in modern Molecular Biophysics and Structural Biology. Upon entering the program, each student is advised by a mentoring committee, explores research options through laboratory rotations, and then chooses a thesis advisor in the first year.

A list of available courses can be found at the following website: http://www.mbsb.pitt.edu/index.php/training/curriculum

Molecular Biophysics and Structural Biology, PhD

Degree Requirements

All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first year. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

Courses

- MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS or
- MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring & summer term of the first year.
- INTBP 2000 - FOUNDTNS OF BIOMEDICAL SCIENCE - taken during the fall term of the first year
Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at

http://www.mbsb.pitt.edu/index.php/training/curriculum

- MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS OR
- MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring, and summer semester of the first year.

- BIOSC 2810 - MACROMOLECULAR STRUCTURE AND FUNCTION - taken during the first fall semester of the first year.

- MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE OR
- MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE - taken during the first fall semester of the first year.

- MSMBPH 2002 - MOLECULAR BIOPHYSICS 2: THEORY AND SIMULATION OR
- MOLBPH 2002 - MOLECULAR BIOPHYSICS 2: THEORY AND SIMULATION - taken during the first spring semester of the first year.

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the first summer semester of the first year.

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1 - taken during the first summer semester of the first year.

- MSMBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOLOGY SEMINAR OR
- MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR - taken every fall and spring semester through graduation.
Advanced Elective Courses-6 credits total-with the permission of his/her advisor, students are permitted to choose from a number of courses offered at Pitt as well as CMU.

Additional Information

Terminal Masters Degree
The program does not admit students whose goal is to attain a Master's of Science degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Department of Music

The Department of Music offers the degrees of Master of Arts and Doctor of Philosophy in music.

The graduate program in music consists of four areas of concentration:

- Musicology
- Ethnomusicology
- Composition and Theory
- Jazz Studies

Students may combine work for the MA and PhD degrees with a program of theoretical, historical, or area studies specialization leading to a certificate in Cultural Studies, Medieval and Renaissance Studies, Global Studies, Asian Studies, Latin American Studies, European Union Studies, West European Studies, Russian and East European Studies, Film Studies or Gender, Sexuality, and Women's Studies.

Admissions inquiries concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Music, Director of Graduate Admissions, Dr. Amy Williams, 110 Music Building, Pittsburgh, PA 15260. Phone: 412-624-4120. Fax: 412-624-4186. E-mail: amYWILL@pitt.edu

Admissions

The deadline for receipt of all elements of the application is January 5.

Prospective students should apply online by filling out the online application form (app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=up-as), paying the application fee and attaching pdf files of the statement of purpose, transcripts, resume/CV and work samples. Applicants must include letters of recommendation with the online application. Please send all additional application materials (music scores, CDs, test scores) to:
The elements of the application are:

1. **Application form** and $50 application fee.

2. **Statement of purpose**, an essay of about two pages that describes the applicant's academic background and professional goals.

3. **Undergraduate and graduate transcripts** from all higher education institutions attended. These should be scanned and included with online application. Students will be required to forward official transcripts/translations at the time of matriculation (upon enrollment) to the Graduate School to clear transcript contingencies.

4. **CV or Resumé**.

5. **Three letters of recommendation**, preferably by persons who have taught the applicant in subjects related to the four research subdisciplines, rather than in performance lessons.

6. **Official scores of the general test of the Graduate Record Examination (GRE)**. Please note that international applicants from a country whose official language is not English are exempt from taking the GRE. All others are required to take the test (including international students who hold or will hold a degree from an English-language institution). Applicants are encouraged to take the test by November 1, if possible, so that scores can reach the department by January 5. For information, go to www.gre.org (http://www.gre.org). The University of Pittsburgh GRE code is 2927.

7. **Samples of work**. Applicants in historical musicology and ethnomusicology should submit two papers on an analytical, historical, or theoretical topic. Applicants in composition and theory should submit three scores and a CD of recent compositions, together with one paper on an analytical or theoretical topic. Applicants in jazz studies should submit a recording that demonstrates their ability to improvise on an original jazz composition and a jazz standard. They should also send a full score of an original work for a large jazz ensemble/orchestra and a full score of an original or standard composition for a small jazz ensemble (up to 9 players). Finally, they should submit a research paper on a style or period in the history of jazz. **Please note**: papers can be submitted online. However, in order to submit two papers, both must be merged into a single pdf document first and then submitted.

8. **TOEFL or IELTS Exam scores**. International applicants whose country's official language is not English must submit certified scores of one of these exams. A minimum TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading and writing) is required. The required minimum IELTS score is 7.0 (with at least 6.5 in each of its four sections).

For information on music department admissions, contact the department's Director of Graduate Admissions, Professor Mathew Rosenblum (rosenblu@pitt.edu). More general information can be found on the University Graduate Admissions (http://www.asgraduate.pitt.edu/applicationadmission) and the Graduate Studies (http://www.asgraduate.pitt.edu) home pages.

International students are urged to consult the website of the Office of International Services (http://www.ois.pitt.edu).

**Financial Assistance**

A graduate student receiving a fellowship or teaching assistantship/teaching fellowship from the University of Pittsburgh who maintains satisfactory progress toward the degree can expect to receive up to four years of financial aid; continuing students must request renewal of financial assistance for the following year no later than February 15. Students who have successfully passed the PhD comprehensive examinations in their fourth year may receive additional financial assistance if there are adequate funds. The department nominates the most outstanding candidates for University- and school-wide fellowships. Students seeking financial assistance must request consideration for aid at the time of application for admission; admission by itself carries no commitment of financial assistance.

**Faculty**

Dietrich School of Arts and Sciences Faculty

**Music - Composition and Theory Concentration, PhD**
Requirements for the PhD:

_Credit Requirement:_ A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

**Language Requirement:** For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

**First Year Evaluation:** At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

**Preliminary Evaluation:** The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

**Comprehensive Examination:** Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st -century musical language, and orchestration.

**Dissertation Overview:** Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

**Dissertation:** Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

**Dissertation Defense:** The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

### Music - Ethnomusicology Concentration, PhD

Requirements for the PhD:

_Credit Requirement:_ A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

**Language Requirement:** For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.
First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music - Jazz Studies Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

**Dissertation Defense:** The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

**Music - Composition and Theory Concentration, MA**

**Requirements for the MA:**

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the
department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

**Music - Ethnomusicology Concentration, MA**

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

**Music - Jazz Studies Concentration, MA**

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

**Music - Musicology Concentration, MA**

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

**Department of Neuroscience**

The Center for Neuroscience (CNUP) Training program is an interschool PhD degree-granting program offered cooperatively by the School of Arts and Sciences (Neuroscience, NROSCI) and the School of Medicine (Neurobiology, MSNBIO). The program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Brain Institute, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Conte Center for Translational Mental Health Research, Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Training is also available for a master's degree through the Department of Neuroscience in the Dietrich School of Arts and Sciences. It is important to note that this is a departmental program rather than a component of CNUP. Thus, training is only available with faculty with primary or secondary appointments in the Department of Neuroscience. Applicants must also arrange for a faculty sponsor before their application will be considered. A more detailed explanation of the program requirements is available on the Department of Neuroscience Web site at http://neuroscience.pitt.edu/programs/masters-program.

**Contact Information**

Center for Neuroscience  
A206 Langley Hall  
Fifth and Ruskin Avenues  
Pittsburgh, PA 15260  
412-383-7582  
Fax: 412-624-9198  
E-mail: lms232@pitt.edu  
http://cnup.pitt.edu  
Email: lms232@pitt.edu

**Admission Requirements and Procedures**

Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those that are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, test scores, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics, neuroscience, or psychology with a cumulative grade point average of at least 3.40 (on a 4.00 scale) and a cumulative Graduate Record Exam (GRE) score greater than 160 verbal, 155 quantitative and a 4.5 in analytical writing.

Additional information and a link to our on-line application can be found at: http://www.cnup.pitt.edu/training/phd-program.

**Financial Assistance**

All students receive full stipend support and individual health benefits. This support is derived from University fellowships and numerous grants funded by the federal government and private agencies. Students in the program also have access to sponsorship on NIH training grants.
Training Faculty

Dietrich School of Arts and Sciences Faculty

Neuroscience, PhD

Degree Requirements

http://www.cnup.pitt.edu/training/phd-program/phd-program-requirements

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

Core Courses

The following core courses are required.

- MSNBIO 2010 - SCIENTIFIC ETHICS OR
- NROSCI 2010 - SCIENTIFIC ETHICS
- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 OR
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 OR
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY OR
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
- MSNBIO 2624 - GRANT WRITING

Additional Information

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

A list of CNUP Training Faculty may be viewed at: Dietrich School of Arts and Sciences Faculty

A complete list of courses may be viewed at: http://www.cnup.pitt.edu/graduate-course-list

Neuroscience, MS

The following sections outline the academic courses, the research experiences, and the oral and written examinations (herein referred to as "milestones") that the student must successfully complete prior to being awarded the master's degree. These requirements are described in terms of the academic and research accomplishments expected during each year of the student's progress through the program. Deviations from the outlined sequence and time schedule need to be approved by the Chair of the Graduate Advising Committee.

MS Degree Requirements
Credits: A minimum of 24 credit hours, including 12 credit hours of graduate course work in courses numbered 2000 or above.

- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
- OR
- NROSCI 2101 - FUNCTIONAL NEUROANATOMY

AND

- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
- OR
- NROSCI 2012 - NEUROPHYSIOLOGY
- NROSCI 2017 - SYNAPTIC TRANSMISSION

- A graduate-level course in statistics also is strongly recommended though not required

Additional

Students must also participate in a journal club every fall and spring term (this could be either a CNUP journal club or a more specialized journal club), and must attend the neuroscience seminar series (NROSCI 2106). A minimum grade of B is required to pass a course, and a cumulative grade point average of at least 3.0 must be maintained throughout the course of study.

Students must complete at least 12 credit hours of coursework toward the total of 30 credits required for the master's degree. Course credits completed before admission to the Department of Neuroscience Master's Degree program cannot be applied to the credit hour requirements required for the master's degree, although prior coursework may satisfy specific course requirements.

Students are also required to pass two milestones en route to the master's degree: the Reprint Exam and the Master's Thesis Defense. Specific details regarding these milestones are provided later in this document.

Yearly Sequence of Requirements and Expectations

Entering Students

Entering students should schedule an introductory meeting with the Chair of the Graduate Advising Committee (currently Dr. J. Patrick Card). The purpose of this meeting is to answer any questions that the student may have and to assist the student in getting settled in the program. Prior to the beginning of the student's first term, the student, with the aid of their research mentor and the Chair of the Graduate Advising Committee, outlines a complete plan of study leading to the Master's Degree.

First Year

The major objectives of the first year are to become actively engaged in laboratory research, to complete core course requirements, and to obtain sufficient experience to pass the Reprint Exam. Participation in journal clubs, research seminars, and involvement in critical assessment of the literature through readings with the mentor and peers is integral to meeting these objectives.

It is required that students participate in the following activities during the fall and spring terms of their first year:

1. laboratory research
2. core courses in neuroscience
3. journal club
4. neuroscience seminar series.

During the summer term at the end of their first year, students should focus primarily on research, although some coursework may be appropriate (e.g., statistics). During the first year, the students typically register for 3-9 research credits of Directed Study (NROSCI 2902) per term; the students should register for this course pass/fail.
Students are required to submit a research progress report at the end of the first year of study. This report is due by the last day of final exam week of the second term.

The Reprint Exam (see Section 9.1) must be completed by May 31 of the first year of study.

This assumes that the student initiated study in the program at the beginning of the fall term. Because admission into the program is considered on a rolling basis, it is not unusual for students to enter the program in the spring or summer terms. In these instances, completion of the reprint examination should take place at the end of the first month following the second term of study.

Second Year

After completion of the first year, the only remaining requirements are to finish course requirements and complete a master's thesis project. A list of elective courses currently offered can be obtained from the administrative office. Selection of the coursework that will be used to satisfy the requirements of the program should be made in consultation with their mentor and is subject to approval by the Director of Graduate Studies. However, given the time constraints of completing the degree it is expected that research will be the principal focus of students throughout their program of study.

During each fall and spring term the student is enrolled in the program, the student must participate in:

1. research (registered for as 6-9 credits, NROSCI 2990, pass/fail)
2. journal club
3. neuroscience seminar series (NROSCI 2106).

Department of Philosophy

The Department of Philosophy offers the degrees of Master of Arts and Doctor of Philosophy.

It is possible for students in the Department of Philosophy to plan a combined program with the Department of History and Philosophy of Science by fulfilling specific requirements in each of the departments. The Departments of Classics, Philosophy, and History and Philosophy of Science jointly offer a graduate program leading to the MA and PhD degrees with an area of concentration in classics, philosophy, and ancient science.

http://www.philosophy.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Philosophy, Graduate Administrator, 1017 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5774. Fax: 412-624-5377. E-mail: kathleenlabuda@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a statement of purpose, a writing sample, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service or the IELTS administered by the University of Cambridge, Local Examination Syndicate. The required minimum TOEFL score is 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing). The required minimum IELTS score 7.0 (with at least 6.5 in each of its four sections). Applications will be accepted for fall term admission until January 10. The department admits students only for the fall term.
Financial Assistance

Many students in the PhD program are supported by fellowships or teaching assistantships/fellowships. The rates are set annually by the University. The department does not offer financial support to non-continuing MA students.

Faculty

Dietrich School of Arts and Sciences Faculty

Philosophy, PhD

Requirements for the PhD

The University requirement for the PhD is 72 credits. The department requires that 36 of these credits must be obtained by taking 12 seminars (including directed studies) offered by the philosophy department (or an approved seminar offered by another department) passed with a grade of at least B, and the remainder are typically satisfied by dissertation research.

Departmental requirements are fully spelled out in the Handbook of Rules and Policies for Graduate Study in Philosophy at the University of Pittsburgh (PDF). In summary, these requirements include:

1. proficiency in French, German, Greek, or Latin, shown by passing a departmental translation examination
2. proficiency in basic and advanced logic, normally shown by passing (with a grade of at least B) PHIL 2500
3. proficiency in ethics, metaphysics and epistemology, and philosophy of science
4. proficiency in the history of philosophy, shown by doing three units, where a unit is a graduate seminar or departmental examination covering a historical topic

When these requirements have been satisfied, the student is comprehensively evaluated and starts working on a paper to serve as the basis for comprehensive examination, which is the student is expected to take by the end of his or her seventh term. Students who pass this examination are then allowed to form a dissertation committee and to present this committee a prospectus for a dissertation. If the prospectus is approved, the student is admitted to Ph.D. candidacy and proceeds to writing the dissertation. Once the dissertation is approved for examination, the student must pass a final oral exam on the dissertation and their research.

Teaching Internship

In order to qualify for the PhD, each graduate student must, under the supervision of the faculty, teach or lead discussion sections for at least two different courses. Teaching assistants and teaching fellows satisfy this requirement in the course of fulfilling their teaching duties. Special arrangements are made to enable other graduate students to satisfy this requirement.

Philosophy, MA

M.A. in Philosophy

The department has no regular terminal M.A. program. Except in extraordinary circumstances, students working towards an M.A. in Philosophy are Ph.D. students in other departments at the University who are seeking a "secondary M.A." All M.A. students are supervised by the Director of Graduate Studies and must satisfy the following requirements:

A. The student must satisfy the Area Requirement in the field of metaphysics and/or epistemology, and in addition one of the other Area Requirements (i.e. either ethics or the philosophy of science), as described in §3.3 of this Handbook. These requirements may (but need not) be satisfied by taking the core courses for Ph.D. students (described in section 3.4 of this Handbook). But M.A. students may not the M&E Core Seminar in the Fall term: courses in the Core Sequence are open to M.A. students only in the spring term.
B. The student must do at least two units of history (where a "unit" is defined in §3.5 of this Handbook), such that one is in ancient philosophy and the other in modern/nineteenth century philosophy.

C. The student must either pass the Basic Logic Exam or Phil 1500 (or a more advanced logic course), as described in §3.1 of this Handbook.

There is also a Course-Number Requirement, parallel to that described in §3.6 of the Handbook: i.e., the student must pass (with a grade of B or better) at least 10 courses (30 credits) offered by the Department, of which at least 6 courses (18 credits) must be 2000-level or 3000-level, and no more than four may be at the 1000-level. (Neither Directed nor Independent studies may count.) None of the courses used to fulfill these requirements can be among those used to fulfill requirements for another degree. All requirements for the M.A. degree should be completed within a period of four calendar years from the student's initial registration for graduate study.

When these requirements have been met, the student will be comprehensively evaluated by the Department and, if the evaluation is favorable, the Department will recommend the conferral of the M.A. degree. Students must register for at least one credit in the term of graduation and be registered for a minimum of three credits in the 12-month period preceding the graduation month. Note that the M.A. degree is only conferred upon students with an overall QPA of 3.0 or higher.

**Secondary M.A. Programs in other departments**

A secondary M.A. in philosophy is available to a student enrolled in a Ph.D. program in another department at the University. The student must satisfy requirements (A)-(C) and the Course-Number Requirement described in §8.1 of the Handbook. Note that none of the courses used to fulfill these requirements can be among those used for residence requirements for the student's "home" degree. When these requirements have been met, the student will be comprehensively evaluated by the Department and, if the evaluation is favorable, the Department will recommend conferral of the M.A. degree. The Department waives its Language Requirement and defers responsibility for residency and other University requirements to the student's "home" department.

Students enrolled in the regular Ph.D. program in the Department may pursue a secondary M.A. degree in other departments at the University. If the secondary M.A. would contribute significantly to the student's philosophical training, or form an integral part of their projected dissertation project, the student may submit a written request to the Graduate Committee that his or her pursuit of the secondary M.A. be officially endorsed by the Department. The Graduate Committee, with the approval of the Chair, may endorse the student's secondary M.A. in which case an additional year of financial support by the Department will be granted, and the timing of requirements will be appropriately adjusted.

**Department of Physics and Astronomy**

The Department of Physics and Astronomy offers the MS and PhD degrees in physics. The graduate program provides a broad experimental, observational, and theoretical foundation upon which students build careers as scientists prepared for both teaching and research at major academic, government and industrial laboratories, educators at universities and colleges, and as independent scientific entrepreneurs.

**Contact Information**

Main Office: 100 Allen Hall  
412-624-9066 or 412-624-9000  
Fax: 412-624-9163  
E-mail: pagrad@pitt.edu  
www.physicsandastronomy.pitt.edu

**Research**

The graduate programs in the Department of Physics and Astronomy are designed primarily for students who wish to obtain the PhD degree, although the MS degree is also offered without financial support. Both the PhD and the MS programs provide high-quality training for students. A set of core courses is to be taken by all graduate students unless the core course material has been demonstrably mastered in other ways. These core courses cover dynamical systems, electromagnetic theory, mathematical methods, quantum mechanics, and statistical physics & thermodynamics. In addition, elective courses are offered in several advanced areas of physics. PhD thesis topics may be chosen from a variety of research fields, including astrophysics/cosmology, condensed matter physics, particle physics, and physics education research. Topics in astrophysics/cosmology...
include: observational, numerical, and theoretical cosmology; dark matter and dark energy; galaxy formation and evolution; active galactic nuclei and quasars; galactic and intergalactic medium; stellar atmospheres; massive stars; supernovae; and physics of the early universe. Topics in condensed matter physics include: biological physics; nanoscience; quantum information; quantum kinetics; quantum optics; quantum states of matter; semiconductor physics; soft condensed matter physics; statistical physics; superconductivity and superfluidity; and ultrafast optics. Topics in particle physics include: the origin of mass and flavor; the search for new symmetries of nature; neutrino physics; CP violation; heavy quarks; leptoquarks; supersymmetry; extra dimensions; baryogenesis; effective field theory; and strong interaction field theory. Topics in physics education research include: cognitive issues in learning physics; and development and evaluation of research-based curricula for introductory and advance physics courses. Multidisciplinary thesis research may also be carried out in, for example, particle astrophysics, biophysics, chemical physics, laser physics, materials science, nanoscience, and surface science. This research may be done in cooperation with faculty from other departments of the University.

Admissions

To be considered for admission, a student must have earned a baccalaureate degree; one of the physical sciences, mathematics, astronomy/astrophysics or engineering with relevant physics courses is required. Research experience is recommended but not required. Must have an impressive undergraduate record; and must submit a complete application. The application also serves as an application for financial aid from the department, if the candidate so desires. A complete application consists of the following. Application details are provided on our website under "How to Apply".

- An online application
  - Transcripts (clear downloads) from all college-level institutions attended (unofficial until admitted)
  - Proof of degree(s) either posted on the transcript or in another form
- Minimum GPA for admission with full status is 3.0 on a 4.0 scale
- Graduate Record Examination (GRE) scores General (currently required, check website for any changes) and Advanced Physics test (recommended)
- Brief statement of purpose, including rank ordered list of research preferences; in addition to list of textbooks used for physics class
- Evidence of any research experience (recommended but not required)
- Curriculum Vitae (optional)
- Three letters of recommendation
- International applicants only: TOEFL (Test of English as a Foreign Language) or IELTS scores and completed Certification of Financial Responsibility and International Graduate Student Supplemental Form for the Dietrich School of Arts and Sciences (Refer to department's graduate application details website for minimum score information)

Financial Aid

Financial aid is normally provided to graduate students through teaching or research assistantships. In addition, numerous competitive fellowships are available for students. All qualified applicants are entered into a pool for these fellowships. The department endeavors to support all students throughout their entire graduate career, provided good academic standing is maintained and progress is being made toward the degree.

Faculty

Dietrich School of Arts and Sciences Faculty

Physics, PhD

Requirements for the Doctor of Philosophy

The PhD program in physics, described in more detail in the referenced documents, aims to assure that graduates are well versed in the fundamentals of their fields, have a broad knowledge of contemporary developments, and are experts in the techniques and current state of the subject area of their research. Students are required to complete the six core courses (PHYS 2373, PHYS 2513, PHYS 2541, PHYS 2555, PHYS 2565, PHYS 2566) within the first two years of their program. Students entering with a Masters degree from another institution are encouraged to review Section A.5 of the departmental requirements document. At least four classes numbered above 3000 are also required for the degree. Teaching practice, presentation
and attendance of seminars, and writing and an oral presentation of a dissertation give candidates broad experience in the effective communication of their work.

A minimum of 72 graduate credits are required for the PhD degree.

The PhD preliminary evaluation, which also serves as the comprehensive examination for the MS, is based on final examination scores in the core graduate and/or advanced undergraduate subjects. All students are required to pass the preliminary examination by the end of the first year.

PhD students are also required to complete the PhD comprehensive examination, which is based on final examination scores in the core graduate courses. This examination should be passed within the first two years of residency. Students who were exempted from a particular core course are required to take the final examination in that course.

The PhD dissertation research, a major part of the PhD program, must contribute significantly to the advancement of knowledge in physics or astronomy. Students will be required to meet annually with their thesis committee and successfully defend their dissertation before this committee and the University community.

**Physics, MS**

**Requirements for the Master of Science**

A minimum of 30 credits (3.0 GPA) is required for the MS for both thesis and non-thesis options. The student must be in compliance with all of the University's degree requirements. At least four physics courses (12 credits) at the graduate 2000-level must be completed with a grade of B (3.00). A 3000-level course can be substituted for one of these, but only with the Academic Advisor's approval. At most, up to 12 credits of 1300-level undergraduate coursework listed in the "Advising" section of this document as acceptable for graduate credit may also be used to satisfy the department’s 30-credit requirement. No more than six credits of graduate work completed at another institution may be accepted by the Graduate Committee toward the completion of the residence requirement. Credits earned for PHYS 2997 and PHYS 2998 may not be used to satisfy this requirement. No more than two non-physics graduate-level courses, approved in advance by the Director of Graduate Studies, will be considered for credit for the MS degree. Please refer to department's graduate website for details about the course and thesis options for this degree.

**Department of Political Science**

**Contact Information**

Department Chair: Jonathan Woon  
Main Office: 4600 Wesley W. Posvar Hall  
412-648-7250  
Fax: 412-648-7277  
E-mail: brd51@pitt.edu  
http://www.polisci.pitt.edu

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Political Science, Graduate Administrator, 4601WWPH, Pittsburgh, PA 15260. Phone: 412-648-7270. Fax: 412-648-7277. E-mail: brd51@pitt.edu

**Graduate Program**

The Department of Political Science offers the degrees of Master of Arts and Doctor of Philosophy. However, the MA degree functions as a stepping-stone to the PhD. The department does not have a terminal MA program, and does not admit students for graduate study who seek a terminal Master of Arts degree. However, PhD students who, for various reasons, choose to discontinue their training after two years are eligible for a terminal MA, contingent upon the successful completion of the requirements outlined below.

The graduate program in political science incorporates six fields:
Students choose two of these fields as areas of specialization. Students may combine work for the MA and PhD degrees with a program of regional or global specialization leading to a certificate in Global Studies, Latin American studies, Asian studies, West European studies, or Russian and East European studies.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing or the IELTS administered by the University. For fall 2018 term admission and awards consideration, complete applications must be submitted by January 8. The department admits students only for the fall term.

Financial Assistance

Graduate students entering the program with a fellowship or teaching assistantship/teaching fellowship who have demonstrated high-quality graduate work and are maintaining good academic progress can expect to have financial aid renewed for up to five years. A graduate student who has not passed the PhD comprehensive examination in September of the fourth year of graduate work ordinarily is not eligible for additional financial assistance until these examinations are passed.

Faculty

Dietrich School of Arts and Sciences Faculty

Political Science, PhD

Requirements for the PhD

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching, or dissertation work as detailed elsewhere in this bulletin.

Students in the PhD program must choose two fields. The requirements for the first field are outlined above in the section regarding requirements for the MA. Unless otherwise stated below, students are required to complete at least four graduate seminars beyond the departmental core (PS 2000, PS 2010, PS 2030, and PS 2040) from one of the remaining five fields of study for their second field.

PhD Qualifying Examinations: At the conclusion of the first year, all students will face a "first year review" before the entire faculty. The faculty will review each student, based on his or her performance in the first year, to determine whether or not he or she should continue in the program. Students who have passed this review are considered to have passed the PhD Qualifying Examination.

Supervised Teaching Experience: Supervised teaching experience is an integral part of the doctoral program. Normally, teaching experience is gained by conducting recitation sections of an introductory course or by assisting a faculty member in an undergraduate course, followed by the teaching of one's own course, in the fourth or fifth year of study.

Comprehensive Examination: Students take a PhD comprehensive examination after approximately one year of coursework beyond the MA, comprising a written exam in both fields, with a possible oral exam if the results of the written exam are unclear.
**Dissertation Overview:** Following successful completion of the comprehensive examination, the student files an application for admission to candidacy for the Doctor of Philosophy degree. At this stage the student presents a proposed topic for doctoral research and a research design for its execution to be reviewed by the dissertation committee.

**Dissertation Defense:** The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

### Political Science, MA

#### Requirements for the MA

For the MA, students must earn 30 hours of credit with a B average or better in courses numbered 1000 or above. At least half of these credits must be carried in courses numbered 2000 or above. All MA students are required to complete a 13-credit core-course sequence in theory and methods (PS 2000, PS 2010, PS 2030, and PS 2040), comprising graduate-level training in empirical analysis of political behavior and normative political thought. The remainder of the students' MA course work is used to develop competence in one of the main fields of political science the department offers.

Students must then pass a comprehensive examination, for MA purposes, covering two of six fields.

### Department of Psychology

The department offers graduate training leading to a Doctor of Philosophy in psychology. Specialization in the fields of biological and health psychology, clinical psychology, cognitive psychology, developmental psychology, and social psychology is available, along with joint programs in clinical/developmental and clinical/health psychology. A specialization in Cognitive/Neuroscience is also available. The area of concentration in clinical psychology is accredited by the American Psychological Association.

### Contact Information

Department Chair: Julie Fiez  
Main Office: 3137 Sennott Square  
412-624-4502  
Fax: 412-624-4428  
E-mail: psygrad@pitt.edu  
http://www.psychology.pitt.edu/graduate-studies

### Admissions

Applications for admission must be submitted online by December 1. Admission is in the fall only. Applicants for admission to graduate study in psychology must submit academic transcripts, 3 letters of recommendation, a statement of goals, and certified scores on the Graduate Record Examination. Applicants to the clinical and joint-clinical programs may also submit scores for the GRE Subject test which is recommended, not required. Students may obtain information concerning the dates and places of administration of the GRE from the Graduate Record Examination, Educational Testing Service, Princeton, NJ 08541-0001; from www.ets.org; or from the testing service of their own college or university. International students must submit certified TOEFL scores; the minimum acceptable score is 90 on the Internet-based exam.

As preparation for graduate study, the department recommends broad undergraduate training including courses in biology, mathematics, the physical sciences, the social sciences, and effective oral and written expression. The department recommends college-level mathematics and 12 credits of psychology, including experimental psychology, statistics, and, for applicants to the clinical program, abnormal psychology.

### Financial Assistance
The Department of Psychology provides tuition and stipend support for students admitted to its graduate programs. Support may be in the form of a fellowship, research assistantship, or teaching assistantship. Qualified students are encouraged to apply for relevant fellowships. Historically, the department has been able to continue support for most students throughout their graduate training; however, funding is only guaranteed for four years.

**Faculty**

Dietrich School of Arts and Sciences Faculty

**Psychology, PhD**

Requirements for the PhD

A minimum of 72 credits is required for the PhD. The credits are readily earned in the course of completing the regular requirements. Up to 24 credits may be granted for a master's degree awarded by another institution.

In addition to the credit requirement, the PhD in psychology requires:

1. Demonstration of proficiency in the program-specific core and required courses as described in the following links: biological and health, clinical, cognitive, developmental, and social.
2. Demonstration of competence in research at the master's level, with an oral defense of a master's thesis or equivalent work. (This may be waived for students entering with a master's degree.)
3. Maintenance of a B average (3.0) in all course work.
4. A comprehensive examination in a field of specialization.
5. Demonstration of teaching competence in a formal course setting.
6. A dissertation based on empirical research.
7. An oral examination concerned primarily with the dissertation.

It is possible to complete these requirements in four years, although most students take four to six years to complete the work for a PhD.

**Clinical Program Note:** Clinical students are also required to complete a one-year internship in an approved setting. This internship normally takes place after the student has met the requirements for admission to doctoral candidacy. For this reason, the minimum time in which a PhD may be earned in clinical psychology is one year longer.

**Supervised Teaching:** Each student is required to fulfill a requirement of teaching at least one supervised course.

**Psychology, MS**

Requirements for the Master's Degree

Normally, students are only admitted for graduate study leading to the PhD. If a student wishes, he or she may also obtain a master's degree by submitting an approved master's thesis and fulfilling the 30 credit course requirement. Satisfactory completion of the program's specific core courses (as described in the following links: biological and health, clinical, cognitive, developmental, and social) constitutes the comprehensive examination for the MS.

**Department of Religious Studies**

*Religious Studies is currently not accepting graduate applications.*

The Department of Religious Studies offers the degrees of Master of Arts (MA) and Doctor of Philosophy (PhD). The principal purpose of the graduate program is to provide students with the research and teaching tools that may lead to careers in colleges, universities, and other venues in
which the academic skills of a religionist are utilized. The department encourages an interdisciplinary approach to the study of religion and works with students to design a course of study to meet intellectual needs within the limits of faculty expertise and available resources.

Contact Information

Department Chair: Adam Shear
Main Office: 2604 Cathedral of Learning
412-624-5990
Fax: 412-624-5994
E-mail: relgst@pitt.edu
www.religiousstudies.pitt.edu

Admissions

Religious Studies is currently not accepting graduate applications.

Financial Assistance

Teaching assistantships and tuition remission scholarships are available through the department on a competitive basis. Religious studies students are also eligible for fellowships offered through the University, including Provost's Humanities Fellowships for first-year graduate students, Mellon Predoctoral Fellowships, and FLAS and other awards offered through the University Center for International Studies (UCIS). Entering students are nominated directly by the department.

Degree Requirements

Graduate degree requirements established by the Dietrich School of Arts and Sciences at the University of Pittsburgh are described elsewhere in this bulletin and should be read in conjunction with the departmental requirements outlined below. Departmental rules allow no more than two upper-division (1000 level) courses to count toward graduate degrees and no more than 50 percent of graduate courses to be taken as directed or independent study.

Faculty

Dietrich School of Arts and Sciences Faculty

Religious Studies, PhD

Requirements for the PhD Degree

Course Requirements: The PhD in Religion requires 48 credits beyond the MA (72 credits beyond the BA). Graduate students entering the PhD program from another institution may have up to 24 credit hours at the MA level applied toward the PhD degree. Transfer credits require a grade of B or better (or the equivalent) and must be for work germane to the MA degree in Religious Studies. Students entering the PhD program from another institution meet the distribution requirements as outlined in the departmental requirements for the MA degree (save for the thesis) in the course of earning the PhD degree.

PhD credits are distributed as follows:

185
All graduate students entering from another institution take "Perspectives on Religion" (REL 2710, 3 credits)

Two courses on theories or methods related to the student's primary or complementary methodological focus (6 credits). One of these courses (3 credits) is earned at the MA level.

Ten courses within the student's areas of specialization (30 credits). Four of these courses (12 credits) are earned at the MA level.

Two courses in each of two religious traditions or contexts other than the student's area of specialization (12 credits). Two of these courses (6 credits) are earned at the MA level.

Twenty-one elective credits, including courses devoted to the preparation of qualifying examinations, advanced language training, the preparation of the dissertation prospectus, and the research and writing of the dissertation (21 credits).

Preliminary Examination: The preliminary examination is required of students who enter the PhD Program with a Master's Degree from another institution. See the "Comprehensive Examination" in the MA Program.

Language Examinations: Verification of reading knowledge of two modern second languages is required. Determination of the two required modern languages is made on the basis of research needs and professional expectations in the student's area of specialization. Students whose research primarily involves English-language sources or one language of research still satisfy the two modern languages requirement. Students pass one of the language requirements prior to sitting for the comprehensive examination.

When applicable, an intermediate or advanced level of competency in modern and/or classical second languages judged necessary for research and standard in a student's area of specialization is required for admission into the program. Additional modern and/or classical language study, as appropriate, may be required as part of the student's professional training.

Comprehensive Examination: Students take the comprehensive examination upon completing all required course work (save for a maximum of 6 credits devoted to preparation of the dissertation prospectus and research and writing of the dissertation) and passing the preliminary and language examinations. The examination is designed to test for both breadth and depth in the student's area of specialization and intended area of research by evaluating the student's critical abilities in three fields that impact the dissertation. The examining committee is comprised of three faculty members chaired by the dissertation advisor. Three written field examination are followed by a one-hour oral defense.

Dissertation Prospectus and Overview: Defense of the dissertation prospectus at a two-hour overview meeting is the final stage before application for admission to PhD candidacy (ABD status). The dissertation committee is composed of four faculty members chaired by the dissertation advisor.

Dissertation: The doctoral dissertation is an independent, original, and significant contribution to knowledge, grounded in an appropriate body of primary and secondary sources. Successful completion of the dissertation signifies the preparation of the author to assume a position within the profession. The dissertation is defended at a two-hour oral defense.

Department of Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers the degrees a Master of Arts (as a degree leading to the Doctor of Philosophy) and a Doctor of Philosophy, with an area of concentration in Russian literature and culture, including cinema. Students may combine work for the MA and PhD degrees with a program of regional specialization leading to a certificate in Russian and East European Studies; Cultural Studies; Film Studies; Gender, Sexuality, and Women's Studies; Jewish Studies; and others.

Eligible Slavic PhD students may apply, before taking the Slavic PhD comprehensive examinations, to transfer to Pitt's Interdisciplinary Film Studies PhD (with a concentration in Slavic), thereby working towards a single PhD in two disciplines. For information on the Interdisciplinary Film Studies PhD, see http://www.english.pitt.edu/graduate/phd-film-studies.

Contact Information

Department Chair: David J. Birnbaum
Main Office: 1417 Cathedral of Learning
412-624-5906
Fax: 412-624-9714
E-mail: slavic@pitt.edu
www.slavic.pitt.edu
Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement, an academic writing sample, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing or the IELTS administered by the University of Cambridge, Local Examinations Syndicate. Applications will be accepted for fall term admission until April 15. For awards consideration, applications must be completed by January 15. The department admits students only for the fall term. The department normally admits students only for the fall term.

Financial Assistance

Graduate students who have been admitted with a teaching or non-teaching fellowship for their first year of study will have their support renewed for at least an additional four years as long as 1) their teaching performance is satisfactory and 2) they are making regular progress in their graduate studies.

Faculty

http://www.slavic.pitt.edu/people/faculty/index.php

Slavic Languages and Literature, PhD

Requirements for the PhD

Credit Requirement: 72 graduate credits (36 beyond the MA), of which 12 may be dissertation credits; at least 60 credits must be completed by the end of the semester in which the examination is to be taken.

Approved Second Area: Nine-15 credits outside the department (but in the 72-credit total) in an approved second area (e.g., Russian and East European Studies, Cultural Studies, Film Studies, Study of Women, Gender and Sexuality, Jewish Studies, European literature, etc.).

Research Languages: A reading knowledge of both French and German is required before taking the PhD comprehensive exam.

PhD Qualifying Examinations: The MA comprehensive exam also serves as the PhD qualifying exam for those students who wish to pursue graduate work at the PhD level.

Supervised Teaching Experience: Supervised teaching experience is an integral part of the doctoral program. All PhD candidates have the opportunity to teach courses in language, literature, and culture, initially by assisting other instructors, and, at a more advanced stage, in stand-alone courses.

Comprehensive Examination: Students take a PhD comprehensive examination after approximately two years of coursework beyond the MA. For examination procedures visit http://www.slavic.pitt.edu/graduate/examinations.

Dissertation Overview: Following successful completion of the comprehensive examination, the student files an application for admission to candidacy for the Doctor of Philosophy. At this stage the student presents a proposed topic for doctoral research and a research design for its execution to be reviewed by the dissertation committee.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.
Slavic Languages and Literature, MA

Requirements for the MA

For the MA, students must earn 36 hours of graduate credit with a B average or better in courses numbered 1000 or above. At least half of these credits must be in courses numbered 2000 or above. All MA students are required to complete RUSS 2110 - INTRODUCTION TO THE STUDY OF LITERATURE 1, RUSS 2210 - STRUCTURE OF RUSSIAN, and RUSS 2230 - HISTORICAL GRAMMAR. Courses are chosen in consultation between the student and DGS and are subject to approval by the latter. The remainder of student coursework is used to develop competence in Russian literature and culture or in an approved second area (see below). MA candidates must also demonstrate a reading knowledge of either French or German before taking the MA comprehensive exam.

The MA comprehensive exam covers material from a reading list. For examination procedures see http://www.slavic.pitt.edu/graduate/examinations.

Department of Sociology

The Department of Sociology offers the degrees of Master of Arts and Doctor of Philosophy. However, a terminal Master's degree is infrequently awarded, as students awarded Master's Degrees usually continue in the Department to receive PhD Degrees.

The faculty conduct research and offer courses within two broadly defined areas: 1) social movements and 2) politics and culture. Within each of these areas, graduate students are able to pursue a variety of theoretical, substantive, and methodological interests.

Graduate students are encouraged to combine their work in sociology with multidisciplinary study in a particular area by enrolling in any of the following certificate programs: African Studies, Asian Studies, European Studies, Global Studies, Latin American Studies, Russian and Eastern European Studies, Cultural Studies, or Gender, Sexuality, and Women's Studies.

Contact Information

Main Office: 2406 Posvar Hall
412-648-7582
Fax: 412-648-2799
E-mail: suszstagg@pitt.edu
www.sociology.pitt.edu/graduate/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Sociology, Graduate Administrator, 4911 WWPH, Pittsburgh, PA 15260. Phone: 412-648-1399. E-mail: brd51@pitt.edu.

Admissions

Qualified students from any discipline are considered for admission. Qualifications include preparation for graduate-level work in sociological theory and both qualitative and quantitative research methods, including a required course in social science applications of multivariable regression models. Applicants must submit to the departmental director of graduate studies transcripts of all college-level work, three letters of recommendation, a career statement, a brief writing sample, and scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination. International applicants are also required to submit TOEFL scores, unless they hold an undergraduate or graduate degree from an accredited U.S. college or university. All applications and application fees must be submitted on-line. Applications are accepted for fall term admission until March 15. The department admits students only for the fall term.

Financial Assistance
Teaching assistantships and fellowships, Andrew W. Mellon Predoctoral Fellowships, Foreign Language and Area Studies Fellowships (administered by the University Center for International Studies), Provost Development Fellowships, and graduate student research assistantships are available.

**Faculty**

http://www.sociology.pitt.edu/faculty

**Sociology, PhD**

Requirements for the PhD

Admission: Prerequisite for admission is a Bachelor of Arts degree or equivalent preparation (plus approval from the Admissions Committee). If a Student has not yet received a Master's Degree at the time of application, the Department will require the student to pursue a Master's Degree at the University of Pittsburgh. The requirements for the Master's Degree are listed below. Those students entering with an MA degree from another institution may petition the Admissions Committee for a transfer of credits but core courses are usually not waived.

**Credit Requirement:** The PhD program requires 72 credits earned from a combination of the required core course sequences, MA courses, additional graduate sociology seminars, and any suitable combination from course work, independent study, research, and dissertation work as detailed elsewhere in this bulletin.

**Supervised Teaching Experience:** Supervised teaching experience is an integral part of the doctoral program. Typically, teaching experience is gained by conducting recitation sections of an introductory course and, once the MA is completed and the student has conducted recitations, by teaching an undergraduate course with the guidance of a faculty mentor.

**Comprehensive Examination:** The PhD comprehensive examination is an individually designed review essay using relevant research literatures to develop research questions for the dissertation and to support those questions with appropriate methodological and theoretical "best practices" in the field and substantive findings related to the dissertation project.

**Dissertation Overview:** At this stage students will have selected, in consultation with their dissertation committee, a suitable dissertation topic. Students present a written prospectus to their committee describing the purpose, scope, and method of proposed study and the sources upon which it will be based. Students are encouraged to give careful thought early on in their graduate work to possible doctoral research topics and discuss their interests with related faculty.

**Final Oral Examination:** The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

**Sociology, MA**

Requirements for the Master's Degree

For the MA, students must earn 36 credits in approved graduate courses. The 36 credits must include completion of the nine credit core course sequence: Research Design, Social Theory, Qualitative Methods and Quantitative Methods, as well as at least 14 credits of elective graduate coursework in the sociology program with grades of B or better.

Students also write and defend a master's thesis for which they receive up to 6 credits.

Remaining credits may be earned with sociology electives (which may include 3 credits of directed study) or graduate coursework in other programs.

**Department of Statistics**
The Graduate Faculty offers various programs of study and research in statistics. Degree programs lead to the Master of Arts or Master of Science in applied statistics, the Master of Arts or Master of Science in statistics, and the Doctor of Philosophy in statistics. These may be pursued by full-time and part-time students. The department also provides courses for students engaged in graduate studies in other disciplines requiring statistics and for individuals requiring specialized statistical skills in the workplace. Full details of all programs and departmental regulations are available on the website at the address listed below.

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Statistics, Graduate Admissions Administrator, 2720 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-1674. Fax: 412-648-8814. E-mail: gerber@pitt.edu.

Admissions

http://www.statistics.pitt.edu/graduate/admissions

A basic requirement for admission to the graduate program in statistics is the completion of a bachelor's degree from an accredited institution in the United States or the completion of a level of education that the University of Pittsburgh deems comparable to a U.S. bachelor's degree. Applicants whose native language is not English and who have not already completed a degree program in a U.S. college or university are required to submit either the TOEFL (administered by the Educational Testing Service) or the IELTS (administered by Cambridge University, Local Examinations Syndicate). Graduate Record Examination (GRE) scores are required.

Decisions regarding admission are based on the applicant's official credentials, grade point averages, and the availability of faculty and facilities to meet the applicant's expressed academic or research needs and interests. With limited space available, not all qualified applicants can be admitted.

The minimal course requirements for admission into the graduate programs of the Department of Statistics are:

- Three terms of calculus
- Linear algebra
- One year of probability and statistics, preferably an introductory mathematical statistics sequence

Students lacking some of these prerequisites may be admitted provisionally at the discretion of the Graduate Committee. In addition, students intending to pursue the PhD should either have taken a one-term course in advanced calculus, or be prepared to take such a course in the first year of graduate study.

Financial Assistance

http://www.statistics.pitt.edu/graduate/financial-assistance

Financial assistance for graduate students is provided in the form of teaching and research assistantships, fellowships, tuition scholarships, and loans. Application for financial aid should be made on the application form for admission to graduate study. All applications for financial assistance are reviewed in the department with award decisions made on the basis of prior academic excellence and achievement and perceived potential for contributions to the field of statistics.

Students applying for fellowships or assistantships for the fall term should file their applications no later than January 15 of the same year.
Requirements for the Master's Degree in Statistics or Applied Statistics

http://www.stat.pitt.edu/graduate-programs

The department encourages its students to obtain a broad background in statistics, including both methods and theory courses, regardless of whether they specialize in applied statistical methodology or in statistical theory. Consequently, two-term sequences in applied statistical methods (STAT 2131-STAT 2132) and intermediate mathematical statistics (STAT 2630-STAT 2640) are common to all master's degree programs offered by the department, and are also generally taken by students whose goal is the PhD in statistics.

Faculty

Dietrich School of Arts and Sciences Faculty

Statistics, PhD

Requirements for the PhD

The main requirement for the Doctor of Philosophy in statistics is the successful completion and defense of a dissertation making a substantial and original contribution to statistics, probability, or their application. Prior to embarking on their research, candidates must pass the qualifying exam (see Requirements for the Master's Degree above) at the PhD level. To be admitted to PhD candidacy, candidates must successfully pass an oral PhD Comprehensive examination over an area of research chosen in consultation with their advisory committee. The purpose of the comprehensive examination is to demonstrate that students are able to understand, summarize, and make use of the statistical literature in an area of potential research that is of interest to them. Students who have found a specific topic for their dissertation are encouraged to combine the comprehensive examination with the presentation of the thesis proposal. Students who are not yet ready to present a proposal can still take the comprehensive exam, but must later submit a thesis proposal orally and in writing to their advisory committee.

Course requirements for the PhD are STAT 2631 - THEORY OF STATISTICS 1, STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS, STAT 2661 - LINEAR MODELS THEORY 1, and STAT 2711-STAT 2712 (Probability Theory) or their equivalent. PhD candidates are also required to take at least three credits in statistical consulting; those students anticipating a career involving consulting are advised to take a substantial number of consulting credits. The remaining courses of the 72 credits required for the PhD will be decided in conjunction with the student's advisor and should consist of mainly formal courses prior to the commencement of research for the dissertation.

The department has no second language requirements for the PhD. Although not required, facility in the use of one or more computer programming languages, especially those used in writing statistical software (for example, SAS, R), is highly recommended.

Full-time graduate students usually take between four and five years to complete a PhD. Part-time students may be allowed as many as 10 years to finish all requirements. Additional information concerning examinations and requirements can be found in the Graduate and Professional Bulletin and the Kenneth P. Dietrich School of Arts and Sciences (A&S).

Applied Statistics, MA

Master of Arts

Department requirements for the Master of Arts in Applied Statistics are the completion of 33 credits, including the two year-long sequences STAT 2630-STAT 2640 and STAT 2131-STAT 2132 mentioned above, at least three credits in consulting, four courses (12 credits) in statistical methods or theory taken from a list of choices, and an approved two-course sequence (6 credits) taken at the graduate level in a discipline other than statistics. Students in our MA Statistics and MA Applied Statistics are required to pass the Preliminary Evaluation, which is equivalent to receiving grades of B or higher in the four core courses (STAT 2630, STAT 2640, STAT 2131, and STAT 2132). A student failing to meet the new grade requirement
needs to re-take the necessary course(s). Students are allowed to repeat the same course twice. They will be terminated from the master's program if they fail to achieve a grade of B or higher on their second attempt.

The Master of Arts in Statistics differs from the Master of Arts in Applied Statistics by replacing the requirements of a two-course sequence in a discipline other than statistics and 3 credits in consulting with the requirement that three additional 3-credit graduate-level statistics courses be taken. Both master's degrees require completion of 33 credits and the passing of the Preliminary Evaluation as explained about.

**Applied Statistics, MS**

**Master of Science**

The requirements for the Master of Science, either in applied statistics or in statistics, are the same as the requirements for the corresponding Master of Arts, except that two 3-credit statistics courses are replaced by 6 credits of STAT 2001 - RESEARCH AND THESIS FOR MS DEGREE, and an oral defense of the thesis is required.

**Statistics, MA**

**Master of Arts**

Department requirements for the Master of Arts in Applied Statistics are the completion of 33 credits, including the two year-long sequences STAT 2630-STAT 2640 and STAT 2131-STAT 2132 mentioned above, at least three credits in consulting, four courses (12 credits) in statistical methods or theory taken from a list of choices, and an approved two-course sequence (6 credits) taken at the graduate level in a discipline other than statistics. Students in our MA Statistics and MA Applied Statistics are required to pass the Preliminary Evaluation, which is equivalent to receiving grades of B or higher in the four core courses (STAT 2630, STAT 2640, STAT 2131, and STAT 2132). A student failing to meet the new grade requirement needs to re-take the necessary course(s). Students are allowed to repeat the same course twice. They will be terminated from the master's program if they fail to achieve a grade of B or higher on their second attempt.

The Master of Arts in Statistics differs from the Master of Arts in Applied Statistics by replacing the requirements of a two-course sequence in a discipline other than statistics and 3 credits in consulting with the requirement that three additional 3-credit graduate-level statistics courses be taken. Both master's degrees require completion of 33 credits and the passing of the Preliminary Evaluation as explained about.

**Statistics, MS**

**Master of Science**

The requirements for the Master of Science, either in applied statistics or in statistics, are the same as the requirements for the corresponding Master of Arts, except that two 3-credit statistics courses are replaced by 6 credits of STAT 2001 - RESEARCH AND THESIS FOR MS DEGREE, and an oral defense of the thesis is required.

**Teaching of English to Speakers of Other Languages (TESOL) Program**

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition, materials and curriculum development, and assessment.

The Department of Linguistics offers two courses in the Teaching of English to Speakers of Other Languages (TESOL).
Higher Education Course

ESL Program Specialist Course

Application Deadline:

March 15 for the following fall term start date.

TESOL Certificate

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition, materials and curriculum development, and assessment.

The Department of Linguistics offers two courses in the Teaching of English to Speakers of Other Languages (TESOL).

ESL Program Specialist Course

Requirements

Any student who wished to earn the certificate must fulfill the following requirements:

Prerequisite
(or taken concurrently with the first certificate course)

LING 1000 - INTRODUCTION TO LINGUISTICS

Course Requirements

LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
LING 2195 - PRACTICUM ESL TEACHING

Please note:

1. LING 2195 - PRACTICUM ESL TEACHING involves supervised language teaching concurrent with or following LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING. Candidates fulfill the requirement by signing up for LING 2195 - PRACTICUM ESL TEACHING and teaching during that term in an informal ESL course run by the English Language Institute, OR, with permission of the TESOL Certificate advisor, another ESL teaching context.

2. The certificate candidate must earn a grade of B or higher in each certificate course.

Degree Prerequisite for Admission

Applicants must hold a baccalaureate degree or its foreign equivalent with a minimum grade point average of B (3.0 on a 4-point scale). Preference is given to applicants who have studied abroad, worked with international students, and/or have any EFL/ESL teaching experience (including volunteer).
Instructional I Prerequisite

Applicants must hold a Pennsylvania Instructional I certificate (or equivalent from another state) and be able to provide a copy as part of the application packet.

Foreign Language Learning Prerequisite for Admission

Native speakers of English should have classroom foreign language learning experience equivalent to at least one year of college level study of a language.

Each applicant who is not a native speaker of English must: (1) achieve a score of 100 or higher on the iBT TOEFL (Skill Requirements: Reading and Listening - High; Speaking and Writing - one skill must be at the level of Good) or 7.5 or higher on the IELTS (Skill Requirements: Speaking and Writing - combined minimum of 13) or their equivalent and (2) have good spoken English skills (a score of at least 4 on the ITA interview test administered by the University of Pittsburgh).

Transcripts and CV and Teaching Certificate

Undergraduate transcripts (and graduate if applicable) and a CV (including a list of references) must be submitted as part of the application. In addition, a copy of the applicant's state teaching certificate must be included in the application materials.

Plan of Study

Students must complete a TESOL certificate plan of study form after consultation with the TESOL Certificate advisor during the first term of study.

Completion of Requirements

When nearing completion of all TESOL certificate requirements, students must apply for graduation from the TESOL Certificate program through the Arts and Sciences Dean's Office. This graduation application is separate from any other degree graduation applications. Additional paperwork must be filed with the Pennsylvania Department of Education with the help of the TESOL Certificate advisor.

Suggested Sequence of Courses

Two-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- I&L (Teaching ELLs)
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [Practicum]

Four-term Option

(entering in the fall term)

Fall:
• LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
• LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

Spring:
• LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

Fall:
• IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
  [Practicum]

Spring:
• IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
• LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
  [Practicum]

*Note:

Students must enter the program in the fall term. Students may complete LING 1000 - INTRODUCTION TO LINGUISTICS prior to the fall term, however.

Higher Education Course

Requirements

Higher Education Course Requirements

Any student who wishes to earn the certificate at the MA or PhD level:

Prerequisite
(or taken concurrently with the first certificate course)

• LING 1000 - INTRODUCTION TO LINGUISTICS

Course Requirements

• LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
• LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
• LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
• LING 2146 - SECOND LANGUAGE ACQUISITION
• IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
• LING 2195 - PRACTICUM ESL TEACHING

PhD students must take an additional 3 credit course approved by the TESOL Certificate Advisor

Please Note:

1. LING 2195 - PRACTICUM ESL TEACHING involves supervised language teaching concurrent with or following LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING. Teaching Assistants who are teaching in the English Language Institute automatically fulfill the Practicum requirements, but they must sign up for LING 2195 - PRACTICUM ESL TEACHING once during their teaching terms. Other candidates fulfill the requirement by signing up for LING 2195 - PRACTICUM ESL TEACHING and teaching during that term in an informal ESL course run by the English Language Institute, OR, with permission of the TESOL certificate advisor, another ESL teaching context. The certificate candidate must earn a grade of B or higher in each certificate course.
2. Those applying for graduate degrees will completed the TESOL Certificate program application process after gaining acceptance to the degree program.

Degree Prerequisites for Admission
Applicants must hold a baccalaureate degree or its foreign equivalent with a minimum grade point average of B (3.0 on a 4-point scale). Preference is given to applicants who have studied abroad, worked with international students, and/or have any EFL/ESL teaching experience (including volunteer).

Second Language Learning Prerequisite for Admission

Native speakers of English must have classroom second language learning experience equivalent to at least one year of college level study of a language. Each applicant who is not a native speaker of English must: (1) achieve a score of 100 or higher on the iBT TOEFL (Skill Requirements: Reading and Listening - High; Speaking and Writing - one skill must be at the level of Good) or 7.5 or higher on the IELTS (Skill Requirements: Speaking and Writing - combined minimum of 13) or their equivalent and (2) have good spoken English skills (a score of at least 4 on the ITA interview test administered by the University of Pittsburgh).

Transcripts and CV

Undergraduate transcripts (and graduate if applicable) and a CV (including a list of references) must be submitted as part of the application.

Plan of Study

Students must complete a TESOL certificate plan of study form after consultation with the TESOL Certificate advisor during the first term of study. The student then will work with academic advisor if earning a graduate degree, or the TESOL Certificate advisor if not in a degree program.

Completion of Requirements

When nearing completion of all TESOL certificate requirements, students must apply for graduation from the TESOL Certificate program through the Arts and Sciences Dean's Office. This graduation application is separate from any other degree graduation applications.

Suggested Sequence of Courses

Two-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- Elective for PhD-level students

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- Practicum
- Elective for PhD-level students

Four-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
Elective for PhD-level students

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2146 - SECOND LANGUAGE ACQUISITION

Fall:

- IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- Elective for PhD-level students
- Practicum

Spring:

- Practicum
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT

Note:

*Students must enter the program in the Fall term. Students may complete LING 1000 - INTRODUCTION TO LINGUISTICS prior to the fall term, however.

Department of Theatre Arts

The Department of Theatre Arts, founded in 1982, offers the MA, MFA, and PhD degrees, which integrate training and practice in the theater with scholarship and research in the liberal arts tradition. The minimal requirements for the degrees established by the Graduate Faculty and by A&S Graduate Studies, as described elsewhere in this bulletin, should be read in conjunction with the specific departmental requirements outlined in the Theatre Arts Graduate Handbook. A printed version may be requested by writing the Graduate Student Services Administrator: maggiebupp@pitt.edu.

For additional information on these aspects of study in the theatre arts at Pitt, visit the department website: www.play.pitt.edu.

Admissions

Applicants to the PhD program in Theatre and Performance Studies should demonstrate a desire for rigorous research at the PhD level; potential for teaching excellence; interest in the exploration of artistic practice; and capacity for creative and critical risk-taking (in terms of research, artistic practice, and teaching). An MA in theatre arts is not a prerequisite for admission to the program. The department admits some highly qualified students with BAs directly into the PhD program.

The MA in Theatre and Performance Studies is open to all qualified students who have completed an undergraduate degree or who will complete one prior to registration. An undergraduate major in theatre arts is not a prerequisite for admission to the program. The department understands the MA degree as a preliminary to a PhD in Theatre and Performance Studies, although it may be undertaken for other reasons.

The MFA in Performance Pedagogy is open to all qualified applicants who have completed an undergraduate degree (or who will complete one prior to registration), along with an expectation of five or more years of professional theater experience. An undergraduate major in theatre arts is normally a prerequisite for admission to the program, though exceptions can be made if circumstances warrant. Because candidates will be teaching extensively during their residency, some teaching experience is preferred. Please note: applications for the MFA are accepted every other year.

Financial Assistance

The department offers a number of assistantships and fellowships involving teaching, administrative and technical work, assistance to faculty members, and combined duties. The requirements established by the Office of Admissions and Financial Aid must be met in order for students to be eligible for department teaching assistantships (TAs) and teaching fellowships (TFs). All students receiving TAs and TFs, receive a full aid package that includes tuition, health benefits, and a stipend. Doctoral students also are eligible for university fellowships, including the Provost's Humanities Fellowship and K. Leroy Irvis Fellowship.

Faculty

Dietrich School of Arts and Sciences Faculty

Theatre and Performance Studies in Theatre Arts, PhD

The PhD program in Theatre History and Performance Studies is distinguished by its emphases on historical and contemporary engagement with exigencies of mobility, ranging from exile, migration, and diaspora to translation and adaptation. The program prioritizes the transnational, the global, and the decolonial in theatre history and performance studies. Gender, race, ethnicity, and class function as primary areas of scholarly and artistic enquiry across historical, historiographical, literary, performance, and practice-based research methodologies. The program prioritizes the integration of scholarship with teaching and artistic practice.

The PhD program in Theatre History and Performance Studies trains scholars in historiographical methodology; performance studies; critical theory; historical, performance, and textual analysis. By the completion of their training, students are expected to demonstrate fluency with established scholarly paradigms of the field as well as facility with emergent and cross-disciplinary approaches. The rigorous five-year curriculum is comprised of departmental seminars offered by the graduate faculty and complemented by a range of seminars from across the University's thriving intellectual departments and communities, including History of Art and Architecture, Film Studies, the Center for Latin American Studies, the Global Studies Center, the Gender, Sexuality, and Women's Studies Program, and the Cultural Studies program, among others. The PhD program mentors a students' professionalization by actively supporting publication, conference participation, and membership in professional organizations. The program prepares students to participate in and contribute to scholarly conversations nationally and internationally.

The program's scholarly training is directly linked to teaching and artistic creation. All PhD students instruct a variety of undergraduate courses under mentorship of the faculty, which may include history, dramatic analysis, and/or performance. The PhD program is integral to the department's BA's stated goals of training the next generation of artist-citizens as well as to the creative and critical work of the department's production season. Graduate students often serve as undergraduate mentors and advisors as well as artistic collaborators with the faculty. Through the Special Option, PhD students are mentored on an individual basis towards enhancing a primary, or developing a secondary, fluency with artistic practice and production processes, most often in the area of directing, dramaturgy, or playwriting. The PhD program welcomes applicants with MAs, MFAs, and other Masters degrees.
The PhD program in Theatre History and Performance Studies develops versatile, flexible graduate students with unique creative and critical aptitudes. Graduates of the program are well-qualified and competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and non-academic employment sectors.

Degree Requirements

A minimum of three years or six terms of full-time residency is required. It is not possible to complete the degree on a part-time basis.

72 credit hours, of which 24 can be granted for an approved Master's degree or its equivalent, are required past the BA, made up of courses stipulated in the curriculum and electives (including independent study, directed study, in-training programs, and dissertation credits).

Students are required to demonstrate advanced knowledge in one foreign language sufficient to read criticism and drama in the language and sufficient to allow them to attend a play in the language and understand it reasonably well. The language requirement may be fulfilled in four ways.

# of courses required (list core courses, etc.)

One, Two, or three sections of World Theatre (as designated by the Diagnostic Exam)

Nine seminar-level courses in history, literature, and critical theory of theatre and performance studies. During the first two semesters of a full-time PhD student's program, she or he must take at least three of these seminars in the Department of Theatre Arts.

At least seven of the nine required courses will be advanced graduate seminars in the Department of Theatre Arts (2000 series). The others may be graduate-level (2000 series) listed in any appropriate University department. Courses labeled "research," "directed study," or "independent study" cannot be used to fulfill this requirement, except by approval of the Graduate Faculty. The student's advisor will regularly monitor selection of courses, and approve the overall sequence chosen. No lower-level undergraduate courses numbered 0001-0999 may be applied toward a graduate degree.

PhD Prelim Evaluation

All students who enter the PhD program are required to take the preliminary examination. Students in their first year of doctoral study must take a minimum of three seminars in the department. Their work in those seminars shall constitute the basis for the prelim exam. The exam is designed to assess students' critical thinking, facility with methodology, and writing skills as well as ability to articulately discuss the course material in the selected seminars.

Comprehensive Exam

By the end of their second year, students should begin to consider and discuss with faculty areas for their comprehensive exam that fall into the three categories: Critical Methodologies and Theoretical Discourses; Historical Discourses; Textual Discourses. By the beginning of their third year, three areas of study should be approved. Through the comprehensive examination, students demonstrate both breadth and depth in regards to theatre and performance history, theory, and practice.

Proposal/overview

The prospectus proposes the subject and plan for the completion of the dissertation. The graduate faculty member who will serve as chair for the student's dissertation committee will provide guidance for the completion of the prospectus. Once the committee chair has approved the prospectus, the student will schedule a defense with all of the members of their PhD committee.

Dissertation and Final Examination

The University of Pittsburgh's Graduate and Professional Bulletin outlines the requirements for the final stage of the degree, which is the preparation and defense of a dissertation. This written work, which must embody an extended original investigation of a problem of significance to theatre arts or performance studies, is the capstone to the research program of a student's training.
Performance Pedagogy in Theatre Arts, MFA

Designed to equip working, professional actors with the tools to expand their employment opportunities in teaching at the college and university level, the MFA in Performance Pedagogy at the University of Pittsburgh offers a dynamic synthesis of teaching, practice, and scholarship.

This program is based on the premise that the professional actor has already gained a level of craft and broad experience that can become the foundation for solid teaching skills. Therefore, emphasis is placed on exploration and strengthening of pedagogical techniques as related to areas of acting and performance training.

Each student is given the mentorship of an experienced teacher of performance and works closely with the mentor to create opportunities for independent studies in pedagogy and curriculum development. Students gain experience applying theory to the practice of teaching acting and performance classes every semester, creating a course, conducting master class workshops, working on production assignments, and coaching or advising undergraduate students as needed. Students are encouraged to develop an area of specialty and to develop other areas of training in order to broaden their knowledge and remain competitive in the academic market.

Degree Requirements

The curriculum for the MFA degree in Performance Pedagogy centers around three focus areas:

1. Pedagogical Study
2. History/Literature/Criticism
3. Other Electives.

Each semester students are expected to carry a 15-credit load in addition to teaching two performance classes. Classroom teaching serves as fulfillment of the student's work obligation to the university in addition to providing a laboratory for applying the pedagogical ideas under study.

# of courses required (list core courses, etc.)

60 credits are required for the program: 36-39 credits in pedagogy; 15 credits in History, Literature and Criticism; and 3-6 credits in electives. Core courses include: Techniques in Performance Pedagogy, Course Development, Production Mentorship, and Directed Studies in Pedagogy.

Thesis and Final Examination

The thesis project is the final requirement for the Performance Pedagogy degree. It is comprised of an original, created course plus a substantial written document that serves as a teaching guidebook for other instructors interested in using the thesis topic in the classroom. The thesis document identifies a pedagogical question, investigates that question through research or classroom work, and then identifies conclusions reached. Thesis documents should be written in such a way that a performance teacher could use the document as a study guide on the topic in question. Thesis documents typically range from 40-80 pages in length and are directly connected to the created course devised by the student.

Thesis planning occurs in the fall semester of the second year. The thesis document must be completed and approved by a two or three person committee selected by the student. An outline of the thesis proposal and the names of the thesis committee are due at the beginning of the final semester. At least one committee member must be from the performance faculty. All thesis documents require a committee signature page. The student must submit the final document (after committee approval) by the end of April of the graduating year. Students present an oral defense of the Thesis to their committee.

Theatre and Performance Studies in Theatre Arts, MA

The MA degree provides students with the necessary research skills to productively engage in scholarly conversations about theatre and performance. Because the department is committed to the integration of theory with practice, students have the opportunity to engage in various types of practical work while focusing their academic studies toward a final Comprehensive Examination or MA Thesis.
Interdisciplinary Programs

Computational Modeling & Simulation, PhD

Requirements

Course Requirements

http://cmsp.pitt.edu/course-requirements

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Comprehensive Exam

The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Course Requirements

http://cmsp.pitt.edu/course-requirements
A minimum of 24 credits of graduate level courses from categories I - IV will be required. It is anticipated that students entering the program will be able to complete the six core courses in categories I - III in their first year and the concentration requirements in the second year.

Computational Modeling and Simulation Seminar Series: All students enrolled in the program are expected to attend the Computational Modeling and Simulation seminar program each semester they are enrolled. Students will receive one credit for each term they are enrolled in the Seminar Series. Seminars will be held typically twice per month, during the academic year. Each enrolled student will be required to give a seminar in this series, at least six months before the PhD defense.

University Credit Requirement: All students in the program must satisfy the university's requirement of a minimum of 30 credits for an MS. At least 24 of these credits will be satisfied by the core program, including the concentration area, described above, and at least 4 credits will be satisfied by enrollment and participation in the Computational Modeling and Simulation seminar program. The remaining credits will be met by directed study (i.e., research).

Interdisciplinary Studies - Medical Informatics Concentration, PhD

Requirements for the PhD

Students pursuing the Doctor of Philosophy degree in ISP must complete a program of study approved by an advisory committee of faculty. A total of 72 graduate credits are required for this degree. This program must include:

(a) The required credits:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS
- ISSP 2160 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE or
- CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

(b) Two courses from the following:

- ISSP 2170 - MACHINE LEARNING or
- CS 2750 - MACHINE LEARNING
- ISSP 2230 - INTRO NATURAL LANGUAGE PROCESSING or
- CS 2731 - INTRO NATURAL LANGUAGE PROCESSING

(c) A theory course from both A and B

A

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

B
(d) an additional course from either A or B

(e) four advanced courses numbered 2000 or higher

(must be approved by advisor)

(f) GPA of 3.0 or better

(g) Successful defense of a proposal and doctoral dissertation

Concentration Requirements

http://www.isp.pitt.edu/about/degrees

The curriculum assumes that a student already has training in a health care field. If this is not so the faculty will select a set of courses that teaches the student basic medical knowledge, and the student may take these courses as electives.

**Computational Modeling & Simulation, MS**

Requirements

**Course Requirements**

http://cmsp.pitt.edu/course-requirements

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

**Preliminary Exam**

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the he program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

**Comprehensive Exam**
The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Course Requirements

At least 24 of these credits will be satisfied by the core program, including the concentration area, described above, and at least 4 credits will be satisfied by enrollment and participation in the Computational Modeling and Simulation seminar program. The remaining credits will be met by directed study (i.e., research).

Interdisciplinary Studies - Medical Informatics Concentration, MS

Requirements for the Master's Degree

Overlapping with ISP requirements of the Dietrich School of Arts and Sciences (A&S). Students should speak with their advisors to make sure they complete both sets of requirements.

Students pursuing the Master of Science degree in ISP must complete a minimum of 24 credits including:

(a) First year students are encouraged, but not required, to take the following:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS (fall)
- ISSP 2030 - ADVANCED TOPICS IN INTELLGNC (spring)
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

(b) The required courses:

- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC

Two courses from the following:
• ISSP 2170 - MACHINE LEARNING or
  • CS 2750 - MACHINE LEARNING

• ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG or
  • CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG

(c) A theory course from both A and B

A

• BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
• BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
• STAT 2131 - APPLIED STATISTICAL METHODS 1
• STAT 2132 - APPLIED STATISTICAL METHODS 2

B

• CS 2110 - THEORY OF COMPUTATION
• CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

(d) Four advanced courses numbered 2000 or higher

(must be approved by advisor)

(e) GPA of 3.0 or better

(f) MS-Level Project

Approved by the faculty after an oral prospectus presentation, involving significant research, design, or development work and a written report.

Concentration Requirements

http://www.isp.pitt.edu/about/degrees

The curriculum assumes that a student already has training in a health care field. If this is not so the faculty will select a set of courses that teaches the student basic medical knowledge, and the student may take these courses as electives.

Joseph M. Katz Graduate School of Business

The Joseph M. Katz Graduate School of Business creates and disseminates knowledge that enhances the quality of the management of organizations. The Katz School, through faculty research programs and our doctoral program, produces high-quality research in areas of importance and infuses knowledge created by this research into all programs, but especially the MBA and related professional programs. Our school's reputation, primarily resulting from our MBA programs and our doctoral program, allows us to attract international, national, regional, and campus partners, with whom collaboration results in specialty professional programs with the MBA program as a foundation. This includes areas such as international business, technology management/engineering, and the health sciences. Our culture of teamwork, adaptability, and flexibility permits the school to readily adapt to future environments and strategic opportunities.

The Katz School is accredited by AACSB-the International Association for Management Education.

Application Procedures

Please refer to individual program descriptions in this section for further information regarding application procedures for MBA and MS programs and the doctoral program.

Degree Options

The Katz School awards the Master of Business Administration (MBA) as well as Specialized Master of Science (MS) degree programs and the Doctor of Philosophy (PhD). Fulltime and part-time programs are available in the following areas: finance, management of information systems, marketing, operations management, organizational behavior and human resources management, and strategy.

In addition to the above degrees, the Katz School offers a number of dual and joint degree options for students who wish to specialize and add a second professional degree to the MBA:

- MBA and Master of International Business
- MBA and Master of Public and International Affairs
- MBA and MS degrees in engineering
- MBA and Master of Health Administration
- MBA and Master of Social Work
- MBA and Juris Doctorate

In cooperation with the University of Pittsburgh's College of Business Administration, the Katz School offers an accelerated BSBA and MS in Accounting program.

- 3+1/BS in Business Administration/MS in Accounting

For further information regarding these dual- and joint-degree programs, please refer to MBA Program Descriptions.
Special Academic Opportunities

The Katz School offers the following special opportunities/programs:

Professional Workshops

Students participate in a variety of workshops throughout the program. During the Transition Module, students take a self-assessment to identify strengths and weaknesses in various managerial skills. Results of this capability assessment and career evaluation exercise help students determine those workshops that will be most beneficial to them such as presentation skills, project management, conflict resolution, creativity, problem solving, and time management.

Study Abroad

As part of a 6-credit MBA international elective course, students spend four to six weeks studying at a school in another country (past countries include the Czech Republic and India).

International Field Studies

As part of a 3-credit international elective course, students spend 10 days in another part of the world studying business culture and practices and visiting different companies in other parts of the world (regions visited in the past include Eastern Europe and Latin America).

Corporate Connections

There are also a number of programs that bring CEOs of major firms to the Katz School to meet and interact with students including Best Practice Partners, Executive Faculty, Executive Women's Panel, Executive Spotlight, and the Katz on Wall Street Panel.

Graduation

A special Katz School graduation ceremony for all graduating Master's and doctoral students is held at the end of April on campus.

Doctoral Program

The theoretically based, managerially relevant doctoral program in business administration seeks to prepare students for careers in research and teaching in management and related areas at leading business schools and universities. This is accomplished by fostering a learning environment in which students can achieve intellectual growth and fulfillment. Successful completion of the doctoral program therefore entails much more than the satisfaction of a set of formal requirements. Doctoral students are expected to assess their knowledge and skills in regular consultation with the faculty and to develop a set of educational experiences that will fulfill their needs and facilitate the pursuit of personal goals.

Contact Information

University of Pittsburgh  
Joseph M. Katz Graduate School of Business  
Doctoral Program  
Director  
282 Mervis Hall  
412-648-1522  
www.katz.business.pitt.edu/phd
Application Procedures

All application materials must be submitted by January 1 of the year of expected entry into the program. The basic prerequisite for admission to the doctoral program is the equivalent of an American bachelor's degree. Many applicants also have advanced degrees and professional experience. Scores on the GMAT or GRE (as well as on the TOEFL for international students) are required, along with recommendation letters and transcripts.

Financial Aid

Most financial aid for doctoral students is in the form of an assistantship that requires research and some teaching. The assistantship provides a stipend, tuition remission, and health insurance. Assistantships are available to domestic as well as international students. Funds associated with specific research projects are sometimes available to students, and faculty often help students obtain funding for dissertation research.

Sequence of Study

Progress to the PhD consists of: the seminar phase, comprehensive examinations, teaching requirement, and the dissertation. Students complete course work in the seminar phase. This is the time during which the student sets scholarly standards and goals. Every student prepares a written statement called the Field Statement upon declaring the student's areas of study. This is also the time to form relationships with faculty members and begin developing research skills.

Most doctoral courses involve research projects and the majority of students, including all those with assistantships, work on faculty research from an early stage. A minimum of 72 post baccalaureate credits is required for the PhD degree. A maximum of 30 credits from a previously earned master's degree may be applied.

Formal requirements in the seminar phase are:

- Work to ensure a basic level of competence in the disciplines and functions relevant to management. Students choose 6 credits of MBA course work. Some or all of these requirements may be exempted depending on educational background and doctoral course objectives.
- Eight courses in the major area of study and three courses in the minor area of study or a seven course research methodology minor.
- A 6-credit teaching requirement.
- At least four courses in research methodology or a seven course research methodology minor.
- A grade point average of 3.3.
- A preliminary evaluation (comprehensive examinations).

Comprehensive examinations are written and oral examinations in both the major and minor area of study. Each student's exams are designed individually, focusing on the area(s) of study. The student is expected to demonstrate comprehensive ability, meaning the ability to synthesize and build on all that the student has learned.

Dissertation

Doctoral students are required to demonstrate their capacity to engage in a sustained research effort by completing a doctoral dissertation. The dissertation entails an independent investigation of a problem of acknowledged significance and size in a management-related area. Only if the dissertation is judged to demonstrate such competence, after a formal defense in a final oral examination, does the department recommend the awarding of a degree.

For more details on requirements of doctoral students, see Regulations Pertaining to Doctoral Degrees.

Teaching

All Katz doctoral students are required to teach six credits as the primary instructor, at the University of Pittsburgh as part of their graduation requirements.
Timeline to Graduation

Most students earn the PhD in four years. The seminar phase typically lasts two years, while the comprehensive exams and the dissertation together require an additional two years to complete.

Statute of Limitations

The statute of limitations represents the maximum time permitted for the fulfillment of all requirements for the PhD degree. The statute of limitations is as follows:

1. Comprehensive examinations must be completed no later than the seventh term of study.
2. The dissertation overview examination must be successfully completed before the end of the fourth year.
3. The dissertation defense must be completed successfully before the end of the sixth year.

Exceptions to the Katz Doctoral Program statute of limitations, not to exceed the University of Pittsburgh's statute of limitations, must be approved by the Katz Doctoral and Research Committee.

Placement

The Katz School's goal is to place PhD graduates in universities that consistently produce high-quality business research, and a successful record has been established in this regard.

Individual Curriculum Design

Students must choose from the following areas of study leading to the PhD in Business Administration:

- Accounting
- Business Analytics and Operations
- Finance
- Information Systems and Technology Management
- Marketing
- Organizational Behavior and Human Resource Management
- Strategic Management

Within the framework of these standard areas, every PhD student plans a unique, individual area of study. A student may choose any of the areas as a primary (major) area of study or as a secondary (minor) area of study. Each of the areas of study provides additional choices to meet student interests and developmental needs. All have subspecialties; all explore a range of current topics. In addition, to expand the option in the core areas, students are invited to draw on courses and research opportunities at the Katz School, as well as other parts of the University, and other institutions.

Two goals must be balanced in planning an individual program. One is to acquire a sound body of knowledge in recognized disciplines and methods. The other is to choose a mix of courses, mentors, and research topics geared to the student's own interests and talents. Ideally, this will lead to a truly original dissertation, followed by a career of meaningful research.

MBA and Master's Programs

The following section details the full range of programs for students interested in pursuing an MBA, an MS, or an MBA and another degree at the same time. Unless otherwise noted, additional information regarding these programs may be obtained by contacting the Admissions Office.

Contact Information
Application Procedures

https://www.katz.business.pitt.edu/apply

Applicants should have earned an undergraduate degree from an accredited U.S. college or university or its equivalent and should demonstrate quantitative competence via academic coursework and GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or a personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is required, and for international applicants, the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) is also a requirement. International applicants should also see the section on Admissions of International Students in the front section of this bulletin.

Financial Assistance

The primary sources of financial assistance for incoming full-time Katz MBA students are tuition scholarships and loans. Limited scholarships are available for the MS programs.

Merit-based scholarships are awarded in various dollar amounts and are directly applied against tuition charges. Katz School scholarships are available to full-time U.S. citizens, U.S. permanent residents, and international students. Award notifications are mailed along with the official admission decision. While consideration for scholarship candidate is independent of the admissions decision, there is no additional application required.

There are several educational loan programs available for students. All of them offer very reasonable interest rates.

Tuition and Fees

Financial Information

Actual tuition for the one-year MBA and two-year MBA programs is approximately the same. However, students in the two-year MBA program will incur additional cost in academic fees, as they will be attending the equivalent of one additional term.

Master's Program Academic Standards

The following section details academic standards for the full-time Masters programs.

Good Academic Standing

In order to maintain good academic standing, a cumulative grade point average of 3.00 or above in all courses applicable to the degree is required throughout the program and for graduation from the Katz program.

Academic Probation and Dismissal Policy
Any student whose GPA falls below 3.00 at any time during the program may be subject to academic probation and/or dismissal from the full-time program. Exceptions to the school's guidelines and procedures may be considered only through written petition to the assistant dean for Master's programs.

**Dean's List**

The Dean's List for full-time students is compiled at the end of each term and consists of 20 percent of the student body with the highest grade point averages (3.75 or above).

**Other Academic Honors**

The Katz School recognizes high academic achievement and leadership through the following honors and awards.

- **Albert Wesley Frey Prize** is awarded to a full-time MBA student for the highest academic performance among all full-time graduating students.

- **Beta Gamma Sigma** is an international honor society recognizing the outstanding academic achievements of students enrolled in collegiate business and management programs.

- **Brosius Creativity Award** is awarded to those students demonstrating exceptional creativity in their program of study.

- **Dean's Outstanding Student Service Award** is awarded at graduation to an MBA student for exemplary service and leadership.

- **Marshall Alan Robinson Prize** is awarded at graduation to a full-time MBA student who has demonstrated academic and professional excellence in the MBA program.

- **Outstanding Professional MBA Student of the Year Award** is awarded at graduation for exemplary academic performance and leadership.

- **Outstanding Master of Science Student of the Year Award** is awarded at graduation for exemplary academic performance and leadership.

- **Outstanding Supply Chain Management Masters Student Award** is awarded at graduation for exemplary academic performance and leadership.

- **Peter Stipanovich Award** is awarded to the outstanding full-time MBA student in finance.

- **Sheth Scholar in Marketing** is awarded to two students each year for exemplary performance in marketing course work.

- **Vincent W. Lanfear Prize** is awarded to a professional MBA student for highest academic performance among all professional graduating students.

**Transfer of Graduate-Level Courses**

Students are permitted to transfer up to 6 graduate credit hours (for MS) and 17 graduate credit hours (for the one year MBA program), 19 (for the two year MBA program) from other AACSB-accredited MBA programs. However, these credits may not have been applied to another degree. If a student earned a degree at another school, the student must verify by letter that the courses desired for transfer did not apply to that degree; if a degree was not earned then a letter is not necessary. All courses must be completed with a grade of "B" or higher to be eligible for transfer consideration.

If a student wishes to have previously earned graduate credits applied to the Masters degree as transfer credits, the appropriate forms must be completed and returned to the school's student records office. The appropriate faculty members will inform the student of the results after a review.

If a student must relocate during his or her studies at the Katz School, one-third of the total required credits may be taken at an AACSB-accredited MBA program to complete the MBA degree at the University of Pittsburgh. Courses taken at other institutions must be approved by the Katz School faculty. It is therefore recommended that each course be pre-approved for transfer before enrollment.

A student must have earned two-thirds of their total required credits from the University of Pittsburgh in order to qualify for an MBA from the Katz School. Note that all transfer credits are subject to the guidelines imposed by the statute of limitations.
Statute of Limitations

The Katz School requires completion of all degree requirements within four years of original registration. Under extraordinary circumstances, this statute may be extended, one year at a time, to a maximum of six years. The director of student services, upon written request, will consider extension of the statute of limitations. A detailed request must be filed before the end of the statutory period. Under no circumstances will a student be allowed more than six years to complete the degree.

This statute of limitations also governs the acceptability of transfer credits. Credits earned outside the Katz School must have been earned within the four-year period of the date of graduation. Credits more than four years old but less than six years as of graduation will be considered for acceptance upon written petition to the associate dean.

Academic Integrity

All students are expected to adhere to the school's Code of Academic Standards, copies of which are available in the dean's office. These standards follow the University's guidelines with several procedure changes. Students may also contact the school's academic integrity officer for advice or clarification of academic integrity guidelines.

Career Management

The Career Management team assists all full-time and professional students, as well as the students in the specialized degree programs. The mission is to be a collaborative career management partner with both students and corporate recruiters, as well as an industry leader in professional development. The team is committed to providing advice in a manner that is designed to tailor a career path to fit each student's unique strengths and professional competencies, and develop and execute a job search plan to secure employment post-graduation. More information on the career management team can be found at https://www.katz.business.pitt.edu/recruiters-and-companies

Masters Programs & Student Services

The goal of the MBA and MS Programs team is exceptional student satisfaction. The Masters Program Office staff are subject matter experts who assist advisors and faculty in the delivery of various Masters Programs. The team also manages student events and activities, including Orientation, Academic Workshops and Professional Skills Development. The Program Office also manages matriculation, registration, curriculum delivery and graduation processes for Masters Students.

The Program advisors are part of the Program Office Student Services team. The advisors are responsible for advising students regarding requirements and procedures of their program. The advisors will verify degree requirements, and are responsible for making sure students stay on track for graduation. The academic advisors work very closely with the career advisors to ensure overall cohesiveness.

Faculty

Katz Graduate School of Business Faculty

Programs & Courses

Business Administration, PhD

Executive Master of Business Administration, MBA
The Executive MBA (EMBA Worldwide) Program is offered in Pittsburgh and Sao Paulo. We offer the academic rigor of the Katz MBA, but in a format tailored to experience professions. Whether our students work in upper management at a corporation, are the founder of a budding startup, or come from a technical background such as engineering or medicine, EMBA Worldwide is designed to help them elevate their careers to new heights.

The program begins in May and ends in October of the subsequent year. Students complete a minimum of 48 academic credits. In addition, the Global Executive Forums (GEF make Katz EMBA Worldwide a truly global experience. You'll travel to three locations (Pittsburgh twice, Prague and Sao Paulo) for a week of study, cultural development activities, and visits with Katz EMBA Worldwide alumni and guest speakers.

For additional program information, contact Christine Kush, Director of Operations, EMBA Worldwide, 515 Alumni Hall, Phone: 412-648-1806, e-mail cakush@katz.pitt.edu or visit www.business.pitt.edu/katz/emba.

Program Requirements

- BACC 2256 - STRATEGIC COST MANAGEMENT
- BACC 2801 - FINANCIAL ACCOUNTING
- BFAE 2801 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISIONS
- BFIN 2306 - FINANCIAL MANAGEMENT
- BMKT 2306 - MARKETING MANAGEMENT
- BMIS 2811 - INFORMATION TECHNOLOGY AND BUSINESS VALUE
- BIND 9661 - LEARNING COMMUNITY WORKSHOP
- BOAH 2422 - MANAGING HUMAN RESOURCES IN A GLOBAL ECONOMY
- BOAH 2519 - NEGOTIATIONS 1
- BOAH 2801 - ORG BEHAV: LDRSHP & GRP EFFECT
- BQOM 2531 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BQOM 2801 - STATSTCL ANAL: UNCERT
- BQOM 2811 - DCSN TECHNLGY IN MFG & OPERATNS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSEO 2407 - STRATEGIC MANAGEMENT
- BSPP 2016 - STRATEGIC VISIONING FOR A GLOBAL FUTURE

Executive Masters of Business Administration Healthcare, MS

The Katz-UPMC Executive MBA in Healthcare (EMBA Healthcare) is designed for healthcare professionals who are seeking to advance their careers; it equips students with the skills and tools that they need to lead healthcare organizations into the future. It is designed for experienced professionals who are looking to take the next step in their careers. The University of Pittsburgh Joseph M. Katz Graduate School of Business and UPMC (University of Pittsburgh Medical Center) created the Katz-UPMC Executive MBA in Healthcare Program to prepare individuals to lead healthcare organizations. The program emphasizes the management and technical skills that healthcare professionals need the most.

The EMBA Healthcare Program begins in May and ends in December of the subsequent year. Students take 48 credits, including 36 credits in the core MBA curriculum, and 12 credits of electives and practicum. Students will meet once a month for two full-day sessions at the University of Pittsburgh's campus. Some courses will be interspersed with guided study or distance learning.

For additional information, contact Leigh Zuccher, Associate Director Recruiting and Business Development, 513 Alumni Hall, Phone: 412-648-1607, e-mail lzuccher@katz.pitt.edu or visit www.emba.pitt.edu.

Program Requirements

- BACC 2801 - FINANCIAL ACCOUNTING
- BFIN 2306 - FINANCIAL MANAGEMENT
- BMIS 2811 - INFORMATION TECHNOLOGY AND BUSINESS VALUE
- BMIS 2911 - INFORMATION TECHNOLOGY AND ELECTRONIC MEDICAL RECORDS
Master of Business Administration - One-Year Program, MBA

MBA Degree Requirements

Students in the one-year program must fulfill the following requirements in order to receive the full-time MBA degree:

1. A minimum of 51 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

Students in the two-year program must fulfill the following requirements in order to receive the full-time MBA degree:

1. A minimum of 57 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.00

MBA Core Curriculum

The following core courses are required of all full-time MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Note:

The remaining credits required for the degree are to be taken in the student's area of study and in other elective course work.

Areas of Study

In place of majors, the Katz School offers areas of study in finance, management of information systems, marketing, organizational behavior and human resource management, operations management strategy, and doctoral studies. Students can customize their MBA to suit their career goals by choosing from a wide array of electives in these fields.

Students may also choose to take elective courses through other professional schools at the University including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Information Sciences.

A description of each of the areas of study follows:
Finance

The study of finance is designed to prepare students for managerial careers in corporate finance, investment analysis, financial consulting, and financial institutions. The coursework presents an integrated treatment of the economic foundations of finance, and the functions of capital markets and financial institutions. The courses provide a thorough understanding of how capital and financial markets operate, and how to manage corporate assets and financial claims in the marketplace.

Management of Information Systems

An MBA with a focus in information systems (IS) prepares students to lead and manage by helping them develop their ability to recognize and capitalize on opportunities to use information systems to increase efficiency, support growth, and enable innovation. Though course and project work related to the specification, evaluation, and management of technology-enabled business initiatives, the IS concentrations available within the Katz MBA program prepare student for careers as leaders in both the IS functional area (e.g. CIO, CTO, Director of IT) and in other business areas that rely heavily on information technology for success (e.g. Supply Chain Management, Customer Analytics/Marketing Research, Financial Operation management, etc.).

Students seeking a stronger foundation in the management of IS and greater depth in their MBA specialty should consider the Katz MBA/MS-MIS Dual Degree program. This program combines a full set of MBA courses, a core of IS technical and management courses, and a range of specializations including: IS Management, Supply Chain Management, Customer Analytics, Entrepreneurship/New Venture Creation, and Healthcare and IS.

Marketing

This area of study is designed to prepare students for careers in marketing management. Marketing is a critical decision area not only in commercial (for profit) organizations but also in healthcare, government, educational, and other non-profit institutions. Among the topics discussed are marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resources Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Operations Management, Decision Sciences, and Artificial Intelligence

The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of the management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units.

Ethical Leadership and Public Affairs
This area focuses on the management of public affairs and corporate social policies. Most business firms operate in complex environments where governmental regulations, public policies, social pressure groups, legal and political systems, technological innovations, and ethical standards directly affect managerial decision-making. The strategies and techniques for coping with these environmental forces and for managing a firm's external social relations are given special attention in a series of advanced courses.

Part-Time/Evening MBA Program

The evening program offers nearly the same curriculum and encompasses the same teaching philosophies as the full-time MBA program. The MBA can be earned in three years by taking approximately 6 credits per term. The program runs year-round with fall, spring, and summer trimesters of 13 or 14 weeks each. Classes are conducted on weekday evenings and select weekends.

Admissions

Students are admitted in the fall, spring, and summer terms. Applicants should check the school's Web site for preferred deadlines.

Candidates must have a bachelor's degree from an accredited U.S. school or the non-U.S. equivalent, and demonstrated quantitative competence via academic coursework and GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is required, and for international applicants, the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) is also a requirement.

Tuition and Fees

http://www.ir.pitt.edu/tuition/index.php

Evening MBA students pay on a per credit basis each term (1.5-8.5 credits considered part-time). In addition to the University-wide fees, a professional workshop fee is required each term.

Academic Probation and Dismissal Policy

If the student's GPA falls below 3.0 upon completion of 12 credits or any time thereafter, the student will be subject to academic probation and/or dismissal from the program. Exceptions to the school's guidelines and procedures may be considered only through written petition to the assistant dean for MBA programs.

Part-Time/Evening Degree Requirements

All students must fulfill the following requirements in order to receive the part-time MBA degree:

1. A minimum of 51 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

Part-Time/Evening MBA Core Curriculum

The following core courses (totaling 22.5 credits) are required of all evening MBA students. Electives are similar to the full-time MBA offerings.

- BACC 2401 - FINANCIAL ACCOUNTING
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
One-Year Program

In 1963, the Katz School launched a unique MBA program that presented the classical two-year American MBA format in one calendar year. This is not a general management program, but contains full concentration in all business disciplines—all conducted in parallel with the core of business, arts and sciences, and logistically integrated by the world-class faculty dedicated to the merger of research and teaching.

The one-year MBA is typically for people who do not require an internship to reach their career goals. It begins in May and ends in April and, through its module format, covers the same ground that a traditional MBA program does in two years.

Master of Business Administration - Two-Year Program, MBA

MBA Degree Requirements

Students in the one-year program must fulfill the following requirements in order to receive the full-time MBA degree:

1. A minimum of 51 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

Students in the two-year program must fulfill the following requirements in order to receive the full-time MBA degree:

1. A minimum of 57 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.00

MBA Core Curriculum

The following core courses are required of all full-time MBA students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Note:
The remaining credits required for the degree are to be taken in the student's area of study and in other elective course work.

Areas of Study

In place of majors, the Katz School offers areas of study in finance, management of information systems, marketing, organizational behavior and human resource management, operations management strategy, and doctoral studies. Students can customize their MBA to suit their career goals by choosing from a wide array of electives in these fields.

Students may also choose to take elective courses through other professional schools at the University including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Information Sciences.

This program combines a full set of MBA courses, a core of IS technical and management courses, and a range of specializations including: IS Management, Supply Chain Management, Customer Analytics, Entrepreneurship/New Venture Creation, and Healthcare and IS.

Marketing

This area of study is designed to prepare students for careers in marketing management. Marketing is a critical decision area not only in commercial (for profit) organizations but also in healthcare, government, educational, and other non-profit institutions. Among the topics discussed are marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resources Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Operations Management, Decision Sciences, and Artificial Intelligence
The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of the management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

**Strategy**

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units.

**Ethical Leadership and Public Affairs**

This area focuses on the management of public affairs and corporate social policies. Most business firms operate in complex environments where governmental regulations, public policies, social pressure groups, legal and political systems, technological innovations, and ethical standards directly affect managerial decision-making. The strategies and techniques for coping with these environmental forces and for managing a firm's external social relations are given special attention in a series of advanced courses.

**Part-Time/Evening MBA Program**

The evening program offers nearly the same curriculum and encompasses the same teaching philosophies as the full-time MBA program. The MBA can be earned in three years by taking approximately 6 credits per term. The program runs year-round with fall, spring, and summer trimesters of 13 or 14 weeks each. Classes are conducted on weekday evenings and select weekends.

**Admissions**

Students are admitted in the fall, spring, and summer terms. Applicants should check the school's Web site for preferred deadlines.

Candidates must have a bachelor's degree from an accredited U.S. school or the non-U.S. equivalent, and demonstrated quantitative competence via academic coursework and GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is required, and for international applicants, the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) is also a requirement.

**Tuition and Fees**

http://www.ir.pitt.edu/tuition/index.php

Evening MBA students pay on a per credit basis each term (1.5-8.5 credits considered part-time). In addition to the University-wide fees, a professional workshop fee is required each term.

**Academic Probation and Dismissal Policy**

If the student's GPA falls below 3.0 upon completion of 12 credits or any time thereafter, the student will be subject to academic probation and/or dismissal from the program. Exceptions to the school's guidelines and procedures may be considered only through written petition to the assistant dean for MBA programs.

**Part-Time/Evening Degree Requirements**
All students must fulfill the following requirements in order to receive the part-time MBA degree:

1. A minimum of 51 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

Part-Time/Evening MBA Core Curriculum

The following core courses (totaling 22.5 credits) are required of all evening MBA students. Electives are similar to the full-time MBA offerings.

- BACC 2401 - FINANCIAL ACCOUNTING
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BMIS 2409 - INFORMATION SYSTEMS
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT

Two-Year Program

The two-year MBA program is built on the solid foundation of the established one-year program. Students begin in August, add a professional internship during the summer, and return in the subsequent fall. After finishing the core curriculum, students may choose up to 34.5 credits from electives across the school. Graduation takes place in April of the second year.

The two-year MBA is typically for people who wish to develop their professional focus, and who need an internship to confirm and advance that professional focus. Individualized coaching and mentoring programs are designed to support the professional growth and development of each student.

Area of Accounting

Accounting

The Katz Accounting Doctoral Program discipline prepares graduates to succeed as accounting scholars and educators at top business schools in the United States and abroad. The program features rigorous coursework, thorough research training and close working relationships between doctoral students and faculty to prepare students to be leading accounting academics. Our graduates have an excellent track record of placements at research-oriented business schools and in succeeding in those environments.

Accounting students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within accounting, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, accounting doctoral students typically complete Katz accounting doctoral seminars (BACC 3000 and above) that may include the courses listed below. Students will take additional coursework in areas such as Finance, Econometrics, Game Theory, Cognitive Psychology, Experimental Design and other areas as appropriate. These remaining courses toward the student's program of study must be approved in
advance by the Accounting faculty and the Katz Doctoral Program Director. Students are also required to register for independent study courses and independent dissertation work/credits to complete the degree requirements.

Accounting doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year. The financial assistance is awarded one year at a time.

Curriculum

The following accounting seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BACC 3001 - INTRODUCTION TO ACCOUNTING RESEARCH
- BACC 3010 - INDEPENDENT STUDY IN ACCOUNTING
- BACC 3014 - EXPERIMENTAL RESEARCH IN ACCOUNTING
- BACC 3017 - ACCOUNTING WORKSHOP
- BACC 3021 - ARCHIVAL RESEARCH IN MANAGERIAL ACCOUNTING
- BACC 3050 - CRITICAL THINKING IN ACCOUNTING
- BACC 3052 - CRITICAL THINKING IN ACCOUNTING II
- BACC 3099 - READINGS IN ACCOUNTING
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Accounting and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which prepares students to pass the CPA while gaining technical skills in multivariate data analysis, data programming, data mining, and database management. In addition, the program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the 150 credit-hour requirement of Pennsylvania and many other U.S. states.

Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 40.5 credits):

- BACC 2251 - FORENSIC ACCOUNTING
- BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING
- BACC 2254 - ADVANCED FINANCIAL ACCOUNTING
- BACC 2258 - STRATEGIC COST MANAGEMENT
- BACC 2559 - INDIVIDUAL TAX ACCOUNTING AND PLANNING
- BACC 2252 - CORPORATE TAX ACCOUNTING AND PLANNING
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BSEO 2315 - BUSINESS LAW
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BMIS 2588 - DATA BASE MANAGEMENT
- BQOM 2578 - DATA MINING

Programming course (choose one):

- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
BMIS 2526 - DATA PROGRAMMING WITH R

Elective Courses (Required minimum 3.0 credits):

- BACC 2523 - ACCOUNTING DATA ANALYTICS

Programming course (choose one):

- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
- BMIS 2526 - DATA PROGRAMMING WITH R

Accounting, MS

The Master of Science in Accounting is a 30 credit program designed to be completed in two terms, on a full-time basis. The program prepares students for leadership roles in financial accounting and managerial accounting. Students gain general business knowledge and specialized accounting skills necessary for success. In addition, the program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the 150 credit-hour requirement of Pennsylvania and many other U.S. states.

Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 24 credits):

- BACC 2251 - FORENSIC ACCOUNTING
- BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING
- BACC 2254 - ADVANCED FINANCIAL ACCOUNTING
- BACC 2258 - STRATEGIC COST MANAGEMENT
- BACC 2252 - CORPORATE TAX ACCOUNTING AND PLANNING
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BSEO 2315 - BUSINESS LAW
- BACC 2559 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Elective Courses (Required minimum: 6 credits):

- BACC 2542 - ACCOUNTING AND FINANCE LAW
- BACC 2543 - TAX POLICY 1
- BACC 2544 - TAX POLICY 2
- BACC 2557 - ACCOUNTING RESEARCH AND WRITING
- BACC 2541 - SEC REPORTING AND DISCLOSURE
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BACC 2534 - CONTROLLERSHIP
- BACC 2524 - INTERNAL AUDIT: RISK & ADVISORY
- BACC 2540 - INTERNATIONAL TAXATION
- BACC 2100 - MACC INTERNSHIP

Area of Business Analytics and Operations
Business Analytics and Operations

The Business Analytics and Operations discipline offers flexible options for a doctoral student in a variety of related research topics including Supply Chain Management, Data Mining and Business Analytics, Decision Sciences, Project Management, Revenue Management, Simulation Methodology, Stochastic Modeling and Applied Statistical Methods, and Business Analytics. These programs require coursework for two years, followed by a period of dissertation-related research. The doctoral program prepares students for a career in teaching and research at institutions of higher learning.

Business Analytics and Operations students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Business Analytics and Operations, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses (BQOM 3000 and above), as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, Business Analytics and Operations doctoral students will complete Katz doctoral seminars (BQOM 3000 and up) that may include Linear and Nonlinear Programming, Simulation, Statistics, Stochastic Processes, Decision Theory, Current Topics in Operations, Value Chain, Data Mining, Business Analytics, Project Management, and Readings in Operations. Students may also take additional coursework from Katz seminars in other disciplines such as Marketing or Finance. They may request courses from the Industrial Engineering Department and from other University of Pittsburgh approved graduate courses in addition to approved courses from other cross-registration eligible institutions.

The following business analytics and operations doctoral seminars may be offered by the Katz Doctoral Program (subject to student enrollment). Students may supplement their programs of study with additional courses as noted. The following list suggests seminars and courses that students may use, with the permission of their advisors and the Katz Doctoral Program Director, to satisfy the course work phase of their programs of study.

Curriculum

Business Analytics and Operations doctoral students are provided with up to five years (14 terms) of financial support. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

- BQOM 3016 - CURRENT TOPICS IN OPERATIONS
- BQOM 3020 - SIMULATION
- BQOM 3023 - DATA MINING SEMINAR
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 3099 - READINGS IN OPERATIONS RESEARCH
- BFAE 3001 - MICROECONOMICS
- IE 2081 - NONLINEAR OPTIMIZATION
- IE 2100 - SUPPLY CHAIN ANALYSIS
- IE 2007 - STATISTICS AND DATA ANALYSIS
- IE 3094 - MARKOV DECISION PROCESSES
- PSYED 3408 - HIERARCHICAL LINEAR MODELING
- PSYED 3417 - STRUCTURAL EQUATION MODELING
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Supply Chain Management and Business Analytics, MS (STEM-designated)

This STEM-designated program combines broad supply chain knowledge in sourcing, logistics, planning, process improvement, inventory, and pricing with in-depth business analytics skills in data analysis, data mining, data programming, and database management. Streamline process, manage risk, and deliver results in today's global business environment.
Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 28.5 credits):

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BMIS 2526 - DATA PROGRAMMING WITH R
- BMIS 2588 - DATA BASE MANAGEMENT
- EBL requirement: BIND 2024 - CONSULTING FIELD PROJECT; BIND 27** Global Research Practicum; OR Internship that has been approved by the faculty director (may substitute BQOM 2139 with faculty director approval)

Supply Chain Elective Courses (Minimum 6.0 credits):

- BQOM 2139 - SIX SIGMA THEORY AND PRACTICE
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Analytics Elective Courses (Minimum 3.0 credits):

- BQOM 2537 - FORECASTING
- BMKT 2544 - SHOPPER ANALYTICS
- BMIS 2542 - DATA PROGRAMMING WITH PYTHON

Business Elective Courses (Minimum 1.5 credits):

- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2306 - MARKETING MANAGEMENT
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BOAH 2456 - MANAGING OFFSHORE OUTSOURCING
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1

Supply Chain Management, MS

The Master of Science in Supply Chain Management is a 30 credit program designed to be completed in two terms, on a full-time basis. The program provides students with broad supply chain knowledge and technical skills in sourcing, logistics, planning, inventory, pricing, and consulting. The program has a strong interdisciplinary flavor, letting students select from a wide range of electives that relate to everything from information technology, to accounting, to strategy.
Required Courses (Required total: 16.5 credits):

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- EBL requirement: BIND 2024 - CONSULTING FIELD PROJECT, BIND 27** Global Research Practicum; or Internship that has been approved by the faculty director (may substitute BQOM 2139 with faculty director approval) 3 cr.

Supply Chain Elective Courses (Minimum 9.0 credits):

- BQOM 2139 - SIX SIGMA THEORY AND PRACTICE
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2537 - FORECASTING
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Business Elective Courses (Up to 4.5 credits):

- BECN 2509 - GLOBAL MACROECONOMICS 1
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2544 - SHOPPER ANALYTICS
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BOAH 2456 - MANAGING OFFSHORE OUTSOURCING
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BQOM 2904 - PROBLEM SOLVING AND CREATIVITY
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1

Business Analytics Certificate

The Graduate Certificate in Business Analytics is designed as a 15-credit program to be completed over the academic year (August - April), with a curriculum comprised of core and elective courses currently offered to Katz Masters students.

Experience-Based Learning (EBL) Requirement

The Business Analytics certificate program will have a strong EBL component. All students in the program will be involved in projects that focus on solving business problems, which involve data management, modeling, programming, and decision analysis.
Curriculum

The curricular requirements of the Graduate Certificate in Business Analytics will help students develop the necessary knowledge of business analysis for the specialization.

Core: 12 Credits

- BQOM 2578 - DATA MINING
  or
- BUSSCM 1760 - DATA MINING
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BMIS 2588 - DATA BASE MANAGEMENT

And Select One:

- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
  or
- BMIS 2526 - DATA PROGRAMMING WITH R

Electives: 3 Credits

- BQOM 2537 - FORECASTING
- BQOM 2559 - APPLIED SIMULATION AND OPTIMIZATION
- BQOM 2558 - MULTIVARIATE DATA ANALYSIS 2
- BMIS 2542 - DATA PROGRAMMING WITH PYTHON If not taken as required
- BMIS 2526 - DATA PROGRAMMING WITH R If not taken as required

Other Business Analytics electives proposed by areas can be counted as elective(s) with MPC approval

Area of Finance

Finance

The finance discipline doctoral program seeks to prepare students to make significant contributions to the existing body of academic research in corporate finance, mergers and acquisitions, capital structure, internal firm organization, corporate diversification, corporate restructuring, financial institutions and investments and others. The program produces graduates that can independently identify important research questions and carry out theoretical and empirical investigation at levels suitable for publication in the top academic journals. The finance faculty works closely with students to develop suitable research topics and very often collaborates with students on joint research. In short, we strive for our graduates to obtain academic placements at top research institutions.

Finance students take courses from both the University of Pittsburgh Katz Graduate School of Business and the Department of Economics as part of their training. The finance faculty offers seminars that provide the core of the doctoral students' training. These seminars introduce the theoretical underpinnings of finance. Beyond these seminars, students are expected to take additional finance seminars that focus on their chosen areas of interest. Since strong methodological skills are critical to a successful scholarly career, finance doctoral students typically also take courses in econometrics, statistics, and mathematical methods. Students are free to matriculate into courses within the Katz school, other colleges at the University of Pittsburgh (such as Statistics or Mathematics), or at Carnegie Mellon University.

A minimum of eight major and seven methodology-related courses are necessary to fulfill coursework requirements. Students typically pursue four courses per semester for two years prior to taking their comprehensive exams in late summer following their second year.
Students are also required to complete an independent research proposal/paper and submit it to the finance faculty at the end of the spring in their second year of study. It is anticipated that this proposal will eventually develop into a publishable research article; however, the main goal of the assignment is for students to gain experience in identifying important research questions and carrying out theoretical and empirical investigation of these questions.

The following finance doctoral seminars are offered by the Katz Doctoral Program (subject to student enrollment):

### Curriculum

The following finance doctoral seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BFIN 3000 - FINANCE FUNDAMENTALS
- BFIN 3010 - INDEPENDENT STUDY IN FINANCE
- BFIN 3016 - ADVANCED TOPICS IN FINANCE
- BFIN 3031 - CORPORATE FINANCE THEORY AND METHODS
- BFIN 3032 - CORPORATE FINANCE SEMINAR 1
- BFIN 3033 - CORPORATE FINANCE SEMINAR 2
- BFIN 3034 - CORPORATE FINANCE SEMINAR 3
- BFIN 3035 - FINANCIAL EMPIRICAL METHODS
- BFIN 3036 - EMPIRICAL ASSET PRICING
- BFIN 3037 - FINANCE SEMINAR IN MARKET MICROSTRUCTURE
- BFIN 3038 - PROPERTY RIGHTS AND THEORY OF THE FIRM
- BFIN 3099 - READINGS IN FINANCE
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

### Additional

The Economics, Math, and cross-registered courses may include:

- ECON 2001 - INTRO TO MATHEMATICAL METHODS
- ECON 2010 - MATHEMATICAL METH ECON ANALYSIS
- ECON 2020 - INTRO TO ECONOMETRIC THEORY
- ECON 2100 - ADVANCED MICROECONOMIC THEORY 1
- ECON 2120 - ADVANCED MICROECONOMIC THEORY 2
- ECON 2260 - ADVANCED ECONOMETRICS 1
- MATH 3225 - MATHEMATICS OF FINANCE 1
- CMU 0723 Seminar in Finance 1-4

### Note

Finance doctoral students are provided with up to five years (14 terms) of financial support. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

### Finance and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which allows students to master the quantitative and qualitative aspects of Finance--valuation techniques, forecasting methods, application of time value of money, building pro-forma financial statements, managing corporate finance functions, and investing & portfolio management. In addition, students will learn data mining, multivariate data analysis, programming, and database management to enable powerful financial decision-making.
Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 39.0 credits):

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2145 - FINANCIAL MODELING
- BFIN 2039 - INVESTMENT MANAGEMENT/CAPITAL MARKETS
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2030 - VALUATION 1
- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2526 - DATA PROGRAMMING WITH R

Elective Courses (Required minimum: 6.0 credits):

- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2051 - INTRODUCTION TO DERIVATIVES
- BFIN 2068 - MARKETS AND TRADING
- BFIN 2069 - FIXED INCOME SECURITIES
- BFIN 2130 - VALUATION 2
- BFIN 2140 - REAL ESTATE FINANCE

Finance, MS

The Master of Science in Finance is a 30 credit program designed to be completed in two terms, on a full-time basis. The program provides students with a broad overview of the quantitative and qualitative aspects of finance, helping them understand what steps should be taken to maximize shareholder wealth. Students learn the technical skills of everything from valuation techniques, to forecasting methods, to the application of the time value of money, to building pro-forma financial statements.

Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 22.5 credits):

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
Elective Courses (Required minimum: 7.5 credits):

- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2051 - INTRODUCTION TO DERIVATIVES
- BFIN 2068 - MARKETS AND TRADING
- BFIN 2069 - FIXED INCOME SECURITIES
- BFIN 2130 - VALUATION 2

Area of Information Systems and Technology Management

Information Systems and Technology Management

The doctoral program discipline in Information Systems and Technology Management prepares students for successful scholarly careers in research universities. The program provides students with theoretical knowledge and methodological skills to enable them to become productive researchers. Students in Information Systems and Technology Management study problems that practicing IS professionals and managers face as they design, use, and apply information systems and technologies to solve business problems.

Information Systems and Technology Management students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Information Systems and Technology Management, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, Information Systems and Technology Management doctoral students typically complete Katz ISTM doctoral seminars (BMIS 3000 and above) as noted below and combine these with choices from other disciplines, for example from Psychology or Statistics.

BMIS 3012 - FDS INFORMATION SYSTEMS RESEARCH. Students are strongly encouraged to register for all seminars offered by the ISTM faculty. See list below.

ISTM doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Curriculum

The following ISTM seminars may be offered toward the major by the Katz Doctoral Program (subject to student enrollment):

- BMIS 3010 - INDEP STUDY MGT INFOR SYSTEMS
Management Information Systems, MS (STEM-designated)

This program equips students with both the technical and business skills needed to manage an organization's IT resources. The MS in Management Information Systems is a STEM-designated program and can also be pursued with a Graduate Certificate in Business Analytics, as a dual degree with the MBA or in a part-time format.

Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 13.5 credits):

- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2537 - BUSINESS SYSTEMS PLATFORMS
- BMIS 2056 - MGT INFORMATION SYSTEMS PRACM
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2588 - DATA BASE MANAGEMENT

Elective Courses (Required minimum: 6 credits):

- BMIS 2034 - INFORMATION TECHNOLOGY GOVERNANCE
- BMIS 2053 - HUMAN FACTORS IN INFORMATION SYSTEMS DESIGN
- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BMIS 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES
- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
- BMIS 2526 - DATA PROGRAMMING WITH R
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION

Area of Marketing and Business Economics

Marketing

The marketing doctoral program discipline seeks to prepare students to contribute to the marketing discipline via the discovery, development, and dissemination of knowledge. The program is designed to equip students with the requisite theoretical background and methodological skills for successful scholarly careers at institutions of higher learning. The marketing group feels strongly that the apprenticeship model is the most efficacious approach to doctoral training and, to that end, students typically engage immediately in research projects with faculty. Recent students have been successful in publishing these projects in leading journals such as the Journal of Consumer Research, the Journal of Marketing Research, and the Journal of Marketing.

The marketing interest group offers seminars that provide the theoretical core of marketing doctoral students' training. These seminars introduce the central conceptual and phenomenological aspects of the marketing field, as well as the methodological approaches employed in their examination.
Since the field of marketing scholarship segments into consumer behavior, modeling, and marketing management, seminars are offered in each of these areas, plus a methodological and marketing theory seminar.

- BMKT 3001 - CONSUMER BEHAVIOR 1
- BMKT 3002 - CONSUMER BEHAVIOR 2
- BMKT 3010 - INDEPENDENT STUDY IN MARKETING
- BMKT 3014 - MARKETING STRATEGY
- BMKT 3017 - MARKETING MODELS
- BMKT 3018 - SPECIAL TOPICS IN MARKETING
- BMKT 3025 - MARKET BEHAVIOR RESEARCH
- BMKT 3099 - READINGS IN MARKETING
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Beyond these seminars, students are expected to take additional seminars (the minimum major course requirement is eight courses) that focus on their chosen area of interest. Students are free to matriculate into courses within the Katz School, other departments at the University of Pittsburgh (such as Psychology, Economics, or Statistics), or at Carnegie Mellon University.

Since strong methodological skills are critical to a successful scholarly career, marketing doctoral students typically take seven or more courses in analytical methods, statistics, and/or econometrics (the minimum course requirement for a combined research methods/minor is seven). A focus in analytical methods or advanced statistics is the norm. Below is a list of some of the topics offered to satisfy this requirement. These topics are offered University-wide, within Katz, or at Carnegie Mellon University. Other choices may be proposed by the student and approved by the faculty advisor.

- Analysis of Variance
- Probability Theory
- Experimental Design
- Multivariate Statistics
- Mathematical Statistics
- Introduction to Econometric Theory
- Human Judgment and Decision Making
- Behavioral Economics
- Katz Microeconomics
- Learning and Memory
- Advanced Data Analysis
- Advanced Topics in Emotion and Decision Making

Students are required to complete an independent research paper and submit it to the marketing faculty in the summer of their first year of study (third term). It is anticipated that this paper will develop into a publishable research article.

Marketing doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

**Marketing Science and Business Analytics, MS (STEM-designated)**

Differentiate yourself with this STEM-designated program which allows students to gain technical skills in multivariate data analysis, data programming, data mining, and database management. In addition, the program helps students develop an in-depth understanding of consumer behavior through the study of customer insights, research techniques, digital marketing, and social media marketing with advanced data analysis and decision making techniques and skill.

Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

**Required Courses (Required total: 36.0 credits):**
Elective Courses (Required minimum: 4.5 credits):

- BMKT 2032 - APPLIED BEHAVIORAL ECONOMICS
- BMKT 2569 - BRAND MANAGEMENT
- BMKT 2532 - PRICING STRATEGIES AND TACTICS
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BIND 2024 - CONSULTING FIELD PROJECT
- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
- BMIS 2526 - DATA PROGRAMMING WITH R

Marketing Science, MS

The Master of Science in Marketing Science is a 30 credit program designed to be completed in two terms, on a full-time basis. The program prepares students for the future of marketing, offering a broad introduction to marketing alongside in-depth study of customer insights, research techniques, data analytics, digital marketing, and social media marketing. Students learn how to build effective marketing strategies based on data and the latest technological tools.

Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 22.5 credits):

- BMKT 2409 - MARKETING MANAGEMENT
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BMKT 2031 - MARKETING RESEARCH
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
Elective Courses (Required minimum: 7.5 credits):

- BMKT 2032 - APPLIED BEHAVIORAL ECONOMICS
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2532 - PRICING STRATEGIES AND TACTICS
- BMKT 2569 - BRAND MANAGEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BQOM 2578 - DATA MINING
- BIND 2024 - CONSULTING FIELD PROJECT
- BMIS 2542 - DATA PROGRAMMING WITH PYTHON
- BMIS 2526 - DATA PROGRAMMING WITH R
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES

Area of Organizations and Entrepreneurship

Organizational Behavior and Human Resources Management

The OBHR doctoral program discipline focuses on preparing students to impact the study of people, process and outcomes within the fields of organizational behavior and human resources management. Through research, collaboration and dissemination of knowledge, students understand how to impact organizational effectiveness in a variety of different environments, industries and across multiple levels of analyses. Our expectation is that students will craft a program of research that is built upon rigorous theory as well as strong methodological skills that are both necessary for effective scholarship. We encourage collaboration with OBHR faculty that has a proven track record of publishing within a variety of top outlets.

Organizational Behavior and Human Resources Management students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Organizational Behavior and Human Resources Management, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. For example students often choose psychology, decision sciences, statistics and research methodology to name a few. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

Organizational Behavior and Human Resources Management doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Curriculum

The following OBHR seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BOAH 3002 - FOUNDATIONS OF ORGANIZATIONAL BEHAVIOR
- BOAH 3027 - OBHR RESEARCH WORKSHOP I
- BOAH 3028 - OBHR RESEARCH WORKSHOP II
- BOAH 3099 - RDGS ORGNZTNL BEHAVIOR/HR MGT
- BORG 3010 - INDEP STUDY ORGNZTNL STUDIES
Organization and Entrepreneurship, MS

The following courses are offered through the Organizations and Entrepreneurship Department:

BHRM 2023 - HUMAN RESOURCES PLANNING/STRATEGY 1
BHRM 2024 - HUMAN RESOURCES PLANNING/STRATEGY 2
BHRM 2060 - INDEPENDENT STUDY HUMAN RESOURCES MANAGEMENT
BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
BOAH 2423 - MANAGING HUMAN CAPITAL
BOAH 2456 - MANAGING OFFSHORE OUTSOURCING
BOAH 2517 - INTERPERSONAL SKILLS MANAGERS 1
BOAH 2521 - STAFFING ORGANIZATIONS
BOAH 2522 - COMPENSATION
BOAH 2527 - CROSS CULTURAL DIMN INT'L MGT
BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
BOAH 2537 - CONFLICT RESOLUTION IN THE WORKPLACE 1
BSEO 2012 - SOCIAL ENTREPRENEURSHIP
BSEO 2033 - MANAGING THE NATURAL ENVIRONMENT
BSEO 2034 - SUSTAINABILITY AND CORPORATE RESPONSIBILITY
BSEO 2316 - BUSINESS LAW
BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
BSEO 2509 - BUSINESS AND POLITICS
BSEO 2500 - BENCHTOP TO BEDSIDE
BSEO 2506 - COMPETING EMERGING ECONOMIES
BSEO 2509 - BUSINESS AND POLITICS
BSEO 2511 - MGMT OF STRATEGIC ALLIANCES 1
BSEO 2316 - BUSINESS LAW
BSEO 2525 - COMPETITIVE INTELLIGENCE
BSEO 2528 - LEGAL ENVIRONMENT OF BUSINESS 1
BSEO 2531 - ENTREP & NEW VENTURE INITIATION
BSEO 2538 - STRATEGIC LEADERSHIP
BSEO 2543 - ACQUISITION & DIVESTMENT ANALYS
BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER
BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT
BSPP 2409 - STRATEGIC MANAGEMENT

Area of Strategic Management

Strategic Management

Students in the Strategy discipline study the problems and issues facing general managers who must formulate and implement strategies for organizations in uncertain and ambiguous environments. Seminars cover theory and empirical findings related to strategy formulation and implementation, and are intended to familiarize students with the variety of research perspectives relevant to the strategy field. In addition, each
faculty member leading a course will ask participants to build upon extant research to develop their own research topics as a first step toward publishing articles.

Strategy students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Strategy, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

Strategy doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Curriculum

The following Strategy seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BSPP 3010 - INDEP STUDY STRATEGIC PLANNING POLICY
- BSPP 3011 - STRATEGIC PLANNING SYSTEMS
- BSPP 3012 - RESEARCH IN COMPETITIVE STRATEGY
- BSPP 3013 - FOUNDATIONS OF STRATEGY RESEARCH
- BSPP 3014 - RESEARCH IN CORPORATE STRATEGY
- BSPP 3015 - WORKSHOP IN STRATEGIC PLANNING POLICY
- BSPP 3018 - THEORY BUILDING IN MANAGEMENT
- BSPP 3019 - SEMINAR IN ENTREPRENEURSHIP
- BSPP 3099 - READINGS STRATEGIC PLANNING & POLICY
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

School of Computing and Information

The University of Pittsburgh's School of Computing and Information (SCI) opened on July 1, 2017, building upon the traditions of excellence embodied by the Department of Computer Science and School of Information Sciences. SCI aims to position the University as a leader in preparing students for this increasingly-interconnected world by providing students with excellent disciplinary foundations and training to support our mission to make the world a better place through polymathic education and the science of interacting systems. Our degree programs address the holistic spectrum of computing and information, from producers to users and from science-oriented exploration to human-centric applications. We foresee a future with increased opportunities to expose our students to a multidisciplinary approach to knowledge creation, information management, and computing; expanded experiential learning opportunities; and extended career networks.

SCI represents the confluence of computing and information along with diverse academic disciplines, serving as a valuable resource to researchers, students, and organizations across the University and around the world. SCI is a new school for a new era of research and learning, one in which the power of information and computing will accelerate knowledge discovery and creativity.

The regulations set forth in the following document apply to students who were admitted to the School of Computing and Information during the 2018-2019 Academic Year. Students admitted prior to this academic year should refer to the Archived Catalogs for the regulations governing their graduate studies.

Students admitted PRIOR to the 2017-2018 Academic Year will find the School-level rules to which they are bound by going to the Archived Catalogs for either Arts & Sciences (Computer Science or Intelligent Systems degrees) or School of Information Sciences (Information Science, Library & Information Science, and Telecommunications degrees).

Computational Modeling and Simulation, MS

For more information regarding the Master of Science in Computational Modeling and Simulation degree program, visit the Dietrich School of Arts & Sciences Catalog.

Department of Computer Science
The faculty of the Department of Computer Science are committed to high quality graduate education. The broad scope of their research enables them to convey to graduate students a comprehensive, state-of-the-art understanding of computer science and its application to a wide range of other disciplines. A substantial level of sponsored research has been achieved thereby providing financial support for many graduate students in the form of research assistantships.

Our graduate students come from all corners of the globe and are able to pursue research topics in most areas within computer science and in many application areas within other disciplines. They are able to take advantage of the diverse faculty research collaborations with other departments and programs within the University such as the Learning Research and Development Center, the Intelligent Systems Program, the Telecommunications Program of the School of Information Sciences, the School of Engineering, and the School of Medicine.

Policies for the Department of Computer Science

Advisors and Student Evaluations

When a student enters the Department he or she will be assigned a temporary advisor. The temporary advisor will guide the student in making course selections and will provide advice and information about the student's academic program. The advisor will sign the student's registration form each term, except when the student is on probation. During a probationary period, the student must have the registration form signed by the Graduate Enrollment Officer. A student may change advisors at any time, after obtaining the agreement of the new advisor. The advisor presents information about his or her students at the annual student performance evaluation meeting.

When a student begins to do independent work on either a MS or PhD project, he or she will negotiate with a faculty member to supervise this work and to become the student's principal advisor. The principal advisor replaces the temporary advisor, and assumes the responsibility for guiding the student in his or her academic program, for signing his or her registration form, and for presenting information about him or her at the annual student performance evaluation meeting. The principal advisor also guides the student in selecting an appropriate research problem for a MS project, MS thesis, or PhD dissertation, and oversees the work.

All students should meet with their advisor at least once per term. Students engaged in research will normally meet with their advisor weekly.

Throughout the term, students may generate an Academic Advisement Report (AAR). This report tracks degree completion, pulling course information directly from their academic record. Substitutions and exceptions must have approval of the GPEC and must be documented through the Records Office. Information regarding documenting exceptions is available on the School's Current Students webpage.

Details regarding advising and resources for tracking your degree progress (the AAR) are available on the School's Catalog page, under the Advising section.

Each student must ensure that the AAR meets all of the program requirements for graduation. At the completion of the program, the Records Office coordinates with the Department to certify all students for graduation. See the SCI Catalog page for more details and regulations pertaining to graduation.

Stricter advising guidelines and regulations apply to the doctoral students. See the doctoral program regulations for details.

Annual Student Performance Evaluation Meeting

Once a year, the CSD faculty will hold a meeting to evaluate student progress. In that meeting, information about each student's academic progress during the previous 12-month period is presented by his or her advisor. It is the student's responsibility to provide the advisor with any supporting material that the advisor requests for the evaluation meeting. After the meeting, students will receive a letter from the GPEC chair describing the faculty's assessment. Students who are not making satisfactory progress in the program will be sent a warning letter stating specific performance goals. Failure to meet those goals may result in termination from the program.

Responsibilities

The following parties share responsibilities for a student's academic progress:
The student is expected to:

- be knowledgeable of SCI and departmental regulations;
- fill in the yearly evaluation form to keep his or her advisor current about his/her academic status (i.e., provisional or probation), progress, and plans;
- register for courses on time (preferably as early as possible);
- assist the administrator in CSD Graduate Programs Office in keeping current his or her file, including an up-to-date mailing address;
- notify the administrator in the CSD Graduate Programs Office if he or she changes advisor;
- provide advisor with materials for the student annual evaluation meeting;
- (for doctoral students) file an application for candidacy for the PhD degree, after passing the dissertation proposal examination and at least eight months before the defense of the dissertation;
- follow the published instructions on SCI procedures for graduation, including filing an official application for graduation early in the term in which graduation is expected; and
- deliver two copies of a final MS thesis or PhD dissertation to the CS Library (please refer to the templates online at http://training.cssd.pitt.edu/thesisdissertationtemplates.htm).

The advisor is expected to:

- assist the student in selecting courses and sign his or her registration form (except in the case of students who are on probation, whose forms must be signed by the Graduate Enrollment Officer);
- counsel the student and verify that his or her planned program is appropriate, given the student's academic goals and the CSD regulations;
- assess the student's progress towards a degree and provide him or her with advice;
- present information about the student's progress at the annual student performance evaluation meeting;
- assist the student in selecting a research area and a principal advisor;
- validate the appropriateness of the student's research problem for a MS project or thesis or PhD Dissertation;
- assist the student in forming thesis, comprehensive examination, proposal and/or dissertation committees, as appropriate; and
- oversee the student's oral examination for an MS thesis, doctoral comprehensive examination, doctoral dissertation proposal meeting, and doctoral dissertation defense examination. In all cases, after the examination has been completed the advisor will secure the signatures of all committee members, complete the required forms, give them to the administrator in the CSD Graduate Programs office, and communicate the results to the student.

The Chairperson of GPEC is expected to:

- act on petitions for transfer of credit, substitution of course requirements, and similar matters;
- announce the timing of PhD preliminary examinations to all graduate students and faculty;
- oversee the preparation, grading and review of these examinations; and
- report the results of the examinations to the student, the student's advisor, the administrator in CSD Graduate Programs Office, and the Dean.

**Registration Requirements and Statute of Limitations**

The CSD abides by the SCI registration requirements and regulations pertaining to statute of limitations. See the SCI Credit & Enrollment Policies for details regarding these items.

Under exceptional circumstances a candidate for an advanced degree may apply for an extension of the statute of limitations. Students seeking support in extending their statute of limitations, should provide the CSD with the reason for the delay, evidence of continuing progress toward the completion of the degree and a plan and proposed date for the completion of the degree. The request must be made in writing, approved by the student's advisor, GPEC, and the Department Chairperson. The Department will submit recommended extensions to the Dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Under special circumstances, a graduate student may be granted one leave of absence. Consistent with regulations, a maximum leave of two years may be granted to doctoral students or one year to master's students. An application for a leave of absence must state the reason for the request, and must be approved by the student's advisor, GPEC, and the Department Chairperson, and then submitted to the Dean for final action. If approved, the time of the leave shall not count against the total time allowed for the degree(s) being sought by the student.
**Grading Options**

All formal course requirements in the CSD must be completed with letter grades. Directed and independent study, and thesis and dissertation research must be taken with the S/N grading option. This includes CS2000, CS2003, CS2910, CS2990, CS3000, and CS3900.

**Independent Study and Directed Study**

Students may elect to undertake individual study under the supervision of a faculty member. A student who wishes to register for CS2000 (Master's Thesis), CS2910 (Master's Project), CS2990 (Independent Study), CS3000 (PhD Dissertation Research), or CS3900 (PhD Directed Study) must submit an individual study permit request for approval by the supervising faculty member. The approved title and short description for these courses must be submitted to the CSD Graduate Programs Office before the student is allowed to register in these courses.

**Transferring Credit**

Normally, students will fulfill CSD course requirements by taking graduate-level courses within the CSD, while they are enrolled in the department. However, in some cases, it may be desirable for a student to count coursework done outside the CSD and/or prior to the time the student enrolls in the department. In such cases, written approval of GPEC is required.

Students can petition GPEC to use courses taken outside the Department in two different ways. First, students may apply to transfer the credits for these courses, using the credits towards the total number needed for a degree. Second, students may apply to use these courses to place out of requirements, i.e., to substitute a course taken elsewhere for a course required by the CSD.

Note that these actions neither entail one another nor are mutually exclusive. For example, a student might enter the CSD having previously taken a graduate-level course in Operating Systems. In that case, he or she might petition both to receive both 3 transfer credits and to place out of the requirement to take CS2510.

In another case, a student might have taken a course that is relevant to graduate studies in computer science, but does not directly correspond to any course required by the CSD, for example, a course in Neural Networks. In that case, the student might petition only for a transfer of 3 credits.

Finally, in yet another case, suppose that a MS student enters having previously taken graduate-level courses in Compiler Design and in Principles of Database Systems. Since only one out-of-department course can be counted for the MS degree, the student may request the transfer of 3 credits for only one of the two courses (say, CS2210), thereby placing out of the requirement. The student may then request placement out of the requirement for the second course (in this example, CS2550), though the credits for this course will not transfer.

Petitions to count courses taken outside of the CSD must be submitted according to the following schedule:

1. A petition to count a course to be taken outside the CSD during a given term must be submitted no later than 2 weeks after the start of the registration period for that term.

2. A petition to count course(s) taken prior to enrolling in the CSD must be submitted within the first two terms after entering the program, and normally within the student's first term. A student must submit all petitions to transfer or substitute courses taken prior to enrollment at the same time. Petitions should be submitted during the first three weeks of any given term and GPEC will meet shortly thereafter to look into these petitions.

3. Normally, an incoming student will not enroll for credit in courses outside the CSD during his or her first term in the program. In unusual cases, an incoming student may petition GPEC during the first week of classes to count such a course.

The University's Academic Regulations for transfer credits apply to courses taken outside the CSD. The following restrictions also apply to CSD students:

- For the MS degree, no more than one course (3 credits) that is either taken out-of-department or is 1600-level can be counted. This does not include the required course in theory or algorithms (CS1510 or CS1511). In no case will a 1000-level course taken prior to enrollment in the CSD count towards the MS degree (including CS1510/CS1511).

- For the PhD degree, no more than 24 credits taken at the MS level may be transferred from out of the department. In addition, for courses taken beyond the MS level, 12 more transfer credits may be acceptable. Note however, that at most 4 of the 12 required courses for the PhD may be taken outside the department. Thus, additional transfer credits (beyond 12 used to satisfy required courses) may be used towards the 72-credit requirement, but students must still complete 8 courses in the CSD.

- After enrolling in the program, students will not normally be given approval to take a course outside the CSD in place of a required CSD course, if the student could take the required CSD course within the next academic year.
Petitions to transfer credit and/or place out of requirements must be submitted to GPEC. For each course the student must submit the following:

- A transfer/course substitution form, available from the administrator in the CSD Graduate Programs Office, signed by the student's advisor. If the petition includes a request to place out of a requirement, the form should also be signed by a CSD faculty member who teaches the equivalent course. Students may contact the GPEC chair if they need assistance in locating the appropriate faculty member(s).

If GPEC recommends approval, it will send the recommendation to the Dean, who will make a final decision and notify the student.

The Deans Office then shares the approval with the Records Office for processing. Forms and School-level regulations regarding transfer credit are linked and explained on the SCI Catalog page. All materials noted on the SCI Transfer Credit Request Form must be submitted with a student's petition to transfer credit.

GPEC will make the final decision about requests to place out of requirements, and will notify the student directly.

**Awarding of Teaching Assistantships**

The CSD supports a number of students with Teaching Assistantships and Fellowships (TAs/TFs). In awarding these, the Department gives priority to PhD students. The following policies apply to the awarding of TAs and TFs; note that these policies are subject to the Department having adequate funds, as discussed below.

1. Students may be admitted with or without support. Those offered support will be offered full support, except under extenuating circumstances. Students may be offered partial support during the summer.

2. All PhD students admitted with support typically continue with the same level of support for the first two years, provided that he/she meets the eligibility requirements for a TA.

3. The eligibility requirements for a TA are:
   - they are not placed on probation
   - they score at least a 4 in the English Language Fluency Test
   - they perform their TA/TF duties satisfactorily
   - they complete their preliminary examinations by the end of the third regular term of enrollment.
   - they have been in the program no more than 5 years.
   - they have maintained an S in the CS2003 course.

   PhD students in their 3rd year or beyond are also typically given support. However, responsibility for providing the financial support typically moves from the department to the student's advisor. Please contact your advisor (by March 1) for details.

4. All other students will be considered for support on a case-by-case basis. Criteria used in giving support to these students will include:
   - the number of course requirements already completed
   - scholarly performance, including GPA and evidence of research potential
   - the results of attempts to pass the preliminary examination
   - the score in the English Language Fluency Test, and
   - the quality of previous teaching performance (if applicable)

Note that it is often the case that some TA positions become available only on very short notice before the start of a term. In order to satisfy the Department's teaching needs, these positions may be filled on an "emergency" basis, following these criteria as preferences. Students receiving these emergency appointments should be aware that their appointment does not imply any preferential treatment for appointments in subsequent terms.

In order to be considered for financial aid for the Fall term, a student has to file an application in the CSD Graduate Programs Office by March 1st. Copies of a vita, an up-to-date grade report and teaching evaluations (when applicable) must be enclosed with the application. Awards for the Fall term will normally be for a full academic year (i.e., Fall and Spring terms), except in the case of emergency positions as noted above. Applications for the Spring and Summer terms are due Nov. 1 and Mar. 1, respectively.

A student who has signed a TA contract may resign from all or part of the assignment for a given term any time up to four weeks before the start of that term. If a student does not resign from the TA assignment, he or she is bound by that assignment. Students violating this rule will not be eligible for TA positions in any subsequent term.

**Fellowships and Awards**

Each year, there are several opportunities for graduate fellowships and awards. It is the student's responsibility to watch for these opportunities, to determine eligibility and to complete an application.
For some external fellowships and awards, the CSD may nominate a maximum number of students. For example, the Andrew Mellon Predoctoral Fellowship restricts the number of students that a department may nominate. When a fellowship or award limits the number of nominations, the CSD will follow a four-step procedure to select the actual nominations. Note that a nomination by the department does not necessarily imply the awarding of a fellowship.

1. Determine eligibility: A student is eligible for a fellowship if he/she meets the criteria established by the organization that grants the fellowship. In addition, a student must be in a good academic standing and meet certain criteria that are determined by the department. The specific department criteria will be announced each year prior to the fellowship deadline.

2. Seek advisor endorsement: An eligible student must discuss the fellowship with her/his advisor and get the agreement of the advisor to write a letter of recommendation.

3. Apply: If a student is eligible and has an advisor's endorsement, then a fellowship application should be completed and submitted to the Computer Science Department.

4. Selection of final nominees: The applications will be made available to the whole CSD faculty, who will vote on the final set of nominees. The faculty will vote based on the application materials and additional information about students' departmental activities that include attendance of departmental colloquia, and participation in the departmental research competitions. A student should write the application in a way that is clear to a non-specialist. The final set of nominees may submit their applications to the fellowship organization.

As an example of department criteria for fellowship eligibility, the following criteria was established for the 2006-2007 Andrew Mellon Fellowship:

1. Passed preliminary examination
2. An author on at least two papers
3. Primary author on at least one paper
4. 3.60 GPA or better

Grievance Procedures

Students who believe that a decision about their academic program has been made on the basis of incomplete or incorrect information may appeal the decision. To do this, the student should prepare a letter that outlines his or her position and provide evidence that supports the claim that the decision was appropriate. The student should send the letter to the CSD Chairperson, after securing the endorsement of his or her advisor. The CSD Chairperson may either reject the appeal or forward it to the Dean for consideration. Appeals must be made within thirty days of the date of notification of any decision.

Computer Science, PhD

Admissions Requirements

Note that an MS degree is not required to apply to the PhD program. Students admitted to the MS program are eligible to complete the requirements for that degree. If they wish to transfer to the PhD program, they must apply to the admissions committee, which will make its decision based on the student's performance in the MS program and on faculty recommendations.
The department is open to applications from exceptional students transitioning to graduate study in Computer Science from other undergraduate fields. Transitional students with demonstrated computing aptitude, as evidenced by outstanding grades in at least 4 of the required computer science courses noted below, may be considered for admission to the graduate program. Completed minimally a selection of courses in the following topical areas (the corresponding Pitt course numbers are indicated):

In Computer Science, one course in each of:

- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - DATA STRUCTURES
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
- CS 1510 - ALGORITHM DESIGN or CS 1511 - INTRODUCTION TO THEORY OF COMPUTATION
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS or CS 1621 - STRUCTURE PROGRAMMING LANGUAGES
- CS 1550 - INTRODUCTION TO OPERATING SYSTEMS or CS 1651 - ADVANCED SYSTEMS SOFTWARE

In Mathematics, the following:

- The two-course calculus sequence (MATH 0220, MATH 0230)
- A course in linear algebra (MATH 1180 or MATH 0280)
- A course in probability and statistics, requiring calculus as prerequisite (STAT 1151, STAT 1152)

**Degree Requirements for the PhD**

A student interested in earning the PhD must be admitted into that program. Master's students interested in the PhD program are encouraged to take the preliminary exams.

**Residency Requirement**

All students seeking the PhD degree in the CSD must engage in a minimum of one term of full time graduate study by the end of the term in which the comprehensive examination is taken.

**PHD Course Requirements**

The PhD degree requires 72 credits of formal course work, independent study, directed study, and/or dissertation research.

The following 12 courses must be completed with an overall grade point average of 3.00 or better:

**Course Requirements**

CS 2001, Research Topics in Computer Science, and CS 2002, Research Experiences in Computer Science. Students are required to take CS 2001 during their first fall term and CS 2002 the following spring.

At least one course from each of the following foundation areas.

**Architecture and Compilers**

- CS 2410 - COMPUTER ARCHITECTURE or
- CS 2210 - COMPILER DESIGN

**Operating Systems and Networks**

- CS 2510 - COMPUTER OPERATING SYSTEMS or
- CS 2520 - WIDE AREA NETWORKS
  Artificial Intelligence and Database Systems

- CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE or
- CS 2550 - PRINCIPLES OF DATABASE SYSTEMS

Theory and Algorithms

- CS 2110 - THEORY OF COMPUTATION or
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

An additional 6 graduate-level CSD courses (for a total of 12 courses). These courses must be 2100-level or higher CSD courses and cannot be independent study courses (CS2990, CS3000), graduate internship (CS2900), thesis project or research courses (CS2910, CS3900).

At least 2 courses must be at the 3000-level.

The following requirements apply to the 12 required courses:

- All must be taken for a letter grade.
- Students are required to complete the four required foundation area courses by the end of the fourth regular term of study. Regular terms include the fall and spring and do not include the summer session.
- The student must receive a grade of B or better in each of the required foundation area courses, and a grade of B- or better in each of the six additional courses; in addition, he or she must maintain an overall average QPA of 3.0 or better.
- No more than 6 of the 12 courses may be taken outside of the CSD. This includes courses that are transferred from other universities. All courses from outside the CSD must be approved by GPEC; see Section 5.6 for details.
- All courses must be at the 2000- or 3000-level and at least 2 courses must be at the 3000-level. Courses in the range 20xx (e.g., CS2045) do not count toward the 12 course requirement.
- All 12 courses must be successfully completed before admission to candidacy for the PhD (This normally occurs when the student passes the oral examination during the dissertation proposal.)

CS 2003 Requirements

After completing CS 2001 and CS 2002, students must enroll in CS 2003 until receiving a satisfactory grade of S for 4 regular terms.

In order to receive a satisfactory grade of S, students must:

- Attend at least seventy percent (70%) of Departmental Research Colloquia offered at the regularly scheduled course time over the course of the term. If there are an unexpectedly high number of Colloquia in a term (approximately more than one per week), attending only 10 Colloquia is required.
- GSO-sponsored colloquia occurring within the regularly scheduled course time shall be included in the count of colloquia offered for this requirement.
- Perform at least one (1) approved Research Activity during a regular term (fall or spring) of each academic year.
  - Options include: Presenting a GSO-sponsored colloquium for CS 2003, presenting a poster at the alumni research reception (fall) or CS Day poster competition (spring), or participating in the CS Department research competition. Other related activities may be presented to GPEC in petition for approval.

This annual requirement shall be evaluated only in the spring term and shall consider the academic year beginning with the prior fall term. As such, students may receive an S in the fall term having only fulfilled requirement (a), with the expectation that requirement (b) will be fulfilled in the spring.

<tr>
<td>Statute of Limitations</td>
<td>PhD degree must be completed within a period of ten calendar years from the student's initial registration for graduate study (or within eight calendar years for students who enter with a master's degree). These limits apply to all students, whether full-time or part-time.</td>
</tr>
</tbody>
</table>

Please note that each of the above milestones must be satisfied by the indicated deadline as part of maintaining good academic standing in the department.

**PHD Preliminary Examinations**

During the first two regular terms of study, each student must pass:

- At least 2 courses at the 2100 - 2899 level with a grade of A- or higher
- At least 2 courses at the 2100 - 2899 level with a grade of B or higher

At least one of the courses taken for an A- must be a required foundation area course. Students are not permitted to repeat a class that they have passed (i.e., earned B or better) in order to improve the grade (i.e., to A or A-). Regular terms include the fall and spring and do not include the summer term.

**PHD Comprehensive Examination**

The purpose of the comprehensive exam is to test the depth of knowledge of the student in one or more areas that are related to the student's area of research and that are approved by the comprehensive examination committee.

To pass the comprehensive exam a student must demonstrate sufficient expertise and depth of knowledge in a selected area of foundation to conduct research leading to a dissertation in that area. The comprehensive exam is an oral exam and is administered by at least three (3) CSD faculty that compose the PhD dissertation proposal committee. The committee has to be approved by the department chair at least four (4) weeks before the scheduled exam date.

The student will prepare a 30 minute presentation which will be followed by an oral question and answer session. The exam is based on a reading list. The student should agree on a reading list with each member of the comprehensive exam committee at least two weeks prior to the exam. The length of the exam is at least two hours and the focus and goal of the presentation and the question and answer session will be specified by the committee at least two weeks before the exam.

Normally, the comprehensive exam should be completed within 1.5 years of completing the preliminary exams.

**Dissertation Proposal**

All PhD students must conduct original research leading to a dissertation. This research must be conducted under the direction of a faculty advisor and begins with the preparation of a dissertation proposal. A written dissertation proposal of approximately 30-40 pages and a presentation of the dissertation proposal are made to a committee of graduate faculty. This committee will examine the dissertation topic and research methods. The committee has to be approved by the department chair at least two (2) weeks before distributing the proposal or the dissertation to the committee.
The intent of requiring a dissertation proposal and an examination on it is to provide opportunities for substantive feedback from a student's committee on the dissertation topic and methods of research. The proposal and examination can aid the student in identifying especially promising research issues and in avoiding work that the committee deems to be unnecessary or inappropriate.

After obtaining approval of the dissertation proposal from the faculty committee, a student gains the official status of a PhD candidate. At this time the proposed research is conducted under the direction of the faculty advisor. Yearly meetings with the student's dissertation committee are required. Upon completion of the research, and subject to agreement from the faculty advisor and committee, the candidate schedules an open meeting at which the dissertation is presented and defended.

**Doctoral Committee**

Each student intending to complete a PhD degree should work carefully with his or her advisor to select a doctoral committee. The committee is composed of:

The student's advisor, who must be a full time (primary appointment) CSD faculty member and a member of the SCI graduate faculty. A student may also have a co-advisor, but the co-advisor must have a primary or secondary (including adjunct) appointment in the CSD. A co-advisor must also be a member of the SCI graduate faculty.

At least two other faculty members with a primary appointment in the CSD, one of whom must be tenured in the CSD.

At least one faculty member from another department within the University that would serve as an external member. The external member(s) should also be a member of the graduate faculty. With the approval of the Dean, the external member of the committee may come from outside the University. The external member cannot serve as a co-advisor.

A majority of the committee members, including the advisor, must be members of the SCI graduate faculty. Regulations require that the doctoral candidate and his or her committee meet at least once per year to evaluate the candidate's progress. The membership of the committee may be changed whenever it is appropriate or necessary, subject to the approval of the CSD chair and the Dean. The committee, or any change to its member, has to be approved by the department chair at least four (4) weeks before distributing the proposal or the dissertation to the committee. Note that the doctoral committee need not be identical to the comprehensive examination committee, although usually there will be significant overlap between the two.

**Written Proposal**

A written proposal must be distributed to the examining committee at least two weeks in advance of the oral examination on the proposal.

There is no specific requirement on the length of the written proposal. However, each member of the Doctoral Committee may request that the student provides him/her with a short document (about 30-40 double-spaced pages) that summarizes the proposed research. This document normally contains:

- a clear statement of the problem to be solved,
- proposed methods of solution,
- scholarly review of related work,
- preliminary results obtained from a prototype program and/or a partial analysis, and
- a detailed research plan, stating the issues remaining to be addressed and suggestions for how they will be addressed, within a specified time frame.

Additional documents (including papers or technical reports) may be provided as appendices.

**Oral Examination on the Proposal**

After writing the proposal and conferring with his or her advisor, the student must schedule an oral examination and send an announcement of the examination to all faculty and graduate students at least one week in advance of it.

The oral examination (sometimes called the prospectus meeting) consists of two parts:
• a public presentation of the proposal open to all members of the University community, followed by questions from the general audience; this component is normally 40-50 minutes in length, and

• a private examination by the doctoral committee.

Any CSD faculty member may attend the private examination, but only the examining committee will vote on results. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree.

The oral examination must be announced to the CSD community via the faculty and graduate student mailing lists. This announcement must be at least one week prior to the examination. The announcement should include a title, abstract, advisor(s) name(s), committee member names, date of examination and location of examination. The abstract is due to the graduate administrator at least four (4) weeks before the scheduled proposal date.

It is the student's responsibility to schedule meetings with members of the examining committee within a few weeks after the examination to review criticisms and suggestions.

After passing the oral examination on the proposal, a student gains the official status of a PhD candidate.

**Dissertation Research and Defense**

The student must meet with his or her entire dissertation committee at least once per year during the time in which the research is being done. The student will also be meeting regularly with his or her advisor.

Upon completion of the research, the student prepares a written dissertation, and, in consultation with his or her advisor and dissertation committee, schedules a public oral defense.

The oral defense must take place at least 8 months after the admission to candidacy. The normal format for the defense of dissertation is a public oral presentation of the research followed by questions by the dissertation committee and general audience. Only the dissertation committee will vote on the result. If the outcome is not unanimous, the case is referred to the Dean for resolution.

The oral defense is public and open to all members of the University community. It must be publicly announced to the school and CSD (via the faculty and graduate mailing lists) at least two weeks prior to the scheduled defense date. The announcement should include a thesis title, abstract, advisor(s) name(s), committee member names, date of defense and location of defense. The abstract is due to the graduate administrator at least four (4) weeks before the scheduled defense date.

It is the responsibility of the student's advisor to ensure that the dissertation is in final form before requesting signatures of all committee members. After the final oral examination is successfully completed, the student must submit his or hers theses or dissertation electronically. Check the website to see what you will need to submit for the Electronic Thesis and Dissertation (ETD).

**Research, Internship Training Requirement**

**Research Training**

Because the PhD degree is a research degree, students should expect to participate in research projects as a way of learning the art of doing research. Normally, a student will start by working with a faculty member on a pre-defined research problem, and later will define his or her own research problem as the subject of the dissertation.

There is no departmental requirement that students participate in the preparation of research grant proposals. However, it is desirable that all doctoral students have some exposure to the process of preparing and submitting research grant proposals. Normally this will be part of the mentoring by each student's advisor.

**Internships**

When an international student does an internship, he or she must use Curricular Practical Training (CPT). If a student on an F-1 visa has engaged in 12 months or more of full-time Curricular Practical Training, he/she will be ineligible for Optional Practical Training (OPT).
Computer Science, MS

Admissions Requirements

The department is open to applications from exceptional students transitioning to graduate study in Computer Science from other undergraduate fields. Transitional students with demonstrated computing aptitude, as evidenced by outstanding grades in at least 4 of the required computer science courses noted below, may be considered for admission to the graduate program. Completed minimally a selection of courses in the following topical areas (the corresponding Pitt course numbers are indicated):

In Computer Science, one course in each of:

- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - DATA STRUCTURES
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
- CS 1510 - ALGORITHM DESIGN or CS 1511 - INTRODUCTION TO THEORY OF COMPUTATION
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS or CS 1621 - STRUCTURE PROGRAMMING LANGUAGES
- CS 1550 - INTRODUCTION TO OPERATING SYSTEMS or CS 1651 - ADVANCED SYSTEMS SOFTWARE

In Mathematics, the following:

- The two-course calculus sequence (MATH 0220, MATH 0230)
- A course in linear algebra (MATH 1180 or MATH 0280)
- A course in probability and statistics, requiring calculus as prerequisite (STAT 1151, STAT 1152)

At the time of enrollment, the student must hold a BS degree.

Degree Requirements for the MS

MS Course Requirements

The MS degree requires 30 credits of formal course work. The 30 credits include a total of 24 credits plus an MS thesis, CS 2000; or 27 credits plus an MS project, CS 2910.

The 30 credits must include one course from each of the following foundation areas.

Foundation area courses must be completed with a grade of "B" or better.

Theory and Algorithms

- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS or
- CS 2110 - THEORY OF COMPUTATION or
- CS 1510 - ALGORITHM DESIGN or
- CS 1511 - INTRODUCTION TO THEORY OF COMPUTATION

Architecture and Compilers

- CS 2410 - COMPUTER ARCHITECTURE or
- CS 2210 - COMPILER DESIGN

Operating Systems and Networks

- CS 2510 - COMPUTER OPERATING SYSTEMS or
- CS 2520 - WIDE AREA NETWORKS
Artificial Intelligence and Database Systems

- CS 2710 - FOUNDTNS OF ARTIFICIAL INTELLGNC or
- CS 2550 - PRINCIPLES OF DATABASE SYSTEMS

In addition to the course courses, list the two options:

- Thesis Option: 6 credits for the MS thesis + at least 12 additional credits of graduate (2100-level or higher) CSD courses.
- Project Option: 3 credits for the MS project + at least 15 additional credits of graduate (2100-level or higher) CSD courses.

All additional coursework must be completed with B- or better.

The additional credits cannot include independent or directed study courses (CS 2990, CS 3000), MS thesis or project, or research courses (CS 2910, CS 3900, ...).

To fulfil the additional credits, a student may count either (a) one CS1600-level or CS20xx course (excluding 2000-2009) or (b) petition GPEC to count one out-of-department course.

All coursework must be completed with an overall grade point average of 3.0 (B) or higher.

Timetable

MS degrees must be completed within four calendar years from the student's initial registration for graduate studies. This limit applies to all students, whether full-time or part-time. Normally, full-time students will complete the degree within two years.

Copies of the thesis must be submitted to the committee at least two weeks in advance of the examination.

The project report must be submitted to the advisor at least a week in advance of the end of the term.

MS Project or Thesis

There are two options for completing the MS degree: the thesis option and the project option.

For the thesis option, the student must complete a written thesis, taking at least six credits of CS 2000, which must be taken with the S/N grading option. The student's advisor will assist him or her in selecting a thesis committee, to consist of at least three faculty members, at least two members must be from Computer Science (one being your advisor) and at most one from outside the department or University (all three could be from Computer Science). The committee will conduct a public oral final examination. The committee must be formed with all names sent to the graduate administrator at least four weeks before the examination date.

The committee will vote on the outcome and sign a report that will be filed in the SCI Graduate Students Office. The oral examination is public and open to all members of the Computer Science Department. It must be announced to CSD via the faculty and graduate mailing lists at least one week prior to its scheduled date. The announcement must include a title, an abstract, name of advisor(s), name of committee members, date of examination, and location of examination.

For the project option, the student must complete a Master's project, taking at least three credits of CS 2910, with the S/N grading option. Approval of a project report by the advisor is required.

Both CS 2000 and CS 2910 are closed courses, requiring approval of the faculty advisor for enrollment.

Note that students selecting the thesis option must complete a total of four electives, plus foundation courses and thesis research (CS 2000), while students completing the project option must complete a total of five electives, plus foundation courses and directed research (CS 2910).

MS Internship

A maximum of one credit of MS Internship (CS 2900) can be taken by students wishing to supplement their in-class education with practical training. Note that international students must complete two semesters of full-time study prior to qualifying for CPT. Further, OIS is unlikely to
approve CPT authorization during the final semester of study; please talk to the graduate studies administrator or the DGS for more information regarding these issues.

Students wishing to complete an MS Internship (CS 2900) as part of their MS degree must fill out a learning agreement in conjunction with their employer and their faculty advisor in the CS Department. Please note that MS Internships not contributing substantively to a student's graduate education will not be approved by the Department. Completed Learning Agreement forms (with all signatures) should be turned in to the graduate studies administrator prior to the add/drop deadline for the term in which the Internship will take place.

**Department of Informatics and Networked Systems**

Those with the skills to design, build, manage, and protect the systems and networks that make information useful and accessible are indispensable. Information professionals enjoy limitless potential for exciting careers in virtually every industry — health care, law, finance, manufacturing government, higher education, and more.

We offer undergraduate and graduate degree programs that balance theoretical principles with hands-on learning experiences in all aspects of information systems, from storing and retrieving information to communicating information among systems, as well as the interaction between people and information systems as well as the role of information systems and technologies in both business and society.

Here, you will have amazing opportunities to learn from faculty engaged in cutting-edge research funded by the National Science Foundation, Air Force Office of Scientific Research, National Institutes of Health, and more. Pitt is one of the top 25 public research universities; this provides our students with access to research projects and laboratories that will develop the next generation of information technologies. We believe that research and teaching must be closely linked, so that future researchers and teachers will gain critical experience in development and research techniques. Students in both the undergraduate and graduate programs are encouraged to participate in research opportunities. Moreover, since the University is situated within a major urban area, our students have a vast array of internship and employment opportunities with major US corporations.

Our students acquire more than technical expertise; they learn how to connect people with technologies that can enhance their lives. Our goal is to educate people who are efficient on the job from day one, while providing the foundation for them to prosper professionally as their careers progress. You'll be able to build systems and manage information using today's technology-you'll also have the ability to design and master the technology of the future.

**Academic Advising**

Each student is assigned an academic advisor at the time of admission to graduate study. These assignments are made primarily on the basis of the student's background and interests as shown in the application. The student may at any time elect to change advisors: any such change requires the consent of the new advisor and must be reported to the Program. Forms for changing advisors are online through the School's "Current Students" Web page.

At the time of initial registration or before the completion of the first term, the student is encouraged to discuss a plan of study with their advisor. A plan of study is a series of courses designed to meet the minimum exit competencies judged by the faculty to be necessary for employment as an information professional; this plan is outlined in and completion is tracked through the Academic Advisement Report (AAR). Students coming into the program without prior course work or work experience in the areas covered by the plan of studies should adhere fairly closely to the suggested plan. If there has been course work or experience in one or more of the content areas of the program, students are permitted to substitute and take courses in an area in which additional background is needed. Substitutions and exceptions must have approval of the advisor and must be documented through the Records Office. Information regarding documenting exceptions is available on the School's Current Students webpage.

Details regarding advising and resources for tracking your degree progress (the AAR) are available on the School's Catalog page, under the Advising section.

Each student must ensure that the AAR meets all of the program requirements for graduation. At the completion of the program, the Records Office coordinates with the Department to certify all students for graduation. See the SCI Catalog page for more details and regulations pertaining to graduation.

Stricter advising guidelines and regulations apply to the doctoral students. See the doctoral program regulations for details.
Policies for the Department of Informatics and Networked Systems

Beyond the School's general Grading and Credit policies, the department may impose stricter rules. Rules pertaining to DINS students are as follows.

Maintenance of a 3.0 GPA

Each student must maintain a 3.0 Grade Point Average (GPA) for all credits of graduate level coursework for either degree or the certificate. Failure to maintain a cumulative 3.0 GPA will result in the student being placed on academic probation. If the student does not raise the GPA to a 3.0 after the next nine credits, the student will be dismissed from the program in which he or she is enrolled. Students should refer to the Academic Standing and Dismissal section of the SCI Catalog page for full definitions and explanations of the academic standing review.

Grades for Individual Courses

All students must earn satisfactory grades in each course taken. A grade of C-, D+, D, D-, F and Unsatisfactory are unacceptable for graduation credit. A course for which such an unsatisfactory grade is earned must be repeated if it is a course that is a degree requirement (e.g., INFSCI 2500). Courses may be repeated only once. Elective courses need not be repeated; another course may be taken to replace it. However, the original course remains on the transcript and a higher grade must be earned to maintain a 3.0 GPA. Full details regarding SCI Grade and Course Repeat policies are available on the School's Catalog page.

Satisfactory (S/NC) /Audit Grading System

Students are permitted to earn at most six credit hours with the grading option S as part of the credits required for the degree. An S grade is equated with a grade of B, B+, A-, A or A+. Course performance equivalent to a B- or lower will result in the assignment of an audit (N grade) and will not count towards graduation. A grade of satisfactory (S) has no quality points associated with it and is not used in calculating the GPA.

See the SCI Catalog for information regarding the selection of an alternative grading option (S/NC or Audit).

Information Science with a concentration in Telecommunications, PhD

PhD Admissions Requirements

All applicants to the School of Computing and Information must adhere to the admissions requirements outlined in the School's policies. In addition, the following are requirements for admission to graduate study in Telecommunications for pursuing a PhD degree.

1. A master's degree from an accredited university, a recognized international program, or the equivalent. Exceptional students with a technical Bachelor's degree may be admitted on occasion. Such students must still satisfy all other requirements that follow.
2. Attainment in graduate work of a minimum quality point average of 3.3 (on a scale with A having a value of 4 points per credit). An international student's quality point average will be calculated on the basis of equivalency from universities that use a different scale.
3. As evidence of the ability to undertake doctoral work, an essay (not exceeding 1000 words) indicating, as specifically as possible, the student's academic and professional goals in relation to the Telecommunications doctoral program and identifying potential areas and/or topics in which the student expects to pursue dissertation research.
4. Evidence of academic completion of:
   o Two different scientific computer programming languages,
   o Introductory class in probability and statistics
   o Differential and integral calculus

In addition, a candidate may elect to include the following optional material:
1. A complete curriculum vitae that provides an overview of education, work, publication, and other professional activities.
2. An example of published writing.
3. A description of any published or unpublished research, contributions to the professional or scholarly literature, and other professional or academic experience relevant to an assessment of his or her capacity to pursue doctoral study successfully.

Students whose complete credentials are not available for full admission may register as special students until the completed credentials are received, provided all other requirements have been satisfied. Students with deficiencies in either coursework or scholastic achievement may be admitted provisionally. Prerequisite courses should be completed within the first two terms.

### Purpose of the Degree

The Doctor of Philosophy (PhD) degree in Information Science with a Focus in Telecommunications (henceforth called PhD in Telecommunications for short) prepares students for independently engaging in advanced work in high-quality research and teaching. It provides research oriented graduate study and professional specialization in telecommunications and emphasizes both scholarly and applied research. To earn a PhD degree, a student must demonstrate breadth of knowledge, give evidence of superior scholarship and mastery of a specialized field, and must demonstrate their ability to do significant and relevant research. In addition, the student must conceive, write and defend a PhD dissertation representing a significant and original contribution to current academic research as demonstrated by a public dissertation defense and publication in established peer-reviewed academic conferences and/or journals. Major milestones en-route to the PhD degree are the preliminary examination, the comprehensive examination, the dissertation proposal, and the dissertation defense.

### PhD Degree Requirements

A candidate for the PhD should have broad knowledge of the field of telecommunications as well as a specialization in the area of major interest. Every candidate should have, in addition, a strong background in research methodologies.

The Telecommunications PhD program requires a minimum of 48 credits beyond a master's degree. Exceptional students with a technical bachelor's degree may be admitted on occasion and in such cases, a minimum of 72 credits beyond the baccalaureate degree is required. The 72 credits must include the required courses (or their equivalent) for the MST degree at the University of Pittsburgh. Also included in the 72 credits are:

- 12 credits of required courses
- 12 credits of doctoral seminars
- 6 credits of minor courses
- At least 18 credits of dissertation research and writing (no more than 18 credits applied toward graduation)
- 48 of the 72 credits must be advanced coursework beyond the MST degree (or its equivalent).

A plan of study should be designed by the advisor and student as early as possible after admission. A copy of the plan of study must be on file in the student's folder and should be consulted during each registration period.

While these are minimum credit requirements, every PhD student may be required to take more credits of coursework to obtain the breadth and depth of knowledge required to successfully complete their dissertations. Graduation depends upon meeting the minimum credit requirements and all other requirements.

### Preliminary Examination Requirement

The preliminary examination, according to Regulations Governing Graduate Study at the University of Pittsburgh, is held:

"...to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently. The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation."

The Telecommunications and Networking faculty has clarified further that the overall objectives of the preliminary examination are:

- To test the PhD students for breadth of knowledge
- To evaluate their skills, and their ability to apply them
To evaluate their ability to do research, and

Eligibility and Preparation

To be admitted to the preliminary examination a student must:

1. Have completed a master's degree in a closely related field (e.g., telecommunications, information science, computer science, engineering, mathematics); Exceptional students admitted after a Bachelor's degree must have completed all pre-requisite coursework.
2. Be admitted to full graduate status (i.e., all provisional admission requirements must be completed);
3. Have attended the PhD orientation session;
4. Be registered in the term in which the preliminary examination is taken; and
5. Apply in writing and with the advice and consent of a faculty advisor to the secretary of the TPC by the announced deadline.

Traditional preparation for the preliminary examination includes graduate-level coursework and familiarity with reading and reviewing papers and identifying research gaps. In addition, doctoral students should become familiar with the proceedings of the relevant professional societies of the field and copies of recent preliminary examination papers available from the secretary of TPC.

Content and Format

The preliminary examination consists of two parts:

1) Research Project and Paper

During the first year of doctoral study, under the direction of the advisor (or another full or adjunct member of the program's graduate faculty), students will design and complete a research project. The project should reflect only those activities undertaken during the first year of study. A previous master's thesis or other work completed prior to the start of doctoral study may not be submitted for this requirement. While much research involves working in a larger team, the student's role in the project and in writing the paper should be significant. The student must be the primary author, and ideally should be the sole author. The student should seek a project or a part of a project in which the student can take the lead in conducting the research and writing up the results under the direction of the advisor. However, unlike a dissertation or thesis, the research paper submitted for the preliminary evaluation may include co-authors. In this case, the role of each co-author should be clearly stated in writing by the student and submitted along with the research paper. Furthermore, the paper may be integrated with other work and later submitted for publication with a longer list of authors.

Research papers take many forms, and some venues require particular nomenclature or forms. The paper submitted to the faculty to meet this requirement should include the following components:

- A clear statement of the problem
- An innovative idea that addresses the problem
- A survey of the relevant research literature
- An explication and implementation of a methodology for addressing the problem
- Evidence that the described idea achieves its goal
- Analysis and evaluation
- Discussion of the research, including but not limited to shortcomings of the work and directions for future work.
- A list of references

While it is possible to deviate from this structure, this should only be done with the support of the advisor.

2) Oral presentation and defense

Submission and presentation of the paper must be made not later than in the last January of the first four terms in the program. Students must complete 6 credits of doctoral courses and 6 credits of doctoral seminars before taking the preliminary examination. The due date for submission of the paper is the second Friday of January. On the fourth Friday of January, papers will be presented orally in conjunction with the IS PhD oral presentations to graduate faculty in a public forum. Each student will give a 20-minute long oral presentation of their paper to the faculty, followed
by a 20-minute discussion. All presentations will be made on a single day. Faculty will meet the same day to grade the written and oral performance. The result of the exam will be: (a) pass, (b) fail with one more chance to re-take the exam the following year, or (c) fail with no chance to re-take the exam.

Timing and Completion of Milestone

A student has to pass the preliminary exam at the earliest opportunity (within the first four semesters) and should not wait till completion of coursework to attempt the preliminary exam. A student will have successfully completed the prelim exam after passing the oral presentation and defense and completion of the coursework as required.

Every student must complete the preliminary examination within four semesters of their admission (not counting summer) into the program unless an exception is granted by the Telecommunications and Networking Program Committee (TPC). Exceptions are typically not allowed for full-time students. Exceptions may be made for part-time PhD students in consultation with their advisors. The preliminary examination consists of authorship, presentation, and public defense of a publishable quality research paper as described below.

With the successful completion of the preliminary examination, the student is fully admitted to doctoral study in telecommunications. The Program Chair will notify the student, in writing, of admission to doctoral study. After admission, the student must complete the remaining coursework including doctoral level seminars; probability and statistics, research design, and information science course requirements; and the residency requirement.

Comprehensive Exam

The student must satisfactorily pass a comprehensive examination designed to assess mastery of the general field of telecommunications, acquisition of both depth and breadth in the area of specialization within the field, and ability to use the research methods of the discipline. The purpose of the comprehensive examination is to assess the student's ability to understand a sub-area of telecommunications in depth. In order to do research, a student must be able to read, understand, present, and criticize research papers in the field. It is also important that the student be able to explain it in depth to someone who is unfamiliar with that area. Thus, this examination centers on the development of a tutorial as well as a lecture in which the student must explain the subject to the satisfaction of the entire Telecommunications faculty. From a learning perspective, this provides the student with the experience of structuring and explaining a technical topic in detail.

Eligibility and Preparation

Prior to the comprehensive examination a student must complete most of the course and seminar requirements. This includes:

1. Completed most of the of graduate course and seminar work for completion of a PhD These credits include:
   • 12 credits of doctoral level classes (as determined by the advisor),
   • 6-credits of minor requirement (Telecommunications courses excluded), and
   • 12 credits in doctoral seminars;
2. Completed a "state-of-the-art" paper to be submitted to graduate faculty two weeks prior to examination date;
3. Be registered in the term in which the comprehensive examination is taken; and
4. Apply to the Chair of the PhD program for permission to take the comprehensive examination.

Content and Format

The comprehensive examination has a written component and an oral component. In preparation for the one-hour oral examination, the examinee must prepare a written "tutorial" paper that must be submitted to the TPC two weeks prior to the scheduled exam date. The "tutorial" paper is a critical essay that explores the literature of the selected topic; the student identifies, synthesizes, and evaluates the relevant literature on the topic.

The comprehensive examination will be conducted by at least four members of the TPC faculty. The exam will be directed at the "tutorial" paper and the various relationships among the components of telecommunications. Goals of the comprehensive examination committee are to assess the student's understanding of the topic of the "state-of-the-art" paper, the theoretical framework that supports it; the quality of the student's research
skills necessary to understand, integrate, and extend knowledge gained through scholarly inquiry; and the relationships of the topic to telecommunications. The results of the exam are conveyed to the student, by the examination committee, usually within an hour after completion of the exam. The result of the comprehensive examination is a pass or fail. If a student fails, they may retake the exam one more time. A student who fails the comprehensive examination twice is no longer eligible to continue in the PhD program.

**Process**

The procedure to schedule and take the comprehensive examination is as follows:

1. The student will select a topic of interest in his research area in consultation with his advisor. When the advisor is satisfied that the student understands the subject matter in sufficient depth, the student prepares a tutorial paper.
2. The student will prepare a comprehensive literature survey of the research on this topic and prepare a tutorial document that is referenced and complete in itself. This document must not exceed 20 pages in length, with a font size of 12 pt, and margins of 1 inch on the left and right. Also, the document must be prepared so that the faculty can easily read it. A researcher in Telecommunications who is not familiar with the research topic should be able to understand and appreciate the issues in this topic by reading this document.
3. The work should be completely done by the student except for informal suggestions from the advisor. The advisor may provide only grammatical feedback; it is up to the student to decide what content is necessary, and how to organize it, because this is a crucial part of the tutorial. Occasionally, the advisor may suggest inclusion of certain topics.
4. The student finds a date for the presentation where at least four of the telecommunications faculty can attend. At least two weeks prior to the examination date, the student must deliver a final copy of the tutorial document to all faculty members.
5. It is strongly recommended that the student provide some preliminary research results on an advancement in the topic or at least reproduce the most relevant work conducted by researchers in this topic.
6. The student has to publicly present the material from this document orally on the day of the examination to the faculty in a presentation lasting 45 minutes. The presentation will be tutorial in nature with additional results if any. The faculty may question the student to assess his or her understanding of the topic in question as well as in any general topic in the area. The faculty may ask questions for clarification and to test the student's grasp of the subject as well as closely related subjects and methodologies.

The response of the TPC may take on several forms, including:

- Unconditional pass
- Conditional pass, with conditions such as
  - Additional recommended or required coursework
  - Specific modification to the tutorial paper
  - Re-attempt the oral presentation
- Fail

All Telecommunications students are encouraged to attend comprehensive exams to see what is expected and learn from the tutorial presentation.

**Timing and Completion of Milestone**

The Comprehensive should be taken after the student has completed almost all coursework, seminars, etc. and after the student has successfully completed the Preliminary examination. Typically, a student will complete the comprehensive exam within 18 months of completing the preliminary exam.

After successfully completing the comprehensive examination, the student is admitted to doctoral candidacy and works with a faculty advisor to prepare a dissertation proposal and form a dissertation committee. The dissertation proposal must be approved by the student's dissertation committee. Successful completion of the comprehensive examination and approval of the dissertation proposal permit the student's academic advisor to recommend the student for doctoral candidacy. Normally a student will begin to register for dissertation credits after being admitted to doctoral candidacy. A minimum of 18 dissertation credits is required. To be eligible for the dissertation defense the student must complete the residency requirement (three terms of full-time study of which two terms must be consecutive). The final defense of the dissertation is a public session announced in University-wide media. The dissertation must be unanimously approved by the dissertation committee.

**Candidacy and Dissertation Requirements**
Pre-Candidacy and the Dissertation Proposal

Dissertation Advisor and Committee

Students must gain the agreement of a member of the telecommunications faculty, who is also a member of the graduate INS faculty, to chair the dissertation committee that will advise the student on the area of research. In most cases, the student's academic advisor continues as the dissertation advisor and chair of the dissertation committee. The advisor's agreement is recorded in the student's file. Any request to change the dissertation advisor must be submitted in writing to the chair of the TPC and the Office of Student Services for an update to the student's digital record. Approval for the change and the selection of another dissertation advisor is filed in the student's folder.

The student's dissertation advisor:

1. Assists in choosing the dissertation committee and in confirming the eligibility of all members selected;
2. Arranges with the TPC support staff to schedule the dissertation proposal presentation;
3. Reviews progress toward completion of the research;
4. Arranges with support staff to schedule the dissertation defense;
5. Chairs the dissertation defense;
6. Secures appropriate signatures from dissertation committee members and assures that all required paperwork is submitted in accordance with the TPC, SIS, and University procedures.

The dissertation committee composition is dictated by SCI regulations; see the Doctoral Committee section of the SCI Catalog for details.

Members of the dissertation committee are to be selected by the student in consultation with the dissertation advisor. The dissertation committee is responsible for monitoring the research, conducting and evaluating the oral defense of the dissertation, and approving the final written presentation of the dissertation. The dissertation advisor directs the dissertation research and writing, but all committee members have the responsibility to assist the student as consultants. All members of the committee may vote.

According to university policy, meetings of the doctoral candidate and their dissertation committee must occur at least annually from the time the student gains Admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward degree and discuss objectives for the following year and a timetable for completing degree requirements.

While the student prepares a dissertation proposal, they are required to enroll in and complete a minimum of 18 dissertation credits as part of their study.

Students should refer to the School's Catalog page, specifically the advising section, for further resources on the advisor/advisee relationship.

Dissertation Proposal

The student schedules a public presentation of the dissertation proposal, notifies the telecommunications secretary, and provides a written copy of the proposal to the committee members at least two weeks prior to the presentation date. The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree.

The dissertation proposal represents a contract between the student and the dissertation committee. The student should specify in as much detail as possible the problem they wish to solve and the method they intend to use to solve it.

Students demonstrate their ability to complete a sound project of original research by presenting and defending the dissertation proposal to their dissertation committee. The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal.

Originality may be reflected in a number of ways. For example, a candidate may pose an important new problem or formulate an existing problem in a novel and useful way. A candidate may investigate previously ignored material or develop new techniques for investigating issues. Extensions of previous investigations are acceptable provided they incorporate important new elements in the design or execution of the research.

Normally, a satisfactory dissertation will form the basis for one or more publishable articles. The dissertation committee may offer an opinion on the publishable content of the proposed research.
Written notice of the student's meeting with the dissertation committee to approve the proposal will be distributed to the TPC faculty at least one week in advance. The notice will contain the student's name, the title and abstract of the proposal, the date, time, and place of the meeting. The committee will conduct the proposal hearing and must unanimously approve the dissertation topic and the research plan. The student is responsible for filing a copy of the approved proposal with the department.

When the proposal has been successfully defended, the chair of the student's dissertation committee shall notify the Chair of the PhD Committee, the chair of the department, and the Dean that the student has achieved formal candidacy.

**Timing and Completion of Milestone**

The proposal may be done any time after the successful completion of the comprehensive examination. University rules require that the proposal be completed at least six months prior to the final defense of the dissertation. The timing of the proposal depends heavily on the student's dissertation project. The actual timing depends on the student's ability to demonstrate the project's feasibility to the committee. For some, this will occur early in the research cycle; for others, this will occur later. It is generally in the student's interest to do this earlier rather than later, since it defines the scope of the completed dissertation. In any case, every student should aim at completion of their dissertation proposal within one year of passing the comprehensive exam.

Acceptance of the proposal includes, to the extent possible, concrete research goals. When the student achieves the goals, the PhD research is to be considered finished. Modification of the goals can only be made collectively and should be written and signed by the student and each committee member. The student should make regular progress reports to the entire committee.

The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. When the proposal has been successfully defended, the chair of the student's dissertation committee shall notify the Chair of the PhD Committee, the INS Program Chair, and the Dean that the student has achieved formal candidacy.

**Candidacy**

For admission to formal candidacy for the PhD degree, a student must have:

1. Passed the preliminary examination;
2. Completed all coursework requirements (with the possible exception of dissertation credits) with a QPA of 3.3 or higher;
3. Passed the comprehensive examination;
4. Successfully presented a dissertation proposal and received permission from the dissertation committee to begin research.

When these steps have been taken, the chair of the student's dissertation committee will notify the Chair of the PhD Committee, the Chair of INS, and the Dean that the student has achieved formal candidacy. The Chair of the PhD Committee will notify the student of his admission to doctoral candidacy in writing. A copy of the notice will be placed in the student's folder. The student is expected, at this time, to schedule and present a colloquium on their research in an open forum in the School of Computing and Information.

**Dissertation Research Procedural Requirements**

The student must submit all forms, letters, and questionnaires related to the dissertation research to the TPC members of the dissertation committee for approval before any such documents are publicly distributed.

The student is also responsible for meeting University requirements when human subjects are used in research. These requirements are found in the University of Pittsburgh's Guidelines to the Use of Human Subjects in Psychosocial Research. The school has a faculty representative on the Psychosocial Institution Review Board who may be contacted with questions of procedure.

The student must prepare a final copy of the dissertation conforming to the University of Pittsburgh's Style and Form Manual for the format of the dissertation. Since the bibliographic style is best determined by the subject of the dissertation, a style manual of the student's choice may be used for the content of the dissertation and must be applied consistently throughout.

For details regarding the University's formatting guidelines and other paperwork related to the Electronic Theses and Dissertations (ETD) submission process, refer to the School's Current Students page on graduation procedures. Specifically, the PhD Graduation Checklist will assist students with resources, deadlines, and related items.
If University facilities and/or faculty time are being used in dissertation research and/or the writing of the dissertation, then students are required to register for at least 3 credits per term or such greater amount as the School or Program deems appropriate. Students who have completed all credit requirements for the PhD degree and are working full time on their dissertations, should register for fixed-fee full time dissertation credits. If the student is a doctoral candidate and off-campus, not using University facilities and/or faculty time, the candidate need only register for 1 credit per academic year to maintain active enrollment status.

**Dissertation Defense**

The purpose of the final defense is to assess the student's ability to present and defend the result(s) of their original research project. The student must be able to clearly communicate the problem, the method, the assumptions, and the results of the project. He or she must be able to clearly articulate and support all assumptions and decisions that were made toward the process of completing the project. While the student's committee makes the final decision, the defense is public and questions are accepted from any attendee.

**Dissertation**

After completing the investigation and preparing the dissertation, the candidate is advised to submit the first draft to the dissertation advisor early in the term in which he/she expects to receive the degree. This allows time for any necessary revisions and for preparation of the final copies in an acceptable style and format.

Any exceptions to the style manual approved for the School must have prior approval by the advisor. Final decisions concerning style and format rest with the student's dissertation advisor. Note the dissertation can either follow the traditional book format model or a collection of published research articles. If the latter case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. If the published articles were co-authored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. Instructions on incorporating articles into the dissertation are provided in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh.

**Eligibility for the Dissertation Defense**

To be eligible to defend the dissertation, a student must have:

1. Completed the residency requirement;  
2. Requested the formal announcement of the defense in the University Times through the School;  
3. Distributed copies of the dissertation to the dissertation committee at least four weeks prior to the date of the defense.

**Registration Requirements**

Students completing their research work for the dissertation will be required to register for at least one credit in the term during which they expect either to complete degree requirements or have the oral defense. Students must submit an application for graduation for the term in which they have planned the dissertation defense. The application for graduation and the related deadlines and late fee structure are available on the School's Current Students webpage.

If a student does complete all the work in a given term, including the dissertation oral examination, and has been cleared for graduation too late to be included on the graduation list for that term, the student may apply to graduate the following term and need not enroll for any courses or any credits, subject to approval by the Dean's office.

If a student is unable to complete the work during the expected term of graduation due to some extenuating circumstances related to the School and University (beyond control of the student and attested to by the Dean's office), the student will not be required to register for additional credits in the term of graduation.

All requests for exceptions to the policy stated above should be sent to the Chair of the Department of Informatics and Networked Systems from the advisor for clearance and recommendation and then to the Dean for approval consideration.
Defense of the Dissertation

The dissertation defense is scheduled by the dissertation advisor early enough in the term to allow for necessary revisions and final editing of the manuscript before the graduation deadline. The candidate must submit copies of the dissertation to the dissertation advisor and to the dissertation committee at least four weeks prior to the scheduled dissertation defense. A copy must also be filed with the Department at least four weeks before the date of the dissertation defense meeting. Notice of the dissertation topic/title/abstract; the defense date, time, and location; and the availability of the final draft copy of the dissertation will be publicly posted and notice sent to the faculty at least one week ahead of the scheduled defense.

Dissertation defenses must be publicly announced and are open to the University community, but only the dissertation committee may vote. A student defends their dissertation successfully if the dissertation committee unanimously approves it. Although the dissertation defense is dedicated primarily to the field of the dissertation, other questions relating to telecommunications may be considered at this time. The chair of the dissertation committee serves as the session moderator.

A student who successfully defends the dissertation with conditions to be completed must satisfy those conditions with the approval of the dissertation advisor within one year.

Completion of the Dissertation

The dissertation should be completed within the statute of limitations described below. If the statute of limitations is about to be exceeded and there is evidence of reasonable progress, the Department may recommend an extension to the statute by a specific period usually not exceeding one year. It is the student's responsibility to present evidence of progress to their advisor along with a request for extension prior to the end of the statute of limitation period. All requests for extension must be approved Department; approved requests will be submitted to the Dean's Office for final action. See details regarding the statute of limitations in the SCI Catalog page.

Publication of the Dissertation and ETD Guidelines

All candidates for a PhD degree are required to submit their official dissertations electronically using the University of Pittsburgh's procedures and formatting for Electronic Theses and Dissertations (ETD). In that case, the candidate is required to pay a fee specified by the University to Student Accounts and submit various items as outlined on the School's PhD Graduation Checklist.

Any dissertation may be published after the final defense provided that the dissertation submitted for publication is approved as to form and content by the dissertation advisor and also provided that due acknowledgement is made to the University. No form of publication, however, shall relieve the student of the responsibility for following the University's Electronic Theses and Dissertations (ETD) formatting and submission guidelines as outlined on the School's PhD Graduation Checklist.

For ETD formatting guidelines and general information, please visit the University of Pittsburgh Electronic Theses and Dissertations website. For deadlines and contact information regarding the School's required graduation and ETD paperwork, please visit the School's Current Students webpage on graduation procedures.

Journal Requirement

All PhD students are required to submit an article of publishable quality (based on their dissertation) to a journal before the degree is awarded. This shall be noted when applying for graduation with signatures of the student and the advisor.

Additional Requirements

Grade Policy

Graduation depends upon meeting the minimum credit requirements and all other requirements. Graduate degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.3 GPA. Grades of C or lower are unacceptable for graduation credit.
Residency Requirements

Full-time study on campus is considered most beneficial to students, but it is recognized that students may have off-campus responsibilities as well. The PhD degree, therefore, can be completed by a combination of full-time and part-time study. Three terms of full-time study are required, two of which must be consecutive and must be taken after successful completion of the preliminary examination. Full-time study is defined as nine or more graduate credits per term.

Registration Requirements

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for at least one credit during a 12month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Upon readmission, the student is required to adjust the program of studies to meet current PhD degree program, School, and University requirements.

In keeping with University policy, all graduate students must be enrolled for a minimum of 1 credit in the term in which they graduate.

Doctoral students who have completed all credit requirements for the PhD degree, including minimum dissertation credit requirements, and are working full time on their dissertations, are encouraged to register for "Full-time Dissertation Study," with a fixed-fee registration per term plus fees. Enrollment in this course fulfills the University requirements for registration in the term of graduation.

Transfer of Credits

Upon petition to the faculty and with the consent of the student's advisor, a student may be granted up to 6 credits of advanced standing. This credit for graduate course work completed at another institution may be granted if the credit has not been applied to a previous degree, has been earned within the 6-year statute of limitations, and is relevant to the student's doctoral studies in the School of Computing and Information. Advanced standing is granted at the time of admission or during the first term of course work, if approved. Petitions for transfer of credits must be received at the time of application or during the first term of attendance. Transcripts verifying the graduate courses must accompany the petition along with sufficient documentation to permit the faculty to evaluate their relevance to the doctoral program.

Transfer credits must be earned at an accredited institution granting degrees at the doctoral level. No credit will be granted toward doctoral degrees for work completed in extension courses or in off-campus centers of another institution unless those credits are approved for graduate degrees at that institution. Transfer credits will not be accepted for courses in which grades lower than a "B," or its equivalent, has been received. For details, see the University's policy on transfer of credits.

Please note these transfer credits will not be applied to core courses, independent study or doctoral seminars.

Probation and Termination

All students pursuing the doctoral degree are required to maintain a cumulative GPA of at least 3.3 after admission to graduate study and for all course work applicable to the degree. Students are automatically placed on academic probation when their cumulative GPA falls below 3.3. The graduate faculty may choose to terminate students on probation for two consecutive terms. A cumulative GPA of 3.3 or better is required for admission to doctoral study and for the award of the doctoral degree. In addition, students must show adequate progress through an annual review to be held on the 2nd Friday of January.

Statute Of Limitations

All requirements for the PhD degree must be completed in not more than six calendar years from the time of first registration. Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program. More details regarding the statute of limitations and extensions can be found in the SCI Catalog.
Note: All students who are candidates for doctoral degrees are governed by the regulations of the University Council on Graduate Study, which establishes minimum standards for graduate work throughout the University as well as by those regulations established by the School of Computing and Information faculty. See the University's Academic Regulations for details.

Information Science, PhD

PhD Admissions Requirements

IS PhD applicants must either have or demonstrate the following prerequisite knowledge. These courses or their equivalents should be taken before seeking admission but may be taken during the first four terms of study. All courses must be at the graduate level and may have been taken in the course of pursuing another graduate degree:

- Statistics or Discrete Math (INFSCI 2020)
- Cognitive Psychology (INFSCI 2300 or INFSCI 2350)
- Systems Analysis and Design (INFSCI 2510)
- Data Structures (INFSCI 2500)
- Database Management (INFSCI 2710)

PhD Degree Requirements

There are three stages of admission to the doctoral program:

1. admission to graduate study when the student first matriculates
2. admission to doctoral study following successful completion of the preliminary examination
3. admission to candidacy following successful completion of the comprehensive examination and the approval of the dissertation proposal.

A minimum of 48 credits, including 30 course and seminar credits beyond the master's degree, and at least 18 dissertation credits are required. Students without a master's degree will be required to take a minimum 24 additional credits of coursework or seminars, for a total of 72 credits beyond the bachelor's degree. Students who did not take the prerequisite courses as part of earlier studies should expect to complete admission requirements or equivalent courses.

A student pursuing a PhD degree is first admitted to graduate study in Information Science. During the first year of study and in preparation for the preliminary examination, PhD students should complete initial course work and attend the PhD orientation session (a two-hour review of requirements for the PhD degree).

Preliminary Examination Requirement

Preparation for the Preliminary Examination

Core Courses: Four graduate-level courses, one in each of the following areas. Students, who have taken two or more of these courses (in any cluster described below) as part of a degree at the University of Pittsburgh, may take additional courses from the remaining areas. Prerequisites for the core courses are not counted as part of the PhD course requirements.

- Research methods
  - INFSCI 2040 - RESEARCH DESIGN
  - INFSCI 2160 - DATA MINING
  - INFSCI 2591 - ALGORITHM DESIGN
- Foundations
  - INFSCI 2120 - INFORMATION AND CODING THEORY
  - INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
Independent Research: Six credits of independent study focused on a research project are required. This research will normally be supervised by the student's advisor over two terms, but any IS faculty member who is a member of the graduate faculty may supervise the student. The student may opt to have different faculty supervise different parts of the independent study. The result of this research will be an original, publishable quality research paper, which will serve as the basis of the preliminary exam (see below). Previously published work may not be used to fulfill this requirement, although the independent research project might build upon previous work done by the student.

Doctoral Seminars: Three doctoral seminars (9 credits), including a required INFSCI 3005 Introduction to Doctoral Research, are required. INFSCI 3005 is offered every fall/spring and should be taken during the first year of study. This course will cover the scope of research in Information Science. Advanced doctoral seminars will be focused on single research themes.

While the preliminary examination can be taken before the completion of the core courses and doctoral seminar, the preliminary examination requirement will not be considered satisfied until all core courses and doctoral seminars are completed.

Preliminary Examination

The goal of the preliminary evaluation is to assess your breadth of knowledge and ability to conduct research in information science. The evidence of your breadth of knowledge is your performance in the core courses and seminars. The evidence of your ability to conduct research is provided by authorship, presentation, and public defense of a publishable quality research paper that:

- presents work you have done under the direction of a graduate faculty member in the department;
- demonstrates your ability to conduct research and clearly report the results of that research;
- shows your mastery of the subject matter, both in the written paper and in your oral presentation and defense.

Research Project and Paper

During the first year of doctoral study, under the direction of your advisor (or another full or adjunct member of the department graduate faculty), students will design and complete a research project. The project should reflect only those activities undertaken during the first year of study. A previous master's thesis or other work completed prior to the start of doctoral study may not be submitted for this requirement. While much research involves working in a larger team, your role in the project and in writing the paper should be significant. You must be the primary author, and ideally you will be the sole author. You should seek a project or a part of a project in which you take the lead in conducting the research and writing up the results under the direction of your advisor. However, unlike a dissertation or thesis, the research paper submitted for the preliminary evaluation may include co-authors. In this case, the role of each co-author should be clearly stated in writing by the student and submitted along with the research paper. Furthermore, the paper may be integrated with other work and later submitted for publication with a longer list of authors.

Research Paper Components

Research papers take many forms, and some venues require particular nomenclature or forms. The paper submitted to the faculty to meet this requirement should include the following components:
1. a clear statement of the problem
2. an innovative idea that addresses the problem
3. a survey of the relevant research literature
4. an explication and implementation of a methodology for addressing the problem
5. evidence that the described idea achieves its goal
6. analysis and evaluation
7. discussion of the research, including but not limited to shortcomings of the work and directions for future work.
8. a list of references

While it is possible to deviate from this structure, this should only be done with the support of your advisor.

Submission and Presentation of Research Papers

Submission and presentation of your paper must be made not later than in January following your second fall semester in the program. Students must complete the 6 credits of Independent Research Study and IS 3005 before taking the preliminary examination. The due date for submission of the paper is the second Friday of January. On the fourth Friday of January, papers will be presented orally to the IS graduate faculty in a public forum. Each student will give a 20-minute long oral presentation of his/her paper to the faculty, followed by a 20-minute discussion. All presentations will be made on a single day. Faculty will meet the same day to grade the written and oral performance. The result of the exam will be: (a) pass, (b) fail with one more chance to re-take the exam the following year, or (c) fail with no chance to re-take the exam. While the submission and presentation of your paper may be made before the completion of the core courses and doctoral seminar, the preliminary evaluation will not be considered satisfied until all core courses and doctoral seminars are completed.

Comprehensive Examination Requirement

Preparation for the Comprehensive Exam

Students will have successfully completed the preliminary examination. In preparation for the comprehensive exam, it is expected that the student will complete 3 credits of advanced statistics.

To be admitted to the comprehensive examination a student must have:

- successfully completed the preliminary examination;
- completed the 1-term residency requirement; and
- notify via e-mail the Chair of the PhD Committee and Program Chair/Secretary of the Committee of the comprehensive examination at least two weeks before the exam.

This notification should include the title of the Comprehensive Exam, the date, and the Committee members.

Comprehensive Examination

The comprehensive examination requires successful completion of the preliminary exam. The student will propose three areas of concentration. These areas must be approved by the examining committee, which will consist of the advisor who will chair the examining committee, and two other full time graduate faculty members from INS selected by the student with the approval of the adviser. To gain this approval, the student should complete and send "Comprehensive Areas of Concentration Approval" form to all committee members for their signatures. In exceptional cases, where the student's focus requires outside expertise, one committee member may come from outside the INS graduate faculty body if recommended by the advisor and approved by the chair of the PhD Program.

The student must meet with the members of the committee to discuss the topics and foci. The student, with the consent of the committee, is free to select areas within information science that are not on the list of topics on the areas of concentration from, so long as the committee is unanimous in approving the topics. Once the committee and the topic areas are selected, the student will prepare an activity and reading list with the advice and approval of the committee members. The student will then proceed with the review of literature, based on the reading list. When the student is ready, he/she will inform the advisor who will ask each member of the committee to submit one or more questions to the advisor. The advisor will be responsible for coordinating the exam with appropriate balance over the three topic areas. The student will be given the questions and allowed one
week to prepare written answers to the questions. After review of the written answers, two-hour oral examination will be scheduled and open to the public. The final reading list, questions and answers should be published and available to the iSchool community on the Schools Web site. As soon as finalized, forward this information with “Comprehensive Exam Submission Approval for Web Publishing” form to the staff, with copies sent to the PhD Chair and all comprehensive committee members. The oral examination will normally be within a week of the completion of the written exam, but in all cases no later than within three weeks. The student will make a 10-minute presentation on the key points. The oral questions will cover the answers on the written examination, and more broadly, about knowledge of the material in the three areas of concentration. The result of the comprehensive examination will be a pass or fail. If a student fails, they may retake the exam one more time.

All required forms are available on the School's Current Students webpage.

Candidacy and Dissertation Requirements

Pre-Candidacy

Once the comprehensive examination is successfully completed, the student can propose and defend a dissertation topic. The student and the dissertation advisor should select the dissertation committee.

Dissertation

Each student must write a dissertation that presents the results of a research project carried out by the student. This research project involves a substantive piece of original and independent research grounded in an appropriate body of literature.

Dissertation Credits

Doctoral students are required to take a minimum of 18 dissertation credits as a part of their study. Dissertation credits should be taken during terms when a student is actively working on the dissertation. Most research activities during the first two years of the program are better completed as part of an independent study or a doctoral seminar. In any term in which a student is enrolled for dissertation credits, the student should meet with their advisor on a regular basis to monitor that appropriate progress is being made towards the completion of the dissertation proposal or the dissertation. The specific activities in a given term should depend on the current stage of the dissertation process. In addition to writing the proposal and dissertation itself, other appropriate activities may include reviewing the literature, programming, prototyping, running preliminary studies, writing grant proposals, preparing journal articles related to the dissertation or presenting preliminary results at conferences.

Doctoral students who have completed all credit requirements for the PhD degree, including minimum dissertation-credit requirements, are encouraged to register for "Full-time Dissertation Study," with a fixed-fee registration per term plus applicable fees. Enrollment in this course provides a student with full-time status and fulfills the University requirements for registration in the term of graduation.

Dissertation Advisor

Students must gain the agreement of a member of the INS graduate faculty to chair the dissertation committee that will advise on the area of research and the design of the dissertation study. The advisor's agreement is recorded in the student's file. Any request to change the dissertation advisor must be submitted in writing to the Chair of the IS PhD Program Approval for the change and the selection of another dissertation advisor is placed in the student's file.

In most cases, the student's program advisor continues as the dissertation advisor and chair of the dissertation committee. By University regulations the dissertation advisor must be a graduate faculty member of the Department of Informatics and Networked Systems. In the event that either the student or advisor desires a change, another INS graduate faculty member may serve as dissertation advisor and chair of the dissertation committee.

The student's dissertation advisor together with the student:

- assists in choosing the dissertation committee and in confirming the eligibility of all members selected;
- arranges with the staff to schedule the dissertation proposal presentation;
• reviews progress toward completion of the research;
• arranges with support staff to schedule the dissertation defense;
• chairs the dissertation defense;
• secures appropriate signatures from dissertation committee members and assures that all required paperwork is submitted in accordance with School and University procedures.

**Dissertation Committee**

The dissertation committee composition is dictated by SCI regulations; see the Doctoral Committee section of the SCI Catalog for details.

The dissertation committee is responsible for monitoring the research, conducting and evaluating the oral defense of the dissertation, and approving the final written presentation of the dissertation. The dissertation advisor directs the dissertation research and writing, but all committee members have the responsibility to assist the student as consultants.

**Dissertation Proposal**

After successfully completing the comprehensive examination, the student, in consultation with the dissertation advisor, must prepare a dissertation proposal. The written proposal is presented to the dissertation committee and defended in a hearing before the dissertation committee.

Students must demonstrate their potential to complete a sound project of original research by presenting and defending the dissertation proposal to their dissertation committee. The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal.

Originality may be reflected in a number of ways. For example, a candidate may pose an important new problem or formulate an existing problem in a novel and useful way. A candidate may investigate previously ignored material or develop new techniques for investigating issues. Extensions of previous investigations are acceptable provided they incorporate important new elements in the design or execution of the research.

The student must submit the dissertation proposal to the committee at least two weeks prior to the scheduled hearing. Copies of the dissertation proposal are made by the student at their own expense. When the proposal has been successfully defended, the student's dissertation advisor shall notify the Chair of the PhD Committee, the Chair of the Information Science and Technology Program, and the Dean that the student has achieved formal candidacy. After approval of the dissertation proposal, major changes may not be made without approval of the student and the dissertation committee. The student is responsible for filing a copy of the approved proposal in the IS Program office.

Electronic notice of the student's meeting with the dissertation committee to approve the proposal will be distributed to the INS faculty at least two weeks ahead of time. The notice will contain the student's name; the title of the proposal; the date, time, and place of the meeting; and a link to the electronic version of the dissertation proposal.

The dissertation proposal meeting is open to all INS faculty and PhD students who wish to attend and others by invitation of the student.

Once the comprehensive examination is successfully completed, the student is officially a doctoral candidate. After becoming a doctoral candidate, the student can propose and defend a dissertation topic.

**Candidacy**

For admission to candidacy for the PhD degree, a student must have:

• passed the preliminary examination;
• completed a minimum of 30 credits beyond the master's degree with a GPA of 3.3 or higher;
• passed the comprehensive examination;
• successfully presented a dissertation proposal and received approval of the dissertation proposal by the dissertation committee.
When these steps have been taken, and the dissertation advisor has notified the Program and the School, the Program Chair will notify the student in writing of his admission to doctoral candidacy. A copy of the notice will be placed in the student's folder. The student is expected, at this time, to schedule and present a colloquium on their research to the Program and the public.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the advisor should assess the student's progress toward the degree, discuss objectives for the following year, and project a timetable for completing degree requirements.

**Eligibility for the Dissertation Defense**

To be eligible to defend the dissertation, a student must have:

- completed the residency requirement;
- at least four weeks prior to the date of the defense, requested the formal announcement of the defense in the University Times;
- at least two weeks prior to the date of the defense, distributed copies of the dissertation to the dissertation committee and make it available to the School's faculty. These copies are provided by the student at their own expense.

The dissertation should be completed within the statute of limitations described below. If the statute of limitations is about to be exceeded and there is evidence of reasonable progress, the Department may recommend an extension to the statute by a specific period usually not exceeding one year. It is the student's responsibility to present evidence of progress to their advisor along with a request for extension prior to the end of the statute of limitation period. All requests for extensions must be approved by the Department; approved requests will be submitted to the Dean's Office for final action. See details regarding the statute of limitations in the SCI Catalog page.

**Preparation for the Defense**

**Procedural Requirements**

The student should work with the advisor to ensure that the dissertation will be produced in an acceptable style and format. Document preparation materials are located here.

The student must submit all forms, letters, and questionnaires related to the dissertation research to the departmental members of the dissertation committee for approval before any such documents are publicly distributed.

The student is also responsible for meeting University requirements when human subjects are used in research. These requirements are found in the University of Pittsburgh's Reference Manual for the Use of Human Subjects in Research. The school has a faculty representative on the Institutional Review Board who may be contacted with questions of procedure.

The student must prepare a final copy of the dissertation conforming to the University of Pittsburgh's Style and Form Manual for the format of the dissertation. Since the bibliographic style is best determined by the subject of the dissertation, a style manual of the student's choice may be used for the content of the dissertation and must be applied consistently throughout.

If University facilities and/or faculty time are being used in dissertation research and/or the writing of the dissertation, then students are required to register for at least 3 credits per term or such greater amount as the School deems appropriate or Full-Time Dissertation Study.

**Registration Requirement**

Students completing their research work for the dissertation will be required to register for at least one credit in the term during which they expect either to complete degree requirements or have the oral defense. Students who have completed all credit requirements for the PhD degree may register for "Full-Time Dissertation Study." If the student is a doctoral candidate and off-campus, not using University facilities and/or faculty time, the candidate need only register for 1 credit per academic year to maintain active enrollment status.

If a student does complete all the work in a given term, including the dissertation defense, and has been cleared for graduation too late to be included on the graduation list for that term, the student may apply to graduate the following term and need not enroll for any courses or any credits, subject to
approval by the Dean's office. Students must submit an application for graduation for the term in which he or she has planned the dissertation defense. The application for graduation and the related deadlines and late fee structure are available here.

If a student is unable to complete the work during the expected term of graduation due to some extenuating circumstances related to the School and University (beyond control of the student and attested to by the Dean's office), the student will not be required to register for additional credits in the term of graduation.

All requests for exceptions to the policy stated above should be sent to the Program Chair from the advisor for clearance and recommendation and then to the Dean for consideration and approval.

**Defense of the Dissertation**

Dissertation defenses must be publicly announced and are open to the University community, but only the dissertation committee may vote. A student defends their dissertation successfully if the dissertation committee unanimously approves it. Although the dissertation defense is dedicated primarily to the field of the dissertation, other questions relating to information science may be considered at this time. The chair of the dissertation committee serves as the session moderator.

A student who successfully defends the dissertation with conditions to be completed must satisfy those conditions with the approval of the dissertation advisor within one year.

**Publication of the Dissertation**

The candidate for a PhD degree is required to pay a fee specified by the University to Student Accounts and submit various items as outlined on the School's PhD Graduation Checklist.

The abstract must not be more than 350 words (2450 typewritten characters) in length. With 70 characters per line there are at most 35 lines in the abstract. All copies of the abstract must be approved and initialed by the dissertation advisor in the upper right-hand corner of the abstract. The dissertation and abstract will be examined and approved by the student's dissertation advisor for style, format, and related matters.

Any dissertation may be published after the final defense provided that the dissertation submitted for publication is approved as to form and content by the dissertation advisor and also provided that due acknowledgment is made to the University. No form of publication, however, shall relieve the student of the responsibility for following the University's Electronic Theses and Dissertations (ETD) formatting and submission guidelines as outlined on the School's PhD Graduation Checklist.

For ETD formatting guidelines and general information, please visit the University of Pittsburgh Electronic Theses and Dissertations website. For deadlines, forms, and contact information regarding the School's required graduation and ETD paperwork, please visit the graduation procedures section of the SCI Current Students webpage.

**Summary of Course Requirements and an Ideal Timeline**

All students will complete:

- Required coursework (30 credits)
  - Four core courses (12 credits)
  - One introductory doctoral seminar (3 credits)
  - Two topical doctoral seminars (6 credits)
  - Two independent research studies (6 credits)
  - One advanced statistics course (3 credits)
- Dissertation work (18 credits)
- A minimum of 18 credits of dissertation study

**Typical Timeline for Coursework/Exams:**

Note: International students must maintain full-time status in Fall and Spring terms. ALL students must be enrolled in a minimum of 1 credit during their graduation term.

**Additional Requirements**

**Grade Policy**

Doctoral degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.3 GPA. Courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

**Residency Requirements**

Full-time residency, in addition to requiring full-time study, affords the student the opportunity for daily professional interaction with faculty and other PhD students. This interaction is a major component in the student's preparation for research. Despite the benefits that full-time residency affords, it is recognized that students may have off-campus responsibilities as well.

The PhD degree, therefore, can be completed by a combination of full-time and part-time study. Two terms of full-time study are required. Full-time study is defined as nine or more graduate credits per term. All students, whether on campus or away, must maintain active status by registering according to the requirements stated below.

Note: No matter your status, you must meet with their advisor at least once per year. Annually, students will submit an annual progress report to the PHD Program Chair, the Program Secretary and the advisor. This will take place on the second Friday of January.

**Registration Requirements**

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Upon readmission, the student is required to adjust the program of studies to meet current PhD degree program, School, and University requirements.

In keeping with University policy, all graduate students must be enrolled for a minimum of 1 credit in the term in which they graduate.
Doctoral students who have completed all credit requirements for the Ph.D. degree, including minimum dissertation credit requirements, and are working full time on their dissertations, are encouraged to register for "Full-time Dissertation Study," with a fixed-fee registration per term plus fees. Enrollment in this course fulfills the University requirements for registration in the term of graduation.

Transfer of Credits

Upon petition to the faculty and with the consent of the student's advisor, a student may be granted up to 6 credits of advanced standing. This credit for graduate course work completed at another institution may be granted if the credit has not been applied to a previous degree, has been earned within the 6-year statute of limitations, and is relevant to the student's doctoral studies in the School of Computing and Information. Advanced standing is granted at the time of admission or during the first term of course work, if approved. Petitions for transfer of credits must be received at the time of application or during the first term of attendance. Transcripts verifying the graduate courses must accompany the petition along with sufficient documentation to permit the faculty to evaluate their relevance to the doctoral program.

Transfer credits must be earned at an accredited institution granting degrees at the doctoral level. No credit will be granted toward doctoral degrees for work completed in extension courses or in off-campus centers of another institution unless those credits are approved for graduate degrees at that institution. Transfer credits will not be accepted for courses in which grades lower than a "B," or its equivalent, has been received. For details, see the University's policy on transfer of credits.

Please note these transfer credits will not be applied to core courses, independent study or doctoral seminars.

Probation and Termination

All students pursuing the doctoral degree are required to maintain a cumulative GPA of at least 3.3 after admission to graduate study and for all course work applicable to the degree. Students are automatically placed on academic probation when their cumulative GPA falls below 3.3. The graduate faculty may choose to terminate students on probation for two consecutive terms. A cumulative GPA of 3.3 or better is required for admission to doctoral study and for the award of the doctoral degree. In addition, students must show adequate progress through an annual review to be held on the 2nd Friday of January.

Statute Of Limitations

All requirements for the PhD degree must be completed in not more than six calendar years from the time of first registration. Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program. The request must be submitted to the advisor and then presented to the INS graduate faculty. More details regarding the statute of limitations and extensions can be found in the SCI Catalog.

Note: All students who are candidates for doctoral degrees are governed by the regulations of the University Council on Graduate Study, which establishes minimum standards for graduate work throughout the University as well as by those regulations established by the School of Computing and Information faculty. See the University's Academic Regulations for details.

Information Science, MS

MSIS Admissions Requirements

Prerequisites for admission to the Master of Science in Information Science (MSIS) degree program include one three-credit college course in each of the following (the corresponding Pitt course numbers are indicated):

- Programming: A course on structured programming using Java, C# or C++. (INFSCI 0017 or CS 0401)
- Statistics: A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. (STAT 0200 or STAT 1000)
Mathematics: A college-level mathematics course, in discrete mathematics or calculus. (MATH 0120, MATH 0220, or MATH 0400). If a student has not taken this prior to enrolling, they may take INFSCI 2020 to meet this requirement.

Note: some specializations within the MSIS program of study require additional pre-requisite courses are not calculated in the total credits required to earn the degree. Please see specialization details below.

MSIS Degree Requirements

The Master of Science in Information Science (MSIS) degree is conferred upon students who have:

- acquired proficiency in the core areas of information science;
- obtained a substantial understanding of the larger problems, particularly the use, non-use, and misuse of information, and the function of information in a global society;
- completed a minimum of 36 credits that may include a practicum or thesis;
- satisfied the general University requirements relating to graduate degrees.

With the possible exception of six credits of advanced standing, all course work must be completed in residence in the MSIS degree program (i.e., registering while matriculated as an SCI student) at the University of Pittsburgh.

The student's advisor may approve certain exceptions to this policy:

- Up to six credits taken at other member institutions in the Pittsburgh Council on Higher Education (PCHE).
- Up to six credits of independent study course work may be applied toward a graduate degree in information science and will be counted as meeting one of the area (foundations, etc.) requirements.
- Up to six credits of upper-division (1000-1999) undergraduate course work may be applied toward a graduate degree in information science. These will normally be very specialized courses that meet some particular need. Prerequisite programming course work is explicitly excluded from this condition. Other credits (including the practicum or thesis) must be at the graduate level (2000 or 3000 course numbers). No University of Pittsburgh courses numbered below 1000 may be applied toward master's degree requirements.
- Up to six credits of Practicum experience. Practicum credits are counted as electives.

Approval for exceptions must be obtained PRIOR to enrollment in the course in question and must be documented with advisor approval. No combination of such exceptions will exceed 9 credits. All requirements for a specialization or general degree requirements (i.e. 2 Foundation courses, 2 Cognitive courses, and 6 Systems and Technology courses) must still be met.

Course substitutions and requirement exceptions must be obtained PRIOR to enrollment in the course in question, must have approval of the advisor, and must be documented through the Records Office. Substitutions and exceptions will be noted on the student's Academic Advisement Report (AAR).

General Track Requirements

A minimum of 36 credits is required to complete the general MSIS degree. Basic course requirements are as follows:

- 6 credits of course work in the Foundations area
- 18 credits of course work in the Systems and Technology areas (INFSCI 2500 required)
- 6 credits of course work in the Cognitive Science or Cognitive Systems areas
- 6 credits of electives—students may pursue a thesis or a practicum as one of the elective options.

Specific course requirements for the degree are outlined on the student's AAR.

Students should know that a thesis is not a requirement of the MSIS degree.

Specializations
Students may elect a specialization on their application for admission. The student then follows a more stringent distribution of credits depending on their specialization. As well, some specializations have additional pre-requisites for admission and therefore students may need to complete courses above and beyond the standard 36 credit requirement.

The following sections describe the specializations; the specific distribution of credits for the individual specializations are outlined on the plans of study. Plan of study worksheets are available on the School's Current Students web page. Students who elected a specialization are expected to review and follow the requirements of that area.

Students select their specialization on the application for admission and may change it until the end of the term in which they are to complete 18 credits. A form and instructions for changing specializations is available on the School's Current Students web page.

Students who do not meet their chosen specialization's requirements for graduation will automatically be changed to the general MSIS track.

Specializations are noted on a student's final transcripts as "Degree awarded in Master of Science in Information Science with a concentration in [specialization]."

**Big Data Analytics**

The Big Data Analytics specialization will provide the graduates of the MSIS degree program with the essential in-depth knowledge of technologies relevant to big data management. Coursework will cover the design and maintenance of infrastructure to efficiently store, easily access, and transfer over wide area networks, extremely large amounts of data. However, the volume and diversity of data make it extremely challenging to store, retrieve, analyze and utilize this information. As society will soon be routinely trying to use petabytes of data stored in multiple formats across different platforms, experts are needed who have the skills and knowledge to design, develop and deploy complex information systems and applications that deal with multi-terabyte data sets.

Students should have an undergraduate data-structures course in addition to the standard MSIS admissions pre-requisites. While this course can be taken after admission, it would require that 13 courses rather than 12 be taken to complete the degree. In addition, students must pass a data analytics examination in order to enroll in this specialization.

**Database and Web Systems**

Storage and distribution subsystems are fundamental components of any information system. As information moved to digital form, storage systems evolved into various forms of database systems. In the environment we call the World Wide Web, people interact with databases and information storage systems through web protocols using web-based interfaces to facilitate distribution.

The database and web systems specialization covers both fundamental concepts of modern database management systems (DBMSs) and advanced issues that typically arise in the context of large-scale-enterprise data management. Coursework is focused on developing practical skills in building and administering realistic database systems, data integration, data warehousing, and Web-based data management. Database research projects offer tremendous opportunities for students in specialties including scalable architectures for wide-area environments with heterogeneous information servers, query optimization in highly distributed databases, and wireless and mobile databases.

The web systems coursework introduces current Web technologies including XML, and new distributed architectures for service provision.

Students should have an undergraduate data-structures course in addition to the standard MSIS admissions pre-requisites. While this course can be taken after admission, it would require that 13 courses rather than 12 be taken to complete the degree. As well, students are encouraged to have programming experience in more than one language - C or C++ and Java are the ideal combination.

**Geoinformatics**

The goal of the Geoinformatics specialization is to provide students in the MSIS degree program with both the breadth and depth of knowledge in geoinformatics required for solving real-world problems. Students will gain the unique knowledge and skills necessary to facilitate the design, development and deployment of complex systems and applications in a rapidly emerging geoinformatics profession. Graduates of the Geoinformatics specialization will be able to deploy and manage geoinformation systems in industry, conduct research in geotechnologies, and pursue PhD research in geoinformatics.
Human-Centered Computing

Human-centered computing (HCC) is concerned with the development and management of systems in which the central focus is the user. The systems should be: aware of the user, easy to use, ubiquitous, and intelligent. In the final analysis, human-centered systems improve workplace satisfaction, capitalize on information in the environment, and act on behalf of the user. Current research in HCC focuses on the building of adaptive interfaces, navigation through information spaces, social computing, and the use of virtual environments in information science. Within this specialization, you will take courses to help you to understand humans and model their preferences, interests, and knowledge; analyze explicitly and implicitly generated data; and design systems with natural and intuitive interfaces.

Information Security

Providing security and assurance to information systems has emerged as one of the most daunting technological and social challenges of recent times. Major corporations and private industry are expending a great deal of resources to develop cybersecurity technology to secure their information systems. The School is pleased to meet the expected demand for professionals trained to protect information systems by offering the security specialization. This track will provide a unique education in the development, design, and deployment of secure information systems with an emphasis on networked information systems. It will produce information technology professionals with the ability to meet special security challenges (e.g., intrusion detection) posed by conventional and emerging network information systems.

Students should have an undergraduate data-structures course in addition to the standard MSIS admissions pre-requisites. While this course can be taken after admission, it would require that 13 courses rather than 12 be taken to complete the degree.

Telecommunications and Distributed Systems

The Telecommunications and Distributed Systems (TDS) specialization focuses on one of the fastest growing Information Technology fields. Distributed computing involves the study of information systems in which the data and computational processing is spread over more than one computer-usually in a network. Networking is critical to efficient communication among widely distributed participants and has become the backbone of industries ranging from Telecommunications firms to healthcare systems. Thanks to the Internet and more powerful computation/communication devices, industry and society are demanding more pervasive networks, more efficient and effective information systems, and more professionals trained to design and manage these complex and vital systems.

With this specialization, students will gain the knowledge and skills to face the challenges of deploying, designing, and managing distributed applications across networked systems. Graduates will be able to design and manage client-server and peer-to-peer systems, manage network-based information systems, and design networks and systems that are secure.

Students should have an undergraduate intro to Telecommunications and Networking (TELCOM 2000) course in addition to the standard MSIS admissions pre-requisites. While this course can be taken after admission, it would require that 13 courses rather than 12 be taken to complete the degree.

Master Degree Program with GSPIA

The School of Computing and Information (SCI) has a joint agreement with the Graduate School of Public and International Affairs (GSPIA). The program allows for students to complete the Master of Science in Information Science (MSIS) degree and one of three degrees in GSPIA simultaneously. To be admitted fully into the joint program, students must be accepted by both GSPIA and SCI.

Students wishing to enter this program need to submit the regular MSIS online application form, along with two recommendation letters, an official transcript, and a copy of GRE or GMAT. International students have additional submission requirements.

All students are expected to have completed the pre-requisites established for the MSIS degree program.

Course of Study for Joint Degree Students
The course of study for the Master of Science in Information Science (MSIS) degree under the joint agreement consists of a minimum of 30 credits in the MSIS program, plus an additional 30-39 credits at GSPIA depending on the selected area of study. Students must have a minimum of 24 credits of residency at SCI by the completion of the degree; Students should consult with the Records Office before enrolling in classes each term in order to ensure they are enrolling under the appropriate school code.

*Please be aware that there is a small tuition differential between the two schools.*

Degree requirements are outlined on the student's academic advisement report.

**Telecommunications and Networking, MST**

**MST Admissions Requirements**

The Department of Informatics and Networked Systems seeks students with diverse interests and abilities. The admission requirements for the Master of Science in Telecommunications degree (MST) reflect the interdisciplinary nature of our program and roughly correspond to an undergraduate degree in a technical discipline (e.g., math, physics, computer science, electrical engineering, computer engineering, information science, etc.)

- must have earned a baccalaureate degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better
- Computer programming skill in at least one scientific programming language
- A 3-credit college level course in probability
- A 3-credit college level course in calculus

Note, other courses, such as an introduction to telecommunications class may be a pre-requisite for many courses in the program. It is not a requirement for admission but the equivalent Pitt course (TELCOM 2000) will not count toward the MST degree.

**MST Degree Requirements**

Completion of the Master of Science in Telecommunications degree requires a minimum of 37 credits. Three credits may be in practicum (a structured supervised employment situation) or a thesis. Students should know that a thesis is not a requirement of the MST degree but for research-oriented students, the faculty strongly recommends a 3-credit thesis in lieu of course work.

The 37-credit minimum of course work should include the following:

- 19 credits of required courses, including the one-credit telecommunications seminar course.
- 3 credits selected from the management/policy group.
- 15 credits of elective course work.

Specific course requirements for the degree are outlined on the student's Academic Advisement Report (AAR).

Course substitutions and requirement exceptions must be obtained PRIOR to enrollment in the course in question, must have approval of the advisor, and must be documented through the Records Office. Substitutions and exceptions will be noted on the student's AAR. Information regarding documenting exceptions is available on the School's Current Students webpage.

Students may choose to take more than the 37 credits required for the MST degree. However, the School is not able to extend any financial aid beyond the required number of courses; any visa issues pursuant to extended study would have to be resolved by the student.

**General Track Requirements**
The general course of study allows you to sample courses from all the specializations in preparation for dealing with the constant changes in telecommunications technology. Since change is the only constant in the telecommunications industry, your versatility as a generalist will enable you to handle challenges as they arise in the industry. Employers such as carriers, manufacturers, consultants, and other organizations (especially smaller ones) are seeking those graduates with a broad set of skills for careers as system engineers, network designers or managers, and telecommunications managers.

A generalist can take courses from any of the areas of specialization in consultation with the faculty advisor.

**Specializations**

Students may elect a specialization on their application for admission. The student then follows a more stringent distribution of credits depending on their specialization. As well, some specializations have additional pre-requisites for admission and therefore students may need to complete courses above and beyond the standard 37 credit requirement.

The following sections describe the specializations; the specific distribution of credits for the individual specializations are outlined on the plans of study. Plan of study worksheets are available of the school's Intranet. Students who elected a specialization are expected to review and follow the requirements of that area.

Students select their specialization on the application for admission and may change it until the end of the term in which they are to complete 18 credits. A form and instructions for changing specializations is available on the School's Current Students Web site.

Students who do not meet their chosen specialization's requirements for graduation will automatically be changed to the general MST track. Specializations for the MST are not noted on a student's final transcripts or other official documents.

**Computer Networks**

Computer networking enables efficient communication and information sharing to take place among widely dispersed participants. The global Internet-and the availability of ever cheaper, more powerful computation and communication devices-is paving the way for a new generation of ubiquitous and pervasive networks.

In this specialization, you will explore a variety of problems encountered in designing computer networks and learn common techniques to solve these problems. Courses are designed to equip graduates with the knowledge and skills required to contribute to the field of data communication and networking. The focus is on network models and architectures, protocol design and implementation, resource management, quality of service support, and security. You will acquire a solid conceptual and practical understanding of how computer network technologies operate and the ability to analyze the benefits and limitations of current and future networking technologies. You will also gain valuable insights into the design, management, and security of computer networks, and have an opportunity to take additional electives from the Department of Computer Science, depending on your interests.

**Wireless**

Wireless systems have become a vital infrastructure in today's society, and significant professional opportunities exist in this growing field. In this area, you will investigate the physical technology and enabling processes; the systems that provide cellular telephony, wireless LANs, and sensor networks; and mobile applications. You may select additional electives from the Department of Electrical and Computer Engineering. Graduates of this track have been hired by wireless carriers, manufacturers, and other organizations as system engineers and wireless network designers.

**Security**

Just as we safeguard data within computers, we must also ensure that the information flowing over networks is protected. In this specialization, you will investigate firewalls, encryption, fault tolerant network design, and other procedures for information assurance. Additional electives may be taken from both the Department of Computer Science and the Department of Mathematics. If you follow this track, you will be prepared for a career as a network security specialist with carriers, manufacturers, consulting firms, the government, financial institutions, and other enterprises.
Internet of Things

Information regarding this new specialization is forthcoming.

Big Data Analytics, ADVCT

SCI provides several options for advanced study in information science beyond a bachelor's or master's degree. The Certificate of Advanced Study (CAS) offers a highly-concentrated curriculum on the theory and application of the most current information field trends.

Students can follow a 15-credit or 24-credit plan of study.

15-credit post-bachelor's certificates

- Big Data Analytics
- Security Assured Information Systems (SAIS)

15-credit post-master's certificates

- Big Data Analytics
- Security Assured Information Systems (SAIS)

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program. Students interested in the CAS should consult this Web site.

Information Science, CAS

For more information regarding this certificate, visit this Web site.

Security Assured Information Systems (SAIS), ADVCT

SCI provides several options for advanced study in information science beyond a bachelor's or master's degree. The Certificate of Advanced Study (CAS) offers a highly-concentrated curriculum on the theory and application of the most current information field trends.

Students can follow a 15-credit or 24-credit plan of study.

15-credit post-bachelor's certificates

- Big Data Analytics

15-credit post-master's certificates

- Big Data Analytics
- Security Assured Information Systems (SAIS)

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program. Students interested in the CAS should consult this Web site.
Telecommunications and Networking, ADVCT

Students who have graduated from a Master's program may pursue a certificate in Telecommunications.

In consultation with an advisor, students project a Plan of Studies to meet their specific interests or needs, and these plans may change as the program proceeds. Students may select graduate-level courses in other departments within the University as well as at Pittsburgh Council on Higher Education-cooperating institutions. Admission to all courses is contingent upon meeting course prerequisites and is subject to the advisor's approval.

Candidates for the Telecommunications certificate must complete the following requirements:

- A total of 24 credits in graduate-level courses acceptable to the advisor and passed with a grade point average of at least B (3.00 on a 4.00 scale)
- Fifteen of the 24 credits must be taken from among the approved courses for the MST degree program.

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program.

Program details are available here.

Department of Information Culture and Data Stewardship

For more than 100 years, Pitt has been educating the professionals who will lead us through the information age: librarians, information and knowledge managers, archivists, and digital-content managers. As the nature and form of information evolves and becomes more complex with each passing year, the education of its managers becomes increasingly vital.

Our Information Culture and Data Stewardship Program offers an array of graduate degree programs and specializations designed to prepare students for careers in this critical profession. We offer one of the most recognized programs in the nation - our Master of Library and Information Science (MLIS) degree is accredited by the American Library Association (ALA).

The Doctor of Philosophy Program prepares students for advanced work in research, teaching, and administration. The program will give students the opportunity to gain the skills in teaching or research appropriate for careers at major research universities, teaching institutions, and library systems.

From the faculty who drive our reputation as a top-tier research university to our course work, which is highly relevant to a field that is always changing, the School offers the right environment to prepare you for a successful and challenging career in the library and information science field.

Academic Advising

Each student is assigned an academic advisor at the time of admission to graduate study. These assignments are made primarily on the basis of the student's background and interests as shown in the application. The student may at any time elect to change advisors: any such change requires the consent of the new advisor and must be reported to the Program. Forms for changing advisors are online through the School's Current Students webpage.

At the time of initial registration or before the completion of the first term, the student is encouraged to discuss a plan of study with their advisor. A plan of study is a series of courses designed to meet the minimum exit competencies judged by the faculty to be necessary for employment as an information professional; this plan is outlined in and completion is tracked through the Academic Advisement Report (AAR). If there has been course work or experience in one or more of the content areas of the program, students are permitted to substitute and take courses in an area in which additional background is needed. Substitutions and exceptions must have approval of the advisor and must be documented through the Records Office. Information regarding documenting exceptions is available on the School's Current Students Web page.

Details regarding advising and resources for tracking your degree progress (the AAR) are available on the School's Catalog page, under the Advising section.

Each student must ensure that the AAR meets all of the program requirements for graduation. At the completion of the program, the Records Office coordinates with the Department to certify all students for graduation. See the School's Catalog page for more details and regulations pertaining to graduation.
Departmental Policies

Grade Policies for Graduate Students

Maintenance of a 3.0 GPA

Each student must maintain good academic standing with a 3.0 Grade Point Average (GPA) for all credits of graduate level coursework. Failure to maintain a cumulative 3.0 GPA result in the student being placed on academic probation. For full details regarding academic standing, see the Academic Standing and Dismissal section of the SCI Catalog.

Grades for MLIS Core Courses

The four required core courses are:

- LIS 2000
- LIS 2005 (or LIS 2224 for AIS students)
- LIS 2600 (or an approved advanced technology course substitute)
- LIS 2700 (or LIS 2215 for AIS students, or LIS 2774 for SLCP students)

A student must earn a grade of B or better in each core course. If a grade of B or better is not earned in a core course, the student must register for the course in the next term offered and earn a grade of B or better. A core course may be repeated only once; all other School policies regarding the repetition of courses apply (see Academic Standing and Dismissal section).

Grades for Elective Courses

All students must earn satisfactory grades in each elective course taken. Grades of C-, D+, D, D-, F and Unsatisfactory are unacceptable for credit toward graduation. A course for which such a grade is earned must be replaced with another course or retaken, with a higher grade earned. In either case, a higher grade must be earned and a 3.0 GPA must be maintained. A course for which a grade of C- or lower was earned may be repeated only once.

Academic Provisional Admission

At the discretion of the faculty, a limited number of students who do not meet the 3.0 GPA minimum required for full admission into the MLIS program may be considered for admission. If such students are able to provide additional evidence of academic potential (e.g., outstanding scores on the Graduate Record Exam or the Miller Analogies Test) or professional potential (e.g., outstanding letters of recommendation and/or outstanding work experience), they may be admitted to the MLIS program with academic provisions. Such students must earn a B average (3.0 GPA) in the first twelve credits earned toward the degree. Failure to achieve a cumulative 3.0 GPA at the conclusion of the first twelve credits, may result in dismissal from the MLIS program.

Incomplete Grades and Class Enrollment for Master's Students

A master's student who has two incomplete grades (either "G" or "I") on their transcript will be barred from enrolling in further courses until the incomplete coursework and grades have been resolved.

Stricter grade guidelines and regulations apply to the doctoral students. See the doctoral program regulations for details.

Library and Information Science, PhD

PhD Admissions Requirements
The Department of Information Culture and Data Stewardship seeks students with diverse educational and career backgrounds. By nature LIS degrees are multi-disciplinary, and we welcome applicants with bachelor's degree and/or advanced degree from diverse disciplinary backgrounds. Our multi-disciplinary nature is reflected in the wide range of standardized tests that are accepted by our admissions committee, which include the GRE, MAT, MCAT, GMAT, and LSAT

**Supporting Documents for Admission**

As evidence of the ability to undertake doctoral work, the student's application must be accompanied by:

- An essay (not exceeding 1,000 words) indicating, as specifically as possible, the student's detailed academic and professional goals in relation to the Library and Information Science doctoral program and discussing in detail potential areas and/or topics in which the student expects to pursue dissertation research. Students SHOULD identify one or more ICDS faculty members with whom they want to work.
- A complete curriculum vitae that provides an overview of education, publications, work, and other activities.
- At least one example of scholarly research or professional writing in any format (print or electronic), which should be authored solely by the applicant. The applicant should explain the status of any published or unpublished research, thesis, contributions to the professional or scholarly literature, and other professional or academic experience relevant to an assessment of his or her capacity to pursue research successfully. If the only suitable writing sample available for submission is a co-authored publication, the applicant must explain the nature and extent of his or her contribution to the work (e.g., percentage of the finished work written by the applicant), and should attach additional evidence as verification (for example, a statement by the primary author or co-author of the work, confirming the parts of the work contributed by the applicant).
- If the candidate has had appropriate professional work experience in libraries, information centers, publishing, the information industry, education, or similarly related areas of professional activity, a brief description should be provided. Credentials of prospective students are reviewed by the ICDS Committee on Doctoral Studies.

However, students who are applying for financial aid should be aware that they must be admitted and meet financial aid deadlines to ensure consideration for funding.

Beyond the criteria and materials previously outlined for application submission, these programs do not require specific coursework for admissions consideration.

**Academic Advising and Plan of Studies**

An advisor will be assigned to the student upon entering the program; however the student is free to select a different advisor for subsequent advising and registration. The PhD student should seek a faculty Program Advisor who is knowledgeable in the student's major area of study. The advisor must be a member of the graduate faculty in the Information Culture and Data Stewardship Department who is able to spend the time and effort necessary for the advising role, will be available for examinations, and with whom a productive and comfortable working relationship can be established.

**Program Advisor**

The advisor selected by the student for the period prior to the dissertation stage of the program is the Program Advisor. The Program Advisor and the Dissertation Advisor may be the same person, but the student has the option to select a different advisor for the dissertation. Upon agreement of the faculty member to act as the student's advisor, the signed agreement is placed in the student's folder. Any subsequent change of Program Advisor should be submitted in writing to the Chair of the ICDS Committee on Doctoral Studies and placed on record in the student's folder.

Doctoral students are ultimately responsible for their own direction and progress through the program and are encouraged to seek advice from any member of the SCI faculty or other University faculty in this endeavor. The Program Advisor, however, is the one primarily responsible for providing guidance, insight, advice, information, explanation of University and School policies, and general assistance in the pursuit of the PhD degree. The Program Advisor will also approve those actions requiring a faculty signature.

The Program Advisor assists the student in

1. developing a plan for the program of studies and
2. arranging for the preliminary and the comprehensive examinations.

**PhD Degree Requirements**
This PhD degree requires a minimum of 54 credits beyond the master's degree with a total credit minimum of 72. A minimum of 36 credits must be taken in advanced course work. The student must receive a letter grade in each course taken in this 36-credit requirement, except for the teaching practicum course.

An additional 18 credits are required which must be applied to dissertation research and writing; however, regardless of the number of credits taken, no more than 18 credits for dissertation research and writing may be applied toward graduation. The grade for these credits will appear as an "S" on the student's transcript. In order to register for, and successfully complete, dissertation credits, students must show evidence of work toward the dissertation by completing the "Dissertation Credit Tracking Checklist" and updating it at the end of the term.

The minimum of 36 credits of course work, all of which must be on the graduate level, must be distributed as follows:

- 3 credits: LIS 3000 - INTRODUCTION TO DOCTORAL STUDIES
- 9 credits: 3000-level doctoral seminars offered by SCI
- 3 credits: LIS 3950 - TEACHING PRACTICUM or FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING
- 6 credits: Courses in research methodology and statistics
- 6 credits: Courses in cognate field
- 9 credits: Courses may be:
  - 3000-level independent studies or doctoral seminars offered by SCI
  - Additional 3000-level doctoral seminars offered by SCI
  - Additional cognate courses (up to 6 credits)
  - Additional research methodology courses

**Additional Requirements**

**GPA REQUIREMENT**

PhD degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.50 GPA.

**COGNATE REQUIREMENT**

Doctoral students are required to devote some portion of their studies to work on other disciplines in order to broaden their perspectives and deepen their understanding of library and information science. To fulfill the cognate requirement, students are required to take a minimum of 6 credits and a maximum of 12 credits in some area of graduate study outside the field of library and information science. These credits may be from more than one department or school.

Students may enroll for all or part of their cognate course work at institutions other than the University of Pittsburgh, but only when prior approval has been obtained from the ICDS Committee on Doctoral Studies. Courses in the School of Computing and Information generally cannot be used to fulfill the cognate requirement. Cross listed courses may be counted as cognates if they originate outside the School. SCI courses may occasionally be approved as cognate courses if the subject matter is highly specialized and clearly distinct from the student's disciplinary focus; students must petition the ICDS Committee on Doctoral Studies for approval in advance of registering for the course. Cognate areas and courses shall be selected with consultation and approval by the student's advisor.

If a student has significant course work at the graduate level or an advanced degree in another discipline and desires that it be considered as the cognate field, the student has the right to petition the ICDS Committee on Doctoral Studies for exemption from the cognate requirement. A minimum of 36 course credits and 18 credits of dissertation writing and research will still be required for the PhD students who opt to petition for exemption from the cognate requirement. Such a petition should be submitted as early as possible, preferably in the first term, in order to plan a coherent program of study.

**RESEARCH METHODOLOGY REQUIREMENT**

Research methodology courses may include courses in statistical analysis, general research methodology, and specific research methods or research methods used in specific fields of study, for instance, historiography, ethnography, or case and field study. Doctoral students should work with their advisors to identify the appropriate research methodology courses.

Research methodology courses may be taken within SCI or in another School. Research methodology courses taken from schools outside SCI cannot be used to fulfill the cognate requirement.
The research methodology course requirement must be fulfilled prior to taking the Preliminary Examination.

TEACHING PRACTICUM

A three-credit teaching practicum is required for all doctoral students in order to provide the student with teaching experience that may become part of the student's professional dossier. The teaching practicum is usually taken after completion of two terms of study. The student is responsible for identifying an appropriate course related to his or her area of interest, and obtaining the agreement of the instructor of record. Appropriate activities as part of the teaching practicum include involvement in course design, attendance at all class sessions, presentation of some course materials, office or tutorial hours, and involvement in grading. The student's teaching responsibility should involve preparation and presentation of specific topics throughout the term, and sole responsibility for at least one class session. The teaching practicum is graded on a pass/fail basis.

Doctoral students may also fulfill this requirement by completing the University Teaching Practicum course offered through the Faculty of Arts and Science. The course, FACDEV 2200, is a graduate seminar designed for Teaching Assistants and Teaching Fellows who will be teaching a class independently for the first time.

PUBLIC PRESENTATION REQUIREMENT

During the course of the PhD program, each student is required to make a formal presentation to faculty and students in the School or in another academic setting. The topic of this presentation may be a research project the student is engaged in or preliminary results of the dissertation project. This presentation may be a guest lecture in a course, a public colloquium, a presentation sponsored by the Doctoral Guild or a presentation at an academic conference. Documentation of presentation should be provided for inclusion in the student's file.

Attendance at colloquia is required of students in their term of residence, and is recommended throughout the PhD program.

Probation and Termination

All students pursuing the LIS doctoral degree are required to maintain a cumulative GPA of at least 3.5 after admission to graduate study for all course work applicable to the degree. Students are automatically placed on academic probation when their cumulative GPA falls below 3.5. The graduate faculty may choose to terminate students on probation for two consecutive terms. A cumulative GPA of 3.5 or better is required for admission to LIS doctoral study and for the award of the LIS doctoral degree. In addition, students must show adequate progress in the subsequent benchmark examinations and defenses.

Each student will submit a LIS Doctoral Student Annual Progress Report in the spring term for review by the ICDS Committee on Doctoral Studies.

Residence and Registration Guidelines

The University's Regulations Pertaining to Doctoral Degrees contains myriad policies related to registration and residence. Students must review these regulations as well as those governed at the School level. In addition PhD students should adhere to the following guidelines.

A student may not register for dissertation credits until the successful completion of the preliminary exam.

Full time dissertation study is achieved once all required courses (36 credits minimum) and all dissertation credits (18 credits of LIS 3999 minimum) are completed. Once the preliminary exam is successfully completed (after a minimum of 24 credits of coursework) students may begin taking a combination of dissertation credits and required credits until both requirements have been completed. Students may, with the approval of their dissertation advisor, register for up to 9 dissertation credits per semester until the 18 credits are achieved, but a combination of dissertation credits and required coursework can also be taken in each semester, so long as at least 9 credits of one or the other or both are taken in each fall and spring semester. If additional coursework (beyond the required 36 credits) is desired by the student or recommended by the advisor (for example, additional coursework in statistical methods, programming, additional cognate courses, etc.), a mix of dissertation credits and such additional coursework may be taken as well (for example, 6 credits of dissertation and one 3-credit additional course, or 3 credits of dissertation and 6 credits of additional coursework).

Doctoral students who have completed all credit requirements for the PhD degree, including the 36 required credits and the 18 dissertation credits (54 credits total), have had their Dissertation Proposal approved, and are working full time on their dissertations, should register for "Full-time Dissertation Study." Enrollment in this course fulfills the University requirements for registration in the term of graduation.
International students studying on an F-1 visa must maintain full-time registration status on an exact and regular basis that is stricter than the residency rules required by the school as stated above. Due to federal immigration regulations, if the term preceding a student entering full-time dissertation status occurs during the fall or spring terms, the student must enroll full-time (9 or more credits). A "reduced course load" request cannot be approved by the Office of International Services (OIS) unless the request is made for the student's term of graduation. Even if a student needs to complete only 6 credits before entering full-time dissertation status, federal regulations trump the school's program requirements and they must enroll full-time in all fall and spring terms excepting their term of graduation.

Preliminary Examination

Eligibility

To be admitted to the preliminary examination a student must:

- Have completed 24 credits of study or be completing 24 credits in the exam term, including 6 credits from courses in research methodology and/or statistics
- Be registered in the term in which the preliminary examination is taken;
- Apply in writing and with the advice and consent of a faculty advisor to ICDS support staff by the announced deadline.

Students (whether full-time or part-time) are encouraged to take the preliminary examination, with the advice of the faculty advisor, as early as possible. Full-time students MAY take the preliminary examination near the end of the 1st year spring term and SHOULD take it no later than the 2nd fall term.

Preliminary Examination Procedure

Upon completion of 24 credits of coursework, the student will submit to faculty for review a portfolio comprising the best representation of work completed thus far. Each student will also be required to present this portfolio to the ICDS Committee on Doctoral Studies as a whole, and the whole committee will vote on whether or not the portfolio is acceptable. A date for the portfolio presentation for the Preliminary Examination will be set at the beginning of each term. Students are required to submit their portfolio to ICDS Department support staff two weeks in advance of the Preliminary Examination. Preliminary Examinations are held in the fall and spring terms.

Preliminary Examination Portfolio

The preliminary evaluation will be based on breadth and depth of knowledge as addressed through coursework, as well as whether the coursework taken will support the research plan of the student. This portfolio will minimally consist of the following elements:

1. Course plan
   - List of courses completed with dates
   - Projected list of remaining courses with dates
   - Notations concerning how all course requirements are to be met

2. Research prospectus
   - Research prospectus or plan and how this relates to coursework (taken and planned). This section will consist of a proposed area of concentration for the dissertation, justification for the research, and description of the methodological approach in some detail. It will also include an analysis of what types of resources will be needed to carry out the plan and to support the student through completion of the dissertation.

3. Two examples of major work
   - Two examples of major work completed while working towards the PhD (for example, a substantial coursework assignment, and a published or submitted conference paper or journal article). At least one of these should be a significant piece of writing, authored solely by the candidate. The other can also be a paper or could be another type of work demonstrating depth of knowledge and research in an area. If a jointly authored paper is included in the portfolio, the candidate should be named as the first author, and s/he must explain the nature and extent of the contributions of each co-author.

4. Additional items
   - Professional activities (e.g., papers presented at conferences)
   - Awards
Preliminary Examination Outcomes

The Chair of the ICDS Committee on Doctoral Studies will respond to the presentation with an evaluation memo to the student either noting the acceptability of the portfolio or noting the areas in which the student is deficient. The memo may be very specific and prescribe specific types of courses, work products, or other elements necessary for the student to complete their research plan or the required course work. If a portfolio is not passed by a majority of those hearing the case, the student may make a second attempt in a later term.

With the successful completion of the preliminary examination, the Chair of the ICDS Committee on Doctoral Studies will notify the student in writing of admission to doctoral study and will note the results on the Preliminary Examination Results Form.

Failure to pass the Preliminary Examination on the second attempt will result in dismissal from the doctoral program.

Failure to pass the Preliminary Examination by the end of the second spring term (or third spring term for part-time students) will result in dismissal from the doctoral program.

Comprehensive Examination

Eligibility

To be admitted to the comprehensive examination a student must:

- Have completed 36 credits of study
- Be registered in the term in which the comprehensive examination is taken;
- Apply in writing using the "Application to Sit for the Comprehensive Exam" form and with the advice and consent of a faculty advisor to the ICDS Department support staff at least six weeks before the scheduled exam time.

Full-time students should take the comprehensive exam in the fall or spring term of the second year. All students must successfully complete the Comprehensive Exam within 18 months of passing the preliminary examination (24 months for part-time students).

Comprehensive Examination Procedure

In the Information Culture and Data Stewardship Department, the Comprehensive Examination will have written and oral components, and will normally be offered in the fall and spring terms. Students will notify their advisor and the Chair of the ICDS Committee on Doctoral Studies of their interest in taking the Comprehensive Examination at least six weeks prior to the examination date, using the form provided. The dates for each student will be determined in consultation with the student and the student's comprehensive examination committee.

Students will be examined in two areas:

- A broad perspective in current issues in library and information science, or archival studies, and
- The student's designated research focus.

In the PhD Library and Information Science program, the following procedures apply:

- The examination will be conducted by a 3-person committee: the student's advisor and two faculty members chosen by the student and the faculty advisor. Faculty members chosen to serve on the committee must give their consent.
- The examination will consist of two parts: a written, take-home exam over two weeks (three weekends) and an oral examination conducted by the student's committee.
- The written examination will consist of four questions, two in each of the areas of the examination. The student will choose one of the two questions in each area. Though the student is required to answer only two questions, there is the expectation that the response will be comprehensive and include a high level of analysis of the material. In terms of length, 12-15 pages would constitute a minimal answer for each question though longer papers are expected. The student will be given two weeks (including three weekends) to complete the written examination.
The second part of the examination will be an oral examination expanding on any points from the written work that the committee wishes to address or any questions arising from the broad, general area of interest. The oral examination (approximately two hours) will take place as soon as possible after the written component has been evaluated.

**Comprehensive Examination Outcomes**

The result of the comprehensive examination will be a pass or fail. If a student fails, he/she may retake the exam one more time. Students use the Comprehensive Examination Results Form to document this benchmark. Failure to pass the Comprehensive Examination on the second attempt will result in dismissal from the doctoral program.

Failure to pass the Comprehensive Examination within the required time frame of within 18 months of passing the preliminary examination (or 24 months for part-time students), will result in dismissal from the doctoral program.

**Dissertation**

**Dissertation Advisor**

Students must gain the agreement of a member of the ICDS graduate faculty to chair the Dissertation Committee that will advise on the area of research and the design of the study. The advisor's agreement must be obtained and recorded in the student's file. Any request to change the Dissertation Advisor must be submitted in writing to the Chair of the ICDS Committee on Doctoral Studies after discussion with the Dissertation Advisor. Students retain the right to change advisors with impunity. It is important for students to be aware of and sensitive to various issues, including: 1) the importance of mutual consideration in the relationship between advisor and advisee; and 2) the academic benefits of continuity in the relationship with a major advisor and other members of the dissertation committee. Approval for the change and the selection of another Dissertation Advisor is filed in the student's folder.

The student's dissertation advisor:

- Assists in choosing the members of the Dissertation Committee and in confirming the eligibility of all members selected;
- Arranges with ICDS support staff to schedule the dissertation proposal presentation;
- Reviews progress toward completion of the research;
- Arranges with LIS support staff to schedule the dissertation defense;
- Chairs the dissertation defense;
- Secures appropriate signatures from Dissertation Committee members and assures that all required paperwork is submitted in accordance with the ICDS, School of Computing and Information, and University procedures.

**Dissertation Committee**

The Dissertation Committee, selected by the student and major dissertation advisor, shall consist of at least four members, with the majority being from the graduate faculty of the School of Computing and Information. At least one, but not more than two, should be from another School of the University. Work in the cognate area may provide the student with the opportunity to select an appropriate outside member for the Dissertation Committee from a discipline related to the student's area of specialization. Upon the recommendation of the Dissertation Advisor, and with the approval of the LIS Committee on Doctoral Studies, a member may be appointed from outside the University. Outside members of the Dissertation Committee are not obligated to attend dissertation related events in person. If an outside person from another University or agency does attend in person, the ICDS Department is not responsible for covering any expenses involved in the attendance of the outside member at meetings. Finally, the major advisor proposes the members of the committee for approval to the ICDS Doctoral Program Chair and the Dean, using the Doctoral Committee Form to document approval of committee composition.

Meetings of the doctoral candidate and the Dissertation Committee must occur at least annually from the time the student gains admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward the degree, discuss objectives for the following year, and project a timetable for completing degree requirements.
Any language requirement relates to proficiencies necessary for successful completion of doctoral research. Depending upon the student's program, proficiencies in modern languages, linguistics, and/or computer languages may be specified. The student's Dissertation Advisor will determine the language requirement in consultation with the Dissertation Committee at the time the proposal is accepted.

**Dissertation Procedural Requirements**

The student must submit all forms, letters, and questionnaires related to the dissertation research to the ICDS members of the Dissertation Committee for approval before any such documents are publicly distributed.

The student is also responsible for meeting University requirements when human subjects are used in research. These requirements are enforced by the University's Human Research Protection Office (HRPO) and the Institutional Review Board (IRB). The school has a faculty representative on the Institutional Review Board who may be contacted with questions of procedure.

Bibliographic style is best determined by the subject of the dissertation; a style manual of the student's choice may be used for the content of the dissertation and must be applied consistently throughout.

The final approved version of the dissertation must be submitted electronically to the University. For the full instructions on the formatting and submission of Electronic Thesis and Dissertation (ETD), please visit the University's ETD Web site and the SCI Current Student Web site.

**Dissertation Proposal Defense**

Prior to scheduling the dissertation proposal defense, the student must have completed all required coursework, and successfully completed the Preliminary and Comprehensive Examinations, which may not be scheduled in the same term as the dissertation proposal defense.

The student should defend the proposal of the dissertation within 18 months of successfully completed the comprehensive exam (24 months for part-time students). All students must successfully complete the Dissertation Proposal Defense within 24 months of passing the Comprehensive Examination (36 months for part-time students). Failure to successfully complete the dissertation proposal defense within the required time period will result in dismissal from the doctoral program.

The student should work closely with the Dissertation Advisor during the preparation of the proposal for dissertation research. Only when the proposal is reviewed and approved by the Dissertation Advisor will the student initiate the proposal defense process. The proposal must be submitted to the members of the Dissertation Committee at least two weeks prior to the scheduled time of the proposal defense. The presentation portion of the proposal defense is an open event and will be announced to the faculty and students in the school. If scheduling problems for committee members occur, telephone conferencing may be used. Faculty discussion about the presentation is closed and only the members of the Dissertation Committee will participate.

The Dissertation Committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. However, approval of the proposal does not imply either the acceptance of a dissertation prepared in accordance with the proposal or the restriction of the dissertation to this original proposal. Please use this Proposal Defense Results form to document the results of the defense.

**Candidacy**

For admission to formal candidacy for the PhD in LIS degree, a student must have fulfilled the following requirements:

- Passed the Preliminary Examination;
- Completed a minimum of 36 credits beyond the master's degree with a GPA of 3.5 or higher;
- Passed the Comprehensive Examination;
- Successfully defended the dissertation proposal and received permission from the Dissertation Committee to begin research.

When these steps have been taken, the chairperson of the student's Dissertation Committee will notify the Chair of the ICDS Committee on Doctoral Studies, the Chair of the Information Culture and Data Stewardship Department, and the Dean of SCI that the student has achieved formal candidacy.
Dissertation

In accordance with the University Regulations Pertaining to the Doctor of Philosophy, each student must write a dissertation that presents the results of a research project carried out by the student. An appropriate research project involves a substantive piece of original and independent research, grounded in an appropriate body of literature, and employing systematic methods and procedures to investigate a defined question or problem. It is relevant to an identifiable field as it is currently practiced, and provides a significant contribution or advancement in that field. It presents either a hypothesis tested by data and analysis, or an analysis of data supporting the development of a theory, or leading to new or substantially improved insights. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

Characteristics which a dissertation should demonstrate are:

- The establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution;
- A clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base;
- A well-defined research design;
- Clarity in composition and careful documentation;
- Results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph
- Sufficient detail so that other scholars can build on it in subsequent work;
- The preparation of the author to assume a position within the profession.

Dissertation Defense

The student should work with the Dissertation Advisor to decide the right time for dissertation defense. The student must obtain the Dissertation Advisor's approval before initiating the dissertation defense process. The student is responsible for presenting one copy of the dissertation in final form to each member of the Dissertation Committee at least two weeks prior to the date of the defense. The deliverable format is to be determined by each individual committee member.

The date, time, location, and subject of the dissertation defense shall be publicized in The University Times four weeks before the defense is held. All members of the Dissertation Committee and such other persons as are interested may attend the final defense, but acceptance of the dissertation is determined by a vote of members of the Dissertation Committee. Only members of the Dissertation Committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the Dissertation Committee, must be sent to the ICDS Department Chair and to the Dean. If the decision of the committee is not unanimous, the case is referred to the Dean for resolution. The Chair of the Dissertation Committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

A student who defends the dissertation, but with conditions to be met before the degree can be awarded, must meet those conditions within the required time frame:

- Minor corrections (largely presentation, e.g., typographical errors) - to be completed within one calendar month, subject to approval by the Dissertation Advisor;
- Substantial amendments (involving more significant revisions and/or additions, e.g., rewriting sections of chapters) - to be completed within three calendar months, subject to approval by members of the Dissertation Committee.

In both of the above cases, the student's statute of limitations will automatically be extended if necessary for the period specified, without the need for a petition.

A student who does not successfully defend the dissertation, may revise and resubmit the dissertation for examination within the time frame allowed by their statute of limitations.

Students must be registered for at least one credit or full-time dissertation credit in the term in which they defend their dissertation.

GRADUATION
Eligibility

The student must have successfully defended their dissertation and received final approval of the dissertation, including all corrections, by the Dissertation Committee. All students apply to graduate; receipt of the graduation application initiates a review of the student's coursework, grades, and milestone completion. As well, an international student's SEVIS record will be updated with a new "program end date." Registration is required for a minimum of one credit (or full-time dissertation) in the term of graduation although exceptions may be approved by the Dean's Office on a case-by-case basis. Finally, the student's Dissertation Chair and the School's Director of Records must approve the submission and publication of the Electronic Thesis and Dissertation (ETD).

For the full instructions on the formatting and submission of ETDs, please visit the University's ETD Web site and the SCI Current Student Web site.

Statute of Limitations

All requirements for the PhD degree must be completed in not more than 6 calendar years from the time of first registration (or 8 calendar years for part-time students). Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program. Requests for either an extension to a statute of limitations or for a leave of absence are submitted through online forms; these forms are shared with the student's advisor and then presented to the ICDS Committee on Doctoral Studies for a decision.

In all other matters of policy, see the University and School's Catalogs, consult with the School's Director of Academic Records.

Library and Information Science, MLIS

MLIS Admissions Requirements

The Department of Information Culture and Data Stewardship seeks students with diverse educational and career backgrounds. By nature LIS degrees are multi-disciplinary, and we welcome applicants with bachelor's degree and/or advanced degree from diverse disciplinary backgrounds. Our multi-disciplinary nature is reflected in the wide range of standardized tests that are accepted by our admissions committee, which include the GRE, MAT, MCAT, GMAT, and LSAT.

Beyond the criteria and materials previously outlined for application submission, these programs do not require specific coursework for admissions consideration.

MLIS Degree and the Profession

The role of information professionals has changed dramatically as the volume of available information has increased and technology for information search and retrieval has advanced. The ability to manage the growing array of information tools has led to new opportunities for those who want to work in the information field, a discipline which bridges the management of both traditional and emerging information sources. The MLIS program, accredited by the ALA through 2020, is responsive to the information marketplace and encourages the development of creativity, professionalism, and a proactive attitude to the needs of various clienteles in library and information service environments.

Upon completion of the Master of Library and Information Science degree, graduates will incorporate the theories, knowledge, skills, ethical foundations, and social responsibilities of the information professions into critical and reflective professional practice for the benefits of individuals and communities. The MLIS degree program integrates library, archival, information, data sciences and data stewardship within the information professions.

Specifically, MLIS graduates will be able to:

Goals for Graduates of the MLIS program
1. Identify and communicate the ethical and historical foundations and core values of the information professions, data professions, and related disciplines.
2. Apply principles of the management of information and organizations to various functions in data and information environments.
3. Select, plan, implement, and apply information technology using creative, contextualized, and ethical approaches.
4. Design, plan, implement, evaluate, and advocate for information services that embody a commitment to inclusion and dedication to underrepresented and marginalized users and communities.
5. Understand and apply research in library, archival, museum studies, information science, data science, and stewardship, as well as other disciplines.
6. Develop and advance the contribution of the information professions to society through advocacy, continuing education, and lifelong learning for information professionals and the communities they serve.

Revised and affirmed by the faculty of the Department of Information Culture and Data Stewardship in April 2018

Degree Requirements

With the possible exception of six credits of advanced standing, all course work must be completed in residence in the MLIS degree program (i.e., registering while matriculated as an SCI student) at the University of Pittsburgh.

The faculty may approve certain exceptions to the degree requirements outlined in the following sections. Approval for exceptions must be obtained PRIOR to enrollment in the course in question and must be documented through the Records Office. See the Advising section of the SCI Catalog for more details.

The MLIS degree is a 36-credit program that can be completed in three consecutive terms of full-time study or up to four years (twelve terms) of part-time study.

There is a series of mandatory core courses -- the remaining courses are tailored to your career goals or chosen area of interest. It is important to plan carefully, in consultation with your faculty advisor, to make the best use of the educational opportunities available.

Students will take the four required courses* for the MLIS degree. Students must earn a B or better in each core course.

- LIS 2000 - INFORMATION, DATA, AND SOCIETY (to be taken in the first term)
- LIS 2005 - KNOWLEDGE ORGANIZATION
- LIS 2600 - INTRODUCTION TO INFORMATION TECHNOLOGIES (to be taken in the first term)
- LIS 2700 - MANAGING AND LEADING INFORMATION SERVICES

*The pathways may have different core and required courses -- students should work with their advisors to ensure that they are following the proper course of study.

Students should know that a thesis is not a requirement of the MLIS degree.

Pathways

Students may elect a pathway on their application for admission. The student then follows a more stringent distribution of credits depending on their pathway.

Our three pathways have been developed in response to needs expressed by the profession. In addition to the core knowledge of librarianship, you'll gain specific skill sets pertinent to your career goals.

- Archives and Information Science
- Data Stewardship
- Library and Information Services

The following sections describe the pathways; the specific distribution of credits for the individual pathways are outlined on the student's Academic Advisement Report (AAR). For more details regarding this dynamically generated advising tool, see the Advising section of the SCI Catalog.

Students select their pathway on the application for admission and may change at any time. A form and instructions for changing specializations is available on the School's Current Students Web site.
Students who do not meet their chosen pathway's requirements for graduation will automatically be changed to the general MLIS track and certified for graduation against the general degree requirements.

The Archives and Information Science pathway is noted on the student's final transcripts as "Degree awarded in Master of Library and Information Science with a concentration in Archives and Information Science." No other pathways are detailed on official documents in this way.

Archives and Information Science

Recordkeeping, from governmental to organizational to personal, is one of the most ancient and essential human and institutional functions. Records are created and maintained for purposes of evidence; accountability; and personal, social and corporate memory. Archives serve a crucial cultural function, providing society with a sense of identity and memory. Records management programs help organizations to be compliant with regulatory agencies, responsible to constituent groups, and effective and efficient in the use of informational resources. Critical to the administration of records is the maintenance of records over long periods of time, traditionally called preservation and now being influenced by discussions concerning digital curation and stewardship.

Our Archives and Information Science program is one of the leading programs of its kind in the United States. You can earn your MLIS degree here, gaining an in-depth knowledge of records and recordkeeping systems; digital records management; archival appraisal and access; the history and evolution of recordkeeping systems; and digital preservation, curation, and stewardship.

Our program will give you the skills and knowledge to identify and analyze recordkeeping systems from legal, evidential, historical, and cultural perspectives. Students study in an engaging and intellectually stimulating environment, taking courses in diverse topics including:

- appraisal and records scheduling;
- organization and representation of unique materials;
- reference and access;
- advocacy and public programming;
- legal and ethical issues;
- preservation of library and archive collections;
- digitization, digital preservation, and digital curation;
- research methods for archival research; and
- management of archives, preservation, and records programs.

Data Stewardship

The Data Stewardship Pathway will provide an introduction to data curation, digital preservation, and data science. It will frame these topics within the broader context of data informatics, digital scholarship, research integrity, disciplinary diversity, and cultural change. In addition to setting the stage from a policy perspective, this Pathway will provide the practical skills needed to carry out effective research data management and preservation as well as situate these practices in the wider landscape of open science and open scholarship. This Pathway draws on data initiatives from across the globe including the United States, the United Kingdom, Europe and Australia. In each course, relevant case studies and exemplars will be provided to illustrate concepts and principles with tangible practice. It will equip graduate students with the necessary knowledge, skills, and competencies to work in a range of data stewardship roles found in libraries, archives, data centers, governments, industries, and businesses.

The foundational course on Data Stewardship examines traditional and emerging practices in areas such as research data management, data preservation, data infrastructures, information ethics, and more.

Library and Information Services

Information professionals are the human interface that connect people, information, and technology. They play a leadership role in the identification, organization, preservation, and effective use of information and cultural artifacts. The work of information professionals is essential to the public good because it supports equitable access to information for all and helps to ensure and informed society and vibrant democracy. While information professionals traditionally have worked in cultural heritage institutions such as libraries, their skills are now needed in all sectors of society. Now more than ever, the world needs highly qualified specialists in libraries and information services.
This pathway covers several areas of interest, each with their own set of suggested elective courses:

**Academic Libraries**

This area of interest is designed to provide you with the theoretical knowledge, contextual understanding, and practical skills to work effectively as a librarian or information professional in a higher education sector that is continually evolving. Our teaching is informed and inspired by personal experience, current research and leading thinking in the field. The courses will equip you for the challenges and demands of planning, managing and delivering resources and services in academic libraries, through exploration of their historical contexts, current positions, and future directions.

**Individualized**

Available to both the on-campus and online MLIS students, this area of interest will give you the practical skills and theoretical knowledge necessary to succeed as an information professional in a wide variety of positions.

**Information Technology**

This area of interest will enable graduates to assess, organize, and manage the various electronic systems that support library services. Faculty will explore the theoretical underpinnings of such systems as well as provide a thorough understanding of their functions. The program will emphasize database design and implementation, information architecture, and information visualization.

**Public Libraries**

Our teaching is informed and inspired by personal experience, current research and leading thinking in the field. The courses in the Public Libraries area of interest will equip you for the challenges and demands of planning, managing and delivering resources and services through exploration of their historical contexts, current positions, and future directions.

**Resources & Services: Children and Youth**

SCI acknowledges the changing landscape of children's and young adult librarianship. Without forgetting our important roots in children's literature, our school prepares information professionals who can reach out to the child of the 21st century.

**Resources & Services: Reference**

The Reference area of interest at SCI will provide students with working knowledge of a wide array of reference sources and services in areas such as government documents, social sciences, science and technology, law, health, and humanities. This course of study will enable you to analyze users' needs to determine what information is appropriate; to make useful judgments about the relevance, trustworthiness, and quality of sources; and to assess methods for delivering the desired information.

**School Library Certification Program**

The School Library Certification Program (SLCP) will allow you to earn both your MLIS degree and your Instructional I teaching certificate in Library Science, K-12, from the Pennsylvania Department of Education. You will gain the critical skills needed through competency-based learning experiences in collaboration with practitioners. You will be prepared to embark upon one of the most challenging and rewarding careers in the Library and Information Sciences field.

**Independent and Experiential Learning Opportunities**
This program is designed to provide you with both the theoretical knowledge and practical skills for managing and making decisions related to your chosen academic pathway. As part of your course of study, you can gain critical experience through a for-credit Field Experience or you may also register for an Independent Study which affords the opportunity to work on research projects and publications.

Students must have completed a minimum of twelve credit hours in good academic standing in order to register for the Field Experience.

Intelligent Systems Program

The Intelligent Systems Program (ISP) is a degree-granting program in the University of Pittsburgh's School of Computing and Information that enables graduate students to pursue diverse interdisciplinary studies in applied artificial intelligence. The scope of the program is broad, but encourages students to explore concentrations in specific areas, such as biomedical informatics, machine learning and decision making, intelligent tutoring systems and educational technology, natural language processing and information retrieval, AI and law, and social computing.

Many of Pitt's acclaimed schools are represented through our associated faculty, including the School of Medicine, the School of Law, the School of Education, the Dietrich School of Arts and Sciences, and the Swanson School of Engineering. There are especially strong connections to research groups in the Department of Computer Science, the Department of Informatics and Networked Systems, the Department of Biomedical Informatics, the Law School, and the Learning Research and Development Center.

The program offers Master of Science and Doctor of Philosophy degrees and an area of concentration in biomedical informatics.

Admissions Information

Briefly, an application consists of the standard School of Computing and Information admission form and supplemental materials. As well, applicants must include a concise statement of purpose, providing information on the following points:

- Objective in pursuing a PhD or MS in intelligent systems.
- Theoretical background in relevant areas.
- Background in relevant tools and applications, particularly programming languages, including your level of proficiency.
- Relevant practical experience, including industrial or commercial experience.

Applicants to the Biomedical Informatics track of the Intelligent Systems Program must specifically indicate their interest in this track on their application to the Intelligent Systems Program.

Financial Assistance

Students in the ISP program are funded through a variety of sources, including externally supported research and training grants, University fellowships, and program funds.

Policies for the Intelligent Systems Program

- When a new student arrives, the student is assigned space. As the student finds an advisor and starts working on projects, he/she usually moves to other labs designated for that faculty.
- The progress of all ISP students is reviewed and mailed to the students in the fall of every year.
- ISP students are eligible to apply for a limited amount of conference travel funds each year. To find out more, refer to the ISP Web page.
- Every ISP student is expected to maintain a website listing their current contact information, publications and current research. They are also responsible for ensuring that the website is linked from the ISP Student Directory.
- ISP students are required to attend all but two of the scheduled AI Forum talks per term and sign in so they get credit. Failure to meet this requirement will affect application for Andrew Mellon Fellowship candidacy, Dietrich School program funding candidacy, summer GSA funding, ISP Travel Grants and similar funding. In case of extenuating circumstances, the student should communicate the possible absence to the ISP director and administrator.
ISP students are required to complete the Research Integrity Module. "Upon completion of this activity, participants should be able to describe generally accepted practices and ethical principles associated with authorship and publication, generation and use of data, mentoring, research misconduct, and other investigator responsibilities". Once completed, the last page must be printed and submitted to the ISP administrator.

**Maintenance of a 3.0 GPA**

Each student must maintain a 3.0 Grade Point Average (GPA) for all credits of graduate level coursework for either degree. Failure to maintain a cumulative 3.0 GPA will result in the student being placed on academic probation. Students should refer to the Academic Standing and Dismissal section of the SCI Catalog page for full definitions and explanations of the academic standing review.

**Grades for Individual Courses**

Students must earn a grade of B- or better in each of the courses in the appropriate ISP curriculum (the General Intelligent Systems Track or the Biomedical Informatics Track).

**Transfer Credits**

Transfer credit limits are determined by the University while the process is managed at the School level. See the Transfer Credits section of the SCI Catalog page for details and forms. Note, the explicit approval of the student's advisor and of the ISP director are required. Students must provide all items outlined in the Transfer Credit Request Form in order for the request to be reviewed by the ISP Director.

**Substituting Other Courses at the University of Pittsburgh**

Course substitutions require approval of the student's advisor and the ISP director. To apply for a course substitution, a student should first obtain the approval of his or her advisor. Then, the student should submit the following information to the ISP director: (1) whether the class is a graduate or undergraduate class, (2) exactly which requirement the course is meant to satisfy, (3) an indication of approval by the student's advisor, (4) justification for the substitution, and (5) sufficient information about the course syllabus for the director to judge whether the substitution would be appropriate.

Course substitution must be documented and shared with the Records Office in order to expedite graduation certification review.

**Intelligent Systems, PhD**

**Requirements for the PhD**

The student's adviser must be a member of the ISP faculty. Note that each new student is initially assigned an administrative adviser. A student's administrative adviser will not necessarily be the student's MS or PhD adviser.

To obtain a degree, a student must also be in good standing and at full student status (not provisional). To remain in good standing, a student must make sufficient progress on their degree requirements, and also attend all but two (2) of the scheduled AI Forum talks per term and sign in so they get credit. Failure to meet this requirement will affect application for various fellowship candidacies, GSA funding, travel grants and similar funding. In case of extenuating circumstances, the student should communicate the possible absence to the ISP director and administrator.

**Course Requirements**

Prerequisites: Students are expected to have the undergraduate prerequisites needed to take the graduate courses required by the ISP. These may be required if not taken.
General Intelligent Systems Track Curriculum:

First-year students

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM
- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Core

- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC / CS 2710 - FOUNDTNS OF ARTIFICIAL INTELLGNC
- AND Choose Two of the Following:
- ISSP 2170 - MACHINE LEARNING / CS 2750 - MACHINE LEARNING
- ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG / CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG
- ISSP 2180 - COMPUTER VISION / CS 2770 - COMPUTER VISION

Theory

Applied or mathematical statistics. Choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

Theory of computation, algorithms. Choose one of the following:

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

One additional course required. Any of the theory courses listed above are acceptable.

Advanced courses

- Four ISSP advanced lecture courses, numbered 2000 or higher and approved by the PhD adviser.

Biomedical Informatics Track Curriculum (ISP/MI)

This assumes that a student already has training in a health care field; if this is not so, then the faculty will select a set of courses that teach the student basic medical knowledge, and the student may take these courses as electives.

First-year students

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM
ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Core

- ISSP 2083 - BIOMDCL INFORMATICS JOURNAL CLUB / BIOINF 2032 - BIOMEDICAL INFORMATICS JOURNAL CLUB
- ISSP 2015 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS / BIOINF 2011 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS
- ISSP 2160 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE / CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

Then choose;

One of the following:

- ISSP 2170 - MACHINE LEARNING / CS 2750 - MACHINE LEARNING
- ISSP 2230 - INTRO NATURAL LANGUAGE PROCESSING / CS 2731 - INTRO NATURAL LANGUAGE PROCESSING
- ISSP 2180 - COMPUTER VISION / CS 2770 - COMPUTER VISION

AND choose one of the following:

- CS 1510 - ALGORITHM DESIGN
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS
- CS 3150 - ADVANCED DESIGN & ANALYSIS OF ALGORITHMS

AND choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

AND choose two of the following:

- ISSP 2070 - PROBABILISTIC METHODS / BIOINF 2101 - PROBABILISTIC METHODS
- ISSP 2081 - FOUNDATIONS OF BIOINFORMATICS
- ISSP 2240 - DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS / INFSCI 2130 - DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS
- BIOINF 2017 - CLINICAL RESEARCH INFORMATICS
- BIOINF 2121 - HUMAN-COMPUTER INTERACTION AND EVALUATION METHODS
- BIOINF 2117 - APPLIED CLINICAL INFORMATICS
- BIOINF 2016 - FOUNDATIONS OF TRANSLATIONAL INFORMATICS
- BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS

Advanced courses

3 Graduate-level Courses (2000 or higher, 3 credits or more) ISSP lecture course that has your adviser's approval as being relevant to your studies in the ISP required.

TA

TA any biomedical informatics (BIOINF) course that is cross listed as an ISSP course.
MS Project and PhD Preliminary Evaluation

For this requirement, the student must complete a research project, approved by the student's preliminary evaluation committee, involving (1) significant research, design, or development work, (2) a written report, and (3) an oral presentation. Students must form a MS project committee (MS) or a preliminary evaluation committee (PhD) consisting of three faculty members, two of whom must be ISP faculty. The student's adviser chairs the committee, and must be an ISP faculty member.

Preferably, the research project is completed by the end of the summer term of the second year. Students who have not defended their research project by end of the fall term of their third year in the program will be placed on provisional status in the program, unless extenuating circumstances warrant an extension, as judged by the student's preliminary evaluation committee.

Although not a requirement, it is strongly suggested that the student submit the project report for publication in a refereed journal or conference. Thus, the scope of the research project is intended to be at the level of a paper that is of publishable quality in a peer-reviewed AI journal or conference.

The steps to completing the project are as follows:

- Submit a project proposal to your committee for its approval.
- Perform the work, and write a project report.
- Submit your project report to your committee at least two weeks in advance of your oral presentation of the work.
- Present your work in a talk given to your committee. As a guideline, you should give about a 30-minute talk and leave about 30 minutes for questions and discussion. The ISP faculty should be invited to the oral presentation. General questions relating to the field of AI are appropriate at this examination. The oral presentation may take place in an open forum, such as the ISP AI Forum, followed by a closed session with just your committee and any other ISP faculty members who wish to be present.

The committee will evaluate the project and presentation. The following criteria should be considered: The project and presentation should represent independent research, design, or development work; they should be technically sound; and they should be relevant to the ISP. Also, the student should display breadth of knowledge, understanding of the significance and motivation of the work, and understanding of the relationship of the work with prior work; and, the presentation should be clear. The committee will combine that evaluation with an evaluation of the student's progress in coursework to arrive at an overall evaluation of one of the following:

- Pass at the PhD level.
- Provisional pass at the PhD level: Must complete additional requirements specified by the committee in order to obtain a pass.
- Pass at the MS level: Student obtains a terminal MS degree, once all course requirements for the MS are completed.
- Fail.

Students who pass will need a card signed by their committee to obtain credit for passing. Contact the ISP program secretary at least two weeks before the oral portion of the preliminary evaluation, so the card can be available at the meeting to be signed.

PhD Comprehensive Examination

For the PhD comprehensive examination, students should follow these steps:

Form a comprehensive examination committee consisting of at least three faculty members, two of whom must be ISP faculty. The student's PhD adviser chairs the committee and must be an ISP faculty member. The faculty on a given student's comprehensive examination committee are often the same as the faculty on that student's preliminary evaluation committee, but they need not be.

Choose three major subareas of AI. One of these areas is flexible; the other two should be chosen from the ISP list of sub-areas below. The flexible area must be unanimously approved by the students' committee (but does not need to be approved by the director). Biomedical Informatics students should choose "Biomedical Informatics" as one of the subareas.

- AI and Business/Accounting
- AI and Law
- AI and Medicine
- AI and MIS
Work with the committee to finalize the reading for the three chosen subareas. Have the committee approve the list.

Work with your committee members (or their designated administrative assistants) to set the following dates for the examination:

- The date and time the written examination is distributed to you.
- The date and time you return the examination, which by default is nine days after receiving it. Your committee can designate an examination period of fewer or more than nine days, and through your adviser you may request that they do so.
- The date and time you orally defend your examination answers before your committee. You should schedule two hours for your oral exam defense, although typically less time will be needed.

Your committee will provide a list of written questions. Unless an exception is made by your committee, you will have nine days to provide the written answers to these questions. At the end of those nine days, you should distribute your answers to each of your committee members. Be sure to check that each has received your answers.

An oral examination will take place after the comprehensive committee has read your answers; the committee should be given a minimum of three days to read your answers before the oral examination. The ISP faculty (only) will be invited. You will be asked questions by your committee about your answers on the written examination, and more broadly, about your knowledge of the material in the three areas of concentration you have chosen.

At the end of your oral examination, your committee will evaluate your performance as one of the following:

- Pass.
- Provisional pass: Must complete additional requirements specified by the committee in order to obtain a pass.
- Fail.

An evaluation by the comprehensive examination committee of "fail" will be considered by the ISP faculty at large, who will make a determination about the status of the student in the ISP, including whether the student is allowed to re-take the examination or whether he or she is terminated from the program.

Students who pass the comprehensive examination will need a card signed by their committee to obtain credit for passing. Contact the ISP program secretary at least two weeks before the oral portion of the comprehensive examination, so the card can be available at the meeting to be signed.

**PhD Dissertation**

In pursuing the PhD dissertation, students should follow these steps:

Find a dissertation adviser and form a dissertation committee. The composition requirements for the Doctoral dissertation committees is detailed in SCI Catalog page; see the Doctoral Committee section for details.
Write a dissertation proposal. Present the proposal to your committee. Your committee must approve your proposal. You will need a form signed by your committee and the ISP director to complete this process. Contact the program administrator at least two weeks before meeting so the form can be available for signature at the meeting.

Carry out the research. Write the dissertation.

Announcement of your dissertation defense must appear in University Times and Pitt Chronicle. Send information to the ISP administrator at least five weeks before your oral defense date. This information will be sent to the University Times and Pitt Chronicle. The announcement includes the student name, the title of the dissertation, and the time and place of the defense.

Have an oral defense which is open to the University at large. You will need a card signed by your committee to obtain credit for passing the dissertation requirement. Contact the program secretary two weeks before your defense, so the card can be available for signature at the meeting.

Credit for doctoral research is ordinarily obtained through the course ISSP 3000 - RESEARCH AND DISSERTATION PHD. Students who have completed all course requirements, passed the PhD comprehensive examination, completed 72 credits of graduate student, and are working fulltime on their dissertations are encouraged to register for FTDJ 0000 - FULL-TIME DISSERTATION STUDY.

Intelligent Systems, MS

Requirements for the Master's Degree

Students pursuing the Master of Science degree in ISP must adhere to the SCI requirements for graduation and complete a minimum of 30 credits as outlined below, as well as a MS Project.

General Intelligent Systems Track Curriculum:

First-year students are encouraged but not required to take:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM
- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Core

- ISSP 2160 - FONUDTNS OF ARTIFICIAL INTELLGNC
AND Choose Two of the Following:

- ISSP 2170 - MACHINE LEARNING / CS 2750 - MACHINE LEARNING
- ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG / CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG
- ISSP 2180 - COMPUTER VISION / CS 2770 - COMPUTER VISION

Theory

Applied or mathematical statistics. Choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2131 - PRACTICUM IN ADV BIOMEDICAL IT
- STAT 2131 - APPLIED STATISTICAL METHODS 1
STAT 2132 - APPLIED STATISTICAL METHODS 2
Theory of computation, algorithms. Choose one of the following:

• CS 2110 - THEORY OF COMPUTATION
• CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

One additional course required. Any of the theory courses listed above are acceptable.

Advanced courses

Four ISSP advanced lecture courses, numbered 2000 or higher and approved by the PhD adviser.

MS Project

For this requirement, the student must complete a research project, approved by the student's preliminary evaluation committee, involving (1) significant research, design, or development work, (2) a written report, and (3) an oral presentation. Students must form a MS project committee (MS) or a preliminary evaluation committee (PhD) consisting of three faculty members, two of whom must be ISP faculty. The student's adviser chairs the committee, and must be an ISP faculty member.

Preferably, the research project is completed by the end of the summer term of the second year. Students who have not defended their research project by end of the fall term of their third year in the program will be placed on provisional status in the program, unless extenuating circumstances warrant an extension, as judged by the student's preliminary evaluation committee.

Although not a requirement, it is strongly suggested that the student submit the project report for publication in a refereed journal or conference. Thus, the scope of the research project is intended to be at the level of a paper that is of publishable quality in a peer-reviewed AI journal or conference.

The steps to completing the project are as follows:

• Submit a project proposal to your committee for its approval.
• Perform the work, and write a project report.
• Submit your project report to your committee at least two weeks in advance of your oral presentation of the work.
• Present your work in a talk given to your committee. As a guideline, you should give about a 30-minute talk and leave about 30 minutes for questions and discussion. The ISP faculty should be invited to the oral presentation. General questions relating to the field of AI are appropriate at this examination. The oral presentation may take place in an open forum, such as the ISP AI Forum, followed by a closed session with just your committee and any other ISP faculty members who wish to be present.

The committee will evaluate the project and presentation. The following criteria should be considered: The project and presentation should represent independent research, design, or development work; they should be technically sound; and they should be relevant to the ISP. Also, the student should display breadth of knowledge, understanding of the significance and motivation of the work, and understanding of the relationship of the work with prior work; and, the presentation should be clear.

The committee will combine that evaluation with an evaluation of the student's progress in coursework to arrive at an overall evaluation of one of the following:

• Pass at the PhD level.
• Provisional pass at the PhD level: Must complete additional requirements specified by the committee in order to obtain a pass.
• Pass at the MS level: Student obtains a terminal MS degree, once all course requirements for the MS are completed.
• Fail.

See the ISP PhD Catalog page for further details about doctoral degree requirements.

The School of Computing and Information

Grand-parenting and the new School of Computing and Information
Computer Science (CS) graduate students who matriculated into the University of Pittsburgh PRIOR to Fall 2017 received a communication allowing a choice to either remain in the School of Arts & Sciences or transfer to the new School of Computing and Information for completion of their CS degree.

- If a student chose to remain in the School of Arts & Sciences, they should refer to the Arts & Sciences catalog for the regulations, policies, and requirements for their degree.
- If a student applied to transfer to the School of Computing and Information, they should refer to the new school's catalog for the regulations, policies, and requirements for their degree.

Note: If a student took no action in response to the grand-parenting e-mail, they will remain in the School of Arts & Sciences by default.

Any student matriculating into the University of Pittsburgh AFTER Fall 2017, must apply to the School of Computing and Information in order to pursue an undergraduate degree in either Computer Science or Information Science and should refer to this School's catalog for information.

If you have additional questions or concerns, please contact the School's Office of Student Services at SCIreg@pitt.edu.

Admissions Requirements and Procedures

General guidelines for applying to a graduate program at the University of Pittsburgh should be reviewed prior to submitting an application for admission. These guidelines are available on the University's Application for Admission Catalog page.

The School of Computing and Information seeks students with diverse interests and abilities for its graduate degree and certification programs. All applicants will be judged on their own merits. Applicants for Master's study must have earned a Bachelor's degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better; the doctoral programs have more stringent requirements. For those who have been in the workforce, admission will be based upon academic achievement, area of study, career orientation, and work experience.

Apply Online: Applications for graduate study must be completed and submitted entirely online. Applicants must set up a free account with the ApplyYourself Application Network, which enables you to work on your application over several sessions. Your information is transmitted through a secured server and is kept private until you submit your application. After submission, your application materials will be managed confidentially within the review process.

Individual programs require supplemental application materials, and some programs require prerequisite coursework and skills knowledge. More details regarding expectations for statement of intent or writing portfolios, pre-requisite courses, and other supplemental application materials can be found on the individual program pages (through the appropriate program).

Admissions Status: Students are admitted to a graduate program and granted one of the following three types of status: Full graduate, Provisional graduate or Special graduate.

1. Full graduate status: when all admission requirements are met; for full details, see Admissions Status in the Regulations Governing Graduate Study at the University of Pittsburgh.

2. Provisional graduate status: when some admission requirements are not (or inadequately) met; Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either appropriate background courses or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated by the student and recommended by the department or program, and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

Students at the School of Computing and Information are expected to complete a Provisional Condition Review form in order to have their status reviewed upon completion of provisions/removal of deficiencies. Students are notified by e-mail when they have reached full graduate status and may request a new admissions letter at that time.

3. Special graduate status: to take specific graduate-level courses for one or more terms without the intent of earning a degree or certificate.

A special status student who takes courses while not seeking an advanced degree may transfer up to 12 credits taken while on special status to a degree program if the student is subsequently admitted into one, and if the department recommends the transfer. A course transferred from special status to full graduate status must carry a grade of B or better.
Application Processing: Begin the online application process at www.sci.pitt.edu.

Your application will be available for review by the department or program once all the recommendation letters are submitted and all test results and transcripts are uploaded.

Applications are reviewed after receipt of all required documents. Please note that, during the December-January timeframe, numerous applications are received. Due to the volume of submissions, there may be a delay in confirmation of receipt of materials.

Applicants are encouraged to check their online application account to ascertain if documentation has been received or if an admissions decision has been made PRIOR to contacting the School for such details. Note, the status of your application, related documents and admission decision cannot be verified until you have submitted the application fee (which is the final step in submitting your application).

Applicants are notified via e-mail when an admissions decision has been posted to the online application system.

The University of Pittsburgh participates in the Council of Graduate Schools' (CGS) "Resolution Regarding Graduate Scholars, Fellows, Trainees and Assistantships" also known as the "April 15 Resolution." Participation in the resolution allows admitted graduate students to consider all offers of financial support through April 15. In turn, the resolution binds students to their decisions made or held in place after April 15. SCI's cooperation ensures that both students and programs conduct their admissions in an ethical manner, and that they receive equal treatment and consideration in the financial support decision-making process. Further details regarding the "April 15 Resolution," including a list of participating institutions, can be found on the CGS Web site.

Deadlines for US Citizens and Permanent Residents: see the individual degree or program pages for application deadlines. Note, SCI processes applications on a rolling basis. However, priority consideration will be given to applications received by these deadlines.

Deadlines for International Students: Due to delays in the issuance of visas it is recommended that international students apply as early as possible, preferably at least six months prior to the start of the term of admittance, so that paperwork can be processed in a timely manner.

Deadlines for international students' applications to the School of Computing and Information are:

<table>
<thead>
<tr>
<th>Term of Admission</th>
<th>Application Deadline</th>
<th>Deadline by which you must accept your offer of admission in order for your visa to be processed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>January 15</td>
<td>Between April 15 and June 15</td>
</tr>
<tr>
<td>Spring</td>
<td>June 15</td>
<td>November 1</td>
</tr>
<tr>
<td>Summer</td>
<td>December 15</td>
<td>March 1</td>
</tr>
</tbody>
</table>

Admission of International Students: Non-US Citizens must read through the International Graduate Student Admission section of the University's Application for Admission page for a complete overview of University admissions requirements, including TOEFL or IELTS scores, for students from other countries.

English Language Proficiency Requirements: Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. International applicants must submit either the TOEFL or the IELTS (taken within two years of the date of application).

Applicants must contact Educational Testing Services directly to request that an official score report be sent to the School of Computing and Information. The institution code for the University of Pittsburgh is 2927. Submission of TOEFL test results is required for admission to graduate study in this School. Individual degree programs may have varying minimum requirements, which are outlined on each program's Catalog page. Applicants who are citizens of a country where English is the official language are exempt from submitting the results of the TOEFL or IELTS. In addition, applicants who have earned a Bachelor's degree or higher degree from a regionally accredited institution in the U.S. are also exempt from submitting the results of the TOEFL or IELTS. However, the School reserves the right to ask for TOEFL scores if deemed necessary for the evaluation of the application. Please note: degrees where anything less than the entire degree was completed in-residence within the English-speaking country will be reviewed on a case-by-case basis. Students in these circumstances may be required to complete the TOEFL or IELTS with the required minimum score upon review.

Prior to registration, students with TOEFL scores less than 100 (Internet-based) will be given the on-campus administered English Language Proficiency Test.
Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 score or better will be given the on-campus administered English Language Proficiency Test.

If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first academic year of study; some programs may require students to follow a shorter completion timeline for remedial courses.

**Deferred Admissions:** Admission to graduate study is valid for the academic year. A student may defer admission for up to one year without reapplication. The student must submit a deferral request through the online application system. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. Approval of a student's request to defer admission does not necessarily mean that any financial aid awarded is also deferred - the offer of financial aid will be reassessed for the student's deferred admit term.

**Reinstatement:** Students who have left the University for one calendar year or more (whether of their own volition or as a result of a suspension), who did not complete work at another institution, and who wish to continue their studies must apply for reinstatement through the School's online application system; exceptions noted in the Leave of Absence (LOA), Readmission, and Reinstatement section.

**Readmission:** Students who previously attended the University of Pittsburgh before attending another institution and who wish to return to the University are considered transfer students and must reapply following the guidelines for transfer students. Former students who have enrolled in other institutions may apply for readmission with advanced standing. Such students should submit a new application to their graduate degree program via the School's online application system. All supporting materials must be submitted; revision of essays is suggested. Inclusion of all transcripts - including new coursework completed during the period of leave - are required.

For more details regarding the different definitions and regulations for readmitted and reinstated students, see the Leave of Absence (LOA), Readmission, and Reinstatement section of the SCI Catalog page.

**Transferring Between SCI Departments or Programs** Students may transfer to a different department or program within SCI. Transfers between SCI departments or programs will be reviewed by the receiving department's admissions committee - including a thorough assessment of the student's academic performance in previous institutions as well as within SCI. Faculty will review the student's original application materials and may require that the student submit supplemental application materials.

To initiate a transfer between SCI Departments or Programs, a student must submit the Graduate Academic Plan Change Form at least one month prior to the start of the new admission term. If a University break occurs during that time, students should allot for additional time for their transfer to be evaluated by the department's admissions committee and their official student record to be processed.

Students should note that transfer to a different department or degree is not guaranteed.

### Appointments and Financial Information

**Teaching and Research Appointments**

Financial assistance for graduate students is provided in the form of teaching and research appointments, fellowships, traineeships, tuition scholarships, and loans. Application for financial aid should be made on the Application for Admission to Graduate Study. All applications for financial assistance are reviewed at the departmental or program level and awards are made to the extent of available funds. Admission to graduate study does not carry any implications concerning the award of financial aid. Only students with full graduate status are eligible for teaching assistantships and fellowships.

In recognition of academic merit, the University offers teaching assistants (TA), teaching fellows (TF), graduate student assistants (GSA), and graduate student researchers (GSR) full or proportional tuition scholarships, and students are required to register for the number of credits proportional to appointment. If appointed in the summer term, students should register for a minimum of 3 credits (or full-time dissertation study, if eligible), unless additional registration is needed for academic purposes.

Policies governing TA/TF/GSA/GSR positions can be found on the Provost's Guidelines and Resources page.

**Tuition Fees and Billing**

The University updates the Tuition, Fees, and Billing page in July for the upcoming academic year.
Academic Regulations and Standards

**University Registration Policies:** Policies on full-time/part-time status, adding and dropping courses, cross-registration, grading systems, etc. are governed by the University at large. Students should refer to the University's Academic Regulations for general information and contact the SCI Records Office for more details on applying these policies in practice.

Highlighted are frequent topics of inquiry: Satisfactory/No Credit, Registration (Enrollment), Cross-Registration, Withdrawing or Resigning, Grading and Records, Academic Record and Grade Reports

In addition to those University-wide regulations and standards detailed in the section on General Academic Regulations, each student in the School of Computing and Information is expected to be familiar with the following School-specific regulations and academic standards.

**Grading Policies**

Courses for which a G, I, N, R, or W grade is recorded and courses numbered below 1000 (0-0999) do not contribute either credits or grade points toward graduation. Courses numbered below 2000 only contribute credits or grade points toward graduation when approved by the department or program PRIOR to enrollment.

Students must achieve the minimum GPA, in no case less than 3.00, and individual course grade minimums established by their department or program in order to be eligible to retain teaching assistantships or fellowships, to undergo the preliminary evaluations, to take comprehensive examinations, to be admitted to candidacy for the PhD degree, and to graduate. No grade lower than a C will be counted toward graduation requirements; yet all letter grades will be calculated into the student's cumulative GPA unless if a class is repeated and a course repeat form processed. See "Repetition of Courses" section for more information.

**Auditing Courses and Selecting a Grading Option**

With the consent of the school and instructor, students may choose to audit a course or complete it with a Satisfactory/No Credit (S/NC) option. Regulations for S/NC credit allowances are governed by the Departments and are subject to the grade options allowed for each particular course (i.e., not all courses may be taken as S/NC). To audit a course, a student must register and pay tuition for the course. The audit grade (N) is not counted toward graduation or the GPA.

Graduate students choose a grading option (letter grade or S/NC) during enrollment from those listed within the University's Student enrollment system. Any decision to change the grading option after a class has been added to the student's enrollment must be processed no later than one week after the end of the Add/Drop period. The University's Office of the Registrar does not require submission of a Grade Option/Audit Request form for graduate courses. However, the SCI Records Office does require this documentation for course auditing.

The default is for all classes to be graded with a letter grade (unless otherwise stipulated by the Course Catalog) and decisions to select an alternative grading option (S/NC or Audit) should be discussed with the student's advisor. After a grading option has been selected and documented, this decision may not be changed.

**Grade Changes**

Grade changes are submitted by the course instructor. Grades will not be changed more than one year after the term's end nor if a student's record has become inactive or if a student has graduated.

**Incomplete (G or I) Grades**

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term in which the course was taken. After the deadline has passed, the G grade will automatically be replaced by "NG" or "no grade" and will remain on the record. The student will be required to reregister for the course if it is needed to fulfill requirements for graduation.

The I grade signifies incomplete course work due to nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

If an instructor is to assign an incomplete grade, the student and instructor must come to an agreement regarding the expected timeline of completion, grading, etc. The Records Office can provide assistance in documenting and enforcing this agreement through the "Incomplete Grade Contract."
Repetition of Courses

Required courses for a major must be repeated or replaced by a comparable course if a grade does not meet the degree's minimum requirements (see Department or program page for specifics). Course repetitions are subject to further regulations:

- Students typically only repeat a course in which the grade of C- or lower has been earned, however, upon department or program approval the student may repeat a course in which they have earned a B- or lower.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G and I) are not identified as repeated courses until the course work is completed.
- Students are only permitted to repeat a course up to two times. Programs may have stricter course repeat policies.
- Any grade earned in the repeated course will be recorded on the academic transcript and calculated in the GPA, even if it is lower than the original grade.

The School automatically submits a course repeat form for students, however it is the responsibility of the student to ensure their repeat course grades have been updated with the "Repeated - Excluded from GPA" flag on their academic record and that all credits have been calculated correctly. Students should discuss repeat courses with their advisor at the beginning and end of the term of enrollment.

Credit & Enrollment Policies

Pre-requisite courses, and any coursework required to prepare for pre-requisite courses, are not calculated in the total credits required to earn a degree. For a list of pre-requisite courses for a degree and/or a degree specialization, refer to the individual degree Catalog pages.

Students who have completed graduate courses in degree-granting graduate programs at other appropriately accredited institutions prior to admission to the University of Pittsburgh and who would like to request a transfer of credits should submit official transcripts from those institutions in addition to the School's Transfer Credit Request form so that the courses can be evaluated for transfer credit.

Transfer Credit Requests are reviewed and approved by the department or program faculty before the form is submitted to the Records Office. As with all School forms, this can be found on the School's Current Students > School forms webpage.

Requests must adhere to the University's limitations for transfer credits. See the University's Academic Regulations for details.

The quality of education that graduate students receive is greatly enhanced with good academic advising at all stages of their program. Given the diversity of these needs, each program must determine the best way to provide these services. Academic advising provides the foundation upon which students plan their studies. It is the policy of the School for each student to have an academic advisor whose responsibilities include providing guidance in developing the student's career goals and academic programs, approving course selections, and advising as needed on issues affecting the student's academic and professional careers. Students are matched with an advisor upon admission; they may, however, change advisors at any time.

A student's assigned advisor can be viewed in the Student Center via my.pitt.edu. The goal of academic advising is to develop a consistent academic program coordinated to meet general program requirements and specific needs of individual students. Ideally, the student and faculty advisor function as a team working toward the objective of career preparation by means of the strongest possible academic experiences for the student. Students should meet each term with their advisors to ensure timely progress through their program.

All departments and programs are responsible, with Dean's Office oversight, for implementing policies and practices consistent with the University's in Elements of Good Academic Advising. Unresolved problems relating to the advising of graduate students at the department or program level should first be addressed with the Chair of the department or program.

Note regarding Graduate Faculty advisors and enrollment: Advising holds/service indicators, permission numbers, withdrawals, and questions regarding the mechanics of enrollment should be referred to the Records Office via SCIreg@pitt.edu. Course selection, research development and interests, and curriculum-based inquiries should be vetted through the student's advisor.

Exemptions to enrollment policies and degree requirements are approved by the department or program and are mediated through the student's advisor. Exemptions are then relayed to the Records Office, via various forms (see School Forms) for inclusion in the student's academic record.

Tracking your degree progress: In order for students to verify that they are making progress toward graduation, they should meet regularly with their academic advisor and review their progress and plans for future study.
In addition, Master's students should make use of the academic advisement report (AAR) as a self-advising tool. This report is submitted with the graduation application as a contract between the School and the student. The AAR provides detailed course options for fulfilling all requirements for the degree. When using the AAR online, students have quick access to schedule details for approved courses and links to enrollment. It is recommended that students continually monitor their AAR and utilize this tool frequently for enrollment and advisement purposes.

If a student finds errors in their AAR, they should speak to their advisor and request updates to their AAR. Requests for updates include "Best Fit" changes (re-directing courses to the appropriate requirement area), authorized student exemptions (exemptions pre-approved by the Program Director and/or the Dean's Office), and corrections to transfer credits. See the School's Current Students site for related forms (School Forms).

Informational videos and documents related to the AAR can be found on the Registrar's Student Training website. Detailed advising information is available on the program offering pages.

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more stringent than the University policies. Variations and additions to those rules within the School of Computing and Information are as follows:

All requirements for master's degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years, or within eight years if the student has received credit for a Master's degree appropriate to the field of study. Some departments may have a more stringent statute of limitations for completion of Master's or Doctoral degrees. See the program offerings for specific details.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. Requests for an extension must state the reason for the delay, provide evidence of continuing progress toward the completion of the degree, and include a detailed plan of study and proposed date for completion. The request must be approved by the chair of the student's Doctoral or Master's committee (if applicable) and the department or program chair or director of graduate studies, and be submitted to the Dean's Office for final action.

**Leave of absence (LOA), Readmission, and Reinstatement:** Graduate students may be granted a leave of absence under special conditions. Students who have resigned without requesting a leave of absence or have been away from the University for one or more years must apply for readmission or reinstatement. By University definitions, readmitted students previously attended the University of Pittsburgh and then enrolled at another external institution. Reinstated students previously attended the University of Pittsburgh and left for one or more calendar years, not attending external institutions in the meantime. These terms are attached to specific graduation requirements. All students interested in readmission or reinstatement must submit an application except for those on an approved leave of absence (see Special Admissions section for details).

Readmitted students follow the School and degree graduation requirements and rules based upon their term of readmission. Their statute of limitations is reset to their term of readmission and their transfer credits, advanced standing, and previously authorized exemptions will be reevaluated at the point of readmission.

Reinstated students follow the School and degree requirements and rules based upon their original term of entry to the School. Their statute of limitations is calculated against their original term of entry to the University and their transfer credits, advanced standing, and previously authorized exemptions will be accepted as previously approved at the point of reinstatement.

Exceptions to the reinstatement rules include:

- Students whose leave exceeds two years. All students who have been away from the University more than two years will be subject to the requirements of the School and of their major and/or certificate programs at the time of their reinstatement, rather than those in place at the time of their last attendance.
- Students on an approved leave of absence. Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to Doctoral students or one year to Master's students. The length and rationale for the leave of absence must be stated in advance, submitted via the School's Leave of Absence Request form (found on the Current Students > School Forms webpage), recommended by the Department or Program, and approved by the Dean's Office.

If granted approval by the Dean's Office, a student is ensured that the time of the leave shall not count against the degree's statute of limitations, the student's transfer credits and previously authorized exemptions will be accepted as previously approved. If a student petitioned the faculty and
received permission to enroll in an external institution during their LOA for transfer credit in advance of their LOA, the credits may still transfer upon the student's return.

Students who have an approved LOA do not have to apply for readmission nor reinstatement. Instead, instructions for returning to the School will be shared with the student in the letter sent approving their leave.

A note on advising appointments and a returning from a break in continuous enrollment:

Since registration open enrollment begins in the twelfth week of the preceding term, applications for reinstatement should be received prior to that period so that the student's application can be reviewed and their record updated. Similarly, students who are returning from a LOA should keep this timeline in mind for setting up an appointment with their advisor and/or notifying the Records Office of their return to studies. Only after a student on an approved LOA has notified the Records Office will their enrollment service indicator (registration hold) be released from their record.

Regardless of the conditions surrounding a student's leave - e.g., an intentional leave of absence, suspension, or an extended lapse in enrollment requiring reinstatement - when a student returns, they return in the standing attached to their record (good, warning, or probation) at the term of their departure.

**Academic Integrity**

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

**Academic Standing and Dismissal**

Academic standing is maintained and monitored each term by the Dean's office in conjunction with the School's various departments and programs. A student's academic standing is comprised of two factors: cumulative GPA and progress toward a degree. In order to be in good academic standing, students are expected to maintain a cumulative GPA of 3.00 or above and make continued progress towards their degree.

Students are placed in the Academic Probation status after earning a cumulative GPA below 3.00. Students may also be placed on Academic Probation if they fail to make progress toward their degree, as determined by their Department or Program, or fail to meet provisional conditions as outlined in their admissions letter (if applicable). Students placed on Academic Probation will be notified in writing by the Dean's Office. It is important to note that students on Academic Probation are not eligible for a teaching assistantships or fellowships, nor are they eligible to complete degree milestones (i.e., comprehensive examinations, thesis proposal, oral defense, or graduation).

Students who are on Academic Probation for failing to meet GPA requirements must earn a GPA of at least 3.00 for each term that they enroll until they have achieved a cumulative GPA of 3.00 or above. If such a student fails to earn 3.00 term GPA, they are subject to Academic Dismissal. Students who are on Academic Probation for failure to make degree progress must satisfy the conditions set forth by the department or program and communicated by the probation letter by the specified deadline. If such a student fails to satisfy these conditions by the specified deadline, they are subject to Academic Dismissal. Dismissal is a final action. Dismissed students are not eligible for reinstatement at the University of Pittsburgh.

A student whose performance on a preliminary or comprehensive examination is judged to be inadequate may be subject to Academic Dismissal at the end of the term.

**Master's Degree Requirements**

University policies governing Master's programs can be found in the Regulations Pertaining to Master's Degrees policy. The information below summarizes further SCI-specific regulations.

**Credit Requirements**
The minimum requirement for any Master's degree is 30 credits. Not more than six credits may be granted toward the completion of the requirements for a Master's degree for work completed at another graduate institution. Students must achieve the minimum GPA established by their department or program, in no case less than 3.00, to take the comprehensive examination and to graduate.

**Comprehensive Examination**

Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program must obtain prior approval from the SCI Academic Council and notify the University Council on Graduate Study and describe the situation. Students on inactive, special, or provisional status, or who have a GPA less than 3.00, are not eligible to take the comprehensive examination. See Comprehensive Examination under Regulations Pertaining to Master's Degrees for further detail on requirements for comprehensive exams.

**Thesis Option and Procedures**

The requirement of a thesis or its equivalent is at the discretion of individual departments or programs. If a thesis is submitted, its form must be in accord with specifications available from The ETD Format Guidelines Manual and approved by the Associate Dean for Academic Programs. A report of the final oral examination in defense of the Master's thesis must be filed with the SCI Records Office on the 5th floor of the Information Sciences building. For further information on thesis requirements, including the makeup of the thesis committee, see Thesis Option under Regulations Pertaining to Master's Degrees.

**PhD Degree Requirements**

University policies governing PhD programs can be found in the Regulations Pertaining to Doctoral Degrees policy. The information below summarizes further SCI-specific regulations.

**Credit Requirements**

The minimum requirement for the PhD degree of 72 credits may be earned in formal course work, directed study, independent study, and/or thesis and dissertation research. Students must achieve the minimum GPA established by their department or program, in no case less than 3.00, to be eligible to undergo the preliminary examination, to take the comprehensive examination, to be admitted to candidacy for the PhD degree, and to be graduated.

**Preliminary Examination**

The nature of the preliminary examination and the time at which it is conducted are determined by each department or program. In some programs, the preliminary doctoral exam/evaluation may be combined with a Master's comprehensive examination. See Preliminary Evaluation under Regulations Pertaining to Doctoral Study for further details on regulations pertaining to the exam. Students must be registered in the term they are completing the Preliminary Examination.

**Comprehensive Examination**

Comprehensive examination results must be reported promptly to the SCI Dean's Office, and no later than the last day of the term in which the examination is administered. Students must be enrolled in the term in which they are completing the Comprehensive Examination. See Comprehensive Examination under Regulations Pertaining to Doctoral Study for further detail on regulations regarding the exam.

**Doctoral Committee**

*Departmental membership status:* University of Pittsburgh faculty members with a primary or joint appointment in a SCI department are considered internal members of that department. Individuals holding primary appointments outside of the department are considered as external to the department. However, a University of Pittsburgh faculty member who holds a secondary appointment in a SCI department and is an active participant within the department may petition the department to be considered as an internal member, as determined by departmental criteria. Upon receiving internal status within a department, a faculty member may no longer act in an external capacity.

*Committee composition:* Doctoral dissertation committees are comprised of at least four members, including at least three internal members, and at least one external member from another department at the University of Pittsburgh or from an appropriate graduate program at another academic institution. The primary advisor and chair of the doctoral dissertation committee must be an internal member of the doctoral candidate's home department. The majority of committee members must be from the University of Pittsburgh, and all committee members from the University of Pittsburgh must be members of the graduate faculty (https://ir.pitt.edu/graduate-faculty-roster/). Under certain circumstances, active researchers with
appointments outside of academia may be approved as external committee members. The composition of the committee must be approved by the Department Chair and the Associate Dean for Academic Programs prior to scheduling the dissertation proposal.

Internal committee members who leave the University after a graduate student has been admitted to candidacy may remain on the committee in their original capacity for a period of up to 12 months. If the chair of the dissertation committee leaves the University, they may continue to serve as the sole chair of the committee for a period of up to 6 months; after this time, a co-chair must be appointed from within the department or program. After this 12-month period, a departed committee member is no longer eligible to be an internal member or committee chair, but may be added to the committee as an external member; this may necessitate the addition of further internal committee members. If a committee member retires, they may remain on the committee as long as they are still willing to serve, and are still active professionally in the academic community.

Any changes in the membership or roles of the committee must be approved by the Department Chair or Program Director and the Associate Dean for Academic Programs.

Admission to Candidacy for the PhD Degree

After completion of the overview/proposal, the student should, in consultation with the student's major advisor, file the application for admission to candidacy for the Doctor of Philosophy degree. Students are informed of admission to candidacy by written notification from the Associate Dean for Academic Programs. Students must be enrolled in the term in which they are completing the overview for candidacy. For a listing of requirements for admission to candidacy, see Admission to Candidacy for the Doctor of Philosophy Degree.

Admission to candidacy must be at least eight months before the defense of the dissertation in order to provide an opportunity for the members of the doctoral committee to review, criticize, and monitor the proposed research.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. A record of such meetings must be maintained in the student's file in their home department or program.

Dissertation

See Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees for an overview of requirements and form for the dissertation and abstract.

Language of the Doctoral Dissertation

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's dean with the approval of the dissertation adviser and committee, but only for sound reasons of scholarship. Permission shall never be granted on the ground of inadequate command of English.

Final Oral Examination

Students preparing to take their final oral examination in defense of their dissertation should refer to Final Oral Examination under Regulations Pertaining to Doctoral Degrees for details on the examination. School-specific timelines and processes are outlined, below.

The final examination must be scheduled at least four weeks in advance. When determining a date for the examination, students should consider the ETD processing deadlines, allowing themselves sufficient time between final oral examination and ETD deadline to revise their dissertation and gather the related paperwork.

When an examination date is established, the chair of the doctoral committee must submit a defense scheduling form to the Dean's office, listing the title of the dissertation and the time and place for its defense. This allows adequate time for announcement in the University Times as required by University regulations.

At least two weeks prior to the dates set for the final oral examination, all members of the doctoral committee should be provided with a copy of the dissertation.

All members of the doctoral committee must physically attend the examination; exceptions can be made with the permission of the Associate Dean for Academic Programs. A report of this examination and a report on approval of the dissertation, signed by all members of the doctoral committee, must be sent to the Associate Dean for Academic Programs for approval. The report on the approval of the dissertation may be signed concurrently with or subsequently to the report of the final oral examination. If the decision of the committee is not unanimous, the case is referred to the Associate Dean for Academic Programs for resolution.
It is the responsibility of the student's advisor to ensure that the dissertation is in final form before requesting signatures of all committee members. After the final oral examination is successfully completed, the student must submit their dissertation electronically. As well, the University requires students submit various forms, publication agreements, and fees in addition to the Electronic Thesis and Dissertation (ETD). Students submit all materials outlined in the SCI PhD Graduation Checklist by the ETD & Paperwork deadline. Any paperwork that is signed must be the original and therefore should be mailed if you are unable to submit it in person. See the checklist for details. ETD deadlines and the SCI PhD Graduation Checklist can be found on the SCI Current Students > Graduation Procedures webpage.

After submission of the ETD and paperwork, the Records Office will review all items for completion and adherence to University formatting guidelines. Students must be available to make additional edits to formatting of their ETD; this process typically takes one month to complete before the document is approved for publication.

Students will be required to register for at least one credit in the term during which they expect either to complete degree requirements or have the oral defense. Students who have completed all credit requirements for the PhD degree may register for "Full-Time Dissertation Study." If the student is a doctoral candidate and off-campus, not using University facilities and/or faculty time, the candidate need only register for 1 credit per academic year to maintain active enrollment status.

If a student does complete all the work in a given term, including the dissertation defense, and has been cleared for graduation too late to be included on the graduation list for that term, the student may apply to graduate the following term and need not enroll for any courses or any credits, subject to approval. See "Student status during term of graduation" section for details.

**Graduation**

**Student status during term of graduation:** Graduate students are required to be in "active status" (registered for one credit per academic year) and enrolled during their term of graduation. If a student does not plan to enroll in credits during their graduation term, they must provide a valid and extenuating reason for this policy exemption via the request for a Graduation Enrollment Waiver form. All requests for this policy exemption will be reviewed by the Records Office and approved by the SCI Dean's Office and the University Registrar.

**Application:** *Graduation is not an automatic process.* Students must file an application for graduation, including additional materials as outlined on the School's Current Students website. The School's deadlines, related late fees, worksheets for tracking progress toward degree completion, and contact information for graduation applications are available on its Current Students website.

If your graduation is postponed, you must reapply by completing another Graduation Application.

**University Commencement:** Candidates for graduation are encouraged to appear in person at the University Commencement Ceremony. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony.

**School Ceremony:** The School of Computing and Information hosts an event to recognize its graduating students and awardees at the end of each term.

Certification of degree graduation requirements is processed after the recognition ceremony; Reading of a student's name at the Recognition Ceremony is not an indication of the student having met graduation requirements.

Event details, travel tips, and information regarding tickets are hosted on the School's website at www.sci.pitt.edu.

**POST-GRADUATION PROCESSING**

**Certification:** Graduation certification is the process run by advisors and staff to ensure students have met all graduation requirements. This process is run after grades are posted for the term in question. Students who are concerned about their graduation eligibility should first review their academic advisement report (AAR) and then meet with their academic advisor.

**Documentation (transcripts, diplomas, etc.):** Official documentation of graduation is managed by the University Registrar's Office. Inquiries regarding transcripts and diplomas should be directed to that office's Graduation/Diplomas service area.

All diplomas are mailed to students approximately four weeks after the official certification date for each graduation period.
Special Academic Opportunities/Programs

Multiple Independent Degree Programs within SCI

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

For further detail, please refer to the University policy regulating pursuit of Two Independent Degree Programs Simultaneously.

Joint SCI/GSPIA MSIS Degree Program

The School of Computing and Information will continue to honor the joint degree agreement made between the School of Information Sciences and the Graduate School of Public and International Affairs (GSPIA). The program allows for students to complete the Master of Science in Information Science (MSIS) degree and one of three degrees in GSPIA simultaneously. To be admitted fully into the joint program, students must be accepted by both GSPIA and SCI. Admissions and course of study details are available on the MSIS degree requirements page of this catalog.

School of Dental Medicine

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull.

Every day, the positive contributions of our faculty, staff, residents and students—the Pitt Dental Medicine family—demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the Graduate School of Public Health; and bachelor of science (BS).

The four-year Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre-doctoral curriculum with the rest of the class.

The Oral Biology Program (MS and PhD) encompasses the study of fundamental biological phenomena related to the development, structure, and function of the craniofacial region as well as the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area with the aim of improving health. Current research focuses involve craniofacial regeneration and genetics.

The School of Dental Medicine offers advanced residency certificate and Master of Dental Medicine degree programs in each of the full array of dental specialties.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The interprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education. To learn more about the Dental Hygiene Program, please visit the Pitt Undergraduate Catalog.

General Dentistry and Specialty Clinics

The School of Dental Medicine provides clinical education and patient care through 15 dental clinics encompassing general dentistry, anesthesiology, special needs, emergency, endodontics, implants, oral and maxillofacial pathology, oral and maxillofacial surgery, orthodontics and dentofacial orthopaedics, pediatric dentistry, periodontics and preventive dentistry, dental hygiene, endodontics, prosthdontics, radiology, and restorative dentistry/comprehensive care.
Clinical Centers
The Multidisciplinary Implant Center focuses on patient care, teaching, and research related to the treatment of tooth loss and the functional bone and soft tissue deficits that can follow tooth loss.
The Center for Patients with Special Needs was established by Dean Thomas W. Braun as a school priority to centralize and increase treatment capacity for patients with physical, developmental, neurological, and intellectual disabilities.
University Dental Health Services (UDHS) is a legally separate nonprofit practice plan that is closely affiliated with the School of Dental Medicine. UDHS providers are full- or part-time faculty members, many of whom are board-certified specialists and nationally recognized experts in their respective fields.

Research Strengths
Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification
The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment
Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application
The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Demographics
For the 2016-17 academic year, the School of Dental Medicine accepted 80 incoming first professional degree or doctor of dental medicine students from a pool of 2,003 applicants. Forty-four percent of the 315 students enrolled in the doctoral program are women. There are 63 students in the dental hygiene certificate program and 27 in the bachelor of science in dental hygiene program. The School of Dental Medicine has 97 full-time, 107 part-time, 115 adjunct, and 16 emeritus faculty members.

Mission
The mission of the University of Pittsburgh School of Dental Medicine is to improve oral health through Teaching, Research and Service:

- Teaching a new generation of clinicians to deliver oral health care with skill and compassion
- Research that expands the boundaries of our knowledge and builds on discoveries to enhance human life
- Service to the diverse community of patients who entrust themselves to our care

Vision
The University of Pittsburgh School of Dental Medicine will be a diverse, welcoming and supportive community widely recognized for excellence and leadership in the improvement of oral health.

- We will train our students to care for patients skillfully, professionally, and compassionately; to treat each patient with respect and kindness; and to be aware at all times of the privilege and responsibility of being entrusted with the care of another human being. We will model evidence-based treatment and the importance of life-long learning.
- We will actively contribute to the mission of the University of Pittsburgh to be a leading research institution, broadening the scientific foundations of dental and craniofacial medicine and translating new knowledge into life-enhancing treatments for people everywhere.
We will be known for our clinical expertise and serve as a regional resource to which our neighbors will turn for comprehensive care. We will use the best techniques and current technologies to create optimal outcomes for our patients.

We will maintain a strong and enduring connection with our alumni to help ensure our School's success for generations to come. Our alumni will carry on our mission through clinical excellence, service to the dental profession, and generous outreach to people in need.

Values

- Service: Providing exemplary service to our students, faculty, patients, and society
- Passion for Excellence: Continuously striving to achieve the highest level of excellence in education, research, and service
- Professionalism and Integrity: Adhering to the highest ethical and professional standards of our profession
- Leadership: Serving as role models and mentors to students, faculty, and staff to shape the future of oral health care
- Collaboration: Embracing a team approach to accomplish shared goals
- Humanism: Respecting the contributions of each person within the School of Dental Medicine family to foster an environment of trust, safety, and fairness

School of Dental Medicine Faculty

School of Dental Medicine Full-time Faculty

Pre-doctoral (DMD) Program

Welcome to Pitt Dental Medicine

Students from Pennsylvania, across the country and around the world come to study at the University of Pittsburgh School of Dental Medicine. Among the best dental schools in the country, the School of Dental Medicine seeks only the most qualified students for admission to nationally recognized predoctoral and graduate academic programs. The central program at the school is the Doctor of Dental Medicine (DMD) program. Providing students with a solid evidence-based education in dental medicine, graduates of the program are well prepared to be practicing clinicians or researchers. The four-year predoctoral program begins at the White Coat Ceremony and leads to a Doctoral degree in Dental Medicine (DMD). Advanced dental education and residency programs are available to students, including the Oral Biology Graduate Program.

Competency-Based Educational Program

The four-year predoctoral program prepares students to provide basic health promotion and disease prevention, diagnose and develop treatment plans, analyze complex medical and dental cases, and achieve competency in all areas defined for general practitioners. The competency-based curriculum also reflects the school's commitment to supporting the development of professionalism, life-long learning, and synthesis of clinical and biomedical science concepts.

View our four-year curriculum.

Beyond the Classroom

Student learning continues far beyond the classroom. Community service is encouraged through the Student Community Outreach Program and Education (SCOPE) and the University of Pittsburgh WISER Center offers dental students hands-on medical experience in a world-class multidisciplinary simulation-based training facility. The Simulation Clinic gives students life-like experience with simulated patients in a classroom, clinical learning environment and the Fassinger Learning Resource Center lets students continue learning past the traditional hours and space of the classroom meetings.
Students are encouraged to participate in any of a number of the school's active student organizations to connect with others sharing and investigating the same interests. Student organizations focus on advancing knowledge and extend the frontiers of a particular segment of oral health. Personal, academic and career counseling are available through the school's Office of Student Affairs for all students. An extensive library system, learning skills center, housing resource center, student health care and recreational and fitness facilities are available through the University.

Research opportunities abound for students in good academic standing to study many different aspects of dental research, including craniofacial genetics, tissue regeneration, informatics, public health and other fields. With an extended history of profound dental research, the University of Pittsburgh School of Dental Medicine also fosters interactions between dental students and researchers in other disciplines. Academic rewards and contributions to the dental profession are just two reasons many students conduct research at the school. Students have opportunities to share their projects and results at national meetings and conferences and provide excellent learning and networking opportunities with colleagues. Student researchers also may compete for awards, scholarships, and other opportunities at the University.

About the School of Dental Medicine

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Class of 2020

- Class Size: 80
- Male: 49 Female: 31
- Average Age: 24
- Undergraduate Schools Represented: 54

Academics

- DAT AA: 21.4
- Average Total GPA: 3.64
- Average Science GPA: 3.55

Ethnicity/Race

- Caucasian: 60*
- Asian: 17*
- Hispanic: 5*
- African American: 4*
- American Indian: 4*
- Asian-Indian: 2*
- *Multiracial: 7

Important Information
Doctor of Dental Medicine, DMD

DMD Curriculum

Following is a listing of all DMD courses and a typical curriculum for each of the four years of the program:

First Year-Fall Term

- CDENT 5116 - EVIDENCE BASED DENTISTRY
- CDENT 5117 - PROFESSIONALISM IN DENTAL MEDICINE
- DENT 5115 - HEALTH PROMOTION AND DISEASE PREVENTION 1
- DENT 5118 - QUALITIES OF A GENERAL DENTIST 1
- ORBIOL 5113 - MOLECULAR AND CELL BIOLOGY 1
- ORBIOL 5114 - MOLECULAR AND CELL BIOLOGY 2
- ORBIOL 5115 - MICROBIAL PHYSIOLOGY AND IMMUNOLOGY
- ORBIOL 5120 - BODY TISSUES
- ORBIOL 5125 - GENERAL EMBRYOLOGY AND CRANIOFACIAL ORGANOGENSES
- ORBIOL 5130 - ORAL TISSUES
- RESTD 5111 - DENTAL ANATOMY AND MORPHOLOGY
- RESTD 5115 - DENTAL ANATOMY AND MORPHOLOGY LAB

First Year-Spring Term

- CDENT 5145 - HEALTH PROMOTION AND DISEASE PREVENTION 2
- CDENT 5146 - CARIOLOGY
- DENT 5148 - QUALITIES OF A GENERAL DENTIST 2
- ORBIOL 5140 - SYSTEMIC GROSS ANATOMY
- ORBIOL 5141 - SYSTEMIC HUMAN PHYSIOLOGY 1
- ORBIOL 5142 - THE SKULL: BASIC AND APPLIED ANATOMY
- ORBIOL 5143 - HEAD AND NECK SOFT TISSUE ANATOMY
- ORBIOL 5144 - SYSTEMIC HUMAN PHYSIOLOGY 2
- PERIO 5141 - PERIODONTOLOGY 1
- PERIO 5149 - PERIODONTAL INSTRUMENTATION 1
- PROSTH 5142 - DENTAL MATERIALS
- RESTD 5143 - PRINCIPLES OF OPERATIVE DENTISTRY 1
- RESTD 5147 - PRINCIPLES OF OPERATIVE DENTISTRY 1 LABORATORY
First Year-Summer Term

- CDENT 5173 - HEALTH PROMOTION AND DISEASE PREVENTION 3
- DENT 5178 - QUALITIES OF A GENERAL DENTIST 3
- DIASC 5170 - GENERAL AND SYSTEMIC PATHOLOGY
- ORBIOL 5171 - IMMUNOLOGY AND INFECTIOUS DISEASES
- PROSTD 5171 - PRINCIPLES OF DENTAL OCCLUSION
- RESTD 5172 - PRINCIPLES OF OPERATIVE DENTISTRY 2
- RESTD 5176 - PRINCIPLES OF OPERATIVE DENTISTRY 2 LAB

Second Year-Fall Term

- DENT 5211 - DIAGNOSIS AND TREATMENT PLANNING 1
- DENT 5218 - QUALITIES OF A GENERAL DENTIST 4
- DIASC 5211 - INTRODUCTION TO RADIOLOGY PHYSICS AND BASIC INTERPRETATION
- DIASC 5212 - ORAL AND MAXILLOFACIAL PATHOLOGY
- ENDOD 5210 - ENDODONTICS I
- ENDOD 5216 - ENDODONTICS I LAB
- ORBIOL 5214 - PHARMACOLOGY AND THERAPEUTICS
- PEDENT 5211 - PEDIATRIC DENTISTRY I
- PERIO 5210 - PERIODONTAL INSTRUMENTATION 2
- PERIO 5212 - PERIODONTOLOGY 2
- PROSTD 5211 - FIXED PARTIAL DENTURES I
- PROSTD 5213 - COMPLETE DENTURES I
- PROSTD 5215 - FIXED PARTIAL DENTURES I LAB
- PROSTD 5217 - COMPLETE DENTURES I LAB

Second Year-Spring Term

- DENT 5242 - DIAGNOSIS AND TREATMENT PLANNING 2
- DENT 5248 - QUALITIES OF A GENERAL DENTIST 5
- DIASC 5241 - RADIOLOGY, IMAGING AND INTERPRETATION I
- DSANE 5241 - ANESTHESIA I: LOCAL ANESTHESIA
- DSANE 5245 - LOCAL ANESTHESIA TECHNIQUE LAB
- ENDOD 5247 - ENDODONTICS II LAB
- ENDOD 5252 - ENDODONTICS II
- ODO 5242 - INTRODUCTION TO ORTHODONTICS
- ORBIOL 5244 - CRANIOFACIAL GENETICS
- ORSUR 5241 - ORAL SURGERY I
- PEDENT 5242 - PEDIATRIC DENTISTRY II LAB
- PEDENT 5253 - PEDIATRIC DENTISTRY II
- PERIO 5243 - PERIODONTAL CLINIC
- PROSTD 5241 - REMOVABLE PARTIAL DENTURES
- PROSTD 5245 - REMOVABLE PARTIAL DENTURES LABORATORY
- PROSTD 5251 - FIXED PARTIAL DENTURES II
- PROSTD 5256 - FIXED PARTIAL DENTURES II LAB
- RESTD 5244 - GERIATRICS
Second Year-Summer Term

- CDENT 5281 - SCOPE 1
- CDENT 5282 - CLINICAL APPLICATION OF PROBLEM-SOLVING SKILLS
- DENT 5278 - QUALITIES OF A GENERAL DENTIST 6
- DENT 5283 - DIAGNOSIS AND TREATMENT PLANNING 3
- DSANE 5272 - ANESTHESIA 2: MEDICAL EMERGENCIES
- ODO 5275 - INTRODUCTION TO ORTHODONTICS LAB
- ORSUR 5282 - ORAL SURGERY 2
- PROSTH 5271 - DIGITAL DENTISTRY 1
- PROSTH 5273 - FIXED PARTIAL DENTURES 3
- PROSTH 5276 - FIXED PARTIAL DENTURES 3 LABORATORY
- PROSTH 5282 - COMPLETE DENTURES 2
- RESTD 5281 - PRINCIPLES OF OPERATIVE DENTISTRY 3

Third Year-Fall Term

- DENT 5310 - SPECIAL NEEDS DENTISTRY
- DENT 5313 - ONGOING PERFORMANCE EVALUATION 1
- DENT 5318 - QUALITIES OF A GENERAL DENTIST 7
- DIASCI 5320 - MANAGEMENT OF DENTAL EMERGENCIES
- DSANE 5311 - PATIENT MANAGEMENT: ENTERAL SEDATION
- DSANE 5313 - ANESTHESIA 3: PAIN AND ANXIETY CONTROL
- DSANE 5315 - NITROUS OXIDE LAB
- DSANE 5317 - ADVANCED LOCAL ANESTHESIA TECH LAB
- ENDOD 5313 - ENDODONTICS 3
- ODO 5319 - CLINICAL ORTHODONTICS
- ORSUR 5313 - ORAL SURGERY 3
- ORSUR 5314 - PHYSICAL DIAGNOSIS AND EVALUATION
- PEDENT 5315 - PEDIATRIC DENTISTRY 3
- PROSTH 5311 - IMPLANTOLOGY 1

Third Year-Spring Term

- CDENT 5342 - INTRODUCTION TO BEHAVIORAL DENTISTRY
- DENT 5348 - QUALITIES OF A GENERAL DENTIST 8
- DENT 5353 - ONGOING PERFORMANCE EVALUATION 2
- DIASCI 5341 - SEMINARS IN ORAL PATHOLOGY AND ORAL MEDICINE
- DSANE 5342 - CLINICAL MEDICINE
- DSANE 5344 - MEDICAL EMERGENCIES - WISER CENTER
- ORBIOL 5340 - CURRENT TOPICS IN ORAL HEALTH RESEARCH
- ORSUR 5344 - ORAL SURGERY 4
- PERIO 5343 - PERIODONTOLOGY 3
- PROSTH 5346 - IMPLANTOLOGY 2
- PROSTH 5348 - DIGITAL DENTISTRY 2
- RESTD 5342 - PRACTICE ADMINISTRATION

Third Year-Summer Term
Advanced Standing (DMD) Program

The University of Pittsburgh School of Dental Medicine is committed to diversity within the dental profession. We have recruited students from more than 20 countries around the globe. Our Advanced Standing students are integrated seamlessly into the predoctoral DMD program and are provided with the same opportunities and incentives as our regular class. We believe in embracing and learning from each other's diverse backgrounds. Our program also provides numerous possibilities for research, community outreach and a personalized educational experience apart from the already rich, holistic and innovative clinical experience that we provide to our students.
Our Advanced Standing Program for dentists holding a dental degree from other countries employs a mandatory two-year curriculum. Qualified Advanced Standing Program students are placed in the First Professional Program (DMD) as third-year dental students following a mandatory summer program, and must complete the third- and fourth-year curriculum as prescribed. No waiver of classes is granted.

Education and Clinical Care

Our comprehensive clinical care model, coupled with evidence-based practice, allows for limitless student experiences. Utilizing advanced technologies, such as simulation patient labs, CBCT imaging, CAD/CAM, implants, 3D printing and more, provides unlimited opportunities which are student driven and faculty guided. With all eight specialty training programs, plus the country's flagship dental anesthesiology program, students are trained by experts in these specific fields while enjoying a low student to faculty ratio and a collaborative Pitt Dental Family atmosphere. Additionally, students gain valuable experience in our renowned Center for Patients with Special Needs and Multidisciplinary Implant Center. Students also may choose to pursue various certificates ranging from dental public health to academic dentistry. Being a part of one of the oldest programs in the country with a strong alumni base and support, students have the prerogative to participate in mentoring experiences, leadership possibilities, and many other social activities.

The University of Pittsburgh School of Dental Medicine participates in the Centralized Application for Advanced Placement for International Dentists (CAAPID) program. The deadline for application is July 5 of the year prior to starting the program. Applications for the Advanced Standing Program that are sent directly to the University of Pittsburgh will not be accepted. Please visit the CAAPID website for specific information.

For detailed information about the program and application requirements and processes, please visit our website. If you have questions, please email us at kaa77@pitt.edu.

About the School

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull. Every day, the positive contributions of our faculty, staff, residents and students—the Pitt Dental Medicine family—demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Other Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the Graduate School of Public Health; and bachelor of science (BS).

The four-year Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.
The Oral Biology Program (MS and PhD) encompasses the study of fundamental biological phenomena related to the development, structure, and function of the craniofacial region as well as the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area with the aim of improving health. Current research focuses involve craniofacial regeneration and genetics.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The interprofessional educational experiences within the school’s specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education.

### Research Strengths

Pitt Dental Medicine is ranked 7th nationally for NIDCR research funding. Students have the opportunity to participate in innovative research involving craniofacial and dental genetics, craniofacial regeneration, informatics, caries research, the county's first DNA registry and repository obtained from saliva samples, and many clinical and translational projects.

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

#### Identification

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

#### Treatment

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

#### Application

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

### Advanced Standing Curriculum

Advanced Standing students are required to take a summer course before they join other DMD students in their third and fourth years. Learn more about the third- and fourth-year curriculum for Predoctoral DMD students.

### Advanced Dental Education and Residency Programs

The School of Dental Medicine offers ten Advanced Dental Education and Residency Programs leading to a Certificate of Completion in the respective program. Programs of three-year duration offer an optional educational tract leading to a Master of Dental Science degree (MDS).

All residents in the various specialties begin their advanced education by studying a core curriculum. It includes, but is not limited to, an orientation program; Clinical Operations; BLS Certification; Infection Control Policies and Procedures; Chemical Dependency; Hospital Protocols and Procedures; Conferences / Classes; Advanced Oral Pathology; Applied Head and Neck Anatomy; Clinical Pharmacology; Intravenous and Inhalation Sedation; Management of Medical Emergencies; Mineralized Tissue Biology; Multidisciplinary Treatment Planning Grand Rounds; Oral and Maxillofacial Radiology and Imaging; Pathobiology and Immunology; and Research Design and Methodology.

Details about the residency programs at Pitt Dental Medicine is available on our website at [dental.pitt.edu/advanced-dental-education-residency-programs](dental.pitt.edu/advanced-dental-education-residency-programs).

**General Dentistry and Specialty Clinics**

The School of Dental Medicine provides clinical education and patient care through 15 dental clinics encompassing general dentistry, anesthesiology, special needs, emergency, endodontics, implants, oral and maxillofacial pathology, oral and maxillofacial surgery, orthodontics and dentofacial orthopaedics, pediatric dentistry, periodontics and preventive dentistry, dental hygiene, endodontics, prosthodontics, radiology, and restorative dentistry/comprehensive care.

**Clinical Centers**

The Multidisciplinary Implant Center focuses on patient care, teaching, and research related to the treatment of tooth loss and the functional bone and soft tissue deficits that can follow tooth loss.

The Center for Patients with Special Needs was established by Dean Thomas W. Braun as a school priority to centralize and increase treatment capacity for patients with physical, developmental, neurological, and intellectual disabilities.

University Dental Health Services (UDHS) is a legally separate nonprofit practice plan that is closely affiliated with the School of Dental Medicine. UDHS providers are full- or part-time faculty members, many of whom are board-certified specialists and nationally recognized experts in their respective fields.

**Research Strengths**

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

**Identification**

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

**Treatment**

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

**Application**

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

**All Residency Programs Core Courses**
Advanced Education in General Dentistry

The University of Pittsburgh's Advanced Education in General Dentistry (AEGD) Program was established in 1989. The one-year long program is fully accredited, enrolls two students per year, and begins on July 1 of each year. We welcome students from diverse backgrounds. Residents for the 2016-17 program year are alumni of the University of Pittsburgh School of Dental Medicine.

The program follows the School of Dental Medicine's academic calendar and daily schedule, including patient appointments on Tuesday evenings. There are no weekend rotations, but a 24-hour on call schedule is maintained for the School of Dental Medicine. There is a roughly, two-week break at the end of December and approximately 10 paid holidays and 10 paid days off during the one-year residency.

The AEGD resident participates with the other post graduate residents at the School of Dental Medicine in the required post graduate core curriculum plus they both attend and present at seminars held in the school. AEGD Residents are encouraged to document patient cases using the fully equipped digital camera maintained in the AEGD clinic. The didactic program constitutes approximately 15% of the total experience. There is a rotation through the Implant Center which provides both clinical and didactic experience in the placement and restoration of dental implants. AEGD Residents rotate through the Center for Patients with Special Needs to provide treatment to patients using a variety of behavioral and pharmacological techniques. In conjunction with the School's Department of Anesthesiology, residents treat patients using intravenous sedation, nitrous oxide and/or general anesthesia. Residents receive the instruction to become eligible for an Anesthesia Restricted Permit II, allowing them to administer nitrous oxide in the Commonwealth of Pennsylvania.

Program Goals

The Advanced Education in General Dentistry (AEGD) program at the University of Pittsburgh School of Dental Medicine provides training to the recent graduate in clinical dentistry and applied basic science beyond the pre-doctoral level, and it refines and enhances those skills necessary for the generalist to provide comprehensive patient care for all population groups. It is also designed to instill confidence in the new dentist to allow him/her to become a leader in the general dental community.

The overall goals of the program are:

1. Enhance the resident's competence and confidence in the various clinical disciplines, which are integral components of general dentistry.
2. Enhance the resident's clinical judgment and develop general dentists with a broad knowledge of dental medicine and related interdisciplinary subjects.
3. Enhance the resident's ability to interact with all health practitioners involved in comprehensive patient treatment - both medical consultations and appropriate consultations and referrals to dental specialists.
4. Enhance the resident's understanding of and provide experience in practice administration, including communication skills, practice management, psychological aspects of patient management, risk management and quality assurance activities.
5. Prepare the residents to become general dentists to practice, teach, and be involved in academic presentations in general dentistry.
6. Develop general dentists who will have a thorough knowledge of the basic and clinical aspects of general dentistry and who will also have the skills and abilities to treat patients who present complex and unusual treatment needs.
7. Understand the oral health needs of communities and engage in community service through the provision of treatment to patients with special needs and underserved populations.
8. Develop General Dentists that demonstrate principles of ethical reasoning, ethical decision-making, and professional responsibility as they pertain to the academic environment, research, patient care, and practice management.

Detailed information about requirements and application for the program are available at dental.pitt.edu/aegd

Dental Anesthesiology Certificate
The Department of Dental Anesthesiology directs and coordinates the three-year, CODA accredited, dental anesthesiology residency program. The goal of this program is to prepare dentists to manage pain and anxiety in adult, pediatric and special needs patients by using pharmacologic and non-pharmacologic techniques. A significant portion of the University of Pittsburgh School of Dental Medicine Residency Program in Dental Anesthesiology is a unit of the medical anesthesiology residency program, administered through the UPMC Medical Education Program (UPMC-MEP). At the conclusion of the program, the dentist will earn a certificate in dental anesthesiology and be proficient in providing all levels of anesthesia services for ambulatory patients undergoing a variety of medical and dental procedures. A maximum of four dental anesthesiology residents are selected each year. They have the same responsibilities and are expected to meet the same competencies as medical residents. Residents in dental anesthesiology have standard postgraduate salaries and benefits.

Residents in the Dental Anesthesiology Residency Program may elect to pursue a master of dental science degree (MDS) alongside their certificate. Eligible residents who elect this option must pass the Master of Dental Science Entrance Examination and enroll in the tract with the Pitt Registrar's Office. Please talk with the dental residency program administrator for details.

Program Description by Year

The first year of the resident's clinical experience begins at the dental school with the resident attending all introductory courses and conferences in anesthesiology intended for post-graduate first-year residents. The dental resident becomes familiar with the anesthetic management of patients undergoing an array of dental procedures, including pediatric, special needs, oral surgery and implant surgery. Within this first year, one month, each, is devoted to training in Internal Medicine, Intensive Care Medicine, Emergency Medicine, and Cardiology.

The second and third years of the residency continue with rotations through UPMC Presbyterian and Montifiore Hospitals, UPMC St. Margaret's, Children's Hospital of Pittsburgh of UPMC, and Magee-Womens Hospital of UPMC. During this rotation cycle, residents will participate in the anesthetic management of patients undergoing general surgery, complex head and neck procedures, orthopedic surgery, and transplantation operations. Three months at UPMC St. Margaret's will provide experience in a high-paced operating room that prepares the resident for private practice. Regional anesthesia and advanced pain management techniques are also developed. Children's Hospital of Pittsburgh of UPMC offers a diversity of experiences in managing the anesthetic requirements of children of all physical sizes and ages who are undergoing a wide variety of surgical procedures. Magee-Womens Hospital of UPMC gives the resident an opportunity to learn about epidural and spinal anesthesia techniques intended for obstetric procedures along with general surgery experience in the hospital operating rooms. Magee-Womens Hospital of UPMC utilizes an after-hours call schedule. The resident serves at the University of Pittsburgh School of Dental Medicine one day per week in the winter months, providing clinical care and lectures in the management of medical emergencies in the dental setting to post-graduate dental specialty students.

During the final three months, residents devote time to completing research projects, providing clinical anesthesia care, and teaching concepts of outpatient anesthesia to pre-doctoral students.

A focus of the training includes developing skills in the management of special needs patients receiving dental care. The University of Pittsburgh School of Dental Medicine has an active Center for Patients with Special Needs that provides the resident with a unique opportunity to provide anesthesia services to this underserved population. Residents will take part in regular journal reviews of current literature and a structured lecture series in anesthesiaology. In addition, residents are expected to attend at least one national conference per year and initiate work on a mentored clinical research project.

The applicant must submit the American Dental Education Association Postdoctoral Application Support Service (ADEA PASS) application and register for the Match Program.

Learn more about requirements and application to the program by visiting dental.pitt.edu/dental-anesthesiology

The advanced education in general dentistry program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx. The Commission on Dental Accreditation has accredited the postdoctoral program in advanced education in general dentistry. However, this education area is not one of the American Dental Association (ADA) recognized dental specialty areas. Therefore, dentists graduating from this program cannot announce that they are specialists, as recognized by the American Dental Association.

Endodontics Certificate
The University of Pittsburgh School of Dental Medicine's Endodontic Residency Program was initiated by Dr. Andrew Michanowicz in May, 1969. This fully accredited two-year program enrolls four students per year. Residents start their program on July 1 of each year.

Throughout the years, the Endodontic Residency Program has continuously incorporated the latest innovations in the field. The use of endodontic microscopy is the standard for each procedure. Residents are expected to have a working knowledge and experience with different file systems from various companies. Each resident has their own ultrasonic and advanced irrigation devices.

Research opportunities in several fields are available. The residents have the opportunity to work with National Institute of Health (NIH) funded researchers. Projects regarding microCT, bone biology, and craniofacial regeneration are available for resident participation.

The program helps the residents develop knowledge regarding every aspect of endodontics and prepares them to become members of the American Board of Endodontics.

On average, residents complete at least 350 cases prior to graduation. Cases include standard root canal therapy, retreatments, endodontic microsurgery, and pulpal regeneration.

Overall, the Endodontic Residency Program prides itself in helping residents develop and master endodontic skills while simultaneously identifying and pursuing avenues of interest in relevant basic science and endodontic technology.

Application

Applications are processed using ADEA Postdoctoral Application Support Service (PASS), or the self-managed application. A fee of $50 is charged to those who chose to use the self-managed application. The application deadline is Sept. 2nd of the previous year. Interviews will be granted on a rolling basis.

For more information, please visit dental.pitt.edu/endodontics-residency

The advanced specialty education program in endodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

General Practice Residency

The General Practice Residency (GPR) Program, sponsored by the University of Pittsburgh Medical Center (UPMC), offers a one-year program that provides residents with postdoctoral clinical and didactic experiences. Based in the UPMC Montefiore Dental Center on the UPMC Presbyterian/Shadyside Campus, the program enrolls a combined total of three (3) residents each year. Residents completing the GPR earn a certificate of training.

Guided by the philosophy that oral health is an integral and interactive aspect of total health, residents engage in approximately nine months of comprehensive dental care. The remaining three months are spent on rotations in anesthesia, emergency medicine, head and neck radiology, and oral and maxillofacial surgery.

In addition to intensive exposure to hospital-based dentistry, the program provides clinical and didactic training across a range of dental specialties, including endodontics, periodontics, implant dentistry, prosthodontics, oral and maxillofacial surgery, oral pathology/oral medicine, orthodontics, pediatric dentistry and treating patients with special needs. Instruction is also provided in ancillary topics pertinent to dental practice, such as patient evaluation and physical examination, emergency medical care, inpatient care and hospital organization, and a multitude of other medical and dental subjects.
Throughout the program, residents focus on the attainment of several objectives, all of which are derived from the Commission on Dental Accreditation's Standards for Advanced Education Programs in General Practice Residency. Upon completion of the program, General Practice residents are prepared to:

- Act as primary care providers, delivering emergency and comprehensive oral health care which is patient-focused and coordinated across disciplines;
- Use advanced dental treatment modalities;
- Direct health promotion and disease prevention activities;
- Function effectively in hospital and non-hospital health care environments;
- Function effectively as members of multi-disciplinary teams;
- Apply scientific principles to learning and oral health care, which entails thinking critically, making evidence/outcomes-based clinical decisions, and utilizing technology-based information retrieval systems;
- Engage in research, scientific writing, and presentations in order to advance dental medicine;
- Adopt a system of values that emphasizes lifelong learning, patient-centered care, exercise of professional ethics, adaptability, and acceptance of cultural diversity among patients and colleagues;
- Understand public oral health needs and practice community service.

While in the program, residents receive UPMC Health System's postgraduate trainee stipend. Those interested in making application to the program may do so through the American Dental Education Association's Postdoctoral Application Support Service (PASS).

For additional information, please visit dental.pitt.edu/gpr

The advanced education in general dentistry program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Oral and Maxillofacial Pathology

The School of Dental Medicine Department of Diagnostic Sciences Residency Program in Oral and Maxillofacial Pathology is a 3-year residency certificate program offered through the University of Pittsburgh Medical Center Medical Education (UPMCMEE). This program is fully accredited by the Commission on Dental Accreditation. The program will accept a maximum of two residents a year. Successful completion of the program will lead to a certificate in Oral and Maxillofacial Pathology and will qualify the graduate to sit for the specialty board examination in Oral and Maxillofacial Pathology.

Curriculum

Faculty members are certified by their specialty boards of Oral and Maxillofacial Pathology, Oral and Maxillofacial Radiology, Oral Medicine, or Anatomic Pathology, and possess a wide range of clinical, teaching, research, and surgical pathology experience. The residency program offers a mix of didactic courses, electives, microscopic general and oral pathology, clinical oral pathology, oral and maxillofacial radiology, head and neck pain, hospital rotations, and research. Clinical patients are seen at the University of Pittsburgh School of Dental Medicine and though the faculty practice plan at the University Dental Health Services, Inc., as well as during the rotation in dermatopathology.

Rotations

Most pathology rotations take place at UPMC-Presbyterian Hospital, in the Oakland section of Pittsburgh, across the street from the University of Pittsburgh School of Dental Medicine. UPMC is a major regional, tertiary care and transplant center that will expose the resident to a large volume and a wide variety of experiences. Rotations include three 4-week rotations in head and neck anatomic pathology, 6 weeks in dermatopathology, 4 weeks in hematopathology-lymph node, 2 weeks in immunopathology, and 2 weeks in autopsy, with additional opportunities in gastrointestinal pathology ("GI quicks"), thoracic pathology, bone and soft tissue pathology, pediatric pathology, and molecular pathology. The program allows some flexibility for the resident to concentrate on a particular area of oral and maxillofacial pathology.

More information including requirements and making an application to the program are available by visiting dental.pitt.edu/omp-residency
The program in dental education is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is http://www.ada.org/100.aspx.

Oral and Maxillofacial Surgery

The Department of Oral and Maxillofacial Surgery (OMS) at the University of Pittsburgh School of Dental Medicine offers a six-year, dual-degree program, and a four-year program. Three residents are accepted each year (two six-year positions and one four year position), and they commence training as interns in the department. In the six-year, dual-degree program, two residents join their corresponding medical school class in the spring of the first year. These residents earn a medical degree and participate in advanced surgical training in oral and maxillofacial surgery, spending a total of 33 months on the oral and maxillofacial surgery service. The four-year program offers a total of 33 months on the oral and maxillofacial surgery service and rotating on medicine, surgery and anesthesia services the other 15 months. The department's graduates have accepted positions in both outstanding surgical practices and university attending positions at major medical centers throughout the United States.

Eight full-time oral and maxillofacial surgery faculty members, as well as part-time faculty and private practice oral and maxillofacial surgeons from the Pittsburgh area, provide surgical training and mentoring. The School of Dental Medicine has, on-site, a modern ambulatory surgical suite with full anesthesia support and facilities that enhance caseload and outpatient surgical management. The department provides instruction in anesthesia, dentoalveolar surgery, dental implants, head and neck pathology, cleft and craniofacial disorders, craniofacial trauma, and head and neck anatomy.

The program is designed to be truly "integrated" and allow for the maximal benefit of coordinated medical training, and progression of knowledge and skill in oral and maxillofacial surgery. Residents are exposed to the full scope of oral and maxillofacial surgery throughout their training-including interdisciplinary care. From day one, new residents work with first professional dental students in a training and supervisory role in the undergraduate OMS clinic. They are involved in managing emergency cases at the UPMC Montefiore Dental Center and in assisting the surgical faculty in the operating rooms of UPMC Presbyterian/Shadyside, Mercy Hospital, and Children's Hospital of Pittsburgh of UPMC. During the entire final year of the program, the chief residents devote a full 12 months to the OMS service, working with an enviable surgical caseload. Residents are also required to attend the Department of Oral and Maxillofacial Surgery Grand Rounds, Journal Club, treatment planning conferences in the Dentofacial Deformities Program (in conjunction with the Orthodontic Program), and the weekly Surgical Treatment Planning and Trauma Conference.

Application

The annual application deadline is September 1 of the preceding year. Late applications will not be accepted. Applicants must graduate from an ADA-accredited dental school, must apply through the ADEA Postdoctoral Application Support Service (PASS), and must participate in the Postdoctoral Dental Matching Program (MATCH).

Interview and Selection

Applicants are screened for interviews that occur in November and December of each year. In late January, through the MATCH Program, two applicants are selected to matriculate into the first year of residency, which commences in late June. Applicants matched to the University of Pittsburgh are enrolled in both the Department of Oral and Maxillofacial Surgery residency and the University of Pittsburgh School of Medicine.

For additional information, please visit dental.pitt.edu/oms-residency

The Department of Oral and Maxillofacial Surgery adheres to the University of Pittsburgh's non-discrimination policy.

The advanced specialty education program in oral and maxillofacial surgery is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation
Orthodontics and Dentofacial Orthopedics Certificate

The Orthodontics and Dentofacial Orthopedics Advanced Dental Education/Residency Program at the University of Pittsburgh School of Dental Medicine requires a three-year course of study. The goals of the program are to provide an excellent advanced education in the specialty of orthodontics and dentofacial orthopedics, to provide high quality clinical care, and to conduct research designed to advance the knowledge of the specialty. The curriculum reflects this mission and provides residents with the necessary knowledge and experience to enter the specialty well prepared for practice. The curriculum is based upon a solid foundation of scientific principles and methods that residents may use as a rational framework for understanding treatment and evaluating future changes in the specialty. The application of basic and clinical scientific knowledge to the practice of orthodontics is the fundamental tenet of the curriculum.

Successful completion of the program leads to a certificate in orthodontics and dentofacial orthopedics, and enables graduates to participate in the American Board of Orthodontics certifying examination. Students may also pursue a course of study leading to a Master of Dental Science degree in Orthodontics and Dentofacial Orthopedics.

Components of the program are:

- Clinical training which prepares the resident for specialty board certification
- Education from a broad curriculum, which provides residents with greater insight on the nature of orthodontics
- Research to enrich the profession and develop critical thinking skills

The curriculum for the Orthodontics and Dentofacial Orthopedics Residency Program is designed to be taught at the postdoctoral level. The path of study followed by the residents comprises a core curriculum of graduate level basic sciences, followed by a broad course of study in craniofacial biology, clinical sciences, and orthodontic techniques. A significant portion of the curriculum is devoted to clinical orthodontics, allowing the resident to develop proficiency through a broad, diverse experience in patient care.

Conferences provide an excellent foundation in the basic and clinical sciences and provide opportunity for study in growth and development, dental statistics, occlusion and malocclusion, development of the dentition, dentofacial abnormalities, biomechanical orthodontics, genetics, bone biology, cephalometrics, diagnosis and treatment planning, evidence-based care, surgical orthodontics, practice management, and orthodontic technique. Orthodontic conferences and literature review sessions provide opportunities for critical analysis of historical and current literature with application to contemporary orthodontic principles in case diagnosis and treatment planning.

Scholarly activity in the form of basic or clinical research is a fundamental component of the curriculum. Residents design, implement, and complete a research project that provides greater knowledge of the specialty and permit residents to develop the ability to apply the scientific method.

Applicants must apply through the Postdoctoral Application Support Service (PASS). Four residents are accepted each year, and all positions are awarded through the Postdoctoral Dental Matching Program in the Phase I (fall) match. The program is fully accredited by the Commission on Dental Accreditation.

Read more about the Orthodontics and Dentofacial Orthopedics Residency Program by visiting dental.pitt.edu/ortho-residency.

Pediatric Dentistry Certificate

The Department of Pediatric Dentistry offers a two-year residency program resulting in a Certificate in Pediatric Dentistry. Residents are trained in the advanced diagnostic and clinical techniques necessary to provide specialty care to children, adolescents, and individuals with disabilities. Residents are eligible to participate in the American Board of Pediatric Dentistry certification examinations, upon successful completion of the Program.
All facilities within the School of Dental Medicine are available for resident use, and there is a vast Health Science Center Library system housed in the medical school directly across the street from the School of Dental Medicine.

**Rotations**

Rotations are scheduled at Children's Hospital of Pittsburgh of UPMC and UPMC Presbyterian Hospital.

The following rotations are completed at Children's Hospital of Pittsburgh of UPMC:

- Pediatric Medicine
- Anesthesiology
  - Hospital Based Operating Room
  - Hospital Grand Rounds

Advanced Pediatric Dentistry residents also rotate through the Pre-doctoral Pediatric Dentistry Clinic and the Preclinical Simulation Clinic to provide instruction and clinical supervision to pre-doctoral dental students.

Applications to the Department of Pediatric Dentistry Residency Program must be filed through the Postdoctoral Application Support Service (PASS) and the Postdoctoral Dental Matching Program (MATCH).

Applications are due by **October 1** of the preceding year.

For additional information about the residency program in pediatric dentistry, including how to apply, please visit [dental.pitt.edu/pediatric-dentistry-residency](dental.pitt.edu/pediatric-dentistry-residency)

*The advanced specialty education program in pediatric dentistry is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is [http://www.ada.org/100.aspx](http://www.ada.org/100.aspx).*

**Periodontics Certificate**

The residency in periodontics is a three-year certificate program. Each resident is exposed to all periodontal diagnostics and therapies and is expected to be competent in all phases of clinical periodontal care. This includes competency in implant therapy and the provision of moderate parenteral sedation. All residents are encouraged to participate in the American Academy of Periodontology board certification process, and to graduate as board-certified periodontist. A master's degree option is available to residents in the Department of Periodontics. Three residents are accepted annually for the three-year program.

Residents in the Periodontics Residency Program may elect to pursue a master of dental science degree (MDS) alongside their certificate. Eligible residents who elect this option must pass the Master of Dental Science Entrance Examination and enroll in the tract with the Pitt Registrar's Office. Please talk with the dental residency program administrator for details.

All residents must be graduates of an accredited U.S. or Canadian dental school. U.S. citizenship is not a requirement.

Applications to the residency program are accepted through the ADEA Postdoctoral Application Support Service (PASS) or the self-managed application through the Office of Residency Education (412-648-8406). Applications are due before August 1 of each year.

Learn more about the Periodontics Residency Program by visiting [dental.pitt.edu/periodontics-residency](dental.pitt.edu/periodontics-residency).

*The advanced specialty education program in periodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is [http://www.ada.org/100.aspx](http://www.ada.org/100.aspx).*
Prosthodontics Certificate

The Advanced Education Program in Prosthodontics is an American Dental Association-accredited three-year certificate program with the option to complete a master's degree. Students who pursue a master's degree will receive their MDS upon completion of the extra required didactic courses within the three year limit. The Program's didactic and clinical components are designed to train and equip the graduate to transfer new prosthodontic knowledge and approaches, to implement evidence-based prosthodontic decision-making in clinical practice, and to prepare for certification by the American Board of Prosthodontics.

Residents in the Prosthodontics Residency Program may elect to pursue a master of dental science degree (MDS) alongside their certificate. Eligible residents who elect this option must pass the Master of Dental Science Entrance Examination and enroll in the tract with the Pitt Registrar's Office. Please talk with the dental residency program administrator for details.

Objectives

The objectives of the residency program in the Department of Prosthodontics are to:

Provide clinical training in all aspects of prosthodontics including:

- clinical experiences to ensure proficiency in all aspects of prosthodontics;
- clinical experiences to ensure proficiency in diagnosis, treatment planning, and management of multi-disciplinary cases;
- to recruit and retain faculty with broad and varying backgrounds in clinical prosthodontics, who espouse diverse philosophies in patient care and prosthodontic procedures, and effectively communicate their knowledge and skills to residents.

Provide biologically and scientifically based education in order to:

- develop, monitor, and update all prosthodontic seminars and conferences to present contemporary, technologically, and biologically-oriented information;
- provide opportunities for scholarly activities, applied research, scientific articles, and clinical and/or research presentations.

Prepare and train residents for a career in prosthodontic practice and/or academics to:

- require all residents to complete annual comprehensive examinations (ACP Annual Board Review Examinations);
- provide opportunities for completion of a treatment case suitable for presentation to the American Board of Prosthodontics;
- provide residents with opportunities to pursue academic degree(s) in related disciplines.

Provide quality and professional care to all patients to:

- ensure ethical and professional conduct by all individuals involved in patient care;
- ensure proper care of all patients in the prosthodontic residency program;
- ensure patient satisfaction with the care they receive.

Program Requirements

The program's clinical components focus on diagnosis, treatment planning, and treatment of edentulous, partially edentulous, and completely edentulous patients. Fixed, removable, and implant prosthodontics constitute the major portion of the clinical training, with occlusion, temporomandibular disorder, and geriatrics as integral components of all phases of care. Residents are required to manage and treat patients requiring complete dentures, removable partial dentures, fixed partial dentures, and implant restorations. Clinical training for residents in implant dentistry emphasizes all aspects of implant treatment including implant placement. Additionally, the program requires the resident's involvement in the treatment of patients with congenital and acquired defects.

To learn more about the Residency Program in Prosthodontics, please visit dental.pitt.edu/prosthodontics-residency
The advanced specialty education program in prosthodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission’s web address is http://www.ada.org/100.aspx.

Oral Biology Program (MS and PhD)

The School of Dental Medicine Department of Oral Biology Graduate Program offers basic, translational, and clinical studies in oral biology, biomedical research and health that span spatial scales from the molecular and cellular levels to the whole organism level. Studies include fundamental biological phenomena related to the development, structure, and function of the craniofacial region and the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area. The Graduate Program provides a stimulating and collegial environment to prepare motivated and qualified students for careers in academia, industry, and government.

Students may earn Doctor of Philosophy (PhD) and Master of Science (MS) degrees in Oral Biology within one of two research concentrations:

- Craniofacial and Dental Genetics
- Craniofacial Tissue Regeneration

Students will work with faculty in the Department of Oral Biology on research in these concentrations.

The program is open to post-baccalaureate students, pre-doctoral dental students, and dental residents. School of Dental Medicine pre-doctoral students and residents may apply for a dual degree option with the PhD or MS Graduate Programs in Oral Biology. Pre-doctoral dental medicine students may also pursue dual degrees while enrolled in the School of Dental Medicine through collaborative programs with the Graduate School of Public Health, the School of Law, and the School of Education.

Admissions will only be considered for the fall term. However, early applications are encouraged, and offers may be extended to suitably qualified candidates before the application deadline.

To read detailed information about the program options as well as how to apply, please visit dental.pitt.edu/oral-biology-academic-programs.

About the School

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull. Every day, the positive contributions of our faculty, staff, residents and students—the Pitt Dental Medicine family—demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the Graduate School of Public Health; and bachelor of science (BS).
The four-year doctor of Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre doctoral curriculum with the rest of the class.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The interprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education.

Research Strengths

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification
The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment
Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application
The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Oral Biology, PhD Program

The PhD Program requires approximately four to five years to complete and employs a curriculum which is separate from the MS Program. Students may enter the PhD program directly following their undergraduate degree and do not necessarily have to earn a master's degree first. Earning a master's degree can be incorporated into the PhD program without increasing the total length of time in studies.

Requirements for the PhD degree (a total of 72 credits of coursework; 50 didactic and 22 research)

- Scientific ethics/fundamentals of research course;
- Quantitative methods and design course(s) (two for students in the Craniofacial Genetics Tract);
- Written comprehensive examination after the sixth semester (for advancement to PhD candidacy);
- Dissertation proposal defense;
- Approval of a Dissertation Committee and dissertation research; and
- Dissertation defense.

Students must maintain a minimum cumulative GPA of 3.0 in required courses to be eligible to take the comprehensive examinations, as well as to graduate.

Fall Term First Semester

- ORBIOL 3503 - ORAL, TISSUES AND EMBRYOLOGY
- ORBIOL 3504 - JOURNAL CLUB
- ORBIOL 3516 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1
- ORBIOL 3551 - FOUNDATIONS IN DEVELOPMENT, GENETICS AND BIOCHEMISTRY
- ORBIOL 3552 - FOUNDATIONS IN STATISTICS, RESEARCH DESIGN, AND CRITICAL THINKING
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGNESIS
- ORBIOL 3505 - DIRECTED RESEARCH

Spring Term Second Semester

- ORBIOL 3504 - JOURNAL CLUB
- ORBIOL 3546 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 2
- ORBIOL 3553 - FOUNDATIONS IN GENETIC EPIDEMIOLOGY
- ORBIOL 3554 - FOUNDATIONS OF CRANIOFACIAL ANATOMY
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGNESIS
- ORBIOL 3505 - DIRECTED RESEARCH

Summer Term Third Semester

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- ORBIOL 3504 - JOURNAL CLUB
- ORBIOL 3505 - DIRECTED RESEARCH

Fall Term Fourth Semester

- ORBIOL 3603 - HUMAN GROWTH AND DEVELOPMENT
- ORBIOL 3505 - DIRECTED RESEARCH

Spring Term Fifth Semester

- ORBIOL 3508 - CURRENT TOPICS IN ORAL HEALTH RESEARCH
- ORBIOL 3505 - DIRECTED RESEARCH
- ORBIOL 3602 - TMJ REGENERATION AND MECHANICS
- ORBIOL 3509 - COMPOSITION, STRUCTURE, AND FUNCTION OF MINERALIZED TISSUES
- ORBIOL 3512 - CRANIOFACIAL GENETICS

Summer Term Sixth Semester

- ORBIOL 3505 - DIRECTED RESEARCH

Fall Term Seventh Semester

- ORBIOL 2110 - TEACHING PRACTICUM
- ORBIOL 3505 - DIRECTED RESEARCH

Spring Term Eighth Semester

- ORBIOL 3505 - DIRECTED RESEARCH
Summer Term Ninth Semester

- ORBIOL 3505 - DIRECTED RESEARCH

Following Terms Tenth through Twelfth

- ORBIOL 3510 - DISSERTATION RESEARCH

Oral Biology, MS Program

The MS Program requires about two years, but no longer than four, to complete. It is distinct from the PhD Program. MS students may apply to be accepted for the PhD Program once they are accepted into the MS program. If the student is accepted into the PhD program at a later date, courses taken toward the MS will satisfy doctoral degree credit and residency requirements.

Requirements for the MS Degree

- Total of 30 credits (28 didactic and 2 in research);
- Successful completion of core curriculum
- Scientific Ethics/Fundamentals of Research course;
- Quantitative methods and design course(s);
- A one-year research project leading to an master's thesis;
- Defense of the master's thesis before a thesis committee research; and,
- A master's thesis.

Students must successfully complete the first-year required curriculum and receive a grade of B, or better, in all required courses.

A student who earned a master of science degree from another institution may petition the Graduate Studies Committee to waive the preliminary examination.

Fall Term First Semester

- ORBIOL 3503 - ORAL, TISSUES AND EMBRYOLOGY
- ORBIOL 3504 - JOURNAL CLUB
- ORBIOL 3516 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1
- ORBIOL 3551 - FOUNDATIONS IN DEVELOPMENT, GENETICS AND BIOCHEMISTRY
- ORBIOL 3552 - FOUNDATIONS IN STATISTICS, RESEARCH DESIGN, AND CRITICAL THINKING
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENESIS
- ORBIOL 3505 - DIRECTED RESEARCH

Spring Term Second Semester

- ORBIOL 3504 - JOURNAL CLUB
- ORBIOL 3546 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 2
- ORBIOL 3553 - FOUNDATIONS IN GENETIC EPIDEMIOLOGY
- ORBIOL 3554 - FOUNDATIONS OF CRANIOFACIAL ANATOMY
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENESIS
- ORBIOL 3505 - DIRECTED RESEARCH

Summer Term Third Semester
Fall Term Fourth Semester

- ORBIOL 3505 - DIRECTED RESEARCH

Spring Term Fifth Semester

- ORBIOL 3508 - CURRENT TOPICS IN ORAL HEALTH RESEARCH
- ORBIOL 3505 - DIRECTED RESEARCH

Summer Term Sixth Semester

- ORBIOL 3511 - THESIS RESEARCH

All Residency Programs Core Courses

School of Education

Mission

The mission of the School of Education is to create and disseminate knowledge that improves teaching and learning, and to develop and implement effective programs for the preparation of education professionals who will enhance both the practice and outcomes of education.

The School of Education is primarily a graduate school that offers certificate and certification programs and masters and doctoral degree programs. All certificate and certification programs are offered at the graduate level only.

Contact Information

Office of Admissions and Enrollment Services
School of Education
5500 Wesley W. Posvar Hall
412-648-2230
Fax: 412-648-1899
E-mail: soeinfo@pitt.edu
www.education.pitt.edu

Admission

Admission Procedure

Faculty members in the program to which the student applies evaluate the applicant's credentials and recommend admission for those applicants meeting the criteria set by the program.

Approved applicants will be notified of their admission for a specific term and asked to indicate whether or not they accept the offer of admission. Should they be unable to register for courses for the term specified in their admission letter, they should notify the Office of Admissions and Enrollment Services. Approved applicants may defer admission for up to one year from the term specified in their admission letter. Approved applicants unable to register for courses within one year of the term specified in their admission letter must reapply for admission.

Changing Programs for Graduate Study

A student wishing to change programs for graduate study must file a new application for admission, noting the request for the change, in the Office of Admissions and Enrollment Services. All work taken both in undergraduate and graduate study will be reviewed by the program to which the student is applying before a decision will be made about admission to the new program. Any change from one program to another in the School of Education while the student is on active status will not alter that status. Thus, the student must register within the dates set for continuing active students.

Financial Assistance

Financial assistance is available to graduate students through graduate student assistantships (GSA), teaching assistantships (TA), teaching fellowships (TF), graduate student researchers (GSR), a variety of scholarships and fellowships, and loan programs. GSA, TA, TF, and tuition scholarship awards are primarily merit-based. GSA, TA, and TF awards provide a stipend and tuition in return for carrying out assigned duties. (See Teaching and Research Appointments under Financial Aid for further detail.) Other merit-based scholarships and fellowships established through gifts or grants both within and outside the University are also available to students.
Advising

Each student is assigned an academic advisor at the time of admission to a program. All course work scheduled must be approved by the academic advisor, who assists in the preparation of a student's plan of studies and who regularly meets with the student to review the student's academic progress. Most School of Education faculty members are not in residence from May until late August. Thus, students should consult with their academic advisors prior to the end of the Spring term to complete registration forms for the upcoming Summer and Fall terms.

Each graduate student who is completing a master's thesis or doctoral dissertation selects a research advisor to provide guidance during the conduct of the thesis or dissertation research. The research advisor may be the same faculty member as the academic advisor or another faculty member. Whatever the case, the faculty member's consent to serve as the research advisor must be formally obtained. A student continuing from a master's program involving a thesis to a doctoral program may select a different research advisor to provide guidance for the doctoral dissertation.

The student, the advisor, the program, or the department may initiate a change of the academic advisor or the research advisor. Any such change must be made according to applicable departmental policy. Notification of such a change must be sent to the student, to the new and former advisors, and to the Office of Admissions and Enrollment Services.

Commonwealth Teacher Education Certification Programs

Teacher education certification programs are offered in both general and special education.

Option 1. Initial Certification - Available for Primary Plus PreK-4, Teacher of Students with Visual Impairments (TVI) PreK-12, secondary content areas - Math, English, Science and English Education 7-12 and Foreign Language (K-12). These programs result in eligibility for a teaching certification without a graduate degree.

Option 2. Certification Plus a Graduate Degree - for students seeking initial general or special education teacher certification along with a master's degree (e.g., Master of Arts in Teaching [MAT] or Master of Education [MEd]).

Option 3. Dual certification (MOSAIC/CASE) e.g. Secondary Certification and 7-12 special education; PreK-4 and preK-8 special education.

Option 4. Additional Field Certification - for students already certified in one or more teaching fields who are seeking teacher certification in an additional specialty area but who are not pursuing a graduate degree.

Advanced certification programs include:

- Supervisory Certification (e.g., Curriculum and Supervision, Special Education)
- Endorsement (e.g. Autism Endorsement)
- Educational Specialist Certification (e.g., as a reading specialist, TVI, Special Ed Teacher Prep.)
- Administrative Certification (e.g., as a principal, superintendent)

University certificates are awarded to non-degree students who complete commonwealth teacher education certification programs offered in instruction and learning (certificates in teaching or reading specialist) and in administrative and policy studies (certificates in educational administration or educational supervision). Students in these programs must apply for graduation at the beginning of the term in which they expect to complete their programs. Eligibility for the University certificate is verified at the same time that a student's application for commonwealth certification is endorsed by the School of Education and sent to the Pennsylvania Department of Education in Harrisburg.

In addition, a University certificate in orientation and mobility is awarded from the Department of Instruction and Learning to non-degree students receiving vision study certification through the Academy for Certification of Vision Rehabilitation and Education Professionals.

Teacher education certification programs and advanced certification programs are described further in the sections for the departments that offer those programs.

Option 5. Joint Program - Available for students in the MSW/CAST program are eligible for an initial teaching certificate secondary content areas - Math, English, Science and English Education 7-12 and Foreign Language (K-12) paired with and a Masters Degree in Social Work (MSW).
Commonwealth Teacher Education Certification Regulations

The following section details regulations pertaining to the school's teacher education certification programs.

Instructional I and II Certification

The Instructional I, or provisional, certificate is issued by the Pennsylvania Department of Education (PDE) to applicants who:

- possess a baccalaureate degree with a 3.0 grade point average;
- have successfully completed a PDE-approved teacher certification program;
- pass all required PRAXIS, PECT and/or PAPA Examinations; and
- are recommended for certification by the college or university offering the PDE-approved teacher certification program.

An Instructional I certificate is valid for six years.

The Instructional II, or permanent, certificate is issued by PDE to applicants who have completed all of the following:

- A PDE-approved induction program for beginning teachers.
- Three years of satisfactory teaching in the field specified on an Instructional I certificate, attested to by the chief school administrator of the approved public or non-public school in Pennsylvania in which the most recent service of the applicant was performed.
- Twenty-four credit hours of post-baccalaureate study or in-service courses approved by PDE. (Some credits earned beyond the baccalaureate degree in teacher education study at the University of Pittsburgh may be used to satisfy this requirement.)

Applicants already holding the Instructional I certificate who are seeking admission to the School of Education in pursuit of Instructional II certification may be admitted under special graduate status. Applicants desiring to combine Instructional II certification with a master's or doctoral degree must apply for admission to an academic program offering the desired degree.

Additional Field Certification

The School of Education offers additional field certification study opportunities to students already holding a Pennsylvania Instructional I or Instructional II certificate. Students must complete major field prerequisites, course work in the subject area pedagogy, and an advanced teaching practicum (modified student teaching) and pass the PRAXIS or PECT Examination specialization test in the additional area. They must also successfully complete a PDE 430 in the additional area. Individuals who possess an Instructional II certificate and who complete requirements for an additional certification area will receive Instructional II certification in the additional certification area.

Grade Point Average/Academic Probation

All students enrolled for teacher education study are required to maintain a grade point average (GPA) of at least 3.00. The cumulative GPA is based on all course work taken after enrollment for teacher education study. A student is automatically placed on academic probation when the cumulative GPA, exclusive of transfer credits, falls below 3.00. No student on academic probation is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum. Although the credits allowed for acceptable work completed elsewhere by transfer students count toward the total number of credits required for teacher education study, the grades earned in such courses are not included in GPA computations, except in determining GPA's required for admission to the School of Education.

Credit Requirements

Teacher education study in the Instructional I certification program requires the satisfactory completion of a minimum of 30 credits of course work approved by the department and the school. The Master of Arts in Teaching option requires 36 credits. Credit requirements for other certification options vary. Certification by the Pennsylvania Department of Education is recommended only for those students who have satisfactorily completed all courses required for certification with at least a 3.00 GPA.

Teacher Certification Testing Program

The PAPA battery of tests, required for some students seeking their first Instructional I certificate, consists of a series of examinations to assess basic communication skills, general knowledge, professional knowledge, and specialized area knowledge. Persons with an undergraduate degree already holding a Pennsylvania Instructional I or II certificate are exempt from the PAPA series. Individuals seeking Instructional I certification in more than one area must take and pass specialization area tests in all areas in which certification is sought. Individuals seeking additional field certification must pass the PRAXIS Examination in the specialization area.
Students completing an Instructional I certificate in preK-4 education, a certificate in preK-4/preK-8 special education or a secondary/7-12 special education certificate must pass the appropriate PECT tests.

Students may take the PRAXIS Examinations at any point during or after attendance at a post-secondary institution. The tests are administered four times each year at the University of Pittsburgh. Some tests are offered every day (when the testing sites are open) while others are administered during a "testing window" which is usually a two week period, usually occurring monthly. Go to the PRAXIS website for information on registering to take the exams.

Student Teaching

In most programs, field experience in local public schools is required throughout the academic year (August to June). When a student accepts their offer of admission, they are required to complete information about student teaching. Applicants must also submit results from a tuberculin test, child abuse clearance, and criminal history check, as required by Pennsylvania Acts 33 and 34. Students must also submit results from a Federal Criminal History Record check by obtaining fingerprint results through the FBI. Lastly, students must successfully pass an online training, Protecting Children from Abuse and also read the PA Mandated Reporter law and sign to indicate understanding.

Student teaching usually begins in late August and sometimes sooner than the opening day of University classes. Specific procedures and regulations governing student teaching practicum can be found in the student teaching handbook.

Teaching Internship

Students in the Master of Arts in Teaching option must complete an academic year (August to June) teaching internship in lieu of student teaching. The internship requires a minimum of 20 hours per week in the Fall term and 30 hours per week in the Spring and Summer terms. To qualify for the internship and the Pennsylvania Teacher Intern certificate, applicants must:

- As required by Pennsylvania Acts 33 and 34 submit the following clearances: Federal Criminal History Record; Pennsylvania State Criminal Record Check; Pennsylvania Child Abuse History Clearance. If there is a criminal infraction on any of these clearances, school placement for the school is unlikely, which will require the student to withdraw from the class. The University cannot guarantee that a person with entries in their criminal record will be permitted to do assignments in a school. While State law bars certain offenders from schools, districts often impose more extreme requirements. Students who have entries in their records should consult the Coordinator of Clinical Practice on whether a placement will be likely
- pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- satisfy the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)

Students must also submit results from a Federal Criminal History Record check by obtaining fingerprint results through the FBI. Lastly, students must successfully pass an online training, Protecting Children from Abuse and also read the PA Mandated Reporter law and sign to indicate understanding.

Advanced Teaching Practicum

Students in the additional field certification option must complete an advanced teaching practicum, (modified student teaching experience) which vary based on the program requirements. Students must file an application for advanced teaching practicum in the Office of Teacher Education, 5300 Wesley W. Posvar Hall, during the term prior to the practicum. Specific guidelines governing advanced teaching practicum are available in the Office of Teacher Education, 5300 Wesley W. Posvar Hall.

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.
Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Academic Regulations:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Grade Point Average/Academic Probation

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures
at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

Psychological Perspectives on Education

EDUC 2000 Psychology of Learning and Development for Educators
EDUC 2007 Human Learning
EDUC 2008 Conception to Early Childhood in Social Context
EDUC 2009 Development: Middle Childhood/Adolescence

Social and Cultural Perspectives on Education

EDUC 2100 Education and Society
EDUC 2102 History of Education
EDUC 2103 Race and Racism in Education and Society
EDUC 2104 Leadership for Service-Learning
EDUC 2105 Sociology of Education
EDUC 2106 Education and Culture
EDUC 2107 Evidence Based Health Program Planning
EDUC 2108 State/National Politics of Education
EDUC 2109 Anthropology of Education
EDUC 2110 Gender and Education
EDUC 2111 Contemporary Philosophy of Education
EDUC 2112 Politics and History of Higher Education
Research Methods

EDUC 2200 Disciplined Inquiry*

EDUC 2201 Introduction to Research Methodology

EDUC 2202 Educational and Psychological Measurement

EDUC 2205 Field Methods

*Enrollment limited to MAT students

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also "Master of Arts and Master of Science Degrees" - "Comprehensive Examination" under Regulations Pertaining to Master's Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
• if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Doctoral Degree General Requirements (EdD and PhD)

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Doctoral Programs

Doctor of Education (EdD) and Doctor of Philosophy (PhD) degree programs are offered by the School of Education to provide advanced graduate study and professional specialization in education. Each recipient must show evidence of superior scholarship, mastery of a special field of knowledge, and ability to do significant and relevant research. In doctoral study in the School of Education, a distinction is made between the preparation of education professionals resulting in the EdD degree and the preparation of education professionals resulting in the PhD degree. While EdD and PhD degrees produce experts in critical inquiry, the School of Education distinguishes the degrees according to, among other factors, the focus of the area of inquiry, the type of knowledge advanced, and the career path chosen by the individual student.

PhD research focuses on the study of basic problems arising primarily from behavioral and social science theory with the goal of advancing such theory and knowledge. Individuals pursuing this degree often seek academic positions in universities or research institutes. EdD research focuses on the study of applied, practical problems with the goal of contributing to solutions. Careers for these individuals often center on professional positions as administrators, curriculum developers, or specialists in schools and clinical settings.

Credit Requirements

Doctoral degrees require a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Generally, courses numbered below 2000 do not meet the minimum
requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree.

**Grade Point Average/Academic Probation**

All students enrolled in doctoral degree programs are required to maintain a grade point average (GPA) of at least 3.300. The cumulative GPA is based on all course work taken after enrollment in the appropriate doctoral program. A student is automatically placed on academic probation when the cumulative GPA after 9 credits or more, exclusive of transfer credits, falls below 3.300. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.500 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

**Leave of Absence**

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

**Academic Integrity Policy**

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

**Doctor of Education Specific Requirements**

The three-year structured EdD program is built on a cohort model and is goal driven. The cohort of students admitted complete a three-year 90-credit program, which includes 30 credits transferred from a relevant master's degree.

While a vast majority of EdD experiences are shared (common coursework, internship experiences, and common outcome metrics) students pick one of the following areas of concentration:

1. Education Leadership
2. Health & Physical Activity
3. Higher Education Management
4. Language, Literacy & Culture
5. Out of School Learning
7. Social and Comparative Analysis in Education
8. Special Education

EdD students take eight core courses (24 credits). This includes four courses (12 credits) focused on building foundational knowledge and four courses (12 credits) specifically focused on research and methodology. Candidates will also develop specialized knowledge in their area of
concentration through course projects, relevant internships, and four 3000 level courses (12 credits). Students take six credits each term, making them part time students throughout the duration of the program.

Coursework will be offered by alternative delivery models. Week-long intensive on-ramp experiences, hybrid seminars, week-long intensive institutes, cross-disciplinary research seminars, and aspirant internships are available. Integrating diverse learning environments offers a range of structures and opportunities for doctoral students and faculty to form and access "communities of practice" face-to-face in a classroom or via CourseWeb (discussion boards, wikis, blogs, Skype, FaceTime, Google Hangouts, etc.). Communities of practice are intentionally created collaborative learning environments that extend and enrich intellectual discourse within a socially constructed space. This flexible structure is especially important for part time doctoral students to thrive as scholarly practitioners.

A school-wide EdD admissions Committee reviews all applications for the EdD degree program. The prospective concentration advisor also reviews the application to affirm the match between student and faculty interests. A 3.5 master's GPA is recommended and GRE scores are not required. For international students a TOEFL score of 100 on the internet-based test with a minimum of 21 on each subtest, 240 on the computer-based test, or 600 on the paper-based test. Interviews will be conducted.

**Plan of Studies**

Prior to advancement to the formal stage called Doctoral Study, the student, in consultation with the academic advisor, must complete a plan of studies that conforms to program requirements. The plan of studies, approved by the academic advisor, the program coordinator, and department is filed in the Office of Admissions and Enrollment Services.

The EdD program requires that students file a Plan of Studies during the fall semester of their first year in the program. In formulating the doctoral Plan of Studies, both the student and the academic advisor must pay close attention to these School of Education requirements as well as requirements specific to the particular program or department in which the degree specialization is taken. It is the responsibility of the student to learn particular requirements from the academic advisor. The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh.

**Course Requirements**

A doctoral Plan of Studies should include the following degree requirements:

- **EdD Foundations Courses (12 credits)**
- **EdD Practitioner Inquiry Courses (12 credits)**
- **Area of Concentration Courses (12 credits)**
- **Additional Area of Concentration Courses (21 transfer credits)**
- **Supporting Field (9 transfer credits)**
- **Supervised Practitioner Inquiry and Internship (6 credits)**
- **Dissertation in Practice (18 credits)**

All EdD students will complete eight common core courses: four EdD Foundations Courses (12 credits) and four EdD Practitioner Inquiry Courses (12 credits) designed specifically for EdD students and aligned with the milestones and requirements of the program. In addition to the eight common courses, students take four courses in their area of concentration. Each area of concentration has specified the courses which fulfill this requirement.

Courses approved for transfer credit must be listed individually on the plan of studies. Any changes in the plan of studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed with the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved plan of studies.

**Supervised Practitioner Inquiry and Internship**

EdD students are required to complete 3 credits of Supervised Practitioner Inquiry and 3 credits of Supervised Internship.

Students in enroll in Supervised Practitioner Inquiry in order to prepare a critical review of literature related to a problem of practice that students identify in consultation with their advisors. Successful completion of this course constitutes completion of the comprehensive examination (as explained below). Supervised Practitioner Inquiry is designed to evaluate students' strengths, weaknesses, motivations, and potential for acquiring in-depth knowledge of education issues in the declared area of study and to assess students' ability to write clearly. The Supervised Inquiry requirement is designed to assure that each doctoral student successfully completes a review of literature on a problem of practice that builds on the content in the foundations and area of concentration courses. Students work directly with their advisors to complete the review of literature.
There are three types of Supervised Internship experiences that students may complete:

1. **Job-embedded internship.** Students already working in their field of choice may elect to have their current responsibilities reviewed for eligibility for a "full-time job-embedded internship." If the advisor and student agree that the students' current responsibilities represent a relevant and meaningful internship experience, then a plan will be developed that will engage the student in analysis of practice and leadership activities.

2. **Aspirant internship.** Students will have an apprenticeship experience in which they shadow and collaborate with a trained mentor in their discipline.

3. **Global studies experience:** Students will have the opportunity to design an international experience that provides direct observation or experience with practice or policy in another country.

The Supervised Internship experience allows students to integrate learning that has occurred across multiple experiences and courses throughout the program as well as previous professional expertise.

**Acceptance of Transfer Credits**

EdD students apply a maximum of 30 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (see Acceptance of Transfer Credits). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. When approved, transfer credits must appear on the student's Plan of Studies. The registrar, after notification of acceptance of transfer credits, will enter the individual transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA=3.0) or its equivalent.
- The course must be judged relevant to a student's doctoral Plan of Studies by the program or department.
- The course must be approved for equivalent graduate degrees at the accredited institution, extension, or off-campus center of other institutions at which the course was taken.

**Residency**

The EdD program has no residency requirement.

**Statute of Limitations**

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the EdD must be completed within a period of 12 years (or 10 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

**Doctoral Preliminary Evaluation**

Each doctoral student is required to take a preliminary evaluation designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the initial phase of graduate study, and the student's potential to apply research methods independently. The EdD preliminary examination is designed to assess and support the student's continued success in doctoral study. The exam consists of a written statement of a defensible problem of practice. The statement articulates the proposed topic, the significance of the problem, scope of inquiry, and questions that will be asked of the literature. This initial assessment is structured to achieve two purposes: (a) to evaluate the student's strengths, weakness, motivation, and potential for acquiring in-depth knowledge of education issues in the student's declared area of study and (b) to assess the student's ability to write clearly.

**Advancement to Doctoral Study**

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.30 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh;
• have a Plan of Studies approved by the academic advisor and the program coordinator on file in the Office of Admissions and Enrollment Services; and
• have passed the doctoral preliminary evaluation.

Comprehensive Examination

The EdD Comprehensive Exam is a review of supporting scholarship and professional knowledge related to the problem of practice. The review of supporting scholarship and professional knowledge related to the problem of practice is an integrated conceptual synthesis across sources that addresses these questions: What has been done to address the problem? What has been learned about this problem? What theories, practices, policies, and contested ideas have emerged?

The review of supporting scholarship and professional knowledge is the final project for EDUC 3009 Supervised Practitioner Inquiry in the fall term of the second year of the EdD program. The advisor approves the review of supporting scholarship and professional knowledge. Evidence of advisor approval is a passing grade in EDUC 3009.

A student must be registered in the term during which the comprehensive examination is taken. In no case may the student be graduated in the same term in which the comprehensive examination is taken. After the comprehensive examination is passed, the student has the remaining time specified by the statute of limitations to complete all remaining doctoral degree requirements.

Ordinarily, students do not register for dissertation credits until they have passed the comprehensive examination.

Doctoral Competency

Each doctoral student is required to demonstrate doctoral competency by satisfactorily completing the supervised inquiry and internship and doctoral comprehensive examination. The form certifying that a student has demonstrated doctoral competency is initiated by the student's academic advisor, signed by the academic advisor, the program coordinator, and the department chairperson, and then sent to the Office of Admissions and Enrollment Services. The dean/associate dean notifies the student that doctoral competency has been demonstrated.

Dissertation in Practice

The EdD program requires a Dissertation in Practice that contributes to the improvement of practice in the student's area of specialization and reflects the application of relevant theory and knowledge.

Doctoral Committee

The EdD doctoral committee will consist of the research advisor and at least two other members, including one member from an area of concentration other than the student's primary area. This member may be from another department in the School of Education, from another department in the University of Pittsburgh, or from an appropriate graduate program at another academic institution. At least two committee members shall be full-time faculty of the School of Education (tenured, tenure stream, or non-tenure-stream), and at least one member shall be an experienced practitioner or former practitioner possessing a doctorate and having significant experience in the area of the proposed project. In general, it is expected that all committee members will have earned a doctoral degree (PhD or EdD).

The doctoral committee will decide on the acceptability of the final dissertation project submission, with each committee member signing an appropriate form and indicating whether he/she deems the project to be a pass or a failure. Students can appeal that decision only with respect to issues of academic integrity, as is the case for all course grades. Appeals shall be done informally first, through the associate dean for student affairs, with the current School policy on such appeals being followed for any further steps.

The program faculty, the department chairperson, and the dean/associate dean must approve membership on and subsequent changes in the doctoral committee. After the program has approved the doctoral committee, the research advisor initiates the "Proposed Doctoral Committee" form to obtain the signatures of the program coordinator, the department chairperson, and the dean/associate dean. The dean/associate dean must give final approval of the doctoral committee before the overview examination may be scheduled.

Dissertation Overview

The dissertation overview is a written proposal and must be presented to the doctoral committee for approval after doctoral competency has been demonstrated. The dissertation overview includes three components: the final version of the statement of problem of practice, review of supporting scholarship and professional knowledge, and applied inquiry plan. The Applied Inquiry Plan guides the development of the Dissertation in Practice. Students develop a potential solution to their problem of practice, such as an intervention or policy change and a plan to study the implementation and predicted outcomes OR collect and analyze data to identify underlying causes and associated factors related to their problem of practice.
The Overview Examination

The overview examination is conducted by the doctoral committee in September of the third year of the EdD program, is chaired by the research advisor, and is open to any faculty member of the graduate faculty of the University wishing to attend. Although any faculty member may participate in the examination, only members of the doctoral committee may be present during the final deliberation and vote on approving the overview. Each member of the doctoral committee must sign the overview form and vote on approving the overview. The committee must unanimously approve the overview in order for the student to be advanced to doctoral candidacy.

Dissertation in Practice

The Dissertation in Practice has two sections. The first section is a report that includes the following parts:

1. Statement of Problem of Practice
2. Review of Supporting Scholarship and Professional Knowledge
3. Applied Inquiry Plan
4. Summary of major findings from the enactment of the applied inquiry plan.
5. Summary of conclusions and recommendations.
6. Dissemination Plan - How will student's research impact practice? The dissemination plan frames the Demonstration of Scholarly Practice
7. References

The second section of the Dissertation in Practice is a Demonstration of Scholarly Practice, a public product that supports the advancement of students' profession, including but not limited to, publishable article in a practitioner journal, white paper, book chapter, presentation to a Board of an organization or agency, policy analysis report, policy brief, video, performance, curriculum resources, professional development plan, professional development resources, program guide, intervention manual, evaluation report, research report, and other products that further students' professional goals.

Students should review the information detailed under Dissertation and Abstract and Final Oral Examination for University-wide Regulations Pertaining to Doctoral Degrees regarding dissertations and dissertation defenses.

The Dissertation Defense

The same rules apply here as detailed under The Overview Examination above.

Vote on the Dissertation Defense

Each member of the doctoral committee must sign the dissertation defense form and vote to pass or fail the student on the dissertation defense. If the decision of the committee is not unanimous, the case is referred to the dean/associate dean for resolution.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

At least one week prior to the end of the term, the dissertation is submitted in final form to the Office of Admissions and Enrollment Services along with the following materials:

- Signed dissertation defense form
- Signed ETD approval form
- Two copies of the dissertation abstract initialed by the research advisor
- Completed Proquest Agreement forms
- Completed Survey of Earned Doctorate form
- Receipt from the Student Payment Center for payment of the dissertation processing fee
- Two copies of the title page

Information concerning requirements for preparing the abstract, the forms to be completed, and the amount of the fees to be paid is available in the Office of Admissions and Enrollment Services. The dissertation and abstract will be examined there to see that they are prepared in an acceptable form and style. For dissertation preparation style information refer to the ETD Format Guidelines. Questions not answered in these documents regarding form and/or style will be referred to the dean/associate dean for review and final decision.
Doctor of Philosophy Specific Requirements

The Doctor of Philosophy degree in the School of Education is a research-intensive training model that prepares students to be nationally competitive for research careers in both academic and non-academic institutions.

Admissions requirements include the GRE for both national and international applicants. International students require a minimum of 100 or higher TOEFL composite score with sub-scores of 21 or higher or 7.0 IELTS with sub-scores of 6.0 or higher. After screening, a small group of applicants will be interviewed prior to a final decision. Only applicants committed to full-time study will be considered (except in unusual circumstances where the applicant works in a setting where research opportunities are available such as a research assistant on a funded project at a research institute).

The students are admitted into one of the following areas of concentration:

- Applied Developmental Psychology
- Education Leadership
- Health and Physical Activity
- Higher Education Management
- Language, Literacy & Culture
- Learning Sciences and Policy
- Mathematics Education
- Research Methodology
- Science Education
- Social and Comparative Analysis in Education
- Special Education - Early Intervention
- Special Education - Education of Students with Mental & Physical Disabilities
- Vision Studies

Plan of Studies

Prior to advancement to the formal stage called Doctoral Study, the student, in consultation with the academic advisor, must complete a plan of studies that conforms to program requirements. The plan of studies, approved by the academic advisor, the program coordinator, and department is filed in the Office of Admissions and Enrollment Services.

PhD students are required to file a Plan of Studies during the first year in the program. In formulating the doctoral Plan of Studies, both the student and the academic advisor must pay close attention to these School of Education requirements as well as requirements specific to the particular program or department in which the degree specialization is taken. It is the responsibility of the student to learn particular requirements from the academic advisor. The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh.

Courses approved for transfer credit must be listed individually on the plan of studies. Also, when a student plan of studies lists directed study credits, a directed study agreement form must be completed, signed by both the student and faculty supervisor, and submitted for each directed study at the time of registration. Forms are available from the department.

Any changes in the plan of studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed with the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved plan of studies.

Credit Requirements

The PhD degree requires a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study if approved on a plan of studies. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree. Department and program websites list specific degree requirements.

Acceptance of Transfer Credits
PhD students apply a maximum of 30 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (see Acceptance of Transfer Credits). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. When approved, transfer credits must appear on the student's Plan of Studies. The registrar, after notification of acceptance of transfer credits, will enter the individual transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA = 3.00) or its equivalent.
- The course must be judged relevant to a student's doctoral Plan of Studies by the program or department.
- The course must be approved for equivalent graduate degrees at the accredited institution, extension, or off-campus center of other institutions at which the course was taken.

The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh. However, under certain circumstances, a student may earn in an accredited graduate institution other than the University of Pittsburgh a limited number of credits toward a doctoral degree.

Doctoral students desiring to take courses at another institution following admission to the University of Pittsburgh should review the course descriptions and receive approval from their academic advisors and program or department prior to registering for those courses if they wish to ensure that these credits will be acceptable for transfer.

Residency

PhD students are required to be enrolled for full-time study, including involvement in research activities.

Supporting Field

PhD students are required to complete a minimum of nine credits in an academic discipline outside of education. This requirement may be met in one of three ways:

1. For a student who does not have a bachelor's degree or an equivalent number of credits to that for a bachelor's degree in an appropriate academic discipline, a minimum of 18 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration (e.g., Latin American Studies or psycholinguistics) as approved by the program or department. No more than 6 of these credits may be used to satisfy research methodology requirements.

2. For a student who has a bachelor's degree or an equivalent number of credits for a bachelor's degree in an academic discipline, a minimum of 9 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration as approved by the program or department. None of the 9 credits may be used to satisfy research methodology requirements.

3. For a student who has a master's degree or an equivalent number of credits toward a master's degree in a relevant academic discipline outside of education, no additional credits outside the School of Education need to be taken.

Supervised Research

PhD students are required to complete a supervised research experience that results in a written report of the experience. Enrollment for six credits of supervised research, internship, practicum, or directed study is required.

Statute of Limitations

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the PhD must be completed within a period of 10 years (or 8 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Doctoral Preliminary Evaluation

Each doctoral student is required to take a preliminary evaluation designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the initial phase of graduate study, and the student's potential to apply research methods independently. The preliminary
evaluation is administered by the program or department to which the student has been admitted. Procedures of administration are available from the program or department.

**Advancement to Doctoral Study**

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.30 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh;
- have a Plan of Studies approved by the academic advisor and the program coordinator on file in the Office of Admissions and Enrollment Services; and
- have passed the doctoral preliminary evaluation.

**Comprehensive Examination**

After advancement to doctoral study, each doctoral student is required to take a comprehensive examination. The comprehensive examination is constructed, administered, and scored by the department or program to which the student has been admitted. Procedures and schedules of administration are available from the department or program.

A student must be registered in the term during which the comprehensive examination is taken. In no case may the student be graduated in the same term in which the comprehensive examination is taken. After the comprehensive examination is passed, the student has the remaining time specified by the statute of limitations to complete all remaining doctoral degree requirements. Satisfactory completion of the doctoral comprehensive examination requirement is part of the demonstration of doctoral competency.

Ordinarily, students do not register for dissertation credits until they have passed the comprehensive examination.

**Doctoral Competency**

Each doctoral student is required to demonstrate doctoral competency by satisfactorily completing the supervised research requirement and doctoral comprehensive examination. The form certifying that a student has demonstrated doctoral competency is initiated by the student's academic advisor, signed by the academic advisor, the program coordinator, and the department chairperson, and then sent to the Office of Admissions and Enrollment Services. The dean/associate dean notifies the student that doctoral competency has been demonstrated.

**Doctoral Committee**

For the PhD student, the doctoral committee consists of the research advisor and at least three other members, including one member from another department outside the School of Education at the University of Pittsburgh or from an appropriate graduate program outside education at another academic institution. The research advisor and a majority of the total committee must be full or adjunct members of the graduate faculty of the University of Pittsburgh. Current graduate faculty membership may be found on the University's Institutional Research website.

The program faculty, the department chairperson, and the dean/associate dean must approve membership on and subsequent changes in the doctoral committee. After the program has approved the doctoral committee, the research advisor initiates the "Proposed Doctoral Committee" form to obtain the signatures of the program coordinator, the department chairperson, and the dean/associate dean. The dean/associate dean must give final approval of the doctoral committee before the overview examination may be scheduled.

**Dissertation Overview**

The dissertation overview is a written proposal and must be presented to the doctoral committee for approval after doctoral competency has been demonstrated.

**The Overview Examination**

The overview examination is conducted by the doctoral committee, is chaired by the research advisor, and is open to any faculty member of the graduate faculty of the University wishing to attend. Although any faculty member may participate in the examination, only members of the doctoral committee may be present during the final deliberation and vote on approving the overview. Each member of the doctoral committee must sign the overview form and vote on approving the overview. The committee must unanimously approve the overview in order for the student to be advanced to doctoral candidacy.
Dissertation

Students should review the information detailed under Dissertation and Abstract and Final Oral Examination for University-wide regulations regarding dissertations and dissertation defenses. School of Education-specific rules follow:

The Dissertation Defense

The same rules apply here as detailed under The Overview Examination above.

Vote on the Dissertation Defense

Each member of the doctoral committee must sign the dissertation defense form and vote to pass or fail the student on the dissertation defense. If the decision of the committee is not unanimous, the case is referred to the dean/associate dean for resolution.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

At least one week prior to the end of the term, the dissertation is submitted in final form to the Office of Admissions and Enrollment Services along with the following materials:

- Signed dissertation defense form
- Signed ETD approval form
- Two copies of the dissertation abstract initialed by the research advisor
- Completed ProQuest Agreement forms
- Completed Survey of Earned Doctorate form
- Receipt from the Student Payment Center for payment of the dissertation processing fee
- Two copies of the title page

Information concerning requirements for preparing the abstract, the forms to be completed, and the amount of the fees to be paid is available in the Office of Admissions and Enrollment Services. The dissertation and abstract will be examined there to see that they are prepared in an acceptable form and style. For dissertation preparation style information refer to the ETD Format Guidelines. Questions not answered in these documents regarding form and/or style will be referred to the dean/associate dean for review and final decision.

Schorr, Jodi Marie - Master's, Johns Hopkins University
Program and Course Offerings

The School of Education is organized into four academic departments and one interdisciplinary degree:

Center for Urban Education

The Center for Urban Education's vision is to be a space of learning and sharing with communities to positively transform educational opportunities and experiences. CUE structures its research, service, and knowledge dissemination into three areas:

Community Partnership & Engagement

CUE is a research center, but the success of its findings, projects, and progress in influencing practice is dependent on community partnership and engagement, which it facilitates through its Community Partnership & Engagement (CPE) affinity group. CUE is grateful for its partners and collaborators, ranging from school districts and administrators to community councils and foundations, and from government contacts and offices to local and regional parent/teacher organizations.

Educator Development & Practice
The Educator Preparation & Development (EDP) affinity group works to devise, document, and deliver the tools and processes teachers and administrators need for improving urban school systems. CUE strives to be an educator training and professional development facility of the highest order for educators in the region, while developing, delivering, and documenting processes and tools that can yield major improvement in urban school systems.

**Student Academic & Social Development**

The Student Academic and Social Development (SASD) affinity group focuses on experiences and support of students at all levels. Through research, practice, and school and community partnerships, SASD works to study and enhance student-learned, academic, and social development.

**EdD in Urban Education**

Both research and the current social climate point to a need for highly effective professionals trained with a focus in particular on urban school, their broader communities, and the social and political factors shaping their organization and function. To this end, the Center for Urban Education is offering and EdD ARCO focused on supporting professionals in gaining a systematic understanding of urban schooling. In particular, the Urban Education ARCO is designed to support the development of leaders in urban education spheres. This program will also support professionals in connecting this work to improvement science to better understand and work with urban communities. Students in the Urban Education ARCO will develop a foundational understanding of the dynamics of urban education, including the history of urban life, communities, and schools in the U.S., as well as policy and practices in the field of urban education. This understanding will ultimately support students in establishing a basis for lifelong learning through normative and critical reflection on urban education within its historical, philosophical, cultural and social contexts.

**Department of Administrative and Policy Studies**

Programs within the Department of Administrative and Policy Studies prepare graduates for educational leadership careers in K-12 schools, school districts, and higher education institutions, for research and teaching careers in colleges and universities, and for research and policy study careers in local, state, national, and international agencies.

Students specialize within three areas of concentration: (1) educational leadership (EdD degree) (2) higher education management, and (3) social and comparative analysis in education. The department offers programs leading to the MEd, MA, EdD, and PhD in administrative and policy studies, as well as certification programs. It also provides service courses for students from other departments and schools at the master's and doctoral levels in education and society, history and sociology of education, education and culture, educational anthropology, supervision, administration, education law, qualitative and quantitative inquiry, interpretive research, and evaluation.

Detailed program information appears below.

**General Contact Information**
Program Information

Higher Education Management Program

The Higher Education Management Program serves graduate students who wish to pursue advanced study in student affairs, academic affairs, and institutional management and policy, and who demonstrate a superior level of expertise and capacity for leadership in the field of higher education.

The following degrees in administrative and policy studies are offered with a concentration in higher education management:

- **Master of Education (MEd)**
  The Master of Education (MEd) in Higher Education Management prepares scholar practitioners for positions working within institutions of higher education. Designed for domestic and international students seeking positions as early career professionals and those already working in the field, students pursue one of two tracks, either management or student services, depending on their professional focus.

- **Doctor of Education (EdD)**
  In the higher education management ARCO, students examine measures that reflect institutional effectiveness, data-based planning, and decision making in higher education environments that demand accountability and transparency. The skills and proficiencies developed are required to succeed at institutions of higher learning. Graduates of our program have worked as directors of institutional development, admissions, and residence life; deans of student affairs; registrars; and college presidents and vice presidents.

- **Doctor of Philosophy (PhD)**
  The PhD degree program in higher education includes a core set of courses designed for students to gain an understanding of historical, political, philosophical, and social elements that shape and continue to reshape higher education. These courses include Higher Education Administration, the Politics and History of Higher Education, Higher Education Research Frameworks and Theory, and Higher Education Policy and Issues. These courses are complemented by core courses within the department of Administrative and Policy Studies designed to ground students in the study education as a discipline. Students develop an area of research specialization within the field of higher education and take other courses at the School of Education as well as courses outside of the school that complement their specialization. In addition, through a strong focus within the program on rigorous methodological training, students gain competency in both quantitative and qualitative research methods and take advanced courses in the methodological approaches they plan to utilize in their research.

Education Leadership Program

The mission of the program is to deliver a preeminent preparation program for aspiring school leaders that provides a relevant and balanced course of studies, which includes rigorous field experience. The goal of the Education Leadership Program is to ensure that all graduates acquire competence through the integration of the knowledge and skills necessary for formulating and implementing a clear vision of educational processes and outcomes associated with responsible data orientation, pertinent to organizational and professional development of staff, and related to effective and responsive management.

Degree and Certification Requirements:

The following degrees in administrative and policy studies are offered with a concentration in school leadership:

- **Master of Education (MEd)**
Certification programs: K-12 Principal, Supervisor of Curriculum and Instruction and the Superintendent's Letter of Eligibility. The certification programs meet Pennsylvania Standards for Commonwealth Certification.

Doctor of Education (EdD)
The EdD in education leadership is suited for principals and school administrators who desire to become superintendents while earning their doctoral degree. You can earn your doctorate while also completing the requirements for your Superintendent's Letter of Eligibility through the Executive Cohort for Educational Leaders (ExCEL) program. ExCEL’s purpose is to prepare leaders who champion publicly supported schools and who are committed advocates for children and youths.

Doctor of Philosophy (PhD)

Social and Comparative Analysis in Education Program

Social and Comparative Analysis in Education (SCAE) is the scholarly study of fundamental problems and questions in education in the United States and around the world from a critical, global perspective. SCAE looks at education holistically, including formal and non-formal settings across the lifespan. SCAE analyzes the relationship between education and social justice in the complementary fields of social foundations, comparative, international, and development education.

Degree and Certification Requirements:

The following degrees in administrative and policy studies are offered with a concentration in social and comparative analysis in education:

- Master of Arts (MA)
- Master of Education (MEd)
- Doctor of Education (EdD)

The social and comparative analysis in education ARCO prepares creative and innovative professionals to take leadership of their chosen professional fields. As scholars, practitioners, and citizens, EdD students in this ARCO conduct research related to their professional practice while expanding the support of students in pre-K-16 education and nonformal educational settings. This is in addition to creating structures, practices, and policies that reflect a commitment to equity and social justice, critical deliberation, and collaborative links between educational institutions and local and national communities.

- Doctor of Philosophy (PhD)
The Doctor of Philosophy (PhD) degree in SCAE trains scholars to apply disciplinary theories and methods from economics, sociology, and anthropology to the study of educational productivity and inequality. In addition to classic theories of how organizations and actors interact within educational systems, we also focus on understanding the effects of contemporary educational policies, trends, and reforms. An emphasis on theories and methods in the social sciences and humanities is coupled with an empirical focus on real-world studies of instructional and organizational processes. The PhD program considers education holistically, including formal and non-formal settings across the lifespan, and has a special strength in comparative, international, and development education.

Education Leadership, EdD

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.
• **One-week intensive on ramp:** The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

• **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

Higher Education Management, PhD

The University of Pittsburgh School of Education's Doctor of Philosophy (PhD) programs prepare students to be nationally competitive and highly qualified for research careers in both academic and non-academic institutions. Our full-time, research-intensive PhDs produce scholars who demonstrate excellent writing and research skills, independent scholarship and productivity, and proficiency in teaching. Under the guidance of our distinguished graduate faculty, students will have the opportunity to produce peer-reviewed publications, present at professional conferences, and collaborate on grant-writing and review, positioning them to excel in their careers as researchers and faculty. Because the PhDs are full-time, students can be fully immersed in their coursework and research in preparation for an impactful scholarly career.

The Higher Education Management program is committed to advancing scholarship, research, and practice in the field of higher education. Designed for domestic and international students who aspire to careers as scholar-researchers, the Doctor of Philosophy (PhD) degree prepares students for positions as university faculty, researchers at educational think tanks and major policy institutes, and as leaders of administrative units with teaching and research responsibilities. Students pursuing a PhD in higher education have research interests ranging from student access to student outcomes, diversity and equity, international and comparative education, administration and management, and policy studies.

Students pursuing the PhD degree have widespread opportunities to engage closely with and learn from faculty who conduct cutting-edge research in the field and who have a strong commitment to high-quality teaching. Students are afforded the opportunity to work with faculty members to conduct research, present at professional conferences, and publish prior to the completion of their degrees. The faculty have expertise in both quantitative and qualitative methodologies, and do both applied and basic research, all with a focus on improving educational outcomes.

The PhD degree program in higher education includes a core set of courses designed for students to gain an understanding of historical, political, philosophical, and social elements that shape and continue to reshape higher education. These courses include Higher Education Administration, the Politics and History of Higher Education, Higher Education Research Frameworks and Theory, and Higher Education Policy and Issues. These courses are complemented by core courses within the department of Administrative and Policy Studies designed to ground students in the study education as a discipline. Students develop an area of research specialization within the field of higher education and take other courses at the School of Education as well as courses outside of the school that complement their specialization. In addition, through a strong focus within the program on rigorous methodological training, students gain competency in both quantitative and qualitative research methods and take advanced courses in the methodological approaches they plan to utilize in their research.

Doctoral Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Doctoral Programs

Doctor of Education (EdD) and Doctor of Philosophy (PhD) degree programs are offered by the School of Education to provide advanced graduate study and professional specialization in education. Each recipient must show evidence of superior scholarship, mastery of a special field of
knowledge, and ability to do significant and relevant research. In doctoral study in the School of Education, a distinction is made between the preparation of education professionals resulting in the EdD degree and the preparation of education professionals resulting in the PhD degree. While EdD and PhD degrees produce experts in critical inquiry, the School of Education distinguishes the degrees according to, among other factors, the focus of the area of inquiry, the type of knowledge advanced, and the career path chosen by the individual student.

PhD research focuses on the study of basic problems arising primarily from behavioral and social science theory with the goal of advancing such theory and knowledge. Individuals pursuing this degree often seek academic positions in universities or research institutes. EdD research focuses on the study of applied, practical problems with the goal of contributing to solutions. Careers for these individuals often center on professional positions as administrators, curriculum developers, or specialists in schools and clinical settings.

Credit Requirements

Doctoral degrees require a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree.

Grade Point Average/Academic Probation

All students enrolled in doctoral degree programs are required to maintain a grade point average (GPA) of at least 3.300. The cumulative GPA is based on all course work taken after enrollment in the appropriate doctoral program. A student is automatically placed on academic probation when the cumulative GPA after 9 credits or more, exclusive of transfer credits, falls below 3.300. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.500 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.
at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Curriculum

The University of Pittsburgh School of Education’s Doctor of Philosophy (PhD) programs prepare students to be nationally competitive and highly qualified for research careers in both academic and non-academic institutions. Our full-time, research-intensive PhDs produce scholars who demonstrate excellent writing and research skills, independent scholarship and productivity, and proficiency in teaching. Under the guidance of our distinguished graduate faculty, students will have the opportunity to produce peer-reviewed publications, present at professional conferences, and collaborate on grant-writing and review, positioning them to excel in their careers as researchers and faculty. Because the PhDs are full-time, students can be fully immersed in their coursework and research in preparation for an impactful scholarly career.

The Higher Education Management program is committed to advancing scholarship, research, and practice in the field of higher education. Designed for domestic and international students who aspire to careers as scholar-researchers, the Doctor of Philosophy (PhD) degree prepares students for positions as university faculty, researchers at major policy institutes, and as leaders of administrative units with teaching and research responsibilities.

Degree Requirements: This degree requires a minimum of 90 credits.

Doctor of Philosophy (PhD) Degree Requirements

The Doctor of Philosophy degree in the School of Education is a research-intensive training model that prepares students to be nationally competitive for research careers in both academic and non-academic institutions.

Admissions requirements include the GRE for both national and international applicants. International students require a minimum of 100 or higher TOEFL composite score with sub-scores of 21 or higher or 7.0 IELTS with sub-scores of 6.0 or higher. After screening, a small group of applicants will be interviewed prior to a final decision. Only applicants committed to full-time study will be considered (except in unusual circumstances where the applicant works in a setting where research opportunities are available such as a research assistant on a funded project at a research institute).

Plan of Studies
Prior to advancement to the formal stage called Doctoral Study, the student, in consultation with the academic advisor, must complete a plan of studies that conforms to program requirements. The plan of studies, approved by the academic advisor, the program coordinator, and department is filed in the Office of Admissions and Enrollment Services.

PhD students are required to file a Plan of Studies during the first year in the program. In formulating the doctoral Plan of Studies, both the student and the academic advisor must pay close attention to these School of Education requirements as well as requirements specific to the particular program or department in which the degree specialization is taken. It is the responsibility of the student to learn particular requirements from the academic advisor. The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh.

Courses approved for transfer credit must be listed individually on the plan of studies. Also, when a student plan of studies lists directed study credits, a directed study agreement form must be completed, signed by both the student and faculty supervisor, and submitted for each directed study at the time of registration. Forms are available from the department.

Any changes in the plan of studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed with the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved plan of studies.

Credit Requirements

The PhD degree requires a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study if approved on a plan of studies. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree. Department and program websites list specific degree requirements.

Acceptance of Transfer Credits

PhD students apply a maximum of 30 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (see Acceptance of Transfer Credits). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. When approved, transfer credits must appear on the student's Plan of Studies. The registrar, after notification of acceptance of transfer credits, will enter the individual transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA = 3.00) or its equivalent.
- The course must be judged relevant to a student's doctoral Plan of Studies by the program or department.
- The course must be approved for equivalent graduate degrees at the accredited institution, extension, or off-campus center of other institutions at which the course was taken.

The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh. However, under certain circumstances, a student may earn in an accredited graduate institution other than the University of Pittsburgh a limited number of credits toward a doctoral degree.

Doctoral students desiring to take courses at another institution following admission to the University of Pittsburgh should review the course descriptions and receive approval from their academic advisors and program or department prior to registering for those courses if they wish to ensure that these credits will be acceptable for transfer.

Residency

PhD students are required to be enrolled for full-time study, including involvement in research activities.

Supporting Field

PhD students are required to complete a minimum of nine credits in an academic discipline outside of education. This requirement may be met in one of three ways:
1. For a student who does not have a bachelor's degree or an equivalent number of credits to that for a bachelor's degree in an appropriate academic discipline, a minimum of 18 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration (e.g., Latin American Studies or psycholinguistics) as approved by the program or department. No more than 6 of these credits may be used to satisfy research methodology requirements.

2. For a student who has a bachelor's degree or an equivalent number of credits for a bachelor's degree in an academic discipline, a minimum of 9 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration as approved by the program or department. None of the 9 credits may be used to satisfy research methodology requirements.

3. For a student who has a master's degree or an equivalent number of credits toward a master's degree in a relevant academic discipline outside of education, no additional credits outside the School of Education need to be taken.

**Supervised Research**

PhD students are required to complete a supervised research experience that results in a written report of the experience. Enrollment for six credits of supervised research, internship, practicum, or directed study is required.

**Statute of Limitations**

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the PhD must be completed within a period of 10 years (or 8 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

**Doctoral Preliminary Evaluation**

Each doctoral student is required to take a preliminary evaluation designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the initial phase of graduate study, and the student's potential to apply research methods independently. The preliminary evaluation is administered by the program or department to which the student has been admitted. Procedures of administration are available from the program or department.

**Advancement to Doctoral Study**

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.30 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh;
- have a Plan of Studies approved by the academic advisor and the program coordinator on file in the Office of Admissions and Enrollment Services; and
- have passed the doctoral preliminary evaluation.

**Comprehensive Examination**

After advancement to doctoral study, each doctoral student is required to take a comprehensive examination. The comprehensive examination is constructed, administered, and scored by the department or program to which the student has been admitted. Procedures and schedules of administration are available from the department or program.

A student must be registered in the term during which the comprehensive examination is taken. In no case may the student be graduated in the same term in which the comprehensive examination is taken. After the comprehensive examination is passed, the student has the remaining time specified by the statute of limitations to complete all remaining doctoral degree requirements. Satisfactory completion of the doctoral comprehensive examination requirement is part of the demonstration of doctoral competency.

Ordinarily, students do not register for dissertation credits until they have passed the comprehensive examination.

**Doctoral Competency**

Each doctoral student is required to demonstrate doctoral competency by satisfactorily completing the supervised research requirement and doctoral comprehensive examination. The form certifying that a student has demonstrated doctoral competency is initiated by the student's academic advisor,
signed by the academic advisor, the program coordinator, and the department chairperson, and then sent to the Office of Admissions and Enrollment Services. The dean/associate dean notifies the student that doctoral competency has been demonstrated.

**Doctoral Committee**

For the PhD student, the doctoral committee consists of the research advisor and at least three other members, including one member from another department outside the School of Education at the University of Pittsburgh or from an appropriate graduate program outside education at another academic institution. The research advisor and a majority of the total committee must be full or adjunct members of the graduate faculty of the University of Pittsburgh. Current graduate faculty membership may be found on the University's Institutional Research website.

The program faculty, the department chairperson, and the dean/associate dean must approve membership on and subsequent changes in the doctoral committee. After the program has approved the doctoral committee, the research advisor initiates the "Proposed Doctoral Committee" form to obtain the signatures of the program coordinator, the department chairperson, and the dean/associate dean. The dean/associate dean must give final approval of the doctoral committee before the overview examination may be scheduled.

**Dissertation Overview**

The dissertation overview is a written proposal and must be presented to the doctoral committee for approval after doctoral competency has been demonstrated.

**The Overview Examination**

The overview examination is conducted by the doctoral committee, is chaired by the research advisor, and is open to any faculty member of the graduate faculty of the University wishing to attend. Although any faculty member may participate in the examination, only members of the doctoral committee may be present during the final deliberation and vote on approving the overview. Each member of the doctoral committee must sign the overview form and vote on approving the overview. The committee must unanimously approve the overview in order for the student to be advanced to doctoral candidacy.

**Dissertation**

*Students should review the information detailed under Dissertation and Abstract and Final Oral Examination for University-wide regulations regarding dissertations and dissertation defenses.* School of Education-specific rules follow:

**The Dissertation Defense**

The same rules apply here as detailed under The Overview Examination above.

**Vote on the Dissertation Defense**

Each member of the doctoral committee must sign the dissertation defense form and vote to pass or fail the student on the dissertation defense. If the decision of the committee is not unanimous, the case is referred to the dean/associate dean for resolution.

**Submission Requirements and Fees**

For general information concerning preparation of the dissertation, refer to the ETD website.

At least one week prior to the end of the term, the dissertation is submitted in final form to the Office of Admissions and Enrollment Services along with the following materials:

- Signed dissertation defense form
- Signed ETD approval form
- Two copies of the dissertation abstract initialed by the research advisor
- Completed ProQuest Agreement forms
- Completed Survey of Earned Doctorate form
- Receipt from the Student Payment Center for payment of the dissertation processing fee
- Two copies of the title page

Information concerning requirements for preparing the abstract, the forms to be completed, and the amount of the fees to be paid is available in the Office of Admissions and Enrollment Services. The dissertation and abstract will be examined there to see that they are prepared in an acceptable
School Leadership, PhD

Doctoral Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Doctoral Programs

Doctor of Education (EdD) and Doctor of Philosophy (PhD) degree programs are offered by the School of Education to provide advanced graduate study and professional specialization in education. Each recipient must show evidence of superior scholarship, mastery of a special field of knowledge, and ability to do significant and relevant research. In doctoral study in the School of Education, a distinction is made between the preparation of education professionals resulting in the EdD degree and the preparation of education professionals resulting in the PhD degree. While EdD and PhD degrees produce experts in critical inquiry, the School of Education distinguishes the degrees according to, among other factors, the focus of the area of inquiry, the type of knowledge advanced, and the career path chosen by the individual student.

PhD research focuses on the study of basic problems arising primarily from behavioral and social science theory with the goal of advancing such theory and knowledge. Individuals pursuing this degree often seek academic positions in universities or research institutes. EdD research focuses on the study of applied, practical problems with the goal of contributing to solutions. Careers for these individuals often center on professional positions as administrators, curriculum developers, or specialists in schools and clinical settings.

Credit Requirements

Doctoral degrees require a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree.

Grade Point Average/Academic Probation

All students enrolled in doctoral degree programs are required to maintain a grade point average (GPA) of at least 3.300. The cumulative GPA is based on all course work taken after enrollment in the appropriate doctoral program. A student is automatically placed on academic probation when the cumulative GPA after 9 credits or more, exclusive of transfer credits, falls below 3.300. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.500 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.
Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Doctor of Philosophy Degree

The University of Pittsburgh School of Education's Doctor of Philosophy (PhD) programs prepare students to be nationally competitive and highly qualified for research careers in both academic and non-academic institutions. Our full-time, research-intensive PhDs produce scholars who demonstrate excellent writing and research skills, independent scholarship and productivity, and proficiency in teaching. Under the guidance of our distinguished graduate faculty, students will have the opportunity to produce peer-reviewed publications, present at professional conferences, and collaborate on grant-writing and review, positioning them to excel in their careers as researchers and faculty. Because the PhDs are full-time, students can be fully immersed in their coursework and research in preparation for an impactful scholarly career.

Degree Requirements: This degree requires a minimum of 90 credits.

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety of methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp:** The EdD cohort will participate in a full-week, on-campus experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on-campus sessions is required.

Doctor of Philosophy Degree

The University of Pittsburgh School of Education's Doctor of Philosophy (PhD) programs prepare students to be nationally competitive and highly qualified for research careers in both academic and non-academic institutions. Our full-time, research-intensive PhDs produce scholars who demonstrate excellent writing and research skills, independent scholarship and productivity, and proficiency in teaching. Under the guidance of our distinguished graduate faculty, students will have the opportunity to produce peer-reviewed publications, present at professional conferences, and collaborate on grant-writing and review, positioning them to excel in their careers as researchers and faculty. Because the PhDs are full-time, students can be fully immersed in their coursework and research in preparation for an impactful scholarly career.

The Doctor of Philosophy degree in SCAE prepares creative and innovative professionals to take leadership in inquiry about critical problems and questions in education. As scholar/practitioner/citizens, Doctor of Philosophy students conduct original research and extend the boundaries of study in education, creating methods for educational practice and inquiry that promote praxis and critical agency. SCAE at Pitt spans educational systems from pre-kindergarten to higher education and includes non-formal educational settings.

Degree Requirements: The Doctor of Philosophy degree requires a minimum of 90 credits in the following areas: Department Core (6 credits), Program Core (9 credits), Specialization (24 credits), Research Methodology (18 credits), Supporting Field (9-18 credits), Electives (9 credits), Supervised Research (6 credits), and Dissertation (18 credits).

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements and to the Social and Comparative Analysis in Education webpage.

PhD Core Curriculum

Methods Courses

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

Urban Education, EdD

Required Courses for Urban Education ARCO Curriculum

Urban Education ARCO Curriculum
Urban Education ARCO Courses

- Introduction to the History and Social Contexts of Urban Education
- Forwarding Critical Perspectives on Urban Education
- Practices in Urban Education
- Urban Schools, Law, and Social Policy

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp**: The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars**: You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

**CORE COURSES** Credits / Units: 24 Total

**Foundation Courses**

- EDUC 3002 - FOUNDATIONS 1:
Practitioner Inquiry Courses
- EDUC 3001 - PRACTITIONER INQUIRY 1
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTICUM INQUIRY 4

SUPERVISED PRACTITIONER INQUIRY
Students will identify, review and synthesize relevant scholarship that supports as inquiry into a problem of practice.
- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.
- EDUC 3012 - SUPERVISED INTERNSHIP

GUIDANCE IN SCHOLARLY PRACTICE

Guidance in Scholarly Practice: Based on research interests, the students will be required to write a manuscript that reports on the improvement science process.

Portfolio of Scholarly Practice: The portfolio of scholarly practice will provide evidence of learning and success in foundations, inquiry, and ARCO experiences.
- EDUC 3099 - GUIDANCE IN DOCTORAL DEGREE

Higher Education Management, MEd

Master of Education Degree

The Master of Education (MEd) in Higher Education Management prepares scholar practitioners for positions working within institutions of higher education. Designed for domestic and international students seeking positions as early career professionals and those already working in the field, students pursue one of two tracks, either management or student services, depending on their professional focus.

- ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY
- ADMPS 2052 - M. ED INTERNSHIP IN HIGHER EDUCATION
- ADMPS 2053 - ORGANIZATION AND MANAGEMENT EFFECTIVENESS
- ADMPS 2054 - ORGANIZATION DEVELOPMENT & LEADING CHANGE
- ADMPS 2055 - STUDENT DEVELOPMENT THEORY
- ADMPS 2056 - STUDENT SERVICES PROGRAM ASSESSMENT
- ADMPS 2080 - SPECIAL TOPICS
- ADMPS 2089 - SPECIAL TOPICS
- ADMPS 2090 - RESEARCH SEMINAR
- ADMPS 2120 - CAPSTONE SEMINAR IN STUDENT SERVICES
- ADMPS 2128 - LEADERSHIP
- ADMPS 2181 - DECONSTRUCTING THE UNIVERSITY

School Leadership, MEd

Curriculum

Social and Comparative Analysis in Education, MA

SCAE Specialization Courses in Social Context of Education

Required course:

- EDUC 2100 - EDUCATION AND SOCIETY

Select at least 9 credits from these foundational courses:

- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- ADMPS 2398 - ECONOMICS OF EDUCATION
- ADMPS 3127 - CURRICULUM: PERSPECTIVES AND ISSUES (K-12)
- ADMPS 3343 - COMPARATIVE EDUCATION

Select at least 3 additional credits from courses for the Social Context of Education (see list here).

SCAE Specialization Courses in Comparative and International Education Policy

Required courses:

- EDUC 2100 - EDUCATION AND SOCIETY
- ADMPS 3343 - COMPARATIVE EDUCATION
- ADMPS 3347 - INTERNATIONAL ORGANIZATION DEVELOPMENT EDUCATION

Select at least 3 credits from these foundational courses:

- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- ADMPS 2398 - ECONOMICS OF EDUCATION

Select at least 3 additional credits from courses for Comparative and International Education Policy (see list here).

Supporting Field
Select at least 6 credits of coursework inside and outside the School of Education that deepen disciplinary knowledge and skill.

Psychological Perspectives on Education

Select 3 credits for developing competency in psychological perspectives on education.

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- PSYED 2127 - HUMAN LEARNING
- PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE

Research Methods

Select at least 6 credits; see list here for recommended courses.

- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY

Master's Thesis

A 6-credit master's thesis is completed under the direction of the faculty advisor.

- ADMPS 2090 - RESEARCH SEMINAR
- ADMPS 2099 - GUIDANCE IN THE MASTER'S DEGREE

Social and Comparative Analysis in Education, MEd

Student can chose between two specialization tracks; Comparative and International Education Policy or Social Context of Education.

SCAE Specialization Courses in Comparative and International Education Policy

Required courses:

- EDUC 2100 - EDUCATION AND SOCIETY
- ADMPS 3343 - COMPARATIVE EDUCATION
- ADMPS 3347 - INTERNATIONAL ORGANIZATION DEVELOPMENT EDUCATION

Select at least 3 credits from these foundational courses:

- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- ADMPS 2398 - ECONOMICS OF EDUCATION

Select at least 12 additional credits from courses for Comparative and International Education Policy (see list here).

SCAE Specialization Courses in Social Context of Education

Required course:

- EDUC 2100 - EDUCATION AND SOCIETY

Select at least 9 credits from these foundational courses:

- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
ADMPS 2305 - SOCIOLOGY OF EDUCATION
ADMPS 2306 - HISTORY OF EDUCATION
ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
ADMPS 2342 - EDUCATION AND CULTURE
ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
ADMPS 2398 - ECONOMICS OF EDUCATION
ADMPS 3127 - CURRICULUM: PERSPECTIVES AND ISSUES (K-12)
ADMPS 3343 - COMPARATIVE EDUCATION

Select at least 12 additional credits from above or other courses for the Social Context of Education (see list here).

Psychological Perspectives on Education

Select 3 credits from these courses to develop competency in psychological perspectives on education:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- PSYED 2127 - HUMAN LEARNING
- PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE

Research Methods

Select at least 6 credits; see additional courses here.

Required:

- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY

Master's Research Paper

A 3-credit master's research paper is completed under the direction of the faculty advisor.

- ADMPS 2090 - RESEARCH SEMINAR

K-12 Principal Certificate - School Leadership

The School of Education at the University of Pittsburgh K-12 Principal certificate program is a 15-month cohort-based program. Presented in an executive format, the Leadership Initiative for Transforming Schools (LIFTS) program collaborates with units in the School of Education and across the University.

The purpose of our principal certificate program is to develop educational leaders of character and integrity who are inspired by a sense of justice to improve the achievement of all students. Drawing from the fields of education and management, the program equips leaders with expertise in instructional, institutional and public leadership grounded in ethics, inquiry, and integrity. The program encourages the shift from teacher leadership to administrative leadership through academic rigor in the classroom, authentic experiences in schools and reflective opportunities for integrating personal and professional growth.

Curriculum

Summer 2018 Courses:

- ADMPS 2123 - SUMMER LEADERSHIP INSTITUTE
- ADMPS 2402 - HEALTH, MENTAL HEALTH AND SAFETY

Fall 2018 Courses:
Spring 2019 Courses:
- ADMPS 2404 - INSTRUCTIONAL LEADERSHIP
- ADMPS 2405 - PUBLIC LEADERSHIP: SCHOOL LAW

Summer 2019 Courses:
- ADMPS 2410 - INSTITUTIONAL LEADERSHIP
- ADMPS 2412 - LEADERSHIP FOR INCLUSIVE SCHOOLS

Superintendent's Letter of Eligibility Certificate - School Leadership

- 24 Credits over twenty months or 5 terms
- All courses approved for Act 45 Credit
- Blended Delivery System (Online + Monthly Campus Class)
- Three 1 credit internship experiences

Program Courses

- EDUC 3003 - FOUNDATIONS 2: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS 4: POLICY AS A LEVER FOR CHANGE
- ADMPS 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION
- ADMPS 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES
- ADMPS 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION
  This course is taken in three (3) separate terms for one (1) credit each
- ADMPS 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES
- ADMPS 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

Supervisor of Curriculum and Instruction Certificate - School Leadership

This is a 24-credit, 15 month program completed with a cohort in 4 consecutive terms (summer, fall, spring, summer).

Program Courses

- ADMPS 2123 - SUMMER LEADERSHIP INSTITUTE
- ADMPS 2412 - LEADERSHIP FOR INCLUSIVE SCHOOLS
- ADMPS 2093 - SUPERVISOR CURRICULUM AND INSTRUCTION INTERNSHIP
- ADMPS 2403 - INSTRUCTIONAL LEADERSHIP
- ADMPS 2403 - TEACHER SUPERVISION AND EFFECTIVENESS
- ADMPS 2406 - PUBLIC LEADERSHIP: ASSESSMENT AND ACCOUNTABILITY
- ADMPS 2407 - POLITICS OF EDUCATION: SCHOOL COMMUNITY PARTNERSHIP
- ADMPS 2086 - CURRICULUM IN SCHOOLS

Department of Health and Physical Activity
The Department of Health and Physical Activity (HPA) focuses its academic, research, and service efforts on promoting physically active lifestyles and other health-related behaviors to prevent disease and enhance quality of life across the lifespan. HPA's expertise has attracted research funding in the areas of physical activity behavior and epidemiology, obesity prevention and treatment, cardiovascular disease, diabetes, fitness training, and health promotion.

The faculty expertise combined with collaboration with other entities with the University of Pittsburgh such as the School of Nursing, the School of Medicine, the Graduate School of Public Health, School of Health and Rehabilitative Sciences, and the University of Pittsburgh Medical Center (UPMC) Hospital network provides for a state-of-the-art and innovative academic, research and clinical experience.

Degrees Offered

Doctoral

- Exercise Physiology, PhD
  The Department of Health and Physical Activity offers a Doctorate of Philosophy (PhD) in Exercise Physiology. This full-time degree program prepares students for positions at research and doctoral-granting universities and research medical centers. The student works closely with their faculty mentor to develop the appropriate plan of study and research experiences. Current research expertise of the faculty includes the following:
  
  Obesity and Body Weight Regulation
  Prevention and Treatment of Chronic Disease
  Epidemiology of Physical Activity and Chronic Disease
  Physical Activity Programming for Health and Fitness
  Physical Activity for Children and Adolescents
  Technology-Based Interventions for the Prevention and Treatment of Chronic Disease
  Perceptual Responses to Physical Activity and Exercise

- Health and Physical Activity, EdD
  The Department of Health and Physical Activity is addressing a growing need for professionals with training in health, fitness, physical activity programming, clinical application, and research. The EdD ARCO in health and physical activity provides students with an evidence-based education that results in expertise in their chosen field of study. Graduates of this program are prepared to design, implement, and lead health, physical activity, and fitness programs as well as corporate, commercial, hospital, community, and university wellness programs.

Master's

- Health and Fitness- Clinical/Practitioner Focus, MS
- Health and Fitness- Research Focus, MS

These tracks within the Master of Science degree focuses on training students to address the changing landscape related to promotion and study of optimal health and fitness through physical activity. This track will prepare students for careers focusing on healthy lifestyle behaviors and to pursue careers in the health and fitness industry such as directors of corporate, commercial, hospital, community, and university wellness programs.

- Health, Physical Activity, and Chronic Disease - Clinical/Practitioner Focus, MS
Health, Physical Activity, and Chronic Disease- Research Focus, MS

These tracks within the Master of Science degree focuses on training students to address the changing landscape related to chronic disease prevention and treatment, with an emphasis on the promotion and study of physical activity and health. This track will prepare students for careers focusing on prevention and treatment of chronic disease through modification of healthy lifestyle behaviors, and to pursue careers as part of a team of professionals to director prevention and treatment initiatives within hospital, community, commercial, and university settings.

Bachelor's

- BS specializing in Exercise Science

Minors

- Applied Fitness
- Aquatics
- Dance
- Exercise Science

Exercise Physiology, PhD

Exercise Physiology Requirements

- The Plan of Study is to be submitted for Graduate Faculty review in the second semester of doctoral study.
- A minimum of 90 credits is required in the Doctoral Program
- A maximum of 30 credits from the master's degree, plus 9 post master's doctoral level courses may be applied to the doctoral plan of studies.
- A minimum of 15 credits must be at the 3000 level for courses taken at the University of Pittsburgh. Note that only 3 hours can be in a Directed Study or Clinical Internship, and only 3 hours can be in a College Teaching Practicum (enrollment in a College Teaching Practicum Requires Prior Department Approval).

Major Field Health and Physical Activity, Exercise Physiology (30-36 Credits)

Collateral Area (9-18 Credits Minimum)

Courses in academic discipline studies supportive of the candidate's major field of specialization. These credits must be in coursework outside the School of Education.

Research Methodology (15 Credits Minimum)

Minimum requirement is for the student to demonstrate coursework through ANOVA and ANCOVA, and HPA 3400 Advanced Research Methodology

Research Practicum (6 Credits Minimum)

Electives (Credits Variable)

Dissertation (18 Credits Minimum)
PhD Core Curriculum

Methods Courses

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105. This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

Health and Physical Activity, EdD

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp**: The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars**: You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

Health and Physical Activity ARCO Curriculum

Health and Physical Activity ARCO Courses

- HPA 3114 - EVIDENCE BASED LIFESTYLE PROGRAM DESIGN AND EVALUATION
- HPA 3115 - HEALTH PROMOTION POLICY AND PROGRAM IMPLEMENTATION
- HPA 3116 - RESOURCE AND FUNDING ACQUISITION FOR HEALTH PROMOTION PROGRAMMING
- HPA 3117 - HEALTH PROMOTION PROGRAM TRANSLATION AND SUSTAINABILITY

Health and Fitness- Clinical/Practitioner Focus, MS

Plan of Study

Students are required to take the following courses:

- HPA 2267 - PHYSIOLOGICAL BASIS-FITNESS AND SPORT CONDITIONING
- HPA 2268 - PHYSICAL ACTIVITY AND HEALTH
- HPA 2269 - OBESITY PREVENTION AND TREATMENT
- HPA 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH
- HPA 2322 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- HPA 2371 - ADVANCED EXERCISE PHYSIOLOGY
- HPA 2374 - EXERCISE TESTING, PRESCRIPTION, AND SUPERVISION
- HPA 2375 - RESEARCH AND EXPERIMENTAL DESIGN IN EXERCISE PHYSIOLOGY
- HPA 2390 - NUTRITION IN SPORT AND EXERCISE
- HPA 2990 - RESEARCH SEMINAR IN HPA
- HPA 2996 - CLINICAL INTERNSHIP
- HPA 3374 - ADVANCED LABORATORY TECHNIQUES

Additional Prerequisites

*Additional prerequisite credits may be required by the department based on the undergraduate training of the applicant.*

Health and Fitness- Research Focus, MS

Plan of Study

Students are required to take the following courses.

Department of Instruction and Learning

The mission of the Department of Instruction and Learning is to provide regional, national, and international leadership in the study and improvement of teaching and learning in diverse educational settings. As part of its effort to carry out this mission, the department offers commonwealth teacher education certification and degree programs.

The department offers the MAT, MEd, MS, EdD, and PhD degrees in instruction and learning as well as various certifications and a graduate certificate in urban education. It has the following. It has the following general areas of study:

- An area of concentration in early childhood education
- An area of concentration in elementary education
- An area of concentration in reading education
- Secondary education certification and areas of concentration in:
  - English and communications education
  - Mathematics education
  - Science education
  - Social studies education
  - Foreign language education
- Special education certification and areas of concentration in:
  - Special Education Teacher Preparation 7-12
  - Applied Behavior Analysis
  - Early intervention for children with disabilities
  - Education of students with mental and physical disabilities
  - Vision studies special education
  - General Special education
- Additional Doctoral Degrees
  - Language, Literacy, and Culture (LLC)
  - Science, Technology, Engineering, and Mathematics (STEM)
- Certificate in Urban Education

A brief section for each of these areas follows. In each section, a link to the program's Web site is provided. Readers interested in a specific program are encouraged to visit that program's Web site for additional information. Please pay special attention to information provided on prerequisite courses and the curriculum.

Degree and Certification Requirements

For additional degree requirement information for many of the following degrees, refer to the school sections on Degree Requirements.
Program Information

Applied Behavior Analysis

The Applied Behavior Analysis (ABA) Program prepares practitioners who are qualified to assess, design, implement, and evaluate ABA programs for a range of populations, but with an emphasis on developmental disabilities and behavioral health issues. Successful completion of the coursework and practicum experiences allows students to seek certification as a Board Certified Behavior Analyst (BCBA) from the Behavior Analysis Certification Board (BACB). With the growing number of children presenting with unique behavioral challenges and requiring additional supports, mental health providers, agencies, and school districts are increasingly seeking the services of professionals with highly specialized training in ABA. The ABA Area of Concentration offers two programs. Supervision of practicum experiences required by the national BACB is also available within the program.

- MEd in Applied Behavior Analysis
  The Applied Behavior Analysis MEd program provides intensive instruction in the theoretical bases of Applied Behavior Analysis as well as the clinical and pedagogical application of the theory and principles. The courses are aimed at special educators and behavioral health providers and are designed to specifically prepare students to apply for the certification examination of the Behavior Analyst Certification Board, Inc (BACB). To become a Board Certified Behavior Analyst (BCBA), the Board requires a Master's degree, approved coursework in Applied Behavior Analysis, and a specified number of supervised practicum hours dependent upon intensity of supervision (750-1500 hours), and successful passage of a national examination following completion of the Master's degree, required coursework, and supervised practicum. Those who are interested should become familiar with the Board's requirements found on its website (http://www.bacb.com). This MEd program offers students the opportunity to pursue the intensive supervised practicum as part of the program's elective courses or students may make other arrangements outside the university to acquire those hours by following the requirements found on the BACB web site.

- Certificate in Applied Behavior Analysis
  The University of Pittsburgh Applied Behavior Analysis Certificate program consists of the coursework required for a national certificate in Applied Behavior Analysis issued by the Behavior Analyst Certification Board (BACB). The program's coursework partially fulfills the requirements to become a Board Certified Behavior Analyst (BCBA).

  Additional requirements include the possession of a master's degree, completion of supervised practicum hours, and successfully passing a national exam. While enrolled in the program, students may also pursue through the university, the intensive supervised practicum to acquire the practicum hours required by the BACB. Those who are interested should become familiar with the Board's requirements found on its website (bacb.com). BCBA pass rates for first-time candidates taking the BCBA exam from the University of Pittsburgh can be found at on the BACB web site.

  This program is specifically designed for:
  
  - Students who already have a Master's degree who wish to obtain a University of Pittsburgh certificate in Applied Behavior Analysis without having to enroll in a degree program; and
  - Students who are enrolled in a graduate program at the University of Pittsburgh other than the MEd in Applied Behavior Analysis who wish to include a certificate in Applied Behavior Analysis as part of or in addition to their degree program

Autism Certificate

The University of Pittsburgh School of Education Autism Certificate is a 15-credit program designed to enrich the knowledge and skills of teachers and other practitioners in the area of autism. The program will focus on the characteristics and etiology of autism; assessment and instructional programming for language/communication, social skills, and academic subjects across settings and grade levels; and family, interagency, and community collaboration.

For those with a Pennsylvania Department of Education Level I or Level II teaching certificate, the program also fulfills the Pennsylvania Department of Education Autism Spectrum Disorders (ASD) Endorsement requirements. The list of possible certifications to which the endorsement might be added includes but is not limited to the following: regular and special education, school psychologist, principal, guidance counselor, speech and language clinician, occupational and physical therapist, reading specialist, and home and school visitor.

The following groups of individuals are encouraged to apply:

424
Post-Baccalaureate or Post-Master's students who possess a Pennsylvania Department of Education Level I or Level II teaching certificate and are interested in obtaining the PDE Program Endorsement in Autism

Post-Baccalaureate or Post-Master's students who do not have a teaching certificate, but who are interested in enhancing their credentials in the area of Autism

Degree-seeking Master's students who are currently enrolled in a program that leads to a Pennsylvania Department of Education Level II teaching certificate and who are interested in obtaining the PDE Program Endorsement in Autism

Degree-seeking Master's and Ph.D. students who do not have a teaching certificate, but who are interested in enhancing their credentials in the area of Autism

Master of Special Education with Academic Instruction Certificate (MOSAIC)

The University of Pittsburgh, School of Education, offers a specialization that leads to a Master's Degree in Special Education and dual teaching certificate for grades 7-12 - one in Special Education and one in a Secondary Content Area (English, Math, Science, Social Studies, or Foreign Language Education). Teaching candidates will study evidence based practices to improve adolescent learning through Special Education and Content Area coursework. Candidates will develop their professional teaching skills during practical experiences, in a variety of public middle and high school classrooms. The MOSAIC program is designed to provide future teachers with the skills, knowledge and experiences to be effective teachers of adolescents both with and without disabilities.

MOSAIC Master of Education (MEd) in Special Education with Instructional Certification in both Secondary Special Education and Secondary Content Area (English, Math, Science, Social Studies and Foreign Language Education) Grades 7-12

- Satisfies the requirements for a PA Instructional I Certificate in Special Education Grades 7-12, pending passing scores on PECT Special Ed 7-12 exams and successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430)
- Satisfies the requirements for a PA Instructional I Certificate in a Specified Content Area (English, Math, Science, Social Studies, or Foreign Language) Grades 7-12, pending passing scores on Praxis II exam and successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430)
- Requires completion of 42 credits
- Lasts four consecutive terms for full-time students - Summer II, Fall, Spring, Summer I
- Requires obtaining all Federal and PA state clearances before entering schools
- Requires a full-time practicum experience (5 days per week) at a local school district in both the fall and spring terms. Fall practicum includes content area and low-incidence disabilities placements. Spring practicum includes content area and high-incidence disabilities placements.
- Requires students to successfully complete the Special Education Comprehensive Exam

Early Childhood Education Program

1. MEd in Early Childhood Education

The Early Childhood Education Program focuses on the education of young children (birth to age 8) in public and private schools and centers, homes, and other facilities in which children within this age range are served. Strong emphasis is also placed on developing relationships with the families of young children and working collaboratively with other professionals. The program offers a range of coursework encompassing infants, toddlers, preschoolers, and primary-aged children. Through student teaching, field placements, and practical learning, students develop competence in the use of developmentally appropriate practices. Main themes within the program include understanding and respecting family diversity, supporting families in their roles with young children, and addressing the needs of children with special needs in inclusive settings.

The program is intended for individuals who already have an Early Childhood Education Certificate or whose career paths do not require them to have a certificate. Individuals who complete the post-baccalaureate Early Childhood Education Certification program (Primary Plus) at the University of Pittsburgh may apply up to 18 credits from their certification studies towards the Master of Education program. Application to the M.Ed. program must be made within three years of completing the certification program. Course work in the Master of Education program is intended to enhance the continuing professional development of early childhood teachers beyond the skills and competencies acquired during certification study and to assist them in gaining greater self-determination through heightened awareness and understanding of their own teaching practice.
2. **MEd in Elementary Education**

   This is an online program. For more information about our online programs see Pitt Online.

   The goals of the MEd program are:
   - To enable teachers to enhance both their understanding and ability to meet the needs of the diverse learners in their classrooms.
   - To enable teachers to advance their understanding of one or more content areas.
   - To enable teachers to broaden their understanding of educational research, educational theories as they apply to practice, action research practices, and educational policy.

1. **Primary Plus: PreK-4 Instructional I Teaching Certification**

   The Primary Plus: PreK-4 Teacher Certification Program prepares students to teach young children ages 4-9 in Pre-kindergarten and K-4 classrooms and to work collaboratively with parents and other professionals. Students will develop skills for employment in public and private schools and early childhood centers. Through coursework and field experiences with pre-kindergarteners and children in grades K-4, students will acquire an integrated understanding of academic content and child development in diverse inclusive settings. The program must be completed as a full-time student. No part-time option is available.

   The Primary Plus: PreK-4 Teacher Certification Program is intended for individuals from a wide range of undergraduate degree and work backgrounds. A student who successfully completes the program and passes both the PECT (Pennsylvania Education Certification Test) in PreK-4 and the PA Statewide Evaluation Form for the Student Professional Knowledge and Practice (PDE 430) is eligible to apply for a Pennsylvania Instructional I certificate for PreK-4.

   - prepares qualified graduates for initial certification in PreK-4 Early Childhood Education
   - lasts three consecutive terms for full-time students - Summer II, Fall, Spring
   - requires two full days per week in a PreK practicum and one full day per week at a K-4 student teaching site during Fall Term
   - requires twelve full weeks of student teaching in a K-4 classroom in the Spring term
   - requires obtaining all Federal and PA state clearances before entering schools

   www.education.pitt.edu/earlychilded

**Elementary Education Program**

This is an online program. For more information about our online programs see Pitt Online.

[www.education.pitt.edu/elementaryed](http://www.education.pitt.edu/elementaryed)

**Reading Education Program**

Graduate work in reading Education is available to individuals interested in working toward:

- K-12 reading specialist certification
- Master's degree in reading education

Those interested in doctoral study in the area of literacy should consult information related to the PhD and EdD Language, Literacy, and Culture area of concentration.

This program offers the following degree in instruction and learning with an area of concentration in reading education and certification and specialization options as noted below:

- Master of Education (MEd)
- Master of Education (MEd) + K-12 reading specialist certificate
Secondary Education Areas of Study

The secondary education area of study offers five areas of concentration:

- English and Communications Education
- Foreign Language Education
- Mathematics Education
- Science Education
- Social Studies Education

Within each of these areas of concentration, the student can choose to pursue a Master of Arts (MAT) teaching degree with certification in one area of concentration, or a Master of Education.

English and Communications Education

This program offers the following degrees in instruction and learning with an area of concentration in English and communications education and certification options as noted below:

- Master of Arts in Teaching (MAT)
- Instructional I Certificate

The mission of the MAT and Instructional I Teaching Certification programs in English and Communications Education at the University of Pittsburgh are to prepare secondary English and Communications teachers with content, pedagogical knowledge, and professional knowledge and skills to meet regional and national needs in the areas of literacy learning, language arts, and communication, especially in diverse school settings.

To achieve this mission, our programs follow the National Council of Teachers of English's criteria for highly qualified teachers of English Language Arts by teaching sophisticated content knowledge; current "best practices" in pedagogical and assessment strategies; the developmental trajectories and needs of adolescents from diverse cultural and linguistic backgrounds; culturally responsive and sustaining pedagogy; and professional leadership skills.

- Master of Education (MEd)

At the master's degree level, students may emphasize study in the specialization of English/Language Arts Education. The master's degree options are designed to help beginning and experienced elementary and secondary teachers acquire the concepts, skills, and attitudes of master teachers in their fields.

Students will work with an English Education faculty advisor to develop a Plan of Studies in the major field that combines work in English Education courses, related studies in education, and related electives from across the university.

www.education.pitt.edu/english

Foreign Language Education

Graduate work in the foreign language education area of concentration is available to qualified persons interested in pursuing K-12 Instructional I certification in French, Spanish, German, Latin, Chinese, Japanese, Italian, or Russian.

The following degrees in instruction and learning with an area of concentration in foreign language education and the certification options are defined below:

- Master of Arts in Teaching (MAT)
- Master of Education (MEd)
- Master of Education (MEd) and a University Certificate in the Teaching of English to Speakers of Other Languages (TESOL)

www.education.pitt.edu/foreignlanguage
**Mathematics Education**

This program offers the following degrees in instruction and learning with an area of concentration in mathematics education and secondary school teacher education certification as detailed below:

- Master of Arts in Teaching (MAT)
- Master of Education (MEd)
  The MEd in Mathematics Education is a professional degree for the graduate student who wishes to pursue advanced study in the field. In addition to addressing the needs and interests of beginning and experienced teachers whose objective is to advance their backgrounds as mathematics teachers in schools, the master's degree also prepares students for admission to doctoral study. Students complete a minimum of 36 credits.
- Doctor of Philosophy (PhD)

www.education.pitt.edu/mathematics

**Science Education**

The School of Education offers innovative graduate-level degree and certification options (biology, chemistry, earth and space science, general science, and physics) for science area majors interested in careers in teaching. The certification options in science education prepare the candidate for teaching assignments in grades seven through 12.

This program offers the following degrees in instruction and learning with an area of concentration in science education and certification programs as defined below:

- Master of Arts in Teaching (MAT)
- Master of Education (MEd)
- Doctor of Philosophy (PhD)

www.education.pitt.edu/science

**Social Studies Education**

The social studies education concentration offers courses of study leading to certification for grades seven through 12 and a master's degree.

This program offers the following degrees in instruction and learning with an area of concentration in social studies education and certification options as defined below:

- Master of Arts in Teaching (MAT)
- Master of Education (MEd)
  Our online program is designed to engage you in dynamic discourse, advanced teaching methods, local and regional research, and to contextualize all you learn with your teaching and scholarly experiences in the field of secondary social studies education.

www.education.pitt.edu/socialstudies

**Special Education Area of Study**

The special education area of study within the Department of Instruction and Learning offers a variety of graduate study opportunities to individuals whose career goals include working with people with disabilities.
A master's degree (MEd) in instruction and learning is offered in each of the program's areas of concentration:

- Early Intervention for Children with Disabilities
- Education of Students with Mental and Physical Disabilities
- General Special Education
- Special Education Teacher Preparation
- Vision Studies Special Education

Work toward graduate degrees may be combined with special education teacher certification study, autism enforcement and vision studies. The areas of concentrations include academic and field work for full-time or equivalent part-time study. Field work appropriate to the individual areas is carried out at cooperating schools, agencies, and clinics in Western Pennsylvania.

The program also offers courses of study leading to eligibility for certification as supervisor of special education. At the doctoral level, the program provides opportunities for specialization studies with a particular emphasis on applied behavior analysis, learning disabilities, vision studies, orientation and mobility, or early intervention.

### Early Intervention for Children with Disabilities

This concentration prepares students to teach infants, toddlers, and preschoolers with disabilities from birth to 5 years of age in hospital, home, and center-based settings, to support families of these young children in decision-making and resource identification, and to collaborate with other professionals in service delivery. The degree options are as follows:

www.education.pitt.edu/ei

### Education of Mental and Physical Disabilities

The major goal of the Special Education PhD and Ed.D degree is the preparation of leadership personnel. Graduates must have leadership skills to identify the significant issues of the day and the ability to make decisions about the most effective use of new technologies and information to serve the nation's disabled population. They will also become researchers and scholars committed to furthering the knowledge and empirical base needed for enhancement of special education practice and of the training of special education personnel. Graduates will serve infants, children, youth, and adults with disabilities through roles as teacher educators, researchers, administrators, consultants, and supervisors.

As they have in the past, it is expected that graduates of this program will have a significant impact on the quality of educational opportunities for persons with disabilities by providing leadership for local education agencies, state educational agencies, private foundations and agencies, colleges, and universities.

This option is available for students with at least three years experience in teaching children with Mental and Physical Disabilities. (i.e., learning disabilities, intellectual disabilities, emotional/behavioral disabilities, etc.). The full-time only program requires a minimum of 90 credits of course work including dissertation research.

www.education.pitt.edu/mpd

### Vision Studies Special Education

The vision studies concentration prepares professionals to educate children and adults with visual disabilities. This specialization enables students to acquire dual certification as teachers of children with visual disabilities and/or as Orientation and Mobility (O&M) specialists with a Master of Education degree. In addition, a component of the program provides the student with both didactic and clinical course work in early intervention with children who are blind and visually impaired. Teachers of children with visual disabilities provide instruction in educational placements that include public schools, resource rooms, and full-time classrooms for children with visual disabilities, or in approved private schools. Graduates provide specialized educational services as an itinerant teacher, a full-time classroom teacher, or a teacher consultant with children birth through age 21. O&M specialists provide necessary instruction to visually disabled children and adults to enable safe, independent travel. Training includes...
integrating skills such as orientation in space in conjunction with the use of a long cane, dog guide, or an optical or electronic device. Students in the vision studies specialization participate in both didactic and practicum experiences to gain a broad range of specialty skills.

The vision studies special education concentration offers the applicant a number of degree and certification options:

1. Commonwealth Certification in Vision Education
2. Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP) Certification in Orientation and Mobility (O&M)
3. Dual Certification in Vision Education and O&M
4. MEd in Instruction and Learning with Vision Education Certification
5. MEd in Instruction and Learning with O&M Certification
6. MEd with Dual Certification in Vision Education and O&M

www.education.pitt.edu/visionstudies

General Special Education

Individually designed master's degree specializations (36 credits minimum) are available for those students who hold Pennsylvania special education teaching certificates or for regular educators who just want to learn more about special education. These specializations are designed to accommodate individualized professional goals but do not provide students with special education certification. Students may also pursue study for other certifications and/or other specialized study.

Language, Literacy and Culture

The Language, Literacy, and Culture (LLC) doctoral program brings together four previous doctoral programs in the Department of Instruction and Learning: English Education, Foreign Language Education, Reading Education, and Social Studies Education. LLC takes an inter- and multidisciplinary approach to the study of cultural, linguistic, social, psychological, and political perspectives on educational studies. Changing immigration patterns, the population of K-12 schools, and new empirical and theoretical advances in education together indicate the need for diverse approaches and disciplinary lenses on the fields of teacher education and classroom teaching and learning. The focus is on the examination of educational issues using sociocultural, linguistic and critical theoretical approaches that are rooted in the promotion of equity, social justice and democratic values.

The LLC area of concentration is appropriate for students with backgrounds in subject matter disciplines (such as reading, English education, foreign and second language learning, applied linguistics, and social studies education) as well as for students interested in pursuing the kinds of interdisciplinary studies in instruction and learning listed above. The interdisciplinary emphasis provides students the opportunities to work with a group of dedicated faculty with diverse backgrounds in addition to being matched with an advisor who is appropriate to their interests.

Science, Technology, Engineering and Mathematics EdD

The STEM Doctor of Education (EdD) program is intended for teachers and educators who desire the skills and credentials needed to advance their practice-oriented careers. It offers a rigorous theoretical and practical orientation for scholar practitioners aspiring to become leaders in K-12 schools and institutions of higher learning, in positions such as district curriculum supervisor, faculty member at a teaching-focused university or district leader in the STEM fields. Candidates for the program must have a master's degree in a related field as well as extensive instructional work experience.

Four core courses examine ideas that lie at the intersection of research in STEM (based primarily in mathematics and science education) in the areas of Curriculum, Instruction, Assessment and Professional learning. Across these courses are threaded considerations of Equity (issues of fairness and justice in how people are treated and of how to provide access and opportunity to all learners), Policy (how policies are created, interpreted, and enacted, and their relationship to educational practice), Methodology (different procedures for studying educational phenomena in STEM education research and their implications) and Theories of learning (different perspectives on how people learn and their influence on instructional decision-making).
Supervisor of Special Education Certificate

Applications of the Supervisor of Special Education Certificate were on hold for the incoming 2018-19 academic year.

This certification option in special education is built on the assumption that most supervisory operations in education are, in principle, generic, with their fundamentals of theory and practice in common. The major distinguishing characteristic of this option is the application of supervisory theory to the context of the special education of exceptional children and youth. Specific emphasis is placed upon activities, relationships, facilities, agencies, persons, and processes that are peculiar to or have particular relevance to special education. The student completes a plan of studies encompassing such courses as supervision, curriculum development, current and legal issues in the specialization, and a supervision internship.

Urban Education

The School of Education Post-Baccalaureate Certificate in Urban Education addresses the social-emotional and learning needs of diverse students in urban schools locally and nationally in an effort to achieve greater equity in opportunity and experience. The program enrolls both preservice and in-service teachers.

The Urban Education certificate program aims to increase a teacher's level of effectiveness for their students in urban schools as well as increasing their marketability and longevity in the field. The certificate program is built upon the following themes developed through asset-based knowledge, understanding, attitudes, dispositions, beliefs, skills and practices:

- Social/Cultural/Relational Dynamics - deeply understanding our students, their families and communities, to best develop meaningful relationships from which to learn and teach.
- Authentic Teacher Self-Excavation - teachers deeply understanding themselves and their impact on students.
- Pedagogical/Curricular/Classroom Learning and Dynamics - deeply understanding and creating positive, responsive, effective classroom student experiences.

The program leads to a University Certificate in Urban Education and does not lead to commonwealth certification.

Certificate Requirements

The Certificate in Urban Education is a 15-credit program. Students are required to apply to the certificate program. They must have earned a baccalaureate degree at an accredited institution and meet the University's requirements for admission to graduate school. Applicants need not be concurrently enrolled in a graduate degree program in the School of Education.

For additional degree requirement information, refer to the Center for Urban Education website and the Department of Instruction and Learning website.

Vision Education

- Doctor of Philosophy (PhD)

The goal of the Blindness/Vision Impairment/Orientation and Mobility PhD degree is the preparation of leadership personnel to assume academic faculty positions at the university level. The focus of preparation for the PhD program is on teaching graduate and undergraduate courses, mentoring graduate students, developing a research agenda that will result in funded and published research and translating research outcomes for the improvement of educational and related service programs for individuals with disabilities. PhD candidates are mentored by a faculty adviser who shares their research interests and are supported by graduate faculty in Special Education. Students may focus their studies in one or more of the following areas: blindness, vision impairments, or orientation and mobility. The PhD program is writing and research-intensive and PhD candidates will have multiple opportunities to learn and participate in the review of research literature, the preparation and submission of research grant proposals, the design and implementation of research studies, and the preparation and dissemination of research reports.
Master of Education (MEd)
The School of Education at the University of Pittsburgh requires all students pursuing a Master's of Education degree (MEd) to complete a minimum of 36-credits, 12 of which are the required graduate-level general education courses listed.

Applicants may choose to pursue the MEd degree through a variety of options (with or without certification):

- MEd degree with single certification as a Teacher of Students with Visual Impairments (TVI)
- MEd degree with single certification as an Orientation and Mobility (O&M) Specialist
- MEd degree with dual certification (TVI and O&M)
- MEd degree without certification but with a Vision Studies Area of Concentration

Students pairing the degree in combination with any certification option will complete additional credits hours to fulfill program requirements. Additionally, the MEd program requires students to successfully complete the Vision Studies Comprehensive Exam. The Comprehensive Exam is a proctored three-hour exam based on the student's area of concentration and is completed towards the end of their MEd degree program.

Single Certification - Teacher of Students with Visual Impairments (TVI)
The University of Pittsburgh, School of Education Vision Studies Program offers a hybrid program of study (online and on-campus) to prepare professionals to serve the educational needs of children who are blind or visually impaired. TVIs provide educational services to students' birth to 21 in a variety of educational settings, which include early intervention or preschools, public school classrooms, resource rooms, specialized schools, or the home. Graduates provide direct assessment and instruction in vision-specific subject areas.

The TVI certification courses are typically offered in a two-course per term pairing. Students may also combine a Master's of Education (MEd) degree with their TVI certification program. For additional curriculum details regarding this combination, please see the MEd degree with single certification as a Teacher of Students with Visual Impairments (TVI).

TVI certification allows the teacher to provide educational services needed by students who are blind or visually impaired. These services include:

- Assessing and evaluating educational strengths and needs including educational functional vision assessments
- Recommending appropriate service delivery plans
- Providing training in the use of adapted materials and devices
- Consulting with classroom teachers and parents regarding the impact of visual impairment on development and learning
- Direct instruction in:
  - Compensatory Academic Skills
  - Career Exploration
  - Sensory Efficiency Skills
  - Social Skills
  - Assistive Technology
  - Recreation and Leisure and activities
  - Self-Determination Skills
  - Techniques of Daily Lives

Single Certification - Orientation and Mobility (O&M)
The University of Pittsburgh, School of Education Vision Studies Program offers a hybrid program of study (online and on-campus) to prepare professionals to serve the orientation and mobility (O&M) needs of children and adults who are blind or visually impaired. O&M Specialists provide the necessary instruction for safe, independent travel. The Vision Studies Program provides graduate students with competencies necessary to teach individuals from early childhood through adulthood. Training includes integrating skills such as orientation in space with the appropriate selection and use of mobility devices and/or optical devices for utilization of residual vision.

The O&M certification courses are offered online during the Fall and Spring semesters, as well as on-campus during the Summer. Students may also combine a Master's of Education (MEd) degree with their O&M certification program. For additional curriculum details regarding this combination, please see the MEd degree with single certification as an Orientation and Mobility (O&M) Specialist.

Graduates are eligible for national certification as an O&M Specialist by the Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP). With this certification, the graduate is qualified to provide O&M services needed by children and adults who are blind or visually impaired in public schools, rehabilitation agencies, Veteran's Administration hospitals. With this certification, the graduate is qualified to provide educational and rehabilitation services. These services include:

- Assessing and evaluating O&M strengths and needs including O&M functional vision assessment
Recommending appropriate service delivery plans

Providing training in the use of mobility materials and devices (e.g. prescriptive cane, optical and non-optical devices, dog guide, and electronic devices)

Consulting with other education and rehabilitation personnel and family regarding the impact of blindness and visual impairment on the O&M process

Direct instruction in:
  - Utilization of mobility devices
  - Gross motor development
  - Visual efficiency skills
  - Concept and sensory development
  - Utilization of residual vision
  - Spatial orientation
  - Instruction in travel in both indoor and outdoor environments
  - Utilization of mass transportation systems
  - Communication and social skills
  - Self-determination skills
  - Utilization of tactile, visual, and auditory maps
  - Familiarization to familiar and unfamiliar environments

Dual Certification - TVI and O&M

Applied Behavior Analysis

Education of Mental and Physical Disabilities, PhD

The University of Pittsburgh School of Education's Doctor of Philosophy (PhD) programs prepare students to be nationally competitive and highly qualified for research careers in both academic and non-academic institutions. Our full-time, research-intensive PhDs produce scholars who demonstrate excellent writing and research skills, independent scholarship and productivity, and proficiency in teaching. Under the guidance of our distinguished graduate faculty, students will have the opportunity to produce peer-reviewed publications, present at professional conferences, and collaborate on grant-writing and review, positioning them to excel in their careers as researchers and faculty. Because the PhDs are full-time, students can be fully immersed in their coursework and research in preparation for an impactful scholarly career.

Special Education - Doctor of Philosophy (PhD)

The goal of the Special Education PhD degree is the preparation of leadership personnel to assume academic faculty positions at the university level. The focus of preparation for the PhD program is on teaching graduate and undergraduate courses, mentoring graduate students, developing a research agenda that will result in funded and published research and translating research outcomes for the improvement of educational and related service programs for children and youth with disabilities. PhD candidates are mentored by a faculty adviser who shares their research interests and are supported by graduate faculty in Special Education. Students may focus their studies in one or more of the following areas: applied behavior analysis, autism, emotional and behavior disorders, learning disabilities, or severe disabilities. The PhD program is writing and research-intensive and PhD candidates will have multiple opportunities to learn and participate in the review of research literature, the preparation and submission of research grant proposals, the design and implementation of research studies, and the preparation and dissemination of research reports. A limited amount of financial assistance in the form of doctoral fellowships is available for full time students on a competitive basis.
PhD Core Curriculum

Methods Courses

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102 and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

Education of Mental and Physical Disabilities Requirements

The major goal of the Special Education PhD and Ed.D degrees is the preparation of leadership personnel. Graduates must have leadership skills to identify the significant issues of the day and the ability to make decisions about the most effective use of new technologies and information to serve the nation's disabled population. They will also become researchers and scholars committed to furthering the knowledge and empirical base needed for enhancement of special education practice and of the training of special education personnel. Graduates will serve infants, children, youth, and adults with disabilities through roles as teacher educators, researchers, administrators, consultants, and supervisors.

Students complete either a PhD or Ed.D in Special Education with a particular emphasis in learning disabilities, deaf and hard of hearing, vision studies, orientation and mobility, or early intervention. As they have in the past, it is expected that graduates of this program will have a significant impact on the quality of educational opportunities for persons with disabilities by providing leadership for local education agencies, state educational agencies, private foundations and agencies, colleges, and universities.

This option is available for students with at least three years experience in teaching children with Mental and Physical Disabilities. (i.e., learning disabilities, mental retardation, etc.). Students may choose between the Ph.D. or Ed.D. Both programs require a minimum of 90 credits of coursework including dissertation research. The Ph.D. requires a one year research residency on campus.

Language, Literacy and Culture, EdD

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.
The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp:** The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

### CORE COURSES Credits / Units: 24 Total

**Foundation Courses**
- EDUC 3002 - FOUNDATIONS 1:  
- EDUC 3003 - FOUNDATIONS 2: LEADERSHIP IN GROUPS AND ORGANIZATIONS  
- EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION  
- EDUC 3005 - FOUNDATIONS 4: POLICY AS A LEVER FOR CHANGE

**Practitioner Inquiry Courses**
- EDUC 3001 - PRACTITIONER INQUIRY 1  
- EDUC 3006 - PRACTITIONER INQUIRY 2  
- EDUC 3007 - PRACTITIONER INQUIRY 3  
- EDUC 3008 - PRACTICUM INQUIRY 4

**SUPERVISED PRACTITIONER INQUIRY**
Students will identify, review and synthesize relevant scholarship that supports as inquiry into a problem of practice.
EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.

EDUC 3012 - SUPERVISED INTERNSHIP

GUIDANCE IN SCHOLARLY PRACTICE

Guidance in Scholarly Practice: Based on research interests, the students will be required to write a manuscript that reports on the improvement science process.

Portfolio of Scholarly Practice: The portfolio of scholarly practice will provide evidence of learning and success in foundations, inquiry, and ARCO experiences.

EDUC 3099 - GUIDANCE IN DOCTORAL DEGREE

Language, Literacy and Culture Curriculum

Language, Literacy and Culture ARCO Courses

- IL 3012 - CRITICAL READING IN LANGUAGE LITERACY AND CULTURE 1
- IL 3013 - CRITICAL READINGS IN LANGUAGE, LITERACY, AND CULTURE 2
- IL 3014 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 1
- IL 3015 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 2

Language, Literacy and Culture, PhD

The Language, Literacy, and Culture (LLC) PhD is for students who aim to conduct research on the interconnection of culture, language, and literacy in both formal and informal educational settings. The goal of the LLC program is to develop interdisciplinary knowledge complemented by specialized knowledge of teaching and learning in foreign and second language, literacy, social studies, and early childhood education. We frame the exploration of teaching and learning within perspectives that promote equity, social justice, and democratic values.

Faculty and students in our program study issues such as:

- Civic education and racial identity among disenfranchised populations
- Critical historiography in secondary social studies classrooms
- Sociocultural approaches to foreign and second language acquisition
- Comprehension instruction in the context of text-based discussions of informational texts
- Writing, language, and grammar instruction in high school English classrooms
- New and multiple literacies in urban classrooms
- Representations in children's literature
- Immigrant families' home literacy practices

Faculty are actively involved in collaborations within the University of Pittsburgh World History Center; Center for Urban Education; Women's Studies; College of Arts and Sciences; Center for Race and Social Problems; and with University Prep, a 6-12 partnership school; and Falk School, a K-8 laboratory school.

As members of the LLC community, students engage closely with and learn from faculty who conduct research in the field and have a strong commitment to high-quality teaching. Through a combination of coursework, research collaborations with faculty, and teaching and supervision practicum experiences, students prepare for careers in research and teaching universities, research institutes, educational non-profits, and educational consulting.
The PhD in Language, Literacy, and Culture includes a core set of courses designed to engage students in an exploration of teaching and learning from a variety of perspectives: linguistic, critical, psychological, historical, and sociocultural.

Curriculum

PhD students in the Language, Literacy, and Culture program who enter the program without a Masters degree in a relevant field are required to take eight to nine courses within the major field of LLC, five research methods courses, six courses in a cognate (supporting) field, the first year seminar, annual writing workshops, and elective courses as needed. Students with a Masters degree in a related field can transfer credits toward the PhD with approval by the LLC faculty. PhD students are also required to complete one research practicum and one teaching practicum. Furthermore, all PhD students are required to be full-time students. PhD students must successfully pass required doctoral milestone projects in order to continue in the program. The PhD program culminates with completion of a doctoral dissertation.

Major Field (24-27 Credits - 15 credits minimum at 3000 level.
(If a doctoral-level course from a department other than DIL is numbered in the 2000, it can count as a 3000 level course on the plan of studies.)
IL 3248 (required)

Cognate Field (0, 9 or 18 Credits)
Courses in academic discipline studies supportive of the candidate's area of specialization. These credits must be in coursework outside of the School of Education.

Research Methods (15 credits)
EDUC 3104 (required)
EDUC 3100 (required)
EDUC 3105 (required)
Doctor of Philosophy (PhD) Degree Requirements

The Doctor of Philosophy degree in the School of Education is a research-intensive training model that prepares students to be nationally competitive for research careers in both academic and non-academic institutions.

Admissions requirements include the GRE for both national and international applicants. International students require a minimum of 100 or higher TOEFL composite score with sub-scores of 21 or higher or 7.0 IELTS with sub-scores of 6.0 or higher. After screening, a small group of applicants will be interviewed prior to a final decision. Only applicants committed to full-time study will be considered (except in unusual circumstances where the applicant works in a setting where research opportunities are available such as a research assistant on a funded project at a research institute).

Plan of Studies

Prior to advancement to the formal stage called Doctoral Study, the student, in consultation with the academic advisor, must complete a plan of studies that conforms to program requirements. The plan of studies, approved by the academic advisor, the program coordinator, and department is filed in the Office of Admissions and Enrollment Services.

PhD students are required to file a Plan of Studies during the first year in the program. In formulating the doctoral Plan of Studies, both the student and the academic advisor must pay close attention to these School of Education requirements as well as requirements specific to the particular program or department in which the degree specialization is taken. It is the responsibility of the student to learn particular requirements from the academic advisor. The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh.

Courses approved for transfer credit must be listed individually on the plan of studies. Also, when a student plan of studies lists directed study credits, a directed study agreement form must be completed, signed by both the student and faculty supervisor, and submitted for each directed study at the time of registration. Forms are available from the department.

Any changes in the plan of studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed with the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved plan of studies.

Credit Requirements

The PhD degree requires a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study if approved on a plan of studies. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree. Department and program websites list specific degree requirements.
Acceptance of Transfer Credits

PhD students apply a maximum of 30 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (see Acceptance of Transfer Credits). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. When approved, transfer credits must appear on the student's Plan of Studies. The registrar, after notification of acceptance of transfer credits, will enter the individual transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA = 3.00) or its equivalent.
- The course must be judged relevant to a student's doctoral Plan of Studies by the program or department.
- The course must be approved for equivalent graduate degrees at the accredited institution, extension, or off-campus center of other institutions at which the course was taken.

The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh. However, under certain circumstances, a student may earn in an accredited graduate institution other than the University of Pittsburgh a limited number of credits toward a doctoral degree.

Doctoral students desiring to take courses at another institution following admission to the University of Pittsburgh should review the course descriptions and receive approval from their academic advisors and program or department prior to registering for those courses if they wish to ensure that these credits will be acceptable for transfer.

Residency

PhD students are required to be enrolled for full-time study, including involvement in research activities.

Supporting Field

PhD students are required to complete a minimum of nine credits in an academic discipline outside of education. This requirement may be met in one of three ways:

1. For a student who does not have a bachelor's degree or an equivalent number of credits to that for a bachelor's degree in an appropriate academic discipline, a minimum of 18 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration (e.g., Latin American Studies or psycholinguistics) as approved by the program or department. No more than 6 of these credits may be used to satisfy research methodology requirements.

2. For a student who has a bachelor's degree or an equivalent number of credits for a bachelor's degree in an academic discipline, a minimum of 9 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration as approved by the program or department. None of the 9 credits may be used to satisfy research methodology requirements.

3. For a student who has a master's degree or an equivalent number of credits toward a master's degree in a relevant academic discipline outside of education, no additional credits outside the School of Education need to be taken.

Supervised Research

PhD students are required to complete a supervised research experience that results in a written report of the experience. Enrollment for six credits of supervised research, internship, practicum, or directed study is required.

Statute of Limitations

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the PhD must be completed within a period of 10 years (or 8 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Doctoral Preliminary Evaluation
Each doctoral student is required to take a preliminary evaluation designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the initial phase of graduate study, and the student's potential to apply research methods independently. The preliminary evaluation is administered by the program or department to which the student has been admitted. Procedures of administration are available from the program or department.

**Advancement to Doctoral Study**

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.30 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh;
- have a Plan of Studies approved by the academic advisor and the program coordinator on file in the Office of Admissions and Enrollment Services; and
- have passed the doctoral preliminary evaluation.

**Comprehensive Examination**

After advancement to doctoral study, each doctoral student is required to take a comprehensive examination. The comprehensive examination is constructed, administered, and scored by the department or program to which the student has been admitted. Procedures and schedules of administration are available from the department or program.

A student must be registered in the term during which the comprehensive examination is taken. In no case may the student be graduated in the same term in which the comprehensive examination is taken. After the comprehensive examination is passed, the student has the remaining time specified by the statute of limitations to complete all remaining doctoral degree requirements. Satisfactory completion of the doctoral comprehensive examination requirement is part of the demonstration of doctoral competency.

Ordinarily, students do not register for dissertation credits until they have passed the comprehensive examination.

**Doctoral Competency**

Each doctoral student is required to demonstrate doctoral competency by satisfactorily completing the supervised research requirement and doctoral comprehensive examination. The form certifying that a student has demonstrated doctoral competency is initiated by the student's academic advisor, signed by the academic advisor, the program coordinator, and the department chairperson, and then sent to the Office of Admissions and Enrollment Services. The dean/associate dean notifies the student that doctoral competency has been demonstrated.

**Doctoral Committee**

For the PhD student, the doctoral committee consists of the research advisor and at least three other members, including one member from another department outside the School of Education at the University of Pittsburgh or from an appropriate graduate program outside education at another academic institution. The research advisor and a majority of the total committee must be full or adjunct members of the graduate faculty of the University of Pittsburgh. Current graduate faculty membership may be found on the University's Institutional Research website.

The program faculty, the department chairperson, and the dean/associate dean must approve membership on and subsequent changes in the doctoral committee. After the program has approved the doctoral committee, the research advisor initiates the "Proposed Doctoral Committee" form to obtain the signatures of the program coordinator, the department chairperson, and the dean/associate dean. The dean/associate dean must give final approval of the doctoral committee before the overview examination may be scheduled.

**Dissertation Overview**

The dissertation overview is a written proposal and must be presented to the doctoral committee for approval after doctoral competency has been demonstrated.

**The Overview Examination**

The overview examination is conducted by the doctoral committee, is chaired by the research advisor, and is open to any faculty member of the graduate faculty of the University wishing to attend. Although any faculty member may participate in the examination, only members of the doctoral committee may be present during the final deliberation and vote on approving the overview. Each member of the doctoral committee must sign the
overview form and vote on approving the overview. The committee must unanimously approve the overview in order for the student to be advanced to doctoral candidacy.

Dissertation

*Students should review the information detailed under Dissertation and Abstract and Final Oral Examination for University-wide regulations regarding dissertations and dissertation defenses.* School of Education-specific rules follow:

The Dissertation Defense

The same rules apply here as detailed under The Overview Examination above.

Vote on the Dissertation Defense

Each member of the doctoral committee must sign the dissertation defense form and vote to pass or fail the student on the dissertation defense. If the decision of the committee is not unanimous, the case is referred to the dean/associate dean for resolution.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

At least one week prior to the end of the term, the dissertation is submitted in final form to the Office of Admissions and Enrollment Services along with the following materials:

- Signed dissertation defense form
- Signed ETD approval form
- Two copies of the dissertation abstract initialed by the research advisor
- Completed ProQuest Agreement forms
- Completed Survey of Earned Doctorate form
- Receipt from the Student Payment Center for payment of the dissertation processing fee
- Two copies of the title page

Information concerning requirements for preparing the abstract, the forms to be completed, and the amount of the fees to be paid is available in the Office of Admissions and Enrollment Services. The dissertation and abstract will be examined there to see that they are prepared in an acceptable form and style. For dissertation preparation style information refer to the ETD Format Guidelines. Questions not answered in these documents regarding form and/or style will be referred to the dean/associate dean for review and final decision.

Mathematics Education, PhD

The Doctor of Philosophy (PhD) in mathematics education emphasizes the development of scholarly attainment in the theory, research, and practice of mathematics education. Graduates of this program are prepared to be faculty members in research-focused colleges or universities, researchers in non-academic institutions, or leaders in schools, universities, research facilities or other settings in which mathematics education takes place. From the beginning of the program, students have opportunities to work with faculty in research activities, eventually developing their own lines of interest, which they pursue through the dissertation phase and beyond. Currently, potential areas of work include studying student and teacher learning, particularly in urban settings, with respect to race and other issues of equity-including identifying mathematics instructional practices that provide high-quality learning opportunities to all students; studying how teachers can be supported to develop high-quality and equitable forms of practice; and understanding how students' and teachers' learning is influenced by the larger institutional settings in which they study and work.

Doctor of Philosophy Degree

PhD Core Curriculum

Methods Courses
Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

Doctor of Philosophy Degree

The Doctor of Philosophy (PhD) in mathematics and science education emphasizes the development of scholarly attainment in the theory, research, and practice of mathematics and science education. Graduates of this program are prepared to be faculty members in research-focused colleges or universities, researchers in non-academic institutions, or leaders in schools, universities, research facilities or other settings in which mathematics and science education takes place. From the beginning of the program, students have opportunities to work with faculty in research activities, eventually developing their own lines of interest, which they pursue through the dissertation phase and beyond. Currently, potential areas of work include studying student and teacher learning, particularly in urban settings. In this work we aim to identify mathematics or science instructional practices
that provide high-quality learning opportunities to all students; study how teachers can be supported to develop high-quality and equitable forms of practice; and understand how students' and teachers' learning is influenced by the larger institutional settings in which they study and work.

**PhD Core Curriculum**

**Methods Courses**

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the mentods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

**First Year Seminar**

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

**Special Education, EdD**

**EdD Curriculum**

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation**: The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp**: The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars**: You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

**SCHEDULE**
### CORE COURSES
Credits / Units: 24 Total

#### Foundation Courses
- EDUC 3002 - FOUNDATIONS 1: ON-RAMP
- EDUC 3003 - FOUNDATIONS 2: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS 4: POLICY AS A LEVER FOR CHANGE

#### Practitioner Inquiry Courses
- EDUC 3001 - PRACTITIONER INQUIRY 1
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTICUM INQUIRY 4

#### SUPERVISED PRACTITIONER INQUIRY
Students will identify, review and synthesize relevant scholarship that supports as inquiry into a problem of practice.
- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

#### LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.
- EDUC 3012 - SUPERVISED INTERNSHIP

#### GUIDANCE IN SCHOLARLY PRACTICE

**Guidance in Scholarly Practice:** Based on research interests, the students will be required to write a manuscript that reports on the improvement science process.
Portfolio of Scholarly Practice: The portfolio of scholarly practice will provide evidence of learning and success in foundations, inquiry, and ARCO experiences.

Early Intervention, PhD

PhD Core Curriculum

Methods Courses
Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminar
To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

Requirements

- IL 3509 - ADV SEMINAR: EARLY INTERVENTION

Note:
The remaining major field area courses are chosen according to the interests and background of the candidate.

Research Methodology and Practicum (18 credits)

- Approved courses in Research Methodology: 12 credits
- Approved Research Practicum: 6 credits

Supporting Field (9-18 credits)

Nine credits are taken outside of the School of Education if the student's bachelor's degree is in an academic discipline or the equivalent. Eighteen credits are taken outside the School of Education if the degree is not in an academic discipline.

Electives

Electives are chosen to bring breadth and/or depth to the program of study. Because of the broad areas of specialty within the field of Special Education, these courses may be taken within the School or from across the University. Electives are taken as-needed to complete a minimum of 90 credits for the degree.

Dissertation (18 credits)

Vision Studies, PhD

Blindness/Vision Impairment/Orientation and Mobility, Doctor of Philosophy (PhD)

Total of 90 credits minimum (maximum of 30 credits form master's degree)

Major Field (DIL) Studies

30-36 credits with at least 18 credits at the 3000 level with a minimum of 15 credits at the University of Pittsburgh

- IL 3590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Research Methodology (12 credits minimum)

Approved courses in Research Methodology - 12 credits

Research Practicum Courses (6 credits)

Approved Research Practicum - 6 credits

Academic Area (9-18 credits)

Nine credits are taken outside of the School of Education if the student's bachelor's degree is in an academic discipline or the equivalent. Eighteen credits are taken outside the School of Education if the degree is not in an academic discipline. 9-18 credits
Electives (Credits variable)

Electives are chosen to bring breadth and/or depth to the program of study. Because of the broad areas of specialty within the field of Special Education, these courses may be taken within the School or from across the University.

Dissertation (18 credits)

Dissertation - 18 credits

Foreign Language Education with TESOL Certificate, MEd

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Grade Point Average/Academic Probation

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be
recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.
Psychological Perspectives on Education

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

Social and Cultural Perspectives on Education

- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

Research Methods

- EDUC 2200 - DISCIPLINED INQUIRY *
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS
  *Enrollment limited to MAT students

Additional Requirements

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.
Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
- if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper
Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Master of Education Degree with TESOL Certificate

This option permits qualified individuals for the MEd with a specialization in foreign language education to be considered upon application by the Department of Instruction and Learning and by the Department of Linguistics for admission to the University of Pittsburgh certificate program in the Teaching of English to Speakers of Other Languages (TESOL). If accepted, students combine course work for the MEd in foreign language education with required courses for the TESOL certificate. Students complete a minimum of 37 credits in this combined specialization. The University of Pittsburgh TESOL certificate is not to be confused with state certification for teaching in the public elementary or secondary schools. The degree is ideal for individuals seeking positions as English language teachers in other countries or in university English Language Institutes. Each applicant who is not a native speaker of English must: (1) achieve a score of 100 or higher on the internet-based TOEFL (Skill Requirements: Reading and Listening - High; Speaking and Writing - one skill must be at the level of Good) or 7.5 or higher on the IELTS (Skills Requirement: Speaking and Writing - combined minimum of 13) and (2) have good spoken English skills.

Required Course

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION

Social and Cultural Perspectives on Education

Choose 3.0 credits from the following courses:

- IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- IL 2256 - ISSUES IN FOREIGN LANGUAGE ED
- IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

Foreign Language Education Elective

- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2195 - PRACTICUM ESL TEACHING
- IL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Applied Behavior Analysis, MEd

Program Studies-Applied Behavior Analysis
IL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
IL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
IL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
IL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
IL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS
IL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS

Program Studies-Approved Electives

Choose 9.0 credits from the following courses

- IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- IL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM
- IL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- IL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- IL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- IL 2529 - BRAILLE
- IL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- IL 2531 - EDUCATION OF CHILDREN WITH VI 1
- IL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- IL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- IL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM
- IL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Psychological Perspective on Education

Choose 3.0 credits from the following courses.

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE
- PSYED 2127 - HUMAN LEARNING
- PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE

Research Methods

Research Methods: Choose 3.0 credits from the following 2 courses

- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY

Social and Cultural Perspectives on Education

Choose 3.0 credits from the following courses

- ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY
- ADMPS 2133 - GENDER AND EDUCATION
- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
- ADMPS 2344 - LEADERSHIP IN SERVICE LEARNING
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION
- HPA 2322 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2109 - GENDER IN EDUCATION

Research Seminar

- IL 2590 - RESEARCH SEMINAR IN SP ED

**Combined Accelerated Studies in Education (CASE), MEd**

**Requirements**

After completion of the junior and senior years of study in the undergraduate Combined Accelerated Studies in Education (CASE) program the student can apply for admission to the graduate CASE Program. The 40 credit program leads to an MEd degree, PreK-4 certification and PreK-8 special education certification.

- IL 2290 - RESEARCH SEMINAR FOR MED STUDENTS
- IL 2434 - MATH AND SCIENCE METHODS 2 (PRE K - GRADE 4)
- IL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- IL 2512 - ASSMNT INSTRUC-HIGH INCIDNC DISAB
- IL 2513 - INSTRNL METH-HIGH INCIDNC DISABS
- IL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- IL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- IL 2751 - METHODS AND MANAGEMENT IN SP ED
- IL 2800 - STUDENT TEACHING-EARLY CHLDHD ED
- IL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES
- IL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION

**Early Childhood Education, MEd**
The program is intended for individuals who already have an Early Childhood Education Certificate or whose career paths do not require them to have a certificate. Individuals who complete the post-baccalaureate Early Childhood Education Certification program (Primary Plus) at the University of Pittsburgh may apply up to 18 credits from their certification studies towards the Master of Education program. Application to the M.Ed. program must be made within three years of completing the certification program. Course work in the Master of Education program is intended to enhance the continuing professional development of early childhood teachers beyond the skills and competencies acquired during certification study and to assist them in gaining greater self-determination through heightened awareness and understanding of their own teaching practice. Students complete a minimum 36-credit-hour program and must fulfill all curriculum and degree requirements for graduation.

Basic Areas of Education (12 credits)

Education and Human Development - 3 credits
Education and Society - 3 credits
Intro to Research Methodology - 3 credits
• IL 2290 - RESEARCH SEMINR FOR MED STUDENTS or
• IL 2690 - RESEARCH SEMINAR ONLINE

Methods Courses

• IL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD
• IL 2270 - INTEGRATED ART & MUSIC IN ELEMENTARY SCHOOL
• IL 2433 - MATH/SCIENCE INSTRUCTION FOR YOUNG LEARNERS 1 (PREK - GRADE 4)
• IL 2434 - MATH AND SCIENCE METHODS 2 (PRE K - GRADE 4)
• IL 2905 - TEACHING INFANTS, TODDLERS AND PRESCHOOLERS
• IL 2208 - READING/Writing METHODS 1: PRE K - GRADE 1
• IL 2209 - READING WRITING METHODS 2: GRADE 2-4
• IL 2268 - SOCIAL STUDIES METHODS PRE-K - 4
• IL 2047 - INTEGRATED CURRICULUM PRE-K-4
• IL 2563 - SEM: INCLUSION EARLY CHILDHOOD
• Other Elective Approved by Advisor - 3 credits

Major Field Studies

• IL 2041 - INTRO TO EARLY CHILDHOOD ED
• IL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES
• Advanced Course in Family Studies or Approved Elective - 3 credits
• Practicum or Approved Elective - 3 credits

Special Ed

One of the following:

• IL 2500 - FOUNDATIONS OF SPECIAL EDUC
• IL 2501 - STUDENT W/DISAB IN ELEM CLSSRM
• IL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS
• IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Early Intervention for Children with Disabilities Focus on Early Intervention, MEd
The Early Intervention program is an academic Master's program that prepares individuals to work with young children with disabilities (ages birth to 5 years) and their families. A hands-on, carefully supervised approach is used to assist students in developing competence in assessing young children with a variety of disabilities and planning, implementing, and evaluating appropriate educational programs for them. Students are taught to work in partnership with families and to collaborate with professionals from other disciplines. Consideration is given to a wide range of service delivery models including home, center, school, and hospital-based programs. Special emphasis is placed on preparing students to address the needs of young children with disabilities in natural, community settings that are designed for the inclusion of all children through direct and consultative service delivery.

**Master's Degree Requirements**

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

**Common Requirements**

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

**Acceptance of Transfer Credits**

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

**Grade Point Average/Academic Probation**

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.
Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

Psychological Perspectives on Education

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
Social and Cultural Perspectives on Education

EDUC 2100 - EDUCATION AND SOCIETY
EDUC 2102 - HISTORY OF EDUCATION
EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
EDUC 2105 - SOCIOLOGY OF EDUCATION
EDUC 2106 - EDUCATION AND CULTURE
EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
EDUC 2109 - GENDER IN EDUCATION
EDUC 2110 - GENDER AND EDUCATION
EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

Research Methods

EDUC 2200 - DISCIPLINED INQUIRY *
EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
EDUC 2205 - FIELD METHODS
*Enrollment limited to MAT students

Additional Requirements

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.
Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
- if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements
Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

**Master of Education Degree - Focus on Early Intervention**

A hands-on, carefully supervised approach is used to assist students in developing competence in assessing young children with a variety of disabilities and planning, implementing, and evaluating educational programs for them. The specialization emphasizes the development of collaborative partnerships with families and with other professionals in the delivery of services. Special consideration is given to preparing students to address the needs of young children with disabilities in community settings that are designed for the inclusion of all children. Course work and practicum experiences are based on evidenced-based practices. Students complete a minimum of 37 credit hours beyond six hours of prerequisite course work.

**Intro to Research Methodology**

Choose 3.0 credits from the following courses:

- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY
- IL 2563 - SEM: INCLUSION EARLY CHILDHOOD
- IL 2561 - PROGRAMMING IN EARLY INTERVENTION
- IL 2562 - ASSESSMENT YOUNG CHILDREN DISABILITY
- IL 2582 - WORKING WITH FAMILIES
- IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

**Practicum**

Choose 6.0 credits from the following courses. You must take one of the courses twice.

- IL 2850 - PRACTICUM - PRESCHOOL
- IL 2852 - PRACTICUM - INFANTS & TODDLERS

**Seminar**

Choose 2.0 credits from the following courses.

- IL 2594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1
- IL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES
- IL 2519 - ORAL MOTOR AND FEEDING STRATEGIES: YOUNG CHILDREN WITH DISABILITIES
- IL 2518 - POSITIONING, HANDLING AND MOBILITY: YOUNG CHILDREN WITH DISABILITIES
- IL 2507 - EARLY INTERVENTION CONSULTATION
- IL 3509 - ADV SEMINAR: EARLY INTERVENTION

**Approved Electives**

Approved Electives - 6.0 credits

**Prerequisites**
It is suggested that the courses below are taken as prerequisites, although they may be taken concurrently early in the student's program.

Foundations of Special Education - 3 credits
Child Development - 3 credits

**Elementary Education, MEd**

This is an online program. For more information about our online programs see Pitt Online.

**What are the goals of the MEd program?**

- To enable teachers to enhance both their understanding and ability to meet the needs of the diverse learners in their classrooms.
- To enable teachers to advance their understanding of one or more content areas.
- To enable teachers to broaden their understanding of educational research, educational theories as they apply to practice, action research practices, and educational policy.

**What are the MEd program options in Elementary Education?**

There is one 36-credit MEd option, however, those students who received their teaching certificate from the University of Pittsburgh will be admitted to the program with advanced standing. These students will need to take only 18 additional credits and will use 18 credits from their graduate certification program to complete the 36-credit requirement.

Similarly, if a student completed a graduate education program at another university, he/she will be granted up to 12 advanced credits. These courses will be transferred into the 36-credit MEd program and an additional 24 credits will be completed at the University of Pittsburgh.

**Who is eligible for each of these options?**

- Former certification candidates who completed their coursework at the University of Pittsburgh
- People who completed a certification in an undergraduate program
- People who completed a graduate-level certification program at a university other than the University of Pittsburgh
- International students who are not eligible for a teacher certification program but would like to earn a masters degree in elementary education

**How will I design my program?**

If you meet program requirements and are admitted into the MEd program, you will receive a letter offering you admission with the name of your advisor. Once you accept the offer of admission, contact your advisor to begin planning your program. Registration is done online so the curricula for the programs found in this website help you determine which courses you can choose to take.

**What other requirements will there be in addition to the courses?**

- During the last term of your program, contact your advisor to request a take-home comprehensive exam. You are to take only three hours to complete it and must return it within one week after receiving it.
- Within the first two weeks of the term in which you will be graduating, you must contact the Admissions and Enrollment Center (412-648-2230) and request that an application for graduation be sent to you or you can stop in (5300 Posvar) and pick up the necessary paperwork.

**Master's Degree Requirements**
The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a master degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Grade Point Average/Academic Probation

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.
Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

Psychological Perspectives on Education

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

Social and Cultural Perspectives on Education

- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
Research Methods

- EDUC 2200 - DISCIPLINED INQUIRY *
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS

*Enrollment limited to MAT students

Additional Requirements

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.
Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
- if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Master of Education Degree
The MEd is a 36-credit program specializing in elementary education. Applicants are required to have a 3.00 undergraduate GPA and to be certified in elementary education.

**English and Communications Education, MAT**

The University of Pittsburgh, School of Education, offers two post-baccalaureate programs for Secondary English and Communications teacher certification (grades 7-12), the Master of Arts in Teaching (MAT) Program and Instructional I Teaching Certificate. MAT certification is available in Comprehensive English and in three areas of Communication - Theater Arts Concentration, Film Media Concentration, and Speech Concentration. Certification in more than one English or Communication area is also available. Details of the MAT program are outlined below:

- requires Teaching Interns to take and pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)
- is completed in three terms (fall, spring, summer 1 session) beginning in late August of the admission year and concluding in mid-June of the following year
- consists of 36 credits of graduate course work combined with a maximum 4.5 day per week internship in a local school district from September through June

*Discover more about our programs through the words of current students and alumni in a Teacher Certification video. In addition, find out more about the new Urban Scholars via videos that follow four students as they go through a full year of the program, which prepares preservice teachers to be successful in urban schools by pairing them with skilled mentors who help build positive relationships with students.*

Interested in finding out more about our teacher education programs? Admissions representatives can answer questions you have at an upcoming Teacher Education Information Session.

**MAT Program**

- IL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
- IL 2245 - TEACHING & LEARNING IN SECONDARY ENGLISH 2
- IL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- IL 2820 - TEACHING AND LEARNING IN SECONDARY ENGLISH 3
- IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- IL 2881 - INTERNSHIP-ENGLISH OR COM EDUC
- IL 2824 - STUDENT TEACHING SEMINAR IN ENGLISH OR COMMUNICATION EDUCATION
- IL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2

**English and Communications Education, MEd**

Students complete a minimum of 36 credits of specialized study in English education. All students must pass a comprehensive examination to complete the degree.

Students who have completed the English Education certification program at the University of Pittsburgh may transfer up to 18 graduate-level course credits from their certification coursework to the MEd program. Students should consult their advisors for the exact number of credits they can transfer.
MEd English and Communications Education Core Curriculum

24 credits from the following 6 courses:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY
- IL 2235 - THEORY AND PRACTICE IN TEACHING LANGUAGE, GRAMMAR AND USAGE
- IL 2239 - THEORY AND PRACTICE IN TEACHING NEW MEDIA AND LITERACIES
- IL 2240 - THEORY AND PRACTICE: ASSESSMENT IN ENGLISH EDUCATION
- IL 2243 - THEORY & PRAC IN TCHNG WRITING
- IL 2246 - THRY & PRAC: MULTI-CULTURAL LIT
- IL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Research Methodology

Choose 3.0 credits from the following 2 courses

- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS

Electives

Choose 9.0 credits from the following 6 courses

The elective courses may be taken in the School of Education or from other schools/departments, such as English Language or Linguistics, as long as the courses support the student's professional growth in English Education and are approved by the student's advisor. Pitt online courses that will count as electives are: IL 2201, IL 2257, ADMPS 2117.

- ADMPS 2117 - DIFFERENTIATED INSTRUCTIONAL PRACTICES  
  (online course)
- IL 2201 - SOCIOCULTURAL PERSPECTIVES ON LITERACY LEARNING  
  (online course)
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS  
  (online course)
- IL 2516 - INCLUSIVE SETTING CLASSROOM MANAGEMENT STRATEGIES  
- IL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS
- LSAP 3595 - SPECIAL TOPICS

Foreign Language Education, MAT

Foreign Language Education - Master of Education (MAT)

The University of Pittsburgh, School of Education, offers a post-baccalaureate program for Foreign Language teacher certification (grades K-12), the Master of Arts in Teaching (MAT) Program. Certification Studies are available in French, German, Italian, Spanish, Chinese, Japanese, or Latin. Native speakers of the language of certification are not exempt from prerequisite course work in the culture, civilization literature, and structure of their language. Applicants who are non-native speakers of the language of certification are also required to achieve at least an Advanced-Low rating on an oral proficiency interview by an individual certified by the American Council on the Teaching of Foreign Languages. Details of the MAT program are outlined below:
• requires Teaching Interns to pass the Written Proficiency Test (WPT) in the language of certification during the first semester of their program in order to attain the Intern Certificate. The WPT, in combination with the OPI (part of the admissions process), fulfills the Praxis II requirements for the state—this is the preferred way of satisfying the Praxis II requirements. Please note that this applies to all foreign language candidates with the exception of those students pursuing certification in Latin—because no OPI or WPT in Latin is available, students pursuing this option must satisfy Praxis II requirements in taking and passing the standard Content Knowledge test in Latin.
• satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the Writing Proficiency Test (WPT) and national PRAXIS II Exam of Fundamental Content Knowledge, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and student teaching)
• is completed in three terms (fall, spring, summer 1 session) beginning in late August of the admission year and concluding in mid-June of the following year
• consists of 36 credits of graduate course work combined with a maximum 4.5 day per week internship in a local school district from September through June

Discover more about our programs through the words of current students and alumni in a Teacher Certification video. In addition, find out more about the new Urban Scholars via videos that follow four students as they go through a full year of the program, which prepares preservice teachers to be successful in urban schools by pairing them with skilled mentors who help build positive relationships with students.

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load.

Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Grade Point Average/Academic Probation
All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.
Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

Psychological Perspectives on Education

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

Social and Cultural Perspectives on Education

- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY

- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

Research Methods

- EDUC 2200 - DISCIPLINED INQUIRY *
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS

*Enrollment limited to MAT students

Additional Requirements

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
- if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination
The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Master of Arts in Teaching Degree

The Master of Arts in Teaching degree is available for qualified liberal arts graduates who want to combine initial teacher certification in a particular foreign language with advanced study for a master's degree. Applicants must have completed, or must be able to complete, prerequisite course work before beginning the MAT. Native speakers of the language of certification are not exempt from prerequisite course work in the culture, civilization, literature, and structure of their language. Students complete a minimum of 36 credits. Applicants are also required to submit results of an Oral Proficiency Interview by an individual certified by the American Council on the Teaching of Foreign Languages. A rating of Advanced Low or higher on the Oral Proficiency Interview is expected.

- IL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1
- IL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2
- IL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- IL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- IL 2882 - INTERNSHIP - FOREIGN LANGUAGE
- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2
- IL 2826 - STUDENT TECHING SEM-FOREIGN LANG
- IL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3

Foreign Language Education, MEd

Master of Education (MEd) - Foreign Language Education
The MEd with specialization in foreign language education is a professional degree for individuals wishing to pursue advanced study in the field of teaching and learning foreign languages combined with trends, issues, a practice-based approach to new, current methodologies, and research in education in general. This option is tailored to the needs of practicing or returning foreign language teachers who wish to learn about recent developments in the field of foreign language education. This degree is also suitable for international students who wish to learn more about foreign language instruction (e.g., English as a foreign language) in their home countries. Some course work in a particular foreign language at the graduate level is also possible within this option. This option does not provide courses or clinical experiences for initial teacher certification. The degree consists of a minimum of 36 credit hours and may be completed on a part-time basis. Six credits earned while pursuing the MEd from an approved, graduate study-abroad program may be counted toward this degree. International students are required to provide proof of English language proficiency at the time of application by a score of 80 or higher on the TOEFL IBT test, a minimum score of 213 on the CBT, a Band 6.5 on the International English Language Testing System (IELTS), or by having earned a degree in an accredited United States university. In the last term of the program, it is required that all MEd candidates sign up to take a written comprehensive exam scheduled in October and March of each year.

**MEd with Specialization in TESOL**

The MEd can also be done in conjunction with a TESOL certificate (Teaching English to Speakers of Other Languages). Students pursuing this opportunity, which is completed in collaboration with Pitt's Department of Linguistics, have the option of choosing from two concentrations within the TESOL certificate: higher education and K-12. The higher education option is ideal for students who plan to work primarily with adult students in the United States and abroad. The K-12 concentration is available only to those students who already hold a PA Instructional I or II certificate (this option is also open to students who have earned a teaching certificate outside of PA, although the application process may vary). Completion of the K-12 concentration allows students to earn an endorsement from the Pennsylvania Department of Education (PDE) as an English as a Second Language (ESL) Program Specialist. Please note that international students applying to the MEd with specialization in TESOL are only eligible to complete the higher education concentration, and must provide evidence of having achieved a score of 80 or higher on the TOEFL IBT test, a minimum score of 213 on the CBT, or a Band 6.5 on the International English Language Testing System (IELTS) for admission consideration.

Unlike the MEd in Foreign Language Education, the MEd with Specialization in TESOL does not accept an earned degree in an accredited United States university as evidence of English language proficiency.

**Master's Degree Requirements**

*The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.*

**Common Requirements**

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

**Acceptance of Transfer Credits**

*For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.*

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.
Grade Point Average/Academic Probation

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.
Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

**Basic Areas of Education Requirement**

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

**Psychological Perspectives on Education**

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

**Social and Cultural Perspectives on Education**

- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

**Research Methods**

- EDUC 2200 - DISCIPLINED INQUIRY *
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS

*Enrollment limited to MAT students

**Additional Requirements**

**Master's Comprehensive Examination**

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or
To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
- if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.
Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Master of Education Degree

The MEd degree is a professional degree for individuals wishing to pursue advanced study in the field of teaching and learning foreign languages combined with trends, issues, and research in education in general. This option is tailored to the needs of foreign language teachers who wish to learn about recent developments in the field of foreign language education. This degree is also suitable for international students who wish to learn more about foreign language instruction (e.g., English as a foreign language). Some course work in a particular foreign language at the graduate level is also possible within this option. This option does not provide courses or clinical experiences for initial teacher certification. The degree consists of a minimum of 36 credit hours and may be completed on a part-time basis. International students are required to provide an assessment of English language proficiency at the time of application. A minimum score of 550 on the paper based TOEFL or a score of 80 on the internet-based TOEFL is required for admission. The International English Language Testing System (IELTS) may also be submitted as evidence of English language proficiency. A minimum score of 6.5 is necessary on IELTS for admission.

Curriculum: Students starting Fall 2016 (2171) and later

A Comprehensive Exam must be taken in the Fall or Spring of the second year of study.

- IL 2255 - TECHNQ/PROC DR FOREIGN LANG TCH
- ADMPS 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- IL 2256 - ISSUES IN FOREIGN LANGUAGE ED
- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- IL 2722 - PRACTICUM IN FOREIGN LANGUAGE
- IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- IL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE
- IL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- IL 2251 - INTRODUCTION TO FOREIGN LANGUAGE EDUCATION

Electives
Choose 6.0 credits from the following courses

- IL 2250 - TECHNOLOGY IN FOREIGN LANGUAGE EDUCATION
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- IL 2711 - SPECIAL TOPICS - FOREIGN LANGUAGE EDUCATION

**General Special Education, MEd**

The MEd in General Special Education requires a minimum of 36 credits meeting School of Education requirements for Basic Areas of Education courses, a three-credit research seminar, and elective courses in Special Education. Students will work with a faculty advisor to develop a curricular plan that combines work in Special Education and related studies in education. Students must pass a comprehensive exam prior to receiving the M.Ed. degree.

**Special Education Program Studies**

The 12 credits in Special Education may be chosen from within or across the following specialty areas of Special Education: Applied Behavior Analysis, Students with Visual Impairments, Early Intervention for Children with Disabilities, or Supervisor of Special Education Certificate

**Electives**

Choose 12 credits of elective courses from special education, other program areas within the Department of Instruction and Learning, other departments within the School of Education, or other schools at the University of Pittsburgh offering coursework relevant to the student's specialty area.

**Research Methods**

Choose 3.0 credits from the following courses:

- ADMPS 2356 - FIELD METHODS
- EDUC 2200 - DISCIPLINED INQUIRY
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS
- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY
- PSYED 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- PSYED 2519 - QUALITATIVE METHODS: PARTICIPANT OBSERVATION

**Research Seminar**

- IL 2590 - RESEARCH SEMINAR IN SP ED

**Psychological Perspectives on Education**

Choose 3.0 credits from the following 7 courses:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE
Social and Cultural Perspectives on Education

Choose 3.0 credits from the following courses:

- ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY
- ADMPS 2133 - GENDER AND EDUCATION
- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
- ADMPS 2344 - LEADERSHIP IN SERVICE LEARNING
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

- IL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- IL 3542 - WEB CURRNT ISSUES & TRENDS SP ED

Master of Education (MEd) with Special Education Pre-K - 8 Teacher Certificate

The Special Education Teacher Preparation PreK-8 (SETP PreK-8) specialization is a post baccalaureate program with two paths for completion. One option combines special education teacher certification with a Master of Education (MEd) degree. The other option is for special education teacher certification only.

Students pursuing a Master of Education degree (MEd) specializing in Special Education PreK-8 are required to complete a minimum of 39 credits beyond the prerequisite course work. MEd students will develop advanced knowledge in the fields of educational research, learning theory, and child development to enhance their teaching practice.

Most MEd candidates complete the program in twelve months of full-time study. Each year a new cohort of students begins the program together starting in the summer and finishing in early June of the following summer. With the exception of the first summer term, special education courses are offered in the evening. A few of the MEd required courses are also available in an online format.

During the fall term students are required to spend one day per week in each school to which they are assigned for student teaching in preparation for student teaching in the spring. Students complete two different full-time student teaching experiences in the spring, each of eight weeks duration. During the student teaching experiences, teacher candidates are closely supervised by both a university supervisor and an experienced mentor teacher. The School of Education Office of Placement Services and Clinical Practices will arrange field placements for students.

The MEd program requires students to successfully complete the Special Education Comprehensive Exam. The Comprehensive Exam is a proctored, three-hour written exam based on the student's area of concentration and is completed near the end of their MEd degree program.

Admission follows successful completion of an initial teacher certification program (Elementary, PreK-4, Grades 4-8, Reading Specialist), an undergraduate degree, and selected prerequisite courses. Students enter the Special Education Pre-K-8 specialization on a full-time basis.

Requirements

- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- IL 2590 - RESEARCH SEMINAR IN SP ED
- IL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- IL 2511 - CURR PRG DVLP-LOW INCDNC DISAB
- IL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
Specialization Course

Choose 3.0 credits from the following courses

Students may also choose a content area course in Math, Science, Social Studies, or English Education as approved by their advisor.

- IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- IL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM
- IL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
- IL 2562 - ASESMNT YOUNG CHLDRN DISABLTY
- IL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION

BAE Course

Choose 3.0 credits from the following courses

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

Master of Special Education with Academic Instruction Certificate (MOSAIC)

MOSAIC Curriculum

- IL 2575 - TRANSITION PROCESSES AND SPECIAL EDUCATION PROCEDURES
- IL 2509 - APLLD BHVR ANAL/POSTV BHVR SUPRT
- IL 2513 - INSTRNL METH-HIGH INCIDNC DISABS

Teaching and Learning in Secondary Content Areas I

- IL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
- IL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1
Mathematics Education, MAT

The University of Pittsburgh, School of Education, offers a post-baccalaureate program for Mathematics teacher certification (grades 7-12), the Master of Arts in Teaching Program (MAT). Details of the MAT are outlined below:

- requires Teaching Interns to take and pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)
- is completed in three terms (fall, spring, summer 1 session) beginning in late August of the admission year and concluding in mid-June of the following year
- consists of 36 credits of graduate course work combined with a maximum 4.5 day per week internship in a local school district from September through June

Required Courses
Mathematics Education, MEd

Students complete a minimum of 36 credits.

Math Education Core Curriculum

18 Credits

- IL 2474 - PROPORTIONAL REASONING IN MIDDLE SCHOOL MATHEMATICS
- IL 2484 - MATH PROBLEM SOLVING K-12
- IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- IL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- IL 2451 - SPECIAL TOPICS: MATHEMATICS

(Assessment and Evaluation)

(Reasoning and Proving)

Electives

Choose 9 credits of elective courses from mathematics, mathematics education, statistics, and computer science, and from other programs in the School of Education chosen to support the program of studies.

Psychological Perspectives on Education

Choose 3.0 credits from the following 7 courses.

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE
- PSYED 2127 - HUMAN LEARNING
- PSYED 2504 - DVLP: MIDDLE CHILHD/ADOLESCENCE

Research Methods

Choose 3.0 credits from the following 5 courses.
Social and Cultural Perspectives on Education

Choose 3.0 credits from the following courses.

- ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY
- ADMPS 2133 - GENDER AND EDUCATION
- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION

Reading Education, MEd

At the master's degree level, students may emphasize study in the specialization of reading education.

Two master's degree options are offered in the reading education specialization. One is combined with Pennsylvania Reading Specialist Certification—the MEd plus Reading Specialist Certification, and this "general" Master's degree that does not include the Reading Specialist certification. This Master's degree may be selected by those who wish to have more choice in the development of their program. This program may be more appropriate for students whose native language is not English or who come from another country.

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.
Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Grade Point Average/Academic Probation

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy
Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

Research Methods
Additional Requirements

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:
• be admitted to full graduate status;
• have a minimum grade point average of 3.00 (transfer credits not considered);
• have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
• have passed the comprehensive examination;
• have an approved overview on file in the Office of Admissions and Enrollment Services; and
• if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Psychological Perspectives on Education

Choose 3.0 credits from the following 11 courses:

• EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
• EDUC 2007 - HUMAN LEARNING
• EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
• EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE
• PSYED 2127 - HUMAN LEARNING
• PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
• PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE

Research Methods
Choose 3.0 credits from the following 10 courses:

- ADMPS 2356 - FIELD METHODS
- EDUC 2200 - DISCIPLINED INQUIRY
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS
- IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY
- PSYED 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- PSYED 2519 - QUALITATIVE METHODS: PARTICIPANT OBSERVATION

Social and Cultural Perspectives on Education

Choose 3.0 credits from the following 23 courses:

- ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY
- ADMPS 2133 - GENDER AND EDUCATION
- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
- ADMPS 2344 - LEADERSHIP IN SERVICE LEARNING
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION
- HPA 2322 - EVIDENCE BASED HEALTH PROGRAM PLANNING

Major Field Studies

Choose 24 credits from the following 10 courses:

- IL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- IL 2210 - LANGUAGE & THE READING PROCESS
- IL 2211 - COMPREHENSION AND VOCABULARY
- IL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS
- IL 2219 - DISCIPLINARY LITERACY
- IL 2232 - INTERNSHIP IN READING
Science Education, MAT

The University of Pittsburgh, School of Education, offers a post-baccalaureate program for Science teacher certification (grades 7-12), the Master of Arts in Teaching Program (MAT). This program is appropriate for individuals with non-education backgrounds in their baccalaureate studies. A strong science background and educational methodology are the foci of studies. Professional development is stressed through the use of teaching portfolios showing content background, teaching competencies, and technology in the design of instruction. Certification studies are available in Biology, Chemistry, Physics, Earth and Space Science, and General Science. Details are below:

- requires Teaching Interns to take and pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)
- is completed in three terms (fall, spring, summer 1 session) beginning in late August of the admission year and concluding in mid-June of the following year
- consists of 36 credits of graduate course work combined with a maximum 4.5 day per week internship in a local school district from September through June

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.
A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

**Grade Point Average/Academic Probation**

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

**Statute of Limitations**

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

**Leave of Absence**

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

**Academic Integrity Policy**

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions
regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

Psychological Perspectives on Education

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

Social and Cultural Perspectives on Education

- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION
- EDUC 2106 - EDUCATION AND CULTURE
- EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING
- EDUC 2108 - STATE/NATIONAL POLITICS OF EDUCATION
- EDUC 2109 - GENDER IN EDUCATION
- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

Research Methods

- EDUC 2200 - DISCIPLINED INQUIRY *
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
Additional Requirements

Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

• be admitted to full graduate status;
• have a minimum grade point average of 3.00 (transfer credits not considered);
• have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
• have passed the comprehensive examination;
• have an approved overview on file in the Office of Admissions and Enrollment Services; and
• if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Master of Arts in Teaching Degree

This option provides a comprehensive teacher preparation program for qualified science area graduates who want to coordinate certification study with advanced-level studies in education. Applicants must have completed or be able to complete prerequisite academic course work before beginning MAT studies. This 36-credit program for full-time students involves 10 consecutive months of study (September - June).

Jumpstart

Weeks 1-2; 40 hours

• IL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1
• IL 2741 - PRACTICUM IN SECONDARY SCIENCE 1
• IL 2845 - PRACTICUM IN SECONDARY SCIENCE
• IL 2431 - TEACHING & LEARNING IN SECONDARY SCIENCE 2
• IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

Social Studies Education, MAT

The University of Pittsburgh, School of Education, offers a post-baccalaureate program for Secondary Social Studies certification (grades 7-12), the Master of Arts in Teaching (MAT) Program. Details of the MAT program are outlined below:

- requires Teaching Interns to take and pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)
- is completed in three terms (fall, spring, summer 1 session) beginning in late August of the admission year and concluding in mid-June of the following year
- consists of 36 credits of graduate course work combined with a maximum 4.5 day per week internship in a local school district from September through June

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

All master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 36 credits (including 9 credits in Basic Areas of Education) and the passing of a comprehensive examination.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exception are courses taken while an undergraduate student at the University of Pittsburgh during the final term of undergraduate study that meet the following requirements, as explained in the Graduate Catalog:

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is
admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

**Grade Point Average/Academic Probation**

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.50 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after two terms on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

**Statute of Limitations**

All requirements for a master's degree must be completed within a period of four consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within five years in an MAT or MEd program.

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

**Leave of Absence**

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

**Academic Integrity Policy**

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

**Plan of Studies**
Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator, is filed in the Office of Admissions and Enrollment Services.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements, and be filed in the Office of Admissions and Enrollment Services. At the time of graduation, completed courses must comply with the approved Plan of Studies.

**Basic Areas of Education Requirement**

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. A maximum of 6 credit hours of BAE courses may be taken from those offered within a single department. The courses in each area that may be used to meet this requirement are listed below. See also individual program curricula for exceptions to how their master's degree programs meet the Basic Areas of Education Requirement.

**Psychological Perspectives on Education**

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ ADOLESCENCE

**Social and Cultural Perspectives on Education**

- EDUC 2100 - EDUCATION AND SOCIETY
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
- EDUC 2105 - SOCIOLOGY OF EDUCATION

- EDUC 2110 - GENDER AND EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

**Research Methods**

- EDUC 2200 - DISCIPLINED INQUIRY *
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- EDUC 2202 - EDUCATIONAL/PSYCHOLOGICAL MEASUREMENT
- EDUC 2205 - FIELD METHODS

*Enrollment limited to MAT students

**Additional Requirements**
Master's Comprehensive Examination

The School of Education requires a comprehensive examination for all master's degrees. The comprehensive examination is designed to assess the student's mastery of the general field of graduate study. The comprehensive examination is constructed, administered, and scored by the program or department to which the student has been admitted. Procedures and schedules of administration are available from the program or department. *The student must be enrolled to take the comprehensive examination.

*See also Comprehensive Examination under Regulations Pertaining to Master of Arts and Master of Science Degrees. The University-wide regulations on comprehensive examinations detailed there apply to all School of Education master's programs.

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form along with a corrected copy of the overview to the Office of Admissions and Enrollment Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices and the Office of Admissions and Enrollment Services.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have an approved plan of studies on file in the Office of Admissions and Enrollment Services;
- have passed the comprehensive examination;
- have an approved overview on file in the Office of Admissions and Enrollment Services; and
- if the proposed research involves human subjects, have a letter on file in the Office of Admissions and Enrollment Services from the IRB approving the proposed research.
Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. One corrected copy of the thesis as approved by the master's committee must be filed, along with one copy of a research advisor approved abstract and the form showing a passed final oral examination, no later than one week before the end of the term during which the student expects to graduate. The dean/associate dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

Master of Arts in Teaching Degree

This option provides qualified graduates in the social science disciplines with the opportunity to obtain Instructional I teacher certification in social studies education for grades seven through 12 and the MAT degree. All applicants are required to have completed 30 credits in one of the social science disciplines along with another 18-30 credits across the other six disciplines in addition to general arts and sciences prerequisites. The MAT option requires 36 credits.

- IL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1
- IL 2262 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 2
- IL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- IL 2827 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 3
- IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- IL 2883 - INTERNSHIP - SOCIAL STUDIES
- IL 2828 - STUDENT TEACHING SEMINAR-SOCIAL STUDIES
- IL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2
Social Studies Education, MEd

The structure for the online social studies MEd is divided into six distinct academic areas. Each area is made up of content, knowledge, and skills critical to the development of graduate-level practitioners and scholars. The program requires a minimum of 36 credits for completion. Degree requirements include:

- 15 credits (5 courses) in Social Studies-specific Pedagogy;
- 3 credits (1 course) in Psychological Perspectives on Education;
- 3 credits (1 course) in Social and Cultural Perspectives on Education;
- 3 credits (1 course) in MEd Research Seminar;
- 3 credits (1 course) in MEd Research Methods;
- 9 credits (3 courses) in approved electives; and
- a written comprehensive exam.

Social Studies Theory and Pedagogy

Choose 15.0 credits from the following 6 courses:

- IL 2219 - DISCIPLINARY LITERACY
- IL 2265 - ISSUES IN HISTORY EDUCATION
- IL 2269 - SPECIAL TOPICS: SOCIAL STUDIES
- IL 2277 - COMPARATIVE AND GLOBAL PERSPECTIVES ON EDUCATION
- IL 2710 - ADVANCED SOCIAL STUDIES METHODS
- IL 2712 - HISTORICAL THINKING AND HISTORIOGRAPHY: SECONDARY SOCIAL STUDIES CLASSROOM

Psychological Perspectives on Education

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION

Social and Cultural Perspectives on Education

- EDUC 2100 - EDUCATION AND SOCIETY

Research Seminar

- IL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Research Methods

Choose 3.0 credits from the following courses

- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY

Electives

Choose 9 credits from the following options:
• Advisor-approved 2000-level or above ADMPS, EDUC, or IL courses;
• Advisor-approved 2000-level Arts and Sciences (history, political science, geography, psychology, sociology, anthropology, or economics) courses

Vision Studies Special Education - Vision Education Certification, MEd

The School of Education at the University of Pittsburgh requires all students pursuing a Master's of Education degree (MEd) to complete a minimum of 36-credits, 12 of which are the required graduate-level general education courses listed.

Applicants may choose to pursue the MEd degree through a variety of options (with or without certification):

• MEd degree with single certification as a Teacher of Students with Visual Impairments (TVI)
• MEd degree with single certification as an Orientation and Mobility (O&M) Specialist
• MEd degree with dual certification (TVI and O&M)
• MEd degree without certification but with a Vision Studies Area of Concentration

Students pairing the degree in combination with any certification option will complete additional credits hours to fulfill program requirements. Additionally, the MEd program requires students to successfully complete the Vision Studies Comprehensive Exam. The Comprehensive Exam is a proctored three-hour exam based on the student's area of concentration and is completed towards the end of their MEd degree program.

MEd Vision Studies Required Courses

• EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
• EDUC 2100 - EDUCATION AND SOCIETY
• EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
• IL 2690 - RESEARCH SEMINAR ONLINE

Applied Behavior Analysis Certificate

Certificate Program

• IL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
• IL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
• IL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
• IL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
• IL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS
• IL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS

BACB Requirement (Optional)

For students wishing to pursue the national BCBA

• IL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Autism Spectrum Disorders Endorsement/Certificate

The University of Pittsburgh School of Education Autism Certificate is a 15-credit program, consisting of (a) a core of three required 3-credit graduate level courses (9 credits total), (b) 3 or 4 credits of practicum experience with children with autism, and (c) one 3 credit elective course.
Core Courses

- IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- IL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM
- IL 2586 - AUTISM INTERVENTIONS IN SCHOOL AND COMMUNITY SETTINGS

Practicum

Choose 3.0 credits for the following courses

- IL 2850 - PRACTICUM - PRESCHOOL
- IL 2780 - AUTISM ENDORSEMENT PRACTICUM

Elective Courses

Choose 3.0 credits from the following courses

- IL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- IL 2511 - CURR PRG DVLP-LOW INCDCNC DISABS
- IL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Early Childhood Education - Primary Plus: PreK-4 Teacher Certificate

The Primary Plus: PreK-4 Teacher Certification Program prepares students to teach young children ages 4-9 in Pre-kindergarten and K-4 classrooms and to work collaboratively with parents and other professionals. Students will develop skills for employment in public and private schools and early childhood centers. Through coursework and field experiences with pre-kindergarteners and children in grades K-4, students will acquire an integrated understanding of academic content and child development in diverse inclusive settings. The program must be completed as a full-time student. No part-time option is available.

The Primary Plus: PreK-4 Teacher Certification Program is intended for individuals from a wide range of undergraduate degree and work backgrounds. A student who successfully completes the program and passes both the PECT (Pennsylvania Education Certification Test) in PreK-4 and the PA Statewide Evaluation Form for the Student Professional Knowledge and Practice (PDE 430) is eligible to apply for a Pennsylvania Instructional I certificate for PreK-4.

- prepares qualified graduates for initial certification in PreK-4 Early Childhood Education
- lasts three consecutive terms for full-time students - Summer II, Fall, Spring
- requires two full days per week in a PreK practicum and one full day per week at a K-4 student teaching site during Fall Term
- requires twelve full weeks of student teaching in a K-4 classroom in the Spring term
- requires obtaining all Federal and PA state clearances before entering schools

Click through to read the Primary Plus PreK-4 Teacher Certification Academic Checklist.

Interested in finding out more about our teacher education programs? Admissions representatives can answer questions you have at an upcoming Teacher Education Information Session.

Requirements

The Primary Plus: PreK-4 Teacher Certification Program prepares students to teach young children ages 4-9 in Pre-kindergarten and K-4 classrooms and to work collaboratively with parents and other professionals. Students will develop skills for employment in public and private schools and early childhood centers. Through coursework and field experiences with pre-kindergarteners and children in grades K-4, students will acquire an integrated understanding of academic content and child development in diverse inclusive settings. The program is designed for full-time study (Summer II, Fall and Spring Semesters).
English Education - English Instructional I Certificate

Requirements

- IL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
- IL 2245 - TEACHING & LEARNING IN SECONDARY ENGLISH 2
- IL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- IL 2820 - TEACHING AND LEARNING IN SECONDARY ENGLISH 3
- IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM

- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2

PY Core Curriculum (Instructional I Certification)

Foreign Language Education - Foreign Language Instructional I Certificate

The University of Pittsburgh, School of Education, offers two post-baccalaureate programs for Foreign Language teacher certification (grades K-12). The two programs are an Instructional I Teacher Certificate Program and a Master of Arts in Teaching (MAT) Program. Certification Studies are available in French, German, Italian, Spanish, Chinese, Japanese, or Latin. Native speakers of the language of certification are not exempt from prerequisite course work in the culture, civilization literature, and structure of their language. Applicants who are non-native speakers of the language of certification are also required to achieve at least Advanced-Low rating on an oral proficiency interview by an individual certified by the American Council on the Teaching of Foreign Languages. Details of the Instructional I Teaching Certificate Program are outlined below.

- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the Writing Proficiency Test (WPT) and national PRAXIS II Exam of Fundamental Content Knowledge, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and student teaching)
- can be completed in two terms (fall and spring) of 15 credit hours each
- can be designed to accommodate part-time students
- requires 10 hours per week at a local school district in the fall term and a full-time student teaching experience in the spring term
- requires obtaining all Federal and PA state clearances before entering schools
- contains 18 credits which can be applied within three years toward a Master of Education degree
- students may apply for financial aid

Certificate Requirements

- IL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1
- IL 2882 - INTERNSHIP - FOREIGN LANGUAGE
- IL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2
- IL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- IL 2826 - STUDENT TECHNG SEM-FOREIGN LANG
Mathematics (7-12) Instructional I Certificate

The University of Pittsburgh, School of Education, offers two post-baccalaureate programs for Mathematics teacher certification (grades 7-12). The two programs are an Instructional I Teaching Certificate and a Master of Arts in Teaching Program (MAT). Details of the Instructional I Teaching Certificate are outlined below.

- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and student teaching)
- can be completed in two terms (fall and spring) of 15 credit hours each
- can be designed to accommodate part-time students
- requires 10 hours per week at a local school district in the fall term and a full-time student teaching experience in the spring term
- requires obtaining all Federal and PA state clearances before entering schools
- contains 18 credits which can be applied within three years toward a Master of Education degree
- students may apply for financial aid

Requirements

A Secondary Content Area teacher certificate (English, Math, Science, Social Studies, or Foreign Language Education) is combined with a second teaching certificate for Special Education grades 7-12 and a Master of Education in Special Education. Teaching candidates will study evidence-based practices to improve adolescent learning through Special Education and Content Area coursework. Candidates will develop their professional teaching skills during practical experiences, in a variety of public middle and high school classrooms. The MOSAIC program is designed to provide future teachers with the skills, knowledge and experiences to be effective teachers of adolescents both with and without disabilities.

- IL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3
- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2

Reading Specialist Certificate of Advanced Study K-12

The School of Education offers preparation that leads to certification as a Reading Specialist (K-12). Coursework is completed in a blended format of on-campus and online study. The curriculum for the Reading Specialist Certificate of Advanced Study (K-12) is designed to provide candidates with opportunities to build specialized knowledge, engage in principled practice in supervised settings, and prepare for leadership roles in schools and school districts. The curriculum addresses the International Reading Association's Standards for Reading Professionals (2010) in the areas of:

- Foundational Knowledge
- Curriculum and Instruction
Requirements

It is required that applicants have an initial teaching certificate. If initial certification does not include PDE-required special education courses (9 credits) and an English Language Learners course (3 credits), then those courses must be completed before application for certification. Teaching experience is advised. A minimum of 24 credit hours is required.

- IL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- IL 2211 - COMPREHENSION AND VOCABULARY
- IL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS
- IL 2217 - LITERACY PRACTICUM WITH ELEMENTARY STUDENTS
- IL 2219 - DISCIPLINARY LITERACY
- IL 2218 - LITERACY PRACTICUM WITH ADOLESCENT STUDENTS
- IL 2243 - THEORY & PRAC IN TCHNG WRITING
- IL 2281 - LEADERSHIP SCHOOL LITERACY PROGM

Science Education - Science (7-12) Instructional I Certificate

The University of Pittsburgh, School of Education offers a post-baccalaureate program for Secondary Science teacher certification (grades 7-12). Certification Studies are available in Biology, Chemistry, Physics, Earth and Space Science, and General Science. Certification in more than one science is also available. Details are outlined below.

- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and student teaching)
- can be completed in two terms (fall and spring) of 15 credit hours each
- can be designed to accommodate part-time students
- requires 10 hours per week at a local school district in the fall term and a full-time student teaching experience in the spring term
- requires obtaining all Federal and PA state clearances before entering schools
- contains 18 credits which can be applied within three years toward a Master of Education degree
- students may apply for financial aid

Requirements

- IL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1
- IL 2845 - PRACTICUM IN SECONDARY SCIENCE
- IL 2431 - TEACHING & LEARNING IN SECONDARY SCIENCE 2
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- IL 2432 - TEACHING & LEARNING IN SECONDARY SCIENCE 3
- IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- IL 2843 - STUDENT TEACHING SEM - SCIENCE
- IL 2496 - INTERNSHIP - SCIENCE
- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2
Social Studies Education - Social Studies (7-12) Instructional I Certificate

The University of Pittsburgh, School of Education, offers two post-baccalaureate programs for Social Studies teacher certification. The two programs are an Instructional I Teaching Certificate Program and a Master of Arts in Teaching (MAT) Program. Details of the Instructional I Teaching Certificate are outlined below.

- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and student teaching)
- can be completed in two terms (fall and spring) of 15 credit hours each
- can be designed to accommodate part-time students
- requires 10 hours per week at a local school district in the fall term and a full-time student teaching experience in the spring term
- requires obtaining all Federal and PA state clearances before entering schools
- contains 18 credits which can be applied within three years toward a Master of Education degree
- students may apply for financial aid

Requirements

- IL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1
- IL 2262 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 2
- IL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES
- IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- IL 2827 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 3

- PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1
- PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2

Special Education Pre-K - 8 Teacher Certification

Students pursuing a Special Education PreK-8 certification-only track are required to complete a minimum of 30 credits beyond the prerequisite course work. Most students complete the certification program in three semesters. Students begin with two courses in the summer session and then complete two semester of full-time study in the fall and spring semesters. Each year a new cohort of students begins the program together starting in the summer. With the exception of the first summer term, special education courses are offered in the evening.

During the fall term students are required to spend one day per week in each school to which they are assigned for student teaching in preparation for student teaching in the spring. Students complete two different full-time student teaching experiences in the spring, each of eight weeks duration. During the student teaching experiences, teacher candidates are closely supervised by both a university supervisor and an experienced mentor teacher. The School of Education Office of Placement Services and Clinical Practices will arrange field placements for students.

Requirements

The Special Education Teacher Preparation PreK-8 (SETP PreK-8) specialization is a post baccalaureate program with two paths for completion. One option combines special education teacher certification with a Master of Education (MEd) degree in Instruction and Learning. The other option is for special education teacher certification only. This specialization prepares special educators to teach children and youth with a range of disabilities and emphasizes educational needs rather than categorical labels. Individuals holding the PreK-8 certification may provide specialized support and instruction to eligible students with cognitive, behavior, physical, and/or health disabilities within the specified grade level range in a variety of
settings. Pennsylvania requires all special educators to also be initially certified to teach the general education population and curriculum. In that case, these programs accept previously certified elementary level teachers and reading specialists and furthers their ability to effectively teach a diverse student body.

Additionally, the Combined Accelerated Studies in Education (CASE) program is a five-year program that combines undergraduate and graduate work. Students who successfully complete the program will receive a Bachelor of Science (BS) degree in Applied Developmental Psychology and a Masters of Education (Med) degree in Instruction and Learning. This program prepares students to apply for dual teacher certification in PreK-Grade 4 and Special Education PreK-8. The CASE program provides prospective teachers with a rich blend of coursework and field experiences. Students who complete the program will gain a strong background in the liberal arts along with the specific professional and pedagogical knowledge and practice skills necessary to be an effective educator.

- IL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- IL 2511 - CURR PRG DVLP-LOW INCIDNC DISABS

- IL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- IL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES
- IL 3542 - WEB CURRNT ISSUES & TRENDS SP ED

**Supervisor of Special Education Certificate**

Through six courses and an internship (19 credits), the program provides candidates with the opportunity to develop and knowledge of and competence in the fundamental concepts of supervising special education programs.
Requirements

This certification option in special education is built on the assumption that most supervisory operations in education are, in principle, generic, with their fundamentals of theory and practice in common. The major distinguishing characteristic of this option is the application of supervisory theory to the context of the special education of exceptional children and youth. Specific emphasis is placed upon activities, relationships, facilities, agencies, persons, and processes that are peculiar to or have particular relevance to special education. The student completes a plan of studies encompassing such courses as supervision, curriculum development, current and legal issues in the specialization, and a supervision internship.

- IL 3596 - INTERNSHIP IN SPECIAL EDUCATION

Vision Studies - Dual Certification in Vision Education and Orientation and Mobility Certificate

Graduates with dual certification integrate skills acquired from both the Teacher of Students with Visual Impairments (TVI) and Orientation and Mobility (O&M) components of the program into a more comprehensive service. Dually certified graduates are highly desirable to potential employers. A teacher who has earned Pennsylvania Department of Education (PDE) certification as a TVI and national professional certification in O&M from the Academy for Certification of Vision Rehabilitation & Education Professionals (ACVREP) (http://www.acvrep.org) will have a stronger background in motor development, sensory training, concept development, and movement. See the single certification O&M overview or the single certification TVI overview for more specific details regarding each certification option.

Students gaining admission to the dual TVI & O&M certification program will be admitted into a fall term cohort. In this hybrid program, the didactic courses are offered online in the fall, spring, and summer terms. Within the TVI certification tract, all courses are offered online, but the summer provides a time for face-to-face classes in Pittsburgh on the Oakland campus. Additionally, the O&M program requires students to participate in one Summer 6-week on-campus experience.

In addition to these didactic courses, students complete three levels of clinical practice. The first is an observational experience focused on TVI and O&M instructional practices. The second is a TVI student teaching practicum. Students apply for a PDE Instructional I teaching certificate upon successful completion of the TVI didactic coursework, the student teaching practicum, and the required Praxis II exams.

The third practicum is an O&M Internship required by ACVREP, which is scheduled at the completion of the O&M courses. Students are also required to attend a weekend workshop at Pitt's Oakland Campus prior to beginning the O&M internship. Students completing the academic and clinical requirements of the O&M curricula must pass a national certification exam in O&M (see the ACVREP website for details) in order to become eligible for O&M certification.

Students have multiple options towards program completion. The dual certification courses are typically offered in a two-course per term pairing. Students may also combine a Master's of Education (MEd) degree to their certification program of study. Students needing to complete a MEd degree and/or co-requisite courses may add additional courses to become a full-time student. The dual certification program takes approximately 3 years to complete.

Vision Studies - Orientation and Mobility (O&M) Certificate

If you are already certified in a vision related field of study (e.g., TVI, Rehab Teacher for the Blind, or Low Vision Therapist), then you only need to complete the 21-credits of O&M Certification courses listed on the O&M Suggested Plan of Study (Option 1). If you do not possess certification in a vision related field of study, you must complete the 21-credits of O&M Certification courses plus 11-credits of additional TVI Certification courses (Option 2).
In addition, students complete and O&M internship which is required by the national certifying body ACVREP and is scheduled at the completion of the O&M didactic coursework. Students are also required to attend a weekend workshop on Pitt's Oakland campus prior to the beginning of the O&M internship. This single certification program takes approximately 2 years to complete.

Students may also combine a M.Ed. degree with the O&M certification program.

**O&M Certification Curricula (Option 1)**

All courses are 3 credits unless otherwise indicated.

- IL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- IL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1
- IL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
- IL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY
- IL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS
- IL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY

**O&M Certification Curricula (Option 2)**

Required courses for O&M single certification for students who do not possess certification in a vision related field of study. This path (Option 2) also requires all the courses from Option 1 above, for a total of 32 credits.

All courses are 3 credits unless otherwise indicated.

- IL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- IL 2531 - EDUCATION OF CHILDREN WITH VI 1
- IL 2532 - EARLY INTERVENTION FOR CHILDREN WITH VI
- IL 2527 - LEVEL 1 OBSERVATIONAL PRACTICUM: VI
- IL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- IL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1
- IL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
- IL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY
- IL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY

**Vision Studies - Teacher of Students with Visual Impairments (TVI) Certificate**

In addition to 31 credits of online courses, students complete two levels of clinical practice. The first is an observational experience focused on TVI instruction. The second is a student teaching practicum, which is required for all initial or second-field certification applicants. Students apply for their PDE Instructional I teaching certificate upon successful completion of TVI coursework, student teaching practicum, and the required Praxis II exams.

**MEd Vision Studies Curriculum**

All courses are 3 credits, except where indicated.

- IL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
Science, Technology, Engineering & Mathematics (STEM), EdD

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp:** The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

CORE COURSES Credits / Units: 24 Total

Foundation Courses
- EDUC 3002 - FOUNDATIONS 1:
- EDUC 3003 - FOUNDATIONS 2: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS 4: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses
- EDUC 3001 - PRACTITIONER INQUIRY 1
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTICUM INQUIRY 4

SUPERVISED PRACTITIONER INQUIRY
Students will identify, review and synthesize relevant scholarship that supports as inquiry into a problem of practice.
- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.
- EDUC 3012 - SUPERVISED INTERNSHIP

GUIDANCE IN SCHOLARLY PRACTICE

Guidance in Scholarly Practice: Based on research interests, the students will be required to write a manuscript that reports on the improvement science process.

Portfolio of Scholarly Practice: The portfolio of scholarly practice will provide evidence of learning and success in foundations, inquiry, and ARCO experiences.
- EDUC 3099 - GUIDANCE IN DOCTORAL DEGREE

Science, Technology, Engineering & Mathematics (STEM) ARCO Curriculum

Science, Technology, Engineering & Mathematics (STEM) ARCO Courses
- LSAP 3096 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION
- IL 3471 - INSTRUCTIONAL ISSUES IN MATH AND SCIENCES EDUCATIONS

- IL 3476 - ASSESSMENT & EVAL IN MATH & SCIENCE EDUCATION

Department of Psychology in Education
Programs within the Department of Psychology in Education prepare graduates for professional careers in teaching, research, and professional practice. Doctoral studies are offered with areas of concentration in applied developmental psychology and in research methodology. Graduates receiving doctoral degrees serve in academic and research capacities in universities, government agencies, public and private research, and testing centers.

Master's degrees are offered with areas of concentration in applied developmental psychology and research methodology. Master's study in research methodology prepares personnel for positions in testing and research. Master's study in applied developmental psychology prepares students for professional roles as program administrators, directors, and supervisors, child development specialists, child and youth workers, child life specialists, behavior/developmental specialists, mobile therapists, and research associates.

The department offers the following degrees in psychology in education:

- Master of Arts (MA)
- Master of Science (MS)
- Master of Education (MEd)
- Doctor of Philosophy (PhD)

Program Information

Applied Developmental Psychology Program

Applied Developmental Psychology helps students gain the expertise for recognizing how the development, implementation, and evaluation of programs directly correspond with the progression of children, youth, and their families.

This program offers:

- Bachelor of Science (BS) degree
- Master's degree (MS)
- Doctoral degree (PhD)

Infant Mental Health Program

The program offers a Certificate and track within the MS in Applied Developmental Psychology program for students to gain specialized skills and knowledge for working with very young children (0 to 3-years of age) and their families. The training will be aligned with the recently purchased IMH Competency Guidelines and will prepare IMH students to be "ready" for IMH Endorsement through the process to be determined by the state of Pennsylvania. Students with IMH concentration and/or those who pursue IMH Endorsement will have unique qualifications that may improve employment opportunities and qualification to work in various settings. Among the unique skills students will learn are culturally-informed methods for infant observation, neurobehavioral assessment, transdisciplinary evaluation of infant development, promotion of caregiver-infant relationships, family engagement, relationship observation and assessment, system coordination, and an understanding of evidence-based interventions including Child Parent Psychotherapy, Circle of Security, Seeing is Believing, Healthy Families America, and more. Students will have unique learning opportunities with the continued collaboration between the concentration in IMH and various local agencies and offices.

Research Methodology Program

The Research Methodology Program prepares professionals in the areas of psychometrics and test design, and scholars who contribute to the study of the quantitative methods used in empirical studies. Graduate students of the research methodology program acquire skills in the interrelated areas of measurement, research design, and statistical methods. Graduates are prepared for positions in colleges, universities, research centers, testing agencies, school systems, ministries of education and other government agencies, and industry.

This program offers:

- Master of Education (MEd)
Applied Developmental Psychology, PhD

PhD Applied Developmental Psychology Curriculum

The PhD degree requires 90 credits distributed as follows: 27 credits in core developmental course work, 9 credits in professional practice course work, 18 credits in research methodology, and 9 credits in a supporting field of study. The program also requires two terms of supervised research, a research project, a practicum in college teaching, and a dissertation.

- PSY 2330 - DEVELM PSYCH: COGNITV DEVELOP
- PSY 2325 - DVLPMTL PSY: SOCIAL DEVELOPMENT
- PSYED 3190 - RES SEM IN PSYCHOLOGY IN EDUC
- PSYED 3417 - STRUCTURAL EQUATION MODELING
- PSYED 3450 - INTRO TO EDUCATIONAL EVALUATION
- PSYED 3591 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY
- PSYED 3592 - PRACTICUM IN COLLEGE TEACHING
- PSYED 3599 - DISSERTATION RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY
- PSYED 2416 - APPLIED MULTIVARIATE ANALYSIS
- PSYED 3419 - MEANING-CENTERED APPROACHES TO STUDYING DEVELOPMENT: PARTICIPATION OBSERVATION IN THE FIELD
- PSYED 3632 - APPLIED RESEARCH DESIGN
- PSYED 2510 - ASSESSMENT OF CHILDREN'S DEVELOPMENT IN REAL WORLD CONTEXTS
- PSYED 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- PSYED 2073 - CONSTR ACHIEV/ABILITY TESTS
- PSYED 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- IL 3003 - RESEARCH INTERVIEWING
- EDUC 3595 - SPECIAL TOPICS - LSAP
- ADMPS 3012 - QUALITATIVE DATA MANAGEMENT ANALSYS AND PRESENTATION

Development in Context

12 Credits - Select at least 4 from the following (other options available with advisor consent):

- PSYED 3589 - SPECIAL TOPICS
- PSYED 3531 - FAMILY INFLUENCE ON CHILD DEVELOPMENT
- PSYED 3535 - CULTURE AND COGNITION
- PSYED 2588 - SPECIAL TOPICS
- EDUC 3595 - SPECIAL TOPICS - LSAP

Years 2-3

Select at least 4 from the following (any sequence):

- PSYED 3417 - STRUCTURAL EQUATION MODELING
• PSYED 3419 - MEANING-CENTERED APPROACHES TO STUDYING DEVELOPMENT: PARTICIPATION OBSERVATION IN THE FIELD
• PSYED 3450 - INTRO TO EDUCATIONAL EVALUATION
• PSYED 2416 - APPLIED MULTIVARIATE ANALYSIS
• ADMPS 3012 - QUALITATIVE DATA MANAGEMENT ANALYSIS AND PRESENTATION
• IL 3003 - RESEARCH INTERVIEWING
• LSAP 3595 - SPECIAL TOPICS

Area of Concentration

15 Credits

With your advisor, develop a coherent set of courses for your scholarly development.

Courses may be drawn from outside the School of Education or University of Pittsburgh.

Research, Teaching Practicum, and Dissertation Courses

All courses are 3 credits unless otherwise specified.

• PSYED 3591 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY
• PSYED 3592 - PRACTICUM IN COLLEGE TEACHING
• PSYED 3599 - DISSERTATION RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY

PhD Core Curriculum

Methods Courses

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a minimum of 5 methods courses: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

• EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
• EDUC 3103 - QUANTITATIVE METHODS 2
• EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

• EDUC 3102 - FIRST YEAR SEMINAR 1
• EDUC 3105 - FIRST YEAR SEMINAR 2
Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

**Research Methodology, PhD**

**Doctor of Philosophy Degree**

Degree Requirements: The PhD degree requires a minimum of 90 credits and a dissertation.

*A redesigned Doctor of Philosophy degree starts Fall 2014. For additional degree information, refer to the introductory school section on Doctoral Degree.*

- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY
- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- PSYED 2030 - EXPERIMENTAL DESIGN
- PSYED 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- PSYED 2073 - CONSTR ACHIEV/ABILITY TESTS
- PSYED 2410 - APPLIED REGRESSION ANALYSIS
- PSYED 2416 - APPLIED MULTIVARIATE ANALYSIS
- PSYED 2422 - DATA ANALYSIS USING COMPUTER PACKAGES
- PSYED 3408 - HIERARCHICAL LINEAR MODELING
- PSYED 3410 - REGRESSION ANALYSIS
- PSYED 3416 - MULTIVARIATE STATISTICS
- PSYED 3417 - STRUCTURAL EQUATION MODELING
- PSYED 3420 - COMPUTER APPLICATIONS TO RESEARCH METHODOLOGY
- PSYED 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- PSYED 3475 - PSYCHOMETRIC THEORY
- PSYED 3477 - ITEM RESPONSE THEORY
- PSYED 3484 - ADV TOPICS IN MEASUREMENT
- PSYED 3491 - SUPERVISED RESEARCH IN RES METH
- PSYED 3495 - TEACHING INTERNSHIP IN RES METH
- PSYED 3499 - DISSERTATION RESEARCH IN RESEARCH METHODOLOGY

**PhD Core Curriculum**

**Methods Courses**

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete a **minimum of 5 methods courses**: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

**First Year Seminar**
To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102 and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

**Applied Developmental Psychology, MS**

The Master of Science degree requires 36 credits distributed as follows: Applied Developmental Psychology (ADP) Core courses (18 credits), Specialization courses (12 credits), and Community-Based Practice Learning (with capstone project) courses (6 credits).

**Core Courses**

All full-time students in the 36-credit Master of Science (MS) program in Applied Developmental Psychology (ADP) complete a common set (18 credits) of core, foundational courses in their first year.

- PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE
- PSYED 2510 - ASSESSMENT OF CHILDREN'S DEVELOPMENT IN REAL WORLD CONTEXTS
- PSYED 2530 - APPLIED DEVELOPMENTAL PSYCHOLOGY (ADP): PROFESSIONAL IDENTITY AND LEADERSHIP
- PSYED 2542 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS 1
- PSYED 2543 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS 2

**Specialization Courses**

(Other courses may be chosen based on specialization with advisor approval)

Choose 18.0 credits from the following courses:

In the second year of the program, students complete in-depth study and training in courses aligned with their chosen concentration/specialization area, as well as complete a community-based practice learning experience that consists of a field placement and development of the Master's capstone project. ADP MS students presently may select from five concentrations; ARMO, BHSC, CHSCN, CYD, and IMH, or, they may design their own course of study with advisor approval. See typical course offering by concentration below. ADP MS options include completion of the Applied Behavior Analysis Certificate, Study Abroad, and taking additional elective courses. View Course Options

- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- PSYED 2113 - DEVELOPMENTAL PSYCHOPATHOLOGY
- PSYED 2141 - CHILD AND YOUTH WORK 1 - INTRODUCTION
- IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- PSYED 2632 - APPLIED RESEARCH DESIGN
- PSYED 2532 - PSYCHOSOCIAL ASPECTS OF ILLNESS
- PSYED 2520 - INTRODUCTION TO COUNSELING
- PSYED 2521 - THEORY, MEANING AND PRACTICE OF PLAY AND ACTIVITY
- PSYED 2349 - CHILD LIFE PRACTICE IN HOSPITALS
- PSYED 2524 - BEHAVIORAL ASSESSMENT AND INTERVENTION
- PSYED 2003 - REFLECTIVE CONSULTATION
Research Methodology, MA

The Master of Education degree requires 39 credits of coursework and a research project.

Core Curriculum

- PSYED 2001 - INTRO TO RESEARCH METHODOLOGY
- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- PSYED 2030 - EXPERIMENTAL DESIGN
- PSYED 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- PSYED 2073 - CONSTR ACHIEV/ABILITY TESTS

Additional Research Methods Courses

Choose 9.0 credits from the following 4 courses

- PSYED 2422 - DATA ANALYSIS USING COMPUTER PACKAGES
- PSYED 2410 - APPLIED REGRESSION ANALYSIS
- PSYED 2416 - APPLIED MULTIVARIATE ANALYSIS
- PSYED 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS

Psychological Perspectives on Education

Choose 3.0 credits from the following courses

- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/adolescence
- PSYED 2127 - HUMAN LEARNING
- PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- PSYED 2504 - DVLP: MIDDLE CHLHD/adolescence

Social and Cultural Perspectives on Education

Choose 3.0 credits from the following courses

- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
Research Requirements

Choose 6.0 credits from the following 3 courses

- Option 1: Thesis - 6 total credits of PSYED 2499 over 2 terms;
- Option 2: Supervised Research Project Thesis Equivalent - 3 credits of PSYED 2491 and 3 credits of PSYED 2494;
- Option 3: Supervised Research Project and Literature Review - 3 credits of PSYED 2491 and 3 credits of 2494

- PSYED 2491 - SUPERVISED RESEARCH IN RES METH
- PSYED 2494 - M.A. PROJECT IN RSRCH METHODLGY
- PSYED 2499 - THESIS RES IN RSRCH METHODOLOGY

Master's Comprehensive Examination

Master's Comprehensive Examination consists of three 100-item multiple-choice tests, one each in the areas of measurement, research design, and statistics.

For the Master's Comprehensive Examination, a student must attain a score of 60 on each of the three area tests. The students must take each of the three area tests until a score of 60 is attained. Before retaking a test, however, the advisor and the students should make plans for removal of any knowledge deficiency identified from the results of the previous administration. The advisor's approval for retaking any part of the examination should be obtained. There is no limit on the number of times a master's student may take the comprehensive examination in order to obtain a passing score at the master's level. Students cannot retake an examination for at least a month unless the advisor agrees.

Research Methodology, MEd

Core Curriculum

Degree Requirements: The MA degree requires 39 credits of coursework and completion of a thesis option.

- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
The student participates in a supervised research activity that involves data collection. Usually, students register for three credits of PSYED 2491 in each of two terms. A report that describes the activities completed each term is written by the student. The written report prepared for the supervised research experience does not satisfy the pre-dissertation research project requirement in the doctoral program.

Additional Research Methods Courses

Choose 9.0 credits from the following 4 courses

Other courses may be approved by the student's advisor.

- PSYED 2410 - APPLIED REGRESSION ANALYSIS
- PSYED 2416 - APPLIED MULTIVARIATE ANALYSIS
- PSYED 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- PSYED 2422 - DATA ANALYSIS USING COMPUTER PACKAGES

Psychological Perspectives on Education

Choose 3.0 credits from the following courses.

- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/adolescence
- PSYED 2504 - DvLP: MIDDLE CHILHD/adoLESCENCE
- PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- PSYED 2127 - HUMAN LEARNING

Social and Cultural Perspectives on Education

Choose 3 credits from the following courses.

- ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY
- ADMPS 2133 - GENDER AND EDUCATION
- ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION
- ADMPS 2305 - SOCIOLOGY OF EDUCATION
- ADMPS 2306 - HISTORY OF EDUCATION
- ADMPS 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- ADMPS 2342 - EDUCATION AND CULTURE
- ADMPS 2344 - LEADERSHIP IN SERVICE LEARNING
- ADMPS 2352 - ANTHROPOLOGY OF EDUCATION
- EDUC 2111 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EDUC 2102 - HISTORY OF EDUCATION
- EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY
- EDUC 2104 - LEADERSHIP IN SERVICE LEARNING
Master's Comprehensive Examination

Master's Comprehensive Examination consists of three 100-item multiple-choice tests, one each in the areas of measurement, research design, and statistics.

For the Master's Comprehensive Examination, a student must attain a score of 60 on each of the three area tests. The students must take each of the three area tests until a score of 60 is attained. Before retaking a test, however, the advisor and the students should make plans for removal of any knowledge deficiency identified from the results of the previous administration. The advisor's approval for retaking any part of the examination should be obtained. There is no limit on the number of times a master's student may take the comprehensive examination in order to obtain a passing score at the master's level. Students cannot retake an examination for at least a month unless the advisor agrees.

Quantitative Research Methodology Minor

Requirements

A minor in Quantitative Research Methodology is awarded to students who successfully complete a minimum of 18 credits in intermediate and advanced quantitative research methodology course work in the Department of Psychology in Education with a minimum grade point average of 3.25.

The course work must be distributed as follows:

- A minimum of 6 credits in statistical methods.
- A minimum of 3 credits in measurement.
- A minimum of 3 credits in research design.

Statistical Methods Courses

Minimum of 6 credits chosen from:

- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- PSYED 2410 - APPLIED REGRESSION ANALYSIS
- EDUC 3103 - QUANTITATIVE METHODS 2

Measurements Courses

Minimum of 3 credits chosen from:
Research Design Courses

Required course - 3 credits:

- PSYED 2030 - EXPERIMENTAL DESIGN

Infant Mental Health Certificate

Description of the Course Requirements:

All students must complete 18 course credits for this School of Education Post-Baccalaureate Certificate in Infant Mental Health within the Department of Applied Developmental Psychology. Students may complete two optional credits in Reflective Supervision/Consultation to meet requirements for IMH Endorsement.

All courses are 3 credits unless otherwise specified.

- PSYED 2003 - REFLECTIVE CONSULTATION
- PSYED 2005 - INFANT DEVELOPMENT
- PSYED 2006 - INFANT MENTAL HEALTH INTERVENTIONS I
- PSYED 2007 - FOUNDATIONS OF INFANT MENTAL HEALTH I
- PSYED 2008 - FOUNDATIONS OF INFANT MENTAL HEALTH II
- PSYED 2009 - INFANT MENTAL HEALTH INTERVENTIONS II

Learning Sciences and Policy Program

The Learning Sciences and Policy program is based on the belief that understanding learning, teaching, and organizations is best undertaken as an interactive system, and that an integrated and coordinated interdisciplinary approach is best suited to understand, design and implement educational change. The program combines disciplines in learning sciences, teaching in the content disciplines, and organization and policy studies with the goal of improving instruction at scale, and is predicated on the idea that successful policy solutions will require learning on the part of educational professionals at all levels of the system.

- Learning Science and Policy (LSAP) PhD

The Learning Sciences and Policy (LSAP) PhD program brings three groups of faculty expertise together into a collaborative research and training environment: learning sciences in education; content-based educational research; and education policy and organizational change. The goal for the new program is to produce a yearly cohort of 5 to 8 nationally-competitive research scholars who have the training, track-record, and vision to become leaders in understanding and promoting educational change.

Our program is based on the belief that understanding learning, teaching, and organizations is best undertaken as an interactive system, and that an integrated and coordinated interdisciplinary approach is best suited to understand, design, and implement educational change. The program combines disciplines in learning sciences, teaching in the content disciplines, and organization and policy studies with the goal of improving instruction at scale, and is predicated on the idea that successful policy solutions will require learning on the part of educational professionals at all levels of the system.

Innovative features of the LSAP PhD Program:

- Students will be immersed in rigorous interdisciplinary research and training experiences from their first day in the program.
• The University of Pittsburgh Learning Policy Center will serve as a vehicle for dissemination of LSAP faculty and student research as well as a location for policy internships.

• Access to Pittsburgh's rich talent pool of analysts and research in education policy and learning including research scientists at Learning Research and Development Center (LRDC), policy specialists at the RAND Corporation, research methodologists at Carnegie Mellon, and education reform specialists at the Institute for Learning.

• Admitted students will be guaranteed full funding (for three years) through research assistantships that will allow them to work alongside active researchers on funded research programs.

• Students will participate in a year of field placement or a semester of field placement and a semester of teaching practicum at the college level. Field placements provide experiences outside the university (e.g., museums, school districts, community centers, and research centers).

• Policy and design internships with projects including the Institute for Learning, the Learning Policy Center, University of Pittsburgh's Center for Out-of-School Learning Environments (UPCLOSE), Pittsburgh Science of Learning Center (PSLC), SWoRD, the Design-based Learning Project.

• Active involvement in ongoing research projects.

• Integrated coursework that covers the fields of Learning Sciences, Learning Policy and Organizations, and Content Area Learning.

• Rigorous training in quantitative, qualitative, and mixed research methods.

• Out-of-School Learning EdD

The EdD Area of Concentration (ARCO) in Out-of-School Learning is intended for experienced professionals who aspire to be transformational leaders in out-of-school learning. Prospective applicants might currently work in museums, out-of-school time (OST) settings, libraries, digital media/technology, university outreach/extension, policy groups and think tanks, life-long learning programs, parks, environmental centers, arts-based organizations, community settings, youth development, or the many other areas where we explore learning environments that exist outside of classrooms. Program faculty are expert in connecting research and practice and have experience across a wide range of out-of-school settings, audiences, and learning arrangements.

Out-of-School Learning students are part of a larger, multidisciplinary EdD cohort of students from eight different specializations in education, offering rich opportunities for collaboration and broad learning about education. The core EdD curriculum covers educational foundations and methods of practitioner inquiry, while the specialized out-of-school learning curriculum focuses on informal learning theory, organizational processes, applied life-long learning, and evidence-based change and evaluation.

In addition to online work, most students in the EdD program come to Pittsburgh for occasional Saturday sessions with the entire EdD cohort. Students in the out-of-school learning program can opt for this online/face-to-face model or could choose a predominately online model. Students who do not live in Pennsylvania can apply for merit-based scholarships to help offset the cost of out-of-state tuition.

Learning Sciences and Policy, PhD

Degree Requirements

Doctoral students in the Learning Sciences and Policy program who enter the program without a master's degree in a relevant field are required to take six core courses, a minimum of six research methods courses, and eight advanced seminars in an area of specialization. Students also participate as part of a faculty member's research team throughout their time in the program. As part of that research team, students engage in every phase of the research process, apprenticing under the active mentoring of the faculty member. Additionally, doctoral students are expected complete at least two independent research projects under the supervision of the faculty. Students are required to take two one-semester practica/internships, the purposes
of which are to expose students to a range of kinds and forms of research and build students' professional skills. Students with a Masters degree in a related field can transfer credits toward the PhD with approval by the LSAP faculty.

Out-of-School Learning, EdD

EdD Curriculum

The EdD program is a three-year 90-credit program, including 30 credits transferred from relevant graduate work. Students are required to transfer 30 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on campus, orientation in the spring before the summer start of the program. The day includes a welcome from the Dean of the School of Education, EdD program information, and cohort-building activities as well as an introductory session with other students in your Area of Concentration. Orientation typically takes place in April.

- **One-week intensive on ramp:** The EdD cohort will participate in a full-week, on campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience, known as the "on-ramp", will be your first foundations course on framing, identifying, and investigating problems of practice. The on-ramp typically takes place in June.

- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is required.

**CORE COURSES** Credits / Units: 24 Total

**Foundation Courses**
- EDUC 3002 - FOUNDATIONS 1:
- EDUC 3003 - FOUNDATIONS 2: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS 4: POLICY AS A LEVER FOR CHANGE

**Practitioner Inquiry Courses**
- EDUC 3001 - PRACTITIONER INQUIRY 1
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTICUM INQUIRY 4

**SUPERVISED PRACTITIONER INQUIRY**
Students will identify, review and synthesize relevant scholarship that supports as inquiry into a problem of practice.
- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

**LABORATORY OF PRACTICE**
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.
- EDUC 3012 - SUPERVISED INTERNSHIP

**GUIDANCE IN SCHOLARLY PRACTICE**

**Guidance in Scholarly Practice:** Based on research interests, the students will be required to write a manuscript that reports on the improvement science process.

**Portfolio of Scholarly Practice:** The portfolio of scholarly practice will provide evidence of learning and success in foundations, inquiry, and ARCO experiences.
- EDUC 3099 - GUIDANCE IN DOCTORAL DEGREE

Out-of-School Learning ARCO Curriculum
Out-of-School Learning ARCO Courses

- LSAP 3015 - INFORMAL LEARNING: THEORY AND FOUNDATION
- Evaluation Assessing Impact and Evidence for Decision Making
- The Future of Out-of-School Learning
- Lifelong Learning for Diverse Audiences
John A. Swanson School of Engineering

Graduate study in engineering at the Swanson School is designed for those professionals who wish to further develop the ability to apply engineering principles to the solution of modern society's problems. The programs are flexible and can be used by those interested in research, design, management, and related technical positions in both the public and private sectors. PhD programs are also designed for those individuals interested in an academic or research career.

The Swanson School of Engineering offers graduate education leading to the Master of Science degree in bioengineering, chemical engineering, computer engineering, civil engineering, electrical engineering, industrial engineering, materials science and engineering, mechanical engineering, petroleum engineering, and sustainable engineering. Swanson School of Engineering MS degree programs have two tracks: a professional track and a research track. The school offers PhD degrees in chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials science and engineering, and mechanical engineering as well as computational modeling and simulation. Also offered is a MD/PhD Program with the School of Medicine and several certificate programs.

Contact Information

The Swanson School of Engineering is housed in the Michael L. Benedum Hall of Engineering. Inquiries and correspondence concerning graduate study should be addressed to the graduate coordinator of the appropriate department or program. Inquiries of a general nature can be sent to:

University of Pittsburgh
Associate Dean for Academic Affairs
152 Benedum Engineering Hall
Swanson School of Engineering

Admissions

All applicants will be judged on their own merits. For recent graduates of an ABET-accredited program, admission will be based primarily on the undergraduate academic record. Typically a B average (cumulative grade point average of 3.0 on a 4.0 scale) or better is required for admission, and most programs require the Graduate Record Examination (GRE). Applicants should check each program's specific requirements.

Applicants from non-ABET accredited programs also are considered on an individual basis with emphasis given to academic achievement, area of study, career orientation, and work experience. Depending on the program, applicants who do not have an engineering degree may have to take certain prerequisite courses before beginning their graduate engineering degree program. Applicants may be admitted provisionally until specified prerequisites are completed and/or a 3.000 grade point average is achieved. Undergraduate courses cannot be used to satisfy graduate degree requirements.

Graduate Special Student - A student not currently enrolled at the University of Pittsburgh will be granted temporary admission typically only for one term but at most for a total of six credits. Students in this classification cannot earn credits toward the completion of degree requirements at the University of Pittsburgh with the following exception: Students who are unable to meet the deadline for filing an official application for admission may be granted temporary admission status by the appropriate graduate coordinator. Regular admission must be granted within the first term of registration as a Special Student. Graduate credits earned during temporary admission period can be applied toward the degree. Approval from the appropriate graduate coordinator is required.

Admissions Procedures

1. U.S. citizens or permanent residents should:
1. See the Swanson School of Engineering Web site for the online application, or contact a departmental graduate coordinator for the application material.

2. Apply online or return the completed application material with a check or money order for $40 payable to the University of Pittsburgh. This application fee is not refundable.

3. Ask the registrars of all undergraduate and graduate schools attended to send transcripts of records to the University of Pittsburgh; Swanson School of Engineering Office of Administration; 151 Benedum Engineering Hall; Pittsburgh, PA 15261. An official transcript of the undergraduate record is required unless the applicant is a graduate of the University of Pittsburgh.

Once all application material, including the application fee and complete transcripts, are received, the application will be reviewed. The deadline for the fall term is March 1; the spring term deadline is July 1; and the summer term deadline is February 1. All applications for financial assistance should be received by February 1 for admission the following fall term.

Please see Graduate Admissions of International Students in the front section of this bulletin for University regulations on admissions of international students.

2. International Students: In addition to academic review by the Swanson School of Engineering, the admissions officer, Office of International Services (OIS) will also process international student applications for non-academic qualifications. The document needed to apply for a non-immigrant visa will be issued only after the applicant has been admitted and has provided evidence of adequate financial support and English language proficiency. The procedure for international applicants is as follows:

1. Preliminary inquiries concerning graduate programs, research, and financial aid may be directed to the departmental graduate coordinator. Applications for graduate study are available from www.engineering.pitt.edu, the graduate coordinator, or the University of Pittsburgh, Swanson School of Engineering, Office of Administration, 151 Benedum Hall, Pittsburgh, PA 15261. The non-refundable application fee for international students is $50.

2. Following review (and acceptance) by the department based upon the applicant's academic qualifications, the international student admissions officer will review the applicant's financial and language qualifications to determine eligibility for a visa document.

3. Prior to completion of registration, entering engineering graduate students with TOEFL scores of less than 100 on the iBT (or equivalent) must take an additional test of English language proficiency administered by the English Language Institute (ELI). International students who are citizens of countries where English is the official language, international students who have completed degrees at regionally accredited institutions in the U.S., and international students who have results on the TOEFL above 100 on the iBT (or equivalent) may be exempted from taking the additional test of English language proficiency by the student's academic department.

This procedure applies also to international applicants who are already in the United States.

The University reserves the right, even after the arrival and enrollment of a student from another country, to require, at the student's expense, individual curricular adjustments whenever particular deficiencies or needs are found. This may include enrollment without credit in English as a Foreign Language or other prerequisite courses. New international students are encouraged to use the services of OIS for help in adjusting to the United States and to facilitate their total educational experience.

Financial Aid

The Swanson School of Engineering provides a considerable amount of financial assistance to highly qualified, full-time graduate students. Applicants interested in being considered for financial assistance including teaching and research assistantships must also complete a graduate assistantship application available at http://www.engineering.pitt.edu/graduate and should check with the department of their choice for any additional information concerning applications for assistantships. All applications for financial assistance should be received by February 1 for admission the following fall term.

Financial aid includes:

1. Fellowships awarded to students of outstanding ability, usually as an unrestricted grant.

2. Traineeships awarded to students for training in selected areas.

3. Teaching assistantships and teaching fellowships awarded to exceptionally well-prepared students in return for assistance in laboratories, recitation sections, and other instructional duties. Partial to full tuition scholarships are provided with these assistantships.

4. Research assistantships awarded to students for assistance on research programs. Partial to full tuition scholarships are provided as part of the assistantship.

Advisors
Three types of advisors are primarily responsible for guiding engineering students through their program:

**Graduate Coordinator**

The graduate coordinator is the faculty member responsible for the operation of the department's graduate program. The coordinator supervises the operations of admissions, registration, course scheduling, assignment of advisors, graduation, and academic disciplinary procedures. The graduate coordinator generally is the best source of information and advice when questions arise or problems are encountered during graduate study.

**Faculty Advisor**

Each student is assigned a faculty advisor when admitted into a graduate program. This advisor assists the student in planning a course of study and is responsible for approving the student's registration and all course changes. Once the student begins thesis or dissertation research, the duties of the faculty advisor are assumed by the student's major research advisor.

**Major Research Advisor(s)**

The major research advisor (or advisors if joint advisors are designated) is the graduate faculty member who directs the student's research and supervises the preparation of the thesis or dissertation. Generally, the major advisor also serves as the chair of the final oral examination (defense) committee for the student's thesis or dissertation.

**Responsibility for Academic Progress**

It is the responsibility of students to check their academic progress by contacting either the departmental graduate coordinator or their faculty advisor. The student should also become familiar with the program degree requirements and pertinent academic regulations.

**Academic Integrity and Code of Conduct**

The integrity of the academic process requires fair and impartial evaluation on the part of faculty and honest academic conduct on the part of students. Students are expected to conduct themselves with a high level of responsibility in the fulfillment of their course of study and their conduct in and out of the classroom. It is the corresponding responsibility of faculty to make clear to students those standards by which they will be evaluated and the resources permissible for use by students during their course of study. The educational process is perceived as a joint faculty-student enterprise that will involve professional judgment by faculty and may involve, without penalty, reasoned exception by students to the data or views offered by faculty. Consistent with these considerations (and without limiting their scope and application in their entirety to the academic programs of the University), faculty and students are directed to observe established University of Pittsburgh and Swanson School of Engineering guidelines on academic integrity and code of conduct. The Swanson School of Engineering and the University of Pittsburgh Guidelines on Academic Integrity are available to faculty and students in the departmental offices of the Swanson School of Engineering and is also available by Policy Guidelines - SSOE. The University's student Code of Conduct is available at: http://www.studentaffairs.pitt.edu/wp-content/uploads/2016/11/2016_Code_of_Conduct_Nov4.pdf

**Probation, Suspension and Dismissal**

A graduate student whose cumulative GPA falls below 3.000 will be placed on academic probation for the following term. If the student's cumulative GPA remains below 3.000 for the next academic year term (i.e., the cumulative GPA is below 3.000 for two successive academic year terms), he or she can be suspended or dismissed. Students will normally be suspended for one calendar year; students who are dismissed will not be re-admitted to the Swanson School of Engineering. Students on probation are not eligible to take the PhD preliminary evaluation or the MS or PhD comprehensive examination, and will not be graduated.
Course Work for Graduate Credit

Only graduate courses will count for graduate credit (i.e., 2000 or 3000 level courses). Students may not use undergraduate courses taken at either the University of Pittsburgh, or another university to satisfy a graduate requirement.

Online courses:

Unless the student is specifically enrolled in one of the Swanson School's online degree programs, no more than two online courses (six credits total) may be taken for graduate credit. These course must be:

1. Offered by an appropriate academic graduate program.
2. Suitable for the student's academic program and typically not available on the University of Pittsburgh campus
3. Approved by the graduate coordinator and then approved by the Associate Dean for Academic Affairs.

Residency and Statute of Limitations Requirements

A graduate student may complete all requirements for the MS degree on a part-time basis. All degree requirements for the Research MS degree, must be fulfilled within a period of four calendar years after the student's first registration for graduate study; within five calendar years for a Professional MS degree.

Master of Science Programs

All departments in the Swanson School of Engineering offer MS degree programs that have two tracks: a professional track and a research track. The differences are detailed below. Students may transfer no more than six credits of appropriate graduate course work from another graduate program at the discretion of the graduate coordinator in satisfying the course requirements of both the professional and research MS degrees.

Professional MS Track

The professional track consists of 30 credits (10 courses). The faculty of the degree-granting unit determines the actual course content and requirements. These programs typically have a set of required core courses. Students may have an opportunity for more in-depth study in a particular area of interest through a two- or three-course concentration. As a professional degree, while no thesis or comprehensive examination is required, the department may require a special projects course.

The professional MS programs are oriented toward full-time students seeking a career in industry, and part-time students currently working in industry. Certain programs may be offered off campus at industrial sites or online. Although students who have an undergraduate degree in a technical area (e.g., mathematics, physics, computer science, or chemistry) may be accepted, depending on the particular program, they may be required to take certain prerequisite courses. These undergraduate pre-requisite courses cannot be used to satisfy graduate course requirements. Interested students should contact the appropriate graduate coordinator for specific details.

Research MS Track

The research track is primarily for those students who wish to pursue the PhD. Students in this track will be advised to take courses best suited for a research degree. The MS research track requires a minimum of 24 course credits, depending on the selected option and six credits of thesis research. The department may also specify credit distribution requirements for courses in the major and related areas. The student should see his or her major advisor for detailed information. Students working under the MS research option are required to present a thesis that demonstrates marked attainment in some area of the student's major subject, as well as acquisition of the methods and techniques of scientific investigation. Certain programs may permit a project to be completed in place of the thesis. The University transcript will include an entry indicating that the student is in the research MS
track. A comprehensive examination or equivalent is required. Normally the final oral exam for the thesis meets the requirements of the MS comprehensive exam.

A graduate student may commence MS thesis work only after obtaining full graduate status.

A graduate student should initiate preliminary thesis and research work as early as possible. Once research and thesis work has begun, the student must register for thesis credits of research in each succeeding term until successful completion of the thesis and the final oral examination. Exceptions to this rule can be made only upon the recommendation of the student's major advisor.

Only six credits of MS thesis may be used as partial fulfillment of the requirements for the MS degree. Before completion of the thesis, the student will receive a grade of I (incomplete) at the end of each term. After successful completion of the thesis and the final oral examination, all I grades will be changed to S grades.

**MS Thesis Oral Examination (Defense)**

The purpose of this examination is to evaluate the student's MS thesis and is part of the MS thesis requirements as specified by the program. For additional information on the thesis exam, see Thesis Option under Regulations Pertaining to Master of Arts and Master of Science Degrees.

**Residency and Statute of Limitations Requirements**

A graduate student may complete all requirements for the MS degree on a part-time basis. All degree requirements for the MS degree, however, must be fulfilled within a period of four calendar years after the student's first registration for graduate study.

**Electronic Thesis and Dissertation (ETD)**

http://www.pitt.edu/~graduate/dissertation.html

All graduate students preparing a thesis or dissertation must complete an Electronic Thesis and Dissertation participation form. The signed participation form and the necessary payment receipt documentation are to be submitted to the Swanson School of Engineering Office of Administration. After receiving approval the student will go to the ETD Online System and follow the instructions in the Format Guidelines Manual for submission of an ETD. Questions and problems can be addressed by contacting the School of Engineering Office of Administration, 151 Benedum Hall.

**Joint MD/PhD Degree Program/Medical Scientist Training Program**

The Medical Scientist Training Program (MD/PhD) offers selected students an opportunity to earn MD and PhD degrees simultaneously from the School of Medicine and certain departments in the Swanson School of Engineering. Interested applicants should contact the MD/PhD program at 5585 Scaife Hall, 412-648-2324 for further information. http://www.mdphd.pitt.edu/

**Joint MBA/MS Degree Program**

The Swanson School of Engineering and the Joseph M. Katz Graduate School of Business have established joint MBA/MS programs with each of the seven engineering graduate degree programs. These programs are designed to meet the clear and growing need felt by various industry sectors for managers with sophisticated business and engineering skills. In today's environment, such cross-functional skills are essential in addressing multifaceted problems involving issues related to product development, quality, information systems, modeling and quantitative analysis, finance and accounting, international relations, and marketing.

Both full-time and part-time options are available. The full-time option can be completed in two academic years, whereas the part-time option may typically require a period of four to five years. The programs generally consist of 64.5 credits full time (or 69 credits part time). It is designed for students with undergraduate degrees in engineering and, in some cases, the physical sciences, preferably with industry work experience. Candidates must meet the admissions criteria of both the MBA program and the specific MS engineering program of interest.
Students accepted into the program will be expected to complete both degrees concurrently and pay full tuition. Courses will be scheduled in such a manner as to preclude students from receiving one degree before the other.

This program is only for those students seeking a professional MS engineering degree. Students interested in the research MS engineering degree track will not be admitted. Further, because of the high credit demand, students in the program will not be able to hold either research or teaching assistant positions. Students who enrolled in the joint degree program are expected to complete both degrees.

Full-time students will register for the program through the Joseph M. Katz Graduate School of Business for four semesters at the one-year MBA tuition rate. For more information see http://www.business.pitt.edu/katz/mba/academics/programs/mba-msengineering.php.

Doctor of Philosophy Programs

The general PhD requirements of the Swanson School of Engineering are listed below. Further information concerning degree requirements and options can be found under each program's description.

Entrance to the PhD Program

A graduate student who has received the Master of Science degree in one engineering program area or has equivalent preparation is eligible to enter a doctoral program in that same area. To be accepted for a doctoral program, a graduate student must have achieved a superior scholastic record and shown great promise for conducting independent research. A prospective doctoral student should have a cumulative graduate grade point average of at least 3.00 in graduate course work. Evidence of research aptitude, including favorable recommendations, is required. Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree according to the established criteria and qualifications set by each department. Admission to a doctoral program does not include any implication concerning admission to candidacy for the PhD degree.

Course and Dissertation Credit Requirements

An objective of the PhD program is to attain a high degree of competence in the student's chosen field of specialization. Completion of the PhD program requires a total of 72 credits, of which at least 18 must be for dissertation research. The graduate faculty determines the minimum course requirements for each PhD program. Typically each program has a core of well-coordinated courses followed by advanced course work in one or more specialty areas, with the number of course credits varying among programs. Additional course work may be prescribed in accord with the student's specific needs. However, all PhD students must take a minimum of 24 credits of graduate level didactic coursework (2000 or 3000 level). A student may further attain the required degree of competence beyond these 24 credits by other means including independent study under faculty supervision. Regardless of how the required competence is obtained, it must be certified by passing the appropriate series of examinations.

Students who have been formally admitted to PhD candidacy may register for dissertation research (3999). Preliminary dissertation research can be done as part of an appropriate 3997 departmental course. The number of dissertation credits for which a student registers should be commensurate with the independent research effort to be undertaken during the term. Minimum registration is three credits per term. Of the minimum 18 credits of dissertation research, at least 12 credits must be for the program's PhD dissertation research course (3999). These may be taken only after admission to candidacy; the other six credits may be in the department's pre-candidacy PhD research course. Students will be given an I grade for all research courses until the dissertation is successfully defended and submitted.

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full time on their dissertations may register for Full-Time Dissertation Study (FTD), which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee.

Once a student registers for dissertation research (3999), he or she must continue to register for dissertation research in successive terms (not including the summer term) until the final oral examination has been passed, unless the student is eligible to register for Full Time Dissertation credit. (In special cases the major advisor may request that this requirement be waived.) Upon successful completion of the final oral examination, all I grades will be changed to S grades.

Doctor of Philosophy Evaluation/Examinations
To complete the PhD program, students must pass the preliminary evaluation, comprehensive and final oral examinations. Students who have less than a 3.000 cumulative GPA for all courses that satisfy graduation requirements are considered to be on probation and will not be permitted to take any of these examinations.

**Preliminary Evaluation (Qualifier)**

See Preliminary Evaluation under Regulations Pertaining to Doctoral Degrees for an overview of the purpose of this examination, and then review the school-specific information below. This examination is usually taken within the first two to four terms of graduate study and is a first step towards the student's formal admission to candidacy for the Doctor of Philosophy degree. Each program determines the exact format and content of this examination, which may consist of written and oral components. Qualifier examinations are usually given once a year at a time specified by the program.

**Comprehensive Examination**

See Comprehensive Examination under Regulations Pertaining to Doctoral Degrees for an overview of the purpose and regulations regarding this examination, and then review the school-specific information below. The nature and timing of this examination is determined by the department; it may be combined with students' formal presentation of their dissertation proposal. However, the Comprehensive Examination cannot be taken until at least one full term after successfully completing the Preliminary Examination. The formal thesis proposal should be scheduled as soon as the candidate is prepared to present his/her topic and research plan, since there must be at least two full terms between its successful completion and the Final Oral Examination.

**Final Oral Examination (Defense)**

See Final Oral Examination under Regulations Pertaining to Doctoral Degrees for an overview of the purpose and regulations regarding this examination, and then review the school-specific information below. The final oral examination determines the acceptability of a student's dissertation and his or her ability to comprehend, organize, and contribute to the chosen field of research. One copy of the dissertation must be submitted to each member of the doctoral committee at least two weeks before the date set for the final oral examination. Because a portion of the defense is open to the public, the student should ensure that the dissertation defense is formally announced on both the School's webpages and its videos monitors, at least two weeks prior to the defense date. Further, this examination cannot occur sooner than two full terms following the formal thesis proposal.

**Admission to PhD Candidacy**

See Admission to Candidacy for the Doctor of Philosophy Degree under Regulations Pertaining to Doctoral Degrees for the requirements for admission. An Application for Admission to Candidacy for the Doctoral Degree must be filed after these requirements have been met.

In order to have the dissertation topic approved, the student must prepare, in consultation with the major advisor, a dissertation proposal. A formal dissertation proposal conference will then be held in which the members of the doctoral committee will review the proposal and either accept, revise, or reject it. Depending on the department's procedure, this conference may be held in conjunction with the comprehensive examination. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal.

If the dissertation proposal is accepted by the doctoral committee, the student is formally admitted to candidacy for the Doctor of Philosophy degree. Such admittance to PhD candidacy must be accomplished at least two terms before the student plans to graduate.

**Doctoral Committee**

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees for an overview of the committee's make up and responsibilities. In addition, the following school-specific rules apply in the School of Engineering:
Faculty who hold a secondary appointment and actively participate in the department will be considered as internal rather than external members of the doctoral committee. Hence, they may serve as the major advisor. Faculty members whose secondary appointment within the department is viewed as a courtesy appointment may be considered as an external committee member, but cannot serve as the student's sole committee chair (major advisor).

The composition of the Doctoral Committee must be approved by the department's graduate coordinator and either the Associate Dean for Academic Affairs or the Associate Dean for Research prior to the presentation of the formal dissertation proposal. A committee must consist of four or more persons, including at least one from another department within the University of Pittsburgh or from an appropriate graduate program at another academic institution, government agency or industry. The majority of the committee, including the major adviser, must be full or adjunct members of the Graduate Faculty. Typically the committee will consist of three internal (from the department) and one external members. In certain cases the graduate coordinator or associate dean may recommend one or more additional members of the committee if appropriate. Once the dissertation proposal is approved, the student is expected to meet at least annually with his/her Doctoral Committee.

If a committee member leaves the University, that member can continue to serve as an internal committee member provided that he/she has an adjunct appointment in the student's home department. If the major advisor (committee chair) leaves the University, then a new major advisor must be appointed by the graduate coordinator and approved by the appropriate associate dean. The new major advisor will typically be selected from among the remaining committee members. The former major advisor may remain on the committee as a member, but only if he/she has an adjunct appointment. The graduate coordinator and School administration must be informed of any proposed committee changes in the term they occur.

A major advisor has an obligation to assist the student to the successful completion of his/her dissertation. In those rare cases where the major advisor no longer feels that he/she can adequately work with the student, then it is incumbent on the department chair and graduate coordinator to meet with the committee and, if it is decided that the student is able to complete the dissertation, then select a new major advisor, typically from among the remaining members of the committee, and a replacement committee member appointed.

**PhD Dissertation**

Each student must prepare a dissertation embodying an extended original, independent investigation of a problem of significance in the student's field of specialization. The dissertation must add to the general store of knowledge or understanding of that field. Dissertations must be written in English. It is highly recommended that the student use a plagiarism-detection software (e.g., iThenticate) to ensure that no plagiarism, which is considered research misconduct, has been committed, either overtly or covertly.

A dissertation submitted to the Swanson School of Engineering in partial fulfillment of the requirements for an advanced degree must be free from any restriction, other than the author's copyright, concerning its publication by any agency outside the University. Any publication of a dissertation must be with appropriate acknowledgment to the University of Pittsburgh. After the dissertation has been prepared and approved by the major advisor, the final oral examination can be held.

**Departmental Requirements**

The policies enumerated above represent minimum requirements. In certain cases, individual departments may have stricter requirements. It is the ultimate responsibility of the student to understand the policies/requirements of his/her graduate program.

**Computational Modeling and Simulation PhD Program**

The Computational Modeling and Simulation (CMS) PhD Program at the University of Pittsburgh provides its graduate students with an integrated program of creative, independent research, course work, and teaching. Our students pursue research in diverse areas of engineering and sciences with concentration on numerical methods and computational schemes. Coupled with the University Center for Research Computing (www.crc.pitt.edu), this program offers unparalleled opportunities for individualized training in high performance computing and physical modeling. An extensive seminar series exposes students and faculty alike to the world’s leading scientists and their latest research. Pitt's outstanding research and placement resources, coupled with the university's commitment to being one of the top centers for computational research, uniquely positions us to help our PhD candidates to meet their objectives. For a review of our PhD Program in CMS, and application to this program, please see: www.cmssp.pitt.edu

**Cooperative Education**
With the renewed emphasis on professional master degree programs and the development of such initiatives as the MS/MBA, and 3+1+1 (first three years at a home institution, a fourth year at the SSoE to earn the BS degree, and a fifth year at the SSoE to earn an MS degree) programs, there is a strong need to provide graduate students, including international graduate students with a work opportunity that is an essential part of their education. This also includes PhD students who desire to take a term off in order to obtain industrial experience and perspective. Not only does the program provide them with needed experience, but it enables them to earn a reasonable amount of money over a 15 week work rotation. For more information, please visit http://www.engineering.pitt.edu/coop/.

Swanson School of Engineering Faculty

School of Engineering Faculty

Program and Course Offerings

Sustainable Engineering, MSSE

Overview

The Master of Science Degree in Sustainable Engineering (MS SE) is housed within the Mascaro Center for Sustainable Innovation (MCSI), with the degree granted from the Swanson School of Engineering. The 30-credit degree was designed to integrate with current MS programs in engineering, providing students with the opportunity to complete two MS degree programs with a limited time increase.

Program Objectives

- Provide advanced education to graduate students to identify and solve sustainability issues using systems approaches in the context of the triple bottom line of environmental, societal, and economic problems.
- Create a rigorous program with breadth and depth to propel graduate students to foster sustainable technologies, science, and practices in the U.S. and abroad.
- Create regional and nationally scalable sustainability solutions through service learning projects with a cohort of students.
- Provide students with experiences that enable them to communicate sustainability issues and solutions to multiple audiences.

Course Requirements

A total of 30 credits are required to earn the MS SE professional master's degree. The degree is structured so the participating student is required to take five core courses and five electives.

The four core courses are as follows:

- ENGR 2905 - CURRENT ISSUES IN SUSTAINABILITY
- CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
- CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT
- ENGR 2907 - (Active in Spring 2018)

Choose one of the following:

- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2523 - GLOBAL ENERGY POLICY
- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT
Electives:

Students can choose five electives from the areas below:

**Sustainable Built Environment & Infrastructure**
- CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING
- CEE 2340 - CONCRETE STRUCTURES 2
- CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES
- CEE 2720 - URBAN TRANSPORTATION PLANNING

**Energy**
- ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY
- ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS
- ECE 2795 - SPECIAL TOPICS POWER
- ECE 2250 - POWER ELECTRONICS
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2774 - POWER SYSTEMS ANALYSIS 2

**Environmental and Water Sustainability**
- CEE 2410 - WATER RESOURCES ENGINEERING
- CEE 2416 - SEDIMENT TRANSPORT
- CEE 2500 - ENVRNMNTL ENGRG MICROBIOL
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING
- CEE 2511 - ENVIRONMENTAL ENGINEERING PROCESS LABORATORY
- CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

**Green Computing**
- ECE XXXX - Sustainable Computing (Pre: ECE 2162, ECE 2192)
- ECE 2160 - EMBEDDED COMPUTER SYSTEM DESIGN
- ECE XXXX - Emerging Memory Technologies
- ECE 2161 - EMBEDDED COMPUTER SYSTEM DESIGN 2
- ECE 2192 - INTRODUCTION TO VLSI DESIGN
- ECE 2193 - ADVANCED VLSI DESIGN
- ECE 2162 - COMPUTER ARCHITECTURE 1
- ECE 3162 - ADVANCED COMPUTER MICROARCHITECTURE
- ECE 2140 - SYSTEMS-ON-A-CHIP DESIGN

**Department of Bioengineering**

**Contact Information**
Graduate Degree Programs

The Department of Bioengineering offers the degrees of Master of Science in Bioengineering, Doctor of Philosophy (PhD) in Bioengineering, and a Professional Masters in Medical Product Engineering. In addition, the department has a certificate program in Medical Product Innovation and participates in the MD/PhD program with the School of Medicine's Medical Scientist Training Program and the MBA/MS program with the Katz Graduate School of Business.

The graduate program in bioengineering incorporates five programmatic tracks:

- Bioimaging and Signals
- Biomechanics
- Molecular, Cellular, and Systems Engineering
- Neural Engineering
- Medical Product Engineering*
- Tissue Engineering and Regenerative Medicine

*(Please note this track has separate tracks for the MS and PhD).

The department has an active, interdisciplinary graduate bioengineering program in conjunction with faculty from the School of Medicine, the School of Health and Rehabilitation Sciences, the School of Dental Medicine, the clinicians at the University of Pittsburgh Medical Center hospitals, and other schools and departments at the University of Pittsburgh and Carnegie Mellon University.

The graduate program is directed toward engineering and life science education and research, with particular emphasis on the PhD. Its scope is broadly defined to incorporate the application of engineering principles, methods, and technology in two broad areas: (1) scientific queries into fundamental biological phenomena and (2) the development of instrumentation, materials, devices, and systems relative to application in the biological sciences and medicine. Thus, the bioengineering faculty are applying various forms of engineering principles, mathematics, computation, technology, and methodology to a broad variety of medical and life sciences problems.

Admissions

http://www.engineering.pitt.edu/BioGraduateAdmissions/

Applicants for admission are expected to have a minimum GPA of 3.5 from an accredited BS program. They must submit transcripts of all college-level work, three letters of recommendation, a statement of purpose, and scores on the verbal, quantitative, and analytical writing sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit the TOEFL, administered by the Educational Testing Service, with a minimum score of 550 (213 computer-based, 80 internet-based). In addition to these basic requirements, evidence of significant research and/or industrial experience is very important as further evidence of ability to perform well at the graduate level.

Students with a non-engineering background may be admitted provisionally on a case-by-case basis, and often are required to take undergraduate engineering and math courses considered as prerequisite for graduate course work in these areas. These undergraduate courses do not count toward their graduate degree credit requirements. Likewise, an undergraduate knowledge of physiology and basic biology and chemistry is assumed. In addition to the above basic requirements, evidence of significant research and/or industrial experience is very important as further evidence of ability
to perform well at the graduate level. These experiences should be detailed clearly in recommendation letters, as well as in the student's statement of purpose. Please note that incomplete applications will not be considered.

**Financial Assistance**

All doctoral students in the Department of Bioengineering are currently supported either by research or departmental funds. Financial assistance is typically arranged between a student and a faculty advisor. Students with exceptional qualifications will be considered for additional departmental support and fellowships.

**Bioengineering, PhD**

**PhD Requirements**

http://www.engineering.pitt.edu/Departments/Bioengineering/_Content/Programs/Graduate/Programs---accordion/

The course requirements for the PhD in Bioengineering include the following:

- Graduate Engineering Mathematics-3 credits (from an approved list of math courses)
- Statistics for Bioengineers-3 credits (from an approved list of statistics courses)
- Societal, Political, and Ethical Issues in Bioengineering-3 credits
- Life Sciences-6 credits (from an approved list of life science courses)
- Teaching Practicum-2 credits
- Seminar-6 credits total, 4 credits must be the Bioengineering Seminar
- Track Courses-9 credits (from a menu of courses for specific track)
  - Bioimaging and Signals Track
  - Biomechanics Track
  - Medical Product Engineering (MPE) - PhD Track
  - Molecular, Cellular, and Systems Engineering (MCSE) Track
  - Neural Engineering (NE) Track
  - Tissue Engineering and Regenerative Medicine (TERM) Track
- Graduate Electives-6 credits
- Grant Writing in Bioengineering-1 credit
- Doctoral Dissertation Research-33 credits

Total number of credit hours: 72 credits (plus the credits associated with the remedial courses, as applicable.) Students typically take the PhD preliminary exam after their first year in the program, and PhD proposal (comprehensive examination) is presented generally at the end of the second year. A final public PhD defense is made by each PhD candidate based on the student's research work. All students must maintain a 3.0 GPA at all times to remain in good standing in the program.

* Please note that the total of 33 credits is not necessarily the total number of credits of BIOENG 3997 that must be taken, as other courses/credits in other areas may be taken as long as the total number of credits adds up to 72 total. Students are required to take a minimum of 12 credits of BIOENG 3999 after their PhD proposal defense, as these credits cannot be taken before. Total number of credit hours: 72 credits.

**Preliminary Exam**

The PhD Preliminary Exam is given once a year, typically in early June, and is to be taken by students pursuing the PhD degree after their first two semesters of full time course work. A student is allowed no more than two opportunities to take the preliminary examination.

The purpose of the preliminary examination is to evaluate the student's ability to use fundamental principles of biomedical science and engineering approaches to investigate solutions to bioengineering problems. The basis of the examination is a specific research question (problem), chosen by the student to write a proposal on. The student may seek assistance from his/her advisor or any other faculty member for choosing the question. The examination will consist of an oral presentation and accompanying written proposal in NIH RO3 format. The written document and oral presentation
should demonstrate the student's ability to think, present, and defend in an academic environment, as well as a sufficient background in the biomedical science and engineering aspects of the chosen problem.

The examinations will be coordinated within the current graduate tracks. They will typically take place at the end of the first year of graduate studies. The scheduling of the examinations will be handled by the track coordinators, who will also determine the suitability of the research question (problem) (having both engineering and biomedical science components). The student may get help from anyone in preparing the oral presentation, but must observe the usual strict standards on plagiarism in preparing the written document. Students are encouraged to focus on one to two experiments and note both alternatives and potential problems in each experiment. Proper referencing of sources is required for both the oral and written components. One important paper in the field must be identified in the references and made available to the reviewers, who may ask for an explanation or critique of any aspect of the paper. The research proposal may be supported by preliminary data, but this is not a requirement. In addition, students must provide a written statement, signed by their advisor, to state what the student's contribution to their research was in the proposal document.

Rather, the examination committee is expected to probe the student with challenging questions to establish the depth of his/her creative and analytical thinking, as well as knowledge in appropriate background areas.

The final result of the preliminary examination will be based on the combined evaluation of the written and oral components, with three possible outcomes: unconditional pass, conditional pass, and fail.

**Committee Selection**

Committees for PhD students should consist of the student's advisor (who will act as Chair of this committee,) at least two additional faculty members from within the Department of Bioengineering and at least one faculty member from outside the Department of Bioengineering. For MS students, the committee will need to consist of three faculty members total and at least two need to be member of the Bioengineering faculty. However, all three can be Bioengineering faculty as there is no requirement to have one member from outside of Bioengineering. Students are required to receive approval from the faculty Graduate Coordinator of the committee, ideally 1-2 months prior to the proposal defense. After this takes place, the student will need to obtain a "blue form" (admission to PhD candidacy form) from the Graduate Administrator, and obtain the necessary signatures at the student's proposal. After this occurs, the form will need to be returned to the Graduate Administrator for submission to the school for approval.

Formal admission to candidacy for the Doctor of Philosophy degree (typically in the 3rd year) constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. **Note that it is a departmental requirement that students complete their proposal by the end of their third full year in the program.** To qualify for admission to candidacy, students must have obtained full graduate status and have satisfied the requirement of the preliminary examination. Note that a student does not necessarily need to have all coursework completed before completing their proposal. The student should submit the written proposal in NIH RO1 format to the committee at least two weeks in advance of the oral defense to the approved committee. The approval of the proposal and defense of it constitutes passing the proposal and Comprehensive Examination. The committee will meet at least once a year during the remainder of his or her PhD program culminating in the Dissertation Defense.

Once a student has completed the proposal and comprehensive exam, they may then register for 3999 credits, or "post-proposal" research credits. After the student completes 12 credits of 3999, which can easily be completed in one semester, they can then register for FTDH, or Full Time Dissertation Hours, up to and including the semester in which they graduate. Please note that no courses can be taken once a student registers for FTDH. It is important to note that students may switch into 3999 credits if the propose before the end of the add/drop period of the semester in which they complete their proposal.

**Graduation info**

Students are expected to be prepared to announce their dissertation defense date at least two weeks before their defense by emailing the information including the dissertation date, time, and location, the name and full title of their advisor, along with an abstract of no more than 400 words, to the Graduate Administrator, after which a notice will be sent out to the school. At the defense, the student is to prepare the ETD approval forms, the abstract, a copy of all publications (including journal articles, presentations, and proceedings,) and a copy of the PhD rubric form for each member of their dissertation committee.

**Bioengineering, MD/PhD**
MD/PhD Requirements

The MD/PhD program supports well-integrated basic and clinical science pre-doctoral training program. The training program links 17 PhD programs in six graduate schools within the University of Pittsburgh and Carnegie Mellon University. It is important to keep in mind that MD/PhD students are working toward TWO degrees, not just "two for the price of one". However, it is recognized that some relaxation of the requirements is appropriate for these students. For example, students in the MD/PhD program exceed the basic life science requirements for the Bioengineering PhD program. However, MD/PhD students cannot use their MD courses to opt out of the advanced engineering/math course requirements for the PhD.

The course requirements for the MD/PhD in Bioengineering include the following:

- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Track Courses (from a list of approved courses for specific tracks) - 9 credits
- Graduate Electives (can be most graduate level courses per approval of Graduate Coordinator) - 6 credits
- Teaching Practicum, BIOENG 3003 - 2 credits
- Bioengineering Seminar - 6 credits (4 credits must be the Bioengineering Seminar, BIOENG 2023)
- Grant Writing in Bioengineering, BIOENG 2900 - 1 credit
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 - 12 credits of 3999 to be taken after the proposal - 42 credits

Total number of credit hours: 72 credits (plus the credits associated with the remedial courses, as applicable).

Bioengineering/Business Administration, MS/MBA

http://www.engineering.pitt.edu/Departments/Bioengineering/_Content/Programs/Graduate/Programs---accordion/

The Department of Bioengineering and the Katz Graduate School of Business offer a dual MBA/MS program, with the following requirements for the Professional MS in Bioengineering:

Foundation Courses

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BIOENG 2242 - SOCTL, POL & ETHCL ISS BIOTEC 2 or another approved Ethics course (determined by CMI Education Director)
- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Life Sciences (from a list of approved Life Science courses) - 6 credits
- Bioengineering Seminar, BIOENG 2023 - 2 credits

Bioengineering Track Courses

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT
- BIOENG 2170 - CLINICAL BIOENGINEERING
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

Projects Courses

- Joint with KGSB, through the course BIOENG 2095 - 3 credits

Please note that all students must maintain a 3.0 GPA at all times to remain in good standing in the program.

Bioengineering, MS
**MS Requirements**

The course requirements for the MS in Bioengineering include the following:

**Research M.S. Program (Thesis)**

The Research MS program requires a total of 31 credits, which includes:

- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Societal, Political and Ethical Issues in Bioengineering, BIOENG 2241 or BIOENG 2242 - 3 credits
- Life Sciences (from a list of approved Life Science courses) - 3 credits
- Track Courses (from a list of approved courses for specific tracks) - 9 credits
- MS Thesis, BIOENG 2999 - 6 credits
- Teaching Practicum, BIOENG 3003 - 1 credit
- Bioengineering Seminar, BIOENG 2023 - 3 credits

Total - 31 credits

Other required courses may be tailored to the student's background and interests. Typically, completion of the Research MS program requires two years. Within the first year of enrollment (preferably within the first semester), the MS candidate is expected to finalize the general area in which he/she will write a thesis and an advisor who will guide the work. By the third semester of enrollment, the student is to prepare a Master's Thesis, following University requirements for Electronic Theses and Dissertations (ETDs.) The student (under the guidance of his/her advisor) selects a thesis committee of three or more persons. For MS students, the committee will need to consist of three faculty members total and at least two need to be member of the Bioengineering faculty. However, all three can be Bioengineering faculty, as there is no requirement to have one member from outside of Bioengineering. The committee should consist of the student's advisor (who will act as Chairman of this committee), at least one additional faculty member from within the Department of Bioengineering and at least one faculty member from outside the Department of Bioengineering. The committee meets at least once per year and oversees the Thesis Defense.

**Bioengineering - Medical Product Innovation Certificate**

**Requirements**

http://www.engineering.pitt.edu/Sub-Sites/Centers/CMI/_Content/Prospective-Students/Graduate-Certificate-in-Medical-Product-Innovation/

The Graduate Certificate in Medical Product Innovation (CMI), offered by the Department of Bioengineering in conjunction with CMI is multi-faceted, reflecting the multidisciplinary nature of medical innovation, with the objectives:

1. To educate engineering graduate students at the MS and PhD levels in clinical, engineering, business, and legal aspects of the medical device design and development process;
2. To educate students of the health sciences (residents, fellows and clinicians) in engineering, business, and legal methodologies in identifying and developing innovative solutions to their problems;
3. To educate law students in engineering methodology, regulatory constraints, medical device intellectual property, and commercialization aspects of medical innovation;
4. To educate business (MBA) students in clinical, engineering, regulatory, and legal aspects of medical innovation and entrepreneurship; and
5. To train all of the above disciplines in the art of working in multi-disciplinary teams to accomplish the medical innovation process, from medical technology ideation, through development, to realization and commercialization.

Certificate candidates must complete a minimum of 5 courses (15 credits) drawn from the following areas: 
- Medical Product Innovation Core Curriculum, BIOENG 2150 and BIOENG 2151 - 6 credits
- Electives - 9 credits from each of the following subgroups:
  - Medical Ethics, BIOENG 2241, or BIOENG 2242 - 3 credits
  - Entrepreneurship/Engineering Management (per approval by CMI Education Director) - 3 credits
  - Legal Aspects of Medical Product Engineering (per approval by CMI Education Director) - 3 credits
- More information and details on credit requirements for the Certificate Program can be found here: http://www.engineering.pitt.edu/Sub-Sites/Centers/CMI/_Content/Education/Graduate-Certificate-in-Medical-Product-Innovation/

Students currently enrolled in any graduate program in the University (MS, MBA, JD, PhD, etc.) are eligible to obtain the C-MPI upon completion of the Certificate requirements. No formal admissions process is required. Post-baccalaureate and post-professional students interested only in obtaining the C-MPI need to apply to the Department of Bioengineering for admission to the Certificate program.

Department of Chemical and Petroleum Engineering

Contact Information

Vice Chair for Education
940 Benedum Engineering Hall
412-624-9646
Fax: 412-624-9639
E-mail: ril3@pitt.edu
http://www.engineering.pitt.edu/chemical/

Graduate Degree Programs

The Department of Chemical and Petroleum Engineering awards Master of Science degrees in chemical and petroleum engineering and the Doctor of Philosophy degree in chemical engineering; offers several dual degree programs; and participates in joint degree programs with the Katz Graduate School of Business and the School of Medicine. The general objective of all programs is to develop the ability of the chemical or petroleum engineer to carry out original research at advanced levels.

The aim of the doctoral program is to develop individuals for careers in academic and industrial research. The program is flexible. Its primary emphasis is on innovative and distinctive research on the cutting edge of engineering science. Students wishing to pursue the PhD should have an outstanding academic background and a desire and ability to carry out original research. PhD students here are given independence and responsibility. They are not only encouraged, but are expected to, develop research ideas, which they propose and defend. They work closely with their faculty research advisors and often participate in a research group addressing relevant engineering problems. To supplement their research, students take advanced courses in areas related to their research work. Candidates for the PhD achieve a high level of proficiency through this advanced course work and individual study in their research area and related areas.

The graduate program offers MS and PhD students the opportunity to pursue independent research in five research focus areas in which the department has developed national and international reputations: biotechnology, catalysis, multi-scale modeling, materials, and environment and energy. Additional research areas exist in programs that have exploited opportunities at the interface between disciplines. The department's recognized research activities impact the following boundaries between established disciplines: biotechnology/environment; biology/medicine/engineering; energy/environment; polymer chemistry/physics; catalysis/chemistry/materials; catalysis/energy; and catalysis/environment.

Admissions

Chemical Engineering: For admission to full graduate status, students should have an undergraduate degree in chemical engineering with high academic standing from an ABET accredited curriculum.

Petroleum Engineering: For admission to full graduate status, students should have an undergraduate degree in engineering or geology and high academic standing.
Students from chemistry or from another engineering discipline who desire to pursue a graduate degree in chemical engineering must have a high grade point average and prepare for graduate course work by taking selected undergraduate courses in chemical engineering. See MS and PhD Requirements for Students with Non-Chemical Engineering BS Degree. Each case for admission will be evaluated individually, and applications are encouraged.

Interested students may apply online. Questions can be addressed as follows:

1. Send e-mail to che@engr.pitt.edu. Be sure to include your name and complete mailing address.
2. Send surface mail to:
   University of Pittsburgh
   Department of Chemical and Petroleum Engineering
   Vice Chair for Graduate Education
   940 Benedum Hall
   Pittsburgh, PA 15260

Financial Assistance

While admission to the graduate program does not imply the granting of financial aid, most fulltime PhD students are supported. All students who qualify for financial assistance are awarded departmental fellowships. In addition, a select few top students receive supplementary dean's fellowships. An applicant interested in obtaining financial aid should request information directly from the department. Applications for admission and financial aid should be submitted by January 1 for the following fall term.

Chemical Engineering, PhD

The following special regulations pertain to the Department of Chemical and Petroleum Engineering. For additional requirements, review the school-wide information in the Doctor of Philosophy Programs section as well as the Regulations Pertaining to Doctoral Degrees.

Entry to the PhD Program

In order to enter the PhD program, a student must have completed an MS degree and passed the PhD oral qualifying preliminary examination. Especially well-prepared students, with consent of the department faculty, may be granted permission to obtain the PhD degree directly without obtaining an MS degree. This eliminates the required completion of the MS thesis. All MS-level course work is still required.

During the summer of the first year as a graduate student in the department, the student wishing to continue into the PhD program must take the oral preliminary examination. Failure to take this examination at this time will forfeit one of two opportunities to pass this examination. The structure and content of the PhD oral qualifying examination is subject to change in order to meet the requirements of the faculty and PhD program.

PhD Course Requirements

A student's course series will be designed by the student and his/her thesis advisor, approved by the PhD committee, and signed off by the graduate coordinator. This sequence should include courses in the student's research area as well as courses not related to his/her research area. Forty-two credits beyond the MS degree are required and must include the following courses:

- XX 2/3XXX Electives (Science, Math, or Engineering) 12 credits
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING (if not taken at MS level)
- CHE 3990 - ADVANCED GRADUATE PROJECTS (18 credit minimum)
- CHE 3999 - PH.D. DISSERTATION (taken after PhD proposal defense), 12 credits (minimum)

Additional course requirements may include the following, if the student has not previously completed courses in these areas at the master's level:
Note:

Students must also register for one credit in PhD research methodology each term. A minimum of 72 graduate credit hours, including MS courses and thesis credits, are required. All full-time students must fulfill a two-term teaching requirement during their course of study and attend the departmental graduate seminar series during the fall and spring terms.

Dissertation Requirement

A dissertation topic should be selected after passing the PhD oral qualifying examination. This is done by submitting a formal request in writing to the departmental graduate faculty for appointment of a faculty advisor (or advisors). Preliminary work (at least 18 credits) can be done on the dissertation by registering for CHE 3990. After being admitted to PhD candidacy, the student should concentrate on the dissertation, registering for CHE 3999 (minimum 12 credits). Most students complete more than 30 credits of these courses.

PhD Comprehensive Examination and Proposal Conference

This is an oral examination covering chemical engineering at the PhD level and is based upon a written dissertation proposal. If this examination is passed, a doctoral committee will be officially appointed. This exam should be taken at least 18 months before completion of the dissertation and preferably within the first year beyond the MS.

PhD Final Oral Examination

A final review (defense) of the thesis must be conducted by the dissertation committee in order to determine the acceptability of the dissertation.

Off-Campus Research

Occasionally, a research program can be conducted at a government or industrial site. In those situations the student should submit a proposal for such research to the graduate coordinator for approval by the faculty. The faculty advisor must be actively involved in the research.

Chemical and Petroleum Engineering Dual Degree, MS

Requirements

A program of study is available in which a student may pursue a dual degree between chemical engineering and petroleum engineering. In general, 48 credits are required, including the fundamental courses in the two areas. Both thesis and non-thesis options are possible. The required chemical engineering courses are:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMENTAL OF REACTION PROCESSES
- CHE 2301 - FUNDAMENTAL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

and the required petroleum engineering courses are:

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
Additional requirements for the Dual Degree MS, non-thesis options:

- CHE 2910 - SPECIAL PROJECTS
- 3 course credits in Chemical or Petroleum Engineering coursework
- 9 additional course credits from the approved list (as specified Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology

Additional requirements for Dual Degree MS with thesis:

- 6 course credits from the approved list (as specified Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING
- CHE 2999 - M.S. THESIS or PETE 2999 - M.S. THESIS
- Registration for one credit of CHE 2980 - MS RESEARCH METHODOLOGY or PETE 2980 - MS RESEARCH METHODOLOGY each fall and spring term until graduation
- Attendance at the Department Seminar series each fall and spring term

MS Final Examination

A final review (oral defense) of the MS Thesis must be conducted by the thesis committee in order to determine the acceptability of the thesis. The committee consists of the student's major advisor and two (2) other members of the faculty.

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (See http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805) or CHE 0300 (sophomore-level) "Transport Phenomena" class offered during the Fall term. Neither of these classes can serve as an elective nor core course substitute in the MS in Petroleum Engineering required classes.

Chemical Engineering (Professional Engineer Program), MSChE

Students who wish to pursue advanced study in chemical engineering may apply for admission to the Professional Engineer Program. It differs from the regular MS program in two important respects:

1. Course work replaces the MS thesis requirement.
2. The student completes a 3-credit special project course, CHE 2910, during their last term in the program. This course could be satisfied, for example, by a project with a faculty member, or a project based on their professional work (for engineers currently working in industry) for which a faculty member agrees to serve as advisor. Submission of a term paper, which is completed under the advisement of a member of the faculty, is required.

A minimum of 31 credit hours of course work is required.
These must include the five core courses and elective courses listed below.

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMENTALS OF REACTION PROCESSES
- CHE 2301 - FUNDAMENTALS OF TRANSPORT PROCESSES
- CHE 2410 - MATHMETICAL METHODS IN CHEMICAL ENGINEERING
- CHE 2910 - SPECIAL PROJECTS
- ChE 2XXX - Chemical Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)

Note:

Up to 6 credit hours may be elected in approved graduate course offerings outside the department (denoted by XX, above). Students who wish to enter this program should first apply for admission to graduate study in chemical engineering. Once admitted, students can then request admission to the Professional Engineering Program.

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (See http://www.cer.msu.edu/ for details about the bridging courses CHE 804 and 805) or CHE 0300 (sophomore-level) "Transport Phenomena" class offered during the Fall term. Neither of these classes can serve as an elective nor core course substitute in the MS in Petroleum Engineering required classes.

**Chemical Engineering (Research-Oriented Program), MSChE**

**Requirements**

The candidate for the Master of Science degree must demonstrate proficiency in basic chemical engineering subjects by successfully taking the following required courses:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMENTALS OF REACTION PROCESSES
- CHE 2301 - FUNDAMENTALS OF TRANSPORT PROCESSES
- CHE 2410 - MATHMETICAL METHODS IN CHEMICAL ENGINEERING
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING

In addition to these 15 credits, the student must satisfactorily complete the following courses:

- At least 9 additional credits of graduate-level course work, at least 3 of which must be in chemical engineering. Approved courses can be taken outside the department.
- Six credits of CHE 2999 - M.S. THESIS must also be taken.
- Three credits for Research Methodology (see below).

A full-time student will normally take 33 credits.

Full-time students are required to register each term for Research Methodology, a 1-credit course. In Research Methodology, a letter grade will be given each term based upon the student's research performance. Full-time students are also required to attend the graduate seminar during the fall and spring terms. It should be emphasized that the preceding course requirements are minimum requirements, and additional work may be necessary for an individual student, especially if the student's undergraduate degree is not in chemical engineering.
A student who does not maintain a B (3.00 GPA) average in all MS-level courses is put on academic probation. The graduate faculty of the Department of Chemical and Petroleum Engineering will review all cases of probation each term and determine whether the student will be permitted to continue to pursue graduate study. Should a student receive a grade lower than B- in a required MS course, the student will be required to repeat that course and receive a B- grade or better before being permitted to graduate.

A student with full-time status should discuss possible thesis topics with at least three members of the departmental faculty and then submit a written request to the faculty for assignment of a thesis advisor. After the faculty assigns an advisor, the student can begin the thesis. The MS thesis oral examination is given at the completion of the thesis. All full-time master's students must participate in teaching a course during one term as a master's student.

Students wishing to continue into the PhD program after the MS degree must have a B or better grade in each of the five core required courses and should take the oral qualifying examination after their first year in residence. Failure to do so will forfeit one of two opportunities to pass this examination.

**Note:**

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (See http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805) or CHE 0300 (sophomore-level) "Transport Phenomena" class offered during the Fall term. Neither of these classes can serve as an elective nor core course substitute in the MS in Petroleum Engineering required classes.

---

**Petroleum Engineering, MSPE**

The candidate for the degree of non-thesis Master of Science in Petroleum Engineering must demonstrate proficiency in petroleum engineering by passing the following:

**Mandatory Courses:**

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

**Note:**

In addition to these 24 credits, the student must satisfactorily complete two other courses from the accepted electives list in order to fulfill the 30 credits required for the MS degree.

**Accepted Electives:**

- GEOL 2110 - PLATE TECTONICS
- GEOL 2151 - GROUNDWATER GEOLOGY
- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS
- GEOL 2640 - ADV GEOHAZARDS & RISK MGMNT
Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (See http://www.egr.msu.edu/ for details about the bridging courses CHE 804 and 805) or CHE 0300 (sophomore-level) "Transport Phenomena" class offered during the Fall term. Neither of these classes can serve as an elective nor core course substitute in the MS in Petroleum Engineering required classes.

Department of Civil and Environmental Engineering

Graduate Degree Programs

http://www.engineering.pitt.edu/Departments/Civil-Environmental/Graduate-Overview/

The Department of Civil and Environmental Engineering offers graduate study and research leading to the Master of Science in Civil Engineering and Doctor of Philosophy degrees. Also offered is a joint degree program resulting in a second Master of Science degree in mathematics, and a joint degree program with the Katz Graduate School of Business resulting in a MBA degree. The MS in Civil Engineering and the PhD in engineering may be pursued in one of the following areas:

The Master of Science degree in Civil and Environmental Engineering is primarily designed for students with an undergraduate degree in engineering, although students with other backgrounds can be accommodated with specially designed programs. An MS degree can be pursued by either a full-time or part-time student in one of the following areas:

- Construction Management
- Environmental Engineering
- Geotechnical and Pavement Engineering
The areas of study for the Ph.D. in Civil Engineering in the Department of Civil and Environmental Engineering within the Swanson School of Engineering are divided into two integrated research areas and sub-component specialty areas as follows:

- **Sustainability and Environmental Engineering (SEE):**
  - Environmental Engineering;
  - Sustainable Engineering; and
  - Water Resources Engineering

- **Advanced Infrastructure Systems (AIS):**
  - Geotechnical and Pavement Engineering;
  - Structural Engineering and Mechanics; and
  - Transportation Engineering.

### Civil and Environmental Engineering - Advanced Infrastructure Systems - Geotechnical and Pavement Engineering Specialty, PhD

**Requirements**

http://www.engineering.pitt.edu/Departments/Civil-Environmental/_Content/Graduate/Civil-Graduate-Programs/

Students pursuing the PhD must complete a minimum of 72 credits, including the following:

- 24 course credits (8 courses) in major area
- 15 additional course or special investigation credits in major area
- 9 course credits (three courses) in minor area
- 18 credits of dissertation research

The total number of credits above these minimum requirements will depend on the student's background, academic achievement, and dissertation topic. This decision will be made in consultation with the major advisor.

Students must complete the following required courses (or equivalent*) as part of their Major Concentration Coursework:

- CEE 2612 - DESIGN AND ANALYSIS OF EXPERIMENTS
- CEE 2333 - INTRODUCTION TO FINITE ELEMENTS
- CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

* Courses can be accepted as "equivalent" with prior approval by both the student's academic advisor and the academic coordinator.

In addition to the 3 required courses, each student must complete 3 courses toward the Minor Concentration and 5 more elective courses towards the Major Concentration for a total of 11 Lecture Courses, i.e., a minimum of 33 credits of post-baccalaureate coursework taken at Pitt (2XXX level or higher) or transferred in from post-baccalaureate study. The coursework should be comprised of didactic ("book") courses and not include seminar or research courses.

- Up to 30 credits may be applied to the Major Concentration and/or Minor Concentration from previously completed post-baccalaureate study.

- A minor area of concentration can be within any approved coherent area of science or engineering at the University of Pittsburgh outside of CEE.

- Doctoral Research (CEE 3997 - RESEARCH, PH.D) may only be taken following successful completion of the PhD Preliminary Exam.

- At least 12 credits of the Dissertation credit may be taken as Doctor Dissertation (CEE 3999 - PH.D. DISSERTATION) which may only be taken following successful completion of the PhD Dissertation Proposal Exam. Remaining Dissertation credit may be taken as Doctor Research CEE 3997 - RESEARCH, PH.D or Doctoral Dissertation.
- All students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of full-time residency (i.e., full-time study in the PhD program).

Additional Information

Plan of Study

The PhD Plan of Study is prepared by the student with the aid of the student's faculty advisor during the student's first two terms of graduate study. It should be approved and signed by the faculty advisor, all other faculty members in the program area, the graduate coordinator, and the department chair. Copies should be made available to the student, the faculty advisor, and the academic coordinator. Any change in the Plan of Study must be approved by the faculty advisor and the academic coordinator, and should likewise be recorded.

PhD Examination Structure

All PhD candidates must pass the preliminary, comprehensive, and final oral examinations:

Preliminary Examination

The purpose of this examination is to determine the student's potential to complete the PhD program. It is organized by the advisor and faculty from the student's program area, before or sometime during the first two terms of the program.

Comprehensive Examination

All PhD students must take this examination toward the end of their course work. Students must submit a written proposal of their expected dissertation research and pass a presentation and comprehensive oral examination administered by the student's doctoral committee. The comprehensive examination committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering. The written proposal is recommended to be in the format of a standard federal research proposal (e.g., National Science Foundation) in terms of length, formatting, and technical content. A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the Dissertation Defense.

Final Oral Examination

This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

Civil and Environmental Engineering - Advanced Infrastructure Systems - Structural Engineering and Mechanics Specialty, PhD

Requirements

http://www.engineering.pitt.edu/Departments/Civil-Environmental/_Content/Graduate/Civil-Graduate-Programs/

Students pursuing the PhD must complete a minimum of 72 credits, including the following:
24 course credits (8 courses) in major area
15 additional course or special investigation credits in major area
9 course credits (three courses) in minor area
18 credits of dissertation research

The total number of credits above these minimum requirements will depend on the student's background, academic achievement, and dissertation topic. This decision will be made in consultation with the major advisor.

Students must complete the following required courses (or equivalent*) as part of their **Major Concentration** Coursework:

- CEE 2612 - DESIGN AND ANALYSIS OF EXPERIMENTS
- CEE 2333 - INTRODUCTION TO FINITE ELEMENTS
- CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

* Courses can be accepted as "equivalent" with prior approval by both the student's academic advisor and the academic coordinator.

In addition to the 3 required courses, each student must complete 3 courses toward the **Minor Concentration** and 5 more elective courses towards the **Major Concentration** for a total of 11 Lecture Courses, i.e., a minimum of 33 credits of post-baccalaureate coursework taken at Pitt (2XXX level or higher) or transferred in from post-baccalaureate study. The coursework should be comprised of didactic ("book") courses and not include seminar or research courses.

- Up to 30 credits may be applied to the **Major Concentration** and/or **Minor Concentration** from previously completed post-baccalaureate study.
- A minor area of concentration can be within any approved coherent area of science or engineering at the University of Pittsburgh outside of CEE.
- Doctoral Research (CEE 3997 - RESEARCH, PH.D) may only be taken following successful completion of the PhD Preliminary Exam.
- At least 12 credits of the Dissertation credit may be taken as Doctor Dissertation (CEE 3999 - PH.D. DISSERTATION) which may only be taken following successful completion of the PhD Dissertation Proposal Exam. Additional Information

Plan of Study

556
The PhD Plan of Study is prepared by the student with the aid of the student's faculty advisor during the student's first two terms of graduate study. It should be approved and signed by the faculty advisor, all other faculty members in the program area, the graduate coordinator, and the department chair. Copies should be made available to the student, the faculty advisor, and the academic coordinator. Any change in the Plan of Study must be approved by the faculty advisor and the academic coordinator, and should likewise be recorded.

**PhD Examination Structure**

All PhD candidates must pass the preliminary, comprehensive, and final oral examinations:

**Preliminary Examination**

The purpose of this examination is to determine the student's potential to complete the PhD program. It is organized by the advisor and faculty from the student's program area, before or sometime during the first two terms of the program.

**Comprehensive Examination**

All PhD students must take this examination toward the end of their course work. Students must submit a written proposal of their expected dissertation research and pass a presentation and comprehensive oral examination administered by the student's doctoral committee. The comprehensive examination committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering. The written proposal is recommended to be in the format of a standard federal research proposal (e.g., National Science Foundation) in terms of length, formatting, and technical content. A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the Dissertation Defense.

**Final Oral Examination**

This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

**Civil Engineering/Mathematics, MSCE/MS**

The general requirements for the two options for the Master of Science in Civil and Environmental Engineering/Mathematics degree (thesis and professional) are detailed below:

- **Thesis Option:** 24 course credits (eight courses) minimum and thesis (6 credits), with comprehensive and final examinations.
- **Professional Option:** 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

**MS Final Examination**

Students pursuing the thesis and project MS options must take and pass both a comprehensive examination and a final oral examination.
Comprehensive Examination

This examination is given to all students during the last term of the program. It may be either an oral examination or, at the recommendation of the area faculty, a written examination. It is administered by an MS committee made up of the faculty advisor (as chair), plus a minimum of two other faculty members from fields related to the student's interest. If the result of the examination is unsatisfactory, subsequent action is at the discretion of the MS committee.

Final Oral Examination

The purpose of this examination is to evaluate the student's MS thesis or project and/or related course work. The examination is administered by the MS committee, chaired by the student's major advisor.

Civil and Environmental Engineering - Construction Management Area, MSCE

Requirements

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Construction Management Area degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

MS Thesis Degree Requirements

a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent

b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent

c) 3 credits - CEE 2203 - CONSTRCT METHODS AND EQUIPMENT or Equivalent

d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent

e) 3 credits - CEE 2205 - CONSTRCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS or Equivalent

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.
**Professional MS Degree Requirements**

a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent

b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent

c) 3 credits - CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT or Equivalent

d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent

e) 3 credits - CEE 2205 - CONSTRUCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS or Equivalent

g) 12 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count toward the degree program coursework requirements).

---

**Civil and Environmental Engineering - Environmental Engineering Area, MSCE**

**Requirements**

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Environmental Engineering Area degree (thesis and professional) are detailed below:

**Thesis Option:** 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

**Professional Option:** 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2500 - ENVIRONMENTAL ENGINEERING MICROBIOL or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY or Equivalent

c) 3 credits - CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING or Equivalent

d) 3 credits - CEE 3501 - ENVIRONMENTAL ENGINEERING PROCESSES 1 or Equivalent
e) 3 credits - CEE 3502 - ENVIRONMENTAL ENGINEERING PROCESSES 2 or Equivalent

f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

g) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Professional MS Degree Requirements

a) 3 credits - CEE 2500 - ENVIRONMENTAL ENGINEERING MICROBOL or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY or Equivalent

c) 3 credits - CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING or Equivalent

d) 3 credits - CEE 3501 - ENVIRONMENTAL ENGINEERING PROCESSES 1 or Equivalent

e) 3 credits - CEE 3502 - ENVIRONMENTAL ENGINEERING PROCESSES 2 or Equivalent

f) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

Civil and Environmental Engineering - Geotechnical Area, MSCE

Requirements

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Geotechnical Engineering Area degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

MS Thesis Degree Requirements

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent

b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent
c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent

d) 3 credits - CEE 3805 - ROCK MECHANICS or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

**Thesis Defense**

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

**Professional MS Degree Requirements**

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent

b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent

c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent

d) 3 credits - CEE 3805 - ROCK MECHANICS or Equivalent

e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

**Civil and Environmental Engineering - Pavement Engineering Area, MSCE**

**Requirements**

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Pavement Engineering Area degree (thesis and professional) are detailed below:

**Thesis Option:** 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

**Professional Option:** 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent

c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent -- OR -- CEE 2718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS or Equivalent

d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or Equivalent

e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Professional MS Degree Requirements

a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent

b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent

c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent -- OR -- CEE 2718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS or Equivalent

d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or Equivalent

e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

Civil and Environmental Engineering - Structural Engineering and Mechanics Area, MSCE

Requirements

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Structural Engineering and Mechanics Area degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:
MS Thesis Degree Requirements

a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent

c) 3 credits - SEM Graduate Design Elective CEE 2340 - CONCRETE STRUCTURES 2, CEE 2341 - STEEL STRUCTURES 2, CEE 2343 - PRESTRESSED CONCRETE, CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING

d) 6 credits - SEM Graduate Technical Elective CEE 2330 - ADVANCED STRUCTURAL ANALYSIS, CEE 2343 - PRESTRESSED CONCRETE, CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES, CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING, CEE 3330 - STRUCTURAL STABILITY, or CEE 3333 - ADVANCED FINITE ELEMENT METHODS

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

e) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Professional MS Degree Requirements

a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent

c) 3 credits - SEM Graduate Design Elective CEE 2340 - CONCRETE STRUCTURES 2, CEE 2341 - STEEL STRUCTURES 2, CEE 2343 - PRESTRESSED CONCRETE, CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING

d) 6 credits - SEM Graduate Technical Elective CEE 2330 - ADVANCED STRUCTURAL ANALYSIS, CEE 2343 - PRESTRESSED CONCRETE, CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES, CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING, CEE 3330 - STRUCTURAL STABILITY, or CEE 3333 - ADVANCED FINITE ELEMENT METHODS

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

e) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

Civil and Environmental Engineering - Sustainable Engineering Area, MSCE
Requirements

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Sustainable Engineering Area degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

**MS Thesis Degree Requirements**

a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent

b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent

c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or Equivalent

d) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

**Thesis Defense**

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

**Professional MS Degree Requirements**

a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent

b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent

c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or Equivalent

d) 21 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

**Civil and Environmental Engineering - Transportation Engineering Area, MSCE**
Requirements

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Transportation Engineering Area degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

MS Thesis Degree Requirements

a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent
b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent
c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent
d) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or CEE 2730 - HIGHWAY ENGINEERING or Equivalent
e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION
f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

g) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Professional MS Degree Requirements

a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent
b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent
c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent
d) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or CEE 2730 - HIGHWAY ENGINEERING or Equivalent
e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION
f) 15 credits - Graduate Technical Electives
Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

Civil and Environmental Engineering - Water Resources Engineering Area, MSCE

Requirements

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Water Resources Engineering Area degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with thesis defense

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

The detailed course requirements for the two degree options are as follows:

MS Thesis Degree Requirements

a) 3 credits - CEE 3408 - ADVANCED ENVIRONMENTAL FLUID MECHANICS or Equivalent

b) 3 credits - CEE 3414 - ADVANCED HYDROLOGY or Equivalent

c) 3 credits from either CEE 2416 - SEDIMENT TRANSPORT or Equivalent -- OR -- CEE 3416 - RIVER MECHANICS AND MORPHODYNAMICS or Equivalent

d) 6 credits - WR Graduate Technical Electives (e.g. CEE 2401 - OPEN CHANNEL HYDRAULICS, CEE 2410 - WATER RESOURCES ENGINEERING)

e) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

f) 6 credits - MS Thesis CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Professional MS Degree Requirements

a) 3 credits - CEE 3408 - ADVANCED ENVIRONMENTAL FLUID MECHANICS or Equivalent

b) 3 credits - CEE 3414 - ADVANCED HYDROLOGY or Equivalent
c) 3 credits from either CEE 2416 - SEDIMENT TRANSPORT or Equivalent -- OR -- CEE 3416 - RIVER MECHANICS AND MORPHODYNAMICS or Equivalent

d) 6 credits - WR Graduate Technical Electives (e.g. CEE 2401 - OPEN CHANNEL HYDRAULICS, CEE 2410 - WATER RESOURCES ENGINEERING)

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

e) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

Civil and Environmental Engineering - Construction Management Certificate

The Construction Management Certificate Program is directed at Part-time students currently employed in the construction industry as well as other students interested in obtaining credentials in construction management.

The Academic Requirements associated with the Graduate and Post-Baccalaureate Certificate in Construction Management include the completion of fifteen (15) credits of coursework within the Civil and Environmental Department from among the following Graduate Level courses:

- CEE 2201 - CONSTRUCTION COST ENGINEERING*
- CEE 2202 - CONSTRUCTION SCHEDULING*
- CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT*
- CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT
- CEE 2205 - CONSTRCT FINANCE & COST CONTROL
- CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY
- CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS
- CEE 2230 - BUILDING INFORMATION MODELING

Students must complete three (3) required courses above (designated with an asterisk *) and may select any two (2) of the remaining courses above as electives in the completion of their Certificate. Additional graduate level courses within the Swanson School of Engineering may be considered as substitutes for the two (2) elective courses with permission of the Program Director to customize the Certificate to meet the educational goals of the student. All courses can be taken either on campus or online.

Department of Electrical and Computer Engineering

Contact Information

Department Chair: Alan D. George  
Main Office: 1238 Benedum Hall  
412-624-8002  
Fax: 412-624-8003  
E-mail: ecemain@pitt.edu  
http://www.engineering.pitt.edu/ECE/

Additional information concerning the Electrical Engineering graduate program may be obtained from Sandy Weisberg, Electrical Engineering Program Administrator while information concerning the Computer Engineering graduate program may be obtained from Dre' Aliquo-Varela, Computer Engineering Graduate Program Administrator. Both Ms. Weisberg and Ms. Aliquo-Varela are located at 1238 Benedum Hall, 3700 O'Hara Street, Pittsburgh, PA 15261. Alternately, you may contact them via phone at 412-642-8001, fax at 412-624-8003, or email ecemain@pitt.edu.
Graduate Degree Programs

The Department of Electrical and Computer Engineering offers a program of graduate study and research for master's and doctoral degree students whose career choice is oriented toward basic or applied research in industry, government, or academic institutions. Degrees awarded are the Master of Science in Electrical Engineering, the Master of Science in Computer Engineering, the Doctor of Philosophy in Electrical Engineering, and the Doctor of Philosophy in Computer Engineering. The MSCE and PhD in Computer Engineering are jointly offered with the Department of Computer Science. Course work and faculty/student research in the graduate Electrical Engineering program are concentrated in the following four areas:

- Computer Engineering
- Optical and Electronic Devices
- Electric Power Engineering
- Signal Processing and Systems

and include research in computer architecture, computer-aided design (CAD), very-large-scale integrated (VLSI) design, optical interfacing, embedded systems, parallel processing architectures, networking, photonic and electronic devices, micro/nanorobotics and systems, fiber optics, ultrafast laser processing, nanowires and nanoparticles, semiconductor device modeling and characterization, power electronics, pattern recognition, biomedical image processing, speech processing, statistical signal processing, wavelets, intelligent and neutral control, human-centered control, networked control, radio-frequency identification (RFID) and tags, electric power systems analysis, simulation and modeling: transmission, distribution systems and technologies, real-time control of power systems, and renewable energy interconnections, and smart grid.

Graduate Admissions

http://www.engineering.pitt.edu/Departments/Electrical-Computer/_Content/Graduate/Electrical-and-Computer-Engineering-Graduate-Admissions/

Applicants for admission must submit transcripts of all college-level work, two letters of recommendation, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit the TOEFL administered by the Educational Testing Service with a minimum score of 80 (internet-based test). For awards consideration, applications must be completed by February 1.

Financial Aid

The Department of Electrical and Computer Engineering offers graduate students support in a variety of ways. Many full-time students are supported by graduate research assistantships or teaching assistantships. There are also several fellowships available for highly qualified graduate students.

Graduate Regulations

In addition to the general regulations of the Swanson School of Engineering, the electrical and computer engineering department has the following requirements:

Computer Engineering, PhD

Requirements

http://www.engineering.pitt.edu/ComputerEngineering/GraduateProgram/

The PhD degree in computer engineering requires at least 72 credits. These credits must include the following categories:

Four core courses required (12 credits minimum). Each student must complete at least one course chosen from each of the following three areas, and one additional course from any one of these areas.
Computer Architecture

- CS 2410 - COMPUTER ARCHITECTURE or
- EE 2410 - Computer Architecture
- EE 2162 - Computer Architecture

Software Systems

- CS 2210 - COMPILER DESIGN or
- EE 2210 - Compiler Design
- CS 2510 - COMPUTER OPERATING SYSTEMS or
- EE 2510 - Computer Operating Systems
- CS 2310 - SOFTWARE ENGINEERING or
- EE 2310 - Software Engineering
- EE 2186 - Software Engineering

Hardware Systems

- EE 2160 - Embedded Systems
- EE 2192 - Introduction to VLSI Design
- EE 2120 - Hardware Design Methodologies

Additional Requirements

Nine courses (27 credits minimum) must be chosen from the list of CoE graduate courses, or from pre-approved CS or EE courses not cross-listed as CoE courses.

1. Seven courses (21 credits minimum) are elective and may be CS, EE, or CoE courses, courses from other disciplines, or research project courses (2998).
2. The specific program of study should be approved in advance by the Student's Research Committee (described below).
3. Dissertation (12-18 credits)

Examinations: Each student must pass the following examinations:

Preliminary Examination

This is an oral examination conducted by the Student's Research Committee. The Master of Science Thesis Oral Examination will satisfy the Preliminary Examination requirements.

Comprehensive Examination

To complete the comprehensive examination, a student must satisfy both the following requirements not later than two years after entering the program:
Complete a total of five courses with a grade of A- or better. These courses must be taken from either the Core Requirements listed above or the CoE Elective categories and

- Complete the four courses that satisfy the Core Requirements category above with a grade of B or better.

The particular of mix of five courses in part 1 can be any combination of core or elective courses. However, any core course requirement that is not included in the five must be completed with a B or better in order to satisfy part 2.

Dissertation Proposal

Within five years, students must present their plan for dissertation research to be approved by the Student's Research Committee. This is after the student has completed all other PhD requirements.

Dissertation Defense

Student must orally defend their dissertation research to be approved by the Student's Research Committee, the time between the dissertation proposal and the defense has to be at least eight months.

Composition and Role of the Student's Research Committee

The Student's Research Committee will consist of a primary advisor and at least three graduate faculty members from the Computer Engineering Graduate Faculty.

The Student's Research Committee has two responsibilities: the approval of the program of study and the oversight of the dissertation research. At least one member of the committee must be from a department other than the advisor or co-advisors if the co-advisors are from the same department. One additional member must be a member of the graduate faculty who is not a member of the CoE Graduate Faculty.

Electrical & Computer Engineering, PhD

Electrical Engineering, PhD

http://www.engineering.pitt.edu/ECE/Graduate/Electrical/Programs/

A student showing unusual proficiency in graduate course work and independent research will be recommended for doctoral study. The objective of the PhD program in electrical engineering is to attain a high degree of competence in one major field, as well as some understanding of a minor or cognate field. A minimum of 72 credits beyond the BS degree is required, including 18 credits of dissertation work. In addition to the general regulations, the department has specific requirements as described below:

PhD Preliminary Evaluation

This is an oral and written presentation on a subject mutually agreed upon by the student and the advisor in the field of the student's interest. The examination is to demonstrate the student's initiative and ability to do independent work.

Program Conference

During the first year of registration in the PhD program, the student must meet with a faculty committee and present a program of study for its approval. The committee consists of the student's faculty advisor, who chairs the committee, and two other faculty members from the department.
PhD Comprehensive Examination

To complete the Comprehensive PhD exam, a student must obtain a minimum GPA of 3.3 in the four courses assigned by the PhD program conference committee no later than the first two years of enrollment in the PhD program. If the student fails to achieve this requirement, he/she must pass an oral exam that takes place at the same time as the PhD Proposal exam and answer general questions related to his/her research area. If he/she fails this oral exam, the student may take it once more three months later.

PhD Proposal Examination

In this examination, the student presents and defends a proposal for dissertation work to a doctoral committee consisting of at least five members, four of whom must be graduate faculty, with one from outside the Electrical and Computer Engineering Department.

PhD Final Oral Examination

In this examination, administered by the doctoral committee, the student defends the validity of the dissertation and the contributions that are made in the work. Results from the dissertation must be submitted to a refereed journal for publication.

Electrical & Computer Engineering, MBA/MSE

Electrical Engineering/Business Administration, MSEE/MBA

The program consists of 64.5 credits for full-time students or 69 credits for part-time students and leads to a Master of Business Administration (MBA) and a Master of Science in Electrical Engineering (MSEE). The joint full-time program requires students to take 39 credits minimum of business and 25.5 credits minimum in electrical and computer engineering. The full-time option can be completed in two academic years whereas the part-time option may require a period of four to five years. The program is only for those students seeking a professional MS Engineering degree. Detailed information may be located at http://www.engineering.pitt.edu/ECE/Graduate/Electrical/Programs/

Computer Engineering, MSCOE

http://www.engineering.pitt.edu/ComputerEngineering/GraduateProgram/

The Computer Engineering Program graduate degrees are offered jointly with the Department of Computer Science. Students in the program come from both departments. For more information on the program see http://engineering.pitt.edu/ComputerEngineering/GraduateProgram/.

It is not the intention that students will be admitted to the program as terminal MS students. Instead, this degree is designed as a "milepost" in the program of study for a student pursuing a PhD.

This degree requires at least 30 credits, and includes eight courses or project courses, and six thesis credits. These fall into the following categories:

Requirements

Four core courses required (12 credits minimum)-Each student must complete at least one course chosen from each of the following three areas, and one additional course from any one of these areas.

Computer Architecture

- CS 2410 - COMPUTER ARCHITECTURE
Software Systems

- CS 2210 - COMPILER DESIGN
- CS 2510 - COMPUTER OPERATING SYSTEMS
- CS 2310 - SOFTWARE ENGINEERING

Hardware Systems

- ECE 2160 - EMBEDDED COMPUTER SYSTEM DESIGN
- ECE 2192 - INTRODUCTION TO VLSI DESIGN
- ECE 2120 - HARDWARE DESIGN METHODOLOGIES 1

Additional Requirements

Four courses (12 credits minimum) must be chosen from the list of CoE graduate courses, or from pre-approved CS or ECE courses. One of these four courses may also be a research project course (2998).

Master's Thesis (6 credits): Each student must write and defend a master's thesis. The thesis should be an in-depth investigation of a research topic in computer engineering. This requirement also includes the submission of a paper to a refereed conference or journal.

Electrical & Computer Engineering, MS

Electrical and Computer Engineering - Professional Track - Computer Engineering Concentration, MSEE

Degree Requirements

http://www.engineering.pitt.edu/ECE/Graduate/Electrical/Programs/

The Master of Science degree has both research and professional tracks. The research track provides the student the opportunity to work on a thesis (applied or basic in nature) under the close supervision of a faculty advisor. The minimum requirements for the research track are 24 credits of graduate course work and preparation and defense of a thesis (6 credits) on a topic in the student's primary area of interest. For the professional option, the minimum requirement is 30 credits of graduate course work.

Course selection for either the research or the professional tracks is developed by the student in consultation with the student's advisor and following guidelines set by the department. The course plan may include courses in and outside of the Department of Electrical and Computer Engineering. A list of courses is available to MS students and can be found at http://engineering.pitt.edu/ECE/Graduate/Electrical/Programs/

Electrical and Computer Engineering - Professional Track - Electric Power Systems/Signal Processing and Systems Concentration, MSEE

Degree Requirements

http://www.engineering.pitt.edu/ECE/Graduate/Electrical/Programs/
The Master of Science degree has both research and professional tracks. **Electrical and Computer Engineering - Research Track - Electric Power Systems/Signal Processing and Systems Concentration, MSEE**

Degree Requirements

http://www.engineering.pitt.edu/ECE/Graduate/Electrical/Programs/

**Electrical and Computer Engineering - Research Track - Optical and Electronic Devices Concentration, MSEE**

Degree Requirements

http://www.engineering.pitt.edu/ECE/Graduate/Electrical/Programs/
The Master of Science degree has both research and professional tracks. The research track provides the student the opportunity to work on a thesis (applied or basic in nature) under the close supervision of a faculty advisor. The minimum requirements for the research track are 24 credits of graduate course work and preparation and defense of a thesis (6 credits) on a topic in the student's primary area of interest. For the professional option, the minimum requirement is 30 credits of graduate course work.

Course selection for either the research or the professional tracks is developed by the student in consultation with the student's advisor and following guidelines set by the department. The course plan may include courses in and outside of the Department of Electrical and Computer Engineering. A list of courses is available to MS students and can be found at http://engineering.pitt.edu/ECE/Graduate/Electrical/Programs/

**Electric Power Engineering Certificate**

- Via Synchronous, Interactive, Distance-Enabled Delivery

The University of Pittsburgh Swanson School of Engineering has established an Electric Power Engineering Post-Baccalaureate/Graduate Certificate Program that rises to the challenge of meeting the nation's critical development needs for electrical energy professionals. This is the only distance enabled program in electric power engineering that allows students to attend classroom lectures in real time, and also allows synchronous participation remotely via the Internet.

The program is deeply rooted in core electric power engineering principles and focuses on the expansion and enhanced reliability of electric power grid infrastructure through application of power electronics and advanced control technologies, as well as renewable energy integration and smart grids. Program content - combined with innovative distance-enabled delivery and collaborative program components - makes this program an attractive and unique choice in graduate engineering, particularly for individuals in industry/business. For additional information and to apply: www.engineering.pitt.edu/powercertificate

http://www.engineering.pitt.edu/App_shared/GainfulEmployCert/electric/Gainful_Employment_Disclosure.html

**Certificate Curriculum**

Credit-hours required: 15

Students may select any five of the following courses:

- ECE 2774 - POWER SYSTEMS ANALYSIS 2 *
- ECE 2777 - POWER SYSTEMS TRANSIENTS 1 *
- ECE 2250 - POWER ELECTRONICS *
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2795 - SPECIAL TOPICS POWER Renewable & Alternative Energy Systems
- ECE 2795 - SPECIAL TOPICS POWER Smart Grid Technologies and Applications
- ECE 2795 - SPECIAL TOPICS POWER Advanced Power Electronics: FACTS & HVDC Technologies

**Note:**

*prerequisite required

**Additional Information**

**Admission Requirements**

- BS in electrical engineering from an ABET-accredited university program (no industry experience required) OR
- BS in any engineering field, PLUS a minimum of three years of power industry experience
- Completed application via Apply Yourself, Pitt's online application portal
At least two references preferred
No GRE required
Applications and references will be reviewed by the program director prior to admission

Department of Industrial Engineering

Contact Information

Department Chair: Bopaya Bidanda
Main Office: 1025 Benedum Hall
412-624-9830
**Graduate Degree Programs**

The Department of Industrial Engineering's graduate programs prepare engineers to assume leadership positions in industry, government, and service organizations. With the Master of Science in Industrial Engineering, a student's program could be broad or specialized depending on his/her interests. The department provides several areas of concentration, including:

- Operations Research and Analytics
- Product Development and Manufacturing Systems
- Engineering Management and Assessment

In addition, the department also offers a dual degree (MSIE/MBA) program in cooperation with the Joseph M. Katz Graduate School of Business, and several options with the Master's program including (1) a Graduate Certificate in Safety Engineering, (2) opportunities for Lean Six Sigma Certification, (3) a Graduate Certificate in Healthcare Systems Engineering in cooperation with the Graduate School of Public Health, and (4) a Graduate Certificate in Nuclear Engineering in cooperation with the Department of Mechanical Engineering and Materials Science.

The Doctor of Philosophy degree is the department's flagship graduate program. Currently, the primary areas of research include all aspects of operations research, manufacturing science and nontraditional manufacturing, and supply chains. Doctoral graduates are qualified for academic research careers as well as technical leadership positions in industry.

**Admissions**

Applicants must possess an undergraduate or graduate degree from an ABET-accredited program in any engineering discipline, or a degree in a complementary technical discipline, such as mathematics, physics, or computer science. The department also requires undergraduate knowledge of calculus-based probability and statistics, calculus, linear algebra, and proficiency in computer programming.

Applicants for admission must submit the application form and fee, transcripts of all college-level work, three letters of recommendation, and a statement of career goals/objectives. International applicants to the full-time Masters program and all applicants to the PhD program must also submit scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination (GRE). Applicants to the part-time master's program are generally not required to take the GRE. International applicants whose first language is not English must take the TOEFL administered by the Educational Testing Service with a minimum score of 550 (paper-based test)/213 (computer-based test)/ 80 (internet-based test). It is desirable for PhD applicants to have an interview with a faculty member, although this is not a requirement for admission.

Domestic applicants are considered on a rolling basis, while deadlines for international applicants are as follows: fall term - April 1 and spring term - July 1. International applicants are not accepted for enrollment beginning in a summer term. Prospective students are encouraged to apply early whenever possible.

Applications may also be completed online by going to [http://www.engineering.pitt.edu/Departments/Industrial/Admissions/](http://www.engineering.pitt.edu/Departments/Industrial/Admissions/)

Applicants to the MSIE-MBA program must apply through the Joseph M. Katz Graduate School of Business

**Financial Assistance**

It is the department's policy to provide graduate teaching or research assistantships to as many PhD students as possible. However, these awards are limited in number and highly competitive, and are awarded on the basis of merit and departmental research/teaching requirements. Financial support comes from the department, not individual faculty, and is generally restricted only to students interested in pursuing a doctoral degree. All decisions on assistantships are made by the chair based upon the recommendations of the departmental graduate committee. Barring unforeseen circumstances, students who are awarded financial support will have their financial support continued as long as they maintain their level of academic excellence.
and make satisfactory progress toward their degree objectives. For full consideration, students must apply early for financial support and in no case later than January 31 for the fall term and July 31 for the spring term.

Industrial Engineering, PhD

This is the department's flagship graduate program and prepares the student for the rigorous demands of a career in research and development, or academia. It requires a strong background in mathematics, probability theory, optimization techniques and manufacturing systems. The PhD student is expected to be a full-time student. Although it is possible to seek candidacy as a part-time student, the PhD candidate must spend at least one academic year on campus full time. The graduate faculty typically works closely with individual doctoral students to create a flexible program tailored to individual needs.

Entrance to the PhD Program: To be admitted to the doctoral program, students must pass the PhD qualifying examination. The student must seek faculty approval to take this examination, which is typically given once a year in late April or early May and encompasses (1) Operations Research, (2) Probability, (3) Statistics & Data Analysis, (4) Manufacturing Systems & Basic Industrial Engineering, and (5) either Stochastic Processes or Micro & Nano Manufacturing. A cumulative grade point average of 3.30 or better in graduate course work and formal faculty approval are required in order to be able to take the exam. The examination allows the department to assess the student's academic preparation and creative ability to conduct doctoral-level research. Students are expected to take the examination in April/May of the calendar year following the one in which they entered the graduate program, although it is acceptable to take the examination earlier.

Doctoral Course and Dissertation Credit Requirements: In addition to the basic core courses, doctoral students take additional courses that may be required in preparation for the PhD degree and the student's dissertation topic. These courses are selected in conjunction with a program approved by the student's advisor. According to University regulations, the PhD requires at least 72 credits beyond the bachelor's degree or 42 credits beyond the master's degree, including 18 credits for dissertation research. Currently, course credits typically include the following:

- IE 2000 (for students with non-IE undergraduate degree): 1 credit
- Other required courses (IE 2100, 2084, 2088): 9 credits
- Additional course work (at least 6 credits of which must come from offerings outside the Department of Industrial Engineering): 20-24 credits
- Dissertation research (IE 3997/IE 3999): at least 18 credits

Additional Doctoral Requirements: All full-time students must enroll in and attend IE 3095 (Graduate Seminar) each term they are in residence; the credits for these do not count toward the 72-credit requirement.

The comprehensive examination is taken by students after completing the course work in their concentration. The PhD comprehensive exam has a three-fold purpose: (1) to test the student's proficiency (knowledge and skills) in his or her major area of interest; (2) to identify deficiencies in the student's background and suggest remedial work; and (3) to test the student's ability to prepare an acceptable dissertation in his or her area of concentration.

All doctoral students are expected to pursue research by working with individual faculty in areas that can lead to a potential doctoral dissertation. A PhD candidate must demonstrate the ability to conduct research of original nature by completing a dissertation and preparing one or more papers of publishable quality. The dissertation topic is selected by the student in some theoretical or methodological area of interest in consultation with a faculty advisor. A faculty committee must approve the dissertation proposal before the student embarks on dissertation research. Information regarding the PhD program can be obtained by going to http://www.engineering.pitt.edu/Departments/Industrial/_Content/Graduate/Doctoral-Program/

Industrial Engineering/Business Administration, MSIE/MBA

This dual-degree program, offered in conjunction with the Joseph M. Katz Graduate School of Business, positions individuals with an undergraduate degree in engineering or the hard sciences to take a management role in a company that has a significant engineering and/or technological focus. Full-time students can complete both degrees in 20 months, while part-time students can do so in four years. Prospective students must apply via the Joseph M. Katz Graduate School of Business to the joint program; students who are already in the MBA program are not permitted to enroll in the joint program.
A total of 25.5-26.5 credits from the Department of Industrial Engineering are required (12-13 credits in core classes, 12 credits in electives, and 1.5 credits in an integrated project).

In particular these credits are divided as follows:

- **Required Core (2 courses: 6-7 credits)**
  - IE 2001 - OPERATIONS RESEARCH
  - IE 2006 - INTRO TO MANUFACTURING SYSTEMS
  - IE 2000 - FUNDAMNTLS OF INDUSTRIAL ENGR*

- **Elective Core: at least two of the following (2 courses: 6 credits)**
  - IE 2003 - ENGINEERING MANAGEMENT
  - IE 2004 - DATA BASE DESIGN
  - IE 2007 - STATISTICS AND DATA ANALYSIS
  - IE 2100 - SUPPLY CHAIN ANALYSIS

- **Free Electives (4 courses: 12 credits)**
  - Any elective offered by the IE Department (including courses in the elective core above)

*IE 2000 - FUNDAMNTLS OF INDUSTRIAL ENGR is required only for students without an undergraduate degree in IE

For details on the curriculum requirements for the MBA portion of the program, please visit Joseph M. Katz Graduate School of Business.

### Industrial Engineering, MSIE

#### Requirements for the MSIE Degree

The Master of Science in Industrial Engineering program is very flexible and requires 30 to 31 credits of graduate study. It may be obtained with or without a thesis option. With either option, the student is required to take three core courses (IE 2001, IE 2005, and IE 2006) that count for 9 credits, and at least two courses from the elective core (currently IE 2003, IE 2004, IE 2007, IE 2100) that count for an additional 6 credits. In addition, students who do not have an undergraduate degree in Industrial Engineering are required to take IE 2000 (1 credit) in their first term.

- With the non-thesis option, the remaining 15 credits may be freely chosen from the elective core or other departmental graduate courses based on the student's individual interests and the approval of his or her academic advisor. With the permission of the advisor, the student may also take up to 6 of the 15 credits from other relevant graduate offerings outside the department.

- With the thesis option, 9 of the 15 remaining credits may be freely chosen from the elective core or other departmental graduate offerings. In addition, the student must complete a 6 to 8-credit thesis. With this option, out-of-department electives are generally not permitted. In both cases, students who have already taken one or more of the core courses as undergraduates or as part of another graduate program are encouraged to skip such courses and substitute them with more advanced course work in the same area.

Normally the program can be completed in three terms of full-time study or two to three years of part-time study. Many graduate courses are offered in the evening for the convenience of working professionals. Courses are also offered over the summer term. Information regarding the MS program can be obtained by going to: http://www.engineering.pitt.edu/industrial/graduate/

### Health Care Systems Engineering Certificate

The certificate in Health Care Systems Engineering is intended for individuals pursuing careers in health systems management and process engineering. Primarily designed for Master's degree students in the Department of Health Policy & Management and the Department of Industrial Engineering, this program provides a rigorous and multi-disciplinary education as a complement to the core curriculum of both programs. With a focus on enhancing innovation, effectiveness and efficiency in health care and public health, the Certificate's ultimate goal is to produce well-educated professionals and leaders in their disciplines. The HSE certificate is not a stand-alone option but is open to all Master's students in Industrial Engineering, and students must formally apply for this option. For IE graduate students, the MS degree in IE along with the HSE certificate requires a total of 36-38 credits. Students interested in the HSE certificate are strongly encouraged to map out their study plans immediately after enrolling in the department.

A recommended study plan for MSIE students who choose the HSE Certificate option is shown below:
### Fall Year 1
- IE 2000 - FUNDAMENTALS OF INDUSTRIAL ENGINEERING
- IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
- IE 2006 - INTRODUCTION TO MANUFACTURING SYSTEMS
- IE 2076 - TOTAL QUALITY MANAGEMENT
- HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
- IE 2110 - HEALTH SYSTEMS ENGINEERING SEMINAR
**Total:** 10-11 credits

### Spring Year 1
- IE 2001 - OPERATIONS RESEARCH
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE Core Elective
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
**Total:** 12 credits

### Fall Year 2
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- IE Core Elective²
- IE 2110 - HEALTH SYSTEMS ENGINEERING SEMINAR
**Total:** 9 credits

### Spring Year 2
- HPM Elective²
- IE 2998 - GRADUATE PROJECTS/PRACTICUM³
**Total:** 5-6 credits

¹If undergraduate degree is not in Industrial Engineering

²These electives can be switched around, or the last term could be reduced to just 3 credits if these elective credits are taken earlier in the program (e.g. during the fall or summer)

³Cannot be taken earlier
Nuclear Engineering Certificate

Requirements

Students must satisfactorily complete five of the following nine courses in order to earn either the graduate or post-baccalaureate certificate in nuclear engineering:

- ENGR 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING or
  ME 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING Pre-req: an undergraduate degree in engineering or science.

- ENGR 2101 - NUCLEAR CORE DYNAMICS or
  ME 2101 - NUCLEAR CORE DYNAMICS Pre-req: ENGR 2100/ME 2100 or an undergraduate degree in nuclear engineering, work experience in nuclear engineering with instructor's permission.

- ENGR 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE or
  ME 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE Pre-req: ENGR 2100/ME 2100

- ENGR 2104 - NUCLEAR OPERATIONS AND SAFETY or
  ME 2104 - NUCLEAR OPERATIONS AND SAFETY Pre-req: ENGR 2100/ME 2100

- ENGR 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS or
  ME 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS Pre-req: ENGR 2102/ME 2102, ENGR 2103/ME 2103

- ENGR 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT or
  ME 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT

- ENGR 2107 - HIGH PERFORMANCE COMPUTING ALGORITHMS AND METHODS or
  ME 2107 - HIGH PERFORMANCE COMPUTING ALGORITHMS AND METHODS

- ENGR 2110 - NUCLEAR MATERIALS or
  ME 2110 - NUCLEAR MATERIALS Pre-req: an undergraduate course in materials science or instructor's permission

- ENGR 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY or
  ME 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY

- ENGR 2113 - RADIATION DETECTION AND MEASUREMENT or
  ME 2113 - RADIATION DETECTION AND MEASUREMENT

- ENGR 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS or
  ME 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS Pre-req: an undergraduate course in heat transfer and fluid flow or instructor's permission.

- ENGR 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY or
  ME 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY Pre-req: an undergraduate course in heat transfer and fluid flow or instructor's permission.

- ENGR 2118 - COMPUTATIONAL RADIATION TRANSPORT or
  ME 2118 - COMPUTATIONAL RADIATION TRANSPORT

- ENGR 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS or
  ME 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS
ENGR 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER or
ME 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER

ENGR 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS or
ME 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS

ENGR 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES or
ME 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES

Additional Information

The program will be sufficiently flexible to accommodate students from a wide spectrum of engineering disciplines.

Additional information can be found here:

- http://www.engineering.pitt.edu/nuclear/
- http://www.engineering.pitt.edu/online/

Who may apply

- Practicing engineers currently in or aspiring to a leadership role in the nuclear industry,
- Engineering professionals who desire graduate level education in nuclear engineering with a focus on safe nuclear plant operations,
- New graduates with a minimum of a bachelor's degree in a technical discipline, and
- Professionals who manage multidisciplinary teams for project design or management in the nuclear industry

How to apply

At the University of Pittsburgh, any student pursuing a Master's degree in the Swanson School of Engineering may pursue the graduate certificate in nuclear engineering as a focus track. It is also possible for individuals who wish to achieve the certificate only to apply to the program.

Interested students can apply here: https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=up-e

Questions

Inquires regarding the graduate certificate in nuclear engineering can be directed to:

Daniel G. Cole, PhD, P.E.: Director of Steven R. Tritch Program in Nuclear Engineering
636 Benedum Hall
dgcole@pitt.edu

Inquires regarding registration can be directed to:

Carolyn Chuha: Mechanical Engineering Graduate Administrator
636 Benedum Hall
Cac90@pitt.edu
412-624-9722
Safety Engineering Certificate

The certificate in Safety Engineering program is intended for engineers seeking training in safety engineering to enhance their operational abilities or if they become newly assigned to positions that have higher levels of safety engineering responsibilities. It is also designed to enhance the capabilities of non-engineering based safety professionals seeking training in safety engineering, and affords the opportunity for engineers and other working professionals to maintain their certifications and licensure as safety professionals. A minimum of 15 credits are required to complete this certificate and the certificate may be obtained as a stand-alone program or in conjunction with the MS degree. In particular, the certificate requires the following 3-credit courses: IE 2301 - INTRODUCTION TO SAFETY ENGINEERING, IE 2302 - ENGINEERING FOR PROCESS SAFETY and IE 2303 - WORK DESIGN. The remaining two classes (6 credits) can come from a list of approved electives within the Swanson School that is maintained by the program director.

Department of Mechanical Engineering and Material Science and Engineering

The Department of Mechanical Engineering and Materials Science offers MS and PhD degrees in both areas as well as MS degree in Nuclear Engineering, and the graduate certificate in Nuclear Engineering which is open to all graduate students within the Swanson School of Engineering. The certificate in Nuclear Engineering may also be earned by qualified post baccalaureate students who are not seeking to also earn an MS degree.

Materials Science and Engineering

The Department of Materials Science and Engineering offers broad-based educational and research programs in materials science and engineering leading to the degrees of Master of Science and Doctor of Philosophy in Materials Science and Engineering. These programs are oriented toward the
application of fundamental knowledge of materials science and engineering to the solution of real-world materials problems that impede technological progress. They are designed to educate engineers, providing them with the tools to become successful in research, development, production, management, and teaching. The department also offers a dual degree Masters program with the Katz Graduate School of Business.

Basic courses on the structure, properties, and energetics of materials are taken in common. The student, working with faculty advisors, tailors the program to suit individual interests and demands of the student's chosen field of specialization through advanced and specialty courses.

The range of research programs in the department reflects the broad spectrum of interest of the faculty. However, interest in the structure and properties of materials and their relationship to materials processing is a common thread that ties together many of the programs. Research is aimed at building an understanding of basic phenomena that will lead to solutions of materials problems at the forefront of technological and social progress.

Current research programs are centered in several areas of ceramics for structural and functional applications: metals, including corrosion and oxidation; high-temperature materials; materials for energy applications; additive manufacturing; metal-forming processes; phase transformations in metals and ceramics; intermetallic phases; plastic deformation of metals; surfaces and interfaces; thermomechanical processing of steels; ceramic processing and sintering science; electronic properties of ceramics; nanostructured materials; catalytic materials; thin film science and technology; and laser processing of materials

**Master of Science Program**

The Master of Science in Materials Science and Engineering degree (MSMSE) may be pursued as either a Professional MS Track program (for practicing engineers) or a Research MS Track program. Students can tailor their individual MS program to emphasize different aspects of materials science and engineering (e.g., ceramics, metallurgy, etc.).

**Admissions**

A bachelor's or master's degree holder applying to the program must have cumulative grade point average (QPA) equal to or higher than 3.0 (B) or equivalent. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the Graduate Committee.

In some cases, depending on previous background and QPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.0 (B) or better in courses that are required to obtain a better background in materials science and engineering and/or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.

**Doctor of Philosophy Program**

http://www.engineering.pitt.edu/Departments/MEMS/_Content/Graduate/Graduate-Program-Accordion-content/

The Doctor of Philosophy Program in the Department of Materials Science and Engineering is a research degree leading largely to careers in teaching and research in academia and industry. This program is designed for excellent students. As the studies progress, students develop an understanding at the highest level in their area of specialization that must lead to an original contribution to the field in the PhD dissertation.

**Admissions**

A bachelor's or master's degree holder applying to the program must have a QPA equal to or higher than 3.3 (B+) or equivalent. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the Graduate Committee.

In some cases, depending on previous background and QPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.3 (B+) or better in courses that are required to obtain a better background in materials science and engineering and/or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.
Graduate Materials Science Courses

http://www.engineering.pitt.edu/Departments/MEMS/_Content/Graduate/Graduate-Program-Accordion-content/

Six core courses are offered annually and other graduate courses are offered on a two-year rotation.

Mechanical Engineering

Graduate Degree Programs

The mechanical engineering graduate program offers PhD and master of science degrees in mechanical engineering, and master of science degree in nuclear engineering. Each graduate student's program is developed individually within very broad limits and is carefully designed to meet his or her needs and objectives. The graduate faculty is committed to high-quality research and teaching. The curriculum is an integrated program of study in applied sciences, applied mathematics, and modern computational procedures that are relevant to the research emphasis in the department. The research is focused on five major areas: (1) Energy Technology: fluid mechanics, Newtonian and non-Newtonian fluid dynamics, heat transfer, combustion, fuel cells, gas turbines, advanced thermodynamics cycles and hybrid systems, thermal hydraulics in nuclear energy generation, energy accountability and sustainability in electronic equipment; transducers and control; (2) Smart Materials, Transducers, Dynamic Systems and Control: Sensors and actuators based on smart materials, adaptive structures and materials, structural acoustics, active/passive noise control, micro-electro-mechanical systems, microfluidic devices, radio-frequency energy harvesting, structural acoustics, and structural vibration control, novel actuators and mechatronics; (3) Nanotechnology: process design and modeling, tribology, composite materials, computational materials, multiscale simulation methods; micro- and nano-fabrication and characterization methods; (4) Advanced Manufacturing: 3D additive manufacturing, inkjet printing, laser manufacturing, topology optimization; and (5) Biomechanics: constitutive modeling of soft biological tissues, experimental and computational biomechanics, biomechanical modeling/simulation; musculoskeletal biomechanics, upper extremity biomechanics, joint replacement. In addition to the MS and PhD degrees, the department also offers a dual degree program with the Katz Graduate School of Business.

Admissions

https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=up-e

An application for either the MS in mechanical engineering or PhD program is judged on the student's prior academic record, GRE scores (required for PhD applicants), the accreditation of the prior degree granting school, and the capability of the department to match the applicant's interest with the program. A foreign national student who did not receive his or her Bachelor of Science or Master of Science degree from an accredited U.S. institution is required to take the TOEFL exam and receive a score of at least 550 (213 for the computerbased exam/80 internet-based exam) or the International English Language Testing System (IELTS) and receive a minimum result of Band 6.5 as well as the GRE. GRE testing may also be required for applicants of the MS program if requested by the Graduate Committee. Students with a Bachelor of Science degree in another engineering field, mathematics, or physics will also be considered for the graduate program with the possibility that prerequisite courses may be required.

A part-time program is available for students who are employed in local industries. Part-time students usually carry from 3 to 6 credits per term in either day or evening classes.

Requirements for the Master of Science Program

http://www.engineering.pitt.edu/MEMS/Graduate/Mechanical_Engineering/

The Master of Science in Mechanical Engineering degree (MSME) can be pursued as either a Professional MS Track (for practicing engineers) or a Research MS Track. The Professional Track is best suited to those currently in industry who are looking to increase their knowledge.

The Nuclear Engineering Graduate Program
The Department of Mechanical and Materials Science offers graduate studies in advanced nuclear engineering. The graduate faculty is committed to high-quality research and teaching. The curriculum is an integrated program of study in applied sciences, applied mathematics, and modern computational procedures that are relevant to the research emphasis in the department. The research is focused on three major areas: (1) Nuclear Energy Technology (2) Operations and Safety (3) Nuclear Materials (4) Nuclear Modeling and Simulations and (5) Radiology and Radiochemistry.

**Degree Programs**

An application for the MS program is judged on the student's prior academic record, GRE scores, the accreditation of the prior degree granting school, and the capability of the department to match the applicant's interest with the program. A foreign national student who did not receive his or her Bachelor of Science from an accredited U.S. institution is required to take the TOEFL exam and receive a score of at least 550 (213 for the computer-based exam / 79-80 internet-based exam) or the International English Language Testing System (IELTS) and receive a minimum result of Band 6.5 as well as the GRE. Students with a Bachelor of Science degree in another engineering field, mathematics, or physics will also be considered for the graduate program with the possibility that prerequisite courses may be required. A part-time program is available for students who are employed in local industries. Part-time students usually carry from three to six credits per term in either day or evening classes.

Applicants who do not meet these requirements will be considered on an individual basis with strong emphasis given to academic promise, career orientation, work experience, and preparation in engineering and related disciplines. In some cases, applicants may be admitted provisionally until certain deficiencies in either coursework or academic achievement are satisfied.

**Nuclear Engineering Graduate Certificate**

The Department of Mechanical Engineering and Materials Sciences is offering a certificate for students in the Swanson School of Engineering with an interest in nuclear science and technology. Students from the Bioengineering, Civil, Chemical, Industrial, Mechanical, Materials Science, and Electrical/Computer engineering programs may be most interested in obtaining this certificate.

Fifteen units are required to complete the certificate. This certificate may be combined with graduate courses in any one of the School's seven Master of Science (MS) degree programs or the certificate may be awarded stand-alone as a post-baccalaureate certificate. Since the nuclear courses are cross-listed as Mechanical Engineering courses, they can be counted toward both a MSME degree and Nuclear Engineering Graduate Certificate.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. This focus on nuclear operations and safety not only fulfills a recognized educational need, but is also designed to take advantage of unique industrial resources in the Pittsburgh area which will greatly facilitate student learning.

The renaissance of nuclear science and technology in the United States has created a need in the marketplace once again for engineers with nuclear knowledge. The University of Pittsburgh aims to meet these marketplace needs by preparing engineers through the graduate certificate in nuclear engineering. Classes are taught by current and former nuclear engineers, including faculty with experience conducting commercial nuclear operations programs for Westinghouse or the Beaver Valley Nuclear Station and with certificates or operation licenses from the US Nuclear Regulatory Commission.

**Objectives**

The objectives of the nuclear engineering certificate are:

- To develop the basic competencies needed by science and engineering graduates to contribute quickly and effectively to the renaissance of nuclear science and technology in the United States and abroad.
- To create a benchmark educational program that can serve as a model throughout academia

**Materials Science and Engineering, PhD**

Requirements for the PhD Degree
A minimum of 72 credits is required for the PhD. Of the total of 72 credits required for the PhD degree a minimum of 36 credits must be coursework beyond the Bachelor of Science (BS) degree. PhD students must maintain a minimum QPA of 3.3 (B+) in this coursework. The coursework consists of (I) a materials core (six required courses students must take in the first year of enrollment), (II) a group of courses tailored for each student's research and as required technical broadening beyond the MSE focus, (III) courses to address mathematical/numerical skills, and (IV) PhD Research and Dissertation credits. The student's advisor must approve the course sequence selection.

The 18 credits core course component must be taken within the first year of the program. Typically, PhD students will carry a course load of three courses per term until their coursework is completed. If a student's background is insufficient for a given graduate course, the student must prepare by attending appropriate undergraduate courses or through independent study. This should be arranged in consultation with the student's faculty advisor and the lecturing faculty of the relevant course(s).

A total of up to twelve (12) credits may be taken in relevant science, math, engineering disciplines outside of the MSE designation of graduate level courses and in different departments than MEMS. The selection of courses, in general, must be acceptable to the student's advisor.

Minimum credit requirements include:

Core Courses (18 credits)

- MSE 2003 - STRUCTURE OF MATERIALS
- MSE 2011 - ENERGETICS
- MSE 2013 - KINETICS IN MATERIALS SCIENCE
- MSE 2015 - ELECTROMAGNTC PROPS MATERIALS
- MSE 2030 - MECHANICAL BEHAVIOR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG

Note:

Students must score at least a B (3.0) in each of these six classes. If a student does not get at least a letter grade of B, the class must be taken a second time. These classes must be successfully completed before the student can apply for admission to PhD Candidacy.

Advanced Courses

A student must take advanced courses and technical electives. These are comprised of at least two courses (6 credits) selected by the student and his or her advisor as the best advanced preparation for research in the area of the dissertation, and two courses, as a broadening experience, to complement the student's PhD specialization and contribute significantly to career preparation.

Mathematics Courses

The student is required to take two mathematics/numerical courses for six (6) credits beyond those required for the materials science and engineering Bachelor of Science degree. They can be satisfied by many courses. This requirement may be waived if it was met in a previous program.

PhD Research and Dissertation Credits

Each student must also have:
- At least six (6) credits of MSE 3997 (PhD Research);
- At least 12 credits of MSE 3999 (PhD Dissertation);

Please note that registration for MSE 3999 is allowed only after the student has passed the Comprehensive Examination and defended the PhD Proposal, which qualifies the student for the status of PhD Candidacy.

The course requirements described in these guidelines are a minimum requirement. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional
courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD Committee for better preparation for a given research area. Note that completion of the PhD degree and admission PhD candidacy require a GPA of B+ or better (≥3.3).

### Mechanical Engineering, PhD

http://www.engineering.pitt.edu/MEMS/Graduate/Graduate_Information/

The goal of the Doctor of Philosophy program in the Department of Mechanical Engineering is to develop the student for the rigorous career demands of engineering research either in the industrial or academic fields. The student is educated at the pioneering edge of technical, management, systems design, and decision-making concepts. This work requires a strong background in mathematics and one of the specialty areas of mechanical engineering. The PhD student is expected to attend full time. It is possible, however, to seek candidacy as a part-time student with the stipulation that the PhD candidate must spend at least one full-time academic year on campus.

A graduate student who has completed eight course courses of the master's program in good standing can go directly into the PhD program. An applicant who has received the Master of Science in mechanical engineering from a university with an Accreditation Board for Engineering and Technology (ABET)-accredited mechanical engineering curriculum, or who has substantially equivalent preparation, is eligible to enter the Doctor of Philosophy program in the Department of Mechanical Engineering.

If deficiencies in engineering preparation are noted, as in the case of science majors from accredited institutions, admission may be granted after the completion of such designated undergraduate courses as may best correct the deficiencies. Only those individuals whose preparation has been judged satisfactory for graduate study in the Department of Mechanical Engineering will be admitted to full graduate status.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program. Students must maintain a minimum cumulative QPA of 3.30 in courses to be eligible to take the preliminary and comprehensive examinations as well as to graduate.

### Plan of Study

During the first term in the doctoral program the student must submit a plan of study for approval by the department. Minimum course requirements (beyond the MS or equivalent degree) include:

- 30 credits for M.S. degree (or equivalent)
- 18 course credits at an advanced graduate level (Approval is required by the student's advisor and the graduate committee. Courses may NOT include: ME 2001, ME 2002, ME 2003, ME 2004, ME 2007, ME 2020, ME 2022, ME 2047, ME 2053, ME 2060, ME 2074, ME 2100, ME 2125 and any course that is a dual graduate/undergraduate course. Non-duplicating courses from other departments may be allowed subject to approval.)
- ME 3997 - RESEARCH, PHD
- ME 3999 - PHD DISSERTATION (after admission to PhD Candidacy)
- 6 additional credits approved by advisor and graduate committee

**Total Credits: 72**

### Materials Science and Engineering - Professional Track, MSMSE

The professional MS track is primarily oriented toward part-time students currently working in industry.

### MS Track Requirements

The professional track consists of a minimum of 30 course credits (equivalent to 10 courses). There are no thesis or comprehensive examination requirements for this degree. Up to nine (9) credits of coursework counting towards the 30 course credits requirement may consist of non-MSE
courses in other Engineering, Science or Mathematics disciplines that are approved by a student's advisor. No more than six credits may be granted to a student as transfer credit for work done at another accredited graduate institution. At least 21 course credits must be obtained from MSE 2000 and 3000 courses, not including Graduate Seminar (MSE 3023 and 3024), MS Research (MSE 2997), and MS Thesis (MSE 2999). An independent graduate project (MSE 2998) can be conducted after consultation with the student's faculty advisor and may account for 3 of the 21 required MSE credits. Students with non-MSE backgrounds are strongly encouraged to take for credit introductory courses (e.g. MSE 2067 or equivalent). MS degrees are conferred only on those students who have completed all course requirements with at least a 3.00 (B) GPA.

Materials Science and Engineering - Research Track, MSMSE

The research track is primarily for full-time students who have the intention to pursue a PhD or are strongly oriented toward a research career. The University transcript will include an entry indicating that a student is in the research MS track.

Research MS Track Requirements

The Research Track MS degree requires a minimum of 30 credits of course and research based graduate study, including at least 21 course credits. At most up to nine (9) credits of coursework counting towards the required minimum of 21 course credits may consist of technical courses in other non-MSE Engineering, Science or Mathematics disciplines that are approved by a student's advisor. No more than six (6) credits may be granted toward completion of the requirements for the Research Track MS for work completed at another accredited graduate institution. A minimum of 12 course credits must be derived from 2000- and 3000-level MSE courses, not including credits associated with Graduate Seminar (MSE 3023 and MSE 3024), MS Research (MSE 2997), and MS Thesis (MSE 2999). Students with non-MSE backgrounds are strongly encouraged to take for credit introductory courses (e.g. MSE 2067 or equivalent). The student's advisor must approve the course sequence selection. In addition to coursework requirements a minimum of 3 credits of MS research (MSE 2997) and six (6) credits of MS Thesis (MSE 2999) are required. Master's degrees are conferred only on those students who have completed all courses required for the degree with an average grade of least a 3.00 (B) GPA.

MS Thesis

An MS student should initiate research work as early as possible and then register for MS research (MSE 2997). Once thesis preparation has begun, a student must register for thesis credits (MSE 2999) in each succeeding term until successful completion of the thesis and a final oral defense and comprehensive exam. The MS thesis document is at least expected to be a report on independently conducted research and must adhere to the School of Engineering defined style and format. A Style and Form Manual for a thesis is available in the Engineering Office of Administration.

The purpose of an MS thesis oral defense is to evaluate an MS thesis and the student's command of the research subject. The successful completion of a defense is a requirement for the MS degree. The thesis examining committee consists of at least three members of the MSE faculty who are recommended by the student's advisor and approved by the department chair. After successfully completing a defense, a student must deposit an electronic and/or hard copies of the approved thesis in accordance with the current guidelines for thesis submissions available from the Office of Administration of the School of Engineering or the MSE Program Office.

Part-time students may pursue the research MS track. However, they must recognize that, although their thesis topics may be related to the broad technical area of their employment, results of work-related routine technical activities, analysis, surveys, or studies conducted for employers are not acceptable for inclusion in MS theses. Furthermore, part-time students should become aware of the University Intellectual Property Ownership Policy before undertaking theses. Prospective students must clarify all of these issues before contemplating a research-based MS degree.

Mechanical Engineering - Professional Track, MSME

Professional Master of Science Track

Students must take at least one of the following mathematics courses:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
ME 2646 - LINEAR SYSTEM THEORY or
ECE 2646 - LINEAR SYSTEM THEORY

Mechanical engineering courses are offered from the following subject areas:

Dynamic Systems and Control

- ME 2015 - HUMAN ROBOTICS AND CONTROL
- ME 2020 - MECHANICAL VIBRATIONS
- ME 2027 - ADVANCED DYNAMICS
- ME 2042 - MEASUREMENT AND ANALYSIS OF VIBRO-ACOUSTIC SYSTEMS
- ME 2045 - LINEAR CONTROL SYSTEMS
- ME 2046 - DIGITAL CONTROL SYSTEMS
- ME 2242 - OPTIMAL FILTERING AND ESTIMATION
- ME 2247 - INTRODUCTION TO NONLINEAR CONTROL DESIGN or
  ECE 2647 - INTRODUCTION TO NONLINEAR CONTROL DESIGN
- ME 2646 - LINEAR SYSTEM THEORY or
  ECE 2646 - LINEAR SYSTEM THEORY
- ME 2671 - OPTIMIZATION METHODS or
  ECE 2671 - OPTIMIZATION METHODS
  ECE 3650 - OPTIMAL CONTROL
- ME 2082 - ELECTROMECHANICAL SENSORS & ACTUATORS

Fluid Mechanics

- ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS
- ME 2055 - COMPUTATIONAL TRANSPORT PHENOMENA
- ME 2070 - MICROFLUIDICS
- ME 2074 - ADVANCED FLUID MECHANICS 1

MEMS/NEMS

- ME 2010 - NANOMECHANICS, MATERIALS AND DEVICE
- ME 2049 - THERMAL MANAGEMENT IN ELECTRONIC SYSTEMS
- ME 2082 - ELECTROMECHANICAL SENSORS & ACTUATORS
- ME 2222 - NANO-SCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS
- ME 2223 - NANO-SCALE MODELING AND SIMULATIONS

Materials and Biomechanics

- ME 2005 - STRUCTURE OF MATERIALS
- ME 2007 - ELEMENTS OF MATERIAL SCIENCE AND ENGINEERING 1
- ME 2008 - Elements of Materials Science and Engineering 2 (Proposed)
- ME 2009 - PROCESSING OF MATERIALS
- ME 2010 - NANOMECHANICS, MATERIALS AND DEVICE
- ME 2048 - ENGINEERING ALLOYS FOR CONSTRUCTION
• ME 2060 - NUMERICAL METHODS
• ME 2062 - ORTHOPAEDIC ENGINEERING
• ME 2067 - MUSCULOSKELETAL BIOMECHANICS
• ME 2084 - INTRODUCTION TO POLYMER SCIENCE
• ME 2086 - MECHANICS OF 3D PRINTED MATERIALS AND STRUCTURES
• ME 2222 - NANO SCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS
• ME 2223 - NANO SCALE MODELING AND SIMULATIONS:

Nuclear

• ME 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING
• ME 2101 - NUCLEAR CORE DYNAMICS
• ME 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL
• ME 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
• ME 2104 - NUCLEAR OPERATIONS AND SAFETY
• ME 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
• ME 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT
• ME 2107 - HIGH PERFORMANCE COMPUTING ALGORITHMS AND METHODS
• ME 2110 - NUCLEAR MATERIALS
• ME 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
• ME 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS
• ME 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY
• ME 2118 - COMPUTATIONAL RADIATION TRANSPORT
• ME 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS
• ME 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
• ME 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
• ME 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES

Solid Mechanics

• ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS
• ME 2004 - ELASTICITY
• ME 2010 - NANO MECHANICS, MATERIALS AND DEVICE
• ME 2022 - APPLIED SOLID MECHANICS
• ME 2033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING
• ME 2047 - FINITE ELEMENT ANALYSIS

Thermal Systems

• ME 2049 - THERMAL MANAGEMENT IN ELECTRONIC SYSTEMS
• ME 2050 - THERMODYNAMICS
• ME 2053 - HEAT AND MASS TRANSFER
• ME 2055 - COMPUTR ANAL TRANSPORT PHENOMENA
• ME 2056 - INTRO TO COMBUSTION THEORY
• ME 2074 - ADVANCED FLUID MECHANICS 1
• ME 2254 - CONVECTION HEAT TRANSFER

Note:
A student may take up to 9 graduate credits from other engineering, mathematics, or physics departments.

**Mechanical Engineering - Research Track, MSME**

**Research Master of Science Track**

The Research MS Track is designed for individuals seeking an in-depth research experience in mechanical engineering. A total of 21 course credits and a master's thesis are required for this degree. Upon entering the program, students plan a program of study with the aid of their faculty advisor.

Students must take:

- ME 2997 - RESEARCH, M.S.
- ME 2999 - M. S. THESIS (at least 6 credits)

At least one of the following mathematics courses:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

**Note:**

A student may take up to 9 graduate credits from other engineering, mathematics, or physics departments.

**Nuclear Engineering - Non-Thesis Option (Professional Track), MSNE**

**Master of Science Program**

Upon entering, the student plans a program of study with the aid of the faculty advisor. The course requirements can be met by either the

(1) **Thesis Option (Research M.S.Track):**

- 21 course credits
- ME 2997 - RESEARCH, M.S.
- ME 2999 - M. S. THESIS - 6 credits

30 Credits

Or the

(2) **Non-Thesis Option (Professional M.S.Track):**

- 30 course credits.

**Non-Thesis Option (Professional M.S. Track)**
The professional MS programs are oriented toward full-time students seeking a career in industry, and part-time students currently working in industry. Full-time GSR-supported students might change to professional M.S. track, upon request/approval by the sponsoring faculty advisor and the graduate program. Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of their general field of study. The professional master's degrees normally require the satisfactory completion of at least 30 course credits of graduate study approved by the department.

No more than six credit hours may be granted to a student as transfer credit for work done at another accredited graduate institution. (See Acceptance of Transfer Credits section for further detail.) MS/MBA students are limited to transferring six credit hours. All credits earned in the ME master's degree program must be at the graduate level (the 2000 or 3000 series courses).

Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 QPA. (Visit http://www.bulletins.pitt.edu/graduate/index.html for further detail.

In either case, students seeking the Master of Science degree in Nuclear Engineering must take at least one of the mathematics courses, ME 2001, ME 2002 or ME 2646 / ECE 2646. Up to nine (six for MS/MBA students) graduate credits from other engineering, mathematics, or physics departments may be used in fulfilling the remaining course requirements. The MS/MBA students are also required to complete an integrated project course. Please contact the Graduate Director for a copy of the guidelines for the integrated project course.

**Nuclear Engineering - Thesis Option (Research Track), MSNE**

**Master of Science Program**

Upon entering, the student plans a program of study with the aid of the faculty advisor. The course requirements can be met by either the

(1) Thesis Option (Research M.S.Track):

- 21 course credits
- ME 2997 - RESEARCH, M.S.
- ME 2999 - M. S. THESIS - 6 credits

30 Credits

Or the

(2) Non-Thesis Option (Professional M.S.Track):

- 30 course credits.

**Thesis Option (Research M.S. Track)**

The research M.S. track is primarily for those students who wish to advance the technology. Students in this track will be advised to take those courses best suited for the research degree. Full time graduate students who are supported by department scholarships must choose the research M.S. track. Each candidate must provide a suitable number of copies of the thesis for review and use as designated by the thesis examining committee, consisting of at least three members of the faculty recommended by the major advisor and approved by the department chair. The major advisor must be a Mechanical Engineering or Material Science Faculty member with an appointment in the Mechanical Engineering and Materials Science Department. Nonnative English speakers are encouraged to take ENGR 2050 - TECHNICAL WRITING (however this course does not count toward graduation). The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the office of the dean. After the examination, the approved ETD must be deposited to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school and submitted for microfilming and deposit in the University Library System. A receipt for the ETD processing/microfilming fees and any necessary paperwork must be submitted to the appropriate ETD Staff in the Office of Administration.
Nuclear Engineering Certificate

Requirements

Students must satisfactorily complete five of the following nine courses in order to earn either the graduate or post- baccalaureate certificate in nuclear engineering:

- ENGR 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING or ME 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING Pre-req: an undergraduate degree in engineering or science.
- ENGR 2101 - NUCLEAR CORE DYNAMICS or ME 2101 - NUCLEAR CORE DYNAMICS Pre-req: ENGR 2100/ME 2100 or an undergraduate degree in nuclear engineering, work experience in nuclear engineering with instructor's permission.
- ENGR 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL or ME 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL Pre-req: ENGR 2101/ME 2101
- ENGR 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE or ME 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE Pre-req: ENGR 2100/ME 2100
- ENGR 2104 - NUCLEAR OPERATIONS AND SAFETY or ME 2104 - NUCLEAR OPERATIONS AND SAFETY Pre-req: ENGR 2100/ME 2100
- ENGR 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS or ME 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS Pre-req: ENGR 2102/ME 2102, ENGR 2103/ME 2103
- ENGR 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT or ME 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT
- ENGR 2107 - HIGH PERFORMANCE COMPUTING ALGORITHMS AND METHODS or ME 2107 - HIGH PERFORMANCE COMPUTING ALGORITHMS AND METHODS
- ENGR 2110 - NUCLEAR MATERIALS or ME 2110 - NUCLEAR MATERIALS Pre-req: an undergraduate course in materials science or instructor's permission
- ENGR 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY or ME 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- ENGR 2113 - RADIATION DETECTION AND MEASUREMENT or ME 2113 - RADIATION DETECTION AND MEASUREMENT
- ENGR 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS or ME 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS Pre-req: an undergraduate course in heat transfer and fluid flow or instructor's permission.
- ENGR 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY or ME 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY Pre-req: an undergraduate course in heat transfer and fluid flow or instructor's permission.
- ENGR 2118 - COMPUTATIONAL RADIATION TRANSPORT or ME 2118 - COMPUTATIONAL RADIATION TRANSPORT
Additional Information

The program will be sufficiently flexible to accommodate students from a wide spectrum of engineering disciplines.

Who may apply

- Practicing engineers currently in or aspiring to a leadership role in the nuclear industry,
- Engineering professionals who desire graduate level education in nuclear engineering with a focus on safe nuclear plant operations,
- New graduates with a minimum of a bachelor's degree in a technical discipline, and
- Professionals who manage multidisciplinary teams for project design or management in the nuclear industry

How to apply

At the University of Pittsburgh, any student pursuing a Master's degree in the Swanson School of Engineering may pursue the graduate certificate in nuclear engineering as a focus track. It is also possible for individuals who wish to achieve the certificate only to apply to the program.

Questions

Inquires regarding the graduate certificate in nuclear engineering can be directed to:

Daniel G. Cole, PhD, P.E.: Director of Steven R. Tritch Program in Nuclear Engineering

Medical Scientist Training Program

Chemical Engineering, MD/PhD
The MD/PhD program in chemical engineering is administered through the Medical Scientist Training Program (MSTP). This physician-scientist training program is tailored to a student's specific research interests. Intended for students who have a clearly defined interest in biomedical research, the MSTP links various PhD programs with the School of Medicine.

### Approved Math Courses

- BIOENG 2001 - MATHEMATICAL METHODS IN BIOENGINEERING 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- ECE 2521 - ANALYSIS STOCHASTIC PROCESSES
- ECE 2523 - DIGITAL SIGNAL PROCESSING
- ECE 2671 - OPTIMIZATION METHODS
- MATH 2070 - NUMERCL METH IN SCI COMPUTING 1
- MATH 2071 - NUMERCL MATH IN SCI COMPUTING 2
- MATH 2090 - NUMERICAL SOLUTN ORDNRY DE
- MATH 2370 - MATRICES AND LINEAR OPERATORS
- MATH 2371 - MATRICES & LINEAR OPERATORS 2
- MATH 2500 - ALGEBRA 1
- MATH 2700 - TOPOLOGY 1
- MATH 2800 - DIFFERENTIAL GEOMETRY 1
- MATH 2801 - DIFFERENTIAL GEOMETRY 2
- MATH 2950 - METHODS IN APPLIED MATHEMATICS

- STAT 2661 - LINEAR MODELS THEORY 1

### Approved Life Sciences Courses

- BIOENG 2065 - INTRO TO CELL MECHANOBIOLOGY
- BIOENG 2520 - MOL CELL BIOLOGY & BIOPHYSIC 1
- BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING
- BIOENG 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- BIOSC 2070 - IMMUNOLOGY
- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2301 - SELECTED TOPICS IN ANATOMY
- HRS 2306 - MOTOR LEARNING AND CONTROL OF MOVEMENT/HEALTH PROMOTION
- HRS 2307 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION
- HRS 2356 - CONCEPTS AND PRINCIPLES RELATED TO SENSORY MOTOR CONTROL 1
- HRS 2710 - FUNCT NEUROMUSCULAR STIMULATION
Approved Statistics Courses

- BIOENG 2525 - APPLIED BIOSTATISTICS
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- BIOST 2014 - INTRODUCTION TO BIOSTATISTICS FOR BIMEDICAL SCIENTIST
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- CLRES 2020 - BIOSTATISTICS
- CMU 36-746 - STATISTICAL METHODS FOR NEUROSCIENCE*
- CMU 36-759 - STATISTICAL MODELS OF THE BRAIN*
- PSY 2010 - STATISTICAL ANALYSIS 2
- STAT 2220 - APPLIED REGRESSION
- STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS

*Note that these courses will only count with prior approval from the BioE Graduate Coordinator as a statistics course for those students in the Neural Engineering track area provided those students have a formal background in statistics, via an undergraduate degree or other means. Any questions and requests for the required approval should be directed to the Graduate Coordinator.

Biomechanics Track
This graduate track has a specific menu of courses to satisfy the 9-credit "Track Courses" requirement for the Research M.S., Ph.D., or M.D./Ph.D.

At the University of Pittsburgh there are broad and extensive research activities in Biomechanics. Application areas include cardiovascular, musculoskeletal, ergonomic, occupational, rehabilitation, and urological. Our educational goal is to expand on the fundamental knowledge gained at the undergraduate level of both biomechanics and the biological sciences, and demonstrate how they can be applied to solve basic and applied biomedical problems. We believe that biomechanics concentration students should be exposed to all areas of biomechanics, and not just their area of specialty. Further, since many areas of biomechanics share similar background material, our courses should present fundamental material first, followed by application examples to give the students a feel for "theory and application" in biomechanics. The fundamental philosophy of the approach is multi-scale, wherein Biomechanics is taught as a means to solve biomedical problems, regardless of problem scale (cell to whole body).

Due to the wide breadth of student interests, we offer the following two sub-tracks:

Sub-track I - Biosolid-fluid mechanics/Biological materials
Sub-track II - Biodynamics/Rehabilitation and Human Movement

Each sub-track has a set of three required courses (see below), as well as special options for a second/third life science courses that would be relevant to their area of interest.

**Required courses for the biological materials and biofluids sub-track option:**

- BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS
- BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
- BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES

**Required courses for the biodynamics/rehab sub-track option:**

- BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
- BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS

**For the third track course, choose one of following two options:**

- BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS

An approved Human Movement/Rehabilitation course as listed below:

Students may satisfy their life science course requirements for the PhD program with any of the courses from the BioE approved list of life science courses.

**Recommended Engineering/Math/Related courses:**

- ME (CMU) 759 - CELL MECHANICS
- BIOENG 2065 - INTRO TO CELL MECHANOBIOLOGY

**Cardiovascular:**

- BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING
- BIOENG 3025 - VASC BIOMECH & ROLE IN PATHOBIOL

**Human Movement/Rehabilitation:**

- BIOENG 2035 - BIOMECHANICAL MODELING OF MOVEMENT
- BIOENG 2061 - ERGONOMICS & OCCUPTNL BIOMECHNC
BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT
BIOENG 2703 - REHABILITATION ENGINEERING DSGN
BIOENG 2704 - FUNDMS REHAB ENGR AND TECHN 1
BIOENG 2709 - REHABILITATION BIOMECHANICS
BIOENG 2725 - DESIGN FOR INJURY PREVENTION

Tissue engineering/Biomaterials
BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY
BIOENG 3015 - SCAFFOLDS FOR REGENERATIVE MEDICINE

Medical Imaging
BIOENG 2380 - MEDICAL IMAGING SYSTEMS 1
BIOENG 2382 - MEDICAL IMAGING SYSTEMS 2
BIOENG 2630 - METHODS IN IMAGE ANALYSIS

Mechanical Engineering/Civil Engineering
CEN 12775 Finite Elements in Mechanics (CMU)
ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS
ME 2027 - ADVANCED DYNAMICS
ME 2045 - LINEAR CONTROL SYSTEMS
ME 2047 - FINITE ELEMENT ANALYSIS
ME 2062 - ORTHOPAEDIC ENGINEERING
ME 2074 - ADVANCED FLUID MECHANICS 1
ME 2080 - INTRO MICROELECTROMECHANICAL SYS
ME 3011 - FINITE ELASTICITY

Math
BIOST 2049 - APPLIED REGRESSION ANALYSIS
MATH 2070 - NUMERCL METH IN SCI COMPUTING 1
MATH 2071 - NUMERCL MATH IN SCI COMPUTING 2
MATH 2090 - NUMERICAL SOLUTN ORDNRY DE
MATH 2370 - MATRICES AND LINEAR OPERATORS
MATH 2371 - MATRICES & LINEAR OPERATORS 2
MATH 3380 - MATHEMATICAL BIOLOGY
MATH 2500 - ALGEBRA 1
MATH 2800 - DIFFERENTIAL GEOMETRY 1
MATH 2801 - DIFFERENTIAL GEOMETRY 2
MATH 2950 - METHODS IN APPLIED MATHEMATICS
MATH 2960 - COMPUTATIONAL FLUID MECHANICS
MATH 3070 - NUMRC SOLUTN NONLINEAR EQUATIONS
MATH 3071 - NUMRC SOLUTN PARTL DIFFT EQUA
MATH 3072 - FINITE ELEMENT METHOD
MATH 3075 - PARALLEL FINITE ELEMENT METHODS
MATH 3370 - MATHEMATICAL NEUROSCIENCE
MATH 3920 - NONLINEAR METH DIFFERNTL EQUATN
MATH 2601 - ADVANCED SCIENTIFIC COMPUTING 1
MATH 2602 - ADVANCED SCIENTIFIC COMPUTING 2
MATH 2603 - ADVANCED SCIENTIFIC COMPUTING 3
MATH 2604 - ADVANCED SCIENTIFIC COMPUTING 4
MATH 2900 - PARTIAL DIFFERENTIAL EQUATIONS 1
MATH 2901 - PARTIAL DIFFERENTIAL EQUATIONS 2
MATH 2920 - ORDINARY DIFFERENTIAL EQUATNS 1
MATH 2921 - ORDINARY DIFFERENTIAL EQUATNS 2
ME 2001 - DIFFERENTIAL EQUATIONS
ME 2002 - LINEAR AND COMPLEX ANALYSIS
STAT 2220 - APPLIED REGRESSION
STAT 2661 - LINEAR MODELS THEORY 1
Electrical Engineering/Information Science
ECE 2646 - LINEAR SYSTEM THEORY
ECE 2671 - OPTIMIZATION METHODS
ECE 3648 - NON-LINEAR SYSTEM THEORY
ECE 3650 - OPTIMAL CONTROL
ECE 2521 - ANALYSIS STOCHASTIC PROCESSES
ECE 2523 - DIGITAL SIGNAL PROCESSING
ECE 3526 - MODERN SPECTRAL ESTIMATION
Bioimaging and Signals Track

Bio-Imaging and Signals Track

The Bio-Imaging and Signals track is geared towards students with interests in any of the following areas:

1. Development and application of imaging devices;
