To complete the MS requirement of 30 graduate credits for the Professional M.S., students must complete:

At least one of the following three mathematics courses (3-credits each)

ME 2001 - DIFFERENTIAL EQUATIONS

ME 2002 - LINEAR AND COMPLEX ANALYSIS or

ME 2646 - LINEAR SYSTEM THEORY /ECE 2646 - LINEAR SYSTEM THEORY

At least five of the nuclear engineering courses listed below (totaling at least 15-credits)

Up to nine graduate credits (six for MS/MBA students) from courses offered in other engineering departments or in the mathematics or physics departments (totaling up to 9-credits) as approved by Nuclear Engineering program directors.

MS/MBA students are also required to complete an integrated project course. Please contact the Graduate Directors for a copy of the guidelines for the integrated project course.

Nuclear Engineering Course Offerings

- ENGR 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING or
- ME 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING

- ENGR 2101 - NUCLEAR CORE DYNAMICS or
- ME 2101 - NUCLEAR CORE DYNAMICS Pre-req: ENGR 2100 / ME 2100 or with instructor's permission

- ENGR 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL or
- ME 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL Pre-req: ENGR 2100 / ME 2100 or with instructor's permission

- ENGR 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE or
- ME 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE Pre-req: ENGR 2100 / ME 2100 or with instructor's permission

- ENGR 2104 - NUCLEAR OPERATIONS AND SAFETY or

- ME 2104 - NUCLEAR OPERATIONS AND SAFETY Pre-req: ENGR 2100 / ME 2100 or with instructor's permission
- ENGR 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS or
- ME 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS Pre-req: ENGR 2100 / ME 2100 or with instructor's permission
- ENGR 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT or
- ME 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT
- ENGR 2110 - NUCLEAR MATERIALS or
- ME 2110 - NUCLEAR MATERIALS Pre-req: an undergraduate course in materials science or instructor's permission
- ENGR 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY or
- ME 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- ENGR 2113 - RADIATION DETECTION AND MEASUREMENT or
- ME 2113 - RADIATION DETECTION AND MEASUREMENT
- ENGR 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS or
- ME 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS Pre-req: an undergraduate course in heat transfer and fluid flow or instructor's permission
- ENGR 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY or
- ME 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY Pre-req: an undergraduate course in heat transfer and fluid flow or instructor's permission
- ENGR 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS or
- ME 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS Pre-req: ENGR 2100 / ME 2100 or with instructor's permission
- ENGR 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER or
- ME 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
- ENGR 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS or
- ME 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- ENGR 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES or
- ME 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES
- ME 2097 - SPECIAL STUDY MECHANICAL ENGRG
(Special Study is as agreed with Advisor)

SOE Faculty

STEVEN D. ABRAMOWITCH, Associate Professor and William Kepler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh

MURAT AKCAKAYA, Assistant Professor, Electrical and Computer Engineering, PhD, Washington University

DAVID ANDERSON, Assistant Professor, Electrical and Computer Engineering, PhD, University of Rochester

HESSAM BABAEI, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Louisiana State University

ANNA C. BALAZS, Distinguished Professor and John A. Swanson Chair, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

HSEEN BALED, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

HENG BAN, R.K. Mellon Professor in Energy, Mechanical Engineering and Materials Science, PhD, University of Kentucky

IPSITA BANERJEE, Associate Professor, Chemical and Petroleum Engineering, PhD, Rutgers University

MASOUD BARATI, Assistant Professor, Electrical and Computer Engineering, PhD, Illinois Institute of Technology

MATTHEW BARRY, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

AARON P. BATISTA, Associate Professor, Bioengineering, PhD, California Institute of Technology

CARLA APARECIDA BAUMEL, Assistant Professor, Civil and Environmental Engineering, PhD, Northwestern University

TARYN BAYLES, Vice Chair for Education and Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

ERIC J. BECKMAN, George M. and Eva M. Bevier Chair Professor, Chemical and Petroleum Engineering, PhD, University of Massachusetts

MOSTAFA BEDEWY, Assistant Professor, Industrial Engineering, PhD, University of Michigan

KURT E. BESHORNER, Associate Professor, Bioengineering, PhD, University of Pittsburgh

MARY BESTERFIELD-SACRE, Associate Dean for Academic Affairs and Nickolas A. DeCecco Professor, Industrial Engineering, PhD, University of Pittsburgh

BOPAYA BIDANDA, Chair and Ernest E. Roth Professor, Industrial Engineering, PhD, Pennsylvania State University

HODA BIDKHORI, Assistant Professor, Industrial Engineering, PhD, Massachusetts Institute of Technology

MELISSA M. BILEC, Associate Professor and Roberta Luxbacher Faculty Fellow, Civil and Environmental Engineering, PhD, University of Pittsburgh

HARVEY S. BOROVETZ, Distinguished Professor, Bioengineering, PhD, Carnegie Mellon University

IONNIS BOURMPAKIS, Assistant Professor and Bicentennial Faculty Fellow, Chemical and Petroleum Engineering, PhD, University of Crete

BRYAN N. BROWN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

DANIEL D. BUDNY, Associate Professor, Civil and Environmental Engineering; Director, Freshman Engineering Program, PhD, Michigan State University

ANDREW P. BUNGER, Associate Professor and R.K. Mellon Faculty Fellow, Civil and Environmental Engineering, Chemical and Petroleum Engineering, PhD, University of Minnesota

KAREN BURSIC, Associate Professor and Undergraduate Program Director, Industrial Engineering, PhD, University of Pittsburgh

LEONARD W. CASSON, Associate Professor, Civil and Environmental Engineering, PhD, University of Texas at Austin

RAKIE CHAM, Associate Professor, Bioengineering, PhD, University of Pittsburgh

JUN CHEN, Assistant Professor, Electrical and Computer Engineering, PhD, Chinese Academy of Sciences

APRIL CHAMBERS, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

KEVIN P. CHEN, Paul E. Lego Professor, Electrical and Computer Engineering, PhD, University of Toronto

MARKUS CHMIELUS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Technical University, Berlin, Germany

SUNG KWON CHO, Professor, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea

YOUNGJAE CHUN, Associate Professor, Industrial Engineering, PhD, University of California, Los Angeles

MINKING CHYU, Associate Dean for International Initiatives; Leighton E. and Mary N. Orr Chair Professor, Mechanical Engineering and Materials Science, PhD, University of Minnesota

RENEE CLARK, Assistant Professor, Industrial Engineering, PhD, University of Pittsburgh

WILLIAM W. CLARK, Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University

DANIEL G. COLE, Associate Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University

XINYAN CUI, William Keppler Whiteford Professor, Bioengineering, PhD, University of Michigan

AHMED DALLAL, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

MONI KANCHAN DATTA, Assistant Professor, Bioengineering, PhD, Indian Institute of Technology, India

LANCE A. DAVIDSON, Professor and Wellington C. Carl Faculty Fellow, Bioengineering, PhD, University of California at Berkeley

RICHARD E. DEBSKI, Professor and William Keppler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh

SAMUEL J. DICKERSON, Assistant Professor and Director, Electrical and Computer Engineering, PhD, University of Pittsburgh

AMRO EL-JAROUDI, Associate Professor and Director, Electrical and Computer Engineering, PhD, Northeastern University

MAHMOUD EL NOKALI, Associate Professor, Electrical and Computer Engineering, PhD, McGill University

ROBERT M. ENICK, Bayer Professor and Vice Chair for Research, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

WILLIAM FEDERSPIEL, William Keppler Whiteford Professor, Graduate Coordinator, Bioengineering, PhD, University of Rochester

SUSAN FULLERTON, Assistant Professor, Chemical and Petroleum Engineering, PhD, The Pennsylvania State University

GIOVANNI P. GALDI, Leighton E. and Mary N. Orr Professor, Mechanical Engineering and Materials Science, PhD, University of Naples, Italy

NEERAJ J. GANDHI, Professor, Bioengineering, PhD, University of California, San Francisco

JIN GAO, Assistant Professor, Bioengineering, PhD, Chinese Academy of Sciences

WEI GAO, Associate Professor, Electrical and Computer Engineering, PhD, Pennsylvania State University

CALIXTO I. GARCIA, Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

MARK J. GARTNER, Professor of Practice, Bioengineering, PhD, Carnegie Mellon University

ALAN D. GEORGE, Ruth E. and Howard T. Mickle Professor and Chair of Electrical and Computer Engineering, PhD, Florida State University

LEANNE GILBERTSON, Assistant Professor, Civil and Environmental Engineering, PhD, Yale University

PEYMAN GIVI, Distinguished Professor and James T. MacLeod Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

BRIAN M. GLEESON, Chair and Harry S. Tack Professor, Mechanical Engineering and Materials Science PhD, University of California at Los Angeles

ANDRES GOMEZ ESCOBAR, Assistant Professor, Industrial Engineering, PhD, University of California, Berkeley

BRANDON GRAINGER, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

KILICHAN GURLEYIK, Assistant Professor, Bioengineering, DSc, Washington University in St. Louis

SARAH HAIG, Assistant Professor, Civil and Environmental Engineering, PhD, University of Glasgow

JOEL M. HAIGHT, Professor, Industrial Engineering, PhD, Auburn University

KENT A. HARRIES, Professor and Bicentennial Board of Visitors Faculty Fellow, Civil and Environmental Engineering, PhD, McGill University

ALAN HIRSCHMAN, Professor, Bioengineering, PhD, Carnegie Mellon University

GERALD D. HOLDER, Distinguished Service Professor, Chemical and Petroleum Engineering, PhD, University of Michigan

KATHERINE MARY HORNBOSTEL, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

JINGTONG HU, Assistant Professor, Electrical and Computer Engineering, PhD, University of Texas at Dallas

HENG HUANG, John A. Jerenko Professor, Electrical and Computer Engineering, PhD, Dartmouth College

TIN-KAN HUNG, Professor, Bioengineering, PhD, University of Iowa

ANTHONY T. IANNACCHIONE, Associate Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

TAMER S. IBRAHIM, Associate Professor, Bioengineering, PhD, The Ohio State University

STEVEN P. JACOBS, Professor, Electrical and Computer Engineering, DSc, Washington University

TEVIS D. B. JACOBS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pennsylvania

DANIEL R. JIANG, Assistant Professor, Industrial Engineering, PhD, Princeton University

J. KARL JOHNSON, William Kepler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Cornell University

ALEX K. JONES, Professor and COE Undergraduate Program Director, Electrical and Computer Engineering, PhD, Northwestern University

BISTRA JORDANOVA, Assistant Professor, Bioengineering, PhD, Carnegie Mellon University

JOHN A. KEITH, Assistant Professor and R.K. Mellon Faculty Fellow, Chemical and Petroleum Engineering, PhD, California Institute of Technology

ROBERT JOHN KERESTES, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

VIKAS KHANNA, Associate Professor, Civil and Environmental Engineering, PhD, The Ohio State University

LEV KHAZANOVICH, Anthony E. Gill Chair Professor and Civil and Environmental Engineering, PhD, University of Illinois

HONG KOO KIM, Bell of PA/Bell Atlantic Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

TAKASHI DANIEL YOSHIDA KOZAI, Assistant Professor, Bioengineering, PhD, University of Michigan

PRASHANT N. KUMTA, Edward R. Weidlein Chair Professor, Bioengineering, PhD, University of Arizona

ALEXIS KWASINSKI, Associate Professor and R.K. Mellon Faculty Fellow, Electrical and Computer Engineering, PhD, University of Illinois at Urbana-Champaign

JUNG-KUN LEE, Professor and William Kepler Whiteford Faculty Fellow, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea

KEEWON LEE, Assistant Professor, Bioengineering, PhD, Mayo Clinic College of Medicine

SANGYEOP LEE, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

PAUL LEU, Associate Professor and B.P. America Faculty Fellow, Industrial Engineering, PhD, Stanford University

GUANGYONG LI, Associate Professor, Electrical and Computer Engineering, PhD, Michigan State University

LEI LI, Associate Professor, Chemical and Petroleum Engineering, PhD, University of Michigan

XU LIANG, William Keppeler Whiteford Professor, Civil and Environmental Engineering, PhD, University of Washington

JEEN-SHANG LIN, Associate Professor, Civil and Environmental Engineering, ScD, Massachusetts Institute of Technology

STEVEN LITTLE, Chair and William Kepler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

PATRICK J. LOUGHLIN, Professor, Bioengineering, PhD, University of Washington

NIATIKUN LOUIS LUANGKESORN, Assistant Professor, Industrial Engineering, PhD, Northwestern University

ARASH MAHBOOBIN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

SPANDAN MAITI, Assistant Professor, Bioengineering, PhD, University of Illinois, Urbana-Champaign

LISA M. MAILLART, Professor, Industrial Engineering, PhD, University of Michigan

SCOTT X. MAO, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, Tohoku University

ZHI-HONG MAO, Associate Professor and William Kepler Whiteford Faculty Fellow, Electrical and Computer Engineering, PhD, Massachusetts Institute of Technology

JAMES R. MARTIN, II, U.S. Steel Dean of Engineering, Swanson School of Engineering, Civil and Environmental Engineering, PhD, Virginia Tech

JOSEPH J. MCCARTHY, William Kepler Whiteford Professor and Vice Provost for Undergraduate Studies, PhD, Northwestern University

JAMES R. MCKONE, Assistant Professor, Chemical and Petroleum Engineering, PhD, California Institute of Technology

RAVI S. MEENAKSHISUNDARAM, William Kepler Whiteford Professor, Industrial Engineering, PhD, Purdue University

IRENE MENA, Assistant Professor and Director of the First Year Engineering Program, Mechanical Engineering and Materials Science, PhD, Purdue University

NATASA MISKOV-ZIVANOV, Assistant Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

KARTIK MOHANRAM, Associate Professor, Electrical and Computer Engineering, PhD, University of Texas at Austin

BADIE I. MORSI, Professor, Chemical and Petroleum Engineering, PhD, ScD, Institut National Polytechnique de Lorraine-Ecole Nationale Supérieure des Industries Chimiques

JOHN MURPHY, Professor, Chemical and Petroleum Engineering, Duquesne University

SITTICHAJ NATESAKHAWAT, Assistant Professor, Chemical and Petroleum Engineering, PhD, The Ohio State University

IAN NETTLESHIP, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Leeds

TAGBO HERMAN ROLAND NIEPA, Assistant Professor, Chemical and Petroleum Engineering, PhD, Syracuse University

ROBERT S. PARKER, Robert V.D. Luft Professor and Vice Chair for Graduate Education, Chemical and Petroleum Engineering, PhD, University of Delaware

THOMAS PICCONE, Assistant Professor, Mechanical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

OLEG A. PROKOPYEV, Professor, Industrial Engineering, PhD, University of Florida

JAYANT RAJGOPAL, Professor and Graduate Program Director, Industrial Engineering, PhD, University of Iowa

MARK S. REDFERN, Vice Provost for Research and William Kepler Whiteford Professor, Swanson School of Engineering; Professor, Bioengineering, PhD, University of Michigan

GREGORY F. REED, Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

PIERVINCENZO RIZZO, Professor, Civil and Environmental Engineering, PhD, University of California at San Diego

ANNE M. ROBERTSON, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, University of California at Berkeley

JOAQUIN RODRIGUEZ, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

ABHIJIT ROY, Assistant Professor, Bioengineering, PhD, Indian Institute of Technology

PARTHA ROY, Associate Professor, Bioengineering, PhD, University of Texas, Southwestern Medical Center

WARREN RUDER, Assistant Professor, Bioengineering, PhD, Carnegie Mellon University

STEVEN G. SACHS, Assistant Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

JOSEPH T. SAMOSKY, Assistant Professor, Bioengineering, PhD, Massachusetts Institute of Technology

DAVID SANCHEZ, Assistant Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

WISSAM SAIDI, Associate Professor, Mechanical Engineering and Materials Science, PhD, Ohio State University

SHERVIN SAMMAK, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

DAVID SCHMIDT, Associate Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

JOHN SEBASTIAN, Professor of Practice, Civil and Environmental Engineering, MBA, University of Pittsburgh

ERVIN SEJDIC, Associate Professor and Fulton C. Noss Faculty Fellow, Electrical and Computer Engineering, PhD, University of Western Ontario

INANC SENOCAK, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Florida

JASON SHOEMAKER, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of California, Santa Barbara

SANJEEV G. SHROFF, Chair, Distinguished Professor and Gerald E. McGinnis Chair, Bioengineering, PhD, University of Pennsylvania

WILLIAM S. SLAUGHTER IV, Associate Professor and Undergraduate Director, Mechanical Engineering and Materials Science, PhD, Harvard University

PATRICK SMOLINSKI, Associate Professor, Mechanical Engineering and Materials Science, PhD, Northwestern University

MAX STEPHENS, Assistant Professor, Civil and Environmental Engineering, PhD, University of Washington

GEORGE DEWITT STETTEN, Professor, Bioengineering, PhD, University of North Carolina

SUSHENG TAN, Associate Professor, Electrical and Computer Engineering, PhD, Chinese Academy of Sciences

ALBERT C. F. TO, Associate Professor and CNG Faculty Fellow, Mechanical Engineering and Materials Science, PhD, University of California at Berkeley

GELSY TORRES-OVIEDO, Assistant Professor, Bioengineering, PhD, Georgia Institute of Technology and Emory University

LUIS E. VALLEJO, Professor, Civil and Environmental Engineering, PhD, University of Wisconsin

JONATHAN VANDE GEEST, Professor, Bioengineering, PhD, University of Pittsburgh

JULIE M. VANDENBOSSCHE, Associate Professor, Civil and Environmental Engineering, PhD, University of Minnesota

SACHIN S. VELANKAR, Associate Professor, Chemical and Petroleum Engineering, PhD, University of Delaware

OLEG VELIKOKHATNYI, Assistant Professor, Bioengineering, PhD, Institute of Strength Physics and Materials Science of Russian Academy of Sciences

GÖTZ VESER, Nickolas A. DeCecco Professor, Chemical and Petroleum Engineering, PhD, Fritz-Haber-Institute of the Max-Planck-Society

NATASA VIDIC, Assistant Professor, Industrial Engineering, PhD, University of Pittsburgh

RADISAV D. VIDIC, Chair William Keppler Whiteford Professor, Civil and Environmental Engineering, PhD, University of Cincinnati

JEFFREY S. VIPPERMAN, Professor and Vice Chair, Mechanical Engineering and Materials Science, PhD, Duke University

DAVID VORP, Associate Dean for Research, and John A. Swanson Professor, Bioengineering, PhD, University of Pittsburgh

GUOFENG WANG, Associate Professor, Mechanical Engineering and Materials Science, PhD, California Institute of Technology

QING-MING WANG, Professor and ME Graduate Director, Mechanical Engineering and Materials Science, PhD, Pennsylvania State University

DOUGLAS WEBER, Associate Professor, Bioengineering, PhD, Arizona State University

JUSTIN WEINBAUM, Assistant Professor, Bioengineering, PhD, Washington University in St. Louis

JOHN WHITEFOOT, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Michigan-Ann Arbor

JÖRG M. WIEZOREK, Professor, Mechanical Engineering and Materials Science, PhD, University of Cambridge

CHRISTOPHER E. WILMER, Assistant Professor, Chemical and Petroleum Engineering, PhD, Northwestern University

SYLVANUS N. WOSU, Associate Dean for Diversity Affairs; Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Oklahoma

FENG XIONG, Assistant Professor, Electrical and Computer Engineering, PhD, University of Illinois at Urbana-Champaign

WEI XIONG, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

JUDITH C. YANG, William Keppler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Cornell University

JUN YANG, William Keppler Whiteford Professor, Electrical and Computer Engineering, PhD, University of Arizona

VICTOR YASHIN, Assistant Professor, Chemical and Petroleum Engineering, PhD, Moscow State University

BO ZENG, Assistant Professor, Industrial Engineering, PhD, Purdue University

MIN HEE YUN, Associate Professor, Electrical and Computer Engineering, PhD, Arizona State University

XIAYUN ZHAO, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Georgia Institute of Technology

LIANG ZHAN, Assistant Professor, Electrical and Computer Engineering, PhD, University of California, Los Angeles

School of Health and Rehabilitation Sciences

Welcome to The School of Health and Rehabilitation Sciences (SHRS)

The School of Health and Rehabilitation Sciences (SHRS) offers educational programs leading to the following graduate degrees and certificates:

Accelerated Programs:

Dietitian Nutritionist Program

Master's Programs:

Master of Science in Clinical Rehabilitation and Mental Health Counseling

Master of Science in Health Informatics with concentrations in:

- Data Science
- Health Care Supervision and Management
- Registered Health Information Administrator

Master of Science in Nutrition and Dietetics

Master of Occupational Therapy (MOT) (only students who received a graduate school guarantee for the MOT are eligible for admission)

Master of Arts or Science in Communication Science and Disorders with concentrations in:

- Speech-Language Pathology
- Audiology

Master of Science degree program in Health and Rehabilitation Sciences with concentrations in:

- Health Information Systems (no longer admitting students)
- Health Care Supervision and Management (no longer admitting students)
- Musculoskeletal Physical Therapy
- Neuromuscular Physical Therapy
- Rehabilitation Science and Technology
- Sports Medicine
- Sports Science
- Wellness and Human Performance (no longer admitting students)

Master of Science in Occupational Therapy

Master of Science in Physician Assistant Studies

Master of Science in Prosthetics & Orthotics

Doctoral Programs:

Professional doctoral degrees:

- Doctor of Audiology (AuD)
- Doctor of Occupational Therapy (OTD)
- Doctor of Physical Therapy (DPT)
- Doctor of Physical Therapy/ Doctor of Philosophy in Bioengineering
- Doctor of Clinical Science (CScD) in Speech-Language Pathology (no longer admitting students)
- Doctor of Clinical Science (CScD) in Occupational Therapy with concentrations in:
 - Geriatric Practice
 - Pediatric Practice
 - Musculoskeletal Rehabilitation
 - Neurological Rehabilitation Clinical Educator
 - Professional Leader and Advocate

Doctor of Philosophy

- Communication Science and Disorders
- Rehabilitation Science

Certificate Programs:

Offered through the Health Information Management Department:

- Health Data Analytics Certificate
- Health Information Cybersecurity Certificate
- Leadership in Health Informatics Certificate
- Revenue Cycle Management Certificate

SHRS is affiliated with the University of Pittsburgh Schools of the Health Sciences and shares a close affiliation with the world-class University of Pittsburgh Medical Center (UPMC). The medical center comprises a variety of hospitals and clinical facilities that affords students a wealth of opportunities for professional experience.

The SHRS faculty ground their teaching upon research studies, clinical service and participation in their respective professional associations. Faculty research and service typically occurs within a multi-disciplinary collaboration in diverse health care and research environments. Consequently, both entry-level and advanced students are exposed to state-of-the-art curricula, which are continually reviewed from the perspective of new research findings, technological developments, changing public policy and accepted clinical and management practice.

Our students interact with role models and mentors who demonstrate the core values of their respective professions including commitment to:

- Respect for the inherent value, dignity and integrity of the patient, client and/or research subject;
- A service-oriented and personalized approach to health care and rehabilitation;
- Ethical behavior in all clinical, service and research interactions with patients, colleagues, employees and others.

Philosophy of Graduate Education

The faculty of the School of Health and Rehabilitation Sciences (SHRS) believes that it has a major responsibility in graduate education to broaden the perspectives and awareness of students in the health professions toward high standards of scholarship and recognition of its relevance to technological and human needs.

Graduate programs provide depth in a substantial area of the student's profession and foster critical thinking through a variety of scholarly and creative activities thereby generating an atmosphere of scientific inquiry. These substantive areas include the knowledge of the scientific basis for the development of advanced clinical expertise within the professions represented in the School. An equally important function is to encourage health professionals to be sensitive to the needs of the human beings they are serving and to adapt their methods to the changing social, economic and technological environments in which they practice. Accordingly, these professionals should develop the capability to perform newly emerging and expanding roles of advanced clinical services, research, teaching and administration in the health care systems, advancing the frontiers of their particular field of expertise.

On the assumption that the accumulation and mastery of basic factual knowledge have been accomplished, graduate education focuses on synthesis and integration to allow for new systemic insights into the application and extension of that knowledge. The linkage of various educational experiences with research projects enhances problem-solving skills. Through interdisciplinary and multi-disciplinary didactic, clinical and research experiences, individual professional identity is fostered, while the ability to function both on an independent and collaborative level with colleagues from other disciplines is enhanced.

Admission Information

Contact Information

Office of Admissions
School of Health and Rehabilitation Sciences
4020 Forbes Tower

412-383-6558
Fax: 412-383-6535
E-mail: admissions@shrs.pitt.edu
Website: www.shrs.pitt.edu

Application Procedures

Each graduate and doctoral program at SHRS has its own specific list of application requirements and instructions. We utilize various application portals for admission.

The following SHRS programs utilize Centralized Application Systems (CAS) which are unique application portals for specific professions:

Communication Science and Disorders (MA and AuD) (CSDCAS <https://csdcas.liaisoncas.com>)
Doctor of Physical Therapy (PTCAS <http://www.ptcas.org/>)
Doctor of Occupational Therapy (OTCAS <https://otcas.liaisoncas.com>)
Physician Assistant Studies (CASPA <https://caspa.liaisoncas.com>)
Prosthetics & Orthotics (OPCAS <https://portal.opcas.org/>)

The following SHRS programs utilize the SHRS Apply Yourself application:

Clinical Rehabilitation and Mental Health Counseling
Dietitian Nutritionist Program
Health Informatics (on-campus)
Master of Science in Health and Rehabilitation Sciences:

- Neuromuscular or Musculoskeletal Physical Therapy
- Rehabilitation Science and Technology
- Sports Medicine
- Sports Science

Master of Science in Occupational Therapy
Doctor of Clinical Science in Speech-Language Pathology
Doctor of Clinical Science in Occupational Therapy
PhD in Communication Science
PhD in Rehabilitation Science

To apply to the *online* Health Informatics Master of Science and certificate programs, please visit: <https://online.shrs.pitt.edu/>

*Applicants for the Master of Occupational Therapy (MOT) program should contact the OT Department

Admissions Process for International Students:

SHRS is a globally diverse community with students from over 20 countries, including Canada, China, Colombia, Ghana, Greece, India, Indonesia, Korea, Mexico, Saudi Arabia, Singapore, Switzerland, Taiwan, and Thailand.

As noted above, because each program has its own specific requirements, it is encouraged that international applicants review these requirements (including CAS programs).

In addition to general admission requirements, SHRS has specific requirements for international applicants that are noted below.

Application Deadlines

Fall admission: April 15*
Spring admission: September 1
Summer admission: February 1

*Please note that if a program deadline is prior to the deadline above you must submit your application by the program deadline.

Academic Credential Evaluations

Applicants who have completed the equivalent of a baccalaureate degree or higher at an institution outside of the United States are required to provide an official third-party course-by-course evaluation of those academic credentials verifying Grade Point Average (GPA) on a 4.0 scale. The evaluation is an application requirement.

Upon admission official transcripts of all original language academic records for all post-secondary educational endeavors are required. If original documents are issued in a language other than English, certified English translations must also be submitted. A final transcript or diploma showing completion of the undergraduate degree must be submitted prior to starting all SHRS graduate programs.

SHRS requires credential evaluations be provided by a member of the National Association of Credential Evaluation Services. Below is a non-exhaustive list of accreditation services. SHRS neither endorses nor recommends any company over another. The list is in alphabetical order. Visit www.naces.org/members.html for a more extensive list of service providers.

Educational Credential Evaluators, Inc.: www.ece.org

International Consultants of Delaware, Inc.: www.icdeval.com

Joseph Silney & Associates, Inc.: www.jsilny.com

World Education Services, Inc.: www.wes.org

International applicants are not required to submit an evaluation for degrees earned in the United States.

Verification of English Language Proficiency

The University of Pittsburgh accepts TOEFL or IELTS test scores to verify English Language Proficiency.

TOEFL

Minimum TOEFL scores accepted (with the exception of the programs below) are:

- 80 on the internet based test
- 550 on the paper based test

Minimum TOEFL scores accepted by the PhD in Rehabilitation Science, Communication Science and Disorders (MA/MS) and Doctor of Audiology (AuD) are:

- 100 on the internet based test
- 600 on the paper based test

Minimum TOEFL scores accepted by the Doctor of Occupational Therapy (OTD) are:

- 90 on the internet based test
- 575 on the paper based test

TOEFL scores must be sent electronically through ETS to institution code 2927.

IELTS

The minimum IELTS score accepted (with the exception of the programs below) is:

- Overall Band 6.5

The minimum IELTS score accepted by the PhD in Rehabilitation Science, Communication Science and Disorders (MA/MS), Doctor of Audiology (AuD) and Doctor of Occupational Therapy (OTD) is:

- Overall Band 7.0

IELTS scores must be mailed to the address below:

SHRS Admissions Office
4020 Forbes Tower
University of Pittsburgh
Pittsburgh, PA 15260

IELTS score reports must be submitted in the original sealed envelope to be considered official.

Verification of English Language Proficiency is required unless the following apply:

- The applicant is a citizen of a country whose official language is English.
- The applicant has completed a degree at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English.

Information for Admitted Students

If you are a citizen of a country whose official language is not English, and you scored below 100 on the TOEFL iBT or overall band 7.0 or lower on the IELTS, you will be required to take an English Language Proficiency Test to better assess your English Language skills. The results of this exam may be used to recommend (not require) additional English language instruction that may supplement your education. If you have additional questions about the test, please click [here](#).

Process of Issuing Visa Documents

For future international students - Once you have confirmed your admission to the School of Health and Rehabilitation Sciences (SHRS) at the University of Pittsburgh, SHRS will notify the Office of International Services (OIS) of your future attendance. OIS will then email you to complete the information required to either create or verify your immigration documents. This email will also include information about the timeline for receiving a new immigration document and international student orientation.

All international students should refer to the University's Office of International Services (OIS) website at <http://www.ois.pitt.edu> for information on admissions, orientation, immigration and visas, and life in Pittsburgh.

Admission Status

Full Status

The student has been admitted into a SHRS degree program. To maintain full graduate status, the student must achieve a minimum cumulative GPA of 3.000 (based on 4.000) in his/her graduate study. Students whose cumulative GPA drops below a 3.000 while in the program will be placed on academic probation (please see the Academic Probation policy in this handbook).

Non-Degree Status

Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission as non-degree students provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration as a non-degree student.

Applicants who do not wish to enroll in a degree program may apply for admission as non-degree students to take one or more courses of particular interest, if written permission is obtained from the course instructor. Non-degree students are permitted to take a total of six (6) credits. A non-degree student wishing to register for more than 6 credits must receive approval from the Department Chair/Program Director. Information concerning such requests should be directed first to the Director of Admissions, 4020 Forbes Tower, University of Pittsburgh, Pittsburgh, PA 15260 or via email at admissions@shrs.pitt.edu.

Active Status

Graduate students are required to register for at least 1 credit in the fall and spring terms. PhD students who have completed their course work and have successfully proposed their dissertation, must be enrolled in dissertation credits or FTDI (Full time Dissertation Study) in the fall and spring terms to maintain active status.

Inactive Status

A student who has not registered for at least 1 credit or for full-time dissertation study during a 12-month period will be transferred automatically to inactive status. Inactive students cannot apply to graduate or take Preliminary or Comprehensive Examinations. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her advisor and committee.

Reinstatement

Readmission is not automatic nor does it necessarily reinstate the student to the academic status enjoyed prior to becoming inactive. Students must formally re-apply for admission and pay the application fee. If the requirements for successful completion of the specific graduate program in which the student was enrolled have changed during the period of non-enrollment, the re-admitted student may be required to meet the revised requirements of the program that are in effect at the time of readmission. This will be decided by the Department Chair of the student's particular program; for the doctoral program the decision will be made by the Associate Dean of Graduate Studies.

Upon readmission, the student's Plan of Study will be adjusted to meet the requirements at the time of readmission.

Financial Information

Tuition and Fee Rates

Tuition and fee rates are available on the Financial Information page in the University Catalog and the tuition chart is on-line at Graduate Tuition & Mandatory Fees.

Full Tuition

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current graduate "flat" tuition rate for their academic center. Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

Summer Term

All students are billed on a per-credit basis. (except for the Doctor of Physical Therapy program)

Residency/Reduced Tuition

Students who reside in the Commonwealth of Pennsylvania may be eligible for reduced tuition through state appropriations.

Eligibility is determined by criteria outlined in the University of Pittsburgh Guidelines for Determining Eligibility for Reduced Tuition Rates, available on-line at <http://payments.pitt.edu/pa-tuition-rate-eligibility>.

Additional Fees

Lab Fees: Lab courses may incur an additional fee to cover laboratory expenses. These fees will be charged to the student directly and will appear on the invoice generated by Student Accounts in addition to tuition and other fees each semester.

Financial Obligation of Students

The University of Pittsburgh has the right to withhold services if a student defaults on any financial obligation until repayment arrangements have been made that are satisfactory to the office or department to which the debt is owed.

Scholarships, Grants and Financial Aid

If you are interested in applying for loans, scholarships, grants, or work study, you should call, or visit the University of Pittsburgh, Office of Admissions and Financial Aid, Alumni Hall, Pittsburgh, PA 15260, 412-624-PITT. The website for information is <https://oafa.pitt.edu/>

The website specifically for graduate students is: Graduate School Financial Aid Instructions.

SHRS Scholarships and Awards

General information on scholarship and awards can be found at: SHRS Financial Information Page. Information on merit, individual department and school wide scholarship and awards can be found at: Schoolwide Scholarships

Contact individual departments for information on scholarships and awards specific to your area of study.

SHRS Academic Regulations

Minimum Academic Standard

In addition to the University-wide regulations and standards detailed in the section on General Academic Regulations, each student in SHRS is expected to be familiar with these school-specific regulations and academic Standards:

- It is the student's responsibility to review her/his academic standing, to identify graduate program requirements and prerequisites for intended graduate program(s) and to monitor their completion.
- All required and prerequisite coursework must be taken for a grade, when letter grade option is available, unless approved by the Department Chair/Program Director.
- Students must receive a grade of C or better in all courses required by their program curriculum.
- Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser/faculty.)
- Students will not be permitted to register for a course until they attain a C or better in its prerequisites.
- Failure to receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

Advising

Master and Clinical Doctorates

Master's students are assigned an advisor who must be a member of the SHRS faculty holding a regular, research, clinical, or adjunct appointment, and having at least a master's degree. The director of the program to which the student has been accepted selects advisors for SHRS graduate students. Students are notified of their advisor after their enrollment. It is the student's responsibility to contact the advisor to schedule an initial meeting.

Doctor of Philosophy

PhD students are assigned an academic advisor in the student's main area of specialization. The academic advisor and student will plan course work and other experiences to enable the student to meet program requirements and her/his academic goals.

Change of Advisor

If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a *Change of Advisor form*, **located on the SHRS website under forms**. The student must complete the form and secure the required signatures, and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate change of advisor procedures.

More information on Advisor roles and responsibilities can be found in the SHRS Graduate Handbook.

Plan of Study

Every student in SHRS must have a Plan of Study, signed by academic/faculty advisor, on file with Student Services by the end of the first semester. Any revisions to the Plan of Study must be approved by the academic/faculty advisor or Department Chair and submitted to Student Services.

To be certified for graduation, students must have successfully completed all courses outlined in their final Plan of Study as well as any other requirements for the degree. A final Plan of Study must be on file in Student Services 4019 Forbes Tower.

Allowable Credits

Transfer Credits

The completion of requirements for advanced degrees must be satisfied through registration at the Oakland Campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their Department Chair and the Dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for

an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components are responsible for providing any financial assistance to the graduate student.

Transcripts certifying graduate courses completed at another institution prior to admission to the University of Pittsburgh should be submitted at the time of application, and will be evaluated for acceptability as transfer credits early in the student's graduate career by the advisor and Department Chair.

For **Master of Arts and Master of Science degrees**, no more than six (6) credits may be transferred. The Office of Student Services will enter the transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

For **Professional Master and Clinical Doctorate Degrees**, no more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another accredited graduate institution.

For all **Master and Clinical Doctorate** a maximum of six (6) credits in undergraduate courses (numbered 1000 and above) may be included as transfer credits in the Plan of Study.

For **Doctor of Philosophy** up to 30 credits taken at the graduate level (2000 & 3000 level courses) toward a master's degree may be transferred. In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No Undergraduate credits (1000 level course) may be applied towards the doctoral degree. All transfer credits must be submitted to and approved by the Associate Dean of Graduate Studies. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.

Transfer credits will not be accepted for courses in which a grade lower than B (GPA = 3.000), or its equivalent, has been received. No credit is granted toward an advanced degree for work completed in extension courses, correspondence courses, or in the off-campus center or another institution unless those credits are approved for the equivalent graduate degrees at the institution, and provided that the institution has an accredited program.

Credits Required

The number of credits required for the Master's degree varies among the departments within SHRS, but all departments require at least 30 credits. Many departments offer a variety of emphases. Individual departments should be contacted for the number of credits and Plan of Study specific to that department and focus.

Undergraduate Courses in the Graduate Program

A maximum of six (6) credits in undergraduate courses (numbered 1000 and above) may be included in the *Plan of Study*.

Grading Policy

All SHRS graduate programs adhere to the University's grading system and grading policies for graduate students. Please refer to the Office of the University Registrar on Grades or the University Catalog on Grading and Records

SHRS Policy and Procedure for G and I Grades

G & I (Incomplete) Grade Policy

SHRS (G) Grade Policy

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken.

Once the deadline has passed, the G grade will be changed automatically to a (NG) - No Grade. The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Action required by the student and faculty member for a "G" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of G Grade Credits Form (the form and the SHRS G grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.

SHRS (I) Incomplete Grade Policy

The I grade indicates that the work of the course for which it is awarded has not been completed due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars. It is to be awarded only to students who have been doing the regular work of the course but who need more time than the term allows to complete the course work. That is, if extenuating circumstances ought to arise from the nature of the course work rather than from the student's personal difficulties (in which case a G grade is appropriate; see above).

All incomplete grades are expected to be completed by no later than the end of the next consecutive semester. It is the responsibility of the faculty member to clearly state to the student the expected due date.

- If the incomplete grade is given in the spring, it is expected to be completed by the end of the summer term in August.

Action required by the student and faculty member for a "I" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of Incomplete Credits Form (the form and the SHRS I grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.

Student Services, will be following up on any Incompletes grades that are not changed within the expected time frame at the end of every term.

Satisfactory/No Credit (S/NC) grading option

Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a C or better.

More information on Grading Policies can be found in the SHRS Graduate Handbook.

Comprehensive Examination

Comprehensive Examinations are required for many graduate programs in SHRS. Successful completion of the Comprehensive Examination is needed for the student to demonstrate mastery of his/her field of graduate study. Each individual department/program will specify the content and procedure for the scheduling, administration, and grading of the Comprehensive Examination. Please refer to individual program descriptions or handbooks for details of Comprehensive Examinations for each program.

Enrollment Status

Graduate students cannot enroll for more than (15) units without the dean's approval. Only an advisor or the University Registrar's Office can enroll you after you receive approval for the additional unit(s)

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students.

Students cannot enroll in courses that meet at the same time.

More information on enrolling in courses can be found in the SHRS Graduate Handbook.

Monitored Withdrawal

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

The form must be signed by the instructor of the course and be returned to the Director of Student Services, Registrar, 4024 Forbes Tower within the first nine weeks of the term in the fall and spring.

Late Withdrawal procedure

Procedure for an Appeal for Late Withdrawal

- After the Monitored Withdrawal deadline has passed, students may appeal to withdraw from a course by submitting an Appeal for Late Withdrawal. Form can be found on the SHRS website, under current students/forms.
- All appeals for late withdrawal must be for non-academic reasons, i.e. medical or family emergencies. If you are trying to withdraw without extenuating circumstances, your appeal will be denied.
 - Appeals must be submitted to the Dean's Office of the school offering the course, regardless of the student's home school.
 - Appeals for Late Withdrawal from SHRS courses should be submitted to 4024 Forbes Tower, to the Registrar, Kellie Beach
- The appeal requires information on the class, including class number, catalog/course number, subject, and course title. This information can be found in your Student Center/PeopleSoft.
- The signature of the instructor-or an email from the instructor indicating the date of last attendance, grade earned, and acknowledgment of your withdrawal-is required. You must print and attach copies of the emails.
- Attach a typed statement explaining the extenuating circumstances which you feel merit consideration of withdrawal beyond the deadline. Please provide relevant documentation, such as certification from a doctor, hospital receipts, an obituary, etc.
 - Please address the documentation and the letter to SHRS, Associate Dean for Graduate Studies, Dr. Kelley Fitzgerald
 - Please include your PeopleSoft ID and your University of Pittsburgh e-mail address on each submitted document.
 - Please sign and date each document.
- You will be notified of the Associate Dean's decision via your student email account.
- Appeals for late withdrawal must be submitted before the end of the 13th week of the semester. After the 13th week, students can only appeal to withdraw from the entire semester.
- If your request is approved and you accept the grade of "W" there is no tuition adjustment for withdrawing from the course.

Repetition of Courses

Consult your dean's office for the proper procedure of repeating a class and for information on how this will affect your grades and the calculation of your Grade Point Average (GPA). When you repeat a class, you must officially enroll and pay for the class again. University policy prohibits any student from attending a class without being officially enrolled for that class. A repeated course, has a notation appearing underneath the previous course taken designating that it is excluded from the GPA. The original course and grade will always remain on your record/transcript.

Graduate Students are only permitted to repeat a course once.

Note: Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.

- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. Withdrawal (W), Repeat (R), and Audit/Non-Credit (N) grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA.
- Incomplete grades (G and I) are not identified as repeated courses until the coursework is completed.

- Students seeking to repeat other non-SHRS (prerequisites, electives, etc.) courses will be permitted to do so at the discretion of the program director.

Statute of Limitations on Allowable Coursework

Masters:

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all professional masters within five years (includes both full time and part time students). Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

PHD/Doctoral:

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years or within eight years if the student has received transfer credits. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full-time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Extension:

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the Associate Dean of Graduate Studies for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may process a withdrawal from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Please visit the Student Payment center resignation page on the University of Pittsburgh website for more information.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. All requests for a leave of absence need to be put in writing to the Associate Dean of Graduate Studies, using the **SHRS Request of Leave of Absence from a Graduate Program**. The length and rationale for the leave of absence must be approved by the Associate Dean. If approved, the time of the leave shall not count against the total time allowed for the degree (statute of limitations) being sought by the student.

To request of leave of absence, you must complete the "Request of Leave of Absence from a Graduate Program" form which can be found on the SHRS website under current students/forms. This form must be submitted to Student Services on the 4th floor of Forbes Tower for approval.

Note: If the reason for your leave is medical in nature, a formal note from a Doctor must be included with this form.

Academic Probation and Dismissal Policy

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and/or suspension and will receive written notification of this status. At this point it is the student's responsibility to meet with his or her advisor.

To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to recommendation for immediate dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Graduate Studies.

Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or recommended for dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Graduate Studies. SHRS reserves the right to terminate a student at any time for academic or other reasons.

Dismissal from the program is at the discretion of the SHRS Dean. Notwithstanding the foregoing, in the event it is not mathematically possible for a student to remediate their cumulative program GPA within their next two terms of study the student may be immediately dismissed.

A student may appeal their dismissal with the University of Pittsburgh Provost office.

Graduation Requirements

Graduation Requirements for a Graduate degree from SHRS are as follows:

- student must be considered an "active student" at time of graduation; s/he must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions
- students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating
- satisfactory completion of required credits
- minimum cumulative GPA 3.000
- the GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
- completion of all requirements for the program in which student has enrolled
- no outstanding D, F, G or I grades in a required course
- updated and approved Plan of Study on file in Student Services, 4019 Forbes Tower
- an application for graduation must be filed in the SHRS Office of Student Services, based on the deadlines determined for that term. Email notification of these deadlines will be sent to students in the prior term and will posted on the SHRS Graduation website. The Application for Graduation can be obtained in the Dean's office or on the SHRS Forms website.

A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Thesis and Non-Thesis Options and Procedures

Thesis Option

A thesis is a written report of an investigative study conducted by the student during his/her graduate program. The completion of a thesis requires that the student has the necessary knowledge and skills to conduct a valid study and that the thesis project is the investigation of a research question appropriate to his or her focus of study. The thesis is usually a concluding experience in Master of Science programs and completed under the guidance of a research mentor.

Completion of a thesis may be required for specific graduate programs within SHRS. Students should refer to the specific program requirements to determine if a thesis is required for completion of his/her program. Thesis credits can be obtained in the following courses: HRS 2924, HRS 2925, and CSD 2000. Students should refer to his/her program requirements for specific guidelines for completing the thesis, the minimum number of thesis credits required, and for required courses.

Non-Thesis Option

Many SHRS graduate programs provide a non-thesis option as an alternative to completing a thesis. The non-thesis option is program-specific and reflects the culminating assignment to demonstrate the student's mastery of his/her area of study. Some programs require the student to complete the non-thesis option while others may give the student the opportunity to choose between completing a thesis or the non-thesis option. Students should refer to their home program/department for specific information on the non-thesis option.

Scholarly Paper

As part of the non-thesis option for a Master of Science degree, some programs/departments may require a scholarly paper. A scholarly paper is of publishable quality in a focused area.

Examples of scholarly papers include, but are not limited to: substantial reviews of the literature on a particular topic, development of health care policies, or development of evidence-based treatment procedures. Students who complete this option must register for HRS 2926 Scholarly Paper for 1-6 credits depending on the requirements of his/her plan of study.

More information on Thesis and Non-Thesis options and Scholarly Paper can be found in the SHRS Graduate Handbook.

Internships/ Clinical Education/ Independent Studies

Internships

Overview:

An internship is a period of supervised, planned, practical experience providing an opportunity to apply previously learned skills or theories designed to complement the didactic phase of the academic program. The internship may be primarily clinical, teaching, or administrative in nature. Many programs require internship experiences, coordinated by the student's advisor or an identified Clinical Coordinator, who provides oversight regarding internship objectives and activities, administrative and contractual relationships with the site, and ensures that students meet all SHRS and site criteria.

Clinical Internships

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply his/her knowledge in a supervised environment to develop clinical skills and judgment.

Clinical Education

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply his/her knowledge in a supervised environment to develop clinical skills and judgment.

Independent Study - HRS 2999 or CSD 2990

Independent Study provides an opportunity for the student to complete an intense, self-designed project with faculty supervision in an area of special interest. A maximum of six (6) independent study credits may be accepted toward meeting degree requirements for the program.

More information on Internships, Clinical Education, Independent Studies can be found in the SHRS Graduate Handbook.

Graduate and Professional Student Association

The SHRS Graduate and Professional Student Organization (SHRS GPSO) is a member of the Graduate and Professional Student Government (GPSG) of the University of Pittsburgh. All full- time and part-time graduate students of SHRS who have active status, as defined by the School, and who are in good standing, as defined by the University, are members of the SHRS GPSG. Further information on becoming active in this organization can be obtained by sending an email to: shrssab@shrs.pitt.edu.

Doctor of Philosophy

SHRS offers a PHD program in Communication Science and Disorders (CSD) and Rehabilitation Science.

Doctor of Philosophy in Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders (CSD) research doctoral program is oriented toward scientific inquiry in the discipline of communication science and disorders with an emphasis on basic and applied research training. Much of the CSD PhD program is individually tailored and designed to meet a variety of academic and professional goals. For Information on the CSD PHD degree, please see Communication Science and Disorders, PhD

Doctor of Philosophy in Rehabilitation Science

The mission of the PhD program in Rehabilitation Science is to advance the frontiers of knowledge underlying the practice of rehabilitation disciplines and professions through research, teaching, and professional development.

This PhD is an interdisciplinary degree. Students enter the program through the following SHRS departments or programs: Health Information Management, Occupational Therapy, Physical Therapy, Rehabilitation Counseling, Rehabilitation Science and Technology, and Sports Medicine. Upon degree completion, you will have mastered a specific area of expertise in rehabilitation science and carry an expansive core of related knowledge.

Contact Information:

Courtney Fleck
Assistant to the Associate Dean of Graduate Studies
4022 Forbes Tower
Phone: 412-624-6538
Fax: 412-383-6535
Email: courtney.fleck@pitt.edu
www.shrs.pitt.edu

Program Summary

Program starts fall, spring or summer terms

- 8 years (with approved credit transfer) or 10 years (without credit transfer)
- 72 credits total required to graduate (some areas of focus may require more credits)

The Primary Goals of the PhD program in Rehabilitation Science are to:

1. Provide core content in theories and models of rehabilitation, disability and/or assistive technology that underpin rehabilitation science;
2. Provide in-depth, state of the science, content in basic, clinical, social, medical and/or engineering sciences that support the dissertation research;
3. Provide mentorship opportunities for immersion in rehabilitation science research laboratories, projects, and/or ongoing studies;
4. Prepare students to conduct and disseminate original research that will advance rehabilitation science;
5. Promote interdisciplinary research in preparation for becoming a research team member;
6. Promote knowledge, behaviors and skills consistent with the responsible conduct of research;
7. Provide opportunities to teach content in an area of expertise.

The doctoral degree in Rehabilitation Science is an interdisciplinary research degree offered by SHRS and not by individual departments within the school. Graduates of this program will have a specific area of expertise in rehabilitation science as well as a core of interdisciplinary knowledge related to this specific area. They will become the researchers, scholars, teachers, thinkers, and planners in the demanding and changing field of rehabilitation science.

Areas of Study

- Assistive technology
- Biomechanics
- Evidence-based practice and epidemiology of disability
- Functioning, disability and health
- Psychosocial, cultural, and behavioral aspects of rehabilitation and disability
- Health information systems and information technology related to health and rehabilitation sciences
- Neural basis of sensory and motor function and dysfunction
- Neuromuscular aspects of sports injuries
- Health Services Research in Rehabilitation

Admission Requirements/ Application Process

Applicants should have a strong interest in rehabilitation research as well as a master's degree in an area related to rehabilitation science. The exceptional student with a bachelor's degree, six or more credits of graduate course work, and compelling clinical/research experience in rehabilitation science will be considered.

Resources, including research mentors, must be available to enable the student to engage in a plan of study in the student's major area of interest in rehabilitation research. Therefore, it is important that there is a match between the research interests of an applicant and an SHRS graduate faculty member.

Admission Requirements

Successful applicants will have a minimum GPA of 3.0 (based on a 4.0 scale) in all college work; minimum scores at the 50th percentile on the revised verbal and quantitative GRE® revised General Test, and a minimum score of 3.5 on the Analytical Writing section of the GRE® revised. Students for whom English is a foreign language must have a minimum TOEFL score of 100 (internet), 600 (paper); or Band 7.0 on the IELTS (reading and writing modules).

Application Requirements

Applicants are required to submit the following:

- Completed SHRS on-line application form
- An essay stating career goals, specific research interests and experience, and clinical interests and experience;
- Three to five academics or work-related letters of recommendation (at least one academic reference must be included as well as a letter of support from the identified Research Mentor. The Research Mentor's letter should indicate how the student is known to the Mentor, a description of the student's potential for success in the program and as a rehabilitation scientist, and how the Mentor will support the student's dissertation research project (funding/resources))
- A résumé, including work history, formal education, continuing education, licensing and certification, professional organizations, honors and awards, publications, presentations, and grants;
- Official transcripts from all colleges attended; transcripts must be sent directly from the institution to the University of Pittsburgh
- GRE® revised General Test scores
- Test of English as a Foreign Language (TOEFL or IELTS scores (for candidates whose native language is not English)
- At least one example of written work (class project, course assignment, publication for which candidate is first author, etc.)
- See the SHRS website for additional requirements for international applicants

Applications are accepted at any time and Applicants are encouraged to apply at least 6 months prior to the term in which they will begin classes.

Applicants are evaluated by the PhD Admissions Committee. Admission to the program requires (1) the applicant to meet the standards for a PhD student in SHRS, and (2) that a faculty member of the PhD program has an opening for an additional PhD student and agrees to be the Academic Advisor for that applicant.

For more information about admission to the PhD program contact:

Office of Admissions
School of Health and Rehabilitation Sciences
4020 Forbes Tower
412-383-6558

Financial Aid

Financial assistance is often available from a variety of sources, including graduate student assistantships and teaching assistantships. These assistantships typically require 20 hours per week of research, teaching, or clinical service in exchange for a tuition, health insurance, and an annual salary. Other forms of financial assistance, including fellowships, may be available through individual faculty grants. Applicants interested in financial support should indicate this on their applications for admission. Acceptance into the PhD program does not assure that a student will be offered financial aid. Depending on the availability of financial aid, the offer of financial support to an applicant may be deferred until a later date. Since financial aid is limited, applicants who desire financial aid are encouraged to apply early.

Transfer Credits

If a student wishes to transfer credits, the student and the student's Academic Advisor must submit a Credit Transfer Request Form to Student Services during the first year of study. Transcripts verifying the graduate courses and course descriptions must accompany the petition. The student and student's Academic Advisor will be informed by the Associate Dean of Graduate Studies which courses are acceptable as transfer credits, and this information will be placed in the student's file. Based on University guidelines, students who transfer any credits from a master's degree must complete the PhD within 8 years; students who do not transfer credits must complete the PhD within 10 years.

Academic Advisor

Students admitted to the PhD program are assigned an Academic Advisor who is a member of the Graduate Faculty in SHRS. He/she will have research interests similar to the student's interests and will have agreed to be the student's Research Mentor.

The Academic Advisor and student will determine the Plan of Study for the student. They will also plan course work or other experiences to enable the student to demonstrate competency in the proposed content supporting the dissertation, as well as statistics/research methodology content in preparation for the Comprehensive Examination and Dissertation Proposal Defense. It is the responsibility of the Academic Advisor to provide advice to the student during the PhD program, especially with the following steps.

1. Petitioning the Associate Dean of Graduate Studies for transfer of credits
2. Preparing a Plan of Study outlining course work and dissertation credits leading to the PhD Degree
3. Locating research opportunities
4. Revising the Plan of Study as needed as the dissertation topic is formulated
5. Finding a Primary Research Mentor

Plan of Study

The student and Academic Advisor will prepare a tentative Plan of Study within the first term of enrollment. If a Plan of Study has not been submitted by the end of the first term, the student will not be permitted to enroll in the subsequent term. The Plan of Study Form can be obtained online on the SHRS website. The Plan of Study should include transfer credits, course work to date, future course work, and dissertation credits leading to the PhD degree. A copy of the Plan of Study will be placed in the student's file. The Plan of Study should be reviewed each term at registration and updated as needed by the student and Academic Advisor. A final updated Plan of Study must be on file in the student's permanent file in Student Services in the term in which the student graduates, or the student cannot be certified by the Registrar for graduation.

More information regarding the following can be found in the PHD handbook on the SHRS website:

- SHRS Student Statistical Support
- Annual Review/Progress Reports
- Preliminary Examination
- Primary Research Mentor
- Comprehensive Examination
- Dissertation Proposal Defense
- Admission to Candidacy
- Dissertation
- Electronic thesis and Dissertation (ETD)
- Final Oral Defense of Dissertation
- Continued Use of Data After Leaving the University of Pittsburgh

Ombudsperson

SHRS has designated a person within SHRS to be the Ombudsperson.

The Ombudsperson is a person who handles complaints, serves as a mediator, and a spokesperson for the rights of a particular individual or group. The Ombudsperson in the School of Health and Rehabilitation Sciences (SHRS) will be a neutral contact person (Non-faculty) for students with whom they can engage in informal discussions to express concerns about conflicts and other issues that may arise during the course of their education that they believe are difficult to address with their academic department.

The Ombudsperson for SHRS is Kellie Beach, Director of Student Services, and Registrar. She can be reached at kbeach@pitt.edu to make an appointment. More information on the role of an Ombudsperson for SHRS can be found on the SHRS website under the Orientation page.

School of Health and Rehabilitation Science Faculty

SHRS Faculty

Programs and Course Offerings

Department of Communication Science and Disorders (CSD)

Master of Arts and Master of Science Degrees in Communication Science and Disorders

The Communication Science and Disorders program provides students with a specialized academic education in communication processes and disorders, including disorders of speech, language, swallowing, and hearing. It includes the knowledge and skills needed to critically evaluate empirical research, and clinical expertise in the diagnosis and treatment of individuals having communicative disorders.

The master's degree program has two concentrations: one in speech-language pathology, and one in audiology. There is also an option for meeting public school practice requirements. For students interested in the clinical practice degree in audiology, please see the section on the Doctor of Audiology (AuD) degree in this bulletin.

A research track (resulting in the Master of Science degree) in audiology and speech-language pathology is also available.

The Masters degree programs in speech-language pathology and audiology at the University of Pittsburgh are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

<http://www.shrs.pitt.edu/CSD/>

General Admission Requirements (CSD MA/MS) Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.

- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.
- Graduate Record Examination scores (GRE-general). The GRE **must be within the past 5 years**.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

Please note that, in order to be eligible for clinical certification by the American Speech-Language-Hearing Association, you must meet the standards specified by the Association's Council for Clinical Certification. This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences (Physics, Chemistry), Behavioral Sciences (Sociology, Psychology), Statistics (not research design).

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: International Consultants of Delaware, Educational Credential Evaluators Inc., or Joseph Silny & Associates. **We do NOT accept evaluations by World Education Services (WES)**. The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency within 12 months of the due date of the application. Applicants from Quebec Province are required to submit TOEFL or IELTS scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and TOEFL scores are received by CSDCAS.

Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Clinical Science (CScD) Degree in Medical Speech-Language Pathology

The CScD is an advanced clinical doctorate recommended for the student or clinician seeking to employ state of the art clinical excellence and leadership as a speech-language pathologist in settings such as modern primary, tertiary, or rehabilitation medical centers and academic institutions.

The primary objectives of the CScD program are to provide students with advanced academic course work, clinical skills, case-based learning experiences, medical team rotations, and extensive mentored clinical practice. Graduates of this program will excel in their medical specialties and assume leadership roles. Graduates will be prepared for independent clinical practice in the medical setting and clinical faculty positions.

Students are expected to meet the eligibility requirements for application for both American Speech Language and Hearing Association certification (Certificate of Clinical Competence CCC-SLP) and Pennsylvania state licensure over the course of their studies. There is no dissertation project required for the CScD degree; however, students will demonstrate expertise in the critical analysis and application of scientific information.

Contact Information

CSD Administrator
Department of Communication Science and Disorders
School of Health and Rehabilitation Sciences
6035 Forbes Tower

Fax: 412-383-6555
Email: csdadmissions@shrs.pitt.edu
www.shrs.pitt.edu/csd

Admission Requirements

A SLP MS/MA is required in order to fulfill the clinical component of this program.

Once your application is complete, it will be forwarded to the CSD Department for review by the CScD Admissions Committee.

Applicants will be required to participate in interviews addressing content knowledge and discussions of the program.

The department has an application **deadline of January 1st** to begin the program the following summer term. All application materials must be received by the SHRS Admissions office (4020 Forbes Tower, Pittsburgh, PA 15260) by the deadline. Applicants are encouraged to apply early due to the length of time required to secure a clinical position. Rolling admissions means the department will review and admit qualified applicants until a class is full.

All applicants considering the CScD must email CSD admissions before starting the application process.

Students with master's or doctoral degrees in speech-language pathology (with or without a completed clinical fellowship) may apply for advanced academic and clinical standing. All students must complete a minimum of 87 credits to satisfy didactic and clinical requirements for this degree. 8 credits of advanced standing toward CSD 2520 will be awarded to those entering the program with their Certificate of Clinical Competence (CCC). No more than one-third of the total number of required credits (87) may be granted to a student as transfer credit for work done at another institution. These credits must be appropriate substitute coursework taken beyond what was required for the MA/MS degree. Where a course and/or clinical/teaching experience is/are being considered as a substitute for a CScD requirement, the candidate must show evidence of having attained the CScD course objectives. The request will be considered by the CScD Plan of Study Committee. Approval by both members of the committee, as well as the course instructor of record (for CScD courses), are required for approval of the course substitute.

A successful applicant will be offered conditional admission contingent upon:

- Securing a half time clinical position as a speech-language pathologist in a facility with which the academic department has a working relationship. The department will help locate possible positions, but it is the responsibility of the candidate to successfully secure the position following normal hiring practices at the specific facility.
- Engaging in unsupervised clinical practice in Pennsylvania. To engage in unsupervised clinical practice, you must obtain a Pennsylvania state license or provisional license in speech-language pathology.
- Please be advised that maintenance of the clinical practice above and the State License are mandatory throughout your time in the program. Failure to maintain these requirements is grounds for dismissal from the program, as they are essential components of the academic program.

All applicants are advised to ensure that they meet the certification and licensing requirements before applying to the program. Queries must be addressed by ASHA or the PA State Board - the University of Pittsburgh cannot address these queries.

University of Pittsburgh SHRS requires that applicants have the equivalent of a master's degree in Communication Science and Disorders from a regionally accredited institution in the US.

Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may

subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Audiology (AuD) Degree

The primary objective of the AuD program is to provide students with the academic course work, clinical skills, and experience (beyond that obtained with the master's degree) needed to enter the professional community and assume independent leadership roles. Graduates will be prepared for independent clinical practice and academic positions upon graduation, and will be immediately eligible for professional licensure and for Certification from the American Speech-Language and Hearing Association and American Board of Audiology Certification.

The AuD is the required entry-level degree for audiologists. This AuD program prepares entry-level audiologists to assume independent clinical and leadership roles within the professional communities of the region, state, and nation.

The Doctor of Audiology degree education program in audiology at the University of Pittsburgh is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, MD 20850, 800-498-2071 or 301-296-5700.

General Admission Requirements AuD Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.
- Graduate Record Examination scores (GRE-general). The GRE **must be within the past 5 years**.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

Please note that, in order to be eligible for clinical certification by the American Speech-Language-Hearing Association, you must meet the standards specified by the Association's Council for Clinical Certification. This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences (Physics, Chemistry), Behavioral Sciences (Sociology, Psychology), Statistics (not research design).

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor degree or those international degrees that are equivalent as determined by one of the following transcript evaluators: International Consultants of Delaware, Educational Credential Evaluators Inc., or Joseph Silny & Associates. **We do NOT accept evaluations by World Education Services (WES).** The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency within 12 months of the due date of the application. Applicants from Quebec Province are required to submit TOEFL or IELTS scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and TOEFL scores are received by CSDCAS.

Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the AuD program is regulated by the *SHRS Academic Standards*, as well as the departmental *Student Handbook on Academic and Clinical Requirements*.

Doctor of Philosophy Degree in Communication Science and Disorders

Contact Information

CSD Administrator
Department of Communication Science and Disorders
School of Health and Rehabilitation Sciences
6035 Forbes Tower
412-383-6543
Fax: 412-383-6555
E-mail: csdadmissions@shrs.pitt.edu
www.shrs.pitt.edu/aud/

The PhD program in Communication Science and Disorders is oriented toward the basic scientific questions in the discipline, with an emphasis on basic and applied research.

The expectations of graduating PhD students are that they are able to conduct a program of independent, creative, scholarly research, and that they can plan and execute effective teaching at all levels of pedagogy.

Admission Requirements

Applicants will apply online using the SHRS Apply Yourself application. It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Applicants should submit their GRE scores to institution code 2927. For PhD applicants who have taken the GRE 5-10 years prior to their application, the Communication Science and Disorders PhD program will accept a copy of the official GRE scores that were sent to the applicant. After 10 years, all applicants will need to retake the examination.

For PhD applicants who completed a graduate program in the Communication Science and Disorders Department at the University of Pittsburgh, the only official transcript required at the time of application for the PhD program is the transcript that confirms completion of the first CSD graduate degree.

No one will be admitted to the CSD PhD program without a suitable adviser in their main area of specialization. Thus, anyone interested in PhD education is encouraged to contact individual faculty members whose research interests mesh most closely with theirs.

PhD applications are due by January 15th. Applicants will be interviewed by faculty members as part of the admissions process. A final admission decision depends on the availability of a suitable research adviser and a review and recommendation by the PhD Admissions Committee.

Foreign transcript evaluation must be completed by International Consultants of Delaware, Educational Credential Evaluators Inc., or Joseph Silney & Associates. **We do NOT accept transcript evaluations by World Education Services (WES).** The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework).

International applicants must also submit official TOEFL scores. Your application for admission will not be reviewed until your credential evaluation and TOEFL scores are received by CSDCAS.

Financial Aid

Acceptance into the PhD program does not guarantee financial aid, but each admitted student is automatically put into a merit-based competition for available teaching assistantships, doctoral traineeships, and positions on research grants. Financial assistance is often available from a variety of sources, including teaching assistantships, PhD traineeships, and graduate research assistantships. Such appointments typically require 20 hours each week of teaching, research, and/or clinical service in exchange for a monthly stipend. A scholarship based on merit covers at least partial tuition remission, fees, and health insurance. The Department's Financial Aid Committee works with each admitted student's adviser to secure a funding opportunity that is rewarding both academically and financially. Prospective applicants who are interested in financial support should indicate this on their application for admission.

Doctoral

Communication Science and Disorders, PhD

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree in communication science and disorders at the University of Pittsburgh. *For further detail on allowable credits, see Credit Requirements under Regulations Pertaining to Doctoral Study.*

All CSD PhD students are required to take the PhD Research Seminar (CSD 3048) and a minimum of three additional departmental PhD seminars: one in speech/language/voice/swallowing, one in hearing, and one in the student's major area of study.

CSD PhD students also take a minimum of 12 credits of coursework in statistics and experimental design, and 6 credits of PhD research practicum. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental Proseminar (CSD 3060), to participate in poster sessions, attend invited colloquium talks, and present "think aloud" talks about their own research, at whatever stage it is in its development. Students also have the opportunity to take courses in teaching and grant preparation, and to complete teaching practica.

Four formal degree requirements must be satisfied before a student initiates PhD dissertation work:

1. No later than the second term of study, students, with the help of their major advisers, develop a proposed Plan of Study that specifies their background, goals, and tentative plans for their program of study. Students schedule a Plan of study meeting with a faculty committee, to review this document and their plans (see *Major Adviser and Advising Committees, below*).
2. Annually after the initial plan of study meeting, the student compiles an academic portfolio, until the time at which the student takes the comprehensive examination. The portfolio consists of at least three new pieces of scholarly work that are provided to the student's Plan of Study Committee prior to an annual review meeting. The student's Plan of Study will also be reviewed at these annual meetings.
3. The student must complete a pre-dissertation research project, culminating in a publishable manuscript resulting from a research practicum experience. This project must be completed prior to initiating the comprehensive examination.

4. The student must pass a comprehensive examination consisting of two substantive written projects and an open-ended oral examination.

Students on provisional or special status, or on probation, are not eligible to take the comprehensive exam.

Students must then successfully complete both the written dissertation overview (prospectus document) and oral examination of their prospectus.

After the prospectus is passed, students file an application for admission to candidacy for the Doctor of Philosophy degree. For details *see below and also Admission to Candidacy for the Doctor of Philosophy Degree in this bulletin for details.*

Major Adviser and Advising Committees

Students admitted to the PhD program are assigned a major adviser in their main area of specialization. The adviser is primarily responsible for providing assistance and advice to the student throughout all facets of the PhD program, and typically serves as the chair of the Plan of Study, Comprehensive Examination, and Dissertation Committees. Either PhD students or their advisers may initiate a change of adviser, but no student may remain in the program without an adviser.

The student, upon consultation with the major adviser, secures the agreement of at least two other departmental faculty members with graduate faculty status to serve with the adviser on the student's Plan of Study Committee. This committee initially convenes to review and make recommendations about the student's Plan of Study. Thereafter, the committee meets annually with the student to review and make recommendations about the student's portfolio and general progress in the PhD program. This committee, with or without changes in faculty membership, also administers and evaluates the student's comprehensive examination.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees for an overview of the dissertation committee's makeup and responsibilities.

Overview or Prospectus Meeting

See Overview or Prospectus Meeting under Regulations Pertaining to Doctoral Study for the regulations pertaining to this meeting and then read the following information that is specific to the PhD program in Communication Science and Disorders. After securing the adviser's approval, each PhD student must submit a written dissertation proposal to the Dissertation Committee at least two weeks prior to a formal overview meeting with that committee. (*See Dissertation and Abstract section for details on the characteristics of an appropriate dissertation.*)

Final Oral Examination

See Final Oral Examination under Regulations Pertaining to Doctoral Study and then note the following additional program-specific information.

After securing the adviser's approval, the student submits copies of the complete document to the dissertation committee at least two weeks prior to the final oral examination in defense of the dissertation.

PhD Curriculum

For the CSD PhD degree, a minimum of 72 credits beyond the bachelor's degree is needed.

Required coursework includes: the departmental PhD Research Seminar (CSD 3048); a minimum of 3 additional PhD seminars (one in speech and language, one in hearing, and one in the student's major area of study (speech/language/voice/swallowing)); a minimum of 12 credits in research design and statistics; and attendance each fall and spring term at the weekly departmental Proseminar (CSD 3060). The proseminar includes student and faculty poster sessions, a colloquium series, and a student-centered research roundtable that allows participation and problem-solving by students at various stages of their research training.

Otherwise, coursework and other experiences are individually tailored for each student, in consultation with the student's adviser and the adviser-chaired Plan of Study committee.

Doctor of Audiology, AuD

Degree Requirements

Students with bachelor's degrees in communication science and disorders can complete the program in four years, while students with a master's degree in CSD can complete the program in approximately two years. Students applying to the AuD program with a completed master's degree will be required to complete two years of study with a minimum of 30 credits (typically about 38 credits) to satisfy academic and clinical requirements for the degree. A review of successfully completed graduate coursework in the master's degree in CSD (focus in Audiology) will be conducted after being admitted to the AuD Program. Students applying to the AuD program with a completed bachelor's degree (major in CSD) will require four years of study with a minimum of 75 credits (typically about 100 credits) to satisfy academic and clinical requirements for the degree. Students with a bachelor's degree without a CSD major will have to complete an additional year of post-baccalaureate study. Other requirements include the successful completion of two comprehensive examinations, a mentored research project, and a full-time clinical externship.

Comprehensive Examinations

Students in the AuD program are required to successfully complete two comprehensive examinations before the Doctor of Audiology degree can be awarded. The Comprehensive Exam I is a formative examination that will identify strengths and/or weaknesses in the student's knowledge base. An ad hoc committee of reviewers administers this comprehensive examination.

In addition, students pursuing the AuD are required to successfully complete Comprehensive Exam II. During this examination, the student will demonstrate an ability to apply theoretical knowledge to a real clinical case with which the student has been extensively involved during clinical training. Comprehensive Exam II will have both written and oral portions. The student will identify a case from the student's own clinical experience in which they have been primarily responsible for case management. This case will be thoroughly presented in conjunction with in-depth background information, including relevant clinical research on all aspects of the case. A panel of three reviewers will be constituted to evaluate each individual student's examination performance.

All audiology students in good academic standing are expected to pass their comprehensive examination(s). However, regardless of academic standing, failure to pass either of the above examinations within three examination cycles will result in the student's dismissal from the audiology program.

AuD Curriculum

- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2022 - CLINICAL PROCEDURES LAB 2-2
- CSD 2040 - AUDIOLOGICAL ASSESSMENT
- CSD 2041 - MANAGEMENT OF HEARING LOSS
- CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB

- CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3
- CSD 2659 - AUDIOLOGY EXTERNSHIP
- CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2
- CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2
- CSD 2971 - RESEARCH PRACTICUM (Fullfilled by 2 credits of CSD 2971)
- Comprehensive Examination II
- CSD 2162 - COUNSELING FOR COMMUNICATION DISORDERS
- CSD 2043 - FUNDAMENTALS OF SPEECH-LANGUAGE PATHOLOGY FOR AUDIOLOGISTS

Medical Speech-Language Pathology, CScD

Degree Requirements and Curriculum

All students enrolled in the Post Masters CScD program are required to complete 87 credits. Eight credits of advanced standing toward CSD 2520 will be awarded to those entering the program with their Certificate of Clinical Competence (CCC). Courses are chosen with the advisor and a Plan of Study will be developed to design an in-depth program of study taking into account the student's previous academic preparation and experience.

Please note that you will have **required** classes each Summer term in the program. Most of our courses are only offered once per academic year. If a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Comprehensive Examinations

Students in the CScD program are required to successfully complete oral and written comprehensive examinations. These are cumulative examinations covering the core clinical sciences and theoretical basis supporting diagnosis and intervention. Students are required to be engaged in clinical practice throughout their program. Students are also required to demonstrate clinical decision-making and clinical practice knowledge and skills using principles of evidence-based practice.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this bulletin, the CScD program is regulated by the SHRS Academic Standards, as well as the departmental Student Handbook on Academic and Clinical Requirements.

Master's

Communication Science and Disorders - Audiology Concentration, MA/MS

Communication Science and Disorders Program Requirements

Proseminar Requirement

All students must complete the proseminar requirement, which consists of attending a specified number of scientific and professional presentations that have relevance to communication science and disorders.

Clinical Practicum

Clinical practicum requirements are met in Communication Science Disorders Clinical Network which consists of more than 100 facilities in Western Pennsylvania with which the program is affiliated. These include varied settings such as hospitals, rehabilitation centers, home based services, specialty clinics, not-for-profit clinics, early intervention, private practices, and schools. All academic course work must be completed with a minimum grade of C to satisfy requirements for the degree.

Comprehensive Exam for MA

All students in the Master of Arts program are required to pass an oral comprehensive examination in the spring of their second year. The comprehensive examination assesses students' ability to think critically, to communicate their thoughts in oral form, and to demonstrate their grasp of the major academic and clinical content provided in their graduate program.

Students seeking the Doctor of Audiology (AuD) degree must complete a second comprehensive examination which includes a written and oral component. Details about that comprehensive examination can be found in the section on the AuD degree.

Thesis Option for Master of Science (MS) degrees

Students pursuing the Master of Science degree in audiology must successfully complete a thesis project. Thesis students will have an examining committee of at least three University of Pittsburgh faculty members (including the research director, who serves as chair).

Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Concentration

This program is designed for those students who do not plan to provide clinical services, but would like to pursue a research track in audiology. Students pursuing the AuD degree (Clinical Doctorate) also may pursue a research track. The audiology concentration for the master's degree requires a minimum of 30 credits of coursework. All credits must be passed with a B grade or better in order to count towards graduation.

Audiology Curriculum

Department of Health Information Management

Master of Science Degree in Health Informatics with a Track in Data Science or Registered Health Information Administrator or Health Care Supervision and Management

The Department of Health Information Management (HIM) offers three tracks leading to the Master of Science degree in Health Informatics, Data Science (DS), Registered Health Information Administrator (RHIA) and Health Care Supervision and Management (HSM).

Contact Information:

Bambang Parmanto, PhD, Interim Chair
 Department of Health Information Management
 6051 Forbes Tower
 412-383-6650
 Fax: 412-383-6655
 E-mail: him@pitt.edu
<http://www.shrs.pitt.edu/HIM/>

Admission Requirements for Data Science (DS), Registered Health Information Administrator (RHIA), and Health Care Supervision and Management (HSM)

- A baccalaureate degree from an accredited institution:
- A minimum grade point average (GPA) of 3.0 (on a 4.0 scale) is required. Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

Application Process for DS, RHIA & HSM

- Complete the SHRS ApplyYourself online application.
- Application fee of \$50 - You may pay the application fee online or elect to pay by check or money order. Make check or money order payable to the University of Pittsburgh. You will be prompted to choose your payment type at the end of the ApplyYourself application process.
- Three Letters of Recommendation are required. These recommendations should be from college level instructors or employers/professionals who have supervised your work in a paid or volunteer capacity. These individuals should be able to comment on your academic, professional and interpersonal abilities. People submitting recommendation letters on your behalf are encouraged to send their letters to our admissions office electronically through our application system. For those people who wish to submit their letter of recommendation on paper, please forward them a copy of our Recommendation Form and follow the directions for paper recommendations.
- Statement of Purpose/Essay

- Transcript(s) - Submit official transcript(s) from each college or university you have attended even if only one course was taken at that particular college or university. Course(s) posted for advanced standing on transcripts are not considered official. Please mail to the SHRS Office of Admissions, 4020 Forbes Tower, University of Pittsburgh, Pittsburgh, PA 15260.

Applications accepted on a rolling basis.

Financial Aid

There are scholarships and loan opportunities available to graduate students from the American Health Information Management Association (AHIMA). Further information can be obtained from the AHIMA web site at www.ahima.org under the career and student center tab. Additionally, the Pennsylvania Health Information Management Association (PHIMA) awards scholarships to qualified students in Pennsylvania. Further information can be obtained from PHIMA's web site at <http://www.phima.org/members/scholarships/>.

The Healthcare Information and Management Systems Society (HIMSS) also awards scholarships to HIMSS student members who have achieved academic excellence and have the potential to be future leaders in the health care information and management systems industry. Visit the HIMSS site at <http://www.himss.org/> and navigate to "Scholarships" under the Professional Development menu.

Certificate

Health Data Analytics Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students to open doors in new fields. All students enrolled in these certificate programs are required to complete 10 credits, that is, three 3-credit courses and one 1-credit independent study. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 10 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate program can be counted into the MS program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (10 credits)

- HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS
- HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS
- HI 2453 - DATA ANALYTICS AND MACHINE LEARNING IN HEALTH SCIENCES (3-Credits)
- HI 2999 - INDEPENDENT STUDY (1-Credit)

Health Information Cybersecurity Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students to open doors in new fields. All students enrolled in these certificate programs are required to complete 10 credits, that is, three 3-credit courses and one 1-credit independent study. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 10 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate program can be counted into the MS program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (10 credits)

HI-2450 - Security, Privacy, Legal & Ethical Issues in Health IT (3 credits)

HI-2210 - Health Information and the Health Care System (3 credits)

HI-2452 - Digital Health (3 credits)

HI-2999 - Independent Study (1 credit)

Leadership in Health Informatics Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students to open doors in new fields. All students enrolled in these certificate programs are required to complete 10 credits, that is, three 3-credit courses and one 1-credit independent study. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 10 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate program can be counted into the MS program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (10 credits)

HI-2210 - Health Information and the Health Care System (3 credits)

HI-2632 - Leadership and Project Management (3 credits)

HI-2231: Talent Management and Human Resources (3 credits)

HI-2999 - Independent Study (1 credit)

Revenue Cycle Management Certificate

In the Department of Health Information Management, there are four certificate programs: Health Data Analytics, Health Information Cybersecurity, Revenue Cycle Management, and Leadership in Health Informatics.

These certificate programs can help students to open doors in new fields. All students enrolled in these certificate programs are required to complete 10 credits, that is, three 3-credit courses and one 1-credit independent study. A certificate program can be finished in one or two terms.

There are online and on-campus versions of these certificates. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of these certificates.

Program Requirements

The admission requirements for these certificate programs are identical to our Master of Science in Health Informatics (MSHI) program. All students enrolled in a certificate program are required to complete 10 credits. For students who pursue a MS degree in MSHI program, the credits obtained from these certificate program can be counted into the MS program. The required courses for each of the four certificate programs are listed below.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Health Informatics Courses (10 credits)

HI-2210 - Health Information and the Health Care System (3 credits)

HI-2410 - Health Vocabulary, Terminology & Classification Systems (3 credits)

HI-2230 - Financial Management and Health Care Reimbursement (3 credits)

HI-2999 - Independent Study (1 credit)

Master's

Health Informatics, MS

Data Science Track

Data Science (DS), a track in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Data Science (DS) track prepares students responsible for the development, evaluation, and management of health information technologies and systems. Graduates of this track analyze, design, implement, and evaluation health information systems. They will also have the ability to conduct in-depth data analytics projects to improve the quality of health care and reduce the cost of health care services. Students enrolled full-time can complete the program in 3-4 consecutive semesters.

There are online and on-campus versions of this track. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of the track.

Program Requirements

All students enrolled in the Data Science track are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Data Science taking into account student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

DS Curriculum

The Data Science curriculum allows students to choose from required courses and elective courses. Elective courses can be chosen from other health informatics tracks in the department, other departments in the SHRS or other academic programs within the University.

Required Health Informatics Courses (36 credits)

HI-2250 - Foundations of Health Informatics

HI-2450 - Security, Privacy, Legal & Ethical Issues in Health IT

HI-2210 - Health Information and the Health Care System

HI-2410 - Health Vocabulary, Terminology & Classification Systems

HI-2451 - Database Design and Big Data Analytics

HI-2452 - Digital Health

HI-2454 - Data Science in Health Informatics

HI-2632 - Leadership and Project Management

HI-2453 - Data Analytics and Machine Learning in Health Science

HI-2651 - Data Science Capstone

HI-2470 - Implementation Science of Health IT

HI-2650 - Practical Research & Evaluation Methods

Please note: All students are required to finish one Data Science capstone project. Before graduation, all students are also required to demonstrate body of knowledge in statistics and computer programming.

RHIA Track

The Registered Health Information Administrator (RHIA) track leading to a Master of Science degree in Health Informatics prepares students responsible for the development and management of health information systems consistent with the clinical, fiscal, administrative, ethical, and legal requirements of healthcare institutions. Graduates of this program analyze, design, implement, and evaluate health information systems. As members of the healthcare team, they interact with other healthcare professionals and administrators, and provide healthcare data for patient care, research, quality improvement, strategic planning, reimbursement, and related managerial functions.

RHIA graduates work in a variety of settings, such as hospitals, health planning agencies, computer companies, consulting firms, information systems vendors, ambulatory care centers, research centers, rehabilitation facilities, and insurance companies.

The Registered Health Information Administrator (RHIA) Option

We offer courses within the RHIA track for students who are seeking eligibility to sit for the American Health Information Management (AHIMA) credentialing examination to become a Registered Health Information Administrator (RHIA).

The RHIA concentration leading to a Master of Science degree in Health Informatics is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Results from the 2018 outcomes assessment reported to CAHIIM in the 2019 Annual Program Report (APAR) indicate:

- A 100% employer satisfaction rate
- A 100% graduate satisfaction rate
- A 100% pass rate National Certification Exam

There are online and on-campus versions of this track. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of the track.

Program Requirements - RHIA

All students enrolled in the RHIA track are required to complete 36 credits (students enrolled full-time normally complete the program in 3-4 consecutive semesters). Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Informatics taking into account student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Required Courses for All Students

HI-2250 - Foundations of Health Informatics

HI-2450 - Security, Privacy, Legal & Ethical Issues in Health IT

HI-2210 - Health Information and the Health Care System

HI-2410 - Health Vocabulary, Terminology & Classification Systems

HI-2451 - Database Design and Big Data Analytics

HI-2231 - Talent Management and Human Resources

HI-2452 - Digital Health

HI-2632 - Leadership and Project Management

HI-2230 - Financial Management and Health Care Reimbursement

HI-2610 - Health Information Management Internship

HI-2470 - Implementation Science of Health IT

HI-2650 - Practical Research & Evaluation Methods

Please note, before graduation, students are required to demonstrate a body of knowledge in statistics computer programming, anatomy and physiology (HIM-1405), medical terminology, pathophysiology and pharmacology. (HRS-1020)

Program Requirements - RHIA, RHIA Option

Internship

Students in the RHIA track are required to complete an internship as part of their curriculum requirements. The overall goal of the internship is to provide students with practical experiences to apply their knowledge and skills that they learn in their respective graduate programs.

The HIM department has affiliation agreements with approximately 200+ clinical sites for student internships. The following list provides a sample of these sites:

Center for Connected Medicine

Children's Hospital of Pittsburgh - IS Department

Children's Institute of Pittsburgh

Excela Health

Highmark

M*Modal

McKesson

Oman HIM Institute

United Cerebral Palsy of Pittsburgh

University of Pennsylvania Health System

UPMC CTSI (Clinical and Translational Science Institute)

UPMC Department of Radiology

UPMC eRecord

UPMC Health Track

UPMC Interface Development

UPMC Physician Services Division

UPMC Radiology Division

UPMC Technology Development Center

Prerequisites for Graduate Internships

The following are required in order for students to be eligible to participate in an internship. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

Physical examination including proof or completion of specific immunizations

TB test, 2-step

Pennsylvania Criminal Record Check

Pennsylvania Child Abuse Clearance

FBI Background Check (includes fingerprinting)

HIPAA Training and Certification

Students must carry personal health insurance while participating in an internship

Students must carry professional student liability insurance coverage while participating in an internship. This coverage is provided by the SHRS group insurance plan and will appear as a charge on the students' tuition bill.

Some sites may have additional requirements (i.e. drug screen, influenza vaccine, or orientation programs specific to their organization).

Internship sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

Additional Information:

Travel to internship sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.

All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.

Approximate cost for clearances is \$100, and costs for physical exam and immunization status are dependent on health insurance coverage and provider costs.

Approximate cost for drug screen is \$40.

The internship is 3 credits, and requires a minimum of 180 hours of student participation.

For more information on internships students are encouraged to contact their academic advisor.

Healthcare Supervision and Management Track

Health Care Supervision and Management (HSM), a track in the Master of Science in Health Informatics program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS).

The Health Care Supervision and Management (HSM) track provides students an opportunity for knowledge, skills, and career advancement. Qualified students with interests in administration and supervisory management in health care, long-term care, and rehabilitation may pursue this 36 credit track in Health Care Supervision and Management. Students enrolled full-time normally complete the program in 3-4 consecutive semesters.

This program is designed for students who wish to attain knowledge and skills at the graduate level to prepare for a supervisory management position or to upgrade competencies developed earlier in his/her career.

There are online and on-campus versions of this track. The curriculum and course contents are identical in these two versions. Domestic students can choose either of them according to their situation or preference before the enrollment. International students are required to attend the on-campus version of the track.

Program Requirements

All students enrolled in the Health Care Supervision and Management track are required to complete 36 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Care Supervision and Management taking into account student's previous academic preparation and experience.

Around half of our courses are only offered once per academic year. In this case, if a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HSM Curriculum

The Health Care Supervision and Management curriculum allows students to choose from required courses and elective courses. Elective courses can be chosen from other health informatics tracks in the department, other departments in the SHRS or other academic programs within the University.

Required Health Informatics Courses (33 credits)

HI-2250 - Foundations of Health Informatics

HI-2450 - Security, Privacy, Legal & Ethical Issues in Health IT

HI-2210 - Health Information and the Health Care System

HI-2410 - Health Vocabulary, Terminology & Classification Systems

HI-2231 - Talent Management and Human Resources

HI-2452 - Digital Health

HI-2632 - Leadership and Project Management

HI-2230 - Financial Management and Health Care Reimbursement

HI-2630 - Administrative Capstone

HI-2470 - Implementation Science of Health IT

HI-2650 - Practical Research & Evaluation Methods

Electives (select 3 credits - selected with advisor from SHRS and other departments within the University)

HI-2451 - Database Design and Big Data Analytics

HI-2454 - Data Science in Health Informatics

HI-2453 - Data Analytics and Machine Learning in Health Science

HRS 2901 - INTRO TO RESEARCH METHODOLOGY

HRS 2910 - STATSTCL APPLCS/HEALTH & REHAB OR (BIOST 2011, 2041, 2042,; PSYED 2018)

HRS 2905 - ETHICAL ISSUES IN HEALTH CARE

HRS 2482 - LEGAL ASPECTS OF HEALTH CARE

HRS 2480 - DIMENSIONS OF AGING: CULT & HLTH

HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY

LAW 5339 - LAW OF DISABILITY DISCRIMINATION

Please note: All students are required to finish one Administrative capstone project.

Health Information Management - Health Care Supervision and Management Concentration, MS

In the Fall of 2019, the Healthcare Supervision and Management Area of Concentration was terminated. Students who were enrolled prior to the Fall 2019 term have the option to stay in the Healthcare Supervision and

Management Area of Concentration or transfer to a new major. The last term that a student can be admitted to the ARCO is Fall 2019 and the inactivation term is Fall 2021.

Health Care Supervision and Management (HSM), a concentration in the Master of Science in Health and Rehabilitation Sciences program, is housed in the Department of Health Information Management, School of Health and Rehabilitation Sciences (SHRS). **Pitt and SHRS are currently ranked the #1 college in the US to student health professions according to College Factual as listed in a recent article in USA Today.**

The Health Care Supervision and Management (HSM) concentration provides health professionals an opportunity for career advancement. Qualified students with interests in administration and supervisory management in health care, long-term care, and rehabilitation may pursue a 41-42 credit concentration in Health Care Supervision and Management. Students enrolled full-time normally complete program in 5 consecutive semesters.

This program is designed for professionals in health care who wish to attain knowledge and skills at the graduate level to prepare for a supervisory management position or to upgrade competencies developed earlier in his/her career.

Students with a special interest in long-term care for the aging or disability studies may pursue additional courses offered within SHRS and/or the Graduate School of Public Health (GSPH).

Program Requirements

All students enrolled in the Health Care Supervision and Management concentration are required to complete 41-42 credits. Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Care Supervision and Management taking into account student's previous academic preparation and experience.

Most of our courses are only offered once per academic year. Please also note that you will have a **required** class that is offered during Summer. If a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

HSM Curriculum and Course Descriptions

The Health Care Supervision and Management curriculum allows students to choose from required core courses and elective courses. Elective courses can be chosen from SHRS or other academic programs within the University.

Foundation & Core Course (17 credits)

- HRS 2434 - BUSINESS ISSUES AND DATA ANALYTICS IN HEALTH CARE *
- HRS 2435 - FINANCIAL MANAGEMENT IN HEALTH CARE *
- HRS 2445 - HUMAN RESOURCE MGT/LABOR RELTN *
- HRS 2465 - LEADERSHIP SKILL DEVELOPMENT *
- HRS 2421 - SECURITY, PRIVACY, LEGAL AND ETHICAL ISSUES IN HEALTH CARE *
- HRS 2920 - ADMINISTRATIVE INTERNSHIP *

Health Informatics Courses (select 6 credits)

- HRS 2420 - INTRO TO HEALTH INFORMATICS
- HRS 2490 - ELECTRONIC HEALTH RECORDS *
- HRS 2423 - CLOUD COMPUTING, HL7 AND ANALYTICS IN HEALTH CARE
- HRS 2424 - DATABASE DESIGN AND MANAGEMENT IN HEALTH CARE

- HRS 2432 - TELEMEDICINE, TELEREHABILITATION, AND E-HEALTH

*** Required Course for All Students**

Electives (select 12-13 credits - selected with advisor from SHRS and other departments within the University)

- HRS 2431 - EVALUATION METHODS IN HEALTH INFORMATICS
- HRS 2454 - LEAN SIX SIGMA AND OTHER IMPROVEMENT METHODOLOGIES IN HEALTH CARE
- HRS 2901 - INTRO TO RESEARCH METHODOLOGY
- HRS 2903 - ISSUES IN THE HEALTH SYSTEM
OR
- HRS 2902 - TOPICS IN HEALTH CARE
- HRS 2910 - STATSTCL APPLCS/HEALTH & REHAB
OR (BIOST 2011, 2041, 2042,; PSYED 2018)
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE
- HRS 2428 - CONCP SOFTWR PROJ ENGR HLTH CARE
- HRS 2482 - LEGAL ASPECTS OF HEALTH CARE
- HRS 2480 - DIMENSIONS OF AGING: CULT & HLTH
- HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY
- LAW 5339 - LAW OF DISABLTY DISCRIMINATION
- HRS 2425 - DATA ANALYTICS: APPLICATION IN GENOMICS AND PERSONALIZED CARE
- HRS 2426 - EVALUATION OF CLASSIFICATION SYSTEMS, REFERENCE TERMINOLOGIES & DATA CAPTURE TECHNOLOGIES IN HC
- HRS 2457 - QUALITY MANAGEMENT

Thesis Option

- HRS 2924 - GRADUATE RESEARCH PROPOSAL
- HRS 2925 - GRADUATE RESEARCH

Non-Thesis Option

Students are required to take six credits in an area in which they want to further develop their professional skills, selected from the following list of electives or from other offerings within the School and University.

Please note: All students are required to take at least 30 credits within SHRS

**** A comprehensive examination is required and should be scheduled by the advisor and student ****

Internships for Graduate Students

Graduate students in the Department of Health Information Management in the areas of Health Information Systems and Health Care Supervision & Management are required to complete an internship as part of their curriculum. The overall goal of the internship is to provide students with practical experiences to apply their knowledge and skills that they learn in their respective graduate programs.

The HIM department has affiliation agreements with approximately 200+ clinical sites for student internships. The following list provides a sample of these sites:

- Center for Connected Medicine
- Children's Hospital of Pittsburgh - IS Department
- Children's Institute of Pittsburgh
- Excela Health
- Highmark

- M*Modal
- McKesson
- Oman HIM Institute
- United Cerebral Palsy of Pittsburgh
- University of Pennsylvania Health System
- UPMC CTSI (Clinical and Translational Science Institute)
- UPMC Department of Radiology
- UPMC eRecord
- UPMC Health Track
- UPMC Interface Development
- UPMC Physician Services Division
- UPMC Radiology Division
- UPMC Technology Development Center

Prerequisites for Graduate Internships

The following are required in order for students to be eligible to participate in an internship. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

- Physical examination including proof or completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- FBI Background Check (includes fingerprinting)
- HIPAA Training and Certification
- Students must carry personal health insurance while participating in an internship
- Students must carry professional student liability insurance coverage while participating in an internship. This coverage is provided by the SHRS group insurance plan and will appear as a charge on the students' tuition bill.
- Some sites may have additional requirements (i.e. drug screen, influenza vaccine, or orientation programs specific to their organization).
- Internship sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

Additional Information:

- Travel to internship sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.
- All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.
- Approximate cost for clearances is \$100, and costs for physical exam and immunization status are dependent on health insurance coverage and provider costs.
- Approximate cost for drug screen is \$40.
- The internship is 3 credits, and requires a minimum of 180 hours of student participation.

For more information on internships students are encouraged to contact their academic advisor.

Health Information Management - Health Information Systems Concentration, MS

In the Fall of 2019, the Health Information Systems Area of Concentration was terminated. Students who were enrolled prior to the Fall 2019 term have the option to stay in the Health Information Systems Area of Concentration or

transfer to a new major. The last term that a student can be admitted to the ARCO is Fall 2019 and the inactivation term is Fall 2021.

The Health Information Systems (HIS) concentration leading to a Master of Science degree in Health and Rehabilitation Sciences prepares professionals responsible for the development and management of health information systems consistent with the clinical, fiscal, administrative, ethical, and legal requirements of healthcare institutions. Graduates of this program analyze, design, implement, and evaluate health information systems. As members of the healthcare team, they interact with other healthcare professionals and administrators, and provide healthcare data for patient care, research, quality improvement, strategic planning, reimbursement, and related managerial functions.

HIS graduates work in a variety of settings, such as hospitals, health planning agencies, computer companies, consulting firms, information systems vendors, ambulatory care centers, research centers, rehabilitation facilities, and insurance companies.

Why choose HIS at PITT!:

- **PITT and SHRS are currently ranked a top ten college in the US to study health professions according to College Factual as listed in a recent article in *USA Today*.**
- **Our Health Information Systems Masters program is ranked among the best in the nation for its quality and affordability by *MBA Healthcare Management*.**

The HIS Concentration Registered Health Information Administrator (RHIA) Option

We offer specialized courses within the HIS concentration for students who are seeking eligibility to sit for the American Health Information Management (AHIMA) credentialing examination to become a Registered Health Information Administrator (RHIA).

The Health Information Systems concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Results from the 2015 outcomes assessment reported to CAHIIM in the 2016 Annual Program Report (APAR) indicate:

- A 100% employer satisfaction rate
- A 100% graduate satisfaction rate
- A 93% pass rate National Certification Exam

Program Requirements - HIS

All students enrolled in the Health Information Systems concentration are required to complete 41-42 credits (students enrolled full-time normally complete program in five consecutive semesters). Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Informatics taking into account student's previous academic preparation and experience.

Most of our courses are only offered once per academic year. Please also note that you will have **required** classes offered during the Summer. If a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Health Informatics & Foundation Courses (select 29-30 credits)

- HRS 2420 - INTRO TO HEALTH INFORMATICS *
- HRS 2421 - SECURITY, PRIVACY, LEGAL AND ETHICAL ISSUES IN HEALTH CARE *
- HRS 2422 - COMPUTER PROGRAMMING FOR HEALTH INFORMATICS *
- HRS 2423 - CLOUD COMPUTING, HL7 AND ANALYTICS IN HEALTH CARE
- HRS 2424 - DATABASE DESIGN AND MANAGEMENT IN HEALTH CARE *

- HRS 2425 - DATA ANALYTICS: APPLICATION IN GENOMICS AND PERSONALIZED CARE
- HRS 2426 - EVALUATION OF CLASSIFICATION SYSTEMS, REFERENCE TERMINOLOGIES & DATA CAPTURE TECHNOLOGIES IN HC
- HRS 2428 - CONCP SOFTWR PROJ ENGR HLTH CARE *
- HRS 2431 - EVALUATION METHODS IN HEALTH INFORMATICS
- HRS 2432 - TELEMEDICINE, TELEREHABILITATION, AND E-HEALTH
- HRS 2434 - BUSINESS ISSUES AND DATA ANALYTICS IN HEALTH CARE
- HRS 2439 - HEALTH INFOR SYSTEMS INTERNSHIP *
- HRS 2490 - ELECTRONIC HEALTH RECORDS *
- HRS 2901 - INTRO TO RESEARCH METHODOLOGY
- HRS 2910 - STATSTCL APPLCS/HEALTH & REHAB
OR (BIOST 2011, 2041, 2042; PSYED 2018)

- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS

Health Management Courses (select 6 credits)

- HRS 2435 - FINANCIAL MANAGEMENT IN HEALTH CARE
- HRS 2445 - HUMAN RESOURCE MGT/LABOR RELTN
- HRS 2465 - LEADERSHIP SKILL DEVELOPMENT
- HRS 2454 - LEAN SIX SIGMA AND OTHER IMPROVEMENT METHODOLOGIES IN HEALTH CARE
- HRS 2903 - ISSUES IN THE HEALTH SYSTEM
OR
- HRS 2902 - TOPICS IN HEALTH CARE
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE

*** Required Course for All HIS Students**

^ Additionally required courses for students interested in enhanced Security & Privacy content.

Thesis Option (6 credits)

- HRS 2924 - GRADUATE RESEARCH PROPOSAL
- HRS 2925 - GRADUATE RESEARCH

Non-Thesis Option (select 6 credits)

Electives to be taken from above or at other schools within the University.

Please note: All students are required to take at least 30 credits within SHRS

****A comprehensive Examination is required and should be scheduled by the advisor and student.****

Program Requirements - HIS, RHIA Option

All students enrolled in the Health Information Systems/RHIA Option concentration are required to complete 41-42 credits (students enrolled full-time normally complete program in five consecutive semesters). Courses are chosen with the advisor and a Plan of Study will be developed to enable each student to design an in-depth study of Health Informatics taking into account student's previous academic preparation and experience.

Most of our courses are only offered once per academic year. Please also note that you will have **required** classes offered during the Summer. If a student fails to successfully complete a course, the student must retake the course the next academic year. Furthermore, this may also prevent the student from registering for the advanced-level courses and delay the date of graduation.

Health Informatics & Foundation Courses (23-24 credits)

- HRS 2421 - SECURITY, PRIVACY, LEGAL AND ETHICAL ISSUES IN HEALTH CARE *

- HRS 2422 - COMPUTER PROGRAMMING FOR HEALTH INFORMATICS *
- HRS 2424 - DATABASE DESIGN AND MANAGEMENT IN HEALTH CARE *
- HRS 2428 - CONCP SOFTWR PROJ ENGR HLTH CARE *
- HRS 2439 - HEALTH INFOR SYSTEMS INTERNSHIP *
- HRS 2490 - ELECTRONIC HEALTH RECORDS *
- HRS 2903 - ISSUES IN THE HEALTH SYSTEM *

OR

- HRS 2902 - TOPICS IN HEALTH CARE *
- HRS 2910 - STATSTCL APPLCS/HEALTH & REHAB *
OR (BIOST 2011, 2041, 2042; PSYED 2018)

Health Management Courses (6 credits)

- HRS 2435 - FINANCIAL MANAGEMENT IN HEALTH CARE *
- HRS 2445 - HUMAN RESOURCE MGT/LABOR RELTN *
- HRS 2465 - LEADERSHIP SKILL DEVELOPMENT
- HRS 2454 - LEAN SIX SIGMA AND OTHER IMPROVEMENT METHODOLOGIES IN HEALTH CARE
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE

RHIA Option (11 credits)

- HIM 1405 - MEDICAL TERMINOLOGY LAB *^
- HRS 1020 - ANATOMY AND PHYSIOLOGY *^
- HRS 2416 - INTRODUCTION TO HEALTH INFORMATION & THE HEALTH CARE SYSTEM *
- HRS 2433 - CLASSIFICATION SYSTEMS IN HEALTH CARE *
- HRS 2457 - QUALITY MANAGEMENT *
- HRS 2456 - REIMBURSEMENT SEMINAR *
- HRS 2482 - LEGAL ASPECTS OF HEALTH CARE *

Electives/Additional Coursework

- HRS 2420 - INTRO TO HEALTH INFORMATICS
- HRS 2423 - CLOUD COMPUTING, HL7 AND ANALYTICS IN HEALTH CARE
- HRS 2425 - DATA ANALYTICS: APPLICATION IN GENOMICS AND PERSONALIZED CARE
- HRS 2426 - EVALUATION OF CLASSIFICATION SYSTEMS, REFERENCE TERMINOLOGIES & DATA CAPTURE TECHNOLOGIES IN HC
- HRS 2431 - EVALUATION METHODS IN HEALTH INFORMATICS
- HRS 2432 - TELEMEDICINE, TELEREHABILITATION, AND E-HEALTH
- HRS 2434 - BUSINESS ISSUES AND DATA ANALYTICS IN HEALTH CARE
- HRS 2901 - INTRO TO RESEARCH METHODOLOGY

IMPLEMENTATION DATE: 9/1/2016

*** Required Courses for RHIA Option Students**

^Undergraduate courses do not count towards the 41 required graduate credits. These courses can be taken prior to admission or while enrolled in the program.

Please Note: All students are required to take at least 30 credits within SHRS.

****A comprehensive Examination is required and should be scheduled by the advisor and student.****

Internships for Graduate Students

Graduate students in the Department of Health Information Management in the areas of Health Information Systems and Health Care Supervision & Management are required to complete an internship as part of their curriculum. The overall goal of the internship is to provide students with practical experiences to apply their knowledge and skills that they learn in their respective graduate programs.

The HIM department has affiliation agreements with approximately 200+ clinical sites for student internships. The following list provides a sample of these sites:

- Center for Connected Medicine
- Children's Hospital of Pittsburgh - IS Department
- Children's Institute of Pittsburgh
- Excela Health
- Highmark
- M*Modal
- McKesson
- Oman HIM Institute
- United Cerebral Palsy of Pittsburgh
- University of Pennsylvania Health System
- UPMC CTSI (Clinical and Translational Science Institute)
- UPMC Department of Radiology
- UPMC eRecord
- UPMC Health Track
- UPMC Interface Development
- UPMC Physician Services Division
- UPMC Radiology Division
- UPMC Technology Development Center

Prerequisites for Graduate Internships

The following are required in order for students to be eligible to participate in an internship. The student's advisor will provide detailed information and time guidelines for completion of the requirements once the student matriculates into the graduate program.

- Physical examination including proof or completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- FBI Background Check (includes fingerprinting)
- HIPAA Training and Certification
- Students must carry personal health insurance while participating in an internship
- Students must carry professional student liability insurance coverage while participating in an internship. This coverage is provided by the SHRS group insurance plan and will appear as a charge on the students' tuition bill.
- Some sites may have additional requirements (i.e. drug screen, influenza vaccine, or orientation programs specific to their organization).
- Internship sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

Additional Information:

- Travel to internship sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.
- All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.
- Approximate cost for clearances is \$100, and costs for physical exam and immunization status are dependent on health insurance coverage and provider costs.
- Approximate cost for drug screen is \$40.
- The internship is 3 credits, and requires a minimum of 180 hours of student participation.

For more information on internships students are encouraged to contact their academic advisor.

Department of Occupational Therapy

Doctor of Occupational Therapy (OTD)

The Doctor of Occupational Therapy (OTD) Program is an entry-level educational program, which prepares students for careers as occupational therapists.

The OTD Program is a three-year (9 term) professional course of study including fieldwork, a capstone project, and an experiential preceptorship.

Admission to the OTD Program is only available on a full-time basis. The OTD Program begins the first week in June of each year.

*The entry-level occupational therapy doctoral degree program has been granted Preaccreditation Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org. The program must complete an on-site evaluation and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT certification examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

The OTD Program requires that students complete fieldwork education, and an experiential preceptorship at facilities external to the University of Pittsburgh. PLEASE NOTE: All OTD students are required to obtain the following annually - PA criminal record check, PA child abuse history clearance, PA DHS and PA DOE fingerprint background checks, personal health insurance, health screening, drug screening, influenza vaccination, CPR/AED training, and first aid training.

**On 8/16/2019, the following accreditation information was updated in the published catalog. In an effort to provide accurate information the update was made on 8/21/2019.*

Admission Requirements and Application Process

Baccalaureate Degree

Students are admitted into the OTD Program after successful completion of a baccalaureate degree with a minimum cumulative GPA of 3.00 (based on a 4.00 scale).

Prerequisite Courses

Complete the following prerequisite courses within the past 5 years with a minimum grade of B and a minimum GPA in these prerequisites of 3.00 (based on a 4.00 scale).

- Human Anatomy & Physiology (with a laboratory component), 8 credits
- Lifespan Human Development, 3 credits
- Psychopathology/Abnormal Psychology, 3 credits
- Statistics, 3 credits

Note: AP credits are not accepted as fulfillment of prerequisite courses

Graduate Record Examination (GRE)

GRE[®] General Test scores within the past 5 years (at or above the 50th percentile preferred). GRE scores must be sent to the "University of Pittsburgh OTCAS" using institution code 1894. Visit the GRE Web site for more information about the GRE.

Experience in Occupational Therapy

Complete a minimum of 40 hours of volunteer or paid work experience. These experiences should occur in at least two different occupational therapy practice areas (e.g., children and youth/pediatrics, health and wellness, productive aging/geriatrics, rehabilitation, mental health, work/industry, home care).

Letters of Recommendation

Submit three letters of recommendation attesting to the applicant's academic and professional abilities (including one from an occupational therapist and one from a college-level instructor). Letters of recommendation are submitted through the Occupational Therapy Centralized Application Service (OTCAS).

Self-Evaluation Essays

Demonstrate evidence of graduate level writing skills in responses to Pitt-OT essay questions, and a personal statement, discussing your strengths, skills, and experiences that will contribute to your success in the OTD Program and your professional goals for becoming an occupational therapist. All essays are submitted through OTCAS.

Technical Standards/Essential Skills

Attest to satisfactory performance of the technical standards/essential skills required for successful completion of the OTD curriculum. Students admitted to the OTD Program must review the Technical Standards and submit a signed form at the time of matriculation.

OTD - Technical Standards

Application Information

All applicants must apply to the OTD Program online using the Occupational Therapy Centralized Application Service (OTCAS). To learn more about the OTCAS application process and to create an OTCAS account, please visit the OTCAS portal.

Applicants are encouraged to apply early in the application cycle, which begins in mid-July each year. Prerequisite courses must be completed by January 1. Official transcripts must be sent directly to OTCAS. Letters of recommendation are submitted electronically through OTCAS. The deadline for applying to the OTD Program is February 1; however, applicants are encouraged to apply before this deadline as the Department of Occupational Therapy begins reviewing complete and verified applications in November for the program starting the following June. Applications are reviewed when all materials, including transcripts and letters of recommendation, have been received and verified by OTCAS and GRE scores are available. OTCAS uses a verification process that can take several weeks. OTCAS will verify your documents before releasing them to the University of Pittsburgh. Applicants should confirm their status as verified with OTCAS.

For questions about the receipt, processing, and verification of an application, please contact OTCAS Customer Service at 617-612-2860, otcasinfo@otcas.org.

International Applicants

- Academic Credential Evaluations - The Academic Credential Evaluation must include a course by course evaluation and be submitted with your application to OTCAS. If an international applicant has earned an undergraduate or graduate degree in the United States, the Academic Credential Evaluation is not required.
- Verification of English Language Proficiency - Applicants for whom English is not their first language must take the iBT (the Internet-based version) of the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), or have a master's degree from an English-speaking university. The minimum TOEFL score accepted is 90 and the minimum IELTS score is Band 7.0. TOEFL scores must be sent electronically through Educational Testing Service (ETS) to institution code 2927. IELTS scores must be mailed to the Department of Occupational Therapy, University of Pittsburgh, 5012 Forbes Tower, Pittsburgh, PA 15260.

The School of Health and Rehabilitation Sciences has specific requirements for international applicants.

PLEASE NOTE. Applicants who already have a baccalaureate degree in occupational therapy and are interested in obtaining a master's degree should apply to the Master of Science (MS) in Occupational Therapy Program.

Master of Science (MS) in Occupational Therapy

The Master of Science (MS) in Occupational Therapy is a one-year (3-term) graduate program housed within the Department of Occupational Therapy. This advanced practice program is designed for those with a baccalaureate degree in occupational therapy.

Post-professional graduate studies in this field enable occupational therapists to pursue advanced skills in clinical practice, management, education, research, or health and disability policy.

Admission Requirements and Application Process

Qualified applicants for the Master of Science (MS) Program in Occupational Therapy must meet the following admission requirements:

- Bachelor's degree in occupational therapy. For international students, a bachelor's degree or diploma must be from a school/university approved by the World Federation of Occupational Therapists (WFOT) in the year that the applicant graduated and/or national governmental institutions that approve/accredit occupational therapy programs to grant a degree in occupational therapy (e.g., Ministry of Health).
- Minimum cumulative grade point average of 3.00 (based on a 4.00 scale).
- Evidence of graduate level writing skills in a self-evaluation essay that discusses goals, strengths, skills, and experiences that will contribute to success in the program and in the profession. The essay should also include a brief statement discussing interest in the field of study and reasons for applying to the University of Pittsburgh.
- Documented evidence of knowledge of rehabilitation through previous paid work experiences, internships or field experiences, or volunteer work experiences.
- Three letters of recommendation, preferably from individuals who have taught the applicant in an academic setting and/or supervised clinical activities. Letters of recommendation should address academic, professional and personal attributes, and potential for successful graduate education.
- Official transcripts from all colleges/universities attended. For international students, original or certified (notarized) copies of all original language academic records (mark sheets, transcripts) from all postsecondary institutions attended. Where the official original documents are issued in a language other than English, certified English translations must also be submitted. Certified copies of the original certificates or diplomas awarded at the completion of studies must also be submitted.
- Interview (personal or virtual) with the MS Program Director and at least one other faculty member from the Department of Occupational Therapy.

In addition, internationally educated students will be required to provide:

- An Academic Credential Evaluation.
- An official score report (from ETS) of the Test of English as a Foreign Language (TOEFL). A minimum score of 550 on the written test, 213 on the computer-based test, or 80 on the internet-based test is required from all applicants whose native language is not English and/or who have not completed an academic degree from a college or university in the U.S. where the method of instruction is English. International English Language Testing System (IELTS) scores are also accepted. The minimum IELTS score is 6.5. Exemption can be applied for:
 1. applicants who have completed an undergraduate or graduate degree from a regionally accredited institution in the U.S., or
 2. citizens of a country where the official language is English.

Application Information

All applicants must:

- Complete the School of Health and Rehabilitation Sciences ApplyYourself online application;
- Submit the application fee of \$50 (U.S.); and
- Submit required documents (Admission Requirements).

Application Deadlines

Applications are accepted for enrollment beginning in the Summer term only (May). The deadline for submitting the application and all materials is February 1.

For information about our program, please contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu.

Doctor of Clinical Science (CScD) in Occupational Therapy

The Doctor of Clinical Science (CScD) Program in Occupational Therapy provides doctoral level training in advanced practice and clinical education. The CScD Program offers five areas of concentration: Master Practitioner (Geriatric, Musculoskeletal, Neurologic, or Pediatric Practice), and Clinical Education. Core courses focus on assessment, intervention, evidence-based protocols and guidelines, and data-based decision making. Each core course is paired with a colloquium or clinical rotation that provides students with mentored opportunities to apply their skills in the appropriate setting. Cognate courses focus on theory, evidence, and data collection in the student's chosen area of concentration.

Admission Requirements and Application Process

The CScD in Occupational Therapy is an advanced practice doctoral degree designed for occupational therapists who are seeking advanced knowledge and skills. There are no prerequisite courses for this degree however, applicants must have an entry-level baccalaureate or master's degree in occupational therapy from a program accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) or approved by the World Federation of Occupational Therapy (WFOT).

Occupational Therapists with Baccalaureate Degrees

Occupational therapists with a baccalaureate degree in occupational therapy, and no additional graduate degrees, should apply to the Master of Science (MS) in Occupational Therapy. Credits in the MS program will satisfy the requirements for the first 30 credits of the required 72 credits of the CScD Program.

Occupational Therapists with Master's Degrees

Occupational therapists with 1) an entry-level master's degree in occupational therapy, or 2) a baccalaureate degree in occupational therapy and an advanced master's degree in occupational therapy (or another field) may be able to transfer up to 30 credits from their master's degree, providing that these credits meet requirements in the CScD curriculum.

All Applicants

In addition to the admission requirements, applicants must provide evidence of:

- National certification in occupational therapy (NBCOT) or eligibility
- Pennsylvania state licensure in occupational therapy or eligibility
- Minimum cumulative graduate GPA of 3.00 on a 4.00 point scale
- Graduate level writing skills in an essay that addresses (a) rationale for pursuing an advanced practice doctorate, (b) chosen area of concentration, and (c) how the program is likely to change the applicant's practice
- Professional skills and conduct, collegiality, oral and written communication skills, and leadership through two letters of recommendation

Application Information

All applicants must:

- Complete the School of Health and Rehabilitation Sciences ApplyYourself online application;
- Submit the application fee of \$50 (U.S.);
- Submit required documents (Admission Requirements).

International Applicants

- An Academic Credential Evaluation.
- An official score report (from ETS) of the Test of English as a Foreign Language (TOEFL). A minimum score of 550 on the written test, 213 on the computer-based test, or 80 on the internet-based test is required from all applicants whose native language is not English and/or

who have not completed an academic degree from a college or university in the U.S. where the method of instruction is English. International English Language Testing System (IELTS) scores are also accepted. The minimum IELTS score is 6.5. Exemption can be applied for:

1. applicants who have completed an undergraduate or graduate degree from a regionally accredited institution in the U.S., or
2. citizens of a country where the official language is English.

Application Deadlines

Applications are accepted on a rolling basis for students intending to start the program in July of the same calendar year.

For More Information

Contact the Department of Occupational Therapy at (412) 383-6620 or OTpitt@shrs.pitt.edu.

Master of Occupational Therapy (MOT)

The Department of Occupational Therapy now offers a Doctor of Occupational Therapy (OTD) Program.

The Master of Occupational Therapy (MOT) Program is only available to candidates with a University of Pittsburgh Freshman Guarantee for Occupational Therapy who began undergraduate studies at the University of Pittsburgh in Fall of 2016. Candidates with Freshman Guarantee status should contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu or 412-383-6620 to inquire about the MOT application process.

The MOT Program prepares students for entry-level practice as occupational therapists. The MOT Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE's telephone number, c/o AOTA, is 301-652-AOTA and its Web address is www.acoteonline.org.

Graduates of the Program are eligible to sit for the National Certification Examination for the Occupational Therapist, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the graduate will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. A felony conviction may affect a graduate's ability to sit for the NBCOT Certification Examination or obtain a state license.

PLEASE NOTE: The MOT Program requires that students complete fieldwork education at facilities external to the University of Pittsburgh. All MOT students are required to obtain the following annually - PA criminal record check, PA child abuse history clearance, PA DHS and PA DOE fingerprint background checks, personal health insurance, health screening, drug screening, influenza vaccination, CPR/AED training, and first aid training.

Admission Requirements and Application Process

Admission Requirements

The MOT Program is only available to candidates with a University of Pittsburgh Freshman Guarantee for Occupational Therapy who began undergraduate studies at the University of Pittsburgh in Fall of 2016.

Baccalaureate Degree

Students are admitted into the MOT Program after successful completion of a baccalaureate degree and successfully maintaining the Freshman Guarantee requirements.

Prerequisite Courses

Complete the following prerequisite courses with a minimum grade of C:

- Human anatomy & physiology (with a laboratory component), 4 credits
- Behavioral sciences (psychology, sociology, and/or anthropology), 6 credits
- Statistics, 3 credits

Note: AP credits are not accepted as fulfillment of prerequisite courses

Graduate Record Examination (GRE)

Complete the GRE[®] General Test. Please arrange to send your GRE scores to the University of Pittsburgh using institution code 1894. Visit the GRE Web site for more information about the GRE.

Experience in Occupational Therapy

Complete a minimum of 20 hours of volunteer or paid work experience in at least two different occupational therapy practice areas (e.g., pediatrics, geriatrics, medical rehabilitation, psychiatric rehabilitation, home healthcare, school system).

Letters of Reference

Submit three letters of reference (one from an occupational therapist, and preferably one from a college-level instructor). Letters of Reference must be submitted directly to the Department of Occupational Therapy by the recommender. References can be emailed to OTpitt@shrs.pitt.edu or mailed to:

Department of Occupational Therapy
Bridgeside Point I
100 Technology Dr., Suite 350
Pittsburgh, PA 15219

Self-Evaluation Essays

Demonstrate evidence of graduate level writing skills in an essay (personal statement), discussing your strengths, skills, and experiences that will contribute to your success in the MOT Program and your professional goals for becoming an occupational therapist. The Self-Evaluation Essay is submitted to the Department of Occupational Therapy with the application.

Technical Standards/Essential Skills

Attest to satisfactory performance of the technical standards/essential skills required for successful completion of the MOT curriculum. Students admitted to the MOT Program must review the Technical Standards and submit a signed form at the time of matriculation.

Technical Standards/Essential Skills

Application Information

Applicants to the MOT Program apply by contacting the Department of Occupational Therapy at OTpitt@shrs.pitt.edu and requesting an application.

The MOT Program begins in June each year. To be considered for admission your application must be submitted by October 15. Prerequisite courses must be completed by January 1. The Department of Occupational Therapy begins reviewing complete applications and offering admission in November for the program starting the following June. Applications are complete when all materials, including letters of recommendation, have been received and GRE scores are available.

Official transcripts must be sent directly to the Department of Occupational Therapy at:

Department of Occupational Therapy
Bridgeside Point I

100 Technology Dr., Suite 350
Pittsburgh, PA 15219

For questions about the receipt, and processing of your application, please contact OTpitt@shrs.pitt.edu.

Program Requirements

The MOT Program is a two-year professional course of study requiring 78 credits, including fieldwork education. The MOT Program begins in June each year.

Certification

Graduates of the program will be eligible to sit for the National Certification Examination for the Occupational Therapist, administered by the National Board for Certification in Occupational Therapy, Inc. (NBCOT). After successful completion of this examination, the graduate will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. A felony conviction may prevent a graduate's ability to sit for the NBCOT Certification Examination or attain a state licensure.

Doctoral

Doctor of Clinical Science (CScD)

Program Requirements

The Doctor of Clinical Science (CScD) Program in Occupational Therapy requires 72 post-baccalaureate credits. Students with an entry-level master's degree in occupational therapy or a baccalaureate degree in occupational therapy and an advanced level master's degree in occupational therapy or another field may be eligible to transfer 30 credits from their master's degree, leaving a remaining 42 credits, thus being able to complete the program in 4 terms or 13 months. Students without a master's degree will be required to take all 72 credits, culminating in a longer program of study.

Curriculum and Course Descriptions

The program requires the completion of 72 credits (up to 30 credits may be transferred from a master's degree, potentially leaving a remaining 42 credits in the CScD program). Each student will be advised and evaluated by a doctoral committee who will oversee the development, implementation and grading of Preliminary and Comprehensive Examinations necessary to complete the program. The plan of study will be customized to each student based on his or her preferred area of concentration, and will be comprised of core courses and cognate courses. Required courses are held in the summer, fall, and spring terms.

Clinical Science Doctoral Committee

Each student will be supervised by a doctoral committee that will be formed by the end of the first term in the program. The doctoral committee will be comprised of 3 faculty, and at least 2 faculty must be appointed in the Department of Occupational Therapy. This committee will oversee the development, implementation and grading of the preliminary and comprehensive examinations.

Preliminary Examination

The preliminary examination is a written examination posed by members of the doctoral committee. Questions will address assessment concepts, intervention/education concepts, and evidence in the student's chosen area of concentration. Students must successfully pass the preliminary examination before they can propose and receive approval for their capstone project.

Comprehensive Examination

A capstone project will be developed and implemented by the student in collaboration with the doctoral committee. The comprehensive examination is the culminating written summary and oral defense of the capstone project. Students must successfully pass both the written and oral components of the comprehensive examination to complete the CScD program.

Plan of Study

Core Courses

All students will take the following eight core courses:

- OT 3000 - Advancements in Functional Assessment
- OT 3001 - Advancements in Functional Assessment Colloquium
- OT 3100 - Evidence Analysis for Improving Clinical Interventions
- OT 3101 - Evidence Analysis for Improving Clinical Interventions Colloquium
- OT 3200 - Evidence-Based Protocols and Practice Guidelines
- OT 3201 - Evidence-Based Protocols and Practice Guidelines: Clinical Rotation
- OT 3300 - Data-Based Decision Making for Clinical Practice
- OT 3301 - Data-Based Decision Making for Clinical Practice: Clinical Rotation

Cognate Courses

Cognate courses are specific to the student's chosen area of concentration or track.

Area of Concentration: Master Practitioner (Geriatrics, Pediatrics, Musculoskeletal, Neurological)

- OT 3400 - Master Practitioner Cognate Seminar 1
- OT 3500 - Master Practitioner Cognate Seminar 2
- OT 3600 - Master Practitioner Cognate Seminar 3
- OT 3700 - Master Practitioner Cognate Practicum and Capstone

Area of Concentration: Clinical Educator

- OT 3401 - Clinical Educator Cognate Seminar 1
- OT 3501 - Clinical Educator Cognate Seminar 2
- OT 3601 - Clinical Educator Cognate Seminar 3
- OT 3701 - Clinical Educator Cognate Practicum and Capstone

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the CScD program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the departmental Student Handbook on Academic and Clinical Requirements.

Doctor of Occupational Therapy (OTD)

Degree Requirements

The OTD Program is a three-year (9 term) professional course of study requiring 108 credits, including fieldwork education, an experiential preceptorship, and a capstone project. Students in the OTD Program must successfully complete all didactic coursework, Level II fieldwork, and pass a competency examination prior to the commencement of the experiential preceptorship. Students must complete Level II fieldwork and the experiential preceptorship within 24 months following completion of the didactic portion of the program.

Curriculum and Course Descriptions

Plan of Study

Term 1 - Summer Term - 8 Credits

Foundational Skills

- OT 2200 - Foundations of Occupation
- OT 2201 - Body Functions and Structures: Anatomy**
- OT 2202 - Therapeutic Approaches 1**
- OT 2203 - Clinical Seminar 1

Term 2 - Fall Term - 15 Credits

Assessment and Analysis

- OT 2204 - Human Performance Analysis**
- OT 2205 - Neurobehavioral Science**
- OT 2206 - Clinical Conditions 1
- OT 2207 - Principles of Assessment**
- OT 2208 - Critical Appraisal of Evidence
- OT 2209 - Clinical Seminar 2

Term 3 - Spring Term - 15 Credits

Intervention I

- OT 2210 - Psychosocial/Cognitive Theory and Practice**
- OT 2211 - Activity/Context Adaptation Theory and Practice**
- OT 2212 - Clinical Conditions 2
- OT 2213 - Occupational Therapy and the Health System
- OT 2214 - Therapeutic Approaches 2**
- OT 2215 - Fieldwork Education A (FW 1)**
- OT 2216 - Clinical Seminar 3

Term 4 - Summer Term - 8 Credits

Intervention II

- OT 2217 - Neurorehabilitation Theory and Practice**
- OT 2218 - Biomechanical Theory and Practice**
- OT 2219 - Fieldwork Education B (FW 1)**
- OT 2220 - Clinical Seminar 4

Term 5 - Fall Term - 13 Credits

Intervention III

- OT 2221 - Developmental Theory and Practice**
- OT 2222 - Productive Aging Theory and Practice**
- OT 2224 - Management of Occupational Therapy Practice
- OT 2225 - Project Development 1
- OT 2226 - Fieldwork Education C (FW 1)**
- OT 2227 - Clinical Seminar 5

Term 6 - Spring Term - 13 Credits

Clinical Synthesis I

- OT 2228 - Fieldwork Education D (FW 2)**
- OT 2229 - Fieldwork Education E (FW 2)**

Term 7 - Summer Term - 7 Credits

Clinical Synthesis II

- OT 2229 - Fieldwork Education E (FW 2)**

Term 8 - Fall Term - 15 Credits

Leadership I

- OT 3203 - Advanced Concepts in Clinical Reasoning
- OT 3204 - Advanced Concepts in Health Policy and Advocacy
- OT 3205 - Leadership Development
- OT 3206 - Advanced Theory and Practice**
- OT 3207 - Project Development 2

Term 9 - Spring Term - 14 Credits

Leadership II

- OT 3208 - Experiential Preceptorship (FW 3)**
- OT 3209 - Professional Development Seminar

**Course includes laboratory, fieldwork, or experiential component.

PLEASE NOTE: The OTD Program requires that students complete fieldwork education, and an experiential preceptorship at facilities external to the University of Pittsburgh. All OTD students are required to obtain the following annually - PA criminal record check, PA child abuse history clearance, PA DHS and PA DOE fingerprint background checks, personal health insurance, health screening, drug screening, influenza vaccination,

CPR/AED training, and first aid training. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and / or substance abuse.

Fieldwork and Experiential Preceptorship

Fieldwork education and the Experiential Preceptorship are essential parts of professional doctoral preparation and are integrated as components of the curriculum design. They are an extension of the OTD Program within the clinical/community setting. The fieldwork experience provides the OTD student with the opportunity to learn professional responsibilities through modeling by qualified and experienced personnel and to practice these responsibilities in a supervised setting. The Experiential Preceptorship provides an in-depth professional experience and the completion of a culminating (capstone) project. Fieldwork education and the Experiential Preceptorship are only conducted in sites that have a signed agreement (Memorandum of Understanding) with the School of Health and Rehabilitation Sciences. This agreement formally identifies the responsibilities of the University and the site.

Fieldwork education includes Level I and Level II experiences. Level I fieldwork occurs during Term 3 (OT 2215 - Fieldwork Education A), Term 4 (OT 2219 - Fieldwork Education B), and Term 5 (OT 2226 - Fieldwork Education C). Level I fieldwork is designed to enrich didactic coursework through direct observation and participation in selected aspects of the occupational therapy process. Level I fieldwork is supervised by qualified personnel (e.g., currently licensed or otherwise regulated occupational therapy practitioners, psychologists, physician assistants, teachers, social workers, nurses, and others). OTD students are assigned to Level I fieldwork sites in the Greater Pittsburgh Area by the Academic Fieldwork Coordinator in collaboration with the occupational therapy faculty. The qualifications of individuals supervising students during Level I fieldwork are reviewed by the Academic Fieldwork Coordinator to ensure that a meaningful learning experience can be provided.

Level II fieldwork is completed in Terms 6 and 7 (OT 2228 - Fieldwork Education D; OT 2229 - Fieldwork Education E). Level II fieldwork is distinct from Level I fieldwork. Students must successfully complete Level I fieldwork experiences prior to enrolling in Level II fieldwork. Level II fieldwork is an in-depth experience in delivering occupational therapy services to clients in traditional and/or emerging settings consistent with our OTD Program's curriculum design. Each OTD student is assigned to specific Level II fieldwork sites to ensure exposure to a variety of clients across the life span and to a variety of settings. Students can complete Level II fieldwork in a minimum of one setting if it is reflective of more than one practice area, or in a maximum of four different settings. The OTD Program only uses sites within the United States that allow for supervision by an occupational therapist who meets state regulations and has a minimum of one year of practice experience, subsequent to the requisite initial certification. Level II fieldwork is a minimum of the equivalent of 24 full-time work weeks. Level II fieldwork may be completed on a part-time basis as long as it is at least 50% of a full-time equivalent at the site. The OTD student is assigned to a Level II fieldwork site by the Academic Fieldwork Coordinator and signs the Level II Fieldwork Acknowledgment Agreement. The performance of a student who does not successfully complete Level II fieldwork is critically reviewed by the Academic Fieldwork Coordinator and occupational therapy faculty. Satisfactory completion of targeted interventions by the student may be required prior to enrolling in a subsequent Level II fieldwork. The faculty reserves the right to place a student at a site in the Greater Pittsburgh Area based on the student's academic performance and/or professional behavior.

After successful completion of Level II fieldwork (OT 2228; OT 2229), the OTD student engages in didactic coursework and training of advanced skills beyond the generalist level of an occupational therapist. OTD students enroll in OT 3208-Experiential Preceptorship (doctoral experiential component) (Term 9) after they have successfully completed all didactic coursework, Level I and Level II fieldworks, and a competency requirement. The Experiential Preceptorship (OT 3208) is a 16 week (640 hour) in-depth experience in clinical practice skills, research skills, administration, leadership, program and policy development, advocacy, and/or education and includes the completion of a culminating (capstone) project. The focus of the Experiential Preceptorship is on the development of skills for increased autonomy as a contributor to advancing occupational therapy practice. Preceptorships are completed in a novel practice setting or a traditional setting with a novel program, and have a connection with community issues or problems. Students are assigned a faculty mentor who oversees their Experiential Preceptorship, including the development of learning objectives and plans for supervision. The Experiential Preceptorship is distinct from Level I and II fieldwork and is the final step in the preparation of the OTD student for entry-level practice.

These learning experiences (Fieldwork education and Experiential Preceptorship) prepare the OTD student to assume the roles of practitioner, manager, and contributor upon graduation from the academic program. Prior fieldwork, volunteer, and/or work experience hours cannot be applied towards the Experiential Preceptorship hours, and a student's current work setting cannot serve as a site for his/her Experiential Preceptorship. The Experiential Preceptorship may be completed on a part-time basis.

The culminating (capstone) project is a multi-faceted investigative assignment that students begin in Term 3. It is designed to encourage students to think critically, solve challenging problems, collaborate with other professionals, and to develop advanced skills in communication, research, teamwork, planning, leadership, self-reliance, professionalism, and advocacy - skills that will prepare them to respond positively and confidently to the many opportunities and challenges in today's evolving and increasing complex practice settings. Although, the learning objectives for the Experiential Preceptorship and culminating project address all three roles of the occupational therapist - practitioner, manager, and contributor - the focus is on the development of skills for increased autonomy as a contributor to advancing occupational therapy practice. The projects address community issues or problems, and are implemented in novel practice settings.

Level II fieldwork (OT 2228; OT 2229) and the Experiential Preceptorship (OT 3208) must be completed within 24 months following completion of the didactic portions of the OTD Program. OTD students are responsible for securing all required resources in preparation for and during Level I and II fieldworks and the Experiential Preceptorship including but not limited to transportation, health screenings and associated testing, health insurance, drug screening, influenza vaccination, CPR/AED training, first aid training, liability insurance, background checks and clearances, parking, housing, food, and clothing.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the OTD Program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the policies and procedures in the SHRS Graduate Student Handbook and the OTD Student Manual.

Master's

Master of Occupational Therapy (MOT)

The Department of Occupational Therapy now offers a Doctor of Occupational Therapy (OTD) degree program.

The Master of Occupational Therapy (MOT) degree program is only available to candidates with a University of Pittsburgh Freshman Occupational Therapy Guarantee who began undergraduate studies at the University of Pittsburgh in Fall of 2016. Candidates with Freshman Occupational Therapy Guarantee status should contact the Department of Occupational Therapy at OTpitt@shrs.pitt.edu or 412-383-6620.

Degree Requirements

The entry-level MOT Program is a two-year professional course of study requiring 78 credits, including fieldwork education.

Certification

Graduates of the Program are eligible to sit for the National Certification Examination for the Occupational Therapist, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this examination, the graduate will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. A felony conviction may affect a graduate's ability to sit for the NBCOT Certification Examination or obtain a state license.

Curriculum and Course Descriptions

There are a total of 78 credits for the MOT Program and a minimum GPA of 3.00 (based on a 4.00 scale) is required for graduation. Most courses in the MOT curriculum require the successful completion of one or more prerequisite courses (see individual course descriptions for prerequisites).

Plan of Study

Term 1* - Summer Term - 7 Credits

- OT 2100 - Foundations of Occupation Science and Occupational Therapy**
- HRS 2022 - Human Anatomy**
- OT 2203 - Clinical Seminar 1

Term 2 - Fall Term - 15 Credits

- OT 2101 - Human Movement Analysis**

- OT 2104 - Clinical Psychiatry
- OT 2105 - Clinical Medicine
- OT 2106 - Clinical Research for Occupational Therapy
- OT 2109 - Neurobehavioral Science / MOT **
- OT 2207 - Principles of Assessment **
- OT 2209 - Clinical Seminar 2
- OT 2113 - Rehabilitation Theory and Practice**

Term 3 - Spring Term - 15 Credits

- OT 2107 - Psychosocial/Cognitive Theory and Practice / MOT **
- OT 2108 - Clinical Neurology and Orthopedics
- OT 2111 - Occupational Therapy and the Health Care System
- OT 2113 - Rehabilitation Theory and Practice / MOT **
- OT 2214 - Therapeutic Approaches 2 **
- OT 2216 - Clinical Seminar 3

Term 4 - Summer Term - 7 Credits

- OT 2112 - Neurorehabilitation Theory and Practice**
- OT 2114 - Biomechanical Theory and Practice / MOT **
-

Term 5 - Fall Term - 14 Credits

- OT 2115 - Developmental Theory and Practice / MOT **
- OT 2116 - Integrative Capstone Seminar
- OT 2117 - Management of Occupational Therapy Practice / MOT
- OT 2118 - Special Topics in Occupational Therapy Theory and Practice **
- OT 2227 - Clinical Seminar 5

Terms 6 & 7 - Spring and Summer Terms - 20 Credits***

- OT 2119 - OT Fieldwork Education A (FW 2)
- OT 2120 - OT Fieldwork Education B (FW 2)

* Term 1 begins in early June.

** Includes laboratory component with associated fee.

*** Fieldwork A and B must be completed within 3 years of completing didactic coursework. A misdemeanor or felony charge or conviction may affect a student's ability to complete courses with a fieldwork component.

PLEASE NOTE: The MOT Program requires that students complete fieldwork education at facilities external to the University of Pittsburgh. All MOT students are required to obtain the following annually - PA criminal record check, PA child abuse history clearance, PA DHS and PA DOE fingerprint background checks, personal health insurance, health screening, drug screening, influenza vaccination, CPR/AED training, and first aid training. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or felonious or illegal act associated with alcohol and/or substance abuse.

Academic Standards

In addition to following University-wide academic rules and regulations as detailed in the General Academic Regulations section of this Catalog, the MOT Program is regulated by the School of Health and Rehabilitation Sciences Academic Standards, as well as the departmental Student Manual.

Master of Science (MS) in Occupational Therapy

Program Requirements

The program begins in the Summer term (May) each year and requires the completion of 33 credits (9 credits in Professional Foundations; 12 credits in Assessment/Analysis; 12 credits in Intervention). A Comprehensive Examination is required at the end of the Spring term and prior to graduation.

Curriculum and Course Descriptions

Plan of Study:

The program requires the completion of 33 credits (9 credits in Professional Foundations; 12 credits in Assessment/Analysis; 12 credits in Intervention).

The following is a typical plan of study for students enrolled in the Master of Science (MS) Program in Occupational Therapy (OT).

Summer Term - 9 Credits

- OT 2200 - Foundations of Occupation
- OT 2202 - Therapeutic Approaches 1
- OT 2218 - Biomechanical Theory & Practice
- OT 2203 - Clinical Seminar 1
- OT 2241 - Clinical Preceptorship 1 OR HRS 2594 - Research Preceptorship

Fall Term - 12 Credits

- OT 2221 - Developmental Theory and Practice OR OT 2222 Productive Aging Theory and Practice
- OT 2207 - Principles of Assessment
- OT 2224 - Management of Occupational Therapy Practice
- OT 2208 - Critical Appraisal of Evidence
- OT 2209 - Clinical Seminar 2
- OT 2242 - Clinical Preceptorship 2 OR HRS 2594 - Research Preceptorship

Spring Term - 12 Credits

- OT 2210 - Psychosocial/Cognitive Theory and Practice
- OT 2213 - Occupational Therapy and the Health System
- OT 2240 - Special Topics in Occupational Therapy
- OT 2214 - Therapeutic Approaches 2
- OT 2216 - Clinical Seminar 3
- OT 2243 - Clinical Preceptorship 3 OR HRS 2594 - Research Preceptorship

Comprehensive Examination:

Each student must successfully complete a Comprehensive Examination. This examination is used to determine mastery of the core content in the curriculum.

Preceptorship

Preceptorships provide advanced experiential learning in an area of occupational therapy practice for the purpose of advancing skills and knowledge in that practice area. For internationally educated occupational therapists a clinical preceptorship can also be customized for the purpose of developing familiarity with the U.S. health care system.

MS students have taken advantage of preceptorships to gain advanced skills (e.g., burns rehabilitation), participate in program development activities (e.g., designing an energy conservation and work simplification program for individuals with chronic respiratory diseases), develop teaching modules for entry-level program courses (e.g., assistive technology, neuroscience and neurorehabilitation), develop familiarity with health and disability policy, and design and implement scholarly projects.

For all preceptorship experiences, in addition to the site mentor, students are assigned a faculty mentor who guides them through the preceptorship. The student and faculty mentor meet prior to the start of the preceptorship to discuss goals for the preceptorship, a plan of action for achieving the goals, and the evaluation process. The student and faculty mentor meet throughout the preceptorship to discuss the student's progress. Students find the preceptorships to be rewarding experiences that advance their clinical skills and career development.

Department of Physical Therapy

The Department of Physical Therapy offers three academic programs of study:

- DPT program leading to the DPT degree
- Joint DPT/PhD program leading to a DPT degree and a PhD in Bioengineering
- M.S. in Health & Rehabilitation Sciences with a concentration in neuromuscular or musculoskeletal physical therapy

Doctoral

Physical Therapy, DPT

Doctor of Physical Therapy (DPT) Degree

The Doctor of Physical Therapy (DPT) program is the entry-level educational program which prepares students for careers as physical therapists. Upon successful completion of the curriculum, a student is eligible for the licensure examination, which is required to be a practicing physical therapist. The goal of the DPT curriculum is to prepare students to become self-directed, self accountable physical therapists who can function in a cost-effective manner in all settings, and with persons of all ages. Graduates of the program will be prepared to enhance human movement and function through the use of evidence-based practice principles. Physical therapy graduates will have a foundation on which to base further knowledge and skills in specialty areas and to contribute to development of the art and science of physical therapy.

Contact Information

M. Kathleen Kelly, PhD, PT
Vice Chair, DPT Program
Department of Physical Therapy
School of Health and Rehabilitation Sciences
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
412-383-6637
Fax: 412-648-5970
E-mail: ptinfo@shrs.pitt.edu
www.shrs.pitt.edu/dpt/

Application Process

Admission to the Doctor of Physical Therapy program is only available on a full-time basis. The DPT program begins the first week of June each year. All applicants must apply to the program through the PT Centralized Application Service (PTCAS). This information is located on the Department website.

Admissions Requirements

To be eligible to apply to the DPT program, applicants must have earned a bachelor's degree, taken and successfully passed all prerequisite coursework, taken the Graduate Record Exam (GRE-general) within the last five years, and must demonstrate evidence of experience in a physical therapy setting in either a volunteer or paid capacity.

- Graduate Record Examination - (GRE -general). GRE scores must be sent to institution code 7754
- Minimum GPA of 3.0 (based on a 4.0 scale)
- 3 letters of recommendation: 1 from a licensed physical therapist (from applicant's volunteer or work experience in a PT setting); 1 from a college level professor; 1 from either of the following: a licensed physical therapist or a supervisor/employer (preferably in a healthcare or related setting).
- Demonstrated evidence of adequate exposure to the field of physical therapy and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a physical therapy setting; there is no minimum number of hours required. It is preferable for applicants to show evidence of the willingness to work with a variety of patients in different physical therapy settings
- The Department faculty have outlined the Technical Standards deemed essential for successful completion of the DPT curriculum. Students admitted to the DPT program must review the Technical Standards and submit a signed form at the time of matriculation
- Please note that many clinical sites will require a Child Abuse clearance (Act 33), Criminal Background check (Act 34), and a drug screen prior to participation in a clinical education experience. **If you do not** have a clean background check for either Act 33/34 clearance, or a clean drug screen you may not be able to participate in Clinical Education and therefore will not be able to meet the DPT requirements for graduation.

Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act and if you have a record you may not be able to become licensed to practice your profession after graduation.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs, 8 credit hours
- Physics I and II sequence with labs, 8 credit hours
- Biology I and II sequence with labs, 8 credit hours
- Anatomy (human, vertebrate, comparative or anatomical kinesiology), 3 credit hours
- Physiology (human physiology preferred), 3 credit hours
*A two course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours
**Science courses must be for science majors or pre-med majors. Introductory or remedial courses are not accepted as prerequisites.
- Two courses in Psychology: should include a general psychology course and a specialized psychology course such as: developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours
- Statistics, 3 credit hours
- English Writing (English composition or an upper-division writing course), 3 credit hours

At the time of application no more than 2 courses can be outstanding and must be completed prior to starting the program. Courses MUST BE completed within the past 5 years.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this catalog, the DPT program is regulated by the *SHRS Academic Standards*.

Statute of Limitations

All requirements of the DPT must be completed within three years. Extension of the statute of limitations may be granted if there are extenuating circumstances. Such requests, listing reasons for the extension and the amount of additional time needed, must be approved by the department chair.

Comprehensive Examinations

Students in the DPT program are required to pass a written comprehensive examination before the Doctor of Physical Therapy degree can be awarded. The written comprehensive examination is a cumulative examination covering the core clinical sciences and focusing on physical therapy practice.

Degree Requirements

The Doctor of Physical Therapy program is a three-year (8 semester*) professional course of study including clinical internships.

**From a Academic Proposal approved on September 18th, 2019 the terms were reduced from 9 to 8. This changed was made on 9/30/2019.*

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes more than 65 weeks of clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and have a 1 year internship at the end of their didactic phase of the plan of study.

Joint Degree

Physical Therapy/Bioengineering, DPT/PhD

The Doctor of Physical Therapy (DPT) - PhD in Bioengineering program combines the entry-level DPT leading to licensure as a physical therapist, with a PhD in Bioengineering that will prepare the student to become an independent researcher. The program will integrate clinical and research experiences, with students receiving mentorship from faculty in the departments of Physical Therapy and Bioengineering. Students should have a Bachelor's degree or higher in engineering or engineering-related discipline, with a strong interest in physical therapy.

Contact Information

Patrick Sparto, PhD, PT
Co-Director, DPT-PhD Program
Department of Physical Therapy
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
Phone: 412-383-6732
Fax: 412-648-5970
E-mail: psparto@pitt.edu

Application Process

Applications will need to be submitted through the PT Centralized Application Service (PTCAS) by end of November for admission to the program the following June. The application is reviewed by faculty in both departments.

Admission Requirements

Students will need to meet the admission requirements of both programs. Applicants must have a minimum of a Bachelor's degree in a field of engineering or closely related (e.g. physics, or applied mathematics, kinesiology). Applicants must demonstrate evidence of exposure to the field of PT through volunteer or work experience. Applicants must submit 4 letters of reference: one physical therapist with whom the student has

volunteered or worked for, two academic advisors, and one research supervisor. A minimum GPA of 3.0 is required but competitive applicants typically have a 3.5 GPA or greater. Applicants must take the GRE exam; typically, admitted students have GRE scores greater than the 50th percentile.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs, 8 credit hours
- Physics I and II sequence with labs, 8 credit hours
- Biology I and II sequence with labs, 8 credit hours
- Anatomy (human, vertebrate, comparative or anatomical kinesiology), 3 credit hours
- Physiology (human physiology preferred), 3 credit hours
 *A two course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours
 **Science courses must be for science majors or pre-med majors. Introductory or remedial courses are not accepted as prerequisites.
- Two courses in Psychology: should include a general psychology course and a specialized psychology course such as: developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours
- Statistics, 3 credit hours
- English Writing (English composition or an upper-division writing course), 3 credit hours

At the time of application no more than 2 courses can be outstanding and must be completed prior to starting the program. Courses MUST BE completed within the past 5 years.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the DPT program is regulated by the *SHRS Academic Standards*.

Curriculum Overview

Students will follow the typical plan of study for DPT students for the initial eight terms (i.e. 2 2/3 years) of the program. Then students will follow the plan of study for PhD students in Bioengineering. Clinical internships and research experiences will be performed throughout the program. At a minimum, the program will take 6 years to complete. After completing the didactic and clinical requirements of the DPT program, the student will be allowed to take the licensing exam. Students are required to write and orally defend a dissertation to complete their PhD degree.

DPT Curriculum

The course requirements for the DPT include the following:

- Basic Science (Anatomy, Neuroscience, Exercise Physiology, Pharmacology)-16 credits
- Clinical Science (Kinesiology, Musculoskeletal PT, Neuromuscular PT, Cardiopulmonary PT, Patient Management, Human Disease, Geriatrics Growth and Development)-52 credits
- Critical Inquiry (Research Methods, Evidence-Based Practice) -9 credits
- Leadership and Professional Development-6 credits
- Clinical Education-28 credits

Total number of credit hours: 111 credits. Students are required to pass a written comprehensive examination before the Doctor of Physical Therapy degree can be awarded. The written comprehensive examination is a cumulative examination covering the core clinical sciences and focusing on physical therapy practice.

Courses	Credits
Basic Science (Anatomy, Neuroscience, Exercise Physiology, Pharmacology)	16
Clinical Science (Kinesiology, Musculoskeletal PT, Neuromuscular PT, Cardiopulmonary PT, Patient Management, Human Disease, Geriatrics Growth and Development)	52

Critical Inquiry (Research Methods, Evidence-Based Practice)	9
Leadership and Professional Development	6
Clinical Education	28
Total:	111

PhD Requirements

The course requirements for the PhD in bioengineering for the combined program include the following:

- Bioengineering Track Courses-9 credits
- Graduate Electives-6 credits
- Seminar-5 credits total-4 credits must be Bioengineering Seminar
- Graduate Engineering Mathematics-3 credits
- Statistics for Bioengineers-3 credits
- Societal, Political, and Ethical Issues in Bioengineering-3 credits
- Teaching Practicum-2 credits
- Grant Writing in Bioengineering-1 credit
- Doctoral Dissertation Research-40 credits

Total number of credit hours: 72 credits minimum (plus the credits associated with the remedial courses, as applicable.) Students typically take the PhD preliminary exam after their first year in the program, and PhD proposal (comprehensive examination) is presented generally at the end of the second year. A final public PhD defense is made by each PhD candidate based on the student's research work.

Master's

Physical Therapy - Musculoskeletal Physical Therapy Concentration, MS

This program is designed for the practicing physical therapy professional who has already earned an entry-level degree in physical therapy. This post-professional graduate plan of study enables physical therapists to improve their clinical knowledge and clinical skills through a specific program of advanced physical therapy practice and scholarship. The Master of Science in Health and Rehabilitation Science program offers a choice of concentrations in Physical Therapy: Musculoskeletal Physical Therapy and Neuromuscular Physical Therapy. This program is designed to provide advanced clinical skills in the areas of musculoskeletal and neuromuscular physical therapy. The program leads to a professional clinical degree at the post baccalaureate level. The program is 12 months in length and 33 credit hours.

Contact Information

Program Director
Department of Physical Therapy
School of Health and Rehabilitation Sciences
Bridgeside Point 1
100 Technology Drive Room 242
Pittsburgh, PA 15219
Phone: 412-383-8169
Fax: 412-648-5970
E-mail: ptinfo@shrs.pitt.edu

Application Process

All applicants must:

- Apply online using the SHRS ApplyYourself application
- Submit the application fee of \$50 (US)
- Submit an essay-a description of educational and long-term professional goals
- Submit three letters of recommendation. These references can be from a college instructor/professor, academic advisor, supervisor or employer, etc. The letters should address the applicant's academic, professional and personal attributes and potential for successful graduate study
- Submit official transcripts/marksheets from all colleges and universities attended.

Admission Requirements

For admission to full graduate status an applicant must demonstrate:

- A minimum grade point average (GPA) of 3.0 from their entry-level professional physical therapy program (equivalent GPA determined via credential evaluation)
- Evidence of potential for success in a graduate program that can be demonstrated through past work experiences, continuing education, and letters of recommendation

Admissions decisions will be based on an overall evaluation of all credentials submitted and the availability of space in the class.

Additional requirements for International Applicants:

Academic Credential Evaluation

- Evaluations are accepted from International Consultants of Delaware, Inc. (ICD), Educational Credential Evaluators, Inc. (ECE) or Joseph Silney & Associates, Inc. (JS&A)
- A course by course evaluation including a grade point average equivalent is required
- A final transcript/marksheet and diploma (degree certificate) showing completion of the undergraduate degree must be submitted prior to starting the program
- If an international student has earned an undergraduate or graduate degree in the United States, this evaluation is not required
- If you are a US Citizen who earned their degree outside the US an academic credential evaluation IS required
- We do not accept WES evaluations

English Language Proficiency Scores

The University of Pittsburgh will accept the following as verification of english language proficiency:

- TOEFL - minimum scores accepted are 80 ibt (internet based test) or 550 pbt (paper based test). TOEFL scores must be sent via ETS to the University of Pittsburgh, institution code 2927
- IELTS - minimum score accepted is Overall Band 6.5. IELTS scores must be mailed directly from the testing center to SHRS Office of Admissions, 4020 Forbes Tower, University of Pittsburgh, Pittsburgh, PA, 15260

Verification of English Language Proficiency is required unless the following apply:

- The applicant is a citizen of a country whose ONLY official language is English
- The applicant has completed a degree at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English

For detailed information about these requirements and additional helpful information for international applicants please visit the International Applicants information on the SHRS website.

Note: Application can be submitted while the first professional degree is in progress provided the applicant will be able to provide evidence of successful degree completion prior to starting the program.

Application deadline: April 15. Applications submitted and/or completed after the deadline will be reviewed on a case by case basis. Please contact admissions@shrs.pitt.edu.

We encourage international student applications.

Program Requirements

Examination and Testing

Throughout the plan of study, a series of written and/or oral-practical examinations are integrated within the formal course work. These examinations are used to determine mastery of the core elements of the plan of study.

The written examination will cover the levels of "application and analysis" and "synthesis and analysis" so as to gauge the student's ability to utilize information in their clinical decision making.

The practical examinations will focus on the clinical application of therapeutic assessment and treatment techniques. Students will be expected to demonstrate appropriate patient handling, awareness of safety issues, application of technique, and decision-making rationale at the level of an advanced clinician.

Failure to meet any of the above requirements may result in the student not being recommended for graduation from the program.

Curriculum and Course Descriptions

Students in the MS in Health and Rehabilitation Sciences can choose from either a Musculoskeletal PT concentration or a Neuromuscular PT concentration. Upon completion of either one, students will be awarded a Master of Science (MS) degree in Health and Rehabilitation Sciences.

The MS in Health and Rehabilitation Sciences requires the minimum completion of 33 credits. Students must maintain an overall 3.0 GPA in their required plan of studies in order to be considered a candidate for graduation.

Musculoskeletal Concentration Curriculum

Fall

- HRS 2314 - Fundamentals of Neuroscience for the Orthopedic Clinician, 4 credits
- HRS 2362 - Evidence Based Practice - Clinical Considerations for the Lower Extremity, 3 credits
- HRS 2372 - Advanced Clinical Practice, The Lower Quarter, 3 credits
- HRS 2907 - Clinical Investigations, 2 credit

Spring

- HRS 2307 - Falls & Balance Dysfunction: PT Management and Intervention, 3 credits
- HRS 2309 - Analysis Neuromusculoskeletal Signs/Symptoms in Clinical Decision Making, 3 credits
- HRS 2361 - Evidence Based Practice - Clinical Considerations for the Lumbo Pelvic Spine, 3 credits
- HRS 2373 - Advanced Clinical Practice: The Upper Quarter, 3 credits

Summer

- HRS 2308 - Clinical Practice Seminar, 2 credits
- HRS 2374 - Clinical Rounds and Case Presentations, 1 credit
- HRS 2380 - Evidence Based Practice - Clinical Considerations for the Cervical and Thoracic Spine, 3 credits
- HRS 2381 - Evidence Based Practice - Clinical Considerations for the Upper Extremity, 3 credits

*

Note that each course in the plan of study is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence, (e.g. failure to receive a passing grade of 'C' or better; leave of absence from program) will result in a one year delay in completing the course, the remaining program requirements, and the year of graduation.

Physical Therapy - Neuromuscular Physical Therapy Concentration, MS

This program is designed for the practicing physical therapist professional who has already earned an entry-level degree in physical therapy. This post-professional graduate plan of study enables physical therapists to improve their clinical knowledge and clinical skills through a specific program

of advanced physical therapy practice and scholarship. The Master of Science in Health and Rehabilitation Science program offers a choice of concentrations in Physical Therapy: Musculoskeletal Physical Therapy and Neuromuscular Physical Therapy. This program is designed to provide advanced clinical skills in the areas of musculoskeletal and neuromuscular physical therapy. The program leads to a professional clinical degree at the post baccalaureate level. The program is 12 months in length and 33 credit hours.

100 Technology Drive Suite 210
Pittsburgh, PA 15219
Phone: 412-383-8169
Fax: 412-648-5970
E-mail: ptinfo@shrs.pitt.edu

Application Process

All applicants must:

- Apply online using the SHRS ApplyYourself application;
- Submit the application fee of \$50 (US);
- Submit an essay-a description of educational and long-term professional goals;
- Submit three letters of recommendation. These references can be from a college instructor/professor, academic advisor, supervisor or employer, etc. The letters should address the applicant's academic, professional and personal attributes and potential for successful graduate study;
- Submit official transcripts/marksheets from all colleges and universities attended.
- Additional requirements for international applicants- including academic credential evaluation and English language proficiency requirements.

Admission Requirements

For admission to full graduate status an applicant must demonstrate:

- A minimum grade point average (GPA) of 3.0 from their entry-level professional physical therapy program (equivalent GPA determined via credential evaluation)
- Evidence of potential for success in a graduate program that can be demonstrated through past work experiences, continuing education, and letters of recommendation

Admissions decisions will be based on an overall evaluation of all credentials submitted and the availability of space in the class.

Additional requirements for International Applicants:

Academic Credential Evaluation

- Evaluations are accepted from International Consultants of Delaware, Inc. (ICD), Educational Credential Evaluators, Inc. (ECE) or Joseph Silney & Associates, Inc. (JS&A)
- A course by course evaluation including a grade point average equivalent is required
- A final transcript/marksheet and diploma (degree certificate) showing completion of the undergraduate degree must be submitted prior to starting the program
- If an international student has earned an undergraduate or graduate degree in the United States, this evaluation is not required
- If you are a US Citizen who earned their degree outside the US an academic credential evaluation IS required

English Language Proficiency Scores

The University of Pittsburgh will the following as verification of english language proficiency:

- TOEFL - minimum scores accepted are 80 ibt (internet based test) or 550 pbt (paper based test). TOEFL scores must be sent via ETS to the University of Pittsburgh, institution code 2927

- IELTS - minimum score accepted is Overall Band 6.5. IELTS scores must be mailed directly from the testing center to SHRS Office of Admissions, 4020 Forbes Tower, University of Pittsburgh, Pittsburgh, PA, 15260

Verification of English Language Proficiency is required unless the following apply:

- The applicant is a citizen of a country whose ONLY official language is English
- The applicant has completed a degree at a regionally accredited institution in the U.S.
- The applicant is not a citizen of a country whose official language is English but has completed a degree program at an institution outside of the U.S. where the language of instruction is English and where the official national language of the country in which the institution is located is English

For detailed information about these requirements and additional helpful information for international applicants please visit the International Applicants information on the SHRS website.

Note: Application can be submitted while undergraduate degree is in progress provided the applicant will be able to provide evidence of successful degree completion prior to starting the program.

Application deadline: April 15. Applications submitted and/or completed after the deadline will be reviewed on a case by case basis. Please contact admissions@shrs.pitt.edu.

We encourage international student applications.

Program Requirements

Examination and Testing

Throughout the plan of study, a series of written and/or oral-practical examinations are integrated within the formal course work. These examinations are used to determine mastery of the core elements of the plan of study.

The written examination will cover the levels of "application and analysis" and "synthesis and analysis" so as to gauge the student's ability to utilize information in their clinical decision making.

The practical examinations will focus on the clinical application of therapeutic assessment and treatment techniques. Students will be expected to demonstrate appropriate patient handling, awareness of safety issues, application of technique, and decision-making rationale at the level of an advanced clinician.

Failure to meet any of the above requirements may result in the student not being recommended for graduation from the program.

Curriculum and Course Descriptions

Students in the MS in Health and Rehabilitation Sciences can choose from either a Musculoskeletal PT concentration or a Neuromuscular PT concentration. Upon completion of either one, students will be awarded a Master of Science (MS) degree in Health and Rehabilitation Sciences. The MS in Health and Rehabilitation Sciences requires the minimum completion of 33 credits. A comprehensive examination sequence is required following completion of the core coursework in each of the separate concentrations. Students must maintain an overall 3.0 GPA in their required plan of studies in order to be considered a candidate for graduation.

Neuromuscular Concentration Curriculum

Fall

- HRS 2305 - Advanced Neuroscience, 4 credits
- HRS 2306 - Motor Learning and Control of Movement/Health Promotion, 3 credits
- HRS 2372 - Advanced Clinical Practice: The Lower Quarter, 3 credits
- HRS 2907- Clinical Investigations, 2 credits

Spring

- HRS 2307 - Falls & Balance Dysfunction: PT Management and Intervention, 3 credits

- HRS 2309 - Analysis Neuromusculoskeletal Signs/Symptoms in Clinical Decision Making, 3 credits
- HRS 2356 - Concepts and Principles Related to Sensorimotor Control, 3 credits
- HRS 2373 - Advanced Clinical Practice: The Upper Quarter, 3 credits

Summer

- HRS 2312 - Seminar in Neurologic PT, 2 credits
- HRS 2364 - Evidence Based Medical & Physical Therapy Interventions for Persons with Neuromuscular Disease, 3 credits
- HRS 2365 - Case Studies of Persons with Neuromuscular Disorders, 3 credits
- HRS 2374 - Clinical Rounds and Case Presentations, 1 credit
- Comprehensive Exam Sequence

*

Note that each course in the plan of study is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence, (e.g. failure to receive a passing grade of 'C' or better; leave of absence from program) will result in a one year delay in completing the course, the remaining program requirements, and the year of graduation.

Program 1: Master of Science in Clinical Rehabilitation and Mental Health Counseling

<http://www.shrs.pitt.edu/mscrmh/>

Overview

Clinical Rehabilitation and Mental Health Counseling is a program that blends the important concepts of rehabilitation and mental health counseling to provide a strong, cohesive training program for clinical and professional counselors. Clinical Rehabilitation and Mental Health Counselors are uniquely qualified to work with individuals with disabilities, particularly those who are experiencing psychiatric disabilities or other mental and behavioral health concerns.

The mission of our program is to improve individual and community mental health and rehabilitation outcomes through the clinical education and training of outstanding professional counselors. Our program integrates counseling, clinical services, research, and advocacy with a strengths-based, empowerment focus.

This program prepares students for clinical practice in rehabilitation and mental health counseling. The two-year, 60-credit hour curriculum includes courses on foundations of rehabilitation and mental health counseling, human development across culture and the lifespan, individual, group, family and couples counseling, substance abuse, evidence based practice in counseling, crisis management, risk assessment and disaster preparedness, clinical assessment and diagnosis, case conceptualization and treatment planning, medical and psycho-social aspects of disability, case management, vocational and career development, job development and placement, and assistive technology. Individualized and group professional mentorship over a students to years of study is a hallmark of the program.

Graduates meet eligibility criteria for national certification in rehabilitation counseling (i.e., certified rehabilitation counselor, CRC), professional counseling (National Counselor Certification, NCC and satisfy the educational requirements for licensure as a professional counselor (LPC).

Prerequisites

The curriculum of study for clinical rehabilitation and mental health counseling relies upon having experienced a strong undergraduate education that has provided a sound foundation in knowledge, methods, and attitudes. Students must possess foundational knowledge of the concepts and terminology in medical, psychological, and sociological sciences on which to build the knowledge and skills of the rehabilitation and mental health counseling curriculum.

Students must have the ability to communicate in a clear, organized, and logical fashion with appropriate grammar, both verbally and in writing.

Admission is available on a full-time or part-time basis. Exceptions may be granted to outstanding students who do not meet all of the prerequisite requirements.

Admission Requirements

- Baccalaureate degree in psychology, human services, rehabilitation sciences, social sciences, or related field of study from an accredited post-secondary institution
- Minimum overall undergraduate GPA of 3.00.
- Applicants must demonstrate that they possess foundation knowledge of the concepts and terminology in medical, psychological, and sociological sciences on which to build the rehabilitation counseling curriculum. Students must have the ability to communicate in a clear, organized, and logical fashion with appropriate grammar, both verbally and in writing.

All applicants must:

- Complete the SHRS ApplyYourself online application
- Submit the \$50 application fee (U.S.)
- Submit official transcripts from all colleges and universities attended
- Submit a minimum of three letters of recommendation - Preferably from individuals who have instructed you in academic settings and/or supervised research activities
- Submit a personal statement - Description of educational and long-term professional goals
- Curriculum Vitae or Resume
- Participate in an interview - Applicants may be required to complete a group interview with the counseling faculty as a part of the application process. Face to face interviews are preferred but other means can be arranged if indicated.

This program requires that student's complete clinical internships at facilities external to the University, and such facilities may require a criminal background check, an Act 33/34 clearance, and a drug screen to determine whether the student is qualified to participate in the clinical internships. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Program 2: Master of Sciences in Health and Rehabilitation Sciences with a Concentration in Rehabilitation Counseling

Overview

The program curriculum is designed to permit the student to obtain the essential knowledge, skills, and attitudes necessary to function effectively as a professional rehabilitation counselor. The curriculum includes courses on rehabilitation research, foundations of vocational rehabilitation, counseling services, medical, psychological and social aspects of disability, case management, vocational and career development, assessment, job development and placement, rehabilitation science and assistive technology, and disability studies.

Prerequisites

The curriculum of study for rehabilitation counseling is based upon having experienced a strong undergraduate education that has provided a sound foundation in knowledge, methods, and attitudes. Students must possess foundational knowledge of the concepts and terminology in medical, psychological, and sociological sciences on which to build the rehabilitation counseling curriculum.

Students must have the ability to communicate in a clear, organized, and logical fashion with appropriate grammar, both verbally and in writing.

Admission is available on a full-time or part-time basis. Provisional special status may be granted to outstanding students who do not meet all of the prerequisite requirements.

Admission Requirements

- Required credits/degrees: Completion of a baccalaureate degree from an accredited institution (no specific major) from a curriculum with a distribution of studies in psychology, counseling, and social sciences
- Required quality point average: 3.0

Prerequisite Courses

- Psychology, counseling, or human development, 6 credits
- Statistics, 3 credits
- English composition or technical writing, 3 credits

Application Requirements

All applicants must:

- Complete the SHRS ApplyYourself online application;
- Submit the application fee of \$50 (U.S.);
- Submit an essay—a description of educational and long-term professional goals;
- The applicant should demonstrate knowledge of rehabilitation through previous work experiences, internships, field experiences, or volunteer work experiences;
- Submit three letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, and personal attributes and potential for meaningful graduate study;
- Submit official transcripts from all colleges and universities you have attended;
- Additional requirements for international applicants.

Note: Application can be submitted when course requirements are in progress.

Please note this program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the clinical internships. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Admission Requirements and Application Process

<http://www.shrs.pitt.edu/msrc/admission>

The curriculum of study for rehabilitation counseling is based upon having experienced a strong undergraduate education that has provided a sound foundation in knowledge, methods, and attitudes.

Specific requirements for admission to rehabilitation counseling are:

1. A Baccalaureate degree. (No specific major is mandated; however, prerequisite study for post baccalaureate advanced education should include a well-rounded general education that includes a distribution of studies in psychology, counseling and social sciences) Computer literacy is essential.
2. Prerequisite coursework includes foundation courses in the following areas:
 - o Psychology, counseling, or human development (2 courses)
 - o Statistics or research design
 - o English composition or Technical Writing
3. Students must possess foundation knowledge of the concepts and terminology in medical, psychological, and sociological sciences on which to build the rehabilitation counseling curriculum.
4. The applicant must have a minimum overall GPA of 3.00, and a 3.00 in the prerequisite courses
5. The applicant should demonstrate knowledge of rehabilitation through previous work experiences, internships or field experience, or volunteer work experience.

Applications are accepted on a rolling basis.

Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Master of Science Degree in Physician Assistant Studies

The Physician Assistant Degree program prepares students to become highly qualified physician assistants. The University of Pittsburgh graduates will go on to serve as tomorrow's leaders in patient centered care, education and professional service.

Physician Assistants (PAs) are health care professionals licensed to practice medicine with physician supervision. PAs practice primary and specialty patient care in medical and surgical settings throughout the United States and worldwide. In order to practice, Physician Assistants must graduate from an accredited educational program and become certified through an examination by the National Commission on Certification of Physician Assistants (NCCPA).

The University of Pittsburgh Physician Assistant Studies Program received Accreditation by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA) in March of 2012, following a site visit in September 2011. This program was awarded continuing accreditation through March of 2018. Students are admitted into the program upon successful completion of: an undergraduate degree at an accredited institution and fulfillment of all prerequisites.

Applications are accepted through CASPA each year from mid April to November 1. Students are admitted each spring semester.

Master of Science in Prosthetics and Orthotics

Contact Information

Meghan Wander
Department of Rehabilitation Science and Technology
6425 Penn Ave., Ste. 401
Pittsburgh, PA 15206
412-624-6366
Fax: 412-624-6501
E-mail: mew135@pitt.edu
<http://www.shrs.pitt.edu/po/>

Program Overview

Orthotics and Prosthetics is the evaluation, fabrication and custom fitting of artificial limbs and orthopedic braces. Orthopedic braces, or orthoses, are used to stabilize or unload joints, normalize motion and stresses on tissue, substitute for muscle weakness or paralysis, and assist in normal growth, development and function. Orthoses can be applied to the head, neck, trunk, or limbs. Artificial limbs, or prostheses, are used to replace missing limbs or portions of limbs, and to restore more normal function of the upper or lower extremities.

Orthotists and prosthetists work in a variety of settings, including private practice, hospitals, rehabilitation facilities, nursing homes, and home health settings. Orthotists and prosthetists are currently in high demand, and the demand is expected to increase in the future.

Orthotists and prosthetists are part of the health care team, and as such, work with physicians, therapists, and other health care professionals to provide the orthotic and prosthetic needs of patients. Orthotists and prosthetists are responsible for 1) performing a comprehensive assessment of the patient's orthotic/prosthetic needs, 2) creating a comprehensive orthotic/prosthetic treatment plan to meet the needs and goals of the patient, 3) performing the necessary procedures to deliver the appropriate orthotic/prosthetic services, which may include fabrication of the orthosis/prosthesis, 4) providing continuing patient care and periodic evaluation to assure/maintain/ document optimal fit and function of the orthosis/prosthesis, 5) participating in personal and professional development through continuing education, training, research and organizational affiliations, and 6) developing, implementing and/or monitoring policies and procedures regarding human, business, and organizational management.

The MSPO Program is five consecutive terms in length, including one summer term, and requires a total of 66 credits. It is designed to meet all standards for accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE) and for preparing students to complete residencies and take the American Board of Certification in Orthotics and Prosthetics examinations.

The curriculum includes clinical internships at various internship sites which are available in the Pittsburgh area and throughout the country. The first set of internships are integrated into the curriculum and are completed within the Pittsburgh area. During the last term of the Program, the student completes a more extensive internship, and the student may have to relocate out of the Pittsburgh area during this term. We can work with the student to set up additional internship sites for this final term if necessary.

Accreditation Status

The Master of Science Program in Prosthetics and Orthotics has been granted accreditation by the National Commission on Orthotic and Prosthetic Education (NCOPE). Our graduates are fully eligible for NCOPE residencies, and, upon successful completion of an NCOPE residency, they are fully eligible to take the certification examinations of the American Board for Certification in Orthotics, Prosthetics & Pedorthics (ABC).

Admission Requirements and Application Process

<https://www.shrs.pitt.edu/RST/MSPO.aspx?id=681&SBP=4876>

Prerequisite courses

1. Baccalaureate Degree. No specific major is mandated; however, the degree should include a well-rounded general education with a distribution of courses in the sciences, mathematics, psychology, social sciences, and humanities.
2. Prerequisite coursework includes foundation courses in the following areas:

• Physics with lab	4 credits
• Biology with lab	4 credits
• Chemistry with lab	4 credits
• General Psychology	3 credits
• Mathematics (algebra or higher)	3 credits
• Human anatomy	3 credits
• Human physiology	3 credits
• Statistics	3 credits
3.

*These courses may not be taken in an online or e-learning setting. Candidates who apply to the program with the latter will be asked to retake said courses prior to enrolling in the program.
4. Recommended minimum overall grade point is a 3.0 grade-point average in all college-level courses and a 3.0 average in prerequisite courses. Applicants with less than a 3.0 but with other outstanding qualifications will be considered.
5. Demonstration of knowledge of the profession of orthotics and/or prosthetics through volunteer or work experience. We suggest 250 hour minimum of O&P shadowing to allow the practitioner plenty of time to write a recommendation.
6. Recommendations: (Three): At least one academic reference from a college instructor, and at least two references from a health-care professional (preferably a certified orthotist or prosthetist).
7. Essay describing background leading to the choice of this profession and long-term goals.
8. Completed Application form.
9. Official transcriptions from all college level course work.
10. Graduate Record Exam General Test (institution code - 2927).

Applicants applying to the Prosthetics and Orthotics (MS) program will apply online using the Orthotics &

Prosthetics Centralized Application Service, known as OPCAS, <https://portal.opcas.org/> submit one copy of their official transcript, letters of recommendation, and other required information directly to OPCAS.

To be assured inclusion in the review process, applications should be completed by the date posted on the MSPO website (<http://www.shrs.pitt.edu/po>). Application information which must be submitted includes:

- Completed application form
- Official transcriptions of all college-level courses
- Letters of recommendation (three)
 - At least one from a college instructor
 - At least two from a health care professional (preferably a certified orthotist or prosthetist)

- Essay describing background leading to your choice of this profession and your long-term goals.
- Graduate Record Exam Scores (General GRE) (Institution Code 2927)
- Record of work, shadowing, or volunteer experience related to the profession of orthotics and prosthetics

Please note that the University of Pittsburgh's program requires that you complete clinical internships at facilities external to the University, and such facilities will or may require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the clinical internships. Additionally, in order to become licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Admissions process, application deadline and prerequisites requirements are available on the Prosthetics and Orthotics webpage.

The School of Health and Rehabilitation Sciences does not require a supplemental application. It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Tuition and Fees

Tuition and Fee rates for the MSPO program can be found at the following websites:

Tuition

- Pennsylvania Residents: <http://ir.pitt.edu/graduate-tuition/>
- Out-of-State Students: http://ir.pitt.edu/historicalRates-Fees/20162017_pgh_grad_out_state.pdf

University Fees:

- <http://ir.pitt.edu/graduate-tuition/>

In addition to University Fees, some of the MSPO courses have lab fees associated with them. Current Fees are available on the Prosthetics and Orthotics webpage.

Certificate

Assistive Technology Certificate

The Department of Rehabilitation Science and Technology has developed an innovative program that prepares individuals to be well-versed in assistive technology, and able to either work directly with persons with disabilities or participate in a research environment related to assistive technology and rehabilitation.

Eligibility

To be eligible for admission into the certificate program, a student must:

- currently be enrolled in a Master of Science or PhD program in RST, physical or occupational therapy, communication science and disorders, or engineering program or
- possess an MS, PhD, or MD degree in an appropriate health-related or technology field.

Program Requirements

The certificate will be awarded upon completion of a Master's or higher degree and completion of 15 credits. The following courses are required:

- HRS 2704 - FUNDMS REHAB ENGR AND TECHN 1

- HRS 2705 - PRACT REHAB ENGR & ASSISTV TECHN
- HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY
- HRS 2921 - CLINICAL INTERNSHIP or
- HRS 2748 - ASSISTIVE TECHNOLOGY PRACTICUM

And at least three credits must be completed from any combination of the following courses:

(or other courses if approved by the Chair of the Department of Rehabilitation Science and Technology)

- HRS 2709 - MANUEL WHEELCHAIR DESIGN
- HRS 2711 - COMPUTER ACCESS
- HRS 2724 - ASSISTIVE TECHNOLOGY FUNDING AND POLICY
- HRS 3705 - WHEELCHAIR BIOMECHANICS
- HRS 3702 - SOFT TISSUE BIOMECHANICS
- HRS 3710 - CLINICAL APPLICATIONS AND SEATING

Disability Studies Certificate

The School of Health and Rehabilitation Sciences offers a 15-credit certificate program in disability studies. This multidisciplinary field of inquiry examines how psychosocial and societal participation issues potentially affect the estimated 45 million people with disabilities.

Eligibility

Students enrolled in MS, PhD, or MD degree programs in health-related or technology fields and professionals working in a variety of fields (minimum of bachelor degree required) are eligible to apply for this certificate program. Admission is offered on a rolling basis.

Program Requirements

The certificate will be awarded upon completion of the following courses. These 15 credits can be taken over two or more semesters:

- HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION or
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE or
- HRS 2902 - TOPICS IN HEALTH CARE
- HRS 2475 - DISABILITY RELATIONS AND SERVICES INTERNSHIP

Master's

Rehabilitation Science and Technology - Clinical Rehabilitation and Mental Health Counseling, MS in CRMHC

Clinical Rehabilitation and Mental Health Counseling is a program that blends the important concepts of rehabilitation and mental health counseling to provide a strong, cohesive training program for clinical and professional counselors. Clinical Rehabilitation and Mental Health Counselors are uniquely qualified to work with individuals with disabilities, particularly those who are experiencing psychiatric disabilities or other mental and behavioral health concerns.

This program prepares students for clinical practice in rehabilitation and mental health counseling. The five semester, 60-credit hour curriculum includes courses on foundations of rehabilitation and mental health counseling, human development across culture and the lifespan, individual, group, family and couples counseling, substance abuse, evidence based practice in counseling, crisis management, risk assessment and disaster preparedness, clinical assessment and diagnosis, case conceptualization and treatment planning, medical and psycho-social aspects of disability, case management, vocational and career development, job development and placement, and assistive technology. Individualized and group professional mentorship over five terms of study is a hallmark of the program.

This program prepares students to practice the profession of rehabilitation and mental health counseling. The five term, 60-credit hour curriculum is accredited by the Council for Accreditation of Counseling and Related Education Programs (CACREP) through October 2023.

Graduates meet the education eligibility criteria for national certification in counseling (i.e., national certified counselor, NCC, or certified rehabilitation counselor, CRC) and the pre-clinical service and educational requirements for licensure as a professional counselor (LPC).

Requirements:

Curriculum and Course Descriptions

Fall Term - Year 1

- COUN 2731 - FOUNDATIONS OF REHABILITATION & MENTAL HEALTH COUNSELING
- COUN 2733 - COUNSELING SKILLS & TECHNIQUES
- COUN 2730 - CULTURAL CONSIDERATIONS IN COUNSELING
- COUN 2742 - LEGAL, ETHICAL & PROFESSIONAL ISSUES IN COUNSELING
- COUN 2755 - CLINICAL COUNSELING MENTORSHIP
- COUN 2738 - DIAGNOSIS & TREATMENT OF COGNITIVE AND MENTAL HEALTH DISORDERS

Spring Term - Year 1

- COUN 2739 - GROUP COUNSELING
- COUN 2734 - COUNSELING THEORIES AND TECHNIQUES
- COUN 2737 - CLINICAL, DIAGNOSTIC AND FUNCTIONAL ASSESSMENT IN COUNSELING
- COUN 2755 - CLINICAL COUNSELING MENTORSHIP
- COUN 2744 - EVIDENCE BASED PRACTICE IN COUNSELING

Summer Term - Year 1

- COUN 2746 - COUNSELING PRACTICUM

Fall Term - Year 2

- COUN 2740 - CLINICAL APPLICATIONS IN COUNSELING
- COUN 2715 - MEDICAL & PSYCHOLOGICAL ASPECTS OF DISABILITY
- COUN 2741 - CASE CONCEPTUALIZATION & TREATMENT PLANNING
- COUN 2750 - CLINICAL COUNSELING CAPSTONE
- COUN 2732 - HUMAN DEVELOPMENT ACROSS THE LIFESPAN
- COUN 2749 - CLINICAL COUNSELING INTERNSHIP

Spring Term - Year 2

- COUN 2743 - FAMILY AND COUPLES COUNSELING
- COUN 2735 - CAREER COUNSELING & VOCATIONAL ISSUES

- COUN 2736 - CRISIS COUNSELING, RISK MANAGEMENT AND DISASTER PREPAREDNESS
- COUN 2723 - ASSISTIVE TECHNOLOGY TO PROMOTE MENTAL & PHYSICAL FUNCTIONING
- COUN 2745 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING
- COUN 2749 - CLINICAL COUNSELING INTERNSHIP
- COUN 2751 - CLINICAL COUNSELING CAPSTONE EXAM

Clinical Capstone Examination

All Counseling students are required to pass a clinical competency examination. The Clinical Counseling Capstone Exam requires student demonstration of knowledge and skills that reflect entry-level competencies of a rehabilitation and mental health counselor. Students are assessed on knowledge and skills accumulated through coursework and clinical experiences. The Capstone requires students to synthesize and apply advanced concepts into clinical practice.

The Capstone employs a clinical case study approach. Students are charged with researching and completing a written review on a client issue or population with the expectation of demonstrating expertise. Students are then provided a case study in their area of expertise to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate, realistic, and evidence-based intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. Successful completion of the Capstone is needed for the student to demonstrate mastery of graduate study and to advance to the final phase of their graduate training - internship.

Rehabilitation Science and Technology - Physician Assistant Studies, MS

Program Requirements

Prerequisite course work

- Anatomy with lab and Physiology, two semesters*
 - This requirement may be met by taking either one semester of Anatomy with lab and one semester of Physiology or two semesters of Anatomy & Physiology combined, each with a lab.
- Biology with lab, two semesters*
- Chemistry with lab, two semesters*
- English Composition/Writing, two semesters
- Microbiology with lab, one semester*
- Organic Chemistry with lab, one semester*
- Psychology, Introduction, one semester
- Psychology, Upper Level, one semester
- Statistics, one semester
- Medical Terminology, one semester, at least one college credit (certification courses not accepted)

*Prerequisite Science Courses cumulative GPA of 3.0 or higher is required

Other admission criteria

Successful completion of an undergraduate degree at an accredited institution

- A valid Healthcare Provider BLS course certification from AHA. CPR certification must be maintained throughout the two year program.
- Overall grade-point average (GPA) of 3.0 (based on a 4.0 scale) in all college-level course work and a minimum (GPA) of 3.0 (based on a 4.0 scale) in the prerequisite science courses marked above with an asterisk (*).
- Three letters of recommendation, one from a former college/university instructor and one from a supervisor of the required clinical experience.
- A minimum of 500 hours of hands-on patient care experience.

The patient care experience must be direct, "hands-on" patient contact e.g., RN, EMT or paramedic, patient care attendant or nurse's aide, clinic assistant, Peace Corps volunteer or other cross-cultural health care experience, therapist, clinical research assistant, respiratory therapist/aide, medical assistant, PT/OT assistant.

All coursework, requirements, and degree must be completed by August 31st each year in order to be considered for a seat in the class that will begin the following January.

Although not required, the following will be considered when determining the applicant's candidacy score:

- Biochemistry with lab, one semester
- Advanced Biology Courses
- Calculus, one semester
- Nutrition, one semester
- Shadowing a PA

The program is two full years (six consecutive semesters) and classes start each January (spring semester). Applications will be considered until the class is filled. Students are highly encouraged to apply early. The program does not offer advanced standing. All courses within the curriculum are required. No credit is granted for pre-admission experiential learning. Only full-time students are admitted.

Interview Process

Applications for admission will be reviewed by the PA Program Admissions Committee. Candidates selected will be required to meet with the Admissions Committee. The University of Pittsburgh's PA program finds the personal interview to be a necessary and important component to the admission process. The faculty looks for such personal attributes as maturity, empathy, compassion, motivation, ability to communicate, cultural sensitivity, critical thinking skills and the potential to achieve career fulfillment within the PA role. Interviews will be conducted on campus to provide the candidate and faculty an opportunity to meet and discuss the program objectives, student's goals, rationale for choosing the PA profession and more specifically the program at the University of Pittsburgh.

Plan of Study

The Physician Assistant curriculum is comprised of a rigorous 24 month Master of Science Program. The goals and objectives of our program are guided by the criteria set forth in the Standards and Guidelines for an Accredited Educational Program for the Physician Assistant as established by ARC-PA. The first three semesters (12 months) are made up of classroom instruction. Course content is presented through traditional lecture, integrated instruction, case based and hands on skills labs. The clinical year is comprised of rotations in internal medicine, primary care, emergency medicine, general surgery, women's health, pediatrics, and behavioral health. The curriculum is presented by practicing physician assistants, medical and surgical physicians and providers who have the expertise in their respective specialty.

Each course in the program is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (e.g. failure to receive a passing grade of 'C' or better; leave of absence from program) will result in the delay of completion of program requirements and graduation from the program.

Didactic Year 1:

Semester 1:

Course Credits

- PAS 2101 - INTRODUCTION TO THE PHYSICIAN ASSISTANT PROFESSION
- PAS 2102 - HUMAN ANATOMY
- PAS 2105 - HEALTH POLICY
- PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE
- PAS 2108 - Introduction to Clinical Medicine with Lab, 3 credits

PAS 2109 Medical Physiology and Pathophysiology, 4 Credits

Semester Total Credits: 15

Semester 2:

Course Credits

- PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
- PAS 2107 - PATIENT EDUCATION AND COUNSELING
- PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1
- PAS 2202 - CLINICAL MEDICINE 1
- PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES I IN MEDICINE 1
- PAS 2204 - PHARMACOLOGY 1

Semester Total Credits: 15

Semester 3:

Course Credits

- PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2
- PAS 2302 - CLINICAL MEDICINE 2
- PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2
- PAS 2304 - PHARMACOLOGY 2
- PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN
- PAS 2306 - FUNDAMENTALS OF SURGERY

Semester Total Credits: 15

Year 1 Total Credits: 45

Clinical Year 2:

Clinical Year 2

The schedules presented in Semesters 4, 5, and 6 are an example. The actual clinical schedule and order a student will complete the identified discipline specific rotation may vary.

Semester 4:

Course Credits

- PAS 2701 - CLINICAL ROTATION 1
- PAS 2702 - CLINICAL ROTATION 2
- PAS 2703 - CLINICAL ROTATION 3

Semester Total Credits: 12

Semester 5:

Course Credits

- PAS 2704 - CLINICAL ROTATION 4
- PAS 2705 - CLINICAL ROTATION 5
- PAS 2706 - CLINICAL ROTATION 6

Semester Total Credits: 12

Semester 6:

Course Credits

- PAS 2707 - CLINICAL ROTATION 7
- PAS 2713 - CLINICAL ROTATION 8 ELECTIVE 2
- PAS 2709 - CLINICAL ROTATION 9
- PAS 2712 - SUMMATIVE EVALUATION

Semester Total Credits: 13

Year 2 Total Credits: 37

Program Credits Total: 82

Certification

Graduates of the professional program are eligible to sit for the Physician Assistant National Certification Exam (PANCE) administered by the National Commission on Certification of the Physician Assistant (NCCPA). All States and the District of Columbia have legislation governing the qualifications or practice of physician assistants. All jurisdictions require physician assistants to pass the Physician Assistant National Certifying Examination. Only those successfully completing the examination may use the credential "Physician Assistant-Certified." To remain certified, PAs must complete 100 hours of continuing medical education every 2 years. Every 10 years, they must pass a recertification examination.

Rehabilitation Science and Technology - Prosthetics & Orthotics Concentration, MS

Program Requirements/Minimum Credits

Students enrolled in the MSPO Program are required to complete 65 credits to meet degree requirements. The curriculum meets all requirements for students to do NCOPE residencies and take the American Board of Certification in Prosthetics, Orthotics, and Pedorthics certification examinations. Specific courses include:

Fall term, year one

- HRS 2771 - FUNCTIONAL ANATOMY AND KINESIOLOGY
- HRS 2772 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS
- HRS 2773 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION
- HRS 2901 - INTRO TO RESEARCH METHODOLOGY
- HRS 2776 - PROFESSIONAL ISSUES IN PROSTHETICS AND ORTHOTICS
- HRS 2779 - PATIENT MANAGEMENT IN ORTHOTICS AND PROSTHETICS
- HRS 2774 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS

Spring term, year one

- HRS 2883 - TRANS-TIBIAL PROSTHETICS
- HRS 2785 - LOWER EXTREMITY ORTHOTICS 1
- HRS 2727 - CAPSTONE FOR PROSTHETICS AND ORTHOTICS
- HRS 2775 - INTRODUCTION TO EVIDENCE - BASED PRACTICE IN ORTHOTICS AND PROSTHETICS
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE

Summer term, year one

- HRS 2786 - LOWER EXTREMITY ORTHOTICS 2
- HRS 2783 - SPINAL ORTHOTICS
- HRS 2921 - CLINICAL INTERNSHIP (4 hours/week) = 56 hours, 1 credit
- HRS 2885 - TRANS-FEMORAL PROSTHETICS

Fall term, year two

- HRS 2781 - UPPER EXTREMITY ORTHOTICS
- HRS 2881 - UPPER EXTREMITY PROSTHETICS
- HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY
- HRS 2903 - ISSUES IN THE HEALTH SYSTEM
- HRS 2704 - FUNDMS REHAB ENGR AND TECHN 1
- HRS 2921 - CLINICAL INTERNSHIP (4 hours/week) = 60 hours, 1 credit

Spring term, year two

- HRS 2921 - CLINICAL INTERNSHIP (280 hours)
- HRS 2926 - SCHOLARLY PAPER
- HRS 2777 - PRACTICE MANAGEMENT IN PROSTHETICS AND ORTHOTICS

Program Total = 65 credits

*Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure, for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one year delay in completing the course, the remaining program requirements, and the year of graduation.

Comprehensive Exam

At the beginning of the final term of study, a comprehensive examination will be given, covering all aspects of the Program. Students will be required to pass this examination prior to graduation.

Thesis/Non-thesis Options

All MSPO students are required to complete at least a Capstone Project, under the direction of a faculty advisor and an additional faculty reader. However, as a substitute for the Capstone Project, the student may elect to complete a master's thesis, under the direction of a faculty advisor and thesis committee. Students electing to pursue the thesis option will complete 3 credits of Graduate Research Proposal (HRS 2924) in place of the 3 credit Capstone Project (HRS 2926) and will also complete 3 credits of Graduate Research (HRS 2925).

Rehabilitation Science and Technology - Rehabilitation Science and Technology (RST) Concentration, MS

Program Requirements/Minimum Credits

All students enrolled in the RST concentration are required to complete 44 credits to meet degree requirements. Students must complete a common set of core courses

- HRS 2704 - FUNDMS REHAB ENGR AND TECHN 1
- HRS 2705 - PRACT REHAB ENGR & ASSISTV TECHN
- HRS 2706 - INTRODUCTION TO REHABILITATION ENGINEERING DESIGNS
- HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY
- HRS 2718 - PROJECT BASED TECHNOLOGY DESIGN
- HRS 2724 - ASSISTIVE TECHNOLOGY FUNDING AND POLICY
- HRS 2901 - INTRO TO RESEARCH METHODOLOGY
- HRS 2905 - ETHICAL ISSUES IN HEALTH CARE
- HRS 2921 - CLINICAL INTERNSHIP
- A set of relevant electives

Note:

The curriculum covers basic science, engineering principles, assistive technology, pathology, rehabilitation, and consumer advocacy.

Students must complete all core courses. Other units may be taken as electives to meet the required number of credits for graduation.

Thesis/Non-Thesis Options

Students in the rehabilitation science and technology program are encouraged to pursue graduate research by completing a master's thesis under the direction of a faculty advisor and thesis committee. However, a non-thesis option of a scholarly paper is also available.

RST students who choose the scholarly paper option may take about one year to complete the program. The scholarly paper may take the format of a literature review, program development, or other product as approved by members of the student's Scholarly Paper Committee.

Department of Sports Medicine and Nutrition

Students who choose to pursue Pitt's Coordinated Master in Nutrition and Dietetics degree are ahead of the game! In 2024, all Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The Masters curriculum is a combination of didactic coursework and supervised practice which includes required competencies and student elective courses affording graduates a strong foundation in medical nutrition therapy and eligibility to sit for the Registration Exam for Dietitians.

The Sports Medicine (SM) program focuses on enhancing the knowledge base in the prevention, assessment, treatment and rehabilitation of athletic injuries and illness. Athletic Trainers, other health care professionals and individuals interested in sports medicine will find the curriculum well-suited to meet their post-professional goals and objectives. Several graduate assistantships are available for applicants who are Certified Athletic Trainers.

The Wellness and Human Performance (WHP) program is designed for students seeking graduate training to develop knowledge and skills related to nutrition and exercise in maintaining and improving health and physical performance. Primary areas of focus pertain to education and training in sports nutrition, health and wellness coaching, and the use of nutrition and exercise for the prevention and management of obesity and related chronic diseases.

Joint Degree

Nutrition and Dietetics, BS/MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! In 2024, all Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a Registered Dietitian Nutritionist.

Interested students will apply in the Spring Term of each year to begin the MS as juniors or graduate students in Fall Term. For incoming Pitt freshmen, a guaranteed admit will be available to enable students to complete the BS/MS degree in 5-years by following the recommended course schedule.

For more information, please contact:

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is a graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program. The Dietitian Nutritionist Program is a competency based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as Registered Dietitian Nutritionists.

This accelerated program offers points of entry for:

- qualified undergraduates
- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Undergraduate students will earn both Bachelor of Science and Master of Science degrees. Students who enter the program with a bachelor's degree will earn a Master of Science. Preparation for a career in dietetics as a Registered Dietitian Nutritionist (RDN) requires the following:

- completion of an approved 4-year college degree program (accredited by ACEND)
- completion of an accredited supervised practice experience (providing a minimum of 1200 hours)*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides experiential supervised practice required to become an RDN. The experiential supervised practice sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having a car accessible to them for both years of the program. Please review the experiential practice information.

**The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate, a post-baccalaureate, and as a graduate of a Didactic Program in Dietetics (DPD).

Prerequisite Requirements for Undergraduate & Post Baccalaureate Students

Completion of the following courses for a letter grade:

- General Chemistry 1 & 2 with lab, 8 credits
- Organic Chemistry 1 & 2, 6 credits (CHEM 0350, 3 credits, taken at Pitt will fulfill the requirement)
- Foundations of Biology 1, 3 credits
- Foundations of Biology 2, (genetics content) or Intro to Genetics, 3 credits
- Biology lab, 1 credit
- Intro to Microbiology, 3 credits (Food Microbiology will not fulfill the requirement)
- *Biochemistry, 3 credits
- Algebra (or higher math), 3 credits
- Statistics, 4 credits
- English Composition, 3 credits
- English Writing (W course), 3 credits
- *Introduction to Nutrition, 3 credits
- +Intro to Dietetics, 2 credits
- +Food and Culture, 3 credits
- Introduction to Psychology, 3 credits
- Communications, 3 credits
- Business, or Economics, 3 credits
- Humanities or Social Science, 3 credits
- Electives, 6 (*Elective credits may be split in to multiple courses ie. Freshman Program, Physical Education, First Aid/CPR, etc.)

*These courses need to have been completed within the past five years.

+These courses can be taken in the first year of the Dietitian Nutritionist Program for BS and Post Baccalaureate entryway students.

Additional Requirements for DPD Students

Additional Prerequisites for students who have completed, or who are currently completing, a Didactic Program in Dietetics (DPD) are outlined below:

- Nutrition Assessment, 3 credits
- Nutrition Education, 3 credits
- Nutrient Metabolism, 3-6 credits
- Food Applications with Lab, 4 credits
- Food Service Management, 3 credits
- Life Cycle Nutrition, 3 credits
- Nutrition Therapy, 3 credits

Additional Requirements

- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- A minimum grade of C- in all courses designated as prerequisites taken at the University of Pittsburgh; a C or better is required for transfer.

Application Deadline

March 15; however, we encourage students to apply prior to the deadline as the program will begin reviewing applications and interviewing in January.

All applicants must:

- Complete the SHRS ApplyYourself application;
- Submit a self-evaluation essay, discussing strengths, skills and experiences that will contribute to success in the program and your professional goals as a registered dietitian;
- Submit resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Submit three letters of recommendation: one from a registered dietitian, one from a supervisor in volunteer or work experience and one from a college professor. These letters should address the applicant's academic, professional and personal attributes and potential for meaningful graduate study. At least one letter should speak to your leadership experience and commitment to service;
- Submit official transcripts from all colleges and universities attended; a minimum cumulative grade point average of 3.0 based on a 4.0 scale is required.

Applications can be submitted when course requirements are in progress.

Admission is for the fall term only.

International Applicants

International applicants please review specific requirements [here](#).

Technical Standards

All candidates and graduates must possess the essential physical, cognitive and behavioral abilities considered necessary for students admitted to this program to achieve the knowledge, skills and competencies of an entry-level dietitian. Candidates with disabilities will be considered on a case by case basis. The following link provides detailed information on the technical standards.

Please note that this program requires students to complete portions of their education (e.g., supervised practice experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860/412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Coordinated Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN) to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN).
2. To prepare entry-level graduates with advanced knowledge and skills that contribute to the evidence-informed practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering as a junior or with a baccalaureate degree that is not from a Didactic Program in Dietetics (DPD) will complete 93-95 credits during this three-year program. Didactic Program in Dietetics (DPD) graduates will complete Year 2 & Year 3 of the program fulfilling a 60-credit course of study.

First Year

Fall Term

- HRS 1000 - INTRODUCTION TO RESEARCH
- NUTR 1602 - NUTRITION ASSESSMENT
- NUTR 1620 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- HRS 1023 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (if not taken previously)

Spring Term

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION AND COUNSELING
- NUTR 1610 - FOOD SCIENCE 1
- NUTR 1613 - FOOD SCIENCE 1 LABORATORY
- NUTR 1630 - NUTRITION THERAPY 1
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- Elective or NUTR 1612 - FOOD AND CULTURE (if not taken previously)

DPD graduates enter here.

- NUTR 1625 - NUTRITION THERAPY

Second Year

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN or
- HRS 2650 - EXERCISE PHYSIOLOGY + HRS 2999 Independent Study (with advisor permission)
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
Elective, 3 credits
- HRS 2635 - PROFESSIONAL DEVELOPMENT

Spring Term

- HRS 2624 - ADVANCED MEDICAL NUTRITION THERAPY 2

- HRS 2625 - NUTRITION COUNSELING METHODS
- HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB
- HRS 2655 - RESEARCH METHODS AND APPLIED STATISTICS
Elective, 3 Credits

Undergraduate students will receive a BS in Nutrition Science after successful completion of the Year 2.

Third Year

Fall Term

- HRS 2654 - Practicum in Dietetics 1, 1 credit
- HRS 2647 - Experiential Practice: Community Nutrition, 3 credits
- HRS 2648 - Experiential Practice 1, 10 credits
- HRS 2649 - QI Research Project Development, 1 credit

Credits / Units: 15

Spring Term

- HRS 2008 - ENTREPRENEUR SKILLS FOR NUTRITION PROFESSIONALS
- HRS 2656 - Practicum in Dietetics, 1 credit
- HRS 2651 - Experiential Practice 2, 7 credits
- HRS 2652 - Experiential Practice 3, 3 credits
- HRS 2653 - QI Research Project, 1 credit

All students will receive a Master in Science after successful completion of Year 3.

*Courses may vary dependant on transfer courses accepted.

*Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure, for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one year delay in completing the course, the remaining program requirements, and the year of graduation.

Master's

Nutrition and Dietetics, MS

Students who choose to pursue Pitt's Coordinated Program are ahead of the game! In 2024, all Registered Dietitian/ Nutritionists (RDNs) entering the field will be required to have a master's level degree to enter the profession. The Coordinated Program will graduate its final class in Spring Term 2020.

Beginning in fall 2019, the department will offer an accelerated entry-level graduate program, the Dietitian Nutritionist Program, which will provide both the didactic and the supervised experiential practice competencies to meet eligibility requirements for the National Registration Examination for Registered Dietitians/Nutritionists. Interested students will apply in the Spring Term of each year to begin the MS as juniors or graduate students in Fall Term. For incoming Pitt freshmen, a guaranteed admit will be available to enable students to complete the BS/MS degree in 5-years by following the recommended course schedule.

All applicants are directed to the Dietitian Nutritionist Program beginning in fall 2019.

For more information, please contact:

The Coordinated Program curriculum is a combination of didactic coursework and supervised practice which includes required competencies and student elective courses affording graduates a strong foundation in medical nutrition therapy and eligibility to sit for the Registration Exam for Dietitians.

About

The Coordinated Program is a two-year Master of Science program is a is a two-year Master of Science program housed within the Department of Sports Medicine and Nutrition.

Program Summary
53 credits (full-time only)
2 years (4 terms)
Program starts fall term only

Preparation for a career in dietetics as an Registered Dietitian/Nutritionist (RDN) requires the following:

- Completion of an approved 4-year college degree program (accredited by ACEND) such as our Pitt undergraduate program*
- Completion of an accredited supervised practice experience (providing a minimum of 1200 hours)**
- Successful performance on the national Registration Examination for Dietitians

No matter your professional goals in the Dietetics profession, this program offers an entry level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the Masters program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

**This program provides the 1200 hours of supervised practice required to become an RDN. The supervised practice sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having a car accessible to them for both years of the program. Please review the supervised practice information.

The Coordinated Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2190, Chicago, IL, 60606-6995, 800/877-1600 or 312/899-0040. For more information on becoming an RDN, visit www.eatright.org.

Registration

This graduate curriculum provides students with a Master of Science degree and the accredited supervised practice component. The Coordinated Program offers supervised experiences in a variety of major health care and community settings including the renowned University of Pittsburgh Health Care System (UPMC). Upon successful completion of the program, graduates are eligible for the National Registration Examination for Dietitians.

Graduation Requirements

Graduation from the Coordinated Master in Nutrition and Dietetics requires completion of 53 credits as follows:

- 26 credit hours of core academic requirements.
- 20 credit hours of supervised practice. This will provide the minimum of 1200 hours of supervised practice as specified by ACEND.
- 7 credit hours of research requirements.

Program Mission and Goals

The mission of the Coordinated Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN) to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN).
2. To prepare entry-level graduates with advanced knowledge and skills that contribute to the evidence-informed practice of RDNs.

Program outcomes are available upon request.

First Year

Fall Term

- HRS 2008 - ENTREPRENEUR SKILLS FOR NUTRITION PROFESSIONALS
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
- HRS 2999 - INDEPENDENT STUDY
- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS

Spring Term

- HRS 2633 - PROFESSIONAL DEVELOPMENT
- HRS 2634 - FOOD SERVICE MANAGEMENT WITH LAB
- HRS 2625 - NUTRITION COUNSELING METHODS
- HRS 2901 - INTRO TO RESEARCH METHODOLOGY
- HRS 2640 - SUPERVISED PRACTICE : COMMUNITY NUTRITION

Second Year

Fall Term

- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2641 - SUPERVISED PRACTICE: FOOD SERVICE MANAGEMENT
- HRS 2642 - SUPERVISED PRACTICE: CLINICAL 1
- HRS 2637 - PRACTICAL APPLICATIONS OF MEDICAL NUTRITION THERAPY 1

Spring Term

- HRS 2624 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2643 - SUPERVISED PRACTICE: CLINICAL 2
- HRS 2644 - SUPERVISED PRACTICE: MANAGEMENT OF NUTRITION CARE
- HRS 2645 - SUPERVISED PRACTICE MANAGEMENT IN LONG-TERM CARE
- HRS 2638 - PRACTICAL APPLICATIONS OF MNT 2

Total Program Credits: 53

*Courses may vary dependent on transfer courses accepted.

*Each course is offered only once during the academic year, therefore, any departure from completing a course in its planned sequence (for example: failure, for any reason, to satisfactorily complete a required course; an unresolved "G" or "Incomplete" grade) will result in a one year delay in completing the course, the remaining course requirements, and the year of graduation.

Sports Medicine and Nutrition - Sports Medicine Concentration, MS

The Sports Medicine (SM) program focuses on enhancing the knowledge base in the prevention, assessment, treatment and rehabilitation of athletic injuries and illness. Athletic Trainers, other health care professionals, and individuals interested in sports medicine will find the curriculum well-suited to meet their post-professional goals and objectives. Several graduate assistantships are available for applicants who are Certified Athletic Trainers.

About

The Sports Medicine (SM) concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a two-year graduate program housed within the Department of Sports Medicine and Nutrition.

Program Summary
36 credits (full-time-only)
4 terms
Program starts fall term only

Sports medicine is a multidisciplinary field that focuses on health care issues for athletes and physically active individuals. The SM program has a research focus and provides a core curriculum that is central to the pathokinesiology of joint injury and the principles by which restoration of joint function is accomplished. Graduates of the program seek appointments in both clinical and educational settings at colleges and universities, high schools and private sports medicine clinics. Individuals who have successfully completed our program include athletic trainers, physical therapists, bioengineers and exercise physiologists.

Graduate assistantships are available to applicants who are athletic trainers and include appointments at the University of Pittsburgh. The yearly assistantships include tuition remission and stipend.

Research

Students are provided with a research experience within the Neuromuscular Research Laboratory/Warrior Human Performance Research Center that focuses on issues central to clinical research in orthopedics and sports medicine. Research includes the use of electromyography, motion analysis, isokinetic dynamometry, physiological, proprioceptive, and balance assessment modalities for the purpose of defining and restoring function as well as optimizing performance in military personnel, injured athletes, and in physically active individuals.

The NMRL boasts:

- 30 years of comprehensive, relevant sports medicine research as part of the University of Pittsburgh
- A 10-year history of Department of Defense (DoD) Human Performance Operation and Injury Prevention Research
- Unique understanding of DoD Human Performance Operation and Injury Prevention needs
- Multi-disciplinary, team-centric approaches to research
- Cutting-edge and innovative research capabilities

Admission Requirements:

All applicants must:

- Complete the SHRS ApplyYourself online application
- Submit the application fee of \$50 (U.S.)
- Submit a self-evaluation essay addressing your purpose for applying to the program, your ability to successfully complete the program, and your goals (short and long term)
- Submit three letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional, clinical (as appropriate) and personal attributes; as well as potential for meaningful graduate study
- Submit official transcripts from all colleges/universities attended
- Additional requirements for international applicants can be found on the SHRS website

Application deadline is March 15.

Applicants applying for a Clinical Graduate Assistantship must apply by January 15. There is a mandatory, on-campus, interview with program faculty to be considered for the assistantship. You will be contacted by the department to schedule if qualified. FAQ

Both MS and PhD students may be eligible for the following Scholarships

George I. Carson Graduate Fellowship of the University of Pittsburgh

Funds from the George I. Carson Graduate Fellowship are awarded to graduate students who are or were affiliated with an athletics program at the University of Pittsburgh as undergraduate and are or will be students at a University of Pittsburgh graduate or professional school. The recipients must be of high moral character, or outstanding undergraduate academic achievement, and demonstrate the potential for outstanding graduate study. Deadline for application will be approximately May 1 for the upcoming fall term and spring term. Students may apply for both the fall and the spring at the same time using the May deadline.

Sports Medicine Resource Fund

This graduate scholarship was created to help defray the cost of professional development activities. Eligible students are those individuals who have completed their undergraduate Athletic Training degree at the University of Pittsburgh and are now continuing their education at Pitt through the Master's in Sports Medicine Program. This \$1000 scholarship can be used toward travel and attendance at a professional meeting.

Freddie H. Fu, MD Graduate Research Award

The award is named for and presented in honor of Freddie H. Fu, MD for continued support of research in the field of Sports Medicine. The purpose of this award is to encourage graduate research activity by recognizing exceptional student research projects and defraying some of the expenses associated with the student research. The number of awards presented each year will be contingent on the number of quality proposals submitted and monies available.

American College of Sports Medicine (ACSM)

The ACSM provides research grants and scholarships from various endowments and funds including education, minority scholarships, and Foundation Research Grants. For more information.

NATA Research and Education Foundation Graduate/Doctoral Scholarship

The National Athletic Trainers' Association provides a number of scholarships to eligible students on the basis of academic and clinical excellence as well as participation in campus and community activities that demonstrate qualities of leadership and service. Applicants must be student members of the NATA by November 1 of the year preceding submission of the application, be enrolled in an accredited curriculum program and intend to pursue the profession of athletic training as their means of livelihood and have a minimum GPA of 3.2 or higher. Completed applications must include a statement of support by a certified athletic trainer and verification of academic standing. The amount of each scholarship is \$2300.00. Applications will be posted on the NATA website approximately September 1. Go to NATA Foundation for additional application information. Deadlines for portions of the application begin in January. Learn more about this scholarship.

NATA Research & Education Foundation Master's/Doctoral Research Grant

[View more about this grant.](#)

Financial Aid

Graduate assistantships are available to master's candidates who are athletic trainers and include appointments at the University of Pittsburgh. The yearly assistantships include tuition remission and stipend.

Academic Standards

An average of at least B (GPA=3.00) is required in all courses that make up the MS emphasis in sports medicine. A student who receives a grade lower than a C is required to retake the course according to School of Health and Rehabilitation Sciences policy.

Student Scholarship Appointment Standards

The Department of Sports Medicine and Nutrition, in accordance with the University of Pittsburgh and School of Health and Rehabilitation Sciences, defines a student scholarship as a teaching assistant, teaching fellow, graduate student assistant, or student employee trainee (TA/TS/GSA/SET). Although student scholarship appointments may not be made for more than one year, a student may be reappointed. While it is impossible to guarantee reappointments, most students making satisfactory progress toward a graduate degree and whose teaching or other service performance is satisfactory will receive at least one renewal of their appointment or an offer of other financial assistance. If it is impossible to offer renewal or other appointments, priority will be given to those with superior academic, teaching, and service qualifications.

The criteria for reappointment are the quality of assigned work and academic achievement. Unsatisfactory academic performance is a cumulative GPA below 3.00 or completion of fewer than 9 credits of graduate work per term. As such, students who have a cumulative GPA below 3.00 at the time of scholarship reappointment will not receive reappointment of their scholarship. This policy is in accordance with the University of Pittsburgh Policy Statement for Teaching Assistants, Teaching Fellows, and Graduate Student Assistants.

Program Requirements

The concentration in sports medicine requires a student to successfully complete a minimum of 36 credits and is available with a thesis and non-thesis option. Master's degree candidates must successfully defend a thesis research project or scholarly paper (non-thesis track) in the second year for completion of the program.

Sports Medicine and Nutrition - Sports Science Concentration, MS

The Sports Science concentration in the Master of Science in Health and Rehabilitation Sciences program is designed for students seeking graduate training to advance their knowledge and skills related to understanding and improving sports performance. Primary areas of focus pertain to education and training in sports science, nutrition, sports medicine, and research. The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance. All students will complete a 1 year sports science practical experience with a designated sports team or organization and will also have access to the Sports Medicine and Nutrition research facilities and faculty.

For more information, please contact:

Matthew Darnell, PhD, RD, SCC, CSSD
 Program Director, MS in Sports Science
 Department of Sports Medicine and Nutrition
 Neuromuscular Research Laboratory
 Warrior Human Performance Research Center

 412-246-0475
 E-mail: med30@pitt.edu
<https://www.shrs.pitt.edu/msss>

About

The Sports Science (SS) Concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a one-year graduate program housed within the Department of Sports Medicine and Nutrition.

Program Summary

33 credits (Full or part-time)
1-3 years (varies)
Program starts fall term only

The curriculum integrates coursework, research, and practical application experiences pertaining to multiple aspects of athletic and human performance.

Students will have access to the Department of Sports Medicine and Nutrition research facilities and faculty.

Admission Requirements

Prerequisites (satisfactory grades must be earned in all courses)

- Exercise Physiology (3 credits)
- Introduction to Nutrition (3 credits)
- Introduction to Statistics (3 credits)
- Human Anatomy and Physiology I (3 credits)

Applications may be submitted while prerequisite coursework is in progress.

Additional Requirements

Bachelor's degree from an accredited institution.

Minimum undergraduate GPA of 3.0 (out of 4.0). Admission may be considered for applicants with a GPA of less than 3.0 if other supporting evidence of their ability to complete the graduate program is provided.

An interview may be required.

Application Procedures

Application Deadline: March 15. If spots are available after the deadline applications will be considered on a rolling basis until the class is full.

Application Deadline for highly competitive practical experience positions: January 15. Some of the practical experiences are highly competitive and may require an on-campus interview. Qualified applicants will be contacted by the department to schedule an interview.

All applicants must:

- Complete the SHRS ApplyYourself online application
- Submit the application fee of \$50 (U.S.)
- Submit an essay - a description of professional and educational goals that are realistically attainable during enrollment in the graduate program
- Submit three letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional and personal attributes and potential for meaningful graduate study.
- Submit official transcripts from all colleges/universities you **have attended**
- Additional requirements for international applicants

Curriculum:

Sports Science MS Curriculum (33 credits)

- HRS 2868 - SEMINAR IN SPORTS MEDICINE
- HRS 3896 - RESEARCH SEMINAR SPORTS MEDICINE
- HRS 3898 - LAB TECHNIQUES SPORTS MEDICINE 1
- HRS 3897 - LAB TECHNIQUES SPORTS MEDICINE 2
- HRS 2650 - EXERCISE PHYSIOLOGY
- HRS 2628 - NUTRITION AND PERFORMANCE WITH LAB
- HRS 2629 - DIETARY SUPPLEMENTS FOR HEALTH AND PERFORMANCE
- HRS 2660 - ADVANCED HUMAN PERFORMANCE AND TESTING

Applied Sports Science Experience (9 credits)

- HRS 2661 - SPORTS SCIENCE PRACTICUM 1, 3 credits
- HRS 2662 - SPORTS SCIENCE PRACTICUM 2, 3 credits
- HRS 2663 - SPORTS SCIENCE PRACTICUM 3 (Capstone), 3 credits

Capstone Project

Master's degree candidates must successfully complete a capstone project in the last term for completion of the program. The capstone project may be a data-based project, a literature review, program development, or other project as approved by members of the student's advisory committee.

Sample Curriculum Plan

Fall Term		Credits	Spring Term		Credits
Year 1	HRS 3898 - Laboratory Techniques in Sports Science & Medicine I	3	HRS 3897 - Laboratory Techniques in Sports Science & Medicine II		3
	HRS 3896 - Research Seminar in Sports Science & Medicine	3	HRS 2868 Seminar in Sports Science & Medicine		3
	HRS 2650 Exercise Physiology	3	HRS 2660 - Advanced Human Performance and Testing		3
	HRS 2628 - Nutrition and Performance with Lab	3	HRS 2629 - Dietary Supplements for Health & Performance		3
	HRS 2661 - Sports Science Practicum 1	3	HRS 2662 - Sports Science Practicum 2		3

Summer Term	Credits
Summer 1 HRS 2663 - Sports Science Practicum 3	3
Total	3

Sports Science Practicum

The Sports Science Practicum provides students with a valuable one year supervised practice experience with a designated sports team or organization. The practicum offers students the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an

athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have the opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting.

Sports Medicine and Nutrition - Wellness and Human Performance Concentration, MS

The Advanced MS in HRS will focus on wellness and human performance for those students seeking graduate training to develop knowledge and skills related to nutrition and exercise in maintaining and improving health and physical performance. The Advanced Program will include the integration of course work, practical applications, and research pertaining to nutritional aspects of health, fitness, and athletic training/performance. This Advanced MS Program in HRS with a concentration in wellness and human performance will parallel the Advanced MS with a concentration in sports medicine and provide students with access to the sports medicine research facilities and faculty.

The Wellness and Human Performance (WHP) program is designed for students seeking graduate training to develop knowledge and skills related to nutrition and exercise in maintaining and improving health and physical performance. Primary areas of focus pertain to education and training in sports nutrition, health and wellness coaching, and the use of nutrition and exercise for the prevention and management of obesity and related chronic diseases.

About

The Wellness and Human Performance (WHP) concentration leading to a Master of Science degree in Health and Rehabilitation Sciences is a two-year graduate program housed within the Department of Sports Medicine and Nutrition.

Program Summary
38 credits (full or part-time)
2 - 4 years (varies)
Program starts fall term only

The curriculum integrates coursework, research and practical application pertaining to nutritional aspects of health, fitness, and athletic training/performance.

Students will have access to the Department of Sports Medicine and Nutrition research facilities and faculty.

Note: This program is NOT an avenue to acquire the RDN (registered dietitian/nutritionist) credential.

Admission Requirements:

For admission to full, unrestricted status, the applicant must have completed an undergraduate degree program with an overall grade point average (GPA) of 3.0 or better (based on a 4.0 scale).

An applicant with a GPA of less than 3.0 in overall undergraduate and professional programs but with favorable professional credentials may be admitted on provisional status upon recommendation of the admissions committee.

Application Deadline: March 15.

Prerequisite Courses:

Students must have a bachelor's degree in any field and the following prerequisites or their equivalents in order to be eligible to apply:

- Physiology, 4 credits
- Introduction to Nutrition, 3 credits

Application Procedures:

All applicants must:

- Complete the SHRS ApplyYourself online application
- Submit the application fee of \$50 (U.S.)
- Submit an essay-a description of professional and educational goals that are realistically attainable during enrollment in the graduate program
- Submit three letters of reference, preferably from individuals who have instructed you in academic settings and/or supervised research activities. These letters should address the applicant's academic, professional and personal attributes and potential for meaningful graduate study
- Submit official transcripts from all colleges/universities you have attended
- International Applicants are required to submit an Academic Credential Evaluation. View more information on the SHRS website
- A visit to the school for an interview may be required if requested by the Admissions Committee.

Note: Application can be submitted when course requirements are in progress

Program Requirements

This degree requires the completion of a minimum of 38 credits.

Core Requirements: 26 credits

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2650 - EXERCISE PHYSIOLOGY
- HRS 2600 - NUTRITION RESEARCH SEMINAR
- HRS 2625 - NUTRITION COUNSELING METHODS
- HRS 2660 - ADVANCED HUMAN PERFORMANCE AND TESTING
- HRS 2627 - DIET & EXERCISE CHRONIC DISEASE MGT
- HRS 2628 - NUTRITION AND PERFORMANCE WITH LAB
- HRS 2629 - DIETARY SUPPLEMENTS FOR HEALTH AND PERFORMANCE
- HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB

Research: 6 Credits

- HRS 2901 - INTRO TO RESEARCH METHODOLOGY *
- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS

Note:

* Required

Additional Requirements: 6 Credits

- HRS 2999 - INDEPENDENT STUDY
- Electives in a designated specialty area (3)

Rehabilitation Science Doctor of Philosophy (PhD)

Doctoral

Rehabilitation Science, PhD

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree at the University of Pittsburgh. Some areas of focus within the PhD Program may require more than 72 credits. Up to 30 credits taken at the graduate level towards a master's degree may be accepted for transfer. In recognition of graduate study beyond the master's degree, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. Credit transfer requests are evaluated by the Associate Dean of Graduate Studies after matriculation.

In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No undergraduate credits (1000 level courses) may be applied towards the doctoral degree. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of SHRS. To carry out this responsibility, each student has an Academic Advisor who, in consultation with the student, plans a program of study and research in accordance with SHRS guidelines.

Course and Competency Requirements

The following requirements apply to all PhD in Rehabilitation Science students:

HRS 3000 - Doctoral Seminar: 4 credits

Core Areas

There are two Core Areas which are required for all students in the PhD in the Rehabilitation Science Program - Methods of Inquiry for Rehabilitation Sciences and Core Concepts in Disability and Rehabilitation Sciences.

All students pursuing a Doctor of Philosophy in Rehabilitation Science degree will be required to demonstrate basic competency in designing and appraising research studies and to demonstrate basic competency in understanding the fundamentals of disability and rehabilitation sciences.

CORE: Methods of Inquiry for Rehabilitation Sciences

Upon completion of the courses, students will be able to design a research study to answer a specific research question, including the best design for the question asked, sampling, controls for bias or confounding, and basic statistical analysis. They will be able to critically appraise research and apply it to clinical practice.

CORE: Core Concepts in Disability and Rehabilitation Sciences

Upon completion of the modules, students will be able to describe and discuss core concepts in disability and rehabilitation sciences, and analyze and synthesize multiple perspectives on the current and future state-of-the science.

A grade of B or better for each term of the Methods of Inquiry for Rehabilitation Scientists Core and Core Concepts in Rehabilitation and Disability Core (2 terms, 2 credits)

- HRS 3002 - Methods of Inquiry I - 1 credit
- HRS 3003 - Core Concepts I - 2 credits
- HRS 3004 - Methods of Inquiry II - 1 credits
- HRS 3005 - Core Concepts II - 2 credits

HRS 3001 - Dissertation Research: 18 credits

Preliminary Examination for the Methods of Inquiry Core and the Core Concepts in Rehabilitation and Disability Core requires an unconditional PASS

Comprehensive Written and Oral Examinations in the content area of the dissertation requires an unconditional PASS

Content in the areas of research design and statistics: 9 credits

Participate in the teaching of at least one course

Successful completion of manuscript submission requirement

Manuscript Submission Requirements

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum amount of experience in manuscript writing and submission by completing:

- 1 co-author manuscript accepted for publication
- 1 first author manuscript submitted and reviewed by a peer-reviewed journal
- Data-based manuscripts are strongly preferred.

Successful completion of grant application submission requirement

Grant Submission Requirement

Prior to scheduling the dissertation defense, each PhD student will demonstrate a minimum experience with grant writing and submission by completing one of the following:

- Submission and peer-review of a Doctoral Research or Research Fellowship Grant applications (Can be NIH or Private Foundations)
- Submission and peer-review of Pilot study grant applications (e.g., foundations, professional societies, the UPMC Rehab Institute Pilot Award)
- Completion of a grant writing course
- Submission of a provisional and non-provisional patent application
- Submission and peer-review of an SBIR like applications, or other options to secure funding for technology development (pitching an idea for commercial development, etc.)

Note: The peer-review may be internal or external peer review. A copy of the summary report from the review should be submitted with a copy of the grant application to Debby Keelan (dkeelan@pitt.edu) to be kept in the student's file.

Also, note: Submission to the \$1,000.00 SHRS scholarship award will NOT qualify for satisfying the grant submission requirement. A new SHRS Doctoral Scholarship Award will be available fall term 2017, that will satisfy this requirement.

Successful defense of the dissertation research

Note: PhD students are required to maintain a 3.000 Cumulative GPA and receive a grade of C or better in all courses required by their program curriculum.

Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received **if an authorization to repeat the course is given by the student's adviser/faculty.**) Students will not be permitted to register for a course until they attain a C or better in its prerequisites. Failure to

receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

School of Information Sciences

The School of Information Sciences (iSchool) is one of the nation's pioneering schools in the education of information professionals, with a rich history that reaches back more than 100 years. Throughout that century, the School has built and maintained a tradition of excellence and innovation in the Information Sciences. As one example, our Master of Library and Information Science degree is **ranked tenth in the nation** by *U.S. News & World Report*. This School, with a national and international reputation for quality, will prepare students for careers in the information, telecommunications, archival and library professions.

The School of Information Sciences offers programs of study leading to masters' and doctoral degrees, as well as certificates of advanced study (post-bachelor's and post-master's). The iSchool is composed of the Information Science and Technology Program, the Library and Information Science Program, and the Telecommunications and Networking Program. Degrees and certificates offered by each are outlined under the individual program headings. The iSchool's faculty, staff, students and programs-uniquely interdisciplinary, multicultural, and international by design-are dedicated to building a global society and an informed citizenship based upon access to reliable and useful information.

Grandparenting and the new School of Computing and Information

School of Information Science (SIS) students who matriculated into the University of Pittsburgh PRIOR to Fall 2017 received a communication allowing a choice to either remain in SIS or transfer to the new School of Computing and Information for completion of their degree.

- If a student chose to remain in the School of Information Sciences, they should refer to these catalog pages for the regulations, policies, and requirements for their degree.
- If a student applied to transfer to the School of Computing and Information, they should refer to the School of Computing and Information catalog pages for the regulations, policies, and requirements for their degree.

Please note: If a student took no action in response to the grandparenting e-mail, they were transferred to the School of Computing and Information by default.

Any student matriculating into the University of Pittsburgh AFTER Fall 2017, must apply to the School of Computing and Information in order to pursue an undergraduate degree in either Computer Science or Information Science and should refer to this School of Computing and Information catalog pages for information.

Mission of the School of Information Sciences

The Mission of the School of Information Sciences is to support and advance the broader education, research, and service mission of the University by educating students, furthering knowledge, and contributing our expertise to advance humankind's progress through information.

This mission is achieved through specific actions:

- Offering superior graduate programs in Library and Information Science, Information Science, and Telecommunications
- Engaging in research and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavors
- Cooperating with industry and government to transfer knowledge
- Extending our expertise to local communities and public agencies to contribute to social, intellectual, and economic development in Pennsylvania, the nation, and the world. In addition, the School works with industry, government, and local communities to provide unique opportunities for students and to advance the fields within the Information Sciences.

Goals of the iSchool

The goals of the School of Information Sciences are to:

- Promote excellence in education at the master's and doctoral levels in the information sciences.

- Advance knowledge in the Information Sciences as an internationally-recognized center for high-quality, innovative, and leading edge research.
- Provide strong professional, technical, and policy leadership by the faculty at the local, state, national and international levels.
- Promote recognition of the School of Information Sciences for its production of seminal research, curricular leadership, superior professional and PhD students, and service to professional and regional communities.
- Foster intellectual vitality in the iSchool community.

Major and Degree Options

The School of Information Sciences offers the following graduate degrees:

- Master of Science in Information Science (MSIS)
- Master of Science in Telecommunications (MST)
- Master of Library and Information Science (MLIS)
 - On-campus program
 - MLIS Pitt Online (web-based)
- Doctor of Philosophy in Information Science (PhD)
- Doctor of Philosophy in Information Science with a Focus in Telecommunications (PhD)
- Information Science with a Focus in Telecommunications
- Doctor of Philosophy in Library and Information Science (PhD)
- Certificate of Advanced Study (post-bachelor's and post master's in Information Sciences and Telecommunications (CAS)
- Certificates of Advanced Study (post-master's) in Telecommunications

The iSchool also has a joint agreement with the Graduate School of Public and International Affairs (GSPIA), allowing students to complete the MSIS degree and one of three degrees in GSPIA simultaneously. The course of study for the MSIS degree under the joint agreement consists of a minimum of 30 credits in graduate Information Science and Technology courses, plus an additional 30-39 credits at GSPIA depending on the selected area of study. To be admitted fully into the joint program, students must be accepted by both GSPIA and the Master of Information Science Program. More information is available at www.ischool.pitt.edu/ist/degrees/joint-degree-programs.php

Contact Information

SCIreg@pitt.edu (current students)

www.sci.pitt.edu

Admissions Information

Note: Prospective students interested in enrollment in one of our degree programs for Fall 2017 or later, must refer to the School of Computing and Information. See the grandparenting section for details.

The School of Information Sciences seeks students with diverse interests and abilities for its graduate degree and certification programs. All applicants will be judged on their own merits. Applicants for master's study must have earned a bachelor's degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better; the doctoral programs have more stringent requirements. For those who have been in the workforce, admission will be based upon academic achievement, area of study, career orientation, and work experience. Each program has specific prerequisites for admission-see links at the bottom of the page for details specific to each degree.

Please note that there may be different language requirements for specific programs. The general requirements are as follows: a minimum score of 550 (paper-based), or 80 (Internet-based) on the TOEFL is required for admission to graduate study in this program. The requirement to take the TOEFL may be waived if the applicant has received a degree from an accredited institution in the United States.

Prior to registration, students with TOEFL scores less than 600 (paper) or 100 (Internet-based) will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study.

Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 score or better will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study. Other admission requirements vary depending upon the chosen program.

Application Fee

Submission of an application fee as determined by the School of Information Sciences is required of all applicants. This fee is non-refundable.

Financial Assistance

The School of Information Sciences provides a limited amount of financial assistance to highly qualified, full-time graduate students. Please note that financial assistance provided by the iSchool differs from financial aid provided by the University, government, or other private organization.

Financial assistance is awarded each term. Student assistantships are available only to full-time students (full-time is defined as a minimum of 9 credits and a maximum of 15 credits per term). Decisions are contingent upon availability of funds and satisfactory academic performance during completed terms.

Financial assistance priority is given to U.S. citizens in evaluating financial assistance applications. All international students are expected to come fully funded for the entirety of their degree, advanced study certificate or additional program of study. International students may be granted financial aid in such exceptional circumstances as the awarding of a Graduate Student Research Assistantship for a funded project.

Academic Standards

The following section details school-specific academic rules and regulations. *These are in addition to the University-wide rules detailed under General Academic Regulations.*

Academic Integrity

A student has an obligation to exhibit honesty, and to respect the ethical standards of the information professions in carrying out his or her academic assignments. All students are responsible for adhering to policies on academic integrity, which are available on the school's Intranet.

Transfer of Credits

A maximum of 6 graduate credits earned with a grade of B or better may be transferred toward either the Master's or PhD degree from institutions fully accredited for graduate study, provided that these credits have not been applied to any other degree or certificate, that they are applicable to the students' program of study, and that they are not older than the statute of limitations for the degree. Approval of transfer credits is determined by the faculty via a petition submitted by the student during their first term of study. Detailed instructions and forms are available on the school's Intranet.

Satisfactory/No-Credit (S/NC) Grading System (formerly the S/N option)

In addition to the standard University letter grade system, the Satisfactory/No-Credit (S/NC) option (formerly the S/N option) is offered at the master's level for a limited number of courses. Under this option, a student who does satisfactory work receives the grade of S. If the student's work is unsatisfactory, an NC is assigned. Courses for which an S is received are counted toward graduation but are not utilized in computing the GPA. A limit of 6 credits of Satisfactory (S) grades may be applied at the master's level. Doctoral programs may have more stringent requirements.

Advising

Academic advising provides the foundation upon which students plan their studies. It is the policy of the School for each student to have an official advisor whose responsibilities include providing guidance in developing the student's career goals and academic programs, approving course selections, and advising as needed on issues affecting the student's academic and professional careers. The goal of academic advising is to develop a consistent academic program coordinated to meet general program requirements and specific needs of individual students. Ideally, the student and faculty advisor function as a team working toward the objective of career preparation by means of the strongest possible academic experiences for the student. Students are matched with an advisor upon admission; they may, however, change advisors at any time. Students should meet each term with their advisors to ensure timely progress through their program.

Special Academic Opportunities/Programs

In addition to the degree offered, the School of Information Sciences offers other academic opportunities and programming to its students:

Colloquiums

Throughout the year, nationally and internationally recognized speakers from the information professions present research colloquiums, which are open to all faculty and students at the iSchool. Colloquiums further enrich the iSchool's educational programs.

Student Organizations

The School encourages students to become members of-and to participate actively in-the student chapters of several professional associations: Student Chapter of the American Library Association (SCALA), American Society for Information Science and Technology (ASIS&T), Special Libraries Association (SLA), and the Society of American Archivists (SAA). The iSchool cooperates with local chapters and special divisions of these organizations and other professional associations, such as the Institute of Electrical and Electronics Engineers (IEEE), the Association for Computing Machinery (ACM), and the Data Processing Management Association (DPMA), in promoting meaningful programs of interaction with practicing professionals.

Alumni Association

The alumni of the School meet each year at professional associations, assist with recruitment efforts, and offer career/skill development opportunities. For more information, please visit www.ischool.pitt.edu/alumni.

Beta Phi Mu

Graduates who achieve a grade point average of at least 3.75 on a 4.0 scale in their work for the MLIS degree and are nominated by a member of the faculty are eligible for election to membership.

Program and Course Offerings

Department of Information Science and Technology

Information Science and Technology

The School of Information Sciences (iSchool) offers a Master of Science in Information Science (MSIS) and a PhD in Information Science. In addition, the iSchool offers Certificates of Advanced Study in Information Science to post-bachelor's and post-master's level students who wish to continue their education. Students may also pursue a joint degree between the iSchool and the Graduate School of Public and International Affairs.

Research Focus

Members of the faculty are active researchers with funding from governmental and/or corporate sources. Both master's and doctoral students have an opportunity to work with faculty on research projects, and doctoral students conduct independent research for their dissertations. Some major areas of research interest are systems analysis and design, information retrieval, database and networking, human-centered computing, social computing, intelligent systems, geoinformatics security assured information systems, big data analytics, and cognitive science.

The MSIS Degree

Connecting people, information, and technology is the mission of the School of Information Sciences. The Master of Science in Information Science (MSIS) degree builds on that mission by preparing students for careers as information professionals, including systems analysts and designers, database developers and managers, information security experts, and more. This 36-credit program can be completed in three semesters (depending upon course schedules) of full-time study or as many as four years of part-time study. For more details about this program, please visit www.ischool.pitt.edu/ist/degrees/msis-program.php.

Our Curriculum

The curriculum has been designed to provide our students with a rigorous program that is also flexible, so that the specific needs of individual students can be met. The MSIS Program offers several options to carefully target your studies. For those not ready to specialize, the School allows you to design a course of study under the direction of your advisor that meets your individual needs, while conforming to the general distribution guidelines found in the MSIS Plan of Study. Many students use this option to sample multiple areas of the curriculum, such as cognitive systems, human-centered computing, systems design and implementation, networks and security, and database management. The program has developed a series of specializations, in consultation with industry, that ensure that students have the critical expertise in specific areas in high demand by employers. Specializations are described here.

Admissions

<http://www.ischool.pitt.edu/ist/degrees/msis-admissions.php>

Applicants for graduate study must have earned a bachelor's degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better. The program seeks students with diverse interests and abilities; an undergraduate computer science major is not a prerequisite. Although many successful students have entered the program with a background in mathematics, engineering, or computer science, many other outstanding students entered with undergraduate degrees in business, music, history, philosophy, or chemistry.

Prerequisites

Prerequisites for admission to the Master of Science in Information Science (MSIS) program include one 3-credit college course in each of the following:

- A structured programming language
- Statistics
- Mathematics-discrete mathematics or calculus

Students who lack some of the prerequisite courses may be admitted provisionally pending completion of the prerequisites during the first 12 credits of study. Any coursework that the student is asked to meet as a condition of their admission must be completed with a grade of B or better.

Graduate Record Examination (GRE)

All Master of Science in Information Science (MSIS) applicants are required to submit a recent score (within three years of the date of application) on the Graduate Record Examination as part of their admission credentials. Scores on all three sections (verbal, quantitative, and analytical) of the General Section should be submitted. While submission of the GRE scores are preferred, a recent and strong performance on the GMAT will be accepted in lieu of taking the GRE exam. The University code for the GRE is 2927. The program code is 0404.

International Applicants

There are different documentation requirements for international students. They are described here.

English Language Proficiency

Graduate students must possess sufficient knowledge of English in order to study, to understand lectures, and to participate successfully in class discussion without being hindered by language. The Test of English as a Foreign Language (TOEFL) must be taken if the applicant's native language is not English. The institution code for the University of Pittsburgh is 2927 and the department code is 90.

A minimum score of 550 (paper-based), or 80 (Internet-based) on the TOEFL is required for admission to graduate study in this program. The requirement to take the TOEFL may be waived if the applicant has received a degree from an accredited institution in the United States.

Prior to registration, students with TOEFL scores less than 600 (paper) or 100 (Internet-based) will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study.

Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 score or better will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study. Other admission requirements vary depending upon the chosen program.

Application Fee

Submission of an application fee as determined by the School of Information Sciences is required of all applicants. . This fee is non-refundable.

Deadlines

Admissions occur on a rolling basis throughout the year. See the iSchool's Web site for Application Deadlines.

School-Based Financial Assistance

The Graduate Information Science and Technology Program awards School-based financial support on the basis of qualification to full-time graduate students with full admission status (all prerequisites completed). Please visit www.ischool.pitt.edu/ist/degrees/financial-aid.php for the most current information.

Academic Advising

Each student is assigned an academic advisor at the time of admission to graduate study. These assignments are made primarily on the basis of the student's background and interests as shown in the application. The student may at any time elect to change advisors-any such change requires the consent of the new advisor and must be reported to the program. Forms for changing advisors are available at the school's administrative offices, Fifth Floor, IS Building.

At the time of initial registration, the student is encouraged to fill out a Plan of Study and discuss it with their advisor. The Plan of Study forms are available here. A Plan of Study is a series of courses designed to meet the minimum exit competencies judged by the faculty to be necessary for employment as an information professional. All Plans of Study must have the approval of the advisor and will be used to ensure that the student has met all requirements for graduation.

Statute of Limitations

The master's degree must be completed within four years of the first term in which courses were taken after admission. The normal full-time course load is 9 to 12 credits per term; thus, a fulltime student will complete the program in three or four terms. The normal part-time course load is 6 credits per term, which permits the part-time student to complete the program in six terms. The faculty, in response to a student petition, may approve exceptions to the four-year limit if extenuating circumstances exist.

Registration and Residence Requirements

To maintain active student status, students must register for at least 3 credits during one of the three terms of the calendar year. It is recommended, however, that part-time students register for at least 6 credits during two of the three terms of the academic year to maintain reasonable progress through the program. In addition, international students are responsible for meeting the registration requirements dictated by their visa.

The PhD in Information Science Degree

The Doctor of Philosophy degree provides research-oriented graduate study and professional specialization in the science of information. The candidate must give evidence of superior scholarship, mastery of a specialized field of knowledge, and demonstration of ability to do significant and relevant research. Students interested in the PhD degree should consult this Web site.

The candidate for the PhD program should also have a broad knowledge of the field as a profession as well as a specialization in an area of major interest. Every candidate should possess a strong background in the foundations of information science and research methodologies.

The advisor and student should design a Plan of Study at the time of registration.

The iSchool also offers a Doctor of Philosophy degree in Information Science with a focus in Telecommunications. Details are available at www.bulletins.pitt.edu/graduate/tele.htm.

Residence Requirement

Full-time residency, in addition to requiring full-time study, affords the student the opportunity for daily professional interaction with faculty and other PhD students. This interaction is a major component in the student's preparation for research. Despite the benefits that full-time residency affords, it is recognized that students may have off-campus responsibilities as well.

The PhD degree, therefore, can be completed by a combination of full-time and part-time study. Two terms of full-time study are required. Full-time is defined as nine or more graduate credits per term. All students, whether on campus or away, must maintain active status by registering according to the requirements stated below. No matter their status, they must meet with their advisor at least once per year. Students will submit an annual progress report to the PhD Program Chair, the Program Secretary and the advisor. This will take place on the second Friday of January.

Registration Requirement

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for a least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Upon readmission, the student is required to adjust the program of studies to meet current PhD program, school, and University requirements.

In keeping with University policy, all graduate students must be enrolled for a minimum of 1 credit in the term in which they graduate.

Doctoral students who have completed all credit requirements for the PhD degree, including minimum dissertation credit requirements, and are working full time on their dissertation, are encouraged to register for "Full-time Dissertation Study," with a fixed fee registration per term, currently \$500 plus fees. (Enrollment in this course fulfills the University requirements for registration in the term of graduation.)

Please note that international students may be required to register for credits beyond the minimums stated above, as they are also responsible for meeting the registration requirements dictated by their immigration visa.

PhD Statute of Limitations

All requirements for the PhD degree in IS must be completed in not more than six calendar years from the time of first registration. Students may in extenuating circumstances submit a formal request for extension of their statute of limitation or for a leave of absence from the program. The request must be submitted to the advisor and then presented to the Faculty Committee on Doctoral Studies for a decision.

Admission Requirements

Applicants for admission to the PhD program are required to have earned a master's degree from an accredited university and should have a grade point average (GPA) of 3.3 or better (on a 4.0 scale) for any graduate studies they have pursued.

Students must submit at least three references from persons in the professional and academic communities. The PhD Admissions Committee may, on occasion, require additional references.

Applications will not be considered without the submission of the iSchool's application fee.

As evidence of their ability to undertake doctoral work students must submit an essay (not to exceed 1,000 words) indicating, as specifically as possible, the student's academic and professional goals in relation to the Information Science and Technology doctoral program, and identify potential areas and/or topics in which the student expects to pursue dissertation research. This essay is a critical component of the admissions process, and will be used in assigning the student's initial program advisor.

PhD applicants must either have or demonstrate the following prerequisite knowledge. These courses(or their equivalents) should be taken before seeking admission, but may be taken during the first four terms of study. All courses must be at the graduate level and may have been taken while pursuing another graduate degree:

- Statistics or Discrete Math (e.g., IS 2060 Statistics or IS 2020 Mathematical Foundations)
- Cognitive Psychology (e.g., IS 2300 Human Info Processing or IS 2350 Human Factors)
- Systems Analysis and Design (e.g., IS 2510 Information Systems)
- Data Structures (e.g., IS 2500 Data Structures)
- Database Management (e.g., IS 2710 Database Management)

All applicants must submit scores from a predictor test (if not taken previously) such as the Graduate Record Examination (GRE) or equivalent examination. Scores on all three sections (verbal, qualitative, and analytical) of the GRE must be submitted.

International Applicants

There are different documentation requirements for international students. They are described here.

English Language Proficiency

Graduate students must possess sufficient knowledge of English in order to study, to understand lectures, and to participate successfully in class discussion without being hindered by language. The Test of English as a Foreign Language (TOEFL) must be taken if the applicant's native language is not English. The institution code for the University of Pittsburgh is 2927 and the department code is 90.

A minimum score of 550 (paper-based), or 80 (Internet-based) on the TOEFL is required for admission to graduate study in this program. The requirement to take the TOEFL may be waived if the applicant has received a degree from an accredited institution in the United States.

Prior to registration, students with TOEFL scores less than 600 (paper) or 100 (Internet-based) will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study.

Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 score or better will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study. Other admission requirements vary depending upon the chosen program.

Application Fee

Submission of an application fee as determined by the School of Information Sciences is required of all applicants. This fee is non-refundable.

Library and Information Science Program

The School of Information Sciences (iSchool) offers a Library of Information Science (LIS) program, which consists of the Master of Library and Information Science degree (MLIS) and the Doctor of Philosophy in Library and Information Science degree, as well as certification programs for school library media specialists. Students enrolled in LIS programs, under the mentorship of the program faculty, prepare for careers in the information professions as digital content managers, librarians, archivists, records managers, college and university faculty members, supervisors in diverse information centers, and as information specialists.

The MLIS degree, which requires completion of 36 credits of course work is offered both on campus and through the MLIS: Pitt Online Program, which is a fully online program accredited by the American Library Association that can be completed in six terms of study.

The core curriculum (12 credits) is enriched by advanced courses in management, technology, resources and services for specific patron groups, and organization of information. Upon award of the MLIS degree, graduates are prepared to make contributions to the profession at the local, national, and international levels. On-campus students may target their career goals by enrolling in one of our top-ranked specializations.

The Doctor of Philosophy in Library and Information Science degree prepares students for advanced work in research, teaching, and administration. The program will give students the opportunity to gain skills in teaching or research appropriate for careers at major research universities, teaching institutions, and library systems.

Beyond curricular offerings, educational experiences available to students in the program include colloquiums, practical experience in professional settings, participation in national conferences, and attendance at professional association meetings.

Research Focus

Members of the LIS faculty are active researchers, with records of funding from governmental agencies and private sources. While both master's and doctoral students have opportunities to work with faculty on research projects, doctoral students are most involved in the research process.

Some areas of research interest include (but are not limited to) archives, health resource, children's information, digital libraries, interactive information retrieval, library management, organization of information, cyberscholarship, social information tools, science and technology studies, digital humanities, and school library media center management.

Master of Library and Information Science (MLIS) Degree

The role of information professionals has changed dramatically as the volume of available information has increased and technology for information search and retrieval has advanced. The ability to manage the growing array of information tools has led to new opportunities for those who want to work in the information field, which is a discipline that bridges the management of both traditional and emerging information sources. The MLIS program is responsive to the information marketplace and encourages the development of creativity, professionalism, and a proactive attitude to the needs of various clienteles in traditional and digital information service environments.

The program is accredited by the Committee on Accreditation of the American Library Association. The MLIS Program is ranked tenth in the nation by *U.S. News & World Report* and many of its specializations are also highly ranked.

Admissions

The Library and Information Science Program seeks students with diverse educational and career backgrounds. Applicants for graduate study must have earned a bachelor's degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better. Submission of scores from a standardized predictor test is required for admission to the MLIS program. Applicants with post-bachelor's advanced degrees are exempt from this requirement. Students who have not worked in libraries may elect to do a 3 credit Field Experience.

A maximum of 6 credits earned with a grade of B or better may be transferred toward either the master's or PhD degree from institutions fully accredited for graduate study, provided that these credits have not been applied to any other degree or certificate, that they are applicable to the students' program of study, and that they are not older than the statute of limitations for the degree.

International Applicants

There are different documentation requirements for international students. These are explained here.

English Language Proficiency

Graduate students must possess sufficient knowledge of English in order to study, to understand lectures, and to participate successfully in class discussion without being hindered by language. The Test of English as a Foreign Language (TOEFL) must be taken if the applicant's native language is not English. The institution code for the University of Pittsburgh is 2927 and the department code is 90.

A minimum score of 550 (paper-based), or 80 (Internet-based) on the TOEFL is required for admission to graduate study in this program. The requirement to take the TOEFL may be waived if the applicant has received a degree from an accredited institution in the United States.

Prior to registration, students with TOEFL scores less than 600 (paper) or 100 (Internet-based) will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study.

Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 score or better will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study. Other admission requirements vary depending upon the chosen program.

Application Fee

All applicants are required to submit an application fee as determined by the School of Information Science. This fee is non-refundable.

School-based Financial Assistance

Financial assistance is available at www.ischool.pitt.edu/admissions/financial-aid.php.

Doctor of Philosophy in Library and Information Science (PhD) Degree

The Doctor of Philosophy in Library and Information Science degree prepares students for advanced work in research, teaching, and administration. The primary purpose of this 54-credit degree is to develop an understanding of library and information science beyond the master's degree, with particular emphasis on the conduct of original research, the production of significant and generalizable research findings, and the contribution of such findings to public knowledge.

The advisor selected by the student for the period prior to the dissertation stage of the program is the program advisor; before the dissertation proposal is prepared, the student should select a dissertation advisor. The program advisor and the dissertation advisor may be the same person, but the student has the option to select a different advisor for the dissertation. The advisor must be a member of the graduate faculty in the Library and Information Science Program who is able to spend the time and effort necessary for the advising role, be available for examinations, and with whom a productive and comfortable working relationship can be established.

For complete information on the PhD program, consult Statement of Requirements for the Degree of Doctor of Philosophy at <http://www.ischool.pitt.edu/lis/degrees/phd.php>.

PhD Admission Requirements

The following are requirements for admission to the program:

- A master's degree from a program accredited by the American Library Association, a recognized international program, or the equivalent in a closely related field of study.
- Attainment in graduate work of a minimum grade point average of 3.50 (on a scale where A=4.00). An international student's grade point average will be calculated on the basis of equivalency from universities that use a different scale.
- Submission of scores from a predictor test, such as the GRE, GMAT, MCAST, LSAT or MAT, taken within the last three years. Institutional/program codes may be found [here](#)
- At least three references from persons in the professional and academic communities.
- An interview may be required

As evidence of the ability to undertake doctoral work, the student's application must be accompanied by:

- An essay (not exceeding 1,000 words) indicating, as specifically as possible, the student's academic and professional goals in relation to the Library and Information Science doctoral program and identifying potential areas and/or topics in which the student expects to pursue dissertation research.
- A complete curriculum vitae that provides an overview of education, work, publication, and other professional activities.
- At least one example of scholarly research or professional writing in any format (print or electronic). The student should describe fully any published or unpublished research, thesis, contributions to the professional or scholarly literature, and other professional or academic experience relevant to an assessment of capacity to pursue doctoral study successfully.
- If the candidate has had appropriate professional work experience, a brief description should be provided.

Credentials of prospective students are reviewed by the Admissions and Review Committee and voted upon by the LIS Committee on Doctoral Studies throughout the year. However, students who are applying for financial aid should be aware that they must be admitted and meet financial aid deadlines to ensure consideration for funding. PhD students may begin their studies only in the fall term in order to ensure a coherent program of study.

International Applicants

There are different documentation requirements for international students. These are explained [here](#).

English Language Proficiency

Graduate students must possess sufficient knowledge of English in order to study, to understand lectures, and to participate successfully in class discussion without being hindered by language. The Test of English as a Foreign Language (TOEFL) must be taken if the applicant's native language is not English. The institution code for the University of Pittsburgh is 2927 and the department code is 90.

A minimum score of 550 (paper-based), or 80 (Internet-based) on the TOEFL is required for admission to graduate study in this program. The requirement to take the TOEFL may be waived if the applicant has received a degree from an accredited institution in the United States.

Prior to registration, students with TOEFL scores less than 600 (paper) or 100 (Internet-based) will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study.

Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 score or better will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first two terms of study. Other admission requirements vary depending upon the chosen program.

Proficiency program: Students may choose to take the International English Language Testing System exam (ELTS) in place of the TOEFL. Students should receive a minimum result of Band 7.0 on the IELTS.

Statute of Limitations

All requirements for the PhD degree must be completed in not more than six calendar years from the time of first registration. Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program.

PhD Research Areas

<http://www.ischool.pitt.edu/lis/degrees/phd.php>

Telecommunications and Networking

The School of Information Sciences offers a Master's degree, Certificate of Advanced Study in Telecommunications and a PhD degree in Information Sciences with a focus in Telecommunications. This program prepares students for careers in a variety of arenas including industry, business, government, health care, education, and the nonprofit sector in positions such as network engineers or analysts, network administrators or managers, consultants, systems engineers, and research and development engineers (with appropriate undergraduate education).

Research Focus

Members of the faculty are active researchers with funding from governmental and/or corporate sources. Both master's and doctoral students have an opportunity to work with faculty on research projects, and doctoral students conduct independent research for their dissertations. Faculty members and students conduct research on a wide variety of topics including (but not limited to) wireless networks and security, network design and survivability, computer networks, network policy, and economics of the telecommunications industry.

Contact Information

Telecommunications Program
School of Information Sciences

Fax: 412-624-5231

Master of Science in Telecommunications Degree Program

The Telecommunications and Networking program offers hands-on learning opportunities in telecommunications systems, computer networks, policy and management, wireless systems, and network security so that you will find a rewarding career in industry, government, education or the nonprofit sector. The MST program is a 37-credit program that can be completed in one year of full-time study or as many as four years of part-time study.

For complete program details, visit www.ischool.pitt.edu/tele/degrees/mst-program.php

Admissions

<http://www.ischool.pitt.edu/tele/degrees/mst-admissions.php>

To qualify for admission, an applicant must be a graduate of an accredited college or university. Preference will be given to candidates with a scholastic average B (3.0 on a 4.0 scale) or better.

All MST applicants are required to submit a recent score (within three years of the date of application) on the Graduate Record Examination as part of their admission credentials. Scores on all three sections (verbal, quantitative, and analytical) of the General Section should be submitted.

While submission of the GRE scores are preferred, a recent and strong performance on the GMAT will be accepted in lieu of taking the GRE exam. The institutional number for the University of Pittsburgh is 2927 and the department code is 0404.

The student must have completed the following course work (at the undergraduate or graduate level), with a grade of B or better, prior to admission to the MST program:

- Computer programming skill in at least one scientific programming language
- Probability (a 3-credit course)
- Calculus (a 3-credit course).

The following courses (or their equivalent), while not counting towards the 37-credit degree, may be required depending upon previous educational background:

- Introduction to Telecommunications (TELCOM 2000)
- Physical Layer of Communications I (TELCOM 2200)
- Software Tools and Techniques (TELCOM 2300)

English Language Proficiency

Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. The Test of English as a Foreign Language (TOEFL) must be taken if the applicant's native language is not English. The institution code for the University of Pittsburgh is 2927 and the department code is 90.

A minimum score of 550 (paper-based) or 80 (Internet-based) on the TOEFL is required for admission to graduate study in this program. The requirement to take the TOEFL may be waived if the applicant has received a degree from an accredited institution in the United States.

Prior to registration, students with TOEFL scores less than 600 (paper-based) or 100 (Internetbased) will be given the on-campus administered English Language Proficiency Test (The Michigan Test) . If remedial courses in English as a second language are recommended as an outcome of the Michigan Test of English Proficiency, the student must complete the remedial course during the first two terms of study.

Students may choose to take the International English Language Testing System exam (IELTS) in place of the TOEFL. Students must receive a score of Band 6.5. Students who do not achieve a score of Band 7.0 or better will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a second language are recommended as an outcome of the Michigan Test of English Proficiency, the student must complete the remedial course during the first two terms of study.

Academic Advising

Each student is assigned an academic advisor at the time of admission to graduate study. These assignments are made primarily on the basis of the student's background and interests as shown in the application. The student may at any time elect to change advisors-any such change requires the consent of the new advisor and must be reported to the Program Chair.

In consultation with the advisor, the student must complete a Plan of Study at the time of registration. The Plan of Study forms are available here. A Plan of Studies is a series of courses designed to meet the minimum exit competencies judged by the faculty to be necessary for employment as an information professional. All Plans of Study must have the approval of the advisor and will be used to ensure that the student has met all requirements for graduation.

Statute of Limitations

The Master's Degree program must be completed within four years of the first term in which courses were taken after admission. The normal full-time course load is 9 to 12 credits per term; thus, a full-time student will complete the program in three or four terms. The normal part-time course load is 6 credits per term, which permits the part-time students to complete the program in six terms. The faculty, in response to a student petition, may approve exceptions to the four-year limit if extenuating circumstances exist.

Registration and Residence Requirements

To maintain active student status, students must register for at least 1 credit during one of the three terms of the calendar year. It is recommended, however, that part-time students register for at least 6 credits during two of the three terms of the academic year to maintain reasonable progress through the program.

The PhD in Information Science with a Focus in Telecommunications

The Doctor of Philosophy degree program provides research-oriented graduate study and professional specialization in telecommunications. The candidate must give evidence of superior scholarship, mastery of a specialized field of knowledge, and demonstration of ability to do significant and relevant research. Students interested in the PhD degree should consult the Web site, www.ischool.pitt.edu/tele/degrees/phd.php.

Admission Requirements

Students seeking admission to the PhD program with a focus in Telecommunications must:

- Hold a master's degree from an accredited university, a recognized international program, or the equivalent.
- Have maintained in graduate work of a minimum grade point average of 3.3 (on a scale with A having a value of 4 points per credit). An international student's grade point average will be calculated on the basis of equivalency from universities that use a different scale.
- Submit scores from a predictor test (if not taken previously) such as the Graduate Record Examination (GRE) or equivalent examination. Scores on all three sections (verbal, quantitative, and analytical) of the GRE must be submitted.
- Provide evidence of the ability to undertake doctoral work, in an essay (not exceeding 1,000 words) indicating, as specifically as possible, the student's academic and professional goals in relation to the Telecommunications doctoral program and identifying potential areas and/or topics in which the student expects to pursue dissertation research.
- Provide at least three references from persons in the profession and academic communities.
- Have successfully completed:
 - Two different scientific computer programming language classes
 - Coursework in probability and statistics
 - Differential and integral calculus classes

Statute of Limitations

All requirements for the PhD degree must be completed in not more than six calendar years from the time of first registration. Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program.

Journal Requirement

All PhD students are mandatorily required to submit an article of publishable quality to a journal before the degree is awarded.

Certificate

Big Data Analytics

Certificate of Advanced Study in Information Science

The iSchool provides several options for advanced study in information science beyond a bachelor's or master's degree. The Certificate of Advanced Study (CAS) offers a highly-concentrated curriculum on the theory and application of the most current information field trends.

Students can follow a 15-credit or 24-credit plan of study.

15-credit post-bachelor's certificates

- Big Data Analytics
- Security Assured Information Systems (SAIS)*
- * eligible for Committee on National Security (CNSS) Certifications

15-credit post-master's certificates

- Big Data Analytics
- Security Assured Information Systems (SAIS)*

* eligible for Committee on National Security (CNSS) Certifications

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program. Students interested in the CAS should consult this Web site

Information Science and Technology - Security Assured Information Systems, ADVCT

Certificate of Advanced Study in Information Science

- Security Assured Information Systems (SAIS)*

* eligible for Committee on National Security (CNSS) Certifications

24-credit post-master's certificate

CAS Requirements

The SAIS is a 15-credit certificate program designed to the needs of professionals with a Bachelor of Science or a Master of Science degree in Information Science or a related field in order to expand their professional skills and qualifications in the security assured information systems field.

Download a copy of our information sheet and application checklist.

Core courses

Post-bachelor's students must complete the following three courses with a grade of B- or better:

Post-master's students must complete the following three courses with a grade of B or better:

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2170 - CRYPTOGRAPHY
- TELCOM 2821 - NETWORK SECURITY

Elective courses

Post-bachelor's students must complete one Networking or Systems and Technology course and one SAIS course available at the iSchool with a grade of B- or better:

Post-master's students must complete one Networking or Systems and Technology course and one SAIS course available at the iSchool with a grade of B or better:

Examples of these courses include but are not limited to:

- INFSCI 2540 - SOFTWARE ENGINEERING
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- INFSCI 2731 - SECURITY IN E-COMMERCE
- INFSCI 2955 - SPECIAL TOPICS: SYSTEMS
- TELCOM 2120 - NETWORK PERFORMANCE
- TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- TELCOM 2825 - INFORMATION SYSTEMS AND NETWORK INFRASTRUCTURE PROTECTION

CNSS Certifications

Students completing the SAIS CAS will be eligible for the following Committee on National Security Systems (CNSS) Certifications:

- CNSS 4011 (Information Security Professionals - INFOSEC),
- CNSS 4012 (Designated Approving Authority - DAA), and
- CNSS 4013 (System Administrators in Information Security Systems - INFOSEC).

Students who chose *TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS* and *TELCOM 2825 - INFORMATION SYSTEMS AND NETWORK INFRASTRUCTURE PROTECTION* additionally receive the following CNSS certificates:

- CNSS 4014 (Information Security Officers - Advanced Level) or
- CNSS 4015 (System Certifiers).

Telecommunications

Requirements

Students who have graduated from a master's program may pursue a certificate in Telecommunications.

In consultation with an advisor, students project a Plan of Studies to meet their specific interests or needs, and these plans may change as the program proceeds. Students may select graduate-level courses in other departments within the University as well as at Pittsburgh Council on Higher Education-cooperating institutions. Admission to all courses is contingent upon meeting course prerequisites and is subject to the advisor's approval.

Candidates for the Telecommunications certificate must complete the following requirements:

- A total of 24 credits in graduate-level courses acceptable to the advisor and passed with a grade point average of at least B (3.00 on a 4.00 scale)
- Fifteen of the 24 credits must be taken from among the approved courses for the MST degree program.

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program.

Doctoral

Information Science - Telecommunications Focus, PhD

PhD Degree Requirements

The Telecommunications PhD program requires a minimum of 72 credits beyond the Bachelor's degree. The 72 credits must include the required courses (or their equivalent) for the MST degree at the University of Pittsburgh. Also included in the 72 credits are:

- 12 credits of required courses
- 12 credits of doctoral seminars
- 6 credits of minor courses
- At least 18 credits of dissertation research and writing

48 of the 72 credits must be advanced coursework beyond the MST degree (or its equivalent).

Graduation depends upon meeting the minimum credit requirements and all other requirements. Graduate degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.3 GPA. Grades of C or lower are unacceptable for graduation credit.

All students who are candidates for doctoral degrees are governed by the regulations of the University Council on Graduate Study, which establishes minimum standards for graduate work throughout the University as well as by those regulations established by the iSchool faculty.

Residency Requirements:

Full-time study on campus is considered most beneficial to students, but it is recognized that students may have off-campus responsibilities as well. The PhD degree, therefore, can be completed by a combination of full-time and part-time study. Three terms of full-time study are required, two of which must be consecutive and must be taken after successful completion of the preliminary examination. Full-time study is defined as nine or more graduate credits per term.

Preliminary Examination Requirement

The preliminary examination, according to Regulations Governing Graduate Study at the University of Pittsburgh, is held:

...to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently.... The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation.

The Telecommunications and Networking faculty has clarified further that the overall objectives of the preliminary examination are:

- To test the PhD students for breadth of knowledge
- To evaluate their skills, and their ability to apply them
- To evaluate their ability to do research, and

The prelim will consist of undertaking a research project, submitting a research paper, and an oral presentation and defense. For more details, see http://www.ischool.pitt.edu/tele/documents/PhD_description.pdf.

With the successful completion of the preliminary examination, the student is fully admitted to doctoral study in telecommunications. The Program Chair will notify the student, in writing, of admission to doctoral study. After admission, the student must complete the remaining coursework including doctoral level seminars; probability and statistics, research design, and information science course requirements; and the residency requirement.

Comprehensive Exam

The student must satisfactorily pass a comprehensive examination designed to assess mastery of the general field of telecommunications, acquisition of both depth and breadth in the area of specialization within the field, and ability to use the research methods of the discipline. The purpose of the comprehensive examination is to assess the student's ability to understand a subarea of telecommunications in depth. In order to do research, a student must be able to read, understand, present, and criticize research papers in the field. It is also important that the student be able to explain such papers in depth to someone who is unfamiliar with that area. Thus, this examination centers on the development of a tutorial as well as a lecture in which the student must explain the subject to the satisfaction of the faculty. From a learning perspective, this provides the student with an experience of structuring and explaining a technical topic in detail. It is expected that a student has completed the minimum 30 credits of coursework before taking the comprehensive exam.

Candidacy and Dissertation Requirements

Doctoral students are required to take a minimum of 18 dissertation credits as part of their study. After successfully completing the comprehensive examination, the student will select a dissertation advisor and a committee. Then, the student in consultation with the dissertation advisor, must prepare a dissertation proposal which is then presented to the committee in a public session. The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. When the proposal has been successfully defended, the chair of the student's dissertation committee shall notify the Chair of the PhD Committee, the Telecommunications Program Chair, and the Dean of the School of Information Sciences that the student has achieved formal candidacy.

Information Science and Technology, PhD

PhD Degree Requirements

<http://www.ischool.pitt.edu/ist/degrees/phd-details.php>

There are three stages of admission to the doctoral program: (1) admission to graduate study when the student first matriculates, (2) admission to doctoral study following successful completion of the preliminary examination, and (3) admission to candidacy following successful completion of the comprehensive examination and the approval of the dissertation proposal. A minimum of 48 credits, including 30 course and seminar credits beyond the master's degree, and at least 18 dissertation credits are required. Students without a master's degree will be required to take a minimum 24 additional credits of coursework or seminars, for a total of 72 credits beyond the bachelor's degree. Students who did not take the prerequisite courses as part of earlier studies should expect to complete admission requirements or equivalent courses.

Graduate degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.3 GPA. Courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Preliminary Examination Requirement

The Preliminary Examination is composed of an oral presentation related to a research oriented publication. In preparation for the preliminary examination, which is usually taken in the third semester of study, PhD students will complete the following course work.

- Four graduate-level courses, one in each of the following areas: Research methods, foundations, design, and information
- Six credits of independent study focused on a research project, which will result in an original, publishable quality research paper (the basis for the preliminary exam)
- Three doctoral seminars (9 credits) are required, including an Introduction to Doctoral Program (INFSCI 3005). Advanced doctoral seminars will be focused on single research themes.

While the preliminary examination can be taken before the completion of the core courses and doctoral seminar, the preliminary examination requirement will not be considered satisfied until all core courses and doctoral seminars are completed.

Research Project and Paper

During the first year of doctoral study, under the direction of your advisor (or another full or adjunct member of the department graduate faculty), students will design and complete a research project. The project should reflect only those activities undertaken during the first year of study. A previous master's thesis or other work completed prior to the start of doctoral study may not be submitted for this requirement. While much research

involves working in a larger team, your role in the project and in writing the paper should be significant. You must be the primary author, and ideally you will be the sole author. You should seek a project or a part of a project in which you take the lead in conducting the research and writing up the results under the direction of your advisor. However, unlike a dissertation or thesis, the research paper submitted for the preliminary evaluation may include co-authors. In this case, the role of each co-author should be clearly stated in writing by the student and submitted along with the research paper. Furthermore, the paper may be integrated with other work and later submitted for publication with a longer list of authors.

Comprehensive Examination Requirement

The comprehensive examination requires successful completion of the preliminary exam. The student will choose three areas of concentration and three faculty members for the comprehensive examination committee, one of whom is the advisor. In preparation for the comprehensive exam, it is expected that the student will complete 3 credits of advanced statistics. Once the committee and the topic areas are selected, the student will prepare an activity and reading list with the advice and approval of the committee members. The student will then conduct whatever preparation is necessary. When the student is ready, he/she will inform the advisor who will ask each member of the committee to submit one or more questions to the advisor. The advisor will be responsible for constructing the exam with an appropriate balance over the three topic areas. The student will be given the questions and allowed one week to prepare written answers to the questions. After review of the written answers, an oral examination will be scheduled. The oral questions will cover the answers on the written examination, and more broadly, knowledge of the material in the three areas of concentration. The result of the comprehensive examination will be a pass or fail. If a student fails, they may retake the exam one more time.

Candidacy and Dissertation Requirements

Doctoral students are required to take a minimum of 18 dissertation credits as a part of their study. Dissertation credits should be taken during terms when a student is actively working on the dissertation. In any term in which a student is enrolled for dissertation credits, the student should meet with their advisor on a regular basis to monitor that appropriate progress is being made towards the completion of the dissertation proposal or the dissertation. The specific activities in a given term should depend on the current stage of the dissertation process. In addition to writing the proposal and dissertation itself, other appropriate activities may include reviewing the literature, programming, prototyping, running preliminary studies, writing grant proposals, preparing journal articles related to the dissertation or presenting preliminary results at conferences.

Once the comprehensive examination is successfully completed, the student is officially a doctoral candidate. After becoming a doctoral candidate, the student can propose and defend a dissertation topic.

Library of Information Science, PhD

PhD Degree Requirements

This PhD degree requires a minimum of 54 credits beyond the master's degree with a total credit minimum of 72. A minimum of 36 credits must be taken in advanced course work. The student must receive a letter grade in each course taken in this 36-credit requirement (except for the teaching practicum course). An additional 18 credits are required, which must be applied to dissertation research and writing. However, regardless of the number of credits taken, no more than 18 credits for dissertation research and writing may be applied toward graduation.

The minimum of 36 credits of course work, all of which must be on the graduate level, must be distributed as follows:

- 3 credits: LIS 3000 INTRODUCTN TO DOCTRAL STUDIES
- 9 credits: 3000-level doctoral seminars in SIS
- 3 credits: LIS 3950 TEACHING PRACTICUM or FACDEV 2200 PRACTCM ON UNIVERSITY TEACHING
- 6 credits: Courses in research methodology and statistics
- 6 credits: Courses in cognate field
- 9 credits: Courses may be:
 - 3000-level independent studies or doctoral seminars at the iSchool

- Additional 3000-level doctoral seminars at the iSchool
- Additional cognate courses (up to 6 credits)
- Additional research methodology courses

Additional Requirements

PhD degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.50 GPA.

Doctoral students are required to devote some portion of their studies to work on other disciplines in order to broaden their perspectives and deepen their understanding of library and information science. To fulfill the cognate requirement, students are required to take a minimum of 6 credits and a maximum of 12 credits in some area of graduate study outside the field of library and information science. These credits may be from more than one department or school.

The research methodology course requirement must be fulfilled prior to taking the preliminary examination. Research methodology courses may include courses in statistical analysis, general research methodology, and specific research methods or research methods used in specific fields of study such as historiography, ethnography, or case and field study.

A three-credit teaching practicum is required for all doctoral students in order to provide the student with teaching experience that may become part of the student's professional vita. The teaching practicum is usually taken after completion of two terms of study. The student is responsible for identifying an appropriate course related to his or her areas of interest and obtaining the agreement of the instructor of record.

Residence and Registration Requirements

According to University of Pittsburgh policy, students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study, which excludes any other employment except as approved by their departments. Doctoral students must register for at least 3 credits in each term until they have achieved candidacy. To maintain active status, all doctoral candidates must be registered for a minimum of 3 credits in each 12-month period (3 credits in one term or 1 credit in each of three terms) from the time of admission to candidacy until receipt of degree.

School-Based Financial Support

Financial aid information is available at www.ischool.pitt.edu/lis/degrees/financial-aid.php.

Preliminary Examination

Upon completion of 24 credit hours of course work, each student submits for review a portfolio comprising the best representation of work completed thus far. The student presents this portfolio orally to the Doctoral Studies Committee (DSC) as a whole, which votes on its acceptability. The Preliminary Examination is based on the breadth and depth of knowledge as addressed through course work, as well as whether the course work taken will support the research plan the student submits and defends to the DSC.

Comprehensive Examination

The Comprehensive Examination is conducted by a three person committee the- faculty advisor and two faculty members chosen by the student and the faculty advisor. The examination consists of a written take-home exam over two weeks and an oral examination conducted by the student's committee. The take-home exam has two parts: a broad perspective on current issues in the field of library science, information science, or archives, depending on the student's general area, and the area of the student's research specialization.

Language Requirement

Students are required to be proficient in any languages necessary for completion of doctoral work. Depending upon the student's course of study, proficiencies in modern languages, linguistics, and/or computer languages may be required.

Candidacy and Dissertation

For admission to formal candidacy for the PhD degree, a student must have:

- Passed the preliminary evaluation
- Completed a minimum of 36 credits beyond the master's degree with a GPA of 3.50 or higher
- Passed the comprehensive examination
- Successfully defended the dissertation proposal and received permission from the Dissertation Committee to begin research

Students demonstrate their ability to complete a sound project of original research by presenting and defending the dissertation proposal to their Dissertation Committee. The Dissertation Committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree.

Public Presentation Requirement

During the course of the PhD program, each student is required to make a public presentation on a research project in which the student is engaged.

Master's

Information Science and Technology, MSIS

MSIS Degree Requirements

A minimum of 36 credits is required to complete the MSIS degree. Basic course requirements are as follows:

- 6 credits of course work in the Formal or Applied Foundations area
- 18 credits of course work in the Systems and Technology areas (INFSCI 2500 required)
- 6 credits of course work in the Cognitive Science or Cognitive Systems areas
- 6 credits of electives--students may pursue a thesis or a practicum as one of the elective options. Students should know that a thesis is not a requirement of the MSIS degree

Master Degree Program with GSPIA

The School of Information Sciences (SIS) has entered into a joint agreement with Graduate School of Public and International Affairs (GSPIA). The program allows for students to complete the Master of Science in Information Science (MSIS) degree and one of three degrees in GSPIA simultaneously. To be admitted fully into the joint program, students must be accepted by both GSPIA and SIS.

Admission Process

Students wishing to enter this program need to submit the regular application form, along with two recommendation letters, an official transcript, and a copy of GRE or GMAT. International students have additional submission requirements.

All students are expected to have completed the prerequisite courses in

- mathematics,
- statistics (or comparable coursework),
- structured programming language (C or C++ recommended)

Course of Study

The course of study for the Master of Science in Information Science (MSIS) degree under the joint agreement consists of a minimum of 30 credits in the Graduate Information and Technology Program, plus an additional 30-39 credits at GSPIA depending the selected area of study. Students may register under either the GSPIA or SIS school code during any given semester, but must have registered under each school code for at least 24 credits by the completion of the degree. Please be aware that there is a small tuition differential between the two schools.

The 30 credits taken in SIS are to be distributed as follows:

- 3 credits in the Mathematical and Formal Foundations area.
- 6 credits in the Cognitive Science area or Cognitive Systems area. INFSCI 2300 and INFSCI 2350 are recommended.
- 18 credits in the Systems and Technology area or Cognitive Systems area, including INFSCI 2500.
- 3 credits as Electives from any remaining course in the Information Science program .

Note:

Any changes to the distribution above must be requested, in advance, through petition to the faculty.

City of Opportunities

Pittsburgh is big enough that opportunities-for internships, jobs, and access to a rich cultural scene as well as the outdoors-abound.

Library of Information Science, MLIS

MLIS Degree Requirements

Students seeking the MLIS (both on-campus and MLIS: Pitt Online) must complete the following requirements:

- Complete a minimum of 36 credits of graduate-level course work
- Complete core courses of the pathway in which the student is enrolled with a grade of "B" or better in each
- Maintain a B (3.00) average for the required 36 credits of graduate-level course work

Requirements for the MLIS degree must be completed within a period of four calendar years from the student's initial registration.

MLIS Pathways

The pathways below have been developed in response to needs expressed by the profession. In addition to the core knowledge of librarianship, you'll gain specific skill sets pertinent to your career goals.

Archives and Information Science Pathway

Archives and Information Science >

(will appear on transcript)

Records are created and maintained for purposes of evidence and accountability as well as for personal, social and corporate memory. Archives serve a crucial cultural function, providing society with a sense of identity and memory. Records Management programs help organizations to be compliant with regulatory agencies, responsible to constituent groups, and effective and efficient in the use of informational resources. Graduates of the Archives and Information Science Pathway will have the skills and knowledge to work as archivist, special collections librarians, records managers, corporate archivist, digital asset coordinators, and more.

Data Stewardship Pathway

Data Stewardship >

The Data Stewardship Pathway will provide an introduction to data curation, digital preservation and data science, and will frame these topics within the broader context of data informatics, digital scholarship, research integrity, disciplinary diversity and cultural change. In addition to setting the scene from a policy perspective, the Pathway will provide the practical skills needed to carry out effective research data management and preservation, and will situate these practices in the wider landscape of open science and open scholarship. This Pathway will equip graduate students with the necessary knowledge, skills and competencies to work in a range of data stewardship roles located in libraries, archives, data centers, government, industry and business.

Library and Information Services Pathway

Library and Information Services >

While information professionals traditionally have worked in cultural heritage institutions such as the library, today their skills are needed in all sectors of the economy. Now, more than ever, the world needs highly qualified specialists in libraries and information services. The Library and Information Sciences Pathway will prepare students for leadership roles in the identification, organization, preservation and effective use of information and cultural artifacts. Graduates of this pathway will be prepared for careers as web content managers, digital asset coordinators, librarians, information architects, and more.

Telecommunications, MST

The Telecommunications and Networking program offers hands-on learning opportunities in telecommunications systems, computer networks, policy and management, wireless systems, and network security so that you will find a rewarding career in industry, government, education or the nonprofit sector.

The MST program is a 37-credit program that can be completed in one year of full-time study or as many as four years of part-time study.

Prerequisites for admission to the MST program include:

- baccalaureate degree
- computer programming experience in at least one scientific programming language
- completion of a 3-credit course in probability
- and a 3-credit course in calculus.

The following courses are pre-requisites for a number of graduate-level Telecommunications courses. If you have not taken these, or their equivalent, you will need to do so.

- Introduction to Telecommunications (TELCOM 2000)
- Physical Layer of Communications 1 (TELCOM 2200)
- Software Tools & Techniques (TELCOM 2300)

MST Degree Requirements

Completion of the Master of Science in Telecommunications degree requires a minimum of 37 credits. Three credits may be in practicum (a structured supervised employment situation) or a thesis. For research-oriented students, the faculty strongly recommends a 3-credit thesis in lieu of course work.

The 37-credit minimum of course work should include the following:

- 19 credits of required courses, including the one-credit telecommunications seminar course.
- 3 credits selected from the management/policy group.

- 15 credits of elective course work.

Students may choose to take more than the 37 credits required for the MST degree. However, the iSchool is not able to extend any financial aid beyond the required number of courses; any visa issues pursuant to extended study would have to be resolved by the student.

Specializations

Students who wish to focus on one of our specializations are encouraged to take as many courses as possible in that area of specialization as part of the 15 credits of electives.

Students can specialize in more than one area by taking offered courses in those particular areas, again as part of their 15 credits of electives.

Telecommunications Systems

Telecommunications systems are built on an infrastructure, similar to that classically used for telephony. In this specialization, you will investigate the physical technologies (copper and fiber) used for information transmission, the enabling transmission processes (such as multiplexing, synchronization, and noise filtering), and the systems that provide telephony (classic circuit switched and VOIP). If you pursue this track, you would likely be hired by a carrier, equipment manufacturer, consultant, or business for a career as a system engineer, network designer or manager, switching system designer, or telecom manager.

Computer Networks

Computer networking enables efficient communication and information sharing to take place among widely dispersed participants. The recent emergence of the global Internet-and the availability of ever cheaper, more powerful computation and communication devices-is paving the way for a new generation of ubiquitous and pervasive networks.

In this specialization, you will explore a variety of problems encountered in designing computer networks and learn common techniques to solve these problems. Courses are designed to equip graduates with the knowledge and skills required to contribute to the field of data communication and networking. The focus is on network models and architectures, protocol design and implementation, resource management, quality of service support, and security. You will acquire a solid conceptual and practical understanding of how computer network technologies operate and the ability to analyze the benefits and limitations of current and future networking technologies. You will also gain valuable insights into the design, management, and security of computer networks, and have an opportunity to take additional electives from the Department of Computer Science, depending on your interests.

Policy and Management

Telecommunications systems exist in social and organizational contexts. In this specialization, you will explore the relationships among telecommunications technologies, service providers, end users, and governmental entities. In telecommunications, industry structure and government regulation is closely tied to the details of technology, so it is important that students forging a career in this area have a thorough understanding of not only the technology, but also the historical and existing economic and political structures. In this specialization you may take additional courses from the Katz Graduate School of Business or the Graduate School of Public and International Affairs, depending on your interests. Upon graduation, you will be prepared for a career as a policy analyst or network manager.

Wireless

Wireless systems have become a vital infrastructure in today's society, and significant professional opportunities exist in this growing field. In this area, you will investigate the physical technology and enabling processes; the systems that provide cellular telephony, wireless LANs, and sensor networks; and mobile applications. You may select additional electives from the Department of Electrical and Computer Engineering. Graduates of this track have been hired by wireless carriers, manufacturers, and other organizations as system engineers and wireless network designers.

Security

Just as we safeguard data within computers, we must also assure that the information flowing over networks is protected. In this specialization you will investigate firewalls, encryption, fault tolerant network design, and other procedures for information assurance. Additional electives may be taken from both the Department of Computer Science and the Department of Mathematics. If you follow this track, you will be prepared for a career as a network security specialist with carriers, manufacturers, consulting firms, the government, financial institutions, and other enterprises.

Internet of Things

Information regarding this new specialization is forthcoming.

General

If you choose not to specialize in one particular area, the general course of study allows you to sample courses from all the specializations in preparation for dealing with the constant changes in telecommunications technology. Since change is the only constant in the telecommunications industry, your versatility as a generalist will enable you to handle challenges as they arise in the industry. Employers such as carriers, manufacturers, consultants, and other organizations (especially smaller ones) are seeking those graduates with a broad set of skills for careers as system engineers, network designers or managers, and telecommunications managers.

A generalist can take courses from any of the areas of specialization in consultation with the faculty advisor.

School of Law

- Contact Information
- Admissions
- Scholarships and Financial Aid
- Flex-time Program
- Academic Standards
- Professional and Career Development
- School of Law Faculty
- Programs and Course Offerings

The essential mission of the University of Pittsburgh School of Law is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment. Pitt Law excels in teaching the next generation of diverse legal professionals; producing research of impact and contributing to society through public service.

In serving its students, the school is committed to an active and inclusive spirit of community and to the effective, efficient, and congenial provision of service. In teaching, research, and public service, the School of Law aspires to conduct all of its programs at a nationally prominent level of quality that adds luster to the legal and business communities of Pittsburgh; that makes the school relevant to the key needs of this region's private, public, and nonprofit sectors; and that distinguishes it as one of the finest public urban law schools in the United States.

For more than 110 years, the School of Law has prepared students to become excellent attorneys and leaders in both the legal profession and in society. Today, Pitt Law builds on this proud history by training lawyers to take on the opportunities and challenges of 21st century legal practice in the United States and around the world.

At Pitt Law we turn out practice-ready lawyers by providing students with both traditional law school classroom experiences designed to develop and hone analytical and communication skills and with experiential learning opportunities in one of our six clinics, which range in subject area from Environmental Law to Family Law to Health Law. Students who wish to focus their studies can enjoy the numerous benefits of enrolling in one of our five certificate programs, with their opportunities for international externships, instruction in litigation skills by teams of top practicing litigators, or membership on an intellectual property moot court team. Seven joint degree programs, including two partnerships with Carnegie Mellon University, permit students to craft discipline-bridging courses of study in areas including public health, business administration, and international affairs. And Pitt Law students can serve as editors at the award-winning website JURIST, the world's only Web-based, student-powered legal news source, which is viewed weekly by 100,000 viewers and is based right here at the School of Law.

Among its first-professional degrees, the School of Law offers the Juris Doctor (JD) degree; a number of joint degree programs with other schools of the University and Carnegie Mellon University, leading to both a JD and a master's degree; and LLM degrees for foreign law graduates as well as several certificate programs. The School of Law also offers graduate programs leading to a Master of Studies in Law (MSL) and a Doctor of Jurisprudence (SJD) degree. *For further information on the graduate programs, see the School of Law-Graduate Programs section of this bulletin.*

Contact Information

Financial Aid and Admissions are located in the same office at the University of Pittsburgh School of Law.

Office of Admissions and Financial Aid
Barco Law Building
3900 Forbes Avenue
Pittsburgh, PA 15260

Website: www.law.pitt.edu

General Information: (412) 648-1413
Admissions Information: (412) 648-1805
Financial Aid Information: (412) 648-1415
Fax: (412) 648-1318

Email Admissions: admitlaw@pitt.edu
Email Financial Aid: lawfa@pitt.edu

Office Hours: 8:00 a.m. - 5:00 p.m. Monday through Friday

Walk in appointments are available during office hours; however, scheduling an appointment is encouraged. To schedule an appointment, please email or call our office.

Admissions

Pitt Law is highly competitive, and we base admissions decisions on many factors. Our admissions committee will carefully evaluate your graduate work, professional experience, and undergraduate GPA and make a decision on a rolling basis, or you may request a priority decision within 14 business days. Each program, degree and certificate has various requirements. Please see each program's requirements.

Qualifications for Admission to the Bar: In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

Transfer Students

The University of Pittsburgh School of Law will accept transfer students after those students have successfully completed the first year of academic study at another law school. Applicants must complete the law school application and submit the following:

- Application fee
- Official LSDAS report
- Letter of good standing from the current law school dean
- Certified law school transcript
- Letter of recommendation from a current law school professor
- Final official undergraduate transcript

The deadline for submitting an application is June 1st of every year. Decisions made on transfer students depends on the number of seats available at Pitt Law, the QPA from the current law school and the competitiveness of the current law school.

If admission is granted, the transfer student's completed law school work will be evaluated for transfer credit in light of the curricular offerings at Pitt Law. Only up to 32 transfer credits will be accepted. However, only up to 29 credits will be accepted in the case of (1) a transfer student admitted from a U.S. law school that is not approved by the American Bar Association, (2) a transfer student who is a graduate of a foreign law school and who is admitted after completion of the Pitt Law LL.M. program, or (3) a transfer student who has not completed the Pitt Law LL.M. program and who is a graduate of a foreign law school for law school work done outside of the United States. All transferred credits must comply with the restrictions in ABA Standard 505.

In keeping with the requirements of The Order of the Coif, students are eligible for Coif membership only if they complete at least 75% of their law studies in graded courses. For transfer students, any credits transferred without grades will not count toward this requirement.

Visiting Students

A student may apply to visit at Pitt Law if he/she has completed two years of law study at another law school and has the permission of the dean of their current school. Applicants must complete the law school application and submit the following:

- Application fee
- Copy of your LSDAS report
- Letter from the dean stating the third year at Pitt Law will count toward a degree from the previous school
- Certified law school transcript.

The deadline for submitting an application is June 1st of every year. Decisions made on visiting students depends on the number of seats available at Pitt Law, the QPA from the current law school and the competitiveness of the current law school.

Scholarships and Financial Aid

All admitted students are reviewed for merit scholarship awards at time of admissions to Pitt Law. The merit scholarships are renewable for the second and third years of law school provided the recipient maintains a cumulative grade point average of 2.8 in their legal studies. Scholarship renewal review is conducted at the end of the academic year. Students whose scholarship is not renewed may request to have their scholarship reinstated at any time based upon earning the cumulative 2.8 grade point average in their legal studies.

Approximately 70 percent of the student body receives scholarship funds from the School of Law in the form of merit or need-based scholarship awards. The Law School offers various merit scholarships at the time of admissions. Some scholarship require an additional application and others are based on the materials submitted in your admissions application. If admitted, you will be emailed any scholarship application that requires additional materials.

Please visit the Pitt Law website for more details on available scholarships or contact the School of Law Financial Aid Office.

Loans

For most students the major portion of law school costs are met through the Federal Unsubsidized Stafford Loan, Federal Graduate PLUS Loan, and alternative educational loan programs.

Generally, to be considered for an educational loan as a law student, you must:

- Complete the Free Application for Federal Student Aid (FAFSA)
- Be a U.S. Citizen, permanent resident, or other eligible non-citizen
- Enrolled at least half-time in a degree program
- Registered with the Selective Service, if required
- Not owe a refund on a federal grant or be in default on a prior federal loan
- Maintain Satisfactory Academic Progress.

Loan Counseling

Before federal loan funds can be released, all incoming students must complete a Loan Entrance Counseling session, regardless of whether they have borrowed in the past. This counseling session is a federal requirement for all students to insure that they understand their rights and responsibilities as a borrower. Loan counseling can be completed online at www.studentloans.gov.

All students who have borrowed through the Federal Loan Program are required to attend a Loan Exit Counseling session before they graduate or drop below half time. The counseling sessions will be schedule in April for all third year students. All third year students will receive notification of the time of the counseling sessions. The counseling sessions informs students of their rights and responsibilities as a borrower as well as giving students information on their repayment options.

Flex-time Program

The flex-time program is offered to students whose outside obligations necessitate a more flexible program of study than is traditionally available. All classes are still held during the daytime; however, hours may be planned according to personal needs and interests. The pace is intended to be less strenuous than the regular program. Course loads are optimally designed to result in graduation in four years rather than three with no fewer than 10 credits per semester. The option to accelerate is also available to flex-time students after the first year of study. Flex-time students are still required to pay full tuition. Applicants to the flex-program must include a letter with their application explaining their individual circumstances. The application process is otherwise the same.

Please note that flex-time is not a part-time program.

Academic Standards

The School of Law Policy on Written Work for Credit, its Standards of Academic Integrity, the Grading Guidelines, and other academic policies of the school are included in the Academic Rules section of the School of Law's web site.

Professional and Career Development

The Professional Development Office is dedicated to providing students and graduates with the information and tools necessary for successful career development and advancement. Our office assists students and graduates in their pursuit of careers in a wide variety of settings, including private law firms, public interest organizations, government agencies, corporate and business environments, judicial clerkships, academia, and non-traditional careers.

Through an extensive array of services including individual counseling, educational programming, interviewing opportunities, printed and online resources, job posting databases, and a substantial alumni network, the PDO helps educate students and graduates for a lifetime of successful career management.

The PDO also serves as an intermediary between prospective employers and law students. By posting job vacancies, scheduling on-campus interviews, sponsoring programs, and participating in and promoting off-campus job fairs, we provide a range of employment prospects. Through ongoing outreach, the PDO Staff endeavors to create ever-increasing employer interest in Pitt Law students and graduates.

Each student will meet with a Career Counselor during their first year and is encouraged to meet with the counselor as often as needed. As a student begins to develop his or her legal career path they are able to work with an PDO counselor whose background mirrors the student's desired path. Our office is open Monday- Friday 8:30 a.m. - 5:00 p.m. Additionally, PDO has daily walk-in hours and hosts "Facetime" in the student lounge.

Programs and Course Offerings

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Certificate

Law - Human Resources Law Certificate

The program will be a ten-month, accelerated program. It will offer five courses designed to be taken in order. Each is eight weeks in length. At the completion of the program, students will be eligible to sit for some of the industry-based human resources certification exams offered by the Society for Human Resource Management (SHRM) and the HR Certification Institute.

The HRLC courses will be taught by industry experts and Pitt Law Faculty. In addition, the program will seek to create an advisory committee composed of Pitt law and business faculty, program faculty, and human resources professionals.

We do not expect an increase in need for student aid and minimal or no need for additional library resources. As this is a distance-learning program, we do not expect there to be any significant impact on office, laboratory, or classroom space. Instructors will need to coordinate with the Barco Law Library staff concerning planned student projects to ensure that digital resources will be available remotely to students where ever that may be. The Library staff can arrange for 30 students to access the library's existing Lexis and Westlaw databases, and by March 2019 all of the databases the Law Library subscribes to will be available to all students, whether on-campus or off-campus. All students in the program will have a "library liaison" at the Barco Law Library available to them for assistance.

Required Courses

School of Law's Programs

You expect the Juris Doctor (JD) program at Pitt Law to offer a solid foundation in the basics of legal education. You might not expect the opportunity to specialize in areas like environmental and energy law; health law; and intellectual property, technology, and innovation law.

You might not expect to be able to pursue both a JD and a second master's degree at another Pitt school-in an area such as bioethics, business, public health, and social work-or at nearby Carnegie Mellon University in less time than it would normally take to complete two consecutive degrees.

You might not expect a 30-credit Master of Studies in Law advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree. Or a Master of Laws degree to provide foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year. Or even a completely-online Health Care Compliance Online Graduate Certificate Program developed by experts in compliance, law, and online education.

And you might not expect how quickly and the extent to which you'll get to apply those classroom lessons. Assisting the public through work with a clinic (health law, elder law, the environment, immigration, and more); serving as a full-time extern on Capitol Hill or throughout Washington, D.C., as part of the Semester in D.C. Program; interning with a federal agency, nonprofit, or corporation; and participating in a national or international moot court competition are just some of the opportunities you'll have to practice your skills and hone your expertise even before you graduate.

Certificate

Law - Certificate in Disability Legal Studies

The law exerts a powerful and direct impact on the lives of persons with disabilities. It is estimated that close to 20 percent of the US population, nearly 54 million people, have a disability, with a dramatic increase in the proportion since 1970. People with disabilities comprise one of the largest, least employed, and most disenfranchised minority groups in society.

This 15-credit certificate program is a unique effort to provide legal education to those working in the administration of and provision of services in disabilities programs. Administrators, educators, health practitioners, advocates, social workers, architects, city planners, attorneys, and business leaders, among others, could potentially benefit from the program's instructional content.

Requirements

Students enrolled in the certificate program are required to take four core courses.

- LAW 2814 - INTRODUCTION LAW AND LEGAL REASONING
- LAW 5395 - HEALTH LAW AND POLICY
- LAW 5339 - LAW OF DISABILITY DISCRIMINATION
- LAW 5028 - TORTS

Or another first-semester required course if the Certificate Director deems it preferable for a particular student's interest

The remaining 3 credits (minimum) may be satisfied by any of the following (or similar) courses which are offered as instructor availability permits:

- LAW 5464 - BIOETHICS AND LAW
- LAW 5283 - MENTAL HEALTH LAW

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Environmental and Energy Law Programs

The School of Law is currently in the process of transitioning its longstanding Environmental Law, Science & Policy Certificate Program into a new Energy & Environmental Law Area of Concentration:

Students who were admitted with the Class of 2016 or earlier classes can choose either to pursue the Certificate or the Area of Concentration. Whichever choice a student makes, the student must register for, and complete the requirements of, the chosen program in order to have completion of that program reflected on their transcripts.

Students who are admitted with the Class of 2017 or later classes may only enroll in the Area of Concentration.

The law around the development, sale, use and preservation of natural resources is the practice framework for energy and environmental lawyers. Pitt Law offers a flexible concentration that allows students to pursue transactional, regulatory, litigation, or policy-based courses in the area of energy & environmental law. Students pursuing this concentration may explore the law of shale plays, utility law, international commercial transactions, pollution control laws, conservation statutes, renewable energy incentives, and climate law and policy.

Energy and environmental law is often practiced in or through interactions with administrative agencies and tribunals. The Concentration exposes students to administrative decisionmaking, statutory interpretation, rulemaking and adjudication, and judicial review of agency decisions.

Area of Concentration

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students may pursue this concentration by taking foundational courses in environmental or energy law, 5-6 credits of electives, and 4-6 skills-based credits.

Please note that this program may require that you complete an internship, externship, or other field work at a facility or facilities external to the University and that such facility or facilities may require a criminal background check, an Act 33/34 clearance (if applicable), and perhaps a drug screen to determine whether you are qualified to participate.

- LAW 5340 - ENVIRONMENTAL LAW
- LAW 5038 - ENERGY LAW AND REGULATION
- **Elective Courses (5-6 credits required)**
- LAW 5201 - ADMINISTRATIVE LAW
- LAW 5082 - CLIMATE CHANGE AND THE LAW
- LAW 5295 - EXPERT WITNESS
- LAW 5919 - PGH JOURNAL TECH LAW & POLICY
- LAW 5143 - WATER & SHALE GAS DEVELOPMENT
 - Energy & Environment
 - International Energy Transactions
 - * may be alternately used as a Skills Component
- **Skills Component (4-6 credits required)**
- LAW 5883 - ENVIRONMENTAL LAW CLINIC
 - Environmental Moot Court Competition
 - Energy Law Moot Court Competition
 - Externship in the area of Environmental Law or Energy Law
- LAW 5955 - D.C. EXTERNSHIP

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Health Care Compliance Online Graduate Certificate Program

The Health Care Compliance Graduate Certificate Program is a fully online, accelerated 10-month graduate certificate program designed for working professionals. This advanced, accelerated program will support you as you take on more strategic compliance roles. In this program, you will:

- Learn the relevant law, practical applications of compliance, best practices and explore current issues;

- Interact with expert faculty-professors from the School of Law and Graduate School of Public Health, current and former federal regulators, and compliance industry experts;
- Network and collaborate with your peers in other industries and locations through innovative online applications; and
- Work on weekly assignments when and where you choose.

This program is designed for:

- Compliance professionals who wish to enhance their understanding and professional development;
- Attorneys who wish to acquire an appreciation of the compliance industry, client needs, and issues;
- Health care professionals who must understand compliance;
- Industry administrators and leaders; and/or
- Those interested in an exciting career change.

HCC Online course work is asynchronous, meaning there are no scheduled meeting times or locations. You will complete each course in the program within eight weeks, working through weekly modules, based on your own schedule and from any location.

The objectives of the Health Care Compliance Online program are to:

- Provide an understanding of the laws that shape the health care industry in general, and compliance in particular;
- Help students acquire a deeper understanding of the regulatory context of compliance;
- Help students develop the skills and knowledge necessary to identify compliance issues, guide change, and navigate complexity while supporting an ethical culture;
- Identify best practices in compliance management;
- Enhance critical thinking and problem solving skills in a compliance context;
- Help students acquire knowledge and skills to manage conflict;
- Improve students' communication and presentation skills; and
- Facilitate peer-to-peer learning and networking opportunities.

Requirements

Applicants must have earned a baccalaureate degree at an accredited institution. Admissions decisions will be made based on professional experience, academic credentials, and a personal statement. In some instances an interview (online or via phone) may be required.

To apply for the program, complete the Health Care Compliance Online Application available at Pitt Online's website.

Note: Please visit the Pitt Online State Authorization page to be sure your state is authorized to enroll students online. Currently, pursuant to state laws and regulations, online programs at the School of Law are authorized to enroll students from all states with the exception of: Arkansas, Kentucky, Minnesota, Missouri, Oregon, Washington State. Maryland Residents: the University of Pittsburgh is registered with the Maryland Higher Education Commission.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Health Law Certificate

Students enrolled in a degree program at the University of Pittsburgh School of Law can develop an expertise in the rapidly changing, steadily growing field of health law through the Law School's Health Law Certificate Program.

Pitt's program, one of the oldest in the country, is intended to give students interested in health law a basic grounding in the field, complemented by clinical experience and more in-depth study of advanced topics and closely related areas of law. Students are encouraged to obtain the same broad background in law expected of all graduates for the University of Pittsburgh School of Law.

The health care industry comprises more than one-sixth of the entire economy-larger even than the automobile industry. It is also a large consumer of legal services. Law firms ranging from the largest to the smallest provide legal services to hospitals, health insurance companies, nursing homes, physicians' practices, home health agencies, and pharmaceutical and device manufacturers, to name some of the more prominent. In addition, many

federal and state agencies and many of the larger providers of health care goods and services employ a large number of lawyers in house. Although there are a few areas that are substantively unique-such as Medicare and Medicaid reimbursement, certificate of need requirements, and fraud and abuse prohibitions-much of health law involves the application of other areas of law, such as corporate law, employment law, and real estate law, to the health care industry's special circumstances.

The Health Law Program provides students with a strong foundation in health law that will enable them to practice in a variety of contexts, including law firms, health care management firms and insurers, government, and health care institutions. A combination of classroom and skills components acquaints students with everything from complex business and legal transactions, to bioethics and patient care issues, to the variety of legal issues that arise in the operation of a health care institution. Students gain hands-on experience in these areas through their work in the Law School's clinics and practicums, and in externships and summer jobs available in the health care setting.

In addition to courses taught by regular law school faculty, leading practitioners in various fields of health law such as fraud and abuse, business transactions, compliance, disabilities law, nonprofit organizations, and privacy teach courses designed to relate theory to practice. In addition, Current Issues in Health Law, a required course for all Health Law Certificate Program students, is taught by renown practitioners of health law and by health care professionals and executives.

Requirements

The Health Law Certificate Program is an educational program of concentration in health law for students in their second and third years of the JD curriculum. Admission is available to all students entering their second year in the JD program.

Students must complete the following requirements to receive a Certificate in Health Law:

- Complete a minimum of 18 credits in courses in health law, including Health Law and Policy, and Current Issues in Health Law;
- Write their faculty-supervised paper on a topic in health law;
- Complete a clinic, externship, or practicum;
- Take a minimum of two health law electives.

Required Level Courses (register for 2 courses)

- LAW 5731 - CURRENT ISSUES IN HEALTH LAW
- LAW 5395 - HEALTH LAW AND POLICY

Core Elective Courses (register for 2 courses)

- LAW 5464 - BIOETHICS AND LAW *
- LAW 5811 - HLTH CARE BUS TRANSACTIONS *
- LAW 5284 - HEALTH CARE COMPLIANCE *
- LAW 5408 - HEALTH CARE FRAUD AND ABUSE
- LAW 5089 - PUBLIC HEALTH LAW *

Skills Course (register for at least 2 credits)

- LAW 5955 - D.C. EXTERNSHIP
- LAW 5391 - ELDER LAW CLINIC
- LAW 5393 - HEALTH LAW CLINIC
- LAW 5497 - HEALTH LAW PRACTICUM: ADR
- LAW 5538 - MEDICARE & MEDICAID PRACTICUM
- LAW 5875 - SOCIAL SECURITY DISABILITY PRACTICUM
- LAW 5973 - VETERAN'S PRACTICUM

National Health Law Transactional Competition

Additional Electives (register for at least 2 related courses)

- LAW 5251 - BIOTECHNOLOGY LAW
- LAW 5212 - BUS PLANNING, ENTREP & TECHN
- LAW 5135 - COMMERCIALIZING NEW TECS
- LAW 5300 - FOOD AND DRUG LAW
- LAW 5430 - INFO PRIVACY LAW AND PRACTICE
- HPM 2133 - LAW IN PUBLIC HEALTH PRACTICE
Law in Public Health Practicum (GSPH)

- LAW 5283 - MENTAL HEALTH LAW
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5313 - REPRDCTV LAW & POLICY

* This course may be used to satisfy the Additional Electives requirement or the Core Elective requirement, but not both.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Intellectual Property, Technology & Innovation Law

The School of Law is transitioning its longstanding Intellectual Property & Technology Law Certificate Program into a new Intellectual Property & Innovation Law Area of Concentration:

Students who were admitted with the Class of 2017 or earlier classes can choose to pursue either the Certificate or the Area of Concentration. Whichever choice a student makes, the student must register for, and complete the requirements of, the chosen program in order to have completion of that program reflected on their transcripts.

Students who are admitted with the Class of 2018 or later classes may only enroll in the Area of Concentration.

The Intellectual Property and Innovation Law Area of Concentration is designed to allow students to obtain a focused introduction to these bodies of law and practice while simultaneously getting a broad grounding in modern law practice generally. No scientific or technical background is required to pursue the Area of Concentration or to practice law in any of the related fields, though students who wish to practice law as a patent prosecutor do need to have an engineering degree or other, similar technical qualification.

Certificate Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, students must have a minimum of 14 credits and meet the below course requirements. In addition, students can opt to use one of the following as a Skills Component:

- Giles Sutherland Rich Moot Court Competition
- Cardozo/BMI Moot Court Competition
- Externships with government agencies or other organizations that focus on intellectual property and/or technology law, practice, and/or policy
- Semester in DC externship with a focus on intellectual property and/or technology law, practice, and/or policy.

Foundational Courses (2 courses totaling 5-6 credits required)

- LAW 5260 - INTELLECTUAL PROPERTY
 - LAW 5328 - COPYRIGHT *
 - LAW 5694 - TRADEMARK LAW *
- * may be taken as elective if not taken as a foundational

Elective Courses (5-6 credits required)

- LAW 5895 - ARTIFICIAL INTEL & LGL RES SEM
- LAW 5251 - BIOTECHNOLOGY LAW
- LAW 5212 - BUS PLANNING, ENTREP & TECHN
- LAW 5620 - CYBERSECURITY & PRIVACY REGLN
- LAW 5404 - CYBERSPACE AND THE LAW
- LAW 5862 - FDS INTELCL PROPERTY LAW SEM
- LAW 5547 - INT'L INTELLECTUAL PROPRTY LAW
- LAW 5631 - LAW AND ENTREPRENEURSHIP
- LAW 5717 - TELECOMMUNICATIONS LAW
- LAW 5984 - TRADE SECRETS LAW

Skills Component (4-6 credits required)

- LAW 5135 - COMMERCIALIZING NEW TECS
- LAW 5481 - INTELLCTL PROPERTY LICENSING
- LAW 5839 - LAW ENTRTAINMNT SCL ENTRP PRAC
- LAW 5242 - PATENT LAW PRACTICE
- LAW 5276 - PATENT LITIGATION
- LAW 5695 - TRADEMARK LAW PRACTICE

Note

Law - International and Comparative Law Certificate

The International & Comparative Law Certificate program is intended to provide a foundation for careers and further study in the application of legal regimes to transnational and international relationships. Students should keep in mind that in order to be a good international or comparative lawyer, one must first be a good domestic lawyer. Thus, students in the certificate program are expected and encouraged to obtain the same broad background in law expected of all graduates of the University of Pittsburgh School of Law.

Requirements

To receive the International & Comparative Law Certificate upon graduation, students must complete:

- the required courses (below);
- satisfy the Upper Level Writing Requirement (ULW) with a paper focused on international or comparative law content;
- complete twelve credits of elective courses (below);
- and attenda two designated CILE programs in each of the candidate's 2L and 3L years at the School of Law.

The courses that qualify as international and comparative law electives for purposes of the Certificate requirements are determined annually. In general, a course will satisfy the elective requirement if at least 25 percent of its content is in the areas of international or comparative law. Listed below are courses offered in recent years that have satisfied this elective requirement - you should consult the schedule of courses for any given term to determine what courses are being offered and the credits awarded. For new course offerings, you should contact CILE to determine if a given course will satisfy the elective requirement. Courses in the School of Law that do not have a predominantly international or comparative law subject matter may be approved for elective purposes on a case-by-case basis at the discretion of the CILE Academic Director if, in practice, the student's work in the class included that element in a particularly substantial manner; for example, the student satisfies the written requirement of a "W" course with a paper using a comparative law approach. (Note this would not be permitted if the given paper was also being used to satisfy the ULW requirement.)

Coursework outside the School of Law may also be eligible to satisfy up to 3 elective credits if the CILE Academic Director determines that at least 25 percent of its content is in international topics, that it otherwise is an appropriate course for these purposes, and the use of these credits has been approved by the Associate Dean of the School of Law as qualifying under School policy for the six credits of non-School of Law coursework permitted to be credited towards the JD degree. Proposed elective courses outside the School of Law must be approved in advance by the CILE Academic Director as well as in accordance with general School of Law policies.

Required Courses

- LAW 5226 - INTERNATIONAL LAW
- LAW 5225 - INTERNATNL BUSINESS TRANSACTNS

Example Electives

- LAW 5618 - ARABIC FOR LAWYERS 1
- LAW 5619 - ARABIC FOR LAWYERS 2
- LAW 5124 - THE CIVIL LAW TRADITION IN U.S. COURTS
- LAW 5304 - COMMERCIAL TRANSACTIONS
- LAW 5213 - CONFLICT OF LAWS
- LAW 5299 - CONTEM CHIN LGL INSTN US LAWYR

- LAW 5857 - DIVERSITY COPR GVRNC SEMINAR
- LAW 5252 - INT'L & EURPN LABOR MARKTS LAW
- LAW 5469 - FRENCH FOR LAWYERS 1
- LAW 5471 - FRENCH FOR LAWYERS 2
- LAW 5416 - GERMAN FOR LAWYERS
- LAW 5473 - GERMAN FOR LAWYERS 2
- LAW 5986 - INTERNATIONAL ARBITRATION SEM
- LAW 5043 - INT'L COMMERCIAL ARBITRATION
- LAW 5275 - INT'L & FOREIGN LEGAL RESEARCH
- LAW 5653 - INTERNATIONAL HUMAN RIGHTS

- LAW 5694 - TRADEMARK LAW
- LAW 5453 - TRANSNATIONAL LITIGATION
- LAW 5253 - TRANAT LITIGATN CRT AROND WRLD

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - J.G. Civil Litigation Certificate Program

Are you drawn to the real life drama of the courtroom? Do you have dreams of becoming a trial attorney? If so, then the University of Pittsburgh School of Law (PittLaw) may just be the place for you. Through its unique John P. Gismondi Civil Litigation Certificate Program, PittLaw can provide you with a unique curriculum devoted exclusively to training the trial lawyers of tomorrow.

During the first year of law school, all students take the same courses. Those students who wish to register for the Gismondi program, do so at the beginning of their second year of law school. During their second and third years, all students enrolled in the certificate program will take certain required foundational core courses, a clinic or practicum, as well as a number of specialized classes. The heart of the Gismondi program is a collection of specialized courses taught exclusively by a pre eminent group of practicing trial attorneys whose insight and experience offer an invaluable perspective in the classroom. Together with our core courses, these select courses provide a level and depth of litigation training unlike that available at most any other law school.

In each of these specialized skills courses, class size is kept small so as to enrich the learning experience. Students not only are taught legal rules and principles in a typical lecture format, but more importantly, they are assigned to "role play" in a variety of real world litigation scenarios, each designed to develop specific skills which are essential to successful trial work.

Students complete their training by taking a required litigation skills clinic or practicum selected from this group of options: Civil Practice Clinic (Health Law or Elder Law), Tax Clinic, Immigration Clinic, Environmental Law Clinic, PA Practice Practicum, Lawyering III Clinic, Unemployment Compensation Practicum, Criminal Prosecution Practicum, Veterans Practicum or Family Law Clinic. In all of these clinics, students have the potential of representing real clients in actual court proceedings.

The students in the John P. Gismondi Civil Litigation Certificate Program will complete their law school education having developed a set of skills which better prepares them to do courtroom work than traditional law school graduates, and that advantage, in turn, makes the Gismondi certificate students more attractive to law firms seeking to hire young and enthusiastic litigation associates.

Certificate Requirements

All students must follow the JD degree requirements in order to graduate. To qualify for this certificate, students must complete the Core Courses and Required Specialized Skills Courses listed below. In addition, students must take a litigation skills clinic or practicum, or a combination thereof, approved by the Director of Civil Litigation Program for a minimum of four credits.

Students must participate in the Murray S. Love Trial Moot Court Program during their second or third year or the Interscholastic Mock Trial Team (enroll in the attendant seminar Mock Trial Strategy and Practice).

Students must participate in the Program's Court Observation. Students will spend a day organized by the Academy of Trial Lawyers of Allegheny County observing court proceedings. Students will fulfill this requirement in their third year. Students must sign up with the Program Director in order to participate on one of these dates.

Students are required to complete an Upper Level Writing Requirement of 2 credits. Students may satisfy this requirement by taking any seminar or undertaking an independent study project if the paper they write is on an unresolved litigation related issue and the issue is approved by the Director of the Civil Litigation Certificate Program and the faculty member supervising the seminar or independent study project. The paper must comply also with applicable requirements of the professor and the Student Handbook relating to the Upper Level Writing Requirement.

- LAW 5103 - EVIDENCE
- LAW 5407 - TRIAL ADVOCACY
- Or
- LAW 5616 - MOCK TRIAL STRATEGY AND PRA
- LAW 5129 - FEDL COURTS & FEDL LITIGATION
- Or
- Students must take four of these five courses:
- LAW 5320 - LITIGATION STRATEGY & PLANNING
- LAW 5295 - EXPERT WITNESS
- LAW 5236 - PRE-TRIAL PRA-PLEADINGS DISCV
- LAW 5223 - ADVANCED TRIAL EVIDENCE
- LAW 5197 - ADVANCED TORTS

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Public Policy Concentration

You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program in the spring semester of your 2L or 3L year.

While law students learn many skills that are useful for policy-related work, they do not typically learn how to apply those skills in a policy context, for example by analyzing a government agency report, mapping the stakeholders on a particular issue, preparing questions for a Senate hearing, writing a short policy brief, or developing an advocacy campaign.

The Semester in DC Program Policy Track is designed to fill this gap by teaching you how to apply your legal advocacy, research, and writing skills in the policy context, so that you can successfully engage in policy-related work after graduation. The Policy Track is offered each spring semester jointly with the Graduate School of Public and International Affairs (GSPIA) at Pitt's Washington Center in downtown Washington, DC.

Highlights of the Semester in DC Program Policy Track include:

- A policy-related externship with a government or nonprofit organization in Washington, DC
- Classes that are focused on learning from policy experts who regularly visit as guest speakers and on attaining pragmatic policy advocacy, analysis, and writing skills
- Joint classes with GSPIA students, so that both policy and law perspectives are represented in each class
- An individual alumni mentor for each student, as well as connections with Law and GSPIA's alumni network of hundreds of attorneys and policy practitioners in the Washington, DC area

Semester in DC Program alumni have gone on to do all kinds of policy work after graduation, including positions:

- With the U.S. Departments of State and Health and Human Services
- With U.S. Senate and House offices
- In healthcare policy for Johnson & Johnson, the Maryland Department of Health, and the Legal Resource Center for Public Health Policy
- In environmental policy for the Sierra Club, the Environmental Investigation Agency, and Voices for Progress
- In child/family policy for the Children's Law Center and First Focus
- In labor policy for the AFL-CIO

Requirements

You can earn the Public Policy Concentration by completing the Policy Track of the Semester in DC Program after taking the required 1L Legislation and Regulation course.

The Public Policy Concentration requires students to earn 15 credits in the policy-related classes listed below. Students will have already completed the 3-credit foundational course in Legislation and Regulation in their 1L year. Students can complete the 12 remaining credits by participating in the Semester in DC Program Policy Track, which offers the listed courses. Only the courses listed below may be used to fulfill the requirements of this concentration; other courses may not be substituted.

Foundational Course

- LAW 5032 - LEGISLATION AND REGULATION

Electives (up to 7 credits)

- LAW 5877 - LAW MAKING SEMINAR
- LAW 5666 - LOBBYING AND ADVOCACY
- LAW 5668 - POLICY COLLOQUIUM

or

- LAW 5954 - D.C. SEMINAR

(Students may apply 1 credit from the DC Seminar to the Public Policy Concentration if their seminar papers are approved in advance as policy-focused.)

Skills Component (6 credits required)

- LAW 5667 - POLICY EXTERNSHIP *
- LAW 5955 - D.C. EXTERNSHIP *

* must be approved in advance as policy focused.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Tax Law Program

The Area of Concentration in Tax Law is intended to provide students with a solid foundation in tax law that can be used either to enter a career in tax law, as a basis for pursuing further study in tax law, or as an adjunct to a career in another area of law. Tax law is unique in that it intersects with every area of the law—from energy and environmental law to corporate law to health law to personal injury law, just to name a few examples. Knowledge of tax law is thus important whether one wishes to specialize in tax law or whether one wishes to gain a deeper knowledge of tax law to improve skills in another area of law (e.g., in advising corporations, partnerships, and other businesses).

Students may pursue this concentration by taking a foundational course in tax law, six credits of elective courses, and three credits of skills-based courses.

Area of Concentration

All students must follow the JD degree requirements in order to graduate. To qualify for this concentration, the Tax Law Area of Concentration requires a minimum of 13 credits. The requirements for the program are divided into three categories—foundational, elective, and skills. Students must take a foundational course in tax law, 6 credits from among the listed elective courses, and 3 credits from among the listed skills courses.

Foundational Course (Required)

- LAW 5105 - FEDERAL INCOME TAXATION

Elective Courses (6 credits required)

- LAW 5817 - CORPORATE TAXATION
- LAW 5371 - PARTNERSHIP TAXATION
- LAW 5259 - ESTATE AND GIFT TAX
- LAW 5841 - INTERNATIONAL TAX *
- LAW 5325 - FEDERAL TAX PRACTICE & PROCEDURE
- LAW 5355 - NON-PROFIT ORGANIZATIONS
- LAW 5273 - STATE AND LOCAL TAX
- LAW 5511 - TAX LAW & POLICY SEMINAR
- LAW 5931 - PITTSBURGH TAX REVIEW

Skills Component (3 credits required)

- LAW 5425 - LOW-INCOME TAX CLINIC
Tax Law Moot Court Competition
- LAW 5414 - ESTATE PLANNING
Externship in the area of tax law
- LAW 5955 - D.C. EXTERNSHIP
* may be alternately used as a Skills Component

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Doctoral

Law - Juridical Science, SJD

Program Information

The Doctor of Juridical Science (SJD) is the Law School's most advanced degree, which is designed for legal academics who wish to pursue advanced independent study, research and writing. The Law School's SJD program offers candidates the opportunity to become active members of a vibrant legal community.

Degree Requirements

The SJD is a research degree. There is no formal requirement for candidates to pursue course work, whether for credit or otherwise, other than required participation in a non-credit, ungraded colloquium for SJD students during their first year in the program. However, a candidate may be required by his advisor to take or audit courses and participate in seminars and discussions which will further the student's understanding of his or her field of knowledge and its relation to other fields. Each candidate will be allowed 2-4 years to complete the program, the first year of which must be spent in residency at the University of Pittsburgh School of Law. The year of residency is in addition to the LLM year for Pitt Law LLM graduates. A candidate is required to conduct rigorous research and produce an original dissertation that will contribute significantly to legal scholarship and further understanding of the law. Specifically, a candidate is required to submit a dissertation overview, defend that overview, submit a doctoral dissertation, and successfully defend the dissertation. The SJD degree must be completed under the supervision of a faculty member who has consented to serve as the faculty advisor.

Joint Degree

Law and Arts Management (Carnegie Mellon), JD/MAM

The University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which arts management and law overlap. This program, spanning four years, prepares you for careers in which arts management and law overlap. You must satisfy both schools' degree requirements, but some credit is given by each school for completing the other school's program.

The joint degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

hznadmit@andrew.cmu.edu

Law Arts Management Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MAM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MAM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Bioethics, JD/MA

JD/MA, University of Pittsburgh School of Arts and Sciences and the Center for Bioethics and Health Law

The School of Law and the School of Arts and Sciences (A&S) offer a joint degree program in law and bioethics. Graduates of the program receive the Juris Doctor (JD) degree, the basic professional degree in law, and the Master of Arts (MA) degree from FAS, in bioethics. The joint degree program is directed by Alan Meisel, JD, in cooperation with Lisa S. Parker, PhD, who directs the interdisciplinary Master of Arts in Bioethics.

The joint degree program has been established in recognition of the extensive and increasing overlap between law and bioethics. The objective of this educational program is to prepare graduates with an interdisciplinary background in law and bioethics so they can address those issues and situations that require knowledge of and expertise in both. Graduates will be academically prepared for professional roles as bioethicists in health care institutions, in public policy working for government or philanthropic organizations, or in the practice of law, for example, giving counsel to health care institutions.

Contact Information

University of Pittsburgh School of Law
Professor Alan Meisel
3900 Forbes Avenue
Pittsburgh, PA 15260
(412) 648-7120
meisel@law.pitt.edu

Requirements

The sequence of the curriculum is designed to allow students maximum flexibility. Students may either take the entire first-year School of Law curriculum intact, or they may take one bioethics course - Theoretical Foundations of Applied Ethics - in place of Criminal Law (which would then be taken in their second year of law school). Students should discuss this plan of study with Prof. Alan Meisel, Director of this joint program.

Writing Requirements

The writing requirements for both degrees are simultaneously satisfied by completion of the master's thesis requirement in a subject in the field of law and bioethics.

Practica

The Clinical Practica ensure that students will be comfortable in and knowledgeable about the clinical setting by learning how to identify the normative issues in clinical cases and to be able to give practical advice regarding difficult bioethical dilemmas. Students are scheduled for six credits of clinically-based work, which may be reduced to three for students with previous health care training. In Clinical Practica I and II students acquire familiarity with the clinical setting by

- rounding in specified services with residents, attending physicians, and other health care professionals, including one night on call per service
- participating in twice weekly seminars on medical sociology and clinical ethics and to fulfill those seminar requirements of reading, writing, discussion, and case presentations
- observing ethics consultations and clinical ethics teaching sessions
- completing a self-paced programmed text covering basic medical terminology

In Clinical Practicum II, students participate in an intensive four-week rotation in the clinical area of their choice, allowing in-depth development in an area of clinical medicine. Students should relate this intensive clinical experience to their thesis topic.

In addition to meeting the specifically required coursework for the JD degree and the MA degree, students will select electives from among an array of courses available in the two separate degree programs and in other parts of the University. For an up-to-date list of law school courses considered to be especially appropriate for students in this joint degree program, students should consult the courses listed as electives for the Health Law Certificate Program.

Students in the joint law and bioethics program will ordinarily fulfill the requirements of the Health Law Certificate Program in the law school and may obtain this certificate concurrent with the joint degree.

Advising

Students are required to consult with the Director of the Joint Degree Program during or prior to the spring registration period each year in order to assure that they meet all requirements of the Joint Degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in this joint degree program unless they limit the number of credits from outside the Law School that count toward their JD degree to no more than 12. See New York Rules of Court § 520(c)(5).

Credits

Students enrolled in the joint degree program accomplish in three to four years what would take four or more years if the two degrees were obtained separately. The total required number of credits 100, as compared with 118 credits if the two degrees were taken separately. The 100 credits include 34 credits of specifically prescribed* law courses, the Bioethics and Health Law Clinical Practicum (3 credits), and 18 specifically prescribed credits in bioethics. Within the remaining 45 credits, students must satisfy requirements for their law degree, take a course from the list of Restricted Elective courses for the bioethics degree, and take at least 3 credits in a course relevant to bioethics (either in the law school or not).

Taken as a joint degree program, the two degrees are ordinarily earned in 7 semesters and one summer.

During at least 5 semesters, joint degree students must be coded by the University Registrar as "primary law." During these semesters, they pay tuition at the Law School rate. They must enroll in at least 10 credits of law school courses.

Specifically Prescribed Law Courses

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING (Fall Term)
- LAW 5076 - LEGAL ANALYSIS AND WRITING (Spring Term)
- LAW 5028 - TORTS
- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5024 - PROPERTY
- LAW 5061 - PITT LAW ACADEMY (Fall Term)
- LAW 5062 - PITT LAW ACADEMY (Spring Term)
- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2904 - MA THESIS IN BIOETHICS
- BIOETH 2606 - CLINICAL PRACTICUM 2
- BIOETH 2664 - BIOETHICS
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS

Additional credits to complete the graduation requirement may include courses service as a bioethics restricted elective or a bioethics elective.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Business Administration (Carnegie Mellon), JD/MBA

The daily interaction of Law and Business in our society presents attorneys, entrepreneurs, and other professionals with a diverse set of challenges arising from public and private institutions, policies, and practices. A joint degree program can provide valuable interdisciplinary skills to tackle these challenges. To prepare the next generation of leaders, the University of Pittsburgh School of Law offers an outstanding joint degree program in Law and Business with a unique option.

Students may combine a Juris Doctor (JD) degree with a Master in Business Administration (MBA) from Carnegie Mellon University Tepper School of Business, which is in the top 20 of all U.S. business schools according to the U.S. News rankings. The JD/MBA program enables students to receive integrated training in Law and Business while reducing the amount of time ordinarily necessary to earn the two degrees from five years to four years.

Requirements

Students in the JD/MBA program complete the joint degree in either eight (8), nine (9), or ten (10) semesters. During the first four (4) semesters of the program, students must enroll full-time for one (1) entire year at the School of Law and for one (1) entire year at the appropriate School of Business. Students have an option of enrolling either at the School of Law or the School of Business for the first-year of the program. During the third- and fourth-years of the program students enroll in courses at both schools, subject only to availability and each school's respective upper-level requirements. To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the First-Year Curriculum page. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the Graduation Requirements page.

Tepper School of Business

To graduate with a JD/Tepper MBA degree students must acquire a total 88 credits from the School of Law and 64 credits (or 192 units) from Tepper. However, completing the MBA degree entitles the student to 15 credits of advanced standing at the School of Law, resulting in an actual total of 73 credits; and completing the JD degree entitles the student to 10 credits (or 30 units) at Tepper, resulting in an actual total of 54 credits (or 162 units). This means that, after a year at the School of Law and a year at Tepper, a student must acquire at least 40 additional credits from the School of Law and 22 credits (or 66 units) in electives from Tepper to graduate with a JD/MBA.

More information can be found on their website.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MBA with the Tepper School of Business). See New York Rules of Court § 520.3(c)(5).

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

To graduate from the Law School, students in the JD/MBA program must have five semesters of full-time enrollment (minimum of 10 credits per semester) at the Law School (rather than the six that is normally required).

School of Law

Details about the first-year program at the School of Law can be found on the [First-Year Curriculum page](#). A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the [Graduation Requirements page](#).

Katz School of Business

To graduate with a JD/Katz MBA degree students must acquire a total of 76 credits from the School of Law and 39 credits from Katz. This means that, after a year at the School of Law and a year at Katz, a student must normally acquire at least 43 additional credits from the School of Law and 3 credits from Katz to graduate with a JD/MBA.

More information can be found on their website.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MBA with the Tepper School of Business). See New York Rules of Court § 520.3(c)(5).

Note

For detailed term-specific course descriptions, please go to the [Schedule of Classes Course Lists](#) on the Law School web site.

Law and Information Security Policy (Carnegie Mellon), JD/MSISPM

Building on their longstanding and successful partnership, the University of Pittsburgh School of Law and Heinz College offer a joint degree program designed to train students for careers in which management, information security, and law overlap. This joint degree offering is particularly beneficial to many students' careers because legal considerations affect many management and policy decisions, and the practice of law is enhanced by a clear understanding of the policy and security concerns facing the public, private, and nonprofit sectors. Participants in the program will emerge with a broad knowledge of the fundamental intersections of law, government, privacy and information security, and management. The fields of

cybersecurity, information privacy, intellectual property law, cybercrime, and other IT-related sectors are growing rapidly. There are many job opportunities in this emerging space. Many of those jobs have legal dimensions and will be filled by people with legal training. Graduates of the joint degree program will be better prepared to compete for those jobs and to succeed in them because of their broader, interdisciplinary training. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Curriculum & Requirements

The Heinz School of Public Policy and Management and the Law School have different degree requirements. Carnegie Mellon courses are counted in units and University of Pittsburgh courses are counted in credits. A 12-unit course is the equivalent of a 4-credit course. To fulfill the program requirements for the Law School, students have to complete 88 credits while the Heinz School requires 198 units for the MSISPM degree. Students in the joint degree program are able to transfer 30 units to the Heinz School degree after completing their JD degree and 14 credits to the JD degree after completing their MSISPM degree.

Students are required to register for a minimum of one class per semester at Heinz College during years 3 and 4 in order to qualify for the transfer of credits between institutions. A full listing of the requirements for graduation from the University of Pittsburgh School of Law can be found on the [Graduation Requirements page](#).

Before selecting courses for each program, students are required to meet with their Academic Advisors at both programs to map out a course of study. In addition to the course work for both programs, Heinz School students are required to complete a summer internship after their first year at the Heinz School. Students can receive assistance from the Career Services Office in securing an internship.

Since degrees in the joint programs are awarded concurrently, it is important to note that a student who resigns from one program will be subject to all the requirements for graduation from the remaining degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and International Affairs, JD/MPIA

This program provides rigorous, integrated training for students preparing for a professional career that combines law and public and international affairs. Increasingly, lawyers in the public and nonprofit private sectors work in managerial and policy-making capacities for which legal training alone does not prepare them. At the same time, legal considerations impinge more than ever on the work of public managers and planners, although most of them have had no exposure to legal training. Students in the joint-degree program gain a broadened knowledge base and a cross disciplinary approach to solving problems involving the intersection of law, policy, and management. They also develop more marketable professional skills than are usually acquired through single-degree programs. Professionals trained in both law and public and international affairs thus enjoy expanded career opportunities. The University of Pittsburgh's program is unique because of the range of master's degree options available.

Students in the MPIA degree program pursue majors in Global Political Economy or Security and Intelligence Studies. Students interested in international development have a choice of two major fields, which include Development Planning and Environmental Sustainability or Non-Governmental Organizations (NGOs) and Civil Society.

Curriculum & Requirements

The structuring of this four-year degree program is flexible. A student may begin study in either school. The only requirement in this connection is that the first year in the School of Law be taken in its entirety, with no outside courses. GSPIA also expects joint-degree program students to complete the required master's degree core courses early in their program in GSPIA.

Degrees in the joint-degree program are awarded concurrently. Therefore, it is important to note that a student who resigns from one program and elects to remain in the other will be subject to all the requirements of that particular degree program. The previously described arrangement for awarding advanced-standing credits will no longer be in effect.

Each student must satisfy both schools' requirements as modified by participation in the joint-degree program. The credit requirements are as follows:

Program	Joint Degree Credits
Juris Doctor (JD)	79 Credits
Master of Public and International Affairs	36 Credits
Total Credits for Joint Degree	115 Credits

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Health, JD/MPH

The Graduate School of Public Health, Health Policy & Management and the School of Law at the University of Pittsburgh offer a cooperative educational program, through which students may earn both the Juris Doctor (JD) degree, the first professional degree in law, and the Master of Public Health (MPH) degree, the primary professional degree in public health. Students have the option of selecting between two areas of concentration pursuing their MPH degree: health policy and management or public health sciences. The joint-degree program has been established in recognition of extensive and increasing connections between law and the broad range of health services, both public and private, in the United States.

The objective of this specialized educational program is to provide graduates with an inter-disciplinary education to prepare them to address issues and situations that affect personal and public health. Graduates of this joint-degree program are academically prepared for the practice of law with private clients, serving as house counsel with health organizations and systems, and as attorneys representing state, county and local health departments. The threat of bioterrorism and the need to balance both individual rights and public protection in establishing public health preparedness has made public health law an even more vital professional focus for attorneys.

For Additional Information

For information regarding entrance examinations, tuition and financial aid, writing requirements and field experience, please visit the GSPH website.

Requirements

Students enrolled in the joint-degree program receive integrated training in law and public health. Students must complete 37 credits in the MPH curriculum, and 8 JD credits will be applied toward the MPH degree in order to meet the required 45 credits for the MPH degree. Students must complete 76 credits in the JD curriculum, and 12 MPH credits will be applied toward the JD degree in order to meet the required 88 credits for the JD degree. The first year of law school must be completed in a single academic year before embarking on studies in public health. Neither degree may be granted prior to the fulfillment of all requirements for the joint-degree program.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law and Public Policy and Management (Carnegie Mellon), JD/MSPPM

The University of Pittsburgh School of Law and Heinz College offer a joint-degree program designed to train students for careers in which management, public policy and law overlap. A successful partnership that has been in existence for over a decade, this program offers students a comprehensive education that marries the analytic and quantitative strength of the Heinz School with the rigorous legal training afforded by the School of Law. This joint degree offering is particularly beneficial to many students' careers since legal considerations affect many public management and policy decisions, and the practice of law is enhanced by a clear understanding of public policy and management concerns. Participants of the program emerge with a broad knowledge of the fundamental intersections of law, government, policy analysis and management. Furthermore, the interdisciplinary nature of this program allows for practical skill sets to solve economic and social problems that require technological, managerial, and legal expertise.

The joint-degree program is designed to be completed in eight semesters over four academic years instead of the five years required if pursued separately. Students interested in the joint degree program can pursue both programs simultaneously. During the first year, students study at either the Heinz School or the School of Law, taking the standard first-year curriculum of the respective school. The second year involves full-time study at the other school. For the third and fourth years, students take courses at both schools. In order to graduate with both degrees, students have to fulfill both schools' degree requirements.

Law and Social Work, JD/MSW

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

Faculty Advisors

University of Pittsburgh School of Law

3900 Forbes Avenue
Pittsburgh, PA 15260

(412) 648-5642
deasy@pitt.edu

University of Pittsburgh School of Social Work

Professor Jeffrey Shook, MSW, JD, PhD
2117 Cathedral of Learning
Pittsburgh, PA 15260
(412) 648-9365
jes98@pitt.edu

Requirements

Students enrolled in the joint degree program will receive integrated training in social work and law over a four year period. The combined credit-hour requirements for the MSW and JD degrees obtained separately is 148 credits (60 for the MSW, usually completed in four full-time semesters, and 88 for the JD, usually completed in six full-time semesters). In the joint degree program, the two degrees are awarded for a combined total of 121 credits (46 in Social Work and 75 in Law). This reduction in credit-hour requirements is achieved through the acceptance of up to 14 credit hours of JD course work receiving a grade of C or higher toward the MSW degree and the acceptance of up to 13 credit hours of MSW work receiving a grade of B or higher toward the JD degree. All didactic foundation SW courses must be completed in a single academic year; likewise, all first-year JD courses must be completed in a single academic year. Neither degree may be granted prior to the fulfillment of all requirements for the joint degree program.

For Students Interested in Practicing in New York

Please be advised that students who wish to be admitted to practice in New York should not enroll in a joint degree program that entitles the student to more than 12 credits of advance standing at the Law School (i.e., the JD/MSW with the School of Social Work). See New York Rules of Court § 520(c)(5).

Integrative seminar

All students must complete an Integrative Seminar, to be jointly presented by the School of Social Work and Law School, during each Fall and Spring semester of their enrollment in the MSW-JD program. The integrative seminar will meet twice each Fall and Spring semester. The goal of the seminar will be to allow students the space to discuss issues related to integration and to listen to and have a dialogue with outside speakers who have integrated law and social work in their practice, research, and/or teaching.

Required electives in the Law School

Students must complete at least 2 courses from the Law School menu of MSW-JD "required electives."

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Master's

Law - Foreign Law Graduates, LLM

The Master of Laws (LLM) degree provides foreign law graduates with critical training in the common law legal tradition and the U.S. legal system during an academic year at the University of Pittsburgh, located in Pittsburgh's vibrant Oakland neighborhood. Pitt Law's LLM program provides lawyers who have completed their law degree outside the United States with an opportunity to study the common law legal tradition and the U.S. legal system in the United States.

Degree Requirements

Students must complete a minimum of 24 credits to graduate. The program is completed in one academic year from August to May. Part-time admission is considered on a case-by-case basis. The CILE Academic Director, Executive Director and Program Administrator take an active role in personally counselling each LLM student on their course choices, helping you to plan a course of study that is uniquely tailored to your personal needs. Courses taken must include:

- LAW 5977 - INTRODUCTION TO AMERICAN LAW
- LAW 5813 - U.S. LEGAL ANALYSIS & WRITING
- LAW 5820 - LL.M COLLOQUIUM
Writing Requirement - Choose one of the following:
- LAW 5902 - INDEPENDENT STUDY
or a Seminar Course (Usually 3 credits-various courses are offered each semester). In seminars, the class will meet once a week for two hours with the guidance of a faculty member. The students will conduct research on the seminar topic and prepare drafts of their paper throughout the semester. Each student will present their paper in class and submit a final paper at the end of the semester.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Law - Master of Studies in Law (MSL)

The Master of Studies in Law at the University of Pittsburgh School of Law is a 30-credit advanced degree designed for graduates and mid-career professionals seeking to enhance their careers with a versatile alternative to the traditional three-year Juris Doctor degree. The MSL degree can be earned in one academic year (August to May) full-time or two to four years in a flexible part-time schedule.

MSL students seek to gain foundational and specialized knowledge of laws and legal systems. Law is a pervasive influence on almost all aspects of life across the globe, but higher education often ill-prepares students and professionals for navigating laws and legal dynamics in business and life. The MSL degree addresses this critical knowledge gap.

Pitt Law commands one of the oldest Master of Studies in Law programs in the country. Only a handful of students are admitted per year. Pitt Law offers a large number of areas of specialization from which to choose, including a self-designed specialization.

This is not an online program. MSL students take the same vast array of courses as Juris Doctor candidates taught by world-class legal scholars, judges and attorneys, and they gain the advantages and benefits of attending the University of Pittsburgh.

Degree Requirements

Applicants must have completed at least an undergraduate bachelors degree. Applicants need to provide official transcripts of all college, graduate and professional studies, whether a degree was obtained or not. No standardized test is required.

International students are welcome and encouraged to apply. They must have completed the equivalent of a US bachelors degree, and they must submit a TOEFL score. The minimum acceptable TOEFL scores are 600 paper, 250 computer, 110 internet. IELTS scores are also accepted in lieu of TOEFL. International students are encouraged to apply as early as possible because of greater amount of time needed to process the application, obtain visas, and obtain housing.

Students must complete 30 course credits in the School of Law to receive the MSL degree. Students are required to take Introduction to Law and Legal Reasoning, one first-year JD course, and the required courses in their selected area of specialization.

The areas of specialization from which students may choose are as follows:

Biomedical & Health Services Research
Business Law
Commercial Law
Corporate Law

Criminal Law and Justice
Disability Law
Elder and Estate Planning Law
Employment and Labor Law
Energy Law
Environmental Law
Family Law
Health Law
Intellectual Property and Technology Law
International Business Law
International and Human Rights Law
Jurisprudence
Real Estate Law
Sports and Entertainment Law
Tax Law

Students may also design their own unique concentration.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

Professional

Law - Juris Doctor (JD)

Pitt Law offers the Juris Doctor (JD) degree as well as a number of joint degree programs with other Pitt schools, which lead to both a JD and a second master's degree.

In all of these programs, Pitt Law's essential mission is to help lawyers and legal institutions to meet the demands of a rapidly changing legal and professional environment.

The program's first-year curriculum offers a solid foundation in legal analysis and reasoning through courses in subject areas traditionally viewed as basic for legal education.

Pitt Law JD students enjoy a large degree of latitude in designing courses of study that meet their individual goals and interests, with only a handful of graduation requirements beyond the first year.

Pitt Law offers particularly rich opportunities in:

- International law, featuring prominent international/comparative law faculty, a rich international and comparative law curriculum, several courses each year taught by visiting foreign law professors, internships abroad, internationally focused scholarships and fellowships, Languages for Lawyers courses, strong University programs (including area studies certificate programs), and international moot law competitions.
- "Live-client" clinics in a range of substantive areas and practice settings, giving students opportunities to develop valuable lawyering skills in the context of real-life, not simulated, legal disputes and transactions. Students grapple with legal, ethical, and practical issues, under the supervision of - and in close counsel with - a seasoned attorney faculty member.
- The Semester in D.C. Program, during which students spend a semester in Washington, D.C., earning a full semester's worth of academic credit while working full-time as an extern with a non-profit organization or government agency.
- Seven certificate programs/areas of concentration enabling students to concentrate their studies in particular areas of law. These programs include specialized advanced courses that incorporate lawyering skills relevant to particular areas of practice.
- Cross-disciplinary learning - Pitt Law students may take courses in other schools at Pitt or other local colleges and universities (up to six non-law graduate credits can be used toward the JD requirements).

Some Pitt Law courses incorporate multiple disciplines, such as Law & Human Behavior and Law & Economics Seminar, or are jointly taught by law faculty and faculty from other disciplines to classes comprising both law and other graduate/professional students - for example, Commercializing New Technologies.

Pitt Law joint degree programs enable students to earn the JD as well as a master's degree in another discipline through an integrated program, more quickly than earning the two degrees separately.

Degree Requirements

Admission applications for the Pitt Law JD program will be accepted starting September 1 through our deadline of April 1. Applications are considered only for the current year for the fall semester. We require all applicants submit their applications on-line through the Law School Admission Council (LSAC). Pitt Law is highly competitive and decisions are based upon many factors. Once your application is complete, our Admissions Committee will review your application. Once we are able to make a decision, you will be notified by mail within several weeks. You can also verify your application status on-line with a user name and password, which will be sent to you electronically once you apply. We ask for your patience during the admissions cycle as it can become very busy during key times of the year.

Application Requirements:

- Applicants must submit a \$65 application fee
- Applicants must have completed a bachelor's degree from a regionally accredited college or university in the United States before the first day of law school.
- In cases where an applicant has completed studies outside the United States, the requirement is education deemed by the University of Pittsburgh to be comparable to a bachelor's degree from a regionally accredited college or university in the United States. [Click here for more information](#)
- When evaluating an undergraduate degree, the committee pays careful attention to the strength of the major field of study, as evidenced by the courses listed on the undergraduate transcript. Pitt Law is looking for applicants who have demonstrated the discipline and ability to handle a rigorous and demanding program. The admissions committee carefully evaluates graduate work and professional experience, although utilizes the undergraduate GPA.
- Applicants are required to register with the Credential Assembly Service (CAS) through LSAC and must take the LSAT. If an applicant takes the LSAT more than one time the highest score is considered by the admissions committee when making a decision. The latest test score that will be considered for all entrance is the score from the previous February examination. Scores from tests taken more than four years prior to the current admissions year will not be considered. More information can be obtained from the Law School Admission Council (LSAC).
- A required personal statement gives the committee a view into the non-academic world of the applicant and serves as the interview. This is critical in our ability to enroll a diverse class. We ask that you keep your personal statement to no more than two pages, typed, double spaced.
- Letters of recommendation play an equally important role in this process as they can reveal the strengths of the academic achievements of the applicant. We recommend three letters, although none are required. Letters should be submitted through the LSAC letter of recommendation service.
- We encourage applicants to submit a Resume, as they highlight for the admissions committee a broader view of your achievements.
- In addition to a bar examination, there are character, fitness, and other qualifications for admission to the bar in every U.S. jurisdiction. Applicants are encouraged to determine the requirements for any jurisdiction in which they intend to seek admission by contacting the jurisdiction. Addresses for all relevant agencies are available through the National Conference of Bar Examiners.

In order to graduate, a student pursuing a JD must complete 88 credits, including the following:

- A prescribed first-year curriculum, as follows: Contracts, Criminal Law, Legislation and Regulation, Torts, Civil Procedure, Constitutional Law, Property, and Legal Analysis and Writing, as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the Pitt Law Academy speaker series
- The upper-level writing requirement
- A course in Legal Profession
- Six credits in a course designated as satisfying the professional skills requirement
- The one-credit Foundations of Legal Research course
- A course designated as satisfying the international/comparative law requirement
- A course designated as satisfying the writing ("W") requirement

Additional graduation requirements apply for those students whose grade point averages place them in the bottom 15% of their class at the end of their first or second year. The upper-level writing requirement and other academic requirements are described in the Academic Rules and Graduation sections of the School of Law's web site.

Note

For detailed term-specific course descriptions, please go to the Schedule of Classes Course Lists on the Law School web site.

First-Year Curriculum

The first-year curriculum is comprised of the following required courses, as well as attendance at a minimum of five programs (for students entering Fall 2019 or later) or six programs (for students entering before Fall 2019) in the **Pitt Law Academy**:

Fall:

- LAW 5020 - CONTRACTS
- LAW 5046 - CRIMINAL LAW
- LAW 5720 - LEGAL ANALYSIS AND WRITING
- LAW 5032 - LEGISLATION AND REGULATION
- LAW 5028 - TORTS

Spring:

- LAW 5033 - CIVIL PROCEDURE
- LAW 5101 - CONSTITUTIONAL LAW
- LAW 5076 - LEGAL ANALYSIS AND WRITING
- LAW 5024 - PROPERTY

Year Long Program

- LAW 5061 - PITT LAW ACADEMY

School of Law Faculty

Full Time

Jessie Allen, Associate Professor of Law
JSD, Columbia University School of Law
JD, Brooklyn Law School

Chaz Arnett, Assistant Professor of Law
JD, Harvard Law School

Kevin D. Ashley, Professor of Law and Intelligent Systems
JD, Harvard Law School
PhD, University of Massachusetts and Amherst

Elena A. Baylis, Associate Professor of Law
JD, Yale Law School

Deborah L. Brake, John E. Murray Faculty Scholar and Professor of Law
Associate Dean for Research & Faculty Development
JD, Harvard Law School

Ronald A. Brand, Professor of Law
Academic Director, CILE
Chancellor Mark A. Nordenberg University Professor and John E. Murray Faculty Scholar
JD, Cornell University

Ben Bratman, Professor of Legal Writing
JD, Vanderbilt University Law School

Teresa Kissane Brostoff, Professor of Legal Writing
JD, University of Pittsburgh School of Law

Tomar Pierson-Brown, Clinical Assistant Professor of Law
Director - Health Law Clinic
JD, Case Western Reserve University School of Law
LLM, University of the District of Columbia, David A. Clarke School of Law

William M. Carter, Jr., Professor of Law
JD, Case Western Reserve University School Of Law

Pat K. Chew, Judge J. Quint Salmon and Anne Salmon Chaired Professor
JD, University of Texas
M.Ed, University of Texas

Mary Crossley, Professor of Law
JD, Vanderbilt University

Vivian Curran, Distinguished Professor of Law
JD, Columbia University
PhD, Columbia University
MPhil, Columbia University

Kevin Deasy, Associate Professor of Legal Writing
Associate Dean of Students
JD, University of Pittsburgh School of Law

Gerald S. Dickinson, Assistant Professor of Law
JD, Fordham Law

Greer Donley, Assistant Professor of Law
JD, University of Michigan Law School

Jasmine B. Gonzales Rose, Assistant Professor of Law
JD, Harvard Law School

Philip Hackney, Associate Professor of Law
LLM, (Tax), New York University School of Law
JD, LSU Paul M. Herbert Law Center

Haider Ala Hamoudi, Professor of Law
Vice Dean of the University of Pittsburgh School of Law
JSD, Columbia University
JD, Columbia University

David A. Harris, Sally Ann Semenko Endowed Chair, Professor of Law
John E. Murray Faculty Scholar
LLM, Georgetown University
JD, Yale Law School

Bernard J. Hibbitts, Professor of Law
LLM, Harvard University
LLM, University of Toronto
LLB, Dalhousie University
BA (Juris.), Oxford University

David J. Hickton, Professor of Law
Founding Director, Institute for Cyber Law, Policy and Security
JD, University of Pittsburgh School of Law

Anthony C. Infanti, Professor of Law
Affiliate Faculty, Gender, Sexuality & Women's Studies Program
Buchanan, Ingersoll & Rooney Faculty Scholar

LLM (Taxation), New York University
JD, University of California, Berkeley

Jules Lobel, Professor of Law
JD, Rutgers University

Grant MacIntyre, Assistant Professor of Law
JD, University of Pittsburgh School of Law

Michael J. Madison, Professor of Law
Faculty Director, Innovation Practice Institute
JD, Stanford Law School

Martha M. Mannix, Clinical Associate Professor of Law
JD, Hastings College of the Law

Alan Meisel, Professor of Law and Psychiatry
Dickie, McCamey & Chilcote Professor of Bioethics
Director of MSL Program, Health Law Certificate Program, and Certificate in Disability Legal Studies
JD, Yale University

Peter B. Oh, Professor of Law
JD, The University of Chicago

Ann Sinsheimer, Professor of Legal Writing
PhD, Rhetoric, Carnegie Mellon University
JD, University of Pittsburgh School of Law

Matiangai Sirleaf, Assistant Professor of Law
JD, Yale Law School

George H. Taylor, Professor of Law
JD, Harvard University

David Thaw
Assistant Professor of Law and Information Sciences
JD, Berkeley Law
PhD, University of California, Berkeley

Lu-in Wang, Professor of Law
JD, University of Michigan Law School

Sheila I. Velez Martinez, Clinical Assistant Professor of Law
Director of Clinical Programs

Rhonda Wasserman, Professor of Law
JD, Yale Law School

Amy J. Wildermuth, Professor of Law
Dean of the University of Pittsburgh School of Law
JD, College of Law, University of Illinois

Professor Emeritus of Law

Douglas M. Branson, W. Edward Sell Professor of Business Law
LL.M., University of Virginia
JD, Northwestern University

William J. Brown
LLM, Yale University
Certificate in International Business Law, City of London College

Nancy M. Burkoff
JD, University of Pittsburgh

John M. Burkoff
LL.M, Harvard University
JD, University of Michigan

Richard Delgado
JD, University of California - Berkeley

Harry M. Flechtner
JD, Harvard Law School

Cyril A. Fox, Jr.
JD, University of Pittsburgh School of Law

Lawrence A. Frolik
LLM, Harvard Law School
JD, Harvard Law School

Robert Berkley Harper
JD, University of Pittsburgh School of Law

Arthur D. Hellman
JD, Yale University

William V. Luneburg, Jr.
JD, Harvard University

Margaret M. Mahoney
JD, University of Michigan

Francis Barry McCarthy
LLM, Columbia University
JD, Boston College

Thomas Ross
JD, University of Virginia

Richard Harry Seeburger
LLM, Harvard University
LLB, Harvard University

Stella L. Smetanka
JD, University of Pittsburgh School of Law

Research Professor Emerita

Jean Stefancic
MA, University of San Francisco

Professor of Practice

Charles C. Cohen
JD, University of Michigan

Honorable Judith K. Fitzgerald
JD, University of Pittsburgh School of Law

Honorable Laurie Marin
JD, Brooklyn Law School

Marily Nixon
JD, University of Virginia School of Law

Visiting Faculty

Anne W. Bauer
LLM, Georgetown University Law Center 2009
JD, University of Pittsburgh School of Law, 2008

William A. Congelio, Esquire

Leigh Coogan
JD, University of Pittsburgh School of Law

Joshua Galperin
JD, Vermont Law School

Marco Gardini
LLM, University of Pittsburgh School of Law
JD, University of Parma (Italy)

Jacqueline Lipton
PhD, LLM, Cambridge University
PhD, Griffith University
LLM, Monash University

Alice L. Stewart, Visiting Clinical Assistant Professor
JD, Duquesne University School of Law

Judith A. Teeter, Visiting Professor
JD, Boston University School of Law

Adjunct

Kevin C. Abbott
JD, University of Pittsburgh School of Law

Sara Burhan Abdullah
LLM, University of Pittsburgh School of Law
JD, University of Pittsburgh School of Law

Rodney R. Akers
JD, Harvard University

Lynn J. Alstadt
JD, University of Pittsburgh School of Law

Heather Batzel

Alan S. Baum
JD, Ohio Northern University School of Law

Jaclyn M. Belczyk
JD, University of Pittsburgh School of Law

Thomas Beline
JD, University of Pittsburgh School of Law

Dan Berlin

C. Allen Black, Jr.
PhD, University of Newcastle (Australia)
JD, University of Pittsburgh School of Law

Paul D. Boas

Alison Bonebrake
MPA, Public Management and Policy, University of Pittsburgh School of Law

Honorable Edward J. Borkowski
MWS, University of Pittsburgh
JD, Duquesne University

Eduardo H. Bozzo
JD, University of Argentina

Samuel W. Braver
JD, Duquesne University

Robert Marc Brenner

Christopher S. Channel
JD, Marshall-Wythe School of Law at the College of William and Mary

Susan K. Cohen
PhD, University of Minnesota

James P. Coletta
JD, University of Pittsburgh School of Law

Julie R. Colton

Timothy Conboy
JD, University of Pittsburgh School of Law

Pamela Wilkins Connelly
JD, University of Pittsburgh School of Law

James V. Corbelli
JD, University of Pittsburgh School of Law

Mary Nell Cummings
JD, SUNY Buffalo Law School

Stephanie Dangel
JD, Yale Law School

Robert E. Dapper, Jr.
JD, University of Pittsburgh School of Law

Elliot Dater

Claudia Davidson

Marshall L. Dayan

Michelle DeBord

Elizabeth A. DeLosa.
JD, Duquesne University

Charles A. DeMonaco
JD, Ohio Northern University

Cecile C. M. Desandre
Baccalaureate A2, the Sorbonne, Paris

Steven A. Diaz

Louis A. DiNardo, C.P.A., J.D.
JD, Duquesne University

Matthew R. Divelbiss
JD, University of Pittsburgh School of Law

Christian Ehret
JD, University of Pittsburgh School of Law

Jack W. Elliott
JD, Wake Forest University School of Law

Karen Engro
JD, Tulane Law School

Adam S. Ennis
JD, Benjamin N. Cardozo School of Law, Yeshiva University

Thomas J. Farrell
JD, New York University School of Law

Ralph G. Fischer
JD, University of Pittsburgh School of Law

Paige Forster
JD, University of Pittsburgh School of Law

Susan Frietsche
JD, Temple University

Craig Frischman
JD, University of Pittsburgh School of Law

Michael George
JD, Duquesne University

Mark Gesk
JD, Duquesne University

Myles Getlan
LLM, Georgetown University Law Center
JD, University of Pittsburgh School of Law

John P. Gismondi
JD, University of Pittsburgh School of Law

Bret Grote
JD, University of Pittsburgh School of Law

Harry Gruener
JD, University of Pittsburgh School of Law

K. Mark Hall

John F. Hammond

Kevin Harkins
JD, University of Pittsburgh School of Law

Tina Batra Hershey

Craig S. Heryford
JD, Duquesne University

Leo N. Hitt
LLM, New York University
JD, University of Pittsburgh School of Law

Joseph S. Hornack
JD, Rutgers University

Vicki Kuftic Horne

Kenneth J. Horoho, Jr.
JD, Duquesne University

Honorable Philip A. Ignelzi
JD, University of Pittsburgh School of Law

John E. Iole
JD, University of Pittsburgh School of Law

Ira Karoll
JD, Northwestern University

Stephen R. Kaufman

Adam Kelson
JD, Boston University School of Law

Barbara Kern

Oliver Kim
LLM, Georgetown University
JD, University of Minnesota

Miles A. Kirshner
JD, University of Pittsburgh School of Law

George Kontos
JD, University of Pittsburgh School of Law

James E. Kopelman
JD, University of Pittsburgh School of Law

Daniel Kovalik
JD, Columbia Law School

Honorable Beth A. Lazzara
JD, University of Pittsburgh School of Law

Lawrence M. Lebowitz
JD, University of Pittsburgh School of Law

Honorable Lisa Pupo Lenihan
JD, University of Pittsburgh School of Law

Richard C. Levine
JD, University of Pittsburgh School of Law

John Kent Lewis
JD, Duquesne School of Law

Penina K. Lieber
JD, University of Pittsburgh School of Law

Alexander H. Lindsay, Jr.
JD, University of Pittsburgh School of Law

Blaine Lucas
JD, University of Virginia

John P. Lydon
JD, University of Pittsburgh School of Law

Thena Robinson Mock
JD, Loyola University New Orleans College of Law

Beverly Weiss Manne
JD, University of Pittsburgh School of Law

Jason Manne
JD, University of Pittsburgh School of Law

Lisa Zeidner Marcus
JD, Columbia University Law School

Cathy Martin

Lisa A. Martinelli

Moshe Z. Marvit
JD, Chicago-Kent College of Law

Jason Matzus
JD, University of Pittsburgh School of Law

Regis McClelland
JD, Duquesne University

John W. McIlvaine, III
JD, Pepperdine University

William McKendree
JD, Duquesne University

Laura A. Meaden
JD, University of Pittsburgh School of Law

Kemal Mericli

Reid P. Meyer

Clay Nestler
JD, University of Pittsburgh School of Law

Timothy O'Brien

Brian O'Connor

Deborah Olszewski
JD, University of Pittsburgh School of Law

David R. Overstreet
JD, Villanova University School of Law

Stephen Paschall

Jon R. Perry
JD, Duquesne University

Jeffery D. Peters
JD, University of Pittsburgh School of Law

Orlando G. Portela Valentin
PhD, University of the Basque Country, Spain
LLM, University of the Basque Country, Spain
JD, University of Puerto Rico Law School

William C. Price
JD, University of Pittsburgh School of Law

J. Matthew Pritchard IV
JD, University of Pittsburgh School of Law

James A. Prozzi
JD, University of Pittsburgh School of Law

Jeffrey Ramaley
JD, Duquesne University

Robert B. Ramsey, III
JD, St. Louis University, 1984

David J. Rosenberg
JD, University of Pittsburgh School of Law

Michael Rosenzweig
JD, University of Pittsburgh School of Law

John Samuel Rozel
MSL, University of Pittsburgh School of Law

Stephanie W. Schreiber
JD, University of Pittsburgh School of Law

Robert Schupansky

Stephanie L. Sciullo
JD, University of Pittsburgh School of Law

Steven Seel
JD, University of Pittsburgh School of Law

Joseph W. Selep
JD, Ohio Northern University

Matt Shames
JD, University of Pittsburgh School of Law

Rachael Shaw

Marc Silverman
MA, University of Pittsburgh
Master of Library Science, University of Pittsburgh

Larry A. Silverman
JD, Duquesne University

Jennifer A. Smokelin
JD, University of Pittsburgh School of Law

Marcy Smorey-Giger
JD, Duquesne University

Steven M. Stadtmiller
JD, University of Pittsburgh Law School

John Stember
JD, University of Pittsburgh School of Law

Natalya Stepanova-Sipper
LLM, University of Pittsburgh School of Law
JD, Tashkent State Law Institute

Edward Van Stevenson
JD, University of Kentucky

Stephen C. Tanzilli
JD, University of Pittsburgh School of Law

Linda Tashbook
JD, University of Pittsburgh School of Law
MLS, University of Pittsburgh

Richard Thorpe
PhD, Princeton University
JD, Yale Law School

Honorable David B. Torrey
JD, Duquesne University

Chatón T. Turner
JD, University of South Carolina

James S. Urban
JD, Duquesne University

Jonathan P. Vallano
PhD, Experimental (Legal) Psychology, Florida International University

Elizabeth Van Nostrand
JD, Tulane University

Joshua Vaughn

Honorable William F. Ward
JD, Temple University School of Law

Honorable Christine A. Ward
JD, University of Pittsburgh School of Law

Peter M. Watt-Morse
JD, Northwestern University

Jillian Wein Riley

Heather Weiner
JD, Syracuse University

Rob Wible
JD, Duquesne University

Patricia H. Wysor
MEd, University of Pittsburgh School of Law
MFA, University of Pittsburgh School of Law

Affiliated Faculty

Karen Clay
PhD, Stanford University

Matthias Grabmair
PhD, Intelligent Systems, University of Pittsburgh
LLM, University of Pittsburgh School of Law

Robert M. Hayden
PhD, State University of New York at Buffalo
JD, State University of New York at Buffalo

Kenneth M. Lehn
Ph.D, Washington University

Jeffrey Shook, Affiliated Assistant Professor of Law
PhD, Social Work, University of Michigan
MSW, University of Michigan
JD, American University

Distinguished Jurist in Residence

Honorable D. Michael Fisher
JD, Georgetown University

School of Medicine

The mission of the University of Pittsburgh School of Medicine is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to his or her fullest potential.

First Professional Program (MD)

The mission of the [University of Pittsburgh School of Medicine](#) is to improve the health and well-being of individuals and populations through cutting-edge biomedical research, innovative educational programs in medicine and biomedical science, and leadership in academic medicine. We strive to implement this mission with the highest professional and ethical standards, in a culture of diversity and inclusiveness, and in an environment that enables each individual to develop to his or her fullest potential.

UPSOM has a well-developed curricular infrastructure that combines a lecture- and problem-based curriculum with early and in-depth clinical experiences and an integrated organ systems approach to the preclinical sciences. The clinical years are characterized by an integrated clerkship structure and an emphasis on student flexibility. The UPSOM educational objectives, which are used to guide course content and learning objectives, underwent a school-wide review and update in 2017.

The [current UPSOM curriculum](#) was implemented in 2004 and features active, participatory learning; a problem-based approach; an early introduction to the patient and the community; and the integration of a rigorous foundation in basic and clinical biomedical sciences with the social and behavioral aspects of medicine. Key subject matter is longitudinally integrated throughout the curriculum, building upon a foundation of prior learning while providing a level-appropriate and well-synchronized introduction of new content.

Scheduled instructional time in the first two years of the curriculum is a mix of lecture; small group learning (much of which is problem-based learning; the remainder includes demonstrations, faculty-directed problem-solving exercises, skill-practice sessions, and other activities); and other activities (which includes observation of and appropriate participation in patient care, community-site visits, experiences with [standardized patients](#), [high-fidelity simulations](#), patient conferences, laboratory exercises, and other activities). Student achievement of course objectives is supported by a host of technologies, including the online curriculum and podcasts. A longitudinal performance-based assessment program provides formative support as students hone their clinical skills.

The patient focus of the UPSOM curriculum begins on day one, in the Introduction to Being a Physician course. Students interview patients about their experience of illness and experiences with their physicians, to develop an understanding of their roles as medical professionals. Medical interviewing and physical examination courses follow, along with exercises examining the many facets of physician life-in society, ethical and legal settings, and at the patient bedside.

Throughout the first two years, students apply their new skills in local practices and hospitals one afternoon per week. The [Foundations of Medicine](#) block runs through three-fourths of the first year and provides language and concepts that underlie the scientific basis of medical practice. [Organ Systems block](#) courses integrate physiology, pathophysiology, pharmacology, and introduction to medicine with concurrent courses in the Introduction to Patient Care and Patient, Physician and Society blocks. Weekly discussions, patient interviews, and examination of hospitalized patients reinforce essential clinical skills.

The [third-year curriculum](#) consists of ten required clerkships. They are designed to optimize the balance between out-of-hospital and inpatient learning opportunities, eliminate unintentional curriculum redundancy, and optimize opportunities for student-designed curricula in the junior and senior years. The third year is punctuated by three one-week clinical focus courses.

Every student engages in a mentored [longitudinal research project](#) conducted longitudinally throughout the four-year curriculum. Completion and presentation of the scholarly project is due in the spring of the senior year and is a requirement for graduation. Students pursue their projects through several program options, which may include [areas of concentration](#). An innovative system of web-based learning portfolios facilitates learner-mentor communication and enriches the possibilities for collaboration within and beyond the University.

Many key topics are integrated throughout the curriculum as [longitudinal themes](#). These topics include communication skills; cultural competence; critical thinking skills; disabilities medicine; geriatric medicine; evidence-based medicine; interprofessional education and team communications; palliative care; population medicine and public health; prevention; professionalism; public health preparedness; and substance abuse.

The information above details the school's MD program.

Contact Information

Office of Admissions and Financial Aid
S520 Scaife Hall
3550 Terrace Street
Pittsburgh, PA 15261

Requirements for Admission

Admission Process

The admissions process is described in great detail on the Office of Admissions and Financial Aid [web site](#).

The by-laws of the Admissions Committee specifically state the school's criteria for selecting students for admissions. The by-laws are reviewed and updated at the year-end business meeting of the UPSOM Admissions Committee.

<https://www.medadmissions.pitt.edu/admissions/you-apply/policies-restrictions>

Financial Aid

Financial aid for medical students is available in the form of scholarships, need-based grants, and loans (federal, private, and institutional resources). For maximum consideration of all resources, students should complete the "Need Access Application" and the Free Application for Federal Student Aid (FAFSA). These applications should include the student's information, his/her spouse's information (if applicable), and his/her parents'

information. Signed copies of federal tax returns (for student/spouse and parents) must be provided to the financial aid office. Aid is awarded on the basis of financial need, as determined from the financial aid applications and supporting documentation.

Newly admitted students should apply no later than either one month after acceptance or by March 1 to ensure that an award letter is provided prior to the national decision date of April 30th.

Upperclassman should provide all required information no later than April 1. The Free Application for Federal Student Aid (FAFSA) should be submitted prior to April 1 to ensure results are available prior to the deadline.

Students who do not wish to provide parental information are still considered for Federal Stafford loans, Federal Graduate PLUS loans, and private loans; these students should complete the FAFSA and provide a signed copy of their federal tax return.

The financial aid process is described in detail on the [Office of Financial Aid's website](#).

Academic Standards

The University of Pittsburgh School of Medicine offers a centrally governed, integrated, interdisciplinary curriculum that emphasizes problem solving and self-directed learning. The academic year is in session between 10 and 12 months, depending on the level of study. Academic calendars specific to each year can be found on the [Office of Medical Education's web site](#). The first three years is a set curriculum and the fourth year is a combination of both set and elective offerings. To be considered to be making satisfactory academic progress, the student must complete the first two years of the curriculum by the end of the third year after initial enrollment. The full text of the guidelines for student promotion can be found in the [medical student handbook](#) on the Office of Student Affairs web site. Students are governed by an Honor Code, which seeks to support and sustain respect for each other as well as for patients. The full text of the Honor Code can be found in the [student handbook](#).

Grading

The UPSOM makes use of a 2 tiered grading system.

The first two years of the curriculum are graded as Satisfactory/Unsatisfactory.

The last two years are graded using a five point narrative grading system that includes Honors, High Pass, Pass, Low Pass, or Unsatisfactory.

Degree Requirements

To receive the MD degree, students must:

1. Successfully complete curricular requirements for each of the four years.

First year: Courses in foundations of medicine including medical anatomy, cell communication and pharmacology. tissues in health and disease, human genetics, fuel metabolism, immunology in health and disease, medical microbiology; organ systems including neuroscience, introduction to psychiatry; scientific reasoning in medicine including evidence-based medicine-fundamentals and evidence-based medicine-applied, patient, physician and society courses including introduction to being a physician; ethics, law, and professionalism, behavioral medicine, and the introduction to patient care courses.

Second year: Course work in organ systems including body fluid homeostasis, digestion and nutrition, hematology, endocrine, reproductive and developmental biology, skin and musculoskeletal diseases, and integrated case studies; investigation and discovery, population health, and introduction to patient care courses.

Third year: Rotations in inpatient medicine; family medicine; inpatient pediatrics; obstetrics and gynecology; neurology; psychiatry; surgery, anesthesiology; and outpatient experiences in pediatrics; medicine; emergency medicine; otolaryngology; and ophthalmology. The third and fourth year schedule is viewed as a continuum and designed so students may enroll in clinical or research electives at any time during the third or fourth years.

Fourth year: An acting internship in either internal medicine, pediatrics, family medicine, or surgery; four weeks of an integrated life science course of the student's selection; a boot camp; and seven to eight months of clinical and/or research elective experiences.

2. Pass the United States Medical Licensing Examination, both Steps 1 and 2 (CK and CS).
3. Meet accepted standards of professional conduct and emotional stability.

Degree Options

In addition to the MD program, the UPSOM offers a structured MD/PhD dual degree program, an MD/MA in Bioethics, a certificate program in Clinical Research, and a five—year non-degree— granting program for physician-scientists.

First Professional Program, MD Curriculum

MS-1

Patient, Physician & Society Block (PPS)

- Introduction to Being a Physician - [MED 5124](#)
- Ethics, Law & Professionalism - [MED 5124](#)
- Behavioral Medicine - [MED 5128](#)

Fundamentals of Basic Science Block (FBS)

- Medical Anatomy - [MED 5112](#)
- Human Genetics - [MED 5127](#)
- Fuel Metabolism - [MED 5127](#)
- Cellular and Pathologic Basis of Disease - [MED 5127](#)
- Immunology in Health & Disease - [MED 5116](#)
- Medical Microbiology - [MED 5116](#)

Organ Systems Pathophysiology Block (OSP)

- Neuroscience - [MED 5133](#)
- Introduction to Psychiatry - [MED 5133](#)

Introduction to Patient Care Block (IPC)

- Medical Interviewing - [MED 5137](#)
- Introduction to Physical Examination - [MED 5137](#)
- Advanced Physical Examination 1 - [MED 5138](#)
- Clinical Experiences 1 - [MED 5138](#)

Evidence and Discovery Block (E&D)

- Evidence-Based Medicine - Fundamentals - [MED 5180](#)
- Evidence-Based Medicine - Applied - [MED 5181](#)
- [Scholarly Project](#)

MS-2

Patient Physician & Society Block (PPS)

- Population Health - [MED 5261](#)

Organ Systems Pathophysiology Block (OSP)

- Body Fluid Homeostasis: Cardiovascular - [MED 5218](#)
- Body Fluid Homeostasis: Renal - [MED 5218](#)
- Body Fluid Homeostasis: Pulmonary - [MED 5218](#)
- Digestion & Nutrition - [MED 5223](#)
- Skin & Musculoskeletal Diseases - [MED 5223](#)
- Hematology - [MED 5223](#)
- Endocrine - [MED 5223](#)
- Reproductive & Developmental Biology - [MED 5223](#)
- Integrated Case Studies - [MED 5227](#)

Evidence and Discovery Block (E&D)

- Investigation and Discovery - [MED 5265](#)
- [Scholarly Project](#)

Introduction to Patient Care Block (IPC)

- Advanced Physical Examination 2 - [MED 5233](#)
- Clinical Experiences 2 - [MED 5233](#)
- Advanced Medical Interviewing - [MED 5234](#)
- Clinical Procedures - [MED 5234](#)

Clinical Skills Assessment in IPC Block

- [Clinical Competency Assessment Orientation Handbook](#)

MS-3

Clerkships

- [Adult Inpatient Medicine](#)
- Anesthesiology
- [Neurology](#)
- [Combined Ambulatory Medicine and Pediatrics](#)
- [Family Medicine](#)
- [Obstetrics and Gynecology](#)
- [Pediatric Inpatient Medicine](#)
- [Psychiatry](#)
- [Specialty Care](#)
- [Surgery and Perioperative Care](#)

Clinical Clerkships

Eight required clerkships form the core of the combined clinical years. The overall aim of the clerkship experience is to provide students with the essential experiences where they will apply their knowledge and skills as they develop competence in the care of patients. Together, the clerkships, and all other clinical experiences, share a fundamental set of objectives.

Overall, the objectives of the required clerkships are for students to be able to:

- Integrate basic science concepts with clinical reasoning.
- Establish and maintain appropriate therapeutic relationships with patients.

- Obtain a sensitive and thorough medical history.
- Perform a sensitive and accurate physical examination.
- Perform general clinical procedures.
- Participate in discussions and decision-making with patients and families.
- Clearly communicate medical information in spoken and written form.
- Develop knowledge, skills, and attitudes to practice the basic principles of prevention.
- Demonstrate sound clinical reasoning.
- Appropriately assess patients with common signs and symptoms.
- Appropriately use testing to guide diagnostic and therapeutic decisions.
- Diagnose and demonstrate basic understanding of common diseases and conditions.
- Describe therapeutic options and participate in the care of patients with common problems.
- Recognize acute life-threatening medical problems and initiate care.
- Develop the knowledge and exhibit the skills necessary to assist in the management of chronic diseases.
- Participate in care in a variety of settings.
- Develop the knowledge, skills and attitudes necessary to provide culturally competent care.
- Use information and educational technology to facilitate research, education and patient care.
- Incorporate ethical and legal principles in clinical practice and research.
- Demonstrate professional behaviors.
- Work effectively with others as a member or leader of a health care team or other professional group.
- Develop an understanding of the impact of nonmedical determinants of health on health outcomes and health equity.

Clinical Focus Courses

The third year is punctuated by three one-week learning experiences, spread over the 48 weeks of the third year.

1. The [Preclerkship Course](#) is an introduction that is presented immediately prior to the start of the third year. It includes aspects of clinical, humanistic, and administrative preparation for clinical experiences.

2. The [Geriatrics Course](#) uses a combination of learning formats, including classroom sessions and experiences at clinical sites, to provide a highly focused exposure to key topics in this important discipline. A major emphasis is on developing skills to succeed in and lead inter-professional teams. This curriculum builds upon the new perspectives gained by students during the first six rotations of the third year.
3. [Assessment Week](#) is conducted at the time of transition from third to fourth year. Students complete a series of structured assessments and participate in focused review sessions. Together these activities provide students with timely and specific formative feedback about their progress toward the objectives of the curriculum.

MS-4

General Schedule for Fourth Year

Clerkship Period	1	2	3	4	5	6	7	8	9	10	11	12	12.5
Length (in Weeks)	4	4	4	4	4	4	4	4	4	4	4	4	4

During the combined clinical years (MS-3 & MS-4) students rotate through 10 required clerkships in any sequence. Additional requirements are 1 Acting Internship, 1 Integrated Life Sciences Selective, 9 electives, and 3 Clinical Focus Courses.

What do the 12.5 Periods in the MS-4 year include?

- Nine electives
- One acting internship (family medicine, internal medicine, pediatrics, surgery)
- One integrated life science course
- Two recess/interview periods
- One recess week in the fall between periods 18 and 19

Acting Internship

An acting internship (sub-internship) of four-week duration is required during the senior year. An AI is a clinical rotation offered on an in-patient service in which one or more attending physicians have overall responsibility for coordinated patient care. The service will be structured with both attending staff and house staff.

The acting internship should include the assignment to the student of specific groups of patients upon whom he or she completes an initial history and physical examination, constructs a differential diagnosis, formulates a treatment plan, writes orders, and carries out necessary therapy, all under careful supervision.

Acting internships that fulfill this requirement are offered in:

- Family medicine
- Internal medicine

- Pediatrics
- Surgery

Search the [Course Catalog](#) for more information on Acting internships.

Acting internships in other departments or out of the city will not fulfill the AI requirement.

Integrated Life Science Course

The fourth year Integrated Life Science (ILS) Program includes a choice of courses that revisit some aspect of basic science after students have had several years of clinical experience. Because of the level of sophistication that students have developed by this stage in their medical education, they can better understand the relevance of basic science to clinical problems. Each student is required to complete one ILS course.

ILS Courses

- Changing Science, Changing Society: A Guide to 21st Century Medicine - [MSELC 5700](#)
- Clinical Pharmacology - [MED 5710](#)
- Infectious Disease in Obstetrics, Gynecology and Reproductive Medicine - [OBYN 5725](#)
- Molecular Medicine - [PEDS 5720](#)
- Neoplasia and Neoplastic Disease - [MED 5715](#)
- Neurosurgery and Head and Neck Dissection - [NSURG 5705](#)
- Science of Resuscitation - [EMED 5735](#)
- Surgery Integrated Life Sciences - [SURG 5700](#)

Recommended Electives

In order to provide diversity, it is strongly recommended that you take at least one elective in each of the following blocks:

1. Medicine or neurology
2. Pediatrics, pediatric neurology, pediatric pathology, pediatric surgery
3. Surgery or surgical subspecialties, obstetrics and gynecology
4. Ambulatory care, community medicine, or psychiatry.

Clinical Competency Assessment (CCA)

- [Clinical Competency Assessment Orientation Handbook](#)

5121

Bioethics, MD/MA

Students enrolled in the University of Pittsburgh School of Medicine may elect to earn the Master of Arts in Bioethics in conjunction with their medical degree. This allows the 30 credit MA degree to be earned in an accelerated program, taking a year away from the MD program, usually between the second and third years of medical school. During this one year, the student will follow the Dietrich School of Arts and Sciences calendar for the fall and spring terms, pay tuition at the in-state tuition rate set for Dietrich School graduate students, and must adhere to the rules, regulations, policies, and procedures of the Dietrich School. Applicants must complete the on-line application and provide official transcripts from their undergraduate and graduate studies, 3 letters of recommendation, a personal statement, writing sample, and official MCAT or GRE scores. Additional information about the MD/MA program may be found [here](#).

Core Course Requirements

The following courses are required for the major:

- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS
- BIOETH 2664 - BIOETHICS
-
- LAW 5464 - BIOETHICS AND LAW

Clinical Practica

The following courses are required for the major:

- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2606 - CLINICAL PRACTICUM 2

Thesis Research

Students must complete a research project and write a thesis under the supervision of and advisor, and defend it before a committee. Students may register for up to 6 course credits related to their thesis research.

Restrictive Electives

Students choose one elective from a list of “restricted elective” courses. Courses placed on this pursue ethical issues related to a particular area in greater depth than the Bioethics core course, or employ a particular disciplinary perspective to explore issues in medicine and research. In recent years, restricted electives have included:

- Bioethics and Health Law
- Ethical Issues in Medical Genetics
- Gender, Ethics, and the Body
- Historical and Sociological Perspectives in Public Health
- Medical Anthropology

- Medical Sociology

Electives

The remaining credits may be taken in electives approved by the program director. Students work with the program director and their thesis advisor to ensure that their particular needs are met. Students may take a Special Topics in Bioethics or Directed Reading in Bioethics course, or may identify relevant elective courses from various departments and schools of the University, including:

- Anthropology
- Communication
- Cultural Studies
- English
- Film Studies
- Gender, Sexuality, and Women's Studies
- History and Philosophy of Science
- Law
- Philosophy
- Psychology
- Public Health
- Sociology
- Women's Studies
- Graduate Course Offerings

In addition, through the Pittsburgh Council on Higher Education, full-time students may take courses at ten consortium-affiliated colleges and universities, including Carnegie Mellon University, Duquesne University, and the Pittsburgh Theological Seminary.

Clinical Science Training Program, MD/MS

The Clinical Scientist Training Program (CSTP) offers clinical research training and scholarships to University of Pittsburgh medical students who are committed to careers in clinical investigation. Students may complete the dual MD/MS in clinical research or the MD/Certificate in clinical research.

The CSTP involves a research year between third and fourth year of medical school, typically scheduled July 1 - June 30. We expect students to take their research year after completing their core clerkships in the third year of medical school in order to ensure that their research will be informed by their clinical knowledge. The research year includes:

- Formal coursework: Students complete the ICRE core curriculum (11 credits). Those completing the MD/Certificate complete 7 additional elective credits. Those completing the dual MD/MS program complete 6 units of thesis research and 10 additional track-specific required and elective credits.
- [Mentored clinical research](#): Students complete a mentored clinical research project with their SP mentor.
- [Financial support](#): During the research year, students receive a living stipend, health insurance, and travel funds. Additionally, they receive a full tuition scholarship for the cost of the Certificate. The cost of the additional credits for the MS are the student's responsibility to pay. Students who successfully complete their research year objectives additionally receive a substantial tuition scholarship toward the fourth year of medical school upon returning from the research year.

For more information, contact [us](#).

Core Curriculum

All CSTP students complete the core curriculum during the CSTP research year.

- CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
- CLRES 2010 - CLINICAL RESEARCH METHODS
- CLRES 2020 - BIOSTATISTICS
- CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH
- CLRES 2075 - SEMINAR FOR UNDERSTANDING PRINCIPLES AND PRACTICES OF RESEARCH TECHNIQUES (SUPPORT)
-
- MEDEDU 2140 - MEDICAL WRITING & PRESENTATION SKILLS (ONLINE)
- or
- NROSCI 2014 - SPEAKING OF SCIENCE

MD/Certificate

Students completing the dual MD/Certificate register for 18 units during their CSTP research year (9 units in Summer, 4.5 units in Fall, and 4.5 units in Spring). These credits include the 11-credit core curriculum and 7 credits of elective credits.

MD/MS

Students completing the dual MD/MS degree receive 3 credits from pre-clinical courses in the MD curriculum ([MED 5180](#), [MED 5181](#), & [MED 5265](#)) toward the 30-credit MS degree. Students register for the remaining 27 credits during their CSTP research year (9 credits in Summer, 6 credits in Fall, and 6 credits in Spring) and after returning to medical school.

Medical Scientist Training Program, MD/PhD

The Medical Scientist Training Program (MSTP) offers exceptionally talented individuals the opportunity to undertake a physician-scientist training program tailored to their specific research interests. Our primary directive is to create future biomedical investigators by providing the highest quality graduate medical training. This program offers a range of special services and opportunities to facilitate the completion of a dual degree (MD/PhD). In addition to efficiency, the close integration of clinical and basic science training better reflects the future careers of biomedical scientists. Information regarding the application process can be found on the [MSTP web site](#).

Admissions Process: Prospective students must apply individually to the University of Pittsburgh School of Medicine through the American Medical College Application Service (AMCAS) and complete the MSTP online application. The criteria for acceptance to the MSTP include an outstanding academic record and letters of recommendation, positive personal interviews, and significant prior research experience. Admission to the MSTP is competitive, as is admission to graduate school, with students applying to the PhD programs of their choice after the first year of medical school.

Every year the program receives approximately 400 applications for a maximum of 15 available positions. The application review committee screens each completed application and well-qualified applicants are invited for an interview in Pittsburgh. Students currently enrolled in the MSTP have an average undergraduate GPA of 3.82 and an average Medical College Admission Test score of 515.8. (These scores are for general assessment purposes only; applications are considered holistically.) We also review the letters of recommendation that are submitted to the medical school as part of candidates' School of Medicine application. Please be sure to include two letters of recommendation from faculty and/or scientists who are conversant with your research training. Previous research experience and commitment to a career as a physician-scientist are crucial in the evaluation of applications. Please convey your anticipated research interests and plans as well as past work. Additionally, a bachelor's degree or equivalent must be completed prior to matriculating.

1. **MSTP Application Deadline:** Applicants must submit an initial application through AMCAS by October 1, 2018. In order to be considered for the MSTP, your MD application along with the supplemental application for Pitt-CMU MSTP and all supporting documents, including letters of recommendation, are due no later than **11:59 PM on OCTOBER 15, 2019**. We do not grant application deadline extensions. Early applications is strongly encouraged, as interview offers are made on a rolling basis. Our MSTP admits only U.S. citizens and U.S. permanent residents; international students are ineligible for the MSTP.
2. **Acceptances:** We accept students on a rolling basis; therefore, it is very important to complete the application, including recommendation letters, as early as possible. Applicants must complete their MD secondary application as soon as possible. Starting October 17, those with completed applications will be informed of their acceptance to our program within roughly three weeks of their interview date. Applicants are ranked and notified of the following action:
 1. Acceptance into MSTP with full funding for all years of medical school and graduate school (including tuition and stipend)
 2. Wait-listed for acceptance into MSTP with funding
 3. Not accepted into MSTP

A second group of students is placed on the wait list. The University of Pittsburgh MSTP also accepts a small number of matriculated second-year medical students into the dual-degree program based upon their outstanding performance and developing interest in research pursuits during their medical school experience. Once admitted to the program, we do not accept any transfer credits from undergraduate or graduate courses to fulfill the MSTP course requirements.

The University of Pittsburgh and Carnegie Mellon University MSTP recognizes that our training environment is positively enriched by trainees with diverse backgrounds and needs. Our program gives full consideration to all eligible applicants and does not discriminate on the basis of race, color, sex, veteran status, disability, national origin, creed, marital status, age, disability, gender identity, or sexual orientation.

Tuition and Fees:

MSTP students are fully supported through the entire program. Tuition, health insurance, and stipend are supported by a combination of funds from a National Institute of Health training grant, individual graduate programs, and School of Medicine funds.

Degree and Program Requirements

The MSTP program has many unique aspects of the curriculum, designed to integrate MSTP education through courses such as molecular medicine, the research basis of medical knowledge, professional development, ethics, and longitudinal clinical clerkships. MSTP students begin training to become physician-scientists from the very first week, and are well advised about possible courses and research opportunities. Descriptions of additional MSTP courses are listed below:

- MSTP 5010 - MOLECULAR MEDICINE

- MSTP 5973 - PROFESSIONAL DEVELOPMENT II: METHODS AND ANALYSIS
 - MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE
 - MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
 - MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
 - MSTP 5990 - LONGITUDINAL CLINICAL COURSES 1 & 2
 - MSTP 5993 - LONGITUDINAL CLINICAL COURSE 3
 - MSTP 5955 - MSTP WORKSHOPS
-
- MSTP 5010 - MOLECULAR MEDICINE
 - MSTP 5973 - PROFESSIONAL DEVELOPMENT II: METHODS AND ANALYSIS
 - MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE
 - MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
 - MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
 - MSTP 5990 - LONGITUDINAL CLINICAL COURSE
 - MSTP 5955 - MSTP WORKSHOPS

Physician Scientist Training Five-Year Non-Degree Program

Overview: The Physician Scientist Training Program (PSTP) at the University of Pittsburgh School of Medicine is a five-year tuition assistance non-degree granting program through which students with a strong basic/translational research interest can start to build careers as physician-scientists. The PSTP website is located at pstp.pitt.edu.

Tuition Assistance: Medical school tuition is partially covered by the program (\$10,000 for each of the four years of medical school). Students do not pay tuition during their research year between MS2 and MS3.

Admissions Process: Applicants invited for an interview at the University of Pittsburgh School of Medicine are eligible to apply to the PSTP. A completed PSTP application consists of both the PSTP supplemental application and two research-focused letters of recommendation.

The PSTP interviews approximately 20 qualified candidates per year. Qualified applicants demonstrate a high degree of scholastic excellence, a sincere commitment to a career in academic medicine, and the potential to be a leader in biomedical research.

Program Completion Requirements

All PSTP students successfully complete paid research rotations during the summer before and after the first year of medical school, and a paid research year between the second and third years of medical school. PSTP students also participate in a longitudinal enrichment curriculum of research-oriented classes:

- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
 - MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
 - MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE
 - MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR
-
- MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
 -
 - MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
 -
 - MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE

-
- MSELECT 5950 - PSTP WORK IN PROGRESS SEMINAR

Mini-Electives

Medical student curricula are packed with essential courses and content that all students must master, yet most students find time to pursue areas of personal interest. A goal of the recent curricular revision was to provide increased opportunities for such exploration and growth. We believe, and students confirm, that pursuing studies beyond the required curriculum helps students understand the connection between their basic science coursework and medical practice, and provides exposure to topics and specialties that cannot readily be included in the core curriculum. A mini-elective structure was developed to provide well-structured, rigorous and high quality experiences in areas not typically available to students (especially students in the pre-clinical years).

These courses are offered to any first- or second-year student who is able to commit to attending all course sessions, typically four to eight of them. Most mini-electives are only offered during the Spring Term of each academic year. Updates to the course list as well as date changes typically occur in the late Fall. An email is sent to students in early December announcing registration dates. Please note that the longitudinal mini-electives begin in the fall and registration for those mini-electives are made separately by contacting the course director listed on the course description.

Students who have other assigned academic commitments at the course times must meet those commitments. Therefore, some students may not be able to enroll in some mini-electives.

Course space is limited, based on the maximum number of students designated by the course director.

Students who successfully complete a mini-elective course will receive a certificate of completion. It will not be shown on their official University transcript.

For a complete list of courses, please [click here](#).

Additional questions about mini-elective courses should be directed to Betsy Nero in the Office of Medical Education at 412-648-9829 or betsy@medschool.pitt.edu.

Graduate Programs

The University of Pittsburgh School of Medicine has a long tradition of research excellence and training by world-class faculty committed to mentoring the next generation of scientists. The School of Medicine offers a variety of programs leading to the Doctor of Philosophy, the Master of Science, or a certificate. In addition, it works with other schools of the University through collaborative graduate programs. The School of Medicine also offers an MD degree as well as a joint MD/PhD program enabling exceptionally able students to earn both degrees simultaneously. These programs are described in the First Professional Program section of the School of Medicine catalog.

Biomedical Informatics (PhD, MS, Certificate)

Biomedical informatics is the science and engineering of information handling in health care delivery and biomedical research, studying and developing models of the various aspects of health care delivery and biomedical research in order to better understand how they operate. Those models suggest interventions that may improve health care delivery and biomedical research, including new methods for capturing, organizing, analyzing, and conveying clinical information to clinicians and researchers. Experiments are performed in

which the effect of promising interventions on health care delivery or biomedical research are observed and compared to existing methods, which serve as controls. The analysis of the results of such experiments can lead to greater understanding of health care delivery and biomedical research, and thereby to methods with which to improve them.

Example areas of investigations in biomedical informatics at the University of Pittsburgh include the development and evaluation of new computer-based methods for (1) analyzing proteomic data to diagnosis disease, (2) supporting clinical trials, (3) providing clinical information to patients, (4) understanding the mechanism of diseases from genomic data, (5) natural language processing of electronically available medical text to extract important clinical features, (6) alerting clinicians when patient care appears atypical, (7) real-time detection and assessment of outbreaks of infectious disease and (8) teaching clinical trainees.

This program offers both master's and doctoral degrees. Most students choose to follow a general course of study in biomedical informatics; some, however, elect a specialization in one of the following areas: bioinformatics, clinical informatics, image informatics, or biosurveillance/infectious disease informatics. The specific curricula for the specializations, which are variations of the general course of study in biomedical informatics, can be found on the Training Program Web site at <http://dbmi.pitt.edu>.

Individuals who want a less intensive exposure to informatics may seek a 15-credit certificate in lieu of an academic degree. The biomedical informatics certificate can be a means of augmenting professional training in fields related to informatics and/or fulfilling educational needs associated with a professional position. Trainees across all health professions are welcome.

412-648-9203
Fax: 412-648-9118

More information on Admissions, Financial Aid, Curriculum, Courses, Degree Requirements, and Faculty, can be found at <http://dbmi.pitt.edu>.

PhD Requirements

Credits: To earn the PhD degree in biomedical informatics, a student must complete a program of study approved by a committee of biomedical informatics faculty. The program requirements include a minimum of 72 credits consisting of a required Foundations course (15 credits); Research Skills (7 credits); Teaching Practicum (3 credits); doctoral dissertation research (18 credits), elective courses (12 credits); additional electives and/or independent study (19 credits); successful completion of a preliminary evaluation; successful completion of a doctoral comprehensive examination composed by a doctoral committee; and research work leading to an acceptable dissertation. All required courses must be taken for a letter grade, with the exception of

the Journal Clubs/Colloquiums and some independent and/or dissertations studies (to be determined by the faculty advisors). A minimum “B” grade is required in all graduate courses.

Admission to Candidacy/Dissertation: To qualify for admission to candidacy, a student must have completed formal coursework with a 3.3 GPA or higher, passed the comprehensive examination, and received approval of the proposed subject and plan for the dissertations from their dissertation committee following a prospectus meeting. The dissertation committee usually includes the principal dissertation advisor and three additional faculty (a majority of the committee must be biomedical informatics core faculty, and have University graduate faculty status).

An appropriate dissertation project involves a substantive piece of original and independent biomedical informatics research, grounded in an appropriate mode of literature and providing a significant contribution to the field. The dissertation must be successfully defended in a public oral defense. The dissertation process will follow the applicable regulations and procedures of the University and the School of Medicine, as described in the Regulations Pertaining to Doctoral Degrees section of this document.

MS Requirements

Credits: The Master of Science in Biomedical Informatics requires a minimum of 36 credits consisting of required biomedical informatics core Foundation (15 credits); Research Skills (4 credits); electives/independent study (14 credits); and Research (3 credits).

All required courses must be taken for a letter grade, with the exception of the Journal Clubs/Colloquiums and some independent and/or dissertation studies (to be determined by faculty advisors). A minimum “B” grade is required in all graduate courses.

Research Project or Thesis: A key element of the program is a research project with two key deliverables: (1) the writing and submission of a paper of publishable quality based upon the research and (2) the completion of an oral examination on its contents. A master’s project committee will oversee the student’s research progress, including the oral comprehensive examination. Students have the option of developing their projects into a formal master’s thesis.

Successful completion of the oral examination on the research project satisfies the comprehensive examination requirement of the University’s Committee on Graduate Studies. Final certification of the completion of the master’s degree requires submission of the hard copy of the master’s research project to the program coordinator.

Certificate Requirements

The biomedical informatics certificate is a 15-credit (minimum) experience. The curriculum of all students in this program will have the following general structure: required Foundation (9 credits); electives (minimum 3 credits); and research project (3 credits)

Research Project: The research project should be summarized in a report commensurate with its scope, one copy of which must be submitted to the training program coordinator after approval by the student's research advisor.

Additional Requirements for Doctoral, Master's, and Certificate Students in Biomedical Informatics

Instruction in the Responsible Conduct of Research: This Web-based set of instructions and evaluation modules may be accessed at <http://www.ctsi.pitt.edu/RCR/index.shtml>.

Attendance at and participation in the Department of Biomedical Informatics' invited lectures, symposia, conferences, etc. (particularly the Annual Training Program Retreat and special departmental lectures). Such lectures are considered important educational experiences, as well as introducing students to primary researchers and their work in the field of biomedical informatics.

Biomedical Sciences (MS)

The Biomedical Master's Program (BMP) is designed to develop critical scientific thinking skills and train students for successful application to professional degree programs in the health sciences. Biomedicine is the centerpiece of the health sciences, interconnecting everything from medicine, dentistry and pharmacy, to clinical and biomedical research. The field of Biomedicine ultimately studies and advances understanding of the human body, how it works in health and how it goes awry in disease. The BMP at the University of Pittsburgh School of Medicine offers educational and experiential training in Biomedicine as preparation for successful careers in the health sciences within a faculty mentored community individualizing each student's success.

Contact Information

Office of Graduate Studies
M240 Scaife Hall
412-383-8716
Fax: 412-648-1077
Email: bmppitt@pitt.edu
www.bmp.pitt.edu

Admissions

Admissions Criteria:

The BMP welcomes candidates who are U.S. Citizens, non-citizen nationals, or lawfully admitted permanent residents of the U.S., or individuals who already hold, or can obtain a J-1, H1-B, or F1 transfer visa.

The program is designed for applicants with long-term goals of entering careers in the health sciences, or applying to MD, DMD, and PhD degree programs.

Candidates must have distinguished personal qualifications of past academic ability, research efforts or publications, and references. Application requirements include a bachelor's degree with a 3.0 GPA, and preference is given to applicants with a 3.3 or higher GPA, and completion of courses required for application to a professional degree program. MCAT, DAT, PCAT, or GRE scores are not required for admission, but should be reported by any applicant who has taken one of these tests. Candidates with community service, physician or dentist shadowing, patient volunteering, clinical or basic research experiences, and strong academic performance will be viewed very favorably.

Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Application Process:

- The online application process starts October 1st and closes on June 1st the following year. Admissions is conducted on a rolling basis. Responses to offers are required within 30 days of an offer being extended, or the final responses deadline of June 15th, whichever is first. Students matriculate for the beginning of the fall semesters. A strong focus on promoting diversity of successful applicants will be employed in the admissions process.
- Admissions are based upon the student's academic record, letters of recommendation, previous professional or research experience, written statement of interest, an updated resume/CV, and a online or in-person interview.

The online application is available

at: <https://admissions.gradbiomed.pitt.edu/ApplicantRegistration/ApplicantRegistration>

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: <http://oafa.pitt.edu/learn-about-aid/>. All students are responsible for their own tuition.

Degree Requirements

All requirements detailed in the Regulations Governing Graduate Study at the University of Pittsburgh will be met. The MS in Biomedical Sciences requires the completion of a minimum of 32 credits with a GPA of 3.0 or higher. Maximum credits allowed per term will be 15, and a typical course load will be 15 credits for the fall and spring terms and 2 credits for the summer term.

Foundational Components:

The Curriculum. The BMP employs science-based instruction designed to improve student preparation for professional degree programs in medicine, dentistry, research, and other related health science professions. By emphasizing understanding and how to think in addition to what to know, the BMP promotes the development of study habits that enable our students to excel and thrive in the first two years of these demanding professional

degree programs. These goals will be achieved through an integrated series of required core courses and elective courses and experiential training opportunities together with dedicated one-on-one advising and mentorship that will enable students to successfully apply to and perform well in their chosen professional school.

Experiential Training. The BMP affords opportunities for experiential training specifically tailored to the strengths and weaknesses of each individual student. The areas selected correspond to the typical aspects considered in the review of standard professional school applications: community service, patient volunteering, physician or dentist shadowing, and research training.

Mentoring. The BMP provides a three-tiered mentoring model to all students. Each student will meet with their assigned advisor during the initial phase of the program in order to identify strengths and weaknesses of the previous training received by the student. The student and advisor will prepare a preliminary set of career goals, identifying areas that require special attention for success in the student's chosen field. Periodic assessments of each student's progress towards these goals will follow. Each student receives mentorship through the career development coursework in the BMP. This includes group and one-on-one mentoring facilitated by the course instructor. Each student receives access to an International Coaching Federation career coach. This provides further personal and professional development that is entirely confidential. The students will also receive mentoring during the preparation of applications to professional and graduate schools, emphasizing standardized test preparation, personal statement writing, identifying most meaningful experiences, and honing interviewing skills.

Expanding on these three components, the BMP enables the student to differentiate with elective courses, experiential opportunities and mentoring to focus on specialized interests. These Areas of Concentration (AOCs) are in Medicine, Dentistry, or Biomedical Research. The AOCs are designed to individualize the program for students seeking future professional programs leading to the MD, DMD, or PhD degree, respectively.

Successful completion of the BMP results in conferral by the University of Pittsburgh of the Master of Science (MS) degree in the major of Biomedical Sciences. The BMP is a 12 month program. Applicants who are working may complete the program part-time over the course of two academic years

Curriculum

The BMP curriculum includes three major components: core, electives, and experiential activities. A common "core" has been designed to provide the foundational sciences for students who have a minimal level of basic science training as well as advanced education in health science thinking skills to serve students well into the first two years of professional degree programs. These courses are complemented by electives and experiential activities that are chosen based on each student's interests in his/her AOC.

Core Courses: Biochemistry and Physiology; Method and Logic in Biomedicine; Cell Signaling and Pharmacology; Comprehensive Analysis of Disease; Foundations of Successful Career Planning and Development 1 and 2, Professionalism and Non-cognitive Development 1 and 2.

Elective Courses: Human Anatomy; Histology and Cell Function in Health and Disease; Cell Biology Pathways in Treatment of Disease; Organ Systems Physiology.

Additional Elective Courses: Additional courses are available through the School of Medicine Molecular Pharmacology and Cell Biology & Molecular Physiology Graduate Programs, and the School of Dental Medicine at the University of Pittsburgh.

Experiential Courses: The BMP will provide ample opportunities in community service, hospital volunteering, and clinical shadowing. Available opportunities are matched each term to optimize the experiential benefit for all students during their tenure in the program. Research training experiences are also available in a wide range of biomedical and clinical research laboratories. Students are expected to take the initiative, guided by their faculty advisor, to find suitable matches and schedule experiential education and training sessions during the Fall, Spring, and/or Summer terms.

Training in Ethics: Ethical conduct and scientific integrity is an essential aspect of the health sciences. The BMP program instructs students on the significance and practice of ethical conduct in an annual workshop.

Academic Standards

Students must maintain a minimum cumulative GPA of 3.0. In addition, a minimum of a B grade must be earned in each of the required courses and in each of the program core courses.

Computational Biology (PhD)

Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavioral science.

The Joint Pitt-CMU PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

Program Website:

www.compbio.pitt.edu

Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences are ideal candidates.

Recommended Prerequisites

For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91.

Application

REQUIRED MATERIALS - Deadline December 10, 2019

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts (submitted online)
- Conversion of GPA (for international students only)
- Unofficial TOEFL Scores (submitted online)
- Application Fee
- Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.
- For more information on application process, see www.compbio.pitt.edu/?page_id=163
- **Financial Aid**
- All students are provided with a stipend and full tuition remission. Assistance is also provided for health insurance.
- **Teaching Assistantships**
- Although all students are supported as research assistants throughout their time in the program, students are required to TA for one semester. There are also opportunities to assist in the teaching courses of the program. Students are also encouraged to develop teaching skills by mentoring other students and passing on their knowledge to lab mates and fellow students.

Curriculum

The curriculum is designed to train students who will shape the next generation of discovery in computational biology in academia and industry. Students are required to complete 72 credit hours of academic work toward partial fulfillment of the requirements for completion of dissertation study. Of these, 30+ are formal coursework, and the remaining to be completed with full-time research.

All students are required to take five core graduate courses. The core courses aim at providing a strong common background in computational biology before they specialize in particular research areas

Core Courses

- Machine Learning
- Introduction to Computational Structural Biology
- Computational Genomics
- Cellular and Systems Modeling
- Laboratory Methods for Computational Biologists

In addition, all students are required to take three graduate elective courses: a life science/physical science course; an advanced interdisciplinary elective specified for the student's chosen area of specialization; and one general elective.

Specialization Areas

- Computational Genomics
- Computational Structural Biology
- Cellular and Systems Modeling
- Bioimage Informatics

For more information on the curriculum, see www.compbio.pitt.edu/?page_id=87

Other Courses

In addition to core and elective courses, students take complementing courses, if needed, and participate in program seminar, journal clubs, ethics courses and directed studies toward their dissertation projects.

Program Seminar Series

Students enrolled in the program are expected to attend scientific seminars during all years of training. Beginning in their second year and ending in the year before their thesis defense, students present their research progress to fellow students and the faculty on at least an annual basis.

CPCB Course

Effective presentation of scientific data is an invaluable aspect of graduate training. Therefore, all first- and second-year students must present a scientific article on a topic (selected by a faculty member) that introduces students to the methodology and applications of computational biology. The talk is made in a format that allows the student to develop basic presentation skills. Students subsequently receive feedback on their talks, thereby improving their presentations skills as their graduate training advances.

Training in Ethics

Ethical conduct and scientific integrity is an essential aspect of research. This is especially important given the competitive nature of funding processes and the high demand for productivity. Hence, the program instructs students on the significance and practice of ethical conduct.

Directed Study

Credits are given for laboratory projects (wet or computer labs) under the direction of the dissertation advisor prior to admission to candidacy for the doctorate.

Scheduling

We anticipate two types of course schedules for students in the program. The default for students who have taken the prerequisites will be to take three courses in each of the first two terms (50-75% time) and spend the remaining time on research. Such students would normally take the core courses in the first year along with one additional course. The third and fourth terms would be split between taking electives and doing research.

Students who enter with some biology or computer science or physical science background but not with sufficient background to take all of the core courses would take a mix of missing prerequisites and core courses in each of the first two terms (approx. 90% time) and spend 10% time on research. These students would then

take a mix of remaining core courses and electives in the third and fourth terms (along with 30% research) and finish electives in the fifth and/or sixth terms.

Comprehensive Examination

Students are required to pass a comprehensive examination after completion of their courses, prior to being officially admitted to candidacy to the PhD degree. Students are expected to complete this examination no later than the beginning of the spring term of their third year. The comprehensive examination consists of two parts: a 12-page “grant-style” written proposal of the proposed research, followed by an oral defense of the proposed research.

Post-Comprehensive Qualifying Examination

Students who have been accepted to PhD candidacy conduct research on a full time basis, and are required to complete a minimum of 40 credit hours (9-14 credits per term) of full-time dissertation study in order to meet the criteria for dissertation defense. Hence, all students will have completed at least 72 credit hours of study prior to graduation, including 29 credit hours of core + elective courses, and at least 40 credit hours of dissertation research.

Completion of Degree

The program is structured in such a way that students can finish their degree within four years of entering their dissertation laboratory. However, it is recognized that the actual time required to attain the degree depends on the specific type of research undertaken and how quickly progress is made in completing the experimental program.

Terminal Master’s Degree

The Program does not admit students whose goal is to attain a MS degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student’s control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

For more information on the program, such as list of training faculty, please see www.compbio.cmu.edu/?page_id=31615

Computational Biomedicine and Biotechnology, MS

The Computational Biomedicine and Biotechnology (CoBB) Master’s of Science program trains leaders who can translate cutting-edge computational technologies into real-world advances in biomedicine and biotechnology. Seated in the Department of Computational and Systems Biology, the program focuses on the interface between computer science and applied biology. It is appropriate for students with backgrounds in either quantitative disciplines (computer science, engineering) or biological sciences and who seek to have an impact in the rapidly evolving field of computational biotechnology. Students in the CoBB program will learn to develop and apply novel computational, mathematical, statistical, and *in silico* techniques to meet current challenges in biotechnology. Our trainees will be equipped with the necessary skills for successful biomedical data science and biocomputing technology careers in the health care and biotechnology industry, government, and academia.

Executive Committee:

Joseph Ayoob, PhD

Ivet Bahar, PhD

Chakra Chennubhotla, PhD

James Faeder, PhD

Program Website:

www.csb.pitt.edu/cobb/

Admissions

CoBB welcomes students from various backgrounds, including life science, computer science, physical science, mathematics and statistics, and engineering majors, students with interdisciplinary or multi-disciplinary backgrounds.

Application

Required Materials:

- The Online Application
- Statement of Purpose
- Three letters of Recommendation
- Unofficial Transcripts
- Unofficial TOEFL Scores
- Application Fee

Financial Assistance

Financial guidance is available through the University of Pittsburgh Office of Admissions and Financial Aid: <http://oafa.pitt.edu/learn-about-aid/>. All students are responsible for their own tuition.

Degree Requirements

To receive the CoBB MS, all students are required to complete a minimum of 30 credits of masters-level coursework and to maintain an overall GPA of 3.0 or higher.

Curriculum

- At least 4 research credits of independent study
- A summer internship or additional independent study, worth 3 credits
- 3 credits of Fundamentals of Computational Biology
- 2 credits of Professional Development
- One course (taken or waived) from each of the five groups
 - Computational Structural Biology
 - Computational Systems Biology
 - Computational Genomics
 - Computer Science
 - [Electives](#)

Independent Study

Gaining hands on experience in solving problems in computational biology is an essential part of CoBB training. Each student is therefore required to take a minimum of 4 credits of independent study with a

University of Pittsburgh faculty member. Students are expected to select a research mentor for the independent study in their first semester, and to complete the research requirement in the second and/or third semesters.

Internship

To gain experience in the professional application of computational biology, students are required to participate in a 2 to 3 month summer internship at a company of their choosing. Acceptable internship sites include industrial labs, biotech/pharma companies, and governmental organizations.

Students will present a written report with well-defined structure and content at the end of their internship to summarize their experience and the skills they acquired during their experiential training, and to make recommendations for future work. They will also make an oral presentation to share their experience with others.

Completion of Degree

The program is structured in such a way that students can finish their degree within 12-20 months, depending on the background of the student. To complete the degree in one year, students must demonstrate proficiency in programming, calculus and linear algebra.

For more information on the program, please visit www.csb.pitt.edu/cobb/

Institute for Clinical Research Education

The Institute for Clinical Research Education (ICRE) is the home for the University of Pittsburgh's premier clinical and translational research training programs. The ICRE has developed customized degree programs that emphasize the multidisciplinary nature of clinical and translational research and engage adult learners by focusing on applied approaches to building skills. <http://www.icre.pitt.edu/>

Graduate Training Programs:

- [Clinical and Translational Science \(PhD\)](#)
- [Clinical Research \(MS\)](#)
- [Clinical Research \(Certificate\)](#)
- [Medical Education \(MS\)](#)
- [Medical Education \(Certificate\)](#)
- [Certificate in Clinical and Translational Science for Doctoral Students in the Health Sciences](#)

Clinical and Translational Science (PhD)

The Institute for Clinical Research Education at the University of Pittsburgh has designed the PhD Program in Clinical and Translational Science to train researchers in this emerging field that aims to close the gap between basic science and clinical research. This rigorous and advanced training program is intended primarily for clinicians, and aims to substantially enhance the capabilities of scientists to conduct high-quality clinical and translational research.

Pittsburgh, PA 15213
Phone: 412-586-9632
Fax: 412-586-9672
email: icre@pitt.edu

<http://www.icre.pitt.edu/ClinTransPhD/index.html>

Admissions

Admissions Criteria

Applicants must meet the following requirements before filling out an online application.

- Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.5 on a 4.0 scale
- TOEFL or IELTS test results (when applicable)

Timeline

The PhD Program in Clinical and Translational Science accepts applications from September 1 through January 31 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by January 31. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The PhD in Clinical and Translational Science curriculum is organized into 4 categories of coursework: Core, Advanced Selectives, Research Specialization, and Dissertation Research. While students advance through the program they will also complete the Preliminary Evaluation, Comprehensive Exam, and Dissertation Milestone.

To view the curriculum in detail, please visit this [page](#).

Non-credit Requirements/Milestones

Responsible Conduct of Research (RCR) Requirement

Responsible Conduct of Research (RCR) Requirement: Clinical Research Degree Program students are required to attend 8, 1-hour Responsible Conduct in Research workshops. These workshops are offering through the Clinical and Translational Science Institute (CTSI).

Comprehensive Examination

PhD in CTS students are required to complete a Comprehensive exam. This exam consists of a written examination in the form of an NIH R01-style proposal (including, at a minimum, specific research aims, background and significance, and research methods) and an oral defense of the written portion.

Doctoral Prospectus and Dissertation

PhD in CTS students must complete both a Doctoral Prospectus and successfully complete and defend a Doctoral Dissertation.

- Individuals must prepare a dissertation proposal for presentation to a doctoral dissertation committee at a formal dissertation overview meeting. At this meeting, the dissertation committee members will provide guidance in shaping the conceptualization and methodology for the individual's Doctoral Dissertation.
- The proposal, writing, and defense of a culminating research project. The written work must conform to the University of Pittsburgh style manual (www.pitt.edu/~graduate/etd/formatguidelineshtml.html) The Final Oral Defense is a public defense of the Doctoral Dissertation.

More information:

Please view the [PhD in CTS Program Handbook](#) (http://www.icre.pitt.edu/documents/PhD_in_CTS_Handbook.pdf) for complete program details.

Clinical Research (MS)

This 30-credit Master of Science Program is for highly talented individuals from a broad range of disciplines who want concentrated training in the design and implementation of high-quality clinical research.

Admissions

Admissions Criteria

- Applicants must meet the following requirements before filling out an online application.
- Candidates are encouraged, but not required, to have completed a graduate or professional degree.
- Candidates must have a high level of interest and potential for the pursuit of innovative clinical research as a major focus of their career plan.
- Candidates from departments who ensure 50%-75% of protected time during their pursuit of the degree.
- A minimum GPA of 3.2 on a 4.0 scale
- TOEFL or IELTS test results (when applicable)

Timeline

The Master of Science in Clinical Research Program accepts applications from December 15 through February 28 each year. In order to guarantee that you are considered for admission, we must receive your application and all component parts by February 28. Students will be notified via email of admission decisions approximately 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

Core Curriculum

The purpose of the core curriculum is to provide trainees with the basic set of skills that are required by clinical investigators in all fields of interest. These skills include an understanding of research design, epidemiologic methods, biostatistics, study and survey design, and measurement of outcomes.

The four core courses that comprise the core curriculum are offered in July and August. They are commonly taken together but can be distributed over two summer terms with the guidance of an academic advisor.

[CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH](#)

[CLRES 2010 - CLINICAL RESEARCH METHODS](#)

[CLRES 2020 - BIOSTATISTICS](#)

[CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH](#)

Advanced Grant Writing Course

This course focuses on research design and development and is a two-part course offered during the fall and spring terms. The Advanced Grant Writing course is taken by MS students during year 2.

[CLRES 2071 ADVANCED GRANT WRITING PART 1](#)

[CLRES 2072 - ADVANCED GRANT WRITING PART 2](#)

Specialty Track Requirements:

Students who enter the Master of Science in Clinical Research Program will select a curriculum track that offers specialized training in a specific clinical research area. Each specialty track offers a different curriculum of required courses, which can be viewed in the Program Handbook. The MS program has 5 specialty tracks:

- Clinical Trials Research Track
- Comparative Effectiveness Research Track
- Health Services Research Track
- Translational Research Track
- Innovation Track

Each of these tracks has a distinct set of required courses that allow students to specialize in an area of clinical research. All MS students will also take a selection of elective courses to reach the 30 credit minimum required for this degree.

Comprehensive Competency Review:

The Comprehensive Competency review is a program check-in completed at the midpoint of a student's degree progress. The MS in Clinical Research Program is designed to train students in the skills, knowledge, and

professional norms for clinical researchers and the Comprehensive Competency Review helps students be confident that they are on track to develop competence in all key areas.

Thesis or Substantive Research Project:

The MS in Clinical Research requires each student to complete a formal thesis or substantive research project. Students are able to write a standard thesis, grant proposal, or 2 manuscripts to fulfill this requirement.

Students must successfully defend their research project to a review committee as required by the University's Committee on Graduate Studies.

Responsible Conduct in Research (RCR) Requirement

Clinical Research Degree Program students are required to attend 8, 1-hour Responsible Conduct in Research workshops. These workshops are offered through the Clinical and Translational Science Institute (CTSI).

More Information:

For additional program details, please visit the Master of Science in Clinical Research Program (<http://www.icre.pitt.edu/MSClinicalResearch/index.html>) and review the Program Handbook (http://www.icre.pitt.edu/documents/Clinical_Research_Handbook.pdf.)

Clinical Research (Certificate)

The Certificate in Clinical Research Program is aligned with the mission of the Institute for Clinical Research Education to offer the highest-caliber training and education in clinical research and to enhance collaboration among trainees from multiple disciplines. This program is geared toward clinicians who are pursuing a research career, and can be completed over a year of part-time study.

Medical Education (MS)

The Master of Science in Medical Education Program is designed to help academically oriented health care professionals enhance their education, strengthen their teaching skills, and expand their ability to facilitate the learning process of students and residents in a variety of clinical teaching environments. This program is typically completed over 2 years of part-time study. Alumni of this program have gone on to make valuable contributions to the field of medical education, many of them through leadership positions in top training programs across the country.

Institute for Clinical Research Education
200 Meyran Ave., Suite 300

Admissions

Admissions Criteria

Candidates must have completed one of the following degrees: MD, DDS, DMD, DO, ND, OD, PharmD, PhD, DNS in nursing, PhD with clinical responsibilities, or other professional degree as deemed appropriate by the selection committee.

Candidates must have a high level of interest in and potential for the pursuit of innovative medical education as a major focus of their career plan.

Candidates must be based in departments that ensure adequate protected time to participate in courses and complete a research project during their pursuit of the degree.

A minimum GPA of 3.2 on a 4.0 scale

TOEFL or IELTS results (when applicable)

Timeline

The Master of Science in Medical Education Program has two application cycles per year. The application period for the Spring Term occurs from September 1 through October 31. The application period for the

Summer Term occurs from December 15 through February 28. In order to guarantee that you are considered for admission, we must receive your application and all component parts by the last day of the admission cycle. Students will be notified via email of admission decisions 1-2 months following the close of the application cycle.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The University requires the successful fulfillment of a minimum of 30 credits for awarding a Master of Science in Medical Education. The degree is granted upon the completion of a tightly integrated curriculum with three components: (1) coursework plus observed teaching activities focusing on adult learning, classroom and clinical teaching skills, curriculum development, innovation in medical education, professional development, and medical administration; (2) additional courses to provide trainees with fundamental research skills; and (3) a project on curriculum development or a mentored research project.

Core Curriculum

All Master of Science trainees in the Medical Education Program enroll in 10 required courses that cover the fundamental aspects of the field of medical education. The total number of required credits ranges from 17 to 19 credits depending on the number of [MEDEDU 2080 - MASTERS RESEARCH](#) credits taken (trainees can enroll in 1 to 3 thesis research credits). Below are the required courses:

[MEDEDU 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH](#)

[MEDEDU 2010 - CLINICAL RESEARCH METHODS](#)

[MEDEDU 2020 - BIostatISTICS](#)

[MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH](#)

[MEDEDU 2080 - MASTERS RESEARCH](#)

[MEDEDU 2100 - ENHANCING TEACHING SKILLS](#)

[MEDEDU 2111 - FUNDAMENTALS OF ADULT LEARNING PART 1](#)

[MEDEDU 2120 - PROFESSIONAL DEVELOPMENT](#)

[MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN](#)

Electives

Trainees choose elective coursework to reach the required 30 credits. These courses may be offered through the [Medical Education](#) or [Clinical Research](#) program.

Independent Research Project

Trainees pursuing the Master of Science in Medical Education are required to complete a substantive research project. This thesis requirement can take the form of a curriculum development project, survey research, qualitative research, or other type of research project. The trainee must be the principal investigator for their thesis project and plan to publish their research in a peer-reviewed journal.

More Information

To learn more about the Medical Education Academic Programs, please visit the program [page](#) and review the [program handbook](#)

Medical Education (Certificate)

This certificate program is flexible and allows students to choose courses within the Medical Education program that align with their learning and professional goals. Students in this program typically choose courses in teaching and learning to enhance their skills as a clinician-educator at either a university or community-based program. The program is typically completed over one year of part-time study.

Financial Assistance

The Institute for Clinical Research Education does not provide financial aid. Unless students have other funding sources, they are responsible for covering the tuition costs, taxes, and fees associated with their course enrollment.

Degree Requirements

The Certificate in Medical Education offers a very flexible curriculum. Students are required to complete 15 credits, but are able to choose courses based on their individual educational interests and research goals. A minimum of 9 credits out of the 15 must be Medical Education courses. Please see the ICRE [courses page](#) for a complete list of our courses.

Integrative Systems Biology (PhD)

ISB is an innovative program in graduate training that rapidly immerses students into a research environment, then mentors them to become independent scientific practitioners, skilled not only in the art of technical execution but in the creative multidisciplinary thinking required to address important questions in systems biology. Students receive a PhD in Integrative Systems Biology.

Integrative Systems Biology is a field of study that has emerged within the last decade as a unifying discipline that focuses on placing the molecules that comprise living systems within functional and organism contexts.

The goal of ISB is to utilize all of our available resources to create a training and research environment to answer challenging questions of fundamental importance in biomedical and life sciences. The ISB faculty are drawn from cellular, developmental, molecular and systems biologists across the University of Pittsburgh campus and are distributed between research foci:

Quantitative Biology

Translational Medicine

E-mail: sas101@pitt.edu

<http://www.isb.pitt.edu>

Admission Requirements and Procedures

Students most likely to gain admittance will have a baccalaureate degree from a natural science, physical science, or engineering program, a grade point average of 3.0 (on a scale of 4), and three letters of recommendation. As this is an accelerated program, students should have prior immersive experience in research studies. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 650 (paper), IELTS score of at least 7.50 or iBT score of at least 100 is required for admission to the Program.

Additional information and a link to the online application can be found at <http://www.isb.pitt.edu/how-apply>

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the program in the fall session, and after performing three rotations identify an advisor and area of research dissertation research project. Areas of research focus include Cell, Development, and Molecular Biology, Quantitative Biology, Translational Medicine, and Genes and Evolution. Required course work is completed during the first two years. After Spring of the students' second year, they take a comprehensive examination that includes the generation of a research proposal ready for submission to national fellowship programs. Students receive career mentoring throughout their ISB training to ensure a seamless transition to the postdoctoral level. Additional information can be found in the Student Handbook: https://www.isb.pitt.edu/sites/default/files/ISB-Handbook_043019.pdf.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

ISB 2000 - LABORATORY RESEARCH ROTATION

ISB 2070 - THE BEDSIDE TO BENCH

INTBP 3240 - GRADUATE STUDENT WRITING SEMINAR

MSCBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

ISB 2020 - SYSTEMS BIOLOGY I

ISB 2035 - SYSTEMS BIOLOGY II

ISB 2060 - ISB CONFERENCE

ISB 3090 - PHD DISSERTATION RESEARCH

Interdisciplinary Biomedical Graduate Program

Through the Interdisciplinary Biomedical Graduate Program, students may be admitted into one of the following 4 PhD degree-granting programs in the School of Medicine:

[Cell Biology and Molecular Physiology \(PhD\)](#)

[Cellular and Molecular Pathology \(PhD\)](#)

[Molecular Genetics and Developmental Biology \(PhD\)](#)

Molecular Pharmacology (PhD)

Students will not be admitted to pursue a master's degree. However, students who cannot complete the PhD program due to extenuating personal, financial, academic, or medical reasons may be awarded a master's degree.

The Interdisciplinary Biomedical Graduate Program is flexible and accommodates students whose research interests are still evolving by introducing them to a variety of fields through interdisciplinary courses and laboratory experiences. For those students who have a clearly defined research interest, the program offers the opportunity to move quickly into a laboratory and accelerate their study.

www.gradbiomed.pitt.edu

Academic Standards

Students must maintain a minimum overall cumulative GPA of 3.00. In addition, a minimum of a B grade must be earned in each of the required courses and in each of the degree-granting program core courses.

General Degree Requirements - All Interdisciplinary Biomedical Graduate Students

The first term core course, Foundations of Biomedical Science, is required of all students and is followed by increasingly specialized course work in the discipline-specific program the student has chosen. A course in biomedical experimental design and analysis and a course in research ethics are also required of all students.

The first year includes three laboratory research rotations. (*See listing of Required Courses below.*) Students are guided through their first year of graduate study by a faculty mentor assigned by the program.

The mentor helps to identify rotation laboratories, provides advice on classes, and ensures that students reach appropriate milestones in the first year of the program. At the end of the first year, a preliminary student performance evaluation is conducted by the Program Steering Committee. When a student has successfully completed the preliminary evaluation and chosen a dissertation advisor, the student transfers into one of the degree-granting programs.

Evaluation following the first year is undertaken by the degree-granting program and includes course performance and a comprehensive exam at the end of the second year of study. The comprehensive exam is in the form of an original research proposal followed by an oral examination before a faculty committee. Upon successful completion of the comprehensive exam, the student nominates a dissertation advisory committee composed of a minimum of 5 members. A majority of the committee (including the major advisor) must have graduate faculty status. The student then presents a dissertation proposal to the committee and is admitted to candidacy. The training program is completed by execution of an original and independent research project and defending a dissertation. *Please see Regulations Pertaining to Doctoral Degrees.*

Required Courses-All Students

The following courses are required of all students in the Interdisciplinary Biomedical Graduate Program:

[INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE](#)

[INTBP 2005 - FOUNDATIONS CONFERENCE](#)

[INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS](#)

[INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH](#)

[INTBP 2010 - LABORATORY RESEARCH ROTATION](#)

A minimum of 72 credits (32 course credits and 40 PhD dissertation research credits) beyond the baccalaureate degree is required for the PhD degree.

Cell Biology and Molecular Physiology (PhD)

The graduate program in Cell Biology and Molecular Physiology has a rich tradition of scientific training and discovery. Graduates of the PhD program have gone on to become chairs of departments at six major U.S. medical schools, and are represented at all levels of academic and biomedical research. The program combines basic and clinical research faculty who are dedicated to the training of students. Faculty employ an integrative biology focus: combining tools of imaging, genetics, biochemistry, molecular biology, structural biology, computational modeling and physiological approaches to understand the functions of cells, tissues and organisms. Both basic scientists and clinical researchers seek to investigate dysregulation of normal cell biological functions in human disease. The program is home to the Center for Biologic Imaging, a state-of-the-art imaging center and the NIH-supported, O'Brien Kidney Center. Areas of expertise in the program include the cellular trafficking of proteins and lipids, genetic disorders of ion channels, regulation of gene expression during development, DNA damage repair and cancer, models of neurodegeneration and aging, signal

transduction in diabetes, cell biology and physiology of renal diseases and the regulation of male and female reproduction systems.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, students take the following 4 required courses for the Cell Biology and Molecular Physiology program:

MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES and

MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

OR

MSCBMP 2860 - MULTIPARAMETRIC MICROSCPC IMAGNG and

MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY

AND

INTBP 3240 - GRADUATE STUDENT WRITING SEMINAR

Other electives include:

MSCBMP 2870 - HISTOLOGY

MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC

MSCBMP 2860 - MULTIPARAMETRIC MICROSCPC IMAGNG

MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

Cellular and Molecular Pathology (PhD)

The Cellular and Molecular Pathology program integrates the fields of cellular and molecular biology with the study of human disease, primarily in the context of Regenerative Medicine with translational goals. Utilizing the latest technologies, the program combines both basic science and clinical research to explore fundamental questions related to the biology of normal tissue growth and embryonic development, current best practices in tissue engineering, and the cellular and molecular pathways that lead to the development of disease. Active

research programs investigate diverse topics such as liver development, disease and transplantation in the Pittsburgh Liver Research Center; developmental neuroscience and neurological diseases; mechanisms of gene regulation; cancer biology; angiogenesis; pulmonary disease; inflammation and autoimmunity; genetics; bioinformatics; and molecular diagnostics. Research laboratories are located throughout the medical center campus and research studies involve both basic research scientists (PhD's) and clinician scientists (MD/PhD's).

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses for the Cellular and Molecular Pathology program:

INTBP 3240 - GRADUATE STUDENT WRITING SEMINAR

MSCMP 2730 - MOLECULAR MECHANISMS OF CELL GROWTH & DIFFERENTIATION AND EITHER

MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS OR

MSCMP 2740 - MOLECULAR PATHOBIOLOGY OR

MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Additionally we require at least 5 terms of:

MSCMP 2750 - RESEARCH SEMINAR

As well as two electives of your choice

From the above electives or from courses throughout the School of Medicine on diverse topics of interest to students such as the following CMP-sponsored courses:

MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING

MSCMP 3740 - STEM CELLS

MSCMP 3750 - ANGIOGENESIS

MSCMP 3770 - CELL THERAPY

Molecular Genetics and Developmental Biology (PhD)

The Molecular Genetics and Developmental Biology (MGDB) graduate program provides an exciting and vigorous academic environment for highly motivated and qualified students to prepare for a rewarding career in biomedical research. The MGDB program brings together faculty in both basic and applied sciences, including researchers from the School of Medicine, the School of Arts and Sciences, the University of

Pittsburgh Cancer Institute, the Children's Hospital of Pittsburgh, the Magee-Womens Research Institute and the Department of Biological Sciences. MGDB faculty have a wide diversity of interests and are pursuing research projects that address fundamental, contemporary issues in biology and medicine. MGDB research is at the cutting edge of many emerging fields, including developmental and reproductive biology, stem cell biology, proteomics, computational biology, genomics and DNA replication, damage and repair. Our work has direct relevance to acute injury, cancer, diabetes, muscular dystrophy, heart disease, kidney disease, fertility/infertility, congenital disorders and other genetic diseases and regenerative medicine. We are committed translating lab bench discoveries to the bedside and graduate students are fully integrated in all aspects of our investigative work.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the Molecular Genetics and Developmental Biology program:

MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE

MSMGDB 2535 - MODEL ORGANISMS

MSMGDB 2550 - RESEARCH SEMINAR

INTBP 3240 - GRADUATE STUDENT WRITING SEMINAR

Molecular Pharmacology (PhD)

Biomedical research in the Molecular Pharmacology program is focused on cutting-edge discovery of molecular and cellular mechanisms of intracellular signaling using a combination of biochemical, molecular biological, biophysical, ultrastructural, and imaging approaches. Basic research into cellular communication in health and disease is the main emphasis of the program with the added advantage of an array of translational opportunities into the development and testing of novel therapeutic agents. Applications of this common theme are directed toward research in molecular biology of cancer, neuropharmacology, cell and organ system pharmacology, signal transduction, neurodegenerative diseases and drug discovery. Formal collaborative interactions with the Pittsburgh Cancer Institute, the Center for Neuroscience, the Pittsburgh Institute for Neurodegenerative Diseases (PIND), the Division of Clinical Pharmacology, the University of Pittsburgh Drug Discovery Institute, University of Pittsburgh Structural Biology Imaging Center, the Vascular Medicine Institute and the Center for Biological Imaging provide a broad multidisciplinary approach to training in modern molecular pharmacology.

Core Courses

Apart from the general degree requirements for all Interdisciplinary Biomedical Science Graduate students, the following are core courses in the molecular pharmacology program:

MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY

MSMPHL 3360 - MOLECULAR PHARMACOLOGY

MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION

MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS

MSMPHL 3375 - NEUROPHARMACOLOGY

MSMPHL 2370 - DRUG DISCOVERY

Microbiology and Immunology (PhD)

The Program in Microbiology and Immunology (PMI) is an innovative program in graduate education that is administered through the School of Medicine of the University of Pittsburgh. The program aims to train highly motivated PhD students as self-reliant scholars in an environment where they have ready access to the breadth of expertise, approaches and sub-disciplines of microbiology and immunology. Students in this program will gain broad knowledge of diverse fields within microbiology and immunology, which is supplemented by seminars, journal clubs and laboratory rotations. The program rapidly immerses students into a research environment, and mentors them to become independent and creative scientists.

PMI brings together faculty in basic and translational sciences, including researchers from the University of Pittsburgh School of Medicine (Departments of Microbiology & Molecular Genetics and Immunology; Center for Vaccine Research; Microbiome Center), Magee-Women's Research Institute, Rangos Research Center at the Children's Hospital of Pittsburgh, and the University of Pittsburgh Cancer Center (e.g. Cancer Virology and Cancer Immunology Programs).

Faculty research interests in the PMI can be broadly divided into the following areas:

Autoimmunity

Basic immunological mechanisms

Bacteriology

Cancer immunology

Discovery and development of novel antimicrobial therapies

Host-pathogen interactions

Immunology of organ transplantation

Innate Immunity

Parasitology

Viral and bacterial pathogenesis

Virology

www.pmi.pitt.edu

Admission Requirements and Procedures

Students with at least a baccalaureate degree in biological or physical science or in mathematics, computer science or engineering are encouraged to apply. Admissions are based upon the student's academic record, letters of recommendation, previous research experience, written statement of interest and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. Applicants who have earned a bachelor's degree or a higher degree from a regionally accredited institution in the United States are exempt from submitting English language proficiency test results.

Additional information and a link to the online application can be found at <https://www.pmi.pitt.edu/admissions>

Financial Assistance

All full-time students receive a stipend, educational enrichment fund, computing and network service, and individual health insurance (with option to purchase additional family coverage) during their graduate training.

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4-6 years. Students enter the program in the summer or fall sessions, and perform four research rotations during their first year. It is expected that four rotations of seven weeks each will be performed in different laboratories of members of the PMI training faculty, but there are several circumstances where the requirement for four rotations or laboratories might be relaxed. Additional information can be found in the Student Handbook: https://www.pmi.pitt.edu/sites/default/files/KristinD-Files/Handbook_PMI%2012-8-17.pdf

A minimum of 72 credits is required for graduation with a PhD. Of these, 32 credits must come from approved courses, both required and elective course work, and 40 of these credits are taken as dissertation research

credits upon completing the comprehensive examination, to be held during the fall term of the second year and advancing to candidacy. Required course work includes the following:

MSMI 2100 - FIRST PMI LABORATORY ROTATION and

MSMI 2110 - SECOND PMI LABORATORY ROTATION (taken during fall and spring terms of the first year)

MSMI 2000 - PRINCIPLES OF MICROBIOLOGY AND IMMUNOLOGY (taken during the fall of the first year)

MSMI 2200 - COMPREHENSIVE MICROBIOLOGY: MOLECULAR VIROLOGY & MOLECULAR PATHOGENESIS and/or

MSMI 2210 - COMPREHENSIVE IMMUNOLOGY (taken during the spring of the first year)

MSMI 2250 - TA: MEDICAL MICROBIOLOGY (taken during the spring of the second and third years)

MSMI 2300 - SCIENTIFIC WRITING IN MICROBIOLOGY AND IMMUNOLOGY (taken during the summer of the first year)

MSMI 2350 - INTRODUCTION TO BIOSTATISTICS FOR MICROBIOLOGY AND IMMUNOLOGY GRADUATE STUDENTS (taken during the summer of the first year)

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH (taken during the summer of the first year)

MSMI 2450 - IMMUNOLOGY RESEARCH SEMINAR (taken every fall and spring term from the second year through graduation)

MSMI 2460 - MICROBIOLOGY AND RELATED TOPICS SEMINAR SERIES (taken every fall and spring term from the second year through graduation)

MSMI 3220 - CONTEMPORARY TOPICS - IMMUNOLOGY (taken during the fall and/or spring terms of the second and/or third years)

MSMI 3230 - MICROBIOLOGY RESEARCH IN PROGRESS (taken every fall and spring term from the second year through graduation)

Molecular Biophysics and Structural Biology (PhD)

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

Admission Requirements and Procedures

Students with at least a baccalaureate degree in physics, chemistry and mathematics or cellular and molecular biology are encouraged to apply. Admissions are based upon the student's academic record, CV, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disability.

Additional information and a link to the online application can be found at <http://www.mbsb.pitt.edu/index.php/apply-for-the-mbsb-program>.

Financial Assistance

All students receive complete financial support in the form of stipend, tuition, and health insurance.

Degree Requirements

All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first two years. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS or

MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring & summer term of the first year.

INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE - taken during the fall term of the first year

MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE or

MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE - taken during the fall term of the first year

MSMBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS or

MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS - taken during the spring term of the first year

[09763 - MOLECULAR MODELING AND COMPUTATIONAL CHEMISTRY](#) taken during the spring of the first year

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer term of the first year

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS - taken during the summer term of the first year

MSMBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOLOGY SEMINAR or

MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR - taken every fall and spring term through graduation

MSMBPH 2030 - DATA AND LITERATURE CLUB or

MOLBPH 2030 - DATA AND LITERATURE CLUB - beginning with the spring term of the first year, D&L Club is taken every fall and spring term through graduation

MSMBPH 2040 - TA: MBSB or

MOLBPH 2040 - TA: MBSB taken once in any term

Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at
<http://www.mbsb.pitt.edu/index.php/training/curriculum>.

Neurobiology/Neuroscience (PhD)

The Center for Neuroscience (CNUP) Training Program is an interschool PhD degree-granting program offered cooperatively by the School of Medicine (Neurobiology, MSNBIO) and the Dietrich School of Arts and Sciences (Neuroscience, NROSCI). The program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Brain Institute, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Conte Center for Translational Mental Health Research, Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Center for Neuroscience
E1440 Thomas E. Starzl Biomedical Science Tower
200 Lothrop Street
Pittsburgh, PA 15261
412-648-9537
Fax: 412-648-1441

<http://cnup.pitt.edu/>

argenzio@pitt.edu

Admission Requirements and Procedures

Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those who are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, test scores, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics, neuroscience, or psychology with a cumulative grade point average (GPA) of at least 3.40 (on a 4.00 scale). Applicants with a GPA below 3.0 will not be considered.

Additional information and a link to our on-line application can be found at: <http://www.cnup.pitt.edu/training/phd-program>

Financial Assistance

All students receive full stipend support and individual health benefits. This support is derived from University fellowships and numerous grants funded by the federal government and private agencies. Students in the program also have access to sponsorship on NIH training grants.

PhD Degree Requirements

<http://www.cnup.pitt.edu/training/phd-program/phd-program-requirements>

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

Core courses:

MSNBIO 2010 - SCIENTIFIC ETHICS or

NROSCI 2010 - SCIENTIFIC ETHICS

MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or

NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or

NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or

NROSCI 2102 - SYSTEMS NEUROBIOLOGY

MSNBIO 2624 - GRANT WRITING

Other requirements:

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

A list of CNUP Training Faculty may be viewed at: <http://www.cnup.pitt.edu/people/training-faculty>

A complete list of courses may be viewed at: <http://www.cnup.pitt.edu/graduate-course-list>

School of Nursing

<http://www.nursing.pitt.edu/>

The School of Nursing was established as an independent school of the University by action of the Board of Trustees in April 1939 and was opened in September of the same year. The University conferred the degree Bachelor of Science in Nursing Education for the first time in August 1939. The University conferred the first Bachelor of Science in Nursing degrees in February 1942.

The first Master's degree was awarded in 1944, and the first Doctor of Philosophy degree in 1957. The first Doctorate of Nursing Practice degree was awarded in 2008.

Mission

The University of Pittsburgh School of Nursing, founded in 1939, is one of the oldest programs in baccalaureate and doctoral education in nursing in the United States. As one of the nation's distinguished schools of nursing, the resources of the School constitute an invaluable asset for the intellectual, scientific, and economic enrichment of health care in Pennsylvania, the nation, and throughout the world.

The School of Nursing's mission is to:

- provide high-quality undergraduate education in nursing;
- maintain and develop superior graduate programs in nursing that respond to the needs of health care in general and nursing in particular within Pennsylvania, the nation, and the world;
- engage in research and other scholarly activities that advance learning through the extension of the frontiers of knowledge in health care;
- cooperate with health care, governmental, and related institutions to transfer knowledge in health sciences and health care;
- offer continuing education programs adapted to the professional upgrading and career advancement interests and needs of nurses in Pennsylvania; and
- make available to local communities and public agencies the expertise of the School of Nursing in ways that are consistent with the primary teaching and research functions and contribute to the intellectual and economic development in health care within the commonwealth, the nation, and the world.

Master's Program Admission Process and Admission Criteria

<http://www.nursing.pitt.edu/degree-programs/master-science-nursing-msn/msn-applicationadmission>

Applications are available online at www.nursing.pitt.edu. Admission criteria are described on the school's Web site (<http://www.nursing.pitt.edu/degree-programs/master-science-nursing-msn/msn-applicationadmission>). Complete applications will be reviewed and interviews (face to face or by telephone) will be conducted prior to an admission decision. The School offers master's admission to only the Clinical Nurse Leader, and Nursing Informatics areas of concentration. The application deadlines for Nursing Informatics are February 15th and May 1st. International students are advised to apply by the February 15th deadline. Complete applications received by February 15th will be reviewed and an admission decision will be made by June 1. Complete application received by the May 1st deadline will be reviewed and admission decisions made

by June 30th. The application deadlines for Clinical Nurse Leader are Fall Term admissions May 1, Spring Term admission October 1, and Summer Term admission March 1. Applicants must apply online at <https://app.applyyourself.com/?id=up-nurs>

Applications to the Master Program in nursing are reviewed by the faculty in the applicant's Major/Area of Concentration. Applicants must meet the criteria listed below. Qualified applicants are considered without regard to race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era.

Applicants must have:

- A baccalaureate degree in nursing from an ACEN (NLN), ACICS, or CCNE accredited program.
- Current RN license in U.S. state/territory or locale where student will complete clinical requirements.
- A GPA of 3.0 or higher in the undergraduate degree.
- A pre-admission interview. If the applicant resides at a great distance, a telephone interview may be conducted.
- Official scores on the Graduate Record Examination (GRE). The GRE may be waived if the GPA is 3.5 or higher.
- Pre-requisite statistics course within the last 10 years with a grade of B- or better.
- Three letters of recommendation attesting to the applicant's capacity and potential for master's study from each of the following (these can be uploaded into the online application) (/apply-now): The director or a faculty member from the most recent academic program attended (if applicant has been a nursing student in the last 5 years); a recent employer; and a person who can speak to the applicant's professional work.
- A typed essay (500-word minimum) stating your philosophy of nursing; reasons for wanting to study in a particular area of concentration; what you expect from the master's program; and your future career goals.

RN-MSN

Applicants to the RN-MSN program must graduate from a CCNE, ACICS or ACEN [NLN] accredited associate degree program or diploma school of nursing. A student may be admitted to the DNP program pending satisfactory completion of the 24 graduate bridge credits and completion of the BSN.

Doctor of Nursing Practice (DNP) Admission Process and Admission Criteria

<http://www.nursing.pitt.edu/degree-programs/doctor-nursing-practice-dnp>

Application

Pitt Nursing accepts applications for admission to all areas of the DNP Program via Apply Yourself. Each applicant must complete and submit the following:

1. A non-refundable application fee of \$50.00
2. Complete official transcripts of **all** undergraduate and graduate education (sent by the institution at which courses were taken)
3. Official GRE Scores (per Admission Criteria)
4. Three letters of professional recommendation indicating the reviewer's support of the student's ability to successfully complete a demanding graduate level academic and clinical program. At least one recommendation should come from a current or recent direct supervisor. Before you submit your application, ask your references in which form they wish to submit their recommendation -- by paper or electronically. For both paper and electronic submission of recommendation letters, please follow the instructions outlined on Apply Yourself.
5. Personal essay stating one's philosophy of nursing, reasons for wanting to study in a particular major or concentration, expectation of the DNP program, and future career goals. This should include a proposed area of interest for the DNP project.
6. Current CV or resume

Admission

You may apply to the DNP program at various points in your educational career. The school offers both *BSN to DNP* and *MSN to DNP* pathways; your choice will depend upon which degrees you previously earned and which majors/concentrations you select.

Students, who are currently enrolled in their last term of a BSN program, may apply to the BSN to DNP focus areas which do not require clinical experience beyond the BSN educational experiences. If offered admission, it would be contingent on the student's (1) successful completion of the BSN and (2) obtainment of the RN license.

BSN-prepared students, who are currently enrolled in their last term of a MSN or MS program in a related focus, may apply to the MSN to DNP. If offered admission, it would be contingent on the student's (1) successful completion of the MSN or MS in a related focus and (2) fulfillment of all admission criteria.

The University of Pittsburgh School of Nursing admits a **FALL COHORT ONLY** to all DNP Program areas of concentration except the Nurse Anesthesia BSN to DNP major which admits a **SPRING TERM COHORT** only. The application deadlines for all areas are February 15th and May 1st. International students are advised to apply by the February 15th deadline. Complete applications received by February 15th will be reviewed and an admission decision will be made by June 1. Complete application received by the May 1st deadline will be reviewed and admission decisions made by June 30th.

Applicants must apply online at <https://app.applyyourself.com/?id=up-nurs>.

Admission to the DNP Program

The DNP Program admits BSN graduates and, advanced practice nurses and nursing administrators who have completed a graduate degree in nursing from a CCNE, ACICS, or ACEN [NLN] accredited program in nursing.*

* BSN graduates with a master's in other areas may be considered for admission.

BSN to DNP

- Current RN license in U.S. state/territory or locale where student will complete clinical requirements
- ≥ 3.0 GPA in BSN (from ACEN [NLN], ACICS, or CCNE accredited program)
- GRE: Verbal & Quantitative sections (competitive scores), Analytical Writing (≥ 3)
- Pre-requisite statistics course within the last 10 years with a grade of B- or better.
- Clinical experience for select focus areas ** required or preferred for selected majors and concentrations

MSN to DNP

- Current RN license in U.S. state/territory or locale where student will complete clinical requirements
- ≥ 3.0 GPA in MSN from an accredited program or master's in related field (must have BSN from an accredited program)
- GRE: Verbal & Quantitative sections (competitive score), Analytical Writing (≥ 3)
(may be waived if MSN or master's in related field with GPA ≥ 3.5)
- Pre-requisite statistics course within the last 10 years with a grade of B- or better.
- Clinical experience for select focus areas**
- Nurse Anesthesia MSN to DNP (additional requirements)
 - 1) current Nurse Anesthetist certification in US state/territory or locale where student will complete the DNP Scholarly Project
 - 2) Minimum of 3.0 GPA in MSN or MS in Nurse Anesthesia from an accredited program

RN-DNP

Applicants to the RN-DNP program must graduate from a CCNE, ACICS or ACEN [NLN] accredited associate degree program or diploma school of nursing. A student may be admitted to the DNP program pending satisfactory completion of the 24 graduate bridge credits and completion of the BSN.

**Clinical Experience for Select Focus Areas

- **Neonatal NP:** Equivalent of 2 years full time (within last 5 years) nursing experience in the care of critically ill newborns, infants, and children in critical care inpatient settings (preferably Level III NICU) Students may enroll in pre-clinical courses while obtaining practice experience

- **Health Systems Executive Leadership:** 2 years of management experience
- **Nurse Anesthesia BSN to DNP:**
Minimum of 1 year full-time ICU/critical care nursing experience (within last 5 years) by start of program (may apply if employed in ICU/critical care and will have required experience before admission term)
- **Nurse-Midwife:** One year of nursing experience in a Labor and Delivery unit preferred, but will consider applicants demonstrating other interest/experience in women's health.

Doctor of Philosophy (PhD) Admission Process and Admission Criteria

<http://www.nursing.pitt.edu/degree-programs/doctor-philosophy-phd>

The PhD program follows a FALL TERM ONLY COHORT ADMISSIONS process. Applicants to the PhD program must submit their completed applications by February 1. Complete applications received by February 1 will be reviewed and admission decisions made prior to June 1. Application decisions (except for international applicants) will be communicated electronically (by e-mail). Applicants must apply online at <https://app.applyyourself.com/?id=up-nurs>. The School offers BSN-PhD and MSN-PhD options. Applicants are expected to be RN's. The School of Nursing also offers a currently matriculating BSN to PhD option, in which a student who has not yet completed the BSN can be admitted conditionally into the PhD program pending successful completion of their BSN. Interested applicants should contact the Student Affairs & Alumni Relations Office at 412-624-4586 for further information.

Admission to the PhD Program

Admission to the PhD program is assessed through interviews, references, standardized testing, a written statement of goals, and a second writing sample. Documentation of academic success and achievement of competitive scores on the Graduate Record Examination (GRE) taken within the last five years are required.

The doctoral faculty strongly recommends that students develop knowledge of and experience with word processing, database management, and computerized literature searches prior to applying to the PhD program.

Length of Program

The post-master's full-time student (MSN to PhD) is comprised of 48 credits minimum, and students may complete the program in approximately two and a half years depending on the nature and complexity of research for the dissertation. Twenty-four credits are granted from the prior master's program. For courses taken prior, an evaluation of the content of a course taken elsewhere must be approved by the Director of the PhD Program to determine its comparability with the coursework at the University of Pittsburgh. Students entering the MSN to PhD program will work with their academic advisor to conduct a gap analysis to review prior research-related coursework to determine if additional research core coursework is needed beyond that specified in the MSN to PhD curriculum plan. The part-time student may complete the program in three to four years. The statute of limitations for completion of the MSN to PhD track is eight consecutive calendar years from the first term of registration for credits that are in the required curriculum plan for the doctoral degree. (MSN to PhD track)

The BSN to PhD program requires 72 credits minimum. Students admitted to the BSN to PhD track are expected to enroll full-time, and the program can be completed in three years, depending on the complexity of research for dissertation. Students are also encouraged to consider obtaining a simultaneous master's degree such as the Clinical Nurse Leader. The statute of limitations for completion of the BSN to PhD track is 10 consecutive calendar years from the first term of registration for credits that are in the required curriculum plan for the doctoral degree.

For more information, see Policy 208.

Doctor of Philosophy (PhD)

Doctor of Philosophy

The Doctor of Philosophy (PhD) program prepares nurse scholars who will discover and extend scientific knowledge that advances the science and practice of nursing and contributes to other disciplines. Graduates can assume leadership roles within research teams, health care systems, and schools of nursing in academic institutions.

The PhD program of study provides a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of content, methods, and values of the discipline of nursing and its relation to other fields. The curriculum includes courses in the philosophical underpinnings and theoretical foundations for research, and research design, measurement and intervention development. Courses also include advanced statistics, advanced quantitative and qualitative methods, the responsibilities and activities of scientists, and the art and science of teaching and learning. Students work closely with research faculty members from nursing and other disciplines. Each student also participates in two mentored research experiences. The first is the Apprenticeship Practica, wherein students affiliate with a mentor's established research team over time to explore the scientific literature, develop, plan, and implement an apprenticeship research project, and disseminate findings. This experience allows for the opportunity to acquire individualized and tangible research skills within a mentored application environment which is additive to and precedes the dissertation experience. The second mentored research experience is the students development and implementation of their independent dissertation project, culminating in dissertation defense. Students prepare and submit applications for competitive research funding.

Admission of Students from Other Countries (MSN, DNP, and PhD)

Students from other countries applying to the School of Nursing should apply using the same admissions process and admissions criteria described above. The application should be completed in English and be accompanied by official academic credentials with notarized English translations. Applicants must successfully complete the TOEFL or IELTS if English is a second language. Applicants must also have a professional nursing license. The following links specify the licensure requirement for the MSN, DNP, and PhD programs. Applicants who need to apply for a professional nursing license are encouraged to visit the Pennsylvania State Board website which contains information for internationally educated nurses applying to take the NCLEX-RN examination.

Insurance and Health Care Requirements

All students admitted with full or provisional status are automatically enrolled in a University liability insurance policy annually and to have a physical examination upon admission. All admitted students are required to submit Act 33, 34 and 73 clearances completed within 3 months of admission. Individual students must meet additional health requirements of clinical agencies such as drug testing. Students must submit a completed School of Nursing's Annual Health Form each year. Current CPR certification is required prior to enrollment in all clinical courses. Students are required to carry health insurance for the duration of their study, which will cover payment for treatment and follow-up procedures related to injury or medical problems incurred during graduate study. The University of Pittsburgh makes insurance programs available to graduate students (see: <http://www.hr.pitt.edu/benefits/student-in>).

Financial Assistance

<http://www.nursing.pitt.edu/scholarship-opportunities>

The sources of awards and aid may include: professional nurse traineeships, graduate student assistant positions, graduate student researcher positions, teaching assistant positions, teaching fellow positions, school scholarships, pre- and postdoctoral training grant fellowships, federal Stafford Loans, private loans, and emergency aid.

Academic Policies

<http://www.nursing.pitt.edu/resources-students/policies>

All students in the School of Nursing are governed by School of Nursing and University policies. Therefore, it is essential that students regularly review and familiarize themselves with those policies, both general and graduate. Question about policies should be directed to the academic advisor or to their respective program, major or area of concentration director/coordinator. Policies of particular importance deal with admission criteria, registration processes, transfer of credits, acceptable academic status, warning and probation, readmission, requirements for degree completion, academic integrity, unsafe clinical performance, and impaired clinical performance.

Advising

Each new student who is admitted to the graduate program is assigned a faculty advisor from the specific major or area of concentration to which the student is admitted. The faculty advisor provides some initial orientation to the school, the University, and the program requirements. Each student meets at least once a term with the advisor for course selection and other academic advising, although students and advisors can meet additionally as needed. The advisor is actively involved if there are academic concerns.

Students also can use the staff in the Student Affairs & Alumni Relations Office in the School of Nursing to obtain information about sources of financial aid, scholarships, school policies, registration, course availability, University resources, and community resources for help with personal problems. An online general orientation program is mandatory for all new students.

General Degree Requirements

To earn the Master of Science in Nursing (MSN), the Doctor of Nursing Practice (DNP) and Doctor of Philosophy (PhD) the student must demonstrate satisfactory academic achievement in required coursework prescribed by the curriculum with an overall academic achievement of a minimum Grade Point Average (GPA) of 3.00. Successful completion of a comprehensive examination is also required for the MSN, BSN to DNP and PhD in nursing. The DNP requires a DNP project and the PhD requires successful defense of an original dissertation.

Application for Graduation

Each candidate for graduation must file an official Application for Graduation in the Nursing Student Affairs & Alumni Relations Office at least three months before the degree is to be completed, otherwise there is a fee assessment after the deadline. Students must be registered in the term in which they take their comprehensive examination. International students must be registered according to the conditions of their visa. Every student is required to be registered for at least one credit at the University in the 12 month period before graduation.

Major and Degree Options

The School of Nursing offers the following graduate degrees:

- The Master of Science in Nursing with majors and areas of concentration in the following areas:
 - Nurse Practitioner
 - Neonatal Nurse Practitioner* (no longer accepting applications as of December 2018)
 - Nurse Specialty Role
 - Nursing Administration* (no longer accepting applications)
 - Clinical Nurse Leader
 - Nursing Informatics

**not currently accepting applications*

- The Doctor of Nursing Practice (DNP)
 - MSN to DNP Options
 - Nurse Practitioner
 - Adult-Gerontology Acute Care Nurse Practitioner
 - Adult-Gerontology Primary Care Nurse Practitioner
 - Family (Individual Across the Lifespan) Nurse Practitioner
 - Pediatric Primary Care Nurse Practitioner
 - Neonatal Nurse Practitioner
 - Psychiatric Mental Health Nurse Practitioner
 - Clinical Nurse Specialist
 - Adult-Gerontology (CNS)
 - Nurse Specialty Role
 - Health Systems Executive Leadership
 - Nurse Anesthesia

- BSN to DNP Options
 - Nurse Practitioner
 - Adult-Gerontology Acute Care Nurse Practitioner
 - Adult Gerontology Primary Care Nurse Practitioner
 - Family (Individual Across the Lifespan) Nurse Practitioner
 - Pediatric Primary Care Nurse Practitioner
 - Neonatal Nurse Practitioner
 - Psychiatric Mental Health Nurse Practitioner
 - Clinical Nurse Specialist
 - Adult-Gerontology (CNS)
 - Nurse Anesthesia
 - Nurse-Midwife

The Doctor of Philosophy (PhD) in Nursing (including the BSN to PhD and MSN to PhD options.)

**not currently accepting applications*

Special Academic Opportunities/Programs

The School of Nursing offers a variety of special programs within its master's and doctoral programs:

Minors

Students in the Master's program, the DNP program and the PhD program have the option of completing a minor in nursing education, nursing informatics, nursing research, nursing administration, and gerontology for nurse practitioners, or health care genetics. The minimum credits required to obtain a minor is 9-12 credits.

Post-Professional Certificates

Post-Professional certificates are available in nursing education, health care genetics, nursing informatics, nursing research, gerontology for nurse practitioners, adult-gerontology acute care nurse practitioner, neonatal nurse practitioner, and psychiatric mental health nurse practitioner. The certificate options require a minimum of 15 credits; additional credits may be required depending on the certificate program and previous graduate course work. All students admitted to a nurse practitioner certificate programs must meet all curriculum requirements of the full graduate degree program, either through previous course work or credits earned during the certificate program. Individual review of transcripts will determine the exact number of credits needed to meet curriculum requirements.

Admission criteria for master's level certificate programs include:

Evidence of successful completion of MSN, DNP or other relevant first professional degree
 Relevant work experience
 Three letters of recommendation
 Satisfactory interview with program faculty
 Current RN license if the certificate program includes clinical experiences.

School of Nursing Faculty

School of Nursing Faculty

Program and Course Offerings

Certificate

Adult-Gerontology Acute Care Nurse Practitioner Certificate

Post-Professional Adult-Gerontology Acute Care Nurse Practitioner

This non-degree certificate is designed for nurse practitioners or clinical nurse specialists with a previous Master of Nursing or Doctor of Nursing Practice who are seeking to expand their roles via nurse practitioner certification in Adult-Gerontology Acute Care. The total credits required are 24.

Overview

The Adult-Gerontology Acute Care Nurse Practitioner (AG-ACNP) Post-Professional Certificate is designed for graduate prepared Nurse Practitioners (NP) or Clinical Nurse Specialists (CNS) who are seeking to expand their roles via nurse practitioner certification in Adult-Gerontology Acute Care. The curriculum prepares nurse practitioners to function as generalist, principal providers of care for adults and older adults with acute, critical and complex chronic health problems across the continuum of acute care services.

AG-ACNP students may choose a clinical emphasis in cardiopulmonary, critical care, oncology, trauma emergency preparedness or directed study. The directed study allows students to design clinical experiences around a particular area of interest (i.e. internal medicine, general surgery). The curriculum consists of NP and AG-ACNP specialty courses and clinical practice hours.

Graduates of the AG-ACNP Post-Professional Certificate are eligible to sit for the national certification examination in Adult-Gerontology Acute Care offered by the American Nurses Credentialing Center or American Association of Critical Care Nurses. Successful passing of the national certification examination entitles the graduate to apply for certification as a Certified Registered Nurse Practitioner (CRNP) in Adult-Gerontology Acute Care by the State Board of Nurse Examiners of the Commonwealth of Pennsylvania.

Curriculum Format

- Course work may be completed in 3 terms
- 540 clinical hours**
- Online or onsite
- Students are required to attend 2 onsite laboratory intensives - 2 days in the Summer term and 1 day in the Fall term. Each student will be responsible for the room and board cost during the lab intensives.
- Online students will need to arrange for clinical placements and appropriate physician or nurse practitioner preceptors. An Affiliation Agreement between the University and the clinical site is required before clinical hours can begin.

Program Outcomes

Graduates of the AG-ACNP Post-Professional Certificate are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining and restoring health to acutely/critically or complex chronically ill adults and older adults
- Identify health risks, promote wellness, and diagnosis and manage acute and chronic illness
- Participate in multi-disciplinary research and provide leadership in mobilizing health services

Admission Criteria

- Valid registered nurse license in state where clinical experiences are performed
- Minimum of one year nursing experience recommended
- BSN required
- Previous MS, MSN or DNP as a NP or CNS (from accredited program (ACEN, NLN, ACICS, or CCNE)
- GPA ≥ 3.0 in the MS, MSN or DNP degree
- Pre-admission interview
- Complete online application
- *International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu*
- Spring Term Admission Only

Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified on-site students as per Policy

438

Curriculum (subject to change)

- NUR 2044 - NURSING GRADUATE ORIENTATION MODULE
- NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
or
- NURNP 2100D - MANAGEMENT OF ADULT WITH EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY
- NURNP 2101 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE CLINICAL *
- NUR 2680 - INTRODUCTION TO GENETICS AND MOLECULAR THERAPEUTICS
or
- NUR 2680D - INTRODUCTION TO GENETICS AND MOLECULAR THERAPUTICS
- NURNP 2104 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
or
- NURNP 2104D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT
- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
or
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2102 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2
or
- NURNP 2102D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2
- NURNP 2028 - ROLE PRACTICUM *

Choose one of the following: (3 cr. each)

- NURNP 2105 - CLINICAL EMPHASIS - CARDIOPULMONARY
- NURNP 2106 - CLINICAL EMPHASIS - CRITICAL CARE
- NURNP 2107 - CLINICAL EMPHASIS - ONCOLOGY
- NURNP 2109 - CLINICAL EMPHASIS - DIRECTED STUDY
- NURNP 2194 - CLINICAL EMPHASIS: TRAUMA EMERGENCY PREPAREDNESS

Note

Successful completion of the AG-ACNP Specialty Comprehensive Exam is required.

* Dependent on the individual's previous role, population of patients and years of experience, up to 300 clinical hours may be completed through the option of credit by course examination."

The total credits required will vary based on evaluation of the student's previous coursework. Additional coursework may be required and/or credit may be given for previous coursework that meets the core curriculum requirements.

Total Credits: 24

Certificate in Gerontology for Nurse Practitioners

The Post-Professional Certificate in Gerontology for Nurses Practitioners is a non-degree certificate designed for graduate-prepared Family, Adult Primary Care, Psychiatric Mental Health Primary Care, and Adult Acute Care Nurse Practitioners who seek to increase their formal education as a principal provider of primary health care in the care of older adults.

The curriculum includes a total of 15 credits; nine (9) credits of core advanced nursing practice and six (6) approved elective credits. The core advanced nursing practice courses are specifically designed to enable the Nurse Practitioner to increase their capacity in the complex care of older adults. The curriculum includes a clinical practicum to provide students with the opportunity to synthesize and integrate concepts learned in the delivery of primary health care to older adults across a variety of settings.

Students will select six (6) credits of elective courses related to their career goals or interests (taught through other departments).

Upon successful completion of all requirements students will receive a Certificate in Gerontology for Nurse Practitioners. Certificate in Gerontology for Nurse Practitioners will appear on the student transcript.

Graduates will increase their marketability across health care settings with expertise in geriatrics and will enhance their clinical practice to better meet the complex health care needs of our aging population.

Curriculum Format

- 100% online delivery (no onsite campus requirements)
- Part time (2-3 terms)
- 15 credits (includes 180 practicum hours in student's locale)
- Fall term admission

Program Outcomes

Graduates of the Certificate in Gerontology for Nurse Practitioners will be prepared to:

- Apply advanced knowledge about gerontology and geriatrics, and specialized knowledge of aging and the aging process
- Bring expertise to the NP role that includes the diagnosis and management of acute, chronic, and preventive health care needs of the older adult population
- Collaborate with and lead inter-disciplinary health care teams in the care of older adults.

Admission Criteria

- Current RN license in U.S. state/territory where student will complete practicum requirement
- ≥ 3.0 GPA in MSN or DNP as a Family, Adult Primary Care, Psychiatric Mental Health Primary Care, or Adult Acute Care NP program from ACEN, NLN, ACICS, or CCNE accredited program
- Pre-admission interview
- Short essay

Core Advance Nursing Practice (Required): 9 Credits

- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
- NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
- NURNP 2528 - SEMINAR IN GERIATRIC CARE
- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Electives: 6 Credits

Choose two courses from the following:

- GERON 2001 - ETHICS AND AGING
- GERON 2002 - PREVENTION AND HEALTHY AGING
- GERON 2004 - MENTAL HEALTH AND MENTAL ILLNESS IN LATE-LIFE
- GERON 2005 - PERSPECTIVES IN AGING

- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING
- GERON 2009 - AGING AND COMMUNICATION

Course Offerings

Fall Term

- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
Elective Options:
- GERON 2001 - ETHICS AND AGING
- GERON 2004 - MENTAL HEALTH AND MENTAL ILLNESS IN LATE-LIFE
- GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING

Spring Term

- NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
- NURNP 2528 - SEMINAR IN GERIATRIC CARE
Elective Options:
- GERON 2002 - PREVENTION AND HEALTHY AGING
- GERON 2005 - PERSPECTIVES IN AGING
- GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA

Summer Term

- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM
Elective Options:
- GERON 2009 - AGING AND COMMUNICATION

Certificate in Health Care Genetics

Genetic based health care is routinely becoming a part of daily health care, having major impacts on patient diagnosis, prognosis and treatment. The Certificate in Health Care Genetics is designed for health care workers who are seeking focused, graduate-level education in the specialty of genetics. Knowledge gained through coursework will enable healthcare workers to better care for and educate their patients..

Admission Criteria

- Healthcare worker with a Bachelor's or Master's Degree
- GPA ≥ 3.0 in the Bachelor's or Master's Degree
- Pre-admission interview
- Complete online application
- International applicants
- Fall, Spring, Summer Term Admission

Curriculum

The curriculum includes courses in genetics (taught through the School of Nursing) and choice of 3 courses related to the student's career goals or interests (taught through other departments in the Schools of the Health Sciences). Learning experiences may be enriched through Clinical Genetics Case Conferences, Human Genetics Research Seminar, Human Genetics Journal Club, Genetics Grand Rounds, and a Research Practicum in a molecular genetics laboratory.

- Full-time or Part-time (~ 3 terms)
- Electives (per approval of Coordinator) **9 cr.**
- NUR 2680 - INTRODUCTION TO GENETICS AND MOLECULAR THERAPEUTICS
- NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 15

Program Outcomes

Graduates of the Certificate in Health Care Genetics are prepared to:

- Guide patients in their understanding of the genetic basis of disease as well as providing patient education and guidance in the areas of available genetic testing, interpretation of testing, recurrence risks, and genetic based therapies
- Provide advocacy for patients and families with genetic conditions
- Utilize family histories to determine disorders for which the patient is at risk
- Utilize a variety of resources to stay up to date with advances in genetic based medicine
- Determine when patient referral to a genetic professional is required
- Utilize a variety of resources to provide patients and their families with support mechanisms
- Interpret genetic research findings

Neonatal Nurse Practitioner Certificate

The Neonatal Nurse Practitioner (NNP) Post-Professional Certificate is designed for graduate prepared nurse practitioners who are seeking to expand their roles via nurse practitioner certification in neonatal critical care. The NNP is prepared to manage the health care of high-risk infants, their families and children up to 2 years of age. This expanded role is performed in collaboration with neonatologists and other pediatric clinicians. NNPs are primarily employed in neonatal intensive care units (NICUs) and are involved in coordinating and managing care for infants with chronic health problems and providing continuity for these children from hospital to home.

The NNP curriculum provides students with course work and clinical experiences focusing on the care and management of critically ill and convalescent premature and full-term infants. The sequence of courses provides for a logical building of the clinical decision making skills necessary to function as a NNP. Clinical experiences may be in a variety of clinical settings which include newborn nurseries, intensive care nurses of various levels and out-patient clinics.

Graduates are prepared to perform acts of medical diagnosis and prescribe medical therapeutics and corrective measures. In addition, the NNP selects and performs clinically advanced diagnostic and therapeutic invasive procedures on newborns in the intensive care setting.

Graduates are eligible for both legal certification as a Certified Registered Nurse Practitioner (CRNP) and prescriptive authority by the Commonwealth of Pennsylvania, as well as other states and national professional certification as an NNP offered by the National Certification Corporation.

Curriculum Format

- Full-time or Part-time (length depends on prior academic preparation)
- 600 clinical hours (minimum)

Program Outcomes

Graduates of the Post-Professional NNP area of concentration are prepared to accomplish the following:

- Assume responsibility for promoting, maintaining, and restoring health to infants from the newborn period up to 2 years of age
- Identify health risks, promote wellness, and diagnosis and manage acute and chronic illness
- Participate in research and provide leadership in mobilizing health care resources in the community

Admission Criteria

- MSN or DNP preparation as a nurse practitioner
- A baccalaureate degree in nursing from accredited program (ACEN, NLN, ACICS, or CCNE)
- Valid registered nurse license in state where clinical experiences are performed
- Equivalent of 2 year full-time, recent (within past 5 years) practice experience as a registered nurse in the care of critically ill newborns, infants or children in critical inpatient settings, primarily in Level III or IV NICU. Applicants must have acquired this experience or be currently employed in the indicated settings
- Competitive GPA from graduate nursing degree
- Official GRE scores (may be waived if GPA from graduate nursing degree was ≥ 3.5)
- Prerequisite statistics course
- Pre-admission interview
- Complete online application
- *International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu*

Curriculum

- NURNP 2028 - ROLE PRACTICUM
- NURNP 2570 - COMPREHENSIVE NEONATAL ASSESSMENT THEORY
- NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY
- NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL
- NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY
- NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY

Total Credits: 25 (minimum)

The total credits required will vary based on evaluation of the student's previous coursework.

Nursing Education Certificate

The Post-Professional Certificate in Nursing Education combines didactic courses and two field-based preceptorships in settings and roles of the student's interest. The curriculum prepares students to apply instructional theory and research in the following types of educational settings and roles: schools of nursing, health care agency staff development, continuing education departments, advanced practice nursing and patient and community education agencies. The Minor in Nursing Education is also available to University of Pittsburgh School of Nursing graduate students. Students should consult with their academic advisor.

Graduates may be eligible for the Certified Nurse Education Exam offered by the National League of Nursing (NLN) (Note: visit the NLN website at www.nln.org for eligibility requirements)

Program Outcomes

Graduates of the Post-Professional Certificate in Nursing Education are prepared to:

- design current, progressive nursing education programs using research and theories of learning instruction, curriculum, evaluation and measurement.
- utilize a variety of teaching strategies and media appropriate to learner characteristics, instructional objectives, and nursing or health-related content.
- plan the learning activities of individuals and groups of students in clinical and didactic settings.
- guide the performance of learners in settings where nurses function as educators for nurse colleagues, students, patients, families, and communities.

- apply principles of measurement and evaluation to the development of learner assessment procedures for didactic and educational instruction.
- utilize computer technology and educational informatics as integral components of nursing education and training.
- articulate the role of the nurse educator within the health professions, schools of nursing, and community.
- perform the role of education consultant in settings where nurses, patients, families, and communities participate in education activities.

Admission Criteria

- Valid registered nurse license in state where clinical experiences are performed
- GPA ≥ 3.0 in MSN or DNP Degree (from accredited program (ACEN, NLN, ACICS, or CCNE)
- Pre-admission interview
- Complete online application
- International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu
- Fall, Spring, Summer Term admission

Curriculum

- Elective (per approval of Coordinator) **3 cr.**
- NURSP 2071 - DESIGN AND PROCESS OF INSTRUCTION
- NURSP 2072 - MEASUREMENT AND EVALUATION
- NURSP 2073 - PRACTICUM 1 IN NURSING EDUCATION: TEACHING AND LEARNING ASSESSMENT
- NURSP 2074 - PRACTICUM 2 IN NURSING EDUCATION: EDUCATIONAL PROGRAM MANAGEMENT

Total Credits: 15

Nursing Informatics Certificate

The Post-Professional Certificate in Nursing Informatics is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems that support, enhance and manage patient care. Informatics nurses are involved in practice, education, research, administration, and consultation and can work in public, private, or corporate settings. Career opportunities for graduates of this specialty are numerous.

The curriculum includes course work in introduction to informatics, clinical information systems, and project management. Practicums are designed to enhance the students' knowledge and skill set through active participation in a selected informatics role.

Curriculum Format

- Part-time (~ 4 terms)
- 240 practicum hours (minimum)
- 15 course credits
- Online only

Program Outcomes

Graduates of the Post-Professional Certificate in Nursing Informatics are prepared to:

- Analyze clinical information systems for adoption by healthcare systems
- Manage projects in a multidisciplinary integrated healthcare informatics environment
- Consult with companies in the design of healthcare information systems
- Plan and develop informatics applications for telehealth, consumer health, and community-based care.

Admission Criteria

- Valid registered nurse license in state where clinical experiences are performed
- 3.0 or higher in MSN, DNP or higher nursing degree (from accredited program (ACEN, NLN, ACICS, or CCNE)
- Satisfactory resume
- Pre-admission interview
- Complete online application
- *International applicants: see Pitt's Office of International Services*
- Fall Term Admission

Admission of International Applicants

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

Curriculum

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT
- NURSP 2085 - NURSING INFORMTCS PRACTICUM 1
- NURSP 2086 - NURSING INFORMTCS PRACTICUM 2

Total Credits: 15

Nursing Research

The online Certificate in Nursing Research is a non-degree certificate for nurses with a Bachelor's degree who are seeking a focus on research as well as current graduate students and nurses with a Masters or DNP degree. This certificate particularly targets nurses interested in advancing their knowledge and skills as clinical research coordinators and quality assurance managers. The curriculum builds upon the students' existing research knowledge and skills and enhances their expertise to conduct and coordinate clinical research studies following federal regulations and Good Clinical Practice (GCP). Graduates broaden their marketability in a variety of clinical research settings.

Graduates of the Certificate in Nursing Research are eligible for National Certification as a Certified Clinical Research Coordinator by the Association of Clinical Research Professionals (ACRP) after successful completion of the Clinical Research Coordinator (CRC) Certification Exam. (*Note: clinical research coordinator experience is required for the exam.*)

Admission Criteria

- Valid registered nurse license in state where clinical experiences are performed
- ≥ 3.0 GPA in BSN from accredited program (ACEN, NLN, ACICS, or CCNE)
- Minimum of one year nursing experience recommended
- Official GRE scores (may be waived if GPA ≥ 3.5)
- Prerequisite statistics course
- Pre-admission interview
- Complete online application
- International applicants

Admission of International Students

Applications from international students are reviewed according to the admission criteria stated above, and admissions deadlines for all programs are available online. The on-line application must be completed in English. See the School of Nursing International Applicants page for specific admission requirements for international applicants.

Curriculum Format

- Part-time (~ 5 terms)
- Fall, Spring, Summer Term admission
- Online

Curriculum

- Elective (approval by Coordinator, Nursing Research Concentration **3 cr.**)
- Module CITI Biomedical Responsible Conduct of Research **0 cr.**
- Module CITI Biomedical Human Subjects Research **0 cr.**
- Module CITI Conflicts of Interest **0 cr.**
- Module CITI Good Clinical Practice **0 cr.**
- Module CITI Clinical Research Coordinator **0 cr.**
- Module CITI Privacy and Information Security **0 cr.**
- Module ISER Responsible Literature Searching **0 cr.**
- NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
- NUR 2008 - ETHICS FOR ADVANCED PRACTICE NURSING
- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

- NUR 2800 - COORDINATING CLINICAL TRIALS
- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2388 - DATABASE MANAGEMENT

Note

Graduates of the Certificate in Nursing Research are prepared to accomplish the following:

- Conduct and coordinate clinical studies sponsored by the federal government, industry, and foundations for phase I, II, and III studies of drugs, devices, and biologics as well as behavioral interventions across the lifespan
- Pursue employment as quality assurance managers, clinical research coordinators or monitors in Schools of the Health Sciences, Pharmaceutical Companies, Clinical Research Organizations, Institutional Review Boards, Education and Compliance Offices, and other research settings

Total Credits: 16

Psychiatric Mental Health Nurse Practitioner Certificate

The Psychiatric Mental Health Nurse Practitioner Post-Professional Certificate is designed for graduate prepared Nurse Practitioners (NP) or Clinical Nurse Specialists (CNS) who are seeking to expand their roles via nurse practitioner certification in Psychiatric Mental Health Care.

The curriculum includes foundational and psychiatric care content providing students with the advanced practice skills to effectively manage persons with psychiatric disorders across the lifespan. Emphasis is placed on psychobiologic diagnosis and treatment, including psychotherapies for these individuals and their families to promote mental health and prevent subsequent mental disorders.

Clinical experiences are designed so that students provide comprehensive management to psychiatric clients with mental illness in intensive and varied clinical experiences. Culminating clinical management practice provides students with the opportunity to synthesize and integrate concepts from primary health care with their psychiatric knowledge base.

Graduates are eligible for national certification offered by the American Nurses Credentialing Center (ANCC) and legal certification as a CRNP and prescriptive authority through the State Board of Nursing of the Commonwealth of Pennsylvania.

Curriculum Format

- Full-time or Part-time (length depends on prior academic preparation)
- 640 clinical hours (length depends on prior academic preparation)

Program Outcomes

Graduates of the PMHNP are prepared to accomplish the following:

- Provide comprehensive care to psychiatric clients
- Conduct psychotherapies for psychiatric clients and their families

Admission Criteria

- Valid registered nurse license (all students must obtain a Pennsylvania license)
- Previous MS or MSN as a NP or CNS (from accredited program (ACEN, NLN, ACICS, or CCNE)
- GPA ≥ 3.0 in the MS or MSN degree
- Official GRE scores (may be waived if GPA ≥ 3.5)
- Minimum of one year nursing experience recommended
- Prerequisite statistics course (within 10 years) with a grade of B- or higher
- Pre-admission interview
- Complete online application
- International applicants: see www.nursing.pitt.edu and www.ois.pitt.edu
- Rolling admissions

Curriculum

*Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified on-site students as per Policy 438.

- NURNP 2026 / NURNP 2026D - ROLE SEMINAR 1*
- NURNP 2029 / NURNP 2029D - ROLE SEMINAR 2*

Joint Degree

Public Policy and Management/Doctor of Nursing Practice, MPPM/DNP

MASTERS OF PUBLIC POLICY AND MANAGEMENT IN THE GRADUATE SCHOOL OF PUBLIC AND INTERNATIONAL AFFAIRS (GPSIA) AND THE DOCTOR OF NURSING PRACTICE HEALTH SYSTEMS EXECUTIVE LEADERSHIP (HSEL) IN THE GRADUATE SCHOOL OF NURSING

There is a real and increasingly urgent need for nursing professionals to have a strong understanding of nonprofit management techniques and international development strategies, particularly if they seek employment in not-for-profit hospital systems or charitable organizations that provide health care services to underdeveloped communities at home or abroad.

The University of Pittsburgh is uniquely positioned to train leaders for such positions. GPSIA is nationally renowned as a center for the study of international development, human rights, poverty, and the administration of nonprofit organizations. The School of Nursing is consistently ranked as one of the leading schools of its type in the world, and nurses seek out its graduate programs as a credential of choice to advance their careers.

The intention of this joint degree program is to enable students who are in the process of acquiring professional training as health care executive leaders to obtain simultaneously a substantial knowledge of public and nonprofit management tools and techniques that will be useful to them in their careers leading healthcare organizations.

Students will be informed of the joint degree option upon interview, and they will be able to enter the joint program at any time during their course of study. Students in the DNP program move between full- and part-time enrollment depending on concurrent employment demands, this will continue to be facilitated in the School of Nursing. The joint program between the MPPM program in GPSIA and the HSEL DNP program in the School of Nursing is offered both on-campus and as a distance learning option.

Applicants will apply separately to both schools, and they must meet all of the usual admissions requirements for both. The schools will make their admissions decisions independently. Any applicant accepted to both schools will have the option of pursuing the joint degree. Applicants may apply to both schools at the same time. Students enrolled in the MPPM program may apply to the DNP before completing their first 24 credits at GPSIA. Students enrolled in the DNP may apply to GPSIA before completing their first 24 credits at the School of Nursing.

Students may apply to GPSIA at www.gspia.pitt.edu. A complete application to the MPPM program at GPSIA consists of a personal statement, resume, two letters of recommendation, and transcripts showing prior undergraduate and graduate-level work. Successful MPPM candidates must have at least five years of full-time work experience in positions with some management or budgetary responsibility.

Students may apply to SON DNP HSEL at www.nursing.pitt.edu/degree-programs/doctor-nursing-practice-dnp/dnp-admission. A complete application to the DNP HSEL program at the SON consists of a personal essay stating one's philosophy of nursing, reasons for wanting to study in a particular major or concentration, expectation of the DNP program, and future career goals. This should include a proposed area of interest for the DNP project, current CV or resume, three letters of professional recommendation indicating the reviewer's support of the student's ability to successfully complete a demanding graduate level academic and clinical program, official transcripts showing prior undergraduate and graduate-level work, and official GRE Scores (per Admission Criteria).

Candidates for the joint degree program must have at the time of admission at least 5 years of full time work experience in positions with supervisory or budgetary responsibility as defined in the GSPIA MPPM admission requirements.

Sample Curriculum Plan

A sample curriculum plan of the joint program is outlined below.

NOTE: Actual courses and sequencing may vary.

Year 1: Fall Term

- NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY
- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE
- NUR 3012 - PUBLIC POLICY IN HEALTH CARE

Year 1: Spring Term

- NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1
- NUR 3013 - ETHICS IN HEALTHCARE

Year 1: Summer Term

- NUR 3031 - METHODOLOGIES FOR DNP PROJECTS
- NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Year 2: Fall Term

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- GSPIA Elective

Year 2: Spring Term

- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION

Year 2: Summer Term

- PIA 2024 - ECONOMICS FOR PUBLIC AFFAIRS
- GSPIA Elective

Year 3: Fall Term

- PIA 2896 - MPPM POLICY SEMINAR

- GSPIA Elective

Year 3: Spring Term

- NURSP 2388 - DATABASE MANAGEMENT
- NUR 3032 - DATA ANALYSIS FOR DNP PROJECTS

Year 3: Summer Term

- Introduction to Informatics
- DNP Residency
- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 3097 - DNP RESIDENCY: ADMINISTRATION

Year 4: Fall Term

- NURSP 3096 - DATA ANALYTICS AND CLINICAL SYSTEMS DESIGN
- NURSP 3094 - EVIDENCE-BASED MANAGEMENT AND QUALITY IMPROVEMENT

Year 4: Spring Term

- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NURSP 3092 - LEADERSHIP IN COMPLEX SYSTEMS

Year 4: Summer Term

- NURSP 3097 - DNP RESIDENCY: ADMINISTRATION
- NUR 3037 - DNP PROJECT CLINICAL

37 Credits SON; 24 Credits GSPIA = Total 61 credits for Joint Degree

NOTE: PIA 2020 meet the School of Nursing requirements for NURSP 2061.

PIA 2024 meets the School of Nursing requirements for NURSP 2091.

Master's

Masters Neonatal Nurse Practitioner

Nurse Practitioner Major

<http://nursing.pitt.edu/degree-programs/master-science-nursing-msn/msn-program-majors/neonatal-nurse-practitioner-nnp>

We are no longer accepting admissions to the MSN Neonatal Nurse Practitioner Program, as of December 31, 2018. Applicants interested in becoming a neonatal nurse practitioner who have an earned BSN are encouraged to apply to the Doctor of Nursing Practice (DNP) Neonatal Nurse Practitioner BSN to DNP Concentration program. Those with and earned MSN as a neonatal nurse practitioner may add the DNP degree by applying to the Neonatal Nurse Practitioner MSN to DNP Concentration .

The Neonatal Nurse Practitioner (NNP) is prepared to manage the health care of high-risk infants within families and children up to 2 years of age. This expanded clinician role is performed in collaboration with neonatologists and other pediatric clinicians. Graduates assume leadership roles in a

variety of clinical settings including intensive care nurseries of various levels, newborn nurseries and high-risk follow-up clinics. Course work and clinical experiences focus on the care and management of critically ill and convalescent premature and full-term infants. Graduates select and perform diagnostic and therapeutic invasive procedures on newborns in the intensive care setting. Students are also prepared to participate in research.

The NNP area of concentration offers both full and part time study on the main campus in Pittsburgh. A post master's option is also available. Selected core courses may be transmitted to distance students (additional fees apply). Graduates are eligible to take the NNP certification examination offered by the National Certification Corporation (NCC) and for legal certification as a CRNP and prescriptive privileges through the State Board of Nursing of the Commonwealth of PA.

Applicant Requirements

A baccalaureate degree in nursing from a CCNE, ACICS or ACEN [NLN] accredited program in nursing An RN-Option, Early Admission to MSN/DNP is available for this Area of Concentration. Other requirements for admission include an application, transcripts, professional references, an essay, a resume/CV, a prerequisite statistics course within the last 10 years with a grade of B- or better, and a copy of a current license to practice nursing in a state or territory of the United States. All students must obtain a Pennsylvania license prior to beginning clinical courses. Official scores on the Graduate Record Examination (GRE).The GRE may be waived if the BSN GPA IS 3.5 or higher.

Relevant clinical experience: Equivalent of 2 year full time recent (within past 5 years) practice experience as a registered nurse in the care of critically ill newborns, infants, or children in critical care inpatient settings , primarily Level III or IV NICU is required before a student begins the clinical courses

NNP Full-Time Sample Curriculum Plan:

or
- NUR 2032D - DIFFERENTIAL DIAGNOSIS CLINICAL
- NUR 2033 - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN
or
- NUR 2033D - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN
- NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY
- NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL

Spring Term (YR 2)

- NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY
- NURNP 2028 - ROLE PRACTICUM
- NURSP 2098 - HEALTHCARE QUALITY

Summer Term (YR 2)

- NUR 2008 - ETHICS FOR ADVANCED PRACTICE NURSING
- NUR 2009 - LEADERSHIP AND HEALTHCARE SYSTEMS: POLICY, ORGANIZATION, AND FINANCING OF HEALTH CARE
- NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY
- NURNP 2028 - ROLE PRACTICUM
- NURNP 2029 - ROLE SEMINAR 2
or
- NURNP 2029D - ROLE SEMINAR 2
- Comprehensive Exam

Total Credits: 58

* Courses with a "D" are delivered synchronously via distance education for qualified students per Policy 438

Nurse Specialty Role

- Clinical Nurse Leader Concentration
- Nursing Administration Concentration
- Nursing Informatics Concentration

Minor

Gerontology Minor for Nurse Practitioners

A 9-credit Gerontology Minor for Nurse Practitioners (NP) can be obtained by DNP students who are enrolled in the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) DNP or the Psychiatric Mental Health Nurse Practitioner (PMHNP) DNP area of concentration.

The Nurse Practitioner functions in an expanded role that includes the diagnoses and management of health care needs of a specific population and this curriculum will prepare the Nurse Practitioner to develop expertise in the care of older adults. The gerontology courses are specifically designed to address the needs of the older adult in regard to the common geriatric syndromes, geriatric economic and social issues and the unique presentation of disease. Content includes an emphasis on chronic conditions, multi-morbidity, and internal medicine.

The diagnosis and management of these conditions will be emphasized in keeping with the role of the Nurse Practitioner. The courses were designed using national standards for nurse practitioner education through a combination of didactic and clinical learning experiences.

The Gerontology Minor is a 9 credit curriculum available to DNP students currently enrolled in the Family (Individual Across the Lifespan) Nurse Practitioner (FNP) DNP or Psychiatric Mental Health Nurse Practitioner (PMHNP) DNP programs who want to increase their knowledge and expertise related to the diagnosis and management of health care needs in the care of older adults.

Curriculum Format

- ~ 3 Terms
- Onsite
- 180 Practicum Hours

Program Outcomes

Graduates of the Gerontology Minor are prepared to accomplish the following:

- Provide comprehensive, evidence-based geriatric focused care for elderly patients and their caregivers based on physical, mental, emotional and functional changes
- Practice culturally sensitive care in regard to ethnicity, religion, gender and socio-economic status
- Identify available community resources to promote health, safety, function and independence
- Provide leadership to other members of the interdisciplinary team that is focused on the needs and wishes of the patient
- Assume the role of advocate for patients and caregivers in regard to access and transitions within the health care system

Curriculum: Gerontology Minor (subject to change)

- NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY
or
- NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH
- NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
or
- NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES
- NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM
- NURNP 2528 - SEMINAR IN GERIATRIC CARE

Total Credits: 9

*Courses with a "D" can be delivered synchronously via distance technology. Such courses are open only to qualified on-site students as per Policy 438.

Health Care Genetics Minor

Genetic based medicine is routinely becoming a part of daily health care, having major impacts on patient diagnosis, prognosis and treatment. The curriculum is designed for health care workers who are seeking focused, graduate-level education in the specialty of genetics. Knowledge gained through coursework will enable healthcare workers to better care for and educate their patients.

The Minor in Health Care Genetics is available to enrolled University of Pittsburgh graduate students. Students should consult with their academic advisor. The Minor includes courses in genetics (taught through the School of Nursing) and choice of 2 courses related to the student's career goals or interests (taught through other departments in the Schools of the Health Sciences). Learning experiences may be enriched through Clinical Genetics Case Conferences, Human Genetics Research Seminar, Human Genetics Journal Club, Genetics Grand Rounds, and a Research Practicum in a molecular genetics laboratory.

Curriculum Format

- Full-time or Part-time (~ 3 terms)

Program Outcomes

Graduates of the Minor in Health Care Genetics are prepared to accomplish the following:

- Guide patients in their understanding of the genetic basis of disease as well as providing patient education and guidance in the areas of available genetic testing, interpretation of testing, recurrence risks, and genetic based therapies
- Provide advocacy for patients and families with genetic conditions
- Utilize family histories to determine disorders for which the patient is at risk
- Utilize a variety of resources to stay up to date with advances in genetic based medicine
- Determine when patient referral to a genetic professional is required
- Utilize a variety of resources to provide patients and their families with support mechanisms
- Interpret genetic research findings

Admission Criteria

- GPA \geq 3.0 in current graduate program

Curriculum

- Electives (per approval of Coordinator) **6 cr.**
- NUR 2680 - INTRODUCTION TO GENETICS AND MOLECULAR THERAPEUTICS
- NUR 2681 - ADV TOPICS IN HUMAN GENETICS

Total Credits: 12

Nursing Administration

The Minor in Nursing Administration is available to enrolled University of Pittsburgh School of Nursing graduate students pursuing education in advanced clinical specialty roles who want the opportunity to also obtain knowledge and experience pertinent in management and leadership. Students should consult with their academic advisor. The minor will prepare nurses to assume positions as advanced practice nurses with some management and/or leadership responsibility.

The curriculum focuses on management in complex social and operational systems for healthcare delivery. Attention is given to applying role-related knowledge and skills in diverse settings and populations, including acute care, long term care, psychiatric, and community settings. The culminating practicum is a uniquely designed mentored clinical experience that provides students with an opportunity to experience a leadership role.

Curriculum Format

- Part-time (~ 2 terms)
- 180 Clinical hours

Program Outcomes

Graduates of the Minor in Nursing Administration are prepared to accomplish the following:

- Assume leadership for clinical initiatives and outcomes within their area of clinical focus
- Develop a business case for change within their area of clinical focus

Curriculum

* These courses are available via distance education for qualified students per Policy 438

- NURSP 2061 / NURSP 2061D - ORGANIZATION & MANAGEMENT THEORY*
- NURSP 2091 / NURSP 2091D - FINANCE AND ECONOMICS FOR HEALTH CARE LEADERS*
- NURSP 2092 / NURSP 2092D - LEADERSHIP DEVELOPMENT*
- NURSP 2064 - NURSING ADMINISTRATION SEMINAR AND PRACTICUM

Nursing Education

The Minor in Nursing Education combines didactic courses and two field-based preceptorships in settings and roles of the student's interest. The curriculum prepares students to apply instructional theory and research in the following types of educational settings and roles: schools of nursing, health care agency staff development, continuing education departments, advanced practice nursing, and patient and community education agencies. The Minor is available to enrolled University of Pittsburgh School of Nursing graduate students. The minor involves the completion of a minimum of 12 credits of coursework. Students should consult with their academic advisor.

Graduates may be eligible for the Certified Nurse Education Exam offered by the National League of Nursing (NLN) (*Note: visit the NLN website for eligibility requirements*)

Curriculum Format

- Part-time (~ 4-5 terms)
- 330 practicum hours

Program Outcomes

Graduates of the Minor in Nursing Education are prepared to:

- design current, progressive nursing education programs using research and theories of learning instruction, curriculum, evaluation and measurement.
- utilize a variety of teaching strategies and media appropriate to learner characteristics, instructional objectives, and nursing or health-related content.
- plan the learning activities of individuals and groups of students in clinical and didactic settings.
- guide the performance of learners in settings where nurses function as educators for nurse colleagues, students, patients, families, and communities.
- apply principles of measurement and evaluation to the development of learner assessment procedures for didactic and educational instruction.
- utilize computer technology and educational informatics as integral components of nursing education and training.
- articulate the role of the nurse educator within the health professions, schools of nursing, and community.
- perform the role of education consultant in settings where nurses, patients, families, and communities participate in education activities.

Admission Criteria

- GPA \geq 3.0 in current MSN program

Curriculum

- NURSP 2071 - DESIGN AND PROCESS OF INSTRUCTION
- NURSP 2072 - MEASUREMENT AND EVALUATION
- NURSP 2073 - PRACTICUM 1 IN NURSING EDUCATION: TEACHING AND LEARNING ASSESSMENT
- NURSP 2074 - PRACTICUM 2 IN NURSING EDUCATION: EDUCATIONAL PROGRAM MANAGEMENT

Total Credits: 12

Nursing Informatics Minor

The Minor in Nursing Informatics is a combination of cognitive science, computer science, information science, and nursing science. It includes the development, analysis, and evaluation of information systems that support, enhance and manage patient care. Informatics nurses are involved in practice, education, research, administration, and consultation and can work in public, private, or corporate settings. Career opportunities for graduates of this specialty are numerous.

The Minor in Nursing Informatics is available to enrolled University of Pittsburgh School of Nursing graduate students. The informatics curriculum includes introduction to informatics, clinical information systems, database management, and project management courses. Students should consult with their academic advisor.

Curriculum Format

- Part-time (2-3 terms)
- 11 course credits
- Online

Program Outcomes

Graduates of the Minor in Nursing Informatics are prepared to:

- Analyze clinical information systems for adoption by healthcare systems
- Manage projects in a multidisciplinary integrated healthcare informatics environment
- Consult with companies in the design of healthcare information systems
- Assist in the planning and development of informatics applications for telehealth, consumer health, and community-based care.

Curriculum

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NURSP 2388 - DATABASE MANAGEMENT
- NURSP 2076 - CLINICAL INFORMATION SYSTEMS
- NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Total Credits: 11

Nursing Research

The Minor in Nursing Research is available to students pursuing education in advanced clinical specialty roles who want the opportunity to also obtain training pertinent to conduct and coordinate clinical research. Students should consult with their academic advisor. The curriculum focuses on research methodology and statistics. The Minor will enable graduates to apply their clinical and research skills in the following types of positions: clinical trial interventionists, research consultants, adverse events coordinators, and research project managers.

Graduates of the Minor in Nursing Research are eligible for National Certification as a Certified Clinical Research Coordinator by the Association of Clinical Research Professionals (ACRP) after successful completion of the Clinical Research Coordinator (CRC) Certification Exam. (Note: clinical research coordinator experience is required for exam).

Curriculum Format

- Part-time (~ 4 terms)
- Onsite

Program Outcomes

Graduates of the Minor in Nursing Research are prepared to accomplish the following:

- Apply research principles to the management of clinical investigations
- Participate in the research process including the development of reviews of literature, research protocols, and human subjects protection protocols
- Participate in recruitment of research subjects, data collection, and dissemination of research findings
- Utilize computer technology and informatics as an integral component of a research program or project
- Articulate the role of the clinical researcher within the health professions and society
- Perform the role of nurse researcher within clinical research settings

Curriculum

- Elective - (approval by Coordinator, Nursing Research Concentration) **3 cr.**
- NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

- NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS
- NUR 3052 - MANUSCRIPT DEVELOPMENT
- NUR 2800 - COORDINATING CLINICAL TRIALS

Total Credits: 12

- Donette Svidron, MSN, University of Pittsburgh
- Robin W. Tate, MBA, Waynesburg University
- Jessica G. Tillia, MS, University of Pittsburgh
- Charles W. Warner, DNP, University of Pittsburgh

School of Pharmacy

Chartered in 1878, the School of Pharmacy has a tradition of developing leaders and innovators that drive the future of pharmacy. We investigate, discover, and create ways to improve patient health and, through partnerships, change practice and improve efficiency of care. We also use computational and bench research methods to discover and develop drugs and drug delivery systems, and optimize drug therapy. The School of Pharmacy leads the way in education, personalizing education and getting students to expert faster. The School of Pharmacy is among the oldest pharmacy schools in the country. **Pitt Pharmacy is in the top tier of schools of pharmacy in US News & World Report rankings and NIH-funded research.**

Mission

The School of Pharmacy is committed to improving health through excellence, innovation, and leadership in education of pharmacists and pharmaceutical scientists, in research and scholarship, in care of patients, and in service to our communities.

Vision

To be an outstanding school of pharmacy renowned for excellence in discovery and advancement of science-based use of medicines and other interventions to enhance the vitality and quality of life.

Values

Integrity guides our daily work. We foster:

Passion, commitment, and diligence

Creativity and personal growth

Collaboration and teamwork

A culture of respect for the individual.

Doctor of Pharmacy (PharmD) Program

The professional curriculum is composed of a course of study requiring two years (62 credits) of pre-professional study followed by four years of professional courses. The four-year professional curriculum emphasizes problem solving and critical thinking, blending classroom and laboratory learning with experiential learning in practice. The required component of experiential learning is designed to facilitate progress from initial stages of making meaningful connections with patients to caring for complex patients with acute and chronic diseases. Experiences include patient care in communities, in hospitals, and during transitions of care. This experiential education begins in the first weeks of the P1 year.

Through our commitment to personalizing education, PittPharmacy inspires students to use their unique interests and talents to improve the lives of people through the safe, effective, and responsible use of medications and other interventions.

The PharmD program prepares students to be practitioners who advance the profession by fostering innovation, leadership, interprofessional collaboration, civic engagement, advocacy, life-long learning, and a professional attitude of inclusion.

Accreditation Council for Pharmacy Education

The University of Pittsburgh School of Pharmacy's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60503, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org.

E-mail: rxschool@pitt.edu

www.pharmacy.pitt.edu

Special Academic Opportunities

PittPharmacy provides opportunities to personalize students' education and get them to expert faster.

Areas of Concentration

Areas of Concentration (ARCO's) provide ways to tailor education to explore personal and professional interests. During pharmacy school, students can pursue an area of pharmacy in depth through specialized courses and experiences, mentoring, and a scholarly project. Students may apply for an ARCO during their second professional year of PharmD training. Each ARCO has specific requirements.

- Community Leadership, Innovation, and Practice
- Geriatrics and Palliative Care
- Global Health
- Pediatrics
- Pharmacoeconomics
- Pharmacotherapy Scholars
- Pharmacy Business Administration
- Research

International Pharmacy Travel

Pitt student pharmacists have the opportunity to gain exposure to diverse practices of pharmacy and global cultures through international experiences.

Student-Driven Independent Study

Students work directly with a faculty member to design a unique one-on-one learning experience in the community, hospital, or laboratory. Unlike traditional electives, students play an active role in establishing the goals and parameters of the project. Check out videos by faculty who offer electives and special topic opportunities.

PharmD/PhD Combined Program

If students are committed to extending their research education, we offer an opportunity for a pathway to obtain a Doctor of Philosophy in Pharmaceutical Sciences (PhD) degree.

Selecting Experiential Rotations

Students can design an individualized combination of core and elective rotations that are unique to their professional interests, talents, and goals. Students are able to choose from over 1,000 rotations in a wide range of pharmacy careers locally, nationally, and internationally.

Admissions

The School of Pharmacy admits students to its programs under one of two pathways-guarantee or open. Those two admission pathways are detailed below:

Pharmacy Guarantee Freshman Admission

All students should first submit an application to the University of Pittsburgh, Office of Admissions and Financial Aid. The School offers a guaranteed acceptance to a limited number of high school seniors who enroll at one of the University of Pittsburgh campuses. The number of guaranteed offers is limited and offered on a rolling basis. Students who have demonstrated academic success in high school, score 1330 or higher on the SAT I (Math and Critical Reading sections), with a minimum of 660 in the Math section, and specify Pharmacy on the application will be offered the guaranteed admission, if available.

Students who receive the guaranteed admission are expected to perform well in their pre-professional courses. In order to secure a place in the PharmD Program, students must earn:

- a letter grade of a C or better in all pre-professional courses with no repeat of pre-professional courses
- a 3.25 or greater overall GPA in pre-professional courses
- a competitive Math and Science GPA of 3.0
- Note: Required Math and Science courses must be taken at the University of Pittsburgh (AP credits are acceptable)

To exercise the guaranteed admission, all applicants, must:

- Submit the Pharmacy College Admissions Test (PCAT) scores
- Submit a completed PharmCAS application and fee
- Participate in a satisfactory interview prior to School of Pharmacy Admission

Students who meet these performance criteria will be admitted into the PharmD Program.

Open Admission

Students admitted to the program through open admission compete for remaining spaces in the class. The requirements to be considered a competitive applicant for the School of Pharmacy's professional program are:

- completion of the pre-professional requirements
- competitive Math and Science GPA of 3.0
- submission of the Pharmacy College Admission Test (PCAT) scores
- submit a completed PharmCAS application and fee
- selected applicants will be required to participate in a satisfactory interview (interviews are by invitation only)

More information about PharmCAS and deadlines for application can be found at www.pharmcas.org.

Students applying for admission must apply through PharmCAS, the Web-based Pharmacy College Application Service.

Visit the School of Pharmacy Web site at www.pharmacy.pitt.edu.

Application Procedures and Deadlines

All applicants must file an application through PharmCAS, a Web-based Pharmacy College Application Service, by January 6, 2020.

The application process, application deadlines, and other admission requirements are summarized on the School of Pharmacy Web site.

Throughout the application process, it is the student's responsibility to follow all instructions and meet all deadlines. Failure to do so might result in their application being canceled. It is highly recommended that students apply early to ensure that all application materials are received by the January deadline. tab.

Preparing to Complete the Application

The School of Pharmacy recommends that students thoroughly review the application process before entering data or filling out forms so that they are aware of all the information they will need to gather and how much time the entire process will take. Visit the PharmCAS Web site at www.pharmcas.org and review the "Preparing to Apply" tab. Then review the Checklist, PharmCAS Instructions, and the Applicant Code of Conduct links. Review the time line for the application process: Admissions Calendar

Complete Pre-professional Courses and Minimum Eligibility Requirements: Math & Science course requirements must be completed by the end of spring term of year of admission and all other courses must be completed before the fall term. NOTE: Early Decision applicants must have all of the pre-professional required course work completed and letter grades recorded on official transcripts by the PharmCAS Early Decision deadline of September 3, 2019.

Register to take the PCAT (Pharmacy College Admission Test): Visit the PCAT web site for registration deadlines for test dates and register as early as possible since the test sites have a limited number of examinee seats for each exam date. Register to take the PCAT (recommended test dates include July and/or September, October/November) and have your scores sent to PharmCAS, code 104. Applications are not complete until PCAT scores are received. Only completed applications are considered for an interview invitation. NOTE: Since the January PCAT scores will not be received until after interviews are offered, the Admissions Committee recommends an earlier PCAT testing date.

Completing the Application Process

The application process consists of one application.

PharmCAS (Pharmacy College Application Service): This service enables students to generate one primary application that can be submitted to multiple PharmD degree programs. For the University of Pittsburgh School of Pharmacy, the application must be electronically submitted on or before midnight Eastern Standard Time on January 6, 2020.

To eliminate any unforeseen problems, it is recommended that students submit their application early; i.e., November 1st. This will ensure eligibility to update fall grades and, if issues arise, they can be investigated and resolved before the December deadline.

After electronically submitting the PharmCAS application and fee for the PharmD program, there are follow-up steps that applicants must address to be certain that all the required documents (such as transcripts to PharmCAS) have been received on time.

Tuition and Financial Aid

Students should investigate their eligibility for federal and state programs by calling the Office of Admissions and Financial Aid at 412-624-PITT or e-mail oafa@pitt.edu.

The University's financial advisors are the best source of information about local grants or scholarships that extend beyond federal and state programs. Students are encouraged to look outside of the health professions for additional support. Students may be able to compete successfully for economically or academically awarded scholarships from private groups and associations.

In addition, the School of Pharmacy has a number of general scholarships provided through the generosity of the School's alumni and friends. These are described in detail on the school's Web site at <http://www.pages.pharmacy.pitt.edu/pharmdhandbook/the-pharmd-student-handbook/admissions/scholarships/>

Tuition Rates and Fees can be found on the school's Web site at <https://oafa.pitt.edu/financialaid/costs/>.

Academic and Professional Standards

Academic Integrity

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

Enrollment in the School of Pharmacy carries with it obligations of conduct within and outside of the classroom. Professional students are expected to maintain the highest standards of personal integrity and conduct themselves in a manner that is a credit to themselves, the school, and the profession.

Each year, students will be asked to sign a copy of the University of Pittsburgh School of Pharmacy Code of Conduct that reaffirms their commitment to ethical and professional behavior. Details of the Code are outlined on the school's Web site.

Grading System

Doctor of Pharmacy students are subject to the provisions of the Guidelines and Regulations for the Promotion of Students in force at the time. All students will be given a copy of these guidelines and regulations upon entry into the program.

Calculation of grade point average (GPA) will include all required professional courses and approved electives taken while enrolled in the PharmD program. Cumulative GPA will be calculated at the end of each term. All PharmD students must maintain a cumulative GPA of 2.00. Students who fail to maintain a cumulative GPA of 2.00 or above will be placed on academic probation and given one opportunity to repeat selected courses in order to raise their cumulative GPA above 2.00. Students failing to increase their cumulative GPA above a 2.00 during this period of academic probation will be dismissed from the PharmD program. Term GPA will be calculated at the end of each term. Students with a term GPA under 2.00 will be placed on academic probation and must achieve a GPA of 2.00 or above during the following term. Students failing to achieve a term GPA of 2.00 or above during this period of academic probation will be dismissed from the PharmD program.

It is the responsibility of students to monitor their academic progress and become familiar with the program degree requirements and academic regulations.

Clearance and Immunization Policy

The Office of Experiential Learning manages learning experiences in communities and professional practice environments that are embedded across all four years of the PharmD program. Because these experiences involve direct patient contact, the practice sites where students are placed require

proof of immunization to communicable diseases, fingerprinting, background checks, and drug screens. Students who fail to complete these prerequisites no later than two weeks prior to the start of classes will not be able to fulfill their experiential learning requirements. PittPharmacy works with CastleBranch, a background screening and compliance tracking solutions company, to collect and manage the documentation of all such prerequisites. Each student has access to his or her information through the secure CastleBranch web site both as a student and after graduation. CastleBranch maintains a secure site to which only the Office of Experiential Learning Office and the student have access.

A positive criminal history and/or positive drug screen may disqualify a student from completing required experiential learning and may prevent successful completion of the PharmD program. Many of the sites used for experiential learning require students to meet certain prerequisites. These prerequisites may include showing proof of immunization to communicable diseases, undergoing criminal background checks, and drug screening. Failure to meet these prerequisites can result in students being unable to complete their experiential learning requirements.

Additionally, in order to become a licensed pharmacist, many states will inquire as to whether the applicant has been convicted of any misdemeanor, felony, or any illegal act associated with alcohol and/or substance abuse. A criminal history may delay or prevent licensure.

PhD or MS in Pharmaceutical Sciences

The School of Pharmacy offers graduate level training to highly motivated individuals. Our mission is to train the next generation of leaders and decision makers seeking to improve the health of the community through outstanding basic and clinical research. Major strengths include highly accomplished, well-funded research faculty, multidisciplinary training opportunities, and cutting-edge technologies.

Training consists of required core courses, elective courses, journal clubs, research presentations, and an original faculty-advised research project leading to a final thesis or dissertation. Students may select to enroll in one of five Primary Tracks: medicinal chemistry, biochemical pharmacology, pharmaceuticals, clinical pharmaceutical sciences, or health outcomes and policy research.

Contact Information

Lori Altenbaugh
Graduate Program Coordinator
University of Pittsburgh

altenbaughlm@pitt.edu

Application Process

Applications must be submitted electronically at the Pharmacy College Application Service for Graduate Programs (PharmGrad). Application to our program requires a \$50.00 fee that cannot be waived.

Applications for the fall term must be submitted no later than January 3, 2020. Applications are reviewed on a first-come, first-served basis so it is wise to apply as early as possible. Applications for spring term admission are not accepted.

The School of Pharmacy highly recommends that applicants to the PhD program have research experience and that students mention specific faculty with whom they would like to work in their Personal Statement.

When complete, student applications are reviewed. No preliminary assessments are made on individuals applying to the program until all application requirements are complete. The GRE is required in order to submit your application. Subject-specific tests are not required. GRE scores are good for five years; the ETS will not release GRE scores after 5 years from the date of the exam. We do not state a minimum GRE or GPA as we prefer to look at the entire representation of the applicant. The average GRE score for those students admitted for 2019 verbal is 152 (56th percentile), quantitative is 168 (95th percentile) and analytical writing is 3.5.

We require three references that **MUST** be submitted online. Written references are not accepted.

IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT. You will be notified if your application is reviewed and you are invited for an interview. At that time, you will need to supply an official transcript.

International Students

For the Test of English as a Foreign Language (TOEFL), a minimum result of 100 on the iBT (Internet-based test) is required. For IELTS the minimum acceptable score is 7.0. You must submit GRE and TOEFL (or IELTS) scores to the University of Pittsburgh, institution code is 2927. You do not need a department code. TOEFL scores are good for two years; the ETS will not release TOEFL scores after 2 years from the date of the exam. **If you have graduated from a U.S. institution OR if English is the official language of your country then proof of English proficiency is not required.**

Financial Assistance and Tuition

Most students accepted to our PhD program are offered full tuition scholarship plus a teaching assistant stipend. Teaching assistant experience is not necessary as you will be trained upon acceptance into the program.

For the 2019-2020 academic year we granted scholarships and TA positions to 14 new admissions from a pool of approximately 101 applications. No financial assistance is available to MS students. Tuition Rates and Fees can be found on the school's Web site at <https://oafa.pitt.edu/financialaid/costs/>. NOTE: Health insurance is REQUIRED for all students.

All fees are the same for those students who are not offered a scholarship.

Length of Programs

The PhD Program requires a minimum of 72 credits. Most students complete the PhD degree within five years. The statute of limitations for completion of the PhD degree is ten years. (See Statute of Limitation/Leaves of Absence in the University catalog for more information.)

The MS (thesis-based) program requires a minimum of 30 credits. Most students complete the MS degree in two academic years. The statute of limitations for completing the MS degree is four consecutive calendar years from the first term of registration.

The Non-Thesis MS program requires a minimum of 34 credits and is usually completed within one calendar year (three semesters). The statute of limitations for completing the MS degree is four consecutive calendar years from the first term of registration.

Academic Standards

School of Pharmacy students are responsible for upholding the standards of behavior outlined in the University's Guidelines on Academic Integrity, the University's policy on sexual harassment, and other policies related to student behavior.

MS Pharmacy Business Administration

The 12-month executive style Master of Science in Pharmacy Business Administration (MSPBA) program consists of 36 credits that build critical skills and expertise for pharmacy professionals seeking to substantially increase their business acumen and marketability.

Bridget.Regan@pitt.edu

Amy Giles
Program Coordinator
University of Pittsburgh

Application and Requirements

Prerequisite

- Two years of professional experience is recommended
- Candidates with a PharmD or BS in Pharmacy will receive preferential admission

To apply to the program, you must complete the following requirements:

- Completed Application Form (Application PDF)
- Résumé or CV
- One self-nomination letter describing:
 - Current job responsibilities and assignments
 - Finest achievements and greatest disappointments
 - Challenges met within current organization
 - Civic and community activities and any offices held
 - Reasons and motivations for entering the MSPBA program
 - Professional and personal goals and plans
- Two letters of professional reference
- College or university transcripts
- Graduate school admission exam scores (recommended)
- GMAT
- TOEFL or the IELTS examination (for anyone who speaks English as a second language)
- In-person interview with MSPBA program representatives

Applicants will be contacted for scheduling of an on-site interview following receipt of complete packet of information

Tuition and Financial Aid

Tuition

Tuition Rates and Fees can be found on the school's Web site at <http://mspba.pitt.edu/tuition/>. Tuition is paid in equal parts per term for three terms.

All students, including students traveling from out of town, are responsible for all travel expenses.

The MSPBA program will provide a list of hotels that offer University rates from which students can select and reserve rooms.

Financial Aid

Federal Stafford loans are available to U.S. citizens for up to \$20,500 per academic year. Refer to the University's Office of Admissions and Financial Aid for information on how to apply. U.S. citizens who are funding the degree in full, in part, or whose employer reimburses only after the end of a term, may consider financing. Furthermore, students may also finance their costs through standard loans.

Tuition Includes

- All books, cases, and simulations; meals during class sessions

- Microsoft Windows and Program Bundle software packages
- Access to all University of Pittsburgh student resources such as libraries, fitness facilities, and public transportation while on campus

School of Pharmacy Faculty

School of Pharmacy Faculty

Accreditation

Accreditation Council for Pharmacy Education

Doctoral

Pharmaceutical Sciences - Biochemical Pharmacology Track, PhD

Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.

- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all PhD students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area. For students interested in the Clinical Pharmaceutical Scientist Track, you may find the curriculum here: http://www.pharmacy.pitt.edu/research/clinical_pharma_science.php

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3043 - TEACH ME TO TEACH YOU
- PHARM 3042 - RESEARCH PRACTICUM

1st Year: Spring

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Fall

- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

3rd Year: Fall

- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, PhD

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

Pharmaceutical Sciences - Community Leadership, Innovation, and Practice, PhD

Pharmaceutical Sciences - Community Leadership, Innovation, and Practice, PhD

Pharmaceutical Sciences - Geriatrics & Palliative Care, PhD

Pharmaceutical Sciences - Global Health, PhD

Pharmaceutical Sciences - Medicinal Chemistry Track, PhD

Medicinal Chemistry

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

PhD Comprehensive Exam and Dissertation

Requirements:

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all PhD students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and dissertation research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area. For students interested in the Clinical Pharmaceutical Scientist Track, you may find the curriculum here: http://www.pharmacy.pitt.edu/research/clinical_pharma_science.php

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3043 - TEACH ME TO TEACH YOU
- PHARM 3042 - RESEARCH PRACTICUM

1st Year: Spring

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Fall

- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR

- PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

3rd Year: Fall

- PHARM 3042 - RESEARCH PRACTICUM
- Track-Specific and/or Electives. - 3-4 credits

PhD Comprehensive Exam and Dissertation

Each student follows a program of study developed in conjunction with the major advisor with input from the student's doctoral committee. The program of study must contain all of the program core courses as well as elective courses specific to the student's focus area.

Following completion of course work, students are required to complete a comprehensive examination. To be eligible for the comprehensive examination, students must be in full graduate status and have completed didactic course work with a minimum grade point average (GPA) of 3.00. To qualify for advancement to candidacy for the Doctor of Philosophy degree the student must pass the comprehensive examination.

Admission to PhD candidacy constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to research and writing of the dissertation.

Each PhD student must write a dissertation that presents the results of research carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It represents a hypothesis tested by collection and analysis of data and provides a significant contribution or advancement to that field.

See Regulations Pertaining to Doctoral Degrees for a full overview of regulations and procedures for PhD candidates.

Further information is available on the School of Pharmacy website: http://www.pharmacy.pitt.edu/programs/grad/grad_index.php.

Pharmaceutical Sciences - Pediatrics, PhD

Pharmaceutical Sciences - Pharmaceutical Outcomes and Policy Research Track, PhD

Pharmaceutical Outcomes and Policy Research

Pharmaceutical Outcomes and Policy Research (POPR) is a specialty track/program in Pharmaceutical Sciences. The POPR track will train students to investigate the impact and outcomes of pharmaceutical products, pharmacy services, and pharmaceutical policies across health care systems. The core mission of POPR is the advancement of knowledge about the safety and effectiveness of medicines, and pharmacy's role in improving population health. POPR students most often focus on patient-centered outcomes such as access, safety, quality of care, costs, and patient-reported health. Graduates will be trained to work in a broad range of settings, including: academia; pharmaceutical industry; government organizations such as FDA, AHRQ, NIH; contract research organizations; and health care systems

- You will learn epidemiological study designs, data management, data analysis, and data interpretation.

- You will develop strong quantitative methodological skills in pharmaceutical outcomes and health services research.
- You will apply social/behavioral theory to the study of patient, provider, and organizational behaviors as it relates to pharmaceuticals and pharmacy practice.
- You will learn how pharmaceutical outcomes research is used to inform clinical practice and guide health policy decisions.

PhD Comprehensive Exam and Dissertation

Requirements

Students must complete a total of 72 credit hours to fulfill the requirements for the PhD. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
 - EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
 - EPIDEM 2185 - INTRODUCTION TO SAS
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- Journal Club
Electives

1st Year: Spring

- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
 - BIOST 2049 - APPLIED REGRESSION ANALYSIS
 - EPIDEM 2180 - EPIDEMIOLOGICAL METHODS 1
 - PHARM 2003 - PHARMACOEPIDEMIOLOGY
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - CLRES 3140 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN HEALTH SCIENCES
- Journal Club

2nd Year: Fall

- BIOST 2046 - ANALYSIS OF COHORT STUDIES
 - EPIDEM 2187 - EPIDEMIOLOGICAL METHODS 2
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1
 - PHARM 3043 - TEACH ME TO TEACH YOU
- Journal Club
Social and Behavioral Theory

2nd Year: Spring

- PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3062 - ADVANCED METHODS IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH

- CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)
Journal Club
Electives

3rd Year: Fall

- PHARM 3042 - RESEARCH PRACTICUM
Track-Specific and/or Electives

Pharmaceutical Sciences - Pharmaceutics Track, PhD

Pharmaceutics

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.
- You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.
- Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

Pharmaceutical Sciences - PharmacoAnalytics, PhD

Pharmaceutical Sciences - Pharmacotherapy Scholars Program, PhD

Pharmaceutical Sciences - Research, PhD

Master's

Pharmaceutical Sciences - Biochemical Pharmacology Track, MS

Biochemical Pharmacology

The biochemical pharmacology track focuses on the biochemical mechanisms responsible for drug and other xenobiotic, and gene actions on living systems, both healthy and compromised.

- You will have the opportunity to study with faculty in multiple areas including behavioral, cardiovascular and endocrine pharmacology, neuropharmacology, immunopharmacology, chemotherapy, toxicology, and metabolic diseases.
- Your research opportunities include studying the biochemical mechanism of drugs and genes in cell cultures and/or healthy and compromised animal models.
- You will have the opportunity to create and/or use genetically engineered animals that include transgenic and knockout mice, as well as to integrate disease models into the animal models in order to study the gene function in diseases.
- You will develop a broad knowledge of the regulation of drug metabolizing enzymes and transporters and the implications of this regulation in drug metabolism.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Clinical Pharmaceutical Scientist Track, MS

Clinical Pharmaceutical Scientist

The clinical pharmaceutical scientist is a specialty track in which students with expertise in pharmacotherapeutics investigate both the clinical and mechanistic elements of drug therapy issues.

- You will learn experimental design, experimental methods, data analysis, and data interpretation of human-based research projects.
- You will study how research discoveries are translated into practices that promote health and prevent disease.
- You will learn the process required to implement new therapies as standards of care through human-based research projects.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Medicinal Chemistry Track, MS

Medicinal Chemistry

The medicinal chemistry track is a complex scientific discipline whose focus is to develop molecules that can impact human health by discovering, designing, synthesizing and characterizing safe and effective agents for disease therapy and diagnosis. The research involves a multidisciplinary approach encompassing chemistry and biology, and includes organic synthesis, protein and nucleic acid chemistry, natural product chemistry, computational chemistry, molecular biology, cell biology, structural biology, pharmacology and proteomics.

- You will learn to design, synthesize and characterize new medicinal agents and enhance the biological activity of existing pharmaceutical agents.
- You will learn to use computational, biophysical, structural biology and cell-based screening technologies to identify natural and synthetic compounds for pharmacological activity and to conduct structure-based drug design.
- You will isolate, characterize, and synthesize compounds based on natural products, as well as target identification for biologically active natural products.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
 - PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
 - PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
 - PHARM 3042 - RESEARCH PRACTICUM
- Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
 - PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
 - PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmaceutical Sciences - Non -Thesis, MS

The Graduate Program in Pharmaceutical Sciences is pleased to offer the new Non-Thesis MS degree to qualified students.

Why choose the non-research based thesis?

Students will be able to complete the MS degree in one calendar year. Our MS in Pharmaceutical Sciences attracts students interested in drug discovery, delivery, and metabolism in addition to pharmacology, pharmacokinetics, and pharmacodynamics. Graduating with the MS in Pharmaceutical Sciences will prepare you for employment in pharmaceutical manufacturing plants and labs. Pharmaceutically-trained professionals are involved in biotechnology, research, synthesizing and testing new compounds, in marketing and sales of pharmaceuticals and biomedical devices, and in pharmaceutical benefit management. Some areas where graduates with degrees in Pharmaceutical Sciences are sought after are Cosmetic Science, Industrial Pharmacy, and University-based laboratory areas.

Non-Thesis MS Academic Requirements for Acceptance

- A BS or BA in biochemistry, biology, chemistry, pharmacy, pharmaceutical sciences or a related field is required.
- Applications must be submitted electronically.
- We require three references that MUST be submitted online. Written references are not accepted.
- Successful applicants will be admitted for fall 2012. We do not accept Spring Admissions.
- The Graduate Record Examination (GRE) is required and must have been taken within the past three years. Subject specific tests are not required.
- International applicants with English as a second language must complete the TOEFL or IELTS. For TOEFL a minimal score of 80 (Internet-based test), 550 (Paper-based test), or 213 (Computer-based test) is required. For IELTS the minimum acceptable score is 6.5.
- You must submit GRE and TOEFL (or IELTS) scores to the University of Pittsburgh, institution code is 2927. You do not need a department code. TOEFL scores are good for two years; the ETS will not release TOEFL scores after 2 years from the date of the exam.
- If you have graduated from a U.S. institution OR if English is the official language of your country then TOEFL or IELTS scores are not required.
- IMPORTANT: WE DO NOT ACCEPT ANY DOCUMENTS SENT VIA MAIL TO OUR DEPARTMENT. You will be notified if your application is reviewed and you are invited for an interview. At that time you will need to supply an official copy of your transcript.

- Application to our program requires a \$50.00 fee which cannot be waived. Credit cards are accepted. To apply, go to: http://www.pharmacy.pitt.edu/programs/grad/ms_nonthesis.php; click Apply On-line!

Program Requirements for Graduation

- 30 credits are required for graduation. A minimum of 10 credits must be taken in any given semester.
- In lieu of an original research study the student would complete a written project consisting of a comprehensive literature review of a topic of current interest in pharmaceutical sciences. The student would defend the project as an oral examination before their MS committee and major advisor.
- The MS committee will consist of the Director of the Graduate Program in Pharmaceutical Sciences, the student's major advisor and one other member of the faculty chosen by the student and major advisor and approved by the Program Director and Senior Associate Dean.
- Students would be required to attend the training courses offered by the University.
 - Small Animal Training
 - Bloodborne Pathogens Training
 - Chemical Hygiene Plan & Formaldehyde Awareness
 - Radiation Safety Course

Sample Curriculum for Non-Thesis MS

Fall Term

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-4 credits

Spring Term

- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-4 credits

Summer Term

- PHARM 3042 - RESEARCH PRACTICUM
- Optional Electives - 0-9 credits

Pharmaceutical Sciences - Pharmaceutics Track, MS

Pharmaceutics

The pharmaceutics track is concentrated on the study of the design of pharmaceutical dosage forms and their interaction with the human body. Topics included are physical pharmacy, bioanalysis, drug delivery and targeting, drug metabolism, drug transport, pharmacokinetics and pharmacodynamics.

- You will develop a thorough understanding of how to apply principles of physical pharmacy to dosage form design and optimization of drug product performance.
- You will develop the fundamentals required for design of both traditional and complex state-of-the-art drug delivery systems and skills essential for the advancement of targeted drug therapies using small molecules, proteins, peptides and other biomolecules, probiotics, and tissue engineered platforms.

- You will gain knowledge of the human body and the interaction of medications with the human body including metabolism, pharmacokinetics and pharmacodynamics.
- Your research opportunities include formulation of dosage forms, development of novel delivery systems and development of complex new therapies for site specific action, establishing novel markers for disease, study of metabolic pathways, development of bioanalytical techniques, and evaluation of absorption, distribution, and elimination of drug substances and their regulation.

MS Core Curriculum

Requirements:

Students must complete a total of 30 credit hours to fulfill the requirements for the MS. Required courses for all MS students are listed below. Students who have had prior course work or extensive experience in a given area may be exempted from the required course at the discretion of the faculty. The remaining credit requirements are completed through elective courses and thesis research. The specific plan of study is developed by the student and their faculty advisor and committee. Courses should be selected to assure an adequate breadth of knowledge as well as depth in the student's focus area.

1st Year: Fall

- PHARM 3040 - STATISTICAL METHODS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES
- PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

1st Year: Spring

- PHARM 2001 - PHARMACEUTICAL ANALYSIS
- PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR
- PHARM 3042 - RESEARCH PRACTICUM
Choose one of the following Journal Club Courses:
- PHARM 3000 - TOPICS IN NEUROSCIENCE
- PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

2nd Year: Fall

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

2nd Year: Spring

- PHARM 2010 - MASTER OF SCIENCE THESIS
- Track-Specific and/or Electives. - 3-4 credits

MS Comprehensive Exam and Thesis

The thesis for the MS must represent an original research project or a comprehensive and detailed survey of some topic of current interest in the pharmaceutical sciences. It must be defended in an oral examination.

Pharmacy Business Administration, MPBA

In Summer 2019, the Master of Science in Pharmacy Business Administration (MSPBA) was renamed to Master of Pharmacy Business Administration (MPBA) and changed degree type to Master of Pharmacy Business Administration. Students currently enrolled may option to transfer into the new MPBA program.

Master of Pharmacy Business Administration

The 12-month executive style Master of Pharmacy Business Administration (MPBA) program consists of 36 credits that build critical skills and expertise for pharmacy professionals seeking to substantially increase their business acumen and marketability.

MPBA Value

- Designed for emerging pharmacy professionals seeking executive positions.
- Obtain an in-depth understanding of the business of medicines.
- Learn to innovate and solve real-world problems.
- Focus in specialized area of either Specialty or Community Pharmacy.

MPBA Fit

- Synergistically fusing the expertise of the Schools of Pharmacy and Business
- Efficiently formatted for working professionals
- Friday and Saturday every other week for 12 months.

Requirements

1st Semester

- BOAH 2421 - HUMN RESORC COMPETITIVE ADVNTG
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BACC 2401 - FINANCIAL ACCOUNTING
- BMKT 2409 - MARKETING MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS
- PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM

2nd Semester

- BFIN 2409 - FINANCIAL MANAGEMENT 1
- PHARM 5911 - HEALTHCARE SALES AND MARKETING
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BACC 2401 - FINANCIAL ACCOUNTING

3rd Semester

- PHARM 5910 - US HEALTHCARE SYSTEM
- BSPP 2409 - STRATEGIC MANAGEMENT
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE

Professional

Doctor of Pharmacy, PharmD

Doctor of Pharmacy (PharmD) Program

The professional curriculum is configured in a course of study requiring two years (62 credits) of pre-professional study followed by four years of professional courses. The four-year professional curriculum emphasizes problem solving and critical thinking, blending classroom and laboratory learning with experiential learning practice. The required component of experiential learning is designed to facilitate progress from initial stages of making meaningful connections with patients to caring for complex patients with acute and chronic diseases. Experiences include patient care in communities, in hospitals, and during transitions of care. This experiential education begins in the first weeks of your P1 year.

Through our commitment to personalizing education, PittPharmacy inspires students to use their unique interests and talents to improve the lives of people through the safe, effective, and responsible use of medications and other interventions.

The PharmD program prepares students to be practitioners who advance the profession by fostering innovation, leadership, interprofessional collaboration, civic engagement, advocacy, life-long learning, and a professional attitude of inclusion.

Program Accreditation

University of Pittsburgh's Doctor of Pharmacy Program is accredited by the Accreditation Council for Pharmacy Education, 190 South LaSalle Street, Suite 2850, Chicago, IL 60603, 312/664-3575; FAX 866/228-2631, web site www.acpe-accredit.org

Pre-Professional Requirements

Applicants to the professional pharmacy program must have successfully completed, or be in the process of completing, all prerequisite mathematics and science subjects no later than the spring term of the year of admission. All other pre-professional courses should be completed no later than the first day of the fall term of admission. Pre-professional courses must be taken for a letter grade.

Pre-Professional Courses:

- General Biology (with lab) - 8 credits
- General Chemistry (with lab) - 8 credits
- Organic Chemistry (with lab) - 8 credits
- English Composition - 6 credits
- Calculus - 3-4 credits
- Statistics - 3-4 credits
- Elective courses+ - 24 credits

Total: 60-62 credits

+At least 9 credits must be in the humanities and 9 credits in the social sciences. A course in Public Speaking is recommended.

Non-native English-speaking applicants must supply evidence of their proficiency in the English language.

Degree Requirements

To earn the degree of Doctor of Pharmacy, the student must demonstrate satisfactory achievement in required course work prescribed by the curriculum (*detailed below under Program Description*), earning an overall GPA of 2.00 or higher. Refer to the school's Student Handbook for the guidelines for academic progress.

Program Description

The professional curriculum leads to the Doctor of Pharmacy (PharmD) degree and requires completion of 134.5 credits (note: this curriculum is subject to change):

Fall Term-First Professional Year (P-1)

- PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS
- PHARM 5112 - COMMUNITY HEALTH 1: COMMUNICATION AND WELLNESS
- PHARM 5114 - ANATOMY AND PHYSIOLOGY 1
- PHARM 5116 - BIOCHEMISTRY 1
- PHARM 5118 - PRINCIPLES OF DRUG ACTION
- PHARM 5120 - THE EMERGING PROFESSIONAL
- PHARM 5122 - CASE CONFERENCE SERIES 1

Total: 16 credits

Spring Term-First Professional Year (P-1)

- PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS
- PHARM 5113 - COMMUNITY HEALTH 2: CULTURAL AWARENESS AND BEHAVIOR
- PHARM 5115 - ANATOMY AND PHYSIOLOGY 2
- PHARM 5117 - BIOCHEMISTRY 2
- PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY
- PHARM 5121 - CASE CONFERENCE SERIES 2

Total: 16 credits

Fall Term-Second Professional Year (P-2)

- PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE
- PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS
- PHARM 5214 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1
- PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE
- PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE
- PHARM 5220 - CASE CONFERENCE SERIES 3

Total: 16 credits

Spring Term-Second Professional Year (P-2)

- PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION

- PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT- IMMERSION IN PRACTICE
- PHARM 5215 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2
- PHARM 5119 - DRUG DEVELOPMENT 1
- PHARM 5223 - GASTROENTEROLOGY/NUTRITION
- PHARM 5227 - CASE CONFERENCE SERIES 4

Total: 15 credits

Fall Term-Third Professional Year (P-3)

- PHARM 5312 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING
- PHARM 5314 - IMMUNOLOGY
- PHARM 5316 - PULMONOLOGY/RHEUMATOLOGY
- PHARM 5318 - ENDOCRINOLOGY
- PHARM 5320 - POPULATION HEALTH AND MANAGEMENT
- PHARM 5322 - PHARMACY LAW
- PHARM 5324 - CASE CONFERENCE SERIES 5
- PHARM - Professional Elective - 3 credits

Total: 16.5 credits

Spring Term-Third Professional Year (P-3)

- PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS
- PHARM 5313 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT

Graduate School of Public and International Affairs

The mission of the Graduate School of Public and International Affairs (GSPIA) is to prepare students to make substantive contributions to society through careers as managers, advisors, and policy analysts in government and nonprofit organizations in a multitude of geographic locations throughout the world. This mission is accomplished through dedication to quality teaching that builds skills and commitments to the core values, challenges, and rewards of public service. It is supported through basic and applied research on timely issues of public management; international, regional, and urban affairs; and policy making. The school and faculty are committed to making a difference in the world by drawing on diverse skills and knowledge to improve the performance of public and nonprofit organizations that contribute to free and just societies in the United States and abroad. To accomplish these ends, GSPIA teaches, conducts research, and performs public service in the following areas:

- The management and administration of public and nonprofit agencies
- The growth and sustainable development of urban metropolitan regions throughout the world
- The economic and social development of newly independent and developing states
- The emerging dynamics that are shaping today's international political economy
- Threats to and issues in international security

The mission of GSPIA stresses the importance of democratic responsibilities and personal integrity in the management of human affairs as well as the professional qualifications required for managing constructive change. Students and faculty alike are required to:

- Demonstrate the highest standards of ethical and professional conduct
- Use critical thinking and problem solving skills in addressing public policy issues
- Consider the international and intersectoral aspects of public affairs
- Develop partnerships with others both internal and external to the University of Pittsburgh

Admissions

<http://www.gspia.pitt.edu/Prospective-Students>

GSPIA admits persons who have demonstrated intellectual competence and high motivation in an academic and/or professional environment and who will enrich the quality of life in the school. Individuals from varied cultural, academic, and social backgrounds provide an exciting frame of reference for the stimulating exchanges so vital to a dynamic academic process. The following are required of all applicants: transcripts, application and fee, GRE score, TOEFL or IETS score (if international), letters of recommendation, essays, and resume.

Admission Prerequisites

It is desirable, but not mandatory, that PhD applicants have an earned master's degree in public and international affairs or a degree in one of the social sciences and work experience prior to undertaking doctoral study.

Admission Requirements

All applicants must have earned a bachelor's degree from a regionally accredited U.S. institution or a degree that is equivalent to a four-year U.S. bachelor's degree. Applicants are expected to have a B+ or better average (3.0 GPA) in their work to date. To be competitive for merit scholarships,

applicants normally need at least a 3.5 GPA. The admissions committee also takes into consideration GPA within the major, GPA within the last two years, extenuating circumstances, length of time since graduation from college, rigor of the undergraduate program, and other factors.

Doctoral applicants are only eligible for admission to full-time status in the Fall Term.

Application Requirements

Online Application

Complete and submit the online application in its entirety. All application materials can be submitted electronically using the online system, with the exception of official academic transcripts.

Application Fee

The non-refundable \$50 application fee may be paid by check or credit card. You will be prompted to pay the fee at the end of the online application process. The application fee is waived for Returned Peace Corps Volunteers, AmeriCorps Volunteers, Truman Scholars, Pickering Fellows, Coro Fellows, Rangel Fellows, McNair Fellows, Teach for America alumni, City Year alumni, Payne Fellows, Catholic Volunteer Network alumni, and veterans/active duty members of the US Armed Forces.

Early Application Discount: Prospective students who submit a complete online application for fall-term admission by December 31 of the previous year pay a reduced application fee of \$25.

Test of English as a Foreign Language (TOEFL) and the International English Language Testing System (IELTS)

TOEFL/IELTS Scores (international students only). International applicants must submit either the TOEFL or the IELTS. Contact Educational Testing Services directly to request that an official score report be sent to GSPIA. The minimum TOEFL score required for admission is 80 on the Internet-based test, although 90 or above is strongly preferred. The minimum IELTS score required for admission is 7.0 (overall, and in each of the subsections). GSPIA's institutional code is 2574.

Exceptions: International students who completed a degree at a regionally accredited college or university in the United States are not required to submit a TOEFL/IELTS score. Students from certain English-speaking countries are also exempt (see this link for a list of exempt countries). All US citizens and permanent residents are exempt.

GRE or GMAT Scores

GRE or GMAT Scores (not required for MPPM and non-degree applicants).

All applicants to the MPA, MPIA, MID, and PhD programs must have taken the GRE or GMAT within five years of the date of their application. It is not necessary to take both exams; either test score may be submitted. Official score reports must be sent directly from the testing agency to GSPIA. (GRE test takers can order score reports online at www.gre.org. GMAT test takers can order reports at www.mba.com). Copies of your own score report are not acceptable. GSPIA's institutional code is for the GRE 2574.

Exceptions: Students applying to GSPIA's joint-degree program with the University of Pittsburgh School of Law may substitute an LSAT score in lieu of the GRE.

Résumé

All applicants should upload a current résumé/curriculum vitae, showing relevant awards, academic achievements, full- and part-time job experience, internships, and volunteer work.

Personal Essay

Introduce yourself to the admissions committee. Discuss your professional goals and why you feel a GSPIA degree can help you attain them. Describe your background, interests, and motivation for pursuing graduate work in public & international affairs. There is a 5,000 character limit (approximately two double-spaced, typed pages).

Second Essay (PhD applicants only - not required for master's or non-degree candidates)

Identify the broad topic and research questions you envision as the focus of your doctoral dissertation research, as well as the methodologies you intend to use. There is a 5,000 character limit (approximately two double-spaced, typed pages).

Optional Essay

If there are any special circumstances you would like the admissions committee to consider, highlight them in the optional essay. Use this essay to include any information that you feel is important, but that you were not able to include elsewhere on the application. There is no penalty for leaving this blank.

Academic Transcripts

When completing the online application, you will be asked to upload copies of official transcripts from all colleges and universities you have attended, whether or not you earned a degree. You should upload a scanned copy of an official transcript generated by your university's registrar's office. Self-reported transcripts, student grade reports, or copies of unofficial transcripts are not acceptable.

It is not necessary to submit hard copies of your transcripts at the time of application, as long as your scanned copies have uploaded successfully. If you are admitted, you will then be required to submit final, official transcripts directly from your university's registrar's office to GSPIA. The official copy must exactly match the scanned copy that you submitted at the time of application.

If you do not have access to technology that will allow you to submit a scanned copy of your transcript at the time of application, you may submit an official copy instead. The official copy must be sent by mail directly from your university's registrar's office to GSPIA (3601 Posvar Hall; Pittsburgh, PA 15260).

Two Letters of Recommendation

Letters should be written by professors who have taught you or supervisors who have overseen your work, either professionally or in a volunteer capacity. If you graduated from college less than three years ago, at least one, if not both, of your letters should be from professors. Letters written by friends, family members, work colleagues, or anyone who has not taught or supervised you are not acceptable.

All letters must be submitted online. When you complete the online application, you will be prompted to enter the names and email addresses of your recommenders. The system will automatically send them an email explaining how they can upload their letters.

Admission Deadlines

GSPIA does not consider applications on a rolling basis. International students are strongly encouraged to submit application materials at least one month prior to the stated deadlines.

Application Deadlines: Fall Term

US Citizens/Permanent Residents:

January 15 - PhD applicants

February 1 - MPA, MPIA, MID

June 1 - MPPM applicants

August 1 - Non-degree applicants

International Students:

January 15 - MPA, MPIA, MID, PhD, and MPPM applicants

Early Application Discount: Prospective students who submit a complete online application for fall-term admission by December 31 of the previous year pay a reduced application fee of \$25.

Application Deadlines: Spring Term

US Citizens/Permanent Residents:

November 1 - MPA, MPIA, MID, and MPPM applicants

December 1 - Non-degree applicants

International Students:

August 1 - MPA, MPIA, MID, and MPPM applicants

Application Deadlines: Summer Term

US Citizens/Permanent Residents:

March 1 - MPPM applicants

April 1 - Non-degree applicants

International Students:

January 15 - MPPM applicants

School-Based Funding

GSPIA offers competitive, merit-based scholarships to its most outstanding master's degree applicants. All applicants for fall admission are automatically considered for merit funding, as long as they are planning to pursue full-time study and have submitted a complete application by the February 1 deadline. There is no separate application for GSPIA merit funding.

Typically, awards are renewed for the student's second year, as long as the student has earned at least 24 credits and maintained an overall GPA of 3.5 or better.

Tuition

2018-2019 Academic Year Tuition*

Per Term Rate for Fall & Spring

PA Resident - \$11,145

Out-of-State - \$18,490

Per Credit and Summer Term

PA Resident - \$898

Out-of-State - \$1,512

2018-2019 Academic Year Mandatory Fees*

Security & Transportation Fee	\$90	\$90
Student Activity Fee	\$12	\$6
Wellness Fee	\$130	\$65

*Subject to change based on University of Pittsburgh tuition rates and fees

Academic Standards

Students are in good academic standing when they earn acceptable grades for graduate work and make normal progress toward the degree. Specifically, full-time students must earn a minimum of 9 credits per term with a minimum cumulative GPA of 3.5 in all courses. Part-time students are held to the same standards. However, they are expected to do so while carrying less than 9 credits per term. Full- or part-time students admitted with provisional status must maintain a minimum cumulative GPA of 3.0 in all courses in their first 12 credits.

Students receiving school-based funding are held to higher standards. Master's students must earn, after two terms, 24 credits and a cumulative GPA of 3.5. Doctoral students must earn 24 credits and a cumulative GPA of 3.0.

Probation

Students are automatically placed on academic probation when they fail to maintain a minimum GPA of 3.00 and earn the appropriate number of credits for their status. Students are also placed on academic probation automatically if they receive two G or I grades in one term and/or earn a grade of U, C- or lower.

Dismissal

Students who fail to correct the deficiencies of their academic probation within a specified time period (normally one term) are subject to dismissal. Should a student be dismissed, students may appeal the decision to the associate dean.

For additional information on academic standards and procedures, students are referred to GSPIA's Handbook of Academic Policies and Procedures for Master's Degree Programs, GSPIA's Handbook of Academic Policies and Procedures for the Doctor of Philosophy, and the University's Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Acceptance of Transfer Credits from Outside Institutions

Students who have completed graduate courses in degree-granting graduate programs at other accredited institutions prior to admission to GSPIA should submit official transcripts from those institutions at the time they apply so that the courses can be evaluated for transfer credits or waivers. If the source institution is located in the United States, the institution must be regionally accredited in order for the credits to be transferrable. Graduate-level courses taken while a student was enrolled in an undergraduate program are generally not eligible to be transferred into GSPIA. Under normal circumstances, only graduate-level courses taken after a student has earned a bachelor's degree may be evaluated as transfer credits. (See "Enrollment in Graduate Courses as an Undergraduate" above.) A maximum of 12 credits can be transferred for students enrolled in the MPA, MPA, and MID degree programs. A maximum of 6 credits can be transferred for students enrolled in the MPPM program. Students admitted with provisional status cannot transfer credits until full graduate student status has been granted.

Official transcripts certifying graduate courses completed at another regionally accredited institution can be evaluated for acceptability as transfer credits, provided grades of B or better (GPA = 3.0) or its equivalent has been earned. Other documentation such as course syllabi and descriptions will be required to support the student's request. The documents must prove that the course(s) are substantially similar in content to existing GSPIA course(s) in order for the transfer to be approved. Transfer (advanced standing) credits are entered as block transfer credits (advanced standing) on the student's transcript. Grades and quality points are not recorded for credits accepted by transfer.

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University. Graduate students already enrolled, may, when approved in advance by the director of student services, spend a term or more at another graduate institution, to obtain training or experience not available at the University, and transfer those credits toward the requirements for a GSPIA degree. In such instances, neither the University nor GSPIA is responsible for any financial assistance to the graduate student.

No credits will be granted toward a GSPIA degree for work completed in extension courses, correspondence courses, or those offered in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution, and provided that the institution has a regionally accredited program.

Acceptance of Transfer Credits from Other Graduate Schools at the University of Pittsburgh

With the exception of students enrolled in formal joint-degree programs, students who earn/have earned credits while enrolled as a graduate student at another University of Pittsburgh school may petition for some of their credits to count toward the GSPIA degree. Typically, no more than six credits earned while enrolled in another graduate program at the University of Pittsburgh may be counted toward the GSPIA degree. In most cases,

such credits will not be listed as transfer credits on the student's GSPIA transcript, and will count only as free electives. The final decision on course acceptability rests with the GSPIA director of student services and the University of Pittsburgh Registrar.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from GSPIA represents mastery of current knowledge in the student's field of study.

Requirements for the professional master's degrees must be completed within a period of five consecutive calendar years from the students' initial registration for graduate study. Joint degrees that require coursework in excess of 50 credits may be granted a longer statute of limitations.

Under exceptional circumstances a candidate may apply for an extension of the statute of limitations. The request must be approved by the division director and submitted to the dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Advising and Career Services

Academic Advising: Each student is assigned a faculty advisor based on, whenever possible, the compatibility of student and faculty academic interests. Faculty advisors assure that students, through proper course selection, can make productive use of the resources of the school and the University during their period of residence. In addition, faculty advisors are responsible for counseling their advisees about career opportunities in the student's area of study; for counseling advisees who have been placed on probation; and for approving the advisee's school-wide required and elective courses, proposed thesis or dissertation topics, and supervised internships. Advisors and students monitor academic progress and identify areas where corrective action on the part of students may be required. It is essential, therefore, that students consult periodically with their advisors. Unless students subsequently request a change, faculty members originally assigned will continue as advisors throughout the students' program of study. If, however, a change in faculty advisor is requested, students must obtain the signed approval of the new advisors. . Based on a student-focused approach, we provide students with a Graduate Enrollment Counselor who serves as the first point of contact for class registration, financial aid application and preparation for graduation. Additionally, graduate enrollment counselors support students by providing information necessary to navigate the logistical challenges of graduate school and connect students to resources at the University of Pittsburgh.

Professional Development and Career Services: GSPIA places great emphasis on assisting students in determining the best and most appropriate positions available. In addition to faculty advisors, the school provides resources and guidance for students throughout their course of study as they devise strategies to identify professional opportunities. Among the many services offered through the Office of Career Services are individual career advising, internship and job search assistance, and a series of career-related workshops and special events. Extensive reference materials on jobs, fellowships, and internships are made available in a variety of ways, including Career Connections, GSPIA's online career management system for students and alumni. Workshops cover such topics as resume preparation, job search strategies, negotiation skills, networking, and using technology in securing employment. Special events include Foreign Service information sessions, mock interviews for the Presidential Management Fellowship Program, an internship fair, and networking events with alumni, foundations, and agency representatives on campus and in Washington, D.C. All students are required to participate in the Professional Development Program. In this course, students will gain the knowledge and resources necessary to begin to plan their career and internship searches. This graduation requirement covers job search techniques, resume and cover letter review, interviewing skills, internship and company searches and much more.

Major and Degree Options

GSPIA offers the following degrees:

Master of Public Administration (MPA), including majors in:

Energy & Environment
Governance & International Public Management
Policy Research & Analysis

Public & Nonprofit Management
Urban Affairs & Planning

This is a 48 credit program. The average length of time normally required to obtain this degree is 2 years.

Master of Public and International Affairs (MPIA), including majors in:

International Political Economy
Security and Intelligence Studies
Human Security

This is a 48 credit program. The average length of time normally required to obtain this degree is 2 years.

Master of International Development (MID), including majors in:

Human Security
Urban Affairs & Planning
Governance and International Public Management
Energy & Environment
Nongovernmental Organizations & Civil Society

This is a 48 credit program. The average length of time normally required to obtain this degree is 2 years.

Master of Public Policy and Management (MPPM) -

Traditional accelerated mid-career master program or

Online mid-career master program

This is a 30 credit program. The average length of time normally required to obtain this degree is 2 years.

Doctor of Philosophy (PhD)

Joint degrees

Minors

Students have the flexibility to customize their education as any major can be taken as a minor. Adding a minor will help differentiate your education, deepen your knowledge base and broaden professional marketability. Each minor consists of a 9-credit sequence of courses within your chosen subject area. This is taken in addition to general required courses and courses for your major area of study. Any course taken to fulfill a requirement for your degree or major cannot count towards your minor. A course may not be double-counted. An approved course must be substituted.

MID, MPIA, and MPA students may select a minor from among the nine listed below.

Civil Security & Disaster Management
Governance & International Public Management
Energy & Environment
International Political Economy
Nongovernmental Organizations & Civil Society
Policy Research & Analysis
Public & Nonprofit Management
Security & Intelligence Studies
Urban Affairs & Planning

Joint Degrees

GSPIA students may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements (including entrance exams like the GRE, GMAT, and LSAT, where applicable). If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed on year 9or, in the case of current law students, two years) of full-time study.

Full-time students in the MPA, MPIA, or MID programs are eligible to participate in the following joint programs:

Juris Doctor with University of Pittsburgh School of Law: The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Master of Business Administration with University of Pittsburgh Katz Graduate School of Business - MPIA and MID students only: Combining a GSPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

Master of Public Health with University of Pittsburgh Graduate School of Public Health: Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Master of Social Work with University of Pittsburgh School of Social Work: Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Master of Science in Information Science with University of Pittsburgh School of Information Science: The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

International Organizations MBA with University of Geneva, Switzerland - MPIA and MID students only: In this unique program, students spend one year in Pittsburgh followed by a year in Switzerland. There, they pursue an internship in Geneva's thriving diplomatic community while completing the requirements for the University of Geneva's IO-MBA, a unique management program which focuses on the needs of international organizations. After returning to Pittsburgh for one semester, students receive degrees from both universities. Both degrees are taught in English.

Joint Degrees at Kobe University, Japan: Through a special partnership, students may combine their GSPIA degrees with one of several degrees offered by the Graduate School of International Cooperative Studies at Kobe University: the Master of International Affairs, Master of Laws, Master of Economics, or Master of Political Science. The Kobe GSICS curriculum is in English.

Early Admission Program for Pitt undergraduate students to complete their bachelor's degree while working on a master's degree at GSPIA. Once a student has completed 24 credits in GSPIA, they may apply and obtain their bachelor's degree.

To be eligible undergraduate University of Pittsburgh students must be enrolled in The Dietrich School of Arts and Sciences or the College of General Studies, be in good academic standing with a minimum overall GPA of 3.5, have a minimum of 96 credits, have completed all Skills and General Education requirements and have no "I" or "G" grades.

Applicants must submit an online application through www.gspia.pitt.edu, in essay #3 make reference that you are applying for the Early Admission Program, submit a letter from your Academic/Faculty Advisor stating that you have completed all courses in your major(s). Dietrich SAS applicants must submit a letter from Ms. Susan Crain, Dietrich SAS office of the Dean, stating that they satisfy the above eligibility requirements and may enter our masters program. CGS applicants must submit a letter from Timothy Carr, 459A Cathedral of Learning, stating that they satisfy the above eligibility requirements and may enter our masters program.

Special Academic Opportunities/Programs

GSPIA offers a variety of academic programs to complement the degree programs offered, including area studies, exchange programs, and research and travel grants.

Centers, Institutes and Initiatives

The Matthew B. Ridgway Center for International Security Studies - educates the next generation of security analysts and produces scholarship and impartial analysis that informs the options available to policymakers who must confront diverse challenges to international and human security on a global scale.

The Ford Institute for Human Security - conducts research that focuses on a series of transnational threats to the human rights of civilian populations and makes independent research and policy papers available to both domestic and international policymakers.

The Center for Metropolitan Studies - connects the academic programs at GSPIA with state and local governments, federal agencies, regional governance institutions, and nonprofit organizations in the United States to address real time problems they are confronting.

Johnson Institute for Responsible Leadership - reaffirms GSPIA's commitment to creating ethical leaders and provides an institutional platform from which to launch an innovative program of teaching, research, and public service on issues of ethics and accountability in all areas of public life.

Center for Disaster Management - provides a school-wide focus to support research, education, and training projects that focus on extreme events. The goal of the Center is to develop a coherent approach for research and analysis on policy issues related to disaster risk reduction and management that cross inter-organizational, interdisciplinary, and inter-jurisdictional boundaries.

Shale Gas Governance Center - The mission of the Shale Gas Governance Center is to promote research, teaching and outreach on the governance issues posed in Pennsylvania, the United States and around the world by the emergence of the "shale gas revolution."

The Roscoe Robinson Jr. Memorial Lecture Series - promotes discussion and understanding of key issues related to diversity in public service. The series features at least two lectures per year in honor of the late Roscoe Robinson Jr, the first African American, U.S. Army four-star general.

The Philanthropy Forum - provides a university-based platform for national dialogue with leading thinkers and practitioners in the field of philanthropy and engages in significant research on the history and contemporary contributions of philanthropy to our local, national, and global communities.

International Political Economy Colloquium (IPEC) - provides a forum for IPE scholars to present their best new works in progress.

Pittsburgh International Trade and Development Seminar Series - is a joint undertaking sponsored by the University of Pittsburgh's Department of Economics, Graduate School of Public and International Affairs and Carnegie Mellon University of Pittsburgh's Heinz College.

The Governance Group is an interdisciplinary research center at the University of Pittsburgh, focusing on governance, institutional design and program evaluation. A joint initiative of the Graduate School of Public and International Affairs (GSPIA) and the Department of Political Science, the Group is comprised of over a dozen faculty members from five different departments with the University.

The Symposium on Political Violence is a joint undertaking sponsored by the Graduate School of Public and International Affairs (GSPIA), the Department of Political Science, and the Matthew B. Ridgway Center for International Security at the University of Pittsburgh. The Symposium provides a forum both for external scholars and for faculty and graduate students in GSPIA and the Department of Political Science at Pitt to present their research on political science.

Area Studies

The University of Pittsburgh is home to several internationally recognized area studies centers. Many of these centers have been designated National Resource Centers (NRCs) by the US Department of Education, certifying their status as leading centers of their kind in the United States. The NRCs sponsor numerous programs and offer Foreign Language and Area Studies (FLAS) Fellowships for which GSPIA students (U.S. citizens only) are eligible. The area studies centers and programs include:

- African Studies
- Asian Studies Center
- Center for Latin American Studies
- Center for Russian and East European Studies
- European Studies Center

In addition, UCIS is home to a European Union Center of Excellence, one of only ten so designated and partially funded by the European Union in the United States. The Study Abroad Office and the Nationality Rooms and Intercultural Exchange Programs round out the UCIS component programs.

UCIS offers graduate certificates that GSPIA students can pursue concurrently with their degrees, allowing them to focus their studies on a particular region or theme. UCIS's constituent units offer nine certificate programs. It is normally possible to complete the requirements for a GSPIA master's degree and a UCIS certificate in two years. For further information, see UCIS' section of this catalog.

GSPIA Programs Abroad

GSPIA has developed a number of international partnerships that offer students the possibility to study abroad for a regular academic term, during the summer, or-in a double degree program-for an entire year or more:

International Organizations MBA in Geneva, Switzerland

This program provides students with the opportunity to earn a master's degree from GSPIA as well as an IO-MBA from the University of Geneva (Switzerland) in 28 months. Students spend a year in Geneva and normally pursue an internship in Europe at an international organization. This is an ideal option for anyone interested in working at the United Nations or a similar multilateral body. Coursework is in English.

Summer Studying the EU in Brussels, Belgium

This program enables GSPIA students to earn credits toward their degree while studying EU policies and interacting with EU officials at the Free University of Brussels (ULB). Courses are taught in English.

International Development and Asian Affairs in Kobe, Japan

This program enables students to earn a Certificate in International Development and Asian Affairs from GSICS at Kobe University while completing their masters degree from GSPIA.

Public Administration and/or International Studies in Seoul, Korea

This program enables students to earn credits toward their GSPIA degree by taking courses in the Graduate School of Public Administration and/or the Graduate School of International Studies at Seoul National University. Coursework can be completed in English or Korean.

Public Policy and International Affairs in Paris, France

This program enables students to earn credits toward their GSPIA degree by taking courses at the Institut d'Etudes Politiques de Paris (in French), or at its English-language wing, the Paris School of International Affairs.

Government or Political Science in Bogota, Colombia

This program enables students to earn credits toward their GSPIA degree by taking courses at the Department of Political Science at the University of the Andes, one of Latin America's leading institutions. Coursework is in Spanish.

Public Management in Nanjing, China

This program enables students to earn credits toward their GSPIA degree by taking courses at Nanjing University's School of Public Management. Coursework is in Chinese.

International Relations, Madrid, Spain

This program allows students to earn credits toward their GSPIA degree by taking courses at the School of International Relations, IE University. Coursework is in English.

Budget permitting, each year the Office of the Dean and the school's academic programs make available small grants to students. Uses for these grants can include attending professional development conferences, presenting papers, and supporting internships and study abroad activities. These grants are awarded through a highly competitive selection process.

Faculty

Lisa S. Alfredson, Professor, PhD, London School of Economics

Ariel Armony, Professor, PhD, University of Pittsburgh

Luke Condra, Assistant Professor, PhD, Stanford University

Sabina E. Deitrick, Associate Professor, PhD, University of California, Berkeley

George W. Dougherty, Assistant Professor, PhD, University of Georgia

William N. Dunn, Professor, PhD, Claremont Graduate University

Gary Hollibaugh, Assistant Professor, PhD, University of Rochester

Muge Kokten Finkel, Assistant Professor, PhD, University of Virginia

Shanti Gamper-Rabindra, Associate Professor, PhD, Massachusetts Institute of Technology

Marcela Gonzalez Rivas, Assistant Professor, PhD, University of North Carolina, Chapel Hill

Ryan Grauer, Assistant Professor, PhD, University of Pennsylvania

Daniel Jones, Assistant Professor, PhD, University of Pittsburgh

Kevin Kearns, Professor, PhD, University of Pittsburgh

John T.S. Keeler, Dean and Professor, PhD, Harvard University

Michael Kenney, Associate Professor, PhD, University of Florida

Michael Lewin, Lecturer, PhD, Johns Hopkins University

Sera Linardi, Assistant Professor, PhD, California Institute of Technology

Jerome B. McKinney, Professor, PhD, University of Missouri, Columbia

John Mendeloff, Professor, PhD, University of California, Berkeley

David Y. Miller, Professor, PhD, University of Pittsburgh

Jennifer B. Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison

Ilia Murtazashvili, Assistant Professor, PhD, University of Wisconsin, Madison

Lisa Nelson, Associate Professor, PhD, University of Wisconsin, Madison

Paul J. Nelson, Associate Dean, PhD, University of Wisconsin

Erica Owen, Assistant Professor, PhD, University of Minnesota

Louis A. Picard, Professor, PhD, University of Wisconsin, Madison

Michael Poznansky, Assistant Professor, PhD, University of Virginia

Taylor Seybolt, Associate Professor, PhD, Massachusetts Institute of Technology

Nuno Themudo, Associate Professor, PhD, London School of Economics

Jeremy Weber, Assistant Professor, PhD, University of Wisconsin, Madison

Meredith Wilf, Assistant Professor, PhD, Princeton University

Phil Williams, Wesley W. Posvar Chair for International Security Studies, University of Southampton

Part-time and Visiting Faculty

Kathleen Buechel, Senior Lecturer, MA, Kennedy School of Government, Harvard University

Julie Santucci, Senior Lecturer, MA, University of Arizona

Program and Course Offerings

Certificate

Certificate in Cybersecurity, Policy and Law

To be a leader in cybersecurity requires more than just technical knowledge - it also requires a deeper understanding of the of the cyber challenges surrounding law, policy, regulations, and ethics. We are offering a Graduate Certificate in Cybersecurity, Policy and Law from three schools within the University of Pittsburgh: the Graduate School of Public & International Affairs, School of Law and the School of Computing and Information.

Cybersecurity is a multidisciplinary field that involves technical issues, security policies, regulation and law. Our integrated curriculum provides students with the skills to develop comprehensive cybersecurity policies and strengthen cybersecurity environments to minimize risk.

As part of the certificate's multidisciplinary approach, the certificate requires courses to be taken from all three Pitt schools. Students must complete a minimum of three courses from the School of Computing and Information, one course from the Graduate School of Public and International Affairs, and one course from the School of Law to earn the certificate.

Applicants must have a Bachelor's degree. All students are expected to complete the program within one to two years.

Students enrolled in a Graduate School of Public & International (GSPIA) degree program may count no more than six (6) of the certificate credits (two courses) toward their degrees.

Students will need to contact the School of Law or School of Computing & Information to obtain permission to take courses from those schools.

The Certificate curriculum, comprising of 15 credits, follows:

Graduate School of Public & International Affairs: 3 credits

- PIA 2156 - ETHICS AND POLICY IN CYBER SPACE
- PIA 2360 - CYBER SECURITY POLICY
- PIA 2379 - INTRODUCTION TO CYBER CRIMES
- PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE
- PIA 2365 - TRANSNATIONAL CRIME
- or
- PIA 2xxx Policy Analysis for Cyber Security & Intelligence Studies

School of Law requirements: 3 credits

- LAW 5623 - CYBER LAW AND POLICY
- LAW 5380 - CYBERCRIME
- LAW 5620 - CYBERSECURITY & PRIVACY REGLN
- LAW 5404 - CYBERSPACE AND THE LAW
- LAW 5430 - INFO PRIVACY LAW AND PRACTICE
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5877 - LAW MAKING SEMINAR

School of Computing & Information

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- INFSCI 2731 - SECURITY IN E-COMMERCE
- INFSCI 2625 - CYBERSECURITY AND PRIVACY REGULATION
- TELCOM 2821 - NETWORK SECURITY
- TELCOM 2811 - HACKING FOR DEFENSE

- CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY
- CS 2530 - COMPUTER AND NETWORK SECURITY
- CS 3525 - ADVANCED TOPICS IN SECURITY AND PRIVACY

Doctoral

Public and International Affairs, PhD

Requirements

The PhD program requires the completion of 72 credits of course work and 6 credits for the dissertation for a total of 78 credits. The curriculum for doctoral students is outlined as follows:

Doctoral Core Courses: 12 credits

- PIA 3000 - INTERMEDIATE QUANTITATIVE METHODS
- PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS
- PIA 3050 - QUALITATIVE RESEARCH: DESIGN AND METHODS
- PIA 2025 - MICROECONOMICS
or
- PIA 2028 - PUBLIC POLICY ANALYSIS

Field Seminars: 6 credits

Students must take two (2) of the following four field seminars.

- PIA ---- IA (International Affairs) FIELD SEMINAR
- PIA ---- ID (International Development) FIELD SEMINAR
- PIA ---- PA (Public Administration) FIELD SEMINAR
- PIA ---- PP (Public Policy) FIELD SEMINAR

Note: Field Seminars are only offered once every two (2) years, so students must register for the chosen seminars as soon as they are offered.

Electives: 24 credits

Students must take eight (8) additional graduate level courses.

PIA 3099 Dissertation: 6 credits

Students must be admitted to candidacy and must be writing their dissertation to be eligible to register for PIA 3099 Dissertation. Six (6) credits of PIA 3099 Dissertation are required to graduate.

- PIA 3099 - DISSERTATION PHD

Minimum Required Credits: 78 credits

Students must complete 72 credits of course work, excluding the 6 dissertation credits, with a minimum GPA of 3.0. Students must meet this requirement in order to qualify for final approval of their comprehensive examinations. Students are required to maintain full-time status while completing the 72 credits of coursework.

Doctoral Milestones

Plan of Study Meeting

After electing field and subfields early in the first term of study, students will meet with the faculty advisers representing their field and primary subfield. This meeting's aim is to structure a program that best serves the student's interests and ensures that the degree requirements are met in a timely and stipulated manner. At this meeting, the acceptance of course credits from previous graduate studies is also discussed.

Annual Progress Evaluation: First and Second Years

Held with the student's field and primary subfield advisers, the review serves the following purposes:

- To identify any necessary adjustments to the student's original plan of study
- In exceptional circumstances, to signal that a student's performance points to a reconsideration of his/her doctoral status.

The annual review should be scheduled near the end of each academic year. The student is responsible for scheduling this meeting, and should be fully aware that many professors may be unavailable after the end of the term. Failure to schedule this meeting in a timely manner may lead to the review being undertaken without student participation.

It is expected that the two faculty advisers will solicit comments from those faculty with whom the student has taken coursework during the year, especially in relation to courses in which the student did not perform adequately (i.e., received a G, I or lower than B grade).

Annual Dissertation Progress Evaluation: Third and Later Years

At the end of the third and later years, the student must undergo an annual evaluation of their progress toward the dissertation. As stated in the Regulations Governing Graduate Study at the University of Pittsburgh, "meetings of the doctoral candidate and his/her dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the committee should assess the student's progress toward the degree and discuss objectives for the following year and a timetable for completing degree requirements.

The student's dissertation committee, or academic advisers if a dissertation committee has not been approved by the end of the third year of studies, will undertake the evaluation. Unjustified failure to make sufficient progress toward the dissertation will be grounds for suspension of funding and, possibly, dismissal from the program.

Comprehensive Examinations

The comprehensive examination is designed to assess the student's mastery of two general fields of doctoral study. Unless an exception is granted by the Doctoral Program Director, Comprehensive Examinations are taken in May following a student's fourth semester, after the student completes all required courses and earns at least 72 credits (including advanced standing credits). In addition, all incomplete grades must be removed by meeting the requirements to complete the courses; even if the course is viewed by the student as not being relevant to his or her degree program.

Two Comprehensive Exams must be taken, corresponding to two of the four PhD fields (Public Policy, Public Administration, International Development, International Affairs). Students may change their chosen fields up until the registration for the Comprehensive Exams in the spring term of their second year. Each exam will be 60-hour take-home exam that require responses to three questions out of a pool of up to nine potential questions. Answers are limited to 2,000 words per question (not including references or footnotes). During the 60-hour period, students cannot communicate with others about the exam questions. Students' evaluation in comprehensive exams will be based on their mastery of the relevant literatures only.

Faculty will provide reading lists for each field that will be used to clarify expectations about the literatures that students are expected to master. The lists must be of reasonable length as determined by the field committee in consultation with the PhD program director. The PhD program director will provide incoming students with the most updated readings lists for all fields. No changes can be made to reading lists within 6 months of the comprehensive exam date.

Establishing the Dissertation Committee

During the third year of studies, and before admission to candidacy for the PhD degree, the major academic adviser (i.e., committee chair) proposes, for the approval of the director of the school's doctoral program and the dean, a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the dissertation committee. The majority of the committee, including the major adviser, must be full or adjunct members of the Graduate Faculty. This committee must review and approve the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated three times a year. *Only a GSPIA faculty member is eligible to serve as the chair of the committee.*

This dissertation committee has the responsibility to advise the student on his/her research and has the authority to require high-quality research and/or the rewriting of any portion or the entire dissertation. It conducts the final oral examination and determines whether the dissertation meets accepted standards.

The student must meet with his/her dissertation committee at least once a year (see Annual Dissertation Progress Evaluation above).

The membership of the dissertation committee may be changed whenever it is appropriate or necessary, subject to the approval of the Doctoral Program Director and the Dean.

When a dissertation committee member leaves the University, the member must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed from within the department, and the restructured committee requires the approval of the dean and either the department chair or the director of the school's doctoral program. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.

Retired faculty members may remain as members or chairs of committees if they are spending considerable time in Pittsburgh or the vicinity and are still professionally active. Retired faculty who meet these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the dean and either the department chair or the school's director of doctoral programs.

The completed and signed Dissertation Committee Approval Form and/ or the Change in Dissertation Committee Form should be submitted to the Office of Student Services for posting and filing.

All coordination between Dissertation Committee members is the responsibility of the student.

Dissertation Proposal

Immediately after passing the comprehensive examinations, and establishing the dissertation committee, the students should meet with the chair to discuss the development of a dissertation proposal, which outlines the goals and objectives, theoretical argument, policy implications, literature, research design, and timetable for the dissertation research.

The student will submit the Announcement of Dissertation Proposal Meeting Form, available from the Office of Student Services, to the Doctoral Program Director ten days prior to the proposal meeting. The announcement will be sent to the faculty and graduate student email lists. Proposal defense meetings are open to all faculty and students.

There must be a minimum of three members present for the meeting to be convened, and the absent member is required to submit a written evaluation of the proposal to the Committee Chair. Under no circumstances can the meeting be held without the Chair. If the Committee accepts the proposal, all Committee members will sign the Approval of Dissertation Proposal Form, available from the Office of Student Services. The completed and signed form is then submitted along with a copy of the approved proposal to the Ph.D. Program Director, who has final approval. According to University guidelines, only after the proposal has been accepted as final by the Doctoral Program Director does the student advance to candidacy. The signed and completed form is to be returned to the Office of Student Services for posting and filing.

Dissertation

The Dissertation Committee must meet a minimum of once a year; however, students are strongly encouraged to schedule more frequent committee meetings.

An appropriate dissertation should be a substantive piece of original and independent research grounded in an appropriate body of literature. The characteristics which a dissertation should demonstrate are:

- the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution,
- a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base,
- a well-defined research design,
- clarity in composition and careful documentation,
- results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph,
- sufficient detail so that other scholars can build on it in subsequent work, and
- the preparation of the author to assume a position within the profession.

Oral Defense of the Dissertation

At the oral defense, the student will be asked to explain and justify dissertation research and to assess its relation and contribution to the literature and policy in the field. The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the University Times. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the dissertation committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the dissertation committee, must be sent to the Office of Student Services for posting and filing. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the dissertation committee should ensure that the dissertation is in final form, i.e., all required changes have been made, before requesting signatures of the members of the committee.

Electronic Thesis and Dissertation (ETD)

After approval of the dissertation, all candidates are required to publish the document electronically via d-scholarship. For access to more information on ETD and training, go to www.pitt.edu/~graduate/etd/training.html.

Minor

Social Policy Minor

The Social Policy minor is 9 credits (three courses). Because some of the listed courses are required for some students in MPA, there will be some variation in requirements for the minor. Students must complete either of the required courses. For students who are not in the MPA program, the Social Policy minor requires PIA 2117 - PUBLIC PROGRAM EVALUATION. Students in MPA (who already take Program Evaluation as a required course) will be required to complete three course from the list of courses above. No more than one methods course can be used to complete the Social Policy minor.

Public Administration Program

Master of Public Administration (MPA)

Public administration is a field practiced at the intersection of the government, nonprofit, and private sectors. GSPIA's MPA program trains managers to balance the needs of each community with its resources, promoting neighborhood development, effective local government, ethical leadership, and

responsible business practices. Students acquire an incredibly diverse and flexible set of professional skills appropriate for careers in nonprofit agencies, government offices, and private businesses worldwide.

The 48-credit MPA degree is designed to advance the core value of social equity fundamental to today's public management. GSPIA's programs in urban affairs and nonprofit management are consistently ranked among the very best in the country. Additionally, GSPIA's Center for Metropolitan Studies and the Johnson Institute for Responsible Leadership bridge the gap between theory and practice, allowing students to work directly with local government and nonprofit leaders. In 2012 US News ranked GSPIA #19 among all MPA programs for "City Management and Urban Policy." A major reason for this strength is GSPIA's relationship with Pitt's University Center for Social and Urban Research (UCSUR), where students and faculty engage in scholarly analysis of urban and regional issues. UCSUR promotes a multidisciplinary research agenda centered on economic, demographic, and social change in cities and regions.

Degree Requirements and Majors

MPA students may choose one of five majors: Energy and Environment, Public & Nonprofit Management, Urban Affairs & Planning, Governance & International Public Management or Policy Research & Analysis. Students may also pursue a minor in any of these fields, or in any of the following fields offered by GSPIA's other degree programs.

Prior to graduation, students must also complete a 300-hour internship with an approval from GSPIA career services.

Joint Degree Options

MPA students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MPA/law degree (JD), MPA/Master of Public Health (MPH), MPA/Master of Science in Information Science (MSIS), and MPA/Master of Social Work (MSW). They may also pursue a joint master's degree through the Graduate School of International Cooperative Studies at Kobe University in Japan. An accelerated, five-year bachelor's/master's degree program is available to select University of Pittsburgh undergraduates.

Area Studies Certificate Options

MPIA students are eligible to combine their master's degree with a graduate certificate from the University Center for International Studies, specializing in Africa, Asia, western Europe, eastern Europe, the European Union, Latin America, or Russia.

Accreditation

GSPIA's Master of Public Administration degree is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA). NASPAA accreditation recognizes that a master's program in public affairs has gone through a rigorous process of voluntary peer review conducted by the Commission on Peer Review and Accreditation (COPRA), and has met NASPAA's Standards for Professional Master's Degree Programs in Public Affairs, Policy, and Administration.

Joint Degree

Energy and Environment, JD/MPA

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students

spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Juris Doctor

The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues, such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)
- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Juris Doctor requirements: 79 credits

(see Law's website for requirements)

Total Number of Credits for Joint Degree: 115

Major Specific Requirements:

Students must take three of the following five courses & one additional approved E&E major courses.

Energy and Environment

- PIA 2231 - CONTEMPORARY US ENERGY POLICY
OR
- PIA 2115 - ENVIRONMENTAL ECONOMICS
OR
- PIA 2502 - POLITICAL ECONOMY OF GLOBAL ENVIRONMENT
OR
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT

- PIA 2xxx - Approved E&E Major Course

Energy and Environment, MPA/MIS

Joint Degree

Full-time GSPIA students in the MPA, MPA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Master of Science in Information Science

The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/MIS

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Information Science requirements: 30 credits

(see Information Science website for requirements)

Total Number of Credits for Joint Degree: 66

Major Specific Requirements:

Students must take three of the following five courses & one additional approved E&E major courses.

Energy and Environment

- PIA 2231 - CONTEMPORARY US ENERGY POLICY
OR
- PIA 2115 - ENVIRONMENTAL ECONOMICS
OR
- PIA 2502 - POLITICAL ECONOMY OF GLOBAL ENVIRONMENT
OR
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT

- PIA 2xxx - Approved E&E Major Course

Energy and Environment, MPA/MPH

Joint Degree

Full-time GSPIA students in the MPA, MPA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Master of Public Health

Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/MPH

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior = PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)
- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Public Health requirements: 42 credits

(see Public Health website for requirements)

Total Number of Credits for Joint Degree: 78

Major Specific Requirements:

Students must take three of the following five courses & one additional approved E&E major courses.

Energy and Environment

- PIA 2231 - CONTEMPORARY US ENERGY POLICY
OR
- PIA 2115 - ENVIRONMENTAL ECONOMICS
OR
- PIA 2502 - POLITICAL ECONOMY OF GLOBAL ENVIRONMENT
OR
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT

- PIA 2xxx - Approved E&E Major Course

Energy and Environment, MPA/MSW

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Master of Social Work

Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/MSW

GSPIA Core Requirements: 18 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2021 - INTERNATIONAL AFFAIRS *
- PIA 2022 - QUANTITATIVE METHODS
- PIA 2024 - ECONOMICS FOR PUBLIC AFFAIRS *
- PIA 2025 - MICROECONOMICS or
- PIA 2028 - PUBLIC POLICY ANALYSIS

Policy Research and Analysis, JD/MPA

Joint Degree

Full-time GSPIA students in the MPA, MPJA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Juris Doctor

The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues, such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Master of Public Administration and Master of Science in Information Science

The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Requirements for the joint degree MPA/MIS

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Information Science requirements: 30 credits

(see Information Science website for requirements)

Total Number of Credits for Joint Degree: 66

Major Specific Requirements:

Public & Nonprofit Management

- PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR
- PIA 2185 - STRATEGIC MANAGEMENT
(pre-requisites: PIA 2020 or 2170)
- PIA 2xxx - Approved PNM Major Course
- PIA 2xxx - Approved PNM Major Course

Public and Nonprofit Management, MPA/MPH

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Master of Public Health

Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/MPH

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior = PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)
- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Public Health requirements: 42 credits

(see Public Health website for requirements)

Total Number of Credits for Joint Degree: 78

Major Specific Requirements:

Public & Nonprofit Management

- PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR
- PIA 2185 - STRATEGIC MANAGEMENT
(pre-requisites: PIA 2020 or 2170)
- PIA 2xxx - Approved PNM Major Course
- PIA 2xxx - Approved PNM Major Course

Public and Nonprofit Management, MPA/MSW

Joint Degree

Full-time GSPIA students in the MPA, MPJA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Master of Social Work

Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/MSW

GSPIA Core Requirements: 18 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2021 - INTERNATIONAL AFFAIRS *
- PIA 2022 - QUANTITATIVE METHODS
- PIA 2024 - ECONOMICS FOR PUBLIC AFFAIRS *
- PIA 2025 - MICROECONOMICS or
- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM
- PIA 2098 - INTERNSHIP

Degree Core Courses: 9 credits

- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION
- PIA 2096 - CAPSTON SEMINAR: or
- PIA 2099 - THESIS (pre-req. PIA 2028 + PIA 2003 + approval)

Major Courses: 9-12 credits

(see Major-Specific requirements)

Minimum Required GSPIA Credits: 36 credits

Master of Social Work requirements: 51 credits

(see Social Work website for requirements)

Total Number of Credits for Joint Degree: 87

Major Specific Requirements:

Public & Nonprofit Management

- PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR
- PIA 2185 - STRATEGIC MANAGEMENT
(pre-requisites: PIA 2020 or 2170)
- PIA 2xxx - Approved PNM Major Course
- PIA 2xxx - Approved PNM Major Course

Urban Affairs & Planning, JD/MPA

Joint Degree

Full-time GSPIA students in the MPA, MPJA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Juris Doctor

The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues, such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPA/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)
- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Juris Doctor requirements: 79 credits

(see Law's website for requirements)

Total Number of Credits for Joint Degree: 115

Major Specific Requirements:

Urban Affairs & Planning (UAP)

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2xxx - Approved UAP Major Course

Urban Affairs & Planning, MPA/MIS

Joint Degree

Full-time GSPIA students in the MPA, MPPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public Administration and Master of Science in Information Science

The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2xxx - Approved UAP Major Course

Master's

Energy and Environment, MPA

Energy & Environment (E&E)

Energy & Environment explores the politics and policies of the worldwide energy industry, examining ways to meet global energy needs in a sustainable, environmentally conscious way. Pittsburgh is a global epicenter of one of the biggest energy revolutions of the 21st century - the shale gas boom. New technologies like "fracking" are making billions of dollars of natural gas accessible to world markets for the first time, generating thousands of new jobs from Europe to North America. Western Pennsylvania sits atop one of the largest and most productive shale deposits anywhere on the planet, raising major questions about how to extract the gas responsibly, how to protect communities from environmental harm, and how to tax and regulate the rapid growth. GSPIA Students study the economics of the global energy industry, environmental sustainability, and regulatory policy in one of the world's best living laboratories. Graduates are prepared for jobs at environmental protection agencies, energy corporations, and a host of local, state, and national government offices that make energy policy.

The major curriculum, comprising 12 credits, follows:

GSPIA core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)

Major Courses: 12 credits

- PIA 2xxx - Approved E&E Major Course

Three of the following five courses:

- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2502 - POLITICAL ECONOMY OF GLOBAL ENVIRONMENT
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2522 - POLITICAL ECONOMY OF GLOBAL ENERGY

Electives: 15 credits

Minimum Required Credits: 48 credits

Governance & International Public Management, GIPM/MPA

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Core: Governance & International Public Management(GIPM)

The major curriculum, comprising 12 credits, follows:

GSPIA core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-requisite: PIA 2022)

Major Courses: 12 credits

- PIA 2xxx - Approved GIPM Major Course
- PIA 2xxx - Approved GIPM Major Course

Two of the following four courses:

- PIA 2528 Governance & Local Government and Civil Society
- PIA 2519 Comparative Governance

- PIA 2552 Managing Organizations in Development
- PIA 2180 Comparative Public Administration

Electives: 15 credits

Minimum Required Credits: 48 credits

Policy Research and Analysis, MPA

Policy Research and Analysis (PRA)

Today's policymakers require analytical skills from a variety of disciplines: quantitative, economic, political, and organizational. Students in the policy research & analysis major enjoy access to a rich array of resources to help them prepare for careers in both the public and private sectors. Recent graduates of our program have gone on to work in such careers as budget examiners for the state of New York, analysts for the Government Accountability Office and the U.S. Mint and consultants for the leading firm Booz Allen Hamilton.

Motivated and inquisitive people looking to acquire the technical skills and knowledge to contribute to research and policymaking decisions will appreciate our curriculum. It is infused with a rich variety of interdisciplinary viewpoints to give students a well-informed view of policy analysis that is both national and international in scope.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-req: PIA 2022)

Major Courses: 12 credits

- PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS (pre-requisite PIA 2022)
- PIA XXXX Approved PRA major course
- PIA XXXX Approved PRA major course
- PIA XXXX Approved PRA major course

Electives: 15 credits

Minimum Required Credits: 48 credits

Public and Nonprofit Management, MPA

Public and Nonprofit Management (PNM)

Public service is a discipline practiced at many levels: local, national and international often with ripple effects across each. Through grassroots contributions and global applications, GSPIA students pursuing a public & nonprofit management major acquire a deep understanding of the many contexts in which public and nonprofit organizations operate. Many look forward to the opportunity to leverage change in a mixed economy.

Our curriculum stresses responsible leadership and our students develop the skills to diagnose leadership challenges and opportunities from a variety of ethical and moral frameworks. Our interdisciplinary approach draws from a variety of fields such as philosophy, law, organizational design and political science. Our approach gives students the skills they need to meet the challenges of a world in which services increasingly span boundaries among business, government and nonprofit organizations.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-req: PIA 2022)

Major Courses: 12 credits

- PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR
- PIA 2185 - STRATEGIC MANAGEMENT (pre-req. PIA 2020 or PIA 2170)
- PIA XXXX Approved PNM major course
- PIA XXXX Approved PNM major course

Electives: 15 credits

Minimum Required Credits: 48 credits

Urban Affairs & Planning, MPA

Urban Affairs & Planning (UAP)

The major in Urban Affairs and Planning takes a city-focused perspective on international development. More than half of the world's people now live in urban areas, raising important questions about how governments should meet the public's needs for transportation, health and sanitation, education, and other essential services.

As the developing world urbanizes, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face critical challenges, including poverty, homelessness, and pollution. The major prepares students to confront those problems on an international scale, while developing valuable skills in Geographic Information Systems (GIS), regional economic planning, and sustainable development management. Students take advantage of GSPIA's highly regarded Center for Metropolitan Studies, participating in cutting-edge research alongside faculty experts.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2104 - FINANCIAL MANAGEMENT
- PIA 2117 - PUBLIC PROGRAM EVALUATION (pre-req: PIA 2022)

Major Courses: 12 credits

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2xxx - Approved UAP Major Course

Electives: 15 credits

Minimum Required Credits: 48 credits

Minor

Energy and Environment Minor

The required courses for the Energy & Environment Minor are:

PIA 2523 Global Energy Policy (3cr)

or

PIA 2231 Current Controversies - U.S. Energy Policy (3cr)

PIA 2502 Global Environmental Policy (3cr)

or

PIA 2115 Environmental Economics (3cr)

PIA 2XXX Approved E&E course (3cr)

With approval, appropriate courses may be substituted for those listed above. No course may be double-counted. Any course taken to fulfill a requirement for your degree or major cannot also count toward your minor. In such cases, an approved course must be substituted. Please consult with your graduate enrollment counselor.

Policy Research and Analysis Minor

The requirements for the Policy Research and Analysis minor are:

PIA 2023 Intermediate Quantitative Methods (3cr)

PIA 2025 Microeconomics (3cr)

PIA 2117 Program Evaluation (3cr)

With approval, appropriate courses may be substituted for those listed above. No course may be double-counted. Any course taken to fulfill a requirement for your degree or major cannot also count toward your minor. In such cases, an approved course must be substituted. Please consult with your graduate enrollment counselor.

Public and Nonprofit Management Minor

The requirements for the Public and Nonprofit Management minor are:

PIA 2103 Managing People in the Public/Nonprofit Sector (3cr)

PIA 2117 Program Evaluation (3cr)

PIA 2185 Strategic Management (3cr)

With approval, appropriate courses may be substituted for those listed above. No course may be double-counted. Any course taken to fulfill a requirement for your degree or major cannot also count toward your minor. In such cases, an approved course must be substituted. Please consult with your graduate enrollment counselor.

Urban Affairs & Planning Minor

The requirements for the Urban Affairs and Planning minor are:

PIA 2025 Microeconomics (3cr)

PIA 2125 City & Regional Theory & Practice (3cr)

PIA 2715 GIS for Public Policy (3cr)

With approval, appropriate courses may be substituted for those listed above. No course may be double-counted. Any course taken to fulfill a requirement for your degree or major cannot also count toward your minor. In such cases, an approved course must be substituted. Please consult with your graduate enrollment counselor.

Public and International Affairs Program

Master of Public and International Affairs (MPIA)

From the halls of the United Nations to the streets of war-torn conflict zones, the modern international system is in a state of rapid flux that demands versatile, well-educated professionals. The MPIA degree is a multidisciplinary program designed to prepare students for careers of influence in the international arena - as government policymakers, diplomats, intelligence officials, global business leaders, nonprofit managers, and policy researchers. The program emphasizes practical skills and knowledge necessary to participate in the world policy process and shape its future. The MPIA curriculum includes traditional courses on world history, economics, and international relations theory, along with practical courses on intelligence collection and analysis, diplomacy, and international finance. It also includes one of the country's only graduate specializations in Human Security - a unique field that focuses on the security of civilian populations and human rights.

Degree Requirements and Majors

Students must complete at least 48 credits in public and international affairs and may choose one of three majors: International Political Economy, Human Security, or Security & Intelligence Studies. Students may also pursue a minor in any of these fields, or in any of the following fields offered by GSPIA's other degree programs.

Prior to graduation, students must also complete a 300-hour internship with an approval from GSPIA career services.

Joint Degree Options

MPIA students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MPIA/law degree (JD), MPIA/Master of Business Administration (MBA), MPIA/Master of Public Health (MPH), MPIA/Master of Science in Information Science (MSIS),

and MPIA/Master of Social Work (MSW). They may also pursue a joint master's degree through the University of Geneva in Switzerland or the Graduate School of International and Cooperative Studies at Kobe University in Japan. An accelerated, five-year bachelor's/master's degree program is available to select University of Pittsburgh undergraduates.

Area Studies Certificate Options

MPIA students are eligible to combine their master's degree with a graduate certificate from the University Center for International Studies, specializing in Africa, Asia, western Europe, eastern Europe, the European Union, Latin America, or Russia.

Joint Degree

Human Security, JD/MPIA

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Juris Doctor

The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues, such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPIA/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional lecture)
- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS

- PIA 2028 - PUBLIC POLICY ANALYSIS (pre-req. PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2363 - INTERNATIONAL HISTORY

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Juris Doctor requirements: 79 credits

(see Law website for requirements)

Total Number of Credits for Joint Degree: 115

Major Specific Requirements:

Human Security

- PIA 2xxx - Approved HS Major Course
- PIA 2xxx - Approved HS Major Course
- PIA 2xxx - Approved HS Major Course
- PIA 2xxx - Approved HS Major Course

Human Security, MBA/MPIA

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Master of Business Administration

For MPIA and MID students only: Combining a GSPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPIA/MBA

Student is required to take one of the following depending on major:

If SIS major: PIA 2303 Security & Intelligence Studies

If IPE major: PIA 2301 International Political Economy

If HS major: PIA 2307 Human Security

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre-req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR

- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2363 - INTERNATIONAL HISTORY
- PIA 2021 - INTERNATIONAL AFFAIRS

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Business Administration requirements: 39 or 40.5 credits

(see Business Administration website for requirements)

Total Number of Credits for Joint Degree: 75.5 or 76

Major Specific Requirements:

Human Security

- PIA 2xxx - Approved HS Major Course
- PIA 2xxx - Approved HS Major Course
- PIA 2xxx - Approved HS Major Course
- PIA 2xxx - Approved HS Major Course

Human Security, MPIA/MIS

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE

requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public and International Affairs and Master of Science in Information Science

The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public and International Affairs and Master of Public Health

Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. - PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2363 - INTERNATIONAL HISTORY

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Information Science requirements: 30

(see Information Science website for requirements)

Total Number of Credits for Joint Degree: 66

Major Specific Requirements:

Security & Intelligence Studies

- PIA 2xxx - Approved SIS Major Course
- PIA 2xxx - Approved SIS Major Course
- PIA 2xxx - Approved SIS Major Course
- PIA 2xxx - Approved SIS Major Course

Security and Intelligence Studies, MPIA/MPH

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Master of Public Health

Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPIA/MPH

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. if waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre-req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2363 - INTERNATIONAL HISTORY

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Master of Social Work

Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

- PIA 2xxx - Approved SIS Major Course

Master's

Human Security, MPIA

Human Security

Because the globalization process has made the world seem exponentially smaller, threats from tsunamis, earthquakes, disease and starvation are arriving faster and in more dramatic fashion than ever before. One of the most innovative, forward-thinking disciplines in international affairs today, the human security major covers a wide swath of issues critical to the safety of people worldwide.

GSPIA's program, one of the first of its kind in the United States, emphasizes the development of peacekeeping and peace-building skills. Students study threats to individuals from nongovernmental, nonmilitary sources. Examples of threats include civil wars, international migration and crime, global climate changes and natural disasters. We teach students to focus on the human condition as a planet, resulting in a new generation of leaders able to guide our global community through some of the most perilous times it has ever experienced.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2307 - HUMAN SECURITY
- PIA 2363 - INTERNATIONAL HISTORY

HS Major Courses: 12 credits

- PIA XXXX Approved HS major course
- PIA XXXX Approved HS major course
- PIA XXXX Approved HS major course
- PIA XXXX Approved HS major course

Electives: 15 credits

Minimum Required Credits: 48 credits

International Political Economy, MPIA

International Political Economy

From the Euro to the yen, today's global economy operates in a climate of change. The international global political economy (IPE) major teaches students to understand globalization and the role the state plays, as well as market strategies for corporations and their corporate identities. Courses target competencies in finance, economics, international trade and development. Specific topics range from the work of nongovernmental organizations (NGOs) to political climates in post-Communist states and the role of women in developing countries.

GSPIA IPE students are idealistic, curious about the world and eager to put their vision into practice. Recent IPE graduates include a treasury expert with the Republic of Turkey, a project manager specialist for the U.S. Agency for International Development's Mission in Moscow, a presidential management fellow with the U.S. Department of Commerce, and a United Nations Fulbright Fellow with the Department of Social and Economic Affairs.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY
- PIA 2363 - INTERNATIONAL HISTORY

Major Courses: 12 credits

- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course

- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course

Electives: 15 credits

Minimum Required Credits: 48 credits

Security and Intelligence Studies, MPIA

Security and Intelligence Studies

The post-9/11 world has brought remarkable change to national and international security. Issues of strategy, weapons systems, national defense and the role of government are being redefined every day. GSPIA's major in security & intelligence studies (SIS) approaches issues within an international context and covers a variety of topics including transnational organized crime, terrorism, weapons of mass destruction and competition for natural resources.

SIS students are interested in the use of technology, investigation and discovery and often have a desire to travel internationally. Our program prepares students for careers in the security or intelligence fields with various think tanks or intelligence agencies, such as the FBI or CIA.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 9 credits

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES
- PIA 2363 - INTERNATIONAL HISTORY

Major Courses: 12 credits

- PIA XXXX Approved SIS major course
- PIA XXXX Approved SIS major course
- PIA XXXX Approved SIS major course
- PIA XXXX Approved SIS major course

Electives: 15 credits

Minimum Required Credits: 48 credits

Minor

Security and Intelligence Studies Minor

The requirements for the Security and Intelligence minor are:

PIA 2303 Security & Intelligence (3cr)

PIA 2XXX Approved SIS course (3cr)

With approval, appropriate courses may be substituted for those listed above. No course may be double-counted. Any course taken to fulfill a requirement for your degree or major cannot also count toward your minor. In such cases, an approved course must be substituted. Please consult with your graduate enrollment counselor.

International Development Program

Master of International Development (MID)

MID students promote respect for human life and human rights, often working behind the scenes to bring real improvements to the human condition through hands-on careers in public service. They work face-to-face with underprivileged and vulnerable populations, in the front offices of aid agencies, and in international organizations dedicated to protecting those who need help most.

The 48-credit MID degree is designed to prepare students to make a difference locally, nationally, and globally by emphasizing intellectual rigor and practical skills. Students study development theoretically, but also learn concrete technical and managerial skills necessary to work in organizations that promote equality in the developing world. Graduates exit the program prepared for professional work in the United Nations, public aid agencies, and charities of all sizes. Often, they pursue work in the private sector, research groups, and prominent nongovernmental organizations.

Degree Requirements and Majors

Students must complete at least 48 credits in international development and may choose one of five majors: Energy & Environment, Human Security, Nongovernmental Organizations & Civil Society, Urban Affairs & Planning, or Governance & International Public Management. Students may also pursue a minor in any of these fields, or in any of the following fields offered by GSPIA's other degree programs.

Prior to graduation, students must also complete a 300-hour internship with an approval from GSPIA career services.

Joint Degree Options

MID students are eligible to pursue one of several joint degrees at the University of Pittsburgh, including a joint MID/law degree (JD), MID/Master of Business Administration (MBA), MID/Master of Public Health (MPH), MID/Master of Science in Information Science (MSIS), and MID/Master of Social Work (MSW). They may also pursue a joint master's degree through the University of Geneva in Switzerland or the Graduate School of International Cooperative Studies at Kobe University in Japan. An accelerated, five-year bachelor's/master's degree program is available to select University of Pittsburgh undergraduates.

Area Studies Certificate Options

MPIA students are eligible to combine their master's degree with a graduate certificate from the University Center for International Studies, specializing in Africa, Asia, western Europe, eastern Europe, the European Union, Latin America, or Russia.

Joint Degree

Energy & Environment, JD/MID

Requirements for the joint degree MID/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2002 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION

OR
- PIA 3393 - COMPARATIVE PUBLIC ADMINISTRATION

Human Security, JD/MID

Joint Degree

Full-time GSPIA students in the MPA, MPA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of International Development and Juris Doctor

The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues, such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MID/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2002 + approval by graduate enrollment counselor)

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of International Development and Master of Business Administration

For MPIA and MID students only: Combining a GSPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Human Security, MID/MPH

Joint Degree

Full-time GSPIA students in the MPA, MPiA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of International Development and Master of Public Health

Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Master of International Development and Master of Social Work

Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. - PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)

- PIA 2096 - CAPSTON SEMINAR: (see 24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT (pre-req: PIA 2025)

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 6 credits

Minimum Required GSPIA Credits: 36 credits

Master of Public Health requirements: 42 credits

(see Public Health website for requirements)

Total Number of Credits for Joint Degree: 78

Major Specific Requirements:

Nongovernmental Organizations & Civil Societies

- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
OR
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY

- PIA 2xxx - Approved NGOCS Major Course
- PIA 2xxx - Approved NGOCS Major Course
- PIA 2xxx - Approved NGOCS Major Course

Nongovernmental Organizations and Civil Societies, MID/MSW

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of International Development and Master of Social Work

Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MID/SW

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (PIA 2022)

- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career counselor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career counselor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT (pre-requisites: PIA 2024 & PIA 2025 or 2026 or 2027)

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 6 credits

Minimum Required GSPIA Credits: 36 credits

Master of Social Work requirements: 51 credits

(see Social Work website for requirements)

Total Number of Credits for Joint Degree: 87

Major Specific Requirements:

Nongovernmental Organizations & Civil Societies

- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
OR
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA 2xxx - Approved NGOCS Major Course
- PIA 2xxx - Approved NGOCS Major Course
- PIA 2xxx - Approved NGOCS Major Course

Urban Affairs & Planning, JD/MID

Requirements for the joint degree MID/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)

- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2002 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT (pre-req: PIA 2025)

Major Courses: 12 credits

(see for Major-Specific requirements)

Electives: 6 credits

Minimum Required GSPIA Credits: 36 credits

Juris Doctor requirements: 79 credits

(see Law website for requirements)

Total Number of Credits for Joint Degree: 115

Major Specific Requirements:

Urban Affairs & Planning (UAP)

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2xxx - Approved UAP Major Course

Urban Affairs & Planning, MID/MBA

Requirements for the joint degree MID/MBA

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS
(students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career counselor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career counselor in first term)

- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2002 + approval by graduate enrollment counselor)

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT (pre-req: PIA 2025)

- PIA 2xxx - Approved UAP Major Course

Master's

Energy & Environment, MID

Energy and Environment explores the politics and policies of the worldwide energy industry, examining ways to meet global energy needs in a sustainable, environmentally conscious way. Pittsburgh is a global epicenter of one of the biggest energy revolutions of the 21st century - the shale gas boom. New technologies like "fracking" are making billions of dollars of natural gas accessible to world markets for the first time, generating thousands of new jobs from Europe to North America. Western Pennsylvania sits atop one of the largest and most productive shale deposits anywhere on the planet, raising major questions about how to extract the gas responsibly, how to protect communities from environmental harm, and how to tax and regulate the rapid growth. GSPIA Students study the economics of the global energy industry, environmental sustainability, and regulatory policy in one of the world's best living laboratories. Graduates are prepared for jobs at environmental protection agencies, energy corporations, and a host of local, state, and national government offices that make energy policy.

Energy & Environment (E&E)

The major curriculum, comprising 12 credits, follows:

GSPIA core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT

Major Courses: 12 credits

- PIA 2xxx - Approved E&E Major Course

Three of the following five courses:

- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2502 - POLITICAL ECONOMY OF GLOBAL ENVIRONMENT
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2522 - POLITICAL ECONOMY OF GLOBAL ENERGY

Electives: 18 credits

Minimum Required Credits: 48 credits

Governance & International Public Management, GIPM/MID

Governance and International Public Management provides a comparative perspective on international development, focusing on the ways in which public and nonprofit organizations must adapt to meet the different cultural, political, and economic circumstances of the communities they serve.

It explores how public agencies around the globe, faced with similar problems like poverty, illiteracy, and inequality, have addressed those issues differently in different countries. Students confront the challenges of implementing complex policies in a global, multicultural context. This major focuses on developing the management and analytical skills necessary to take leadership roles in the multilateral sector, governments abroad, or any organization that delivers services internationally. Graduates are well-prepared to pursue careers at the United Nations, the U.S. Agency for International Development, and similar organizations.

Core: Governance & International Public Management(GIPM)

The major curriculum, comprising 12 credits, follows:

GSPIA core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT (pre-req: PIA 2025)

Major Courses: 12 credits

- PIA 2xxx - Approved GIPM Major Course
- PIA 2xxx - Approved GIPM Major Course

Two of the following four courses:

- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
OR
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT
OR
- PIA 2519 - COMPARATIVE GOVERNANCE
or
- PIA 2180 - COMPARATIVE PUBLIC ADMINISTRATION

Electives: 18 credits

Minimum Required Credits: 48 credits

Human Security, MID

Human Security (HS)

Because the globalization process has made the world seem exponentially smaller, threats from tsunamis, earthquakes, disease and starvation are arriving faster and in more dramatic fashion than ever before. One of the most innovative, forward-thinking disciplines in international affairs today, the human security major covers a wide swath of issues critical to the safety of people worldwide.

GSPIA's program, one of the first of its kind in the United States, emphasizes the development of peacekeeping and peace-building skills. Students study threats to individuals from nongovernmental, nonmilitary sources. Examples of threats include civil wars, international migration and crime, global climate changes and natural disasters. We teach students to focus on the human condition as a planet, resulting in a new generation of leaders able to guide our global community through some of the most perilous times it has ever experienced.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements: 12 credits

(See Master's Degree Requirements)

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT
(pre req: PIA 2025)

HS Major Courses: 12 credits

- PIA 2307 - HUMAN SECURITY
- PIA XXXX Approved HS major course
- PIA XXXX Approved HS major course
- PIA XXXX Approved HS major course

Electives: 18 credits

Minimum Required Credits: 48 credits

Nongovernmental Organizations and Civil Society, MID

NGOs and Civil Society (NGOCS)

Much of the work that has defined change around the world has been the domain of nongovernmental organizations (NGO's). The nongovernmental organizations and civil society (NGOCS) major prepares students for a future in a world where NGO's are committed to social change in the shifting landscape of the human condition. Students acquire knowledge in management strategies and politics and courses cover such topics as alleviating hunger, advocating for human rights and promoting public health.

GSPIA NGOCS students have the opportunity to develop experience through internships, both domestic and international, as well as the change to build expertise in issues such as grant writing, education or health care that will serve them well following graduation. Our approach is to act as

advocates of change with our courses and faculty inspiring and empowering students to make a difference. Graduates go on to work with individual governments, regions and communities around the globe to improve the quality of life.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements: 12 credits

(See Master's Degree Requirements)

Degree Core Courses: 6 credits

- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION
- PIA 2510 - ECONOMICS OF DEVELOPMENT (pre-req: PIA 2025)

NGOCS Major Courses: 12 credits

- PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT
OR
- PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY
- PIA XXXX Approved NGOCS major course
- PIA XXXX Approved NGOCS major course
- PIA XXXX Approved NGOCS major course

Electives: 18 credits

Minimum Required Credits: 48 credits

Social Policy, MPA/MID

MPA Track:

- PIA 2210 - RACE, GENDER, LAW AND POLICY
- PIA 2216 - ECONOMICS OF SOCIAL POLICY

Recommend

- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS OR
- PIA 2145 - BENEFIT COST ANALYSIS

MID Track:

- PIA 2512 - POVERTY AND INEQUALITY
- PIA 2117 - PUBLIC PROGRAM EVALUATION

For Both Tracks

Choose two social policy electives.

- PIA 2210 - RACE, GENDER, LAW AND POLICY
- PIA 2512 - POVERTY AND INEQUALITY

- PIA 2187 - INEQUALITY, POVERTY AND PUBLIC POLICY
- PIA 2449 - HUMANITARIAN INTERVENTION
- PIA 2202 - BEHAVIORAL ECONOMICS AND GAME THEORY
- PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS
- PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS
- PIA 2145 - BENEFIT COST ANALYSIS
- PIA 2705 - NEIGHBORHOOD AND COMMUNITY DEVELOPMENT
- PIA 2510 - ECONOMICS OF DEVELOPMENT
- PIA 2507 - HUMAN RIGHTS: POLITICS AND PRACTICE
- PIA 2307 - HUMAN SECURITY
- PIA 2520 - FOOD SECURITY: AGRICULTURE & RURAL DEVELOPMENT
- PIA 2096 - CAPSTON SEMINAR:

Urban Affairs & Planning, MID

Urban Affairs & Planning (UAP)

Urban Affairs and Planning takes a city-focused perspective on international development. More than half of the world's people now live in urban areas, raising important questions about how governments should meet the public's needs for transportation, health and sanitation, education, and other essential services.

As the developing world urbanizes, booming cities like Shanghai, Mumbai, Buenos Aires, and Johannesburg face critical challenges, including poverty, homelessness, and pollution. The major prepares students to confront those problems on an international scale, while developing valuable skills in Geographic Information Systems (GIS), regional economic planning, and sustainable development management. Students take advantage of GSPIA's highly regarded Center for Metropolitan Studies, participating in cutting-edge research alongside faculty experts.

The major curriculum, comprising 12 credits, follows:

GSPIA Core Requirements (See Master's Degree Requirements): 12 credits

Degree Core Courses: 6 credits

Major Courses: 12 credits

- PIA 2125 - CITY AND REGION THEORY AND PRACTICE
- PIA 2715 - GIS FOR PUBLIC POLICY
- PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS
- PIA 2xxx - Approved UAP Major Course

Electives: 18 credits

Minimum Required Credits: 48 credits

Minor

Nongovernmental Organizations and Civil Society Minor

The requirements for the Nongovernmental Organizations & Civil Society Minor are:

PIA 2526 Micropolitics: NGO's, Development & Civil Society (3cr)

With approval, appropriate courses may be substituted for those listed above. No course may be double-counted. Any course taken to fulfill a requirement for your degree or major cannot also count toward your minor. In such cases, an approved course must be substituted. Please consult with your graduate enrollment counselor.

Public Policy and Management Program

Master of Public Policy & Management (MPPM)

- Traditional Master of Public Policy and Management (MPPM)

The accelerated, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study.

- Online Master of Public Policy and Management (MPPM)

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

Special Admissions Requirements

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs. The flexible curriculum of the MPPM program is ideal for full-time and part-time students, as it allows them to take any of the courses offered at GSPIA. Students are free to study international affairs, international development, or public administration, and may focus their course selection on any of the fields of study offered under GSPIA's traditional, 48-credit master's degree programs.

Joint Degree

International Political Economy, JD/MPIA

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public and International Affairs and Juris Doctor

The joint JD allows students to combine the study of law and policy, preparing them equally well for employment in the judicial or executive branches of government. Graduates are positioned to work in international law firms, nonprofit advocacy, and in public or nonprofit agencies that require knowledge of legal issues, such as refugee services and the Department of Justice. Pitt Law School also partners with GSPIA in the University of Pittsburgh's Washington Center.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPIA/JD

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional lecture)
- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre-req. PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2363 - INTERNATIONAL HISTORY

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Juris Doctor requirements: 79 credits

(see Law website for requirements)

Total Number of Credits for Joint Degree: 115

Major Specific Requirements:

International Political Economy

- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course

International Political Economy, MBA/MPIA

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public and International Affairs and Master of Business Administration

For MPIA and MID students only: Combining a GSPIA degree with an MBA opens many opportunities for a career in international finance, government financial regulation, or multinational corporations. Students with both degrees are highly marketable in the fields of international business and international economic policy.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPIA/MBA

Student is required to take one of the following depending on major:

If SIS major: PIA 2303 Security & Intelligence Studies

If IPE major: PIA 2301 International Political Economy

If HS major: PIA 2307 Human Security

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waiver exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre-req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career advisor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career advisor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses: 9 credits

- PIA 2363 - INTERNATIONAL HISTORY
- PIA 2021 - INTERNATIONAL AFFAIRS

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Business Administration requirements: 39 or 40.5 credits

(see Business Administration website for requirements)

Total Number of Credits for Joint Degree: 75.5 or 76

Major Specific Requirements:

International Political Economy

- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course

International Political Economy, MPIA/MIS

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Master of Science in Information Science

The joint MSIS degree allows GSPIA students to combine the study of public management and information technology management, at a time when both fields are increasingly interconnected. Students are prepared to pursue public or nonprofit-sector careers that require strong knowledge of modern information systems.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. Joint degree students must meet with an advisor from both schools.

Requirements for the joint degree MPIA/MIS

GSPIA Core Requirements: 12 credits

- PIA 2022 - QUANTITATIVE METHODS (students may waive PIA 2022 if they pass the waive exam. If waived, the class must be replaced by an additional elective)
- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS
- PIA 2028 - PUBLIC POLICY ANALYSIS (pre-req: PIA 2022)
- PIA 2094 - PROFESSIONAL DEVELOPMENT PROGRAM (may be waived, see career counselor in first term)
- PIA 2098 - INTERNSHIP (may be waived, see career counselor in first term)
- PIA 2096 - CAPSTON SEMINAR: (24 credits)
OR
- PIA 2099 - THESIS (24 credits prior + PIA 2003 + approval by graduate enrollment counselor)

Degree Core Courses

- PIA 2021 - INTERNATIONAL AFFAIRS
- PIA 2363 - INTERNATIONAL HISTORY

One of the following based on major:

- PIA 2301 - INTERNATIONAL POLITICAL ECONOMY or
- PIA 2303 - SECURITY AND INTELLIGENCE STUDIES or
- PIA 2307 - HUMAN SECURITY

Major Courses: 12 credits

(see Major-Specific requirements)

Electives: 3 credits

Minimum Required GSPIA Credits: 36 credits

Master of Information Science requirements: 30

(see Information Science website for requirements)

Total Number of Credits for Joint Degree: 66

Major Specific Requirements:

International Political Economy

- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course
- PIA 2xxx - Approved IPE Major Course

International Political Economy, MPIA/MPH

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Master of Public Health

Students pursuing a joint MPH gain a unique perspective on public management, government responses to epidemics, and the effect of sanitation on international development. They study health policy and the science behind it, both at the local level and on the world stage, where disease recognizes no borders. Graduates are employed by medical relief agencies, nonprofit organizations that distribute vaccines, and government authorities responsible for protecting society from epidemics.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Joint degree students should contact their GSPIA Graduate Enrollment Counselor once a term for advising. Graduate Enrollment Counselors advise for GSPIA programs only. International Political Economy, MPIA/MSW

Joint Degree

Full-time GSPIA students in the MPA, MPIA, or MID programs may pursue two graduate degrees simultaneously, through GSPIA's partnerships with other professional schools at the University of Pittsburgh (and two foreign universities). Joint programs reduce the number of credits needed for each degree, allowing students to earn two master's degrees in just three years, or a master's degree and a law degree in just four years.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements. Those applying to the joint JD program with the University of Pittsburgh School of Law may submit an LSAT score as a substitute for GSPIA's GRE requirement. Those applying to the joint MBA program may submit the GMAT as a substitute for the GRE. If admitted to both schools, students

spend one full year in GSPIA followed by a second full year in the other program (or vice versa). During the third and/or fourth year, they spend a minimum of one additional term in GSPIA, earning a total of 36 GSPIA credits.

Although it is possible to apply to both schools at the same time, currently enrolled students may still apply for a joint degree as long as they have not yet completed one year (or, in the case of current law students, two years) of full-time study.

Master of Public & International Affairs and Master of Social Work

Today's community building arena demands well-trained professionals across a wider array of skills and systems than one degree program may offer. That's why the joint degree program between GSPIA and School of Social Work provides students with focused professional education in the community building arena to prepare them for careers in non-profit and government organizations, community development, social policy, and urban and regional affairs.

Note

Joint-degree students take a minimum of 36 credits and must have 3 terms of GSPIA residency. Students must graduate from both schools at the same time. No course may be double-counted. Any course taken to fulfill a requirement for the degree in one program cannot also count toward the degree in the other program. Master's

International Political Economy Minor

The requirements for the International Political Economy major are:

PIA 2301 International Political Economy (3cr)

PIA 2302 International Financial Policy (3cr)

PIA 2310 States & Markets (3cr)

or

PIA 2319 International Trade (3r)

Public Policy and Management, MPPM

Master of Public Policy and Management (MPPM)

Accelerated Mid-Career Masters (Traditional)

The accelerated mid-career, 30-credit Master of Public Policy and Management (MPPM) degree provides mid-career professionals an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners.

The program is designed to help enhance and advance the careers of professionals in the public and nonprofit sectors. It is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service. Degree requirements can be completed within one year of full-time study or two years of part-time study. Students may specialize in security & intelligence, global political economy, human security,

development planning & environmental sustainability, non-governmental organizations & civil society, urban & regional planning, public & nonprofit management, and policy research & analysis.

The MPPM program seeks applicants with a bachelor's degree and a minimum of five or more years of experience beyond an entry-level position. Candidates' experience should demonstrate increasing levels of responsibility, leadership, and professional competence, particularly in areas such as budgeting and finance, human resource management, or policy formulation or implementation. Candidates with fewer than five years of such experience should not apply to the MPPM program, but should apply instead to one of GSPIA's other, 48-credit master's degree programs.

Online Accelerated Mid-Career Masters

The online Master of Public Policy and Management (MPPM) degree is a part-time, 30-credit program for mid-career professionals with at least five years of full-time work experience. It is an online version of the MPPM program that GSPIA has offered to talented mid-career students for more than a decade. Students who apply to the MPPM program may now choose whether they want to pursue the degree in its traditional, on-campus format or in a 100% online format.

The program provides mid-career professionals with an opportunity to expand their knowledge, develop new analytic tools and professional skills, explore new ideas and theories, and interact with experienced faculty and practitioners. It is designed to help enhance and advance the careers of working professionals in the public and nonprofit sectors, but is also ideal for professionals in other fields looking to change careers, and begin a new, rewarding life in public service.

Online Program Structure

As an online MPPM student, you will enroll in two web-based courses (for a total of 6 credits) per term. You will be able to complete the 30-credit degree in just five terms. By taking courses during the spring, summer, and fall terms, you can earn your degree in just 20 months. You may, if you prefer, complete the program at a slower pace by taking just one course at a time.

You will follow a set curriculum of online courses, all of which are taught by regular GSPIA faculty who are dedicated to your success, wherever you are. You will complete your coursework using the Pitt Online Website, where you can login at your convenience to view course material and submit assignments.

In addition to the professors teaching your courses, you will be assigned to a faculty advisor and a full-time enrollment counselor who will be able to assist you by phone, Skype, or email with any questions you may have. Your advisor and enrollment counselor will help you navigate the registration process and work with you throughout your time at GSPIA to ensure your success.

Traditional Requirements:

MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
OR
- PIA 2021 - INTERNATIONAL AFFAIRS
OR
- PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION

- PIA 2117 - PUBLIC PROGRAM EVALUATION
- PIA 2896 - MPPM POLICY SEMINAR

- PIA 2025 - MICROECONOMICS
OR
- PIA 2027 - MACROECONOMICS

Specialization Courses (six courses): 18 credits

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course

Minimum Required Credits: 30 credits

Online Requirements

Online MPPM Core Courses: 12 credits

- PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS
- PIA 2025 - MICROECONOMICS
- PIA 2117 - PUBLIC PROGRAM EVALUATION
- PIA 2896 - MPPM POLICY SEMINAR

Online specialization courses (six courses): 18 credits

Online MPPM students must take an additional 18 credits beyond the core.

- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
- PIA 2xxx - MPPM specialization course
 - PIA 2xxx - MPPM specialization course

Graduate School of Public Health

Note: Students should refer to the catalog in use in their year of matriculation for course and credit requirements. All other information should be obtained from the current catalog.

The Graduate School of Public Health consists of programs offered by the Departments of Behavioral and Community Health Sciences, Biostatistics, Environmental and Occupational Health, Epidemiology, Health Policy and Management, Human Genetics, and Infectious Diseases and Microbiology, the multidisciplinary MPH program for doctoral-level health professionals, and nine certificates. Programs and specialty tracks, including joint programs, are detailed under individual department sections.

The mission of the Graduate School of Public Health (Pitt Public Health) is to promote health, prevent disease, and achieve health equity for everyone through leadership in education, research, and service. Visit our Web site, www.publichealth.pitt.edu, for more information.

Health Policy and Management/Business	MHA and MBA
Health Policy and Management/Law	MPH and JD
Human Genetics/Medicine	PhD and MD

Certificate Programs

Community-Based Participatory Research and Practice
Environmental Health Risk Assessment
Evaluation of Public Health Promotion and Health Education Programs
Global Health
Health Equity
Healthcare Systems Engineering
Health Systems Leadership and Management
Lesbian, Gay, Bisexual, and Transgender Individuals' (LGBT) Health and Wellness
Public Health Genetics
Public Health Preparedness and Disaster Response (Admission to this program has been suspended until further notice.)

Admissions

Application instructions differ depending on whether you are applying for a degree, a certificate, or for non-degree coursework. Please follow the application instructions for your plan of study when applying to Pitt Public Health.

Pitt Public Health has general admission requirements for all applicants, plus each department has requirements specific to their programs. It's important to review both requirements before applying.

Accelerated 3+2 Master's Degree Program

University of Pittsburgh undergraduates may apply for admission to a number of accelerated master's programs. Designed to allow students to complete a bachelor's and master's degree in approximately 5 years. Students must have completed the number of undergraduate credits required by their program (minimum of 96 credits) before they can become a Pitt Public Health student. Besides the regular admission requirements, undergraduates must also meet additional requirements, which are specific to this program.

Non-Degree Status

You can take up to 12 credits (cumulative maximum) as a non-degree student. If you are later accepted into a degree program, that program will decide which of those credits may be applied to your requirements.

Requirements

You must have a U.S. bachelor's degree or the equivalent foreign degree to become a non-degree student. You will have to submit transcripts for all education, as well as a WES evaluation for study outside of the U.S. and TOEFL scores, if applicable.

Non-degree applicants must be U.S. citizens or permanent residents. In some cases, local applicants currently holding an F or J visa status may be eligible to apply; however, these applicants must contact the Office of Student Affairs for approval before submitting an application. Pitt Public Health does not sponsor I-20s for non-degree study.

How to Apply

- Apply online through SOPHAS Express and complete required sections only
 - Pay application fee online directly to SOPHAS Express
 - Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
 - Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
 - Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code 2927, with no department code
- Note:** *Non-degree applicants are not required to submit recommendations, upload transcripts through SOPHAS Express, submit test scores, or submit any non-required sections of the SOPHAS Express application.*

What classes should I take?

If you're planning to apply and you know which department you're interested in, you may want to contact that department directly for suggestions about classes. Many non-degree students choose to enroll in the Pitt Public Health core courses (unless restricted) as a way to learn more about our various programs and/or to start working towards a degree.

Here's a sample of courses that may interest you:

- Principles of Epidemiology (EPIDEM 2110)*
 - Public Health Genetics (HUGEN 2049)
 - Public Health Biology (PUBHLT 2015)*
 - Social and Behavioral Sciences and Public Health (BCHS 2509)*
 - Health Policy and Management in Public Health (HPM 2001)*
 - Environmental Health and Disease (EOH 2013)*
 - Principles of Statistical Reasoning (BIOST 2011)*
- *part of the Pitt Public Health Core Curriculum*

Note: *Pitt Public Health encourages non-degree students to apply to a degree program, but acceptance as a non-degree student does not guarantee admission to a degree program.*

Financial Aid

Almost all Pitt Public Health doctoral students and many master's students receive financial aid. Most financial aid is provided through the departments, and the amount of aid available varies among programs. Applicants should contact departments directly for information about available financial aid.

Academic Standards and Academic Integrity

Students are expected to exhibit academic honesty and to uphold the ethical standards of public health professionals. A student who is not in satisfactory academic standing will be placed on probation and may be subject to dismissal. Students should refer to the Pitt Public Health Academic Handbook for complete information on the school's academic performance standards.

Grading Policies

The Graduate School of Public Health follows the University's letter grade system in evaluating student performance in course work, though a variety of options are detailed below.

Pitt Public Health school-wide core courses are graded A, B, C, etc.

Students electing to audit a course must register for the course as for any other course, and must also complete a grade option form in the Office of Student Affairs and obtain the instructor's permission to audit the course. Students receive a grade of N for audited courses and receive no academic credit for the course.

See the Grading and Records section of this bulletin for detailed discussion of University Grading System and Grading Options.

Withdrawal and Resignation

To withdraw from a class after the official add/drop period while still enrolled in other classes, you must process a Monitored Withdrawal Request Form through the dean's office of the school offering the class.

If you wish to drop all of your classes after the end of the add/drop period, you must resign from the term. Adjustments to tuition charges resulting from official resignation (dropping of all courses for the term) are based on the effective date of resignation and in accordance with the federally mandated calculation. If you decide to resign, call the resignation hotline immediately to leave your name and contact information (412-624-7585), as the refund amount is calculated from the date of resignation.

Course Repeat

A student may repeat a course in which a grade of B- or lower is received if authorized by the student's advisor. Students may not repeat a school-wide core course or required departmental course more than once (i.e., course may only be taken twice), and students who fail a school-wide core course or required departmental course twice are subject to dismissal. *(See Pitt Public Health academic dismissal and probation guidelines in the Pitt Public Health Academic Handbook. See also Repeating Courses for more information.)*

GPA Calculation

In general, a student's Grade Point Average (GPA) is obtained by dividing the total number of letter grade credits taken in the graduate program into the total number of quality points earned in the graduate program.

All University of Pittsburgh courses taken as a Pitt Public Health student are included in the calculation of GPA.

Advanced Standing and Transfer Credits

For details on advanced standing and transfer credits, students should consult the Pitt Public Health Academic Handbook and their academic advisor. Acceptance of transfer credits is at the discretion of the program.

Acceptance of a maximum of 12 credits taken as a non-degree student at Pitt Public Health is at the discretion of the program.

Students enrolled at Pitt Public Health may take credits in another school or institution, providing that their department has approved application of those credits to the degree requirements. In all cases, any combination of advanced standing credits and credits taken from another school or institution during enrollment at Pitt Public Health may not exceed the limits established by the University or the Regulations Governing Graduate Study at the University of Pittsburgh.

Academic Advising

The Graduate School of Public Health considers effective academic advising an essential component of educating students. Departments have the primary responsibility for identifying and assigning to each student a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. Departments are expected to provide students with a copy of school and departmental regulations appropriate for their program, and students are expected to become familiar with University, Pitt Public Health, and department regulations concerning graduate study and to accept responsibility for the completion of all degree requirements.

The student's academic advisor is to direct and assist the student in the selection of classes and the conduct of research. Waivers from program requirements are processed at the program level, and waivers from school requirements by the Office of Student Affairs. The Application for Graduation is processed through the Pitt Public Health Office of Student Affairs after clearance has been received from the academic advisor. A student will be certified for graduation only after the academic advisor has confirmed that all degree requirements have been met.

For students required to take preliminary, comprehensive, or defense examinations, the academic advisor, in consultation with the student, designates faculty members to act as the examining committee.

Each doctoral student is required to complete an Independent Development Plan per year and to submit it to his/her advisor. A suggested template is provided.

Each doctoral student, together with the student's doctoral committee, is responsible for assuring accomplishment of all elements of the student's course of studies, including the core requirements, the research tools requirement, course work in the field of specialization, advanced standing, the qualifying and comprehensive examinations, and the dissertation overview and its final oral defense.

Career Services

Pitt Public Health's Career Services office offers programs, services and resources to help master's and doctoral students as they prepare for employment or additional training in their chosen field of study. These services include Pitt Bridges, an online job board where jobs and training positions are posted weekly. Career counseling appointments are available to help with resume/CV critiques, cover letters, and mock interviews. Students can also register for skills-based workshops that are held regularly on a variety of topics. Networking functions and public health job fairs are also sponsored by this office.

Faculty

GSPH Primary Faculty

Program and Course Offerings

A number of courses of general interest to all departments are offered. Course descriptions and a current schedule are available to students. A list of course offerings by department may be accessed through the departmental sections of this catalog.

Certificate

Global Health Certificate

This program educates students about current health patterns and transitions occurring globally, as well as about the role of dynamic global environmental, political, economic, health care, and social changes to these patterns.

Coursework consists of 7 credits of core courses and 8 credits of additional coursework aligned with the individual student's specific area of interest and intended skillset. Students must complete a field experience, which can be combined with the required practicum for the degree program provided the experience is relevant to global health. Students have the opportunity to complete this global health practicum in the form of local opportunities or in an international setting.

Required Courses

The certificate core courses cannot overlap with any other departmental requirement. Overlap is permitted for the remaining required courses and these may also fulfill departmental requirements.

- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH
- PUBHLT 2027 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

One course from the Graduate School of Public and International Affairs is required from the list of approved classes (3 credits)

Master's

Multidisciplinary, MPH

Program Requirements

The mission of the Multidisciplinary Master of Public Health (MMPH) degree program is to prepare doctoral level health professionals to practice in community, public, and global health settings. They will use population-based concepts, health education, health promotion and the preventive components of public and personal health care and practice. The educational program provides these individuals who have varied health science backgrounds with the advanced public health training in which they can incorporate and apply the public health knowledge and skills in a public or private setting. The program is designed to foster a comprehensive overview to bridge the gaps among public health disciplines and subdisciplines. The MMPH is uniquely designed for individuals with advanced degrees (MD, RN, DDS, DO...) and allows them the freedom to self-design their MPH. Comprised of the Pitt Public Health core curriculum (19-21 credits) the students are encouraged to choose electives from varied public health departments to form an area of focus of relevance to them. This self-designed degree gives the student the flexibility necessary to work around busy clinical schedules. Upon completion of the MMPH, students will have an understanding of statistics, health policy, research design and the ability to contribute to new research in their chosen fields of interest.

In addition to the Public Health core courses, students must complete a master's essay under the guidance of a faculty committee and register for a practicum experience. The curriculum consists of 42 credits and can be completed in a year.

Although the program has a 42 credit requirement, six credits of advanced standing or transfer credits may be applied, making it possible for an eligible student to complete 36 credits.

Note:

Aside from the core requirements, the MMPH curriculum is flexible. The student should work with the program director upon admission to identify competencies (goals) for his or her program, and suggested courses for achieving those competencies. Additionally, students must complete a 200 hour practicum and a final essay.

* No more than six credits may be taken in other university graduate programs.

Pitt Public Health Core Requirements

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

*Students must take either BIOST 2011 or BIOST 2041

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY

*Can be waived if student has a clinical degree

- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

*Must register for two terms

- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Department of Behavioral and Community Health Sciences

The Department of Behavioral and Community Health Sciences at the University of Pittsburgh examines the social determinants of health, that is, the set of social and behavioral factors that either promote or threaten public health. Our interventions alter these social and behavioral factors (such as housing, health literacy, or care management) to assess effects on community health. The BCHS mission statement summarizes our approach:

VISION

Healthy people living in thriving and equitable communities.

MISSION

Improve and promote health and equity by engaging individuals, communities, and systems through our research, teaching, and practice.

VALUES

Open communication; active collaboration; integrated and strength-based approaches; social justice and health equity; application of knowledge in the context of people's lives.

The primary educational mission of the Department is to prepare students for positions of responsibility and leadership in public health practice, research, and training. Our students learn to employ the most current health behavior theories and community development strategies in approaching public health challenges. They develop applied research skills in community health assessment and planning, program implementation and evaluation, health education, and health communication. They learn how to design programs and conduct community-based research, and to work as part of interdisciplinary teams examining behavioral interventions and community assessment strategies. These educational and practice experiences prepare our graduates to move into leadership positions at the local, national, and international levels.

The department has a world-class faculty that is involved in teaching, research, and community service on the local, national, and international level. We collaborate with local and regional public health systems, and many of the leadership staff in these organizations also have faculty appointments and teach classes in the department.

Contact Information

Steve Albert, PhD

For additional information concerning specific degrees, contact the following: MPH-Martha Ann Terry, 6137 Parran Hall, 412-624-5887 or materry@pitt.edu; MPH/PhD in Social Work and MPH/MSW in Social Work-Sтивен Albert, 6129 Parran Hall, 412-383-8693 or smalbert@pitt.edu; PhD and DrPH-Jeanette Trauth, 6138 Parran Hall, 412-624-0968 or trauth@pitt.edu; Admission and Registration, 412-624-3107.

Admission: All Applicants

Applications for admission to the Department of Behavioral and Community Health Sciences are processed through the Office of Student Affairs at Pitt Public Health. You must apply for the MPH, PhD, and DrPH programs through SOPHAS, the centralized application service for graduate schools of public health.

Please review the Pitt Public Health requirements for admission before applying.

Application instructions differ depending on whether you are applying for a degree, a certificate, or for non-degree coursework. Please follow the application instructions for your plan of study when applying to Pitt Public Health.

Department requirements- BCHS doctoral applicants:

- PhD applicants: a master's degree in a discipline relevant to public health is required.
- DrPH applicants: A MPH degree is required.
- A minimum grade point average of 3.3.
- Official GRE scores from a test taken within three years of the application date. Scores in the 60th percentile or higher are highly desirable.
- Completed 3 credits of college math passed with a C or better

Department requirements- BCHS MPH applicants:

- At least a 3.0 GPA on a 4.0 scale
- 153 (60%) verbal GRE, 148 (31%) quantitative GRE and 4.5 (82%) analytic writing
- Completed 3 credits of college math passed with a C or better
- Completed 6 credits of social sciences passed with a C or better

The BCHS department requires a minimum TOEFL score of 100 on the IBT or a minimum IELTS score of Band 7.0, if applicable. TOEFL or IELTS must be taken within two years of application.

Financial Assistance

Although resources for master's students are limited, the program makes every effort to assist students in accessing some level of financial aid. Small grants and awards are available from the Department, the Graduate School of Public Health, and from the University, and many BCHS students have been successful in competing for these awards. In addition, a small number of Graduate Student Assistant and Graduate Student Researcher positions are available for full-time doctoral students. There are also opportunities for paid field practicum positions, and many students are able to supplement their income through part-time employment on public health-related service or research projects conducted within the Graduate School, the University, or in the community.

Graduate Programs

Educational programs of the Department of Behavioral and Community Health Sciences build upon a common body of public health knowledge and social/behavioral science concepts, theories and applied research methods. The Master of Public Health (MPH) Program prepares students to assess the health status and needs of populations, develop public health interventions, and evaluate these interventions as well as develop recommendations for improvement. Students learn and put into practice assessment and research skills in the context of social and behavioral change at the individual, organizational, and community levels with an emphasis on social ecology and social justice. Three joint degree options are also available. Two programs with the School of Social Work, the MPH/PhD and the MPH/MSW in Public Health Social Work, train social workers for leadership positions in public health systems and prepare them for research and teaching posts. Students also have the option to receive the MPH and the Master of Public Administration (MPA), the Master of Public and International Affairs (MPIA), or the Master of International Development (MID) through a joint program with the Graduate School of Public and International Affairs. Finally, students can earn an MPH and a PhD in anthropology in cooperation with the Dietrich School of Arts and

Sciences. The Department offers two doctoral degrees: a PhD (doctor of philosophy) and DrPH (doctor of public health). See Doctoral Programs section below for description.

Research Focus

The Department of Behavioral and Community Health Sciences has an extensive array of funded research and training projects. BCHS faculty and staff are skilled in the use of both quantitative and qualitative research methods, and the Department is particularly well known for its community-based participatory research strategies and modeling-simulation efforts designed to improve the health and welfare of communities.

Areas of research strengths include:

- Diabetes and Chronic Disease Prevention
- Cancer Screening Behavior
- Health Equity
- Public Health and Aging
- HIV/AIDS and Sexually Transmitted Diseases
- Maternal and Child Health
- Evaluation Science
- Global Health
- Modeling of health behavior and linked disease dynamics
- Mental Health

Research and training projects are funded by organizations such as:

- National Institutes of Health (NIH)
- Centers for Disease Control and Prevention (CDC)
- National Cancer Institute (NCI)
- National Institute on Aging (NIA)
- National Institute of Nursing (NINR)
- Health Resources and Services Administration, U.S. Department of Health & Human Services (HRSA)
- Pennsylvania Department of Health
- Local and National Philanthropic Organizations

Doctoral Programs

The Doctor of Philosophy (PhD) Program prepares students to conduct research in the social and behavioral sciences areas of public health in a variety of settings as well as teach in academic settings. The PhD curriculum is formed by a social-ecological perspective regarding the determinants of health and opportunities for intervention. Within this overarching framework, the curriculum also emphasizes theory-driven research, addressing health issues across the developmental life span of populations, examining variation across socio-demographic categories such as gender, age, and sociocultural status as it affects health and health disparities. The curriculum addresses the following areas: individual behavior, population health, research design and methods, statistical analysis; behavioral interventions; and the integration of public health research and practice. The PhD Program is a 72 credit program designed to be completed in 2 years full-time coursework in addition to 2 years for completion of dissertation research.

The Doctor of Public Health (DrPH) Program trains individuals for positions of senior responsibility and leadership in public health practice settings. Students develop skill in the seven core areas identified by the Association of Schools of Public Health for DrPH degree programs. This includes coursework and practical experience in the following areas: 1) theory and research methods that facilitate-critical analysis, 2) community orientation, 3) communication, 4) management, 5) leadership, 6) advocacy and 7) professionalism and ethics. These skills position students to assume leadership positions in public health agencies, health departments, nongovernmental organizations, foundations, and agencies in the human services sector. The DrPH Program is a 72 credit program designed to be completed in 2 years full-time coursework in addition to 2 years for completion of dissertation research.

Master's Degree

The MPH Program is a 45-credit program requiring students to complete the Pitt Public Health core courses (18-19 credits), the departmental core courses (17-18 credits), and elective courses. The departmental core courses cover social/behavioral theory and concepts; applied social/behavioral research methods; program planning, implementation and evaluation; health communication; community development approaches and experience in applying social/behavioral theories and methods through the completion of a 200 hour practicum/internship. School core courses include Biostatistics, Epidemiology, Public Health Biology, Environmental and Occupational Health, Health Policy and Management, and Capstone.

Electives are selected from a range of approved courses that pertain to a student's area of concentration or interest. Students are required to complete a practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

A number of joint degrees programs are also offered. See joint degree information below.

Joint Degrees

Students in the BCHS MPH program can pursue two graduate degrees simultaneously, through partnerships with other schools and departments at the University of Pittsburgh. Joint programs typically reduce the number of credits needed for each degree, allowing students to earn two degrees in three years for master's programs and four to five years for MPH/PhD programs.

To participate in a joint degree program, students apply separately to both schools, and must meet all of the usual admissions requirements (including entrance exams like the GRE). If admitted to both schools, students alternate their primary program of study by semester or by year.

Although it is possible to apply to both schools at the same time, currently enrolled students can still apply for a joint degree as long as they have not yet completed one year of full-time study.

Certificates/Specialized Study

The Department of Behavioral and Community Health Sciences offers opportunities for certificates or specialized study in the following areas:

- Lesbian, Gay, Bisexual, and Transgender Health and Wellness
- Health Equity
- Evaluation of Public Health Programs
- Community-Based Participatory Research and Practice (CBPRP)

Certificate

Community-Based Participatory Research and Practice Certificate

In the past 10 years, Community-based Participatory Research and Practice (CBPRP) has emerged as a core discipline in behavioral and social science departments within schools of public health. CBPRP is a collaborative process of research and practice that includes both researchers and community representatives. Communities are generally defined as those that share a unit of identity (e.g., social ties, geographical locations). The CBPRP process involves engaging community members, using local knowledge in the understanding of health problems, and a long-term commitment to partnership. CBPRP is oriented towards holistic interventions informed by social ecology modeling, a widely recognized approach that not only targets knowledge, attitudes, and behaviors of individuals, but also includes social factors such as family and friendship ties, community norms, and the structure of community services.

Requirements for the Certificate

This program provides a comprehensive set of courses that will prepare students for a career in community-based participatory research and practice. As part of the program, student interns will work with local community agencies to collaboratively address identified community public health issues.

Applicants must meet the requirements for admission to the MPH program in the Department of Behavioral and Community Health Sciences and be accepted into the certificate program.

Students must complete 15 credits, including 9 credits of coursework and a six-credit internship/ practicum. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Required Courses

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2135 - LEADERSHIP
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2503 - PRACTICUM

Evaluation of Public Health Promotion and Health Education Programs Certificate

Demand for comprehensive program evaluations is rising in a range of public and private organizations dealing with the health and social welfare needs of populations in the United States as well as worldwide. Graduates with a specialization in program evaluation in public health have expanded opportunities for employment in organizations such as health departments and ministries of health, health and hospital systems, educational programs, philanthropic foundations, and consulting firms. Students in the BCHS program evaluation certificate study under expert faculty and research staff. Students are trained in the application of both quantitative and qualitative methods for evaluation, and have the opportunity to participate directly on interdisciplinary evaluation teams on actual community-based projects. The evaluation concentration typically involves taking courses in basic and advanced evaluation methods, qualitative approaches, health survey methods, and the evaluation practicum.

Requirements for the Certificate

This program trains students to apply both quantitative and qualitative methods for interdisciplinary evaluation of a range of community-based public health projects.

Applicants must meet the requirements for admission to Pitt Public Health.

- Masters students must complete 15 graduate credits, including a 3-credit (400 hours) applied evaluation internship under the supervision of a designated faculty member, and 6 credits of electives.
- Doctoral students must complete 15 graduate credits, including a 3 credit (320 hour) applied evaluation internship under the supervision of a designated faculty member, and 6 credits of electives including 3 credits of seminar in advanced evaluation techniques.
- The certificate program is designed to be completed in four semesters of full-time study, but completion time may vary.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Required Courses

- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 2503 - PRACTICUM (masters students) or

- BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM (doctoral students)

*Doctoral students enrolled in the certificate are required to take as 3 of the elective credits:

- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES

Certificate Electives

Students choose 6 credits from the following courses for their evaluation electives requirement:

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
 - BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
 - BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
 - BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
 - BCHS 3002 - HEALTH SURVEY METHODS
 - BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
 - BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
 - BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
 - BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
 - PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS
- OR
- NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION
 - BCHS 2511 - INDEPENDENT STUDY

Some students may qualify for independent study in evaluation as determined by the certificate program director.

Health Equity Certificate

This innovative certificate program was created to address the systemic root causes of health disparities. While racial and ethnic health disparities are examples of the consequences of social and economic disadvantages, disparities may also be related to sexual orientation, religion, gender, native language, age, and disability status. The certificate provides students with an academic foundation for achieving health equity through assessing the complexity of inequities among diverse groups of marginalized populations, mobilizing communities where disparities exist, developing/evaluating culturally tailored interventions, and advocating for healthy public policy. The program is designed to increase the cultural competency of public health and other professionals and provide an interdisciplinary vehicle for individuals to pursue and strengthen their career interests relevant to health equity.

Requirements for the Certificate

This program addresses the systemic root causes of health disparities by providing trainees with an academic foundation for the promotion of health equity through conducting/evaluating culturally tailored community-based interventions, mobilizing communities where disparities exists, and advocating for healthy public policy.

Applicants must meet the requirements for admission to the MPH program.

Students must complete 15 credits, including Overview of Health Equity, Introduction to Community Health, Health Equity: Research and Interventions (or approved methods class substitute), and the Integrative Seminar in Health Equity. A field experience such as an equity-focused MPH practicum or participation in the Health Equity Journal Club is required. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Required Courses

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
- BCHS 2526 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS
- BCHS 2528 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Methods Course Substitute

Students may substitute BCHS 2526 Health Equity Research: Methods and Interventions for one of the approved methods courses.

- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING (non-BCHS students)
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH (non-BCHS students)
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
and
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
and
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE
- BIOST 2016 - SAMPLING DESIGN AND ANALYSIS
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2062 - CLINICAL TRIALS: METHODS AND PRACTICE
- BIOST 2098 - AGENT BASED MODELING
- EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
- EPIDEM 2180 - EPIDEMIOLOGICAL METHODS 1
- EPIDEM 2187 - EPIDEMIOLOGICAL METHODS 2
- EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
- EPIDEM 2220 - APPLIED SPATIAL/COMMUNITY EPIDEMIOLOGY
- EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS
- HPM 2064 - HEALTH POLICY ANALYSIS (master's students)
- HPM 3064 - HEALTH POLICY ANALYSIS (doctoral students)
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- HPM 3125 - INTERMEDIATE HEALTH ECONOMICS
- PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

Certificate Electives

- BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH
- BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS
- BCHS 2575 - SEMINAR MATERNAL AND CHILD HEALTH
- BCHS 2598 - SOCIAL INEQUALITIES IN HEALTH
- BCHS 2599 - PUBLIC HEALTH APPROACHES TO WOMEN'S HEALTH

- BCHS 2995 - GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: EMPOWERMENT, GENDER EQUALITY, AND HEALTH
- EPIDEM 2143 - SOCIAL EPIDEMIOLOGY
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- EPIDEM 2710 - EPIDEMIOLOGY OF WOMEN'S HEALTH
- HPM 2143 - PUBLIC HEALTH SYSTEMS: LEGAL, ECONOMIC, AND OPERATIONAL FOUNDATIONS
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- CLRES 2200 - INTRODUCTION TO RESEARCH DISPARITIES ON HEALTH CARE
- MEDEDU 2240 - CULTURAL COMPETENCE MEDICAL EDUCATION
- PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

Lesbian, Gay, Bisexual, and Transgender (LGBT) Health and Wellness Certificate

The interdepartmental (BCHS, EPID, IDM) Certificate Program will prepare students to collaborate and conduct independent research designed to improve the understanding of unique health concerns among lesbian, gay, bisexual, and transgender (LGBT) populations; participate in agency or organization planning, training, and delivery of health care for LGBT populations; work with local, state, and federal agencies in developing LGBT competent health care providers; provide leadership in public and private sector organizations serving the health and wellness needs of LGBT populations; and evaluate the effectiveness of health care delivery systems to meet the needs of LGBT populations.

In the United States, public health professionals seek to address health disparities. Students enrolled in this program will be prepared to address health disparities affecting subpopulations who may be experiencing a lower quality of health and wellness, due in part, to historic discrimination, with a focus on lesbian women, gay men, bisexuals, and transgender/transsexual individuals. As such, the certificate will offer courses that include information on identifying and documenting health disparities; impact of historical stigmatizing politics that contribute to development of health disparities; impact of politics and policy to improve means of addressing health disparities; design of appropriate research programs to address health disparities; theories behind intervention programs that work among disparate populations; and means to develop competency skills in working with stigmatized populations.

Requirements for the Certificate

This interdepartmental (BCHS, Epid, IDM) certificate program prepares students to conduct research designed to improve the understanding of unique health concerns among lesbian, gay, bisexual, and transgender populations, to participate in organized planning and delivery of health care for LGBT populations, and to provide leadership in organizations serving the health and wellness needs.

Applicants must meet the requirements for admission to Pitt Public Health.

Students must complete 15 graduate credits, a practicum, and a thesis or project related to LGBT health and wellness and oral presentation of the thesis or project for peers and members of the Center for LGBT Health Research, or at approved scientific meeting. The certificate program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Note: Some additional credits that do not apply to any degree or other certificate must be completed for each certificate program.

Required Courses

- PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE
- PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH
- PUBHLT 2019 - PUBLIC HEALTH SPECIAL STUDIES **This may be substituted with departmental independent studies/ thesis/ dissertation credits if approved by advisor.

Certificate Electives

A minimum of seven credits in elective courses must be completed. For a list of approved electives see below. Other electives may be taken with the approval of one of the certificate directors.

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 2598 - SOCIAL INEQUALITIES IN HEALTH
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS
- HPM 2135 - HEALTH POLICY
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
- IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY

Doctoral

Behavioral and Community Health Sciences, DrPH

The Doctor of Public Health (DrPH) Program trains individuals for positions of senior responsibility and leadership in public health practice settings. Students develop skill in the seven core areas identified by the Association of Schools of Public Health for DrPH degree programs. This includes coursework and practical experience in the following areas: 1) theory and research methods that facilitate-critical analysis, 2) community orientation, 3) communication, 4) management, 5) leadership, 6) advocacy and 7) professionalism and ethics. These skills position students to assume leadership positions in public health agencies, health departments, nongovernmental organizations, foundations, and agencies in the human services sector.

The minimum-credit requirement for the DrPH Program is 72 credits of completed course work and independent research. Twenty-four credits may be awarded for a previously earned master's degree. Twelve (transfer or advance standing) credits may be allowed for graduate work taken after earning the master's degree. All students must complete a common core of courses in the following categories:

- Community/Cultural Orientation in Public Health (6 credits)
- Critical Analysis (24 credits)
- Communication (3 credits)
- Management (3 credits)
- Integration of Research and Public Health Practice (3-8 credits)
- Competency area elective
- A minimum of 1 dissertation credit must be earned.

An important element of the DrPH degree is the Executive Management Practicum, which requires that students work in a setting where they will have an opportunity to develop and refine skills in leadership, advocacy and ethics. While doing so, students will also have opportunities to apply content from coursework in the other competency areas: community/cultural orientation, critical analysis, communication and management. The DrPH Program is designed to be completed in 2 years full-time coursework in addition to 2 years for completion of dissertation research.

BCHS DrPH Requirements

Community/Cultural Orientation (6 credits)

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
Advanced Methods in CBPR series
- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Critical Analysis (24 credits)

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS or
- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENCE STATISTICS
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2 or
- PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- BIOST 2049 - APPLIED REGRESSION ANALYSIS or
- PSYED 2410 - APPLIED REGRESSION ANALYSIS
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Communication (3 credits)

- BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS

Management (3 credits)

- HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT

Integration of Public Health Research and Practice (3-8 credits)

- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE
- BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING
- BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION
- BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

Competency Area Elective (choose one out of three courses below)

Leadership

- BCHS 2135 - LEADERSHIP or
- ADMPS 2128 - LEADERSHIP or
- PIA 2131 - LEADERSHIP

Advocacy

- HPM 2063 - THE POLITICS OF HEALTH POLICY

Professionalism and Ethics

- HPM 2131 - PUBLIC HEALTH LAW AND ETHICS

Electives

Milestones (0-4 credits)

- BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION
- FTDR 3999 - FULL-TIME DISSERTATION STUDY or
- BCHS 3010 - RESEARCH AND DISSERTATION PHD

Additional Requirements

Both DrPH and PhD students take a preliminary (qualifying) examination at the end of the first year of full-time course work and a comprehensive examination when the student has completed all of the required course work. Following successful completion of the dissertation overview, the student is admitted into candidacy and begins dissertation study under the direction of a dissertation committee. The dissertation and oral defense of the dissertation must be completed within five years of the comprehensive examination. See General Requirements for Doctoral Degrees for further information.

Behavioral and Community Health Sciences, PhD

The Doctor of Philosophy (PhD) Program prepares students to conduct research in the social and behavioral sciences areas of public health in a variety of settings as well as teach in academic settings. The PhD curriculum is formed by a social-ecological perspective regarding the determinants of health and opportunities for intervention. Within this overarching framework, the curriculum also emphasizes theory-driven research, addressing health issues across the developmental life span of populations, examining variation across socio-demographic categories such as gender, age, and sociocultural status as it affects health and health disparities. The curriculum addresses the following areas: individual behavior, population health, research design and methods, statistical analysis; behavioral interventions; and the integration of public health research and practice.

The minimum credit requirement for the PhD program is 72 credits of completed course work and independent research. Twenty-four credits may be awarded for a previously earned master's degree. Twelve (transfer or advance standing) credits may be allowed for graduate work taken after earning the master's degree. All students must complete a common core of courses in the following categories:

- Theories of behavior and community (6 credits)
- Research design and methods (11 credits)
- Elective theory and methods (3 credits)
- Statistical analysis (12 credits)
- Interventions (6 credits)
- Integration of public health research and practice (3-8 credits)
- Milestones (0-4 credits)

PhD students will typically earn 3 credits preparing for their comprehensive exam and a minimum of 1 dissertation credit must be earned. All PhD students must be enrolled as a full-time student at least 1 semester during their program. Registration for FTDR (i.e. Full-time Dissertation Research) after completion of 48 credits of coursework will fulfill this requirement. The program is designed to be completed in 2 years full-time coursework in addition to 2 years for completion of dissertation research.

BCHS PhD Requirements

Behavior & Community (6 credits)

- BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH

Research Design & Methods (11 credits)

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

- BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS
- BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES

Elective: Theory & Methods Examples (Choose any 3 credit graduate course at Pitt)

- BCHS 3002 - HEALTH SURVEY METHODS
- BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
- BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS

Advanced Methods in CBPR series

- BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
- BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
- BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
- BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH

TBD: Students may choose any graduate course at the University - 3 credits

Statistical Analysis (12 credits)

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS or
- PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS

- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2 or
- PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE

- BIOST 2049 - APPLIED REGRESSION ANALYSIS or
- PSYED 2410 - APPLIED REGRESSION ANALYSIS

- BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Interventions (6 credits)

- BCHS 2558 - HEALTH PROGRAM EVALUATION
- BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Integration of Public Health Research and Practice (3-8 credits)

- BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING

* Students enroll in two semesters of BCHS 3004.

- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH (required if no MPH)
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

- FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING or
- BCHS 2511 - INDEPENDENT STUDY
- 5 CIDDE Workshops
- Research Competency Requirement

Electives

Milestones (0-4 credits)

- BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION

- FTDR 3999 - FULL-TIME DISSERTATION STUDY or
- BCHS 3010 - RESEARCH AND DISSERTATION PHD

Additional Requirements

Both DrPH and PhD students take a preliminary (qualifying) examination at the end of the first year of full-time course work and a comprehensive examination when the student has completed all of the required course work. Following successful completion of the dissertation overview, the student is admitted into candidacy and begins dissertation study under the direction of a dissertation committee. The dissertation and oral defense of the dissertation must be completed within five years of the comprehensive examination. See General Requirements for Doctoral Degrees for further information.

Joint Degree

Behavioral and Community Health Sciences, MPH/MID; MPH/MPA; MPH/MPIA

The MPH/MID, MPH/MPA and MPH/MPIA joint degree programs prepare students for careers as public health practitioners in emerging economies where health issues are closely linked to social, political, and economic problems.

The MPH/MPA, MPH/MPIA and MPH/MID joint degree requirements are listed below. Students should refer to the Graduate School of Public and International Affairs page for the most current program checklists. The joint degree programs are designed to be completed in three years of full-time study.

- 78 credits, including coursework and one 300 contact hour field placement
- Foundational public health courses
- Advanced courses in health communications, program planning, and behavioral theories
- Advanced courses in public and international affairs; international development; or public administration
- Health-related field placement experiences
- Advanced thesis or essay research synthesizing public health core concepts with issues relevant to public and international affairs

GSPH Core Requirements

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING or
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/MID; MPH/MPA; MPH/MPIA Core Requirements

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2503 - PRACTICUM

- BCHS 2521 - ESSAY

Required Electives

Pick a minimum of 6 credits.

- BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION
 - BCHS 2515 - WORKSITE HEALTH PROMOTION
 - BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING
 - BCHS 2524 - OVERVIEW OF HEALTH EQUITY
 - BCHS 2526 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS
 - BCHS 2558 - HEALTH PROGRAM EVALUATION
 - BCHS 2572 - RISK COMMUNICATION
 - BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
 - BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
 - BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
 - BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
 - BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
 - BCHS 3002 - HEALTH SURVEY METHODS
 - BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
 - BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
 - PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS
- OR
- NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Additional Electives

Students must reach the 45 credit minimum with remaining approved electives taken within any graduate school at the university.

Behavioral and Community Health Sciences, MPH/MSW

What is the MPH/MSW joint degree program?

The joint degree program is collaboration between the School of Social Work and the Graduate School of Public Health, Department of Behavioral and Community Health Sciences. Students graduate with both Master of Social Work and Master of Public Health degrees and are prepared to pursue a wide range of social work and public health careers to improve the health of a target population and/or community. Students participate in class work, field placements, and leadership seminars to acquire the knowledge and skills to address health problems.

What principles guide this program?

The program has a strong commitment to social justice, the elimination of health disparities, and a holistic definition of community and population health, including individuals' physical health conditions and the behavioral and social ecological determinants of health. Moreover, both social work and public health share a commitment to involving consumers/community members in the development of policies and in the planning, delivery and evaluation of health promotion interventions, health behavior change, and health education.

What are the advantages of the program?

- Students develop knowledge, values and skills for both professional social work practice and (e.g. direct practice or community organization/social administration) and community public health practice (e.g. primary, secondary, and tertiary prevention).
- Advising and mentoring focuses on supporting students to achieve their professional goals (e.g., selection of field placements, papers written as part of course-work, leadership training activities, focus of final thesis/essay in the MPH program).

- Students increase their career marketability as a result of being able to work from a cross disciplinary perspective. Students have gone on to jobs, for example, in various social service organizations, health departments, other government agencies, academic institutions, think tanks, and the Centers for Disease Control and Prevention.

What competencies will individuals gain as a result of the program?

- Application of theoretical principles to primary, secondary, and tertiary health interventions targeting the promotion of health behavior change, enhancement of the environment, and the elimination of risk factors in neighborhoods and communities that contribute to disease and poor health status outcomes
- Application of principles of community-based participatory research and practice to community health assessment
- Application of quantitative and qualitative skills to program planning and evaluation research
- Processes involved in community health planning, program implementation, and program evaluation
- Written communication to inform the public, policymakers, and other key-stakeholders
- Other leadership skills in micro practice with individuals, families, and groups or macro practice.

All graduates also achieve the core and cross-cutting competencies for Pitt Public Health MPH students.

What are the requirements of the program?

The BCHS MPH/MSW joint degree typically is completed with a three-year curriculum plan for Direct Practice or COSA (2.5 years for advanced standing students). The BCHS MPH/MSW in Social Work requirements are listed below. Students should refer to the School of Social Work for the most current program checklist.

- 33 Social Work credits (plus 18 field placement credits)
- 36 Public Health credits

Some highlights of the program are:

- 18 field placement credits representing two separate field placement experiences, foundation and concentration, coordinated by the School of Social Work, Office of Field Education.
- Leadership Seminars for students participating in the Juanita C. Evans Fellowship Program
- Final essay or thesis

What types of careers do graduates of the MSW/MPH joint degree program engage in?

- Patient Services Managers
- Research Scientist
- Policy Advocates
- Program Directors
- Communication Directors
- Adjunct and part-time faculty in MSW and BSW degree programs
- Bridging the gap between the public's health and social work practice
- Program Planners

Application Process

Students must apply separately to the School of Social Work and the Graduate School of Public Health (GSPH).

GSPH Core Requirements

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING or
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 1033 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/MSW Core Requirements

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH

Please choose a second-level research course to satisfy the BCHS 2525 requirement.

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2503 - PRACTICUM or
- BCHS 2511 - INDEPENDENT STUDY and/or coursework depending on circumstances.
- BCHS 2521 - ESSAY

Behavioral and Community Health Sciences, MPH/PhD, Anthropology

This joint degree program with the Department Anthropology in the Dietrich School of Arts and Sciences prepares anthropologists for research, teaching, and program planning/evaluation for specialization in the cultural, social, and behavioral aspects of health and health care in either a domestic or international setting.

Competencies

Graduates will be able to:

- Demonstrate ability to apply principles of community-based participatory research and practice to community health assessment
- Develop quantitative and qualitative skills that can be applied to program planning and evaluation
- Communicate in writing information to the public, stakeholders and policymakers
- Apply theory to program planning and evaluation

All graduates also achieve the core and cross-cutting competencies for Pitt Public Health MPH students.

The MPH/PhD joint degree requirements are listed below. Students should refer to the Department of Anthropology for the most current program checklist.

- 87 credits, including coursework, research and fieldwork
- Foundational public health courses
- Courses in health communication, program planning, methods, community development and behavioral theories
- Advanced courses in anthropology
- Advanced dissertation research that includes at least one year of fieldwork in an area of specialization

MPH students enrolled in the MPH/PhD program in anthropology fulfill the course work requirements for both BCHS and anthropology and earn both degrees for a total of 87 credits. The MPH essay/thesis requirement is met by the PhD dissertation. The practicum requirement is met through fieldwork. The joint degree program is designed to be completed in four to five years including time for dissertation research.

GSPH Core Requirements

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING or
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/PhD Anthropology Core Requirements

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2521 - ESSAY

Behavioral and Community Health Sciences, MPH/PhD, Social Work

This joint program with the University of Pittsburgh School of Social Work prepares students to fulfill leadership roles in public health systems or academic settings. Students in this program, have opportunities to work with local organizations on a variety of planning, evaluation, and research activities.

Competencies

Graduates will be able to:

- Demonstrate ability to apply principles of community-based participatory research and practice to community health assessment
- Develop quantitative and qualitative skills that can be applied to program planning and evaluation
- Demonstrate process of planning, implementing, and evaluating programs and policies
- Communicate in writing information to the public, to stakeholders and to policymakers
- Apply theory to program planning and evaluation

All graduates also achieve the core and cross-cutting competencies for Pitt Public Health MPH students.

The BCHS MPH/PhD in Social Work requirements are listed below. Students should refer to the School of Social Work for the most current program checklist. The joint degree program is designed to be completed in four to five years including time for dissertation research.

Requirements

- 72 credits, including coursework and research
- Foundational public health courses
- Advanced courses in health communications, program planning, and behavioral theories
- Advanced courses in research methods and statistics
- Advanced dissertation research in an area of specialization

GSPH Core Requirements

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING or
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

BCHS MPH/PhD Social Work Core Requirements

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2503 - PRACTICUM or
- BCHS 2511 - INDEPENDENT STUDY
- BCHS 2521 - ESSAY

Master's

Behavioral and Community Health Sciences, MPH

The MPH Program is a 45-credit program requiring students to complete the Pitt Public Health core courses (18 credits), the departmental core courses (11-15 credits), required electives, and open electives.

Electives are selected from a range of approved courses that pertain to a student's area of concentration or interest. Students are required to complete a practicum in a public health setting and prepare an essay or thesis that addresses an issue of public health significance and that demonstrates the ability to synthesize information from numerous sources. The MPH program is designed to be completed in four semesters of full-time study. An option does exist for finishing in three semesters.

Please refer to the MPH Handbook found on our website.

GSPH Core Requirements

Required coursework for the BCHS MPH degree

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING or
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

BCHS MPH Core Requirements

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 2992 - SYSTEMS THEORIES AND APPROACHES
- BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH
- BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH
- BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH
- BCHS 2503 - PRACTICUM
- BCHS 2521 - ESSAY

Required Electives

Pick a minimum of 6 credits.

- BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION
- BCHS 2515 - WORKSITE HEALTH PROMOTION
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING

- BCHS 2524 - OVERVIEW OF HEALTH EQUITY
 - BCHS 2526 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS
 - BCHS 2558 - HEALTH PROGRAM EVALUATION
 - BCHS 2572 - RISK COMMUNICATION
 - BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH
 - BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE
 - BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD
 - BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH
 - BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH
 - BCHS 3002 - HEALTH SURVEY METHODS
 - BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES
 - BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS
 - PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS
- OR
- NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Additional Electives

Students must reach the 45 credit minimum with remaining approved electives taken within any graduate school at the university.

Department of Biostatistics

Biostatistics is an innovative field that involves the design, analysis, and interpretation of data for studies in public health and medicine. Biostatistics experts arrive at conclusions about disease and health risks by evaluating and applying mathematical and statistical formulas to the factors that impact health.

Students at Pitt Public Health benefit from collaboration with UPMC, Pennsylvania's largest academic medical center, and have access to extensive University computing facilities. Through rigorous courses, students gain a comprehensive understanding of statistical methods in the context of public health and medical problems; work with faculty on developing new and innovative methodologies and analytical techniques; and have the opportunity through both research and service to apply these methods to current and pressing concerns in biomedicine and public health.

Faculty & Administration

GSPH Primary Faculty

Department Student Services Staff

Admissions

In addition to the school-wide admission requirements, admission to all Biostatistics degree programs requires two semesters of calculus, a course in biology, and a basic computing course. In some cases, course deficiencies can be satisfied the first term. The MPH degree also requires 6 credits in biology, 6 credits in social science and a professional degree and/or background in health.

Applying for Admission to Pitt Public Health

Early Admission

University of Pittsburgh undergraduates may apply for early admission to the Biostatistics MS Program. Students must have completed the number of undergraduate credits required by their school before they can become a Biostatistics MS student.

3+2 Accelerated Master's Program

3+2 Accelerated Master's Program Admission Requirements

Financial Aid

The Department of Biostatistics provides full financial aid for approximately 55 PhD students per year. The most common form of financial aid is as a graduate student researcher (GSR). A GSR is expected to work on one of the many funded research projects maintained by either the Department of Biostatistics or their collaborators in other departments. Currently the stipend is \$1975.00 per month and includes a tuition waiver and medical benefits. A limited number of Teaching Assistantships (TA) are also available. The current stipend for a TA is \$2238.00 per month and includes a tuition waiver. To be eligible for a TA position, a first year student must pass the oral English competency exam given by the University of Pittsburgh.

The department does not provide funding for MS or MPH students except in rare circumstances. Many MS/MPH students obtain jobs in the University or surrounding area performing data analysis and other statistical tasks. The department circulates job advertisements when available to all students.

Tuition and Billing

Tuition & Financial Aid

Advanced Standing and Credit Transfer

Acceptance of a maximum of 12 credits taken as a non-degree student at Pitt Public Health is at the discretion of the department and program.

Students enrolled at Pitt Public Health may take credits in another school or institution, providing that their department has approved application of those credits to the degree requirements. In all cases, any combination of advanced standing credits and credits taken from another school or institution during enrollment at Pitt Public Health may not exceed the limits established by the University or the Regulations Governing Graduate Study at the University of Pittsburgh.

Students with previous graduate experience in Biostatistics or a related field may apply to transfer credits for graduate-level coursework successfully completed with a grade of B or better. PhD Students may apply to transfer up to 24 credits, MS students 6 credits, and MPH students 12 credits. The course credits to be transferred must be reviewed by the student's academic advisor and approved by the

Department Chair and Assistant Dean for Student Affairs. Students who receive transfer credits for GSPH Core Courses must complete the GSPH Core Course Exemption Form in addition to the credit transfer paperwork to exempt out of those classes. Students who receive transfer credits for BIOST 2087 must complete the BIOST Course Exemption Form in addition to the credit transfer paperwork to exempt out of those classes. All transfer credit paperwork must be complete by the end of a student's first term.

Doctoral

Biostatistics, PhD

The PhD in Biostatistics degree program is for students with a background in mathematics and a strong interest in biology and public health. The program emphasizes statistical theory and methods so that students are prepared to be effective statistical collaborators in interdisciplinary studies; lead the design and execution of studies; and develop biostatistics methodology.

Program Objectives

Students successfully completing the PhD Program in Biostatistics will be able to:

- Quantitatively address a novel or complex health problem by developing an innovative statistical methodology or adapting existing methods to a new problem
- Demonstrate mastery of advanced statistical theory and applications
- Understand and implement innovative statistical approaches emerging in the literature to biomedical and public health issues
- Communicate the results of biostatistical analyses to individuals with varying degrees of statistical knowledge
- Recognize strengths and weaknesses of proposed approaches, including alternative designs, data sources, and analytic methods
- Determine the data best suited to address public health issues, program planning, and program evaluation
- Contribute to the body of knowledge in the field of biostatistics by submitting an article for publication in peer-reviewed journal, or preparing a book chapter or book for publication

General Requirements for Doctoral Degrees

For an overview of University-wide regulations for doctoral students, see Regulations Pertaining to Doctoral Degrees.

Requirements

Coursework

A minimum total of 72 credits are required.

PhD candidates normally complete graduation requirements in four to five years.

Core Courses

- BIOST 2025 - BIOSTATISTICS SEMINAR (3 terms required)
- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2043 - INTRODUCTION TO STATISTICAL THEORY 1
- BIOST 2044 - INTRODUCTION TO STATISTICAL THEORY 2
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2051 - STATISTICAL ESTIMATION THEORY
- BIOST 2054 - SURVIVAL ANALYSIS

- BIOST 2061 - LIKELIHOOD THEORY AND APPLICATION
- BIOST 2083 - LINEAR MODELS
- BIOST 2086 - APPLIED MIXED MODELS ANALYSIS
- BIOST 2087 - BIOSTATISTICS CONSULTING PRACTICUM
- BIOST 2093 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY *
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH *
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS * (2 terms required)

Note:

*Pitt Public Health Core Courses

Electives

In situations where a student's special interests or needs indicate an alternative course is more appropriate it may be substituted with the permission of the student's academic advisor and department chair.

Department Electives

Students must complete six Biostatistics elective courses. Current electives are:

- BIOST 2016 - SAMPLING DESIGN AND ANALYSIS
- BIOST 2040 - ELEMENTS OF STOCHASTIC PROCESSES
- BIOST 2052 - MULTIVARIATE ANALYSIS
- BIOST 2055 - INTRODUCTORY HIGH-THROUGHPUT GENOMIC DATA ANALYSIS 1: DATA MINING AND APPLICATIONS
- BIOST 2056 - INTRODUCTION TO DIAGNOSTIC TEST EVALUATION AND ROC ANALYSIS
- BIOST 2058 - SCIENTIFIC COMMUNICATION SKILLS
- BIOST 2059 - CONSTRAINED STATISTICAL INFERENCE WITH APPLICATIONS
- BIOST 2062 - CLINICAL TRIALS: METHODS AND PRACTICE
- BIOST 2063 - BAYESIAN DATA SCIENCE
- BIOST 2065 - ANALYSIS OF INCOMPLETE DATA
- BIOST 2078 - STATISTICAL LEARNING IN HIGH-DIMENSIONAL DATA WITH OMICS APPLICATIONS
- BIOST 2079 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES
- BIOST 2094 - ADVANCED R COMPUTING
- BIOST 2096 - NUMERICAL METHODS BIOSTATISTICS

Outside Electives

Students must complete at least three credits outside of the Department of Biostatistics.

Dissertation Research Credits

Students must complete three credits of BIOST 3010 or one term of FTDR 3999. Please see guidelines for both courses below.

Independent Study (BIOST 2021/3010) Guidelines

It is recommended that students should give priority to completing core and elective coursework before registering for independent study (BIOST 2021/BIOST 3010). Specifically, no more than 3 credits of independent study (BIOST 2021/BIOST 3010) should be taken in terms when core and elective courses are offered that a student needs take to complete coursework requirements.

Before passing the dissertation overview and comprehensive examination, a doctoral student can register for BIOST 2021 for his/her independent PhD level research. After passing the dissertation overview and comprehensive examination, a student is permitted to take

BIOST 3010 which can fulfill the dissertation research credit requirement while providing credits toward the 72 credit requirement for the PhD degree.

In situations where a student's special interests or needs indicate more credits of independent study (BIOST 2021/BIOST 3010) appropriate approval must be obtained from the student's academic advisor and department chair.

FTDR 3999 Guidelines

Upon enrollment in 72 credits and successful completion of all required coursework, PhD students are required to register for Full-time Dissertation Study (FTDR 3999). FTDR 3999 carries no credits or letter grade, but provides students with fulltime status. Students enrolled in FTDR 3999 are assessed a special tuition fee.

Preliminary (Qualifying) Examination

The preliminary examination is designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year(s) of graduate study, and the potential to apply research methods independently. The preliminary examination is used to identify those students who may be expected to complete the doctoral program successfully and also to reveal areas for improvement in the student's preparation.

The Biostatistics PhD preliminary examination is typically offered annually in June. The examination consists of three separate components: applications, theory, and public health based on epidemiology. In order to pass the preliminary examination, students must receive passing scores for all three components of the examination. Eligible students are permitted to retake the portions of the examination they did not pass when the examination is offered again the following year. Students who do not pass the examination on the second attempt will be released from the PhD Program in accordance with the Pitt Public Health Probation and Dismissal Guidelines.

Once a student passes the preliminary examination, the student may begin working on his/her dissertation. Students should not begin dissertation work before they pass the preliminary examination.

Eligibility

A student is eligible to take the preliminary examination if the student:

- is enrolled in the Department of Biostatistics PhD Program with good standing (3.00 QPA or greater)
- did not fail the preliminary examination more than once; and
- completed the required courses (listed below) with a B or better, or equivalent coursework which the student has obtained transfer credits or exemption for

Required Coursework

Application

Part 1 of 2

- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Theory

Part 2 of 2

- BIOST 2043 - INTRODUCTION TO STATISTICAL THEORY 1
- BIOST 2044 - INTRODUCTION TO STATISTICAL THEORY 2

- BIOST 2051 - STATISTICAL ESTIMATION THEORY
- BIOST 2061 - LIKELIHOOD THEORY AND APPLICATION
- BIOST 2083 - LINEAR MODELS

Doctoral Dissertation

Students must write a dissertation that presents the results of a research project carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. The PhD dissertation should consist of material sufficient for at least two publications in peer-reviewed journals. At least one of the manuscripts, based on the dissertation and first authored by the student, must be submitted before the PhD dissertation defense. For PhD students matriculated prior to fall 2015, it is recommended that at least one of the manuscripts be submitted before the PhD dissertation defense. It is the responsibility of the student's dissertation committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

Before the student's dissertation overview and comprehensive examination, the student's dissertation advisor proposes for the approval of the Department Chair and Assistant Dean for Student Affairs, a doctoral dissertation committee.

Dissertation Overview & Comprehensive Examination

Doctoral students must prepare and present a dissertation proposal. The dissertation proposal consists of two parts: (i) a presentation of a dissertation overview to members of the student's doctoral committee and all interested members of the Department of Biostatistics and (ii) a comprehensive examination attended only by the student and his/her doctoral committee. The purposes of the overview and the comprehensive exam are for a student to demonstrate that he/she is prepared to complete a dissertation by showing a general breadth of biostatistical knowledge and deep understanding of particular area(s) of biostatistics, demonstrating the ability to use biostatistical research methods and presenting a carefully formulated plan of novel dissertation research. An announcement advertising the time and location of the dissertation overview should be disseminated to the Department at least one week prior to the presentation. The doctoral committee must unanimously approve the dissertation topic and research plan before the student is admitted to candidacy for the doctoral degree. Approval of the overview does not imply either the acceptance of a dissertation prepared in accord with the overview or the restriction of the dissertation to its original overview. The dissertation overview and comprehensive examination should be passed at least one academic term before scheduling the dissertation defense.

Admission to Candidacy

Admission to candidacy for a doctoral degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation.

Eligibility

To qualify for admission to candidacy a student must:

- be in full graduate status
- have satisfied the requirement of preliminary examination
- have completed all required coursework with a minimum quality point average (QPA) of 3.00
- shown proficiency in a research or investigative tool
- have received approval of the proposed dissertation subject and plan following successful completion of the dissertation overview and comprehensive examination requirements

Students are informed of admission to candidacy by written notification from the Assistant Dean for Student Affairs.

Admission to candidacy should occur at least one academic term before the defense of the dissertation in order to provide an opportunity for the dissertation committee members to review, criticize, and monitor the proposed research.

Meetings of the dissertation committee and student must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the dissertation committee should assess the student's progress toward the completion of degree requirements and discuss objectives for the following year and a timetable for completing degree requirements.

Doctoral Dissertation Defense

The final oral examination in defense of the doctoral dissertation is conducted by the student's dissertation committee. One copy of the dissertation must be submitted to each member of the dissertation committee at least two weeks before the scheduled doctoral defense. The defense may not be scheduled earlier than two weeks following submission of the dissertation, but must be held at least two weeks before the degree is conferred.

At least one month before the scheduled defense, the student must provide the department registrar with the defense time, date, place, dissertation title and abstract for school-wide advertisement. The student must also provide these details to the University Times and Pitt Chronicle for advertisement at least one month before the scheduled defense.

The final copy of the dissertation must be prepared and submitted according to University Guidelines for Electronic Theses and Dissertations (ETD). Detailed dissertation rules can be found in the Pitt Public Health Handbook.

Graduation

All PhD students must register for at least one credit or FTDR 3999 during the term in which they intend to graduate.

Master's

Biostatistics, MS

The MS in biostatistics degree program is for students with a background in mathematics and a strong interest in biology and public health. The program emphasizes statistical theory and methods so that students are prepared to be effective statistical collaborators in interdisciplinary studies; and lead the design and execution of studies.

Program Objectives

Students successfully completing the MS Program in Biostatistics will be able to:

- Address health problems by appropriate problem definition, study design, data collection, data management, statistical analysis, and interpretation of results
- Demonstrate mastery of the theory underlying statistical methods
- Understand and implement innovative statistical approaches
- Communicate biostatistical analyses to individuals with varying degrees of statistical knowledge
- Apply research design principles to problems in public health
- Recognize strengths and weaknesses of approaches, including alternative designs, data sources, and analytic methods
- Determine the data best suited to address public health issues, program planning, and program evaluation

General Requirements for Master's Degrees

For an overview of University-wide regulations for master's students, see Regulations Pertaining to Master's Degrees.

Requirements

Coursework

A minimum of 40 credits are required.

Full-time students normally complete graduation requirements for the MS degree within three to five terms (18 to 24 months).

Core Courses

- BIOST 2025 - BIOSTATISTICS SEMINAR
- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2043 - INTRODUCTION TO STATISTICAL THEORY 1
- BIOST 2044 - INTRODUCTION TO STATISTICAL THEORY 2
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- BIOST 2066 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE
- BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS
- BIOST 2087 - BIOSTATISTICS CONSULTING PRACTICUM
- BIOST 2093 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- BIOST 2099 - CAPSTONE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY *
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH *
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS * (2 terms required)

Note:

* Pitt Public Health Core Course

Electives

Students must complete Biostatistics elective credits to bring the total number of course credits to 40. In situations where a student's special interests or needs indicate an alternative, non-Biostatistics, course is more appropriate it may be substituted with the permission of the student's academic advisor and department chair.

Master's Comprehensive Examination

MS students must pass a written comprehensive examination that is given annually at the end of the first year of study in early May. The MS comprehensive examination consists of two short answer components: one for theory and one for applied methods. The examination is a proctored closed book exam.

Eligible students who fail the examination on the first attempt will be permitted to take the examination a second time during the summer. The summer examination is only for eligible first-year students who did not pass the examination on the first attempt in order not to delay graduation or decisions about continuation in the program. Eligible students who fail the examination on the first attempt may also choose to wait until the following May to retake the exam. Students who do not pass the examination on the second attempt will be released from the MS Program in accordance with the Pitt Public Health Probation and Dismissal Guidelines.

Once a student passes the preliminary examination, the student may begin working on his/her thesis. Students should not begin thesis work before they pass the comprehensive examination.

Eligibility

A student is eligible to take the comprehensive examination if the student:

- is enrolled in the Department of Biostatistics MS Program with good standing (3.00 QPA or greater)
- did not fail the comprehensive examination more than once
- completed the required courses (listed below) with a B or better, or equivalent coursework which the student has obtained transfer credits or exemption for

Required Coursework

- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2043 - INTRODUCTION TO STATISTICAL THEORY 1
- BIOST 2044 - INTRODUCTION TO STATISTICAL THEORY 2
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY

Master's Thesis

MS students must register for Capstone (BIOST 2099) after successful completion of the MS Comprehensive Examination requirement. Capstone is a required two-credit course that meets the master's thesis requirement. Capstone credits cannot be used to fulfill elective credit requirements. MS students are required to write and defend a master's thesis. The master's thesis must be in accord with specifications stipulated in the Format Instructions for Pitt Public Health Essays, Thesis, and Dissertations (ETD). The thesis work, including analysis, writing, defending and presenting are done within the Capstone course.

Capstone is a heavily directed, mentored, fast-paced and intense data analysis/writing course with the goal of producing an ETD formatted thesis document containing rigorous analytic methods, appropriately summarized analysis results with logical, statistically and scientifically valid conclusions. Capstone projects may be based on student work with a faculty member, access to a dataset with a research question from an outside source, or work done on a student internship. In addition, if none of these options apply to an individual student, open access datasets from previously funded research projects in the department or open access databases will also be available for students to use. All projects must have a public health focus.

Because of the fast pace and rigor necessary to complete Capstone within one term, it is critical that students prepare in advance of the course. In the semester prior to taking the course but only after passing the MS Comprehensive exam, students must meet with one of the course directors to discuss possible data sets, potential research questions and Pitt faculty members who are not on the Biostatistics faculty core to serve as an external reviewer as required by Pitt Public Health.

In the first two weeks of Capstone, students will finalize their data set, complete a project prospectus and write thesis research question(s). Also during this time, the Capstone director requests the approval of the Department Chair and Assistant Dean for Student Affairs, a master's thesis committee for each student in the Capstone. This committee will be the instructors of the Capstone course, the thesis advisor (if one is selected) as well as a Pitt faculty member who is not on the Biostatistics faculty core. Students may select a Biostatistics faculty member other than the Capstone instructors as their thesis advisor. This is not required, but if a different thesis advisor is selected, this faculty member must sign a memo of understanding in which they agree to adhere to the pace of the course. It will be the students' responsibility to gain the faculty members signature.

The MS thesis committee will judge the adequacy of the MS thesis by the final oral presentation/examination covering the subject of the thesis which occurs in the final week of the Capstone course. Successful completion of the MS thesis requires unanimous agreement by the MS thesis committee.

It is required that all students follow the format instructions for Pitt Public Health essays, theses, and dissertations and work in the ETD template when they start to write their thesis. The final copy of the thesis must be prepared and submitted according to University Guidelines for Electronic Theses and Dissertations (ETD).

Graduation

All MS students must register for at least one credit during the term in which they intend to graduate.

Department of Environmental and Occupational Health

The mission of the Department of Environmental and Occupational Health (EOH) is to study and elucidate the health effects of exposure to chemical, physical, and biological agents encountered in the workplace or general environment. Intrinsic to this research mission is that fundamental information regarding actions of environmental toxicants will provide insight into basic human biology in health and disease. Accordingly, current research includes fundamental studies on free radical biology and especially oxidative lipidomics and mitochondrial function, genetic basis of susceptibility to injurious agents including gene x environment approaches, cellular and molecular regulation of reparative response to injury including mesenchymal stem cells as modifying biological therapeutic agents, cardiopulmonary toxicology of heavy metals and particulate matter including nanoparticles, molecular carcinogenesis including metabolism of telomeres and DNA damage and repair, genetic and epigenetic contributions to neurodegenerative disease with focus on cholesterol dyshomeostasis and

integrated studies in complex disorders such as environmental induced interstitial pulmonary fibrosis. In addition, a focus on exposure science and environmental epidemiology supports efforts into the health effects of air pollution and public health concerns associated with energy procurement including unconventional natural gas development. Translation of these collective efforts in basic and applied research is in part provided by members of EOH active in environmental policy, risk assessment, and community behavioral sciences. These efforts coincide and are coordinated with mentoring and educational programs for pre-doctoral (PhD, MS) and (DrPH, MPH) students.

For information on admission or registration, contact Penny Weiss at 412-383-7297 or email pweiss@pitt.edu.

Admissions

Course work in mathematics and the physical, chemical, and biological sciences must be documented in the undergraduate transcript. Acceptable undergraduate training includes a bachelor's degree in the physical, chemical, or biological sciences with a minimum of two courses each in organic chemistry, biology, physics, and calculus.

Applicants for admission must also take the Graduate Record Examination (GRE). The MPH and DrPH programs also accept MLATS and DATS. If the candidate already has a graduate or professional degree a waiver may be approved by the department. Consistent with Pitt Public Health requirements, students are ordinarily required to have at least a 3.00 (on a 4.00 scale) overall undergraduate GPA, and a 3.00 GPA in the basic science courses (chemistry, physics, biology, mathematics).

Financial Assistance

Financial support is available for tuition and stipend for PhD students through a graduate research assistance program from the University of Pittsburgh Graduate School of Public Health. Stipends are made available from the Department of Environmental and Occupational Health, and from individual research laboratories. Although DrPH and master's students in the environmental health and/or environmental health risk assessment programs are eligible for support, in general it is expected that tuition and stipends for these students will be derived from external sources.

Graduate Degree Programs

PhD and MS Programs

The PhD in Environmental Health Sciences is designed to provide a broad theoretical and practical education for individuals who desire positions in academic, industrial or government laboratories as teachers and/or researchers in the multifaceted discipline of Environmental Health Science with an emphasis on environmental impact on human disease and disease susceptibility. The Environmental Health Sciences program is an integrated modern curriculum combining training in the toxicological and environmental biophysics disciplines that are traditional to the Department of Environmental and Occupational Health with the new and continually developing fields of cellular and molecular pathobiology of environmental disease and gene environment interactions. The program provides an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations. Master of Science degree in Environmental Health Sciences may be pursued and obtained along the way or independently.

EOH PhD and MS Handbook

MPH and DrPH Programs

The Master of Public Health in Environmental and Occupational Health is a key component of Public Health. Local environmental health professionals are the "front line troops" in the public health battle to prevent disease. The Department of Environmental and Occupational Health offers an MPH degree program to provide professional education for individuals who desire positions in environmental health or who already have environmental health positions and are seeking to strengthen their professional competency. The Doctor of Public Health in Environmental and Occupational Health provides further advanced professional education for those individuals who desire leadership positions in public health practice, policy analysis, professional communication, program management, high-level administration, and/or decision-making in an environmental health setting.

EOH MPH and DrPH Handbook

Certificate Programs

The certificate in **Environmental Health Risk Assessment** is offered for interested students and for professionals currently employed in environmental health positions. The risk assessment certificate program provides concentrated coursework relevant to human health risk evaluation and is an efficient means for achieving proficiency in this area of environmental health.

Certificate

Environmental Health Risk Assessment Certificate

This program provides concentrated coursework relevant to human health risk evaluation.

General Requirements

Students must have a graduate degree or be pursuing one concurrently. Students must complete 15 credits: 11 credits of required courses (EOH 2122, EOH 2175, EOH 2181, and EOH 2504) plus 4 elective credits.

Required Core

- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS

Suggested Electives

Electives 4 credits

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY

Doctoral

Environmental and Occupational Health, DrPH

Program Requirements -72 credits

DrPH students must complete the MPH curriculum to satisfy the preliminary qualifying requirements for the program. Students spend the remainder of the program completing their research projects for a total of 72 credits. During the research project, students will meet with their dissertation committee to present an overview of their planned dissertation and be orally examined in areas broadly relevant to their chosen specialty. Preparation and submission of the written manuscript followed by its oral presentation to the dissertation committee completes the program.

EOH Required Course Work

- EOH 2021 - SPECIAL STUDIES 2 Credits Essay
- EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

GSPH Core Requirements

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH

Environmental and Occupational Health, PhD

The PhD in environmental and occupational health provides a broad theoretical and practical education for individuals who desire positions in academic, industrial, or government laboratories in the multifaceted discipline of environmental health sciences. The program combines training in classical toxicological and environmental biophysics with the new and continually developing fields of cellular and molecular pathobiology of environmental disease. Training is geared toward an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations.

Program Requirements

PhD students must complete coursework and research for a total of 72 credits. Attendance and participation in departmental seminars and journal clubs is required. During the first two years of study, students will take the majority of their coursework and have an opportunity to rotate in three different research laboratories. After the first year, students are expected to engage in independent research projects oriented towards their thesis research. Preliminary qualifying examinations for the PhD degree occur in the second year after all core courses have been taken. Students spend the remainder of the graduate program completing the research project and taking selected elective courses. Dissertation preparation and defense complete the PhD requirements. *See General Requirements for Doctoral Degrees and Regulations Pertaining to Doctoral Degrees for more information*

EOH PhD Core Requirements

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2109 - MOLECULAR TOXICOLOGY JOURNAL CLUB minimum 4 semesters
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- EOH 2110 - ROTATION/PRACTICUM at least 2 semesters
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS 2 Semesters
- EOH 2021 - SPECIAL STUDIES
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE OR
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS

Electives

Students must take 12 credits in electives from University wide graduate level courses

Master's

Environmental and Occupational Health, MPH

The MPH program provides an opportunity for students interested in environmental and occupational health to become familiar with the relevant concepts as they apply to public health practice. The program will also be an opportunity for working health professionals to achieve an in-depth environmental perspective as well as a degree in public health. The degree may be tailored more toward either environmental health science or risk assessment depending on the choice of electives and desire of the student.

Program Requirements -47 credits

MPH students must complete the prescribed coursework. In addition, they must complete an independent study under the supervision of a faculty member and register for a practicum experience. Students will take the school-wide core courses as part of the required credits to complete their degree. MPH students are also required to write an essay that is submitted to an examination committee for approval. The curriculum consists of 47 credits and the degree normally takes two years.

GSPH Core Requirements

Required coursework for EOH MPH degree

- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

EOH Core Requirements

- EOH 2180 - INTRODUCTION TO RISK SCIENCES
- EOH 2181 - RISK ASSESSMENT PRACTICUM
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY
- EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM
- EOH 2021 - SPECIAL STUDIES 2 Credit Essay

Electives - Total 6 Credits

Students are required to take 6 credits of electives (school wide graduate level). Detailed below are some of the suggested electives students can take.

- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS
- EOH 2513 - POLICY AND DECISION MAKING FOR PUBLIC HEALTH EMERGENCIES AND BIOTERRORISM
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- BCHS 2572 - RISK COMMUNICATION
- EPIDEM 2220 - APPLIED SPATIAL/COMMUNITY EPIDEMIOLOGY
- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS

Environmental and Occupational Health, MS

The emphasis of the MS in environmental and occupational health is directed towards the theoretical underpinnings of environmental health sciences and toxicology with more limited involvement in laboratory-based research. The program is designed as an integrated modern curriculum combining the training in the toxicological and environmental biophysics disciplines that are traditional to the Department of Environmental and Occupational Health with the new and continually developing fields of cellular and molecular pathobiology of environmental disease and gene environment interactions. The program provides an understanding of how relevant environmental exposures, laboratory based model systems, and gene-environment responses can be interpreted and applied to the study of disease etiology in exposed and potentially exposed human populations. The MS degree may be awarded as a terminal degree to students who do not enter the PhD program.

Program Requirements

MS students will follow the same coursework as the PhD students. They will, however, finish their program with 42 credits and a thesis. The degree takes approximately two years to complete. Students are also subject to a comprehensive exam. PhD students who do not progress to admission to candidacy may obtain a Master of Science with the completion of the MS requirements including a thesis.

MS Core Course Requirements

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS 2 Semesters
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- EOH 2175 - PRINCIPLES OF TOXICOLOGY
- EOH 2109 - MOLECULAR TOXICOLOGY JOURNAL CLUB Minimum 4 Semesters
- EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE
- EOH 2310 - MOLECULAR FUNDAMENTALS
- EOH 2110 - ROTATION/PRACTICUM At Least 2 Semesters
- EOH 2021 - SPECIAL STUDIES
- EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE OR

- EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS

Department of Epidemiology

Epidemiology is the application of the scientific method to the study of disease in populations for the purpose of prevention or control. It is a key basic science of public health and preventive medicine. Epidemiologists play a fundamental role in public health and preventive medicine by identifying variabilities in human situations that may have a critical influence on the occurrence of disease within populations.

The epidemiological method for studying a problem involves three approaches:

- Description of the frequency and determinants of a disease in a defined population;
- Evaluation of factors that may cause a disease; and
- Experimental studies of the effects of modifying risk factors on the subsequent frequency of a disease.

Admissions

Applying for Admission to Pitt Public Health

The department accepts students with a variety of prior health-related professional degree backgrounds, prior graduate degrees, and superior students who have completed a bachelor's degree. Students may matriculate for the MPH, MS, DrPH, or PhD degree. A joint MD/PhD program is also available. Major areas of emphasis within the department are aging, psychiatric, cancer, injury prevention, applied public health cardiovascular and diabetes, clinical trials and methods, infectious disease, molecular and genetic epidemiology, environmental epidemiology, global health, prevention lifestyle and physical activity, neuroepidemiology, obesity and nutritional epidemiology, reproductive, perinatal, and pediatric epidemiology, and women's health.

Financial Assistance

Graduate Student Researcher (GSR) Appointment Information for doctoral program applicants and students only: Graduate Student Researcher Position

Financial Assistance: Tuition & Financial Aid

Minority Student Support Information: <http://www.healthequity.pitt.edu/funding-opportunities>

Research

In fiscal year 2017-2018, the faculty within the Department of Epidemiology received approximately \$22.5 million in research funds. These projects, mostly federally funded, included activity in the major areas of focus within the department. For additional information, review details about our research practices and our numerous Areas of Research Emphasis .

Degree Requirements: Master's and Doctoral Curricula

The student's course of study includes Graduate School of Public Health core courses, department core courses, electives drawn from our frequently used courses, and other appropriate selections throughout the University. The sequencing of courses is developed in conjunction with the major advisor, taking into account background, area of focus, degree program, and Pitt Public Health requirements. The minimum credit requirement is 30 for the master's programs for health professionals and 72 for the doctoral programs. A 45-credit MPH or MS is available for students who are not health professionals. This is a 16-month or 20-month program; MPH students will be involved in a hands-on internship. Master's students must complete a (MS) thesis or essay (MPH) and doctoral students (PhD or DrPH) must complete a dissertation and one-semester Teaching Practicum experience. DrPH students must also fulfill a practicum requirement.

The following are the required departmental courses for students pursuing degrees in the Department of Epidemiology.

Doctoral

Epidemiology, DrPH

Pitt Public Health Requirements

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- Academic Integrity Training
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Department of Epidemiology Requirements

- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
 - EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
 - EPIDEM 2180 - EPIDEMIOLOGICAL METHODS 1
 - EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS
 - EPIDEM 2183 - READING, ANALYZING AND INTERPRETING PUBLIC HEALTH MEDICAL LITERATURE
 - EPIDEM 2187 - EPIDEMIOLOGICAL METHODS 2 OR
 - BIOST 2066 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE or
 - BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
 - EPIDEM 2214 - PUBLIC HEALTH INTERNSHIP
 - EPIDEM 2215 - TEACHING PRACTICUM
 - EPIDEM 2230 - ADVANCED TOPICS IN EPIDEMIOLOGICAL METHODS
 - EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY
 - EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL
 - EPIDEM 2921 - GRANT WRITING
 - EPIDEM 3100 - RESEARCH AND DISSERTATION PHD OR
 - FTDR 3999 - FULL-TIME DISSERTATION STUDY
 - PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
 - BIOST 2093 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- OR
- EPIDEM 2185 - INTRODUCTION TO SAS
 - BIOST 2049 - APPLIED REGRESSION ANALYSIS
 - HPM 2131 - PUBLIC HEALTH LAW AND ETHICS
 - BCHS 2558 - HEALTH PROGRAM EVALUATION
 - Internal Review Board (IRB) Training
 - Presentation Training - Complete at least two posters or oral presentations. Advisor sign-off is required.
 - Leadership Training - Complete at least 6 credits of electives in leadership, advocacy, communication, or management.
 - Possibilities include: PIA 2192, PIA 2028, PIA 2509, PUBHLT 2025, BCHS 2504, BCHS 2572, BCHS 3504, BCHS 2135, HPM 2063 HPM 2081, HPM 2133

Electives

Add electives as recommended by academic advisors to earn total credits required for the program. All Pitt Public Health course descriptions may be found on the Department of Epidemiology course offerings.

Epidemiology, PhD

 - BIOST 2093 - SAS FOR DATA MANAGEMENT AND ANALYSIS
- OR
- EPIDEM 2185 - INTRODUCTION TO SAS
 - Internal Review Board (IRB) Training
 - Presentation Training - Complete at least one poster or oral presentation. Advisor sign-off req.

Electives

Add electives as recommended by academic advisors to earn total credits required for the program. All Pitt Public Health course descriptions may be found on the Department of Epidemiology course offerings.

Department of Health Policy and Management

The Department of Health Policy and Management prepares individuals to assume roles of leadership, policy development, and management within the health care system and public health. Its educational programs are grounded in the faculty's contributions in advancing the state of knowledge and professional practice in institutional and system health care management and the development, advocacy, analysis, and implementation of health policy. The HPM Faculty are engaged in interdisciplinary research addressing a range of problems relevant to public policy, organization, and management as applied to health care organizations and systems and in various professional and community service activities.

Graduate Degree Programs

The Department of Health Policy and Management offers the following graduate degree programs: Master of Health Administration (MHA), Master of Public Health (MPH), Master of Health Administration and Master of Business Administration (MHA/MBA), Juris Doctor/Master of Public Health (JD/MPH), Master of Science in Health Services Research and Policy (MS), a PhD in Health Services Research and Policy, a Graduate Certificate in Health Care Systems Engineering, and a Graduate Certificate in Health Systems Leadership and Management.

The MHA program offers a graduate education relevant to both the aspiring and already practicing health care management/policy professional; a curriculum that anchors the program in its public health tradition while also providing the students with necessary tools, technologies, and knowledge in organizational and system management and policy analysis. Career and professional development activities are provided through the professional practice component of the curriculum which includes a Management Residency, the Executive in Residence program, professional mentorship, and participation in the HPMA Student Chapter and other networking and professional development opportunities.

The MPH Program in the Department of Health Policy and Management in the Graduate School of Public Health at the University of Pittsburgh provides advanced education for recent graduates, entry-level, and mid-career professionals to facilitate their career development as leaders and managers, health professionals, policy analysts, and advocates for various roles and contexts in public health and health care.

The MHA/MBA joint degree program offered by the Department of Health Policy and Management and the Katz Graduate School of Business provides an outstanding professional development opportunity for high-achieving applicants. This program prepares graduates to assume fast-track middle management and executive leadership positions in health care organizations. This rigorous program combines the expertise of the Katz faculty in finance, marketing, business operations and strategic planning with that of the HPM faculty in health care

structures and policy, outcomes measures, data analytics and patient safety and quality management. This three-year, 78-credit program includes a required management residency in the form of two separate field placements during the summer terms or one extended residency experience.

The department also offers a joint degree program with the School of Law, the JD/MPH program in law and health policy. This joint degree program was developed in recognition of the important area of intersection between the practice of law, health policy and health care delivery in the United States. Graduates of this program are provided the academic foundation for professional roles in public policy analysis and development, the practice of law for private clients with specialization in health law, and as inhouse counsel for health care organizations and systems and regulatory agencies. Applicants must be admitted to both the Graduate School of Public Health and the School of Law.

The Master of Science in Health Services Research and Policy program prepares graduates for positions in health services research and policy, analytics and also prepares them for higher level education (such as a PhD). Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services

The PhD in Health Services Research and Policy provides advanced educational and professional development opportunities for individuals entering a career in health services research and policy. The program meets an ongoing need for public health researchers who focus on cost, access, and quality of the health care system. Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services. The goals of the program are to provide graduates with contemporary training in research design and methods appropriate for studying the health care system, experience in developing an NIH style grant proposal, and experience writing for publication, presenting results at a scientific meeting, and teaching. Students identify an area of focus that informs the substance and provides the theoretical framework for their research. Upon completing the program, graduates will be prepared for positions in academia, government or the private sector as experts in health services research and policy.

The Graduate Certificate in Health Care Systems Engineering is offered jointly by the Graduate School of Public Health and the Swanson School of Engineering. This certificate is designed for students in the Department of Health Policy & Management (Pitt Public Health) and the Department of Industrial Engineering (Swanson) and provides students with specific experiences and analytical tools required for effective problem solving relative to quality improvement and process engineering in the health care industry. Students are equipped to serve as leaders in addressing the challenges health care faces in the twenty-first century. Health care management students will learn engineering principles, models, and tools following a systems approach to analysis, problem solving, and project implementation, while engineering students gain knowledge of health care operations, the organizational culture, and the strategic issues facing the industry. With a focus on innovation, effectiveness, and efficiency in health care and public health, the certificate nurtures well-educated professionals and leaders in their disciplines. Contact Jessica Dornin for more information.

The Graduate Certificate in Health Systems Leadership and Management provides rigorous training for healthcare clinicians and providers looking to enhance their careers and improve healthcare delivery through strengthened leadership and management skills. The certificate is primarily designed for physicians, but is open to all healthcare clinicians and providers. The curriculum of 15-16 total credits consists of coursework in the following areas: Leadership Theory and Practice, Strategic Management, Financial Management, Health Policy, Quality and Patient Safety, and an applied project. Contact Jessica Dornin for more information.

Admission Requirements

Masters Degree Programs: The Graduate School of Public Health requires that students apply online for all degree programs. Requirements for admission include a bachelor's degree from an accredited college or university; acceptable scores on the Graduate Record Examination (GRE) for the MS, MHA and MPH and acceptable scores on the GRE and/or LSAT for the JD/MPH; and successful completion of: three postsecondary (college/university)-level semester credits in biology; three post-secondary (college or university) level semester credits in mathematics (algebra or higher); and 6 post-secondary (college/university) level semester credits in social and behavioral sciences, preferably including one course in economics.

In addition, the Admissions Committee cites the following as important factors in the admissions decision: undergraduate performance, GRE scores, letters of recommendation, relevant work (or volunteer) experience, and good interpersonal and communication skills. Most applicants are interviewed as part of the application review process. Students enroll in August of each year. Although a rolling admissions process is in place, applicants are encouraged to apply as soon as possible and prior to the end of May. International University of Pittsburgh students should apply by February 1.

Doctoral Degree Program: Applicants to the PhD Program in Health Services Research and Policy must hold a baccalaureate degree with a GPA of at least 3.3 desirable; college level coursework in calculus with a grade of 3.0 or better is a prerequisite; applicants must submit scores on the verbal, quantitative and critical thinking and analytical writing portion of the Graduate Record Examination (GRE)-a

quantitative score of 720 or higher, verbal score of 560 or higher, and analytical writing of 5.0 or higher are desirable. Applicants for whom English is not their first language must submit scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam. Students must score a minimum of 213 on the computerized TOEFL (or 550 on the paper-based version). The minimum score for the IELTS is 65.

In addition, applicants must demonstrate in their personal statement that they have a clear understanding of how the program of study will benefit them in achieving their career goals. Three letters of recommendation are required from individuals who are in a position to judge the applicant's professional and or academic abilities. At least one recommendation should be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or advisor).

Certificate Program in Health Care Systems Engineering: Applicants to this program must be admitted to or enrolled in the MHA program, the HPM-MPH program, or the MS program in industrial engineering.

Certificate Program in Health Systems Leadership and Management: All Certificate applicants, except those already enrolled in GSPH, need to apply through SOPHAS. In addition, the Certificate applicant will submit a brief statement addressing: interest in health systems leadership and management; previous experience; areas of interest; and the relation of the Certificate to career goals.

The admission requirements for applicants are based on completion of at least an advanced health care provider degree (e.g. MD, RN, PharmD, PT, OT) or appropriate job experience.

Financial Assistance

The Department of Health Policy and Management has limited scholarship funds and these funds are allocated separate from admission decisions. The scholarship funds are mainly awarded to incoming high caliber students on an annual basis. Graduate student assistantship and research positions are periodically available on a competitive basis.

Department Web site: www.hpm.pitt.edu

Certificate

Health Care Systems Engineering Certificate

Offered jointly by the University of Pittsburgh Swanson School of Engineering and Pitt Public Health, this program provides students with specific competencies and analytical tools required for effective problem solving relevant to quality improvement and process engineering in the health care industry. Students are equipped to serve as quality champions and agents of change in addressing the challenges health care faces in the twenty-first century. Engineering students gain knowledge of health care operations, the organizational culture, and the strategic issues facing the industry. Health care management students will learn engineering principles, models, and tools within a systems approach to analysis, problem-solving, and project implementation.

This certificate is intended for individuals pursuing careers in the management, redesign, and improvement of the health care industry. Designed for master's students in the Department of Health Policy and Management and the Department of Industrial Engineering, this program provides a rigorous and multidisciplinary education as a complement to the core curriculum of both programs. With a focus on innovation, effectiveness, and efficiency in health care and public health, the certificate nurtures well-educated professionals and leaders in their disciplines.

Students in this certificate program will be able to:

- Demonstrate knowledge of the structures, performance, quality, policy and environmental context of health and health care to formulated solutions for health policy problems,
- Design and implement projects, including collecting, analyzing, interpreting data and offering sound evidence-based recommendations, and
- Summarize and present health care engineering-related research orally and in writing.

Required Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- or
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2050 - HEALTH SYSTEMS ENGINEERING SEMINAR
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- IE 2000 - FUNDAMNTLS OF INDUSTRIAL ENGR
- IE 2001 - OPERATIONS RESEARCH
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
- IE 2998 - GRADUATE PROJECTS/PRACTICUM

Health Systems Leadership and Management Certificate

General Requirements

This graduate certificate provides rigorous training for health care clinicians and providers looking to enhance their careers and improve health care delivery through strengthened leadership and management skills. The certificate was initially designed for physicians in the School of Medicine, but is open to all health care clinicians and providers.

The admission requirements for applicants are based on completion of at least an advanced health care provider degree (e.g. MD, RN, PharmD, PT, OT), job experience, and career plans.

The curriculum requires 15-16 total credits and consists of coursework in leadership theory and practice; strategic management; financial management; health policy; quality and patient safety; and one applied project.

Required Courses

- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- or
- HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- or
- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- or
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2150 - STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS
- HPM 2700 - SEMINAR IN HEALTH SYSTEMS LEADERSHIP
- HPM 2275 - HPM SPECIAL STUDIES

*Applied Project

Doctoral

Health Services Research and Policy, PhD

Required Public Health Core Courses

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

Required HPM Core Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- HPM 2216 - HEALTH INSURANCE: FINANCING HEALTH CARE
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- HPM 3000 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 1
- HPM 3010 - SEMINAR ON ORGANIZATIONAL STUDIES: HEALTHCARE ORGANIZATIONS AND ENVIRONMENTS
- HPM 3064 - HEALTH POLICY ANALYSIS
- HPM 3065 - ADVANCED HEALTH POLICY ANALYSIS: IMPLEMENTATION, EVALUATION, AND TRANSLATION
- HPM 3125 - INTERMEDIATE HEALTH ECONOMICS
- HPM 3501 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 1
- HPM 3502 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 2
- HPM 3505 - ADVANCED EMPIRICAL MICROECONOMICS METHODS WITH APPLICATIONS FOR HEALTHCARE RESEARCH

Other Requirements

*HPM 3064: Health Policy Analysis is the prerequisite to HPM 3065 and must be taken during the spring term of the first year. In addition to required courses, students must have a minimum of 72 credits to graduate. Full Time Dissertation Study; Current Topics - Must attend all semesters and register for at least 2 Semesters; Teaching (1 credit) - Must serve as teaching assistant at least one semester; Area of Focus (Minimum 12, including electives)

Note:

- (a) Students without previous experience in health care are expected to take HPM 2105: Health and Medical Care Organization
- (b) Students must register for 3 dissertation credits or one semester of Full Time Dissertation Research (FTDR).

Requirements for the Ph.D. Degree:

(Note: This is not a complete list of requirements.)

For an overview of University-wide regulations for doctoral students, see Regulations Pertaining to Doctoral Degrees. All Pitt Public Health doctoral students must:

- Complete specific courses as determined by the program or the school, including at least 3 credits of 3100 (dissertation) or one term of FTDR (full-time dissertation research).
 - Fulfill the University's residency requirement.
 - Satisfactorily complete the preliminary/qualifying examination, the comprehensive examination, the dissertation overview, the dissertation defense, and the annual Individual Development Plan.
 - Meet the requirement for proficiency in tools of research.
 - Register for two terms of Public Health Grand Rounds.
 - Complete the online Academic Integrity Modules in the first semester.
- Individual programs will provide specific information on fulfillment of these requirements.

The Health Services Research and Policy (HSRP) PhD program meets an ongoing need for public health researchers who focus on cost, access and quality of the health care system. Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

The PhD requires a minimum of 72 credits. Students will work with their academic advisors to develop an area of focus with at least 12 credits (included in the 72 credit total) that focuses on a discipline or area of interest. The area of focus is the opportunity for students to gain specialized skills and knowledge relevant to their chosen research area. The courses for the area of focus can be based in a traditional discipline, an established field, or can be thematically linked based on the students' interests and goals. For example, students may choose from a traditional discipline such as economics, psychology, sociology or bioethics. Others may choose to focus on a technical area such as quantitative or qualitative research methods or survey design, or a substantive area such as quality and patient safety, gerontology, pharmacoeconomics, substance abuse, or mental health. Students must successfully pass a preliminary exam given after the first year, a comprehensive exam given after the second year, and typically present their dissertation overview towards the end of the third year. The doctoral dissertation will take the form of three thematically linked manuscripts of publishable quality.

PhD Curriculum

Joint Degree

Health Policy and Management, JD/MPH

Program Requirements

MPH students must complete the prescribed coursework. In addition, they must complete a capstone intellectual product (master's essay) under the guidance of a faculty committee and register for a practicum experience. Students will take the school-wide core courses as part of the required credits to complete their degree.

Pitt Public Health requires the completion of 45 credits to receive a Master of Public Health (MPH) degree, including 40 hours of required courses and 5 elective credits. However, joint degree participants may cross-count up to 8 hours of law school credits towards their MPH.

The School of Law requires 88 credits for the Juris Doctor. Of these, 12 credits may be cross-counted from Pitt Public Health. Overall a total of 113 credit hours is required for completing the joint degree program, which is 20 credits fewer than completing all of the coursework independently.

Pitt Public Health Core Requirements

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- *Students must take either BIOST 2011 or BIOST 2041
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

*Must register for two terms

- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM Core Requirements

- HPM 1012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2025 - HPM PRACTICUM
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2049 - HUMAN RESOURCES MANAGEMENT FOR HEALTH CARE AND PUBLIC HEALTH PROFESSIONALS
- HPM 2063 - THE POLITICS OF HEALTH POLICY

- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT
- HPM 2133 - LAW IN PUBLIC HEALTH PRACTICE
- LAW 5089 - PUBLIC HEALTH LAW

Requirements for the JD/MPH Degree:

For the JD/MPH degree, students enrolled in the joint-degree program receive integrated training in law and public health over a three-and-one-half-year period. Students must apply to and be accepted by the School of Law and then can apply to the Graduate School of Public Health. Once admitted, the student completes the first year of law school before registering for courses in public health. During subsequent semesters students are encouraged to integrate coursework between the schools to best accommodate the students learning objectives. If obtained separately, the combined credit-hour requirements for the JD and MPH degrees is 133 credits (88 for the JD, and 45 for the MPH). Students enrolled in this joint-degree program, however, are able to apply a number of courses toward fulfillment of both degrees simultaneously thereby reducing the total required credits to 113.

JD/MPH Curriculum

Health Policy and Management, MHA/MBA

Required Public Health Core Courses

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2108 - LEADERSHIP, PROFESSIONALISM AND CAREER DEVELOPMENT
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2
- HPM 2141 - MANAGERIAL EPIDEMIOLOGY
- HPM 2216 - HEALTH INSURANCE: FINANCING HEALTH CARE
- HPM 2115 - HEALTH POLICY AND MANAGEMENT RESIDENCY
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2421 - HUMN RESORC COMPETITIVE ADVNTG
- BOAH 2517 - INTERPERSONAL SKILLS MANAGERS 1
- BSPP 2409 - STRATEGIC MANAGEMENT
- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2130 - HEALTH LAW AND ETHICS
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
- HPM 2037 - ESSAY-HA
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- HPM 2145 - MARKETING HEALTH SERVICES STRATEGY AND BUSINESS PLANS
- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2150 - STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS

General Requirements for Master's Degrees

(Note: This is not a complete list of requirements)

All master's degree-seeking students must:

- Complete the school-wide core courses required for their program, and complete and submit the thesis or essay
- Fulfill the program's core course requirements, including required courses, and any field work, and examinations
- Register for two terms of Public Health Grand Rounds
- Complete the online Academic Integrity Module in the first semester
- Submit a master's thesis or essay

Thesis or Essay

All master's students must complete a minimum of one essay/special study credit and meet the master's thesis/essay requirement. Program listings will specify the type of master's paper required. The form of the essay or thesis must be in accord with specifications stipulated in the University's Style and Form Manual or the ETD Format Guidelines Manual. The electronic copy of the thesis/essay must be uploaded and all required paperwork submitted to Joanne Pegher by the deadline posted for that graduation term.

MPH students who have been permitted to submit an article accepted for publication in lieu of the essay must meet the margin requirements and submit a committee signature sheet and title page patterned after that in the Style and Form Manual or the ETD Format Guidelines Manual. If there are multiple authors, a statement should be included explaining the role of each author. All essays must be read and approved by two faculty representing two different University of Pittsburgh Pitt Public Health departments. MS theses require approval by three readers.

Requirements for the MHA/MBA Degree:

An outstanding opportunity to become highly skilled in the management of health care processes, quality, and finances, the MHA/MBA joint degree program is designed to create future leaders in the management of health care organizations. Uniting the strengths of the University of Pittsburgh's Graduate School of Public Health and Joseph M. Katz Graduate School of Business, the program blends outstanding training in management and finance with the content expertise in health care quality improvement, outcomes measurement, and analytics.

Our highly trained graduates will be fully prepared to assume fast-track leadership positions in a variety of health care organizations. The Bureau of Labor Statistics estimates that the demand for health care managers will grow by 17 percent in the next decade. The U.S. health care system is the largest industry in the United States, currently consuming nearly 18 percent of GDP. At the same time, there remain significant problems with access and quality. The joint training in business and health care management should provide a strong foundation for a variety of positions in health care finance, insurance, operations, disease and population health management.

The standard full-time curriculum is a three-year, 78-credit course of study leading to the joint degree. The competency-based curriculum emphasizes both professional and leadership development, as well as functional management skills, blending courses across both the Katz School (MBA) and Pitt Public Health's Department of Health Policy and Management (MHA) in six academic terms.

Students are required to complete a management residency in the first summer term that may be extended into the second summer term. These supervised placements in health care services or health-related practice sites are an invaluable experience for professional development and networking. The student must also complete a master's essay and an applied management project at the residency site.

MHA/MBA Curriculum

Admissions

Students must complete applications for, and be accepted into, both the Graduate School of Public Health and the Joseph M. Katz Graduate School of Business. Application to Pitt Public Health must be submitted through SOPHAS at www.sophas.org. Application to the Katz Graduate School of Business should be made at www.business.pitt.edu/katz/apply.

Master's

Health Policy and Management, MHA

Required Public Health Core Courses

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS
- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS
- HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2029 - HEALTH MANAGEMENT INFORMATION SYSTEMS

Thesis or Essay

All master's students must complete a minimum of one essay/special study credit and meet the master's thesis/essay requirement. Program listings will specify the type of master's paper required. The form of the essay or thesis must be in accord with specifications stipulated in

the University's Style and Form Manual or the ETD Format Guidelines Manual. The electronic copy of the thesis/essay must be uploaded and all required paperwork submitted to Joanne Pegher by the deadline posted for that graduation term.

MHA students who have been permitted to submit an article accepted for publication in lieu of the essay must meet the margin requirements and submit a committee signature sheet and title page patterned after that in the Style and Form Manual or the ETD Format Guidelines Manual. If there are multiple authors, a statement should be included explaining the role of each author. All essays must be read and approved by two faculty representing two different University of Pittsburgh Pitt Public Health departments. MS theses require approval by three readers.

Requirements for the MHA Degree:

The MHA program offers students a competency-based curriculum and an array of professional development resources and activities to prepare graduates for managerial roles in health care systems and networks, managed care, health insurance, and long-term care organizations. The broad curriculum provides students with a foundation of knowledge, analytical and communication skills, and core values for ongoing career growth and professional and leadership development. Upon completion of the MHA program, our graduates obtain post-graduate fellowships or full-time employment in hospitals, academic medical centers, physician practices, long-term care facilities, health plans, and consulting firms.

The mission of the Masters in Health Administration (MHA) Program is to provide students with the competencies necessary for early to mid-level management positions and provide the foundation for subsequent professional development, leadership and executive management in organizations involved in the delivery or financing of health care services. The program's curriculum is based on evidence-based practice enriched by the research activity of the faculty.

In order to be eligible for graduation, students must complete 60 credit hours with a B average or better including a supervised management residency, which is typically scheduled during the summer term, and prepare a scholarly master's essay relating to the culminating experience. The curriculum includes select Pitt Public Health core courses, the required health management core, and elective credits offered within and outside the schools of the health sciences.

MHA Curriculum

Health Policy and Management, MPH

Program Requirements

MPH students must complete the prescribed coursework. In addition, they must complete a capstone intellectual product (master's essay) under the guidance of a faculty committee and register for a practicum experience. Students will take the school-wide core courses as part of the required credits to complete their degree. The curriculum consists of 45 credits typically completed over two years.

Pitt Public Health Core Requirements

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- *Students must take either BIOST 2011 or BIOST 2041
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- *Must register for two terms
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

HPM Core Requirements

- HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH
- HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1
- HPM 2025 - HPM PRACTICUM
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2037 - ESSAY-HA
- HPM 2055 - MANAGING HEALTH PROGRAMS AND PROJECTS
- HPM 2063 - THE POLITICS OF HEALTH POLICY
- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- HPM 2108 - LEADERSHIP, PROFESSIONALISM AND CAREER DEVELOPMENT
- HPM 2131 - PUBLIC HEALTH LAW AND ETHICS
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE

General Requirements for Master's Degrees

(Note: This is not a complete list of requirements)

All master's degree-seeking students must:

- Complete the school-wide core courses required for their program, and complete and submit the thesis or essay
- Fulfill the program's core course requirements, including required courses, and any field work, and examinations
- Register for two terms of Public Health Grand Rounds
- Complete the online Academic Integrity Module in the first semester
- Submit a master's thesis or essay

Thesis or Essay

All master's students must complete a minimum of one essay/special study credit and meet the master's thesis/essay requirement. Program listings will specify the type of master's paper required. The form of the essay or thesis must be in accord with specifications stipulated in the University's Style and Form Manual or the ETD Format Guidelines Manual. The electronic copy of the thesis/essay must be uploaded and all required paperwork submitted to Joanne Pegher by the deadline posted for that graduation term.

MPH students who have been permitted to submit an article accepted for publication in lieu of the essay must meet the margin requirements and submit a committee signature sheet and title page patterned after that in the Style and Form Manual or the ETD Format Guidelines Manual. If there are multiple authors, a statement should be included explaining the role of each author. All essays must be read and approved by two faculty representing two different University of Pittsburgh Pitt Public Health departments. MS theses require approval by three readers.

Requirements for the MPH Degree:

The MPH in Health Policy and Management (HPM) prepares students for careers as public policy analysts, advocates for public health and high quality care, and professionals engaged in the development and implementation of health policies. The program provides professional development through a combination of coursework, a health policy or management related practicum, a Public Health Leader-in-Residence, and other curricular activities.

This two-year, 45-credit Program prepares students for careers in both health policy development, analysis and advocacy and program and organization management in public health agencies, foundations, other nonprofits and the private sector. Graduates of our MPH Program should be well-prepared to pass the Certification in Public Health (CPH) exam, pursue related Doctoral studies and/or obtain professional employment in public health and related sectors, nationally and globally.

In order to be eligible for graduation, students must complete 45 credit hours with a B average or better including a supervised practicum, and prepare a scholarly master's essay relating to culminating experience. The curriculum includes the GSPH core courses, the required MPH core and elective courses offered within and outside of the schools of health sciences.

MPH Curriculum

Health Services Research and Policy, MS

Required Public Health Core Courses

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- HPM 3508 - RESEARCH AND DISSERTATION PHD

Decision Sciences Area of Emphasis Courses

- HPM 2123 - ADVANCED TOPICS IN DECISION AND COST-EFFECTIVE ANALYSIS IN HEALTHCARE
- HPM 2217 - CLINICAL DECISION ANALYSIS
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- IE 2086 - DECISION MODELS

Decision Sciences Suggested Elective Courses

- IE 2001 - OPERATIONS RESEARCH
- CLRES 2023 - SURVIVAL ANALYSIS
- CLRES 2026 - ANALYSIS OF CORRELATED DATA
- CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2215 - COMPUTER METHODS IN DECISION AND COST-EFFECTIVENESS ANALYSIS
- HPM 3501 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS I
- IE 2188 - SIMULATION MODELING AND APPLICATIONS

Health Policy and Economics Area of Emphasis Courses

- CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR
- HPM 2028 - MICROECONOMICS APPLIED TO HEALTH
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2064 - HEALTH POLICY ANALYSIS
- HPM 2216 - HEALTH INSURANCE: FINANCING HEALTH CARE

Health Policy and Economics Suggested Electives Courses

- BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION
- BCHS 3002 - HEALTH SURVEY METHODS
- BIOST 2046 - ANALYSIS OF COHORT STUDIES
- HPM 3125 - INTERMEDIATE HEALTH ECONOMICS

- HPM 3501 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 1
- HPM 3505 - ADVANCED EMPIRICAL MICROECONOMICS METHODS WITH APPLICATIONS FOR HEALTHCARE RESEARCH
- PIA 2028 - PUBLIC POLICY ANALYSIS
- PIA 2117 - PUBLIC PROGRAM EVALUATION

General Requirements for Master's Degrees

(Note: This is not a complete list of requirements)

All master's degree-seeking students must:

- Complete the school-wide core courses required for their program, and complete and submit the thesis or essay
- Fulfill the program's core course requirements, including required courses, and any field work, and examinations
- Register for two terms of Public Health Grand Rounds
- Complete the online Academic Integrity Module in the first semester
- Submit a master's thesis or essay

Thesis or Essay

All master's students must complete a minimum of two essay/special study credits and meet the master's thesis/essay requirement. Program listings will specify the type of master's paper required. The form of the essay or thesis must be in accord with specifications stipulated in the University's Style and Form Manual or the ETD Format Guidelines Manual. The electronic copy of the thesis/essay must be uploaded and all required paperwork submitted to Joanne Pegher by the deadline posted for that graduation term.

MPH students who have been permitted to submit an article accepted for publication in lieu of the essay must meet the margin requirements and submit a committee signature sheet and title page patterned after that in the Style and Form Manual or the ETD Format Guidelines Manual. If there are multiple authors, a statement should be included explaining the role of each author. All essays must be read and approved by two faculty representing two different University of Pittsburgh Pitt Public Health departments. MS theses require approval by three readers.

Requirements for the MS Degree:

The Master of Science in Health Services Research and Policy program prepares graduates for positions in health services research and policy, analytics and also prepares them for higher level education (such as a PhD). Graduates will be prepared to conduct research on policy issues affecting the organization, financing, and delivery of health care and public health services.

The MS requires a minimum of 42 credits. The program includes coursework in statistics and research methods as well as foundations in public health. Students must successfully pass a comprehensive exam given during the second year and submit and successfully defend a master's thesis.

MS Decision Sciences Area of Emphasis

MS Health Policy and Economics Area of Emphasis

Department of Human Genetics

The Department of Human Genetics provides graduate training in the fields of human genetics, public health genetics, and genetic counseling. The mission of the department is to discover new knowledge about the genetic determinants of human health and disease through basic and applied research; to educate students, trainees, and other interested persons in that knowledge; and to apply that knowledge to improve the health of populations, families, and patients.

Contact Information

ATTN: Noel Harrie
Department Office: 3102C Parran Hall
412-624-3066
Fax: 412-624-3020
E-mail: nce1@pitt.edu
<http://publichealth.pitt.edu/hugen>

Admission

In addition to meeting the Graduate School of Public Health's general admission requirements, applicants to the MS and PhD programs should have completed courses in calculus and genetics. For the Genetic Counseling program, the preferred undergraduate background includes courses in each of the following: genetics, organic chemistry-general biochemistry, calculus, statistics, and a behavioral or social science. In some cases, deficiencies can be made up after admission. For applicants to the MPH program, these courses are suggested but not required. For information on admission and registration contact the Department of Human Genetics at 412-624-3066 or nce@pitt.edu.

Financial Assistance

Financial aid in the form of graduate student assistantships is often available for PhD students. For other degree programs, aid is not usually available, although it is often possible to arrange for hourly wage/stipend support from research mentors or other faculty.

Major Educational Areas and Programs

Courses offered by the department address the areas of human population and quantitative genetics, biochemical and molecular genetics, cytogenetics, bioinformatics, genome sequence analysis, public health genetics, and genetic counseling. In addition, courses aimed at genetic counseling students provide training in clinical genetics, cytogenetics/molecular diagnostics techniques, risk communication, counseling, and ethics.

The principle objective of the courses in human genetics is to train students to critically examine the role of genes and genetic variation in determining the distribution of health and disease in the general population.

To achieve this objective, training is provided in both experimental and statistical approaches to the direct detection or estimation of the impact of genes on the health of individuals, families and populations. Such approaches include the evaluation of the relative roles of genetic and environmental factors and their interaction in determining the distribution of disease in the population. The department offers degree programs in three areas: human genetics (MS, PhD), genetic counseling (MS), and Public Health Genetics (MPH)

Human Genetics-PhD and MS

This area is concerned with the study of the mechanisms of genetic variability and its impact on health at the individual and population level. An important component is the study of the fraction of genetic variability that leads directly to disease or determines an individual's susceptibility to diseases caused by pathogens or adverse environments.

A PhD track in human genetics with an emphasis on genetic counseling is available to applicants with three to five years of work experience as a genetic counselor and who are certified in genetic counseling by the American Board of Genetic Counseling (ABGC) or the American Board of Medical Genetics (ABMG).

Genetic Counseling-MS

The objectives of the program are:

- To provide a balanced program of study integrating courses in molecular genetics, medical genetics, and psychosocial and multicultural counseling including biomedical ethics.
- To provide extensive direct patient contact experience in a variety of clinical placements so that the student gains an appreciation of how the practicing genetic counselor functions in different work settings.

- To prepare students at the Master of Science level for entering the profession of genetic counseling and assuming the role of a professional in medical, research, and academic settings.
- This is a full-time, two-year program. Course work occurs in the first year and is followed by a ten-month clinical rotation at nearby hospitals. The clinical internship involves laboratory experience and direct patient contact.

Public Health Genetics-MPH

The MPH program integrates genetics and the public health science disciplines of epidemiology, biostatistics, environmental health, and health services research, focusing on phenotypic disease prevention in populations.

Research

Research in the Department of Human Genetics includes studies of basic genetic mechanisms of segregation and recombination; family and population studies of normal and disease phenotypes; chromosome structure and chromosomal mechanisms in disease; physical and genetic mapping of genes; interaction of genes with the environment; bioinformatics and sequence analysis; assessment of genetic risk; community outreach regarding genetics; educational projects for the public health care professionals; the process of genetic counseling including decision making, communication, and satisfaction with clinical service; and the detection of genetic disease. Application of this research is explored with research in ethics, genetic counseling and screening. The focus of faculty research is on human genetics but includes experimental studies in appropriate non-human animals and methodological work in statistical genetics.

Certificate

Public Health Genetics Certificate

Advances in genetics are occurring at a pace that challenges our collective ability to respond to the many social, legal, ethical, and public health policy implications generated by this revolution of knowledge. Consequently, there is a compelling need to prepare future public health professionals in the biology, technology, applications, responsibilities, and issues of genetic information, which will play an increasing role in our understanding of health and disease. All areas of public health can be improved and expanded by examining the role of genetics in public health issues.

The purpose of the Certificate in Public Health Genetics is to provide graduates with a basic grounding in public health genetics that will enable them to function as public health professionals at the cutting edge of this important new area. Students enrolled in this certificate program are trained to incorporate knowledge of how genes, together with the environment and behavior, influence health and apply this insight into their area of practice or research. Students will be able to:

- Demonstrate basic knowledge of the role that genetics plays in the development of disease.
- Identify the limits of his/her genetic expertise.
- Identify ethical and medical limitations to genetic testing, including uses that don't benefit the individual
- Identify the role of cultural, social, behavioral, environmental, and genetic actors in the development and prevention of genetic-related diseases

More information regarding the program can be found on the Pitt Public Health website under the Academics tab, Degree Programs, and clicking on the Certificates designation.

Certificate Requirements

The curriculum consists of 15 credits, of which at least 12 must be traditional classroom courses. The remaining three credits can be seminar, project, or practicum work.

In addition, all students receiving the certificate must give a presentation in a public health genetics course.

Other courses may be permitted, but must be pre-approved by the director of the MPH in the Department of Human Genetics.

1) All students must take:

- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS

2) At least six credits from the following five courses are required to achieve competency in the basic science of genetics:

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2022 - HUMAN POPULATION GENETICS
- HUGEN 2031 - CHROMOSOMES AND HUMAN DISEASE
- HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE

3) A maximum of three credits may come from the following courses:

- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM
- HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS

4) Additional courses permitted for the certificate include the following:

- EPIDEM 2601 - MOLECULAR EPIDEMIOLOGY TOOLS & TECHNIQUES
- BCHS 2572 - RISK COMMUNICATION

**Other courses may be permitted, but must be pre-approved by the Director of the MPH in Public Health Genetics Program in the Department of Human Genetics.*

Students enrolled in Human Genetics degree programs other than the MPH in Public Health Genetics may receive the certificate, with the stipulation that the certificate curriculum must include at least six credits of coursework that is not part of the coursework for their degree and three credits of project or practicum work. The requirements for current Human Genetics students include:

- **Six additional credits of coursework not already required by the student's degree program** *Three of these credits must be HUGEN 2049: Introduction to Public Health Genetics and the additional three can come from the approved list of additional courses above or otherwise must be approved by the Directors of the MPH in Public Health Genetics program.*
- **Three credits of a project or practicum work** *A paper (10 double-spaced page minimum, plus references) describing the project or practicum is required to receive a grade for these credit hours. Writing guidelines will be provided.*
- **Students must give a presentation in a public health genetics course on a topic decided by the course instructor.**

Competencies

Graduates will be able to:

- (1) Apply knowledge of inheritance, including basic cellular and molecular mechanisms, and risk factors for disease to understanding a variety of rare and common health conditions.
- (2) Identify interactions among genes, environmental factors, and behaviors, and their effects on public health.
- (3) Assess the ethics of the application of genetic technologies to public health

Doctoral

Human Genetics, PhD

The Doctoral Program in Human Genetics prepares students for careers leading genetics and genomics research in academia or industry. The flexible curriculum provides a broad background in the field while allowing customized emphasis on molecular genetics/genomics, statistical genetics and genetic epidemiology, or genetic counseling. Typically four to ten doctoral students are admitted each year, including external applicants and internal applicants currently pursuing Master's degrees within the department. In addition to core coursework and advanced classes in a chosen area of interest, doctoral students pursue mentored research projects culminating in the production and defense of a dissertation.

AREAS OF STRENGTH

The doctoral program offers training in molecular genetics, statistical genetics and genetic epidemiology, and genetic counseling. This includes advanced coursework and outside-of-the-classroom training and research experiences. For example, during the second year and beyond, doctoral students will choose advanced courses in Human Genetics and elective courses across the Schools of the Health Sciences pertaining to their area of interest. Across all years, students will participate in workshops, laboratory meetings, and scientific conferences,

and attend seminars offered to the University community, that enhance knowledge and skills in their chosen area of study. Research experiences including dissertation research will provide in-depth, hands-on training in the chosen area.

Students entering the doctoral program can tailor their training based on their research interests and career goals:

Molecular Genetics

Students pursuing training in molecular genetics or cytogenetics will carry out research projects performing benchtop experimental studies in laboratories within the department or across the Schools of the Health Sciences. Students can further customize their training by choosing among many elective courses in Cell Biology and Molecular Physiology, Cellular and Molecular Pathology, Immunology, Molecular Genetics and Developmental Biology, Molecular Pharmacology, and Molecular Virology and Microbiology.

Statistical Genetics and Epidemiology

Students pursuing training in statistical genetics and genetic epidemiology will carry out applied analysis or methodological research projects related to clinical or epidemiological studies. Students will work as members of statistical and computational research groups within the department or across the School of the Health Sciences. Students can further customize their training by choosing advanced coursework in Biostatistics, Biomedical Informatics, Computational and Systems Biology, and Epidemiology.

Genetic Counseling

Students holding a MS-GC degree who wish to pursue a doctoral degree with a focus in genetic counseling will carry out original research in their area(s) of interest. In addition to addressing basic science or clinical research questions, students' projects will explore the medical, psychological, and familial implications of genetic contributors to human health and disease. Students can further customize their training by choosing elective courses from across the Schools of the Health Sciences in consultation with the Director and Assistant Director of the Genetic Counseling Program.

DOCTORAL COMPETENCIES

Students will gain proficiency in the knowledge, skills, and abilities required to begin a career as an independent scientist. These educational goals are organized into seven doctoral program competencies. After successful completion of the doctoral program, students will be able to:

- Describe basic genetic mechanisms and how they affect proteins, chromosomes, cells, individuals, and populations of organisms in normal and disease states
- Describe mechanisms by which genes and the environment interact to affect the distribution of health and disease in human populations
- Apply a broad range of molecular and analytical methodologies to design genetic studies.
- Use their conceptual and methodological knowledge to analyze data and interpret research results.
- Analyze and communicate published research in human genetics at the level needed for effective research and teaching
- Apply fundamental principles of ethical research practice.
- Query bioinformatic resources to facilitate clinical decision-making or interpret research results.

More information about the program can be found by visiting the Pitt Public Health website, Department of Human Genetics, and accessing the Doctor of Philosophy (PhD) in Human Genetics program designation.

Required Human Genetics Courses

COURSEWORK

Coursework for doctoral students is typically undertaken during the first two years in the program, although advanced courses may be taken in later years. All doctoral students will complete the core Human Genetics courses as well as the core Public Health curriculum. Advanced courses offered through Human Genetics and other departments will provide students instruction in their chosen area of concentration. Certificate programs offered through the Graduate School of Public Health can be pursued to further customize the education of doctoral students.

A minimum of 72 credits is required.

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2022 - HUMAN POPULATION GENETICS

- HUGEN 2025 - HUMAN GENETICS SEMINAR
(must take four times)
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
(must take two times)
- HUGEN 2031 - CHROMOSOMES AND HUMAN DISEASE
- HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE

Human Genetics Research Credits, under one or both of the following course designations:

- HUGEN 2021 - SPECIAL STUDIES - *variable*
- HUGEN 3010 - RESEARCH AND DISSERTATION PH.D. - *variable*

**In addition, two advanced courses are required. Students may select another advanced course with permission of the Graduate Director.*

Advanced Human Genetics Courses

- HUGEN 2029 - INTRODUCTION TO GENE MAPPING
- HUGEN 2051 - INBORN ERRORS OF DEVELOPMENT
- HUGEN 2070 - BIOINFORMATICS FOR HUMAN GENETICS
- HUGEN 2080 - STATISTICAL GENETICS

School Core Course Requirements

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
(must be taken for the first two semesters)
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Joint Degree

Genetic Counseling and Public Health Genetics Dual-Degree Program, MS/MPH

The University of Pittsburgh established the MPH in Public Health Genetics and MS in Genetic Counseling dual degree program in 2004, which was the first program of its kind to be offered to students pursuing a genetic counseling degree. The dual degree program enables students to build upon the clinical skills that they acquire through the Genetic Counseling Program to understand the importance of genetics, genomics, and genetic counseling in the field of public health.

Given the rapid expansion of available genetic and genomic testing, the current focus on precision medicine, and the increasing interest of national organizations, state public health offices, and hospitals in the application of genomics to public health, there is a growing need for professionals with skills in both disciplines. Graduates of the dual degree program are well-prepared to integrate public health genetics into clinical, research, public health, and industry settings. The dual degree program also benefits students by broadening their areas of expertise and career qualifications in other areas of public health including program development, evaluation, and policy.

There are a variety of options for completing the dual degree, which depend in part on the timing of the student entering the program. However, most students are able to complete the dual degree program in 22 months, which is one additional summer session beyond the typical completion time for the MS in Genetic Counseling degree program.

More information regarding the program can be found on the Pitt Public Health website, Department of Human Genetics, under the Dual MPH/MS Genetic Counseling program designation.

Dual-Degree Course Requirements

Students interested in both genetic counseling and public health genetics can pursue both degrees in a combined 62-credits (2.5 to 3 year) program. All requirements for each individual program must be completed.

All required courses for both degrees must be taken by dual degree students, with the exception of PUBHLT 2011, Essentials of Public Health. Given that some of the curriculum overlaps, the dual degree requires the completion of 62 credits. In addition to completing all of the requirements for the MS in Genetic Counseling degree, students enrolled in the dual degree will take an additional seven courses and fulfill the MPH practicum and MPH essay requirements.

The schedule below illustrates one possible schedule that would allow students to complete the Dual Degree Program in 22 months. Schedules are discussed on an individual basis with the Program Directors of the MPH in Public Health Genetics and MS in Genetic Counseling Programs.

Required Human Genetics Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2021 - SPECIAL STUDIES - *variable*
- HUGEN 2022 - HUMAN POPULATION GENETICS
- HUGEN 2025 - HUMAN GENETICS SEMINAR
(*must take two times*)
- HUGEN 2031 - CHROMOSOMES AND HUMAN DISEASE
- HUGEN 2032 - GENETIC TECHNIQUES
- HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES
- HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2036 - GENETIC COUNSELING INTERNSHIP
(*must take two times - fall and spring term of 2nd year*)
- HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
- HUGEN 2039 - RISK CALCULATION GENETIC COUNSELING
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE
(*must take four times but formally register once*)
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM
- HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS
(*must take two times but formally register once*)
- HUGEN 2053 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS
(*must take two times but formally register once*)

School Core Course Requirements

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
**(students in the Public Health Genetics program with adequate prior background may apply to be exempted from the requirement to take PUBHLT 2015)*
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
(*must take two times*)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Thesis and Essay

Students in the dual degree program will complete both the thesis requirement for the MS in Genetic Counseling degree and the Essay requirement for the MPH in Public Health Genetics degree. Depending on the thesis and essay topics, sometimes these documents can be combined into one document comprising the student's thesis project with additional background on public health genetics relevance and, at least, one additional, extensive chapter focusing on an application of public health genetics. The student's thesis committee and the Program Director for the MPH in Public Health Genetics will work with the student to identify the additional components or topics that are needed to satisfy the MPH Essay requirement.

Human Genetics and Medicine, PhD/MD

The joint MD/PhD program is a unique arrangement between the Department of Human Genetics and the Medical Scientist Training Program (MSTP), a collaboration between the University of Pittsburgh and Carnegie Mellon University. The program provides the opportunity for students to undertake a physician-scientist training program tailored to specific research interests, provided by the wide range of research that primary and secondary Human Genetics faculty are involved in within Pitt Public Health and the University of Pittsburgh School of Medicine.

Students in this program begin by completing two years of the MD program in the School of Medicine. Then they come to Pitt Public Health for three years to complete the PhD program. Students then return to the School of Medicine to finish the last two years of medical training.

The required core curriculum for the joint PhD/MD program is the same as the requirements for the PhD in Human Genetics.

Master's

Genetic Counseling, MS

The Genetic Counseling Graduate Program at the University of Pittsburgh is committed to providing cutting-edge training in the complex science of genetics while fostering a strong foundation in counseling. This unique program is constantly evolving to ensure the continued success of graduates entering a dynamic workforce. Each year between 10 and 12 students are welcomed into the incoming class to be trained by world-renowned faculty. The Genetic Counseling Program is grounded in three important elements: scientific training in human genetics and genomics, comprehensive clinical experience, and understanding the psychological and social aspects of counseling, with an added focus on integrating up to the minute discoveries in genetics and genomics as well as valuable concepts from other academic disciplines.

The Genetic Counseling Program is fully accredited by the Accreditation Council for Genetic Counseling, Inc. (ACGC), 7918 Jones Branch Drive, Suite 300 McLean, VA 22102; Phone: 703-506-7667. Our comprehensive program helps students to achieve and often surpass the practice based competencies outlined by the ACGC.

More information regarding the program can be found on the Pitt Public Health website, Department of Human Genetics, under the Master of Science (MS) in Genetic Counseling program designation. Please explore our website to learn more about what sets our program and our graduates apart! We hope you will consider joining our challenging and exciting program.

Required Human Genetics Courses

A minimum total of 38 credits is required for the M.S. in Genetic Counseling.

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2022 - HUMAN POPULATION GENETICS
- HUGEN 2025 - HUMAN GENETICS SEMINAR
(*must take two times*)
- HUGEN 2031 - CHROMOSOMES AND HUMAN DISEASE
- HUGEN 2032 - GENETIC TECHNIQUES
- HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES
- HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING
- HUGEN 2036 - GENETIC COUNSELING INTERNSHIP
(*must take two times - fall and spring term of 2nd year*)

- HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING
 - HUGEN 2039 - RISK CALCULATION GENETIC COUNSELING
 - HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
 - HUGEN 2047 - CLINICAL GENETICS CASE CONFERENCE
- (must take four times but do not formally register)*
- HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS
- (must take two times but do not formally register)*

School Core Course Requirements

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
 - EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
 - PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
 - PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- (must be taken for the first two semesters)*

Clinical Rotations

Genetic counseling students have the opportunity to participate in patient care at world-renowned medical facilities. They typically see 150-200 cases or more and are exposed to a variety of genetic referral types as well as diverse medical systems.

Rotation schedules are divided into 13 blocks, with each block lasting three weeks. All students will spend three blocks in Cancer genetics, three blocks in Prenatal genetics, three blocks in Pediatric genetics as well as one block in Adult/Specialty genetics, Primary Care, and a thesis focused block with clinic days in the Center for Advanced Fetal Diagnostics (CAFD). In addition, students spend three weeks (one block) at an optional rotation site. This allows students the opportunity to select specific training experiences to develop a higher level of expertise based on their interests.

Thesis Project

Designing, conducting, and interpreting research studies are important skills for success as a genetic counselor. The completion of a thesis project is an integral component of a student's education in the Pitt Genetic Counseling Program. The thesis project allows students to understand the research process, develop their research skills, and collaborate with faculty across diverse disciplines.

Students are encouraged to develop a project according to their interests and research goals. Many previous students have published their thesis projects in peer-reviewed journals and have presented their research at conferences both nationally and internationally.

Core Values

The University of Pittsburgh Genetic Counseling Program's core values are:

- **Speak with Integrity and Compassion** - We are committed to honesty, transparency and respect in every interaction.
- **Commit Everyday** - We take personal responsibility to achieve excellence in everything we do.
- **Reach Out** - We embrace collaboration and partnership to enhance professional possibilities
- **Embrace the Unknown** - We believe that curiosity leads to lifelong learning.
- **Be Bold** - We are inspired by innovation and change.

Genome Bioinformatics, MS

Human Genetics, MS

The Master of Science program in Human Genetics prepares students for careers as contributing members of genetics and genomics research teams in academia or industry. Graduates of the program often go on to PhD level study and become independent scientists. The

flexible curriculum provides a broad background in the field while allowing customized emphasis on laboratory genetics or genetic data analysis. In addition to core coursework and advanced classes in a chosen area of interest, MS students pursue mentored research projects culminating in the production and defense of a thesis.

More information about the program can be found by visiting the Pitt Public Health website, Department of Human Genetics, and accessing the Master of Science (MS) in Human Genetics program designation.

MS Program Requirements

COMPETENCIES

Students will gain proficiency in the knowledge, skills, and abilities required to begin a career as a scientist. These educational goals are organized into five MS program competencies. After successful completion of the Master of Science program, students will be able to:

- Describe basic genetic mechanisms and how they affect proteins, chromosomes, cells, individuals, and populations of organisms in normal and disease states
- Describe mechanisms by which genes and the environment interact to affect the distribution of health and disease in human populations
- Use their conceptual and methodological knowledge to analyze data and interpret research results.
- Apply fundamental principles of ethical research practice.
- Query bioinformatic resources to facilitate clinical decision-making or interpret research results.

COURSEWORK

Coursework for MS students is typically undertaken during the first year in the program, although advanced courses may be taken in the second year. All MS students will complete the core Human Genetics courses as well as the core Public Health curriculum. Advanced courses offered through Human Genetics and other departments will provide students instruction in their chosen area of concentration. Certificate programs offered through the Graduate School of Public Health can be pursued to further customize the education of MS students.

Required Human Genetics Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
 - HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
 - HUGEN 2021 - SPECIAL STUDIES - *variable*
 - HUGEN 2022 - HUMAN POPULATION GENETICS
 - HUGEN 2025 - HUMAN GENETICS SEMINAR
- (must take two times)
- HUGEN 2028 - HUMAN GENETICS JOURNAL CLUB AND PEER REVIEW
 - HUGEN 2031 - CHROMOSOMES AND HUMAN DISEASE
 - HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES
 - HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE

School Core Course Requirements

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
 - EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
 - PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
 - PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- (must be taken for the first two semesters)
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Public Health Genetics, MPH

The MPH in Public Health Genetics Program integrates genetics and the public health science disciplines of epidemiology, pathobiology, biostatistics, environmental health, and health services research, with ethics, social sciences, public affairs, economics and law. Public health genetics focuses on phenotypic disease prevention in populations, not just individual patients and their families. It addresses society's legal, ethical, financial, regulatory, and organizational responsibilities in offering genetic services, and devising environmental and occupational interventions to prevent disease in populations.

More information regarding the program can be found on the Pitt Public Health website, Department of Human Genetics, under the Master of Public Health (MPH) in Public Health Genetics designation.

MPH Requirements

The MPH in Public Health Genetics curriculum is designed to give students a strong knowledge base in Human Genetics with a broad understanding of the field of public health. Through the coursework, students are immersed in current topics in human genetics, public health, and the ethical, legal and social issues important to the field of public health genetics. The curriculum, practicum experience, and public health essay focus on the development of skills that are desirable to employers after graduation including critical thinking, scientific writing, and statistical analysis.

A minimum of 47 credits is required for the MPH. This total is made up of school core courses, a core of required courses in the department of Human Genetics, and electives relevant to the student's program goals. The entire program can be completed in 1 1/2 years, although most students prefer to spread it out over two years. There is also the option to complete the program on a part-time basis.

The MPH in Public Health Genetics course schedule can be customized to meet individual student goals, interests, and circumstances.

Required Human Genetics Courses

- HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS
- HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS
- HUGEN 2021 - SPECIAL STUDIES
(variable, or can be replaced by elective courses)
- HUGEN 2022 - HUMAN POPULATION GENETICS
- HUGEN 2025 - HUMAN GENETICS SEMINAR
(must take two times)
- HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES
- HUGEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE
- HUGEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS
- HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM
- HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS
- HUGEN 2053 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS

School Core Course Requirements

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY

**(students in the Public Health Genetics program with adequate prior background may apply to be exempted from the requirements to take PUBHLT 2015)*

- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
(must be taken for the first two semesters)
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS

Public Health Essay and Practicum

Students must write a master's essay, which may be based on the practicum experience or on another topic related to public health genetics. All essays must include analysis of data. The essay topic must be approved by the Directors of the MPH in Public Health Genetics program. The essay is read and approved by an MPH Essay Committee that must consist of at least one of the Public Health Genetics faculty members in Human Genetics and one from outside the department. The MPH Essay Committee must be approved by the Office of Student Affairs. The essay must be approved by unanimous vote of the committee.

All students in the MPH in Public Health Genetics program are required to complete a Practicum. The Practicum is a supervised practice experience of at least 200 hours, providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. MPH students are encouraged to seek out opportunities that fit their interests and goals with guidance provided by program leadership. Students may choose to complete their practicum in the city of Pittsburgh or in a location outside of the city. Many students will complete the practicum during their summer semester, but scheduling is flexible based on student needs.

MPH in Human Genetics Program-Specific Competencies

A student completing the MPH program in Public Health Genetics will be able to:

- (1) Apply knowledge of inheritance, including basic cellular and molecular mechanisms, and risk factors for disease to understanding a variety of rare and common health conditions.
- (2) Identify interactions among genes, environmental factors, and behaviors, and their effects on public health.
- (3) Assess the ethics of the application of genetic technologies to public health
- (4) Communicate genetic and genomic principles to the general public as part of current public health initiatives
- (5) Evaluate how genetic principles/technologies apply to diagnosis, screening, and interventions for disease prevention and health promotion programs

Department of Infectious Diseases and Microbiology

The mission of the Department of Infectious Diseases and Microbiology is to conduct research, teaching, and service that will enhance the control of infectious diseases in the human population. Our goals to accomplish this mission include:

- Research programs that focus on understanding the mechanisms of pathogenesis of microbial infections at the cellular and molecular level as they relate directly to developing methods for disease prevention and treatment.
- Integrated teaching programs that are devoted to the education and training of graduate students in various molecular, immunologic and biologic aspects of microbial pathogenesis, as well as disease control and prevention.
- Programs that focus on population-based education and prevention for control of infectious diseases.

We have a commitment to high quality graduate education that is consistent with our leading cutting-edge research and behavioral health and community education programs. The degree programs draw upon the disciplines of molecular biology, immunology, epidemiology, medicine, health education, and community intervention to provide our students with opportunities to participate in cross-disciplinary research into multiple aspects of infectious diseases. As a graduate of our program you will be prepared for careers in academia, industry, government, and community service sectors. Our graduates have obtained professional positions with prestigious employers in the USA and worldwide. Examples include the National Institutes of Health, the Centers for Disease Control and Prevention, state and local health departments, pharmaceutical companies, hospitals, and major universities and other academic institutions.

The Department offers Master of Public Health (MPH), Doctor of Philosophy (PhD), and Master of Science (MS) degree programs. Students in the MPH program can pursue one of two concentrations: Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL) or Infectious Disease Management, Intervention, and Community Practice (MIC).

For more information on admissions and registration contact the department at 412-624-3331 or idsm@pitt.edu.

Admission

Admission to all of our graduate programs is for the fall semester only. Your application will be evaluated based on your undergraduate academic performance, Graduate Record Exam (GRE) test scores, letters of recommendation, relevant research or professional experience and personal statement.

The application deadline for admissions for the fall of 2018 is January 15, 2018. The IDM Graduate Admissions Committee strongly recommends that you submit all materials by this deadline to ensure prompt review.

Application materials, as well as tips for submitting materials on time, are available on the IDM web site www.idm.pitt.edu.

Early admission into the MS or MPH program

Outstanding applicants who are enrolled in an undergraduate program at the University of Pittsburgh may apply for early admission, also known as 3+2 Accelerated Master's Program. Additional admission requirements must be met for this program.

Financial Assistance

Financial support (through stipends and tuition waivers) is available for full-time doctoral students. A limited number of partial scholarships are available to outstanding new MS and MPH students.

Doctoral

Infectious Diseases and Microbiology, PhD

The PhD program in the Department of Infectious Diseases and Microbiology prepares students for competitive research and teaching careers in academia, government agencies, and private industry. Our PhD students complete coursework that emphasizes the fundamentals of pathogen biology, immunology, cell biology, and molecular biology, which provides the necessary educational basis to conduct independent research mentored by our faculty.

PROGRAM REQUIREMENTS

- 72 credits total
- Preliminary exam
- Comprehensive exam
- Research project and Dissertation
- First author publication

PROGRAM LENGTH

Students complete the PhD program on an average of 6 years.

PhD PROGRAM COMPETENCIES

1. Demonstrate knowledge of the molecular biology of hosts and pathogens and how pathogenesis of infectious diseases evolves from the interactions of organisms on a molecular level.
2. Demonstrate comprehensive knowledge of the mechanisms of innate and acquired immunity and the role of immune functions in health and disease.
3. Demonstrate an ability to analyze and interpret data from scientific publications in the field of molecular biology, microbiology, immunology, or infectious diseases.
4. Show an ability to think independently and demonstrate comprehensive knowledge in a specific area of microbiology related to the student's dissertation work.
5. Conduct independent laboratory-based research leading to a first author publication in a professional peer-reviewed journal.

PhD Program Requirements:

The following are IDM department required courses for the IDM PhD program:

**Note: electives are not included on this list*

- IDM 2040 - SCIENTIFIC COMMUNICATION
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY
- IDM 2023 - MICROBIOLOGY LABORATORY
- IDM 2025 - MICROBIOLOGY SEMINAR
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 2004 - VIRAL PATHOGENESIS
- IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

GSPH Required Courses

The following are GSPH required courses for the IDM PhD program:

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH

Master's

Infectious Diseases and Microbiology, MPH

The Department of Infectious Diseases and Microbiology offers two (2) MPH programs: MIC (Management, Intervention, and Community Practice) and PEL (Pathogenesis, Eradication, and Laboratory Practice). Continue reading below for a description of each MPH program:

The MPH with a concentration in **Infectious Disease Management, Intervention, and Community Practice (MIC)** provides a tailored educational experience to foster competencies for practice, research, and education in public health. Students take courses that focus on global and domestic infectious diseases including HIV, and assists students in designing interventions, approaches, and policies to address the increase in infectious diseases as well as emerging infectious disease threats to public health. This coursework paired with hands-on practicum experience particular to the student's interest prepares students for careers in public health education, program development and management, or further education.

The MPH with a concentration in **Infectious Disease Pathogenesis, Eradication, and Laboratory Practice (PEL)** enables students a unique educational experience, which brings together pathogen biology, immunology, and epidemiology within the broader framework of public health. Students then have the opportunity to apply what they learn in a laboratory setting. Students graduate from the MPH PEL program with the expertise necessary for occupations in public health education, analysis, and research in the non-profit, government, or private sectors. The program also prepares students for further education in medical or graduate programs.

MPH-MIC Departmental Requirements:

PROGRAM REQUIREMENTS

- 42 credits total
- Written essay OR thesis
- 200 hour practicum

PROGRAM LENGTH

- Full-time students complete the program in 2 years or less
- Part-time students complete the program in 3-4 years on average

MPH-MIC PROGRAM COMPETENCIES

1. Demonstrate knowledge of local, regional, national and global infectious diseases.
2. Demonstrate knowledge of social, economic, and cultural factors for the prevention, control and/or elimination of the emergence and spread of infectious diseases in specific populations and communities.
3. Demonstrate knowledge of infectious disease pathogenesis, prevention, clinical diagnosis, and treatment in relevant populations in domestic and international settings.
4. Demonstrate knowledge of clinical, behavioral, epidemiological aspects of infectious disease prevention and treatment interventions for health services, systems of care, organizations, institutions, communities, and

governments.

5. Demonstrate knowledge and skills in recognizing, assessing, evaluating scientific research and best practices to make evidence-based public health recommendations for infectious disease planning, interventions, research, and policies.

The following courses are IDM departmental required courses:

**Note: this list does not include electives*

- IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES
- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY
- IDM 2025 - MICROBIOLOGY SEMINAR
- IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH
- IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS
- IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM
- BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING

MPH-PEL Departmental Requirements:

PROGRAM REQUIREMENTS

- 42 credits total
- Written essay OR thesis
- 200 hour practicum
- OPTIONAL lab rotation

PROGRAM LENGTH

- Full-time students complete the program in 2 years or less
- Accelerated schedule available: 1.5 years
- Part-time students complete the program in 3-4 years on average

The following are IDM departmental required courses:

**Note: this list does not include electives*

- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY
- IDM 2025 - MICROBIOLOGY SEMINAR
- IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES

GSPH Required Courses

The following are GSPH required courses for the MPH-MIC program:

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EOH 1013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2015 - PUBLIC HEALTH BIOLOGY
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

The following are GSPH required courses for the MPH-PEL program:

- BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

- EOH 2013 EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE
- EPIDEM 2110 EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- HPM 2001 HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
- PUBHLT 2022 PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS
- PUBHLT 2033 PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- PUBHLT 2034 PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS
- PUBHLT 2035 PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH
- IDM 2010

Infectious Diseases and Microbiology, MS

The Master of Science program within the Department of Infectious Diseases and Microbiology provides students with a unique basic science education within the Graduate School of Public Health. Graduates of our MS program develop skills and experience to become more competitive applicants for medical school and doctoral programs, as well as qualified researchers in academia, government and industry. This two year program emphasizes coursework in immunology, cell biology, and virology, and enables students to apply their coursework to their thesis research projects completed under a faculty advisor.

PROGRAM REQUIREMENTS

- 36 credits total
- Comprehensive exam
- Research project
- Written thesis & defense

PROGRAM LENGTH

- Full-time students complete the program in 2 years or less
- Part-time students complete the program in 3-4 years on average

MS PROGRAM COMPETENCIES

1. Demonstrate knowledge of the molecular biology of hosts and pathogens and the pathogenesis of host/pathogen interactions.
2. Demonstrate knowledge of the mechanisms of innate and acquired immunity and their roles in health and disease.
3. Demonstrate an ability to analyze and interpret data from scientific publications covering molecular biology, microbiology, immunology, and infectious diseases.
4. Show an ability to think independently and demonstrate comprehensive knowledge in a specific area related to the student's thesis research.
5. Demonstrate an ability to conduct relatively independent laboratory-based research.

MS Program Requirement:

Below are the IDM departmental requirements for the MS program:

**Note: this list does not include electives*

- IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY

- IDM 2023 - MICROBIOLOGY LABORATORY
- IDM 2025 - MICROBIOLOGY SEMINAR
- IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
- IDM 2002 - MOLECULAR VIROLOGY
- IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION
- IDM 2004 - VIRAL PATHOGENESIS
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES
- PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

GSPH Required Courses

The following are GSPH required courses:

- EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
- PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH
- PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

School-level Admission Requirements

Degree and Certificate Requirements

All degree and certificate applicants must have completed Pitt Public Health's prerequisite courses.

Master of Public Health (MPH)

Applicants must possess:

- U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or both
- Applicants who don't already have a graduate degree are required to submit scores on the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE). Departments may require GRE scores from any applicant. In some cases, results of the LSAT, MCAT, or DAT may be substituted.

Master of Health Administration (MHA)

Applicants must possess:

- U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or a combination
- All applicants must submit scores on the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE). MHA/MBA applicants may submit GMAT or GRE scores. In some cases other test scores may be substituted.

Multidisciplinary Master of Public Health (MMPH)

- Applicants must hold a doctoral degree in the health sciences, be an advanced medical, dental, or veterinary student, or hold a relevant doctoral degree in a related field (considered on an individual basis).
- In most cases, official scores from the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE) must be submitted. GRE waivers will be granted on a case by case basis provided MCAT, PCAT, DAT or USMLE/ECFMG scores are submitted in place of the GRE.

Note: If you're a graduate of a foreign medical or dental school, you must hold a valid medical or dental license in the United States, be eligible for licensure, be in a residency or fellowship program, or be a visiting clinician planning to return to your native country.

Master of Science (MS)

Applicants must possess:

- A Bachelor's degree in arts, science, engineering, or nursing, or an MD, DDS, or DVM from an approved U.S. school or equivalent foreign degree
- Evidence of adequate training in the sciences basic to public health (some applicants may be admitted at the discretion of the faculty, making up deficiencies as prescribed)

Applicants may be required to take any examinations deemed necessary to satisfy the faculty as to the applicants' qualifications. In most cases, official scores from the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE) must be submitted.

Doctor of Public Health (DrPH)

Applicants must:

- Have an MPH or other graduate degree in a relevant field, or
 - Fulfill admission requirements for the MPH
 - Demonstrate (or have demonstrated previously) ability for leadership in their field, as well as for advancement of scientific knowledge
- DrPH applicants are required to submit scores on the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE).

Check the department to which you're applying for more specific requirements.

Doctor of Philosophy (PhD)

Applicants must:

- Possess a U.S. graduate or bachelor's degree, or the equivalent degree from a foreign school, in a field relevant to the PhD program to which they are applying
- Have had sufficient courses in mathematics and the biological and social sciences
- Have had sufficient prerequisite courses in the field to which they are applying

Applicants who don't already have a graduate degree are required to submit scores on the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE). Departments may require GRE scores from any applicant. In some cases, LSAT, MCAT, or DAT scores may be submitted.

Certificate Programs

Applicants must possess:

- U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or a combination
- Applicants who don't already have a graduate degree must submit scores on the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE). Departments may require GRE scores from any applicant. In some cases, results of the LSAT, MCAT, or DAT may be substituted.

GRE Requirements for Degree Programs

Each department reserves the right to require that *any* applicant submit an official GRE score report, even if the chart indicates that under the specified circumstances the GRE is generally waived. No photocopies of GRE score reports will be accepted. Use Pitt Public Health code 4234 to send your official GRE scores; department codes are NOT used.

*If you already have a U.S. graduate degree (or the equivalent), contact the department and request a GRE waiver. There is no guarantee that a waiver will be granted. If the GRE requirement is waived, you must request that the department send a written memo to the admissions manager. E-mail this request to the department student services staff: BCHS: Paul Markgraf; EOH: Bryanna Snyder; HUGEN: Noel Harrie; IDM: Chelsea Yonash.

**MCAT or DAT may usually be substituted for GRE.

School-wide Prerequisite Courses

Social Science Requirement

MPH candidates must have six college credits in behavioral and social sciences (with a C or better).

Mathematics Requirement

All applicants must have mathematical preparation appropriate for entrance into Principles of Statistical Reasoning, usually consisting of college-level statistics, algebra, or calculus (with a C or better). Advanced placement courses reflected on college transcripts may fulfill this requirement. An ETS administered advanced placement test score of three or higher in calculus or a GRE quantitative score at or above the 70th percentile is also evidence of acceptable preparation.

Department Requirements

In addition to school and degree-level requirements, each department has specific requirements. Once you know which program(s) you're applying to, be sure to review departmental requirements.

Certificate Programs

Applicants must meet requirements for admission to MPH.

3+2 Accelerated Master's Program Admission Requirements

In addition to the general requirements, each department has its own admissions requirements.

Department (<i>Program</i>)	Admission Requirements for 3+2 Accelerated Program
Behavioral and Community Health Sciences (<i>MPH</i>)	<ul style="list-style-type: none">• Undergraduate GPA: 3.5• GRE scores: 60th (V), 31st (Q) percentiles; 4.5 (A)• Health-related experience (work or volunteer)• All majors acceptable if above criteria are met
Biostatistics (<i>MS</i>)	<ul style="list-style-type: none">• Undergraduate GPA: 3.0• GRE scores: 72nd (V), 67th (Q) percentiles• Prior coursework: calculus (2 semesters)• Suggested major: mathematics (other majors acceptable if above criteria met)
Environmental and Occupational Health (<i>MPH or MS</i>)	<ul style="list-style-type: none">• Undergraduate GPA: 3.0• GRE scores: 60th (V), 50th (Q) percentiles• Prior coursework (grade of B or better): biology (2 required), organic chemistry, general chemistry, physics, and calculus• Major: biology, chemistry, or mathematics
Epidemiology (<i>MPH or MS</i>)	<ul style="list-style-type: none">• Undergraduate GPA: 3.2• GRE scores must be submitted• Three (3) letters of recommendation• Prior coursework (MPH): social sciences (6 cr.), mathematics (3 cr.), human biology (3 cr.)• Prior coursework (MS): mathematics (3 cr.), human biology (3 cr.)• All majors acceptable if above criteria are met
Health Policy and Management (<i>MPH or MS</i>)	<ul style="list-style-type: none">• Undergraduate GPA: 3.5• GRE scores: 85th (V), 50th (Q) percentiles; 5.0 (A)• All majors acceptable, if above criteria are met

Human Genetics
(MPH or MS)

- Undergraduate GPA: 3.5
- GRE scores: 70th (V, Q, A) percentiles
- Prior coursework: chemistry, biochemistry, and molecular biology
- All majors acceptable if above criteria are met

Genome Bioinformatics
(MS)

- Undergraduate GPA: 3.5
- GRE scores: 70th (V, Q, A) percentiles
- Prior coursework: calculus or statistics, some programming/coding experience, and at least one course in biology or genetics or a related field
- Suggested major: mathematics, computer science, biology, or a related field

Infectious Diseases and Microbiology
(MPH-MIC, MPH-PEL, or MS)

MPH-MIC: Management, Intervention, & Community Practice

MPH-PEL: Pathogenesis, Eradication, & Laboratory Practice

- Undergraduate GPA: 3.3
- GRE scores: 75th percentile (combined)
- Strong letters of recommendation from persons directly familiar with academic performance
- Appropriate undergraduate major

3+2 Accelerated Master's Program

Qualified Pitt undergraduates **apply in their third year** and enroll in graduate classes in their fourth year. As they begin master's degree studies, students simultaneously satisfy remaining undergraduate requirements to **graduate on time** with their bachelor's degree at the end of their fourth year.

Students in the accelerated bachelor's/master's program fully participate in the graduate school experience and prepare themselves for their future career:

- **Develop new skills** with advanced coursework
- **Gain real-world experience** through a required practicum or internship
- **Work with experienced researchers** on basic and applied research problems

Though graduate school is challenging, this accelerated program allows motivated students to obtain a graduate degree and career path all while **saving up to one year's worth of tuition!**

Try out Public Health

Not sure what public health is all about? Explore public health or learn more about the school and the professional field by...

- taking a course-for credit-to satisfy a general education elective,
- attending an event whether it's a talk, presentation, workshop, or social event open to the University,
- participating in a recruitment event like our fall open house for prospective students,
- contacting a faculty member whose work interests you,
- chatting with a student services coordinator to learn more about our different departments and programs,
- talking to your advisor,

Or, contacting our Office of Student Affairs for help or to set up a meeting.

How to apply

Students interested in the accelerated bachelor's/master's program apply online to the specific department and program, normally in the middle of their junior year. Plan on

- taking the GRE (submit scores to code 4234)
- completing some undergrad background courses in the behavioral and social sciences (with a C or better)
- having mathematical preparation needed to later take Principles of Statistical Reasoning (usually college-level statistics, algebra, or calculus with a C or better)
- being on-track to complete at least 96 credits before you start as a graduate student

Applying for Admission to Pitt Public Health

If You Are Applying for a Degree Program

All new degree-seeking applicants, except those applying for non-degree study, only a certificate program, Genetic Counseling MS, and/or dual-degree Genetic Counseling MS/MPH, must apply through SOPHAS, the online, centralized application service for CEPH-accredited schools of public health. SOPHAS submits applications to Pitt Public Health only after all required materials are received.

- Apply online through SOPHAS
- Pay application fee directly to SOPHAS
- Submit personal statement through SOPHAS
- Submit three recommendations directly to SOPHAS
- Submit official transcripts for ALL education in the United States directly to SOPHAS
- Submit a course-by-course WES evaluation for ALL education outside of the United States (not including study abroad) directly to SOPHAS
- Submit official GRE scores to the Graduate School of Public Health code **4234**, with no department code
- Submit official TOEFL scores (if applicable) to SOPHAS code **5688**
- Track the status of your completed application online

Note: *Pitt Public Health holds its applicants and students to the high ethical standards expected of public health professionals. Any form of misrepresentation or plagiarism discovered in an application will result in immediate rejection of the applicant. The incident also will be reported to SOPHAS, the public health shared application service, which will notify other participating schools.*

If You Are Applying for Genetic Counseling MS or dual-degree Genetic Counseling MS/MPH Programs

All new Genetic Counseling MS and/or dual-degree Genetic Counseling MS/MPH applicants must apply through SOPHAS Express.

- Apply online through SOPHAS Express
- Pay application fee directly to SOPHAS Express
- Submit personal statement through SOPHAS Express
- Submit three recommendations through SOPHAS Express
- Submit official transcripts for ALL education in the United States and/or in Canada directly to Pitt Public Health Office of Student Affairs. Official e-transcripts can also be emailed to satemp5@pitt.edu
- Submit a course-by-course WES evaluation for ALL education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) directly to Pitt Public Health Office of Student Affairs
- Submit official GRE scores to the University of Pittsburgh code **2927**, with no department code
- Submit official TOEFL scores (if applicable) to University of Pittsburgh code **2927**

Note: Pitt Public Health holds its applicants and students to the high ethical standards expected of public health professionals. Any form of misrepresentation or plagiarism discovered in an application will result in immediate rejection of the applicant. The incident also will be reported to SOPHAS Express, the public health shared application service, and the Genetic Counseling program.

If You Are Applying for Non-Degree Study

Interested applicants may enroll in 12 credits of non-degree study before applying to a degree-seeking program.

- Apply online through SOPHAS Express and complete required sections only
- Pay application fee online directly to SOPHAS Express
- Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
- Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
- Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code **2927**, with no department code

Note: Non-degree applicants are not required to submit recommendations, upload transcripts through SOPHAS Express, submit test scores, or submit any non-required sections of the SOPHAS Express application.

More information about the non-degree option can be found [here](#).

If You Are Applying for a Certificate Only

If you are only applying to a Pitt Public Health certificate, you may apply through the abbreviated application below. If you also plan to apply for a degree program, do not apply through SOPHAS Express for the certificate. You will only be required to apply through SOPHAS following the instructions above.

- Apply online through SOPHAS Express
- Pay application fee online directly to SOPHAS Express
- Submit a personal statement through SOPHAS Express
- Submit three recommendations through SOPHAS Express
- Submit official transcripts for all education in the United States and/or Canada to Pitt Public Health Office of Student Affairs
- Submit a course-by-course WES evaluation for all education outside of the United States (excluding study abroad but including non-English speaking Canadian institutions) to Pitt Public Health Office of Student Affairs
- Submit official GRE scores to the University of Pittsburgh code **2927**, with no department code
- Submit official TOEFL scores (if applicable) to the University of Pittsburgh institution code **2927**, with no department code

Note: Applicants who are interested in only pursuing a certificate should contact the program before applying to confirm the availability of courses. International applicants are not eligible to apply for only a certificate program due to the full-time registration requirements of the student visa.

Current Pitt Public Health Students Applying to a New Degree or Certificate Program

Current degree-seeking students interested in transferring to another program or adding another academic program/certificate must:

- Email a brief statement including name, current program, details on the plans to transfer or add a program, and the term in which you would like to begin the program to the Office of Student Affairs, stuaaff@pitt.edu
- Submit official GRE scores (if applicable) to the University of Pittsburgh code **2927**, with no department code

Further instruction will be forwarded to you once the admissions office receives your email of intent, depending on the department's requirements.

Note: *Pitt Public Health non-degree students are required to apply through SOPHAS if they are interested in being considered for a degree program. See above for the application instructions.*

Admissions Review Process

Pitt Public Health processes new applications on Tuesdays and Thursdays. Once the school has received your verified application from SOPHAS or SOPHAS Express and has processed internally, you will be notified by email. If your application is complete by our school-specific requirements, it will be sent to the department for their review. If your application is incomplete, you will receive an initial email about the missing items and then you will be sent periodic email reminders about the incomplete status. Applicants are not considered for admission until all required application materials have been received. Please be sure to add **donotreply@webadmit.org** and **@sendgrid.me** to your safe-senders list in your email account.

Your application will be reviewed by the departmental committees. Departmental review generally takes four to six weeks, but the timing may vary by department or by season. As soon as the department has submitted a decision on your application to the Office of Student Affairs, you will be notified of the admissions committee's decision by email.

Note: *A departmental committee evaluates applications and makes a recommendation to the recruitment and admissions manager in the Office of Student Affairs. Admission is not final until the recruitment and admissions manager issues a letter of acceptance.*

In the following circumstances, application materials will be kept for one year from the date the application was received and then be destroyed:

- Application remains incomplete
- Application is not accepted
- Application is accepted, but applicant does not respond
- Application is accepted, but the applicant declines admission

Department-specific Admission Requirements

Each program at Pitt Public Health has specific requirements. Once you know which program(s) you're applying to, be sure to review the departmental requirements listed below.

Behavioral and Community Health Sciences

PhD applicants must hold a post-baccalaureate degree, e.g. a master of science degree, in a discipline relevant to public health, such as social work or anthropology, or an MD or JD. DrPH applicants must either hold an MPH degree or a post-baccalaureate degree in a discipline relevant to public health. DrPH applicants who do not hold an MPH degree must complete the Pitt Public Health school core

courses in addition to the requirements for the DrPH degree if accepted. A degree from a school accredited by the Council on Education for Public Health (CEPH) is highly desirable.

Biostatistics

	MS	PhD
Prior Degree Required	Yes	Yes
Complete and Submit Application	Yes	Yes
Three Letters of Recommendation	Yes	Yes
Biology (3 credits)	Yes**	Yes**
Computer Science	Yes**	Yes**
Calculus (1 year)	Yes	Yes
GRE within three years of application	Yes	Yes

* Degree should be a professional health degree, such as nursing, MD, DDS, or DVM

** Deficiency can be made up during the first year

Environmental and Occupational Health

Acceptable undergraduate training includes:

- A bachelor's degree in the physical, chemical, or biological sciences with at least a 3.0 grade-point average overall and in the basic sciences
- A minimum of two courses each in organic chemistry, biology, physics, and calculus
- The Graduate Record Examination (GRE), unless you already have a graduate or professional degree and a waiver is approved

Epidemiology

All epidemiology degree programs require 3 college-level credits of human biology course work. Advanced Placement biology course work does not fulfill this requirement.

Health Policy and Management

Acceptable undergraduate training includes:

MHA applicants

- Minimum of three credits in human biology
- Minimum of three credits in college-level mathematics (algebra or higher) or statistics
- Minimum of six credits in the social and behavioral sciences, preferably with at least one course in economics
- GRE required but current scores from the following exams will be considered on a case by case basis: GMAT, LSAT, MCAT or PCAT

MPH and JD/MPH applicants

- Minimum of three credits in college level mathematics (algebra or higher) or statistics
- Minimum of six credits in the social and behavioral sciences, preferably with at least one course in economics

- GRE required but current scores from the following exams will be considered on a case by case basis: GMAT, LSAT, MCAT or PCAT

MS applicants

- QPA of 3.0 or higher (undergraduate degree)
- Undergraduate or graduate calculus with a 3.0 or higher
- GRE scores in at least the 50th percentile or higher in all categories

It is recommended that applicants have completed coursework in statistics, economics and another social science

PhD applicants

- QPA of 3.3 or higher (master's degree not required)
- Undergraduate or graduate calculus with a 3.0 or higher
- GRE scores in at least the 60th percentile or higher in all categories

Human Genetics

Acceptable undergraduate training includes the following:

MS in human genetics and PhD applicants

- Bachelor's degree in a discipline related to the biological or behavioral sciences from an accredited college or university, with a minimum GPA of 3.0
- Graduate Record Examination (GRE) scores above the 70th percentile for the verbal and quantitative tests
- Introductory courses in genetics and calculus are required; additional coursework in biochemistry and behavioral or social sciences are recommended but not required

MS in Genetic Counseling

- Please see the Genetic Counseling Program's Admissions page for information on admissions requirements

MPH in Public Health Genetics

- Candidates must have a degree in a discipline relevant to public health or must have substantial knowledge of a discipline relevant to public health either gained either through study or experience
- Graduate Record Examination (GRE) scores above the 70th percentile for the verbal and quantitative tests
- Coursework in genetics, biochemistry, and calculus is helpful but not required

MS in Genome Bioinformatics

- Bachelor's degree in a discipline related to biological sciences or computer/information sciences from an accredited college or university with a minimum GPA of 3.0
- Graduate Record Examination (GRE) scores above the 70th percentile for the verbal and quantitative tests
- Coursework in calculus or statistics, some programming/coding experience, and at least one course in biology or genetics or a related field is required
- A minimum TOEFL score of 80 on the internet test. IELTS scores (minimum 6.5) may be substituted. In either case the test must have been taken within two years of application

Infectious Diseases and Microbiology

MS and PhD programs

- Minimum 3.0 combined grade-point average in biology, chemistry, math, and biochemistry and/or molecular biology and/or immunology
- Relevant research experience in biochemistry, immunology, and molecular biology
- College biology with or without microbiology
- Chemistry, including organic chemistry with laboratory and biochemistry
- College-level algebra

MPH programs

- Minimum six credits of college-level behavioral science, to include at least one course in sociology or social psychology and an additional course in anthropology, economics, political science, psychology, or sociology with a grade of C or better

Multidisciplinary Master of Public Health (for clinically trained health professionals)

The program is open to...

- Physicians, dentists, and veterinarians
- Holders of doctoral degrees in the health sciences
- Advanced medical and dental students (considered on an individual basis)
- Holders of other relevant doctoral-level degrees (considered on an individual basis)

If you're a graduate of a foreign medical and dental school, you must hold a valid medical or dental license in the United States, be eligible for licensure, be in a residency or fellowship program, or be a visiting clinician planning to return to your native country.

Certificate Programs

Applicants must possess:

- U.S. bachelor's degree from an accredited institution or the equivalent degree from a foreign school and substantial knowledge in a discipline relevant to public health, either through study, experience, or a combination
- Applicants who don't already have a graduate degree must submit scores on the verbal, quantitative, and analytical portions (general test) of the Graduate Record Examination (GRE). Departments may require GRE scores from any applicant. In some cases, results of the LSAT, MCAT, or DAT may be substituted

Non-Degree Status

You can take up to 12 credits (cumulative maximum) as a non-degree student. If you are later accepted into a degree program, that program will decide which of those credits may be applied to your requirements.

GSPH-Epidemiology Areas of Research Emphasis

Areas of Emphasis

Students take a series of core courses in epidemiology and public health, then may choose to enroll in courses in one or several Areas of Emphasis. Faculty in each of these areas have major research and/or community service programs that provide excellent facilities for student research and field training, and some have training grants. Summaries of each area, and their specific details, are provided below.

Faculty members in each of these areas offer major research and/or community service programs that provide excellent facilities for student research and field training.

Aging Epidemiology
 Applied Public Health Epidemiology
 Cancer Epidemiology
 Cardiovascular & Diabetes Epidemiology
 Clinical Trials & Methods
 Environmental Epidemiology
 Global Health Epidemiology
 Infectious Disease Epidemiology
 Injury Prevention Epidemiology
 Molecular & Genetic Epidemiology
 Neuroepidemiology
 Obesity & Nutritional Epidemiology
 Prevention, Lifestyle & Physical Activity Epidemiology
 Psychiatric Epidemiology

Faculty Contact: Anne Newman, MD, MPH

- Areas of research broadly include: successful aging and longevity, physical function, activity and disability, osteoporosis, vascular aging, sarcopenia, brain aging and mobility.
- Training grant: All trainees participate in a three course series on aging, hands-on research training, research conferences and seminar series. Additional career development opportunities for post-doctoral students are available.
- All doctoral trainees design, implement, analyze data, and report the results of an independent study as part of the program with a goal of submitting three manuscripts for publication. Trainees are encouraged to present their research in a variety of venues, including GSPH Dean's Day.
- Faculty members primarily working in this area include: Robert Boudreau, Jane Cauley, Nancy Glynn, Lewis Kuller, Iva Miljkovic, Anne Newman, Caterina Rosano, Andrea Rosso, Elsa Strotmeyer, Joseph Zmuda
- Collaborating Faculty include: Steve Albert, Howard Aizenstein, Steve Belle, Emma Barinas-Mitchell, Jen Brach, Maria Brooks, Clare Bunker, Lora Burke, Mary Ganguli, Tiffany Gary-Webb, Susan Greenspan, Joseph Hanlon, John Jakicic, Candy Kammerer, Oscar Lopez, Neelesh Nadkarni, Karen Matthews, Ryan Minster, Trevor Orchard, Sara Piva, Chip Reynolds, Akira Sekikawa, Jian-Min Yuan

Faculty Contact: Thomas Songer, PhD

- Areas of focus include: population health status assessment; infectious and chronic disease surveillance and control, maternal and child health epidemiology and environmental health epidemiology.
- Opportunities include practicum experiences, independent study and other applied projects. An enhanced practicum experience is the Summer Institute in Applied Public Health at the Allegheny Health Department.
- Faculty members currently working in this area include LuAnn Brink, Marshal Ma, Kristen Mertz, and Thomas Songer.

Faculty Contacts: Jian-Min Yuan, MD, PhD

- An advanced course is offered in cancer epidemiology on topics of surveillance, etiology and prevention.
- Research focus areas include: breast cancer and hormonal factors; environmental exposures determined by objective biomarkers and gene-environment interaction in the etiology of and susceptibility to cancer, including cancers of the lung, liver, colorectum, urinary bladder, breast, ovary and prostate; molecular epidemiology; cancer screening and related health services; diet as a source of risk and protective factors of cancer; obesity and weight loss for cancer prevention.
- Cancer Epidemiology and Prevention Program Seminar series at the University of Pittsburgh Cancer Institute, an National Cancer Institute-designated Comprehensive Cancer Center.
- Faculty members currently working in this area include: Clareann Bunker, Jane Cauley, Brenda Diergaarde, Lewis Kuller, Faina Linkov, Jian-Min Yuan.

Faculty Contact: Akira Sekikawa, MD, MPH, PhD

- Areas of research broadly include: cardiovascular aging and longevity; body composition and obesity; cardiovascular epidemiology; physical activity and subclinical CVD; novel CVD risk factors, high risk and ethnic subpopulations; vascular health; hypertension; peripheral nerve function; lipid metabolism, and evaluation of cardiac interventions.
- Diabetes areas of research include extensive programs in both Type 1 and Type 2 diabetes. For type 1 diabetes, these include a 30 year follow up study of childhood onset diabetes, (Pittsburgh Epidemiology of Diabetes Complications Study) and the national DCCT/EDIC study also with over 25 years follow up. For type 2 diabetes the Diabetes Prevention Program Outcomes Study and the translation of the interventions to the community form the basis of much activity including a Diabetes Prevention Support Center.
- Training grant: Designed to provide concentrated, tailored training in the quality collection of subclinical atherosclerotic measures, organized around four major research strengths: vascular aging, women's health, genetics and high risk/international populations. All trainees will participate in course work, research field work, and professional development (including CVD and diabetes journal clubs, independent research, grant writing, manuscript preparation and conference presentations).
- Faculty members currently working in this area include: Emma Barinas-Mitchell, Marnie Bertolet, Maria Mori Brooks, Clareann Bunker, Tina Costacou, Samar El Khoudary, Linda Fried, M. Kaye Kramer, Andrea Kriska, Allison Kuipers, Lewis Kuller, Rachel

Mackey, Oscar Marroquin, Karen Matthews, Iva Miljkovic, Matthew Muldoon, Suresh Mulukutla, Anne Newman, Trevor Orchard, Akira Sekikawa, Thomas Songer, Elsa Strotmeyer, Evelyn Talbott.

Faculty Contact: Steven Belle, PhD, M.Sc.Hyg.

- The activities of the Epidemiologic Methods group contribute to all areas of emphasis, specializing in design and conduct of studies including adaptive trials, survey sampling, and statistical methods.
- The didactic component includes three general methods courses and a design of clinical trials course. The journal club has covered topics including Latent Variable Modeling in Epidemiology and Causal Inference.
- The Epidemiology Data Center (EDC) was established in 1980 as a section of the Department of Epidemiology, founded by Katherine M. Detre, M.D., Dr.P.H., and under the co-direction of Steven Belle, PhD, Maria Brooks, PhD, and Stephen Wisniewski, PhD. The EDC has collaborated in over 100 research studies sponsored by the National Institutes of Health and other agencies. Presently, the EDC coordinates data management and analysis activities for 26 research projects sponsored by federal and various other governmental or private agencies and by industry. For more information, see the EDC web-site.
- The EDC hosts the CTSI Design, Biostatistics and Epidemiology (DBE) Core providing services to researchers at all stages of the research spectrum. Services include: grant application development and the pairing of researchers with statistical collaborators. It also hosts a Journal Club offering topics such as Propensity Scores and Survey Sampling.
- Faculty members currently working in this area include: Emma Barinas-Mitchell, GK Balasubramani, Steven Belle, Marnie Bertolet, Robert Boudreau, Maria Mori Brooks, Clareann Bunker, Yona Cloonan, Samar El Khoudary, Anthony Fabio, Sheryl Kelsey, Wendy King, Ashley Naimi, Rachel Mackey, Bedda Rosario, Kristine Ruppert, Robert Schoen, Stephen Wisniewski.
- Additional collaborators from the Department of Biostatistics include: Jong Jeong, and Abdus Wahed.

Faculty Contact: Evelyn Talbott, DrPH, MPH

- Areas of research include: air pollution and cardiovascular disease outcomes, cancer epidemiology and cancer cluster investigation, ambient air lead and PM_{2.5} and health effects, childhood autism and personal and environmental risk factors.
- Graduate student research assistantships for CDC funded projects involving ambient air lead and childhood lead poisoning, childhood autism and the environment , PM_{2.5} air pollution and cardiopulmonary outcomes.
- All doctoral trainees conduct an independent study with the requirement to submit three manuscripts for publication. Hands on training in the area of environmental epidemiology with collaborations with over 23 state health departments through CDC environmental public health tracking programs.
- Faculty members currently working in this area include: Jennifer Adibi, Gary Marsh , Evelyn Talbott, and Ada Youk.
- Additional collaborators from the Department of Biostatistics include: Vincent Arena, and Jeanine Buchanich and from the Allegheny County Health Department: LuAnn Brink and Kristen Mertz.

Faculty Contact: Clareann Bunker, PhD

- Areas of research Include: maternal and child health (rural India); functional disability in aging (rural India); diabetes (Rwanda), hypertension, cardiovascular disease (rural India, Tobago); impaired kidney function (Tobago); infectious disease/HIV (Brazil, India, and Mozambique); bone health (Tobago); prostate cancer (Tobago, Nigeria); cancer (China); environmental health (China); application of the Internet and Mobile technology for global health and prevention. Infectious diseases/dengue modeling (Thailand, Cambodia, Laos, Vietnam, Philippines, Singapore, Malaysia, Taiwan, Brazil, Columbia); atherosclerosis, coronary heart disease, alzheimer's disease, chronic obstructive pulmonary disease (Japan).
- Development of the internet Supercourse with 50,000+ members from over 170 countries, teaching over 50,000,000.
- Development of Project Tycho, a global health data repository released in November of 2013 providing open access to high resolution disease data for research, training, and public health public policy at www.tycho.pitt.edu.
- Faculty members currently working in this area include: Donald Burke, Clareann H. Bunker, Jane Cauley, Catherine Haggerty, Lee H. Harrison, M. Kaye Kramer, Andrea Kriska, Allison Kuipers, Ronald LaPorte, Faina Linkov, Iva Miljkovic, Jean Nachega, Anne Newman, Trevor Orchard, Akira Sekikawa, Evelyn Talbott, Willem van Panhuis, Jian-Min Yuan, Joseph Zmuda.

Faculty Contact: Lee Harrison, MD

- Areas of research include: epidemiology and molecular epidemiology of serious, vaccine-preventable, drug-resistant and hospital-associated bacterial infections; prevention of HIV infection; infectious diseases surveillance; computational modeling of disease and intervention strategies; use of geotemporal analysis in infectious diseases.
- Training grants: 1) Dengue and vaccine-preventable and drug-resistant bacterial infections in Brazil and 2) prevention of HIV infection in Brazil, India, and Mozambique.
- All doctoral trainees conduct an independent study with the requirement to submit three manuscripts for publication. Trainees can choose traditional epidemiology or molecular epidemiology as the basis of their doctoral research.
- Faculty members currently working in this area include: Steven Belle, Donald Burke, Catherine Haggerty, Lee Harrison, Lawrence Kingsley, Jean Nachega, Willem van Panhuis, and collaborating from the Allegheny Health Department: Kristen Mertz.

Faculty Contacts: Tom Songer, PhD, MPH, Anthony Fabio, PhD, MPH

- Applied research in broad areas of unintentional and intentional injury including but not limited to injury from motor vehicle crash, falls, natural disasters, poisoning, head trauma, criminal violence, child maltreatment, domestic violence, and treatment of injury.
- Emphasis on the application of epidemiologic methods in population and clinical settings to understand key risk and prognostic factors for primary and secondary prevention of injury.
- Trainees participate in academic training in injury epidemiology and/or injury prevention and control and applied research training on specific injury and violence topics using mentors from multiple disciplines in the fields of epidemiology, statistics, trauma, behavioral sciences, surgery, psychiatry, criminology and others.
- Faculty members currently working in this area include: Steven Albert, Anthony Fabio, Thomas J. Songer, Evelyn Talbott, Stephen Wisniewski, Mazen Zenati.

Faculty Contact: Joseph Zmuda, PhD

- Areas of current research broadly include aging, cancer, reproduction and early development, cardiovascular disease, diabetes, obesity, sarcopenia, and osteoporosis.
- Requirements vary depending on student background and needs, and are offered in collaboration with the Departments of Environmental and Occupational Health and Human Genetics in the Graduate School of Public Health.
- Didactic and laboratory courses are offered.
- Faculty members currently working in this area include: Jennifer Adibi, Clareann H. Bunker, Brenda Diergaarde, Allison Kuipers, Iva Miljkovic, Anne Newman, Jian-Min Yuan, Joseph Zmuda.
- Collaborators from other departments include: Robert Ferrell, Candace Kammerer, Ilyas Kamboh, Ryan Minster, Dan Weeks.

Faculty Contact: Caterina Rosano, MD, MPH

- Focuses on the application of epidemiology methods and cutting-edge neuroimaging methodologies in population and clinical studies to enhance etiological research and evaluation of specific therapies in the disorders of the central nervous system.
- Targets the interdependent nature of clinical characterization, epidemiological methods and multimodal assessment of disorders of the central nervous system through rigorous academic training and applied research opportunities.
- Maximizes the potential for applied research training and for successful field placements of the trainees through multidisciplinary mentored work with leaders in the fields of epidemiology, psychiatry, neuroscience, neurology, and others.
- Read more about Specialization in Neuroepidemiology
- Faculty members currently working in this area include: Jane Cauley, Mary Ganguli, Lewis Kuller, Karen Matthews, Trevor Orchard, Gale Richardson, Caterina Rosano, Bedda Rosario, Andrea Rosso, Evelyn Talbott.
- Collaborators from other departments include: Howard Aizenstein (psychiatry), James Becker (psychiatry), Kirk Erickson (psychology), Peter Gianaros (psychiatry), Samay Jain (neurology), Oscar Lopez (neurology), Amy Wagner (psychology).

Faculty Contact: Lisa Bodnar, PhD

- Areas of research include: nutritional epidemiology, obesity epidemiology, body composition, bariatric surgery, dietary intake, and supplement use.
- Relevant courses include Nutritional Epidemiology, Nutrition Assessment Laboratory.

- Faculty members currently working in this area include: Lisa Bodnar, Lora Burke, Samar El Khoudary, Wendy King, M. Kaye Kramer, Andrea Kriska, Iva Miljkovic, Akira Sekikawa, Lauren Simkin-Silverman.

Faculty Contacts: Andrea Kriska, PhD, MS

- This program involves translating the proven benefits of lifestyle intervention on a broad range of health outcomes including type 2 diabetes, cardiovascular disease and obesity. This program encompasses the conceptual and practical foundation needed for such public health translation initiatives. Learning objectives include a thorough understanding of disease prevention, behavioral intervention theory and lifestyle intervention training, along with a critical understanding of the methodological issues in designing and evaluating these efforts. Course work includes formal training and a practicum in which students gain community-based experience administering the lifestyle intervention, which is comprised of weight loss, increased physical activity and healthy eating.
- An integral part of this AOE in the Department of Epidemiology is the Diabetes Prevention Support Center (DPSC). The DPSC is comprised of Epidemiology faculty who were originally part of the Diabetes Prevention Program, the national multi-center clinical trial that demonstrated the benefits of lifestyle intervention in preventing a chronic disease. The DPSC serves as the central training center for lifestyle intervention delivery as well as provision of subsequent post-training support.
- The Department of Epidemiology is also the home of the Physical Activity Resource Center for Public Health (PARC-PH) which was developed to provide the physical activity assessment information and lifestyle intervention tools necessary to carry out prevention/translation efforts.
- Faculty members currently working in this area include: Lisa Bodnar, Joyce Bromberger, Lora Burke, Margaret Conroy, Jacqueline Dunbar-Jacob, Nancy Glynn, Wendy King, M. Kaye Kramer, Andrea Kriska, Lewis Kuller, Faina Linkov, Karen Matthews, Kathleen McTigue, Trevor Orchard, Lauren Simkin-Silverman, Elizabeth Venditti, Tiffany Gary-Webb .

Faculty Contact: Gale Richardson, PhD

- The Psychiatric Epidemiology Training Program focuses on the acquisition of epidemiological, biostatistical, and psychiatric concepts and methods, and on their application to research in the field of psychiatric disorders
- Training is accomplished through course work in epidemiology and biostatistics, and through courses in psychiatric epidemiology that were designed specifically for the PET Program
 - The training experience includes the opportunity to work on research projects with faculty mentors who are active researchers in psychiatry and epidemiology within the Graduate School of Public Health (GSPH) and the Department of Psychiatry within the University of Pittsburgh School of Medicine
- Faculty members currently working in this area include: David Brent, Joyce Bromberger, Tammy Chung, Marie Cornelius, Nancy Day, Mary Amanda Dew, John Donovan, Mary Ganguli, Karen Matthews, Margaret McDonald, Kenneth Perkins, Gale Richardson, Stephen Wisniewski.

Faculty Contact: Catherine Haggerty, PhD, MPH

- Areas of research broadly include: causes of pregnancy complications and adverse outcomes including spontaneous abortion, stillbirth, preterm birth, low birth weight, intrauterine growth restriction, and preeclampsia; obesity and nutrition among pregnant women; fertility and contraception; breastfeeding; and sexually transmitted infections. A major clinical site for collaboration is Magee-Womens Hospital, the obstetrics, gynecologic, and reproductive sciences specialty hospital associated with the University of Pittsburgh Medical Center. Global health research experiences are available through a study of pregnancy being conducted in India.
- Training program provides concentrated, tailored training on the patterns, risk factors, and interventions that might improve reproductive, perinatal, and pediatric health, as well as women's health across the lifespan. All trainees will participate in coursework, research field work, and professional development including courses in Reproductive Epidemiology, Epidemiology of Women's Health, and Pediatric Epidemiology; a Reproductive, Perinatal and Pediatric Epidemiology Journal Club; a Maternal and Child Health Journal Club; independent research; grant writing; manuscript preparation; and scientific conference presentations.
- Trainees who engage in community service activities in addition to completing the didactic requirements will be eligible for a Women's Health Specialization, which honors trainees' combined interests in women's health research and community outreach.
- Faculty members currently working in this area include: Jennifer Adibi, Emma Barinas-Mitchell, Lisa Bodnar, Joyce Bromberger, Clareann H. Bunker, Janet Catov, Jane Cauley, Yona Cloonan, Marie Cornelius, Nancy Day, Samar El Khoudary, Catherine Haggerty, Sheryl Kelsey, Andrea Kriska, Lewis Kuller, Rachel Mackey, Dara Mendez, Evelyn Talbott, Nina Markovic, Karen Matthews, Gale Richardson, James Roberts, Rebecca Thurston.

Faculty Contact: Jane Cauley, DrPH

- Areas of research broadly include: women's health across the lifespan, menopause and late life. Menopause and Aging focuses on furthering our understanding of chronological aging versus ovarian aging. Emphasis is placed on a broad range of topic areas including the skeleton, cardiovascular disease, mental health, physical function and disability, body composition and lifestyle.
- Faculty members currently working in this area include: Emma Barinas-Mitchell, Lisa Bodnar, Joyce Bromberger, Maria Mori Brooks, Clareann Bunker, Janet Catov, Jane Cauley, Marie Cornelius, Nancy Day, Natacha DeGenna, Samar El Khoudary, Catherine Haggerty, Sheryl Kelsey, Andrea Kriska, Lewis Kuller, Rachel Mackey, Nina Markovic, Karen Matthews, Dara Mendez, Gale Richardson, Akira Sekikawa, Evelyn Talbott,, Rebecca Thurston.

GSPH-Epidemiology Funded Research & Practice

Funded Research and Training Projects

The Department of Epidemiology, the largest department at Pitt Public Health, offers interdisciplinary research opportunities in the City Of Pittsburgh, which is recognized as an international hub for health care innovation and practice. The school is one of the nation's leading schools of public health, consistently ranking in the top tier among schools of public health in terms of NIH funding. The Department of Epidemiology accounts for about forty percent of the school's total grant funding.

The Department of Epidemiology has a central theme of "**Teaching and Prevention through Quality Research**," and is involved in both research and prevention activities. The department's primary faculty members have a varied range of research interests reflected in more than 90 funded projects and more than 500 publications each year. Faculty, staff and student participation in regular seminars provides a rich collaborative environment.

Based on faculty research, the department offers many areas of emphasis including aging, applied public health, cancer, cardiovascular and diabetes, clinical trials and methods, environmental, global health, infectious disease, injury prevention, molecular and genetics, neuroepidemiology, obesity and nutritional, prevention, lifestyle and physical activity, psychiatric, reproductive, perinatal and pediatric and women's health epidemiology.

Research programs include those with global reach in over a dozen nations including: maternal and child health (rural India); functional disability in aging (rural India); diabetes (Rwanda), hypertension, cardiovascular disease (rural India, Tobago); impaired kidney function (Tobago); infectious disease/HIV (Brazil, India, and Mozambique); bone health (Tobago); prostate cancer (Tobago, Nigeria); cancer (China); environmental health (China); application of the Internet and Mobile technology for global health and prevention; Infectious diseases/dengue modeling (Thailand, Cambodia, Laos, Vietnam, Philippines, Singapore, Malaysia, Taiwan, Brazil, Columbia); atherosclerosis, coronary heart disease, Alzheimer's disease, chronic obstructive pulmonary disease (Japan).

Research Innovations

in risk assessment

- use of advanced imaging methods
- use of biomarkers, including genetic profiles and personal monitoring
- use of activity monitoring and environmental (air and water quality) assessment
- use of molecular tools to detect and study emerging bacterial infections - *in data management and analysis*
- adaptive designs for clinical trials
- geographic modeling
- temporal modeling

Research Highlights

- through the Center for Aging and Population Health (CAPH, a Centers for Disease Control and Prevention (CDC) Research Center, supporting data collection for several large studies, primarily in older adults but also in other groups
- through CAPH, addressing healthy aging by promoting a comprehensive community prevention program called the 10 Keys to Healthy Aging
- with funding from the National Institutes of Health, currently conducting the Lifestyles and Independence for the Elderly Trial, Testosterone Trial, and Aspirin to Prevent Events in the Elderly Trial
- engaging in ongoing follow-up for the Epidemiology of Diabetes Complications study, Women's Health Initiative, Cardiovascular Health Study, Study of Osteoporotic Fracture, and Men's Osteoporosis Study

Collaborating Partners

- Pitt Public Health departments
- Pitt Department of Psychiatry
- University of Pittsburgh Cancer Institute
- Magee Womens Research Institute
- Allegheny County Health Department
- Pennsylvania Department of Health

Tuition & Financial Aid

Tuition and fees are set by the University and the official postings should be consulted for current information.

Learn more about Tuition and Billing

Financial Aid

Pitt Public Health cannot guarantee funding to every student, but last year the school provided more than \$5 million in financial aid to graduate students. Almost all Pitt Public Health doctoral students and many master's students receive some type of financial aid, whether in the form of full or partial scholarships, fellowships, student assistantships, student employment, or student loans.

Students who receive aid generally receive it through their department, and the amount of aid available varies among the programs. Priority consideration is given to doctoral students. Departments may award graduate student research positions to international students.

Important Information on Financial Aid for International Applicants

In general, international students are not eligible for student loans, federal traineeships, fellowships, or scholarships. International students may be eligible for selected scholarships or assistantships. (A significant number of our international doctoral students are supported by assistantships.)

Important: At the time of admission, international applicants who have not been offered financial aid are required to submit an affidavit, indicating that they have sufficient funds to cover their tuition and living expenses for the duration of the program. Visa documents are issued on the basis of these affidavits, and the expectation of self-support continues throughout the period of enrollment.

International students should always consult with the Office of International Services before applying for student employment.

Contacts for Financial Aid

Contact your GSPH Department Student Services Staff or academic advisor first with questions about student assistantships, scholarships, and hourly employment.

Key Deadlines

Loan Applications

Student loan applications are processed for GSPH students by the University's Office of Admissions and Financial Aid (OAFA; 412-624-7488). See complete instructions for applying for a student loan on the University's Office of Admissions and Financial Aid page.

Student Loan Deadlines

While there is no strict deadline for application, the suggested filing dates are encouraged:

- June 1 (fall term)
- October 1 (spring term)
- February 1 (summer term)

Students are encouraged to submit loan application documents as soon as possible before the start of the term for which a loan is requested.

For information about student loans, view the University's Office of Admission and Financial Aid's PowerPoint presentation.

Types of Aid

Student Loans

Generally, applicants must be U.S. citizens or permanent residents. Contact Office of Admissions and Financial Aid for information on loan options, availability, and to apply.

Call 412-624-7488 to check the status of your loan application.

Free Application for Federal Student Aid (FAFSA)

The Free Application for Federal Student Aid (FAFSA) is required for all students who wish to be considered for loans or Pitt Public Health aid. The University of Pittsburgh federal school code is 008815.

Federal Regulations on Student Loans: Satisfactory Academic Progress (SAP)

Institutions participating in Title IV Federal Student Aid programs must monitor satisfactory academic progress of students receiving any federal loans or other aid (e.g. scholarships).

To demonstrate satisfactory progress, students must maintain a 3.0 GPA and complete at least 67% of the total credits attempted at any point. Doctoral students must complete the degree within the statute of limitations for the degree and must complete the degree with no more than 150% of the required credits. If progress is not met, students may be ineligible to receive loans or other aid. Students may appeal, in which case they will have one term to achieve the SAP standards. See Mary Derkach in the Office of Student Affairs, G009 Public Health, to submit an appeal of determination of no progress.

If you receive federal aid, you should read the entire SAP policy. In particular, FTDR registration is counted as 9 credits for the purposes of this law; retaking courses and receiving course grades of W, I, G, F, N (audit) and R all count towards the stated totals. Advanced standing credits also count toward the total number of credits taken. Also, carrying a large number of I, G, W, R, and F graded credits may potentially violate the 67% completion rule. Contact your instructor(s) about filing real grades on a term-by-term basis, where appropriate.

Emergency Loans

The University may provide loans of up to \$200 for students in emergency financial need. Interested students should contact the Student Organization Resource Center (SORC) on the first floor of the William Pitt Union, 412-624-7116.

Short-term student loans of up to \$500 may be available through the Pitt Public Health Office of Student Affairs for students with unexpected emergencies who have paid their tuition for the term. Students should contact assistant dean for student affairs, Mary Derkach for more information.

Grants and Scholarships

Important Note on Loan Eligibility with Regard to Grants and Scholarships

The University recalculates a student's loan eligibility whenever additional financial aid appears in the student financial system. New aid may result in a reduction or total cancellation of loan eligibility, including an obligation to immediately repay all or part of a loan already disbursed. If you receive a scholarship, you may want to schedule a meeting with a loan counselor in the Office of Admissions and Financial Aid and ask for a recalculation of your loan eligibility.

University Aid

The University offers several scholarships throughout the year that are suitable for graduate students. These scholarships will be announced to departments and students will be invited to apply.

Pitt Alumni Association Graduate Scholarship

A one-time \$5,000 scholarship awarded to graduate students who also completed their undergraduate degree at Pitt.

The George L. Carson Graduate Fellowship for Pitt Alumni

Awarded to a graduate student who was affiliated with a Pitt athletics program as an undergraduate. Applications will be available in February and are typically due May 1. Contact the Student Life and Compliance Office in the Athletics Department with questions.

Owens Fellowship

A needs-based, \$6,000 per year fellowship that can be used for tuition, books, and living expenses. Copies of GRE scores or other standardized test scores may be required. Applications are available in February. Go to my.pitt.edu, PittFund\$Me, in early May for applications and information.

Provost's Development Fund

A needs-and merit-based grant for doctoral students intended to provide financial support and professional development for women and disadvantaged students. Applicants must be U.S. citizens or permanent residents. Applicants must also be in the final year of their doctoral program, having completed all required coursework and working on their dissertation. Contact Linda Williams-Moore at lwmoore@pitt.edu for more information.

K. Leroy Irvis Fellowships

Graduate schools receive one award each year to provide first-year support of an outstanding, full-time doctoral student who supports the University's and school's diversity mission. The Irvis Fellowship provides a stipend, tuition remission, and health insurance for the first year; the academic department provides the same level of support for years two and three. Nominations are made by departments.

PittFund\$Me: All students seeking aid should fill out a personal profile at my.pitt.edu, PittFund\$Me, to be considered for any University aid for graduate students.

Pitt Public Health Aid

Pitt Public Health awards the following partial scholarships annually, generally at the start of the fall term. Students may contact their departments and request to be nominated.

Dean's Public Health Scholars Award

During the early spring term each department can nominate one outstanding incoming master's student for the Dean's Public Health Scholars Award, which provides a 50% tuition scholarship for up to two years of full-time graduate studies. Students must be registered full-time through the Graduate School of Public Health to receive the award.

In addition, two scholarship awards are reserved for direct application by newly accepted applicants for Fall 2019. Applicants who wish to be considered for one of these awards must send a request to Mary Derkach, Office of Student Affairs, at derkach@pitt.edu. Selected applicants must plan to enroll through Pitt Public Health as full-time master's students, and be U.S. citizens or permanent residents, with verbal GRE scores in the 70th percentile or better, and quantitative scores in the 60th percentile or better. In addition, requests must be accompanied by a statement describing the applicant's academic achievements to date as well as her/his ability to enhance or contribute to the diversity and inclusiveness of the Pitt Public Health student body. Second-year funding is available, contingent upon a GPA of 3.3 or higher in the first year.

Campaign for the Next 5,000 Alumni

Financial support based on need, merit, and diversity. Although preference may be given to master's students, doctoral students are also eligible.

Dean's Endowed Doctoral Scholarship

Support for doctoral students based on need, merit, and community service.

Dr. Edgar and Lauraine Duncan Scholarship

Financial support for disadvantaged students that can be used for student fees, stipend, books, or travel expenses.

Bernard D. Goldstein Student Award in Environmental Health Disparities and in Public Health Practice

For students or postdoctoral fellows studying either the environmental causes of health disparities or the practice of public health. This award is administered in alternate years by the Center for Health Equity (even-numbered years) and the Center for Public Health Practice (odd-numbered years). Apply by November 18, 2019.

Departmental Awards**Behavioral and Community Health Sciences****Carol McAllister Award**

Based on need and merit, awards can be used for books, fees, stipends, or travel expenses.

Karen S. Peterson Memorial Research Award for Women's Health

Research or practice support for work in women's health.

Joseph and Brigida Ricci Scholarship

Needs-based support for an outstanding student.

Myrna Silverman Scholarship

Needs-based support for an outstanding doctoral student.

Biostatistics**Biostatistics Endowed Scholarship Fund**

Tuition support.

Department of Biostatistics Endowment Fund

Resource support including travel and registration for academic and professional conferences.

Epidemiology**Arlene W. Caggiula Student Award in Nutrition**

Tuition support for students studying nutritional epidemiology, a nutrition-related component of chronic disease, a nutrition-related component of aging, or the evaluation of the epidemiology of a nutrition-related disorder.

Katherine Detre Scholarship

Awarded to promising accepted doctoral applicants or continuing doctoral students who demonstrate high levels of scholarship and commitment to public health. Established to supplement graduate student support in the Epidemiology Data Center.

Lewis H. Kuller Scholarship Award

Resource support that can be used to cover tuition, books, fees, research, travel expenses, or stipends.

Evelyn H. Wei Memorial Fund

Resource support for travel to attend approved scientific meetings, events, or conferences.

Evelyn H. Wei Scholarship Award in Epidemiology

Tuition assistance for master's or doctoral degree students based upon potential contribution to public health, with emphasis on scholarship, leadership, and service.

Health Policy and Management

The Dawn Gideon Scholarship for MHA Students

Provides scholarship assistance for students in the MHA program whose talents lean towards creative problem solving and an understanding of the value all individuals bring to the process.

Nathan Hershey Endowment in Health Administration

An annual award to a full-time student enrolled in the MHA program. Secondary criteria shall include need.

HPM Friends and Alumni Scholarship Fund

This scholarship provides tuition support to students within the Department of Health Policy Management.

Hunter Group Health Policy and Management Student Scholarship Award

This endowed fund provides tuition assistance for students in the Department of Health Policy and Management.

The Thomas and Judy Priselac Endowed Fund for Healthcare Leadership

Provides support for MHA students participating in selected professional and leadership development activities nationally, including professional association conferences, academic team competitions, professional networking, and other health management career path opportunities.

Surma Scholarship for Long-term Healthcare Administration in Policy and Aging

This endowed fund provides support to Graduate School of Public Health students who are Pennsylvania residents and have demonstrated interest in long-term healthcare administration or policies.

Human Genetics**C. C. & Clara Li Endowed Scholarship**

The award is offered to the top accepted applicants in each of our four offered programs, PhD, MS, MPH and MS-GC. It can be used towards tuition support or to defray the cost of books, lab related fees, conference travel, etc.

George Qi Wang Memorial Student Assistance Fund in Pharmacogenetics

Tuition support for students pursuing research studies in pharmacogenetics; open to students in any of the Schools of the Health Sciences or Arts and Sciences.

Infectious Diseases and Microbiology**Bob Yee Student Award**

Tuition support.

Other Financial Support - Resources for Research and Professional Development**Russell Rule Rycheck Award for a Promising MPH Student**

A \$500 award for MPH students committed to the practice of public health. Funds can be used for books, coursework, travel, or professional development. Applications are due to Mary Derkach, assistant dean for student affairs, G009 Public Health, by December 4 each year. If December 4 falls on a Saturday or a Sunday, applications are due the following Monday.

William T. Green Jr. Award in Public Health Studies - Awarded in Fall and Spring Terms

A \$750 award to support research and special projects for currently enrolled Pitt Public Health students. Funds can be used for direct research costs, books, travel, or professional memberships. Applications are due to Mary Derkach, assistant dean for student affairs, G009 Public Health, by December 4 for the fall term, and by March 15 for the spring term.

Other Financial Support - Travel Awards for Conferences and International Study**Pitt Public Health Support****Office of Student Affairs**

The Office of Student Affairs provides departments with \$500 each year to use for student travel grants. To apply for a travel grant, please see the student services staff member in your department. Awards are allocated on a first-come, first-served basis and travel must take

place no later than mid-May. Receipts for reimbursement must be submitted to your department as soon as you return from your conference/meeting.

Awards can be applied only to future travel. Travel must take place during the student's enrollment in a degree program at Pitt Public Health. Students may request only one award per academic year. Awards will be processed as a travel expense reimbursement (TBE) by the student's department upon submission of receipts for travel. In no case can the amount of the award exceed expenses. Students applying for travel awards from more than one source should prepare one reimbursement form for all of the sources, since original receipts are required for all sources.

Student Government Association

Students can apply for a travel award (up to \$150) from the Student Government Association. Applications are available in the Office of Student Affairs.

Global Health

The dean of Pitt Public Health sponsors a grant program for graduate students in the health sciences who want to conduct international research to address global health issues. Availability of grants can be found annually in *The Week Ahead*.

University Support

Foreign Language Area Studies (FLAS)

Funded by the U.S. Department of Education with the intent of promoting the study of a modern, European foreign language within a cultural, scientific, or historical framework. Fellowships are awarded annually for summer and academic year study. Submit an application to Pitt Public Health, and we will then select nominees and forward them to the University Center for International Studies.

Graduate and Professional Student Government

Grants support for travel to academic and professional conferences. Applicants are eligible for one grant per fiscal year (July 1- June 30), and funds are awarded on a first-come, first-served basis.

Nationality Rooms Scholarships

These scholarships reflect decades of work honoring education through cultural exchange. After the Nationality Rooms were built in Pitt's Cathedral of Learning, committees stayed together to raise funds enabling eligible Pitt students to study abroad, thereby experiencing another culture in depth. There are several different awards available.

University Center for International Study Scholarships

The Pitt Study Abroad Office offers a central listing of the range of scholarship possibilities available to help defray the cost of a study abroad program. Scholarships are managed by academic departments and schools such as the Center for Global Health or the College of General Studies.

Women's Studies Student Research Fund

Awards of up to \$1,000 to support travel expenses, secretarial costs, research materials, or other direct costs for research related to the study of women, gender, and/or sexuality.

EXTERNAL SUPPORT

The following external sources also provide travel support for conferences and international study:

Fulbright Fellowship Program

Grants for individually designed study/research projects or for English Teaching Assistantships. During their program, Fulbrighters will meet, work, live with, and learn from the people of a host country, sharing daily experiences.

Fulbright Hays

Funding for students wishing to conduct their doctoral dissertations abroad.

George Mitchell Scholarship

National scholarship for students interested in pursuing one year of graduate work in an institution of higher education in Ireland or Northern Ireland.

International Education Financial Aid

Information on financial aid for U.S. and international students wishing to study abroad.

External Funding Opportunities

These organizations may have financial aid programs for public health students. Students can find listings of internship, fellowship, and post-doc opportunities in Pitt Bridges.

Blake Rubin Scholarship

Strong Arm Leukemia Scholarship

Student Assistantships

Graduate student assistants, graduate student researchers, teaching assistants, and teaching fellows are students who receive support in return for specified duties while gaining teaching, teaching-related, or research experience under the guidance of a faculty mentor.

Whenever available, assistantships and traineeships are awarded by the departments. There are no assistantships available through the Office of Student Affairs or the Dean's Office. Students may receive an assistantship from any department in the University, but there is no central listing of assistantships available.

Descriptions**Traineeships**

A traineeship is money from a training grant allocated to students to support advanced study in a specified field. A traineeship may provide full or partial tuition and/or living expenses. Usually, there is no service requirement. Several departments have traineeships available for students in particular concentrations.

Assistantships

An assistantship provides a full or partial tuition scholarship, a stipend, and individual health insurance coverage in exchange for performance of specified duties, usually in support of a faculty member's research project. Assistantship appointments can be full or part-time. Each department may award a limited number of student assistantships, usually to doctoral students. Students may also be awarded an assistantship by another University department. There is no central listing of University assistantships.

Teaching Assistants

A teaching assistant (TA) is a student who holds a teaching or teaching-related appointment made within the University regulations pertaining to teaching assistants. No teaching assistant shall be employed to teach post baccalaureate courses.

Teaching Fellows

A teaching fellow (TF) is the same as a teaching assistant except that the teaching fellow is more educationally advanced or experienced, typically holding the equivalent of a master's degree. TFs should not be assigned to teach graduate courses. Exceptions may be made only in rare cases where the individual shows clear evidence of outstanding skills in specialized areas and when the individual is directly supervised by faculty.

Eligibility

Students must be appointed through Pitt Public Health and must be enrolled at Pitt Public Health.

Effort

Full-time GSRs are expected to devote twenty hours per week to the research project they are assisting. GSRs may be required to work more hours if the research pertains to their thesis or dissertation. Time expenditure of part-time GSRs is proportional to this standard of twenty hours (i.e. half-time GSRs must devote ten hours per week to their research project, and more if the research pertains to their thesis).

TAs and GSAs have the same work obligation of twenty hours a week. However, their assignments will differ from a GSR and will not likely relate directly to their research interests.

Appointments

GSR, GSA, and TA appointments may be made annually for one to no more than three terms at a time (one academic year). Renewals are subject to satisfactory job performance and availability of funding.

Evaluation

At least once each year, the faculty supervisor must provide a written evaluation of a GSR/TA/GSA's performance to the student and to the department. A suggested evaluation form is available from the department administrator, who should request the evaluation in the spring term. A copy of the completed evaluation should be provided to the department administrator.

Stipend

The monthly stipend amount is set by the department within a range established by the University. Monthly stipend payments for part-time GSR positions will be proportional to this standard. The University does not set a different stipend level for TA and GSA positions.

Tuition Scholarships

Full-time GSR/GSA/TAs are eligible to receive full tuition scholarships to cover up to and including 15 credits per term. Part-time positions are eligible for partial tuition scholarships in accord with their appointments, i.e., a half appointment receives a scholarship for six credits and a quarter appointment covers three credits per term.

Health Insurance

GSRs, GSAs, and TAs are provided individual coverage under the UPMC Health Plan for graduate students. Family coverage is available at an additional cost to the student.

University Policies

Learn about University policies regarding student assistantships.

Student Employment

Registered students can work in part-time student positions for a maximum of 20 hours per week in the fall and spring terms, and 37.5 hours per week in the summer term. Graduate students do not generally receive funding through the federal work-study program.

After creating a PittSource account (free of charge), students have access to postings for summer jobs and regular student employment. Postings include positions within Pitt Public Health, at other University departments, and through off-campus employers.

Sabik, Lindsay | Health Policy & Management | Associate Professor | PhD, Harvard University

Salk, Peter | Infectious Diseases & Microbiology | Visiting Professor | MD, Johns Hopkins University

Santanasto, Adam | Epidemiology | Assistant Professor | PhD, University of Pittsburgh; MPH, University of Pittsburgh

Sekikawa, Akira | Epidemiology | Associate Professor | PhD, University of Pittsburgh; PhD, Yamagata University; MPH, University of Pittsburgh

Shaffer, John R. | Human Genetics | Assistant Professor | PhD, University of Pittsburgh

Songer, Thomas J. | Epidemiology | Assistant Professor | PhD, University of Pittsburgh; MSc, London School of Economics; MPH, University of Pittsburgh

Stall, Ronald | Behavioral & Community Health Sciences | Professor | PhD, University of California, San Francisco; MPH, University of California, Berkeley; MA, University of Kentucky

Stoyanovksy, Detcho A. | Environmental & Occupational Health | Research Associate Professor | PhD, Bulgarian Academy of Sciences; MS, Sofia University

Strotmeyer, Elsa | Epidemiology | Associate Professor | PhD, University of Pittsburgh; MPH, University of Pittsburgh

Talbott, Evelyn O. | Epidemiology | Professor | DrPH, University of Pittsburgh; MPH, University of Pittsburgh

Tang, Gong | Biostatistics | Associate Professor | PhD, University of Michigan; MA, Johns Hopkins University; MS, Beijing University

Tang, Lu | Biostatistics | Assistant Professor | PhD, University of Michigan; MS, University of Virginia

Terry, Martha A. | Behavioral & Community Health Sciences | Associate Professor PhD, University of Pittsburgh; MA, Northern Illinois University

Tseng, George C. | Biostatistics | Professor | ScD, Harvard University; MS, National Taiwan University

Tyurin, Vladimir A. | Environmental & Occupational Health | Research Assistant Professor | PhD, Moscow State University; MS, Far East State University

Tyurina, Yulia Y. | Environmental & Occupational Health | Research Professor | PhD, Russian Academy of Science; MS, St. Petersburg State University

Urban, Zsolt | Human Genetics | Associate Professor | PhD, Semmelweis University; MS, University of Szeged

Van Nostrand, Elizabeth | Health Policy & Management | Assistant Professor | JD, Tulane University

Van Panhuis, Wilbert | Epidemiology | Assistant Professor | PhD, Johns Hopkins University; MD, Free University Medical Center of Amsterdam

Wahed, Abdus S. | Biostatistics | Professor | PhD, North Carolina State University; MA, Ball State University; MS, University of Dhaka

Wang, Hong | Biostatistics | Research Assistant Professor | PhD, Medical College of Wisconsin; MS, Peking University

Weeks, Daniel E. | Human Genetics | Professor | PhD, University of California, Los Angeles; MS, University of California, Los Angeles

Wenzel, Sally E. | Environmental & Occupational Health | Professor | MD

Wisniewski, Stephen R. | Epidemiology | Professor | PhD, University of Pittsburgh; MAS, The Ohio State University

Yothers, Greg | Biostatistics | Research Associate Professor | PhD, University of Pittsburgh; MA, University of Pittsburgh

Youk, Ada O. | Biostatistics | Associate Professor | PhD, University of Pittsburgh; MA, University of Pittsburgh

Yuan, Jian-Min | Epidemiology | Professor | PhD, University of Southern California; MD, Shanghai Medical University; MPH, Shanghai Medical University

Zmuda, Joseph M. | Epidemiology | Associate Professor | PhD, University of Pittsburgh; MPH, University of Pittsburgh; MS, University of Rhode Island

Tuition and Billing

The tuition and fees listed below reflect current information at the time of posting and are likely to increase in the next academic year. Rates are set by the University and the official postings should be consulted for current information.

Tuition Rates for 2018-2019

Status	Pennsylvania Resident	Out of State Resident
Full-time 9-15 credits	\$13,394 per term	\$22,726 per term
Part-time 1-8 credits	\$1,090 per credit	\$1,861 per credit
FTDR	\$500	\$500

During fall and spring terms, students registered full-time are billed a flat, full-time rate. Students enrolled part-time are billed on a per-credit basis. All students are billed on a per-credit basis during summer terms.

Doctoral students registered for full-time doctoral research (FTDR) pay a flat rate of \$500 plus full-time fees.

Additional Fees for 2018-2019

	Activity	Computer	Wellness	Security and Transportation
Full-time (includes FTDR)	\$30/term	\$175/term	\$130/term	\$90/term
Part-time	\$15/term	\$100/term	\$65/term	\$90/term

Billing Information

Contact the Student Payment Center, 412-624-7520, with billing questions.

Invoice Payment

Students and their Authorized Users will be notified twice before each due date if there is a balance due on the student account. Electronic invoices (eBills) are posted on the student's account after registration for classes, on or about the 20th of every month, and are due on the 17th of the next month. The University may also place a financial hold on overdue accounts.

Add/Drop

Students who drop courses by the term's deadline for add/drop may have their tuition for the term adjusted if they are part-time students, or if the drop changes their status from full-time to part-time.

Resignation Refunds Direct Deposit

Adjustments to tuition charges resulting from official resignation or Add/Drop are based on the effective date of resignation and in accordance with the federally mandated calculation. Contact the Student Payment Center (412-624-7520) for information on the amount of tuition adjustment.

Installment Payments

All students should enroll for direct deposit as refunds and financial aid are awarded through eRefunds.

They should also update their authorized users (parents, spouses, and others) so that they can have access to their student account.

Individual Development Plan

A Tool for Outlining Professional Development Objectives

A Graduate Student Independent Development Plan (IDP), is a tool for helping students and advisors outline and discuss short-term and long-term objectives to guide the student's professional development.

Graduate School of Public Health doctoral students and advisors are required to complete an IDP at least annually, typically timed to coincide with the required annual doctoral committee meeting. The school has an IDP template or students and advisors may substitute any other form that meets the same purpose (e.g. department-specific templates or templates provided by professional societies).

Completed IDP forms should be kept in student files at the department level. They should be treated as confidential student records. The Report on Requirements form for the doctoral preliminary exam and dissertation overview includes a checkbox that the committee should use to certify that an IDP has been completed within the six months prior to the exam.

IDPs are intended as a career development tool, and are not a substitute for a GSR evaluation that assesses job performance. For students whose GSR is closely tied to their dissertation research, it may be possible to combine the two, but it is still necessary to assess academic development and job performance separately.

IDPs are not required for master's students but they are highly recommended. This policy was voted and approved by the Educational Policies and Curriculum Committee and the GSPH Council on February 2015.

School of Social Work

The University of Pittsburgh's School of Social Work, successor to the Division of Social Work in the Department of Sociology of the University, was founded in September 1918, and accepted its first class of MSW students that year. The school shares with the University a commitment to the advancement and application of knowledge. Students in Pitt's School of Social Work learn the knowledge, skills, and values to engage in culturally competent practice with diverse populations and communities. They learn to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques, and to advocate for those who confront barriers to fulfilling their potential.

The school's students and faculty members also engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems. In addition, school students, alumni, and personnel serve local, national, and international communities by developing and participating in collaborations with social agencies, community-based organizations, government, and foundations.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to:

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

The school offers a full continuum of social work educational programs at the undergraduate, master's, and doctoral levels (as well as a continuing education program for practicing social workers). The school's bachelor's and master's programs in social work are accredited by the Council on Social Work Education, and graduates are eligible for full membership in the National Association of Social Workers.

Degree Options

The School of Social Work offers the Master of Social Work (MSW) and the Doctor of Philosophy (PhD) degrees. MSW students may combine their degree work with course work leading to a certificate. In addition, the School of Social Work has joint and cooperative degree options with other schools in the University as well as external institutions. The degree options include:

Master of Social Work

<http://www.socialwork.pitt.edu/academics/master-social-work-msw>

- Skill Concentrations (one is required)
- Direct Practice with Individuals, Families, and Groups
- Community, Organization, and Social Action (COSA)
- Direct Practice Certificate Programs
- Gerontology Certificate
- Home and School Visitor/School Social Worker Certificate
- Children Youth and Families Certificate
- Mental Health Certificate
- Integrated Healthcare Certificate
- Human Services Management Certificate

Doctor of Philosophy

<http://www.socialwork.pitt.edu/academics/doctorate-social-work-phd>

Joint and Cooperative Degrees

<http://www.socialwork.pitt.edu/academics/msw/dualjoint-cooperative-degrees>

- **MSW**
- Master of Social Work/Master of Divinity
- Master of Social Work/Master of Public Administration
- Master of Social Work/Master of Public and International Affairs
- Master of Social Work/Master of International Development
- Master of Social Work/Doctor of Philosophy (PhD) in Social Work
- Master of Social Work/Master of Public Health
- Master of Social Work/Juris Doctorate
- Master of Social Work/Certificate of Advanced Study in Teaching
- Master of Social Work/Master of Business Administration
- **PhD**
- Master of Social Work/Doctor of Philosophy (PhD) in Social Work
- Master of Public Health/Doctor of Philosophy (PhD) in Social Work

Specific details regarding course requirements are described in this bulletin and on the School of Social Work Web site and in the Student Handbook.

Admissions

Admission to the MSW and PhD programs is for fall term (September) only. Applicants seeking full-time or part-time admission should submit the application far in advance of their expected entry into the program; all application materials are due no later than May 31 for the MSW program and December 31 for the PhD program of the year in which entry is expected. Applications are reviewed only upon receipt of all required materials. Application forms are available from:

School of Social Work
Office of Admissions
2104 Cathedral Of Learning
412-624-6302
E-mail: sswadmissions@pitt.edu
www.socialwork.pitt.edu/admissions/

Online applications are accepted via the MSW or PhD sections of our website located at <http://www.socialwork.pitt.edu>

For more specifics on admissions requirements for the MSW or the PhD, consult the description of the relevant degree program.

Admission of Students from Other Countries

The School of Social Work welcomes applications from students in other countries whose credentials meet the requirements and the standards of the School of Social Work and the Office of International Services of the University.

MSW and PhD applicants from other countries must apply directly to the School of Social Work. Applicants must submit the completed application form, additional required forms, and other required materials in English. Additional University of Pittsburgh application procedures for international students are described at <http://www.socialwork.pitt.edu/admissions-aid/international-students>. Other information and assistance for international students can be found online at www.ois.pitt.edu/intladmissions.html.

For MSW applicants only: International students who hold a baccalaureate degree in social work from a program that is not accredited by the Council on Social Work Education and who are interested in obtaining advanced standing credit must submit their transcript to the council for a determination of equivalency. Further Information can be found online at www.cswe.org.

Financial Assistance

Students interested in financial assistance to meet tuition and/or living costs should direct inquiries to both the Office of Admissions of the School of Social Work and the University's Office of Admissions and Financial Aid.

Students should be advised that limited resources often preclude any one funding source from granting awards that meet total financial needs. As a result, students are strongly encouraged to seek financial aid packages consisting of partial awards (including loans and scholarships) from a variety of sources, including the Office of Admissions and Financial Aid in Alumni Hall (412-624-PITT) and the School of Social Work Financial Aid Sources, Office of Admissions, Room 2104 Cathedral of Learning (412-624-6302; <http://www.socialwork.pitt.edu/admissions-aid/financial-aid> . *See also the University-wide information on Financial Aid.*

Applications for financial assistance are accepted only after an admissions decision has been made. Awards are made for a one-year period. New applications are required for each succeeding period.

Academic Standards

The School of Social Work's expectations for student and faculty conduct are described in school policies and embody the standards of professional social work. Students in the School of Social Work are required to adhere to the NASW Code of Ethics.

Academic Review Policy

The school maintains an academic review policy that applies to all degree students in the school and that seeks to ensure academic standards of achievement (i.e., satisfactory performance in the field, satisfactory grades for academic course work, and reasonable rates of progress toward completion of degree requirements). The policy statement on academic review appears in the Student Handbook.

Academic Integrity Policy

The school also has an academic integrity policy that applies to all students and faculty members in the school and seeks to ensure that students and faculty members respect the ethical standards expected of them in the performance of their duties and responsibilities. The policy statement on academic integrity appears in the School of Social Work Student Handbook.

Statute of Limitations for School of Social Work Degrees and Leaves of Absence

MSW Program

There is a four-year limitation on the earning of the MSW degree. The four-year period is counted from the date of entry into the program for four full academic calendar years. Under extenuating circumstances (listed below), an advisor can recommend an extension of time to the MSW program director and the associate dean for academic affairs. If approved, the period of extension and the conditions for completing the program will be recorded in the student's folder, with a copy sent to the student. Extenuating circumstances include the following:

- extended illness of the student,
- extended personal emergency,
- involuntary mobilization into a U.S. military unit, and

- death of a close family member.

Under special conditions, MSW students may be granted one leave of absence. A maximum leave of one full academic year may be granted to master's students. A student wishing to take a leave of absence must submit in advance to the MSW program director a written request that indicates the length and rationale for the leave. The MSW program director and the associate dean for academic affairs will review the request. If approved, the time of the leave will not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

PhD Program

There is an eight-year statute of limitations for the completion of the PhD for students who enter with an MSW and who are not pursuing an MPH. There is a 10-year statute of limitations for students in the MSW/PhD program or the MPH/PhD program. Course work and the comprehensive examinations should be completed within three years and the dissertation within five. Under exceptional circumstances, a candidate for the PhD may apply for an extension of the statute of limitations. Requests for an extension of the statute of limitations must be submitted to the doctoral program director and must be approved by the doctoral committee and the dean. The request must be accompanied by a program assessment of the work required of the student to complete the degree and evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, doctoral students may be granted one leave of absence. A maximum leave of two academic calendar years may be granted to doctoral students. A student wishing to take a leave of absence must submit in advance to the doctoral program director a written request that indicates the length and rationale for the leave. The doctoral program director and the associate dean for academic affairs will review the request. If approved, the time of the leave will not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

NASW Code of Ethics

Professional ethics are at the core of social work. The profession has an obligation to articulate its basic values, ethical principles, and ethical standards. The NASW Code of Ethics sets forth these values, principles, and standards to guide social workers' conduct. The Code is relevant to all social workers and social work students, regardless of their professional functions, the settings in which they work, or the populations they serve. The NASW code of ethics can be viewed online at www.naswdc.org/pubs/code/default.asp.

Advising

Students are assigned a faculty advisor at the beginning of the student's matriculation into the MSW or PhD program. Students in the MSW program are assigned an advisor from among the faculty and professional staff. The assignment is made by the MSW program director and remains in effect until changed after a request by an advisor or advisee, as indicated by field assignment or program change, or due to a change in the advisor's assignment.

Special Academic Opportunities

The school offers several academic resources and programs for its students, as detailed below:

Student Participation on School Committees

Students have opportunities to participate in the governance of the School of Social Work by serving on school committees. Information about the purposes and functions of the committees is distributed during the beginning of each fall term. Through the Office of the Associate Dean for Admissions and Student Affairs, students can volunteer to serve on committees and become full members of those committees.

Student Executive Council (SEC)

All degree students in the School of Social Work comprise the membership of the student organization that elects the Student Executive Council. The council concerns itself with student life and serves as a liaison with the administration and faculty.

The Student Executive Council relies heavily on student participation and it endeavors to be of service to the student body. Activities include the publication of a student newsletter, the development of discussion sessions around critical social issues, the provision of opportunities for social action, the participation in planning for orientation, and the planning of a variety of social events.

In addition, SEC members, representing the student body, are appointed to serve in the following organizations and/or committees: Black Action Society; Student Chapter, NASW; Student Chapter, NABSW; Alumni Association (Liaison); BASW Club; and Graduate and Professional Student Association (GPSA).

The Student Executive Council is working to strengthen its involvement in diversity initiatives to benefit the student body. More information regarding the activities and goals regarding diversity initiatives will be published as they are created.

The Student Executive Council supports the MSW student body and welcomes any feedback from all students. The SEC Office is located in Room 2201B CL. Please reach us at our e-mail address at pitt.sec@gmail.com.

SEC's website can be found at: <http://www.socialwork.pitt.edu/student-resources/student-executive-council>

Buhl Library

The Buhl Library of Social Work is a special collection of books, journals, and other resource materials specifically focused on social work. The Buhl Library is located on the first floor of Hillman Library and is staffed by a full-time social work librarian. Additionally, students at the School of Social Work have full access to the wide range of services provided by the University of Pittsburgh library system.

School of Social Work Faculty

James Andrews, MSW Program Coordinator, University of Pittsburgh-Johnstown, MSW, Rhode Island College

Yodit Betru, Clinical Assistant Professor and Agency Coordinator, Child Welfare Education and Research Program, DSW, University of Pennsylvania

Jaime Booth, Assistant Professor, PhD, Arizona State University

Laura Borish, Field Assistant Professor and CWEB/CWEL Agency Coordinator, MSW, University of Pittsburgh

Cynthia K. Bradley-King, Clinical Assistant Professor and Academic Coordinator, Child Welfare Education For Baccalaureates (CWEB) Program, PhD, Indiana University of Pennsylvania

Helen Cahalane, Clinical Associate Professor, Principal Investigator, Child Welfare Education and Research Programs; PhD, University of Pittsburgh

Keith Caldwell, Assistant Professor, BASW Program Director, MSW, University of Pittsburgh

Valire Carr Copeland, Associate Dean for Academic Affairs, School of Social Work, Graduate School of Public Health, PhD, University of Pittsburgh

Larry Davis, Director, Center on Race and Social Problems and Donald M. Henderson Chair, PhD, University of Michigan

Shaun M. Eack, Professor of Social Work and Psychiatry, James & Noel Browne Endowed Chair, Associate Dean for Research, PhD, University of Pittsburgh

Stephanie Eckstrom, Program Coordinator, Pitt-Bradford MSW Program, MSW, University of Maryland At Baltimore

Rafael J. Engel, Associate Professor, Associate Dean of Academic Affairs, PhD, University of Wisconsin at Madison

Elizabeth M.Z. Farmer (Betsy), Dean, PhD, Duke University

Sara Goodkind, Associate Professor, PhD, University of Michigan

Catherine Greeno, Associate Professor, Social Work, Department of Psychiatry, PhD, Stanford University

James Huguley, Assistant Professor, EdD, Harvard University

Leah Jacobs, Assistant Professor, PhD, University of California at Berkeley

Toya Jones, Lecturer, MSW, University of Pittsburgh

Brianna Lombardi, Assistant Professor, PhD, University of North Carolina at Chapel Hill

Aaron R. Mann, Associate Professor, PhD, University of Pittsburgh

Elizabeth Mulvaney, Lecturer, MSW, University of North Carolina at Chapel Hill

Christina Newhill, Professor, PhD, University of California at Berkeley

Mary L. Ohmer, Associate Professor, PhD, University of Pittsburgh

Marlo Perry, Research Assistant Professor, Child Welfare Education and Research Programs, PhD, University of Pennsylvania

Helen Petracchi, Associate Professor, PhD, University of Wisconsin at Madison

Mary Elizabeth Rautkis, Research Assistant Professor, PhD, University of Pittsburgh

Daniel Rosen, Professor, PhD, University of Michigan

Jeffrey Shook, Associate Professor, Doctoral Program Director, PhD, University of Michigan

Tracy Soska, Clinical Associate Professor, COSA Chair, and Director, Continuing Education, MSW, University of Pittsburgh

Fengyan Tang, Professor, PhD, Washington University in St. Louis

John Wallace, David E. Epperson Chair and Professor, School of Social Work, Katz School of Business, Department of Sociology, and Dietrich School of Arts & Sciences, PhD, University of Michigan

Darren Whitfield, Assistant Professor, School of Social Work and Department of Psychiatry, Direct Practice Chair, PhD, University of Denver

Liz Winter, Clinical Assistant Professor and Academic Coordinator, Child Welfare Education for Leadership, PhD, University of Pittsburgh

Hidenori Yamatani, Professor, PhD, University of Pittsburgh

Program and course Offerings

Master of Social Work Program

The leadership required from social work professionals demands an MSW practitioner who possesses a repertoire of specialized knowledge and skills and whose practice is informed by the values and ethics of the profession. Social workers in the 21st century confront a variety of new challenges, as well as many that have long existed. MSW practitioners, who work with and on behalf of individuals, families, groups, organizations, and communities, are faced with the need to develop innovative interventions in a rapidly changing practice environment. Such new, creative solutions to society's problems will be realized only if social work professionals have had a rigorous and thorough education. The goal of the MSW program is to prepare graduates with the specialized knowledge and skills needed to engage in empirically supported and culturally competent advanced social work practice—either direct practice with individuals, families, and small groups, or community organization and social administration—that reflects the social work profession's values, traditions, and philosophy. To accomplish this goal, the MSW program faculty have identified specific program objectives. Graduates of the MSW program will be able to:

- Demonstrate Ethical and Professional Behavior
- Engage Diversity and Difference in Practice
- Advance Human Rights and Social, Economic, and Environmental Justice
- Engage In Practice-informed Research and Research-informed Practice
- Engage in Policy Practice
- Engage with Individuals, Families, Groups, Organizations, and Communities
- Assess Individuals, Families, Groups, Organizations, and Communities
- Intervene with Individuals, Families, Groups, Organizations, and Communities
- Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities

MSW Admissions

<http://www.socialwork.pitt.edu>

The following section details admissions information particular to applicants to the MSW program.

Persons seeking admission to the Master of Social Work (MSW) program must exhibit the leadership potential and professional capabilities essential to function effectively in the profession and must meet minimum academic requirements. An applicant must meet the following requirements:

- A bachelor's degree from an accredited college or university.
- It is recommended that all new applicants have a minimum of a B average (3.00 GPA on a 4.00 scale) in all undergraduate work. Applicants whose GPA is below 3.00 may be considered for admission under provisional status (see <http://www.socialwork.pitt.edu/admissions/msw/admission-qualifications>).
- It is recommended that all MSW applicants have a minimum of 60 undergraduate (or undergraduate plus graduate) credits in the liberal arts, of which 30 credits must be in the social and behavioral sciences and 30 credits must be distributed between the humanities and natural sciences. Course credits are counted from among the following:
 - The Humanities: English, fine arts, languages, literature, philosophy, religious studies, speech.
 - Social and Behavioral Sciences: anthropology, black studies, child development, economics, geography, history, legal studies, political science, psychology*, social
 - Natural Sciences: biology, computer science, mathematics, psychology*, statistics.
- *Note: Psychology courses may be counted as either natural or social science credits.
- Successful completion of a course in descriptive statistics.

Academic and field education credits are not granted in the MSW program for life, volunteer, or employment experience.

Readmission

Persons who were once enrolled as degree students in the graduate program and who have voluntarily withdrawn from the program for more than one year must submit an application for readmission. The application process in these instances is the same as for new applicants. The statute of limitations may prevent the student from applying some graduate credits already completed as progress toward graduation.

Application and Admission Materials

Completed applications include the school online application form, transcripts, three letters of reference, a written statement, a resume, an agreement to participate in field education form and a \$40 application fee. Applicants may request an interview, but this is not required. The director of admissions and student affairs may also request an interview.

Applications and other admissions information are available from:

Office of Admissions
 School of Social Work
 412-624-6302
 E-mail: sswadmissions@pitt.edu

Online applications are accepted at:
<http://www.socialwork.pitt.edu/admissions/msw/application-process>

Application materials may also be downloaded from the School of Social Work Web site or applications may be completed directly online. These materials are available at www.socialwork.pitt.edu/admissions/.

Selection of Skill Concentration

Applicants are required to designate one skill concentration chosen from either Community, Organization, and Social Action (COSA) or Direct Practice with Individuals, Families, and Groups. The appropriateness of the concentration selection is evaluated on the basis of the applicant's resume and written statement. If the applicant is uncertain about which concentration to select, the matter should be discussed with the director of admissions before an application is submitted.

Students indicate in their application to the MSW program the skill concentration they intend to complete. To request a change to these concentrations after beginning the MSW program, students must show that the change would contribute directly to their educational goals and career plans. Students also must be able to demonstrate in a projected plan of study that they will be able to complete all classes and field requirements in the new skill concentration within four years of their date of entry into the MSW program, as specified by the Council on Social Work Education. Such requests should be made and finalized during registration for the second semester of matriculation for full-time students and the third semester of matriculation for part-time students.

Admissions Interview

Admissions interviews may be initiated by the admissions officer of the school in some special circumstance. Decisions on applications for admission are usually made without such an interview. All applicants are welcome to seek information-sharing interviews.

Financial Assistance for MSW Students

The University of Pittsburgh School of Social Work recognizes that financing graduate education is extremely important, especially because the cost of higher education continues to increase each year. Please note that it is the University's Financial Aid Office that administers the process of awarding loans to graduate students. The School of Social Work awards scholarships and a limited number of training fellowships to its master's level students and scholarship and assistantships to its PhD students.

Financial aid is not awarded to any student until admission to the School has been granted. Early application for merit-based scholarship aid is strongly encouraged.

Students applying for financial aid must complete the Free Application for Federal Student Aid (FAFSA) form. Pitt's federal school code is **008815**. The FAFSA form is not available until January for those applying for the next academic year.

MSW Degree Requirements

The MSW curriculum is designed to be a two-year, full-time program. The MSW degree requires the satisfactory completion of a minimum of 60 credits—42 in class work and 18 in field practice—with a minimum GPA of 3.00. Although MSW students must take their required courses for a letter grade, elective courses offered and taken in the graduate program of the School of Social Work may be taken for a letter grade or an H/S/U grade. All graduate field instruction courses shall be taken for S/NC grades. No student will be permitted to graduate with a C, F, or U grade in a required course or an NC grade in the field practicum. Specific requirements for each of the skill concentrations are detailed in the student handbook and on the school's Web page, <http://www.socialwork.pitt.edu/academics/policies-handbooks>.

MSW Academic Standards: Probation

A student in the MSW program will be placed on academic probation if:

- after completing at least nine (9) quality point credits, the student's cumulative GPA falls below 3.00;

- the student receives a grade lower than a B- in a required course (including the five foundation courses, the required concentration skill courses, the second-level human behavior, policy, and research courses, and any specific courses needed to fulfill specialization or certificate requirements), or
- the student receives an NC grade for field placement (SWGEM 2009, SWINT 2009, or SWCOSA 2009).

The MSW program director will send a letter to the student and the student's advisor notifying them of the student's placement on academic probation. The letter will advise the student and the student's advisor of the date and location of an academic review meeting, to be convened by the MSW program director, to discuss the terms of the student's academic probation. A copy of this letter will be placed in the student's folder. Depending on the outcome of the meeting, a student placed on academic probation may be required to modify the student's course of study in the MSW program, including changing the academic courses for which the student is registered and/or delaying entry into or suspending field placement.

Part-Time MSW Students

Students pursuing a part-time course of study must complete the MSW degree in four academic years. Part-time students are expected to take their foundation courses (the equivalent of the first fall term for full-time students) on a part-time basis during the first year and then begin concentration courses and field instruction, on either a part-time or a full-time basis. Part-time students who have completed 21 credits of course work must begin their first field placement; enrollment in further courses after 21 credits is contingent on the initiation of the field placement. Part-time students doing field instruction must complete a minimum of 12 clock hours each week, with at least eight of those hours done during the regular work day of the agency. In order to earn their MSW degree in four years, all part-time students must recognize that they will need to enroll for a minimum of two courses per term in each of the three terms during the academic year. The following options are acceptable:

- Two courses (3 credits per course) *or*
- One course (3 credits) plus a minimum of 3 field credits *or*
- A minimum of 6 field credits (equivalent to two courses)

Advanced Standing and Exemptions for MSW Course Work

Students entering the MSW program may be granted advanced standing, receive transfer credit, or be exempt from specific course requirements if their coursework was completed within the past 7 years. The definition for each is:

Advanced Standing is defined as the awarding of academic credit toward a degree by the School of Social Work for prior baccalaureate course or field work completed at an undergraduate social work program accredited by the Council on Social Work Education when such work is evaluated as entirely comparable. A maximum of 12 course credits and 6 field work credits may be considered.

Transfer Credit is defined as the awarding of academic credit toward a degree by the School of Social Work for post-baccalaureate course or field work completed at an accredited academic institution when such work is evaluated as entirely comparable.

Exemption is defined as the waiving of a required academic course by the School of Social Work following an evaluation of the student's previous course work that is determined to be essentially identical to the required course being waived. Such an exemption does not, however, reduce the number of credits required for graduation.

Specific details and limitations regarding this policy and related procedures are described in the Student Handbook and on the School of Social Work Web site, <http://www.socialwork.pitt.edu/academics/policies-handbooks>.

Consistent with the Council on Social Work Education's (CSWE's) Educational Policies and Accreditation Standards, the School of Social Work's MSW program does not grant advanced standing, transfer credit, or exemption for prior life, volunteer, or employment experience.

Organization of the MSW Curriculum

The MSW program entails both class and field requirements distributed across foundation and skills concentration curricula. The MSW foundation curriculum is the same for all MSW degree students. All students must complete the school's designated class and field requirements for one of two skills concentrations: Community, Organization, and Social Action (COSA) or Direct Practice with Individuals, Families, and Groups. Students must complete the MSW Foundations requirements before being permitted to take concentration courses.

A change in concentration after matriculation is not advisable. (*See Selection of Skill Concentration for further details on changing concentrations.*)

Certificate

Children, Youth and Families Certificate

The Children Youth and Families Certificate is designed to prepare graduates of the MSW program to provide services to at-risk children and families through a wide range of public and private agencies. Through specialized coursework and internship opportunities, students are prepared for professional practice in settings such as family service agencies, child protection, the courts, early intervention, community-based treatment, and other child and family-focused programs. The Children, Youth and Families Certificate is awarded by the School of Social Work, and provides students with the opportunity to enhance professional competency in providing services to young persons and their families.

Gerontology Certificate

The Certificate Program in Aging has been in place since 1980 and continues to attract numerous MSW students. The goals of the Gerontology Certificate program are to enhance students' understanding of the aging process and to provide them with the skills relevant to practice with and/or on behalf of the elderly and their family members. Knowing how to work with the elderly as a social work professional offers many opportunities in an era when that segment of the population continues to increase steeply.

Through courses and the field placement experience, Gerontology Certificate students are exposed to the various roles and settings that constitute contemporary social work practice in aging. Emphasis is given to understanding client and family strengths; diversity among the aged population; the social, cultural, community, and policy contexts of aging; and how these factors inform, and may be influenced by, social work practice. Gerontology Certificate students are encouraged to apply to the Hartford Program Partnership in Aging Education Fellowship.

Home and School Visitor Certificate

Since the 1930s, the School of Social Work has offered a Home and School Visitor/School Social Worker certificate. The program was started by pioneering social work practitioner and educator Marion Hathway. The H&SV/SSW is an interprofessional Educational Specialist certificate program, operated jointly with the University of Pittsburgh School of Education and the Pennsylvania Department of Education, and is intended for students who plan to deliver social work services in elementary or secondary schools. There are three models for certification:

- Certification earned while earning the MSW
- Certification earned post-MSW
- Certification earned without an MSW

The H&SV/SSW certificate program is designed to enhance professional competency in the development and delivery of high quality social work services to diverse student populations in both public and private elementary and secondary schools. The certificate program is organized around the Direct Practice concentration and offers students the opportunity to gain advanced knowledge and skills via courses taken in the Schools of Social Work and Education and a field placement in an educational setting.

For further information, please contact Deborah Robinson, MSW, LSW, Director, dcrl6@pitt.edu.

Home and School Visitor/School Social Worker Certificate

The Home and School Visitor/School Social Worker (H&SV/SSW) certificate, a joint effort with the University of Pittsburgh School of Education that is accredited by the Pennsylvania Department of Education, prepares students for professional practice in both public and private educational settings throughout Pennsylvania. The H&SV/SSW certificate program is designed to enhance professional competency in the development and delivery of high-quality social work services to diverse student populations in elementary and secondary schools.

Human Services Management Certificate

Many MSW's often find themselves moving up quickly into supervisor, management, and even executive positions. The generalist perspective and systems knowledge from their social work education provides a strong basis for leadership growth in a range of social work settings. However, to better prepare macro practice/COSA students to take advantage of leadership opportunities and enhance their personal and professional development, the School now offers the Human Services Management Certificate in collaboration with the Network of Social Work Management under a new University partnership initiative.

This national Human Services Management Certificate can be completed by COSA students in the course of their MSW studies. Students pursuing this certification option must complete twelve credits through the following COSA core and skill electives course work covering Network of Social Work Management (NSWM) competency and practice behaviors in the areas of:

- Social Administration/Human Services Management
- Community Organizing (Community Collaboration)
- Human Resources & Financial Management with Supervision
- Grants, Proposals, and Funding Development

COSA students are encouraged to take other skill electives in COSA, as well as skills courses in other schools. For more information on the NSWM competencies: <https://socialworkmanager.org/competencies>

In addition, COSA student in Social Administration/Human Service Management must also complete a COSA concentration field placement (12 credits) in a community-based or human services organization to apply their course knowledge, values, and skills in the organizational setting.

For more information on the Human Services Management Certificate, please contact the Community Organization, and Social Action Concentration Chair, Tracy M. Soska, at 412-624-3711 or tsssw@pitt.edu.

Integrated Healthcare Certificate

The Integrated Healthcare Certificate Program prepares graduate social work students specializing in direct practice with the knowledge and skills necessary to work with individuals, families, groups, and communities in a variety of institutional and community-based health-related settings. With a focus on leadership and advocacy, the goal of the certificate program is to increase the number of students focused on health and social work. Master's level social work training (MSW), along with a Certificate in Integrated Healthcare, provides the knowledge and skills to work in a variety of integrated healthcare settings. Students completing the Integrated Healthcare Certificate Program will have a deeper understanding of the relationship between behavioral health (e., mental health, substance use) and physical health. New opportunities abound in health care for social workers trained in an interdisciplinary approach who are prepared to bridge the gap between health care providers and patient needs within a coordinated system of care.

Students interested in integrated healthcare may also apply for the Edith Baker Behavioral Healthcare Fellowship, a competitive program that will provide successful applicants with stipends of \$10,000 during their concentration field placement

For more information regarding this fellowship, please e-mail BHWET@pitt.edu.

Mental Health Certificate

The Certificate in Mental Health is designed to prepare MSW graduates for professional practice with individuals, families, and/or groups with mental and/or behavioral health challenges through a wide range of social and human service agencies. Students in the MSW Program take a series of required and elective courses leading to the Certificate in Mental Health within the normal MSW requirements and need not exceed the length of the degree program. Direct practice social workers in mental health services have a wide array of career opportunities across a range of public and private settings, including psychiatric inpatient services, outpatient psychotherapy services, child and family services, partial hospitalization and case management services, drug and alcohol services, and private practice.

Joint Degree

Social Work, MSW/MBA

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the Joseph M. Katz Graduate School of Business.

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students. Upon successful execution of this initiative, the school plans to open the program to all MSW full-time students (COSA and Direct Practice students).

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools. Specific questions may be addressed to:

Dr. Hide Yamatani, Ph.D., MSW, MBA
School of Social Work
University of Pittsburgh
2117 Cathedral of Learning
Pittsburgh, PA 15260
Email address: hzy@pitt.edu

Requests for further information concerning the Katz Graduate School of Business, see <http://www.business.pitt.edu/katz/>. Specific questions may be addressed to:

Dr. Rabikar Chatterjee, Ph.D.
Associate Dean
Katz Graduate School of Business
University of Pittsburgh
301 Mervis Hall
Pittsburgh, PA 15260
Email address: rabikar@katz.pitt.edu

MSW/MBA Joint Degree Admissions Criteria

- SSW Requirement
- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.
- Undergraduate students with social work and human service backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Paid work experience is preferred but not required.
- GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business (KGSB), by the admission deadline.
- Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.
- Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
- Applicants will submit their current resume.
- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)-- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.

- Non-refundable application fee is \$40.
- Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.
- Submission of online MSW application form by the admissions deadline date of **May 31**.
- Katz GSB Requirement
- A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.
- Undergraduate students with strong analytical backgrounds are preferred.
- In general, we would expect an undergraduate GPA of 3.0 or better for admission.
- International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
- Work experience is not necessary, though highly desirable.
- GMAT/GRE scores: Applicants must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business, by the admission deadline. In general, we would expect a GMAT score of 600 or higher for admission. (Corresponding GRE scores will be equivalent to these levels, after conversion.).
- Applicants will submit a 250 word essay describing their post-graduate career goals, skills in which they excel, and key accomplishments.
- Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
- Applicants will submit their current resume.
- English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
- TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
- IELTS Minimum acceptable score: 7.0
- \$50 non-refundable application fee.
- Prospective candidates, domestic or international, may be interviewed before admission, in person or by Skype.

Learning outcome goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

- Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.
- Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.
- Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.
- To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program requirements

- A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.
- The MBA program requires 51 credits for the part-time or one-year program, of which at least 34 credits must be from KGSB courses, while the balance maximum of 17 credits may be from other graduate programs.

Core Courses

The following MBA "core" courses (total of 22. 5 credits) are required:

- BACC 2401 - FINANCIAL ACCOUNTING

- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE

Program requirements

- All MSW/MBA joint degree students will be required to take at least 34.5 credits of KGSB credits, consisting of the above 22.5 credits of core courses plus an additional 12 credits of KGSB electives. Thus, up to 16.5 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 51 credits required for the completion of the Katz MBA degree.
 - All MSW/MBA joint degree students will be required to take a course entitled Social Entrepreneurship (1.5 credits) from the KGSB.
 - The following KGSB courses will count as credits towards the MSW degree:
 - BACC 2401 - FINANCIAL ACCOUNTING (3 credits) will qualify as equivalent to SWCOSA 2085 - FINCL MGT HUMAN SERVICE INSTITNS (3 credits), and will count as 3 credits for both the MSW and MBA programs,
 - BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS (1.5 credits) and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
 - SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS, 3 credits), which will count as 3 credits for both the MSW and MBA programs, and
 - SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g., BIND 2444 - MANAGEMENT SIMULATION CAPSTONE, 3 credits), which will count as 3 credits for both the MSW and MBA programs.
- Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two degree programs separately.

- It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will count towards completion of the MSW program.
- Thus, full-time COSA students with advanced standing must earn grand total of 64.5 credits for CO students, and 61.5 credits for SA students (adding all MSW and MBA courses). This means total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.
- Full-time COSA students **without** advanced standing must earn grand total of 85.5 credits for CO students, and 82.5 credits for SA students (adding all MSW and MBA courses). This means total of 51 social work credits to be taken by CO students and 48 credits to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

Master's

Social Work - Community, Organization, and Social Action Concentration, Community Organization Track, MSW

Community, Organization, and Social Action (COSA) Concentration Curriculum Requirements

COSA offers concentration courses in Human Behavior and the Urban Environment, Organizational Policy Analysis, and a social work research course related to either of the two COSA specialization tracks from which students may choose: Community Organization or Social Administration. Students must take one of the required specialization core skill courses; however, many students prefer to pursue both COSA specializations. Students fulfill their remaining credits from a range of COSA skill elective courses, which include such topics as Supervision and Personnel Management, Financial Management, Public Relations/Marketing, Issue-Based Organizing, Community and Economic Development, and Grants, Proposals and Social Work, Social Work and the Law, and Race and Social Problems. Students may also pursue elective courses in other related professional schools. All students must complete six credits of foundation field work followed by twelve credits of concentration field placement in a range of organizational settings across an array of social work issues and program areas.

Required Skill Courses

- SWCOSA 2084 - INTRODUCTION TO SOCIAL ADMINISTRATION
- SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING

Second-Level HBSE Course

- SWBEH 2008 - HUMN BHVR: URBAN ENVIRONMENT

Second-Level HBSE Course

- SWWEL 2087 - ORGANIZATIONS AND PUBLIC POLICY

Second-Level Research Course

Select one of the two courses below based on your specialized track (CO or SA)

- SWRES 2009 - ORGANIZATIONAL AND COMMUNITY DEVELOPMENT RESEARCH (SA)
- SWRES 2023 - DIRECTED STUDY IN RESEARCH (CO)

Electives and Field Placement

- COSA Skill Electives - 6 credits (two courses related to CO or SA track - see below)
- General Electives - 6 credits
- SWCOSA 2099 - FIELD WORK - 12 credits (related to CO or SA track)

Community Organizing Electives

- SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION
**
- SWCOSA 2092 - ORGANIZING FOR COMMUNITY CHANGE: ISSUE, LABOR AND POLITICAL ORGANIZING
- SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT

Note:

**Courses required for Human Services Management Certificate (COSA or DP)*

*** Courses can count for either Social Administration or Community Organizing*

Social Work - Community, Organization, and Social Action Concentration, MSW

Foundation Requirements

All MSW students must complete the MSW Foundation requirements listed below before being permitted to take concentration skill courses; second-level human behavior and the social environment, social welfare, or research courses; skill electives; and concentration field practicum, unless they are exempted via Advanced Standing credit or examination or an academic plan that is approved by the advisor and the program director.

The foundation course requirements (15 credits total) are:

- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRONMENT
- SWWEL 2081 - SOCIAL WELFARE
- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS

Note:

In addition to the five courses listed above, students must complete 6 credits of Foundation Field Work. Students entering with advanced standing may be exempted from part or all of the Foundation Field Work requirement.

Skill Concentration Curricula

Upon completion of the foundation requirements, students begin course work in either of the two skill concentrations: Direct Practice with Individuals, Families, and Groups or Community, Organization, and Social Action (COSA). In each skill concentration, students can opt to choose a University of Pittsburgh certificate program, or a School of Social Work certificate program.

Community, Organization, and Social Action

The Community Organization and Social Action (COSA) concentration prepares socially active and civically engaged students for leadership careers in community service, community change, and community development organizations. Students can pursue specialized course work along one of two tracks-community organization or social administration-but many prefer to combine studies in both specialization areas. Many courses incorporate service learning and applied research that draw on field internships to enhance learning experience and build a professional portfolio. The COSA concentration also provides opportunities for networking with other students through a COSA student group and with faculty, field faculty, alumni, and seasoned community leaders from the greater Pittsburgh region, both in the field and at the school. Information about curriculum requirements is available on the school's Web site, <http://www.socialwork.pitt.edu/academics/msw/concentrations/cosa>

MSW students in the COSA concentration can elect as part of their graduate studies to obtain a certificate in human service management.

Information about the human services certificate program is available on the school's Web site, <http://www.socialwork.pitt.edu/academics/msw/concentrations/direct-practice/certificates/human-services-management>

Second-Level Research Course

Select one of the two courses below based on your specialized track (CO or SA)

- SWRES 2009 - ORGANIZATIONAL AND COMMUNITY DEVELOPMENT RESEARCH (SA)
- SWRES 2023 - DIRECTED STUDY IN RESEARCH (CO)

Electives and Field Placement

- COSA Skill Electives - 6 credits (two courses related to CO or SA track - see below)
- General Electives - 6 credits
- SWCOSA 2099 - FIELD WORK - 12 credits (related to CO or SA track)

Social Administration Electives

- SWCOSA 2040 - GRANT PROPOSAL WRITING */**
- SWCOSA 2053 - COMMUNICATIONS AND PUBLIC RELATIONS
- SWCOSA 2054 - LEADERSHIP ** (*cross-listing with GSPIA*)

Note:

**Courses required for Human Services Management Certificate (COSA or DP)*

*** Courses can count for either Social Administration or Community Organizing*

Social Work - Direct Practice with Individuals, Families, and Groups Concentration, MSW

Foundation Requirements

All MSW students must complete the MSW Foundation requirements listed below before being permitted to take concentration skill courses; second-level human behavior and the social environment, social welfare, or research courses; skill electives; and concentration field practicum, unless they are exempted via Advanced Standing credit or examination or an academic plan that is approved by the advisor and the program director.

The foundation course requirements (15 credits total) are:

- SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH
- SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRONMENT
- SWWEL 2081 - SOCIAL WELFARE
- SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE
- SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS

Note:

In addition to the five courses listed above, students must complete 6 credits of Foundation Field Work. Students entering with advanced standing may be exempted from part or all of the Foundation Field Work requirement.

Skill Concentration Curricula

Upon completion of the foundation requirements, students begin course work in either of the two skill concentrations: Direct Practice with Individuals, Families, and Groups or Community, Organization, and Social Action (COSA). In each skill concentration, students can opt to choose a University of Pittsburgh certificate program, or a School of Social Work certificate program.

Direct Practice with Individuals, Families, and Groups

Direct practice skills form the basis of service in family and children's agencies, mental health and mental retardation programs, health services, work with juvenile delinquents and adult offenders, and substance abuse treatment. Through course work and field practicum, students in the direct practice concentration acquire the knowledge and skills needed to engage in direct practice with diverse populations of individuals, families, and small groups. Practice approaches include psychodynamic-psychosocial, cognitive-behavioral, and social systems. Consistent with an emphasis on client strengths and the values and traditions of the social work profession, students become skilled at mobilizing a variety of formal and informal support systems to assist clients in addressing their needs and realizing their potential.

Direct practice certificates entail a specific array of courses and field placement experiences that permit students to tailor their education and professional preparation.

Six certification programs are available to direct practice students. Direct practice students in the MSW program can elect to pursue a certificate in:

- Children, Youth and Families Certification (School of Social Work Certificate)
- Gerontology (University of Pittsburgh Certificate)
- Home and School Visitor (School of Social Work, School of Education, and PA Department of Education Certificate)
- Integrated Health Certificate (University of Pittsburgh Certificate)
- Mental Health Certification (School of Social Work Certificate)

Students are not required to pursue a certificate. Those who choose to do so, must declare their choice of a certificate program no later than the end of the first term of full-time study. Individuals intending to complete the Home and School Visitor certificate must declare their interest in their application for admission to the MSW program. Information about curriculum requirements, specialization, and certificate programs are available on the school's Web site, <http://www.socialwork.pitt.edu/academics/msw/concentrations/direct-practice>

Electives:

Social Work, MSW

MSW Degree Requirements

The Master of Social Work (MSW) degree can be completed in two academic calendar years of full-time study and requires the satisfactory completion of a minimum of 60 credits-42 class and 18 field practicum. Candidates for the MSW degree must demonstrate successful completion of the required foundation courses, concentration-specific courses, and field practicum, and must have a minimum overall GPA of 3.00.

Doctorate in Social Work Program

Social work doctoral education prepares people for leadership roles in social work research, social work education, social policy and planning, and administration. The goal of the doctoral program of the School of Social Work is to provide students with advanced research and policy analysis skills based on a foundation of social science theory and social welfare. The doctoral program is committed to the school's mission to address human worth and dignity, social justice, and social equity for diverse populations. Program graduates will be able to conduct research that addresses social work and social welfare and policy problems and to disseminate knowledge to researchers, social work educators, social work practitioners, and policy makers.

The University of Pittsburgh has one of the oldest social work doctoral programs in the United States, awarding its first DSW degrees in 1949. In 1963, the program's degree was changed to a PhD. Information regarding the Doctor of Philosophy Program is available online at www.socialwork.pitt.edu/academic-programs/phd/.

In addition to the description of the PhD in Social Work given below, doctoral students should consult the Regulations Pertaining to Doctoral Degrees in the General Academic Regulations section of this document.

www.socialwork.pitt.edu

Applications should be received no later than December 31 of each year. Admission to the program is on a full-time basis for the Fall Term only. The doctoral program is strongly committed to a policy of equal educational opportunity for people of all races, creeds, and ethnic origins.

Program Transfer Credits

Students who have earned doctoral-level credits at the University of Pittsburgh or at another accredited institution within seven years preceding entry to the doctoral program may be eligible for advanced standing. Advanced standing consists of awarding academic credit toward the degree for post-master's work completed when such work is evaluated as entirely comparable. Official transcripts certifying graduate course work completed in a degree-granting graduate program should be submitted at the time of application. The maximum number of credits that can be transferred and accepted for advanced standing is 12.

Financial Support for Doctoral Students

Financial Support for Doctoral Students Doctoral students are supported in years one and two by research-based graduate student assistantships (GSAs), and in years three and four by teaching assistantships (TAs). Exceptional students with teaching experience and two years post -MSW experience may apply for our teaching fellowships (TFs). Both GSAs and TAs/TFs provide tuition remission and stipends for the fall, spring, and summer terms. There is a 20-hour-per-week work requirement.

Typically the student receives their GSA or TA support for four years as long as the student is making satisfactory progress toward the degree. If a fifth year is required, it usually is supported by adjunct teaching. Students also are encouraged to apply for predoctoral research traineeships and other awards.

Doctoral Curriculum Objectives

The program curriculum strongly emphasizes social problem areas, as well as coordinating themes in theory, research methodology, and social policy courses. The overall goal is to integrate the acquisition of basic advanced knowledge, methods of empirical testing, and application to real-world situations. Course materials draw heavily on several priority areas of social work concern, including aging, mental health, income maintenance, child welfare, women's issues, child and family policy, and health services, and social justice. diversity issues.

By the time students have completed the program, they should have acquired the following:

- Knowledge of relevant social science theory
- Advanced skills in research methodology and statistics
- Advanced knowledge of social welfare policy (historical and contemporary) and policy analysis
- Knowledge of relevant fields of practice, theoretical and policy perspectives, and research findings
- Exposure to an interdisciplinary frame of reference through mechanisms provided internally by the doctoral program and externally through access to other disciplines and professions in the wider University

Although entering students are not required to have completed course work or other experience relevant to computer literacy, possessing basic computer skills will be an asset to students beginning the program.

Doctoral

Social Work, PhD

PhD Degree Requirements

The PhD program requires 10 core courses, one policy elective, plus a minimum of five electives, which may be 2-, 3- or 4-credit courses. During their first year, all students are required to take the Doctoral Seminar (0 credits). Students will spend two years meeting their course requirements. Full-time status is defined as nine or more credit hours per semester. Fifty (50) credit hours must be completed before students are permitted to take the comprehensive examination.

Doctoral Requirements

During the first two academic years in the program, full-time students are primarily involved in taking the required courses in the four essential areas of study: social welfare, social science theory, research methods, and social policy. Students take courses in the fall and spring terms of their first and second years; summer courses are necessary if a student is enrolled in one of our joint degree programs or desires a nine-credit schedule for the fall and spring terms.

Curriculum

Courses are taken in the fall and spring terms during the student's first and second years; summer courses are needed if a student desires a nine-credit schedule for fall and spring terms and/or is enrolled in one of the joint degree programs (no more than 12 credits are recommended for the student's first semester in the program). Learn more about our curriculum.

Comprehensive Examination

Students take a comprehensive examination after completion of all required and elective courses. The Comprehensive examination is taken in the summer of the second year. For students in the MSW/PhD program, the comprehensive examination is taken in the summer of the 3rd year.

Doctoral Dissertation

The doctoral dissertation involves:

- Dissertation Research: begins after passing the comprehensive examination
- Defense of a Dissertation Overview: occurs after a committee review of the dissertation overview and includes an introduction to the problem, a literature review, and a detailed methodology (admission to PhD candidacy)
- Final Dissertation Defense: occurs at least one year following admission to candidacy

Grades in Course Work

It is required that students will maintain an average grade point average of 3.00 or better in all course work. If a student receives a grade lower than B- in a required course, the course will have to be repeated. Whether the courses are required or elected, more than one grade of C+ or lower will be the basis for a formal Academic Review.

Program Flexibility and Individualization

An individual student's program should reflect the student's developing professional expertise, career goals, and personal interest. This program, therefore, maintains as much flexibility and individualization as possible.

This individualization is built upon the core curriculum through planning for elective course work and enrichment experiences, including teaching and research assistantships. The PhD program provides a set of structured and integrated core courses that can be applied to each students' area of specialization. This core curriculum is supplemented by six elective courses that allow students to obtain more depth in their specialization areas. Faculty advisors work closely with students in planning their course work and progress through the doctoral program.

A minimum of three years of full-time study is required for doctoral program completion. The curriculum is distributed between a nine-course core curriculum and elective courses followed by the comprehensive examination and doctoral dissertation.

Core Doctoral Curriculum

During the first two academic years in the program, students are primarily involved in taking the required courses in the four essential areas of study: social welfare, social science theory, research methods and statistics, and social policy. These core courses are provided by the doctoral program. A brief description of each area of study follows with a listing of credits awarded and terms offered. All 1st year students are required to take the non-credit Doctoral Seminar. More information on each doctoral course is available in the Student Handbook.

Required (Core) Courses

Research Methods (17 total credits)

- SWRES 3020 - RESEARCH METHODS 1

- SWRES 3029 - INFERNTL STAT SOCL WORKERS
- SWRES 3021 - MULTIVARIATE ANALYSIS
- SWRES 3022 - RESEARCH METHODS: CAPSTONE SEMINAR 1
- SWRES 3023 - RESEARCH METHODS: CAPSTONE SEMINAR 2
- SWRES 3066 - SEMINAR IN SOCIAL WORK EDUCATION - 3 credits
- Doctoral Seminar - 0 credits

Theory (6 total credits)

- SWGEN 3044 - THEORY 1
- SWGEN 3053 - THEORY 2

Policy (6 total credits)

- SWWEL 3030 - EVAL OF AMERICAN SOCIAL WELFARE
- SWWEL 3037 - SOCIAL POLICY ANALYSIS

Elective Courses (21 credits)

In addition to the above core course requirements, the student selects seven elective courses to pursue more specialized interests. All electives must be at least 2 credit graduate level courses with a credit total = 21 credits. Elective options available in the program, including the Joint Public Health Master's/Social Work PhD option and the graduate certificate in women studies offer particular advantages but tend to restrict the number of electives open to students. Although some doctoral elective courses are offered within Social Work, students are encouraged to take relevant course work in other schools and departments of the University. Many social welfare-related fields are open: sociology, economics, women's studies, political science, law, urban affairs, public health, and others. The student can choose his or her courses from all graduate programs in the University. The students may take no more than two MSW courses for elective credit. All electives must be approved by the student's advisor as contributing to the student's area of specialization.

Interdisciplinary Components of Doctoral Curriculum

In addition to the core doctoral courses, the student has seven elective course selections to pursue more specialized interests. Certain options available in the program, especially the Joint Public Health Master's/Social Work PhD option and the graduate certificate in women's studies, offer particular advantages but tend to restrict the number of electives open to students. Students are encouraged to take graduate-level course work in other schools and departments of the University insofar as this is feasible within their program requirements. Many social welfare-related fields are open: sociology, economics, women's studies, social psychology, political science, law, urban affairs, public health, and others. The student can choose his or her courses from all graduate programs in the University. The student may take no more than two MSW courses as electives.

Cooperative Degrees Program

<http://www.socialwork.pitt.edu/academics/master-social-work-msw>

In addition to the MSW and PhD degrees, graduate students in the School of Social Work have the opportunity to select from several unique dual degree programs. MSW students can avail themselves of one of the eight joint or cooperative degree programs; two joint degree programs are available to PhD students.

Detailed below are joint degree programs offered by the School of Social Work in tandem with the Graduate School of Public and International Affairs, the Graduate School of Public Health, the School of Law, the School of Education, the School of Business, and the Pittsburgh Theological Seminary.

MSW/Master of Public Administration, MSW/Master of Public and International Affairs, and MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

MSW/Master of Public Health program

The MSW/MPH program requires a three year curriculum plan. Students will complete the required core courses in both the MSW and the MPH program. Selected required courses from each program will count as elective courses toward the degree in the other program. A reciprocal agreement between both programs with regards to the acceptance of student electives will facilitate effective curriculum planning.

The total number of credits to be taken will be 86 (50 in Social Work, and 36 in GSPH). Students will be required to complete two field placements (one in the first year and one in the second) as required by the MSW program, and as is consistent with the practicum requirements of the MPH program.

The second field placement will have a public health emphasis and count as the required MPH practicum experience. All students will be required to complete the GSPH Capstone course, and complete an essay as required by the MPH program. Students will be assigned faculty advisors from both SSW and GSPH and these advisors will work collaboratively with the student to plan the academic course of study.

Upon completion of the joint degree program, the student would receive the Master of Public Health and the Master of Social Work degrees from the respective schools. The curriculum is established in an effort to have the requirements for both degrees met by having certain classes at one school fulfill requirements at the other.

The efficient way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

MSW/Juris Doctorate

The School of Social Work (SSW) and the School of Law offer a cooperative educational program through which students may earn both the Master of Social Work (MSW), the primary professional degree in social work, and the Juris Doctor (JD) degree, the first professional degree in law. The MSW-JD program will enable students with interests in a wide range of areas where law and social work converge - such as child welfare, aging, health, mental health, juvenile and criminal justice, family issues, and housing - to engage in a highly integrative educational experience that will include academic courses, field placements, and research opportunities at the intersection of both professions. The joint degree program allows one to earn both degrees in four years rather than five.

Increasingly, social work professionals and attorneys are working together to promote the well-being of their clients. These areas of convergence exist in practice with individuals, families, and groups as well as with communities and organizations. The intersection of legal and social work concerns is also evident at the policy level, and research from both professional disciplines has been used to inform these activities. It is not uncommon for practitioners from both fields to work in concert to draft, implement, and/or advocate for legislation at the local, state, and federal levels.

The MSW-JD program is one among several programs that the Schools of Social Work and Law have jointly established throughout their long and rich history of collaboration.

Neither degree may be granted prior to fulfillment of all requirements for the joint degree program.

Master of Social Work/Master of Business Administration

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students. Upon successful execution of this initiative, the school will lean towards opening the program to all MSW full-time students (Direct Practice students included).

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools.

Master of Social Work with a Secondary Education Teaching Certificate

Overview

The Master of Social Work with a Certificate of Advanced Study in Teaching in Secondary Education (MSW/CAST) combined program is designed to cultivate school-based practitioners that will have a wide range of skills for supporting vulnerable adolescents and families in urban school contexts. The MSW/CAST curriculum design incorporates the person-in-context approach of social work with culturally relevant secondary teaching methods. As such, graduates will be trained to identify, design, and facilitate programmatic responses to the unique needs of children in schools in urban communities, and also to enhance classroom teaching and student learning through their specialized evidence-based expertise.

The program is efficiently designed to be completed in two years (5 semesters). In the first year the bulk of the courses are taken in the School of Education, as students complete the teaching certification portion of the program. In this time students are trained to be secondary education teachers (grades 7-12) in one of five core disciplines: English, Mathematics, Science, Social Studies, or Foreign Language. Students will then shift to the second half of the program, where the bulk of the courses are taken in the School of Social Work and where students will earn an MSW degree over the course of 3 semesters. By combining courses of study in the School of Education and School of Social Work, graduates will:

- 1) Understand the learning environment of students in the urban settings

- 3) Understand schools as organizations in context
- 2) Utilize culturally relevant classroom instruction to promote academic growth of adolescents
- 4) Facilitate intervention programs and student support services that focus on the social and emotional needs of students

Upon successful completion of this combined program graduates will be awarded a Masters Degree in Social Work (MSW) from our direct practice concentration, and certifications in secondary school teacher (grades 7-12) and school social work (pending praxis and licensure exams for relevant certifications).

Admissions and Prerequisites

Candidates for this combined program will need to enter having completed sufficient credits at the baccalaureate or higher level in fields relevant to one of the five secondary teaching disciplines: English, Mathematics, Science, Social Studies or Foreign Language. If a candidate is from a related field and just shy of credits (e.g. political science), they may choose to take relevant courses prior to enrollment. Also, two education courses (6 total credits) are also required as prerequisites and are available the summer before the start of the program (Foundations of Special Education; Teaching English Language Learners). All prerequisites must be met by the start of the first fall semester of year 1.

Interested candidates should apply to the School of Social Work MSW program and the School of Education Instruction 1 program separately, indicating their interest in the MSW/CAST program where asked in the respective application materials. Applicant qualifications for each school will be reflective of the general standards of each individual program. Candidates who are accepted to both programs will be accepted to the combined program, and will be notified and welcomed to the upcoming cohort.

Program Requirements

Coursework. In this uniquely rigorous and efficient program, students will meet an adapted set of the core requirements of both schools, whereby a number of pre-approved courses electives in one program count dually toward course requirements in the other. The total number of credits taken will be 51-54 in Social Work and 22-25 in Education. These credits include required field experiences for both programs.

Fieldwork. The Professional Year (year 1) School of Education field experiences will consist first of ten hours a week during the fall semester observing and teaching in a grade 7-12 classroom alongside an experienced mentor teacher. In the spring semester, the students will complete a full-time student teaching experience in the same classroom. Then in the summer semester following year 1, students will complete their foundation field placement for the School of Social Work. Finally, the concentration field practicum for social work will occur in the fall and spring semesters of year two. This field practicum will be in a primary social work role within a school setting.

Tuition

Students will pay the tuition of whichever school they are enrolled in for the majority of their credits that term. Specifically, fall and spring Year 1 students will pay School of Education tuition, and the remainder of the program will be paid to the School of Social Work. Significant scholarship support is available to students in the program.

Employment

The secondary education focus, along with the 2 calendar year quickened pace, makes MSW/CAST program one-of-a-kind nationally. Upon graduation, students will be prepared to serve either a School Social Worker or a Classroom Teacher. To the teaching profession, graduates bring therapeutic, person-in-context, and family-relations perspectives that will uniquely equip them to build positive relations and supports for students in particularly challenging contexts. Conversely, a school social worker with teacher training will have enhanced skills to support teachers in identifying effective interventions to address psychosocial issues in the classroom. More broadly, a social work with teacher training will be able to construct and deliver instruction more effectively to impact change and understanding amongst his/her clients, colleagues, and staff.

In sum, graduates of this program are uniquely qualified for, although not limited to, work in high need urban educational environments. Ultimately, this degree is a rare and powerful distinction for individuals looking for enhance their preparation and employability in secondary schools.

Social Work, MPH/MSW

MSW/MPH

MSW/Master of Public Health Program

The MSW/MPH program requires a three year curriculum plan. Students will complete the required core courses in both the MSW and the MPH program. Selected required courses from each program will count as elective courses toward the degree in the other program. A reciprocal agreement between both programs with regards to the acceptance of student electives will facilitate effective curriculum planning.

The total number of credits to be taken will be 87 (51 in Social Work and 36 in GSPH). Students will be required to complete two field placements (one in the first year and one in the second) as required by the MSW program, and as is consistent with the practicum requirements of the MPH program.

The second field placement will have a public health emphasis and count as the required MPH practicum experience. All students will be required to complete the GSPH Capstone course and complete an essay as required by the MPH program. Students will be assigned faculty advisors from both SSW and GSPH and these advisors will work collaboratively with the student to plan the academic course of study.

Upon completion of the joint degree program, the student would receive the Master of Public Health and the Master of Social Work degrees from the respective schools. The curriculum is established in an effort to have the requirements for both degrees met by having certain classes at one school fulfill requirements at the other.

Social Work, MPH/PhD

The University of Pittsburgh School of Social Work and the Graduate School of Public Health Center for Maternal and Child Health Leadership Training in Public Health Social Work (based in the Department of Behavioral and Community Health Sciences) program has been in operation since 1965 and represents a unique collaboration. The program's primary objectives are to train social workers for leadership positions in public health systems and prepare them for research and teaching posts.

The program emphasizes a broad range of maternal and child health issues, including infant mortality reduction, adolescent health, youth and maternal substance abuse, services to children with disabilities, injury and violence prevention, child abuse and neglect, pediatric AIDS, and others. The program has excellent links with both the local and state maternal and child health systems as well as with the federal Maternal and Child Health Bureau. Students have numerous opportunities to work with local organizations on a variety of planning, evaluation, and research activities. In recent years, a number of students have participated in federally sponsored summer internship experiences.

The program offers students a joint program to study for both a PhD in Social Work and a Master of Public Health (MPH).

The joint MPH/PhD program, is designed for social workers seeking administrative, policy, and/or academic positions. The overall training program clearly emphasizes leadership training rather than basic professional preparation. All trainees are Masters of Social Work (MSWs) (or equivalent) with at least two years of professional practice experience.

Master of Public Health/Doctor of Philosophy (PhD) in Social Work | School of Social Work | University of Pittsburgh

Objectives

The overall educational objective of the project is to provide the trainees with a "public health approach" to maternal and child health.

This involves:

- a primary focus on populations at risk rather than individuals
- use of an interdisciplinary approach
- a focus on primary prevention of social and health problems
- reliance on systematic data collection and analysis for administrative decision making

The learning objectives include:

- Understanding incidence, prevalence, prevention, treatment, and epidemiological trends of the health and social needs of mothers and children
- Becoming aware of the health and social work systems available for prevention, treatment, and rehabilitation
- Understanding the interrelationship of the identified population-at-risk with other populations needing maternal and child health services
- Understanding the impact of socioeconomic, racial, cultural, geographical, and financial factors on health service delivery and use
- Understanding the technical and legal issues related to service delivery to the population-at-risk
- Understanding the implications of legislation and policy on program funding, planning and development, and patterns of service delivery

It is expected that graduates also will be prepared through the educational experience to:

- Coordinate maternal and child health services within primary, secondary, and tertiary sites
- Effectively access and allocate federal, state, county, and local resources for maternal and child health services
- Develop and coordinate regional public health and social work services for mothers and children
- Develop social work consultation and training skills and apply them to interdisciplinary settings
- Use epidemiological data and statistics, and conduct community needs assessments to support program and policy development
- Prepare technical reports, proposals, and publications

Academic Curriculum

The MPH/PhD curriculum comprises core courses in public health and social work, with a heavy emphasis on research methods and statistics. Specific classes on maternal and child health and public health social work are also required for this degree program. The following list of courses is provided as an example, as the exact course requirements may vary by student.

Requirements:

This joint degree requires the completion of a minimum of 81 credits, a comprehensive examination and successful defense of a dissertation. Graduate Students in the joint MPH/PhD program generally apply 12 credits from the MPH curriculum toward their elective course work for the PhD.

Social Work, MPIA/MSW

Joint Degree Programs with the Graduate School of Public and International Affairs

Master of Social Work/Master of Public Administration

Master of Social Work/Master of Public and International Affairs

MSW/Master of International Development

Three unique joint degree programs are offered by the University of Pittsburgh School of Social Work, through its COSA concentration, and the Graduate School of Public and International Affairs. These joint programs provide students with a broad professional education to prepare them for eventual service in urban non-profit and government organizations, community development policy, and social and urban planning. They provide experienced students with opportunities to expand their knowledge base and enable other students to develop more marketable professional skills than are usually acquired through single-degree programs. Students in these joint programs earn a Master of Social Work from the School of Social Work and a Master of Public Administration, Master of Public and International Affairs or a Master of International Development from the Graduate School of Public and International Affairs.

Students must be admitted to both programs in order to qualify for admission to the joint degree program. Degree candidates must meet the minimum foundation, concentration, and specialized requirements of both schools, except where substitutions are appropriate and approved by the faculty advisors. Depending upon which joint degree program the student elects, the total number of credits required for graduation ranges from 72 to 88 credits. For most students, this means that individual programs can be completed within six to seven terms of full-time residency. Students electing to terminate the joint degree program before its completion must complete all the work required by the respective schools for either degree in order to receive that degree separately.

Graduate School of Public and International Affairs

Complex and emerging issues influence us, our towns, our countries, and our world: Fair housing. Economic and community development. Environmental sustainability. Emergency preparedness. Disaster response. Human rights. International security.

We live in a world both illuminated by great hope and darkened by great conflict. Make a difference and take the lead. Prepare yourself with a comprehensive education from the Graduate School of Public and International Affairs (GSPIA) at the University of Pittsburgh.

Your academic options begin with GSPIA's integrated academic structure of three distinct master's degree programs offering eight different majors. Click on the links below to learn more about GSPIA's academic programs and related learning and research opportunities at GSPIA and the University of Pittsburgh. And-as always-we're ready to answer any questions you may have! Contact the Office of Student Services at 412-648-7640 or by email, gspia@pitt.edu.

The easiest way to apply to the Master's Degree in Social Work Program at the University of Pittsburgh School of Social Work is to use our online application.

Students who prefer to apply through the mail may contact:

Social Work, MSW/MDiv

Social work and theology have many historical, philosophical, and applied commonalities. In an effort to integrate the two educational experiences and prepare professionals competent to integrate their practice skills, the School of Social Work, in cooperation with the Pittsburgh Theological Seminary, has developed a cooperative degree program leading to the Master of Social Work and Master of Divinity degrees.

This program provides a full social work and theological education that may be completed in four years by virtue of mutual and reciprocal educational planning between the institutions. Candidates for the degrees normally enter the seminary and concentrate on theological studies during the first two years of the program. The third and fourth years are spent primarily in the School of Social Work with approximately one course each term being taken at the seminary. Students electing to terminate the cooperative degree program before its completion must complete all the work required by the respective institutions for either degree in order to receive that degree separately. Applications for admission are processed independently by each institution.

Requests for further information concerning the Pittsburgh Theological Seminary and its various programs may be addressed to the Director of Admissions, Pittsburgh Theological Seminary, 616 North Highland Avenue, Pittsburgh, PA 15206, or call 412-362-5610, ext. 2116. The seminary's Web site is www.pts.edu.

Social Work, MSW/PhD

An MSW degree from an accredited school of social work is required to be considered for admission to our PhD program. Those applicants without an MSW degree, who wish to pursue a social work academic career, can apply to the joint MSW/Ph.D. program. Such applicants typically are interested in grounding themselves in the practice base of the social work profession, while also seeking to develop their advanced research and teaching expertise.

If you are interested in a faculty position in a school of social work after completing your PhD, please note that the Council on Social Work Education, the accrediting body for social work undergraduate and master's programs, requires that social work practice courses be taught by faculty with the MSW plus the equivalent of two years of full time practice experience. Therefore, it is strongly recommended that individuals who do not possess an MSW and who desire an academic position in a school of social work consider the option of our joint MSW-PhD program. We also strongly encourage those who do not have the requisite practice experience to obtain it before completing their PhD., preferably before entering the program.

Separate applications are required for admission to each program. Those seeking further information regarding this dual degree program are encouraged to contact Dr. Jeffrey Shook, director of the doctoral program, (412) 648-9365, jes98@pitt.edu.

University Center for International Studies

The University Center for International Studies (UCIS) is the primary resource for initiating and managing international programs, studies and support services while promoting the University's reputation as a leader in global education. A key goal of UCIS is to cultivate globally capable and engaged students toward lives of impact in their community and beyond. In short, to prepare graduate students who are global ready. This is achieved by certificate programs, study abroad, curriculum development, and seminars. UCIS offers 7 graduate certificates, which are academic credentials that attest to acquisition of international knowledge about a particular world region or global issue, cross-cultural understanding, and language proficiency relevant for international careers or for advanced degrees. Certificates are available in:

- African Studies
- Asian Studies
- European Union Studies
- Global Studies
- Latin American Studies
- Russian Studies
- West European Studies

The certificates are administered through the African Studies Program, Asian Studies Center, European Studies Center, Global Studies Center, Center for Latin American Studies, and the Center for Russian and East European Studies. Four centers--European Studies Center, Global Studies, Latin American Studies, and Russian and East European Studies--are designated by the federal government as National Resource Centers.

UCIS certificates evidence language proficiency, regional knowledge and cultural competency that students find useful for international careers.

Admission to Certificate Programs

For admission, graduate students must first apply to the relevant professional school or academic department within the Dietrich School of Arts and Sciences. Applicants are encouraged to contact a UCIS international advisor as early as possible with questions about their interest in a world region or global issue. Formal admission to the UCIS certificate programs is accomplished by completing a simple application form. Generally, no additional tuition is charged for enrollment as a certificate student. Students holding a master's degree from an accredited institution may obtain any of the UCIS graduate certificates without enrolling in a graduate degree program at the University of Pittsburgh. They may apply directly to the UCIS center or program if they wish to enroll only in the certificate program.

Certificate Requirements

UCIS Graduate certificates are awarded after completion of all certificate requirements *as well as* completion of all requirements for the master's degree, or *after* the student has passed the comprehensive examinations for the doctorate. Upon graduation, both the academic degree and the certificate are posted on the student's transcript. Specific certificate requirements for each international studies certificate are listed under the program offerings below.

Advising

All UCIS certificate programs provide personalized advising services to students interested or registered in its programs in addition to those routinely offered by the students' major advisors. Center advisors assist in selecting courses, language training, and arranging internships or study abroad to fit the students' academic and personal interests. See the program offerings below for contact information.

The Graduate Certificate

The African Studies Program offers the graduate certificate in African Studies designed to provide students the opportunity for the interdisciplinary study of Africa. Students seeking a graduate degree at any school within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. The Graduate Certificate program is specifically designed for graduate students who desire an opportunity to intensify their study of Africa and develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, and workshops on Africa. They are also encouraged to participate in internship opportunities with a specific focus on Africa.

Admission to the Certificate Program

Although formal admission to the program is allowed at any point in the student's academic career, students are encouraged to apply for admission early enough to allow them ample time to complete all the requirements in a timely manner. Application information can be obtained from the African Studies Web site or students can apply for admission to the program at our office.

The Graduate Certificate

The African Studies Program offers the graduate certificate in African Studies designed for students who wish to intensify their study of Africa as a world region. Students seeking a graduate degree at any school or department within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. This certificate is specifically designed for graduate students who desire to develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines and professions. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, fellowships, internships and workshops on Africa. Successful completion of a certificate in African Studies can provide an important building block for careers in international development, foreign service, government, business, law, academia and public service.

Certificate Requirements

To receive the Graduate Certificate in African Studies, students must complete the following requirements:

- **African Studies Courses:** Students will complete six courses (18 credits) with at least 25% or more Africa related content. One of these courses must be taken from outside the student's department or professional school. Any Graduate Class can count towards the Certificate if there is at least 25% African content and individual students may focus on an issue or country in Africa while doing their project and or research paper for the class. In special instances, with the consent of the academic advisor, approved upper-level undergraduate courses may be accepted. For a full list of approved undergraduate courses, [click here](#).
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS must be in addition to the credits used to complete the student's primary degree program. In consultation with the academic advisor, students may fulfill these standards through one of the following options, [click here](#)
- For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits*
- **Language Proficiency:** Students will complete two years (4 semesters) of college level study of an African language or equivalent Proficiency of a European language other than English relevant to African Studies as a consequence of Africa's historical experience-a student with two years or more of French, Portuguese, German or Spanish meets the language proficiency requirement.
- **Capstone Research Paper:** Each student will complete a **capstone paper, which** will be the culmination of his or her learning experience in the African Studies program. Each student will select a topic focused on his or her area of concentration and work on this project under the supervision of an African Studies affiliated faculty.
- **GPA in African Studies Courses should be 2.5 or higher.**

Academic Opportunities

Internships: There are several internship opportunities locally and in Africa for student internships. Meet with the academic advisors to learn about these opportunities and sources of funding.

Professional Development: The African Studies Program offers graduate fellowships every semester where a student is given full exposure to the field of African Studies while they also develop their professional skills such as networking, public speaking, communications, media relations, critical thinking, and knowledge of Africa through the various assignments. Graduate students will especially build their outreach, networking and organizational skills through coordinating and hosting community engagement programming.

UCIS International Career Toolkit Series: The Toolkit Series introduces students to the multitude of careers available by meeting and interacting with professionals in a variety of fields. Many of the guests are Pitt alumni and those that graduated with an International Studies Certificate. By attending one of these panels students will gain insight on career choices, what specific careers entail, how to articulate and prepare for short and long term career goals, and utilize resources at Pitt to make their goals a reality. Each year, students enrolled in the certificate program will have the opportunity to visit Washington, DC to interact with professionals and learn about a variety of opportunities for employment possibilities.

The Asian Studies Center at the University of Pittsburgh is widely recognized as being among the best and most comprehensive in the country in research, public service, and teaching about East Asia. The center's mandate is to promote an enhanced understanding of East Asia, South Asia, Southeast Asia, and the Pacific Islands through exceptional undergraduate and graduate academic programs, strong interdisciplinary faculty development, and energetic community outreach. ASC has nationally recognized programs in Chinese and Japanese language and culture studies, with growing strengths in Indian and Korean studies. Its affiliated faculty spans the disciplines. Typically more than 3,500 graduate and undergraduate students enroll each year in Asia-related courses. Undergraduate students from any field or school interested in Asia can supplement and strengthen their major field of study by enrolling in the Asian Studies certificate program.

The East Asian Library (EAL)

<http://www.library.pitt.edu/east-asian-library>

Located in Hillman Library, the EAL contains significant collections of books and periodicals in both the Chinese and Japanese languages, in addition to materials in English and other Western languages housed in the general collections. Those pursuing research on current topics concerned with Japan can make use of the Japan Information Center (JIC), which gives users direct access to a wide array of government documents, economic reports, and a wide range of data related to social and economic issues.

Financial Assistance

Advanced Certificate Requirements

The Advanced Certificate in Asian Studies may be earned by U.S. and international students from any department or school at the University. The certificate combines the language training and multidisciplinary area studies necessary for both communicative and cultural competence. The certificate is designed for students who wish to intensify their study of Asia, either because they would like to be able to use their knowledge of that critical part of the world in their careers after graduation, or because they recognize the importance of an understanding of Asian history, language, and culture for all well-informed people.

- **A minimum of five upper-level courses or graduate seminars dealing with Asia, in at least two departments.** The five courses must include one seminar outside the student's major department.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program*. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

- **A research paper.** The student can fulfill this requirement by presenting either an interdisciplinary seminar paper or thesis (which draws upon more than one scholarly discipline). The paper can be used to complete departmental requirements for a graduate degree as well as for the certificate, but must include research using the student's approved Asian language.
- **Demonstration of proficiency in reading and speaking an approved Asian language related to one of the student's countries or regions of interest.** Proficiency is interpreted to mean at least three years of study or the equivalent, and may be demonstrated by successfully completing courses or by passing a special examination.
- **GSPIA option:** Students enrolled in the Graduate School of Public and International Affairs (GSPIA) may fulfill a more targeted set of requirements for their program. For details, visit <http://www.ucis.pitt.edu/asc/academics/certificate-program/graduate-certificate-program>
- **GPA requirement** is 3.0 for all courses to be counted towards the Asian Studies Certificate.

Financial Assistance

Asian Studies Certificate Students are eligible for a variety of scholarships, grants, and fellowships for research, presentations at conferences, language learning, and tuition replacement. For information visit <http://www.ucis.pitt.edu/asc/funding/graduate>.

Since 1984, the European Studies Center formerly (ESC) has offered a strong curriculum on Europe by bringing together the rich assets of a major research university to create a unique learning community. The ESC has developed an international scholarly reputation in European Union studies and was selected by the European Commission to host one of only ten European Union Centers of Excellence in the United States.

Hillman Library at the University of Pittsburgh has been a depository library for EU publications since 1974. Dr. Phil Wilkin, the West European bibliographer, has developed the Archive of European Integration that provides a wide array of EU-related documents through the Web. Please visit <http://aei.pitt.edu> for details.

Financial Assistance

The ESC offers several possible funding opportunities to students in its certificate program. Please visit <http://www.ucis.pitt.edu/euce/content/graduate-student-funding-opportunities> for further details.

<http://www.ucis.pitt.edu/esc/>

The Certificate of Advanced Study-European Union Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to the EU and proficiency in a relevant language. Students may enroll in the Certificate through the European Studies Center (ESC) or the Center for Russian and Eastern European Studies (REES).

Requirements:

Students seeking the Certificate of Advanced Study-European Union Studies must fulfill the following requirements:

- Complete **18 credits of EU studies courses** in at least two schools or disciplines, with at least nine credits from outside the student's home department or school. Six credits must be selected from the list of core courses. Courses must be approved by the ESC.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses
- * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program.* At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

- For the approved course list, click [here](#).
- Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.
- **Language proficiency:** Students must have three years of progressive college-level instruction in an official EU Member State or official EU candidate country language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.
- Participate in an EU-related cocurricular activity approved by the ESC's Graduate Advisor.
- Be awarded a graduate or professional degree.

For the full requirements for the graduate certificate, please click [here](#).

Certificate of Advanced Study

The Certificate of Advanced Study-West European Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to Western Europe and proficiency in a relevant language.

Requirements:

Students seeking the Certificate of Advanced Study-West European Studies must fulfill the following requirements:

- Complete **18 credits of West European Studies courses** in at least two schools or disciplines, with at least nine credits from outside the students home department or school. Distribution of these 18 credits is tailored to each academic program. Courses must be approved by the ESC.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.

Global Studies Program

Contact Information

Graduate Advisor: Elaine Linn
Assistant Director for Global Studies
Global Studies Program
4101 Wesley W. Posvar Hall
412-648-2113
Fax: 412-624-4672

E-mail: global@pitt.edu
www.ucis.pitt.edu/global

The Global Studies Program provides students with a "global competence," the ability to communicate effectively across cultural and linguistic boundaries and to focus on issues that transcend cultures and continents. The global studies graduate certificate is a joint offering of the University Center for International Studies (UCIS) and the Graduate School of Public and International Affairs (GSPIA), and is open to all students enrolled in a graduate program at the University.

The Global Studies Program draws on the strengths of the Area Studies Centers within the University Center for International Studies and the departments and schools at the University of Pittsburgh. The Asian Studies Center, the Center for Latin American Studies, the Center for Russian and East European Studies, and the Center for West European Studies have been designated by the U.S. Department of Education as National Resource Centers. The University Library System possesses extensive holdings of books and journals to support research and study in these world areas.

Admission to Global Studies Program

Applications to the Global Studies Program may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, students cannot be accepted until they have received notification of admission to the University of Pittsburgh.

Students holding a master's degree from an accredited institution may obtain the Graduate Certificate in Global Studies. They may apply directly to the program if they wish to enroll only for the graduate certificate.

Global Studies Certificate

University of Pittsburgh
University Center for International Studies
Global Studies Center
Elaine Linn, Assistant Director for Academic Affairs
4100 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-2113
eel58@pitt.edu
<http://www.ucis.pitt.edu/global/>

Global Studies is an exciting - and evolving - interdisciplinary field. It is concerned with transnational structures, processes, and interactions, and how these affect social, economic, cultural, political, and ecological environments. Scholars of Global Studies understand and analyze how these structures, processes, and interactions both connect people and places and disrupt established norms, communities, institutions, and relationships. That is, they think globally about these processes.

Within the Global Studies Certificate, graduate students from the Dietrich School of Arts and Sciences can tailor a unique plan of interdisciplinary study within their field of interest drawn from more than 200 courses across 6 global concentrations. The certificate allows students to adopt a transnational lens that can inform their research projects, and to conduct research in one of 35 languages offered at Pitt.

Global Concentrations: To complete the certificate, student choose one of five global concentration/themes:

- **Cultural Dynamics**
- **Peace, Conflict, and Security**
- **Ecology and Sustainability**

- **Health and Well-Being**
- **Politics and Economy**

In addition to the certificate, the Global Studies Center offer numerous complementary programs and opportunities that support students' intellectual and personal development: research skills, career exploration and career readiness, experiential education and civic engagement, and a critical understanding of current events. The center offers tuition remission for students studying less commonly taught languages and internship positions.

Certificate Requirements

Six Global Thematic Courses (18 credits): After students select a global concentration, they choose from a comprehensive and dynamic list of courses ensuring three disciplines are represented to provide an interdisciplinary perspective on their chosen global concentration.

- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program.* In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses
- * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program.* At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits.*

Language Proficiency: Building on Pitt's vast offering of over 30 languages, a minimum of three years of college-level study (six semesters) in a foreign language is required. Students can fulfill this requirement by passing a proficiency exam at the Intermediate mid proficiency level.

Global Studies Capstone Research Paper: This research paper is the culmination of a student's learning experience related to their global concentration. It demonstrates analytical skills within a transnational context. It must be written as part of a course and graded by a faculty member.

Center for Latin American Studies

www.ucis.pitt.edu/clas

The Center for Latin American Studies (CLAS), established in 1964, is internationally recognized for excellence in undergraduate, graduate, and professional education. In 1979 the U.S. Department of Education designated CLAS as a comprehensive National Resource Center (NRC) on Latin America—a distinction it has retained continuously to the present.

CLAS' programs cover the entire Latin American and Caribbean region. Two academic programs are especially noteworthy: The Latin American Archaeology Program, housed in the Department of Anthropology, involves research, training, and publications and emphasizes collaboration between North American and Latin American archaeologists. Fellowships and a bilingual publication series (funded by the Howard Heinz Endowment and The Andrew W. Mellon Foundation) further enhance this exceptional program. The Latin American Social and Public Policy Program draws on the impressive array of faculty and student expertise on Latin American policy issues available at the University of Pittsburgh. The program brings together researchers from different fields with the goal of contributing information of relevance to policy decisions facing Latin America. Social and Public Policy Fellowships are annually awarded to scholars interested in studying various dimensions of social policy at the University of Pittsburgh. The Latin American Social and Public Policy Graduate Certificate is available to students in this more specialized program.

Admission to the Center for Latin American Studies

http://www.ucis.pitt.edu/clas/grad_admissions

Applications to the Center for Latin American Studies may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, the center cannot accept students until they have received notification of admission to the University.

Latin American Library Collection

<http://www.library.pitt.edu/eduardo-lozano-latin-american-collection>

One of the major resources on Latin America available to students at the University of Pittsburgh is the Eduardo Lozano Latin American Library Collection. Its resources include exceptional collections on Bolivia and Cuba as well as extensive holdings on Argentina, Brazil, Ecuador, Guatemala, Mexico, Peru, and Venezuela.

Financial Assistance

Latin American Studies offers a variety of financial assistance to students in its certificate programs. Please visit http://www.ucis.pitt.edu/clas/grad_funding for further details.

Requirements for Certificates

CLAS offers two graduate certificates: the Certificate in Latin American Studies and the Certificate in Latin American Social and Public Policy. Requirements for each are detailed below. GPA requirement is 3.0 for all courses to be counted toward any Latin American Studies Certificate. For a list of approved courses, [click here](#).

- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program*. In consultation with the academic advisor, students may fulfill these standards through one of the following options:

- Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
- Students who can add content courses without affecting their tuition bill will be encouraged to do so.
- Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree."
- The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits*.

Graduate Certificate in Latin American Studies

To fulfill the requirements for this certificate, students must complete six Latin American area studies courses: two courses in the student's major department or school and four courses in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language of the area and to submit a research paper as detailed below.

Graduate Certificate in Latin American Social and Public Policy

To fulfill the requirements for this certificate, students must complete six courses focusing on social and public policy issues of Latin America: three courses should be in the student's major department or school and three courses should be in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language in their area and to present a research paper as detailed below.

Language Proficiency

The certificates in CLAS require three years, or the equivalent, of college-level Spanish, Portuguese, or an Amerindian language of the area. Students must have adequate proficiency to converse and conduct research in Latin America. A standardized examination is given to each candidate by a faculty member of the Department of Hispanic Languages and Literatures.

Interdisciplinary Research Paper

Students in CLAS certificate programs must complete a research paper on Latin America that reflects competence in at least two disciplines. The master's thesis or a revised research paper may be used to fulfill this requirement.

Center for Russian and Eastern European Studies

Contact Information

Graduate Advisor: Andrew Behrendt
Associate Director
Center for Russian and Eastern European Studies
4402 Wesley W. Posvar Hall
Phone: 412-648-7403
aeb72@pitt.edu
www.ucis.pitt.edu/crees

Established in 1965, the Center for Russian and Eastern European Studies (REES) at the University of Pittsburgh is designated by the U.S. Department of Education for Title VI funding as a National Resource Center.

There are three broad focus areas for the research conducted by faculty and graduate student specialists in the REES program. They are (1) contemporary Russian, East European, and Eurasian cultures, (2) politics, economics, and societies of Russia, Eastern Europe, and Eurasia (3) foreign policy issues as they relate to the REES world area.

The Center for Russian and East European Studies offers graduate certificates in East European Studies, Russian Studies, or Soviet Studies to students who successfully combine second language expertise and multidisciplinary area-focused courses.

Admission Information

Application for admission to graduate study is made directly to the academic department or graduate/professional school of the student's choice. The applicant should include a statement requesting admission to the REES certificate program.

To enroll in one of the certificate programs, admitted students should make an appointment with the REES graduate advisor as soon as possible after their arrival at the University.

Financial Assistance

The Center for Russian and East European Studies offers several means of financial assistance to students in its certificate program. Please visit <http://www.ucis.pitt.edu/main/scholarships> for further details.

Certificate

Russian, East European, and Eurasian Studies Certificate

Contact Information

Center for Russian, Eastern European, and Eurasian Studies
4415 Wesley W. Posvar Hall

Overview

REEES is one of a select few National Resource Centers for Russian, East European, and Eurasian Studies funded by the US Department of Education. REEES has 72 affiliated faculty members and has programs with 14 Arts and Sciences departments and five professional schools. Our many areas of focus include subjects such as the transformations of post-communist societies, history, foreign policy and international relations, anthropology, music, film, and contemporary culture and literatures. Recognizing that regional boundaries are constantly contested and redefined, our geographic scope includes Russia, Ukraine, Belarus, the Baltic states, Central Asia and the Caucasus, the Western Balkans, Poland, Hungary, Slovakia, Czech Republic, Romania, Bulgaria, Moldova, Mongolia, and Turkey. REEES currently offers Certificates in Advanced East European Studies, Russian Studies, or Soviet Studies, which may be earned in conjunction with most masters and doctoral programs in the School of Arts and Sciences and a number of professional schools.

Requirements for REEES Certificates

The requirements for each of the REEES graduate certificates are as follows:

- Completion of **six approved Russian, East European, and Eurasian area studies courses**, including four courses from at least two departments other than the student's home department, for a total of 18 credits.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS *must be in addition to the credits used to complete the student's primary degree program*. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
 - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
 - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
 - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree.
 - The 6 credits may be comprised of the following combinations:
 - Two language courses (* see notes below)
 - A language course (* see notes below) and a content course
 - Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, *at least nine (9) credits* of the course work used to complete the certificate requirements *must be in addition to the credits used to complete the student's primary degree program*. At least 3 of these credits must be in content coursework. *All 9 cannot be language course credits*.

- Demonstration of **language proficiency** equivalent to three years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish).
- Completion of a **research paper** of at least 15 pages in length, based substantially on primary sources in one or more languages of the REEES world area.
- Students must maintain a minimum GPA of 3.0 in REEES-related coursework.

Special Academic Opportunities

Special academic opportunities provide students with ways to augment their education and experience with expanded study programs both on and off campus, in both university and professional settings.

Area of Concentration (subplans) and Minors (plans)

Some graduate programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. A graduate minor offered by the faculty at the Pittsburgh campus is available to any graduate student enrolled in an academic degree program on the campus provided that the school from which the student is graduating recognizes this minor. See the Schools, Departments, and Programs section of this bulletin for available areas of concentration and minors.

Certificate Programs

Students may enrich their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed at the start of the Schools, Departments, and Programs section of this bulletin.

A certificate program at the graduate level is a coherent set of courses and related work in a particular area. Most certificate programs require a minimum of 15 credits, of which 12 credits must be earned at the University of Pittsburgh. The certificate may appear on the transcript as a degree goal and will appear on the final transcript as an awarded certificate.

A student must be formally admitted into a certificate program. The requirements for each certificate vary and students should contact the certificate program director.

Cross-Registration

Carnegie Mellon University, Duquesne University, the Pittsburgh Theological Seminary, Robert Morris University, and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the five institutions in the fall and spring terms. See Cross-Registration in the Registration section of this bulletin for further details.

Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. These programs may result in a student earning two separate master's degrees, a master's and a first-professional degree, or a master's or first-professional degree and a doctoral degree, but never result in a student earning two separate doctoral degrees. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative

programs are administered by two or more institutions. The same course, examination, or thesis may be used to fulfill requirements only if so specified in the documents formally establishing the joint- or dual-degree program approved by the University.

Students must be admitted to both academic programs offering the dual or joint degrees being sought and must graduate from both degree programs at the same time. Students are advised to see the individual school for other specific requirements that apply.

Course Information

Please note, when searching courses by Catalog Number, an asterisk () can be used to return mass results. For instance a Catalog Number search of " 2* " can be entered, returning all 2000-level courses.*

Admin and Policy Studies

ADMPS 2004 - THEORIES OF EDUCATIONAL INEQUALITY

Minimum Credits: 3

Maximum Credits: 3

This course is the first of a required two-course sequence designed for students to explore the meaning and expectations of doctoral study in the department of administrative and policy studies. The doctoral core is planned with a curriculum for radical transition to doctoral studies as students increasingly are called upon to take responsibility for their doctoral experience. Students have the opportunity to organize their own learning proclivities by managing resources such as study group and faculty-led deliberations, readings, computer-based technologies, individual research, and field activities. Students cultivate their identities as practitioner/scholar/citizens.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on issues of equity in education based upon the divisions of American society by social constructs of "race". The course is designed to expose students to conceptual frameworks of culture, society, race, class and gender from the social sciences and humanities for understanding the experiences of subordinated minority groups in school and society. The practical problems of social and school reform in American communities and schools will be addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: African Studies

ADMPS 2052 - M. ED INTERNSHIP IN HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course is a practicum experience for med in the higher education management. The internship course is unique in that students are required to be working in an institution of higher education while enrolled. An on-site supervisor will provide learning opportunities to students in conjunction with the course instructor, while the instructor will enhance the experience through weekly activities and course assignments. The course is also an opportunity to combine research and practice and to develop the professional skills necessary for a fruitful career in academic or student affairs or management in higher education.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2053 - MANAGEMENT & ORGANIZATION EFFECTIVENESS

Minimum Credits: 3

Maximum Credits: 3

This is one of a two course series (ADMPS 2053 & 2054) for M.Ed. students in the higher education management specialization. The Organization and Management effectiveness course provides students a professional foundation of the practical application of managerial skills required of first and second-line supervisors in higher education. Course topics devote special attention to: the mission and challenges of HE organizations, organization structures and environments, responsibilities and expectations of managers, financial management, budget development and oversight,

time and resource management, process improvement, the role of technology in complex organizations, decision making and communicating. In addition, the course will explore the role of supervisors in budget creation and resource management within a broader functional and institutional context.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2054 - ORGANIZATION DEVELOPMENT & LEADING CHANGE

Minimum Credits: 3

Maximum Credits: 3

This is one of a two course series (ADMPS 2053 & 2054) for M.Ed. students in the higher education management specialization. The Organization development and Leading Change course explores the practical challenges of strategic planning and the role managers play in its implementation. In addition, the course builds students essential managerial skills in: people and process oversight, understanding and leading transformational change, building competencies through creating measurable performance objectives, developing staff accountability, human resource management and the role of technology as an agent of change.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2055 - STUDENT DEVELOPMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This course provides foundational knowledge about the nature and history of student development theory, focusing on both a solid overview of theory and the application of theory in the design of effective practice in academic and student services contexts. This course also explores developmental issues facing college students as well as factors that promote and impede development. An understanding of student development theory is integral to working in higher education and this course is designed for students pursuing both scholarly and practitioner focused careers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2056 - STUDENT SERVICES PROGRAM ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces the subject of assessment and program evaluation in colleges and universities. Issues related to assessment theory, assessment and evaluation models and methodologies, as well as the political and social contexts of assessment are explored. Students complete a hands-on assessment project from start to finish as a part of the course. Students need to have completed student development theory or an equivalent course prior to enrolling in this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2086 - CURRICULUM IN SCHOOLS

Minimum Credits: 5

Maximum Credits: 5

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2089 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course is for administrative and policy studies newly instituted and experimental courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 2090 - RESEARCH SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Final seminar for candidates for the master of education degree in which each student prepares an original research paper.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

ADMPS 2093 - SUPERVISOR CURRICULUM AND INSTRUCTION INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

The practicum reviews the field based clinical experience of curriculum and instruction students for state certification.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

ADMPS 2097 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 12

Each candidate for an educational leadership certification in pa is linked with schools/ for 360 hours of university supervised and principal-mentored internship/fieldwork experiences over the 12-month lifecycle of the school. Mentors are from various geographical locations at all levels; elementary, middle, and secondary. Candidates register for one credit of internship for each of the four consecutive terms of the k-12 principal program.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad SN Basis

ADMPS 2098 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

Study approved and directed by an academic advisor.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

ADMPS 2099 - GUIDANCE IN THE MASTER'S DEGREE

Minimum Credits: 1

Maximum Credits: 6

A registration unit for students preparing a master's overview and thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

ADMPS 2101 - PENNSYLVANIA SCHOOL LAW

Minimum Credits: 3

Maximum Credits: 3

The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2104 - LATIN AMERICA SOCIAL & PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, gonadal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand how social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 2106 - INTERNATIONAL AND GLOBAL EDUCATION

Minimum Credits: 3

Maximum Credits: 3

The course introduces different perspectives of the world as well as various conceptions of global development. Students consider these issues in examining how formal and non-formal education programs, as well as the media, contribute to developing individual's views of and engagement in local, national, international, and global communities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: African Studies, Global Studies, Russian & East European Studies

ADMPS 2115 - SUPERVISION AND TEACHER LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on skills and strategies school leaders need to know to supervise teachers and develop structures for on-going teacher learning and development. Students study the history of supervision and how it continues to evolve. They analyze their own district's induction and professional development plans and design supervision models appropriate for a differentiated teaching staff.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2117 - DIFFERENTIATED INSTRUCTIONAL PRACTICES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give practitioners a strong theoretical background in differentiated modes of instruction and the skills needed to work with

teachers as they strive to improve and expand their pedagogy. Discussions and readings will explore classroom strategies that improve student achievement, the elements of effective instruction, instructional design related to state standards, and ways to use assessment to drive instruction. Finally, the course will discuss ways that school leaders can work with teachers to enhance their instruction and student learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2120 - CAPSTONE SEMINAR IN STUDENT SERVICES

Minimum Credits: 3

Maximum Credits: 3

Students will learn about the knowledge & skills required of a college or University student services administrator. It is assumed students will have administrative responsibility in future aspect of student services. Responsibilities may include development of vision & mission statement, designing organizational structure & budget. Focus on strategies to effectively manage & administer student services of diverse college & University campuses. Explore how organizational theory can be applied to improve policy making, personnel mgt, resource allocation & organization of administrative units.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 2123 - SUMMER LEADERSHIP INSTITUTE

Minimum Credits: 3

Maximum Credits: 3

Students learn to diagnose adaptive leadership challenges while developing a foundation of individual and group communication skills and a disciplined practice of reflection. The leadership institute will offer a coherent experience of teaching and learning about and for leadership supported by an approach to adult development as meaning/making (Kegan, 1994). The institute develops skills in: team building, problem framing analysis, group process skills, interpersonal skills, communication skills, writing (annotated bibliography, art of critique), shared decision-making, multicultural education/diversity (awareness of diversity, classroom interactions, and diversity in schools), school culture, and reflective practice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 2128 - LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course examines theories about leadership and provide students with feedback on their own leadership styles. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Students learn how to explore concepts regarding leadership, teams and organization culture; assess their own leadership skills and style; receive feedback from colleagues on their style and behavior; and plan for their own leadership development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2131 - HIGHER EDUCATION ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

This course addresses major organizational theories and how they relate to higher education institutions. Students will develop conceptual frameworks that can be utilized as a generic base for the practice of administration and as a diagnostic tool that will assist in identifying organizational problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Global Studies

ADMPS 2133 - GENDER AND EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This seminar examines the role that gender plays in the lives as students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in k-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment, gender and the educational professions; feminist and anti-bias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: African Studies

ADMPS 2181 - DECONSTRUCTING THE UNIVERSITY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2302 - STATE/NATIONAL POLITICS OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Students in this course analyze the broad national and international political issues relating to schooling and school systems. School politics are viewed from a variety of social science perspectives using a number of case studies and theoretical texts. An examination will be made of the dialectical relations between the state and the school in an effort to illuminate social, economic, and cultural reproduction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2305 - SOCIOLOGY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course surveys the classic and contemporary literature on schools and socialization. The relevance of sociological theory and research to education policy debate is also highlighted. Students will increase their understanding of the forces shaping learning and development that are beyond the classroom and are embedded in the larger social context.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2306 - HISTORY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Both a chronological order and a thematic/conceptual investigation will constitute the structure of this course. The literature on past and contemporary historical developments will be compared. Emphasis will be placed on the ideas that prevailed in different time periods. Students will examine the conflicting organizational arrangements, competing theories, and growing external pressures on education.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course surveys the perennial forces which have shaped the character of America's colleges and universities. In situational control and governance. Curricular goals and organization, and faculty and student life are examined against the background of political, economic, religious, social and intellectual developments in American culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Examines how philosophies of education can contribute to one's vision of educative experience. Central educational concepts (e.g., Knowing, learning, thinking, valuing, and being) are analyzed in alternative ways.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2342 - EDUCATION AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

The active experiences in the course are intended to challenge students to investigate and analyze the dynamic relationship between schooling, education, popular culture and society by addressing the normalizing effects of cultural narratives and images that influence our taken-for-granted assumptions, beliefs and actions. Class activities involve considering the moral, social and political dimensions of our educational practice by expanding our sense of what happens outside of schools and classrooms that contribute to shaping our worldviews. We work to better understand the dynamics of culture and the relationships among culture, history, power, language and knowledge. Thus we are challenged to become informed and invigorated professionals that can help reverse the patterns of dehumanization and social control that are often overlooked in the everyday world of practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: African Studies, Asian Studies, Global Studies

ADMPS 2343 - EDUCATION AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 2344 - LEADERSHIP IN SERVICE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This seminar offers participants opportunities to engage and lead with their heads, hearts, and hands. Course modules introduce such critical issues as the ethics and philosophies of experiential modules on cross-cultural understanding geared to the proposed service-site. Students play active leadership roles in shaping and facilitating the seminar.

Academic Career: Graduate

Course Attributes: African Studies

ADMPS 2352 - ANTHROPOLOGY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This introductory course provides an overview of anthropological approaches to the study of education. Ethnographic cases drawn from many cultures, knowledge systems, and time periods help to provide a broad, holistic view of education in diverse community and institutional contexts. Modules may include: nurturing a sense of place; comparing folk, popular, and elite cultures; understanding cultural continuity and change; celebrating rituals and holidays; fostering cultural resilience and responsive reform policies; framing multicultural education; and appreciating the sociolinguistics of schools and home. Students have opportunities to participate in authentic schooling activities, to draft public advocacy pieces, to create team presentations, and to refine a personalized synthesis of a topic of interest. Anthropological field research methods are discussed as a means to craft compelling analytical accounts, but research training is not part of this course

Academic Career: Graduate

Course Component: Lecture

Course Attributes: African Studies, Asian Studies, Global Studies, West European Studies

ADMPS 2353 - APPLIED ANTHROPOLOGY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This advanced seminar explores practical applications of anthropology to educational programs in varied cultural settings around the world. Topics may include: theories of development and social change, the role of schooling in cultural continuity and change, globalization and transnational influences on curriculum and policy; public advocacy and scholarship; school reform and social inequities. Authentic professional activities and meaningful case studies help students to see themselves in the field. Demonstrations of professional skills such as constructive criticism, teamwork, meeting methodological challenges, and critical analysis of texts help students to enhance their academic cv and engaged scholarship portfolio.

ADMPS 2355 - ADVANCED QUALITATIVE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 2356 - FIELD METHODS

Minimum Credits: 3

Maximum Credits: 3

Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ADMPS 2359 - GENDER IN EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This seminar examines and critiques the international division of labor, focusing on the roles and status of women in western as well as non-western and "less-developed" societies. Participants will examine the intersection of gender, development, and education. Education is discussed in its broadest sense, as socialization, knowledge transmission, and institutionalized training.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade
Course Attributes: African Studies

ADMPS 2398 - ECONOMICS OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3

This class introduces students to the economic analysis of education in the U.S. And developing countries. Among the topics to be covered are: human capital theory, educational production functions. Rate of return analysis, various issues in educational policy and finance

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2399 - POLITICAL ECONOMY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3

In this class students will continue (from "economics of education") to develop techniques for economic analysis. The subject is placed in a broader intellectual and political context. Particular attention is given to critique of neoclassical economic analysis, to alternative frameworks for economic analysis, including class-conflict and institutional approaches and the applications of economic analysis in the educational policy process. The course covers issues in industrialized and developing countries.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2402 - HEALTH, MENTAL HEALTH AND SAFETY

Minimum Credits: 2
Maximum Credits: 2

Within the leader as learner block in leadership initiative for transforming schools (lifts), a k-12 principal certificate program, the health, mental health, and safety module will focus on creating the optimal conditions for teaching and learning. Aspiring school leaders will gain the knowledge and skills needed to conduct a school-wide mental health and safety audit. In addition, they will learn about implementing a crisis management plan and the role and responsibilities of a crisis management team.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2403 - TEACHER SUPERVISION AND EFFECTIVENESS

Minimum Credits: 2
Maximum Credits: 2

The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2404 - INSTRUCTIONAL LEADERSHIP

Minimum Credits: 5
Maximum Credits: 5
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2405 - PUBLIC LEADERSHIP: SCHOOL LAW

Minimum Credits: 1

Maximum Credits: 1

The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators

Academic Career: Graduate

Course Component: Lecture

ADMPS 3001 - RESEARCH METHODS IN EDUCATION POLICY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The disciplinary and methodological bases for knowledge and associated inquiry in educational administration and policy study are addressed. Examples of research from various paradigms, disciplines, and professional fields are used to show the relationship among theory, method, and knowledge. The relative importance of substantive and methodological concerns in doing research are emphasized. Positivistic, interpretive, and critical theory inquiry can be addressed by students in their required pilot study.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3003 - THEORIES OF EDUCATIONAL INEQUALITY

Minimum Credits: 3

Maximum Credits: 3

This course is the first of a required two-course sequence designed for students to explore the meaning and expectations of doctoral study in the department of administrative and policy studies. The doctoral core is planned with a curriculum for radical transition to doctoral studies as students increasingly are called upon to take responsibility for their doctoral experience. Students have the opportunity to organize their own learning proclivities by managing resources such as study group and faculty-led deliberations, readings, computer-based technologies, individual research, and field activities. Students cultivate their identities as practitioner/scholar/citizens.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3004 - APS DOCTORAL CORE 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of a required two-course sequence during which students focus on institutional, state and sector-based policy analysis, team building and communications skills. The course builds upon the professional goals set forth in core 1, while sustaining its reflective individual and study group components. Students read extensively about current and complex p-20 educational reform efforts from different points of view. Students will apply analytical tools, and communicate their findings external audiences such as elected officials. In addition, students form cross-sector research teams to address problems and construct solutions for contemporary challenges facing education at all levels. This course concludes with a comprehensive portfolio review and preliminary examination which are requisite for continuation in our doctoral programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3006 - SOCIAL THEORIES & EDUCATION IN GLOBAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

Ultimately, this course is about the student, and the student situating herself in an increasingly global context, driven by technology and globalization. As a consequence, the course is designed to guide the student in exploring a range of social theories that may be helpful in informing how the student understands and operates in educational institutions in local, national, and global economic, political and cultural contexts. By examining and comparing a variety of theories and contexts, the student will be encouraged to develop/refine her own theories of a) how and why society and education are organized as they are; b) how and why education and/or society have or have not changed; and c) how and why education and/or society should be changed. What do you believe in passionately? How can social theories help strengthen and challenge your views? How can they help you gain a deeper and richer understanding of society's past, present and future? Far from being dry, academic reading, they drive policy - politics, business, and many other aspects of the student's everyday life. What kind of leadership role does the student want to create for herself in your career? What is the student willing to advocate for? How can this course help? Many students have very jumbled thinking about the things they feel most strongly about. They know what is right for them, but often can't explain how very clearly. This makes it difficult to convince anyone

besides those who already agree with the student. This will limit the student's political success, as contested issues need complicated, but clear thinking. How can the various social theories help guide the student's thinking and understanding of the issues from multiple perspectives? One of SCAE's international strengths is learning how to manage multiple perspectives, a critical skill in a globalizing world. How do people construct the world so that it makes sense to them? How do we negotiate the contested meanings that arise? Finally, how does the next generation learn about its cultural endowments?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3007 - EDUCATION AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course will explore a wide range of contemporary social issues and trends in educational development from historical as well as comparative perspective. We will read and analyze educational problems and seek to design policy that can have impact in solving the problems. A central focus of this course is social analysis emphasizing educational issues in schools and colleges not only in the United States, but in other global contexts as well. We will critically explore key themes, definitions and approaches to education in individuals' lives across the lifespan, and examine how education helps shape social life in urban/rural areas and other settings from a comparative perspective. We will interrogate theoretical approaches used to understand the problems and current debates in the field of education by all stakeholders including institutions involved with educational development in diverse global settings, such as the United Nations and the World Bank.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3008 - COMMUNITY ENGAGEMENT IN EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course explores a range of contemporary issues and trends in community engagement in education. It addresses educational issues in schools and colleges, not only in the United States but in global contexts as well. It explores critically key themes, definitions and approaches to community engagement in education in individuals' lives across the lifespan, and examines how education helps shape social life in urban/rural areas and other settings. It interrogates policy documents used to understand the problems and current debates related to community engagement in education by individual stakeholders and policymakers as well institutions involved with educational development in diverse local, national and global settings, including the UNESCO "Incheon Declaration." This course is designed to provide students with the grounding they need to perform confidently and competently in areas of their professional practice. It is an opportunity for the critical study of community engagement in education that is relevant to students' professional goals. The course provides tools to explore and assess the theories, ideologies and issues of education from multiple perspectives as well as to situate students' thinking about the issues in searching for policy and practice interventions. Students will frame the discussions within the contextual and practical realities of life in schools and other educational institutions through a range of conceptual lenses, exploring the debates over the meaning and nature of social justice in education, debates that intersect with questions about the person, society, education and knowledge as they strive to understand the complex issues in the field of education. Goals and objectives are aligned with SCAE program commitments to developing in students: deep specialized knowledge; intellectual/practical skills in innovation; taking personal/social responsibility for change; applying/integrating knowledge/understanding to problems of practice; understanding/embracing a commitment to equity; active, intentional, and ongoing engagement with diversity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3010 - SURVEY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Course is designed as a basic introduction to the research methods and analyses associated with various types of survey research. Identification of populations and sampling frames, execution of non-probability and probability sampling techniques, item construction, questionnaire design and implementation of various types of surveys are presented. Use of relevant survey analysis software (e.g., SPSS, NVivo, etc.) For the analysis of sample descriptive statistics in survey research is presented. Students will apply the skills presented through the development of a proposal and an instrument that can be employed in a workable survey.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3011 - SUMMER LEADERSHIP RETREAT

Minimum Credits: 3

Maximum Credits: 3

Summer leadership retreat uses actual case studies to provide an activity driven introduction to a career as an executive school leader. The retreat promotes problem solving, relationship building, professional networking, skill building, and career planning. Led by clinical professors, the class features practical exercises in leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3012 - QUALITATIVE DATA MANAGEMENT ANALYSIS AND PRESENTATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces software and technological tools to organize, conceptualize, systematically analyze, and effectively present qualitative data of diverse kinds in varied media. Students work in teams with real data in this project-based lab course. Technological skills are paired with conceptual discussions of such key operations as coding, thematic analysis, reflexive and analytical notes, framing questions, and assessing significance.

Critiques of core readings, demonstrations, and iterative formal presentations provide opportunities to model professional skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3014 - DOCTORAL SEMINAR IN EDUCATION AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course is designed for those seeking to enhance their professional careers with scholarship. The EDD degree offers an intensive cohort experience and preparation for rigorous, applied research based on a broad, but in-depth acquaintance with the contexts within which phenomena, issues, policies and practices have emerged in the past and continue to evolve in our times. First, students will have the opportunity to develop an enhanced scholarly knowledge base encompassing the various facets of education/society relations by exploring the social, political, economic and cultural contexts within which education/educating take place and within which government agencies, educational institutions, policy-makers, educators and other stakeholders are situated or situate themselves when considering, fashioning, implementing, or reacting/responding to educational phenomena and policies/practices/reforms. Second, preparation for rigorous applied research should follow from understanding the rationales for and challenges of undertaking any of a number of possible research approaches to studying specific phenomena or problems of policy/practice and considering the complications imposed by these contexts in terms of what must be taken into consideration when applying research methods to human conditions and environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3015 - ETHICAL ISSUES IN HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

The ethical issues that present themselves in the educational setting are examined. Students are expected to recognize and evaluate these ethical issues in terms of their own value system as well as that of others. Each student is expected to prepare a case study that questions the ethical issues involved.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3016 - INTRODUCTION TO QUALITATIVE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Course introduces students to distinct discourse communities that have coalesced around different inquiry traditions (e.g., Empirical, interpretive, critical) and modes of research (e.g., Narrative, ethnographic, historical, rhetorical, and linguistic). Emphasis given to interpretive tradition, in which techniques of data collection and data analysis strategies are secondary to the ways in which researchers make meaning of their data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3087 - SPECIAL TOPICS 2

Minimum Credits: 1

Maximum Credits: 1

Students in this one credit course will have the opportunity to concentrate their efforts on writing for publication. We will attend to editing and revising drafts that members are working on (such as manuscripts for journal articles, conference proposals, CVS, dissertation proposals, etc.). As well as essentials of publishing, topics may include: identifying voice and stance; framing propositions and arguments; portraying evidence; reviewing relevant discourses, and other syntax at hand. Class organization is intended to encourage self-reflection, analysis, and revision as a result of instructor and peer-review, and whole group discussion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

ADMPS 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION

Minimum Credits: 3

Maximum Credits: 3

Knowledge management considers knowledge as a strategic asset within emerging contexts. Using technologies and systems, KM deals with the policies, tools and practices that an organization uses to classify, produce, implement, and safeguard information. Contemporary school districts and non-profit organizations are increasingly dedicating resources to knowledge management in their educational, business, technology, and human resource operations. Knowledge management focuses on organizational goals such as improved student performance, data management, organizational development and innovation.

Academic Career: Graduate

ADMPS 3089 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

A course listing for newly instituted and experimental courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3090 - DISSERTATION RESEARCH SEMINAR

Minimum Credits: 3

Maximum Credits: 3

A seminar for doctoral students developing research prior to the preparation of a dissertation overview.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

ADMPS 3092 - HIGHER EDUCATION INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

An internship in administration in higher education.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad LG/SU3 Basis

ADMPS 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 3

Provides an opportunity for the student to gain practical experience and demonstrate the knowledge, skills, and competencies obtained during the process of the training program in educational administration. It also furnishes the context of reality within which the student may acquire additional knowledge skills, and competencies as theory translated in the working world of the school system.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad LG/SU3 Basis

ADMPS 3097 - SUPERVISED RESEARCH

Minimum Credits: 1

Maximum Credits: 6

Doctoral study initiated by the student with advisor's approval and related to the student's program of study.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

ADMPS 3098 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

Doctoral study approved and directed by an academic advisor.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

ADMPS 3099 - GUIDANCE IN THE DOCTORAL DEGREE

Minimum Credits: 1

Maximum Credits: 18

A registration unit for students preparing a doctoral dissertation or dissertation overview.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

ADMPS 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

Minimum Credits: 3

Maximum Credits: 3

This is a required course for all students in administrative studies which reviews and analyzes major issues and the means for managing institutional resources in education. Emphasis is placed on fiscal, human, and physical resources in both basic and higher education.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3104 - HIGHER EDUCATION INSTITUTIONAL STRATEGIC PLANNING

Minimum Credits: 3

Maximum Credits: 3

This course will provide a framework for the development of an integrated institutional strategic plan. It will examine the emergence of higher education planning, the development of preplanning activities, situational analysis, and the establishment of a planning process for the preparation of institutional and department plans.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3106 - STRATEGIC PLANNING AND EVALUATION

Minimum Credits: 2

Maximum Credits: 2

This course will focus on a variety of planning issues and evaluation processes in basic educational organizations. School leadership expectations regarding institutional, program and personnel planning and evaluation tasks will be addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES

Minimum Credits: 3

Maximum Credits: 3

Schools have a responsibility for students' health and safety while they are at school. Students who successfully complete this course will demonstrate their knowledge of research-based approaches to apply in accordance with Pennsylvania law in the areas of health, mental health, safety, and crisis management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES

Minimum Credits: 3

Maximum Credits: 3

This course presents a review of organization theories as they apply to schools and universities. Topics include organizational typologies, competing models of organizational structure, organization-environment linkages, and the evaluation of organizational effectiveness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

ADMPS 3127 - CURRICULUM: PERSPECTIVES AND ISSUES (K-12)

Minimum Credits: 3

Maximum Credits: 3

The course draws on current content in the field of curriculum studies. Contemporary approaches to development and research draw on increasingly diverse disciplinary perspectives and diverse methods of inquiry. Curriculum perspectives and issues are central to the often contentious educational discourses in the public arena as well as in the academy as curriculum decisions are being made related to policy, practice and research, informed points of view are crucial to those engaged in such work. This course is intended to capture some of the contentious local, national and international discourses for which the curriculum field is known and, in particular, how these discourses influence curriculum policy and practice toward intended and unintended consequences.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3128 - HIGHER EDUCATION BUDGET MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the sources of revenues available to colleges and universities and various methods for allocating these funds to academic and administrative functions. Specific attention will be given to topics of fund accounting, sources of revenue, the budget process, fiscal controls and monitoring.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3129 - HIGHER EDUCATION HUMAN RESOURCE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the development of human resource systems that facilitate the conduct of activities in colleges and universities through the effective and efficient utilization of faculty and staff. It will include such topics as human resource strategic planning, position control and monitoring systems, recruitment and selection procedures, evaluation procedures, development and training, incentive systems, salary administration, and fringe benefits administration. Various human resource policies and practices will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3130 - HIGHER EDUCATION PROGRAM MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with faculty and staff within an academic institution. It focuses on how faculty should be managed in order to achieve optimal organization performance. Specific topics addressed include: organizational theory, institutional goals, faculty and staff responsibilities and workload, research curriculum and academic organization. Special attention is also given to faculty and administrative evaluation and development. Group discussion and case studies are the principal instructional formats utilized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3131 - STUDENT, CAMPUS, AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

A seminar focusing on current research dealing with the impact of campus environments, experiences on and off campus, and family background on achievement, values, personal development, and life goals of students in higher education.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 3135 - SEMINAR IN COLLEGE TEACHING

Minimum Credits: 3

Maximum Credits: 3

The course is intended to provide a practicum-like experience for graduate students in the professions and disciplines who are teaching or expect to teach in higher education. Challenging topics include: analyzing and critiquing current syllabuses of class members; structuring the curriculum; teaching for understanding; process and content; teaching and learning in groups; becoming a dialogic classroom; encountering and responding to contentious discussion; and evaluating learning. Although topics will be considered conceptually through readings, the primary curriculum will develop as members of the class present specific issues from their emergent work. Participants will have the opportunity to explore their beliefs in teaching and learning as they consider a web between themselves, their subject and their students, in order to help their students learn how to weave a world for themselves.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 3136 - COMPARATIVE HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on contemporary problems in post-secondary education throughout the world. The seminar will begin with a brief historical introduction, followed by a review of case studies and other documents on higher education in the United States and other countries. Special attention will be given to an examination of comparative and contrasting policies and issues in higher education as they unfold in various developing regions and in the United States.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: African Studies, Asian Studies, Global Studies, Russian & East European Studies

ADMPS 3137 - CULTURE, INNOVATION & ORGANIZATION PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

Whether leading a department of 50 people or a division of 500, leaders need to understand the concepts, skills and practices that build strong organizational cultures. This course explores the cultural facets of organizational life in universities with special emphasis on improvement opportunities such as values clarification, cultural norms, innovation, process and people integration, key performance indicators, the balanced scorecard and the alignment of human resources systems such as hiring, faculty and staff development, performance management and career development. Students are introduced to a variety of methods used to encourage creative problem solving in teams; diffusion of innovation is explored in depth. Students work in teams with an actual University client to implement a benchmarking project, an important tool in improving organizational performance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3139 - LEGAL ASPECTS OF HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

The focus of the course is on federal and state law and higher education in the United States. Although time will be devoted to historical issues pertaining to higher education, most of the time will be devoted to in-depth discussions of contemporary issues. Issues that will be discussed include promotion and tenure, academic freedom, faculty dismissal, sexual harassment, research integrity, campus violence, and student affairs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3141 - POLICY STUDIES IN HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

After broad consideration of key policy issues in higher education--finance, quality, and access--this course considers organization theories in relation to theories of governance, decision-making processes in various institutions, and policy outcomes of these processes are also considered. American higher education is the major focus, international policy perspectives are included, as well.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3142 - ADVANCED SEMINAR IN HIGHER EDUCATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to current developments in the field of education. This course is designed for students who have completed a substantial part of their academic program and is presented in a seminar format. The specific topics addressed are changed from term to term to reflect the most current emerging issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3145 - CASE STUDIES IN POLITICS AND GOVERNANCE

Minimum Credits: 2

Maximum Credits: 2

This course provides an examination of politics and governance at the local, state, and federal levels. Through case studies of strategic importance, the class will examine critical leadership issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3147 - SOCIAL DYNAMICS AND ETHICAL LEADERSHIP

Minimum Credits: 1

Maximum Credits: 1

Students explore issues of equity, justice, right and wrong as these are practiced in contemporary America.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3148 - STRUCTURE AND CULTURE OF COMMUNITIES

Minimum Credits: 2

Maximum Credits: 2

A community's culture is important because it shapes the way that citizens react to events and policies. The way that a leader deals with culture can unite or divide a community. Culturally skilled leaders assess the uniqueness and structure of a community's culture, understand its diversity, manage cultural differences, and recognize cultural knowledge and traditions. A culturally proficient leader effectively interacts with a community's culture in ways that build trust and unity of purpose.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Provides a general overview of evaluation, which is defined as "providing information useful to decision-making". The various purposes of evaluation are identified, and the use of different types of information for each purpose are discussed. The variables that affect the usefulness of information are emphasized. Both evaluation theory and practical experience are utilized to prepare people who will be fulfilling an evaluation function, or using evaluation results for professional decision making.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ADMPS 3207 - SECTOR ANALYSIS AND PROJECT DESIGN

Minimum Credits: 3

Maximum Credits: 3

This is a reading and discussion seminar in which participants examine selected analytical and technical approaches used by multilateral and bilateral agencies in the design of appropriate policy meant to intervene in school systems around the world. The class will survey a number of examples of sector studies, projects, and project evaluations. Visiting lecturers will contribute experiences from their own international work in this area.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: African Studies, Global Studies

ADMPS 3208 - CASE STUDY METHODS IN EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the use of case study research methods in investigations of educational policy and practice. The limitations and possibilities of different approaches are considered. Knowledge and skills are acquired through field-based projects.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 3209 - HIGHER EDUCATION INSTITUTIONAL ASSESSMENT & ACCREDITATION

Minimum Credits: 3

Maximum Credits: 3

Course addresses processes and criteria used for evaluation and accreditation of post-secondary and higher education in situations and programs.

How to identify, obtain, and use meaningful information for organizational decision-making, such as institutional assessment, program evaluation, and benchmarking are investigated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ADMPS 3301 - SOCIAL THEORIES AND EDUCATION GLOBAL CONTEXT

Minimum Credits: 3

Maximum Credits: 3

Students will explore a range of social theories that may be helpful in informing how they understand and operate in educational institutions in local, national, and global economic, political, and cultural contexts. By examining and comparing a variety of theories and contexts, students will be encouraged to develop/refine their own theories of a) how and why society and education are organized as they are; b) how and why education and/or society have or have not changed; and c) how and why education and/or society should be changed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: African Studies

ADMPS 3302 - EDUCATION AND DEVELOPMENT DEBATES

Minimum Credits: 3

Maximum Credits: 3

This seminar introduces participants to the broad field of international and development education. The seminar considers alternative views about the roles played by education systems in progress and change. Case studies of education policy are related to intended and unintended consequences for national integration, economic growth, the distribution of welfare, and other outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: African Studies, Global Studies

ADMPS 3311 - WAYS OF KNOWING

Minimum Credits: 3

Maximum Credits: 3

In making a distinction between ways of knowing and procedures for knowledge generating, students in this seminar will examine various epistemological, ontological and axiological schools of thought that are the basis for educational inquiry. The focus will include assumptions that form the logics of justification for truth claims embedded in educational research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 3314 - EDUCATIONAL REFORM

Minimum Credits: 3

Maximum Credits: 3

This course examines the recurrent phenomenon of educational reform in a variety of settings and from a variety of social scientific perspectives. Focus is placed on the analysis of competing explanations of educational reform and the investigation of case studies from a variety of countries and time periods. Emphasis is given to examining whether reform campaigns are structurally similar and whether a general theory of educational reform is possible.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ADMPS 3343 - COMPARATIVE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This seminar introduces participants to the complementary fields of comparative, international, and development education (CIDE). Emphasis is on social justice issues in CIDE and the comparative analysis of policies and practices that constitute the organization, content, processes of education systems and institutions. Selected topics of continuing interest to educational researchers, policy makers, and practitioners are examined in relation to national and global cultural, economic, and political dynamics. Historical and contemporary examples are used to highlight the contributions of and challenges for those involved in CIDE.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: African Studies, Global Studies

ADMPS 3347 - INTERNATIONAL ORGANIZATION DEVELOPMENT EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This seminar reviews policies and practices of key international organizations and actors in the complementary fields of comparative, international, and development education (CIDE) and examines their impact on national and regional educational policies. Multilateral organizations (such as UNESCO, UNICEF, and the World Bank), bilateral organizations, nongovernmental organizations, faith-based organizations, community-based organizations, and regional agencies (e.g., the inter-American development bank, the Asian development bank, and the European union) will be among the organizations and actors studied.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Anthropology

ANTH 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1

Maximum Credits: 9

This course involves directed research and writing oriented towards the completion of a master's thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

ANTH 2441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 4

This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of a non (indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethnosemantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

ANTH 2490 - LINGUISTICS ANTHROPOLOGY CORE COURSE

Minimum Credits: 4

Maximum Credits: 4

This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Specific topics include: approaches to signs and significance; linguistic relativity (relationships between habits of speech, thought, and action); analysis of conversation and interaction; relationships between meaning and intention; models of variation and change; linguistic dimensions of cultural stereotypes; and the means by which languages, styles, and other aspects of cultural patterning, can be mapped onto populations. Throughout the course we pay particular attention to how tools from linguistic and semiotic anthropology can be applied to the study of topics other than language ' as a framework for ethnography, for textual research, and for the study of material culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

ANTH 2513 - SELECTED ARCHEOLOGICAL PROBLEM

Minimum Credits: 3

Maximum Credits: 3

Examines current topics and controversies in anthropological archaeology. Special problem areas vary from year to year.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

ANTH 2516 - CHIEFDOMS

Minimum Credits: 3

Maximum Credits: 3

Chiefdoms are defined more by what they are not than by what they are: societies whose hierarchical organization makes them non-egalitarian, but that lack the bureaucratic institutions of the state. Seen as stepping stones in the evolution of states or as part of another evolutionary trajectory entirely, chiefdoms are the subject of debate, including just in what sense, or even whether, the word "chiefdom" has any utility. This seminar discusses how chiefdoms can be investigated and understood archeologically, using materials from all the Americas, Polynesia, Europe, and other areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Asian Studies, Global Studies, Latin American Studies

ANTH 2517 - ARCHEOLOGICAL METHOD AND THEORY

Minimum Credits: 3

Maximum Credits: 3

This course surveys contemporary method and theory in anthropological archeology. It begins with varieties of high level theoretical approaches to a study of prehistory, including cultural historical, cultural evolutionary, cultural ecological systems-oriented, Marxist and post-Procession Archaeologies. It covers several methodological problems; construction of research designs, uses of analogy, style, classification and site level or regional level spatial analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2524 - ARCHEOLOGICAL DATA RECOVERY AND ANALYSIS 2

Minimum Credits: 4

Maximum Credits: 4

Advanced analysis of archeological data, primarily quantitative. This course carries on where ANTH 1534 leaves off. Topics include sampling, design of variable sets, advanced database management, computer graphics (plotting, contouring, fishnet surfaces), multivariate statistics (factor analysis, cluster analysis, multi-dimensional scaling), and analysis of spatial distributions (nearest neighbor, clustering, and graphical approaches).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2531 - HOUSEHOLD ARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar will explore the role of the household as an important analytical unit in anthropological archaeology. Topics to be addressed include: archaeological definition of residential units, modeling the evolution of domestic life, analysis of spatial patterns at the household level, and proxemic and symbolic approaches to the prehistoric dwelling. The seminar will also consider the relationship between households and larger societal structures and the cross-cultural compositional and dynamic characteristics of households will be examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, Latin American Studies

ANTH 2532 - ADVANCED TOPICS IN GIS: ANALYSIS OF REGIONS AND RESOURCES

Minimum Credits: 3

Maximum Credits: 3

A brief introduction to GIS techniques in the context of archaeological analysis. The focus will be on how to accomplish analytical tasks of proven utility in archaeology, using autocad map when a vector-based program is most useful and Idris when a raster-based is better. The course is designed to complement ant 2541: regional settlement patterns, although the GIS techniques dealt with are applicable to other scales of analysis as well.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2533 - ANCIENT STATES IN THE NEW WORLD

Minimum Credits: 3

Maximum Credits: 3

Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among pre-Hispanic states in MesoAmerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4
Maximum Credits: 4

An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2536 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 1

Minimum Credits: 1
Maximum Credits: 1

A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the fall term, and is concluded during the spring term in ANTH 2537: special topics in comparative archaeology ii. In order to receive credit students must complete both parts of the seminar (I and II).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2537 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 2

Minimum Credits: 2
Maximum Credits: 2

A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the spring term, and is the conclusion of ANTH 2536: special topics in comparative archaeology i offered during the preceding fall term. In order to receive credit students must complete both parts of the seminar I and II).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2541 - REGIONAL SETTLEMENT PATTERNS

Minimum Credits: 3
Maximum Credits: 3

This seminar will take up both theoretical and methodological aspects of regional settlement pattern studies in archeology. Appropriate objectives for settlement patterns will be discussed. Advantages and disadvantages of different field and analytic methodologies in terms of their effectiveness in achieving clearly defined goals will be explored. This exploration will be pursued primarily through critical examination and reanalysis of data from primary reports of regional settlement patterns studies from different parts of the world.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Latin American Studies

ANTH 2550 - ETHNOARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course will focus on issues in ethnoarchaeology and archaeological implications. Some of these issues have to do with theory and the role of analogy in understanding the past. Others concern how we can use material remains to make inferences about social groups including kinship, organization, ethnicity, work groups, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

ANTH 2551 - PEOPLES IN CONTACT

Minimum Credits: 3

Maximum Credits: 3

This course will examine contact between native and European cultures in the Americas from an archaeological and historical perspective. Prehistoric patterns of interaction including exchange and communication networks will be considered. The impact of this contact on both cultures will also be considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

ANTH 2553 - ARCHAEOLOGICAL CERAMICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide you with a broad introduction to archaeological ceramics. We will cover a number of topics during the course so that you will be conversant in the archaeological literature on pottery and will have a greater understanding of the types of research problems that are most readily investigated through the analysis of archaeological ceramics. You will also gain experience in handbuilding pottery vessels so you have an understanding of pottery from the perspective of the potter and will know how the limitations and possibilities within this medium affect both the manufacture and processes used in creating pottery. We also discuss a variety of archaeological analyses of pottery. Readings drawn from archaeological, ethnoarchaeological, and material culture literature are an important component of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2554 - HUMAN BEHAVIORAL ECOLOGY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ANTH 2555 - WORKSHOP IN PUBLISHING

Minimum Credits: 2

Maximum Credits: 2

This one-credit graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2588 - ARCHEOLOGY CORE COURSE

Minimum Credits: 4

Maximum Credits: 4

A broad introduction to current archaeological thinking on cultural evolution, focusing on early hunters and gatherers, the rise of agriculture and settled village life, the growth of complex societies, and the development of cities. Examines the recent intellectual controversies surrounding these topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2608 - PRIMATE BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2612 - EVOLUTIONARY THEORY 1: A HISTORY OF ALTERNATIVE IDEAS 18TH CENTURY UNTIL THE SYNTHESIS

Minimum Credits: 3

Maximum Credits: 3

This course will be an in-depth survey of the historical development of evolutionary thought, with emphasis on the alternatives to theories that became incorporated into the grand evolutionary synthesis and those alternatives that have emerged since. Students will read and annotate original works in comparative anatomy, embryology, paleontology, genetics and lead class discussion based on this literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2614 - HISTORY OF PALEOANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

In this course we will read primary literature that is relevant to the study of human evolution, both neo and paleobiologically. After a brief overview of the separate histories, and thus foci, of paleontology in general and human paleontology specifically, we will begin formal reading with Blumenbach's two major works, some Buffon, Linnaeus, and Lankester (and probably a few others), Huxley's essays of 1863, Darwin's descent these basically on the topic of "man's place in nature" and then delve into specific articles and monographs on the discovery, naming, and acceptance of human fossils. These readings will cover (but not necessarily be limited to) the debate between Schaffhausen and Fuhlrott, the naming by William, king of the first new hominid species (*Homo neanderthalensis*), the works of Eugene DuBois (*Homo erectus*) and Raymond Dart (*Australopithecus*) and reactions to them, the Leakeys' discoveries at Olduvai Gorge, and some of the more recent finds. We will also discuss *Ramapithecus* and its relevance to the still not satisfactorily answered question, "what is a homind?" The thrust of the course will be to tease apart fact from assumption as they were cobbled together in promoting one's favorite scenario on human evolution. Students will be expected to hand in annotated bibliographies based on the readings, and to take turns in leading discussion. Each student will also produce a term paper that will expand on a topic relevant to the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2617 - PALEOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Paleopathology is the study of disease and its process among ancient peoples using primary evidence from Human Skeletal remains. Additional lines of inquiry draw on archaeological, ethnographical, clinical and documentary sources to aid in our interpretation. In this course you will learn how to recognize abnormal bone, differentiate between disease processes, describe abnormal bone changes, evaluate recording methods and investigate the epidemiological history of various disease processes. The impact of disease upon the individual and ancient societies will be considered throughout the course and in student research. The combined lecture, seminar and laboratory format provides a comprehensive foundation of skeletal pathology, experience with recording methods and an understanding of the impact of disease on the individual and their community.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2619 - ADVANCED SKELETAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with an in-depth understanding of the skeletal features used to develop the osteobiographic profile (e.g., Age, sex, stature, ancestry, handedness, etc.) Of an individual. This analysis is essential for forensic identification and forms the foundation for the reconstruction of ancient individuals and their life-ways. Each student will select some aspect of skeletal analysis and present an overview of the bone biology, the history of the analytical methods, the problems and advantages of each method, modifications that others have made to address these issues, and the current state of knowledge. In the past, some students have proposed new methods of analysis. This will be complemented by a lab exercise designed by the student that will provide data for interobserver analysis of various techniques. The results of this lab will be presented as posters which will be posted on CW at the end of the term. Prior osteological experience is required.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2630 - PHYSICAL ANTHROPOLOGY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The student conducts independent research developed in consultation with, and carried out under the supervision of, a faculty member in biological anthropology.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

ANTH 2680 - BIOARCHAEOLOGY

Minimum Credits: 3

Maximum Credits: 3

The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an impression on the skeleton. We will assess how the individual experienced life and death through skeletal analysis, ethnography and the funerary context.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2687 - CORE COURSE IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2715 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Asian Studies, Global Studies

ANTH 2720 - POETICS AND POLITICS OF ETHNOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

The 1980s was described as "an experimental moment" in the human sciences and as a time of "crisis of representation" when anthropology has taken a literary, experimental, reflexive, modern, late-modern, postmodern, textualist turn. This seminar examines this experimental moment, its history and anthropological precursors, the critiques that have followed, and the suggestions for the future of ethnography and anthropological writing that have ensued. Readings include a number of recent experimental ethnographies as well as a sample of older "classics".

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2724 - THE ANTHROPOLOGY OF SCIENCE: GLOBAL PERSPECTIVES

Minimum Credits: 3

Maximum Credits: 3

Science and technology are integral to contemporary societies. Understanding how science is produced and how it shapes daily life is a crucial challenge for anthropologists, who have studied the production of scientific knowledge in labs, hospitals, field sites, and elsewhere. While early studies of science as a cultural practice focused primarily on the U.S. and Europe, science and technology are produced and consumed globally. Through analyses of case studies of biotechnology, medicine, genetics, conservation, agriculture, energy, climate science, and computing around the world, this class will investigate the global dynamics of science and technology. Juxtaposing readings on different scientific fields from around the globe, we will look for recurring themes that connect these studies. What happens when science and technology travel, and how do new places emerge as centers of knowledge production? How are culture, identity, technology, and science linked?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ANTH 2731 - MEDICAL ANTHROPOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course deals with topics surveyed in medical anthropology 1, looking at them in more ethnographic depth and with greater attention to current research findings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

ANTH 2735 - ECONOMIC ANTHROPOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on major trends and debates in economic anthropology, with an emphasis on economic change and the impact of industrialization and capitalism on the "third world" peoples. Particular attention will be placed on economic theory in anthropology, the nature and "future" of peasants as an analytical category, markets and market places, "moral economy" approaches, agricultural intensification, development and underdevelopment, and anthropological approaches to political economy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2737 - ANTHROPOLOGY OF FOOD

Minimum Credits: 3

Maximum Credits: 3

This course surveys the general subject of culinary anthropology. Topics include food exchanges and the construction of social groups, food and social boundaries, food taboos, symbolism of food, folk conceptions of food, sacrifice and food in religious contexts, world standardization of food preferences. Thus, the focus is on social aspects of food, eating, and exchange.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2741 - ANTHROPOLOGY OF LAW

Minimum Credits: 3

Maximum Credits: 3

This course will examine anthropological analyses of law and law-like phenomena in a number of different societies, concentrating on the development of theory in this field. Since this theory reflects larger theoretical developments in anthropology and in post-war social science, the study of the anthropology of law is a case study in the development of modern theoretical paradigms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Russian & East European Studies

ANTH 2744 - GRANTS AND RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

This seminar will focus on the formulation of individual research problems and research designs in preparation for thesis research. Course requirements center around the development of a research proposal which will include a research design, area and theoretical background, field techniques and procedures, methodology, data analysis, and significance of the research. Grantsmanship, including how to submit proposals to various agencies, will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2750 - CONTEMPORARY ANTHROPOLOGICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar surveys recent developments in anthropological theory, with emphasis on social and cultural anthropology. Topics covered vary with interests of students and the instructor. The course centers on the close reading of several contemporary texts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: African Studies, Global Studies

ANTH 2753 - CONFLICT AND VIOLENCE

Minimum Credits: 3

Maximum Credits: 3

This course surveys a number of anthropological theories regarding conflict and violence, with critical attention to the question of biological versus cultural determinants. Ethnographic materials are drawn from the Pacific and elsewhere. The focus is largely on tribal societies, but not exclusively so, and factors influencing peace-making as well as war are considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2763 - FIELD METHODS

Minimum Credits: 4

Maximum Credits: 4

Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ANTH 2782 - SPECIAL TOPICS IN CULTURAL ANTH

Minimum Credits: 3

Maximum Credits: 3

This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Asian Studies

ANTH 2789 - CULTURAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 4

Maximum Credits: 4

This course is an introduction to the anthropological study of human culture and society. We will examine how different modes of description and explanation in contemporary cultural anthropology are applied to various domains (e.g., How different peoples feed themselves, mate and have children, cooperate and fight with one another, deal with the inevitability of death, etc.). By comparing the ways the human beings cope with the natural environment and each other, we will seek a better understanding of ourselves and what it is to be human.

ASTRON 3550 - STELLAR STRUCTURE

Minimum Credits: 3

Maximum Credits: 3

Stars are the most common astrophysical objects. They create most of the atomic elements and most of the observable optical light in the sky. This class provides an overview of the physics of stars and the interstellar medium. Topics will include hydrostatic equilibrium, nuclear processes, radiative transfer, metallicity and opacity, convection, stellar evolution, stellar explosions, properties of the interstellar medium, and energy feedback from stars.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ASTRON 3580 - GALACTIC AND EXTRAGALACTIC ASTRONOMY

Minimum Credits: 3

Maximum Credits: 3

Galaxies are the fundamental building blocks of the present universe. This class will give an overview of galaxies, their properties, and their formation and evolution with an emphasis on current research areas. Topics will include observational properties (morphology, masses, colors, concentrations), scaling relations, evolution with redshift, stellar populations, gas and dust, dynamics and dark matter, evolution and mergers, and active galaxies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ASTRON 3705 - ASTRONOMICAL TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

This class will expose students to the basics of astronomical data analysis, with an emphasis on statistical techniques and the development of practical programming skills. Topics may include the nature of random and systematic errors, fitting and likelihood techniques, hypothesis testing, astronomical instrumentation and data reduction, and the use of large survey data sets.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ASTRON 3785 - COSMOLOGY

Minimum Credits: 3

Maximum Credits: 3

This class will give an overview of the standard cosmological model and the wide range of observational tests. Topics include the expansion history of the universe, thermodynamic history, nucleosynthesis, recombination, inflation, perturbations and the microwave background, structure formation, evidence for dark matter and dark energy, and future probes of dark energy.

Behavioral & Community Hlth Sci

BCHS 2135 - LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course examines theories about leadership and provides students with feedback on their own leadership styles. Leadership skills are defined and

applied. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Concepts regarding organization leadership are introduced. The course combines theory with practical application. It is highly participative and students are expected to join in a wide range of exercises and simulations. The two major assignments require that the students work in teams with other students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2503 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

Short term field placement relevant to the student's area of interest in an operating organization or agency.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Health communication is the art and technique of informing, influencing, and motivating individual, institutional and public audiences about important health issues. The scope of health communication includes disease prevention, health promotion, health care policy and the business of health care as well as enhancement of the quality of life and health of individuals in the community. This class will introduce the theories and research that underlie health communication. The course will examine health communication campaigns, planning health communication and developing a health communication campaign.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

The core course provides an overview of the social and behavioral sciences and their importance in the inter-disciplinary field of public health. A primary emphasis is on the social-ecological model, its application to public health issues, and its use in the development of policies, strategies, interventions and programs. The course content will introduce students to several relevant social and behavioral theories as well as a range of community health assessment and planning models used by public health professionals in both domestic and international venues. Through a series of assigned readings, discussion exercises, group projects, quizzes and written assignments, students will enhance their knowledge and awareness of the role of social and behavioral sciences in public health and its relevance to their specific discipline. At the conclusion of the course students will be able to: identify the important social and behavioral determinants of health; describe the inter-relationships between the social, behavioral, bio-medical, physiological, and environmental factors related to individual and community health; identify the major health disparities related to social, behavioral and economic factors; describe the role of culture and socio-economic status in health behavior, access to services, and decision-making; and understand the importance of community partnerships and participatory approaches in the development, implementation, management and evaluation of community policies and programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2511 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students with major interests in specialty areas participate in courses of individual study, research activities, or advanced readings with a specified faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

BCHS 2515 - WORKSITE HEALTH PROMOTION

Minimum Credits: 2

Maximum Credits: 2

This course covers the design and implementation of worksite health promotion programs. The course will examine both the benefits of worksite health promotion and the challenges of implementing a meaningful program. Students will review various planning models and plan theory-based incentive programs designed to promote health within the worksite setting.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2516 - VIDEO FOR HEALTH PROMOTION

Minimum Credits: 3

Maximum Credits: 3

Video is an increasingly important media for the distribution of health promotion messages. The purpose of this class is to provide students with basic principles of script development and the video production process to be able to produce educational and persuasive short-form videos for health promotion. Students will develop, direct, and produce short-form health promotion videos for distribution on social media platforms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION

Minimum Credits: 1

Maximum Credits: 1

The course is designed as an introduction to the major theories that are the foundation for most health promotion and health education interventions. It will provide the student with exposure to the current theories that are being used in health behavior and health promotion educational interventions. Also it will provide students with a theoretical foundation for designing, implementing and evaluating health promotion and education programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)

Course Attributes: Global Studies

BCHS 2521 - ESSAY

Minimum Credits: 1

Maximum Credits: 3

The essay requirement is designed to provide the student with an opportunity to integrate the major components of the public health learning experience. The student is expected to demonstrate verbal and technical proficiency in expository writing.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

BCHS 2522 - PUBLIC HEALTH PROGRAM PLANNING

Minimum Credits: 3

Maximum Credits: 3

Public health program planning is a multi-phase process that involves people with different perspectives and stakes, and a planning model is often

used to establish comprehensive thinking and oversight throughout the process while applying specific skills and techniques at certain phases. This course introduces such planning models and principles and discusses participatory program planning in multiple phases in lectures and class exercises.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)

BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expose students to critical health program planning, implementation and evaluation tools and strategies in a format that models actual program implementation. It is a required course for BCHS master's students and has been developed in response to requests from students for guidance in developing the skills necessary for the effective execution of public health interventions. This class complements other bchs coursework in that it gives the student the opportunity to apply theories and models learned in other classes. In particular, the socio-ecological theory heavily influences the content of this course. Through discussions, presentations, written assignments, and in-class activities, students will learn resources for, and gain practice in, the stages of program development, including budgets and use of logic models. Students will learn how to present their program proposals in both written and oral formats.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH, PHD)

BCHS 2524 - OVERVIEW OF HEALTH EQUITY

Minimum Credits: 3

Maximum Credits: 3

Achieving health equity and understanding health disparities involve a critical analysis of historical, political, economic, social, cultural, and environmental conditions that have produced an inequitable health status for vulnerable populations in the United States. Health disparities are an important focus on improving population health and one of healthy people 2020's overarching goal is 'to achieve health equity, eliminate disparities, and improve the health of all groups'. The purpose of this class is to introduce basic issues that underlie health disparities. This course will include an overview of current literature and foster discussions that will examine health disparities, explore social and environmental determinants of those disparities, critically review measurement issues, and determine public health's response to addressing these disparities and achieving health equity. Students should seek to critically reflect on their personal and professional roles in eliminating health disparities and achieving health equity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The goal of the course is to give students a basic understanding of social and behavioral sciences research principles, as well as how these methods are implemented in the field of public health. Relationship of applied research to program evaluation, the link of theory to research, and the translation of research information to applied public health programs and policies will be emphasized. Participatory research will be highlighted. Quantitative and qualitative strategies, research designs, data collection methods, participant selection, and data analysis will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH, PHD)

BCHS 2526 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

This course is one of the series of courses required for the certificate in health equity, and will examine the challenges in, and methods for, health inequities research and interventions. It is intended to both complement and expand upon the knowledge gained in other BCHS courses and/or professional exposure by focusing on a wide range of populations that experience health inequities. Inequities that we will explore include (but not be limited to) those evidenced by gender, ethnicity, disability, socioeconomic status, sexual orientation, and rural/urban living. Through discussions, presentations, written assignments, and in-class activities, students will gain exposure to methods and resources for research in health inequities. This will include ethics and research in diverse communities; barriers and facilitators to engaging diverse populations in health research; advisory boards and coalitions; data bases and research designs utilized in equities research, and the application of research findings to program development. Students will work both in interdisciplinary teams and individually to effectively present their work in written and oral presentations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2528 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Minimum Credits: 1

Maximum Credits: 1

This one credit seminar serves as the integrative course for the health equity certificate. Students build upon and apply the knowledge and experiences gained from all of the previous certificate core and elective courses to specific public health problems while considering a health policy framework. The seminar is designed to expose students to the critical analysis of a health policy as it affects health equity, as well as provides an opportunity for students to network with a variety of academic and community leaders that can potentially further their knowledge and practical skills in this area.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Asian Studies, Global Studies

BCHS 2534 - CLINICAL ASPECTS OF DEMENTIA CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed as an independent study for students in the public health and aging program. Its focus is on the methods and technology for diagnosis and treatment of Alzheimer's Disease.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2551 - SOCIAL NETWORKS & HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is an introduction to the theory, methods, and procedures of network analysis with emphasis on applications to health and social behavior. The goal of the course is to provide a working knowledge of concepts and methods used to describe and analyze social networks so that professionals and researchers can understand the results and implications of this body of research. The course also provides the training necessary for scholars to conduct network analysis in their own research and practice careers.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course uses strengths-based and social ecological approaches to prepare students for practicing public health with communities. Through in-class activities, discussions, community-based experiences and written assignments students will learn appropriate ways to engage communities and assist them in building their own capacity to identify and address health issues. Students will also learn techniques for conducting community health assessments using both primary and secondary data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD, DPH, MPH)

Course Attributes: Community Element - Building Understanding

BCHS 2558 - HEALTH PROGRAM EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Surveys the evaluation and policy research methods applied to health. Students learn to critically assess the adequacy of evaluations and how to plan and pilot test an evaluation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

The impact of population growth, distribution, and change on social, economic, environmental, and health relationships is presented with a focus on the sociopolitical responses to population dynamics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: Global Studies

BCHS 2562 - SEMINAR IN FAMILY PLANNING

Minimum Credits: 3

Maximum Credits: 3

Participants explore the history of contraception and the birth control movement. Issues related to contraceptive care and the broader concerns of women's health are discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2563 - COMMUNITY HEALTH ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Techniques for assessing and projecting selected community characteristics and population health status from the view point of community health programming. Covers both primary and secondary data such as demographic data, health-care utilization and survey data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade
Course Attributes: Global Studies

BCHS 2572 - RISK COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

Course focuses on risk communication within the context of terrorism and natural disasters. The didactic and experiential course will include core principles of risk communication, examine special challenges of risk communication with diverse audiences and media, and prepare students to create risk and crisis communication campaigns.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2575 - SEMINAR MATERNAL AND CHILD HEALTH

Minimum Credits: 3

Maximum Credits: 3

Seminar deals with current issues in society affecting the health of children and their families. For example, problems of adolescent pregnancy, child abuse and neglect, emotional abuse and sexual abuse; prevailing attitudes and responses; etiology and risk factors; and multidisciplinary preventive strategies.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2579 - INTRODUCTION TO PUBLIC HEALTH EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

Introduction to role of public health professionals in community emergency planning and response to all types of disasters. Covers theory and practice of incident command system, role of local, state and federal agencies, surveillance and information systems, risk communications, training and evaluation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2592 - INTEGRATIVE SEMINAR PUBLIC HEALTH SOCIAL WORK

Minimum Credits: 1

Maximum Credits: 1

Provides the social worker an opportunity to integrate previous course content into a framework relevant to the practice of public health social work.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

BCHS 2598 - SOCIAL INEQUALITIES IN HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course critically evaluates social science and epidemiological theory and research on social inequalities in health. A consistently important finding is the positive gradient between socioeconomic position and health. Is this gradient socially patterned? This question is examined by drawing on research from U.S., Other industrialized countries, and the third world. This course devotes special attention to conceptual and measurement issues, the social context of health, hierarchical linear modeling or multilevel analysis, and ecological and life course perspectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOS 2011 or EPIDEM 2110

BCHS 2599 - PUBLIC HEALTH APPROACHES TO WOMEN'S HEALTH

Minimum Credits: 3

Maximum Credits: 3

Public health problems affecting women, i.e., Alcoholism, smoking, occupational health, reproductive health, aging and cancer, as well as health and social problems relating primarily to women are discussed. Etiology of health problems, prevention and treatment, high-risk groups, and controversies related to care are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BCHS 2600 - HARM REDUCTION APPROACHES IN HEALTH AND PUBLIC HEALTH SETTINGS

Minimum Credits: 1.5

Maximum Credits: 1.5

The aims of this seven week course are to introduce students to harm reduction (HR) principles as a conceptual approach to care rather than simply as a set of strategies, like syringe exchange, and to challenge them to consider how HR-informed approaches to care may improve participant and provider outcomes. The approach to care builds on lessons learned from community and provider settings that have demonstrated success in engaging and caring for marginalized populations including those who use substances. However, this course extends the conversation about harm reduction to aspects of care that can promote health improvement among all patient and client populations, not just those who use drugs. Concepts that will be discussed include universal harm reduction and herd harm reduction. The course will incorporate a number of speakers who will address the application of HR in specific settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course is organized around themes central to the conceptualization and implementation of community-based participatory research (CBPR). The goal of this course is to familiarize students with CBPR. Students will become conversant in seminal CBPR literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in translating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in kt as an aspect of community-partnered research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Minimum Credits: 1

Maximum Credits: 1

This course provides hand-on training in the participatory research method known as concept mapping (cm). Cm gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cm and the associated strengths and limitations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to prepare students to effectively manage a range of public health projects. The course is lecture/discussion/laboratory/application based. Project management software is used including Microsoft Project and Visio. Industry standard body of knowledge is the foundation of the course further illustrated with case studies and examples. There are no pre-requisite courses or software skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is an introduction to historic and current concepts about complex, dynamic systems in public health research and practice. We will discuss the rationale for adopting systems thinking - an approach to analyzing the impact of systems within their social, spatial, and temporal context - in behavioral and community health research and practice and illustrate how this approach is critical for the development of public health policy. The course will include didactic sessions, guest lectures, hands-on engagement with tools that allow us to represent dynamic social systems, as well as seminar-style discussions of studies that examine dynamic social systems in public health. (Note: BCHS 2520 is recommended.)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate Sch of Public Health

BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH

Minimum Credits: 1

Maximum Credits: 1

Multilevel analysis is an essential statistical tool in public health that can simultaneously investigate the effects of factors at multiple social ecological levels on individual-level outcomes. In this course, students will learn to identify scientific problems that necessitate the use of multilevel statistical modeling techniques and understand the essential theoretical underpinnings of multilevel analysis. Students will conduct multilevel statistical modeling procedures using Stata and interpret the statistical and practical meaning of fixed and random effect coefficients from the output of these models. Special emphasis will be placed on the strengths and limitations of multilevel analysis in investigating social and group-level determinants of health. BIOST 2041, PSYED 2018, or permission to enroll from the instructor required. Knowledge of linear regression, logistics regression or ANOVA strongly preferred.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2992 - SYSTEMS THEORIES AND APPROACHES

Minimum Credits: 1

Maximum Credits: 1

Systems science approaches were developed to understand connections between a system's structure and its behavior over time. The use of such approaches within public health research and practice has grown tremendously over the past decade. Identifying and understanding the dynamic relationships between individuals and their social and physical environments can help us identify potential leverage points for intervention. This course provides an introduction to systems thinking and models in public health, explores the importance of associated theories and underscores the utility of systems science approaches within public health research and practice. We will highlight current systems science public health research and encourage students to think critically about the utility of systems theories and approaches within public health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 2995 - GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: EMPOWERMENT, GENDER EQUALITY, AND HEALTH

Minimum Credits: 2

Maximum Credits: 2

Limited educational opportunities, financial dependence, and gender bias and discrimination are intersecting factors that contribute to poor health status and well-being among women around the world. This course examines the relationship between such macro-level factors and women's health and explores promising interventions and policy changes aimed at promoting women's empowerment, gender equality, and improved and sustained health outcomes for women. Specific attention is given to examining the connection between women's health and educational and legal initiatives and microfinance programming. Illustrative case examples are drawn from instructor global experience conducted on related research in Thailand, India, and Peru and relevant readings. Key health issues discussed will include gender-based violence, reproductive and sexual health, and pregnancy outcomes. To emphasize key points, guest speakers from diverse fields, including women's studies, ethics, law, and economics will be invited to provide additional insights regarding the complexities associated with the topic and with effective and innovative intervention development.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 2999 - MODELING COLLECTIVE BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

Students will learn how to create dynamic models of health behavior in social context. We will study social ecological models of individual and collective action emphasizing the collective properties such as cooperation and policy resistance that often emerge. Students will learn how to: apply these models to plan and evaluate health interventions and policy; use systems thinking to model health problems; use simple software to create agent models; interpret results and describe public health implications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 3002 - HEALTH SURVEY METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduces techniques for the collection of health data through survey methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

Evaluates theory and methodology with emphasis upon human service organizations.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

Every graduate of a doctoral program needs to know how to write a successful grant application to fund their work. Whether you are a senior manager leading a public health program in the public or non-profit sectors or you are a researcher working in an academic setting, you will need funding to support your work! We begin this doctoral seminar by asking the question, "how do you write a grant proposal that will attract the attention of a funding agency and convince them that your application is significant and should be a priority for funding?" building on the ideas articulated in BCHS doctoral students' preliminary examination, we will focus on writing the specific aims and significance sections for an NIH grant proposal. The students' written work will be shared with and critiqued by other students and faculty participating in the seminar. Finally, we will review and critique examples of successful and unsuccessful grant applications "both program and research grants (especially research grants that the students will most likely be writing at the beginning of their academic careers" namely, ro-3s or r-21s).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Attributes: Global Studies

BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION

Minimum Credits: 1

Maximum Credits: 1

The Integrative Research Seminar: Writing for Publication focuses on the process of developing a manuscript for publication in a peer-reviewed journal. All doctoral students must develop the skills to enable them to write and publish the results of their work. The goal of this seminar is to provide students with the requisite knowledge and skills to develop a manuscript for submission to an appropriate journal for publication. As part of this process students will also learn about the peer review process and how reviewers rate manuscripts submitted for publication. It is expected that students in this seminar will work closely with their academic mentor(s) on the development of manuscripts throughout their doctoral program. And, this seminar will assist students in fulfilling the requirement to submit at least one first-authored manuscript-- ideally based on their dissertation research, before they graduate. The seminar content will be delivered via a series of faculty presentations and discussions. There are no prerequisites for this seminar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PhD or DPH)

BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Students will be introduced to the basic principles of ethnographic research and their application to the evaluation of human service and health care programs. They will become familiar with research design in ethnographic studies; the process of fieldwork in urban settings; the methodology of participant observation and ethnographic interviewing; recording ethnographic data; ethnographic writing; and ethical questions surrounding ethnographic research.

Academic Career: Graduate

Grade Component: Grad Letter Grade

BCHS 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

This course provides an introduction to the use of spatial data in public health. The two main goals are (1) to familiarize students with the use of geographic data in public health research and practice; and (2) to introduce basic spatial analytic skills applied to geographic and spatial data. Students will be taught how to use geographic information systems (GIS) to inform both community practice and research. They will learn how to create, manage, and analyze geographic data and gain hands-on experience applying these techniques to research questions. No previous knowledge of mapping or GIS is assumed. One lecture and one lab per week.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES

Minimum Credits: 2
Maximum Credits: 2

The goal of this two-credit course is to provide you with fundamental skills to identify, use and create scales and indices for research and evaluation. The course will be primarily based on classical measurement theory, yet we will discuss item response theory as well. We will also cover good measurement processes, including establishing and evaluating validity and reliability. We will address communication of measurement principles and applications to lay and scientific audiences. Throughout the course, materials will highlight the influence that culture and socio-demographics have on measurement tools and their validity.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE

Minimum Credits: 3
Maximum Credits: 3

The purpose of this course is to provide a solid grounding in basic concepts, theories, practical approaches and methods associated with prevention (defined here as both problem prevention and health promotion). The course will focus on behavioral and psycho-social areas including substance abuse, mental health, victimization, and sexually transmitted infections, including HIV.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Community Element - Building Understanding, Community Element -General Community Impact

BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS

Minimum Credits: 3
Maximum Credits: 3

This doctoral seminar provides an opportunity for in depth exploration of health communication topics with a particular emphasis on critical analysis of past and current health communication techniques and the application of current best practices in health communication. This class is required for DRPH students in BCHS and will allow students to explore health communication issues within their individual fields of interest.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

BCHS 3508 - ADVANCED METHODS IN COMMUNITY-BASED PARTICIPATORY RESEARCH AND PRACTICE IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course is organized around themes central to the conceptualization and implementation of community-based participatory research and practice (CBPRP). The goal of this advanced course is to familiarize students with methods for conducting community-based participatory research and practice. Students will become conversant in seminal community-based participatory research and practice literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an advanced understanding of the appropriate methods for studying complex community issues. In addition, the course will discuss strengths and limitations related to community-based participatory research and practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BCHS 2559

BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS

Minimum Credits: 3

Maximum Credits: 3

This course is a requirement for students in the doctoral program in the department of behavioral and community health sciences. The seminar is designed to stimulate critical thinking about specific public health issues from within the framework of various behavioral and community theories and models. The purpose of this doctoral seminar is to critically apply and evaluate specific conceptual models and theoretical frameworks to particular significant public health problems or issues. This requires that seminar participants acquire close working familiarity with various conceptual tools and substantive issues. One goal underlying the selection of the substantive issues has been to select those which challenge, provoke, confront, excite, and stimulate seminar participants about economic and political controversies in contemporary healthcare and public health. Similarly, the selection of issues and reading materials dealing with those issues, challenge taken-for granted assumptions with respect to health and illness, public health and medical care as well as health policies and health politics. A final objective of the seminar is to challenge participants to reassess their conception of the field of public health and their place in it. Is it a profession? A discipline? An applied social science? What are the implications/consequences of each?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

The purpose of the executive management practicum is to provide a structure for students in the DRPH program to gain experience in the application of the core set of competencies in high level practice settings. The association of schools of public health has identified seven competencies that students are expected to master during their doctoral study. Four of these are the focus of the practicum: advocacy, communication, leadership, and management. Practicum sites will be chosen based on the mission of the organization and the opportunity for the student to be able to exercise and refine their skills in the areas of management, leadership, communication and advocacy.

Academic Career: Graduate

Course Component: Practicum

BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI

Minimum Credits: 3

Maximum Credits: 3

This course was designed to teach advanced graduate students how to use applied multivariate regression analysis to design, propose, and test complex research questions using a causal modeling framework. The course will include a brief review of simple linear regression, and quickly move to advanced multiple regression analysis topics including multiple predictor regression, stepwise regression approaches, the analysis of longitudinal

data with regression, and examining mediators, moderators and confounding variables and their relationship to the independent and dependent variables of interest. The course will also include several other brief seminars on regression diagnostics, dichotomous predictors and outcome variables, power analysis, and an introduction to other multivariate analysis frameworks including structural equation modeling and longitudinal growth modeling. Students will be required to bring their own multivariate data set and research questions to use for class assignments, preferably data directly related to their dissertation project.

BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION

Minimum Credits: 1

Maximum Credits: 3

This course is designed to be an independent study for BCHS doctoral students in order for them to be able to read and prepare for their comprehensive exam. The purpose of the BCHS comprehensive examination is to "to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline".

Bioengineering

BIOENG 2001 - MATHEMATICAL METHODS IN BIOENGINEERING 1

Minimum Credits: 3

Maximum Credits: 3

All you don't want to miss in mathematics will be covered in this first course of bioengineering graduate students. Solving systems of linear equations and ordinary differential equations will be covered with engineering examples and assignments. Finite difference methods for boundary value problems, Laplace equation, Poisson equation, parabolic partial differential equations, and hyperbolic differential equations will be discussed along with project assignments. Fourier series will be introduced as well.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE

Minimum Credits: 3

Maximum Credits: 3

The course will cover topics related to applied electromagnetics in medicine. Topics such as Maxwell equations, wave equations, transmission lines, electromagnetic theorems, introduction to antennas, and introduction to computational electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications such as MRI, biological sensors, RF ablation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Engineering

BIOENG 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE

Minimum Credits: 3

Maximum Credits: 3

Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the

craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology. Introduction to materials science and engineering would be preferred but is not a prerequisite.

BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS

Minimum Credits: 4

Maximum Credits: 4

Biomedical and chemical engineering graduate students require a similar comprehensive understanding of the underlying principles of heat transfer, chemical species transfer, and momentum transfer or fluid mechanics. This graduate course provides a unified treatment to heat, mass, and momentum transfer at the graduate level. The first part of the course covers the constitutive relations that describe the diffusive flux of material properties, including thermal energy, chemical species concentration, and momentum. Conservation principles and boundary conditions are covered for these material properties and numerous example paradigm problems of steady-state unidirectional (1-D) transport in biomedical and chemical engineering applications are reviewed. The second part of the course covers more advanced concepts including non-Newtonian rheology, unsteady state and 2-D transport, convective transport processes, turbulence, and creeping flow. The focus throughout is on extensive problem-solving and computer simulation using Comsol multi-physics using both biomedical and chemical engineering examples.

BIOENG 2045 - COMPUTATIONAL CASE STUDIES IN BIOMEDICAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Bioengineering 2045 computational case studies in Biomedical Engineering this is an interdisciplinary course that will combine: basic sciences such as electromagnetics and thermodynamics applied sciences such as numerical methods and simulations biomedical research and applications such as magnetic resonance imaging, hypothermia, heat transfer in biological bodies, and cardiac action potential, and mathematical concepts such as optimizations, linear and nonlinear equations. This course will be based on solving computational biomedical engineering problems using

simulations. Some of the numerical topics will include: numerical solutions of matrices, finite element and finite-difference methods. These topics will be described with emphasis on their use in solving these problems. The course will cover setting up the mathematical description of the models and solving these problems using advanced computer codes and the supercomputer center at Pittsburgh. There will be 1d, 2d, and 3d modeling projects.

Academic Career: Graduate

BIOENG 2055 - BIOMEDICAL FLUIDS MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Biomedical Fluid Mechanics is an upper-level undergraduate / graduate course designed to study how momentum (i.e. fluid flow) principles arise and are applied in the biological, physiological, and medical sciences. The course is not exhaustive but focuses instead on several specific systems in which 1) the application of fluid mechanics enhances understanding of the underlying biomedical process; and/or 2) the biomedical process itself teaches an important and sometimes novel fluid mechanical principal. The principal means of analyzing biofluid mechanics in this course will be through the application of differential mass and momentum balances. These principles will be applied only after the student has gained a qualitative understanding of the biomedical process and they will take the student to a quantitative understanding. The course will primarily study principles of fluid mechanics in the cardiovascular system, respiratory system, and in several medical devices in which fluid mechanics plays an important role in relevant design principles. Students will have the opportunity to select topics relative to fluid mechanics that may be relevant to their research projects.

Academic Career: Graduate

Course Component: Lecture

BIOENG 2061 - ERGONOMICS & OCCUPATIONAL BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of ergonomics as applied to the industrial workplace. Specific topics include: occupational biomechanics, anthropometry, work physiology, cumulative trauma disorders and slip and fall prevention applied to the organization and physical design of the workstation, effects of hand tool design on workers, and analysis of manual material handling jobs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

BIOENG 2095 - GRADUATE PROJECTS

Minimum Credits: 1

Maximum Credits: 6

Individual study program under guidance of faculty member.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

BIOENG 2150 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3

Maximum Credits: 3

A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by FDA and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOENG 2150; PROG: Swanson School of Engineering

BIOENG 2154 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY

Minimum Credits: 1

Maximum Credits: 1

Design for Manufacturability (DFM) provides a systematic methodology that can be used to analyze product design for improvements in assembly and manufacturing. Students will use DFM to redesign current products for changes in manufacture that lead to reduction in production cost and improved operability/ customer satisfaction. Students will employ modern software tools that accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements. Course Objectives : Students will gain hands-on experience incorporating the DFM concepts in a project. Upon completing the course, the students should be able to describe the utility of DFM in product development and early manufacturing design, be able to quantitatively evaluate the impact of design choices on manufacturing cost, and be able to use modern quality control concepts and approaches.

BIOENG 2162 - MEDICAL PRODUCT PROTOTYPING 3

Minimum Credits: 2

Maximum Credits: 2

Student teams, under the mentorship of participating PMIC faculty (SSOE, SHS, business, law), will use the resources of the SWANSON innovation center to create a prototype of the most promising device/system from BIOENG 2161 for preclinical and clinical evaluation. Student teams will produce a medical device/product prototype and complete documentation set suitable for technology transfer. Can take up to 3 times.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

Medical product ideation, prototyping, and development are cornerstones for identifying unmet clinical needs and navigating the complexities of the development process. But how does one translate new medical products into the marketplace? Entrepreneurship is a discipline with established tools and methods that must be properly harnessed in order to translate medical products into a startup or an incumbent company (big or small.) After the completion of this course students will be able to understand and differentiate between 'right sized' entrepreneurial methodologies for both startups and existing companies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

BIOENG 2166 - MANAGING MEDICAL PRODUCT RESEARCH AND DEVELOPMENT

Minimum Credits: 4

Maximum Credits: 4

This course will provide the student a theoretical and practical knowledge of professional project management for medical product development in industry. Through lectures, workshops, and industry seminars, students will acquire skills in the following areas: 'project engineering, project management, and innovation management. 'Managing product portfolios. Strategic planning and product planning. 'Creating and managing effective project teams. 'Stage gate process and lean methodology. 'Concurrent engineering. 'Project management tools, including: 'systems engineering 'work breakdown structures' budgeting' resource allocation and scheduling 'monitoring and control of product development students will be introduced to project management tools developed by PDMA (product development and management association) and the PMI (project management institute). The course will be taught by industry professionals with long experience in the medical products industry.

BIOENG 2170 - CLINICAL BIOENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on the early stages of the innovation process; strategic analysis of complex clinical problem solving through the needs finding, concept generation and refinement. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), interview and observe clinical personnel at the University of Pittsburgh school of medicine performing clinical work in order to rigorously define and document clinical needs in the environment of use. Using principles articulated in BIOENG 2150 (medical product ideation), the students produce a document that clearly defines and communicates one or more clinical problems and prioritized feasible solution paths.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOENG 2150; PROG: Swanson School of Engineering

BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on the later stages of the innovation process; prototyping, market analysis, strategic planning, intellectual property protection, and business planning. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), will apply the principles and techniques from BIOENG 2151 (medical product development) and prioritize clinical needs identified in BIOENG 2170 (clinical bioengineering) and, using the resources of the Swanson Innovation Center, create a prototype for pre-clinical and clinical evaluation. Students will use basic principles of intellectual property (IP) for engineers and publicly available search tools to determine patentability, freedom to operate, and patent strength. Students will then produce a medical device/product prototype and complete documentation set suitable for technology transfer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOENG 2170; PROG: Swanson School of Engineering

BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES

Minimum Credits: 3

Maximum Credits: 3

Human Factors Engineering (HFE) is the application of knowledge about human behavior, abilities and limitations to the design and evaluation of products and systems. HFE draws upon a number of disciplines, such as biomechanics, anthropometry, design, physiology and psychology to improve performance, reduce human error and enhance safety. The application of HFE to medical devices is critical to their effective and safe use. This is recognized by industry and regulatory agencies. In fact, all medical devices that are used by patients or clinicians are required to have a human factors evaluation in order to be approved by the Food and Drug Administration (FDA). This course focuses on the application of HFE in design, development and evaluation of medical devices. The educational goals are: a) to learn the fundamentals of HFE relevant to medical devices, and b) to understand the HFE process in medical device design and evaluation according to the Food and Drug Administration (FDA). The course will include didactics and hands-on experience.

Academic Career: Graduate

Course Component: Lecture

BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC 1

Minimum Credits: 3

Maximum Credits: 3

This course teaches students the conceptual tools needed to identify, articulate and resolve practical, everyday, ethical dilemmas inherent in the diverse field of bioengineering. A learning environment where practical ethics can best be understood is fostered. This includes the use of case-based instruction, small group discussion and out of class practical ethics activities including a department- sponsored "field trip" to observe an FDA Panel Meeting in DC. Guest speakers discuss current cases and issues in bioethics. These speakers include: BIOENG post docs as well as faculty with experience in industry, academic research, applied ethics and the FDA. The capstone project requires students, working in groups, to author an ethics case study based on their research and analyze it using methods taught in the course.
