University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Affirmative Action, Diversity and Inclusion, Pamela W. Connelly, Associate Vice Chancellor, 500 Craig Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this policy, please refer to Procedure 07-01-03.

About the University of Pittsburgh

The University of Pittsburgh is an internationally respected center of learning and research, offering exceptional educational opportunities in the arts, sciences, and professions.

Mission

The University of Pittsburgh, founded in 1787, is one of the oldest institutions of higher education in the United States. As one of the nation's distinguished comprehensive universities, the resources of the University constitute an invaluable asset for the intellectual, economic, and social enrichment of Pennsylvania, while the international prestige of the University enhances the image of Pennsylvania throughout the world.

The University's mission is to:

• Provide high-quality undergraduate programs in the arts and sciences and professional fields, with emphasis upon those of special benefit to the citizens of Pennsylvania;

• Offer superior graduate programs in the arts and sciences and the professions that respond to the needs of Pennsylvania, as well as to the broader needs of the nation and the world;

• Engage in research, artistic, and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavor;

• Cooperate with industrial and governmental institutions to transfer knowledge in science, technology, and health care;

• Offer continuing education programs adapted to the personal enrichment, professional upgrading, and career advancement interests and needs of adult Pennsylvanians; and

• Make available to local communities and public agencies the expertise of the University in ways that are consistent with the primary teaching and research functions and contribute to social, intellectual, and economic development in the Commonwealth, the nation, and the world.

The trustees, faculty, staff, students, and administration of the University are dedicated to accomplishing this mission, to which they pledge their individual and collective efforts, determined that the University shall continue to be counted among the prominent institutions of higher education throughout the world.

History

The University began in the Pennsylvania wilderness as the Pittsburgh Academy in 1787, the year the U.S. Constitution was adopted. Thirty-two years later, the Pittsburgh Academy became the Western University of Pittsburgh, and in 1908, the school changed its name to the University of Pittsburgh. Graduate degrees have been conferred since 1836, and the first doctoral program was developed in 1884. A private institution for most of its past, the University of Pittsburgh became state-related in 1966, establishing a relationship with the Commonwealth of Pennsylvania that continues to benefit both partners. Today, as an elected member of the prestigious Association of American Universities, the University of Pittsburgh claims its place among the top public research universities in the nation.

Accreditation

All campuses of the University of Pittsburgh are accredited by the Middle States Association of Colleges and Schools' Commission on Higher Education 3624 Market Street, Philadelphia, PA 19104, (267) 284 - 5000. Schools, programs, and departments may furthermore be accredited by discipline-specific accrediting bodies.

Academic Organization and Pittsburgh Campus Overview

As a state-related, coeducational institution, the University of Pittsburgh's Pittsburgh campus offers a multitude of degree-granting and other programs housed in 16 undergraduate, graduate, and professional schools. The University system includes the Pittsburgh campus and four regional campuses at Bradford, Greensburg, Johnstown, and Titusville.

There are more than 100 academic, research, and administrative buildings and residence halls located on the Pittsburgh campus, which covers 132 acres in the culturally rich Oakland neighborhood. At the heart of the campus stands a central landmark-the Cathedral of Learning, a 42-story Gothic tower, which is the tallest school building in the Western Hemisphere. The Cathedral contains the Nationality Rooms, 27 classrooms, each designed to reflect a distinct culture and providing an overall, multidimensional understanding of America's heritage.

At the Pittsburgh campus, over 4,900 faculty serve over 28,500 students, including 9,500 graduate and more than 19,000 undergraduate students. Alumni accomplishments range from managing Fortune 500 corporations, to writing best-selling novels, to unlocking the secrets of DNA ... and more.

Arthur G. Ramicone, MBA, *Senior Vice Chancellor and Chief Financial Officer*

Kathy W. Humphrey, PhD, *Senior Vice Chancellor for Engagement, Chief of Staff and Secretary of the Board of Trustees*

Cynthia C. Moore, JD, *Deputy Secretary of the Board of Trustees*

Amy K. Marsh, MBA, *Chief Investment Officer and Treasurer*

University of Pittsburgh Board of Trustees

The Board of Trustees is responsible for advancing the purposes of the University; promoting and protecting its independence, academic freedom, and integrity; and enhancing and preserving its assets for the benefit of future students and society at large. In addition, because the University of Pittsburgh is a state-related institution, the trustees ensure that Pitt meets its obligations both to the Commonwealth of Pennsylvania and to society generally.

General administrative, academic, and management authority is delegated to the chancellor. However, the board retains ultimate responsibility for all University affairs.

There are three or more regular meetings of the Board of Trustees each year, including an annual meeting. Special meetings also may be called. Much of the board's work is carried out by committees; many of these committees include faculty, staff, and students as non-voting representatives.

University of Pittsburgh at Titusville

Academic Regulations

Advising

Academic advising is a key part of every undergraduate's experience at the University of Pittsburgh. An academic advisor helps a student determine the appropriate academic path to further the student's educational and career goals. To be a success, the advising process must work both ways: The advisor will be there to help when the student needs it, and the student must actively seek out an advisor for help. Before signing up for classes each term, students meet with their advisors. Though each school may have different advising requirements, students are generally required to meet with their advisors at least two times per term-for an advising appointment and a subsequent registration appointment. The *Class Search* can be a useful advising tool in planning a course of study. Consult with the individual school for school-specific advising services.

Allowable Credits (Credit and Course Limitations)

There are certain limitations on credits, other than those earned as part of regular undergraduate courses taken at the University, that may be applied toward a degree. Those limitations are detailed below.

Advanced Standing Credits

Each school determines whether and under what circumstances the advanced standing credits listed below will be awarded toward a University of Pittsburgh degree or certificate offered by the school. Contact the individual schools for details.

Transfer Credit

Credit may be earned at other appropriately accredited institutions and accepted for transfer to the University of Pittsburgh, subject to University policy and individual school requirements.

Advanced Placement

Credits may be earned toward a University of Pittsburgh degree or certificate through standardized examinations such as the College-Level Examination Program (CLEP), Occupational Competency, Excelsior College Examination Program, and Advanced Placement (AP) Exams. In addition, some schools give credit for the International Baccalaureate Higher-Level Examinations. Credit is given for the following AP Exam scores:

Advanced Placement Credit (effective August 2015)

- Students will have to check with the department to determine credit or waiver.
- Students wishing to take German language courses must still take the German Placement Exam at their orientation session.

Credit by Examination

In some cases, students may earn credits toward a University of Pittsburgh degree or certificate by passing a course examination without registering for the course. Contact the individual department or school for information, as each sets its own policies as to the specific courses for which students may request credit by examination.Career Development Courses

Noncredit, career development courses are not applicable to the bachelor's degree but may be included among the requirements for certain professional certificates.

Cooperative Programs

The University has established some arrangements with industries that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. These programs are administered by the Swanson School of Engineering and are available to any student with a science-related major. The experience normally starts in the sophomore or junior year. Students should contact their school or department to determine the maximum number of credits that may be earned toward their degree requirements through cooperative programs. Call 412-624-9826 for more information.

Duplication of Course Content

Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit.

Directed Reading and Research, Independent Study, Internships

Some schools offer individually designed study other than regular courses. Students are limited by the individual schools as to how many such independent study, directed reading, directed research, and internship credits can be counted among the required credits for the degree. Requirements and procedures may also differ. Contact school for details.

Directed Reading

The student undertakes a specified course of study comparable to a regular course under the direct supervision of a faculty member.

Directed Research

The student pursues a defined research project on campus under the guidance of a faculty member.

Independent Study

Independent study involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off campus with less immediate direction by the sponsoring faculty member.

Internships

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

English Language Institute Courses

Credit for certain English Language Institute courses may be applied toward the undergraduate degree. See school for details.

Enrollment in Graduate Courses

Undergraduate students with sufficient preparation are permitted to enroll in graduate courses, and credits earned may be counted toward the undergraduate degree following procedures determined by each school. Credits earned in graduate courses taken by an undergraduate student typically cannot be counted subsequently toward a graduate degree. Consult the appropriate graduate or professional school bulletin for rules governing transfer credits for graduate-level courses taken by an undergraduate student.

PittOnline (formerly External Studies)

The PittOnline Program offers most courses to students in a Web-based environment. Most course materials can be accessed through CourseWeb, the University's course management system. Web courses feature Web-based instruction and interaction. Students interact with their instructors and other students through the class Web site. Students complete the course requirements within one term and move through the course materials as a cohort. Hybrid courses combine Web-based interaction and face-to-face instruction. Students are required to attend scheduled workshops and participate in online discussions and activities.

Self-paced courses utilize a flexible format where students move through assigned course materials at their own pace. Workshops and Web-based activities are features of some courses. The course syllabus provides more information about workshops and Web-based activities for these courses. Self-paced courses without CourseWeb are indicated with a SPW designation.

For additional information on PittOnline courses, contact the College of General Studies at 412-624-7210.

Reserve Officer Training Corps (ROTC) Credits

Students may elect to participate in either the Air Force ROTC or Army ROTC Programs at the University of Pittsburgh or the Navy ROTC Program at Carnegie Mellon University. Contact individual schools to determine which credits earned in ROTC courses may be applied toward a degree. (For more information on ROTC, see the Special Academic Opportunities section of this bulletin.)

Registration

For additional registration information, visit the University registrar's Web site at www.registrar.pitt.edu

Full-Time and Part-Time Study

Full-time study is defined as enrollment for 12 to 18 credits per term, and part-time study is defined as enrollment for one to 11 credits per term. Students are charged a flat tuition rate for full-time study in the fall and spring terms. For part-time students, tuition payment is on a per-credit basis. Students may exceed the 18-credit limit with written permission from the dean of their school, but they will be billed on a per-credit basis for each additional credit. University fees and other applicable charges are assessed on student statements. Some schools within the University may also apply academic limitations on the number of credits for which a student is permitted to enroll each term. For instance, students in Arts and Sciences must get permission to enroll for more than 18 credits. During the summer term and summer sessions, all students (except co-op students who are doing an academic rotation) are billed on a per-credit basis regardless of the number of credits taken.

Registering for Classes

After students are admitted to a school they will be assigned an academic advisor. All Undergraduate students must meet with their academic advisor each term prior to enrolling in classes. Most students have the ability to use the self- service enrollment tools available through the Student Portal or Pitt PS Mobile.

Continuing students with the ability to utilize self-service enrollment will be assigned an enrollment appointment during the first two weeks of the enrollment period. Students in programs that do not permit self-service enrollment should contact their academic advisor regarding the enrollment process for their program. The enrollment period for a term or session is published in the University's *Academic Calendar*.

Once students have enrolled they may view their class schedules online via the Student Portal or Pitt PS Mobile.

Adding and Dropping Courses

Students may add or drop courses from the start of their enrollment appointment until the end of the add/drop period. The dates for the add/drop periods are published in the University's *Academic Calendar*. Students are encouraged to consult their academic advisors regarding the impact of course changes on their academic career. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course and Resigning from the University.

Cross-Registration

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit www.pchepa.org.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the University's *Academic Calendar* for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and athletic eligibility.

Resigning from the University/Termination of Registration

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript for each course in the term of resignation. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point in time of the term or session has passed, students who wish to terminate their registration may process withdrawal from all classes only with the permission of the academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Grading and Records

For additional grading and records information, visit the University Registrar's Web site at www.registrar.pitt.edu.

GPA

The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. Undergraduates must have a 2.00 GPA in order to graduate from the University of Pittsburgh. The value is the average of total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

Grading System

The University of Pittsburgh has a standard letter grade system (see Letter Grade Option). Some additional grading options are available in some courses as determined by the school and the instructor (see Grading Options below). Finally, undergraduate students may choose to audit a course. Students must complete Grade Option/Audit Request forms to request a grading option available in a particular course.

Grading Options

Individual schools may elect to offer a course with the following grade options:

LG	Letter grade

H/S/U	Honors/Satisfactory/Unsatisfactory
S/NC	Satisfactory/No-Credit (Formerly the S/N Option)
LG and H/S/U	Letter grade and Honors/Satisfactory/Unsatisfactory
LG and S/NC	Letter grade and Satisfactory/No-Credit

Students may select a grade option for those courses that offer more than one option at the point of enrollment or by submitting a Grade Option/Audit Request form by the established deadline to the school offering the course (generally four weeks from the start of the term, but check with the school for specific deadlines). If the student does not select a grade option for a course when more than one grade option is available, the default option (generally the letter grade option) will automatically apply.

Letter Grade Option

The University's letter grade system identified below will be followed without exception:

Grade	Quality Points
A+	= 4.00
A	= 4.00 Superior
A-	= 3.75
B+	= 3.25
B	= 3.00 Meritorious
B-	= 2.75
C+	= 2.25
C	= 2.00 Adequate
C-	= 1.75
D+	= 1.25
D	= 1.00 Minimal
D-	= 0.75
F	= 0.00 Failure

H/S/U Grade Option

Certain courses are offered on the H/S/U (Honors/Satisfactory/Unsatisfactory) grade option. Under this option, students earn an H if they do exceptional work (equivalent to an A- or higher under the letter grade system), an S if they do satisfactory work (equivalent to grades from a C up to a B+), or a U if they do unsatisfactory work (equivalent to a C- or lower). The H and S grades received under this option are counted toward graduation but are not computed in the student's GPA. The U grade is counted toward neither graduation nor the GPA.

S/NC Grade Option (Formerly the S/N Option)

Certain courses are offered on the S/NC (Satisfactory/No-Credit) grade option. This option was designed to encourage students to explore new and potentially difficult subjects without fear of the risks of failure. Under this option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (No Credit) is given. Courses for which an S is received are counted toward graduation, but are not computed in the GPA. Courses in which an NC is received are counted toward neither graduation nor the GPA.

Other Grades: Incomplete, Resign, Withdraw

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor (the options are listed under Grading Options). None of these grades carries quality points:

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Some schools have a shorter deadline for completion of G grades; see school for details.

Once the deadline has passed, the G grade will remain on the record, and the student will be required to reregister for the course if it is needed to fulfill requirements for graduation.

I Grade

The I grade signifies incomplete course work due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

R Grade

The R grade signifies that a student resigned from the University for the term. (See Resigning from the University for more information.)

W Grade

The W grade signifies that a student has withdrawn from a course. (See Monitored Withdrawal from a Course for more information.)

Auditing a Course

To audit a course, a student must register and pay tuition for the course. A Grade Option/Audit Request form must be submitted for undergraduate courses by the established deadline. Students who audit a course are given an N grade.

Repeating Courses

Students may elect to repeat a course, subject to the following stipulations. Students should check with their individual schools for other school-specific rules on repeating courses, including the need to submit appropriate forms.

- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G and I) are not identified as repeated courses until the course work is completed.

- Students are only permitted to repeat a course twice. Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.

Changing Grades

The instructor of a course may change a student's grade by submitting a Grade Change Request Form which can be found on the Faculty Portal. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via Student Portal at my.pitt.edu or via Pitt PS Mobile.

Grade Reports

Students can access their grades online via the Student Center at my.pitt.edu or via Pitt PS Mobile. Grade submission deadlines can be found in the University's *Academic Calendar*.

Transcripts

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University registrar. Currently enrolled students may also receive one unofficial copy of their transcripts per term for personal use. Upon graduation, the transcript reflects a student's degree and date, major, and, if applicable, honors, area of concentration, and minor.

Academic Record

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record provides students and advisors with admission data, academic events, detailed advanced standing/placement/transfer credit information, and standardized test scores. Students can view a copy of their academic record in the Student Center at my.pitt.edu.

Academic Standing

Undergraduate students' academic standing is maintained and monitored each term by the school in which a student is enrolled. Students who are not on academic probation or academic suspension (i.e., students who maintain a cumulative grade point average of 2.00 or higher) are considered to be in good academic standing.

Dean's List

Students whose grades indicate outstanding academic achievement are recognized on their school's Dean's List. The following schools have a Dean's List:

- Dietrich School of Arts and Sciences
- College of Business Administration
- School of Dental Medicine
- Swanson School of Engineering
- College of General Studies
- School of Health and Rehabilitation Sciences
- School of Information Sciences
- School of Nursing

Other Academic Honors

Schools and programs may have additional ways of recognizing academic achievement by students, such as Phi Beta Kappa, Tau Beta Pi, or a Term Honor List. More information about these opportunities is available through the school.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 12 quality point credits and whose GPA falls below 2.00 will be placed on academic probation by the dean of the school. After a certain period of time on academic probation (determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the undergraduate school's probation system are available through that school.

Effect on Financial Aid

Conditions for financial aid eligibility usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA: credits counting toward the degree). Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid in Alumni Hall at 412-624-7488.

Graduation

Requirements for Graduation

Graduation requirements differ among schools. However, all undergraduate schools require a minimum of 120 passing credits to graduate, as well as a GPA of at least 2.00. (See specific schools and programs for detailed graduation requirements.)

Application to Graduate

Students must file an application for graduation through their college or school. Generally, students must apply for graduation before the end of the term preceding the one during which they expect to complete all degree requirements. Each school establishes its own deadline by which students must apply for graduation. Students should check with their schools for the deadlines.

Graduation with Honors

Undergraduate members of a graduating class who have attained an outstanding scholastic record may be graduated with University honors. To be eligible, a student must complete at least 60 letter-graded credits at the University of Pittsburgh. All degree-related course work completed at the University is calculated in the grade point average. Receipt of University honors is based on having obtained the following grade point average at graduation:

Summa Cum Laude	3.75
Magna Cum Laude	3.50
Cum Laude	3.25

The honor status achieved by a student will appear on the student's official University transcript and diploma.

Each school may award undergraduate program honors based on the major GPA and other criteria, as determined by the school and department.

Commencement

Candidates for graduation are encouraged to appear in person at commencement, usually held the Sunday after the spring term ends. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony.

With the exception of students who receive their diplomas at individual school ceremonies, all diplomas are mailed to students approximately four weeks after the official certification date for each graduation period.

Student Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see www.cfo.pitt.edu/policies/.

The information that follows summarizes several key University-wide policies affecting undergraduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu/info/acguidelinespdf.pdf.

Computing Use Policy

Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read Acceptable Computing Access and Use, available in campus computing labs or online at technology.pitt.edu/security/acceptable-computing-access-and-use for details.

Students are subject to the rules and regulations as described in the University of Pittsburgh *Student Code of Conduct*. Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.

Student Code of Conduct

The Student Code of Conduct is an outline of the nonacademic rights and responsibilities of University students. The code defines offenses by and against students. A student or University official may file a complaint of violation of the Student Code of Conduct at the University Student Judicial System. For a copy of the code, please contact the judicial system office in 738 William Pitt Union at 412-648-7910 or see www.studentaffairs.pitt.edu/studentconduct.

Judicial System

The Office of Student Conduct of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the *Student Code of Conduct*. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints about nonacademic student behavior should be filed here.

Pitt Promise: A Commitment to Civility

The University of Pittsburgh is committed to the advancement of learning and service to society. This is best accomplished in an atmosphere of mutual respect and civility, self-restraint, concern for others, and academic integrity. Students are asked to accept the obligation to live by these common values and commit themselves to principles of behavior that contribute to a civil campus environment and to support this behavior in others. The Pitt Promise is online at www.studentaffairs.pitt.edu/pitt-promise/.

Other Policies

Affirmative Action and University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Affirmative Action, Diversity and Inclusion, Carol W. Mohamed, Director (and Title IX, 504 and ADA Coordinator), 412 Bellefield Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this Policy, please refer to Procedure 07-01-03.

Drug-Free School and Workplace Policy

The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law-enforcement agency.

Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or guaranteed Student Loan Program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities. For more information, see www.cfo.pitt.edu/policies/procedure/06/06-02-01.html.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, see www.cfo.pitt.edu/policies/policy/09/09-10-01.html.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits intimate relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself/herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition note: In this policy, the definition of faculty member refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see www.cfo.pitt.edu/policies/policy/02/02-04-03.html.

Family Educational Rights and Privacy Act (FERPA)

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Harassment Policies

Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment. Any individual who, after thorough investigation and an informal or formal hearing, is found to have violated the University's policy against sexual harassment will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion.

Any disciplinary action taken will depend upon the severity of the offense. For more information, see www.cfo.pitt.edu/policies/documents/policy06-05-01web.pdf.

Immunization Policy

The University requires the immunization of all incoming freshmen against measles, mumps, and rubella as a condition of attendance at the University of Pittsburgh. Incoming freshmen must provide to the University Student Health Service documentation of immunization that includes the month, day, and year that the immunizations were administered. Completed immunization forms must be kept on file in the Student Health Service.

Exemptions may be granted based on a written statement from a physician that the immunization may be detrimental to the health of the student or on a student's objection to immunization on religious grounds or on the basis of a strong moral or ethical conviction similar to a religious belief. However, if an outbreak of measles, mumps, or rubella occurs, the State Health Department may exclude from classes students who do not provide proof of immunity to these diseases. For more information, see www.cfo.pitt.edu/policies/policy/06/06-01-02.html.

Patent Policy

A University student, during his or her period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and

the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management or at www.cfo.pitt.edu/policies/policy/11/11-02-01.html.

Research Integrity

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the integrity of science, and to society as a whole. The University's Research Integrity Policy is available online at www.cfo.pitt.edu/policies/policy/11/11-01-01.html.

Smoking Policy

Smoking is prohibited in all University-owned and -leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in University Policy 04-05-03. For complete policy text, see www.cfo.pitt.edu/policies/policy/04/04-05-03.html.

Student Service Indicators Policy

Access to many student services including registration and access to grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at www.cfo.pitt.edu/policies/policy/09/09-04-09.html.

Use of Alcohol Policy

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, see www.cfo.pitt.edu/policies/policy/04/04-05-02.html.

Application for Admission

Most undergraduate admissions to the University of Pittsburgh's Pittsburgh campus are handled by the Office of Admissions and Financial Aid. This section details the general requirements and procedures for admissions to the University through that office and also provides admissions information for prospective students whose applications are not handled by that office. Some schools and programs require supplemental application materials or admission requirements in addition to those requested by the Office of Admissions and Financial Aid. Those requirements are listed within the Schools and Academic Programs section of this bulletin.

The admissions information in this section is subject to change at any time. It is intended to serve only as a general source of information.

Pittsburgh Campus Freshman Admissions

Prospective students who have not earned college credits since graduating from high school with a diploma or GED should consult this section for information on admission to the University of Pittsburgh.

Admissions Contact Information

University of Pittsburgh
Office of Admissions and Financial Aid
4227 Fifth Ave., Alumni Hall
Pittsburgh, PA 15260-6601
412-624-PITT
412-624-7488
oafa@pitt.edu
www.oafa.pitt.edu

High School Preparation

Freshman applicants to the University of Pittsburgh should have completed a minimum of 15 units of credit in college preparatory courses. Flexibility exists within this requirement, however:

- Swanson School of Engineering applicants should have completed four units of mathematics-algebra I, algebra II, plane geometry, and trigonometry/pre-calculus-as well as a unit each of chemistry and physics.
- School of Nursing applicants must have 19 units, with three units of laboratory science, including one year of chemistry with a lab, and four units of mathematics.
- School of Pharmacy applicants seeking conditional admission must have completed one year of high school biology with laboratory, chemistry with laboratory, math through trigonometry (pre-calculus), and either a second-level biology course, second-level chemistry course, or physics.
- Arts and Sciences applicants should have completed three years of mathematics (including algebra I, geometry, and algebra II or trigonometry), three years of science (with labs), and three years of a single second language with a C average or better (or make up the deficit with one year of college-level study).
- College of Business Administration applicants should have completed four units of mathematics, including algebra I and II and geometry, and another math course such as trigonometry, pre-calculus, or calculus in their senior year, as well as two years of a lab science.

Application Procedures

Students seeking admission to the University of Pittsburgh must complete and send the following to the Office of Admissions and Financial Aid: the Freshman Application form (students may also apply online at www.oafa.pitt.edu), an official high school transcript, SAT I or ACT results, and the $45 application fee. The personal essay, included with the Freshman Application form, is optional but strongly recommended for scholarship candidates and for students who wish to be reviewed on more than their high school records and SAT/ACT results. Likewise, letters of

recommendation are optional but recommended. *Note: International applicants must apply online and will find complete application instructions and the online application available at www.oafa.pitt.edu*

Exceptions: Applicants to the Dental Hygiene Program, and students seeking special or non-degree status should see the application procedures outlined under their respective admissions sections (Dental Hygiene Program-School of Dental Medicine Admissions, and Special and Non-Degree Status).

Application Deadlines

The University of Pittsburgh practices a rolling admissions policy, meaning there is not a specific deadline by which prospective students must apply. Applicants are considered and informed of admission decisions on a first-come, first-served basis. However, applicants who want to be reviewed for merit scholarships must submit applications by January 15. See Academic Merit Scholarships.

Note: International students must apply by:

- March 1: for fall and summer term admission
- October 1: for spring term admission

Early Admission

High school students wanting to enter college one year early, prior to completing the senior year, may apply as juniors for early admission to some schools. Contact the Office of Admissions and Financial Aid for more information.

Academic Merit Scholarships

Applicants who are U.S. citizens and eligible non-citizens are automatically considered for academic merit scholarships if their applications and all supporting materials are received by January 15. The University awards hundreds of academic scholarships, all of which are renewable for three years after the freshman year, provided the student maintains a 3.00 grade point average and satisfactory academic progress and is enrolled full-time. The scholarships offered include:

- **Chancellor's Nominee Scholarships:** $2,000-$10,000 paid (all schools).
- **Chancellor's Scholarships:** full tuition, room, and board paid. A number of students interviewed for but not receiving the Chancellor's Scholarship will be awarded full-tuition scholarships.
- **Adena Johnson Davis Nursing Scholarship:** full tuition, room, and board paid.
- **Honors Tuition Scholarships:** award-full tuition paid (all schools).
- **Helen Faison Scholarships:** full tuition, room, and board paid (Arts and Sciences).
- **Honors Challenge Scholarships:** full tuition paid (all schools).
- **Engineering Honors Scholarships:** $2,000-$4,000.
- **Fessenden-Trott Engineering Honors Scholarship:** $9,000.
- **Donald M. Henderson Engineering Scholarships:** full tuition, room, and board paid.
- **Robert R. Lavelle Business Scholarship:** full tuition, room, and board paid.

Graduate School Guarantees

Outstanding freshman applicants who are U.S. citizens and eligible non-citizens and indicate certain professional programs (including business, communication science, dental medicine, dietetics, education, engineering, law, medicine, nursing, physical therapy, occupational therapy, public health, public and international affairs, and social work) as their intended field of study on the Freshman Application will automatically be reviewed for guaranteed admission into that professional program. Early application is recommended as spaces are limited.

Enrollment Fee/Tuition Deposit

Once accepted, students must reserve their positions in the upcoming class by submitting a nontransferable, nonrefundable $300 enrollment fee (a combined $200 tuition deposit and a $100 PittStart fee) by May 1 for the fall term. Residence hall accommodations on the Pittsburgh campus are guaranteed to freshmen admitted for the fall term who pay the deposit by May 1, for three full years from the time admission is offered. After that they are available on a first-come, first-served basis.

Deferred Admission

The University does not offer deferred admission for a subsequent term to admitted students not enrolling for the term of their admission. Students wishing to have their applications re-reviewed for another term may submit a request in writing to the Office of Admissions and Financial Aid. Applications and supporting documentation for the prior academic cycle of fall, spring, and summer are only retained until early October of the next cycle. After that, students who wish to be re-reviewed for admission must submit a new application and supporting credentials.

Admitted freshman students who defer enrollment to attend classes at another institution must file a transfer application.

Transcripts will need to be resubmitted.

Regional Campus Admissions

Listed below is the contact information for the admissions offices of the University of Pittsburgh's four regional campuses. Contact the regional campuses for more information on their particular requirements:

Transfer Student Admissions

Prospective students who are high school graduates and have attended postsecondary institutions, colleges, or universities (except those who took college classes while in high school and are considered freshmen with advanced standing) apply for admission as transfer students through the Office of Admissions and Financial Aid. Transfers between University of Pittsburgh schools or campuses are handled through the school or campus.

Application Procedures

Degree-seeking transfer students who wish to be considered for admission to the University of Pittsburgh must complete and send the Transfer Application form (students may also apply online at www.oafa.pitt.edu), an official high school transcript, an official transcript from each postsecondary institution attended (whether or not it is intended that all courses will be counted toward a degree at the University of Pittsburgh), an SAT I or ACT score if either test was taken, and the $45 application fee. Consult the *University of Pittsburgh Guide and Application for Transfer Students* (available from the Office of Admissions and Financial Aid) for more information or look online at www.oafa.pitt.edu.

Exceptions: RN to BSN applicants to the School of Nursing, applicants to the Dental Hygiene Program, and students seeking special or non-degree status should see the application procedures outlined under their respective admissions sections (School of Nursing-RN Options Program, PharmD Program, Dental Hygiene Program-School of Dental Medicine Admissions, and Special and Non-Degree Status).

NOTE: International students must apply online at www.oafa.pitt.edu, "Applying" "International Students."

Admission Deadlines

The University of Pittsburgh practices a rolling admissions policy, meaning there is not a specific deadline by which transfer students must apply. Applicants are considered and informed of admission decisions on a first-come, firstserved basis. The following schools practice rolling admission for all three terms, except where noted: Dietrich School of Arts and Sciences, College of Business Administration, Swanson School of Engineering, College of General Studies, School of Nursing (fall and spring term admission only) and the School of Social Work (fall and spring term admission only). However, there are several schools and programs that have definitive deadlines by which applications must be submitted for consideration. These deadlines are subject to change and can be verified on the Office of Admissions and Financial Aid Web site at www.oafa.pitt.edu.

- School of Information Sciences deadlines are August 1 for the fall term, November 1 for the spring term, and April 1 for the summer term.
- School of Education Health and Physical Activity applicants must apply by February 1 (fall term admission only). Applied Developmental Psychology applicants must apply by March 15 for fall term (fall term admission only).
- School of Health and Rehabilitation Sciences admits students only in the fall term. Application deadlines are as follows: Applicants to programs in Athletic Training, Clinical Dietetics/Nutrition, and Rehabilitation Science should submit a complete application by March 15. Programs in Communication Science, Emergency Medicine, and Health Information Management practice a rolling admission, but early application is recommended. Students should apply in the second semester of their sophomore year. All admissions requirements must be completed prior to enrollment.

- All transfer pharmacy students, including international students, must file an application through PharmCAS, a Web-based application service (www.pharmcas.org), submitting scores on the Pharmacy College Admissions Test (PCAT) (see www.pcatweb.info for more information). Applicants must also submit a School of Pharmacy Supplemental Application. Instructions for completing the Supplemental Application are on the School of Pharmacy Web site at www.pharmacy.pitt.edu.

NOTE: International applicants must apply by the deadlines specified or the specific program deadline, whichever comes first.

The online international student application and application instructions are different from the instructions above and are available at www.oafa.pitt.edu.

- March 1: summer term admission (transfers only)
- April 1: fall term admission-freshmen
- May 1: fall term admission -transfers
- October 15: spring term admission

Articulation Agreements and Transfer Credit Guide Summaries

The University of Pittsburgh has formal articulation agreements with various higher education institutions throughout the state of Pennsylvania to facilitate the transfer of students from one institution to the other as they pursue their educational goals. For a comprehensive list of articulation agreements and their specific requirements, go to http://www.academic.pitt.edu/articulation/aa2001.htm.

In addition to those formal articulation agreements, The **Pitt Connection Transfer Guide System** was developed by the Office of Admissions and Financial Aid to provide prospective transfer students with the most comprehensive, current, and thorough pre-transfer advising possible. The **Pitt Connection** allows our future students to explore many options at their community college with the assurance that what they are taking will fit nicely into their degree programs at the University of Pittsburgh and allow them to pursue their academic goals with direction. The various undergraduate units at the University regularly review the course offerings at each of the five local community colleges (Butler County Community College, Community College of Allegheny County, Community College of Beaver County, Harrisburg Area Community College, and Westmoreland County Community College) and evaluate the transferability of these courses. The results are then published in five **Pitt Connection Transfer Guides**, one for each of the above-mentioned community colleges. Students at the community college who consult the guides can register for their classes with confidence that, if they complete their coursework with grades of "C" or better, then the courses will help them progress toward their undergraduate degrees from the University of Pittsburgh. The **Pitt Connection Transfer Guides** are also available at the Office of Admissions and Financial Aid.

The College of General Studies also has transfer manuals for the Community College of Allegheny County, Butler County Community College, Community College of Beaver County, Harrisburg Area Community College, and Westmoreland County Community College. See "Prospective Students" at www.cgs.pitt.org for more information.

Contact the relevant schools and programs for further details.

Transfer Scholarships

Transfer scholarships are available to College of General Studies students who are U.S. citizens and eligible non-citizens. Degree-seeking applicants are automatically reviewed for eligibility. These annual scholarships range in value from $600 to $2,500. The scholarships are offered through: the CGS Alumni Endowment Scholarship Fund including John O. Bolvin and Anne E. Levenson scholarships, The Brackmann and Saalbach Family Endowed Scholarship, Joan C. Dash Scholarship, Bruce P. McGough Scholarship, Tom R. Slone Scholarship (designated for students who are active in the Big Brothers Big Sisters youth mentoring organization), and the Grace C. Stewart Fund. Awarding of these scholarships is handled through the Office of Admissions and Financial Aid.

Evaluation of Transfer Credits

Credits earned at another accredited institution are evaluated by the admitting school, which determines the number of advanced standing credits the transfer student will be awarded and the distribution of these credits in relation to the school's degree requirements and University policy. See the appropriate school's information in this bulletin.

Deferred Admission

The University does not offer deferred admission for a subsequent term to admitted students not enrolling for the term of their admission. However, students wishing to have their applications re-reviewed for another term may submit a request in writing to the Office of Admissions and Financial Aid. Applications and supporting documentation for the prior academic cycle of fall, spring, and summer are only retained until early October of the next cycle. After that, students who wish to be re-reviewed for admission must submit a new application and supporting credentials.

Admitted students who enrolled at another institution must file a new transfer application with supporting credentials.

Readmission

Students who previously attended the University of Pittsburgh then attended other institutions and wish to return to the University are considered transfer students and must reapply following the guidelines for transfer students. The admitting school will evaluate the credits previously earned at the University of Pittsburgh along with credits earned elsewhere to determine the number of credits the transfer student will be allowed. Acceptable credits from institutions other than Pitt will appear on the student transcript as advanced standing credits and will not count in the GPA calculation. Credits earned at the University of Pittsburgh will appear as term entries on the student transcript, and courses accepted toward the degree will be used when calculating the student's GPA.

Former University of Pittsburgh students who have not attended another institution may be reinstated through the dean's office of the school in which they were previously enrolled.

Dental Hygiene Program-School of Dental Medicine Admissions

The School of Dental Medicine offers a two-year (six consecutive terms) Associate of Science Degree in Dental Hygiene. The program is designed to fulfill the professional and academic requirements of the Commission on Dental Accreditation. Completion of the program prepares the student for licensure as a dental hygienist in most states.

Admissions Contact Information

University of Pittsburgh
School of Dental Medicine
Dental Hygiene Program
B-82 Salk Hall
Pittsburgh, PA 15261-1937
412-648-8432
hygieneadmissions@pitt.edu
www.dental.pitt.edu/students/dental-hygiene-program

Admission Requirements

Applicants to the Dental Hygiene Program must fulfill the following criteria before applying: have a high school diploma, have a minimum GPA of 3.0 at all academic institutions, have a minimum SAT I combined math and verbal score of 1200 or ACT score of 24, have successfully completed chemistry and biology courses with laboratory components, and have successfully completed a college-level English composition course and a college-level introduction to sociology course.

Application Procedures

Applicants to the Dental Hygiene Program must submit the following items to the School of Dental Medicine by December 15 for early decision review: a completed Dental Hygiene Program application, including the Personal Essay; three professional references; transcripts from all academic institutions attended; 15 hours of job shadowing with a practicing dental hygienist; and SAT I/ACT scores. Once the application materials have been

received, the qualified applicant will be invited to attend a mandatory Applicant Seminar and participate in a personal interview with the admissions committee.

Students who complete this program also have the option of completing a Bachelor of Science in Dental Hygiene offered by the College of General Studies (see the College of General Studies listing in the Schools and Academic Programs section of this bulletin for information on BS degree completion option).

School of Nursing-RN Options (Early admissions To MSN Or DNP

The University of Pittsburgh RN Options (Early Admission to the MSN or DNP program) curriculum is designed for registered nurses, who obtained their initial nursing education through either a CCNE, NLN or ACEN accredited associate degree program or diploma program and want to purse undergraduate education with early admission to a graduate nursing program. Courses are taught by nursing leaders who are experts in their field. Faculty serves as educators, role models and mentors for their students. The RN Options curriculum builds upon the individual professional nurse's strengths and experiences to expand professional knowledge and practice skills.

Applicants should apply using the online application https://app.applyyourself.com/?id=up-nurs

Contact Information

University of Pittsburgh
School of Nursing
239 Victoria Hall
Pittsburgh, PA 15261
1-888-747-0794 or 412-624-4586
sao50@pitt.edu
www.nursing.pitt.edu

Admission Requirements and Application Procedures

RN-Option applicants must be graduates of a CCNE or NLN accredited associate degree program or diploma school of nursing; have a cumulative Grade Point Average (GPA) of 3.0 or above in previous academic work; possess a valid registered Nurse License (all admitted students must obtain a PA license); complete the RN Option online application, including uploading of an essay and current resume; and submit three letters of professional recommendation from professionals and/or professors who know you well, which may be submitted online or mailed in a sealed envelope to:

University of Pittsburgh
School of Nursing
3500 Victoria St.
239 Victoria Building
Pittsburgh, PA 15261

Academic transcripts should be mailed directly from the graduating institution to the above address. For more information, please call 1-888-747-0794 or 412-624-4586 or e-mail sao50@pitt.edu.

Application Deadlines and Other Information

Course offerings are flexible and students may begin coursework in any term (fall/spring/summer). Upon finishing the first 84 of 96 credits in the RN Options track, students must select to complete their remaining requirements in the selected MSN or DNP program or complete the BSN curriculum.

Students who pursue early admission to the MSN or DNP track must: 1) take the Graduate Record Examination (GRE) 2) provide the necessary documentation for admission to the desired major or area of concentration and 3) complete the remaining 36 credits of which 24 will be at the graduate level. Full and part-time schedules are available.

School of Nursing - Accelerated 2nd Degree BSN Program

The Accelerated 2nd Degree BSN is designed to enable individuals with a Baccalaureate Degree in another discipline the ability to earn a Bachelors of Science Degree in Nursing (BSN) in three consecutive full-time terms.

Contact Information

University of Pittsburgh
School of Nursing
239 Victoria Hall
Pittsburgh, PA 15261
1-888-747-0794
sao50@pitt.edu
http://www.nursing.pitt.edu

Admission Requirements and Application Procedures

The Accelerated 2nd Degree BSN requires an applicant to complete 36 prerequisite credits. These courses may be taken at any college or university. Courses from other institutions must be evaluated as equivalent to University of Pittsburgh courses, (Coursework taken at the University of Pittsburgh School of Nursing prior to admission may be taken as a non-degree seeking student.)

Required prerequisites include:

Course	**Credits**
General and Biological Chemistry *+*(includes a lab)*	4
English Composition (scientific/technical)	3
Human Growth & Development + *(birth to death)*	3
Psychology	3
Sociology	3
Statistics *(descriptive, probability, & inferential)*	3
Human Anatomy & Physiology *+ *(includes a lab)*	6 - 8
Human Genetics *+	3
Microbiology *+ *(includes a lab)*	4
Pathophysiology	4

*Should have been completed within the past eight years
+Should have achieved a grade of "B-" or better

Application Deadlines and Other Information

Early submission of an application is recommended. New classes begin in the Fall, Spring and Summer term. Accelerated 2nd Degree BSN applications are reviewed, and admission decisions made, based on the application deadlines: Fall Term -- February 15/June 1; Spring Term--June 1/October 1; Summer Term--October 1/February 15.

Application information and other materials are located on the web at http://www.nursing.pitt.edu/academics/accelerated.jsp.

Prospective students must apply online to the School of Nursing at: https://app.applyyourself.com/?id=up-nurs.

School of Pharmacy PharmD Program

Transfer students, both within the Pitt system and from other colleges and universities, applying for admission to the School of Pharmacy must: (1) file an online PharmCAS application with all supporting credentials by the deadline (the online PharmCAS application is available at http://www.pharmcas.org); and (2) submit a School of Pharmacy Supplemental Application by the deadline specified in the online instructions. For more information on deadlines, online applications, admission calendar, and application instructions, please visit the school's "Admission Process" Web site at http://www.pages.pharmacy.pitt.edu/pharmdhandbook/the-pharmd-student-handbook/admissions/admissions-process/.

Transfer Within University Schools and Regional Campuses

Transfer between Schools

Students enrolled in an undergraduate school of the University who wish to transfer to another undergraduate school at the University should contact the school in which they are currently enrolled to request a transfer of their records. The student's records will be evaluated by the receiving school, which will then notify the student of acceptance or rejection.

Transfer between Campuses

Students enrolled in one campus of the University who wish to transfer to another campus of the University should contact the school at the campus in which they are currently enrolled to request a transfer of their records. The receiving schools will evaluate the records and notify students of acceptance or rejection.

Reinstatement

Students who have left the University for one calendar year or more (whether of their own volition or as a result of a suspension) and who wish to continue their studies must apply for reinstatement through the school to which they were previously admitted.

Second-degree Candidates

Previous Degree Earned Elsewhere

Students who have earned a previous undergraduate degree from an institution other than the University of Pittsburgh and wish to earn a second degree are treated as transfer students and must apply through the Office of Admissions and Financial Aid. (See Transfer Student Admissions.)

Previous Degree Earned at the University of Pittsburgh

Students who have earned an undergraduate degree from a school or campus of the University of Pittsburgh and who now wish to earn another bachelor's degree should apply as second-degree students directly through the desired school. This process may vary with some upper-level division schools.

Each school determines the number of previously earned credits that will apply. A minimum of 30 new credits must be earned to receive a second degree. In addition to those general rules, schools may have other requirements.

Special and NonDegree Admissions

College in High School

The College in High School Program, offered through the College of Arts and Sciences, offers qualified area high school students the opportunity to earn college credits from the University during their regular school day. Courses in chemistry, communication, computer science, French, Latin, mathematics, physics, and statistics are offered. There is a registration process and fee for this program. For further information, contact the College in High School office at 412624-6789 or online at www.as.pitt.edu/undergraduate/offices/chsp/index.html.

Postbaccalaureate Students

Some of the schools at the University will allow students who have already earned a bachelor's degree to take courses at the University as nondegree students. Students should contact the appropriate school for information about admission requirements.

Students interested in the Dietrich School of Arts and Sciences or the College of General Studies should contact the College of General Studies, 412-624-6600, 407 Cathedral of Learning; College of Business Administration students should contact 412-383-9600, 2100 Sennott Square; Swanson School of Engineering students should contact the Engineering Administration Office 412-624-9800, 253 Benedum Hall.

NOTE: International applicants should file an online international student application available at the Office of Admissions and Financial Aid Web site: www.oafa.pitt.edu

Guest/Visiting Students

Guest students are those who are seeking a degree at another university but want to take courses at the University of Pittsburgh for credit with the expectation that the credits will transfer back to the student's home institution. Guest students must be in good academic standing and generally must apply at least a few weeks before the start of a given term. Contact the appropriate school for other admission requirements. Admission for the fall and spring terms is handled through the school. Summer admission for visiting students is handled through the College of General Studies.

NOTE: International applicants should file an online international student application available at the Office of Admissions and Financial Aid website: www.oafa.pitt.edu

Accelerated High School Students

Qualified high school students in junior or senior year may be eligible to take one or two undergraduate courses each fall, spring, or summer term on the University campus while continuing their high school education. Students cannot take courses at the University that are available to them through their high school curricula. Contact the College in High School Office at 412-624-6789 or 412-624-7428 for admission information or visit online at www.as.pitt.edu/undergraduate and select "High School Students."

Summer Visiting Students

Students who are seeking a degree at another university but want to take courses at the University of Pittsburgh for credit during the summer should apply through the College of General Studies (CGS). Contact CGS at 412-624-6600; visit the office at 407 Cathedral of Learning, or visit the Web site at www.summer.pitt.edu for more information.

EXCEPTION: International students

Campus Facilities and Student Services

Academic Resources

A strong infrastructure of services is key to ensuring academic success at any institution of higher learning. The University of Pittsburgh has a wide variety of academic resources that provide that infrastructure to aid students with their research, computing, tutoring, and advising needs.

University Library System

271 Hillman Library
412-648-7710
feedback@library.pitt.edu
www.library.pitt.edu

The University of Pittsburgh libraries and collections provide an abundant amount of information and services to the University's students, faculty, staff, administrators, and researchers. In fiscal year 2007, the University's 28 libraries and collections have surpassed 5.1 million volumes. In addition, they contain more than 5 million pieces of microforms, and more than 48,000 current serials.

Under the administration of the Hillman University Librarian and Director, the University Library System (ULS) includes the following libraries and collections: Hillman (main), African American, Allegheny Observatory, Archives Service Center, Buhl (social work), Center for American Music, Chemistry, Darlington Memorial (American history), East Asian, Engineering (Bevier Library), Frick Fine Arts, Government Documents, Katz Graduate School of Business, Langley (biological sciences, behavioral neuroscience), Mathematics, Music, Public and International Affairs/Economics, and Special Collections. Libraries are also located at each of the University's four regional campuses. The ULS maintains a high-density storage area at the Library Facility in the Point Breeze section of Pittsburgh.

The Hillman Library is the largest facility, with seating for 1,530 users. It offers an open stack arrangement and an extensive range of library services. Hillman Library houses collections in the humanities and social sciences and includes area studies, psychology, computer science, maps, and government documents. In addition to the ULS, the University offers the Barco Law Library and the Health Sciences Library System.

The Health Sciences Library System (HSLS) at the University of Pittsburgh comprises several libraries that support the educational, research, patient care, and service activities of the schools of the health sciences (Medicine, Dental Medicine, Pharmacy, Health and Rehabilitation Sciences, Nursing, and Public Health) as well as the hospitals of the University of Pittsburgh Medical Center. The HSLS includes Falk Library of the Health Sciences, The Western Psychiatric Institute and Clinic Library, The Libraries at UPMC Shadyside, and the Children's Hospital of Pittsburgh Libraries. The Computer and Media Center in Falk Library is the primary health sciences facility and service point for audiovisual and microcomputer resources. HSLS Online (www.hsls.pitt.edu) is the gateway to extensive electronic resources for clinical and research needs.

This year, the University of Pittsburgh's online library catalog, PITTCat, which provides access to materials held in all University libraries, has been updated. PITTCat+ now offers, in addition to the more than five million titles from PITTCat Classic, all items from the D-Scribe Digital Collections, along with enhanced book content such as integrated article searching, access to tables of contents, jacket covers, and book reviews. Further features are a word cloud of associated search terms, spelling variants, translated terms, and thesaurus terms, as well as refined search options that allow searches based on library location. Searches can also be saved as an RSS feed that will send notifications when new items are added to the catalog.

The ULS also provides access to a comprehensive journal and magazine article discovery tool, Zoom!, as well as other online resources such as: Web of Science, Science Direct, and Scopus in the physical sciences; PsycINFO, ERIC, and Congressional Quarterly for the social sciences; Historical Abstracts, Philosopher's Index, and RILM Abstracts of Music Literature in the arts and humanities; and additional collections of article and newspaper databases from EBSCO and Lexis-Nexis.

These and hundreds of other online resources are available via the Pitt Digital Library at www.library.pitt.edu. The University of Pittsburgh is a member of the Association of Research Libraries. Through membership in several Pennsylvania consortia of libraries (PALCI, PALINET, and the Oakland Library Consortium), cooperative borrowing arrangements have been developed with other Pennsylvania institutions.

Computing Services and Systems Development

728 Cathedral of Learning
412-624-HELP (4357)
technology.pitt.edu

University of Pittsburgh students have access to the latest information technology resources provided by Computing Services and Systems Development (CSSD). An overview of these services is described below. Please visit the Information Technology Web site (technology.pitt.edu) or contact the Help Desk, 412-624-HELP (4357), for assistance.

Technology Help Desk

The Technology Help Desk, which is staffed around the clock, serves as the single point of contact for information technology services at the University of Pittsburgh. Students, faculty, and staff can contact the Technology Help Desk at 412-624-HELP (4357) regarding computing questions, including University computing accounts, e-mail, hardware, software, networking, ResNet services, computing labs, or other information technology services.

Campus Computing Labs

CSSD supports seven campus computing labs for students at the Pittsburgh campus. The labs offer more than 600 computers running Windows, Macintosh, Linux, and UNIX. Computers are equipped with more than 100 of the latest software applications and tools as well as CD writing capability and USB ports. Each lab features several media stations that offer scanning capabilities. Printing services include high-speed print capability in all facilities and color laser print capability in the David Lawrence Hall computing lab. Self-service printing stations were piloted in the David Lawrence Hall and Posvar Hall labs in 2008. Lab locations, hours, and equipment lists are available at technology.pitt.edu. Students can also call Lab Line at 412-383-LABS (5227) for real-time information about lab hours and the number of computers available in each lab. The computing labs are located at B-40 Alumni Hall, 1077 Benedum Hall, G-27/G-62 Cathedral of Learning, 1200 Wesley W. Posvar Hall, 112 Hillman Library, 230 David Lawrence Hall, and C114 Sutherland Hall.

E-mail and University Computing Accounts

Students receive a University computing account at the time of admission. The account features a unique username that is used in conjunction with a secure password. Forgotten passwords can be reset online using the Self-Service Password Reset Service. Students must set three online security questions at find.pitt.edu before using the service.

University e-mail addresses consist of a username followed by "@pitt.edu" (for example, abc123@pitt.edu). Students can read University e-mail online from any location using the Webmail feature available at my.pitt.edu. All official University correspondence is sent to a user's University e-mail address. E-mail forwarding options are available at find.pitt.edu for those who prefer to read their e-mail at another address.

Emergency Notification Service

The University's Emergency Notification Service will be used to communicate through voice and text messages as deemed appropriate in the event of an emergency. Students must subscribe to participate in this service by visiting my.pitt.edu.

E-mail Kiosks

More than 100 e-mail kiosks are located throughout the Pittsburgh campus to provide convenient locations for students to check their e-mail or browse the Web between classes and activities. Current locations include the Benedum Hall and Posvar Hall computing labs and galleria areas, the William Pitt Union lobby, the Cathedral of Learning, Litchfield Towers lobby, and Bellefield Hall's second-floor lobby.

Wireless PittNet

Wireless PittNet, the University's campus-wide wireless network service, is build upon the strength of the University's wired network, PittNet. The service is easy to use, extremely secure, and reliable. Any student with a laptop computer and a compatible wireless network adapter can use Wireless PittNet. Visit http://technology.pitt.edu for instructions, coverage locations, and more.

Student Portal (my.pitt.edu)

The University's Web portal, my.pitt.edu, provides a single point of access to the information that students use most at the University. Access Webmail, adjust spam filtering settings, view grades, search class schedules and course descriptions, pay tuition bills online, access the University's library resources, and more. The portal allows students to customize pages to include the tools and applications they find most helpful.

Residential Networking (ResNet) Program

Students living in University residence halls have access to high-speed Ethernet network connections that provide access to services on the University of Pittsburgh network (PittNet) and the Internet. The ResNet program provides onsite support for residence hall students with computing questions and problems, including Ethernet card installation and configuration, troubleshooting network connection problems, computer viruses, and more. Resident students can schedule appointments with ResNet by contacting the Technology Help Desk at 412-624-HELP (4357).

Software for Students

Students are provided with an extensive array of software applications and utilities at no cost. The Microsoft Campus Software for Students program provides Microsoft applications and operating systems to Pitt students free of charge. Students can receive software upgrades while enrolled at the University and may retain the software when they graduate. CSSD also offers mathematics, statistics, utility, and Internet software products without charge or at greatly reduced prices.

Safe Computing Tools

CSSD provides a variety of security tools and services. The Spam and Virus E-mail Filtering Service blocks junk e-mail and viruses from reaching each student's University e-mail address. Spam filtering settings can be adjusted at my.pitt.edu.

CSSD recommends that students install the latest version of Symantec AntiVirus software on their computers and use the LiveUpdate feature to get the latest updates. In addition, two anti-spyware programs, Ad-Aware and Spybot Search & Destroy, are available at no cost. Computrace LoJack is a software application available at no cost to students that allows a laptop to be traced in the event that it is ever lost or stolen. The Pitt Software Update Service can be configured to automatically download and install the latest security updates and service packs for Windows computers.

Academic Resource Center

G-1 Gardner Steel Conference Center
412-648-7920
www.asundergrad.pitt.edu/offices/arc/index.html

The Academic Resource Center (ARC) offers students help in study skills, tutoring, peer mentoring, time management, and test-taking skills. The ARC also maintains a tutor directory, which is a campus-wide listing of tutors and assistance provided by departments, schools, and Special Support Services. The Math Assistance Center (MAC), which is a part of the ARC, provides assistance to students enrolled in first-level algebra and trigonometry courses through faculty and undergraduate teaching assistant (UTA) office hours. The MAC is in 322 Thackeray Hall.

Writing Center

M-2 Thaw Hall
412-624-6556
www.writing.pitt.edu

The Writing Center, part of the University's Department of English, offers one-on-one assistance to students who need help with their writing in any class. Consultants will help with any aspect of the writing process, including development, organization, revision, grammar, and proofreading but will not edit or write text. Students may drop in any time, but it is best to call for an appointment. The Writing Center's hours vary from term to term. For additional information, for scheduled hours, or to make an appointment, call 412-624-6556.

English Language Institute

2816 Cathedral of Learning
412-624-5901

The English Language Institute (ELI) provides intensive instruction in English for people whose native language is not English and who need to meet proficiency requirements to enter a university. Courses are noncredit and cover reading, writing, listening, speaking, and grammar. The institute offers classes in the Test of English as a Foreign Language (TOEFL) to students already enrolled in the institute to help them prepare for the test.

Admission to the ELI does not include admission to the University of Pittsburgh. The University of Pittsburgh requires a 550 on the TOEFL for admission to most undergraduate programs. Students who wish to be considered for admission but who have not achieved 550 on the TOEFL may request to have their academic qualifications evaluated in advance. This early evaluation assures qualified students that they can register for academic courses when they meet the English proficiency requirement. Instructions for this procedure are on the ELI application form and Web site. The staff of the ELI is available to advise students about applications to colleges and universities.

For more information about the English Language Institute, call 412-624-5901, write to elipitt@pitt.edu, or visit www.eli.pitt.edu.

Housing

The University provides a variety of housing options and support services to students, including Residence Life and Off-Campus Living. Students may choose to live on campus in University-owned housing or in off-campus housing.

Housing Application Process

Incoming Students

As part of the admissions process, the University provides entering freshmen with a three-year housing guarantee, provided they

- Have been admitted through the Office of Admissions and Financial Aid and their tuition deposit has been received by May 1, and
- Have submitted their Housing/Dining Services Application, contract, and deposit by the due date.

Returning Guaranteed Students

Students who have lived in University housing during their first year with a housing "guarantee" are guaranteed housing for their second and third years at the University provided that they

- Maintain their status as current and continuing full-time undergraduate students in each successive year and
- Currently reside in University Housing and meet all housing requirements (application, contract, deposit, and due date) in each successive year.

The housing application process takes place each spring and is administered by Panther Central, which is located in the Litchfield Towers main lobby. For all housing information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/housing/index.html.

Residence Life

The director and assistant directors of Residence Life are responsible for resident assistants and resident directors, who work with students as their live-in advisors and resource persons within the residence halls. The office also advises the Resident Student Association (RSA), the Residence Life

governing body. The staff offers a variety of educational and social activities within the residence halls, addresses student counseling and conduct issues, and provides other assistance to residents on matters affecting the quality of life in the residence halls.

Residence Life also offers students opportunities to live in focused living learning communities, which are linked with specific academic departments. Residence Life staff provide personal assistance 24 hours a day, seven days a week. For more information, students should contact the resident director in their hall, visit or call the office in 203 Bruce Hall (412-648-1200/1201), or go to www.reslife.pitt.edu.

Off-Campus Living

The Off-Campus Living (OCL) Center provides assistance to students, staff, and faculty in identifying, renting, leasing, or purchasing suitable living accommodations. Off-Campus Living provides the following: information on Universityowned apartments, an apartment roommate matching service, a sublet service, maps of Pittsburgh and surrounding areas, rental tips, campus shuttle schedules, free local telephone service to contact landlords, and listings of apartments inspected and approved by the City of Pittsburgh. Call 412-624-6998, visit the office at 127 N. Bellefield Ave., or go to www.ocl.pitt.edu.

Student Resources

The University is committed to providing a high quality of life for its students and toward that end supports a variety of offices and activities designed to aid students in realizing their potential and having a fulfilling on-campus life.

Affirmative Action

In addition to its work with developing, implementing, and monitoring the University's affirmative action program, the Office of Affirmative Action is responsible for receiving, investigating, and mediating complaints from any members of the University community who believe they have been discriminated against or harassed on the basis of their race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity or expression, disability, or status as a disabled veteran or a veteran of the Vietnam era. Individuals may request information and advice anonymously if they wish. The privacy of all parties will be respected. The office is in 412 Bellefield Hall, 315 S. Bellefield Ave.; the phone number is 412-648-7860.

Athletics

The University offers a variety of opportunities for students to participate in athletics on the varsity, intramural, and club levels, as well as on-campus facilities for group sports and individual exercise.

Varsity Sports

The University offers 10 sports for men (baseball, basketball, cross country, diving, football, soccer, softball, swimming, indoor and outdoor track, and wrestling) and nine sports for women (basketball, cross country, diving, gymnastics, soccer, swimming, tennis, indoor and outdoor track, and volleyball) at the varsity level as well as cheerleading activities. For more information about these sports and contact numbers for varsity coaches, call 412-6488200 or visit the Pittsburgh Panthers Web site at www.pittsburghpanthers.com.

Intramural and Club Sports

New outdoor playing fields are available behind the renovated Cost Sports Center. Call 412-648-8210 for more information or visit the intramural program's Web site at www.intramurals.pitt.edu.

Sports clubs offer participation in sports ranging from bowling to rowing. Contact the Student Organization Resource Center (833 William Pitt Union, 412-624-7116) for more information on sports clubs or visit the Web site at www.sorc.pitt.edu.

Sports Facilities

There are a variety of sports facilities available for use by individuals and groups. Fitness centers are available in Litchfield Towers, Schenley Quadrangle, Lothrop Hall, Sutherland Hall, Bellefield Hall, Trees Hall, and the Baierl Student Recreation Center in the Petersen Events Center. Gymnasiums and swimming pools are available in Trees Hall and Bellefield Hall. The Baierl Student Recreation Center has two convertible racquetball/squash courts and four racquetball courts. In addition, eight squash courts are available in the Fitzgerald Field House, and soccer fields are available through the Department of Athletics.

Visit www.intramurals.pitt.edu for a virtual tour of the facilities, reservation information, and hours of operation.

Book Centers

The University owns and operates two bookstores on campus: The Book Center and The Health Book Center. The Book Center, at 4000 Fifth Ave., carries textbooks for most University courses, as well as a general book selection, school supplies, and sundries such as art supplies, stationery, greeting cards, and calendars. Call 412-648-1455 or visit www.pitt.edu/~bookctr for more information. The Health Book Center, at 3527 Forbes Ave., carries all course books for the Schools of Medicine, Dental Medicine, Health and Rehabilitation Sciences, Nursing, and Pharmacy, as well as the Graduate School of Public Health. Call 412-648-8915 or visit www.healthbookcenter.pitt.edu for more information.

The University Counseling Center

The University Counseling Center, in 334 William Pitt Union, is staffed by licensed psychiatrists, psychologists, social workers, and counselors who provide a variety of services for undergraduate and graduate students. All services of the center are accredited by the International Association of Counseling Services and are confidential, free, and voluntary.

We provide individual, couples, and group counseling for students seeking assistance for relationship problems, anxiety, depression, stress, and concerns about academic progress or direction. We also provide psychiatric services and medication management for currently enrolled students. Special services such as sexual assault counseling and advocacy are provided through the center's Office of Sexual Assault Services. In addition, drug and alcohol assessments and counseling are provided at the center.

For information about the center and its services, see www.counseling.pitt.edu. To schedule an appointment, call 412-648-7930.

Sexual Assault Services/University Counseling

The Office of Sexual Assault Services provides individual and group counseling designed to alleviate the trauma associated with sexual victimization. Emergency medical, legal, and police support is provided. Students are assisted in negotiating course schedules or room changes and in obtaining medical, legal, and counseling resources available to them in the University and local communities.

The Office of Sexual Assault Services also sponsors Peers 2 Peers. This is a volunteer student outreach program whose mission is to create an awareness of the dynamics of sexual assault on the Pittsburgh campus, promote effective communication, and prevent sexual victimization through educational programming. For more information, call 412648-7856 or 412-648-7930, visit 334 William Pitt Union, or see http://www.saserv.pitt.edu.

Disability Resources and Services

The Office of Disability Resources and Services (DRS) provides a broad range of support services to assist students with disabilities. Services include, but are not limited to, tape-recorded textbooks, sign language interpreters, adaptive computer technology, Braille translation, and nonstandard exam arrangements. Contact DRS at 412-648-7890 or 412383-7355 (TTY) in 140 William Pitt Union or see www.drs.pitt.edu for more information.

Dining Services

Campus Dining Services offers students a variety of dining options. All student dining services are coordinated and administered through Panther Central, which is located in the Litchfield Towers main lobby. All students residing in residence halls are required to purchase a meal plan. Students living in University apartment-style accommodations may purchase a meal plan but are not required to do so. Students can select from a variety of

meal plans, each offering different combinations of dining passes and dining dollars. Campus Dining Services invites you to check out all of our dining options across campus.

Major Residence Hall Dining Facilities

- Market Central in Litchfield Towers
- The Perch at Sutherland

Retail Operations

- Quick Zone in Litchfield Towers and Sutherland Hall
- Market to Go in Litchfield Towers
- Schenley Café in William Pitt Union
- Cathedral Café in the Cathedral of Learning
- Petersen Events Center Food Court
- Starbucks Coffee Carts across campus
- Einstein Bros. Bagels in Posvar Hall and Benedum Hall

For all dining information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/dining/index.html.

Health Care and Student Health Service

All full-time students pay a student health fee each term to cover a variety of services at the Student Health Service in Suite 500 of the Medical Arts Building, 3708 Fifth Ave., Pittsburgh, PA 15213. The Student Health Service is a multiservice health care facility that offers outpatient clinical services, gynecology, and comprehensive health education programs. Call 412-383-1800 or visit www.studenthealth.pitt.edu for more information.

The University of Pittsburgh Pharmacy, in the same suite as the Student Health Service, offers over-the-counter and prescription medicines, often at lower prices than available elsewhere. Call 412-383-1850 or visit www.studentaffairs.pitt.edu/shspharmacy for more information.

Students should have health insurance to protect themselves in the event of illness or injury. A direct-pay medical insurance plan is available to students through University health plans. The plan is designed to provide insurance benefits for services not offered at the Student Health Service as well as for hospitalization and emergency care. Applications and product information are available at the Student Health Service.

ID Cards (Panther Cards)

Every student, faculty, and staff member at the University must obtain an ID card from Panther Central, located in the Litchfield Towers main lobby. Student IDs, or "Panther Cards," are used to access residence halls (your assigned residence only), meal plan, athletic events, campus shuttle buses, recreational facilities (within your residence hall, Bellefield Hall, Trees Hall, and the Baierl Student Recreation Center), Student Health Services, computer labs, and Pitt Program Council events. The Panther Card also affords access to off-campus benefits such as free admission to some Pittsburgh cultural facilities. In addition, the Panther Card offers access to Panther Funds at local participating merchants. For all Panther Card information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/card/index.html.

International Services

708 William Pitt Union
412-624-7120
www.ois.pitt.edu

The Office of International Services (OIS) advises international students on how to maintain their immigration status and helps to ensure compliance for both international visitors and the University, with respect to federal regulations. OIS also provides generalized support in connecting the University's international community and their hosting departments with resources inside and outside campus. For more information, contact OIS at ois@pitt.edu, or call 412-624-7120.

Parking and Transportation

The University provides a variety of parking and transportation services, both on and off campus. For more information, contact the University Department of Parking, Transportation, and Services at 412-624-8612 or visit www.pts.pitt.edu.

Parking Services

Student parking is available year-round. The Parking Services Office provides several parking options to meet the different schedules and needs of students. Commuter parking is available daily on a cash basis or by the term in selected facilities by permit only. Resident student permits are available for full-time students residing in one of the University residence halls operated through the Housing Office. Evening permits are available for parking after 2:50 p.m. weekdays and all day on weekends, except during special events, in many University lots. For more information, visit our Web site at www.pts.pitt.edu/parking. The Parking Services Office is located at 204 Brackenridge Hall, 412624-4034.

Commuting Alternatives (Ridesharing)

Daily commuter students can save money by sharing a ride. A free, computerized matching service is available to help you locate others interested in carpooling. Contact the University's ridesharing partner online at commuteinfo.org, or call 888-814-6110. For additional commuting alternatives, visit www.pts.pitt.edu/commuting.

Public Transportation

Students may ride any Port Authority bus, incline, or light-rail train within Allegheny County for free by showing their valid University ID cards. The Department of Parking, Transportation, and Services, at 3525 Forbes Ave., maintains all Port Authority rider information, including maps, schedules, and routes to facilitate the use of public transit. Port Authority bus schedules are also available in the lobby of the William Pitt Union.

Pittsburgh campus Transportation System

University of Pittsburgh students may ride all of the Pitt buses and shuttles fare-free by showing a valid University ID.

In addition, students are permitted two guest riders (space permitting). Buses and shuttles normally have a 20- or 30minute route. Detailed maps and time schedules are available online at www.pc.pitt.edu/transportation/index.html and at the William Pitt Union information desk. The Department of Parking, Transportation, and Services is located at 3525 Forbes Ave.

SafeRider

A night-time, non-emergency van service called SafeRider is available during the evening and early morning hours to transport you from one campus building to another, from local residences to campus buildings, and from campus buildings to local residences within the University boundaries, and it is not on a regular University bus route. SafeRider operates during the following hours:

Fall and Spring:
Sunday-Wednesday and days when the shuttle system operates on a holiday schedule
7 p.m.-3 a.m.

Thursday-Saturday
7 p.m.-5 a.m.

Summer:
Daily 9 p.m.-3 a.m.

For service, call the dispatcher at 412-648-CALL (2255) during these times. You will need to provide the following information when you call: your name, pick-up location and the telephone number at the pick-up location, destination, number of individuals with you, and student ID number. Consult the SafeRider brochure for additional information concerning policies and procedures.

Buses Home for the Holidays

This program is designed to give students a safe, comfortable, alternative ride home for the three major recesses: Thanksgiving, winter, and spring. Buses depart from the William Pitt Union, and most of the destinations served are direct routes. Deluxe motor coaches (Lenzer/Coach USA) transport the students in air-conditioned comfort while movies are shown en route.

Bicycle Registration Program

Registration of bicycles is recommended as a deterrent to theft, to help in the identification of lost or stolen bicycles, and to help better accommodate cyclists at the University. Registration is easy, and it is free. You may register bikes at www.pts.pitt.edu/commuting/bicycling/bike-registration.php.

Bicycle lockers are available at two convenient locations. The locker totally encloses the bicycle, protecting it from rain and snow. There is also room to store a helmet, riding shoes, and other accessories. Lockers may be rented by the term at the Parking Services Office in 204 Brackenridge Hall.

Career Development

The Career Development Office is dedicated to helping students prepare for rewarding careers by providing individual assistance and a variety of professional development programs. Career counselors and consultants assist students with choosing or changing an academic major through personal assessments, writing effective resumes and cover letters, networking with professionals, exploring internship opportunities, applying for graduate or professional school, and preparing for job interviews. Career Development has a variety of online resources that are available through the my.pitt.edu portal, including *FutureLinks*, a career management software program that enables students to apply for jobs and internships, as well as register for job fairs, career workshops, and other programs and events. Diverse educational programs are offered for students in all stages of their journey. For more information, call 412-648-7130, stop by 224 William Pitt Union, or see www.careers.pitt.edu.

Police Department

The University of Pittsburgh Police Department provides police and security services to the University community. For emergency calls, dial 811 from on-campus phones or 412-624-2121 from off-campus phones. The University of Pittsburgh Police Department's main headquarters is in G1N30 Wesley W. Posvar Hall. For general information calls (non-emergency), dial 412-624-4040 or see http://www.police.pitt.edu.

Student Government

Undergraduates at the University are represented by two primary governing bodies, the Student Government Board and the College of General Studies (CGS) Student Government Council.

The Student Government Board (SGB)

The Student Government Board (SGB) is an elected body of nine students that exists to promote the concerns, interests, needs, and welfare of non-College of General Studies undergraduates at the Pittsburgh campus of the University of Pittsburgh. As the governing body for students, SGB serves as the liaison to University faculty, administration, and staff. SGB also disburses student activity fee funds to student clubs and organizations.

SGB makes appointments to University committees and also oversees SGB committees, whose membership is open to all undergraduates. These SGB committees include Academic Affairs; Allocations; Community and Governmental Relations; Elections; Facilities, Technology, and Transportation; Judicial; Wellness; and any existing task force or ad-hoc committee. The SGB meets weekly during the fall and spring terms. For more information, call 412-648-7970, visit 848 William Pitt Union, or see www.pitt.edu/~sgb.

The CGS Student Government Council

The CGS Student Government Council is composed of five elected members who represent the interests of students in the College of General Studies. The Council coordinates a variety of student programs and services and allocates the CGS student activity fee. In addition to the five

members of the Council, there are five divisions that help carry out the Council's business: Budget and Finance, Judicial Affairs, First Degree, Marketing and Advertising, and Student Programs. For more information, call 412-648-7895, visit 824 William Pitt Union, or see www.cgssg.pitt.edu.

PITT Arts

Each year, 22,000 Pitt students experience the power of the visual and performing arts in Pittsburgh through the PITT ARTS program, which sponsors 110 free student outings per year, including trips to the symphony, cinema, opera, ballet, theater, and museums. Students may also use their student ID cards (Panther Card) to visit the Carnegie Museums of Art and Natural History, Phipps Conservatory and Botanical Gardens, and The Andy Warhol Museum at no cost. Visit the PITT ARTS Web site at www.pitt.edu/~pittarts to find a listing of current arts events in Pittsburgh and on campus, and explore the cheap seats page to find out about deeply discounted tickets, sold right in the William Pitt Union, to local arts organizations.

Pitt Program Council

A variety of entertainment and educational activities are planned each year by the student committees of the Pitt Program Council (PPC), the central programming organization on campus. Programs include lectures, travel packages, weekend films, miniseminars, recreational tournaments, annual homecoming activities, and art gallery exhibits. New members are always welcome. For more information, contact the Pitt Program Council at 412-648-7900, or visit www.pitt.edu/~ppc.

Student Employment and Placement Assistance

The mission of the Office of Student Employment and Placement Assistance (SEPA) is to connect Pitt students who are actively seeking jobs or internships with recruiters and human resources professionals at businesses and organizations throughout the country. SEPA staff work to build relationships with representatives in a variety of career fields and help match qualified students with companies. SEPA hosts several career fairs each semester, facilitates the on-campus interviewing process, and helps students to tap into the Pitt Career Network sponsored by the Pitt Alumni Association. Employers and students use the online career management software program *FutureLinks*, which is accessible on the my.pitt.edu portal, to make connections. For more information, call 412-648-HIRE (4473), stop by the office located at 200 William Pitt Union, or visit www.sepa.pitt.edu.

Student Media

Student-produced media creates original news and entertainment for students and provides training to students interested in working in the media.

The Pitt News publishes a daily newspaper in print, online, social media and mobile app and features news, sports, opinions, art and entertainment and videos.

WPTS-FM radio station broadcasts alternative and independent music, campus news and sports via the FM dial, webstreaming and mobile apps. Their website provides music articles, concert reviews, and news and sports reports.

UPTV-21 television station posts varied short comedic and dramatic video entertainment programs on YouTube and streams some programming live on its website.

Student Organizations

More than 500 registered student organizations provide myriad opportunities for extracurricular activity. In addition to government, media, publications, programming, fraternity, sorority, and honor societies, there are clubs for sports, recreation, performing arts, politics, religion, service, professional and academic pursuits, ethnic and cultural enrichment, and many other specialized interests. Students may also participate in organizations that represent the interest of specific student groups, such as the Black Action Society. A complete list of registered student organizations is available at www.sorc.pitt.edu. The Student Organization Resource Center (SORC) is the office that oversees registered student organizations and is located in 833 William Pitt Union.

Student Volunteer Outreach

The Student Volunteer Outreach (SVO) promotes, supports, and provides opportunities for students to participate in community service and service-learning activities ranging from one-time service projects and alternative break projects to internships and ongoing volunteer opportunities. It also sponsors annual projects and events, including the SVO/SGB Pittsburgh Project, Pitt Partnership for Food, and the Agency Fair for student volunteers. The SVO is on the ninth floor of the William Pitt Union; its Web site is www.svo.pitt.edu.

University Child Development Center

The University Child Development Center is a developmental child-care facility for children between the ages of 6 weeks and 5 years. The center is open to children of University students, faculty, and staff. The children are free to select activities from an age-appropriate environment prepared by the teaching staff. The environment allows children to practice previously learned skills and challenges children to develop new psychosocial, cognitive, and motor skills in a relaxed, nurturing atmosphere. The center is at 635 Clyde St. and is open from 7 a.m. to 6 p.m. Monday through Friday. For more information, call 412-383-2100 or see www.hr.pitt.edu/ucdc.

Veterans Services

The staff of the Office of Veterans Services facilitates the transition of veterans from military to University life, supports their ongoing academic success, and assists veterans, guardsmen, reservists, spouses, and dependents in receiving their military education benefits. In addition to these services, the office implements the VA work study program. The Office of Veterans Services is located on the first floor of Posvar Hall, inside of the College of General Studies. Please call 412-624-3213 or email veterans@pitt.edu for more information.

William Pitt Union

The William Pitt Union, built more than 100 years ago and located across Bigelow Boulevard from the Cathedral of Learning, serves as the focal point for campus activities, student organizations, and the Division of Student Affairs. The union features a recreation center, videogame center, dining service, information service, art gallery, dance studio, lounges, meeting rooms, student organization offices, ticket office, dining rooms, and several multi-use spaces for programs. To reach the union's information desk, call 412-648-7815.

Financial Information

Tuition

Enrollment Fee or Tuition Deposit

Upon acceptance to the University, students may be required to pay a nonrefundable, nontransferable enrollment fee or tuition deposit. If paying an enrollment fee, part of that fee will be considered to be a tuition deposit, and part might be used to pay for new student programming of some nature. The tuition deposit component will be applied toward their first-term tuition. The amount of the deposit ranges from $200-$500. Instructions for payment will be specified in the admission letter.

Full-time and Part-time Tuition and Mandatory Fees

Undergraduate students enrolled for 12 to 18 credits are considered full-time and pay a flat tuition rate. Students enrolled for one to 11 credits are considered part-time and pay for individual credits. Students may exceed the 18-credit limit with written permission from the dean of the school, but they will be charged on a per-credit basis for each additional credit.

During the summer term and summer sessions, most students are charged tuition on a per-credit basis regardless of the number of credits taken. There are academic programs that charge full-time students flat rates during the summer term, and those exceptions are listed on the website cited below.

Mandatory fees vary by campus, undergraduate and graduate level, and by full-time and part-time enrollment. Tuition rates are campus, level, and school specific. The University's tuition and mandatory fee rates are available on the Tuition Rates and Mandatory Fees page.

Residency/Reduced Tuition

Students who reside in the Commonwealth of Pennsylvania may be eligible for reduced tuition through state appropriations.

Assessment of Pennsylvania resident tuition rates is based on whether the student meets the criteria to be considered as a permanent resident of the Commonwealth of Pennsylvania. Essentially, a student who has lived in Pennsylvania for a continuous period of 12 months before enrollment in any institution of higher education in the state may be eligible for Pennsylvania tuition rates. The student must be a citizen of the United States or have an immigrant or permanent visa. For a student younger than 22, both the student and parent(s) or legal guardian(s) must meet the residency requirements for eligibility. Any admitted student may petition for Pennsylvania tuition rates by submitting convincing evidence for review by the Student Appeals Office.

Eligibility is determined by criteria outlined in the University of Pittsburgh Guidelines for Determining Eligibility for Reduced Tuition Rates available in the Student Appeals Office in G-12 Thackeray Hall or online at www.payments.pitt.edu/tuitionguide.html.

Financial Obligation

Students establish a financial obligation to the University when they enroll in courses and will be asked to acknowledge that obligation to be permitted to enroll in classes each term. The agreement to pay (Promissory Note) the student electronically agrees to provides detailed information about the student's financial obligation and also the consequences of default of that obligation. Unpaid accounts may be referred to a collection agency, reported to credit bureau(s), and/or the student may be subject to legal action. In either case, the student will be responsible for any and all expenses incurred, including attorney fees. Students will bear the University's costs and fees associated with all collection activity resulting from the student's failure to make payment under the agreement they will sign each term.

Fees

Special Service Fees may be charged for University transactions that are processed beyond deadlines, due dates, and specified time limits. Special service fees are listed each term in the Schedule of Classes.

Course Fees are associated with certain courses and will be charged when the student enrolls in those courses. These courses are identified in the Schedule of Classes and Course Descriptions. Course fee information is also available on the Academic Regulations page.

Late Payment Fees are charged when students make payment after the published due date for their charges for the term.

Payment

PittPAY is the University's online financial hub for students and their Authorized Users, who students designate in PittPAY as having access to their financial information.

Online Payments may be made through PittPAY by electronic check (eCheck) or credit/debit card. While there is no charge for eCheck transactions, our vendor will charge a non-refundable 2.75% service fee for all debit or credit card payments.

International Payments can be processed in PittPAY through the University's partnership with Flywire. Flywire offers a streamlined and cost effective way to make international payments for tuition and fees on the student's account. More information is available at www.payments.pitt.edu/flywire.

PittPAY Payment Plans are available for students who elect to make payments in monthly installments instead of as one payment at their due date. Participation is optional. More detailed information about the payment plans is available at http://www.payments.pitt.edu/pplan.html.

Check Payments can be mailed to the Student Payment Center. Instructions are available in PittPAY.

College of Business Administration

The College of Business Administration (Pitt Business) is the undergraduate division of the Joseph M. Katz Graduate School of Business and awards the Bachelor of Science in Business Administration (BSBA) degree. Detailed information about the College of Business Administration is available at our website: http://www.cba.pitt.edu/about/. Pitt Business offers full-time and part-time programs with majors in accounting, business information systems, finance, global management, human resources management, marketing, and supply chain management. Double-degree programs are also available to BSBA students in conjunction with the Dietrich School of Arts and Sciences, School of Information Sciences (SIS) and the College of General Studies. Pitt Business also offers certificate programs in international business, leadership and ethics, supply chain management, innovation and entrepreneurship and business analytics for students in the BSBA degree program.

Additional degree programs include the arts and sciences/business dual major program offered through the Dietrich School of Arts and Sciences in conjunction with Pitt Business, and a post-baccalaureate career development certificate program in accounting available through the College of General Studies. Pitt Business draws its faculty from the Katz School and is accredited by AACSB International-The Association to Advance Collegiate Schools of Business.

Contact Information

University of Pittsburgh
College of Business Administration
Office of Admissions

www.cba.pitt.edu

Application Procedures

First-time freshman and external transfer admissions to Pitt Business are handled through the Office of Admissions and Financial Aid. Students planning to relocate to Pitt Business from another Pitt academic program or campus should contact the program in which they are currently enrolled to have their records forwarded to Pitt Business for evaluation. Details for freshman and transfer admissions, as well as for relocation, are provided in the Application for Admission section of this bulletin.

Special Admissions

Under certain circumstances, second-degree, post-baccalaureate, and guest students may apply directly to the College of Business Administration for admission. Students applying under one of these statuses are considered for admission based on the strength of their academic records. (See Second Degree Candidates and Special and Nondegree Admissions sections of this bulletin for more information.) Contact the Pitt Business Office of Admissions for specifics on admission requirements and other procedures.

Evaluation of Transfer Credits

Students transferring from other colleges or universities are encouraged to apply to the College of Business Administration through the Office of Admissions and Financial Aid. (See Transfer Student Admissions section of this bulletin for detailed information.) Upon admission to Pitt Business, transfer students will receive a BSBA degree requirements checklist by email. Pitt Business will evaluate coursework from other colleges based on content and equivalency to coursework offered at the University of Pittsburgh. The degree checklist shows how the transferred courses will apply to the student's BSBA degree. To transfer, a course must be completed with a grade of C or better. The University does not accept grades for transfer, only credits. A minimum of 40 credits must be completed at the University of Pittsburgh. Students who have questions about their credit evaluation should contact the Pitt Business Office of Admissions. Please see our website for additional details on transfer credits: http://www.cba.pitt.edu/admissions/transfer/credit-policies

Academic Standards

The following section details the school's academic standards:

Academic Standing Policy

The academic standing of all BSBA students is reviewed at the end of the fall and spring terms. As a result of this review, students are assigned one of the following academic standing codes: good academic standing, academic probation, academic suspension, or academic dismissal.

Good Academic Standing

Students remain in good standing as long as they maintain a cumulative grade point average (GPA) of 2.00 in all courses taken at the University of Pittsburgh.

The cumulative GPA includes all courses taken on a Letter Grade grading basis at all campuses of the University of Pittsburgh. The course repeat rules require the most recent grade of a repeated course be included in the GPA.

Academic Probation

Any student who has a cumulative GPA below 2.00 is placed on academic probation.

Academic Suspension

Full-time students

If after one term of additional enrollment, the cumulative GPA of a full-time student on probation remains below 2.00, the student is subject to suspension or dismissal.

Students on probation

Students on probation who enroll and then withdraw from all courses are still subject to suspension because they have not raised their cumulative GPA to 2.00 after an additional term of attempted enrollment.

Part-time students

If, after attempting 12 additional credits, the cumulative GPA of a part-time student on probation remains below 2.00, the student is subject to suspension or dismissal.

An academic suspension from Pitt Business prohibits students from enrolling in courses at the University of Pittsburgh for one calendar year. Students will not be awarded transfer credit for courses taken at other colleges or universities while on academic suspension.

Reinstatement after the First Suspension

After one calendar year, suspended students are eligible to apply for reinstatement to the College of Business Administration by writing to the Pitt Business Associate Dean presenting a rationale for reinstatement.

Reinstated students return on academic probation and have one term of enrollment to raise their cumulative GPA to 2.0 or be subject to a second suspension or dismissal.

Second Academic Suspension

If suspended a second time, a student is not eligible for reinstatement for five years. After five years, suspended students are eligible to apply for reinstatement to the College of Business Administration by writing to the Pitt Business Associate Dean presenting a rationale for reinstatement.

Academic Dismissal

Dismissal from Pitt Business is a permanent action, and dismissed students are not eligible for reinstatement at any University of Pittsburgh school or campus.

Grade Point Average Standards

Overall GPA

A cumulative grade point average (GPA) of 2.00 is required in all courses applied toward the BSBA degree.

Major GPA

A minimum cumulative GPA of 2.25 (C+ average) is required in all courses applied toward a student's major. A C- or better must be earned in each individual course applied toward a student's major.

For full-time students: If a full-time student's major GPA drops below 2.25 for two consecutive terms, no new major courses may be taken until the major GPA is raised to 2.25 through course repeats.

For part-time students: If a part-time student's major GPA drops below 2.25 for 9 consecutive credits in his/her major, no new major courses may be taken until the major GPA is raised to 2.25 through course repeats.

Satisfactory/No-Credit Grade Option Policy

All required BSBA core courses and all courses to be applied to a student's major must be taken on a letter grade basis. In addition, courses taken to fulfill the requirements in microeconomics, macroeconomics, calculus, and statistics must also be taken on a letter grade basis. Language classes, arts and sciences general education courses, and electives may be taken on a satisfactory/no-credit (S/NC) grade basis.

Under the satisfactory/no-credit option, a student who does satisfactory work (C or better) receives the grade of S for the course and earns credit for the course. If a student does unsatisfactory work (defined as C- or lower), the student receives the grade of NC and does not earn credit for the course. These courses are not calculated as part of the GPA.

Students may select the S/NC grade option when enrolling online or by visiting 140 Thackeray Hall and completing the grade option form prior to the appropriate deadline.

Course Repeat Policy

A Pitt Business student may repeat a required Arts & Sciences course (including calculus, statistics, microeconomics, macroeconomics and composition), a business core requirement and/or a business major requirement once. If the minimal acceptable grade is not earned after repeating the course, the student may have to transfer out of Pitt Business, or select a different business major.
In the calculation of the major and overall grade point averages, the grade earned in the second taking of a course replaces the grade earned in the first taking; however, the grade earned in the first taking of the course, remains on the student's transcript with a notation indicating the course was repeated.

Academic Integrity

All Pitt Business students are responsible for adhering to Pitt Business policies on academic integrity. The Pitt Business academic integrity guidelines follow the University's guidelines with some procedural changes. Please see the guidelines for details.

Advising

Students pursuing the BSBA degree receive academic advising from full-time professional academic advisors in the College of Business Administration. Each new BSBA student is assigned an academic advisor, establishing a relationship that usually continues through graduation unless the student requests an advisor assignment change.

Academic advisors are information resources. Advisors meet with BSBA students at least once during the fall and spring academic terms to help students create customized academic and career individual development plans and prepare for course enrollment. BSBA students are required to meet with their academic advisor at least once per term, prior to enrollment.

BSBA students are responsible for their academic and career development choices and decisions, but Pitt Business academic advisors are an integrative information and planning resource for students.

BSBA Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations courses):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate business management literacy.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in professional communication and leadership.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Major and Degree Options

The College of Business Administration offers the following degree options:

BSBA Degree

The College of Business Administration awards the Bachelor of Science in Business Administration (BSBA) degree and offers majors in accounting, business information systems, finance, global management, human resources management, marketing and supply chain management.

Pitt Business Certificate Programs

BSBA students have the opportunity to specialize their studies in business analytics, innovation and entrepreneurship, international business, leadership and ethics, supply chain management, innovation and entrepreneurship and business analytics through certificate programs.

The Certificate Program in Business Analytics (CPBA) is designed to give students a strong foundation in the theory, processes, and tools of business analytics in the organizational setting. The CPBA will help students to understand both the statistical and managerial sides of business analytics so that students can add value to organizations of all sizes and types.

The Certificate Program in Innovation and Entrepreneurship (CPIE) is a unique opportunity for Pitt Business students who wish to explore the interface between innovation and entrepreneurship as an enhancement to their business major. The CPIE will contribute to a student's preparation for an entrepreneurial endeavor or a career within an organization committed to innovation and entrepreneurial thinking.

The Certificate Program in International Business (CPIB) builds upon the core curriculum in the College of Business Administration. Requirements include satisfactory completion of level 4 of a second language (a two-year, four-course sequence at the University of Pittsburgh), specialized course work, and one term of approved study abroad or an international internship. Students majoring in Global Management may not also earn the Certificate in International Business. (15 credits, plus foreign language study, and international experience).

The Certificate Program in Leadership and Ethics (CPLE) builds upon the core curriculum in the College of Business Administration. Students admitted to the CPLE will be required to successfully complete all requirements for the BSBA degree requirements including satisfactory completion of specialized course work, internships, and a service-learning project integrating ethics and leadership. (16 credits)

The Certificate in Supply Chain Management (CSCM) is offered jointly by the College of Business Administration and Swanson School of Engineering. Enrollment is available to BSBA students and students enrolled in the BS engineering programs in the School of Engineering. The CSCM provides students with the opportunity to understand important concepts in supply chain management and develop managerial and technical skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations. The CSCM requires 15 credits and is comprised of coursework offered by both CBA and the School of Engineering.

The Certificate Program in Innovation and Entrepreneurship (CPIE) builds upon the core curriculum in the College of Business Administration. CPIE students will explore the interface between innovation and entrepreneurship as an enhancement to their business major. The CPIE will contribute to a student's preparation for an entrepreneurial endeavor or a career within an organization committed to innovation and entrepreneurial thinking. (15 credits)

The Certificate Program in Business Analytics (CPBA) builds upon the core curriculum in the College of Business Administration. CPBA students will develop a comprehensive understanding of business analytics. Students will learn how to diagnose problems and envision solutions from an evidence-based perspective. They will develop the capability to build statistical models, measure the data, interpret the results, and then synthesize the findings in order to improve organizational performance. This holistic education will teach students both the statistical and managerial sides of business analytics. (15 credits)

Pitt Business/A&S Double Degree

Pitt Business offers the double degree program for students seeking to earn degrees in both business and the arts and sciences. Students earning degrees from both Pitt Business and A&S complete a 150-credit program of study, generally requiring five years of study. Students considering this option should consult with advisors in both Pitt Business and A&S, as well as a representative from Career Services, to determine how this program will advance their academic and career goals.

Pitt Business/SIS Double Degree

Pitt Business offers a double degree program for BSBA students seeking to earn degrees in both business and information sciences. Students earning degrees from both Pitt Business and SIS complete a 150-credit program of study, generally requiring five years of study. Students considering this option should consult with advisors in both Pitt Business and SIS, as well as a representative from Career Services, to determine how this program will advance their academic and career goals.

Special Academic Opportunities/Programs

The College of Business Administration offers the following special programs:

Internship Programs

Internships and other career development experiences are an absolutely essential part of business education. The Office of Career Development team works closely with business students to prepare them to successfully launch their careers. A wide range of services, including individualized resume development reviews, mock interviews and career coaching are provided by the Career Development team. The Career Development team also works closely with a wide network of employers and alumni to help business students find internships, as well as full-time positions upon graduation.

Additionally, an international internship program is available to qualified Pitt Business students. This six-credit global immersion program provides a valuable professional experience for students to develop their functional skills, gain a better understanding of cultural differences in the workplace, and enhance their language skills. Sites include: Berlin, Germany; San Paulo, Brazil; Dublin, Ireland; Beijing, China; and Madrid, Spain.

Study Abroad

The Pitt Business International Programs Office connects students to opportunities in more than 75 countries, and the insights Pitt Business students gain into other cultures and economies through these experiences abroad helps them stand out in the competitive global marketplace. Each program is designed to promote cultural development and adheres to our standard of academic excellence. For additional details, please visit our website at: http://www.cba.pitt.edu/study_abroad.

Student Organizations

Business students must diversify their experiences at Pitt and develop hands-on leadership skills essential to a career in business. Pitt Business student organizations are a good way to do this. Designed to run like small businesses, the organizations put students in control. We count on members to coordinate speaker visits from the corporate community, to arrange site visits to local offices of financial institutions and accounting firms, to sponsor social activities for members, and much more. As a member of a student organization, you will make friends for life and develop skills that enhance your resume for your first job. For additional details, please visit our website at: http://www.cba.pitt.edu/studentlife/organizations.

BSBA Degree Program Descriptions

BSBA students may choose a major in accounting, finance, general management, global management, or marketing. To earn the BSBA degree in any of these majors, students must complete a minimum of 120 credits, fulfill all arts and sciences foundation requirements, complete all BSBA core curriculum requirements, and fulfill any major-specific requirements as detailed below.

Department of Business Administration

Major

Accounting, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements (e.g., ANTH 1772 - ANTHROPOLOGY OF WOMEN fulfills both social science and foreign culture requirements).

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:
Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
  or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STAT & PROBLTY FOR BUS MGT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING IN COMPLX ENVIRONMNTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MGRL ETHICS & STAKEHOLDER MGT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMNTLS OF BUS COMMUNICTN (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC & CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The major in accounting is designed to provide students with the general, business, and accounting knowledge necessary for them to succeed as professional accountants. As accounting is a dynamic field, all accounting majors will learn how to keep their knowledge up to date so they can continue to grow throughout their professional careers. Accounting majors will acquire the communication, computer, and interpersonal skills necessary to successfully resolve complex problems in unstructured settings. Accounting majors benefit from participation in extracurricular activities and organizations such as the University of Pittsburgh Accounting Association and Beta Alpha Psi, the national accounting honorary society.

All accounting majors must complete the two (2) BSBA core courses in accounting as well as the seven (7)required accounting major courses listed below. All courses are three credits unless noted otherwise.

BSBA Core Courses in Accounting

Students must complete these courses with a C or better in each course to be eligible to take additional accounting courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING

Required Accounting Major Courses (22 credits)

Courses are offered on a rotating basis.

- BUSACC 1204 - INTERMEDT FINANCL REPORTING 1
- BUSACC 1205 - INTERMEDT FINANCL REPORTING 2
- BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING
- BUSACC 1221 - STRATEGIC COST MANAGEMENT
- BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
- BUSACC 1238 - AUDITING
- BUSACC 1242 - INDIVIDUAL TAX ACCT & PLANNING

Accounting Electives

- BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS
- BUSACC 1296 - ACCOUNTING INTERNSHIP (requires CBA approval)
- BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY (requires CBA approval)

BSBA Program Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate what every BSBA graduate is expected to know about business and management at graduation. This literacy is developed in courses taught in CBA and in particular courses required of all students and offered by the School of Arts and Sciences.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in interpersonal skills, including concise and persuasive written and presentation communication.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Students preparing for the Certified Public Accounting (CPA) Exam will need to complete 150 total credit hours. These credits may be completed through the BSBA program and/or through the MS in Accounting program. Particular CPA Exam requirements vary by state. Academic Advisors and members of the Accounting faculty provide guidance to students preparing for the CPA exam, but students are responsible for confirming with the appropriate state board of accountancy that all educational and experiential requirements are met.

Business Information Systems, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements (e.g., ANTH 1772 - ANTHROPOLOGY OF WOMEN fulfills both social science and foreign culture requirements).

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:
Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
  or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STAT & PROBLTY FOR BUS MGT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING IN COMPLX ENVIRONMNTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MGRL ETHICS & STAKEHOLDER MGT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMNTLS OF BUS COMMUNICTN (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)

- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC & CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Finance, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The major in finance is designed to provide students with the financial knowledge and skills required for a successful business career. It attempts to give students a thorough understanding of the theoretical financial principles and the practical implementation of these principles in the world of business. Students learn how financial markets operate and how to make effective investment and financial decisions. The major is designed to develop analytical skills and problem-solving abilities.

Finance knowledge and practice have become crucial for the success of corporations and of the individuals employed by them. Financial markets are the major conduits through which investments are channeled in the global marketplace.

Understanding these markets and how to make investment decisions are crucial for success in business.

In addition to the BSBA core course, BUSFIN 1030 - INTRODUCTION TO FINANCE, at least fifteen (15) credits in finance course work are required for the finance major.

BSBA Core Course in Finance

This course must be completed with a C or better to take additional finance courses:

- BUSFIN 1030 - INTRODUCTION TO FINANCE

Required Finance Major Courses

- BUSFIN 1311 - CORPORATE FINANCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT

Finance Electives

Courses are offered on a rotating basis.
(A minimum of three courses must be taken.)

- BUSFIN 1316 - ADVANCED CORPORATE FINANCE
- BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS
- BUSFIN 1327 - FUTURES AND OPTIONS
- BUSFIN 1328 - CAPITAL MARKETS
- BUSFIN 1331 - FINANCL INSTITUTIONS & MARKETS
- BUSFIN 1341 - INTERNATIONAL FINANCE
- BUSFIN 1345 - MARKETS AND TRADING
- BUSFIN 1347 - MERGERS ACQISTN & CORPR STRUCT
- BUSFIN 1351 - FINANCIAL MODELING
- BUSFIN 1354 - Valuation
- BUSFIN 1390 - FINANCE INTERNSHIP
- BUSFIN 1395 - FINANCE INDEPENDENT STUDY

BSBA Program Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate what every BSBA graduate is expected to know about business and management at graduation. This literacy is developed in courses taught in CBA and in particular courses required of all students and offered by the School of Arts and Sciences.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in interpersonal skills, including concise and persuasive written and presentation communication.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

General Management, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. - BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC & CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The major in general management provides students with interests in more than one discipline with the flexibility to concentrate their elective course work in two areas. Course work in the areas noted below may be used for the general management major. Courses with significant international content are offered in several areas. Students with international business interests should also consider a study abroad program.

The core courses in the two focused areas of study must be completed with a C or better to take additional courses in those areas. Courses are offered on a rotating basis.

Accounting

- BUSACC 1204 - INTERMEDT FINANCL REPORTING 1
- BUSACC 1205 - INTERMEDT FINANCL REPORTING 2
- BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS
- BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING
- BUSACC 1221 - STRATEGIC COST MANAGEMENT
- BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
- BUSACC 1238 - AUDITING
- BUSACC 1242 - INDIVIDUAL TAX ACCT & PLANNING
- BUSACC 1296 - ACCOUNTING INTERNSHIP *
- BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY **

Finance

- BUSFIN 1311 - CORPORATE FINANCE
- BUSFIN 1316 - ADVANCED CORPORATE FINANCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT
- BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS
- BUSFIN 1327 - FUTURES AND OPTIONS
- BUSFIN 1328 - CAPITAL MARKETS
- BUSFIN 1331 - FINANCL INSTITUTIONS & MARKETS
- BUSFIN 1341 - INTERNATIONAL FINANCE
- BUSFIN 1345 - MARKETS AND TRADING
- BUSFIN 1347 - MERGERS ACQISTN & CORPR STRUCT
- BUSFIN 1351 - FINANCIAL MODELING
- BUSFIN 1355 - VALUATION
- BUSFIN 1390 - FINANCE INTERNSHIP *
- BUSFIN 1395 - FINANCE INDEPENDENT STUDY **

Human Resources Management

- BUSHRM 1665 - NEGOTIATING IN BUSINESS
- BUSHRM 1670 - GLOBAL WORKFORCE MGT & CHANGE
- BUSHRM 1675 - HUMAN RESOURCES STAFFING
- BUSHRM 1680 - COMPENSATION & PERFORM MGMNT
- BUSHRM 1685 - EMPLOYMENT AND LABOR RELATIONS
- BUSHRM 1690 - HUMN RESOURCES MGMNT INTRNSHIP *
- BUSHRM 1695 - HUMN RESOURCS MGMNT INDP STUDY **

Management Information Systems

- BUSMIS 1600 - Technology Enabled Business Transformation
- BUSMIS 1605 - Database Management
- BUSMIS 1610 - Telecommunications Management
- BUSMIS 1615 - Management Information Systems Internship *
- BUSMIS 1620 - Management Information Systems Independent Study **
- BUSMIS 1625 - Electronic Commerce
- BUSMIS 1630 - Project Management
- BUSMIS 1635 - Information Technology Systems and Supply Chains

Marketing

- BUSMKT 1411 - MARKETING RESEARCH
- BUSMKT 1422 - PRINCIPLES OF SELLING
- BUSMKT 1425 - SALES FORCE MANAGEMENT
- BUSMKT 1426 - ADVRTSNG AND SALES PROMOTION
- BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
- BUSMKT 1428 - DIGITAL & SOCIAL MEDIA MARKTNG
- BUSMKT 1431 - PRODUCT DEVELOPMNT & MGMNT
- BUSMKT 1435 - SERVICES MARKETING
- BUSMKT 1441 - CONSUMER BEHAVIOR
- BUSMKT 1451 - RETAIL MANAGEMENT
- BUSMKT 1455 - PRICING STRATEGIES AND TACTICS
- BUSMKT 1461 - INTERNATIONAL MARKETING
- BUSMKT 1481 - BRAND MANAGEMENT
- BUSMKT 1485 - PROJECTS IN MARKETING
- BUSMKT 1490 - MARKETING INTERNSHIP *
- BUSMKT 1495 - MARKETING INDEPENDENT STUDY **

Supply Chain Management

- BUSQOM 1725 - SUPPLY NETWRK MFG CULT LAT AM
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- BUSQOM 1735 - ENGR & BUS COLLBRTN IN INDIA
- BUSQQM 1740 - Procurement and Distribution Management
- BUSBIS 1635 - INF TECHN SYMS SUPPLY CHAINS
- BUSQOM 1790 - SUPPLY CHAIN MGT INTERNSHIP *
- BUSQOM 1795 - SUPPLY CHAIN MGT INDP STUDY **

Organizational Behavior

- BUSORG 1640 - THE ENTREPRENEURSHIP PROCESS
- BUSORG 1645 - CORPORATE ENTREPRENEURSHIP
- BUSORG 1650 - ISSUES IN CAREER MANAGEMENT
- BUSORG 1655 - INT'L DIMENSNS ORGNZTNL BEHAV
- BUSORG 1660 - MANAGING DIVERSTIY IN ORGNIZTN
- BUSORG 1670 - ORGANIZATIONAL BEHAVR IND STDY **

Note:

* Plans for Internships must be approved by CBA Career Services before registration for the course is permitted. Internships will not be counted toward fulfilling Major requirements for students declaring after August 26, 2012.

** Plans for Independent Study courses must be approved by the Associate Dean before registration for the course is permitted.

- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC & CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The global management major enables students to develop expertise in important dimensions of management in a global context. The GLMGT major requires six (6) courses exposing students to the management of people (International Dimensions of Organizational Behavior, Global Workforce Policy), process (Managing Global Supply Chains), and policy (International Economic Issues for Managers; Global Strategy and Competitive Advantage), plus an integrative, senior-level course, focusing on either a company project or a major global industry. We see these three dimensions as intertwined and mutually critical for those who seek to add value to the management function of today's organizations and the firms of tomorrow. To the core understanding of a traditional management foundation, we add knowledge of a second language at the conversational level with the goal of preparing students to conduct business in a second language.

Second Language Requirement

Global management majors must complete second language study through Level 4 at the University of Pittsburgh with a minimum grade of C+ in each course, along with an additional 3-credit course in the language, also to be completed with a minimum grade of C+. If, for a particular language, the University offers instruction only through Level 4, this requirement is fulfilled by 3 credits of a course specific to the region in which the language is widely spoken, completed with a minimum grade of C+. For students already fluent in a second (or third) language, it is required that they will earn at least 8 credits in another language with a minimum grade of C+ in each course.

A student is not permitted to earn both a Global Management major and a Certificate in International Business.

Required Global Management Major Courses

Earn a minimum grade of C (2.00) in each of the following prerequisites to GLM courses:

- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Global management majors must successfully complete the following courses

Global management majors must successfully complete the following courses with a C- or better in each course and a cumulative grade point average of 2.25.

- BUSORG 1655 - INT'L DIMENSNS ORGNZTNL BEHAV
- BUSECN 1508 - INT'L ECON FOR MANAGR
- BUSHRM 1670 - GLOBAL WORKFORCE MGT & CHANGE
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- BUSSPP 1740 - GLBL STRATEGY & COMPV ADVNTG
- BUSSPP 1745 - PROJECTS IN GLOBAL MANAGEMENT

Note:

Global management majors must also earn a minimum GPA of 2.25 in nine (9) credits of second language beyond Level II or 6 credits of language beyond Level II plus 3 credits of a course specific to the region in which the language is widely spoken.

Complete a study abroad experience of at least four weeks in an internationally-based educational or work experience, preferably one making active use of a student's second language training. With permission, up to six (6) credits of the major area courses may be taken abroad as part of a semester study outside of the U.S. Permission will be based on examination of all course material.

* Plans for Internships must be approved by CBA Career Services before registration for the course is permitted. Internships will not be counted toward fulfilling Major requirements for students declaring after August 26, 2012.

** Plans for Independent Study courses must be approved by the Associate Dean before registration for the course is permitted.

These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

One-hundred twenty credits are required for graduation with a BSBA degree. A minimum of 51 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements (e.g., ANTH 1772 - ANTHROPOLOGY OF WOMEN fulfills both social science and foreign culture requirements).

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:
Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
  or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STAT & PROBLTY FOR BUS MGT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING IN COMPLX ENVIRONMNTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MGRL ETHICS & STAKEHOLDER MGT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMNTLS OF BUS COMMUNICTN (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)

- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC & CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Marketing, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Requirements

The major in marketing is designed to provide students with the conceptual background and practical skills necessary to address questions such as what new products a firm should introduce, how products should be priced, how to identify the best channels of distribution, and how best to promote new and existing products. Students majoring in marketing can pursue careers in retailing, sales management, marketing research, advertising and promotion, consumer product marketing, or industrial marketing.

In addition to the general BSBA requirements, 18 credits in marketing course work, plus the BSBA core course BUSMKT 1040 - INTRODUCTION TO MARKETING, are required for the marketing major.

BSBA Core Course in Marketing

Students must complete this course with a C or better to be eligible to take additional marketing courses:

- BUSMKT 1040 - INTRODUCTION TO MARKETING

Required Marketing Major Courses

- BUSMKT 1411 - MARKETING RESEARCH
- BUSMKT 1441 - CONSUMER BEHAVIOR

Marketing Electives

Courses are offered on a rotating basis.
(A minimum of four courses must be taken.)

- BUSMKT 1422 - PRINCIPLES OF SELLING
- BUSMKT 1425 - SALES FORCE MANAGEMENT

- BUSMKT 1426 - ADVRTSNG AND SALES PROMOTION
- BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
- BUSMKT 1428 - DIGITAL & SOCIAL MEDIA MARKTNG
- BUSMKT 1431 - PRODUCT DEVELOPMNT & MGMNT
- BUSMKT 1435 - SERVICES MARKETING
- BUSMKT 1451 - RETAIL MANAGEMENT
- BUSMKT 1461 - INTERNATIONAL MARKETING
- BUSMKT 1481 - BRAND MANAGEMENT
- BUSMKT 1485 - PROJECTS IN MARKETING
- BUSMKT 1490 - MARKETING INTERNSHIP (requires CBA approval)
- BUSMKT 1495 - MARKETING INDEPENDENT STUDY (requires CBA approval)
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS

In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Certificate

International Business Certificate

The Certificate Program in International Business (CPIB) builds upon the core curriculum in the College of Business Administration and is available only to BSBA students. Requirements include satisfactory completion of level 4 of a second language (a two-year, four-course sequence at the University of Pittsburgh), specialized course work, and one term of approved study abroad or an international internship (3-12 credits). Students majoring in Global Management may not also earn the Certificate in International Business.

Leadership and Ethics Certificate

The Certificate Program in Leadership and Ethics (CPLE) builds upon the core curriculum in the College of Business Administration and is available only to BSBA students. Students admitted to the CPLE will be required to successfully complete all requirements for the BSBA degree requirements including satisfactory completion of specialized course work, internships, and a service-learning project integrating ethics and leadership.

Supply Chain Management Certificate

The Certificate in Supply Chain Management (CSCM) is offered jointly by the College of Business Administration and Swanson School of Engineering. Enrollment is available to BSBA students and students enrolled in the BS engineering programs in the School of Engineering. The CSCM provides students with the opportunity to understand important concepts in supply chain management and develop managerial and technical skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations. The CSCM requires 15 credits and is comprised of coursework offered by both CBA and the School of Engineering.

Chad J. Zutter, Associate Professor of Business Administration and Dean's Excellence Faculty Fellow, PhD, Indiana University

College of General Studies

The College of General Studies provides adult and nontraditional students with a wide variety of learning options. Students who enroll in the College of General Studies can complete a Bachelor of Arts or Bachelor of Sciences degree in career-oriented fields and in concentrations in the arts and sciences. In addition to a degree, students may prepare for transfer to any of the University's upper-division and professional schools. The college also offers a wide range of certificate programs in specialized fields such as health services, accounting, and information sciences. For those students who already have a degree but desire career-related study or preparation for graduate study, the College of General Studies permits them to register in a non-degree program. The College of General Studies uses the same faculties as Arts and Sciences and the professional schools of the University to provide instruction.

Professors and instructors teaching for the College of General Studies come from the following seven undergraduate and professional schools across the University of Pittsburgh: Dietrich School of Arts & Sciences, College of Business Administration, School of Dental Medicine/Dental Hygiene Program, Graduate School of Public and International Affairs, School of Health and Rehabilitation Sciences, School of Information Sciences, and School of Nursing. CGS instructors include full-time faculty, regular part-time faculty, adjunct, graduate students, and professionals and leaders from throughout the greater Pittsburgh region.

The College of General Studies (CGS) targets its curriculum to adult and transfer students who have been out of high school at least two years. Most of the students attending the college have full-time work or family responsibilities and therefore take full advantage of the unique delivery systems available for instruction. Students may enroll in traditional day classes, evening classes, or Saturday classes; they may attend one of the suburban locations; or they may enroll for CGS Online courses.

Contact Information

University of Pittsburgh
College of General Studies
1400 Wesley W. Posvar Hall
230 South Bouquet Street
Pittsburgh, PA 15260

Financial Aid

The Office of Admissions and Financial Aid handles all financial aid processing for College of General Studies students. Obtain information regarding the necessary forms and important deadline dates from the University's financial aid Web site, http://www.oafa.pitt.edu/fahome.aspx or call 412-624-7488.

Students who wish to be considered for supplemental financial aid may apply through the Office of the Associate Dean, College of General Studies. Students must have a completed current application for University assistance and all federal programs, including loans, on file with the Office of Admissions and Financial Aid located in Alumni Hall (forms are available on the financial aid Web site). CGS supplemental aid is awarded on a rolling basis and is need-based. The CGS supplemental financial aid application is available at www.cgs.pitt.edu/admissions.

Academic and need-based scholarships are available through CGS. Information concerning these scholarships for enrolled CGS students is available at www.cgs.pitt.edu/admissions.

Career Services

A CGS career consultant is available to assist students with the formulation of career objectives and preparation for the job search. Various seminars are offered throughout the year, and a variety of resource materials are available for student use. For more information on CGS career services, visit: http://www.cgs.pitt.edu/student-services/career-services.

Registration

College of General Studies students can now self register using the University portal, www.my.pitt.edu. Enrollment periods are posted in the Student Center prior to each term.

Class Locations and Times

Students in the College of General Studies have an array of options for where and when to pursue their course work.

Pittsburgh Campus

The full range of courses offered by the College of General Studies is available at the Pittsburgh campus. The 120-acre campus is located in Oakland.

Off-Campus Program

Off-campus classes are currently offered in Butler County to increase accessibility to higher education. Courses are offered for degree credit in the arts and sciences and in a few professional areas, but full majors are not available. Faculty for all off-campus courses are provided by the academic schools and departments of the University.

CGS Online

CGS Online provides students with the opportunity to earn credit towards degrees and certificates through three unique course formats. All courses offered through CGS Online are Web-based, meaning that most course materials can be accessed through CourseWeb, the University's course management system. CGS Online courses are offered in the following formats:

- **Web** courses feature web-based instruction and interaction. Students interact with their instructors and other students through the class web site. Students complete the course requirements within one term and move through the course materials as a cohort.
- **Hybrid** courses combine web-based interaction and face-to-face instructions. Students are required to attend scheduled workshops and participate in online discussions and activities. Students complete the course requirements within one term and move through the course materials as a cohort.
- **Self-paced** courses utilize a flexible format where students move through assigned course materials at their own pace. Workshops, proctored exams and web-based activities are features of some of the courses. The course syllabus provides more information about the activities for these courses.

CGS Online courses meet the same standards for content excellence and expert instruction as our traditional classroom courses.

Saturday Classes

Saturday classes are offered on the Pittsburgh campus for students who find Saturday a convenient time to attend class.

Class Meeting Times

In general, courses meet 50 minutes per week for each credit hour awarded. Most courses are three credits and meet once a week for two-and-a-half hours. Courses including recitations or lab sections may have longer class times.

Admission Requirements

Admission requirements vary based on the program the student is applying to and are detailed as follows.

Degree-Seeking Students

Those students who desire to complete a degree at the University of Pittsburgh, either in the College of General Studies or ultimately transferring elsewhere in the University, are required to apply as degree-seeking students through the University's Office of Admissions and Financial Aid (OAFA). Students applying as degree-seeking students must provide

- A completed application,
- The $45 application fee,
- A high school transcript, and
- Transcripts from all colleges or universities previously attended.

Once this information has been provided, students will be reviewed for admission. OAFA makes all admission decisions on an individual basis in a holistic way, with past performance and future potential considered. While it is not required, it is highly recommended to have the strongest application possible that students complete the Short Answer Questions form to highlight past and/or work experiencss, training, educational pursuits, and explain any exceptional circumstances that they believe the Admission Committee should take into account in reviewing their records. Students are also encouraged to provide letters of recommendation.

Students must meet a number of specific admissions criteria, depending on their previous experience. A selection of these criteria follows below. For details, refer to the Office of Admissions and Financial Aid website:

- Less than two years since high school graduation: To be considered for admission, recent high school graduates must apply for Arts and Sciences admission and must meet the regular standards for admission as defined by Arts and Sciences. (See Pittsburgh Campus Freshman Admissions section of this bulletin for details.) Students may apply for transfer to the College of General Studies after completing 12 credits, including the mathematics and seminar in composition requirements.
- More than two years since high school graduation: Less weight is given to high school performance. Evidence of maturity, motivation, ability, and consistency as reflected in the fulfillment of adult responsibilities are an important basis for the admission decision.
- GED/high school equivalency: Students scoring at the 50th percentile or higher may be considered for admission.
- Disciplinary dismissal: Students who are dismissed from a college or university for disciplinary reasons must provide documentation from a college official stating the reason(s) for dismissal.

Certificate Program Admission

Students looking to broaden their educational experience or seeking professional development may elect to enroll in an academic certificate program. Certificate programs offer a course concentration in a specific area of study and may partially fulfill the student's degree requirements.Students seeking admission to one of the certificate programs in the College of General Studies must meet CGS certificate admission criteria and complete the CGS online application. Students are required to provide transcripts from all colleges and universities attended. Students must take at least one half of the coursework for the certificate at the University of Pittsburgh and earn a 2.0 or better GPA in certificate courses. The certificates offered by CGS are as follows:

- Accounting (postbaccalaureate program)
- Communication
- Community health assessment
- Corporate/community relations
- Digital media
- Gender, sexuality, and women's studies
- Information system design
- Leadership
- Managing health services programs and projects
- National preparedness and homeland security
- Nonprofit management
- Writing
- Writing for the professions

* Please note that the Leadership certificate must be earned in conjunction with a degree. To enter the Accounting certificate, students must already have a bachelor's degree with at least a 2.75 GPA.

Non-degree Admission

Postbaccalauriate Students

Students who already hold a bachelor's degree and desire to complete University course work as preparation for graduate study or for personal or professional interest, but do not desire to complete a second degree, may apply for admission as non-degree students. These students need to complete the CGS online application for admission and provide transcripts for all previous college work. Students who enroll under this program and later desire to earn a degree will be reviewed for admission under the normal admission criteria.

Guest, Visiting, and Summer Visiting Students

Guest, Visiting, and Summer Visiting students are students enrolled in an undergraduate degree program at another university who plan to take courses for credit at the University of Pittsburgh with the intention of transferring those courses back to their home institution. To be eligible for admission, students must have a minimum 2.5 cumulative or overall GPA. Guest student status is given for one semester only. Students apply through the CGS online application. Admissions is rolling. Applications should be submitted at least 2 weeks prior to the start of classes.

Inactive Student Re-admission/Reinstatement

Reinstatement is necessary for any Pitt student in good standing, who is seeking re-admission to CGS and has not registered for at least one course in three consecutive terms. Such students are considered "inactive" and must reapply to the College of General Studies before they can register for class, completing all applications and resubmitting all official transcripts, if necessary, and paying the application fee. Students who have not been enrolled in CGS or some other college or school within the University for more than six terms or two calendar years must follow all academic policies in effect at the time of their re-admission to CGS. Students who have not been enrolled for less than the six terms or two calendar years will be treated as continuously enrolled students and as such will have a choice to follow any new policies or those in existence prior to the end of their previous enrollment.

Early Admission Option for Graduate Study

Students with a GPA of 3.5 or better planning to pursue graduate work at the University of Pittsburgh may want to consider the Early Admission Option for Graduate Study. This option allows students to use the first 24 credits of graduate work as the last 24 elective credits of their undergraduate program. The following graduate schools at Pitt allow this option in conjunction with the CGS degree program: the Graduate School of Public and International Affairs and the Graduate School of Public Health. The School of Law has a similar program for it's Master of Studies in Law Degree program for CGS Legal Studies students.

Guidelines:

- Students must be superior graduate school candidates and be admitted to the Pitt graduate program. Admissions requirements can be obtained from the graduate schools.
- Students must complete a minimum of 96 credits toward the CGS degree, including all general education and major requirements, before the graduate program begins. In addition, the last 30 of the 96 undergraduate should be in residence in CGS. Satisfactory completion of these requirements does not guarantee acceptance into the graduate program. This decision is made by the graduate program.
- The graduate program must include at least 24 credits of graduate-level coursework. Students must earn a B or better grade in all graduate coursework. (S or H grades in the MSL program)
- Twenty-four credits is the maximum number of graduate credits that can be used to fulfill elective requirements of the undergraduate degree. A student may seek to use fewer than 24 graduate credits toward their elective credits if they have already partially fulfilled their elective requirements.

Note: Students who choose this option must be aware that enrolling as a graduate student may affect their financial aid package. Students are responsible for contacting the Financial Aid Office regarding this issue.

International Admission

International students (applicants from other countries on student visas) who are interested in full-time attendance in programs offered only in the College of General Studies must first contact the International Student Admissions Officer, Office of International Services, 708 William Pitt Union, Pittsburgh, PA 15260. (See the International Student Admissions Section of this bulletin.)

Advanced Standing Policy

Applicants must submit official transcripts from each accredited college or university attended, whether or not it is intended that the courses be counted toward a degree. Grades for credits transferred are not used in computing a student's grade point average (GPA). All credits eligible for transfer are subject to the following regulations:

- Only courses with C or better grades will be considered for transfer.
- Courses must correspond with those offered by the University in objectives and content.
- The number of credits granted for a given course cannot exceed the number on the transcript from the school where they were earned, nor can it exceed the number earned in the corresponding courses at the University of Pittsburgh.
- A maximum of 90 credits may be transferred from a four-year institution and 60 credits from a two-year institution, however no more than 90 credits can be transferred.
- While the College of General Studies does not have a statute of limitations, it does reserve the right to invalidate some courses for transfer in which the content is outmoded.
- Students in CGS degree programs may transfer up to 18 credits of professional courses as electives (e.g. business, engineering, nursing, etc.).
- All transfer credits are subject to reevaluation if a student transfers from one school to another or from one major to another within the University of Pittsburgh or becomes inactive and is subsequently readmitted.
- If a course for which advanced standing is given is repeated at the University of Pittsburgh, the advanced-standing credit is cancelled.

Advanced Placement and Credit by Examination

Students in CGS may also earn advanced standing credits through the following means:

College Level Examination Program (CLEP)

The CLEP program provides a way of earning college credits through testing. Specific regulations governing the awarding of CLEP general examination credits are available by calling 412-624-6600, from an academic advisor, or at www.cgs.pitt.edu.

Credit by Examination

Students may earn credits toward graduation by successfully completing examinations in courses offered in the College of General Studies. Such examinations must be arranged through both the office of the CGS Associate Dean and the department teaching the course for which credit is desired. Many courses, except those with laboratories, special restrictions, or in the performing arts, may be challenged by examination. Course-specific credit by examination is open to all students enrolled in the College of General Studies who are in good academic standing. Cost for the exam is $10 per credit.

Once a student has enrolled in a course at any institution (including the University of Pittsburgh) and received a grade, including a grade for incomplete work, the student cannot be given credit toward graduation by taking a challenge examination for that course.

Students may be given credit for successfully completed the advanced-standing tests of the College Entrance Examination Board.

Students who are majoring in administration of justice and who have successfully completed Pennsylvania Act 120 or state police cadet training can receive up to 15 credits of advanced standing. The credits are awarded for specific courses.

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC) through cross registration at Carnegie Mellon University are accepted toward a College of General Studies degree. CGS will grant up to four credits toward graduation for the

following courses in lieu of or in combination with physical education courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0011, MILS 0012, MILS 0021, and MILS 0022; or freshman/sophomore level Navy ROTC courses from CMU.

Also, four junior and senior level courses from these three ROTC programs may be used as professional electives for the CGS degree program, if professional electives are permitted. These courses are AFROTC 1013, AFROTC 1014, AFROTC 1015, and AFROTC 1016 (all 3-credit courses); MILS 1031, MILS 1032, MILS 1041, and MILS 1042 (all 1-credit courses); and similar courses from Navy ROTC.

Internships

An internship is a supervised, work-related experience, volunteer or paid, which is related to an academic discipline and is sponsored, evaluated, and graded by a University faculty member. The internship is a new experience and does not represent credit for past work or continuation of the current employment situation. A detailed outline of CGS internship requirements is available from CGS academic advisers, and at www.cgs.pitt.edu.

PLEASE NOTE: Several CGS majors require that you complete an internship at a facility that may or will require a criminal background check, an ACT 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Study Abroad

College of General Studies students are encouraged to enhance their undergraduate education by including a study abroad experience. Credit may be earned toward a CGS degree through participation in either Pitt-sponsored, exchange, or Pitt-recognized programs. Students may study in virtually any part of the world in these programs or others offered by many American and international institutions. Some programs are of short duration to fit the schedules of students with extensive work, family and other commitments.

Before study abroad is undertaken, approval for credit must be obtained. The study abroad advisor provides program approval and the CGS advisor approves the course selections and credits. Students should have at least a 2.75 GPA before seeking permission to study abroad.

Visit the Study Abroad Office in Room 802 William Pitt Union, call 412-648-7413, or review www.abroad.pitt.edu for more information.

Academic Standards

The College of General Studies' Guidelines on Academic Integrity outlines obligations of both students and instructors for maintaining academic integrity in CGS classes. An electronic copy of this publication, which lists the obligations, procedures, penalties, and remedies for maintaining such integrity, is available on the College of General Studies website.

Graduation Requirements

- Students must apply for graduation from CGS at the beginning of the term when completing the necessary credits in the graduate program. Students must have minimum of 120 credits in order to graduate.
- Students receive a BA or BS degree depending upon the CGS major. The final undergraduate transcript will specify the major completed in CGS.
- The GPA for graduation from CGS will be calculated solely on the earned Pitt credits on the undergraduate transcript. The graduate program courses appear on the graduate transcript and the undergraduate transcript is noted: Baccalaureate degree awarded in conjunction with graduate degree.
- In order for CGS students to graduate with honors from the University, they must have at least 60 letter-graded University of Pittsburgh credits at the undergraduate level. Courses at the graduate level and undergraduate courses graded S or H are not included in this 60 credit requirement.

The Bachelor of Arts or Bachelor of Science degree will be awarded upon the fulfillment of the following conditions:

- Completion of at least 120 credits of University work in one of the prescribed curricular courses, by advanced standing, or by examinations.

- Completion of at least one-half of the major or 15 credits, whichever is greater, at the University of Pittsburgh, Pittsburgh campus.
- Completion of the senior year (30 credits) in the College of General Studies.
- Attainment of at least a cumulative grade point average of 2.00 in courses taken at the University of Pittsburgh.
- Attainment of at least a cumulative grade point average of 2.00 in the major.
- Satisfactory completion of all required CGS and major courses.

Grading Policy

There are two grading options available to students registering for courses offered by the College of General Studies: the letter grade option and the satisfactory/no-credit (S/NC) option (formerly the S/N option). (See the Grading and Records section of this bulletin for additional details on the two systems.)

Students must choose the grading option they desire when self-registering or by submitting a Grade Option/Audit Request form by the end of the fourth full week of classes during a term (second full week of classes during summer sessions 1 and 2). This decision may not be changed. Grade Option/Audit Request forms are available in the CGS registration center, 1400 Wesley W. Posvar or at www.registrar.pitt.edu/ under grades. If the student does not fill out a Grade Option/Audit Request form for a course in which more than one grade option is available, the default option (generally a letter grade) will automatically be selected.

There are two limitations to the choice of the satisfactory/no-credit (S/NC) grade option in the College of General Studies:

1. Departments may decide which courses are required for the major and if any may be taken as satisfactory/no-credit. Departmental rules may cover not only courses within the department but those in other departments that are considered essential to the major. Students should be sure before selecting this grading option that their decision will not have an adverse effect on their plans for majoring in a particular field.
2. Under certain circumstances, departments may declare a course available only for a letter grade or as satisfactory/no-credit. In such courses students will not have a choice for the other grade option.

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements with the same instructor assigning the G grade. A course in which a student has received a G grade cannot be completed by sitting in the same course with the same or different instructor in a subsequent term. Exception to these conditions can be granted only by the CGS Associate Dean and must be approved before the G grade is issued.

At the time of requesting a G grade, the student should arrange with the instructor a plan and schedule for completing the course work. The instructor and student should complete the G-grade Request form. G-Grade Request forms are available in the CGS registration office, 1400 Wesley W. Posvar Hall.

Grade Reports

Shortly after the term ends, students can access their grades online via the university portal at www.my.pitt.edu. This report shows the total credits carried, the grade received in each course, and total quality points earned.

Academic Probation

Students who have earned a minimum of 12 credits in the College of General Studies and whose cumulative grade point average falls below 2.00 at the end of any term will be placed on probation. Students placed on probation may be limited to 6-12 credits a term until they have regained good academic standing. Any students placed on probation who fail to regain good academic standing by the time they have completed an additional 12 credits of course work are subject to suspension.

Dean's List

The Dean's List, a recognition of high academic performance, is achieved by degree students each time they complete 12 letter-graded credits in continuous active status in the College of General Studies with a grade point average of 3.5 or higher. Students cannot have incomplete grades in terms reviewed for the Dean's List.

Degrees Conferred

The College of General Studies awards Bachelor of Arts degrees in the following majors:

- Administration of justice
- Health services
- Humanities
- Legal studies
- Liberal studies
- Media and professional communications
- Public service
- Social sciences

Bachelor of Science degrees are awarded in the following majors:

- Dental hygiene
- Health services
- Natural sciences

Program and Course Offerings

Major

Administration of Justice, BA

In American society, the justice system is a central social institution. Its effects on individuals and social groups give it a pivotal role in a changing society. The administration of justice program, offered by the University of Pittsburgh Graduate School of Public and International Affairs, is an upper-division undergraduate course of interdisciplinary study in the liberal arts and sciences that leads to a Bachelor of Arts degree. The goal of this baccalaureate program is to develop an understanding of the evolution, theory, structure, functioning, and processes of change in the total system of criminal justice in our society.

Administration of justice majors develop competence in one of four specialized areas:

- Adult and juvenile corrections
- Law enforcement practice
- Forensics
- Cybercrime

Students in the Butler area may complete this degree program while staying close to home, through a combination of online courses and evening classes at our additional location on the Butler County Community College campus.

Major Requirements

Students must complete a minimum of 120 credits (approximately 40 courses) for the Bachelor of Arts degree with a major in administration of justice. Of this total, 30 credits (10 courses) make up the major, which is satisfied by taking courses to complete the core requirements, area of concentration, and major electives. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

An outline of the Administration of Justice major requirements follows:

Core Requirements: 12 credits (four courses)

Administration of Justice

- ADMJ 0500 - INTRO TO ADMIN OF JUSTICE
- ADMJ 1400 - INTRODUCTION TO CRIMINAL LAW
- ADMJ 1450 - CRITICAL ISS IN CRIMNL JUSTICE
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section: 7715)

Area of Concentration: 9 credits (three courses)

Choose one of the four areas of specialization. All courses listed under a given area are required.

Adult and Juvenile Corrections

- ADMJ 1220 - DEVIANCE AND THE LAW
- ADMJ 1300 - INTRODUCTION TO CORRECTIONS
- PSY 1205 - ABNORMAL PSYCHOLOGY

Law Enforcement Practice

- ADMJ 1200 - INTRO TO LAW ENFORCEMENT
- ADMJ 1265 - ADVANCED TOPICS IN CRIMINOLOGY
- ADMJ 1410 - INTRO TO CRIMINAL PROCEDURE

Forensics

- ADMJ 1100 - CRIME SCENE INVESTIGATION
- ADMJ 1115 - CRIMINALISTICS
- LEGLST 1230 - PSYCHOLOGY AND LAW

Cybercrime

- ADMJ 1234 - INTRODUCTION TO CYBERCRIME

Choose two of these four concentration courses

- ADMJ 1236 - INTERNATIONAL ORGANIZED CRIME
- ADMJ 1238 - CYBER SECURTY/LAW/MONY LAUNDER
- ADMJ 1246 - FINANCING TERRORISM
- ADMJ 1425 - PRINCIPLES HOMELAND SECURITY

Major Electives: 9 credits (three courses)

- ADMJ 0100 - SOCIETY AND THE LAW
- ADMJ 0600 - INTRODUCTION TO CRIMINOLOGY
- ADMJ 1100 - CRIME SCENE INVESTIGATION
- ADMJ 1115 - CRIMINALISTICS
- ADMJ 1118 - CRIMINALISTICS LAB

- ADMJ 1200 - INTRO TO LAW ENFORCEMENT
- ADMJ 1205 - INTRODUCTION POLICE MANAGEMENT
- ADMJ 1210 - JUVENILE DELINQUENCY
- ADMJ 1220 - DEVIANCE AND THE LAW
- ADMJ 1225 - THE JUVENILE JUSTICE PROCESS
- ADMJ 1230 - WHITE COLLAR CRIME
- ADMJ 1234 - INTRODUCTION TO CYBERCRIME
- ADMJ 1235 - ORGANIZED CRIME
- ADMJ 1236 - INTERNATIONAL ORGANIZED CRIME
- ADMJ 1238 - CYBER SECURTY/LAW/MONY LAUNDER
- ADMJ 1242 - GENDER, RACE, CLASS, AND CRIME
- ADMJ 1245 - TERRORISM
- ADMJ 1246 - FINANCING TERRORISM
- ADMJ 1265 - ADVANCED TOPICS IN CRIMINOLOGY
- ADMJ 1300 - INTRODUCTION TO CORRECTIONS
- ADMJ 1350 - PROBATION AND PAROLE
- ADMJ 1410 - INTRO TO CRIMINAL PROCEDURE (also offered as LEGLST 1141)
- ADMJ 1425 - PRINCIPLES HOMELAND SECURITY (also offered as PUBSRV 1425)
- ADMJ 1901 - INDEPENDENT STUDY
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP

Note:

Other related courses are offered by the disciplines of anthropology, legal studies, political science, psychology, public service, and sociology. Check with a CGS academic advisor for approved courses from these disciplines to satisfy the major's elective requirements.

This major requires that you complete an internship at a facility outside the University, and that facility may require a criminal background check, Act 33/34 clearance, and perhaps drug screening to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Transfer Credit Agreement

A transfer credit agreement has been established between the criminal justice program at Butler County Community College and the administration of justice program at Pitt. The agreement gives a course-by-course outline of the associate's degree program and the equivalent course or requirement fulfilled for CGS. Courses transfer if graded C or better. For a copy of the transfer agreement for a specific community college, contact CGS.

Police Academy Certification

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to ADMJ 0500, ADMJ 1400, ADMJ 1410, and two ADMJ elective courses.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC
- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*
Classics	Linguistics
Communication	Music
English Composition	Philosophy
English Film	Religious studies
English Literature	Russian*
English Writing	Slovak*
French*	Spanish*
German*	Studio Arts
History of Art and Architecture	Theatre Arts
Italian*	

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Legal Studies
Anthropology	Political Science
Economics	Psychology
Gender, Sexuality, and Women's Studies	Religious Studies
History	Sociology
Jewish Studies	Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology	History and philosophy of science
Astronomy	Neuroscience
Biological sciences	Physics
Chemistry	Psychology
Geology and environmental science	

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Dental Hygiene, BS

Opportunities for health care professionals are becoming available as a result of the changes in health care delivery formats. To prepare dental hygiene graduates for employment opportunities created by these changes, the University of Pittsburgh's College of General Studies and the School of Dental Medicine have developed a course of study that leads to a Bachelor of Science in dental hygiene. This degree is intended for those students who have graduated from accredited dental hygiene programs with a certificate or associate's degree. (See School of Dental Medicine listings in this bulletin for information about the Associate of Science in Dental Hygiene program.) The Bachelor of Science degree enhances the already completed professional training and provides important exposure to the liberal arts. The combination of basic sciences, clinical experiences, and liberal arts strengthens the career opportunities for dental hygienists in business, sales, dental hygiene education, and research.

A distinct advantage of the Bachelor of Science degree is that hygienists can practice their profession following receipt of their certificate in dental hygiene and be employed while completing the requirements for the bachelor's degree. Class schedules can be tailored to work schedules. Classes are available in the evening, during the day, on Saturday, and through CGS Online. Attendance can be on a full-time or part-time basis.

Program Requirements

The following program requirements must be met to receive the Bachelor of Science degree:

- Students must earn a minimum of 131 credits to complete the Bachelor of Science degree. Of this 131-credit total, 30 credits must be at the 1000 (junior/senior) level. The courses must be completed within five years of enrolling in the program.
- Students who are transferring from certificate/associate degree hygiene programs to the College of General Studies (CGS) dental hygiene Bachelor of Science degree program complete 39 credits of CGS general education and dental hygiene track course work.
- At least 30 of the 39 credits must be completed at the University of Pittsburgh. Contact CGS Advising for information about credits that transfer from other institutions or if you completed your dental hygiene certificate at Pitt before 1995.

Required Courses (39 credits)

The required courses are listed below. See the complete list of courses that satisfy requirements.

CGS General Education Courses (33 credits)

- English composition or writing-6 credits
    - Choose from ENGCMP (no 0200-level courses), ENGWRT, and ENGLIT/Writing courses.
- Mathematics-3 credits
    - Choose one algebra or computer programming course.
- Humanities-6 credits
    - Choose courses from two of these departments/programs: Africana studies, Chinese, classics, communication, English literature, French, German, history of art and architecture, Italian, Japanese, Korean, linguistics, music, philosophy, religious studies, Russian, Slavic, Slovak, Spanish, studio arts, or theatre arts. One course must be a 1000-level course.
- Social sciences-3 credits
    - Choose a 1000-level course from one of these departments/programs: Africana studies; anthropology; economics; history; Jewish studies; legal studies; political science; psychology; religious studies; urban studies; or gender, sexuality, and women's studies.

- Literature-3 credits
    - Choose one literaruture course.
- History-3 credits
    - Choose one history course.
- International perspective-6 credits
    - Choose two international courses (may include non-Western courses).
- Non-Western-3 credits
    - Choose one non-Western international course.

Dental Hygiene Tracks (6 credits)

Students must choose a concentration in health management, education, or research.

Health Management

- DENHYG 1921 - HEALTH MANAGEMENT SEMINAR
- DENHYG 1922 - HEALTH MANAGEMENT PRACTICUM

Education

- DENHYG 1901 - ALLIED HEALTH EDUCATION
- DENHYG 1902 - ALLD HEALTH EDUCATION PRACTCM

Research

- NUR 0067 - NSG RES: INTRO CRITL APPRL EBP or
- PSY 0035 - RESEARCH METHODS or
- SOC 0230 - SOCIAL RESEARCH METHODS
- Elective

Note:

In this 39-credit program, 21 credits should be completed using 1000-level course work. These 21 credits, when combined with the nine credits for DENHYG 1420, 1422, and 1544 completed in the dental hygiene program, meet the CGS requirement for 30 credits of 1000-level course work. Check with an advisor before registering. Requirements are subject to change.

Health Services, BA

The health services major is an interdisciplinary course of study designed to prepare students to work in health care. The program analyzes the structure of the health care industry; identifies cultural, legal, and environmental factors that impact health; and provides students with communication and management skills.

Students choose one of two fields:

- Managing health services programs and projects gives students key administrative and business skills, with an emphasis on grant and research project management.
- Community health assessment provides skills to assess the physical, social, and environmental factors influencing health behaviors.

Major Requirements

A minimum total of 120 credits is required for the Bachelor of Arts degree with a major in health services. Of this total, the major consists of 3 credits of prerequisite courses and 33 credits of core and specialization courses. The remaining credits for the degree are outlined on the General Education Requirements section on this page.

Prerequisite: Computer Competency

Check with an advisor for information about other options.

- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Health Field Core (15 credits)

- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- HRS 1017 - INTRO TO EPIDEMIOLOGY
- NUR 1829 - CONTEM ISSUES CROS CULTL HLTH
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- SOC 0477 - MEDICAL SOCIOLOGY

Specialization Tracks (18 credits)

Students take a total of two required courses and four elective courses. Check with an academic advisor for course availability and additional elective options.

Track 1: Managing Health Services Programs and Projects

Required, choose two:

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVR or
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS

Electives, choose four:

- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- ANTH 1761 - PATNTS & HEALERS: MEDCL ANTH 1
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- HIM 1455 - QUALITY MANAGEMENT
- HIM 1465 - REIMBURSEMENT SEMINAR
- HIST 1090 - HISTORY MEDICINE & HEALTH CARE
- HIST 1706 - GLOBAL PHARMACEUTICALS
- HPS 0612 - MIND AND MEDICINE
- NROSCI 0081 - DRUGS AND BEHAVIOR
- PUBSRV 1110 - FINANCIAL MGT IN PUBLIC SECTOR
- PUBSRV 1120 - HUMN RESOURCS MGT PUBLC SECTOR
- PHIL 1360 - BIOMEDICAL ETHICS
- SOCWRK 1044 - AGING IN MULTICULTURAL SOCIETY

Track 2: Community Health Assessment

Required, choose two:

- NUR 1765 - RISK FACTORS AND HEALTH
- SOC 1450 - HEALTH AND ILLNESS
- PUBSRV 1310 - DIVERSTY ISSUES PUBLIC SERVICE

Electives, choose four:

- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- ANTH 1794 - GENDER AND HEALTH
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- HIST 1090 - HISTORY MEDICINE & HEALTH CARE
- HIST 1706 - GLOBAL PHARMACEUTICALS
- HPS 0613 - MORALITY AND MEDICINE
- NROSCI 0081 - DRUGS AND BEHAVIOR
- NUR 1634 - HEALTH CARE DELIVERY IN OMAN
- NUTR 1006 - INTRO TO HUMAN NUTRITION
- PSY 1215 - HEALTH PSYCHOLOGY
- PSY 1230 - PSYCHOLOGY OF DEATH AND DYING
- PSY 1235 - ALCOHOL USE AND ABUSE
- PSY 1255 - PRINCIPLES OF BEHAVR MODIFICTN
- PUBHLT 1001 - INTRODUCTION TO GLOBAL HEALTH
- PUBHLT 1002 - SPECIAL TOPICS GLOBAL HEALTH
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINSTRTN
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT
- REHSCI 1018 - SURVY HLTH & REHAB PROFESSIONS
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY
- RELGST 0625 - DEATH, DYING AND IMMORTALITY
- SOCWRK 1044 - AGING IN MULTICULTURAL SOCIETY

Notes

Requirements subject to change. Check with an academic advisor before registering.

An internship is available through the College of General Studies. Please see your advisor for additional information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC
- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*

Classics	Linguistics
Communication	Music
English Composition	Philosophy
English Film	Religious studies
English Literature	Russian*
English Writing	Slovak*
French*	Spanish*
German*	Studio Arts
History of Art and Architecture	Theatre Arts
Italian*	

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Legal Studies
Anthropology	Political Science
Economics	Psychology
Gender, Sexuality, and Women's Studies	Religious Studies
History	Sociology
Jewish Studies	Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology	History and philosophy of science
Astronomy	Neuroscience
Biological sciences	Physics
Chemistry	Psychology
Geology and environmental science	

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Health Services, BS

The Bachelor of Science in Health Services is an interdisciplinary degree completion program designed for allied health professionals who have already received their technical education and licensure in diagnostic medical sonography, radiological technology or respiratory therapy and for community college graduates who have already completed a designated allied health profession associate degree. The core of this flexible program provides students with communication and management skills as well as broadening students' understanding of health-related issues.

Requirements

A minimum total of 120 credits is required for the Bachelor of Science degree with a major in health services. Of this total, the degree consists of 12 credits of required health services courses and up to 24 credits of professional courses, with the remainder consisting of general education courses and electives.

- Licensed diagnostic medical sonographers, radiological technologists, and respiratory therapists will be awarded 24 professional education credits. Credits earned at other colleges or universities will be evaluated for transfer. The maximum number of transferable credits (including 24 professional education credits) to this degree program is typically between 62-66.5 credits.
- Graduates who have earned an associate's degree with an allied health profession major such as anesthesia technician, diagnostic medical sonographer, dietetic technician, health information technology, medical laboratory technician, nuclear medicine technology, occupational therapy assistant, physical therapy assistant, radiation therapy technology, radiologic technologist, respiratory therapy, or surgical technologist will be awarded up to 24 professional education credits. Graduates of designated programs with which the College of General Studies has a transfer credit agreement can, in some cases, transfer more than the 60 credits from a two-year college, speeding up the time to degree completion. Please check with an academic advisor for specifics related to your associate's degree program. The maximum number of transferable credits (including 24 professional education credits) to this degree program is typically between 62-66.5 credits.

Health Service Courses: 12 credits

A minimum of 12 credits, or four courses, are required as follows:

A. Health Field: 6 credits

Students choose two courses from the following list:

- NUR 1765 - RISK FACTORS AND HEALTH
- PHIL 1360 - BIOMEDICAL ETHICS
- PSY 1215 - HEALTH PSYCHOLOGY
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1450 - HEALTH AND ILLNESS

B. Administration/Management Field: 3 Credits

Students choose one course from the following list:

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVR or BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINSTRTN
- PUBSRV 1120 - HUMN RESOURCS MGT PUBLC SECTOR

- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS

C. Related Field: 3 credits

Students choose one additional course from the Health Field or Administration/Management Field lists above or else from the list below:

- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- HRS 1006 - INTRO TO HUMAN NUTRITION
- PSY 1255 - PRINCIPLES OF BEHAVR MODIFICTN
- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
- HIST 1706 - GLOBAL PHARMACEUTICALS

Notes

Requirements are subject to change. Many courses are available in an online format. Check with an academic advisor for course availability and additional elective options before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Humanities, BA

Humanities is a liberal arts major with a focus on courses from three humanities departments. This major can be customized to meet your interests and personal or career goals. You will choose to concentrate in three areas from the list below and have the opportunity to take a variety of courses within those areas of study.

Humanities degree graduates have a variety of skills that make them attractive to prospective employers. Career fields pursued by humanities graduates include the following:

- Acting and drama
- College administration
- Event planning

- Human resources
- Politics
- Teaching
- Publishing
- Journalism
- Marketing and advertising
- Public relations
- Insurance
- Real estate
- Social work
- Occupational therapy
- Travel and tourism

Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in humanities. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications below. The remaining credits required for the degree are outlined in the *General Education Requirements* section on this page.

Standard Option

Choose a minimum of 36 credits (approximately 12 courses) from any three departments/programs below. All courses taken must be humanities related.

- Africana Studies (courses must be humanities related)
- Classics
- Communication
- English Composition (0300 and above)
- Film Studies
- English Literature
- English Writing
- Foreign language departments (literature and culture courses)
- History of Art and Architecture
- Music
- Philosophy
- Religious Studies (courses must be humanities related)
- Studio Arts
- Theatre Arts

Notes

- At least five courses must be taken from one department, and at least three courses must be taken from each of the two other departments.
- At least half of the courses taken for the major must be upper-division (1000-level) courses.
- All courses selected for the humanities major must be approved by an academic advisor.

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see an advisor for additional information.

Pre-Education Options

The College of General Studies and the Pitt School of Education have collaborated on a curriculum within the humanities major that incorporates all of the prerequisite course work needed for admission into the certificate program in comprehensive English education. This option may be used by students interested in the Master of Arts in Teaching (MAT) or Professional Year (PY) programs offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs.

Students pursuing this track take a wide variety of English courses in literature, writing/composition, and literary/film/media theory, in addition to a required foundations course in special education, for a total of 36 credits (approximately 12 courses). At least half of these courses must be at the 1000 level. Students are also encouraged to participate in an internship during their degree program and may fulfill some CGS general education and major requirements by completing a study abroad program. See a CGS advisor for more information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC
- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*
Classics	Linguistics
Communication	Music
English Composition	Philosophy
English Film	Religious studies
English Literature	Russian*
English Writing	Slovak*
French*	Spanish*
German*	Studio Arts
History of Art and Architecture	Theatre Arts
Italian*	

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Legal Studies
Anthropology	Political Science
Economics	Psychology

Gender, Sexuality, and Women's Studies	Religious Studies
History	Sociology
Jewish Studies	Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology	History and philosophy of science
Astronomy	Neuroscience
Biological sciences	Physics
Chemistry	Psychology
Geology and environmental science	

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*

- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Legal Studies, BA

The legal studies major is an interdisciplinary course of study that combines the theories and methods of several social science disciplines and law. While not designed as a prelaw program, the major seeks to develop an understanding of the nature, content, and operation of American law and legal institutions.

Career Opportunities

Courses in legal studies provide a background for graduate work in administration of justice, business, legal studies, and law as well as work in law-related fields like insurance, social security, and social services. The courses also prepare students for careers in the following settings:

- banking
- children's rights
- civil liberties organizations
- collective bargaining/labor relations
- corporate sales divisions
- credit-related agencies
- judicial administration
- legal research
- human resources
- planning commissions

- privacy protection
- public government aid/legislation
- public welfare
- real estate agencies
- tax consultation firms
- workers' compensation bureaus

Major Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in legal studies. Of this total, 30 credits make up the major, which is satisfied by taking courses to complete the core requirements, legal studies electives, and outside electives. Below is an outline of these major course requirements. The remaining credits required for the degree are outlined in the General Education Requirements section on this page. Some legal studies courses fulfill the College of General Studies social sciences curriculum requirements. See the current time schedule of classes for specific information.

Core Requirements: 6 credits (two courses)

- LEGLST 0080 - INTRODUCTION TO LEGAL STUDIES
  Choose one of the following:
- LEGLST 1210 - LAW AND POLITICS or
- PS 1213 - LAW AND POLITICS (Political Science)

Legal Studies Electives: 18 credits (choose six courses)

- LEGLST 0020 - PUBLIC LAW AND MORAL REASONING
- LEGLST 1140 - INTRODUCTION TO CRIMINAL LAW
- LEGLST 1141 - INTRO TO CRIMINAL PROCEDURE
- LEGLST 1150 - LAWYERS AND LEGAL PROFESSION
- LEGLST 1152 - LEGAL ISSUES IN PUBLIC SERVICE
- LEGLST 1155 - LAW AND SOCIAL CHANGE
- LEGLST 1230 - PSYCHOLOGY AND LAW
- LEGLST 1260 - LAW, LITERATURE, AND CINEMA
- LEGLST 1261 - LANGUAGE AND THE LAW
- LEGLST 1315 - SEX, LAW AND MARRIAGE
- LEGLST 1318 - SEPARATION, DIVORCE & CUSTODY
- LEGLST 1320 - LAW AND ENVIRONMENT
- LEGLST 1325 - CONSUMER LAW
- LEGLST 1326 - GLOBALIZATION AND LAW
- LEGLST 1327 - INTERNATIONAL LAW
- LEGLST 1330 - LAW AND BUSINESS CORPORATIONS
- LEGLST 1340 - INTRODUCTION TO CIVIL RIGHTS
- LEGLST 1345 - EMERGING TECOLOGIES & THE LAW
- LEGLST 1355 - EMERGING ISS LEGL & SOCL POLC
- LEGLST 1410 - INTRODUCTION TO LEGAL RESEARCH
- LEGLST 1430 - TRIAL ADVOCACY 1 (honors)
- LEGLST 1435 - TRIAL ADVOCACY 2 (honors)
- LEGLST 1901 - INDEPENDENT STUDY
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section: 7715)

Outside Electives: 6 credits (choose two courses)

The final degree requirement is completion of 6 credits (two courses) from a list of approved electives outside legal studies. The following represents approved elective courses from various disciplines:

Administration of Justice

- ADMJ 0100 - SOCIETY AND THE LAW
- ADMJ 0500 - INTRO TO ADMIN OF JUSTICE
- ADMJ 1220 - DEVIANCE AND THE LAW
- ADMJ 1450 - CRITICAL ISS IN CRIMNL JUSTICE

Communication

- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS

English Composition

- ENGCMP 0410 - WRITING IN THE LEGL PROFESSNS

History

- HIST 1190 - MEDIEVAL GOVERNMENT & SOCIETY
- HIST 1191 - ENGLISH ORIGINS OF AMERCN LAW
- HIST 1690 - AMERICAN LEGAL HISTORY

Philosophy

- PHIL 1390 - PHILOSOPHY OF LAW

Political Science

- PS 1211 - LEGISLATIVE PROCESS
- PS 1614 - THEORIES OF JUSTICE (Honors)

Psychology

- PSY 0182 - LAW AND SOCIAL PSYCHOLOGY

Public Service

- PUBSRV 1305 - HEALTH, LAW AND ETHICS

Sociology

- SOC 0471 - DEVIANCE AND SOCIAL CONTROL

Notes

Students interested in a minor, rather than a major, in legal studies should check with their academic advisor.

Requirements are subject to change. Check with an academic advisor before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC

- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*
Classics	Linguistics
Communication	Music
English Composition	Philosophy
English Film	Religious studies
English Literature	Russian*
English Writing	Slovak*
French*	Spanish*
German*	Studio Arts
History of Art and Architecture	Theatre Arts
Italian*	

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Legal Studies
Anthropology	Political Science
Economics	Psychology
Gender, Sexuality, and Women's Studies	Religious Studies
History	Sociology
Jewish Studies	Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology	History and philosophy of science
Astronomy	Neuroscience
Biological sciences	Physics
Chemistry	Psychology

Geology and environmental science

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Requirements

The College of General Studies and the School of Education have collaborated on the liberal studies curriculum that may be used by students interested in the professional year or the Master of Arts in teaching programs offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to their programs. See an academic advisor for specific requirements. This program is not currently accepting new students. Students who declared the program prior to 2012 and have not completed the program should see an academic advisor for other options, such as the new degree programs offered by the School of Education.

Media and Professional Communications, BA

This major provides students with a rigorous education in the theories of mass media process, history, and ethics as well as the opportunity to specialize in one of three professional practice areas: corporate and community relations, writing for the professions, or digital media.

The three tracks are designed to strengthen both the knowledge base and proficiencies of students pursuing careers in communication fields, such as print, television, radio, film, new media, and corporate and organizational communications. This program also will benefit students pursuing careers in a variety of industries in which communication with internal and external audiences is critical. Learn more about our featured internship opportunity with Pitt Panther TV, and other internship opportunities, today.

The Department of English and Film Studies Program are grateful for the continued support of our sponsoring partners, which provide grants for Pitt undergraduates pursuing media, public relations, and film internships. The funds provide grants for unpaid internships and/or support for living expenses for out-of-town internships. Awards are given on a competitive basis. Also, the University stipulates that students cannot be employed by Pitt while receiving stipends for internships.

Major Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in media and professional communications. Of this total, the major consists of 12 credits of prerequisite courses and 24 credits of specialization courses. The remaining credits for the degree are outlined in the General Education Requirements section on this page. A grade of C or better is required in English composition and writing courses.

Prerequisite Courses (12 credits)

Required for all three tracks.

- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 1121 - HISTORY OF MASS MEDIA
- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION
- PUBSRV 1455 - LAW ETHCS PBLC POLC MASS MEDIA

Specializations (24 credits)

Choose one of the specialization tracks that follow.

TRACK 1: Corporate/Community Relations

Required Courses (9 credits)

- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COM
- BUSERV 1940 - MARKETING FUNDAMENTALS

Electives, choose four (12 credits)

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- COMMRC 1732 - SPECIAL TOPICS IN MASS COM
- ENGCMP 0410 - WRITING IN THE LEGL PROFESSNS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSASV WRIT-ADVRTNG/FUNDRSG
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLC/PROFESSNL WRIT
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRO TO TECHNICAL WRITING
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CREATIVE CORPORATE WRITING
- ENGCMP 1112 - PROF USES OF SOCIAL MEDIA
- ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1403 - TOPC NON-FCTN:ELECTRNC MEDIA
- PSY 0105 - INTRODUCTION TO SOCIAL PSYCH
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT
- PUBSRV 1310 - DIVERSTY ISSUES PUBLIC SERVICE

Internship, choose one (3 credits)

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section 7710)

- THEA 1484 - DIRECTED PROJECT BUSINESS MGT

Track 2: Writing for the Professions

Required Courses (6 credits)

- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS
  and choose one of the following courses:
- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN or
- ENGWRT 1330 - INTERMEDIATE NONFICTION

Electives, choose five (15 credits)

- COMMRC 1732 - SPECIAL TOPICS IN MASS COM
- ENGCMP 0410 - WRITING IN THE LEGL PROFESSNS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLC/PROFESSNL WRIT
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRO TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1112 - PROF USES OF SOCIAL MEDIA
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRT 1391 - WRITING THE REVIEW
- ENGWRT 1393 - SPORTS WRITING
- ENGWRT 1399 - TOPICS NON-FICTION: NEWSPAPER
- ENGWRT 1401 - TOPICS NON-FICTION: MAGAZINE
- ENGWRT 1403 - TOPC NON-FCTN:ELECTRNC MEDIA

Internship, choose one (3 credits)

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section 7710)
- ENGWRT 1370 - JOURNALISM BOOT CAMP:WRITE NOW

Track 3: Digital Media

Completion of two prerequisite courses is necessary before registration for Pittsburgh Filmmakers (PF) courses will be permitted. FILMST 0001 is a prerequisite to all other PF courses. See your advisor to register.

Required Courses (9 credits)

- COMMRC 1112 - THEORIES OF RHETORIC
- ENGFLM 0355 - VISUAL LITERACY
- FILMST 0001 - MOTION PICTURE FUNDAMEMTALS

Electives, choose four (12 credits)

A maximum of two PF courses can be included in the four electives.

- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1112 - PROF USES OF SOCIAL MEDIA
- ENGFLM 0400 - INTRODUCTION TO FILM
- ENGFLM 1390 - CONTEMPORARY FILM
- ENGFLM 1485 - FILM AND POLITICS
- ENGFLM 1683 - DOCUMENTARY FILM
- ENGLIT 0354 - WORDS AND IMAGES
- ENGLIT 0550 - INTRODUCTION TO POPULAR CULTUR
- ENGWRT 0650 - READINGS IN JOURNALISM
- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0070 - EURPN VISL TRADTN RENASNC-PRES
- HAA 1810 - EXPERIMENTAL VIDEO
- PS 1836 - POLITICS THROUGH FILM
- PSY 1050 - TOPICS IN PSYCHOLOGY
- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- SA 1270 - DIGITAL STUDIO: IMAGING
- FILMST 0120 - BASIC DIGITAL PHOTOGRAPHY
- FILMST 0151 - INTRODUCTION TO WEB DESIGN
- FILMST 0245 - PHOTOSHOP FOUNDATIONS
- FILMST 0400 - INTRO TO DIGITAL EDITING
- FILMST 0410 - ADVANCED DIGITAL PHOTOGRAPHY
- FILMST 0420 - ADV DIGITAL EDITING TECHNIQUES
- FILMST 0601 - VIDEO PRODUCTION 1
- FILMST 0610 - DIGITAL EFFECTS & COMPOSITING
- FILMST 1600 - VIDEO PRODUCTION 2

Internship (3 credits)

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section: 7710)

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC
- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*
Classics	Linguistics
Communication	Music

English Composition
English Film
English Literature
English Writing
French*
German*
History of Art and Architecture
Italian*
Philosophy
Religious studies
Russian*
Slovak*
Spanish*
Studio Arts
Theatre Arts

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies
Anthropology
Economics
Gender, Sexuality, and Women's Studies
History
Jewish Studies
Legal Studies
Political Science
Psychology
Religious Studies
Sociology
Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology
Astronomy
Biological sciences
Chemistry
Geology and environmental science
History and philosophy of science
Neuroscience
Physics
Psychology

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Natural Sciences, BS

The natural sciences major is a liberal arts major with a focus on courses from three natural sciences departments. Students customize this major to meet their interests and personal or career goals, choosing from a variety of courses with a concentration in three areas, such as anthropology, biological sciences, chemistry, computer science, geology and planetary science, history and philosophy of science, mathematics, neuroscience, physics, psychology, and statistics.

Also available are a pre-medicine option (for those preparing for medical school or another health professional school); a pre-physician assistant option (for those preparing to apply to Physician Assistant education programs), and two pre-education options (for those preparing for teaching careers).

Natural Sciences Standard Major (36 credits)

Choose a minimum of 36 credits (approximately 12 courses) from any three departments below. All courses taken must be related to natural sciences. At least five courses must be taken from one department, and at least three courses should be taken from each of the two other departments. All courses selected for the natural sciences major must be approved by an academic advisor.

- Anthropology (natural sciences-related course)
- Astronomy
- Biological Sciences
- Chemistry
- Computer science (only courses numbered 0401 and above)
- Geology and planetary science
- History and philosophy of science (natural sciences-related course)
- Mathematics (only courses numbered 0220 and above)
- Neuroscience
- Physics
- Psychology (natural sciences-related course)
- Statistics (0200 or 1000, and courses numbered above 1000)

Pre-Medicine Option (39 credits)

This natural sciences concentration incorporates the course work needed for admission to most medical and dental programs. Completion of this concentration does not guarantee acceptance into graduate study. Students pursuing this option can take advantage of the resources of the University of Pittsburgh's health professions advising team, based in the University Honors College. Night sections of biology, chemistry, and physics courses are available, with seats reserved specifically for CGS students.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- BIOSC 1000 - BIOCHEMISTRY
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS
- PHYS 0110 - INTRODUCTION TO PHYSICS 1

- PHYS 0111 - INTRODUCTION TO PHYSICS 2
- PHYS 0212 - INTRO TO LABORATORY PHYSICS
  Additional recommended courses for premedicine option:
  BIOSC 1850 - MICROBIOLOGY
  MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
  NROSCI 1000 - INTRO TO NEUROSCIENCE
  NROSCI 1250 - HUMAN PHYSIOLOGY

Pre-Physician Assistant Option (40 credits)

The pre-PA curriculum is designed for students interested in the Physician Assistant Studies Program at the University of Pittsburgh School of Health & Rehabilitation Sciences (SHRS). The pre-PA option incorporates the prerequisite course work necessary for application to the PA program. Please note that completion of the pre-PA plan of studies does not guarantee direct admission into graduate study. For a full list of admission requirements, visit the School of Health and Rehabilitation Sciences PA program web site. Note: Requirements for other PA programs from other schools than the University of Pittsburgh may differ.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- BIOSC 1850 - MICROBIOLOGY
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- NUR 0012 - HUMAN ANATOMY AND PHYSIOLOGY 1
- NUR 0002 - NSG ANATOMY & PHYSIOLOGY LAB 1
- NUR 0013 - HUMAN ANATOMY AND PHYSIOLOGY 2
- NUR 0003 - NSG ANATOMY & PHYSIOLOGY LAB 2
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
- PSY 1000-level Elective Course
  Outside Major: Other Requirements
  HRS 1006 - INTRO TO HUMAN NUTRITION
  REHSCI 1235 - MEDICAL TERMINOLOGY

Pre-Education Options

The College of General Studies and the Pitt School of Education have collaborated on two concentrations in the natural sciences major that incorporate the prerequisite science course work needed for admission into the certificate programs in earth and space science and general science. These options may be used by students interested in the Master of Arts in Teaching program offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs. Students must complete a minimum of 120 credits (approximately 40 courses) for a Bachelor of Science degree with a major in natural sciences. Of this total, students must take a minimum of 38 credits (approximately 12 courses) according to the specifications. The remaining credits required for the degree are outlined on the Requirements for the Bachelor's Degree information sheet.

Earth and Space Science Concentration (45 credits)

- ASTRON 0089 - STARS, GALAXIES AND THE COSMOS
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- GEOL 1030 - THE ATMOSPHERE, OCEANS & CLMTE or GEOL 0890 - OCEANOGRAPHY
- GEOL 0055 - GEOLOGY LABORATORY

- GEOL 0060 - HISTORY OF THE EARTH or GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 0800 - GEOLOGY
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 0860 - ENVIRONMENTAL GEOLOGY
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- IL 1580 - FOUNDATIONS OF SPECIAL EDUC
- Science Electives

General Science Concentration (46 credits)

- ASTRON 0089 - STARS, GALAXIES AND THE COSMOS
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY or BIOSC 1850 - MICROBIOLOGY
  Note that CHEM 0320 is a prerequisite course for BIOSC 1000.
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- GEOL 0800 - GEOLOGY or GEOL 0860 - ENVIRONMENTAL GEOLOGY
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
- PHYS 0212 - INTRO TO LABORATORY PHYSICS
- IL 1580 - FOUNDATIONS OF SPECIAL EDUC

Public Service, BA

The undergraduate major in public service is offered by the Pitt Graduate School of Public and International Affairs. It is designed to prepare students for a broad range of careers that are focused on the resolution of public problems or the delivery of public services. These careers range from those in the local government and community arena to the metropolitan region and state arena to national and international settings. Potential employers include local, state, and federal governments; nonprofit and nongovernmental organizations at the local, regional, national, and international level; private firms engaged in working with governments; and private corporations with an active public service culture.

The major serves students who are interested in public issues as concerned and interested citizens and prepares them for a wide range of graduate programs related to public policy and management.

Major Requirements

Students must complete a minimum of 120 credits for the Bachelor of Arts degree with a major in public service. Of this total, students must take 33 credits (11 courses) in public service; one course in statistics(STAT 0200 - BASIC APPLIED STATISTICS or an equivalent course); and six credits (two courses) in a related field such as political science, economics, psychology, sociology, or another field approved by an academic advisor. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Core Courses (15 credits)

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 0030 - PUBLIC POLICY PROCESS
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section: 7715)

Concentration Areas (18 credits)

Choose one of the three concentration areas below:

Public Administration Concentration

- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINSTRTN
- PUBSRV 1110 - FINANCIAL MGT IN PUBLIC SECTOR
- PUBSRV 1120 - HUMN RESOURCS MGT PUBLC SECTOR
- PUBSRV 1130 - PLANNING IN THE PUBLIC SECTOR
- PUBSRV - Electives (choose two additional public service courses)

Nonprofit Management Concentration

- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT
- PUBSRV 1210 - FINANCIAL MGT NON-PROFIT ORGNS
- PUBSRV 1220 - HUMN RESORC MGT NPRF ORGNS
- PUBSRV 1230 - FUNDRAISNG FOR NON-PROFT ORGNS
- PUBSRV - Electives (choose two additional public service courses)

Self-Designed Concentration

Courses that meet the special program needs of the student may be selected from any course offered in public service or in another area or department. The self-designed concentration must be approved by a College of General Studies academic advisor.

Public Service Electives

Public administration concentration students may use the 1200-numbered courses as electives; nonprofit management concentration students may use 1100-numbered courses. Courses designated (UHC) are offered in conjunction with the University Honors College.

- PUBSRV 0150 - INTRODUCTION TO GLOBAL STUDIES
- PUBSRV 1300 - LEGAL ISSUES IN PUBLIC SERVICE
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1310 - DIVERSTY ISSUES PUBLIC SERVICE
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS
- PUBSRV 1320 - GIS IN THE PUBLIC SERVICE
- PUBSRV 1340 - STRATEGIC PLNNG PUBLIC SECTOR
- PUBSRV 1390 - THEORIES OF LEADERSHIP
- PUBSRV 1425 - PRINCIPLES HOMELAND SECURITY
- PUBSRV 1430 - TRIAL ADVOCACY 1 (honors)
- PUBSRV 1435 - TRIAL ADVOCACY 2 (honors)
- PUBSRV 1455 - LAW ETHCS PBLC POLC MASS MEDIA
- PUBSRV 1901 - INDEPENDENT STUDY
- PUBSRV 1910 - INSTIT OF POLITICS INTSHP/SEM

Notes

Five-year accelerated program for Pitt undergraduates

High-achieving University of Pittsburgh juniors (and in some cases, first-term seniors) in the College of General Studies may apply early to the Graduate School of Public and International Affairs (GSPIA). If admitted, they may enroll at GSPIA in what normally would have been their senior year, allowing them to complete both a bachelor's and a master's degree in a total of five years. Special eligibility requirements apply. Pitt undergraduates interested in this program should contact GSPIA at 412-648-7640.

Please note:

This major requires that you complete an internship at a facility external to the University, and this facility may or will require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Students interested in a minor, rather than a major, in public service should check with their academic advisor.

Requirements subject to change. Check with an academic advisor before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC
- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*
Classics	Linguistics
Communication	Music
English Composition	Philosophy
English Film	Religious studies
English Literature	Russian*
English Writing	Slovak*
French*	Spanish*
German*	Studio Arts
History of Art and Architecture	Theatre Arts
Italian*	

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Legal Studies
Anthropology	Political Science
Economics	Psychology
Gender, Sexuality, and Women's Studies	Religious Studies
History	Sociology
Jewish Studies	Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology	History and philosophy of science
Astronomy	Neuroscience
Biological sciences	Physics
Chemistry	Psychology
Geology and environmental science	

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Social Sciences, BA

Social sciences is a liberal arts major with a focus on courses from three social sciences departments. This major can be customized to meet your interests and personal or career goals. You will choose to concentrate in three areas from the list below and have the opportunity to take a variety of courses within those areas of study.

Also available is a pre-education option for those preparing for a teaching career.

Social Sciences Standard Major (36 credits)

Of the minimum total of 120 credits required for the Bachelor of Arts degree with a major in social sciences area, 36 credits (approximately 12 courses) must come in courses that satisfy the major requirements. To satisfy those requirements, students choose social sciences related courses from three of the following departments and programs.

- Africana studies (social sciences-related courses)
- Anthropology (social sciences-related courses)
- Economics
- Gender, Sexuality, and Women's Studies
- History
- Jewish studies
- Legal studies
- Political science
- Psychology (social sciences-related courses)
- Religious studies (social sciences-related courses)
- Sociology

Notes

Students must adhere to the following requirements as they take courses for the social sciences standard major:

- At least five courses must be taken from one department/program listed above and at least three courses from the other two departments/programs.
- At least one half of the major courses must be at the 1000-level.
- All courses selected for the social sciences area major must be approved by an academic advisor.

Pre-Education Option (36 credits)

The College of General Studies and the Pitt School of Education have collaborated on a concentration in the social sciences major that incorporates the prerequisite science course work needed for admission into the certificate program in Social Studies Education. This option may be used by students interested in the Master of Arts in Teaching (MAT) program and Professional Year (PY) Program offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs. Students must complete a minimum of

120 credits (approximately 40 courses) for a Bachelor of Science degree with a major in social sciences. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications. At least 18-credit hours must be at the 1000-level. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Area 1: History, Geography, Culture (15-18 credits)

Recommended courses: choose one per category.

U.S. History

- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0670 - AFRO-AMERICAN HISTORY 1
- HIST 0671 - AFRO-AMERICAN HISTORY 2
- HIST 1610 - UNITED STATES COLONIAL
- HIST 1611 - AMERICAN REVOLUTION 1763-1791
- HIST 1619 - UNITED STATES SINCE 1945

Western European History

- HIST 0100 - WESTERN CIVILIZATION 1
- HIST 0101 - WESTERN CIVILIZATION 2

World History (Non-Western)

- HIST 0700 - WORLD HISTORY

Ancient History

- CLASS 0020 - ROMAN CIVILIZATION
- HIST 0400 - EAST ASIAN CIVLIZATION TO 1800
- HIST 1775 - ORIGINS OF CHRISTIANITY
- HIST 1781 - ROMAN HISTORY
- HIST 1783 - GREEK HISTORY

Geography

- AFRCNA 0385 - CARIBBEAN HISTORY
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0501 - MODERN LATIN AMERICA
- HIST 1164 - SMALL COUNTRIES & THE EU

World Cultures

- ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY
- HIST 1423 - MODERN CHINA
- HIST 1433 - MODERN JAPAN
- HIST 1796 - HISTORY OF AFRICA SINCE 1800

Area 2: Civics (3 credits)

Recommended courses.

- HIST 1641 - MODERN AMERICAN POLITICS
- PS 0200 - AMERICAN POLITICS
- PS 1231 - POLITICAL PARTIES & ELECTIONS
- PS 1234 - ELECTRL BEHAVR & DEMOCRTC PROC
- PS 1252 - STATE GOVERNMENT
- PS 1378 - BLDG DEMOCRACY AROUND THE WRLD

Area 3: Economics (3 credits)

Recommended courses.

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON 0800 - INTRODUCTION TO ECONOMICS

Area 4: Sociology and Social Foundations (3 credits)

Recommended courses.

- ADMPS 1001 - SOCIAL FOUNDATIONS OF EDUCATN
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY
- SOC 1107 - CULTURAL SOCIOLOGY

Area 5: Foundations of Special Education (3 credits)

Required course.

- IL 1580 - FOUNDATIONS OF SPECIAL EDUC

Upper Level Electives (6 credits)

Recommended courses.

- GSWS 1180 - POLITICS OF GENDER AND FOOD
- LEGLST 1152 - LEGAL ISSUES IN PUBLIC SERVICE
- LEGLST 1210 - LAW AND POLITICS
- LEGLST 1320 - LAW AND ENVIRONMENT
- PS 1536 - HUMAN SECURITY
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- SOC 1119 - GLOBAL PERSPS POPULAR CULTURE
- SOC 1445 - SOCIETY AND ENVIRONMENT
- SOC 1448 - WORKING WOMEN

Notes

- All courses selected for the social studies pre-education track must be approved by an academic advisor.
- At least half of these courses must be upper-division (1000-level) courses.
- Students are also encouraged to participate in an internship during their degree program and may fulfill some CGS general education and major requirements by completing a study abroad program.

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses. These 1000-level courses may come from any of the requirements for the degree listed below. Requirements are subject to change; students should check with an academic advisor before registering. Approved courses are listed each term at www.cgs.pitt.edu

Skills (15 credits minimum)

Certain tools of knowledge are required of all students in the baccalaureate degree program: ability to use the English language orally and in writing and ability to understand and use basic mathematical symbols. The courses required to satisfy each of the skills requirements are listed below:

Oral Communication-3 credits

- COMMRC 0520 - PUBLIC SPEAKING or
- COMMRC 0500 - ARGUMENT

Writing-9 credits minimum

ENGCMP 0200 - 0208 and two other courses from English composition (ENGCMP) or English writing (ENGWRT), or those designated W (writing).

Note: At least 3 credits of composition/writing must be from the University of Pittsburgh.

Mathematics-3 credits minimum

- MATH 0010 - COLLEGE ALGEBRA PART 1 and
- MATH 0020 - COLLEGE ALGEBRA PART 2
  or
- MATH 0025 - APPLIED COLLEGE ALGEBRA or
- MATH 0031 - ALGEBRA or
- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC or
- CS 0007 - INTRO TO COMPUTER PROGRAMMING

Note:

Students admitted to CGS for the fall term 2008 (2091) and thereafter are required to complete the public speaking, math, and first University writing course (ENGCMP 0200 or above) with a C- or better grade.

Quantitative and Formal Reasoning (3 credits minimum)

In addition to the acquisition of certain tools of knowledge through the skills requirements, students also need to acquire the ability to apply logic and formal reasoning to reading, writing, and thinking. Choose one course from the following list:

- Computer science (an approved course, 3 credits)
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY

- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 0621 - PROB SOLVING: HOW SCI WORKS
- PHIL 0500 - INTRODUCTION TO LOGIC
- MATH 0120 - BUSINESS CALCULUS or a more advanced course
- Statistics (any course, 3-4 credits)

Understandings (27 credits)

A liberal education provides broad exposure to the three major bodies of knowledge-humanities, social sciences, and natural sciences. Students are exposed to social, scientific, aesthetic, moral, and religious information, the purpose of which is to furnish insight into how the concerns of people are interrelated, how knowledge has been accumulated, and how unsolved problems still challenge humanity. The courses needed to fulfill the understandings requirements are listed below.

Humanities (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Japanese*
Classics	Linguistics
Communication	Music
English Composition	Philosophy
English Film	Religious studies
English Literature	Russian*
English Writing	Slovak*
French*	Spanish*
German*	Studio Arts
History of Art and Architecture	Theatre Arts
Italian*	

*literature and culture courses

Social Sciences (9 credits)

Three courses (one at the 1000 level) distributed over three of the disciplines listed below:

Africana Studies	Legal Studies
Anthropology	Political Science
Economics	Psychology
Gender, Sexuality, and Women's Studies	Religious Studies
History	Sociology

Jewish Studies	Urban Studies

Natural Sciences (9 credits)

Three courses distributed over two or three of the disciplines listed below:

Anthropology	History and philosophy of science
Astronomy	Neuroscience
Biological sciences	Physics
Chemistry	Psychology
Geology and environmental science	

As these tables show, some departments have courses used in different categories. For the list of approved courses, view Academics at www.cgs.pitt.edu.

Literature (3 credits)

This requirement introduces students to works of literature that have abiding value and, in the process, to the techniques of literary interpretation. This one-course requirement may also be fulfilled from disciplines other than English.

History (3 credits)

The study of history provides an understanding of contemporary society from the viewpoint of long-term change. This one-course requirement may also be fulfilled with courses other than those offered by the Department of History.

Note

A course can be used to fulfill only one requirement in the categories of understandings, literature, and history.

International Perspective (9 credits minimum)

The world of today is economically, politically, and culturally interdependent. In the 21st century, knowledge of countries has become essential. This three-course requirement may be fulfilled by taking internationally focused courses offered by a variety of departments. At least one of the courses must be a non-Western course. All international courses may overlap with another requirement.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major may be obtained at the CGS information display in 1400 Wesley W. Posvar Hall or on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. The majors indicated by asterisks are also available by combining Saturday and CGS Online courses.

- Administration of justice*
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities*
- Legal studies

- Media and professional communications
- Natural sciences
- Public service
- Social sciences*

Students who want a major in an arts and sciences field can begin in CGS and transfer to Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by Arts and Sciences.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of aminor or certificate program. Students may have no more than 18 credits in professional courses, such as administration of justice, business, education, engineering, information science, public service, and social work, as electives.

Preparation for Professional Programs

Prerequisite courses for the following programs may be taken through CGS prior to applying to another Pitt school.

• Business • Education • Engineering • Health and Rehabilitation Sciences • Information Science • Nursing • Pharmacy • Social Work

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

For more information, contact the University of Pittsburgh College of General Studies.

Minor

Administration of Justice Minor

Students interested in a minor, rather than a major, in administration of justice should check with their academic advisor. For CGS students, the minor consists of professional elective course work. For Dietrich School of Arts and Sciences (A&S) students, the minor consists of non-A&S elective course work.

Minor Requirements (15 credits)

Students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor.

Required Courses

- ADMJ 0500 - INTRO TO ADMIN OF JUSTICE
- ADMJ 1400 - INTRODUCTION TO CRIMINAL LAW
- ADMJ Electives
  See Administration of Justice Major for current list of electives.

Legal Studies Minor

Students interested in a minor, rather than a major, in legal studies should check with their academic advisor.

Minor requirements:

For the minor, students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor.

Required Courses

- LEGLST 0080 - INTRODUCTION TO LEGAL STUDIES
  LEGLST Elective Courses

  See LEGLST major for a list of electives.

Public Service Minor

Students interested in a minor, rather than a major, in public service should check with their academic advisor. For CGS students, the minor would be professional elective course work. For Dietrich School of Arts and Sciences students, the minor would be non-A&S elective course work.

Minor Requirements

For the minor, students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor.

Required courses:

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 0030 - PUBLIC POLICY PROCESS
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV - Electives
  See Public Service major for a list of electives.

Note:

Requirements are subject to change. Check with an academic advisor before registering.

Certificate

Accounting Certificate

Develop a practical and theoretical foundation in accounting while earning a certificate. Offered by the College of General Studies and the College of Business Administration, the 24-credit part-time evening program enables students to take the same subjects required for accounting majors in the Bachelor of Science in Business Administration program offered by the College of Business Administration.

Participants benefit from the academic instruction of the College of Business Administration and the nontraditional student services available through the College of General Studies. Credits earned may be counted toward certain state licensure requirements.

Who should participate:

Professionals who already have earned a bachelor's degree in any field and wish to develop careers in accounting or another business field in which substantial knowledge of accounting is an asset.

Upon completion of this certificate, participants will be able to:

- Share substantial knowledge of accounting
- Enhance their careers in the business field
- Meet many of the requirements to sit for the certified public accountant (CPA) examination in Pennsylvania.

This certificate is applicable to fields such as public accounting, auditing, taxation, corporate accounting, governmental accounting, and other careers in business that require a substantial knowledge of financial and/or managerial accounting.

Admission requirements

A bachelor's degree and a 2.75 or higher cumulative grade point average are required for admission to the program. A certificate application must be completed online. For an application and additional information on admissions guidelines, see admissions Web page. Credits earned at other accredited educational institutions will be evaluated for transfer. However, a minimum of 15 credits must be earned at the University of Pittsburgh. Students must earn a grade of C or better in all University accounting courses.

CPA preparation

Becoming a CPA in the state of Pennsylvania will require 150 credit hours of coursework, 36 credits of which must be in accounting, auditing, finance, tax, and business law. At that time, completing the certificate program will no longer be sufficient preparation to sit for the CPA exam. Please contact Melvin Watkins, CGS Academic Advisor, at mwatkins@pitt.edu to discuss options for meeting these requirements while enrolled in the College of General Studies.

To learn about becoming a CPA in Pennsylvania, visit the Pennsylvania Institute of Certified Public Accountants Web site at www.picpa.org. You can also contact the Pennsylvania State Board of Accountancy for more information at 717-783-1404 or by E-mail at st-accountancy@pa.gov.

Obtaining the certificate

To receive the certificate, you must fill out an application with your academic advisor prior to completing your last term in the program. Check with your academic advisor for the application filing form and deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (24 credits)

Students must complete their required courses and a minimum of one elective course for a total of 24 credits. A grade of C or better is required for all courses in the program. Students must follow the approved prerequisites for each course. All courses are three credits, and all courses are offered in the evenings.

Required Courses

- CDACCT 6030 - FINANCIAL ACCOUNTING
- CDACCT 6040 - MANAGERIAL ACCOUNTING
- CDACCT 6204 - INTERMEDT FINANCL REPORTING 1
- CDACCT 6205 - INTERMEDT FINANCL REPORTING 2
- CDACCT 6236 - ACCOUNTING INFORMATION SYSTEMS
- CDACCT 6238 - AUDITING
- CDACCT 6242 - INDIVIDUAL TAX ACCT & PLNNG

Electives

Take a minimum of one course.

- CDACCT 6210 - FINANCIAL STATEMENT ANALYSIS
- CDACCT 6221 - STRATEGIC COST MANAGEMENT
- CDACCT 6216 - ADVANCED FINANCIAL ACCOUNTING
- BUSENV 1760 - BUSINESS LAW

Additional Information

Requirements subject to change. Check with an academic advisor before registering.

Gainful Employment Information

Communications Certificate

The Certificate in Communication is a 24-credit program designed to train students to be more effective communicators. Courses, taught by faculty of the Department of Communication, include a range of specialized communication topics. Participants may elect to concentrate their studies in such areas as nonverbal, small group, interpersonal, organizational, or mass communication; persuasion in political settings; or the construction, analysis, and delivery of public speech.

Admission requirements:

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and returned to the College of General Studies.

Who should participate:

- Business and professional people whose success may be enhanced by improved communication skills and further understanding of the communication process
- Those who wish to increase their personal knowledge of communication for use in their careers
- Citizens involved in community and public positions in which persuasive delivery and analysis are vital
- Persons seeking a better understanding of the impact of interpersonal, organizational, public, and mass communication in the contemporary world
- Students already enrolled in the College of General Studies or other University programs who want to concentrate on communications skills

Upon completion of this certificate, participants will be able to:

- Understand what makes one presentation more persuasive than another
- Polish and refine their communication skills
- Apply concentrated knowledge of a specialized communication topic

This certificate is applicable to fields such as education, writing, broadcasting, public relations, sales, communication training, personnel, promotions, advertising, market research, lobbying, politics, communications, and related fields.

Curriculum (24 credits)

The certificate is composed of three basic communication courses (9 credits) and five communication elective courses (15 credits).

- A minimum of five of the required eight courses must be completed at the University of Pittsburgh
- No course with a grade below C will be accepted for certificate credit

Required Courses (9 credits)

Choose three of the following courses. All courses are 3 credits, unless otherwise noted.

- COMMRC 0500 - ARGUMENT
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 0540 - DISCUSSION

- COMMRC 0550 - SPEECH COMPOSITION

Electives (15 credits)

Choose five of the following courses. All courses are 3 credits, unless otherwise noted. Prerequisite courses are in parentheses; English Composition 0200 is required for all 1000-level courses.

- COMMRC 0300 - COMMUNICATION PROCESS
- COMMRC 0310 - RHETORICAL PROCESS
- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 1101 - EVIDENCE
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION (0300)
- COMMRC 1103 - RHETORIC AND CULTURE (0310 or 0320)
- COMMRC 1104 - POLITICAL COMMUNICATION (0310 or 0320)
- COMMRC 1105 - TELEVISION AND SOCIETY (0320)
- COMMRC 1106 - SMALL GROUP COMMUNICATION (0300)
- COMMRC 1109 - NONVERBAL COMMUNICATION (0300)
- COMMRC 1110 - THEORIES OF INTERPERSONAL COM (0300)
- COMMRC 1111 - THEORIES OF PERSUASION (0520 and 0310 or 0320)
- COMMRC 1112 - THEORIES OF RHETORIC (0310 or 0520)
- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS (0310 or 0320)
- COMMRC 1117 - 21ST CENTURY PUBLIC ARGUMENT (0310 or 0320)
- COMMRC 1118 - PRESIDENTIAL RHETORIC 1 (0310 or 0320)
- COMMRC 1119 - PRESIDENTIAL RHETORIC 2 (0310 or 0320)
- COMMRC 1121 - HISTORY OF MASS MEDIA (0320)
- COMMRC 1122 - MEDIA CRITICISM (0320)
- COMMRC 1142 - THEORIES OF MODERN RHETORIC (0310)
- COMMRC 1900 - COMMUNICATION INTERNSHIP

Notes

Requirements subject to change. Check with an academic advisor before registering.

Community Health Assessment Certificate

This interdisciplinary 18-credit program teaches students to:

- apply current theories and research related to how social, economic, cultural, legal, and/or environmental factors are associated with specific health care needs and outcomes;
- communicate knowledgeably and professionally in writing and/or verbally on topics related to health care; and
- use analytical skills to assess the physical, social, cultural, legal, and environmental factors influencing health behaviors.

Students who successfully complete this certificate may apply the credits to an undergraduate degree in the University of Pittsburgh College of General Studies (CGS).

Who should enroll:

- Health care workers seeking to more effectively communicate with and serve diverse populations of people or looking to take on leadership roles in the workplace
- Social work and social services employees interested in learning how health-related factors impact their clients and how social and cultural factors may impact their clients' health behaviors

- Public and community health workers who seek an understanding of the physical, social, and cultural factors influencing health behaviors and outcomes
- Professionals seeking to influence public policy regarding how healthcare services are delivered to diverse populations
- Individuals working for health care- or health services-focused nonprofits

This certificate is applicable to job titles such as health support coordinator, health outreach representative, health services administrator, and more. See an academic consultant for more details.

Upon completion of this certificate, participants will be able to:

- communicate and interact effectively and professionally with people from diverse backgrounds;
- understand how social, cultural, legal, and environmental factors may impact the behaviors of both patients and health care workers and apply this knowledge to their careers;
- identify behaviors that tend to promote or compromise health;
- apply administrative and managerial skills to nonprofits and community health organizations; and
- identify, recognize, gather, and analyze data that are pertinent to the health services field.

Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and returned to the CGS.

Obtaining the certificate

To receive the certificate, you must fill out an application with your academic advisor prior to completing your last term in the program. Check with an academic advisor for the application form and filing deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Additional programs offered in this field include:

- Certificate in Managing Health Services Programs and Projects
- Bachelor of Arts in Health Services

Curriculum (18 credits)

Required courses

- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- HRS 1017 - INTRO TO EPIDEMIOLOGY
- NUR 1765 - RISK FACTORS AND HEALTH
- NUR 1829 - CONTEM ISSUES CROS CULTL HLTH
- PUBSRV 1305 - HEALTH, LAW AND ETHICS

  Choose one of the following:
- SOC 0477 - MEDICAL SOCIOLOGY
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT

Notes

Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh. Students must maintain at least a 2.0 grade point average in all University certificate courses.

Requirements subject to change. Check with an academic advisor before registering.

Corporate/Community Relations Certificate

The Certificate in Corporate and Community Relations helps students to develop the skills they need to effectively communicate a business or organization's mission and achievements to the outside community. It also teaches them how to effectively communicate organizational news and policies internally to fellow employees. Students learn to develop messages and communications strategies that engage the community and promote an organization's image in a positive way.

In this 18-credit program, each student may customize the curriculum by choosing elective courses to meet his or her own personal professional goals and will acquire a foundation in mass media theory through core classes.

Who should enroll:

- Individuals charged with communicating company and organizational news, policies, benefits, and messages to fellow employees
- Individuals charged with communicating and disseminating company and organizational news to an external audience, thereby improving public perception of the organization
- Individuals interested in advancing the causes of community, civic, or volunteer organizations
- Recent graduates or current students who wish to pursue a career incorporate or community communications

Upon completion of this program, students will be able to:

- apply a theoretical understanding of mass media process, history, and ethics to communications-related careers in broadcasting, journalism, legal professions, government, nonprofits, and other fields;
- identify and analyze audience traits, perspectives, and motivators and develop messages appropriate to each audience;
- manage and navigate professional relationships with a wide rangeof constituents;
- develop and write clear messages that support specific organizational goals and enhance the image of a professional organization in the public's mind; and
- create professional and effective communication strategies as well as persuasive written materials, customized to the needs of a specific profession, such as business proposals, speeches, marketing plans, and news stories.

This certificate is applicable to such fields as corporate communications, nonprofit management, advocacy, public relations, broadcasting, sales, communication training, promotions, advertising, lobbying and politics, human resources and relations, and training and development.

Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application must be completed and returned to the College of General Studies. To avoid a late fee, you should complete this process when registering for courses.

Obtaining the certificate

To receive the certificate, you must fill out an application with your academic advisor prior to completing your last term in the program. Check with your academic advisor for the application filing form and deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

Many courses are offered in the evenings. Not all courses are offered every term. All courses are three credits unless otherwise noted. Please check course descriptions for prerequisites. Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh. Students must maintain at least a 2.0 grade point average in all University certificate courses. For the course schedule and descriptions of most undergraduate classes offered by the College of General Studies, Kenneth P. Dietrich School of Arts and Sciences, and College of Business Administration, visit www.courses.as.pitt.edu.

Required Courses (6 credits)

- COMMRC 0320 - MASS COMMUNICATION PROCESS
- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION

Electives (6 credits)

Choose two courses from the following:

- BUSERV 1940 - MARKETING FUNDAMENTALS
- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COM
- PUBSRV 1455 - LAW ETHCS PBLC POLC MASS MEDIA

Specializations (6 credits)

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- ENGCMP 0410 - WRITING IN THE LEGL PROFESSNS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSASV WRIT-ADVRTNG/FUNDRSG
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLC/PROFESSNL WRIT
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRO TO TECHNICAL WRITING
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CREATIVE CORPORATE WRITING
- ENGCMP 1112 - PROF USES OF SOCIAL MEDIA
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1403 - TOPC NON-FCTN:ELECTRNC MEDIA
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT
- PUBSRV 1310 - DIVERSTY ISSUES PUBLIC SERVICE

Additional Information

Additional information on certificate programs is available in 1400 Wesley W. Posvar Hall or at the CGS website: www.cgs.pitt.edu

Digital Media Certificate

Visual literacy is becoming increasingly essential in this digital era. The 18-credit Certificate in Digital Media will help you understand the power of visual images to communicate with audiences. In addition, it will provide inspiration to conceive of these images and how to manipulate technology to bring these images to life, all within the context of traditional and emerging media careers. Students have the opportunity to take courses at Pittsburgh Filmmakers and participate in a unique internship with Pitt Panther TV.

Admission and Application Requirements

Students must meet College of General Studies certificate application requirements and complete an application form online. To avoid a late fee, you should complete the application process when registering for courses and prior to completing your last term in the program. For more information, visit http://www.cgs.pitt.edu/admissions or see a CGS advisor.

Who should participate:

- Professionals operating in multimedia environments
- Individuals responsible for e-commerce efforts
- People interested in producing content for online publications and sites, films, documentaries, etc.
- Entrepreneurs
- Educators

Upon completion of this certificate, participants will be able to:

- Understand how concepts, design, and technology work together to communicate with mass audiences
- Design, create, and manipulate digital communication vehicles
- Understand the importance of visual and textual communication in maintaining organizational success
- Produce engaging interactive programs, such as for training or sales purposes

This certificate is applicable to such fields as interactive online training; 3-D animation; electronic catalogs; DVDs for sales, marketing, or training purposes; multimedia businesses; and general e-commerce.

Curriculum (18 credits)

Many courses are offered in the evenings and at off-campus locations. Not all courses are offered every term. All courses are 3 credits unless otherwise noted. Please check course descriptions for prerequisites.

For the course schedule and descriptions of most undergraduate classes offered by the College of General Studies, the Kenneth P. Dietrich School of Arts and Sciences, and the College of Business Administration, visit www.as.pitt.edu/undergraduate. For Pittsburgh Filmmakers courses, visit http://pfm.pittsburgharts.org/course-listing.

Required Courses (9 credits)

- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 1122 - MEDIA CRITICISM
- ENGFLM 0355 - VISUAL LITERACY

Electives (9 credits)

Choose three of the courses listed below. A maximum of six credits may be taken from Pittsburgh Filmmakers.

- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 1112 - PROF USES OF SOCIAL MEDIA
- ENGFLM 0400 - INTRODUCTION TO FILM
- ENGFLM 1390 - CONTEMPORARY FILM
- ENGFLM 1485 - FILM AND POLITICS
- ENGFLM 1683 - DOCUMENTARY FILM
- ENGLIT 0354 - WORDS AND IMAGES
- ENGLIT 0550 - INTRODUCTION TO POPULAR CULTUR
- ENGWRT 0650 - READINGS IN JOURNALISM
- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0470 - PHOTOGRAPHY AND ART
- HAA 1810 - EXPERIMENTAL VIDEO
- PSY 1050 - TOPICS IN PSYCHOLOGY
- PS 1836 - POLITICS THROUGH FILM
- SA 0110 - VISUAL THINKING

- SA 0130 - DRAWING STUDIO 1
- SA 1270 - DIGITAL STUDIO: IMAGING

  Pittsburgh Filmmakers

  Completion of two of the three required courses is necessary before registration for Pittsburgh Filmmakers courses will be permitted. Pittsburgh Filmmakers courses are designated by a (PF) below. A maximum of two courses may be taken from Pittsburgh Filmmakers. FILMST 0001 Motion Picture Fundamentals is a prerequisite to all other Pittsburgh Filmmakers courses.
- FILMST 0001 - MOTION PICTURE FUNDAMEMTALS
- FILMST 0120 - BASIC DIGITAL PHOTOGRAPHY
- FILMST 0151 - INTRODUCTION TO WEB DESIGN
- FILMST 0245 - PHOTOSHOP FOUNDATIONS
- FILMST 0400 - INTRO TO DIGITAL EDITING
- FILMST 0410 - ADVANCED DIGITAL PHOTOGRAPHY
- FILMST 0420 - ADV DIGITAL EDITING TECHNIQUES
- FILMST 0601 - VIDEO PRODUCTION 1
- FILMST 0610 - DIGITAL EFFECTS & COMPOSITING
- FILMST 1600 - VIDEO PRODUCTION 2

Requirements subject to change. Check with an academic advisor before registering.

Gender, Sexuality, and Women Studies Certificate

The undergraduate Certificate in Gender, Sexuality, and Women's Studies is an interdisciplinary academic program providing students with the opportunity to broaden their understanding of the changing role that gender plays, both in the United States and around the world. The GSWS Certificate is housed in the College of General Studies and offered in partnership with the Gender, Sexuality, and Women's Studies program. Participants benefit from the academic instruction of GSWS faculty and the nontraditional student services available through the College of General Studies.

Students who want to explore the intersection of gender with race, class, ethnicity, ability, and sexual orientation will find courses of interest, as will students who want to know more about the role of women in history, literature and the arts, media, and science. Students who are planning careers in medicine, the creative arts, social work, education, counseling, law, therapy, and business often find that a background in women's studies enhances their professional activities.

Admission and Application Requirements

Students must meet College of General Studies certificate application requirements and complete an application form online. For more information, visit http://www.cgs.pitt.edu/admissions.

In addition, prospective and current students are expected to schedule a meeting with the Gender, Sexuality, and Women's Studies Undergraduate Advisor and complete the UNDERGRADUATE CERTIFICATE ADVISING FORM. The form should be filed as early as possible and no later than the semester prior to graduation.

Certificate Requirements (18 credits)

The Certificate in Gender, Sexuality, and Women's Studies is an 18-credit certificate:

- Transfer courses will be accepted on a case-by-case basis up to a maximum of two courses.
- A cumulative grade point average of 2.0 or higher is required in courses being applied to the certificate.
- A minimum of 12 credits must be earned at the University of Pittsburgh.
- The GSWS Certificate may not be pursued concurrently with the B.A. in Gender, Sexuality, and Women's Studies or with the GSWS minor.

- All certificate students are expected to meet at least once per year with the GSWS advisor to update their files and discuss what courses are needed to fulfill certificate requirements.

Core Courses (6 credits)

A minimum of two courses (six credits) are required (preferably to be completed early in the student's academic program).

- GSWS 0100 - INT TO GENDER, SEXTY, & WOMNST
- GSWS 0500 - INTRO TO FEMINIST THEORY *or*
- GSWS 0550 - SEX AND SEXUALITIES
  Students are advised to take all three core courses to cover the key areas represented by the program (in which case one course counts as an elective, below).

Electives (9 credits)

Three elective courses (9 credits) must be taken from at least two different academic departments (with GSWS as one possible unit.) Visit the Gender, Sexuality, and Women's Studies department Web site for a full listing of approved courses, including such courses as:

- ADMJ 1242 - GENDER, RACE, CLASS, AND CRIME
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- ANTH 0768 - HUMAN SEXUALITY IN CROS CULTUR
- ENGCMP 0203 - SEM CMPSTN: GENDER STUDIES
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- FR 0012 - FRENCH KISS
- GSWS 0200 - SEX, RACE, & POPULAR CULTURE
- GSWS 0600 - GLOBAL LGBTQ LITERATURE
- HIST 1662 - TOPICS IN WOMEN'S HISTORY
- LEGLST 1315 - SEX, LAW AND MARRIAGE
- PSY 0184 - PSYCHOLOGY OF GENDER
- RELGST 1648 - GENDER & THE JEWISH TRADITION
- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1448 - WORKING WOMEN
  Either GSWS 1900 - INTERNSHIP or GSWS 1901 - INDEPENDENT STUDY may be used to meet an elective requirement, but in this case, the two other courses must each be in different departments. Consult with the GSWS advisor. Special permission from the GSWS advisor required.

Interdisciplinary Course (3 credits)

Choose one advanced GSWS course (three credits); GSWS 0100 and GSWS 0500 (or GSWS 0550) are prerequisites for these courses.

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1150 - GLOBAL FEMINISMS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1235 - LANGUAGE, GENDER AND SOCIETY
- GSWS 1450 - GENDER AND SUSTAINABILITY

Notes

Requirements subject to change. Check with an academic advisor before registering.

Information System Design Certificate

This innovative 18-credit program responds to the increasing industry demand for information system professionals. This multifaceted undergraduate certificate can be completed as a stand-alone continuing education program or serve as preparation for a bachelor's, master's, or doctoral degree. Many of the course options are available in the evenings, on Saturdays, and online.

Who should participate:

- Professionals in another field who wish to enter the information management field
- Individuals working in the technology field who want or need more formal training to progress in their careers
- People wanting to prepare for a master's degree in information sciences

Upon completion of this certificate, participants will be able to:

- Use scientific programming language to introduce information structures such as linked lists, stacks, and queues
- Develop program modules using a current programming language
- Utilize the theories of data structures and programming language design

These competencies may be applied to positions such as system designer, database developer, database manager, interactive system designer, expert system designer, information retrieval specialist, network designer, database marketer, or administrator who advises and implements technology purchases and upgrades.

This certificate is applicable to fields such as banking, healthcare, library science, judicial systems, communication, education, agriculture, private industry, and government.

Admission requirements

Students must meet requirements for admission to the College of General Studies. For admissions guidelines and an application, see www.cgs.pitt.edu. A certificate application form must be completed and returned to the College of General Studies.

Students must complete a college algebra course or its equivalent and INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY, earning a C grade or better in both courses before progressing to the certificate curriculum.

Obtaining the certificate

To receive the certificate, you must fill out an application with your advisor prior to completing your last term in the program. Check with your advisor for the application filing form and deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

Students must complete a total of 18 credits as follows. All courses must be completed with a C or better grade.

- INFSCI 0017 - FUNDAMNTLS OF OBJ-ORIEN PRGMG
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS
- INFSCI 1024 - ANALYSIS OF INFORMTN SYSTEMS
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
- INFSCI 1070 - INTRO TO TELCOM & NETWORKS

Choose one elective from the following:

- INFSCI 1014 - GRAPHICS
- INFSCI 1052 - USER CENTERED DESIGN
- INFSCI 1068 - GEOSPATIAL INFO SYSTEMS (GIS)

- INFSCI 1074 - COMPUTER SECURITY

Notes

Requirements subject to change. Check with an academic advisor before registering.

Leadership Certificate

The Certificate in Leadership provides a structured framework of courses and experiences for acquiring the basic practical and analytical skills required of successful public and private sector leaders. Offered by the University of Pittsburgh College of General Studies, this program uses the skills and knowledge of students to help advance their careers further, and take their organizations to the next level.

This 18-credit program is designed for students looking to become a more attractive candidate for a managerial or leadership position in their chosen field, or for those students looking to enter into the business, nonprofit, government, or corporate world.

Who should participate:

The Certificate in Leadership is open to any University of Pittsburgh degree-seeking student, regardless of current school or college, who anticipates moving into a leadership role in business, nonprofit, or other organization.

Upon completion of this certificate, participants will be able to:

- Demonstrate knowledge of leadership theories and models, such as situational, participative, transformational, and servant leadership
- Identify and evaluate the effectiveness of different communicative styles, and communicate clearly and effectively themselves
- Analyze an organization in its cultural, social, historical, developmental, geographic, and/or competitive aspects, and decide which type of leadership style would be most effectivein that situation
- Determine one's fit to the leadership-related challenges of an organization and what one would need to be more effective as a leader in that situation.

Admission requirements

Students wishing to pursue the Certificate in Leadership must be in good academic standing and must submit a certificate application form to the College of General Studies. The form is available through the college's Web site or may be picked up in person.

Obtaining the certificate

To receive the certificate, you must fill out an application with your academic advisor prior to completing your last term in the program. Check with your academic advisor for the application filing form and deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Pre-Requisite Requirements

Because strong communication skills are essential, prior to enrolling in LDRSHP 1200 students must have completed at least one class each in oral and written communication with a C or better.

Recommended Pre-Requisite Courses

- COMMRC 0520 - PUBLIC SPEAKING
  BUSORG 1101 and COMMRC 0500 can be subsituted for COMMRC 0520
- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN

ENGCMP 0420, ENGCMP 0440, and ENGCMP 0450 or ENGWRT 0550 and ENGWRT 0610 can be substituted for ENGCMP 0400.

Co-Curricular Requirement: Emerging Leaders Program

All students must complete the Emerging Leaders Program, a 20 hour non-credit program run by the Cross Culture and Leadership Development Office within the Office of Student Affairs. For more information on the program, please visit www.studentaffairs.pitt.edu/ccldel.

Curriculum (18 credits)

Students must complete their required and elective courses for a total of 18 credits. A grade of C or better is required for all courses in the program. Students also must complete the Emerging Leaders Program. All courses are 3 credits, unless otherwise noted.

Required Courses (6 credits)

Students must complete LDRSHP 1100, the Emerging Leaders Program, and the program pre-requisite requirements listed above prior to registering for LDRSHP 1200. Students may register for the cross-lists of these required courses:PUBSRV 1390 for LDRSHP 1100 and ARTSC 1902 for LDRSHP 1200 .

- LDRSHP 1100 - THEORIES OF LEADERSHIP
- LDRSHP 1200 - LEADERSHIP SEMINAR

Electives (12 credits)

Students must complete at least one course from each of the three designated areas below, and complete 12 credits in all. At least half of the courses must be at the 1000-level.

Area One: Leadership and Ethics

- PHIL 0300 - INTRODUCTION TO ETHICS
- PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES
- PHIL 1300 - ETHICAL THEORY
- PHIL 1380 - BUSINESS ETHICS
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1340 - STRATEGIC PLNNG PUBLIC SECTOR
  These may be used as leadership electives for qualified students.
- AFROTC 1014 - AIR FORCE LEADERSHIP STUDIES
- MILS 0021 - LEADERSHP DYNAMCS & APPLICATNS
- PS 1910 - INSTIT POLITICS INTERNSHP/SEM (cross-listed with PUBSRV 1910)

Area Two: Interpersonal Relations

- ANTH 1760 - ANTHROPOLOGY OF LAW
- COMMRC 0300 - COMMUNICATION PROCESS
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- COMMRC 1109 - NONVERBAL COMMUNICATION
- COMMRC 1111 - THEORIES OF PERSUASION
- ECON 0200 - GAME THEORY PRINCIPLES
- ENGCMP 1100 - LANGUAGE OF BUSINSS & INDUSTRY

- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0105 - INTRODUCTION TO SOCIAL PSYCH
- PSY 0405 - LEARNING AND MOTIVATION
- PSY 1135 - SOCIAL PERCEPTION & COGNITION
- PSY 1155 - PSYCHOLOGY OF SMALL GROUPS
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1335 - ADMINISTRATIVE BEHAVIOR
- SOC 0431 - BUREAUCRACIES

Area Three: Situational Analysis

- ANTH 0701 - CULTURAL ANTHROPLGY: OVERVIEW
- ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY
- ANTH 1738 - GENDER PERSPECTIVES IN ANTHRO
- ANTH 1755 - URBAN ANTHROPOLOGY
- ECON 0800 - INTRODUCTION TO ECONOMICS
- HIST 0050 - SOCIAL CHANGE (cross-listed with SOC 0351)
- LING 1235 - LANGUAGE, GENDER AND SOCIETY (cross-listed with GSWS 1235)
- PS 1241 - PUBLIC ADMIN & POLITCL SYSTEM
- SOC 0010 - INTRODUCTION TO SOCIOLOGY
- SOC 0150 - SOCIAL THEORY
- SOC 0432 - WEALTH AND POWER
- SOC 0444 - URBAN SOCIOLOGY
- SOC 1448 - WORKING WOMEN

Note

Students may not use more than one of each of the courses in these groups: 1) ANTH 0701 and 0780; 2) ANTH 1755 and SOC 0444.

Note

Requirements subject to change. Check with an academic advisor before registering.

Managing Health Services Programs and Projects Certificate

Improve your administrative and business skills and earn a Certificate in Managing Health Services Programs and Projects. This 18-credit, interdisciplinary program emphasizes grant and research project management, and is designed to educate health service workers in the areas of sociology, communications, public administration, and management.

The program is applicable to positions such as health project manager, health administration director, health program director, and medical office manager. Students who successfully complete this certificate may apply the credits earned to an undergraduate degree at the University of Pittsburgh College of General Studies (CGS).

Upon completion of this certificate, students will be able to:

- manage health services research projects, grants, contracts, and finances;
- demonstrate the skills necessary to assume an administrative or managerial role in a health care organization;
- apply organizational theory and concepts to health care facilities; and
- analyze how physical, social, and cultural factors may help or hinder communication about health care needs.

Who should enroll:

- Health care workers who have been charged with, or would like to take on, management of grants and research projects
- Public and community health workers who seek an understanding of how physical, social, and cultural factors may help or hinder communication about health care needs
- Health care employees looking to take on leadership roles in the workplace

Admission requirements

Students must meet the requirements for admission to the College of General Studies. A certificate application must be completed and returned to the College of General Studies.

Obtaining the certificate

To receive the certificate, you must fill out an application with your advisor prior to completing your last term in the program. Check with your advisor for the application form and filing deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Additional CGS programs offered in this field:

- Certificate in Community Health Assessment
- Bachelor of Arts in Health Services

Curriculum (18 credits)

For the course schedule and descriptions of most undergraduate classes offered by the College of General Studies, Kenneth P. Dietrich School of Arts and Sciences, and College of Business Administration, visit www.courses.as.pitt.edu.

Required Courses (15 credits)

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- HRS 1017 - INTRO TO EPIDEMIOLOGY
- NUR 1829 - CONTEM ISSUES CROS CULTL HLTH
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Electives (3 credits)

Take a minimum of one course.

- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVR
- PUBSRV 1110 - FINANCIAL MGT IN PUBLIC SECTOR
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS

Notes

Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh. Students must maintain at least a 2.0 grade point average in all University certificate courses.

Requirements subject to change. Check with an academic advisor before registering.

National Preparedness and Homeland Security Certificate

The Certificate in National Preparedness and Homeland Security (NPHS) is designed to teach current and future emergency professionals to analyze information and make decisions in dynamic and complex crisis environments using new and powerful analytic tools. Through experience-based learning activities, certificate students will develop the skills they need to thrive in homeland security and emergency preparedness careers.

This unique 18-credit certificate incorporates hands-on learning methods. The program features dynamic modeling tools developed at the University of Pittsburgh to plan for and respond to disasters; exercises and simulations that follow protocols established by the U.S. Department of Homeland Security; and tools that use virtual reality, visualization, and Geographic Information Systems (GIS) software to integrate information for crisis decision making.

Who should participate:

- Employees of local, state, and federal entities engaged in emergency preparedness, homeland security, and related fields
- Business people who are charged with risk management and are interested in applying industry tested analytics to developing emergency management and continuity of operations (COOP) plans
- Professionals in organizations with first-responders and first receivers, and those looking to step into such leadership positions
- Veterans interested in building on their expertise in decision-making and crisis leadership
- Career changers and current degree seekers looking to enter a growing and important field that uses a data-driven approach to preparedness activities involving both planning and implementation.

Upon completion of this certificate, participants will be able to:

- Develop and implement organizational risk profiles, COOP plans, business recovery plans, and other risk management activities
- Use knowledge of federal, state, and local agency responsibilities to effectively plan and execute emergency response plans
- Apply incident command protocols and consensus building approaches
- Communicate effectively in a crisis, orally and in writing, and transfer information effectively to obtain positive outcomes
- Plan prevention and preparedness operations and measures that help communities handle efforts related to damage limitation, emergency response, and recovery

Admission requirements

Applicants must have completed at least 60 credits with a grade point average of 2.0. If you are not currently enrolled at the University of Pittsburgh, you must submit official transcripts from all prior institutions with the application. Students must meet requirements for admission to a certificate program in the College of General Studies. For admission guidelines and an application, go to www.cgs.pitt.edu.

NPHS-STEM Undergraduate Scholarship Program

Students interested in pursuing a career in homeland security and emergency preparedness are encouraged to apply for the NPHS-STEM Undergraduate Scholarship program. The program combines course work with real-world experience to help you develop in-demand skills in science, technology, engineering, and math (STEM) while launching a career in information security, emergency management, infrastructure protection, or intelligence analysis, among other options.

Curriculum (18 credits)

The certificate is composed of twelve credits of required core courses, and six credits of elective courses. Core courses cover foundational content and procedures central to national preparedness and emergency response, in addition to analytical tools and approaches. They include a capstone experience in which students will plan, role-play, and report on a complete disaster scenario involving critical infrastructure sectors such as energy, government, transportation, health, and telecommunications. Elective courses allow students to gain further knowledge or experience relevant to their current or intended career paths in such fields as health, information security, and business continuity. All courses are 3 credits, unless otherwise noted.

- No course with a grade below C will be accepted for certificate credit
- To earn the certificate, students must maintain at least a 2.0 grade point average
- All four required core courses must be completed at the University of Pittsburgh to earn the certificate
- A maximum of six credits may be accepted from other institutions for elective courses
- Students should consult with their advisor and/or core course faculty early in their program to identify elective courses appropriate for their career and/or academc interests

Required Courses (12 credits)

Students must have successfully completed at least one other core course prior to registering for the capstone course. The capstone course may be taken concurrently with another core course.

- NPHS 1510 - FEDL/INT'L FRMWRK EMRGY PREP
- NPHS 1520 - STATE/LOCAL FRMWRK EMRGY PREP
- NPHS 1530 - ANAL/DEC TOOLS EMRGY PREPRDNS
- NPHS 1540 - CAPSTONE: EMRGY PREPAREDNESS

Electives (6 credits)

The following list shows a sample of courses already approved as electives:

- ADMJ 1234 - INTRODUCTION TO CYBERCRIME
- ADMJ 1238 - CYBER SECURTY/LAW/MONY LAUNDER
- ADMJ 1245 - TERRORISM
- ADMJ 1252 - CRITICAL INCIDENT MANAGEMENT
- ADMJ 1260 - RESOURCE PROTECTION PLANNING
- ADMJ 1425 - PRINCIPLES HOMELAND SECURITY (cross-listed with PUBSRV 1425 - PRINCIPLES HOMELAND SECURITY)
- CS 1655 - SECURE DATA MGT & WEB APPLCS
- GEOL 0820 - NATURAL DISASTERS
- INFSCI 1068 - GEOSPATIAL INFO SYSTEMS (GIS) or IE 1015 - GEOGRAPHIC INFORMATION SYSTEMS
- INFSCI 1070 - INTRO TO TELCOM & NETWORKS
- INFSCI 1074 - COMPUTER SECURITY
- NPHS 1900 - INTERNSHIP
- NPHS 1901 - INDEPENDENT STUDY
- NUR 1061 - INDEPENDENT STUDY
- NUR 1830 - HEALTH CRE IN AGE OF TERRORISM
- NUR 1865 - FUNDMS DISTR/MASS CASUALTY CRE
- PS 1583 - TOPCS IN INTRNATNAL RELATIONS
- PUBSRV 1320 - GIS IN THE PUBLIC SERVICE

Notes

Students must meet all relevant course prerequisites. NPHS Internship and NPHS Independent Study courses may be repeated for credit with permission.

Requirements subject to change. Check with an academic advisor before registering.

Center for National Preparedness

The Center for National Preparedness (www.cnp.pitt.edu) is an interdisciplinary collaboration of experts and departments at the University of Pittsburgh. It provides research, education, and service aimed at advancing the science, policy and implementation of effective federal, state, and

local preparedness efforts across the public and private sectors. The Center possesses expertise in business continuity, information technology, engineering, medical research, national security policy, and public health.

Nonprofit Management Certificate

The nonprofit field is growing, and so are the demands for the services nonprofits provide. In the last 10 years, 500 new organizations have been established in the Pittsburgh area alone. The growth of nonprofits means that various positions within these organizations will need to be filled by qualified individuals.

The right education is critical to demonstrating your qualifications to prospective employers. A Certificate in Nonprofit Management, alone or coupled with an appropriate bachelor's or advanced degree, will aid in your quest for employment by or promotion within a nonprofit organization.

Students who successfully complete this certificate may apply the credits to an undergraduate degree in public service at the University of Pittsburgh College of General Studies.

Who should enroll:

- Professionals with public relations experience
- Professionals with an interest in fundraising
- Professionals with a background in program development
- Professionals with knowledge of marketing and advertising
- Recent graduates or current students who wish to pursue a careerin the nonprofit field
- Undergraduate degree-seeking students who wish to have an intermediate credential
- Technology workers
- Public service majors
- Entrepreneurs who wish to start a nonprofit

Upon completion of this certificate, participants will be able to:

- organize, manage, or supervise a nonprofit organization;
- hire and train an efficient staff;
- understand the structural and financial issues unique to nonprofits;
- effectively raise revenue through fundraising; and
- write grant proposals.

This certificate is applicable to positions such as grant writers, fundraisers, development officers, accountants, information technology workers, and office managers.

Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application must be completed. To avoid a late fee, you should complete this process when registering for courses.

Curriculum (18 credits)

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MGMNT
- PUBSRV 1210 - FINANCIAL MGT NON-PROFIT ORGNS
- PUBSRV 1220 - HUMN RESORC MGT NPRF ORGNS
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP (section: 7715)

Notes

Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh. Students must maintain at least a 2.0 grade point average in all University certificate courses.

Answers to Frequently Asked Questions:

1. Is there an order in which the student must take the required courses for this certificate? The courses can be taken in any order. Normally the internship would be completed last.
2. How many working hours is required for the internship seminar? 120 hours along with registration for the CGS 1900-7715 course. Visit cgs.pitt.edu/academics/internship for details.
3. Can the internship course be divided (i.e., 1 cr in Fall and 2 cr in Spring)? No, this is a 3-credit course; however, the student could work with Brianna McMeekin to see if the 120 hours could be divided over two terms. Brianna McMeekin can be reached at bmm96@pitt.edu.
4. If the student works at the University, does the student need to complete internship hours outside of Pitt or could it be in a different department on campus? The student can talk to Brianna about this.

Requirements subject to change. Check with an academic advisor before registering.

Gainful Employment Information

According to Urban Institute, the number of nonprofits between 2001 and 2011 has increased by 25 percent. Jobs for social and community service managers are expected to grow by 27 percent by 2020. Social and community service managers had a median salary of $57,950 in 2010.

Writing Certificate

The Certificate in Writing is a 21-credit program designed for those who desire to improve their writing skills. In today's world, the skillful use of the written word is fundamental. This program consists of academic courses taught by faculty of the Department of English. Participants may choose electives to focus on a particular style of writing or to obtain an overview of several writing styles. The program also offers internships with local media, including newspapers, magazines, and television.

Who should participate:

- Students already enrolled in a degree program in the College of General Studies who wish to concentrate on the development of writing skills
- Those who already have a degree, but who wish to develop their writing skills for personal or professional advancement
- People seeking to embark upon writing as a profession

Upon completion of this certificate, participants will be able to:

- Write clearly and accurately
- Apply writing skills to both fiction and nonfiction works
- Understand different forms and techniques used in various types of writing

This certificate is applicable to fields such as media, industrial organizations, governmental agencies, community groups, service providers, and businesses. Skilled writers may work in any organization or field.

Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and returned to the College of General Studies. To avoid a late fee, you should complete this process when registering for courses. Students must have completed a Seminar in Composition course or its equivalent before registering for any of the following classes.

Obtaining the certificate

To receive the certificate, you must fill out an application with your academic advisor prior to completing your last term in the program. Check with your advisor for the application filing form and deadlines, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (21 credits)

In addition to Seminar in Composition, students must complete seven courses (21 credits). These classes should include two English writing courses (6 credits) and five English writing electives (15 credits).

- A minimum of five of the required seven courses must be completed at the University of Pittsburgh.
- No course will be accepted for certificate credit with a grade below C, and no course will be accepted as a prerequisite for a higher-level course if the grade earned is lower than a C

Required Courses (6 credits)

All courses are 3 credits.

- ENGWRT 0520 - INTRO TO FICTION WRITING
- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION

Electives (15 credits)

All courses are 3 credits.

Courses offered vary by term. Choose five additional courses from any combinations of poetry, fiction, and nonfiction. A sampling of courses that can be used to fulfill the certificate requirements include:

Poetry

- ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
- ENGWRT 1210 - POETRY WORKSHOP

Fiction

- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1090 - MASTERING POINT OF VIEW
- ENGWRT 1091 - AUTOBIOG & CREATIVE IMPULSE
- ENGWRT 1092 - WRITER'S JOURNALS
- ENGWRT 1094 - READINGS IN CNTMPRY FICTION
- ENGWRT 1095 - TOPICS IN FICTION
- ENGWRT 1710 - SENIOR SEMINAR IN FICTION

Nonfiction

Writing for the Professions Certificate

In today's business climate, employees have discovered that the ability to research, organize, and write various kinds of documents is a critical component of many positions, including those that are primarily technical in nature. Organizations expect employees to communicate clearly and effectively with both colleagues and non-expert stakeholders.

This 18-credit certificate provides participants with a strong foundation for developing these vital writing skills. You will learn techniques that are critical for producing clearly written documents-critiquing, analyzing, and researching-as well as the practical applications that build on this groundwork.

Who should participate:

Individuals for whom writing will be a major component of their job responsibilities, e.g., broadcasters, legal professionals, or reporters.

Upon completion of this certificate, participants will be able to:

- Identify and analyze audience traits and perspectives
- Determine a specific goal and/or purpose of a document, then organize and develop clearly written prose in support of that purpose
- Apply concentrated knowledge of a specialized communication topic

This certificate is applicable to such fields as print and online writing professions, health professions, and nonprofit organizations.

Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and returned to a College of General Studies academic advisor. To avoid a late fee, you should complete this process when registering for courses.

Obtaining the certificate

To receive the certificate, you must fill out an application with your academic advisor prior to completing your last term in the program. Check with your academic advisor for the application filing form and deadline, and be sure all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

Many courses are offered in the evenings and at off-campus locations. Not all courses are offered every term. All courses are three credits unless otherwise noted. Please check course descriptions for prerequisites.

Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of 9 credits must be earned at the University of Pittsburgh. Students must maintain at least a 2.0 grade point average in all University certificate courses.

For most undergraduate classes offered by the College of General Studies, the Kenneth P. Dietrich School of Arts and Sciences, and the College of Business Administration, visit www.courses.as.pitt.edu.

Required Courses (9 credits)

- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION
- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN
  And choose one of the following courses:
- COMMRC 0320 - MASS COMMUNICATION PROCESS
- ENGWRT 1330 - INTERMEDIATE NONFICTION

Electives (9 credits)

Choose three courses from the following:

- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- COMMRC 1732 - SPECIAL TOPICS IN MASS COM
- ENGCMP 0410 - WRITING IN THE LEGL PROFESSNS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLC/PROFESSNL WRIT
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRO TO TECHNICAL WRITING
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1112 - PROF USES OF SOCIAL MEDIA
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- ENGWRT 1370 - JOURNALISM BOOT CAMP:WRITE NOW
- ENGWRT 1391 - WRITING THE REVIEW
- ENGWRT 1393 - SPORTS WRITING
- ENGWRT 1399 - TOPICS NON-FICTION: NEWSPAPER
- ENGWRT 1401 - TOPICS NON-FICTION: MAGAZINE
- ENGWRT 1403 - TOPC NON-FCTN:ELECTRNC MEDIA

Notes

Requirements subject to change. Check with an academic advisor before registering.

Kenneth P. Dietrich School of Arts and Sciences

The Kenneth P. Dietrich School of Arts and Sciences is the oldest and largest academic unit within the University of Pittsburgh, with more than 10,000 students and over 600 faculty from around the world. The Dietrich School offers a competitive liberal arts education within the setting of a comprehensive research university and a dynamic urban setting.

The Dietrich School instructional programs provide a liberal arts curriculum designed to prepare students for the world of work, research, professional schools, and graduate programs. This education helps students cultivate the skills and knowledge that provide a foundation for lifelong learning, and educates students so that they can become perceptive, reflective, and intellectually self-conscious citizens of the world. The main elements of the Dietrich School general education are: an acquaintance with great works of art, literature, and philosophy; an understanding of basic social institutions and processes; a sense of history and familiarity with the richness and variety of human cultural achievements; an awareness of the main ideas of contemporary natural science and mathematics; and engagement with languages and cultures other than one's own.

The Dietrich School curriculum spans the humanities, natural sciences, and social sciences. Students are encouraged to pursue a broad range of academic subjects. Through one-on-one academic advising, students may choose from over 55 majors, 30 minors, and 20 certificate programs, including dual degrees and pre-professional preparation. The broad range of academic programs includes areas that are unique and cutting-edge, such as the major in Mathematical Biology or the Geographic Information Systems Certificate. Programs such as English writing and philosophy are nationally recognized as centers of excellence. With each academic program, the school's faculty from across the disciplines consistently builds the Dietrich School curriculum to reflect current research, so that our students are poised to meet today's expectations in their various academic pursuits.

In addition to the majors, minors, and certificates, Dietrich School students are encouraged to participate in enriching experiences outside the classroom. These opportunities include undergraduate research with top research faculty and participation in academic internships with reputable corporate and nonprofit institutions. Students may also pursue study abroad in approximately 45 countries, including summer study abroad with Dietrich School humanities and social sciences faculty. Leadership development is encouraged through participation in student organizations and governance, serving in honorary societies, and assisting a faculty member as an undergraduate teaching assistant.

Admission through the Office of Admissions and Financial Aid

The following students are admitted to Dietrich School by the Office of Admissions and Financial Aid. These students should see the Application for Admission section of this bulletin for general admissions information.

- Freshmen (see Pittsburgh campus Freshman Admissions for general admissions information).
- Transfer students who have previously enrolled at a college or university other than the University of Pittsburgh. These include former University of Pittsburgh students who have since earned college credits at another institution and now wish to return to the Dietrich School.
- Continuing education students: Adults who wish to begin or continue to work toward an undergraduate degree by taking a full- or part-time load of day classes should apply as new or transfer students through the Office of Admissions and Financial Aid.
- Students who have previously earned a bachelor's degree from an institution other than the University of Pittsburgh and now wish to earn a second undergraduate degree.
- International students should refer to admission guidelines on the Web site for the Office of Admissions and Financial Aid (www.oafa.pitt.edu).

Admission through the Dietrich School of Arts and Sciences

The following students must apply directly to the Dietrich School for admission:

Transfers from Other University of Pittsburgh Schools at the Pittsburgh campus

To transfer to the Dietrich School from another school at the Pittsburgh campus, students should request that the other Pittsburgh campus school send their records to the Dietrich School in 140 Thackeray Hall. The Dietrich School will review the student records and send letters of acceptance to students who are eligible to transfer into the Dietrich School. To qualify, students must have a minimum overall GPA of 2.0 and have completed their basic skills requirements in composition and algebra according to Dietrich School guidelines. In addition, students enrolled in the College of General Studies (CGS) must earn at least 24 credits through CGS before applying for transfer to the Dietrich School.

Upon acceptance into the Dietrich School, students will receive evaluations of their previous course work, acknowledging the courses that have fulfilled Dietrich School skills and general education requirements. To graduate with a degree from the Dietrich School, students are required to earn their last 30 credits while enrolled in the Dietrich School and to earn at least half of the credits for their majors, minors, and certificates while enrolled in the Dietrich School.

Transfers from University of Pittsburgh Regional Campuses

1. For students seeking guaranteed transfer relocation who have earned credits only from one of the regional campuses, the normal requirement is for completion of 45 credits at the specific regional campus, with a minimum GPA of 2.5.
2. For students seeking guaranteed transfer relocation who have earned 30 or more credits at the specific regional campus and a total of 60 credits overall, a minimum GPA of 3.0 in all courses is required.
3. For students seeking transfer relocation who have between 15 and 30 credits at the specific regional campus and a total of 60 credits overall, a minimum GPA of 3.0 is required in all courses, and the normal requirements of the Dietrich School of Arts and Sciences for external transfer students must be met. For these students, relocation is not guaranteed. Students must complete at least 15 credits at the regional campus to transfer to the Pittsburgh campus.
4. Students with a 3.0 GPA, who would have been directly admissible to the Pittsburgh campus as freshmen, may be considered for relocation with fewer than the above number of college credits.

Students Seeking a Second University of Pittsburgh Degree

Students who have earned a bachelor's degree in any University of Pittsburgh school or campus and wish to earn a second undergraduate degree in the Dietrich School should apply directly to the Dietrich School. Applicants should note the following:

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate course work from the first degree will apply to the second degree, up to a maximum of 90 credits. These credits will be indicated on the academic record during the student's first term of enrollment as a seconddegree student. Students must earn a minimum of 30 new credits and at least half of the credits for the second major toward the second degree while enrolled in the Dietrich School.
- The cumulative GPA and credit total will be based on all credits from the first degree and all new course work taken that applies to the second degree.

Students Seeking Reinstatement

The following students must apply for reinstatement through the Dietrich School of Arts and Sciences in 140 Thackeray Hall:

- Dietrich School students who have not enrolled for three consecutive terms (one calendar year);
- Dietrich School students who have completed their suspension periods and wish to continue their studies; and

- students who last attended another school at the Pittsburgh campus but have not enrolled in classes for three consecutive terms (one calendar year), have not attended another institution, and wish to be admitted to the Dietrich School.

*Students who are returning after completing their suspension period will be reinstated on probation.

The deadline for reinstatement is August 15 for the fall term, December 15 for the spring term, and one week before the beginning of classes in the summer term or sessions. An application fee of $45 is required. Students who last attended another University of Pittsburgh school on the Pittsburgh campus or who attended a regional campus must meet the admissions requirements for transfer to the Dietrich School. Students' academic standing upon reinstatement will be that attained at the end of their last term in residence.

Students who are reinstated for a particular term but do not enroll for that term must apply for reinstatement again if they wish to attend for a later term. Students who have been away from the University for two or more years will be subject to the requirements of the school and of their major in force at the time of their reinstatement, rather than those in force at the time of their last attendance.

Guest Students

Qualified degree-seeking students at other institutions may be admitted to the College of General Studies for the fall or spring term to earn credits for transfer to their home school for use toward graduation. Applicants must be in good academic standing at their home institution, with a minimum 2.5 cumulative GPA, and must certify that the home school will accept the courses for transfer. A one-time application fee of $45 is required, and admission is only valid for one term. Students desiring enrollment for subsequent terms must resubmit certification from the home school.

For summer guest student admission information, please visit www.cgs.pitt.edu.

Post-baccalaureate Students

Students who have completed an undergraduate degree and wish to take additional undergraduate courses on a non degree-seeking basis may apply directly to the College of General Studies. Most post-baccalaureate students take courses in order to facilitate a career change, as prerequisites for a graduate program, or for personal enrichment. Students must submit proof of the undergraduate degree received (either a copy of the diploma or a transcript showing the degree and the date it was awarded). The application deadline is two weeks before the start of classes. A one-time application fee of $45 is required, and admission is valid for one calendar year.

Accelerated High School Students

Accelerated High School students are high school juniors and seniors, age 16 years or older, who take up to six regular undergraduate college credits on campus while continuing their high school programs. Qualified students become part-time, non-matriculated students in the Kenneth P. Dietrich School of Arts and Sciences. They attend regular on-campus classes with college undergraduates and are not identified in the classroom as high school students.

The Director of College in High School and Accelerated High School has the authority to set requirements for admission to Accelerated High School. The application includes permission sections that must be completed by parents or guardians and school officials and must be submitted with other application materials.

Applications must be submitted to the Accelerated High School office. The deadline is two weeks before the first day of classes. There is a one-time application fee of $35, and admission is valid for one term only. Students must resubmit certain specified application materials for subsequent terms. Depending on the course(s) selected, students may be required to take a placement test prior to registration. For more detailed information, contact Accelerated High School in 208B Thackeray Hall at 412-624-7428.

College in High School (CHS) Program

The College in High School Program offers qualified high school students throughout Pennsylvania the opportunity to earn University of Pittsburgh credits on their own high school campuses. Participating schools now offer approved University of Pittsburgh courses in chemistry, communications, computer science, French, German, Latin, mathematics, statistics, physics and political science. The courses are taught by experienced teachers who have been certified through the appropriate University of Pittsburgh departments. All University regulations governing course registration, withdrawal, resignation, and tuition payment are enforced.

The Director of College in High School and Accelerated High School has the authority to set requirements for admission to College in High School.

Students' grades are based on their performance on University examinations and recorded on University transcripts. Although the CHS program cannot govern the transfer credit policies of other institutions, the vast majority of CHS students receive advanced standing, elective credits, or both as a result of their successful participation in the program. For more information, contact the College in High School office in 208B Thackeray Hall at 412-624-6828.

Academic Integrity

As members of the University of Pittsburgh community, Dietrich School students are expected to meet their obligation to exhibit honesty and to respect the ethical standards of the University community and of their chosen field of study in carrying out academic assignments. Dietrich School students are therefore expected to familiarize themselves with the published rules and regulations governing academic integrity. For specific information, see Student Rights and Responsibilities (www.studentaffairs.pitt.edu/drsrightsresonsibilities).

The Dietrich School maintains an Academic Integrity Board, consisting of both faculty and students, for adjudication of grievances from faculty about student behavior and from students about faculty behavior. For more information, contact the Dietrich School Academic Integrity office, 140 Thackeray Hall.

Grading Systems

The Student Records Office, located in the Office of the Associate Dean for Undergraduate Studies in 140 Thackeray Hall, maintains the records of all Dietrich School undergraduates and oversees graduation, transfer credit, internal and external transfers, and Dean's List, and answers routine questions about a variety of matters including general education requirements, course withdrawal procedures, and grade options. Contact Student Records at 412-624-6776.

Letter Grade Option

The Dietrich School adheres to the following University letter grade system without exception:

A+		Superior
A	4.00	
A-	3.75	
B+	3.25	Meritous
B	3.00	
B-	2.75	
C+	2.25	Adequate
C	2.00	
C-	1.75	
D	1.25	Minimal
D+	1.00	

D-	0.75	
F	0.0	Failure

S/NC Grade Option

The Dietrich School offers both a standard letter-grade option and the Satisfactory/No-Credit (S/NC) option for students enrolled in most Dietrich School courses. Under this option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (for no credit) is given. Courses for which an S is earned are counted toward graduation but are not computed in the GPA. Courses in which an NC is earned are not counted toward graduation or the GPA, since the NC designates that no credit has been earned. In order to take a class for the S/NC grade, a student must select the S/NC option by the deadline by completing a Grade Option/Audit Request form in the Dietrich School of Arts and Sciences Dean's Office, 140 Thackeray Hall. Deadlines are printed each term on the Dietrich School undergraduate calendar (www.asundergrad.pitt.edu/calendars.html) and in the Time Schedule of Classes Guide (www.registrar.pitt.edu/schedule_of_classes.html).

Note: There are some formal limitations to a student's choice of grading systems; he or she should check with an academic advisor before deciding to take a course S/NC.

Audit (N Grade)

Students may choose to take a Dietrich School course on an audit basis and receive an N grade on their transcript rather than a letter grade. Students who wish to audit a course must register for the course as usual then process a Grade Option/Audit Request form in the Dietrich School Dean's Office by the deadline. Deadlines are printed on the Dietrich School undergraduate calendar (www.asundergrad.pitt.edu/calendars.html). Courses in which N grades are earned do not count toward graduation and are not included in a student's GPA.

G Grades

A G grade may be awarded when students who have been attending a course and making regular progress are prevented from completing the course due to extenuating personal circumstances. Students who are assigned a G grade are required to complete course requirements no later than one year after the term or session in which the course was taken. After that year, the G grade will remain on the record, and the student will be required to reregister for the course if it is needed to fulfill requirements for graduation. The Dietrich School encourages students with G grades to work with their instructors to complete the requirements for the course by the end of the following term.

I Grades

An I grade indicates that the work of the course for which the grade is awarded has not been completed due to the nature of the course, clinical work, or incomplete research. An I grade is awarded only to students who have been doing the regular work of the course but who need more time than the term allows. That is, the extenuating circumstances ought to arise from the nature of the course work rather than from the student's personal difficulties (in which case a G grade is appropriate). The student should complete the course requirements within one calendar year after the I grade is given.

Academic Honors

Outstanding students in the Dietrich School are recognized for their academic achievement in several ways:

Dean's List

Early each (fall and spring) term, Dietrich School students whose grades in the preceding term indicate outstanding academic achievement are recognized on the Dean's List. To be placed on the Dean's List, a student must have earned at least 12 letter grade credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50 and no grade lower than a C.

Scholarships, Prizes, and Awards

Please check with your major advisor for information about departmental scholarships, prizes, and awards.

Graduation Honors

Those members of a Dietrich School graduating class who have attained an outstanding scholastic record and have taken at least 60 letter-graded credits while a resident in the Dietrich School are graduated with honors. See Graduation with Honors section for other specific requirements.

Departmental Honors

Many departments offer an honors major. Successful completion of the honors major as well as normal graduation requirements leads to the awarding of the bachelor's degree with departmental honors. For detailed information, contact individual departments or see the departmental academic program information in this bulletin.

Honors Societies

In addition to the following honors societies, Dietrich School departmental clubs and academic organizations offer opportunities for leadership, fellowship, service, and scholarship. For a complete listing of all clubs and academic organizations, please visit the online database of the Student Organization Resource Center at http://www.studentaffairs.pitt.edu/sorchome.

National Society of Collegiate Scholars

The mission of National Society of Collegiate Scholars (NSCS) is honoring and inspiring academic excellence and engaged citizenship for a lifetime. NSCS recognizes outstanding academic achievement and provides opportunities for members to enhance their collegiate experience. Benefits of membership include recognition, networking and career resources, the opportunity to apply for scholarships, leadership development, and social and service activities on campus.

Golden Key

Golden Key is an international academic honor society that recognizes and encourages scholastic achievement and excellence among college students from all academic disciplines. It provides campus and community service opportunities enabling personal growth and leadership development as well as interaction with university faculty and administrators to develop and maintain high standards of education. Golden Key rewards its members through different scholarship and award programs, and members access exclusive career opportunities and assistance through Golden Key's partnerships with businesses and graduate programs.

Phi Eta Sigma

The purpose of the Phi Eta Sigma honorary society is to promote a higher standard of learning and to encourage high scholastic attainment among freshmen in the University. Phi Eta Sigma members offer free, on-campus tutoring. Outstanding Dietrich School students are recognized for their academic achievement.

Academic Alert, Probation, Suspension, Dismissal

The Dietrich School is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. Students in the Dietrich School are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 9 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

Students are placed on **Academic Alert** if they earn a term GPA below a 2.00; a cumulative GPA between a 2.00 and a 2.25; or they fail to satisfy the algebra and/or composition requirements within the first two terms of full-time enrollment.

Students are placed on **Academic Probation** after earning a GPA between a 1.50 and a 1.99 over two consecutive terms or have one semester at or below a 1.49 cumulative GPA. Students may also be placed on Academic Probation if they fail to make progress toward their degree (e.g. failing to earn any academic credits).

Students currently on Academic Probation who earn a term GPA below a 2.00 or fail to make progress toward their degree will be subject to **Academic Suspension**. After being suspended, students are not eligible to re-enroll for one calendar year. Following suspension, students are required to apply for reinstatement at the Dietrich School Undergraduate Dean's Office in 140 Thackeray Hall. Students returning from academic suspension are reinstated on academic probation and are required to develop an academic success plan upon their return. Reinstated students are reviewed after each subsequent term of enrollment.

Students who have been reinstated from Academic Suspension must earn at least a 2.00 GPA for each term that they enroll until they have achieved a cumulative GPA of a 2.0 or above. If a student fails to earn a 2.00 term GPA, they are subject to **Academic Dismissal** from the University. Dismissed students are not eligible for reinstatement.

Note: Students on Academic Probation or Suspension are not eligible to earn credits at another institution toward a Dietrich School degree.

Probation and Eligibility for Financial Aid

The Office of Admissions and Financial Aid (OAFA) monitors financial aid eligibility. Students on probation should contact OAFA in Alumni Hall at 412-624-7488 for more information.

Credit System

The following section details the Dietrich School's rules regarding allowable credits and courses for students earning a degree in the Dietrich School.

Advanced Placement (AP) Credits

See Allowable Credits (Credit and Course Limitations).

Career Development and Noncredit Courses

Career development courses offered by the College of General Studies (numbered in the 6000s) and noncredit courses (numbered in the 4000s) may not be counted for credit toward a degree in the Dietrich School.

College Level Examination Program (CLEP) Testing

The Dietrich School does not accept CLEP general examination credits.

Courses Taken Elsewhere

Dietrich School students in good academic standing (cumulative GPA of at least 2.00) may attend a summer or special session of another accredited institution in order to supplement their program, provided they receive prior approval from the Dietrich School office. Students should fill out the

summer approval form and bring the appropriate course descriptions to the Dietrich School Student Records Office in 140 Thackeray Hall. Students will not receive credit for courses taken without advance approval. Upper-class students (60 or more credits) may not take courses at two-year schools. Courses taken elsewhere are subject to the 18 non-Dietrich School credit limitation and may not be a repeat of any course taken (passed or failed) before. A maximum of two courses (no more than 8 credits) may be taken in a single period of enrollment elsewhere. Summer course approval forms are available in the Student Records Office in 140 Thackeray Hall.

Credit by Examination

Each test for credit by examination must be arranged with the department teaching the course for which credit is desired. The examination must be in a specific course offered by the Dietrich School. Departments set their own policies as to the specific courses for which students may request credit by examination, the time and type of examination, and the number of courses among those required for the major for which credit may be earned by examination. Normally, the examinations are administered during the first three weeks of the term.

Students wishing to earn credit by examination should first consult with the department in which the course is given and then obtain the requisite form from the associate dean's office in 140 Thackeray Hall. There is a $10 per credit fee payable to the Student Payment Center, to be submitted once the form is completed. This fee is nonrefundable. Credit by examination is open to all students. Questions should be directed to the departments which offer and administer the exams.

Departmental Credits

No more than 60 credits may be taken in one department, and normally no more than 40 in a single department are considered desirable in a well-balanced program.

Duplication of Course Content

With few exceptions, a Dietrich School course may be taken for credit only once, unless the student did not pass the course and the student takes the course again for a passing grade. Students may not earn graduation credit for courses that substantially duplicate the content of courses taken previously. For example, credit cannot be earned for the following:

- Both a regular version of a course and an honors version of that course.
- Courses that are cross listed with a course the student has already taken.
- Courses taken under a new number if already taken under an old number.
- Certain specific courses that duplicate material and for which additional credit cannot be earned. For example MATH 0120 and MATH 0220 or STAT 0200 or STAT 1000 .

Students with questions about this policy should meet with their academic advisors.

English Language Institute Courses

The following courses from the English Language Institute do not count toward a Dietrich School degree: 0004, 0005, and 0006. LING 0007, LING 0008 , and LING 0009 courses count toward the degree but are not counted toward a linguistics major.

Enrollment in Graduate Courses

Dietrich School students who demonstrate exemplary competencies and proficiencies may take advantage of the rich variety of graduate courses offered by the Dietrich School. Credits earned in graduate courses may count toward the degree. Students should consult with both their academic advisor and instructor of a course before registering.

Independent Study, Directed Research, Directed Reading, Internships, and Undergraduate Teaching

Dietrich School students may earn up to 24 credits of independent study, directed reading, directed research, undergraduate teaching, and internships as part of the 120 credits required for a degree. Ordinarily, no more than six credits may be earned in any term in a single directed reading, directed research, or internship. Under certain conditions, students in good standing may register for a block of 15 credits of independent study. These credits are to be earned for work done within one academic term. A student may register for a 15-credit independent study term only once during his or her college career. This needs to be approved by a dean prior to registration.

Learning Agreement forms for independent study, directed research, directed reading, and internships, as well as specific information about eligibility, procedures, and guidelines, are available from academic advisors and from the Office of Undergraduate Research, Scholarship, and Creative Activity in 209 Thackeray Hall.

Paid (non-academic) internships may not count towards academic credit.

International Baccalaureate

The Dietrich School recognizes the International Baccalaureate (IB) Higher-Level Examinations and may grant advanced standing and/or credit for various fields for scores on the Higher-Level Examinations, which range from five to seven. Advanced standing is determined individually by subject according to departmental policy. Students should send the results of their IB examinations directly to the Student Records Office in 140 Thackeray Hall. No credit will be given for Subsidiary-Level Examinations.

Lower-Level Courses

Credit cannot be earned for courses taken after more advanced course work in the same field has been successfully passed with a C or higher if that advanced course work presumes the competence acquired in the more elementary courses. For example, credit cannot be earned for an algebra course taken after the successful completion of a calculus course.

Non-Dietrich School Courses

A student may take no more than 18 credits of the 120 required for graduation in other University of Pittsburgh schools, such as the College of General Studies. This rule does not apply to graduate courses offered in the Dietrich School of Arts and Sciences. Restrictions on non-Dietrich School courses apply also to courses taken by cross registration. The student who has doubts about the status of any course should check with their academic advisor before registering.

Normal Credit Load

A normal credit load is 12 to 17 credits per academic term (e.g. fall and spring). Any program in excess of 18 credits per term requires the recommendation of your academic advisor and dean's approval; please call 412-624-6480 to make an appointment to appeal to a dean. Students who enroll for more than 18 credits in an academic term will be charged additional tuition per credit.

Physical Education

Students are not required to take any courses in physical education, but they may do so. Up to four credits of courses offered by the School of Education's Department of Health, Physical, and Recreation Education may be counted toward a Dietrich School degree.

Reserve Officer Training Corps (ROTC)

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC through cross registration at Carnegie Mellon University [CMU]) are not accepted toward a Dietrich School degree. The Dietrich School will grant up to four credits toward graduation for the following military science courses in lieu of physical education and recreation courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0012, MILS 0022, 0032, and 0042. Any four credits of Navy ROTC courses from CMU will count in lieu of physical education and recreation courses.

Special Note about Transfer Students/Transfer Credits

Previous course work for transfer students is evaluated by the Dietrich School Student Records Office with respect to general education requirements. Before initial registration, transfer students receive an Undergraduate Degree Requirement Evaluation indicating which requirements they have satisfied and which ones must be completed in order to complete their degree in the Dietrich School. Transfer students may be required to complete one or more placement tests to determine if certain requirements have been met.

Courses from other colleges and universities are evaluated according to the following guidelines:

- Courses must be passed with a grade of C or better and must be earned at an institution accredited by the appropriate regional accrediting association. Courses that have reasonable counterparts in the Dietrich School curriculum are eligible for transfer. Non-Dietrich School credit is granted when there is no comparable course in the Dietrich School, but there is an equivalent course in another undergraduate school at the University of Pittsburgh. Only 18 non-Dietrich School credits will count toward a Dietrich School degree. When requested, students are responsible for supplying descriptions for courses taken elsewhere.
- A maximum of 60 credits can be accepted from accredited community colleges and two-year junior colleges. A maximum of 90 credits can be accepted from accredited four-year institutions. At least 50 percent of the credits required in a Dietrich School major must be earned while enrolled in the Dietrich School.
- The number of credits granted for a given course cannot exceed the number awarded for the course on the transcript of the school where the course was taken or the number earned for the corresponding course in the Dietrich School. Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits).
- The Dietrich School accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation, but will not be calculated into the student's GPA at the University of Pittsburgh.

Please contact the Dietrich School Student Records Office at 412-624-6776 for information about transfer credit evaluation. Please note: All transfer credits are subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Statute of Limitations

All of the credits required for a degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, this limitation may be waived. In such cases, the waiver is for a specific period during which the program must be completed.

PittOnline (formerly External Studies Program)

Dietrich School students may take a maximum of two PittOnline courses toward their degree. For more information about PittOnline courses, contact the College of General Studies (www.cgs.pitt.edu).

Adding and Dropping Courses

Generally, students enrolled in the Dietrich School are not required to have their academic advisor sign their add/drop forms. However, Student Support Services (SSS) students and student athletes must see their academic advisor before processing an add/drop. Additionally, all freshmen are strongly urged to consult their academic advisor before adding or dropping a course. See Adding and Dropping Courses for more information.

Withdrawal from Courses

Freshmen are required to see their academic advisor before withdrawing from any course. In addition, any student considering withdrawing from a basic skills course must first see an assistant dean. Withdrawing from a course or courses may impact s student's financial aid status. Please call 412-624-6480 to make an appointment to see an assistant dean. Withdrawal from a course should be done by the withdrawal deadline, posted in the Dietrich School calendar (www.asundergrad.pitt.edu/calendars html) and on the Web site for the Office of the University Registrar (www.registrar.pitt.edu).

Dietrich School Advising

Academic advising in the Dietrich School is divided roughly into two halves: the freshman/sophomore years and the junior/senior years. All freshmen and sophomores, including new transfer students, are assigned to an advisor in the Advising Center, 201 Thackeray Hall. Students in the Student Support Services program receive additional advisement in the Academic Resource Center. (See Academic Resource Center section for contact information.) All advisors have been specifically trained to work with beginning college students. They are familiar with and ready to discuss all Dietrich School requirements, regulations, procedures, and academic majors and programs, as well as University-wide sources of support and assistance. In addition to answering questions and discussing academic plans, options, opportunities, course selection, and academic-related problems/issues (e.g., whether or not to add, drop, or withdraw from a course), advisors must sign students' registration forms before they can be processed.

Dietrich School students who have not declared a major (generally speaking, freshmen and sophomores) must see an academic advisor at least twice each term by appointment: once to review their progress, to discuss their academic plans and concerns, and to begin thinking about the next term; and a second time to actually select and register for their next term's courses. The first of these two meetings is scheduled at group sessions held the third week of September and January. Each student is responsible for arranging meetings with his or her advisor each term. Dietrich School students traditionally declare their majors near the end of their sophomore year and are then assigned to an advisor in the department of their major. Departmental advisors have the necessary information and in-depth knowledge to advise students in the intricacies of their major and their post-graduation plans.

Bachelor Degree Program Goals

The goal of the Dietrich School is to provide liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence and that gives students the knowledge, understanding, analytical tools, and communication skills that they need to become reflective citizens within a diverse and rapidly changing world.

The Dietrich School faculty believe that these educational goals for the students are best achieved through a process that involves two elements-the General Education Requirements offer an introduction to the broad range of subject matters and modes of thought and analysis found across the humanities, social sciences, and natural sciences, and this broad introduction is then complemented by in-depth studies in one or more major fields of disciplinary or interdisciplinary study, selected from amongst the programs of study devised, offered, and supervised by one of our department or interdisciplinary programs.

The General Education Curriculum is designed to allow students to pursue their own interests at the same time that they are introduced to contemporary and diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. It is also designed to ensure that as many of the General Education courses as feasible are truly courses within the disciplines (or at intellectually rich interdisciplinary interfaces) that draw on the unique resources of a research university. Courses taken in the first few years at the University also, however, have an important role in the development of skills needed for work in the major or for post-baccalaureate life, work, and study, and the curriculum begins with requirements that are primarily designed to ensure that each student acquires such skills.

Bachelor Degree Requirements

The following sections describe the general requirements for all majors offered by the Dietrich School:

Graduation Requirements

To graduate from the Dietrich School, students must earn at least 120 degree credits with a minimum 2.00 GPA. In addition, students must achieve a 2.00 GPA both in the major and in the minor or related area. Within the 120 credits, students must fulfill the Dietrich School's curriculum requirements which are of three types: skills, general education, and requirements for a major and minor or related area (see Skills Requirements, General Education Requirements, and Requirements for Major sections below). Furthermore, students must earn at least half of the credits for their major(s), minor(s), and certificates(s) and the final 30 credits toward the Dietrich School degree while enrolled as a Dietrich School student.

Graduation Application

Students must file an application for graduation in the Students Records office, 140 Thackeray Hall, by a specified deadline prior to the term during which they expect to complete all requirements (i.e., a student who expects to graduate at the end of the spring term must apply before the end of the immediately preceding fall term; see the Dietrich School undergraduate calendar (www.asundergrad.pitt.edu/calendars) each term for application deadline dates). This permits student records to make a complete appraisal of the student's record before the student begins the work of the final term. Any deficiency discovered during the evaluation will be communicated to the student in writing, and should be promptly corrected either in conference with the major advisor at registration or during the add/drop period in the final term. The caps, gowns, and hoods for use in commencement exercises are purchased through the University of Pittsburgh Book Center.

Candidates for graduation are expected to appear in person at commencement exercises to receive their degrees; however, diplomas may be mailed.

Skills Requirements

Skills requirements help ensure that all students attain appropriate levels of competence in writing, algebra, and quantitative and formal reasoning. Skills requirements must be completed within the first year of enrollment. Students are placed in or exempted from skills requirements based on certain achievement test scores, University of Pittsburgh Placement Test scores, or course work completed at other colleges and universities. Skills requirements are outlined below:

Composition Requirement

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCMP 0201 or ENGCMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English language proficiency.

Students must pass foundational composition courses with a grade of C- or better to fulfill the requirement, and students must complete the requirement by the end of their first two terms of full-time enrollment.

Writing-Designated Courses (W Courses)

After completion of a Seminar in Composition course, each student must complete two courses that are designated as writing intensive (W-courses) or one W-course and a second English composition course. W-courses are designed to promote writing within a discipline through the use of writing assignments spread over the course of a term. If this is done through a term paper the student will be required to produce a draft for discussion and revision no later than a month before the end of the course; all W-courses require a minimum of 20-24 pages of written work that has been through at least one cycle of revision. Each student must satisfy one element of those requirements within his or her major field of study.

Algebra

The mathematical proficiency of all incoming students will be assessed. Students who need additional mathematical preparation will be required to complete the preparation by the end of the first two terms of full-time enrollment. Preparation includes, but is not limited to earning a grade of C- or better in a course in algebra. Students will be exempt from the mathematics proficiency test if:

- they have achieved a satisfactory grade on the Advanced Placement examination in calculus in high school;
- they have earned a C- or better in calculus through College in High School;
- they have completed an approved equivalent of Algebra or another approved course; or
- they have scored 600 or better on the Math SAT.

Quantitative and Formal Reasoning

Mathematics is well described as the queen of sciences, providing the universal language of measurement, quantitative analysis and quantitative reasoning, and providing that predictive power that is the base of our science and our technology. All students are required to take and pass with a grade of C- or better at least one course in university mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic in a department of the Dietrich School.

A student who has demonstrated proficiency in mathematics adequate for placement in an upper-level course in mathematics is exempt from this requirement.

Placement Tests

Placement tests are used primarily to determine skills requirements and to ensure that students are placed in appropriate courses. The tests are administered on campus during PittStart, and some are administered at various off-campus locations prior to orientation. Since most of the tests determine the number of skills courses students will need to take, students should review and prepare as much as possible. A sample placement exam in algebra is available at www.asundergrad.pitt.edu/advising/placement-exams.html.

Following are brief descriptions of Dietrich School of Arts and Sciences placement tests taken by students:

Algebra Placement Exam

Students who have a 600 mathematical reasoning score on the SAT I are exempt from this exam. This exam is designed to determine whether students have acquired the algebraic skills considered by the Department of Mathematics to be sufficient preparation for college-level quantitative courses. Students are strongly urged to review for this exam by reviewing algebra textbooks. These exams takes about 90 minutes to complete.

Trigonometry Placement Exam

The Department of Mathematics requires a specific trigonometry score for placement into calculus and other courses requiring trigonometric functions. This exam takes about 25 minutes to complete.

Second language Placement Exam(s)

Second language placement exams are used to decide placement into second language courses for those students who have not satisfied the second language requirement while in high school or those who plan to continue study of a second language in their first term of enrollment in the Dietrich School. The language departments encourage students to prepare for the exams by reviewing first- and second-year second language texts. These exams take about 60 minutes to complete.

Music Theory Exam

Students considering a major or minor in music should take this test. A sufficient score will exempt them from the required Preparation for Music Theory class. This exam takes about 60 minutes to complete.

General Education Requirements

All students graduating from the Dietrich School must satisfy 14 general education requirements covering prominent areas in the liberal arts such as second language, literature, music, art, philosophy, social science, history, natural science, and foreign culture/international courses. In the process of satisfying these requirements, students select from a broad range of approved courses. Descriptions of the general education requirements are available in the Advising Center, 201 Thackeray Hall.

Requirements for the Major

Student preparing to graduate from the Dietrich School must fulfill particular requirements for an academic major of their choice. The Dietrich School offers over 55 majors in 31 departments. Some departments offer more than one major. Each department specifies the particular courses needed to fulfill its major(s). The requirements for each major are summarized below. Handouts are available in the Advising Center, 201 Thackeray Hall, and in the departments provide up-to-date and detailed information about each major.

Note: Transfer students receive an evaluation of their previous course work indicating the equivalent University of Pittsburgh courses for which advanced-standing credits have been awarded. Equivalent Dietrich School courses will meet requirements for the major where appropriate. Students who believe that a previous course not equivalent to a Dietrich School course should meet a requirement for a major may petition the department to review that course.

Related Area

Students must also earn at least 12 Dietrich School credits (with a minimum GPA of 2.00) in a related area specified by the department of their major. The major department may choose to approve these 12 credits in a single department, thematic cluster, geographic grouping, or some other combination. Completion of the requirements for a certificate program usually fulfills the Dietrich School requirements for a related area, at the discretion of the major department. The algebra and writing requirements may not be used as part of a related area. Students should check with their advisor for any approvals required to pursue a planned related area of study.

Minors

Dietrich School students may substitute an approved structured minor for the related area. Students must complete the minor with a 2.00 GPA and indicate the minor on the application for graduation. Students who complete an approved minor will have it listed on their transcript, provided that the minor is indicated on the application for graduation. Half of the credits earned for the minor must be earned at the University of Pittsburgh main campus.

For specific information about these minors, please contact the department offering the minor, the Advising Center in 201 Thackeray Hall, or check the individual minor listings in this bulletin.

Special Undergraduate Majors/Advanced Study Opportunities

In addition to the individual majors detailed under Major and Minor Descriptions by Department, Dietrich School students may choose to pursue a variety of academic programs leading to multiple majors, majors within more than one department, or majors that either prepare students for or offer advanced admission to graduate or professional programs at the University of Pittsburgh.

Double and Triple Majors

Students who meet the major requirements of two or three departments may declare, and have recorded on their transcript, a double or triple major, but they will earn only one degree. If one major leads to the BA degree and another to the BS degree, students must decide at graduation which degree they wish to receive. A maximum of six credits can overlap from one major to another.

Joint Departmental Majors

Several joint majors, constructed from the offerings of two departments, are available to qualified Dietrich School students. Current joint majors include:

- Politics and philosophy, leading to a BA degree;
- Mathematics and economics, leading to a BS degree;
- Mathematics and philosophy, leading to a BS degree; and
- Africana studies and English literature, leading to a BA degree.

For requirements, see Major and Minor Descriptions by Department.

Double Degrees

Dietrich School students may choose to simultaneously pursue more than one undergraduate degree, either within the Dietrich School (i.e., both a BA and a BS) or in another undergraduate school of the University. The Dietrich School also offers a joint degree program with the Swanson School of Engineering. In general, earning two degrees requires a minimum of 150 credits and completion of the curriculum requirements of both schools. Detailed information about these options is available in the Advising Center, 201 Thackeray Hall.

Combined Degree Options

Some students may qualify for a professional school option, in which students who have satisfied the following requirements may receive a bachelor's degree from the Dietrich School upon successful completion of the first year of graduate study:

- Completion of 90 or more credits in the Dietrich School,
- Satisfaction of all skills and general education requirements, and
- Acceptance to a graduate professional school at the University of Pittsburgh (such as the School of Dental Medicine).

Students going on to other graduate schools (such as the Graduate School of Public Health) who have earned 96 or more credits in the Dietrich School and have been accepted into a graduate program may receive a bachelor's degree upon completion of the specified amount of graduate study. Detailed information about these options is available in handouts in the Advising Center, 201 Thackeray Hall.

Dietrich School of Arts and Sciences/College of Business Administration Dual Major Program

Qualified students may apply for admission to a dual Dietrich School of Arts and Sciences/College of Business Administration major. This dual major permits students to pursue an undergraduate Dietrich School major and a business major simultaneously. Students may apply to the program after their first year at the University of Pittsburgh. Specific information about requirements and applications are available in the Advising Center (201 Thackeray Hall) and the College of Business Administration (2100 Sennott Square). See your academic advisor for more information.

Preparation for Professional Programs of Study

Students interested in spending their junior and senior years in the University of Pittsburgh's professional Schools of Social Work, Health and Rehabilitation Sciences, Information Sciences, or Pharmacy normally spend two years in the Dietrich School taking necessary prerequisite courses and electives in preparation for professional study. Although freshmen are accepted directly into the Schools of Engineering, Nursing, and the College of Business Administration (CBA), it is possible for students who begin in the Dietrich School to transfer into those schools after one or two years. Detailed information is available in handouts in the Advising Center, 201 Thackeray Hall.

Preparation for Graduate Professional Studies

Although the Dietrich School does not offer specific majors in prelaw, premedical, predental, or education, it is possible for students in the Dietrich School to complete all the necessary prerequisites for entry into these graduate professional schools while fulfilling their Dietrich School degree requirements. Details are available in handouts in the Advising Center, 201 Thackeray Hall.

Accelerated Law Admissions Program (ALAP)

The Accelerated Law Admissions Program (ALAP), open to any student enrolled in the Dietrich School grants admission to the University of Pittsburgh's School of Law to those students who meet the ALAP's requirements. Students who enter the program complete their undergraduate major in three years, applying for admission to the School of Law during their junior year, and then go on to law school for another three years.

Students interested in the program are encouraged to declare a major early at the end of the first year in order to allow them to complete their undergraduate Dietrich School major(s) by the end of their third year. Also, interested students are encouraged to take summer classes during their second year in order to reduce the credits to be completed in their third year. The requirements for the ALAP are as follows:

- Students must complete 102 credits by the end of their junior year.
- Students must take three writing-designated courses (rather than two) beyond the freshman writing requirement.
- The Dietrich School requirement of 12 credits in a related area is waived for students in the ALAP.
- Students must take the Law School Admissions Test (LSAT) by the fall of their junior year. This would include the June, October, or December test.

Acceptance into the program is competitive, and only those students with above-average grades and competitive LSAT scores should apply.

Five-Year Programs

- BS in statistics and an MA or MS in applied statistics: This program is intended to give outstanding students interested in statistics the opportunity to progress quickly toward their educational objectives. Contact the Department of Statistics for details.
- BS in computer science and an MS in computer science: Exceptional students can earn an MS in computer science in five years and also can participate in a variety of experiential educational activities. Contact the Department of Computer Science for details.

Special Academic Opportunities/Programs

The following special programs are available to Dietrich School students:

Academic Resource Center

The Academic Resource Center (ARC) seeks to increase the admission, retention, and graduation of undergraduate students in the Dietrich School by providing counseling, academic advising, University orientation course, study skills, tutoring, peer mentoring, and monitoring of student performance. The ARC offers the following services:

- Tutoring is available for introductory calculus and statistics courses through both individual and group programs.
- The ARC offers Study Skills Workshops, Individualized Study Skills, and various Study Skills Mini-Workshops for students who want to develop more efficient and effective ways of studying. Topics include suggestions for improving textbook reading, lecture note taking, memory, time management, and test-taking skills.
- Student Support Services (SSS) provides a holistic approach to student development and academic achievement. SSS counselors assist students with financial aid and registration procedures and academic and career planning. SSS offers tutoring by faculty and upper class students in mathematics and science, and 1-credit courses to help students maximize their learning potential. SSS is funded by the U.S. Department of Education.

For more information on the Academic Resource Center, please call 412-648-7920 or visit http://www.asundergrad.pitt.edu/offices/arc/index.html.

In addition to the services offered by the ARC, the departments of English and Mathematics host resource centers - the Writing Center and the Math Assistance Center (MAC), both located in the O'Hara Student Center. For more information, visit their Web sites at: www.composition.pitt.edu/writingcenter/index. html and www.mathematics.pitt.edu/resources/mac-center.php

Office of Freshman Programs

Introduction to the Arts and Sciences (FP 0001)

This one-credit course provides incoming freshmen in the Dietrich School of Arts and Sciences an extended orientation to academic life and its relation to life goals by exploring the nature and value of a liberal arts and sciences education. The small class size enables the students, instructor, and undergraduate teaching assistant to discuss many of the issues that will have an impact on a successful college experience, such as negotiating the transition from high school to college, learning and study skills, academic integrity, computer-system use and library orientation, and educational and career goals. Students often participate as a class in University and citywide cultural events, which gives students the opportunity to socialize beyond the classroom in a way that is valuable to their overall academic experience. For more information about Freshman Programs, visit http://www.asundergrad.pitt.edu/offices/freshman-programs/index.html.

Office of Undergraduate Research, Scholarship, and Creative Activity

The Dietrich School of Arts and Sciences Office of Undergraduate Research, Scholarship, and Creative Activity is a clearinghouse for students interested in earning academic credit for undergraduate research. While classroom and academic components are necessities to earning a college degree, experiential learning helps students to apply what they have been learning in school to real-world situations. By diversifying their education through experiential learning, students maximize their opportunities for the future. For further information, please contact the Office of Undergraduate Research in 209 Thackeray Hall or at http://www.asundergrad.pitt.edu/offices/experientiallearning/index.html.

Study Abroad

Dietrich School students are encouraged to add an international dimension to their undergraduate education through study abroad. Credit may be earned toward the Dietrich School degree through participation in one of several University of Pittsburgh programs or consortia-sponsored programs including Konan Year in Japan, the Denmark International Studies Program, and studies at the Universidad de las Americas in Puebla, Mexico, or the Universities of Sheffield and Sussex in England, to name a few. Students may study in virtually any part of the world in these programs or others sponsored by most American or international institutions.

Before study abroad is undertaken, approval for credit must be obtained. The study abroad advisor provides program approval, and the advisor in the department in which credit is sought and the Dietrich School Advising Center must approve the course selections and credits. Students should have at least a 2.75 GPA before seeking permission from the Dietrich School Advising Center to study abroad. In most cases, registration must be completed in the Dietrich School Advising Center, 201 Thackeray Hall. Call the Study Abroad Office in Room 802 William Pitt Union at 412-648-7413 or see www.abroad.pitt.edu for more information.

Dietrich School Certificate Programs

Certificates are earned in addition to a major and may be used to satisfy the related area requirement, depending upon the major department chosen. Certificates typically require 18-24 credits. See below for summary information about certificate programs available to students through A&S. Other undergraduate certificate programs are available through the Swanson School of Engineering and the University Center for International Studies (UCIS); Dietrich School students are encouraged to consider those certificates, too. Detailed descriptions of these programs are available in handouts in the Dietrich School Advising Center, 201 Thackeray Hall.

- American Sign Language Certificate
- Arabic Language and Linguistics Certificate
- Children's Literature Certificate
- Conceptual Foundations of Medicine Certificate
- Certificate in Gender, Sexuality, and Women's Studies
- Geographic Information Systems (GIS) Certificate
- German Language Certificate
    - German Language Certificate - German for Liberal Arts Track
    - German Language Certificate - German for Professional Purposes Track
- Jewish Studies Certificate
- Life Sciences Research Certificate
- Medieval and Renaissance Studies Certificate

- Undergraduate Certificate in Nanoscience and Engineering (joint with the Swanson School of Engineering)
- Photonics Certificate
- Public and Professional Writing Certificate
- Undergraduate Certificate in Sustainability

Honors and Awards

Numerous scholarships, prizes, and awards are given annually to Dietrich School students for outstanding academic performance. For more information about an honor or award, contact the office, department, or program listed in parentheses following the honor or award title.

- A.J. Schneider Award (Studio Arts)
- A.J. Schneider Memorial Study Abroad Scholarship (History)
- Alfred d'Auberge Scholarship (Music)
- Abraham Pais Award (English)
- ACS Award (Chemistry)
- Alfred Moye Information Technology Initiative Summer Research Experience (Computer Science)
- Alison Bentley Kephart Memorial Fund in the Biological Sciences (Biological Sciences)
- Alliance Française Scholarship Fund (French and Italian Languages and Literatures)
- American Institute of Chemists Award (Chemistry)
- Anthony and Concetta Ambrosio Internship Award (Office of Undergraduate Research)
- Asher Isaacs Memorial Prize (Economics)
- Barry M. Goldwater Scholarship (University Honors College)
- Bernard J. Wein Fund for Undergraduate Research (Office of Undergraduate Research)
- Betty Blockstein Levine Memorial Award (Studio Arts)
- Carol Kay Award (English)
- Chancellor's Undergraduate Merit Scholarships (University Honors College)
- Children's Literature Program Undergraduate Paper Prize (Children's Literature)
- Chinese Language Study Abroad Scholarships (East Asian Languages and Literatures)
- Christine J. Toretti Endowed Fund for Undergraduate Research (Office of Undergraduate Research)
- Composition Program Writing Contest (English)
- Dante Alighieri Society Scholarship Fund (French and Italian Languages and Literatures)
- David Schenker Student Prize(Economics)
- Department of Studio Arts Achievement Award (Studio Arts)
- Dietrich School of Arts and Sciences Undergraduate Research Fund (US Steel) (Office of Undergraduate Research)
- East Asian Languages and Literatures Merit Awards (East Asian Languages and Literatures)
- Esther and Tobias Dunkleberger Scholarship (Chemistry)
- Edwin O. Ochester Undergraduate Poetry Award (English)
- Ella P. Stewart Award (Biological Sciences)
- Emil Sanielevici Undergraduate Research Scholarship (Physics and Astronomy)
- Environmental Studies Field Experience/Study Abroad Scholarship (Geology and Planetary Science)
- Excellence in Research Award (Neuroscience)
- Fil Hearn Award for Study Abroad (History of Art and Architecture)
- Film Studies Undergraduate Writing Award (Film Studies)
- French and Italian Student Scholarship Fund (French and Italian Languages and Literatures)
- Freshman Chemistry Achievement Award (Chemistry)
- Friends of the Frick Fine Arts Undergraduate Writing Award (History of Art and Architecture)
- Halliday Award for Excellence in Undergraduate Research (Physics and Astronomy)
- Maria S. and Herbert G. Constant Fund (French and Italian Languages and Literatures)
- Ira A. Messer Award (Chemistry)
- JK and Gertrude Miller Award (English)
- James E. Bradler Award for Excellence in Undergraduate Research (Neuroscience)

- James Snead Memorial Essay Award (English)
- James V. Harrison Fund (Office of Undergraduate Research)
- Jennifer and Eric Spiegel Book Award (Communication)
- Jerome C. Wells Award (Economics)
- John F. Haskins Award (History of Art and Architecture)
- Dr. John Knox Hall, Jr. Scholarship ((Psychology)
- Julie Thompson Award for Excellence in Undergraduate Writing (Physics and Astronomy)
- Koloc Award (English)
- Larson O'Brien Prize for Excellence in Professional Writing (English)
- Leonard Baxt Fund (Office of Undergraduate Research)
- Leonard S. and Mildred E. Gerlowski Student Award in the Department of Music (Music)
- Lilly Summer Research Fellowship (Chemistry)
- Lore B. Foltin Memorial Prize (Germanic Languages and Literatures)
- M.M. Culver Memorial Fund (Mathematics)
- Marlee and James Myer Award (English)
- Martin Richard and Susan Baer Gluck Award (Music or Studio Arts)
- Mary Louise Theodore Prize (Chemistry)
- Mary M. Masco Memorial Fund (Dietrich School Undergraduate Studies)
- Mellon Jazz Scholarship (Music)
- Merck Award (Chemistry)
- Michael and Susan Ford Scholarship Award (Economics)
- Montgomery Culver Prize for Fiction (English)
- Nationality Room Scholarships (Nationality Rooms)
- Norman K. Flint Memorial Field Geology Scholarship (Geology and Planetary Science)
- Dr. Norman H. Horowitz Award (Biological Sciences)
- Oberbeck Scholarship for Student Research (Dietrich School Undergraduate Studies)
- Oratory Competition Awards (Communication)
- Ossip Writing Awards (English)
- Outstanding Freshman Scholar Award (Biological Sciences)
- Outstanding Undergraduate Student Award (Computer Science)
- Peter F. M. Koehler Sophomore/Junior Level Academic Achievement Award (Physics and Astronomy)
- Peter F. M. Koehler Junior/Senior Level Academic Achievement Award (Physics and Astronomy)
- Phillips Medal (Chemistry)
- Prize for Excellence in Writing for the Public Interest (English)
- Richard F. Zarilla Award (Chemistry)
- Richard T. Hartman Fund (Biological Sciences)
- Rita R and David A Rossi Scholarship (Chemistry)
- Robert W. Avery Award for Undergraduate Excellence in Sociology (Sociology)
- Ruth L. M. Kuschmierz "Pitt in Germany" Scholarship Fund (German)
- SACP College Award (Chemistry)
- Samuel B. Frazier Undergraduate Book Scholarship (Geology and Planetary Science)
- Samuel D. Colella Award (Biological Sciences)
- Silverman Award (Chemistry)
- Taube Award for Fiction (English)
- Teplitz Memorial Scholarship (Chemistry)
- Theodora C. Diamantopulos Endowed Fund for Student Resources (Dietrich School Undergraduate Studies)
- Thomas-Lain Scholarship (Physics and Astronomy)
- Tung-Li and Hui Hsi Yuan Prize in Arts and Sciences (Dietrich School Undergraduate Studies)
- Turow-Kinder Award for Fiction (English)
- Undergraduate Award in Analytical Chemistry (Chemistry)
- Undergraduate Film Studies Writing Award (Film Studies)

- University Scholarships (Admissions and Financial Aid)
- Valspar Award (Chemistry)
- Women's Studies Paper Prize (Women's Studies)
- Women's Studies Student Research Fund (Women's Studies)

Dietrich School Faculty

Dietrich School of Arts and Sciences Faculty

Declaring a Major

All students are required to complete a major or other upper-class option in addition to the skills and general education requirements. Students declare their major by filling out an Undergraduate Academic Program Change form available in the Dietrich School Advising Center, 201 Thackeray Hall. Students normally declare their major during their fourth term of full-time study.

Program and Course Offerings

Department of Africana Studies

Africana studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. The term Africana incorporates the three-tier interdisciplinary thrust of the department: African, African American, and Caribbean social sciences and humanities.

Africana studies prepares social science majors for advanced graduate studies in international affairs, education, social work, social policy studies, and legal and professional training. In the humanities, preparation in the creative arts and literature gears students to practical development in such fields as communication, teaching, theater, and dance. Africana studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana studies offers intellectual paradigms for the multicultural approach to historical, political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana studies is committed to producing liberally educated women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site at www.africanastudies.pitt.edu.

Major

Africana Studies, BA

Africana Studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana Studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana Studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. Africana Studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana Studies offers intellectual paradigms for the multicultural approach to historical,

political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana Studies is committed to producing liberally educated women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site at www.africanastudies.pitt.edu.

Major Requirements

Students are urged to meet with the departmental advisor no later than the beginning of the junior year to confirm a plan of study. The Africana studies major requires:

A total of 30 credits with a focused area of study in either humanities or social science. A 2.0 grade point average in all Africana Studies courses is required for graduation. The department does not permit courses for the major to be taken on an S/NC basis.

All majors, regardless of concentration, are required to take the following three core courses.

- AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
- AFRCNA 1768 - AFRCNA SENIOR RESEARCH SEMINAR
- AFRCNA 1900 - INTERNSHIP

Humanities Concentration

Seven courses as follows; see the lists below for specific courses.

- Two lower level AFRCNA humanities courses
- Three upper level AFRCNA humanities courses
- One lower level AFRCNA social science course
- One upper level AFRCNA social science course

Social Sciences Concentration

Seven courses as follows; see the lists below for specific courses.

- Two lower level AFRCNA social science courses
- Three upper level AFRCNA social science courses
- One lower level AFRCNA humanities course
- One upper level AFRCNA humanities course

Lower-level courses

Humanities courses

- AFRCNA 0150 - AFRICAN AMERICAN LITERATURE
- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0316 - INTRO AFRICAN AMERICAN THEATER
- AFRCNA 0352 - AFRICAN AMERICAN DANCE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 0517 - INTRO TO AFRCN AMERICAN POETRY
- AFRCNA 0522 - INTRODUCTION AFRCN LITERATURE
- AFRCNA 0523 - SWAHILI 1
- AFRCNA 0524 - SWAHILI 2

- AFRCNA 0543 - CONTEM AFRCN AMERICAN DRAMA 1
- AFRCNA 0639 - HISTORY OF JAZZ
- AFRCNA 0788 - CONTEMPORARY AFRICANA FILMS

Social Science courses

- AFRCNA 0120 - AFRICAN AMER EXPERIENCE SPORTS
- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 0311 - INTRO TO AFRCN AMERICAN FAMILY
- AFRCNA 0313 - THE BLACK CHURCH
- AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800
- AFRCNA 0385 - CARIBBEAN HISTORY
- AFRCNA 0434 - PSYCHLGCL EXPRN AFRN AMER FEML
- AFRCNA 0515 - AFRICAN AMERICAN POLITICS
- AFRCNA 0535 - ANTEBELLUM BLCK WOMEN'S HISTRY
- AFRCNA 0536 - 20THC AFRICAN AMER WOMAN HIST
- AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS
- AFRCNA 0628 - AFRO-LATIN AMERICA
- AFRCNA 0629 - AFRO-AMERICAN HISTORY 1
- AFRCNA 0630 - AFRO-AMERICAN HISTORY 2
- AFRCNA 0684 - RACE,CLSS,ETHNY:CARIB EXPRN
- AFRCNA 0787 - BLACK CONSCIOUSNESS

Upper-level courses

Humanities courses

- AFRCNA 1033 - AFRCN AMERICANS AND MASS MEDIA
- AFRCNA 1043 - CONTEM AFRCN AMERICAN DRAMA 2
- AFRCNA 1046 - AFRICAN POETRY
- AFRCNA 1103 - FEMALE PLAYWRIGHTS BEFORE 1959
- AFRCNA 1145 - AFRICAN AMERICAN RHETORIC
- AFRCNA 1150 - CONTEM AFRCN AMERICAN WRITING
- AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY
- AFRCNA 1306 - WORLD LITERATURE IN ENGLISH
- AFRCNA 1334 - MUSIC IN AFRICA
- AFRCNA 1335 - AFRICAN-AMERICAN MUSIC IN U.S.
- AFRCNA 1347 - FRANCOPHONE AFRCNA LITERATURE
- AFRCNA 1349 - CONTEM CARIBBEAN LITERATURE
- AFRCNA 1353 - COMPARATIVE DANCE EXPRESSION
- AFRCNA 1383 - CONCEPTS IN AFRCN AMER THEATER
- AFRCNA 1555 - AFRO CARIBBEAN DANCE
- AFRCNA 1605 - AUGUST WILSON DRAMAS
- AFRCNA 1616 - AFRICAN AMERICAN WOMEN WRITERS
- AFRCNA 1620 - AFRICAN AMERICAN LIT CRITICISM
- AFRCNA 1644 - THE AFRICAN NOVEL
- AFRCNA 1704 - AFRICANA WORLD LITERATURE

Social Science courses

- AFRCNA 1011 - THE RISE MOD PAN-AFRCN MOVEMNT
- AFRCNA 1012 - EARLY 20THC BLK SOCL MOVMNT
- AFRCNA 1021 - HISTORY OF THE AFRCN DIASPORA
- AFRCNA 1030 - AFRICAN POLITICS
- AFRCNA 1039 - HISTORY OF CARIBBEAN SLAVERY
- AFRCNA 1108 - AFRICAN AMERICAN FOLK CULTURE
- AFRCNA 1137 - 19TH CENTURY AFRICAN AMER HIST
- AFRCNA 1223 - PERSNL GROWTH THRGH PSYCHODRAM
- AFRCNA 1309 - WOMN OF AFRC & AFRCN DIASPORA
- AFRCNA 1310 - CULTURES OF AFRICA
- AFRCNA 1331 - AFRICAN LIBERATION MOVEMENTS
- AFRCNA 1402 - LRNG PARDGMS AFRC-AM CHLD DVLP
- AFRCNA 1522 - SEX AND RACISM
- AFRCNA 1538 - HISTORY OF BLACK PITTSBURGH
- AFRCNA 1656 - HISTORY OF AFRICA SINCE 1800
- AFRCNA 1661 - POLITICAL ECONOMY OF AFRICA
- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- AFRCNA 1711 - THE CITY IN AFRICA

Additional requirements

For the Dietrich School required related area outside the major, students might consider completing the related area in a single department as it may lead to the option of a double major.

Students must complete one of their required writing-intensive (W) course in the major.

Minor

Africana Studies Minor - African American Culture Option

Minor Requirements

Option 1:

- AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
- two lower-level courses from the subset
- and two upper-level courses from the subset

(15 Credits Total)

Lower level courses

- AFRCNA 0150 - AFRICAN AMERICAN LITERATURE
- AFRCNA 0311 - INTRO TO AFRCN AMERICAN FAMILY
- AFRCNA 0313 - THE BLACK CHURCH
- AFRCNA 0352 - AFRICAN AMERICAN DANCE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 0515 - AFRICAN AMERICAN POLITICS
- AFRCNA 0517 - INTRO TO AFRCN AMERICAN POETRY

- AFRCNA 0543 - CONTEM AFRCN AMERICAN DRAMA 1
- AFRCNA 0629 - AFRO-AMERICAN HISTORY 1
- AFRCNA 0639 - HISTORY OF JAZZ
- AFRCNA 0787 - BLACK CONSCIOUSNESS
- AFRCNA 0788 - CONTEMPORARY AFRICANA FILMS

Upper level courses

- AFRCNA 1011 - THE RISE MOD PAN-AFRCN MOVEMNT
- AFRCNA 1012 - EARLY 20THC BLK SOCL MOVMNT
- AFRCNA 1033 - AFRCN AMERICANS AND MASS MEDIA
- AFRCNA 1108 - AFRICAN AMERICAN FOLK CULTURE
- AFRCNA 1145 - AFRICAN AMERICAN RHETORIC
- AFRCNA 1335 - AFRICAN-AMERICAN MUSIC IN U.S.
- AFRCNA 1402 - LRNG PARDGMS AFRC-AM CHLD DVLP
- AFRCNA 1522 - SEX AND RACISM
- AFRCNA 1605 - AUGUST WILSON DRAMAS
- AFRCNA 1616 - AFRICAN AMERICAN WOMEN WRITERS
- AFRCNA 1704 - AFRICANA WORLD LITERATURE
- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES

Africana Studies Minor - African Culture Option

Minor Requirements

Option 2:

- AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
- two lower-level courses from the subset
- and two upper-level courses from the subset

(15 Credits Total)

Lower level courses

- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800
- AFRCNA 0522 - INTRODUCTION AFRCN LITERATURE
- AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS
- AFRCNA 0787 - BLACK CONSCIOUSNESS
- AFRCNA 0788 - CONTEMPORARY AFRICANA FILMS

Upper level courses

- AFRCNA 1011 - THE RISE MOD PAN-AFRCN MOVEMNT
- AFRCNA 1030 - AFRICAN POLITICS
- AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY

- AFRCNA 1309 - WOMN OF AFRC & AFRCN DIASPORA
- AFRCNA 1310 - CULTURES OF AFRICA
- AFRCNA 1331 - AFRICAN LIBERATION MOVEMENTS
- AFRCNA 1334 - MUSIC IN AFRICA
- AFRCNA 1347 - FRANCOPHONE AFRCNA LITERATURE
- AFRCNA 1644 - THE AFRICAN NOVEL
- AFRCNA 1655 - AFRICAN CINEMAS/SCREEN GRIOTS
- AFRCNA 1656 - HISTORY OF AFRICA SINCE 1800
- AFRCNA 1661 - POLITICAL ECONOMY OF AFRICA

Africana Studies Minor - Multidisciplinary Option

Minor Requirements

Option 3:

- AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
- one lower-level course from the humanities subset
- one lower-level course from the social sciences subset
- one upper-level course from the humanities subset
- and one upper-level course from the social sciences subset

(15 Credits Total)

Lower level courses

Humanities

- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0316 - INTRO AFRICAN AMERICAN THEATER
- AFRCNA 0352 - AFRICAN AMERICAN DANCE
- AFRCNA 0543 - CONTEM AFRCN AMERICAN DRAMA 1

Social Science

- AFRCNA 0120 - AFRICAN AMER EXPERIENCE SPORTS
- AFRCNA 0313 - THE BLACK CHURCH
- AFRCNA 0385 - CARIBBEAN HISTORY
- AFRCNA 0515 - AFRICAN AMERICAN POLITICS
- AFRCNA 0630 - AFRO-AMERICAN HISTORY 2
- AFRCNA 0684 - RACE,CLSS,ETHNY:CARIB EXPRN

Upper level courses

Humanities

- AFRCNA 1033 - AFRCN AMERICANS AND MASS MEDIA
- AFRCNA 1145 - AFRICAN AMERICAN RHETORIC

- AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY
- AFRCNA 1306 - WORLD LITERATURE IN ENGLISH
- AFRCNA 1347 - FRANCOPHONE AFRCNA LITERATURE
- AFRCNA 1349 - CONTEM CARIBBEAN LITERATURE
- AFRCNA 1353 - COMPARATIVE DANCE EXPRESSION
- AFRCNA 1555 - AFRO CARIBBEAN DANCE
- AFRCNA 1620 - AFRICAN AMERICAN LIT CRITICISM
- AFRCNA 1655 - AFRICAN CINEMAS/SCREEN GRIOTS

Social Science

- AFRCNA 1021 - HISTORY OF THE AFRCN DIASPORA
- AFRCNA 1039 - HISTORY OF CARIBBEAN SLAVERY
- AFRCNA 1538 - HISTORY OF BLACK PITTSBURGH
- AFRCNA 1656 - HISTORY OF AFRICA SINCE 1800
- AFRCNA 1711 - THE CITY IN AFRICA

Joint Major

Africana Studies - English, BA

The joint major offers an especially coherent experience in interdisciplinary learning by bringing together Africana Studies and English in two interrelated ways. Students get a rich and rigorous exposure to African and African Diaspora literature written in English through literature produced in the United States, Africa, Canada, Great Britain, and the Caribbean. Additionally, students examine some of the significant relationships between African and African Diaspora works and a range of English-language literary traditions.

The major is designed to expose students to important questions and traditions in literary interpretation and to offer them political, social, and cultural contexts for the literature they will be reading. Like most liberal arts majors, it helps students learn to think analytically and to make and assess arguments, skills that are important in many jobs and courses of graduate study. The major is also useful for prospective teachers who would be interested in developing and teaching curricula that include African Diaspora literature within other English-language traditions. Students who complete the joint major will have fulfilled most of the School of Education's undergraduate requirements for secondary education certification in English.

The Africana Studies-English joint major requires 45 credits distributed as follows: four core courses, four literature courses from the Department of Africana Studies, three literature courses from the Department of English, and four electives, one of which must be a history course in the Department of Africana Studies. No more than two upper-division courses can count toward the major before a student has completed the introductory courses, and three of the required courses in each department excluding the core courses must be taken before a student enrolls in a senior seminar.

Joint Major Requirements

Required Core Courses (12 credits)

- AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
- ENGLIT 0500 - INTRO TO CRITICAL READING
- ENGLIT 1900 - PROJECT SEMINAR

One of the following:

- AFRCNA 1068 - AFRICANA SENIOR RESEARCH SEMINAR
- ENGLIT 1909 - SENIOR SEMINAR

- ENGLIT 1910 - SENIOR SEMINAR

Africana Studies Courses (12 credits)

Students must take four of the following:

- AFRCNA 0016 - INTRODUCTION TO AFRICAN AMERICAN THEATER
- AFRCNA 0022 - INTRODUCTION TO AFRICAN LITERATURE
- AFRCNA 0050 - INTRODUCTION TO AFRICANA-AMERICAN LITERATURE
- AFRCNA 1004 - AFRICANA WORLD LITERATURE
- AFRCNA 1006 - WORLD LITERATURE IN ENGLISH
- AFRCNA 1020 - AFRICANA AMERICAN LITERARY CRITICISM
- AFRCNA 1044 - THE AFRICAN NOVEL
- AFRCNA 1049 - CONTEMPORARY CARIBBEAN LITERATURE

English Literature Courses (9 credits)

Students must take three of the following:

- ENGLIT 1125 - MASTRPCS OF RENAISSNC LIT
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1175 - 19TH CENTURY BRITSH LITERATURE
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1220 - CVL WAR TO WW1 IN AMER LIT
- ENGLIT 1325 - MODERNISM
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH

Elective Courses (12 credits)

- Students must take four electives, choosing from courses in the departments of Africana Studies and English. One of these electives must be a history course offered by the Department of Africana Studies. Students might also use electives to pursue more extensive work in particular areas of study, such as African, African American, British, Caribbean, or U.S. literature.
- Students interested in careers in education should pay particular attention to courses required by various School of Education certification programs.
- In light of the interdisciplinary and international character of the joint major, it would also be appropriate for students to petition to have a closely related course taught in a foreign language (for example, a course on Francophone-Caribbean literature in the Department of French and Italian Languages and Literatures) count as one of the electives toward the joint major.

Department of Anthropology

Anthropology is concerned with how humans and human societies evolve, with the differences and similarities among human cultures, and with the cultural and biological basis for human behavior. Anthropology integrates a wide range of perspectives on human behavior, culture, and society. Students become familiar with the basic concerns of four subgroups of anthropology:

- Archaeology offers courses covering many geographic regions (Latin America, North America, and China), techniques of analysis, and issues in prehistory. Museum collections, internships in cultural resource management, and a summer field school provide opportunities for student involvement in archaeological work.
- Physical anthropology offers classes on evolutionary theory; human genetics; osteoarchaeology; and human and nonhuman primate evolution, anatomy, morphology, and behavior.

- Cultural anthropology offers a wide variety of courses on cultural areas including the Pacific, Latin America, China, Japan, South Asia, Eastern Europe, and the United States. Classes provide cross-cultural studies of topics such as medical anthropology, food, social and political organization, gender roles, kinship, ethnicity and nationalism, folklore, religion, and conflict and violence.
- Anthropological linguistics offers courses on the nature of languages around the world, focusing on the relationship of language to other aspects of culture and society. Among the courses offered are Gypsy Language and Culture and Writing Systems of Ancient Mesoamerica.

For more information on the major and the Department of Anthropology, visit www.pitt.edu/~pittanth.

Major

Anthropology, BA

Major Requirements

The anthropology major requires the following:

A total of 30 credits including the following required core courses:

- ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
- ANTH 0680 - INTRO PHYSICAL ANTHROPOLOGY
- ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY

The core courses satisfy prerequisites for most upper-level courses

The core courses satisfy prerequisites for most upper-level courses and are generally taken during the freshman and sophomore years.

- ANTH 1750 or one of the other designated under-graduate seminars.
- An additional 18 credits in any anthropology courses will complete the major. A student may choose to concentrate in one of the four subgroups listed above. One of the courses must be a writing (W) course offered within the department. Linguistics and quantitative analysis courses, though not required for the major, are highly recommended.

Note:

The requirements of the program make it possible to pursue a double major in many disciplines such as biology, psychology, religious studies, history, and geology. Students who declare anthropology as a second major should consult with the anthropology advisor as soon as possible to ensure fulfillment of anthropology requirements.

A major in anthropology also combines well with a variety of area studies certificate programs as well as with certificates in women's studies, global studies, geographic information systems, and historic preservation.

Students with an overall GPA of 3.25 or above and a GPA in anthropology courses of 3.50 or above will be graduated from the department with honors, pending the submission and acceptance of a paper representing substantial student research. The honors paper may be an expanded version of a paper from a course or may result from independent research. The successful completion of a linguistics course is recommended.

Department of Biological Sciences

Biological Sciences

The biological sciences major is intended for the biology student who wishes to develop an individualized combination of courses at the advanced level. The student is free to plan a curriculum of great breadth or to choose an area of specialization not offered as a major by the department. Most of

the undergraduates in our department choose the biological sciences major. This major is suitable for those planning a career in which general familiarity with biological topics is desirable, such as jobs in scientific journalism, biological and pharmaceutical supply industries, biological or medical research, scientific libraries and museums, or in any industry where the products or by-products have potential biological impact. Completing the biological sciences major fulfills the basic science requirements for admission to medical, dental, and other health professional schools and to graduate biology programs.

Bioinformatics

Bioinformatics is the theory, application and development of computing tools to solve problems and create hypotheses in all areas of biological sciences. Biology in the post-genome world has been and continues to be transformed from a largely laboratory-based science to one that integrates experimental and information science. Bioinformatics has contributed to advances in biology by providing tools that handle datasets too large and/or complex for manual analysis. Examples of some of these tools include assembly of DNA sequences of entire genomes, gene finding algorithms, microarray expression analysis, molecular system modeling, and biomarker discovery from mass spectra. Computational tools are central to the organization, analysis, and harvesting of biological data at the level of macromolecules, cells, and systems. Consequently, there is a growing need for trained professionals who understand the languages of biology and computer science. Biologists trained in more traditional programs may not have a working knowledge of statistics and algorithms, whereas computer scientists trained in more traditional programs may not have a working knowledge of the chemistry and biology required in the field.

Ecology and Evolution

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones. The ecology and evolution major is a good choice for students interested in the fundamental questions of the evolutionary origins of organisms and how they survive, or don't survive, in their changing habitats. Within this major, students have the opportunity for in-depth study of the morphological and physiological adaptations of a variety of animals, plants, and microorganisms to a changing world; the ecological relationship of organisms from the individual to the global scale; and the mechanisms that drive evolutionary change.

Employment opportunities in the ecological sciences have increased greatly in recent years. There continues to be a demand for well-trained professionals at all levels (BS, MS, and PhD). Government environmental agencies, commercial consulting and testing firms, waste management industries, research laboratories, and natural history and science museums are just a few of the career opportunities. Graduate departments of ecology, evolution, environmental sciences, genetics, botany, public policy, and public health are actively seeking well-qualified students. The required chemistry, physics, and mathematics courses incorporate the requirements for admission to medical, dental, and other health professional schools. An ecology and evolution major could also serve as a springboard to a career in law.

Microbiology

Microbiology is the study of the biology of microscopic organisms: bacteria, viruses, algae, fungi, and protozoa. The methods used to study and manipulate these minute and mostly unicellular organisms differ from those used in most other biological investigations. Recombinant DNA technology uses microorganisms, particularly bacteria and viruses, to amplify DNA sequences and generate the encoded products. Moving genes from one microorganism to another permits application of microbial skills to solve medical and environmental problems. Many microorganisms are unique among living things in their ability to use gaseous nitrogen from the air or to degrade complex and resistant macromolecules in such materials as wood. By rearranging the genes that control these and other processes, scientists seek to engineer microorganisms that will process wastes, fertilize agricultural land, produce desirable biomolecules, and solve other problems inexpensively and safely.

Microbiologists pursue careers in many fields, including agricultural, environmental, food, and industrial microbiology; public health; resource management; basic research; education; and pharmaceuticals. Jobs in all these fields are available at the BS level as well as the MS and PhD levels. The microbiology major also incorporates the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in microbiology, molecular biology, biochemistry, and related disciplines.

Molecular Biology

Molecular biology emphasizes the study of molecules that make up an organism and the forces operating among these molecules. Increasingly, molecular biologists can also explore the genetic control of these molecules and thus define the developmental, cellular, and subcellular changes that occur during the dynamic processes of life. Virtually every question, whether in biochemistry, cell biology, developmental biology, or some other

biological discipline, applies molecular biology, often as the prime approach, in its solution. Biochemical and molecular developments have revolutionized biological research, fueling the explosive growth in the biotechnology industry and rapid increase of molecular medicine.

The molecular biology major, with its two tracks (biochemistry or cell and developmental biology) provides a strong background for many science careers. Both tracks incorporate the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in biochemistry, cell and molecular biology, and related disciplines. Positions for molecular biologists at the BS, MS, and PhD levels are available in the biotechnology industries as well as in universities, medical schools, hospitals, government laboratories, research institutes, and public health institutions.

For more information on the Department of Biological Sciences and the majors it offers, see www.biology.pitt.edu.

Major

Bioinformatics, BS

General Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including
- CHEM 0110 and CHEM 0120 General Chemistry 1 and 2, which includes the labs,
    - CHEM 0310, CHEM 0320, and CHEM 0345 Organic Chemistry 1 and 2 lecture and lab,
    - MATH 0220 Analytic Geometry and Calculus 1,
    - Either MATH 0230 Analytic Geometry and Calculus 2 or STAT 1000 Applied Statistical Methods, and
    - Either the algebra-based physics, PHYS 0110 and 0111 Introduction to Physics 1 and 2, or the calculus-based physics, PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2.
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The S/NC option (formerly the S/N option) may be used for only one biology course and for any of the co-requisite courses.
- The Dietrich School required related area is fulfilled by the co-requisite courses in chemistry. Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major
- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150, 0050, 0160, and 0060 Foundations of Biology 1 and 2 and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.pitt.edu/~biology.

Requirements

The undergraduate bioinformatics degree program at the University of Pittsburgh is operated jointly by the departments of biological sciences (www.biology.pitt.edu) and computer science (www.cs.pitt.edu). This program offers training that builds a solid foundation in chemistry, biology, computer science, mathematics, and statistics. The training will enable students to communicate fluently with experts across these disciplines and to have the skills necessary to apply computing tools to address contemporary problems in biology and medicine. It will enhance the professional opportunities for undergraduates to pursue careers in pure or applied research in academia, government, pharmaceutical, medical, or biotechnology sectors.

Advising for Bioinformatics majors is housed in both the Department of Biology and the Department of Computer Science. For information, contact one of the advisors.

Core courses (42 credits)

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS
- BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN
- CHEM 0310 - ORGANIC CHEMISTRY 1 *
- CHEM 0320 - ORGANIC CHEMISTRY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- CS 0401 - INTRMEDT PROGRMMING USING JAVA **
- CS 0445 - DATA STRUCTURES
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 1501 - ALGORITHM IMPLEMENTATION

Note:

* CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2 are pre-requisites to taking CHEM 0310.

** Students without a background in programming will be encouraged to take CS 0007 - INTRO TO COMPUTER PROGRAMMING prior to taking CS 0401.

Upper Level Courses (22 credits)

- BIOSC 1540 - COMPUTATIONAL BIOLOGY

- BIOSC 1640 - BIOINFORMATICS SOFTWARE DESIGN or
- CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

- BIOSC 1901 - INDEPENDENT STUDY (total of four credits)* or
- CS 1950 - DIRECTED RESEARCH (total of four credits)*

Electives (12 credits)

Electives (12 credits) to be chosen from an approved list of courses in Statistics, Chemistry, Biological Sciences and/or Computer Science. With the approval of the Bioinformatics Program Committee, the student may take electives in other departments.

Note:

* Undergraduate Research is taken over multiple terms for variable credit. Four credits of undergraduate research are required for the major. Research can begin as early as the sophomore year and must be approved by Kirk Pruhs in the Department of Computer Science, or Paula Grabowski in the Department of Biological Sciences.

Capstone experience

BIOSC 1640 and CS 1640 satisfy the bioinformatics major capstone experience requirement. Capstone request must be made to Kirk Pruhs in the Department of Computer Science.

Additional requirements and restrictions

- Bioinformatics majors who have completed CS 0401 may not enroll in CS 0004, CS 0007 or CS 0110
- BIOSC 1000 cannot be substituted for BIOSC 1810.
- CHEM 1810 can only be substituted for BIOSC 1810 if it is not possible for the student to schedule BIOSC 1810
- Students must complete at least one W-course in the major
- A grade of C or better is required in each of the core and upper level courses that are to count toward the major.
- This requirement also satisfies the Dietrich School requirement of a minimum GPA of 2.0 in major courses
- Elective courses for the major must be completed with a grade of C or better. If a C-or lower is earned in an elective course for the major and is not repeated, the course will be used to calculate the overall GPA but will not be counted toward the 32 credits required for the major.
- Students must earn a minimum GPA of 2.0 in the required chemistry and mathematics courses.
- No Bioinformatics major courses may be taken on an S/NC basis
- Due to its interdisciplinary nature, the Bioinformatics major does not require a related area

Honors major requirements

Honors in Bioinformatics is granted if, in addition to fulfilling all requirements for the major, the student:

- completes three semesters (3 x 2 credits) or the equivalent (summer counts as a semester equivalent) of undergraduate research together with a written honors thesis presented in the last semester of the senior year;
- maintains a GPA of 3.5 or above in all Bioinformatics major courses; and
- maintains an overall GPA of 3.25 or above.

Approved elective course list

Biological Sciences

- BIOSC 1500 - CELL BIOLOGY

Biological Sciences, BS

General Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including
- CHEM 0110 and CHEM 0120 General Chemistry 1 and 2, which includes the labs,
    - CHEM 0310, CHEM 0320, and CHEM 0345 Organic Chemistry 1 and 2 lecture and lab,
    - MATH 0220 Analytic Geometry and Calculus 1,
    - Either MATH 0230 Analytic Geometry and Calculus 2 or STAT 1000 Applied Statistical Methods, and
    - Either the algebra-based physics, PHYS 0110 and 0111 Introduction to Physics 1 and 2, or the calculus-based physics, PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2.
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The S/NC option (formerly the S/N option) may be used for only one biology course and for any of the co-requisite courses.
- The Dietrich School required related area is fulfilled by the co-requisite courses in chemistry. Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major

- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150, 0050, 0160, and 0060 Foundations of Biology 1 and 2 and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.pitt.edu/~biology.

Biology Course Requirements

Completion of the biological sciences major requires a total of 32 credits in biology, including

17 credits of required courses:

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2

- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS

- BIOSC 0370 - ECOLOGY or
- BIOSC 1130 - EVOLUTION

- BIOSC 1000 - BIOCHEMISTRY *

A minimum of 15 credits of upper-division courses

A minimum of 15 credits of upper-division courses, which must include two labs or one lab and one field course or one lab and BIOSC 1545 - THE MATHEMATICS OF BIOLOGY. Students may begin to take elective courses when they have completed the appropriate prerequisite courses; for example, some upper-division courses have only 0150 and 0160 as prerequisites whereas others have additional requirements. As part of these electives, students who declare a major in Biological Sciences on or after September 14, 2009 must complete one higher-level 3-credit BIOSC lecture class, defined as a course with prerequisites beyond BIOSC 0150 and BIOSC 0160.

Ecology and Evolution, BS

General Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including
- CHEM 0110 and CHEM 0120 General Chemistry 1 and 2, which includes the labs,
    - CHEM 0310, CHEM 0320, and CHEM 0345 Organic Chemistry 1 and 2 lecture and lab,
    - MATH 0220 Analytic Geometry and Calculus 1,
    - Either MATH 0230 Analytic Geometry and Calculus 2 or STAT 1000 Applied Statistical Methods, and
    - Either the algebra-based physics, PHYS 0110 and 0111 Introduction to Physics 1 and 2, or the calculus-based physics, PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2.
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The S/NC option (formerly the S/N option) may be used for only one biology course and for any of the co-requisite courses.
- The Dietrich School required related area is fulfilled by the co-requisite courses in chemistry. Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major
- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150, 0050, 0160, and 0060 Foundations of Biology 1 and 2 and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and

- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.pitt.edu/~biology.

Biologicaly Course Requirements

Completion of the ecology and evolution major requires a total of 32 credits in biology, including

26 credits of required courses:

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2

- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS

- BIOSC 0370 - ECOLOGY
- BIOSC 0390 - ECOLOGY LABORATORY
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1130 - EVOLUTION
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1550 - ECOLOGY AND EVOLUTION SEMINAR

- BIOSC 0391 - ECOLGY LABORATORY WRITING PRAC or
- BIOSC 1551 - ECOL & EVOLT SEMNR WRITNG PRAC

A 3-credit upper-division field course

A 3-credit upper-division field course offered during the summer at the Pymatuning Laboratory of Ecology (PLE) or an equivalent site pre-approved by the department.

An additional 3 credits of upper-division elective courses

Microbiology, BS

General Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including
- CHEM 0110 and CHEM 0120 General Chemistry 1 and 2, which includes the labs,
    - CHEM 0310, CHEM 0320, and CHEM 0345 Organic Chemistry 1 and 2 lecture and lab,
    - MATH 0220 Analytic Geometry and Calculus 1,
    - Either MATH 0230 Analytic Geometry and Calculus 2 or STAT 1000 Applied Statistical Methods, and
    - Either the algebra-based physics, PHYS 0110 and 0111 Introduction to Physics 1 and 2, or the calculus-based physics, PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2.
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The S/NC option (formerly the S/N option) may be used for only one biology course and for any of the co-requisite courses.
- The Dietrich School required related area is fulfilled by the co-requisite courses in chemistry. Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major
- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150, 0050, 0160, and 0060 Foundations of Biology 1 and 2 and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.pitt.edu/~biology.

Biologicaly Course Requirements

Completion of the microbiology major requires a total of 32 credits in biology, including

26 credits of required courses:

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2

- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS

- BIOSC 0370 - ECOLOGY or
- BIOSC 1130 - EVOLUTION

- BIOSC 1000 - BIOCHEMISTRY or
- BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN and
- BIOSC 1820 - METBLC PATHWAYS & REGULATION

- BIOSC 1570 - MICROBIOLOGY SEMINAR
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1860 - MICROBIOLOGY LABORATORY
- BIOSC 1865 - MICROBIAL PHYSIOLOGY

One of the following:

- BIOSC 1291 - EXPRML GENETC ENGRG WRTNG PRAC
- BIOSC 1571 - MICROBIOLGY SEMNR WRITING PRAC
- BIOSC 1741 - VIROLOGY LAB WRITING PRACTICUM
- BIOSC 1861 - MICROBIOLOGY LAB WRITING PRAC

In addition, seven BIOSC credits must be taken

In addition, seven BIOSC credits must be taken. If one of these courses is a field course, then only six credits are required. These are chosen from a selected list of microbiology electives, including at least one lab or field course. Students may begin to take elective courses when they have completed the appropriate prerequisite courses.

Molecular Biology - Biochemistry Track, BS

General Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including
- CHEM 0110 and CHEM 0120 General Chemistry 1 and 2, which includes the labs,
    - CHEM 0310, CHEM 0320, and CHEM 0345 Organic Chemistry 1 and 2 lecture and lab,
    - MATH 0220 Analytic Geometry and Calculus 1,
    - Either MATH 0230 Analytic Geometry and Calculus 2 or STAT 1000 Applied Statistical Methods, and
    - Either the algebra-based physics, PHYS 0110 and 0111 Introduction to Physics 1 and 2, or the calculus-based physics, PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2.
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The S/NC option (formerly the S/N option) may be used for only one biology course and for any of the co-requisite courses.

- The Dietrich School required related area is fulfilled by the co-requisite courses in chemistry. Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major
- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150, 0050, 0160, and 0060 Foundations of Biology 1 and 2 and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.pitt.edu/~biology.

Biologicaly Course Requirements

Completion of the molecular biology major requires a total of 32 credits in biology, including

20 credits of required courses:

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2

- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS

- BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN
- BIOSC 1820 - METBLC PATHWAYS & REGULATION

- BIOSC 1940 - MOLECULAR BIOLOGY

In addition, students select one upper-division elective

In addition, students select one upper-division elective (either BIOSC 0370 - ECOLOGY or any BIOSC course numbered above 1010) and complete the course work in one of the following two tracks:

Biochemistry Track

- BIOSC 1470 - BIOPHYSICAL CHEMISTRY or
- CHEM 1410 - PHYSICAL CHEMISTRY 1 and
- CHEM 1420 - PHYSICAL CHEMISTRY 2

- BIOSC 1580 - BIOCHEMISTRY SEMINAR
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1950 - MOLECULAR GENETICS LABORATORY

- BIOSC 1581 - BIOCHMSTRY SEMNR WRITING PRAC or
- BIOSC 1831 - BIOCHEMISTRY LAB WRITING PRAC or
- BIOSC 1951 - MOLEC GENETCS LAB WRITING PRAC (Biochemistry)

Molecular Biology - Cell and Developmental Biology Track, BS

General Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including
- CHEM 0110 and CHEM 0120 General Chemistry 1 and 2, which includes the labs,
    - CHEM 0310, CHEM 0320, and CHEM 0345 Organic Chemistry 1 and 2 lecture and lab,
    - MATH 0220 Analytic Geometry and Calculus 1,
    - Either MATH 0230 Analytic Geometry and Calculus 2 or STAT 1000 Applied Statistical Methods, and
    - Either the algebra-based physics, PHYS 0110 and 0111 Introduction to Physics 1 and 2, or the calculus-based physics, PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2.
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The S/NC option (formerly the S/N option) may be used for only one biology course and for any of the co-requisite courses.
- The Dietrich School required related area is fulfilled by the co-requisite courses in chemistry. Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major
- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- University Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150, 0050, 0160, and 0060 Foundations of Biology 1 and 2 and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
  or
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.pitt.edu/~biology.

Biologicaly Course Requirements

Completion of the molecular biology major requires a total of 32 credits in biology, including

20 credits of required courses:

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2

- BIOSC 0350 - GENETICS or
- BIOSC 0355 - UHC GENETICS

- BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN
- BIOSC 1820 - METBLC PATHWAYS & REGULATION
- BIOSC 1940 - MOLECULAR BIOLOGY

In addition, students select one upper-division elective

In addition, students select one upper-division elective (either BIOSC 0370 - ECOLOGY or any BIOSC course numbered above 1010) and complete the course work in one of the following two tracks:

Cell and Developmental Biology Track

- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY

- BIOSC 1560 - CELL & DEVELM BIOLOGY SEMINAR

- BIOSC 1511 - CELL BIOLOGY LAB WRITING PRAC or
- BIOSC 1531 - DEVELM BIOLGY LAB WRITING PRAC or
- BIOSC 1561 - CELL DEVELM BIOL SEM WRIT PRAC or
- BIOSC 1831 - BIOCHEMISTRY LAB WRITING PRAC or
- BIOSC 1951 - MOLEC GENETCS LAB WRITING PRAC (Cell and Developmental Biology)

Two laboratories selected from among

- BIOSC 1510 - CELL BIOLOGY LABORATORY
- BIOSC 1530 - DEVELOPMNTAL BIOLGY LABORATORY
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1950 - MOLECULAR GENETICS LABORATORY

Certificate

Life Sciences Research Certificate

The goals of this certificate program are to enable students to: understand and apply key concepts in designing and performing authentic experimental research; learn and practice good science communication, ethics and responsible conduct in research; develop research practices and critical thinking skills needed for a career in research; and compile evidence of rigorous training in research for applicants to jobs and graduate programs. Students must complete four terms of inquiry-based research in lab or field settings under faculty mentorship, overseen by Research Certificate Oversight Committee, two courses about research methods, three courses focusing on quantitative skills, one course in history and philosophy of science, and written and oral presentations of their research.

Application Requirements

Prerequisites

1. Introductory Biology. Completed **two** terms of introductory biology, with a grade of **C** [not C-] or above. Transfers or students with AP/IB credit may be exempt from part of this requirement.
2. Completed 2 credits of mentored research in a Certificate-approved faculty laboratory (one term; min. 140 hrs.; BIOSC 1903/BIOSC 1904 or NROSCI 1901/NROSCI 1961 or equivalent) **and** have a letter of support from the faculty sponsor.
3. GPA. If students have a cumulative GPA of 2.75 or lower after completing the initial term of research, the faculty sponsor must comment in their letter of support on whether the student is likely to meet the rigorous demands of the Certificate.

Bio 1: Choose one (each totals 4 cr.)

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1 or
- BIOSC 0057 - FDS OF BIOLOGY RESEARCH LAB 1
  and
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 or
- BIOSC 0715 - UHC FOUNDATIONS OF BIOLOGY 1

- BIOSC 0190 - INTRO TO BIOLOGICAL WORLD 1

Bio 2: Choose one (each totals 4 cr.)

- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2 or

- BIOSC 0067 - FOUNDTNS OF BIOL RES LAB 2
  and
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
- BIOSC 0716 - UHC FOUNDATIONS OF BIOLOGY 2

- BIOSC 0191 - INTRO TO BIOLOGICAL WORLD 2

Requirements to Complete the Certificate

Mentored Research in Life Sciences

- Components of mentored research projects: Formulation of hypotheses, experimental design, data collection, data interpretation, drawing conclusions supported by the data. Presentation of research findings, understanding the pertinent scientific literature, developing new knowledge, and development of a path towards research independence.
- Research credit requirements: Three additional terms (each term; min. 140 hours.; BIOSC 1903/BIOSC 1904 or NROSCI 1901/NROSCI 1961 or equivalent.) of research for a total of at least 8 credits or credit equivalents. BIOSC 1903/BIOSC 1904 and NROSCI 1901 /NROSCI 1961 must be approved and credits awarded according to departmental procedures. The final 2 terms of research must be with the same faculty mentor. Research equivalents must be approved by the RCOC.
- Pre-planning and Reporting for each Term: Pre-planning and Reporting: In the last week of classes before the next term of research (see B above), students must submit a 1-2 page report and prospectus summarizing accomplishments and aims for the next term. RCOC determines whether the research can count towards the Certificate before the end of the add/drop period. Oversight: Reporting documents must be co-signed by the faculty sponsor (and co-sponsor if any).
- Choice of Research Faculty: Research-active faculty in the Departments of Biological Sciences or Neuroscience may sponsor students for research in their labs. Faculty sponsors in other A&S departments or other University of Pittsburgh schools must be approved by RCOC.
- Optional Off-campus Research Term: One term of off-campus research may be approved (e.g. summer fellowship or study abroad). Submit in advance a 1-page description to RCOC of the project and the research environment plus a letter from the research advisor confirming commitment to the ≥140 hours of research activity.

Quantitative Skills Courses - Statistics and Mathematics

Complete three courses from this list (9 credits).

- BIOSC 1545 - THE MATHEMATICS OF BIOLOGY
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 0290 - DIFFERENTIAL EQUATIONS
- MATH 1380 - MATH BIOLOGY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- STAT 1211 - APPLD CATEGORICAL DATA ANLYSIS
- STAT 1231 - APPLIED EXPERIMENTAL DESIGN
- STAT 1241 - APPLIED SAMPLING
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Graduate level options for the certificate:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2012 - BAYESIAN & EMPIRICAL BAYES STAT

History and Philosophy of Science Courses

Complete one course from this list (3 credits).

- HPS 0427 - MYTH AND SCIENCE
- HPS 0437 - DARWINISM AND ITS CRITICS
- HPS 0430 - GALILEO & CREATN MDRN SCIENCE

- HPS 0515 - MAGIC, MEDICINE AND SCIENCE or
- HIST 0089 - MAGIC, MEDICINE AND SCIENCE

- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING
- HPS 1620 - PHILOSOPHY OF BIOLOGY
- HPS 1625 - PHILOSOPHY OF MEDICINE
- HPS 1508 - CLASSICS IN HISTORY OF SCIENCE
- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE
- HPS 1670 - PHILOSOPHY OF NEUROSCIENCE
- HPS 1800 - SPEC TOPICS HIST & PHIL OF SCI

Research Methods Courses

- Complete two Research Methods courses, one in research communication and one in research mechanics. It is recommended that the research courses be in the student's major department.
- Be enrolled in the Certificate and performing research in a Certificate-approved lab during the same term as enrolled in these courses. Courses may be taken in any order. Substitution of other Research Methods courses must be pre-approved by RCOC.
- BIOSC 1906 - RESEARCH COMMUNICATION
- BIOSC 1907 - RESEARCH DECONSTRUCTION
- NROSCI 2014 - SPEAKING OF SCIENCE

Presenting Research

The student must present their research at two scientific meetings or symposia, at least one venue must be outside of major and research Departments. Ex.: Honors College Research Fair, Science20xx, Duquesne Summer Undergraduate Research Symposium, regional or national scientific meeting. Presentation and abstract must be designed and delivered by the student and approved by the research faculty advisor and RCOC. The research abstract and a copy of poster or talk must be submitted to RCOC.

Research paper

The student will submit a manuscript describing the research completed in the final research experience spanning at least two consecutive terms. This will be in the form of a research manuscript. The paper must be submitted to the faculty sponsor and the RCOC by the last week of classes before finals week. The paper must be approved by the faculty sponsor and RCOC. The same final research paper may be considered for satisfying both Departmental Honors and the Research Certificate, provided it fulfills other requirements of the Department.

Portfolio Documentation

Upon registration for the Certificate, students must start (and regularly update) their electronic Portfolio, documenting their progress towards Certificate completion. Each proposal, presentation, research report, and other Certificate-related materials must be collated in the Portfolio. The Portfolio allows students, faculty, and advisors to review progress towards the Certificate, and provides coherent documentation of research proficiency when applying for employment or graduate school admission.

GPA Requirements

The student must remain in good academic standing (minimum cumulative GPA 2.00); if students have a cumulative GPA of 2.75 or lower after completing the initial term of research, the faculty sponsor for that research must comment in writing their letter of support on whether the student is likely to meet the rigorous demands of the Certificate.

Advising

Majors in the Departments of Biological Sciences or Neuroscience will be advised through their departments. Students outside of these majors will be assigned an advisor within one of these majors.

Students conducting research with a faculty member who does not work in the Departments of Biological Sciences or Neuroscience must have their research faculty sponsor complete a Faculty Mentor Application unless they are a CNUP faculty member. Students must submit the faculty mentor application with their application for the certificate.

Department of Chemistry

Chemistry, as a central science, is involved in natural processes occurring in living things, the earth, the oceans, and the atmosphere. The chemical industry provides materials to feed, clothe, and house mankind; drugs to combat disease; and processes to provide energy. Chemistry plays a role in high technology fields such as molecular biology, microelectronics, drug design, and ceramics.

The American Chemical Society (ACS)-certified chemistry degree includes core chemistry courses and electives. Special options are available for students with specific interests in combining chemistry with other subjects, such as bioscience, business, communication, computer science, education, and polymer science. These options allow students to take additional courses that provide an in-depth introduction to the subject of choice and are directly relevant to individual career goals.

The Bachelor of Science degree in chemistry prepares students for a career in business or industry or for advanced study in chemistry. Combined with core biology courses, the chemistry major is frequently selected as the preferred major for admission to the graduate health professions, including medical and dental school. In combination with an education option, the chemistry major prepares students for a certification program leading to a career in secondary science teaching. Chemists at all levels of training have a wide variety of industrial and corporate career opportunities in agricultural chemistry, food chemistry, environmental science, petrochemicals, pharmaceuticals, semiconductors and electronics, and fine chemicals, as well as in basic research. Many opportunities are available for chemistry majors with skills in business (sales, technical marketing, management), communications (technical writing, journalism), and computer science (programming, database management, information science). For more information on the ACScertified degree and degree options as well as the Department of Chemistry, see www.chem.pitt.edu.

Major

Chemistry, BS

Major Requirements

The requirements for the ACS-certified major in chemistry are as follows:

These chemistry courses must be taken:

- CHEM 0110 - GENERAL CHEMISTRY 1 and
- CHEM 0120 - GENERAL CHEMISTRY 2
  or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1 and
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0250 - INTRO ANALYTICAL CHEMISTRY
- CHEM 0260 - INTRO ANALYTICAL CHEMISTRY LAB

- CHEM 0310 - ORGANIC CHEMISTRY 1 and
- CHEM 0320 - ORGANIC CHEMISTRY 2
  or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1 and
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 0345 - ORGANIC LABORATORY
- CHEM 1130 - INORGANIC CHEMISTRY
- CHEM 1140 - ADVANCED INORGANIC LABORATORY
- CHEM 1250 - INSTRUMENTAL ANALYSIS
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1430 - PHYSICAL CHEMSTRY LABORATORY 1
- CHEM 1440 - PHYSICAL CHEMSTRY LABORATORY 2

Corequisite courses must be taken in math and physics:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG

For ACS certification, the elective course must be a course in biochemistry

- BIOSC 1000 - BIOCHEMISTRY or
- BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN

At least 2 credits must be selected from an approved list of chemistry or science electives

The chemistry major must earn a 2.00 GPA in all departmental courses

The chemistry major must earn a 2.00 GPA in all departmental courses. Chemistry majors may use the S/NC option in all required physics and mathematics courses and in CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2.

Note:

Students who complete the requirements of the chemistry major automatically complete the requirements for a related area in mathematics. To graduate with departmental honors, the student must have an overall GPA of at least 3.00, have a GPA of at least 3.25 in required chemistry courses, earn 2 credits in CHEM 1710 - UNDERGRADUATE RESEARCH, and earn 1 credit in CHEM 1711 - UNDGR RESEARCH WRITING PRACTCM.

The chemistry department offers options in bioscience, business, communications, photonics, education, and material science. Each chemistry option allows for a waiver of CHEM 1440 - PHYSICAL CHEMSTRY LABORATORY 2, CHEM 1140 - ADVANCED INORGANIC LABORATORY, and the 2-credit science elective required for the ACS-certified degree. Specific information on the options program is available from the department.

Minor

Chemistry Minor

Requirements

Due to the integral role that chemistry plays in many other majors (including life sciences, physical sciences, and engineering), students wishing to receive formal recognition of their work in chemistry may choose to pursue the official minor as outlined below:

18-19 Credits

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
  or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
  or
- CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
- CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
  or
- CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
- CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

Three of the following LECTURE courses:

- CHEM 0250 - INTRO ANALYTICAL CHEMISTRY
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 1130 - INORGANIC CHEMISTRY
- CHEM 1250 - INSTRUMENTAL ANALYSIS
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2

- BIOSC 1000 - BIOCHEMISTRY or
- BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN

Two credits of the following LABORATORY courses:

- CHEM 0345 - ORGANIC LABORATORY
- CHEM 0260 - INTRO ANALYTICAL CHEMISTRY LAB
- CHEM 1140 - ADVANCED INORGANIC LABORATORY
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB
- CHEM 1430 - PHYSICAL CHEMSTRY LABORATORY 1
- CHEM 1440 - PHYSICAL CHEMSTRY LABORATORY 2

Department of Classics

Classics is an interdisciplinary program devoted to the study of the ancient Greek and Roman civilizations. Students may focus on the classics language track or the classical civilization track. Besides the sequences in the Greek, Latin, and Sanskrit languages, the department offers courses in Greek and Roman literature (including comparative literature), mythology, linguistics, history, culture, and philosophy.

The classics language track requires study of texts in the original languages, while the classical civilization track makes use of these same texts in English translations. Both classics tracks qualify graduates for appropriate careers in teaching, but can also be used as preparation for nonclassical academic and professional disciplines such as business, law, and medicine. The study of classics provides a background for the study of Romance and other languages, assists in the proper use of English, and underlies any understanding of Western civilization. For more information on the major and the Department of Classics, see http://www.classics.pitt.edu/.

Major

Classics - The Classical Civilization Track, BA

Major Requirements

The requirements for the major, specific to the major track chosen, are:

The Classical Civilization Track

Required courses for this track are offered by, or cross listed with, the classics department. The courses for the major will be distributed as follows:

- Two courses in Greek, Latin, or both;
- Two survey courses in Greek and Roman civilizations;
- One course from each of three different areas, chosen from archaeology and art, culture, history, language, literature, philosophy, religion, and science; and
- Three courses in an approved area of concentration.

The general rules and requirements for the classics major, regardless of the track chosen, are as follows:

- The classics major requires a minimum of 30 credits with an overall 2.00 GPA in courses counting toward the major. A maximum of two courses may be taken toward the language track major under the S/NC option (formerly the S/N option). Students in the civilization track major may take a maximum of four courses under the S/NC option (formerly the S/N option).
- Except for placement by examination in the language sequences, credit by examination is generally not granted, but the department will consider students with special circumstances.
- Students may either enroll in one of the W courses offered by the department or arrange with the instructor of an upper-level course for the addition of one credit of writing practicum.
- For the A&S-required related area, the classics department recommends other departments' courses in ancient Greek and Roman archaeology and art, history, linguistics, literature, philosophy, religion, and science.

Students have combined a major in classics with a second major or certificate such as anthropology, biology, communication, computer science, history, history of art and architecture, history and philosophy of science, nonclassical languages and literatures, psychology, and women's studies. Students planning graduate study in classics may be required to obtain reading competency in German, French, or Italian. Such study might begin during the course of completing the undergraduate major or may be undertaken in graduate school.

Majors who have reached the end of the junior year with a GPA in departmental courses of 3.50 or higher may, in conjunction with a senior-level course, write an honors essay. Acceptance of the essay by the department will qualify the student for graduating with departmental honors in classics or classical civilization.

Classics - The Classics Language Track: Greek and Latin, BA

Major Requirements

The requirements for the major, specific to the major track chosen, are:

The Classics Language Track: Greek and Latin

Thirty credits in language courses are required, including either GREEK 1700 - GREEK PROSE COMPOSITION or LATIN 1700 - LATIN PROSE COMPOSITION and at least 6 credits in Greek or Latin courses numbered 1300 or above. Classics majors may emphasize one language more than the other if they wish, but every student is required to take at least one year of Greek and at least one year of Latin. The department recommends courses offered by classics and other departments in ancient archaeology, art, history, language, literature, philosophy, religion, and science, as well as courses in later cultures (medieval, Renaissance, or modern) influenced by the classical tradition.

The general rules and requirements for the classics major, regardless of the track chosen, are as follows:

- The classics major requires a minimum of 30 credits with an overall 2.00 GPA in courses counting toward the major. A maximum of two courses may be taken toward the language track major under the S/NC option (formerly the S/N option). Students in the civilization track major may take a maximum of four courses under the S/NC option (formerly the S/N option).
- Except for placement by examination in the language sequences, credit by examination is generally not granted, but the department will consider students with special circumstances.
- Students may either enroll in one of the W courses offered by the department or arrange with the instructor of an upper-level course for the addition of one credit of writing practicum.
- For the A&S-required related area, the classics department recommends other departments' courses in ancient Greek and Roman archaeology and art, history, linguistics, literature, philosophy, religion, and science.

Students have combined a major in classics with a second major or certificate such as anthropology, biology, communication, computer science, history, history of art and architecture, history and philosophy of science, nonclassical languages and literatures, psychology, and women's studies. Students planning graduate study in classics may be required to obtain reading competency in German, French, or Italian. Such study might begin during the course of completing the undergraduate major or may be undertaken in graduate school.

Majors who have reached the end of the junior year with a GPA in departmental courses of 3.50 or higher may, in conjunction with a senior-level course, write an honors essay. Acceptance of the essay by the department will qualify the student for graduating with departmental honors in classics or classical civilization.

Minor

Classics Minor - Classical Civilization Track (minimal languages)

Minor Requirements

The department offers two types of minor tracks, one in classics (Greek and/or Latin), and one in classical civilization. The classics minor consists exclusively of courses in Greek and/or Latin. For the classical civilization minor, no language courses are required, although language courses may be counted if the student wishes.

For advice on alternative plans, please consult with the undergraduate advisor.

Classical Civilization Track (minimal languages)

Fifteen credits in classics, Greek, or Latin courses, including at least one survey course in Greek civilization or history (3 credits), one survey course in Roman civilization or history (3 credits), and one course with a literary or textual component (3 credits). Any Greek or Latin course may count toward the literary/textual requirement.

Classics Minor - Classics Track

Minor Requirements

The department offers two types of minor tracks, one in classics (Greek and/or Latin), and one in classical civilization. The classics minor consists exclusively of courses in Greek and/or Latin. For the classical civilization minor, no language courses are required, although language courses may be counted if the student wishes.

For advice on alternative plans, please consult with the undergraduate advisor.

Classics Track

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE
  or
- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE

Department of Communication

The study of communication is one of the oldest but still most contemporary of disciplines. The field examines important questions about society, communication, and persuasion in a way that combines the best of the ancient liberal arts tradition with the critical attention to the newest media technologies. In courses such as persuasion, argument, interpersonal communication, political rhetoric, rhetoric of science, nonverbal communication, history of media, media criticism, and television and society, our faculty offer diverse views on the roles of communication, media, and rhetoric in our lives.

A degree in communication is not vocational in design, although many of the Department of Communication's graduates hold important positions in industry, education, the media, government, law, and various other professions. An understanding of communication as a human activity, as defined above, makes the department's graduates attractive candidates when seeking employment or obtaining admission to graduate programs. For more information on the major or the Department of Communication, see www.comm.pitt.edu.

Major

Communication, BA

Major Requirements

The communication: rhetoric and communication major requires the completion of 33 credits with a grade of C or better in each course (if the course is to count toward the major). The distribution of courses is

1. Three core courses (all required). Each is a prerequisite for a specific upper-level course.

- COMMRC 0300 - COMMUNICATION PROCESS
- COMMRC 0310 - RHETORICAL PROCESS
- COMMRC 0320 - MASS COMMUNICATION PROCESS

2. Two skills courses

- COMMRC 0520 - PUBLIC SPEAKING

one of the following:

- COMMRC 0500 - ARGUMENT
- COMMRC 0510 - DEBATE
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 0540 - DISCUSSION
- COMMRC 0550 - SPEECH COMPOSITION

3. Six upper-level courses that focus on specific topics or contexts of communication

Since these courses require substantive research and writing components, completion of the composition requirement is a prerequisite.

- COMMRC 1101 - EVIDENCE
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1103 - RHETORIC AND CULTURE
- COMMRC 1104 - POLITICAL COMMUNICATION
- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- COMMRC 1109 - NONVERBAL COMMUNICATION
- COMMRC 1110 - THEORIES OF INTERPERSONAL COM
- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1112 - THEORIES OF RHETORIC
- COMMRC 1113 - AFRCN AMERICANS AND MASS MEDIA
- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS
- COMMRC 1115 - AFRICAN AMERICAN RHETORIC
- COMMRC 1116 - RHET OF AMER COUNTRCULT
- COMMRC 1117 - 21ST CENTURY PUBLIC ARGUMENT
- COMMRC 1118 - PRESIDENTIAL RHETORIC 1
- COMMRC 1119 - PRESIDENTIAL RHETORIC 2
- COMMRC 1120 - RHETORIC OF COLD WAR
- COMMRC 1121 - HISTORY OF MASS MEDIA
- COMMRC 1122 - MEDIA CRITICISM
- COMMRC 1123 - RHETORICAL CRITICISM
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- COMMRC 1142 - THEORIES OF MODERN RHETORIC
- COMMRC 1143 - KNOWLEDGE, POWER, & DESIRE
- COMMRC 1145 - THE HISTORY OF RHETORIC
- COMMRC 1147 - THE RHETORIC OF SCIENCE
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICTN
- COMMRC 1731 - SPECIAL TOPICS IN RHETORIC
- COMMRC 1732 - SPECIAL TOPICS IN MASS COM
- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- CSD 1020 - NATURE OF LANGUAGE *

Note:

*This course is offered by the School of Health and Rehabilitation Science

The major also has the following rules and requirements:

- The Department of Communication offers three special project courses (not required). COMMRC 1710 - SENIOR THESIS IN COMMUNICATION requires a GPA of 3.00 for enrollment and can be counted toward the major; COMMRC 1900 - COMMUNICATION INTERNSHIP requires a GPA of 2.75, and COMMRC 1901 - INDEPENDENT STUDY requires a GPA of 3.00. These two courses can fulfill elective credits.
- Although any department could be a related area, past majors often have selected political science, sociology, business, English writing, psychology, anthropology, or history. Students who plan to do graduate work in communication are advised to do additional work in a second language.

Department of Computer Science

The Department of Computer Science (CS) of the University of Pittsburgh was established in 1966, which makes it one of the oldest such departments in the country. The Bachelor of Science degree program was begun in 1974 with the following objectives: to provide an opportunity for students to focus their educational efforts on computer science as a discipline; to prepare students for employment and positions of responsibility in an increasingly computer-oriented world; and to prepare students for graduate study in computer science.

The curriculum for the BS degree program is dependent on a set of required core courses followed by elective advanced courses. Five core courses provide an introduction to the fundamental areas and to the basic concepts of computer science. These courses include the study of modern languages such as Java. Also included is a careful investigation of fundamental problem-solving techniques used to solve a variety of computational problems. In addition, the computer science major is required to complete eight upper-level courses, three of which are required. The remaining five courses are selected by the student from major areas such as theory, programming, languages, systems programming, artificial intelligence, and software engineering. Finally, three courses in mathematics are required; these courses provide a level of mathematical maturity that is essential to the study of computer science. In addition to the required coursework Computer Science majors must complete a capstone experience, consisting of an internship, directed study, co-op, or designated project course. For more information on the major or the Department of Computer Science, see www.cs.pitt.edu.

The department also offers the scientific computing major jointly with the Department of Mathematics (see Department of Mathematics listing for information on this major) the Bioinformatics major jointly with the Department of Biological Sciences, and the computer engineering major jointly with the Swanson School of Engineering's Department of Electrical Engineering (see Swanson School of Engineering section for more information on this major).

Co-op Program

Through the assistance of the Swanson School of Engineering's Office of Cooperative Education, formal arrangements are established with industry that permit students to rotate four-month terms between the workplace and the classroom. At the University of Pittsburgh, this rotation begins after the completion of the sophomore year and extends into the senior year, with the co-op student completing at least two four-month work periods. These employment sessions, which are typically with the same employer, allow job duties to increase as the knowledge and skills of the student progress. During the co-op sessions, students earn competitive salaries, thus making this program financially rewarding. The co-op credit does not count toward the 40 computer science credits needed for the completion of the computer science program. It does, however, satisfy the capstone graduation requirement.

Major

Computer Science, BS

Major Requirements

The computer science major requires 40 credits in computer science courses and an additional 11-12 credits in mathematics and/or statistics as detailed below:

1. A minimum of 16 credits must be satisfactorily completed in the following five core courses:

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - DATA STRUCTURES
- CS 0447 - COMPUTR ORGZTN & ASSMBLY LANG
- CS 0449 - INTRO TO SYSTEMS SOFTWARE

Note:

Students should have some programming experience (usually acquired in high school) before taking CS 0401. Any high school course that includes the writing of several Pascal, C++, or Java programs would be sufficient. It is also possible to take one of the department's service courses, such as CS 0007 - INTRO TO COMPUTER PROGRAMMING, as preparation.

2. Nine credits in these three upper-level required courses:

- CS 1501 - ALGORITHM IMPLEMENTATION
- CS 1502 - FORMAL METHODS IN COMPUTER SCI
- CS 1550 - INTRO TO OPERATING SYSTEMS

3. Fifteen additional credits in upper-level courses (numbered 1000) must also be completed

Internships, directed studies, CS 1680, CS 1590 and co-op courses (see below) may not be used to satisfy this requirement.

4. A minimum of 12 credits in mathematics must be completed as follows:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2

- STAT 1000 - APPLIED STATISTICAL METHODS or
- STAT 1100 - STAT & PROBLTY FOR BUS MGT or
- STAT 1151 - INTRODUCTION TO PROBABILITY

Note:

Students should complete their required mathematics courses early. Typically, MATH 0220 would be completed in the freshman year. Strong students may elect also to take MATH 1180 - LINEAR ALGEBRA 1.

Additional rules and requirements for the major in computer science are as follows:

- A grade of C or better in all computer science and mathematics, and statistics courses is required for graduation. All computer science courses for the major must be taken for a letter grade, while required mathematics courses may be taken with the S/NC option.
- Some computer science courses that fulfill the departmental writing (W course) requirement will be offered each term.
- A 12-credit related area may be completed in approved mathematics and/or statistics courses. Other options include economics, business, chemistry, physics, psychology, or philosophy.
- To graduate with honors, a computer science major must complete one additional upper-level course and have a GPA of at least 3.50 in major courses, as well as an overall GPA of at least 3.25.

Computer Science, BS/MS

The BS degree in computer science requires 120 credits of course work, including 40 credits in computer science and 11 or 12 credits in mathematics and statistics. Typically, a student completes this degree in four academic years. Well-prepared students may apply for admission to the combined

bachelor's/master's degree program. This accelerated program allows students to begin taking graduate courses in their senior year and complete the combined BS/MS degree in five years. Please contact the Department of Computer Science for additional information.

Minor

Computer Science Minor

Minor Requirements

The requirements for the minor are

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- CS 1501 - ALGORITHM IMPLEMENTATION

any two of the three courses:

- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0447 - COMPUTR ORGZTN & ASSMBLY LANG
- CS 0449 - INTRO TO SYSTEMS SOFTWARE

Note:

The total number of credits is 16. CS 0401 requires programming experience as a prerequisite. A student without any programming background would be advised to take the three credit course CS 0007 as preparation for CS 0401. The minor is essentially five of the six courses that are considered the "core" of the CS major. This is a rigorous minor. This minor is not intended for casual students interested in computer literacy.

Department of East Asian Languages and Literatures

The Department of East Asian Languages and Literatures offers courses in the language, literature, film, linguistics, and culture of China, Japan, and Korea. An undergraduate major is available in either Chinese or Japanese. There is a multiyear sequence of courses in the modern standard languages of China, Japan, and Korea, plus a wide variety of offerings (ranging from introductory to specialized) designed to illuminate various facets of these Asian civilizations. Students whose interests range broadly across the civilization of East Asia may alternatively develop an interdisciplinary studies major or take advantage of the Asian Studies Certificate program. The departmental curriculum is composed of three main categories:

- courses designed to develop competence in the four skills (speaking, listening, reading, writing) of the Chinese, Japanese, or Korean language, plus courses for advanced study in Chinese and Japanese;
- courses taught in English and focused on the mainstream of Chinese, Japanese, and Korean culture as reflected in literature, drama, and film; and
- courses for the advanced study of literature and linguistic analysis.

For more information on the Chinese and Japanese majors, courses in Korean language, or on the Department of East Asian Languages and Literatures, visit the Web site www.deall.pitt.edu/.

Major

Chinese, BA

Requirements for both Japanese and Chinese Majors

Students majoring in either Japanese or Chinese should follow these rules and requirements:

- The first-year language courses may be taken on an S/NC basis, but not the second-year language courses. In the third and fourth years, majors have the option of taking two additional courses S/NC , one of which may be an advanced language course.

Course Requirements

Students majoring in Chinese must take 55.

Language: complete all of the following courses.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2
- CHIN 0003 - SECOND YEAR CHINESE 1
- CHIN 0004 - SECOND YEAR CHINESE 2
- CHIN 1020 - THIRD YEAR CHINESE 1
- CHIN 1021 - THIRD YEAR CHINESE 2

Choose one of the following advanced language courses

- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1050 - FOURTH YEAR CHINESE 1
- CHIN 1051 - FOURTH YEAR CHINESE 2

Literature, linguistics, culture, and film

Choose one of the following courses.

- CHIN 0070 - EXPLRNG CHINA ROOTS TO BLOOMS
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1083 - MASTERPC OF CHINESE LITERATURE
- CHIN 1087 - INTRO TO CHINESE NARRATIVE
- CHIN 1090 - GREAT MINDS OF CHINA
- CHIN 1562 - CONFUCIANISM: BASIC TEXTS

Choose one of the following courses.

- CHIN 0071 - THMS & TYPS MOD CHIN LIT & CUL
- CHIN 0080 - CITY LIFE & EAST ASIAN CULTURE
- CHIN 0082 - HONG KONG CINEMA
- CHIN 1025 - ASPECTS OF CHINESE LANG
- CHIN 1059 - ADAPTD FOR SCRN: CHIN LIT &FLM
- CHIN 1084 - MASTERPIECES OF CHIN LIT: MDRN
- CHIN 1085 - INTRO TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA

Choose two of the following courses.

- CHIN 0070 - EXPLRNG CHINA ROOTS TO BLOOMS

- CHIN 0071 - THMS & TYPS MOD CHIN LIT & CUL
- CHIN 0080 - CITY LIFE & EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0082 - HONG KONG CINEMA
- CHIN 0085 - REVOL/INVLT/IDEN MOD CHIN CULT
- CHIN 1025 - ASPECTS OF CHINESE LANG
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTD FOR SCRN: CHIN LIT &FLM
- CHIN 1065 - SOURCES ON EAST ASIA
- CHIN 1070 - Love and Power
- CHIN 1072 - LAW AND LITERATURE IN CHINA
- CHIN 1083 - MASTERPC OF CHINESE LITERATURE
- CHIN 1084 - MASTERPIECES OF CHIN LIT: MDRN
- CHIN 1085 - INTRO TO EAST ASIAN CINEMA
- CHIN 1086 - LOVE IN CHIN AND WESTERN LIT
- CHIN 1087 - INTRO TO CHINESE NARRATIVE
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA
- CHIN 1091 - ENCOUNTERING MODERN CHINA
- CHIN 1562 - CONFUCIANISM: BASIC TEXTS

Senior Project should be completed in the last spring term prior to graduation.

- CHIN 1999 - SENIOR PROJECT

Non-departmental course requirements; choose two of the following courses.

- ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
- HAA 0620 - ART OF CHINA
- HAA 0690 - CHINA: LANDSCAPE PTG & NATURE
- HAA 1605 - EARLY CHINA: POWER & IDENTITY
- HAA 1640 - 20TH CENTURY CHINESE ART
- HIST 1422 - LATE IMPERIAL CHINA
- MUSIC 0354 - CHINESE PERFORMANCE LITERATURE
- PS 1523 - EAST ASIA IN WORLD POLITICS
- Other course(s) with at least 50% China-related content offered in a department other than East Asian Languages and Literatures.

Japanese, BA

Requirements for both Japanese and Chinese Majors

Students majoring in either Japanese or Chinese should follow these rules and requirements:

- The first-year language courses may be taken on an S/NC basis, but not the second-year language courses. In the third and fourth years, majors have the option of taking two additional courses S/NC , one of which may be an advanced language course.

Requirements

The Japanese major requires completion of 54 credits and a minimum GPA of 2.0 in departmental courses. This program includes elements from four categories: courses designed to develop competence in the four skills of the Japanese language; courses taught in English and focused on the mainstream of Japanese culture as reflected in literature, drama, film, and linguistics; courses related to Japan offered in other departments of the Dietrich School; and a capstone experience for graduating seniors.

Language

- JPNSE 0001 - FIRST YEAR JAPANESE 1
- JPNSE 0002 - FIRST YEAR JAPANESE 2
- JPNSE 0003 - SECOND YEAR JAPANESE 1
- JPNSE 0004 - SECOND YEAR JAPANESE 2
- JPNSE 1020 - THIRD YEAR JAPANESE 1
- JPNSE 1021 - THIRD YEAR JAPANESE 2

Advanced courses

- JPNSE 1030 - Readings in Japanese Literature
- JPNSE 1032 - READINGS IN SOCIAL SCIENCE
- JPNSE 1040 - INTRO TO CLASSICAL JAPANESE 1
- JPNSE 1050 - FOURTH YEAR JAPANESE 1

Culture, Literature, and Linguistics

Complete the following course.

- JPNSE 0083 - INTRO TO JAPANESE LITERATURE *

Choose one of the following courses.

- JPNSE 1022 - HISTORY OF JAPANESE LANGUAGE *
- JPNSE 1023 - ASPCTS OF THE JAPNESE LANGUAGE *
- JPNSE 1025 - EXPLORNG THE JPNSE LANG & MIND *
- JPNSE 1035 - PRAGMATICS OF JAPANESE *

Choose two of the following elective courses.

- JPNSE 0007 - JPNSE CULTURE AND CIVILIZATION
- JPNSE 0080 - CITY LIFE & EAST ASIAN CULTURE
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0085 - JAPANESE TALES OF SUPERNATURAL *
- JPNSE 1056 - JAPANESE LITERATURE & THE WEST *
- JPNSE 1057 - JPNSE CULT & SOCTY THRGH CINEM *
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS *
- JPNSE 1059 - JAPANESE LITERATURE ON SCREEN *
- JPNSE 1070 - WORLD OF JAPAN *
- JPNSE 1071 - THE WORLD OF JAPAN *
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS *
- JPNSE 1081 - FORMS OF JAPANESE THEATRE *
- JPNSE 1082 - A TASTE OF JAPAN *
- JPNSE 1085 - INTRO TO EAST ASIAN CINEMA *

- JPNSE 1700 - INTRO THEORY & PRA OF TRANLT

Related Field

Three Japan-related courses offered by departments in the Dietrich School of Arts and Sciences.

Capstone

- JPNSE 1999 - CAPSTONE PROJECT must be taken during the student's last spring term as an undergraduate.

Writing course

Japanese majors must complete JPNSE 1908 - DIRECTED WRITING FOR MAJORS in conjunction with one of the courses marked with an asterisk (*) in the culture, literature, and linguistics section.

Minor

Chinese Minor - Option A

Minor in Chinese

Students pursuing a minor in Chinese must select one of the following options.

Option A

Two years of Chinese language in either the traditional (CHIN 0001 through CHIN 0004) or the basic (CHIN 0025 through CHIN 0128) track, and one Chinese literature or culture course from the following list:

- CHIN 0007 - INTRO TO CHIN CIVLZ & CULTURE
- CHIN 0080 - CITY LIFE & EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0082 - HONG KONG CINEMA
- CHIN 0085 - REVOL/INVLT/IDEN MOD CHIN CULT
- CHIN 1025 - ASPECTS OF CHINESE LANG
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTD FOR SCRN: CHIN LIT &FLM
- CHIN 1083 - MASTERPC OF CHINESE LITERATURE
- CHIN 1084 - MASTERPIECES OF CHIN LIT: MDRN
- CHIN 1085 - INTRO TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA
- CHIN 1090 - GREAT MINDS OF CHINA

Chinese Minor - Option B

Minor in Chinese

Students pursuing a minor in Chinese must select one of the following options.

Option B

One year of Chinese language in either the traditional (CHIN 0001 and CHIN 0002) or the basic (CHIN 0025 and CHIN 0026) track, and the following courses.

One of the following courses.

- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1083 - MASTERPC OF CHINESE LITERATURE
- CHIN 1090 - GREAT MINDS OF CHINA

Two of the following courses.

- CHIN 0007 - INTRO TO CHIN CIVLZ & CULTURE
- CHIN 0080 - CITY LIFE & EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0082 - HONG KONG CINEMA
- CHIN 0085 - REVOL/INVLT/IDEN MOD CHIN CULT
- CHIN 1025 - ASPECTS OF CHINESE LANG
- CHIN 1059 - ADAPTD FOR SCRN: CHIN LIT &FLM
- CHIN 1084 - MASTERPIECES OF CHIN LIT: MDRN
- CHIN 1085 - INTRO TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA

Chinese Minor - Option C

Option C

Four of the following courses.

- CHIN 0007 - INTRO TO CHIN CIVLZ & CULTURE
- CHIN 0080 - CITY LIFE & EAST ASIAN CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0082 - HONG KONG CINEMA
- CHIN 0085 - REVOL/INVLT/IDEN MOD CHIN CULT
- CHIN 1025 - ASPECTS OF CHINESE LANG
- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTD FOR SCRN: CHIN LIT &FLM
- CHIN 1083 - MASTERPC OF CHINESE LITERATURE
- CHIN 1084 - MASTERPIECES OF CHIN LIT: MDRN
- CHIN 1085 - INTRO TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA

- CHIN 1090 - GREAT MINDS OF CHINA

Two of the following courses.

- ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
- HAA 0620 - ART OF CHINA
- HAA 0690 - CHINA: LANDSCAPE PTG & NATURE
- HAA 1605 - EARLY CHINA: POWER & IDENTITY
- HAA 1640 - 20TH CENTURY CHINESE ART
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION

- HIST 0755 - RELIGION IN ASIA or
- RELGST 0505 - RELIGION IN ASIA

- HIST 1422 - LATE IMPERIAL CHINA
- MUSIC 0354 - CHINESE PERFORMANCE LITERATURE
- PS 1523 - EAST ASIA IN WORLD POLITICS

Other course(s) with at least 50% China-related content offered in a department other than East Asian Languages and Literature.

Japanese Minor - Japanese Culture Option

Minor in Japanese

Two options are available.

Japanese culture option (15 credits)

Five 3-credit courses from the following list.

- JPNSE 0007 - JPNSE CULTURE AND CIVILIZATION
- JPNSE 0080 - CITY LIFE & EAST ASIAN CULTURE
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0083 - INTRO TO JAPANESE LITERATURE
- JPNSE 0085 - JAPANESE TALES OF SUPERNATURAL
- JPNSE 1022 - HISTORY OF JAPANESE LANGUAGE
- JPNSE 1023 - ASPCTS OF THE JAPNESE LANGUAGE
- JPNSE 1025 - EXPLORNG THE JPNSE LANG & MIND
- JPNSE 1035 - PRAGMATICS OF JAPANESE
- JPNSE 1056 - JAPANESE LITERATURE & THE WEST
- JPNSE 1057 - JPNSE CULT & SOCTY THRGH CINEM
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1059 - JAPANESE LITERATURE ON SCREEN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1082 - A TASTE OF JAPAN

- JPNSE 1085 - INTRO TO EAST ASIAN CINEMA
- JPNSE 1700 - INTRO THEORY & PRA OF TRANLT

Japanese Minor - Japanese Language and Culture Option

Minor in Japanese

Two options are available.

Japanese language and culture option (19 credits)

- JPNSE 0001 - FIRST YEAR JAPANESE 1
- JPNSE 0002 - FIRST YEAR JAPANESE 2

Three 3-credit courses from the following list.

- JPNSE 0080 - CITY LIFE & EAST ASIAN CULTURE
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0083 - INTRO TO JAPANESE LITERATURE
- JPNSE 0085 - JAPANESE TALES OF SUPERNATURAL
- JPNSE 1022 - HISTORY OF JAPANESE LANGUAGE
- JPNSE 1023 - ASPCTS OF THE JAPNESE LANGUAGE
- JPNSE 1025 - EXPLORNG THE JPNSE LANG & MIND
- JPNSE 1035 - PRAGMATICS OF JAPANESE
- JPNSE 1056 - JAPANESE LITERATURE & THE WEST
- JPNSE 1057 - JPNSE CULT & SOCTY THRGH CINEM
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1059 - JAPANESE LITERATURE ON SCREEN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1082 - A TASTE OF JAPAN
- JPNSE 1085 - INTRO TO EAST ASIAN CINEMA
- JPNSE 1700 - INTRO THEORY & PRA OF TRANLT

Korean Minor - Korean for Heritage Learners Option

Minor in Korean

Two options are available.

Option 2: Korean for Heritage Learners (14 credits)

Two four-credit Korean language courses from the following list.

- KOREAN 0003 - SECOND YEAR KOREAN 1 or
- KOREAN 1003 - SECOND YEAR KOREAN 1

- KOREAN 0004 - SECOND YEAR KOREAN 2 or
- KOREAN 1004 - SECOND YEAR KOREAN 2

- KOREAN 0005 - THIRD YEAR KOREAN 1 or
- KOREAN 1005 - THIRD YEAR KOREAN 1

- KOREAN 0006 - THIRD YEAR KOREAN 2 or
- KOREAN 1006 - THIRD YEAR KOREAN 2

Two three-credit course from the following list

- KOREAN 0070 - WORLD OF KOREA: PAST & PRESENT
- KOREAN 0075 - INTRO TO KOREA THROUGH FILMS
- KOREAN 1023 - ASPECTS OF THE KOREAN LANGUAGE
- KOREAN 1060 - LANGUAGE AND SOCIETY IN KOREA

Korean Minor - Korean Option

Minor in Korean

Two options are available.

Option 1: Korean (19 credits)

Four four-credit Korean language courses from the following list.

- KOREAN 0001 - FIRST YEAR KOREAN 1 or
- KOREAN 1001 - FIRST YEAR KOREAN 1

- KOREAN 0002 - FIRST YEAR KOREAN 2 or
- KOREAN 1002 - FIRST YEAR KOREAN 2

- KOREAN 0003 - SECOND YEAR KOREAN 1 or
- KOREAN 1003 - SECOND YEAR KOREAN 1

- KOREAN 0004 - SECOND YEAR KOREAN 2 or
- KOREAN 1004 - SECOND YEAR KOREAN 2

- KOREAN 0005 - THIRD YEAR KOREAN 1 or
- KOREAN 1005 - THIRD YEAR KOREAN 1

- KOREAN 0006 - THIRD YEAR KOREAN 2 or
- KOREAN 1006 - THIRD YEAR KOREAN 2

One three-credit course from the following list

- KOREAN 0070 - WORLD OF KOREA: PAST & PRESENT
- KOREAN 0075 - INTRO TO KOREA THROUGH FILMS
- KOREAN 1023 - ASPECTS OF THE KOREAN LANGUAGE

- KOREAN 1060 - LANGUAGE AND SOCIETY IN KOREA

Department of Economics

A major in economics can be designed to serve a variety of purposes in the general liberal arts and can provide a background for postgraduate study in a number of professional schools. In addition, economics is frequently taken as a dual major with business at the undergraduate level. Among the graduate-level options which can be pursued by economics majors are law, business, professional-level training in economics, public administration, professional health management, hospital administration, urban affairs, and transportation studies. Because the range of interests among economics majors is quite broad, students are encouraged to work out a plan of studies fitting their individual needs with a departmental advisor. For more information on the major, the minor, and the Department of Economics, see www.econ.pitt.edu.

Major

Economics, BA

General Major Requirements

Majors may earn either a Bachelor of Science or a Bachelor of Arts in economics. The general rules and requirements as they apply to both degrees are as follows:

- A minimum overall 2.00 GPA is required in all economics courses for graduation with an economics major.
- A minimum grade of C- is required in ECON 0100 - INTRO MICROECONOMIC THEORY, ECON 0110 - INTRO MACROECONOMIC THEORY, ECON 1100 - INTERMEDIATE MICROECONOMICS, ECON 1110 - INTERMEDIATE MACROECONOMICS, MATH 0120 and MATH 0220.
- No ECON course that counts toward the major may be taken on an S/NC basis.
- Students must complete at least one writing-intensive (W) course in the major.
- Credit by exam is usually not accepted, but students should check with the departmental advisor about the possibility.
- Majors may choose to complete a double major. Frequently chosen double majors include economics with computer science, history, and philosophy. Less frequently chosen are the sciences (notably biology), which could lead to graduate-level options in public health fields. Interested students have the option of completing a joint major with the mathematics department that will prepare students for a quantitatively oriented job in industry or for entering graduate school in applied mathematics, statistics, economics, business, or a related field (see mathematics major). A structured program leading to a joint Dietrich School /business major is available for students interested in combining economics with business (see Nondepartmental Dietrich School Majors for details).
- ECON 0800, ECON 0810, and ECON 0820 are designed for non-majors are therefore do not count toward the major.
- Internship credits do not count toward the major. Students are encouraged to do internships.
- Only three credits of ECON 1901 through ECON 1903 may be applied toward the credits required for the major.
- Honors in economics is granted if, in addition to fulfilling all requirements for the economics major, the student meets the following criteria:
    - Maintenance of a GPA of 3.5 in all economics courses
    - Maintenance of an overall GPA of 3.5 or better
    - Completion of at least 3 credits in the economics proseminar series (ECON 1700-ECON 1730)

Requirements

Students seeking a BA in economics must earn at least 27 credits in economics courses including the following:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- Two Economics elective courses*

- Two ECON 1000-level elective courses which require ECON 1100 or ECON 1110 as prerequisites
- One ECON 1000-level elective course
- ECON 0900 - ECONS: INT FOR FIELD MAJORS

Note:

* ECON 0800 does not count as an ECON elective course.

Students seeking the BA must also take the following corequisite courses:

One of the following

- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

One of the following

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STAT & PROBLTY FOR BUS MGT *

Note:

* STAT 1000 or STAT 1100 is required for students pursuing the Economics/Business Dual major. Students pursuing this major are exempted from taking BUSECN 1010 since its equivalent is ECON 1100.

Economics, BS

General Major Requirements

Majors may earn either a Bachelor of Science or a Bachelor of Arts in economics. The general rules and requirements as they apply to both degrees are as follows:

- A minimum overall 2.00 GPA is required in all economics courses for graduation with an economics major.
- A minimum grade of C- is required in ECON 0100 - INTRO MICROECONOMIC THEORY, ECON 0110 - INTRO MACROECONOMIC THEORY, ECON 1100 - INTERMEDIATE MICROECONOMICS, ECON 1110 - INTERMEDIATE MACROECONOMICS, MATH 0120 and MATH 0220.
- No ECON course that counts toward the major may be taken on an S/NC basis.
- Students must complete at least one writing-intensive (W) course in the major.
- Credit by exam is usually not accepted, but students should check with the departmental advisor about the possibility.
- Majors may choose to complete a double major. Frequently chosen double majors include economics with computer science, history, and philosophy. Less frequently chosen are the sciences (notably biology), which could lead to graduate-level options in public health fields. Interested students have the option of completing a joint major with the mathematics department that will prepare students for a quantitatively oriented job in industry or for entering graduate school in applied mathematics, statistics, economics, business, or a related field (see mathematics major). A structured program leading to a joint Dietrich School /business major is available for students interested in combining economics with business (see Nondepartmental Dietrich School Majors for details).
- ECON 0800, ECON 0810, and ECON 0820 are designed for non-majors are therefore do not count toward the major.
- Internship credits do not count toward the major. Students are encouraged to do internships.

- Only three credits of ECON 1901 through ECON 1903 may be applied toward the credits required for the major.
- Honors in economics is granted if, in addition to fulfilling all requirements for the economics major, the student meets the following criteria:
    - Maintenance of a GPA of 3.5 in all economics courses
    - Maintenance of an overall GPA of 3.5 or better
    - Completion of at least 3 credits in the economics proseminar series (ECON 1700-ECON 1730)

Requirements

Students seeking a BS in economics must earn at least 24 credits in economics courses including the following:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- Two economics elective courses
- Two ECON 1000-level courses that require ECON 1100 or ECON 1110 or their equivalents as prerequisites
- ECON 0900 - ECONS: INT FOR FIELD MAJORS

One of the following

- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1180 - MATHEMATICAL ECONOMICS

Note:

*ECON 0800 does not count was an ECON elective course

Students seeking the BS must also take the following corequisite courses:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

One of the following

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- STAT 1000 - APPLIED STATISTICAL METHODS

Minor

Economics Minor

Requirements

The set of courses required for the minor in economics provides an introduction to the core theory in economics and explores some of the issues that economists study. The four core theory courses are taught each term, along with a broad range of applied economics courses. The required courses (totaling 15 credits) are as follows:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

- ECON 1100 - INTERMEDIATE MICROECONOMICS or
- ECON 1110 - INTERMEDIATE MACROECONOMICS

- Two additional ECON courses

Note:

Courses in the 0800 series do not count toward the 15 credits required for the minor in economics, and only 3 credits of ECON 1901 - ECON 1903, directed studies, may be applied toward minor requirements. Other than these restrictions, the two additional courses mentioned above may be any of the courses offered by the department.

Joint Major

Economics-Statistics, BS

The economics-statistics joint major is intended for students who are interested in economics and enjoy modeling and analyzing data. Although the number of such students is not large, there are usually a few each year who express an interest in pursuing both economics and statistics in a depth suitable for a major. More often than not, these students are prime candidates for graduate school, and want to keep their options open as to which field to enter later. Short of completing two bachelor's degrees, their only option now is to major in one subject and minor in the other. If they later decide to attend graduate school in their minor subject, they are likely to be less competitive for admission to the best departments than if they had majored in that subject.

A joint major provides a useful compromise to keep their options open. Additionally, a joint major in economics and statistics can be an excellent training ground for the more quantitative areas of business (such as forecasting, investment management, actuarial planning, and accounting), health management, and public health, without losing the breadth provided by a liberal arts program. Graduates of the joint major who are interested in these areas will have the requisite skills for further training or for immediate entrance into the job market. The curriculum for the joint major consists of eight economics courses and eight statistics courses, along with a statistics writing practicum and three mathematics courses, for a total of 62 credits.

Course Requirements

Economics courses as follows:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1200 - GAME THEORY
- One economics elective course*
- One ECON 1000-level courses that requires ECON 1110 or ECON 1110 as a prerequisite

Note:

*ECON 0800 does not count as an ECON elective course.

Statistics courses as follows:

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLD REGRESSN WRIT COMPONENT
- Four elective STAT courses, chosen from the 1200 level or above: one of these electives must be from the 1600 level or above, excluding internships and directed study courses.

Note:

Students who plan to study statistics at the graduate level are encouraged to take STAT 1631 - INTERMEDIATE PROBABILITY **and** STAT 1632 - INTERMEDIATE MATHEMATICAL STAT.

Mathematics courses as follows:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

One of the following

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS

Note:

Students are strongly encouraged to take a course in linear algebra, such as MATH 0280 - INTRO TO MATRICES & LINEAR ALG **or** MATH 1180 - LINEAR ALGEBRA 1 **or** MATH 1185 - HONORS LINEAR ALGEBRA

Due to the interdisiplinary nature of the major, a related area is not required.

Department of English

The Department of English at the University of Pittsburgh offers two different major programs, English literature and English writing. Both majors are responsive to many of the traditional goals of a liberal arts education: they seek to develop a broad critical and historical understanding of influential cultural traditions and to foster a range of reading and writing strategies as well as skills of critical analysis. The majors prepare students fairly directly for careers in teaching or writing. But the skills and knowledge the majors impart are useful in numerous business and professional settings. For example, an English major is highly regarded as a pre-professional major for further training in law, medicine, or business. The director of academic affairs for the Association of American Medical Colleges has said (1986) that English majors have a higher rate of acceptance at medical schools than students who have majored in the biological and physical sciences.

Major

English Literature, BA

The English literature major is designed to develop a critical understanding of literary and cultural traditions in English that is at once informed, skeptical, and appreciative. Some of the distinctive features of the literature curriculum at the University of Pittsburgh are the recurrent concerns from the introductory to the most advanced undergraduate courses with the following: questions of how and why we read and write and participate in cultural activities; the contexts in which a range of literary texts and films are produced, understood, evaluated, and used; and the changing role of art and culture in the contemporary world. The major offers students opportunities to study canonical works of British and American literature from medieval times to the present; often, these texts will be studied in conjunction with historical or philosophical works, with other national literatures in English, and/or with films or works of popular culture. In many courses, students' own writing will be an important object of study.

Major Requirements

The English literature major requires the completion of 36 credits distributed as follows.

- ENGLIT 0505 - HOW TO DO THINGS WITH LIT 1
- ENGLIT 0506 - HOW TO DO THINGS WITH LITERATURE 2

Two period courses chosen from a listing of approved courses

www.englishlit.pitt.edu/undergraduate/major-requirements

Advanced courses

- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1910 - SENIOR SEMINAR

Six elective courses

- At least four of these courses should fall within the designated area of concentration selected by the student. Students may apply for special approval with the director of the Literature program to count an elective not previously listed in a given area of concentration.
- At least three of these courses must be from the 1000-level or above.
- Students may take up to two courses from other programs in the Department of English (Composition, Film, Writing) designated within their area of concentration. Students may apply for special approval with the director of the Literature program to count an additional elective from another English program.
- At least one of these courses should also fulfill a breadth of study requirement. Students should ask instructors or advisors whether a particular course or section fulfills this requirement.
- Independent study, directed study, teaching assistantships, and internships may count toward any concentration depending upon the nature of the student's work.

Additional information and requirements

- There is no limit on the number of courses English majors may take on an S/NC basis, either inside or outside the department.
- English majors automatically fulfill Dietrich School requirements for W courses.
- Students who contemplate graduate study in English should remember that many schools do require second language competence, sometimes in more than one language.
- The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English departmental courses. The GPA is based on all English department courses, not just those that fulfill major requirements.

English Writing - Fiction Track, BA

English Writing

The University of Pittsburgh's Writing Program is the oldest and one of the largest in the United States, offering tracks in fiction, poetry, nonfiction, and journalism. There is a wide variety of classes, and the maximum size is 22. The Writing Program has a full-time faculty of widely published writers, several visiting writers each year, and a number of part-time faculty who are senior reporters or editors at Pittsburgh newspapers and magazines. Graduates of the writing program include editors at major daily newspapers and publishing houses and winners of the Pulitzer Prize and other major awards.

For more information on the Department of English and the majors in English literature and in English writing, see www.english.pitt.edu.

Major Requirements

A minimum of 33 credits is required: 21 credits in English writing courses and 12 in English literature courses.

Majors must choose one of three tracks: fiction, poetry, and nonfiction. In most cases, students will take other writing courses as well. Each track consists of three levels of courses. The introductory courses (0500s) offer a broad introduction to the skills required of writers in a particular area and generally should be taken no later than the first term of the junior year. The intermediate courses (1000s for fiction, 1200s for poetry, 1300s for nonfiction) refine and develop those skills. The senior seminars (1700s) provide a capstone experience for the student writer. Students should check prerequisites carefully before registration.

Students must complete one of the following prerequisite courses before declaring the major.

- ENGCMP 0200 - SEMINAR IN COMPOSITION
- ENGCMP 0203 - SEM CMPSTN: GENDER STUDIES
- ENGCMP 0205 - SEMINAR IN COMPOSITION: FILM
- ENGCMP 0207 - SEMNR IN COMPOSITN: EDUCATION
- ENGCMP 0208 - SEM IN CMPSTN: SERVICE-LEARNG
- FP 0003 - FRESHMAN SEMINAR
- FP 0006 - FRESHMAN SEMINAR

Fiction Track

- ENGWRT 0520 - INTRO TO FICTION WRITING
- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1020 - ADVANCED FICTION
- ENGWRT 1094 - READINGS IN CNTMPRY FICTION
- ENGWRT 1710 - SENIOR SEMINAR IN FICTION
- Three ENGWRT elective courses*
- ENGLIT 0325 - THE SHORT STORY
- Two ENGLIT elective courses from the list below
- One ENGLIT elective course at the 1000-level from the list below

Note:

Elective courses may be taken in another track if the student wishes.

Approved English Literature (ENGLIT) courses

- ENGLIT 0500 - INTRO TO CRITICAL READING
- ENGLIT 0505 - HOW TO DO THINGS WITH LIT 1
- ENGLIT 0560 - CHILDREN AND CULTURE
- ENGLIT 0562 - CHILDHOOD'S BOOKS
- ENGLIT 0570 - AMERICAN LITERATURE
- ENGLIT 0573 - LITERATURE OF THE AMERICAS
- ENGLIT 0580 - INTRODUCTION TO SHAKESPEARE
- ENGLIT 0590 - FORMATIVE MASTERPIECES
- ENGLIT 0597 - BIBLE AS LITERATURE
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0615 - LITERATURE AND RACE
- ENGLIT 0616 - LITERATURE AND MIGRATION

- ENGLIT 0625 - DETECTIVE FICTION
- ENGLIT 0626 - SCIENCE FICTION
- ENGLIT 0627 - LITERATURE OF SPORTS
- ENGLIT 0628 - WORKING CLASS LITERATURE
- ENGLIT 0629 - THE WILD WEST
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0635 - NEW LITERATURE
- ENGLIT 0636 - THE GOTHIC IMAGINATION
- ENGLIT 0640 - ALLEGORY
- ENGLIT 0641 - TRAGEDY
- ENGLIT 0642 - COMEDY
- ENGLIT 0643 - SATIRE
- ENGLIT 0644 - MYTH AND FOLKTALE
- ENGLIT 0645 - FANTASY
- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 1020 - HISTORY OF LITERARY CRITICISM
- ENGLIT 1023 - CONTEMPORARY CRITICAL THEORY
- ENGLIT 1028 - LITERATURE AND PSYCHOANALYSIS
- ENGLIT 1100 - MEDIEVAL IMAGINATION
- ENGLIT 1105 - MIDDLE ENGLISH LITERATURE
- ENGLIT 1115 - CHAUCER
- ENGLIT 1125 - MASTRPCS OF RENAISSNC LIT
- ENGLIT 1135 - LIT, MEDIA, SCI IN AGE SHAKESP
- ENGLIT 1126 - ADVANCED SHAKESPEARE
- ENGLIT 1127 - SHAKESPEARE ON FILM
- ENGLIT 1128 - SHAKESPEARE'S SEXUALITIES
- ENGLIT 1132 - ELIZABETHAN AND JACOBEAN DRAMA
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1170 - ROMANTIC NATURE
- ENGLIT 1175 - 19TH CENTURY BRITSH LITERATURE
- ENGLIT 1180 - HUMNS, ANMLS, MACHS VICT LIT
- ENGLIT 1181 - VICTORIAN NOVEL
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1210 - THE AMERICAN RENAISSANCE
- ENGLIT 1220 - CVL WAR TO WW1 IN AMER LIT
- ENGLIT 1250 - 20TH CENTURY AMERICAN LIT
- ENGLIT 1255 - THEATER & ACTIVISM
- ENGLIT 1272 - THE ROARING 20'S
- ENGLIT 1280 - CNTMPRY AMERICAN WOMEN WRITERS
- ENGLIT 1325 - MODERNISM
- ENGLIT 1360 - TOPICS IN 20TH CENTURY LIT
- ENGLIT 1370 - MAKERS OF MODERN DRAMA
- ENGLIT 1372 - CONTEMPORARY DRAMA
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH
- ENGLIT 1587 - UTOPIAN LITERATURE
- ENGLIT 1607 - ADVANCED SHORT STORY
- ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT
- ENGLIT 1704 - WOMEN NOVELISTS
- ENGLIT 1756 - BALLADS AND BLUES
- ENGLIT 1738 - IRISH LITERATURE
- ENGLIT 1772 - ADOPTION LITERATURE

Additional information and requirements

- A minimum grade of C or better (not C-) is required in a 0500-level writing course to advance to the first 1000-level course in that track. Students who earn less than a C in their first 1000-level course may not advance to other courses in that track. Moreover, students must earn a C or better (not C-) grade in their senior seminar or internship course.
- Students are encouraged to take additional writing and literature courses beyond the required minimum. Courses in film studies, women's studies, business, and technical writing are particularly useful for English writing majors.
- The Writing Program recommends related areas in second languages, literature in translation, or linguistics; a related area in history or political science is appropriate for students concentrating in journalism.
- Completion of at least one composition course is required for enrollment in a writing program course.
- ENGWRT 0400 - INTRO TO CREATIVE WRITING and ENGWRT 0411 - INTRO TO CREATIVE NONFICTION are optional introductory courses and may be taken during the second year by students who have recently declared a major in writing, are seriously considering writing as a major, or are taking their first 0500-level course. ENGWRT 0400 can only count as an elective towards the Writing degree if taken before ENGWRT 0520 or ENGWRT 0530. Likewise, ENGWRT 0411 may be taken as an elective before ENGWRT 1330 (Nonfiction I).
- There is no limit on the number of courses English majors may take on an S/NC basis, either inside or outside the department.
- English writing majors automatically fulfill Dietrich School requirements for W courses. Students pursuing a second major are required to complete an additional W course for that major.
- Students who contemplate graduate study in English should remember that many schools do require second language competence, sometimes in more than one language.

The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English department courses. The GPA is based on all English department courses, not just those that fulfill major requirements.

English Writing - Nonfiction Track, BA

English Writing

The University of Pittsburgh's Writing Program is the oldest and one of the largest in the United States, offering tracks in fiction, poetry, nonfiction, and journalism. There is a wide variety of classes, and the maximum size is 22. The Writing Program has a full-time faculty of widely published writers, several visiting writers each year, and a number of part-time faculty who are senior reporters or editors at Pittsburgh newspapers and magazines. Graduates of the writing program include editors at major daily newspapers and publishing houses and winners of the Pulitzer Prize and other major awards.

For more information on the Department of English and the majors in English literature and in English writing, see www.english.pitt.edu.

Major Requirements

A minimum of 33 credits is required: 21 credits in English writing courses and 12 in English literature courses.

Majors must choose one of three tracks: fiction, poetry, and nonfiction. In most cases, students will take other writing courses as well. Each track consists of three levels of courses. The introductory courses (0500s) offer a broad introduction to the skills required of writers in a particular area and generally should be taken no later than the first term of the junior year. The intermediate courses (1000s for fiction, 1200s for poetry, 1300s for nonfiction) refine and develop those skills. The senior seminars (1700s) provide a capstone experience for the student writer. Students should check prerequisites carefully before registration.

Students must complete one of the following prerequisite courses before declaring the major.

- ENGCMP 0200 - SEMINAR IN COMPOSITION
- ENGCMP 0203 - SEM CMPSTN: GENDER STUDIES
- ENGCMP 0205 - SEMINAR IN COMPOSITION: FILM
- ENGCMP 0207 - SEMNR IN COMPOSITN: EDUCATION
- ENGCMP 0208 - SEM IN CMPSTN: SERVICE-LEARNG
- FP 0003 - FRESHMAN SEMINAR

- FP 0006 - FRESHMAN SEMINAR

Nonfiction Track

- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1340 - ADVANCED NONFICTION
- ENGWRT 1390 - READINGS IN CNTMPRY NON-FICTN
- ENGWRT 1750 - SENIOR SEMINAR IN NONFICTION
- Three ENGWRT elective courses*
- Two ENGLIT elective courses from the list below
- One ENGLIT elective course at the 1000-level from the list below

One of the following courses

- ENGLIT 0321 - FORMS OF PROSE
- ENGLIT 0399 - NARRATIVE AND TECHNOLOGY

Note:

Elective courses may be taken in another track if the student wishes.

Approved English Literature (ENGLIT) courses

- ENGLIT 0500 - INTRO TO CRITICAL READING
- ENGLIT 0505 - HOW TO DO THINGS WITH LIT 1
- ENGLIT 0560 - CHILDREN AND CULTURE
- ENGLIT 0562 - CHILDHOOD'S BOOKS
- ENGLIT 0570 - AMERICAN LITERATURE
- ENGLIT 0573 - LITERATURE OF THE AMERICAS
- ENGLIT 0580 - INTRODUCTION TO SHAKESPEARE
- ENGLIT 0590 - FORMATIVE MASTERPIECES
- ENGLIT 0597 - BIBLE AS LITERATURE
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0615 - LITERATURE AND RACE
- ENGLIT 0616 - LITERATURE AND MIGRATION
- ENGLIT 0625 - DETECTIVE FICTION
- ENGLIT 0626 - SCIENCE FICTION
- ENGLIT 0627 - LITERATURE OF SPORTS
- ENGLIT 0628 - WORKING CLASS LITERATURE
- ENGLIT 0629 - THE WILD WEST
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0635 - NEW LITERATURE
- ENGLIT 0636 - THE GOTHIC IMAGINATION
- ENGLIT 0640 - ALLEGORY
- ENGLIT 0641 - TRAGEDY
- ENGLIT 0642 - COMEDY
- ENGLIT 0643 - SATIRE
- ENGLIT 0644 - MYTH AND FOLKTALE
- ENGLIT 0645 - FANTASY

- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 1020 - HISTORY OF LITERARY CRITICISM
- ENGLIT 1023 - CONTEMPORARY CRITICAL THEORY
- ENGLIT 1028 - LITERATURE AND PSYCHOANALYSIS
- ENGLIT 1100 - MEDIEVAL IMAGINATION
- ENGLIT 1105 - MIDDLE ENGLISH LITERATURE
- ENGLIT 1115 - CHAUCER
- ENGLIT 1125 - MASTRPCS OF RENAISSNC LIT
- ENGLIT 1135 - LIT, MEDIA, SCI IN AGE SHAKESP
- ENGLIT 1126 - ADVANCED SHAKESPEARE
- ENGLIT 1127 - SHAKESPEARE ON FILM
- ENGLIT 1128 - SHAKESPEARE'S SEXUALITIES
- ENGLIT 1132 - ELIZABETHAN AND JACOBEAN DRAMA
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1170 - ROMANTIC NATURE
- ENGLIT 1175 - 19TH CENTURY BRITSH LITERATURE
- ENGLIT 1180 - HUMNS, ANMLS, MACHS VICT LIT
- ENGLIT 1181 - VICTORIAN NOVEL
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1210 - THE AMERICAN RENAISSANCE
- ENGLIT 1220 - CVL WAR TO WW1 IN AMER LIT
- ENGLIT 1250 - 20TH CENTURY AMERICAN LIT
- ENGLIT 1255 - THEATER & ACTIVISM
- ENGLIT 1272 - THE ROARING 20'S
- ENGLIT 1280 - CNTMPRY AMERICAN WOMEN WRITERS
- ENGLIT 1325 - MODERNISM
- ENGLIT 1360 - TOPICS IN 20TH CENTURY LIT
- ENGLIT 1370 - MAKERS OF MODERN DRAMA
- ENGLIT 1372 - CONTEMPORARY DRAMA
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH
- ENGLIT 1587 - UTOPIAN LITERATURE
- ENGLIT 1607 - ADVANCED SHORT STORY
- ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT
- ENGLIT 1704 - WOMEN NOVELISTS
- ENGLIT 1756 - BALLADS AND BLUES
- ENGLIT 1738 - IRISH LITERATURE
- ENGLIT 1772 - ADOPTION LITERATURE

Additional information and requirements

- A minimum grade of C or better (not C-) is required in a 0500-level writing course to advance to the first 1000-level course in that track. Students who earn less than a C in their first 1000-level course may not advance to other courses in that track. Moreover, students must earn a C or better (not C-) grade in their senior seminar or internship course.
- Students are encouraged to take additional writing and literature courses beyond the required minimum. Courses in film studies, women's studies, business, and technical writing are particularly useful for English writing majors.

The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English department courses. The GPA is based on all English department courses, not just those that fulfill major requirements.

Minor

Creative Writing Minor

As one of the oldest writing programs in the United States, the Writing Program at the University of Pittsburgh has an excellent record of not only producing talented creative writers but also developing the writing skills of undergraduates who go on to work in a variety of professions, including journalism, education, law, and publishing. The minor in Creative Writing fulfills a need that is different from the Certificate in Professional Writing,

with its particular focus on writing in business, non-profit, and legal environments, and the Writing Major, which requires a more substantial commitment of time and study.

Before declaring the minor in Creative Writing, students must complete an English Composition course (ENGCMP 0200, ENGCMP 0203, ENGCMP 0205, ENGCMP 0207, or ENGCMP 0208) to develop the skills necessary for effectively reading and writing at the college level. Students must take ENGWRT 0400 - INTRO TO CREATIVE WRITING.

This minor requires students to complete 18 credits of coursework as follows.

One of the following groups of courses.

Fiction

- ENGWRT 0520 - INTRO TO FICTION WRITING
- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1094 - READINGS IN CNTMPRY FICTION

Poetry

- ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
- ENGWRT 1210 - POETRY WORKSHOP
- ENGWRT 1290 - READINGS IN CNTMPRY POETRY

Nonfiction

- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1390 - READINGS IN CNTMPRY NON-FICTN

Two of the following courses.

- ENGWRT 0520 - INTRO TO FICTION WRITING
- ENGWRT 0530 - INTRODUCTION TO POETRY WRITING
- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION
- ENGWRT 1090 - MASTERING POINT OF VIEW
- ENGWRT 1091 - AUTOBIOG & CREATIVE IMPULSE
- ENGWRT 1092 - WRITER'S JOURNALS
- ENGWRT 1093 - DEVELOPMENT OF A WRITER
- ENGWRT 1095 - TOPICS IN FICTION
- ENGWRT 1293 - TOPICS IN POETRY
- ENGWRT 1399 - TOPICS NON-FICTION: NEWSPAPER
- ENGWRT 1401 - TOPICS NON-FICTION: MAGAZINE
- ENGWRT 1402 - STRUCT/TECHNQS CREATV NONFCTN
- ENGWRT 1403 - TOPC NON-FCTN:ELECTRNC MEDIA
- ENGWRT 1650 - PLAYWRITING 1

English Literature Minor

An undergraduate minor in English literature would help students in a variety of majors to represent significant expertise they have accrued in this field on their transcripts. The structure of the minor will also help direct students with a significant interest in English literature to sequences and sets

of courses that are designed to develop their interest; they can take a mini-curriculum rather than just a smattering of electives. A minor in English literature is a desirable supplement to many degrees across the Dietrich School because it provides insights into cultural traditions and practices, develops students' abilities to write analytic arguments, and promotes critical thinking.

The minor consists of 18 credits and comprises the following courses.

- ENGLIT 0505 - HOW TO DO THINGS WITH LIT 1
- ENGLIT 0506 - HOW TO DO THINGS WITH LITERATURE 2
- Two elective courses at the 0500-level or above
- Two elective courses at the 1000-level or above
- ENGLIT 1900 - PROJECT SEMINAR is recommended but not required.

Film Studies Program

While film studies is not a department, it is an interdisciplinary program and an administrative unit offering both a major and a minor in film studies. Film is one of the major cultural forms of the 20th century, and its study has become an important part of a modern humanities education. At the University of Pittsburgh, the Film Studies Program provides a series of interdisciplinary courses concerning the history, aesthetics, theory, and production of cinema. The program provides courses in critical studies and (by special arrangement with Pittsburgh Filmmakers in Oakland) courses in film, photography, and video production. A major in film studies helps students to understand and appreciate the cinematic medium and to be aware of its impact as a cultural and artistic force. It is also appropriate for students who wish to pursue careers in film teaching, film journalism, film museum curatorial work, film library and archival work, and film and television production. As part of the Film Studies Program, internships are made available to students in many of these fields. (In the past, students have done internships at the Carnegie Museum of Art, the Pittsburgh Film Office, Pittsburgh Filmmakers, and various television stations.)

Various options are available to students interested in film studies. For those students who wish to make film studies the primary focus of their undergraduate program, it is possible to pursue an interdisciplinary major in film studies. For those students who wish to major in another area but desire a focus in film studies, a minor in film studies is available. In addition, many students choose to take elective courses in film studies as part of their undergraduate curriculum.

For more information on the film studies major, see www.filmstudies.pitt.edu/.

Major

Film Studies, BA

Required Courses

The major in film studies major requires the completion of 36 credits distributed as follows.

Two Critical Studies Courses, Normally Taken First

- ENGFLM 0530 - FILM ANALYSIS or
- HAA 0801 - FILM ANALYSIS

- ENGFLM 0540 - WORLD FILM HISTORY or
- HAA 0820 - WORLD FILM HISTORY

One Advanced Seminar, Normally Taken in the Senior Year

- ENGFLM 1920 - ADVANCD SEMINR IN FILM STUDIES

One Production Course, Chosen from the Following

- FILMST 0001 - MOTION PICTURE FUNDAMEMTALS
- FILMST 0200 - BLACK AND WHITE PHOTOGRAPHY 1
- FILMST 0400 - INTRO TO DIGITAL EDITING

At Least Two Courses in Category 1: National Cinemas, Filmmakers

A current Category 1 list from which students can choose their courses is available through the Film Studies Advising office.

At Least Two Courses in Category 2: Themes, Genres, Theory

A current Category 2 list from which students can choose their courses is available through the Film Studies Advising office.

Four Additional Elective Courses to Complete the Major

Additional Rules and Requirements

- ENGFLM 0530 and ENGFLM 0540 or their equivalents should be completed prior to taking any production courses, any 1000-level film courses, and before declaring the major.
- At least five courses that count toward the major must be taken at the 1000 level.
- No more than five production courses may be counted toward the major, although additional production courses can be taken as electives toward graduation.
- Only one three-credit internship can be counted in the production category toward the major.
- For those students taking three or fewer production courses, two courses within the major may be taken in approved related courses in other departments within Arts and Sciences.
- At least 50% of the major courses must be taken at the University of Pittsburgh.
- A minimum GPA of 2.0 in departmental courses is required for graduation.
- No more than three courses that count toward the major can be taken on an S/NC basis.
- Students must complete at least one W-course in the major.
- Common related areas of study completed by film studies majors to fulfill the Arts and Sciences (12-credit) related area requirement are English writing, English or second language literature, history of art and architecture, and history.

Film studies courses fall into three categories. A current list of courses falling into each category is available through the film studies advising office.

- Category 1: National Cinemas, Filmmakers
- Category 2: Themes, Genres, Theory
- Category 3: Film, Photography, Video Production

Note: All courses in Category 3 are offered by special arrangement through Pittsburgh Filmmakers. Enrollment in these classes will be limited to those whose tuition is covered by Arts and Sciences. They will be distributed on a first-come, first-served basis, first to full-time Arts and Sciences students, all of whom must be in good academic standing. To apply for a seat in a Pittsburgh Filmmakers course, students must preregister with the film studies office in room 624 of the Cathedral of Learning two weeks before the first day of Arts and Sciences registration. Failure to attend the first class of the term will mean automatic loss of the seat. Students will not be permitted to take more than one course per term.

Minor

Film Studies Minor

Required Courses

Two Critical Studies Courses

- ENGFLM 0530 - FILM ANALYSIS or
- HAA 0801 - FILM ANALYSIS

- ENGFLM 0540 - WORLD FILM HISTORY or
- HAA 0820 - WORLD FILM HISTORY

Four Elective Courses

Electives must be taken from at least two of the three categories listed. No more than two courses can be taken from Category III.

Note:

Only one elective course for the minor can be taken on an S/NC basis. Half of the courses for the minor must be taken at Pitt. Students pursuing the minor must meet with the film studies advisors to check their progress. Courses taken at other schools must be approved.

Department of French and Italian Languages and Literature

A major in French and/or Italian gives students at the University of Pittsburgh the opportunity to study a second language in detail and to acquire an education in a literary and cultural tradition central to the humanities. Studying French and/or Italian language and literature prepares students for graduate study in law and international affairs; advanced work in the humanities; and careers in business, governmental service, and teaching. The University is committed to international study, and students are encouraged to take advantage of the numerous opportunities to study abroad. Students can also combine a major in French and/or Italian with a second major in a field such as political science, history, biology, or economics. Students who choose to study the grammar, linguistics, rhetoric, literature, and film of Italy and/or the Francophone world will acquire an invaluable technical resource and an in-depth knowledge of a diverse and foundational intellectual tradition. Students may also minor in French and/or Italian. For more information on the Department of French and Italian Languages and Literatures, see our Web site at www.frenchanditalian.pitt.edu.

Major

French, BA

General Requirements for both French and Italian Majors

The following requirements apply to both French and Italian majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Students may choose courses from three areas: language, literature, and civilization.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French or Italian, demonstrate superior performance in departmental courses, and be enrolled in 1000-level French/Italian courses preferably no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

Majors in French must have completed two years of college work or the equivalent before beginning core courses. The French major consists of at least 31 credits above the intermediate level. Elementary and intermediate French language courses (FR 0001 through FR 0004) do not count toward the major. Required credits follow.

- FR 0020 - FRANCE IN THE 21ST CENTURY
- FR 0021 - APPRCHES TO FRENCH LITERATURE
- FR 0027 - THE FRENCH ATLANTIC
- FR 0055 - FRENCH CONVERSATION
- FR 0056 - WRITTEN FRENCH 1
- FR 0058 - ADVANCED FRENCH CONVERSATION

Note:

Majors are expected to take one credit of FR 0058 - ADVANCED FRENCH CONVERSATION, but they may take two additional credits of the course as a nonmajor elective.

In addition to the basic requirements

the following criteria must be met by French majors:

- Once the basic requirements are met, students will, in consultation with their advisor, design a program that corresponds to their needs, but they must take an additional 15 credits at the 1000 level. Twelve credits must be in courses taught in French.
- French majors may take one course above 0004, in addition to 0058, on an S/NC option.
- Although study abroad is not a requirement for the major in French, students are strongly encouraged to consider participating in a study-abroad program in a French-speaking country during their undergraduate career.
- Students must complete at least one W course within the major.

The Dietrich School requires 12 credits in a related area to be chosen in consultation with the program advisor. This requirement can also be met by completing an official minor in another area.

Italian Language and Literature, BA

General Requirements for both French and Italian Majors

The following requirements apply to both French and Italian majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Students may choose courses from three areas: language, literature, and civilization.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French or Italian, demonstrate superior performance in departmental courses, and be enrolled in 1000-level French/Italian courses preferably no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

Majors in Italian Language and Literature, after one year of college instruction in the language, may enroll in ITAL 0003 - INTERMEDIATE ITALIAN 1 for credit toward the major. The major consists of at least 33 credits above elementary Italian. ITAL 0001 and ITAL 0002 Elementary Italian 1 and 2, which do not count toward the major and must include the following courses:

- ITAL 0003 - INTERMEDIATE ITALIAN 1
- ITAL 0004 - INTERMEDIATE ITALIAN 2
- ITAL 0055 - ITALIAN CONVERSATION & CULTURE
- ITAL 0080 - ITALIAN CULTURAL HERITAGE 1 *
- ITAL 0081 - ITALIAN CULTURAL HERITAGE 2 *

- Five 1000-level elective courses at least three of which must be taught in Italian. No more than two of these courses may be taught in English.

Note:

* Because ITAL 0080 and ITAL 0081 have no prerequisites and are taught in English, the department recommends that students interested in an Italian major take those courses as early in their studies as possible.

In addition to those basic course requirements

the following criteria apply to Italian majors:

- Two courses in the 1080 or 1050 series (courses taught in English) may be counted toward the major if the student completes a specified part of the work in Italian.
- A minimum GPA of 2.0 in departmental courses is required for graduation.
- Majors may not take any courses on the S/NC basis.
- A 12-credit related area may be chosen from humanities and social sciences including a second language, linguistics, history, English, history of art and architecture, communication, music, and political science, or another subject as arranged with the major advisor.
- Students must complete at least one W course within the major. ITAL 0060, ITAL 0061, and ITAL 1041 fulfill this requirement.

Italian Studies, BA

General Requirements for both French and Italian Majors

The following requirements apply to both French and Italian majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Students may choose courses from three areas: language, literature, and civilization.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French or Italian, demonstrate superior performance in departmental courses, and be enrolled in 1000-level French/Italian courses preferably no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

The Italian Studies Major promotes the cross-discipline exploration of a variety of areas relating to Italian and Italian American culture: language, literature, theater, cinema, art and architecture, music, history, social and immigration history, politics and political theory, history and philosophy of science, classical studies, and religious studies. The major consists of at least 33 credits above elementary Italian (ITAL 0001 and ITAL 0002 Elementary Italian 1 and 2, which do not count toward the major) and must include the following courses.

- ITAL 0003 - INTERMEDIATE ITALIAN 1
- ITAL 0004 - INTERMEDIATE ITALIAN 2
- ITAL 0055 - ITALIAN CONVERSATION & CULTURE

One of the following courses

- ITAL 0060 - LITERARY ITALIAN 1
- ITAL 0061 - LITERARY ITALIAN 2

One of the following courses

- ITAL 0080 - ITALIAN CULTURAL HERITAGE 1
- ITAL 0081 - ITALIAN CULTURAL HERITAGE 2

Six additional courses

Six additional courses, which can be taught either in Italian or English. At least three of these elective courses must be at the 1000-level, and at least two of them must be courses offered by the Italian program. The remaining courses can be selected from an approved list of other departments' offerings. Italian Studies majors are encouraged to continue their study of the Italian language to the greatest extent possible.

Minor

French Minor

Requirements for French and Italian Minors

The French and Italian department offers four tracks within its minor offerings: French language and literature, French studies, Italian language and literature, and Italian studies. Each minor also offers requirement options.

Requirements

Students can complete the minor in French with five courses chosen from the following list. Only one of the courses may be taught in English. Students whose programs will include two or more courses taught in English should declare the French Studies minor.

15 credits:

- FR 0003 - INTERMEDIATE FRENCH 1
- FR 0004 - INTERMEDIATE FRENCH 2
- FR 0006 - SPECIAL TOPICS IN CONVR & CULT
- FR 0020 - FRANCE IN THE 21ST CENTURY
- FR 0021 - APPRCHES TO FRENCH LITERATURE
- FR 0027 - THE FRENCH ATLANTIC
- FR 0055 - FRENCH CONVERSATION
- FR 0056 - WRITTEN FRENCH 1
- FR 0057 - WRITTEN FRENCH 2
- FR 0081 - FRENCH THEATRE
- Four French electives on literary, cultural, or linguistic topics taught in French (FR 1000 through FR 1079)
- FR 1084 - POLITICS IN MODERN FR LITRATUR
- FR 1085 - WOMEN'S VOICES IN FRENCH LIT
- FR 1088 - SPECIAL TOPICS
- FR 1089 - FRANCOPHONE AFRCNA LITERATURE

One of the following

- FR 0080 - MODERN FRENCH NOVEL
- FR 0085 - FRENCH FILM 1930-1960

Note:

Minors may not take any courses on the S/NC basis.

French Studies Minor

Requirements for French and Italian Minors

The French and Italian department offers four tracks within its minor offerings: French language and literature, French studies, Italian language and literature, and Italian studies. Each minor also offers requirement options.

Requirements

Students can complete the minor in French Studies with five courses chosen from the following list.

15 credits:

- FR 0003 - INTERMEDIATE FRENCH 1
- FR 0004 - INTERMEDIATE FRENCH 2
- FR 0006 - SPECIAL TOPICS IN CONVR & CULT
- FR 0020 - FRANCE IN THE 21ST CENTURY
- FR 0021 - APPRCHES TO FRENCH LITERATURE
- FR 0027 - THE FRENCH ATLANTIC
- FR 0055 - FRENCH CONVERSATION
- FR 0056 - WRITTEN FRENCH 1
- FR 0057 - WRITTEN FRENCH 2
- Three electives on literary and cultural topics taught in English or French (FR 0080 through FR 0089)
- Four electives on literary and cultural topics taught in English or French (FR 1000-FR 1096)

Note:

Minors may not take any courses on the S/NC basis.

Italian Minor

Requirements for French and Italian Minors

The French and Italian department offers four tracks within its minor offerings: French language and literature, French studies, Italian language and literature, and Italian studies. Each minor also offers requirement options.

Requirements

Any combination of five courses from the following list.

- ITAL 0001 - ELEMENTARY ITALIAN 1
- ITAL 0002 - ELEMENTARY ITALIAN 2
- ITAL 0003 - INTERMEDIATE ITALIAN 1
- ITAL 0004 - INTERMEDIATE ITALIAN 2
- ITAL 0055 - ITALIAN CONVERSATION & CULTURE
- ITAL 0060 - LITERARY ITALIAN 1
- ITAL 0061 - LITERARY ITALIAN 2

- ITAL 0080 - ITALIAN CULTURAL HERITAGE 1
- ITAL 0081 - ITALIAN CULTURAL HERITAGE 2
- ITAL 0087 - FOOD FOR THOUGHT
- ITAL 0088 - ITALIAN AMERICA ON SCREEN
- ITAL 1030 - ADVANCED COMPOSITION
- ITAL 1032 - INT TO ITALIAN LINGUISTICS
- ITAL 1041 - ITALIAN THEATRICAL WORKSHOP
- ITAL 1059 - SPEC TOPICS IN 20THC ITAL LIT
- ITAL 1060 - SPECIAL TOPICS
- ITAL 1061 - DANTE 1
- ITAL 1062 - DANTE 2
- ITAL 1064 - NOVEL
- ITAL 1065 - SONGS OF THE ITALIAN SELF
- ITAL 1066 - EPIC POETRY
- ITAL 1067 - ITALIAN THEATER
- ITAL 1068 - ITALIAN NOVELLA
- ITAL 1069 - LITERATURE INTO FILM
- ITAL 1070 - LITERATURE AND POLITICS
- ITAL 1079 - INTRO TO HOLOCAUST LITERATURE
- ITAL 1080 - MASTERPIECES OF ITALIAN PROSE
- ITAL 1081 - DANTE'S DIVINE COMEDY
- ITAL 1082 - ITALIAN RENAISSANCE LITERATURE
- ITAL 1083 - MODERN ITALIAN LITERATURE
- ITAL 1085 - DANTE, PETRARCH, AND BOCCACCIO
- ITAL 1086 - ITALIAN THEATER IN ENGLISH
- ITAL 1087 - FASCISM AND RESISTANCE
- ITAL 1088 - TOPICS ITALIAN AMERCN STUDIES
- ITAL 1089 - SPECIAL TOPICS
- ITAL 1090 - INTRO TO TRANSLATION STUDIES
- ITAL 1092 - CAPSTONE ITALIAN TRANSLATION

Note:

Minors may not take any courses on the S/NC basis.

Department of Gender, Sexuality, and Women's Studies

The Gender, Sexuality, and Women's Studies program at the University of Pittsburgh is committed to promoting feminist and LGBTQIA activism, pedagogy, and scholarship that engage with the larger local, national, and global communities. Program offerings provide opportunities for students and faculty to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

Certificate in Gender, Sexuality, and Women's Studies

The Gender, Sexuality, and Women's Studies program is an interdisciplinary academic program focusing on gender, sexuality, and women. Gender, Sexuality, and Women's Studies (GSWS) courses and cross-listed courses in various departments across the university provide opportunities for all students to broaden their understandings of the changing role of gender in the United States and globally. Students who want to explore the intersection of gender with race, class, ethnicity, nation, religion, ability, age, sex and sexuality will find courses of interest, as will students who want to know more about the role of women in history, in literature and the arts, in media and science. Students who plan careers in medicine, the

creative arts, social work, education, counseling, law, therapy, academia, and business find that this program's courses enhance their professional activities. Still others report that the confidence and insight that they acquire in such courses enriches their lives regardless of their particular career goals. For more information, please visit the Gender, Sexuality, and Women's Studies Program in 401 Cathedral of Learning or online at www.gsws.pitt.edu.

Major

Gender, Sexuality, and Women's Studies, BA

Major Requirements

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines. This major requires 30 credits, distributed as follows.

Core courses

- GSWS 0100 - INT TO GENDER, SEXTY, & WOMNST
- GSWS 0500 - INTRO TO FEMINIST THEORY
- GSWS 0550 - SEX AND SEXUALITIES

Two elective courses

choose one from each of the following groups

Group A

- GSWS 0200 - SEX, RACE, & POPULAR CULTURE
- GSWS 0210 - Wired Women
- GSWS 0220 - Contemporary Issues and Arguments
- GSWS 0350 - SPECIAL TOPICS IN GSWS

Group B

- AFRCNA 0454 - MAN/WOMAN LITERATURE
- ANTH 0768 - HUMAN SEXUALITY IN CROS CULTUR
- ENGCMP 0203 - SEM CMPSTN: GENDER STUDIES
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- FR 0012 - FRENCH KISS
- GSWS 1140 - SPECIAL TOPICS
  - Pitt in China, Pitt in London, etc.
- GSWS 1900 - INTERNSHIP (junior or senior only)
- PSY 0184 - PSYCHOLOGY OF GENDER
- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0446 - SOCIOLOGY OF GENDER
- Any course officially cross-listed with GSWS (check course offerings each semester for options)

Four upper-level courses

choose two from each group

Group A

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1150 - GLOBAL FEMINISMS
- GSWS 1160 - RACE, GENDER, AND CLASS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1235 - LANGUAGE, GENDER AND SOCIETY
- GSWS 1450 - GENDER AND SUSTAINABILITY

Group B

- ADMJ 1242 - GENDER, RACE, CLASS, AND CRIME
- AFRCNA 1309 - WOMN OF AFRC & AFRCN DIASPORA
- ANTH 1738 - GENDER PERSPECTIVES IN ANTHRO
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1160 - VISUAL RHETORIC
- ENGFLM 1703 - GENDER AND FILM
- ENGLIT 1704 - WOMEN NOVELISTS
- FR 1085 - WOMEN'S VOICES IN FRENCH LIT
- HIST 1560 - WOMEN IN LATIN AMER HISTORY
- HIST 1662 - TOPICS IN WOMEN'S HISTORY
- LEGLST 1315 - SEX, LAW AND MARRIAGE
- MUSIC 1398 - WOMEN & MUSIC CROS-CULTL PERSP
- PS 1622 - WOMEN AND POLITICAL THEORY
- PSY 1110 - PSYCHLGCL ASPCT HUMN SEXUALITY
- RELGST 1648 - GENDER & THE JEWISH TRADITION
- SOC 1413 - MARRIAGE
- SOC 1448 - WORKING WOMEN
- Any 1000-level course officially cross-listed with GSWS (check course offerings each semester for options)

Capstone

- GSWS 1910 - CAPSTONE

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major. Students must also have a minimum GPA of 2.0 in all GSWS courses. Students may have no more than six credits overlap with another major or certificate.

Writing (W) requirement

Students must complete at least one writing-intensive (W) course with the GSWS subject designation. Check the Course Descriptions Web site (www.courses.as.pitt.edu) each term for writing-intensive course options.

Related area

A minimum of 12 credits is required in any one Dietrich School department or in a thematic cluster chosen in consultation with the major advisor. The completion of an official Dietrich School minor or a Dietrich School or UCIS certificate also satisfies this requirement.

Certificate

Gender, Sexuality, and Women's Studies Certificate

The Gender, Sexuality, and Women's Studies program is an interdisciplinary academic program focusing on gender, sexuality, and women. Gender, Sexuality, and Women's Studies (GSWS) courses and cross-listed courses in various departments across the university provide opportunities for all students to broaden their understandings of the changing role of gender in the United States and globally. Students who want to explore the intersection of gender with race, class, ethnicity, nation, religion, ability, age, sex and sexuality will find courses of interest, as will students who want to know more about the role of women in history, in literature and the arts, in media and science. Students who plan careers in medicine, the creative arts, social work, education, counseling, law, therapy, academia, and business find that this program's courses enhance their professional activities. Still others report that the confidence and insight that they acquire in such courses enriches their lives regardless of their particular career goals. For more information, please visit the Gender, Sexuality, and Women's Studies Program in 401 Cathedral of Learning or online at www.gsws.pitt.edu.

Requirements

Please consult the Gender, Sexuality and Women's Studies Undergraduate Advisor to plan your program of study.

A minimum of 18-credits, completed with an overall GPA of 2.00 is required, as follows:

- GSWS 0100 - INT TO GENDER, SEXTY, & WOMNST
- One of the following, though students are encouraged to take both courses
- GSWS 0500 - INTRO TO FEMINIST THEORY
- GSWS 0550 - SEX AND SEXUALITIES
- Three elective courses from at least two different academic departments. GSWS may count as one of these programs. Courses must be approved for GSWS credit; consult the Course Descriptions Web site, www.courses.as.pitt.edu, for current listings
- At least one 1000-level course with a GSWS subject; a cross-listed course **will not** fulfill this requirement.

Department of Geology and Environmental Science

The Department of Geology and Planetary Science studies the Earth and how it works. The earth is a fascinating natural system that supports many interactions between the solid earth, oceans, atmosphere, life, and various solar system objects. The primary goal of our geology and environmental geology majors (both BS programs) is a scientific understanding of these natural systems and their significant and sometimes surprising variations over geologic time. In addition, these students often seek a solid scientific grounding in earth resources and environmental problems. Our popular environmental studies major (a BA program) focuses on the economic, political, and legal issues that conspire to either cause or prevent the solution of environmental problems. Our programs are popular with people who love nature, who want to understand how the earth works, and who want to understand the many dimensions of modern environmental issues. For more information on our programs, please visit www.geology.pitt.edu.

Major

Environmental Science, BS

Environmental Science aims to understand every aspect of modern and ancient Earth. A degree in environmental science provides the diverse skills required to work in many different employment settings. For example, the acquired scientific and mapping skills are great for jobs in parks and forestry management, museum work, science education, urban and suburban planning, and jobs that involve natural resource issues. Within the field of geology, environmental and geotechnical jobs exist for people with BS degrees. A master's degree provides better job opportunities in those fields, as well as in oil and gas exploration, which can be enormously rewarding both intellectually and financially. A PhD provides additional employment

options, especially in universities and government labs. Internships enable students to meet potential employers, learn about real world opportunities, and sample different types of work.

Geology deploys an interdisciplinary mix of physics, chemistry, biology, math, and natural science to understand the mysteries of nature. It focuses on the solid Earth (rocks, minerals, mountain belts, volcanoes, earthquakes, sedimentary basins, oil and gas deposits, etc.) as well as the history of life (paleontology) and its impact on the Earth. In recent decades, geologists have become increasingly concerned with the history of the Earth's climate, how the physical and chemical behavior of the oceans has changed over time, and how drifting continents and evolving life have interacted to control the composition of the atmosphere and oceans and hence to control global climate. Geologists also examine how human activities affect our environment, including the quality of air, water, and soil.

Geology majors have hiked the Appalachian Trail, gone backpack camping with at-risk youth in the Utah deserts, bicycled across North America, plumbed the depts. Of unexplored caves, and traveled to Mongolia in pursuit of summer research. Geology majors take a six week summer field camp that features extensive hiking in the western U.S., Italy, New Zealand, or other places around the world. To see whether environmental science is a good major for you try a geology class (GEOL 0040, GEOL 0800, or GEOL 0860) and the Physical Geology Lab (GEOL 0055). Make sure you are comfortable with the required biology, chemistry, math, and physics courses.

The Environmental Science major requires completion of at least 63 credits, as follows.

Core courses required for the major

One of the following courses

- GEOL 0800 - GEOLOGY
- GEOL 0820 - NATURAL DISASTERS
- GEOL 0860 - ENVIRONMENTAL GEOLOGY

All of the following courses

- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 1015 - GEOLOGY COLLOQUIUM
- GEOL 1030 - THE ATMOSPHERE, OCEANS & CLMTE
- GEOL 1051 - GROUNDWATER GEOLOGY
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1904 - DIRECTED READING

One of the following capstone courses

- GEOL 1903 - UNDERGRADUATE RESEARCH
- GEOL 1910 - UNDERGRADUATE THESIS
- GEOL 1960 - FIELD CAMP
- Research Experiences for Undergraduates

Co-requirements for the major

All of the following courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)

Three of the following courses

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1 and
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1

- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2 and
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

- CHEM 0120 - GENERAL CHEMISTRY 2
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
- STAT 1000 - APPLIED STATISTICAL METHODS

Geology electives

Students must complete nine credits of GEOL at the 1000 level or above. A list of eligible courses follows. Courses indicated by an asterisk (*) are recommended for Environmental Science majors.

- GEOL 0060 - HISTORY OF THE EARTH
- GEOL 1001 - MINERALOGY
- GEOL 1003 - IGNEOUS & METAMORPHIC PETROLGY
- GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 1052 - PALEOCLIMATOLOGY
- GEOL 1055 - ENVRL ETHCS, SCI & PBLC POLCY
- GEOL 1056 - UHC ENV ETHCS, SCI & PBLC POLC
- GEOL 1100 - STRUCTURAL GEOLOGY
- GEOL 1201 - INVERTEBRATE PALEONTOLOGY
- GEOL 1240 - EVOLUTION OF THE VERTEBRATES
- GEOL 1309 - PHYSICOCHEMICAL GEOLC LIMN
- GEOL 1313 - COM ENVIRONMNTAL PROFESSIONALS
- GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1446 - ADV GEOGRAPHICAL INFORMTN
- GEOL 1460 - INTRODUCTION TO REMOTE SENSING
- GEOL 1701 - GEOLOGY OF THE PLANETS
- GEOL 1900 - INTERNSHIP
- GEOL 1901 - INDEPENDENT STUDY
- GEOL 1903 - UNDERGRADUATE RESEARCH
- GEOL 1904 - DIRECTED READING
- GEOL 1XXX Other upper-level class in GEOL, approved by the major advisor
- GEOL 2054 - SOILS: GEOBIOCHEMICAL LANDSCAPES
- GEOL 2525 - STABLE ISOTOPE GEOCHEMISTRY
- GEOL 2853 - WATERSHED HYDROLOGY AND BIOGEOCHEMISTRY
- GEOL 2XXX Graduate level GEOL class, instructor permission required

Other Requirements

Grades: Students must maintain a minimum GPA of 2.0 in departmental courses to graduate with a BS degree in Environmental Science

Satisfactory/No Credit: No GEOL course that counts toward the major can be taken on an S/NC basis. No more than two of the non-geological science courses that count toward the major may be taken on an S/NC basis.

Writing requirement: Students must complete at least one writing-intensive (W) course in the major.

Related area: A minimum of 12 credits is required in any one Dietrich School department chosen in consultation with the major advisor. The completion of an official Dietrich School minor or certificate or a UCIS certificate also satisfies this requirement.

Environmental Studies, BA

Rapid growth in human population and development has led to complex environmental problems on local and global scales. The way in which we address these issues will have a profound effect on our society and planet in the coming century. Enlightened solutions require a strong component of scientific knowledge and an awareness of the relevant societal issues. A major in environmental studies will equip students with an understanding of earth systems and the environment, including the role of geologic processes on human activity and the impact of humans on the biosphere, atmosphere, hydrosphere, and global climate. Courses in the natural and social sciences supplement a traditional liberal arts curriculum to provide a comprehensive, interdisciplinary background in the scientific, economic, political, and social aspects of human interaction with the environment.

The environmental studies major provides a strong background for students who seek careers in fields such as resource development and management, environmental policy and regulation, risk assessment, land use planning, public policy, and education. Potential employers include local, state, or federal government organizations; consulting firms; or companies that are affected by environmental issues or regulations. Graduates of the Environmental Studies Program can also pursue postgraduate study in fields such as business, law, medicine, public policy, education, international relations, urban and regional planning, environmental management, and public health.

Major Requirements

The major consists of core courses, co-requirements, and electives. The core courses provide a fundamental understanding of environmental processes, issues, and policy and culminate in an environmental science field course and an interdisciplinary capstone course on science and public policy. The co-requirements provide the necessary background for advanced study. Majors are encouraged to undertake an independent research project, internship, or senior thesis.

Core courses required for the major include the following (33 credits):

- GEOL 0030 - ATMOSPHERE, OCEANS, AND CLIMATE
- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 1313 - COM ENVIRONMNTAL PROFESSIONALS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- LEGLST 1320 - LAW AND ENVIRONMENT

One of the following courses

- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 0800 - GEOLOGY
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 0860 - ENVIRONMENTAL GEOLOGY

One of the following courses

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON 0120 - INTRODUCTORY ECONOMIC THEORY
- ECON 0800 - INTRODUCTION TO ECONOMICS

One of the following options

- EOH 2180 - INTRODUCTION TO RISK SCIENCES and
- EOH 2181 - RISK ASSESSMENT PRACTICUM

- HPS 0611 - PRINCPL OF SCIENTIFIC REASNING

One of the following courses

- GEOL 1055 - ENVRL ETHCS, SCI & PBLC POLCY
- GEOL 1056 - UHC ENV ETHCS, SCI & PBLC POLC

Environmental field course:

(at least 2 credits from one of the following)

- BIOSC 0740 - YELLOWSTONE FIELD COURSE *

Note:

* This requirement can be satisfied by taking any BIOSC course offered at the Pymatuning Ecology Laboratory or an approved environmental science field course offered through an outside institution. In either case, the substituted course must have a credit value of not less than two credits.

Environmental Internship course

- GEOL 1900 - INTERNSHIP , 3 or 4 credits

Co-requirements (12 credits):

- CHEM 0110 - GENERAL CHEMISTRY 1

One of the following options

- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

One of the following courses

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STAT & PROBLTY FOR BUS MGT

Electives (24 credits) in one of the following fashions:

- 12 credits in the social sciences and humanities
- 12 credits in the natural sciences and engineering

Note:

*See the advisor for list of approved courses.

Environmental studies majors automatically fulfill the Dietrich School related area requirement. Three elective credits may be earned through independent study projects or internships.

Geology, BS

Major Course Requirements

Core courses required for a geology major (67 credits):

- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0060 - HISTORY OF THE EARTH
- GEOL 1001 - MINERALOGY
- GEOL 1003 - IGNEOUS & METAMORPHIC PETROLGY
- GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 1100 - STRUCTURAL GEOLOGY
- GEOL 1960 - FIELD CAMP
- GEOL 3900 - TOPICS IN GEOLOGY: COLLOQUIUM
- Nine credits in GEOL elective courses at the 1000 level or above

One of the following

- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 0800 - GEOLOGY
- GEOL 0860 - ENVIRONMENTAL GEOLOGY

Corequirements

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

One of the following

- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- MATH 0250 - MATRIX THEORY & DIFFT EQUATNS
- STAT 1000 - APPLIED STATISTICAL METHODS

Other Requirements

Grades: Students must maintain a minimum GPA of 2.0 in departmental courses to graduate with a BS degree in Environmental Science

Satisfactory/No Credit: No GEOL course that counts toward the major can be taken on an S/NC basis. No more than two of the non-geological science courses that count toward the major may be taken on an S/NC basis.

Writing requirement: Students must complete at least one writing-intensive (W) course in the major.

Related area: A minimum of 12 credits is required in any one Dietrich School department chosen in consultation with the major advisor. The completion of an official Dietrich School minor or certificate or a UCIS certificate also satisfies this requirement.

Certificate

Geographic Information Systems Certificate

The Geology and Planetary Science Department offers a Certificate in Geographic Information Systems (GIS). GIS is a computer-based system that accommodates virtually any type of information about features that are referenced by geographical location. For example, a GIS database may include both location and attribute data, providing a spatial visualization capability for analyzing descriptive characteristics about geographical features, both natural and manmade. One of the most important benefits of GIS analysis is the ability to spatially interrelate multiple types of information stemming from a range of sources. Such computational manipulation of geographic data has become increasingly important in many areas of science, government, and industry. Students who demonstrate experience with computers in general, and GIS/image processing in particular, are at a distinct advantage when looking for jobs in geology, environmental science, city and regional planning, and engineering. This certificate is designed to provide students with the knowledge and skills needed for immediate success in GIS-related jobs.

Requirements

The program is open to any University of Pittsburgh student, including post-baccalaureate students (professionals seeking to expand their job-related computer skills). Approximately four terms (two academic years) will be required to complete this certificate program. It is therefore suggested that undergraduates begin no later than their junior year. A grade of C or better is required in all courses for successful completion of the certificate. GIS topics covered include the nature of geographic data, map projections, raster images, the basic elements of a GIS database, sources of data, and training in the Arc/Info software package. Students also have the option of focusing on remote sensing theory and applications. Remote sensing (RS) topics include image analysis and processing; field validation of satellite and airborne datasets; GPS training; and the use of software packages such as ENVI, Erdas Imagine, ERMapper, and Trimble's Pathfinder Office.

Required core courses (6 credits):

- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS or
- GEOL 2449

- GEOL 1460 - INTRODUCTION TO REMOTE SENSING

Note:

Two elective courses may be chosen that have special relevance to the student's major or employment goals. Appropriate courses will be available from many different departments. Courses not on the following list may be selected contingent on approval by the certificate advisor.

Suggested elective courses (6 credits):

Lower level:

- GEOL 0030 - WORLD PHYSICAL GEOGRAPHY
- GEOL 0820 - NATURAL DISASTERS

1000 level:

- GEOL 1060 - GEOMORPHOLOGY
- BIOSC 1044 - ECOLOGICAL MANAGEMENT SUMMER FIELD COURSE, prerequisites

- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS , prerequisites or
- INFSCI 1030 - INFORMATN STORAGE & RETRIEVAL , prerequisites

2000 level:

- GEOL 2446 - ADVANCED GIS SYSTEMS COMPUTER METHODS, prerequisites
- GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES, prerequisites

Independent Study (4 credits):

Students must demonstrate proficiency in the application of the techniques by completing a project under the supervision of a faculty advisor. Sufficient work must be performed to earn four independent study or directed research credits. Faculty from any department may serve as the advisor, but students are encouraged to work with faculty in their primary area of interest. Projects must use GIS and/or RS as a major tool and result in a published report/map/CDROM that describes the results of the research.

Department of German

The study of second language and culture is a cornerstone of education in today's international world. It teaches intercultural competence by increasing students' understanding of their own backgrounds and their sensitivity for other traditions and values. Knowledge of a second language and culture brings obvious competitive advantages in careers with an international dimension. As a liberal arts discipline, the study of language improves analytic-conceptual and communication skills necessary for all professional careers. Enhanced with appropriate additional course work, a major in German serves as a foundation for professional training in such subjects as business, law, politics, and medicine, as well as the media and communication industry. Students with a BA in German compete well in nontechnical fields for jobs requiring a bachelor's degree. For more information on the major, the minor, the certificate, and the Department of Germanic Languages and Literatures, see www.german.pitt.edu.

Major

German Language and Cultural Studies, BA

Requirements

The German major can be completed by any student who begins GER 0001 - ELEMENTARY GERMAN 1 during the fall term of the freshman year. The curriculum integrates language learning with the study of history, politics, and popular as well as elite culture. Students acquire proficiency in the German language as well as an in-depth understanding of the German-speaking world. The German major requires 12 credits of advanced language, 18 credits in literature and culture, and one credit for GER 1990 - SENIOR THESIS for a total of 31 credits as follows:

Required advanced language courses (12 credits)

- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
- GER 1101 - ADVANCED GERMAN 1-MEDIA
- GER 1102 - ADVANCED GERMAN 2: STRUCTURES

Required literature and culture courses (18 credits)

- GER 1051 - INTRO TO LITERARY ANALYSIS
- GER 1052 - THE MAJOR CULTURAL PERIODS
- GER 1053 - MAJOR CULTURAL PERIODS 2
- Four advanced literature and culture seminars from GER 1200-1399. Courses numbered in the 1500s (German literature and culture courses in English) may be used in this category only in exceptional cases and with the permission of the director of undergraduate studies.

Senior Seminar (1 credit)

- GER 1990 - SENIOR THESIS - to be taken in the fall term of the senior year in conjunction with one of the three seminars

Additional rules and requirements for German majors are as follows:

- A 2.00 GPA is required in major courses to be counted toward the degree.
- Majors may take required courses under the S/NC option only by special permission of the director of undergraduate studies.
- Admission to the German major requires a grade of B- or better in GER 0004 - INTERMEDIATE GERMAN 2.
- The A&S departmental writing requirement is satisfied by GER 1001 - GERMAN WRITING.
- The director of undergraduate studies must approve all courses that are to count as a student's required 12-credit A&S related area. These credits may be taken from another discipline (e.g., art history, economics, chemistry) or from an interdisciplinary field (e.g., film studies or women's studies).
- Departmental honors in German are available to majors who have earned an overall GPA of at least a 3.50 in their major courses, completed a senior thesis that has been accepted by the departmental faculty, and demonstrated a high level of proficiency in speaking and writing German. Only those students with a 3.25 GPA in three advanced literature and culture courses and three advanced language courses will be permitted to write an honors thesis.
- Students are encouraged to study and reside in a German-speaking country as a component of the German major. Numerous possibilities exist for such study, and financial aid is often available.

Minor

German Studies Minor - German Language, Literature, and Film Option

Requirements

The minor in German studies consists of 15-19 credits. Students who are interested in the minor may tailor their course selection according to their interest in German language, literature, and film studies. They may select literature and film courses that are offered either in English translation or in German. The two options within the minor are as follows:

German Language, Literature, and Film Option (15-19 credits)

Students must complete the following requirements:

Two semesters of German language acquisition courses

including:

- GER 0001 - ELEMENTARY GERMAN 1 and
- GER 0002 - ELEMENTARY GERMAN 2
  or
- GER 0101 - BEGINNING GERMAN 1 and
- GER 0102 - BEGINNING GERMAN 2 and
- GER 0103 - BEGINNING GERMAN 3

Three, 3-credit courses

Three, 3-credit courses offered by the department as either German literature, culture, or film courses in German (numbered 1051-1410) or as German literature, culture, or film courses in English (numbered 1500-1542)

German Language (19 credits)

- GER 0001 - ELEMENTARY GERMAN 1
- GER 0002 - ELEMENTARY GERMAN 2
- GER 0003 - INTERMEDIATE GERMAN 1
- GER 0004 - INTERMEDIATE GERMAN 2 - students must pass this course with a minimum grade of B- before taking any 1000-level German courses

1000-level course in German, chosen from the following list

- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN 1
- GER 1004 - PROF GERMAN 2: GER BUS WRLD
- GER 1051 - INTRO TO LITERARY ANALYSIS
- GER 1052 - THE MAJOR CULTURAL PERIODS
- GER 1053 - MAJOR CULTURAL PERIODS 2

Note:

Students may use appropriate study abroad credit toward the German studies minor. The credits must be pre-approved by the department's director of undergraduate studies. The department also offers a German language certificate. For details and requirements on this certificate, please see the A&S Certificate Programs section of this bulletin.

German Studies Minor - German Literature and Film Option

Requirements

The minor in German studies consists of 15-19 credits. Students who are interested in the minor may tailor their course selection according to their interest in German language, literature, and film studies. They may select literature and film courses that are offered either in English translation or in German. The two options within the minor are as follows:

German Literature and Film Option (15 credits)

Students must complete five 3-credit courses offered by the department as either literature, culture, or film courses in German (numbered 1051-1410) or as German literature, culture, or film courses in English (numbered 1500-1542).

German Language (19 credits)

- GER 0001 - ELEMENTARY GERMAN 1
- GER 0002 - ELEMENTARY GERMAN 2
- GER 0003 - INTERMEDIATE GERMAN 1
- GER 0004 - INTERMEDIATE GERMAN 2 - students must pass this course with a minimum grade of B- before taking any 1000-level German courses

1000-level course in German, chosen from the following list

- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN 1
- GER 1004 - PROF GERMAN 2: GER BUS WRLD
- GER 1051 - INTRO TO LITERARY ANALYSIS
- GER 1052 - THE MAJOR CULTURAL PERIODS
- GER 1053 - MAJOR CULTURAL PERIODS 2

Note:

Students may use appropriate study abroad credit toward the German studies minor. The credits must be pre-approved by the department's director of undergraduate studies. The department also offers a German language certificate. For details and requirements on this certificate, please see the A&S Certificate Programs section of this bulletin.

Certificate

German Language Certificate - German for Liberal Arts Track

German Language Certificate

The Certificate in German Language consists of 18 credits of German courses and prepares students for international careers, internationally recognized proficiency exams, and internships in German-speaking countries.

Requirements

The certificate offers two tracks: one for the liberal arts and one for professional purposes. Courses should be taken in sequence.

German for the Liberal Arts

The following courses should be taken, in sequence, by students in this track:

- GER 0003 - INTERMEDIATE GERMAN 1
- GER 0004 - INTERMEDIATE GERMAN 2 with a minimum grade of B- before taking any course in the GER 1000-level experience

Two of the following:

- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
- GER 1002 - GERMAN PHONETICS

One of the following:

- GER 1101 - ADVANCED GERMAN 1-MEDIA
- GER 1102 - ADVANCED GERMAN 2: STRUCTURES
  One of the GER 1200-1399 seminars taught in German

One of the GER 1200-1400 seminars taught in German

Note:

Nine credits may be transferred from study abroad programs in German-speaking countries in accordance with the credit transfer policy of the University of Pittsburgh. These credits have to be pre-approved by the director of undergraduate studies.

A minimum GPA of 2.0 is required in each course that counts toward the certificate. No course that counts toward the certificate can be taken on an S/NC basis unless the student received special permission from the Director of Undergraduate Studies.

For more information, visit www.german.pitt.edu/undergraduate/certificate.php

German Language Certificate - German for Professional Purposes Track

German Language Certificate

The Certificate in German Language consists of 18 credits of German courses and prepares students for international careers, internationally recognized proficiency exams, and internships in German-speaking countries.

Requirements

The certificate offers two tracks: one for the liberal arts and one for professional purposes. Courses should be taken in sequence.

German for Professional Purposes

The following courses should be taken, in sequence, by students in this track:

- GER 0003 - INTERMEDIATE GERMAN 1
- GER 0004 - INTERMEDIATE GERMAN 2
- GER 1003 - PROFESSIONAL GERMAN 1
- GER 1004 - PROF GERMAN 2: GER BUS WRLD
- GER 1101 - ADVANCED GERMAN 1-MEDIA
  GER 1102 - Structures

Note:

Nine credits may be transferred from study abroad programs in German-speaking countries in accordance with the credit transfer policy of the University of Pittsburgh. These credits have to be pre-approved by the director of undergraduate studies.

A minimum GPA of 2.0 is required in each course that counts toward the certificate. No course that counts toward the certificate can be taken on an S/NC basis unless the student received special permission from the Director of Undergraduate Studies.

For more information, visit www.german.pitt.edu/undergraduate/certificate.php

Department of Hispanic Languages and Literatures

The study of a second language, literature, and culture like Spanish traditionally has been one of the central components of an undergraduate education in the humanities. Today there is an added practical dimension to this. With economic and cultural globalization, our links as a nation with Spain and Latin America, including Brazil, have become much closer. At the same time, Spanish is not only a second language for us; it has become much like French in Canada, a de facto second language in the United States, which now has a Spanish-speaking population of more than 30 million. As a result, there is a growing demand for persons trained in Spanish (and also Portuguese) in many fields, especially education, where there is a shortage of new teachers of Spanish language and culture.

The undergraduate **major in Spanish** at the University of Pittsburgh offers a balanced combination of courses designed to strengthen oral and written language skills, and courses that introduce students to the study of Spanish and Latin American literatures and cultures. Majors also have the opportunity to enroll in the **minor in Portuguese Language and Luso-Brazilian cultures**, thereby opening channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. Students with a more general interest in Latin American languages and cultures can choose to minor in Hispanic Languages and Literatures.

In all cases, we encourage students to include at least a semester of study abroad in a Spanish- or Portuguese-speaking country and we offer study-abroad programs. Students interested in going on to graduate school should strongly consider the honors major; those who want to teach Spanish can obtain teacher certification through the School of Education. The department also offers courses taught in English for non-majors interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures. Students can also take advantage of the **non-curricular** activities organized by the department, which include conversation clubs and films series.

Departmental Honors requirements

Especially for students interested in graduate work, the department offers honors in the major, which requires:

- a 3.5 average in departmental courses and 3.0 overall
- a senior thesis of 25-30 pages, written under the supervision of a faculty member close to the field of the thesis
- at least a semester of study abroad is strongly recommended but not required

Students should declare their intention to pursue the honors major no later than at the beginning of their senior year. The thesis will be evaluated by the advisor and two other faculty members in the department. Students may take an independent study with their supervisor that will fulfill the requirement of one upper level course. For further information, consult with the director of undergraduate studies

Teacher Certification

Students who plan to teach Spanish after completing the major should consult with their advisor or the director of undergraduate studies in the department, as well as with the advisors for Pennsylvania Teaching Certification and Masters of Arts in Teaching Programs in the School of Education (Maggie Sikors, mjs 169@pitt.edu, 5504 Posvar Hall, 412-648-7413).

Study Abroad Options for Majors in the Hispanic Languages and Literatures Department

Students are strongly encouraged to add an international dimension to their undergraduate education through studying abroad. By participating in a study abroad program, students earn credits toward their degree. The department offer four programs that are matched directly with major and minor requirements. Information on some of the programs follow.

Study abroad is strongly encouraged. The department offers four programs that are matched directly with major and minor requirements. Information on some of the programs follows.

- Study abroad in Alcalá de Henares, Spain (30 minutes from Madrid) runs every odd-numbered year; for more information, send an e-mail to alcala@pitt.edu.
- Study abroad in Santiago de Chile runs every even-numbered years; for more information, send an e-mail to chile@pitt.edu.
- Study abroad in Porto Alegre, Brazil runs every year; for more information, send an e-mail to brazilsa@pitt.edu.
- Study abroad in Havana, Cuba runs every year; for more information, contact the Study Abroad Office (www.abroad.pitt.edu) via e-mail abroad@pitt.edu or by phone at 412-648-7419.

Major

Spanish, BA

Major requirements

Prerequisites

Before declaring the major, students must complete four Spanish language courses in order to gain the indispensable skills to effectively read, write and discuss in a second language. Students with any previous knowledge of Spanish must take a placement test. Please note that *a grade of B+ or higher in SPAN 0004 is required to declare the major.* The Spanish major requires students to complete 38 credits of coursework as detailed below.

Required Courses

Basic Level

- SPAN 0020 - CONVERSATION
- SPAN 0025 - GRAMMAR AND COMPOSITION

Mid Level

- SPAN 0050 - SPANISH CIVILIZATION
- SPAN 0055 - INTRO HISPANIC LITERATURE 1
- SPAN 1400 - SURVEY LATIN AMERCN LITERATURE
- SPAN 1600 - SURVEY OF SPANISH LITERATURE
- SPAN 1300-level course
- PORT 0001 - ELEMENTARY PORTUGUESE 1

Upper Level

- SPAN 1806 - CAPSTONE SEMINAR

Three electives

Three electives from the SPAN 1400, SPAN 1600, SPAN 1700, and SPAN 1800 level course series, or PORT 0002 - ELEMENTARY PORTUGUESE 2 of you are pursuing the Portuguese minor or related area. These courses include, for example, Colonial Literatures and Cultures, Latin American Novel, U.S. Latino Literature and Film, African Presence in Hispanic Literature and Culture, Don Quixote, Modern Spanish Novel and Film, etc. Note that SPAN 1400, SPAN 1600, and PORT 1010 do not count toward the Spanish major.

Additional information and requirements

- **Related area:** Students must complete a 12-credit related area in order to fulfill Dietrich School graduation requirements. Students interested in Latin America should consider the Latin American Studies Certificate program for a related area.
- **W requirement:** SPAN 0055 - INTRO HISPANIC LITERATURE 1 satisfies this requirement.
- **Grade requirements:** Students must maintain an average GPA of 2.0 or above in all department courses. No courses with a grade of C- or lower will count toward the major.
- **Satisfactory/No-Credit option:** Majors may take one required course on an S/NC basis.
- **Language of instruction:** Spanish majors can take up to one curse offered by the department that is taught in English. In order to have it count toward minor requirements, written assignments must be submitted in Spanish.
- **Study Abroad:** At least one term of study abroad is recommended.
- **Credits in residence:** To complete the Spanish major, students are required to take at least half of the credits required for the major while in residence in the Dietrich School.
- **Placement into language courses:** For the Spanish placement test, please contact the Spanish Language Coordinator, Carlos Ramírez, cramirez@pitt.edu. For the Portuguese placement test, please contact the Portuguese Language Coordinator, Ana Paula Carvalho, apcst11@pitt.edu.
- **Credit by examination:** Students may receive credit by examination for the Spanish language courses up to and including SPAN 1025 - ADVANCED GRAMMAR. Similar credits may be earned in Portuguese.

Double majors, dual degrees and CLAS certificates

Students who have declared an additional major or pursue a dual degree need not to take SPAN 1301. The same rule applies to students taking the CLAS Field Trip to Latin America. Only one course reduction applies if a student meets more than one of these criteria.

Minor

Portuguese and Luso-Brazilian Culture Minor

Before declaring the Portuguese minor, students are required to complete PORT 0001 - ELEMENTARY PORTUGUESE 1 or PORT 1001 - ELEMENTARY PORTUGUESE 1 or take a placement test.

Required courses

- PORT 0002 - ELEMENTARY PORTUGUESE 2 or
- PORT 1002 - ELEMENTARY PORTUGUESE 2

- PORT 0003 - INTERMEDIATE PORTUGUESE 3 or
- PORT 1003 - INTERMEDIATE PORTUGUESE 3

- PORT 0004 - INTERMEDIATE PORTUGUESE 4 or
- PORT 1004 - INTERMEDIATE PORTUGUESE 4

- PORT 0020 - CONVERSATION
- PORT 0025 - GRAMMAR AND COMPOSITION

Spanish Minor

Before declaring the Spanish minor, students must complete four Spanish language courses in order to gain indispensable skills to effectively read, write, and discuss in a foreign language. Students with previous Spanish experience are encouraged to take a placement exam. Students must earn a grade of B+ or higher in SPAN 0004 to declare this minor.

Prerequisite courses

- SPAN 0001 - ELEMENTARY SPANISH 1
- SPAN 0002 - ELEMENTARY SPANISH 2
- SPAN 0003 - INTERMEDIATE SPANISH 3
- SPAN 0004 - INTERMEDIATE SPANISH 4

Required courses

- SPAN 0020 - CONVERSATION
- SPAN 0025 - GRAMMAR AND COMPOSITION
- SPAN 0050 - SPANISH CIVILIZATION
- SPAN 1300-level

Two of the following courses

- Any SPAN 1400-level course except SPAN 1400
- Any SPAN 16-level course except SPAN 1600
- Any SPAN 1700-level course
- Any SPAN 1800-level course

Department of History

Historians use methods, techniques, and ideas from a wide range of humanistic and social scientific fields to teach students how materials from many fields are integrated to describe or explain a particular historical time period or topic. History is an open-ended discipline, and the department welcomes students, as well as ideas and techniques, from other subjects. History also gives a student many options for a future career. Many history majors have become lawyers, journalists, civil servants, and business executives. The future of a history major is not limited to college or school teaching, although these are also available career choices. Expanding opportunities are to be found in public and private agencies, in businesses, archives, historical societies, museums, and government offices. History courses may help students to develop a balanced program that will further their career and intellectual goals. Courses in economics and history could lead to an understanding of economic development and aid a business or civil service career; a combination of language, literature, and history would give a student background that could lead to a career in foreign service or teaching; a mixture of communication and writing with history might prepare one for a career in journalism. In short, students in practically any field can investigate questions that are intellectually exciting and personally helpful by taking history courses related to their programs and ambitions. For more information on the major, the minor, or the Department of History, visit http://www.history.pitt.edu/.

Major

History, BA

Major Requirements

Majors in history must complete a minimum of 30 credits in history courses, including the following:

- Required core courses (15 credits)
- One course in pre-1500 history
- One course in Latin American, Asian, East European, Russian and Soviet, African, or Middle Eastern history
- Required focused area of study (12 credits)

One survey course in U.S. history from the following list:

- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0670 - AFRO-AMERICAN HISTORY 1
- HIST 0671 - AFRO-AMERICAN HISTORY 2

One survey course in European history from the following list:

- HIST 0100 - WESTERN CIVILIZATION 1
- HIST 0101 - WESTERN CIVILIZATION 2
- HIST 0200 - EAST EUROPE CIVILIZATION
- HIST 1240 - POLITICAL EAST EUROPE

One required seminar for majors

- HIST 1000 - CAPSTONE SEMINAR

- HIST 1001 - INTRODUCTORY SEMINAR

Note:

Majors must take four courses beyond the core courses. These courses will be selected by the student with the help of a faculty member or the undergraduate advisor to form a focused area of study. Such areas may be chronological, geographic, or thematic and normally should be declared during the junior year. Many students choose a geographical focus, e.g., History of the Americas or Europe; however students are encouraged to discuss with their advisors or faculty concentrations based on their own grouping together of four courses.

- One additional history course

In addition to those course requirements, the following rules and requirements apply for history majors:

- Students must earn at least a 2.00 overall GPA in history courses.
- Fifteen credits must be in courses numbered 1000 or above.
- Majors may take a total of 9 credits for the major on an S/NC basis (formerly the S/N option). HIST 1000 - CAPSTONE SEMINAR or HIST 1001 - INTRODUCTORY SEMINAR may not be taken S/NC (formerly the S/N option).
- Students may earn up to 9 credits in history on a credit-by-examination basis; arrangements can be made by contacting the instructor of the course involved.
- Students must complete an A&S 12-credit related area; economics, sociology, political science, statistics, or computer science are suggested.
- History majors are strongly encouraged to add an international dimension to their undergraduate education by studying abroad.
- Students interested in graduate study in history should be aware that all graduate departments of history require proficiency in at least one second language and that many require competence in two languages for a PhD.
- The honors program consists of the regular major plus 6 extra credits. Students apply for the honors program in their sophomore year and should have completed 12 credits in history, have a 3.35 GPA overall and a 3.50 in history, and submit a piece of writing for approval by the Undergraduate Committee. There are four elements to the honors program:
    - The special honors seminar, HIST 1902 - WRIT: HISTORY HONORS SEMINAR; this is separate from and in addition to the required seminar for majors
    - One University Honors College history course
    - An independent study (HIST 1901)
    - The completion and acceptance of a 25-50 page honors thesis
    - No grade below B is acceptable to fulfill the honors requirements.

Internships for History Credit

History majors may do an internship for 3 credits (HIST 1900) in a local museum in either the fall or spring semesters. Contact the history academic advisor for information.

Study Abroad

Each year the department offers a scholarship for study abroad. Applications for the A. J. Schneider Award are due by February each year. Contact the history undergraduate advisor for more information.

Minor

History Minor

Minor Requirements

The history minor consists of two lower-level courses followed by three upper-level courses, for a total of 15 credits. The two lower-level (survey) courses may be in the same geographical area or in two different areas. For example, courses may be chosen from among the following:

- HIST 0100 - WESTERN CIVILIZATION 1
- HIST 0101 - WESTERN CIVILIZATION 2
- HIST 0200 - EAST EUROPE CIVILIZATION
- HIST 1240 - POLITICAL EAST EUROPE
- HIST 0300 - RUSSIA TO 1860
- HIST 0301 - RUSSIA TO 1917
- HIST 0400 - EAST ASIAN CIVLIZATION TO 1800
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0500 - COLONIAL LATIN AMERICA
- HIST 0501 - MODERN LATIN AMERICA
- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0670 - AFRO-AMERICAN HISTORY 1
- HIST 0671 - AFRO-AMERICAN HISTORY 2

Note:

Normally, the three upper-level courses should be chosen from the geographic area of one of the survey courses already taken.

Department of History of Art and Architecture

Art, like science or language, is an intrinsically human way of organizing our experience of the world. Because it appeals to a fundamental sense of order, art can speak to us with immediacy even without knowledge of the purposes for which it was created and the particular principles or order adhered to by the artists of a given culture. Still deeper understanding may follow, however, from an awareness of these purposes and principles, and courses in art history are concerned with the study of art and architecture as cultural documents of the values and ideals of various cultures. Art history offers an opportunity to consider objects and environments that have been created in response to some of humanity's loftiest and most basic aims. The requirement that these visual expressions be analyzed and evaluated in the medium of words makes art history a rewarding area of humanistic study. The major in the history of art and architecture offered by the HAA department helps prepare individuals for careers calling for skills in writing, where description and analysis play important roles, as well as for careers more immediately related to art, such as those of critic, teacher, librarian, art administrator, or museum or gallery staff member.

The architectural studies major, also administered by the HAA department, offers a curriculum devoted to the study of human-made environments. The major components include history of architecture, studio arts, and a core curriculum that includes a survey of the history of architecture, the history of architecture theory, a professional internship, and a portfolio. The degree is suitable for a wide variety of careers and professions including the design and construction of the built environment, such as landscape architecture, interior design, restoration, historic preservation, real estate development, and contracting. These interests can be categorized in two groups:

- The preprofessional studies category prepares students for graduate professional training in any of the environmental design fields (architecture, interior design, landscape design, urban planning, and preservation). Students are able to explore a professional interest while acquiring a liberal arts education.
- The nonprofessional studies category is for students not interested in becoming professional architects. This program offers a rigorous curriculum that assists students in exploring their interest in environmental arts and criticism and provides an understanding of the environment's integral relationship with society and culture.

Students of both categories should be fully aware that this degree in architectural studies does not in itself constitute professional or technical training. Students seeking recommendations to graduate professional programs in architecture must complete a number of natural science courses in addition to those focused on architecture and design. Proficiency in calculus is required for students seeking a career in architecture. The department strongly recommends that students successfully complete at least one term of college level calculus (MATH 0220 or equivalent) before graduation.

For more information on these majors and the History of Art Architecture department, see www.haa.pitt.edu.

Architectural Studies Major

This major offers students two options - the Design track and the Preservation Track.

Major

Architectural Studies - Design Track Studio Arts Concentration, BA

Requirements

The Design track requires completion of 48 credits with an additional 9 credits in a Studio Arts concentration.

Architectural Studies courses

- HAA 0940 - APPROACHES TO BUILT ENVIRNMNT
- HAA 1040 - ARCH: IMAGE, TEXT, THEORY
- HAA 1900 - ARCHTCTRL STUDIES INTERNSHIP
- HAA 1912 - ARCHITECTURE & DIGITAL MEDIA 1
- HAA 1913 - FOUNDATIONS STUDIO 1 *
- HAA 1914 - ARCHITCTR AND DIGITAL MEDIA 2
- HAA 1916 - ARCHITECTURE DESIGN STUDIO 1
- HAA 1917 - ARCHITECTURE DESIGN STUDIO 2

Note:

* This course will carry six credits as of spring 2016 term.

+ Effective spring 2015 term, a grade of C or better is required in HAA 1913 to enroll in this course.

Physics course

- PHYS 0110 - Introduction to Physics 1

History of Art and Architecture courses

- HAA 0040 - INTRO TO WESTERN ARCHITECTURE
- HAA 0480 - MODERN ARCHITECTURE
- Two additional HAA courses in architectural history

Required Studio Arts Concentration

- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 1430 - DRAWING STUDIO: PERSPECTIVE

Other Requirements and Recommendations for Architectural Studies majors

- A GPA of at least 2.00 in all department courses is required for graduation with a major in Architectural Studies. A minimum GPA of 2.75 is required for an internship, and a minimum of 3.0 is required for those seeking a recommendation for graduate school. Students who plan to apply to graduate school should maintain a minimum GPA of 3.25.
- Only HAA 1900 - ARCHTCTRL STUDIES INTERNSHIP may be taken on an S/NC basis.

- Students must complete at least one writing-intensive course (W-course) in the major. Each track has a W-course in its requirements - HAA 1040 for the Design track, and HAA 1922 for the Preservation track.
- Students who plan to major in Architectural Studies should contact the departmental advisor as early in their college career as possible to discuss the recommended course sequence for each track, course availability, and entry into restricted classes.
- Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

Architectural Studies - Preservation Track History of Urban America Concentration, BA

Requirements

The Preservation track requires completion of 39 credits with an additional 12 credits in a proscribed related area in either the History of Urban America or Public Service.

History of Art and Architecture courses

- HAA 0040 - INTRO TO WESTERN ARCHITECTURE
- Two additional HAA courses in architectural history

One of the following courses

- HAA 1530 - EARLY AMERICAN ARCHITECTURE
- HAA 1531 - AMER ARCH SINCE INDSTRLZTN

Architectural Studies courses

- HAA 0940 - APPROACHES TO BUILT ENVIRNMNT
- HAA 1900 - ARCHTCTRL STUDIES INTERNSHIP
- HAA 1912 - ARCHITECTURE & DIGITAL MEDIA 1
- HAA 1913 - FOUNDATIONS STUDIO 1 *

Note:

* This course will carry six credits as of spring 2016 term.

Preservation courses

- HAA 1920 - INTRO TO HISTORIC PRESERVATION
- HAA 1921 - DOCUMENTATION AND CONSR STUDIO
- HAA 1922 - PRESERVATION - TEXTS & THEORY

Required Concentration

Every Preservation track major must select either the History of Urban America or Public Service. See www.arch.pitt.edu/prorgram/preservation_track.php for a detailed discussion of the coursework for each.

Other Requirements and Recommendations for Architectural Studies majors

- A GPA of at least 2.00 in all department courses is required for graduation with a major in Architectural Studies. A minimum GPA of 2.75 is required for an internship, and a minimum of 3.0 is required for those seeking a recommendation for graduate school. Students who plan to apply to graduate school should maintain a minimum GPA of 3.25.
- Only HAA 1900 - ARCHTCTRL STUDIES INTERNSHIP may be taken on an S/NC basis.
- Students must complete at least one writing-intensive course (W-course) in the major. Each track has a W-course in its requirements - HAA 1040 for the Design track, and HAA 1922 for the Preservation track.
- Students who plan to major in Architectural Studies should contact the departmental advisor as early in their college career as possible to discuss the recommended course sequence for each track, course availability, and entry into restricted classes.
- Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

Architectural Studies - Preservation Track Public Service Concentration, BA

Requirements

The Preservation track requires completion of 39 credits with an additional 12 credits in a proscribed related area in either the History of Urban America or Public Service.

History of Art and Architecture courses

- HAA 0040 - INTRO TO WESTERN ARCHITECTURE
- Two additional HAA courses in architectural history

One of the following courses

- HAA 1530 - EARLY AMERICAN ARCHITECTURE
- HAA 1531 - AMER ARCH SINCE INDSTRLZTN

Architectural Studies courses

- HAA 0940 - APPROACHES TO BUILT ENVIRNMNT
- HAA 1900 - ARCHTCTRL STUDIES INTERNSHIP
- HAA 1912 - ARCHITECTURE & DIGITAL MEDIA 1
- HAA 1913 - FOUNDATIONS STUDIO 1 *

Note:

* This course will carry six credits as of spring 2016 term.

Preservation courses

- HAA 1920 - INTRO TO HISTORIC PRESERVATION
- HAA 1921 - DOCUMENTATION AND CONSR STUDIO
- HAA 1922 - PRESERVATION - TEXTS & THEORY

Required Concentration

Every Preservation track major must select either the History of Urban America or Public Service. See www.arch.pitt.edu/prorgram/preservation_track.php for a detailed discussion of the coursework for each.

Other Requirements and Recommendations for Architectural Studies majors

- A GPA of at least 2.00 in all department courses is required for graduation with a major in Architectural Studies. A minimum GPA of 2.75 is required for an internship, and a minimum of 3.0 is required for those seeking a recommendation for graduate school. Students who plan to apply to graduate school should maintain a minimum GPA of 3.25.
- Only HAA 1900 - ARCHTCTRL STUDIES INTERNSHIP may be taken on an S/NC basis.
- Students must complete at least one writing-intensive course (W-course) in the major. Each track has a W-course in its requirements - HAA 1040 for the Design track, and HAA 1922 for the Preservation track.
- Students who plan to major in Architectural Studies should contact the departmental advisor as early in their college career as possible to discuss the recommended course sequence for each track, course availability, and entry into restricted classes.
- Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

History of Art and Architecture - Honors Major Option, BA

Option Requirement

Students electing the HAA standard 36-credit program who have at least a 3.50 overall GPA and a 3.50 GPA in HAA may qualify for departmental honors by enrolling in and completing HAA 1950 - SENIOR THESIS (as one of their required 1000-level courses) with a grade of A- or higher and completing HAA 1951 - HONORS RESEARCH SEMINAR. These two courses can be applied toward the 1000-level requirements for the major. This track is especially recommended for students planning to apply to graduate programs in the history of art architecture or related fields.

Other Requirements and Recommendations for HAA majors

- A GPA of at least 2.00 in all department courses is required for graduation with a major in HAA.
- Any of the following may prove useful for the required 12-credit Dietrich School related area: ancient or modern languages, philosophy (particularly aesthetics), cultural and intellectual history, studio arts, music, anthropology, sociology, and psychology of perception.
- There is no language requirement beyond that required by Dietrich School, but a reading competency in a second language is desirable for some field course readings. Graduate programs in the history of art and architecture also require fluency in at least one second language for admission to their programs. If a student's high school language preparation does not provide this competency, he or she should consult the art history advisor concerning preferred languages.
- With the exception of HAA 1901, HAA 1903, HAA 1904, and HAA 1919, courses for the major should not be taken with the S/NC option.

History of Art and Architecture, BA

Students whose only official major is History of Art and Architecture need to complete a total of 36 credits.

Core Courses

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0101 - FOUNDATIONS OF ART HISTORY
- HAA 0102 - PROSEM FOR UG MAJS IN ART HIST *
- HAA 1010 - APPROACHES TO ART HISTORY

Note:

* This course must be taken twice.

Nine additional courses, as follows

Students pursuing a second major may reduce this requirement to six courses but must fulfill the Breadth Requirements.

Breadth Requirements

Students must take at least one class from each of the following areas.

- Ancient art across the globe
- Asian art
- European art before 1750
- Modern and Contemporary art
- Comparative and World art

Four courses at the 1000-level. Students pursuing a second major may reduce this requirement to two course.

Studio Arts

Students may elect to take one of the following courses toward completion of their HAA major

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY

Other Requirements and Recommendations for HAA majors

- A GPA of at least 2.00 in all department courses is required for graduation with a major in HAA.
- Any of the following may prove useful for the required 12-credit Dietrich School related area: ancient or modern languages, philosophy (particularly aesthetics), cultural and intellectual history, studio arts, music, anthropology, sociology, and psychology of perception.
- There is no language requirement beyond that required by Dietrich School, but a reading competency in a second language is desirable for some field course readings. Graduate programs in the history of art and architecture also require fluency in at least one second language for admission to their programs. If a student's high school language preparation does not provide this competency, he or she should consult the art history advisor concerning preferred languages.
- With the exception of HAA 1901, HAA 1903, HAA 1904, and HAA 1919, courses for the major should not be taken with the S/NC option.

Minor

Architecture - Design

Requirements for the minor

The minor in Architecture - Design provides an option for students majoring in fields such as Civil Engineering, Environmental Studies, History, Studio Arts, Urban Studies and for whom course work in architectural design and history will provide additional breadth in their studies of the built environment. The minor requires that students complete 18 credits, 12 of which are studio-based design courses and six of which will provide historical and theoretical background for thinking about architecture and the built environment.

Foundational course in architecture

- HAA 0940 - APPROACHES TO BUILT ENVIRNMNT

Two courses in architectural design

Students must earn a letter grade of C or higher in HAA 1913 HAA 1913 - FOUNDATIONS STUDIO 1 to enroll in HAA 1916 HAA 1916 - ARCHITECTURE DESIGN STUDIO 1.

- HAA 1913 - FOUNDATIONS STUDIO 1
- HAA 1916 - ARCHITECTURE DESIGN STUDIO 1

One course in architectural history

- HAA 0040 - INTRO TO WESTERN ARCHITECTURE
- HAA 0221 - MEDIEVAL ARCHITECTURE
- HAA 0460 - PUBLIC ART
- HAA 0480 - MODERN ARCHITECTURE
- HAA 0510 - PITTSBURGH ARCHITEC/URBANISM
- HAA 0900 - SPEC TOPICS-ARCHTCTRL STUDIES
- HAA 1160 - ROMAN ARCHITECTURE
- HAA 1250 - CONSTRUCTING THE GOTHIC
- HAA 1305 - EARLY RENAISSANCE ARCHITECTURE
- HAA 1306 - HIGH RENAISSANCE ARCHITECTURE
- HAA 1407 - ARCHITECTURE AND ENLIGHTENMENT
- HAA 1475 - MODERNITY, MODERNISM & HOUSING
- HAA 1480 - ARCHITECTURE SINCE 1945
- HAA 1510 - PITTSBURGH ARCHITEC/URBANISM
- HAA 1530 - EARLY AMERICAN ARCHITECTURE
- HAA 1531 - AMER ARCH SINCE INDSTRLZTN
- HAA 1630 - CHINA: ARCHITECTURE
- HAA 1656 - JAPAN: ARCH PERFORMATIVE SPACE
- HAA 1680 - JAPAN: ARTIST AND CITY
- HAA 1907 - ARCH & THE CITY CENTRAL EURP
- HAA 1910 - SPECIAL TOPICS-ARCHITECTURE
- HAA 1920 - INTRO TO HISTORIC PRESERVATION
- HAA 1923 - GLOBAL PRESERVATION

Two co-requisites

HAA 1912 HAA 1912 - ARCHITECTURE & DIGITAL MEDIA 1 may be waived for students who have taken a course in AutoCAD in high school or the equivalent course in the Department of Civil Engineering in the Swanson School of Engineering - CEE 0109 CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1.

SA 0130 SA 0130 - DRAWING STUDIO 1 may be waived for students who have taken art courses in high school.

- HAA 1912 - ARCHITECTURE & DIGITAL MEDIA 1
- SA 0130 - DRAWING STUDIO 1

Museum Studies Minor

This minor is grounded in the department's historic strengths - to offer students a critically informed understanding of how cultural artifacts have been, are, and can be collected and curated. At its core, the goal of the Museum Studies Minor is to introduce students to the approaches, history, and theories of museum and collection practices.

Students pursuing the Museum Studies minor must complete the following coursework, which comprises 16 credits.

One foundational course from the following list.

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0020 - INTRODUCTION TO ASIAN ART
- HAA 0030 - INTRODUCTION TO MODERN ART
- HAA 0090 - INTRO TO CONTEMPORARY ART

The following three courses.

- HAA 1020 - MUSEUM STUDIES EXHIBITION SEM
- HAA 1025 - HIST AND ETHICS OF COLLECTING
- HAA 1903 - HISTORY ART & ARCH INTERNSHIP *

Note:

The Academic Curator of the Department of History of Art and Architecture will work with Museum Studies minors to place them into internship positions that are approved to satisfy the minor requirement.

One of the following courses,

Or a suitable alternative selected in consultation with the Museum Studies minor advisor.

- ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
- ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY
- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- HAA 1030 - SPECIAL TOPICS- MUSEUM STUDIES
- INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY

Preservation Minor

The minor in Preservation is for students who are interested in a specialized focus on the preservation and documentation of historic architecture and the built environment.

Students pursuing the Preservation minor must complete the following coursework, which comprises 18 credits.

Requirements for the minor

- HAA 1920 - INTRO TO HISTORIC PRESERVATION
- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- HAA 1903 - HISTORY ART & ARCH INTERNSHIP *

Three additional courses

Or a total of nine credits, from the following list of courses.

- HAA 0940 - APPROACHES TO BUILT ENVIRNMNT

- HAA 0510 - PITTSBURGH ARCHITEC/URBANISM or
- HAA 1510 - PITTSBURGH ARCHITEC/URBANISM

- HAA 1530 - EARLY AMERICAN ARCHITECTURE
- HAA 1531 - AMER ARCH SINCE INDSTRLZTN
- HAA 1913 - FOUNDATIONS STUDIO 1

- HAA 1921 - DOCUMENTATION AND CONSR STUDIO +
- HAA 1922 - PRESERVATION - TEXTS & THEORY
- HAA 1923 - GLOBAL PRESERVATION

Note:

* The internship must be conducted with an organization that pertains to the field of historic preservation and be approved by the director of the Architectural Studies Program.

+ The Architectural Studies Program strongly recommends this course for students pursuing the minor.

Department of History and Philosophy of Science

Certificate

Conceptual Foundations of Medicine Certificate

Overview of the Certificate Program:

The undergraduate program in the Conceptual Foundations of Medicine is designed to offer a group of related courses in the areas of medical ethics, the nature of explanation and evidence in the biomedical sciences, and social problems such as assessments of alternative forms of health care delivery. The program is likely to be of particular interest to pre-medical and pre-professional health care students, but is intended to appeal to all students interested in social and philosophical problems in the biomedical sciences.

Students interested in obtaining the the undergraduate certificate should apply as early in their course work as possible. Normally, satisfactory completion of one course in the two-term core sequence, History and Philosophy of Science HPS 0612 or HPS 0613, is required for admission into the certificate program. Applications can be secured from the Department of History and Philosophy of Science.

Application Information:

You can download the application form and return it to the department via campus mail or in person at the office (1017 Cathedral of Learning). Download Printable Application form in:

- Microsoft Word Format (.doc)
- Adobe Acrobat Format (.pdf)

Requirements:

- The two introductory core courses (HPS 0612 and HPS 0613) in Conceptual Foundations of Medicine.
- A two-term college-level course in biology.
- Two additional courses in a variety of departments dealing with social and conceptual issues in the biomedical sciences. The two elective courses must be in different departments.
- Students must achieve at least a C grade in each of the required courses, and at least a C+ average in the overall certificate requirements.

Core Courses from the History and Philosophy of Science Department:

- HPS 0612 - MIND AND MEDICINE

This course focuses on questions of the aims of medicine, its scientific status and its relation to the natural sciences. These questions are pursued in the context of psychiatry, neurology, genetics, and the process of physical diagnosis.

- HPS 0613 - MORALITY AND MEDICINE

This course is an introduction to the ethical, legal, and social problems which are part of the modern practice of medicine. It begins with a brief introduction to various types of moral theories (e.g., Kantian, Utilitarian, Naturalistic) followed by discussions of truth-telling in medicine, informed consent, euthanasia, abortion, and the relation between political systems and health care. The focus throughout will be on the role of moral values in medical treatment.

Important Certificate Information:

- All required courses must be completed with a "C" average or better. Pass/fail grades do not count.
- IMPORTANT: Your two upper-level elective courses MUST be from two different departments.
- The department will furnish a list of courses which satisfy the requirements in the "Other" or "Upper Level" category. It will be available online at the beginning of each registration period or by stopping in the office or phoning the department at 412-624-5896.
- If you require academic advising with respect to the required courses, please make an appointment to see Professor James G. Lennox, 1017 Cathedral of Learning, e-mail: jglennox@pitt.edu.
- Use #170042 as the Secondary Academic Program Code number on your registration form to ensure proper credit on your final transcript.
- During the first few weeks of your final term of your senior year fill out an additional application in the Arts and Sciences Dean's Office (140 Thackeray Hall). This will ensure the processing of the certificate information onto your transcript. If this process is not completed in a timely manner, a processing fee will be assessed by the Registrar.
- It is your responsibility to bring a copy of your final transcript to the HPS Department for coursework/GPA verification of the six courses taken. If everything is correct we will then issue a certificate in your name to the permanent address listed on your original application.

Alternative Elective Courses to Satisfy the Conceptual Foundations Requirement

If you believe that there is a course that deals with the social and conceptual issues in the biomedical sciences, and that it should satisfy the elective requirement for the certification, you must:

- Obtain the description of the course;
- Write a very short explanation of why the course ought to count toward satisfaction of the elective requirement, by showing how it deals with social or conceptual issues in the biomedical sciences; and
- Submit both to the Undergraduate Advisor for approval.

The list of elective courses is not fixed, and so other courses well may be approved. However, they must have a major component that deals with social and conceptual issues of biomedicine. You must see Professor James G. Lennox for permission to use other courses.

Approved Elective Courses for Summer Term, 2016 (2167)

- ANTH 0538 - THE ARCHELOGST LOOKS AT DEATH /10787 (6WK-1)
- ANTH 0768 - HUMAN SEXUALITY IN CROS CULTUR /10788 (6WK-1)
- ANTH 1725 - SOCIAL HLTH ISSUES EAST AFRICA /15007 (4WK-2)

Department of Interdisciplinary Studies

Nondepartmental A&S Majors

A&S offers several major options that are not administered by a specific academic department within A&S: the A&S/business dual major, the interdisciplinary studies major, and the politics and philosophy major. Descriptions of these majors follow:

Major

Interdisciplinary Studies, BA

The interdisciplinary studies option is intended for students who wish to design their own major. This major allows students to be flexible and creative in planning a program to match their individual interests and career goals. Completing this major requires sound thought, planning, and extra effort. Students selecting this option must secure the sponsorship of two full-time A&S faculty advisors. Students will formulate a proposal for their major, including a course prospectus (classes chosen) and an essay stating rationale for their desired program of study. They will work on their proposal with their faculty advisors, who must approve the proposal before the interdisciplinary studies faculty committee can approve it.

Major Requirements

A student intending to complete an interdisciplinary studies major must submit a proposal to his/her faculty advisors before the end of the junior year. The faculty committee must approve the proposal before the student can officially declare interdisciplinary studies as a major.

- All A&S degree requirements must be completed (120 credits, 2.0 overall GPA and major GPA, skills and general education requirements).
- The interdisciplinary studies proposal must consist of a minimum of 42 credits, 21 of which must be earned from courses numbered 1000 level or above. Courses are chosen from at least two different departments and arranged in one, two, or three clusters or thematic groupings. Each cluster must contain a minimum of 12 credits.
- A maximum of 6 credits of internship or independent study may be included. A maximum of 6 credits of non-A&S courses (i.e. BUS, BUSERV, ADMJ, ADMPS, IL, PSYED, etc.) may be used. There can be no more than 9 credits of internship/independent study and non-A&S credits combined.

- A W course approved by the faculty advisors must be completed as part of the major.

A GPA of at least 2.00 must be maintained for all interdisciplinary studies course work. Students may achieve honors in interdisciplinary studies by earning a minimum GPA of 3.50 in the courses for the major and approval of a final paper or thesis.

Interdisciplinary Studies, BS

The interdisciplinary studies option is intended for students who wish to design their own major. This major allows students to be flexible and creative in planning a program to match their individual interests and career goals. Completing this major requires sound thought, planning, and extra effort. Students selecting this option must secure the sponsorship of two full-time A&S faculty advisors. Students will formulate a proposal for their major, including a course prospectus (classes chosen) and an essay stating rationale for their desired program of study. They will work on their proposal with their faculty advisors, who must approve the proposal before the interdisciplinary studies faculty committee can approve it.

Major Requirements

A student intending to complete an interdisciplinary studies major must submit a proposal to his/her faculty advisors before the end of the junior year. The faculty committee must approve the proposal before the student can officially declare interdisciplinary studies as a major.

- All A&S degree requirements must be completed (120 credits, 2.0 overall GPA and major GPA, skills and general education requirements).
- The interdisciplinary studies proposal must consist of a minimum of 42 credits, 21 of which must be earned from courses numbered 1000 level or above. Courses are chosen from at least two different departments and arranged in one, two, or three clusters or thematic groupings. Each cluster must contain a minimum of 12 credits.
- A maximum of 6 credits of internship or independent study may be included. A maximum of 6 credits of non-A&S courses (i.e. BUS, BUSERV, ADMJ, ADMPS, IL, PSYED, etc.) may be used. There can be no more than 9 credits of internship/independent study and non-A&S credits combined.
- A W course approved by the faculty advisors must be completed as part of the major.

A GPA of at least 2.00 must be maintained for all interdisciplinary studies course work. Students may achieve honors in interdisciplinary studies by earning a minimum GPA of 3.50 in the courses for the major and approval of a final paper or thesis.

International and Area Studies, BPHIL

The University Honors College (UHC) and University Center for International Studies (UCIS) have created the Bachelor of Philosophy in International and Area Studies (BPhil IAS), a research-based undergraduate major that will help students meet the demands of today's world. The BPhil IAS degree is awarded jointly by the student's home school and the University Honors College and is the first undergraduate degree in international studies at Pitt.

The goal of the BPhil IAS degree is to enable students to think critically about their global world and to gain "global competence," which involves working effectively in different international settings, an awareness of the major currents of global change and the resulting issues raised, the capacity for effective communication across cultural and linguistic boundaries, and personal adaptability to diverse cultures.

Students seeking the BPhil IAS degree must have a minimum GPA of 3.50/4.00; complete an approved program of study involving coursework, second language, and study abroad; and write and publicly defend their research thesis before a faculty examining board that includes a visiting faculty member from outside the University. The BPhil IAS is not a freestanding major, as it requires the student to combine the BPhil IAS with a major in the student's home school of admission (A&S, CBA, Engineering, etc.); students must combine the BPhil IAS requirements with all curriculum requirements for a degree in their home school of admission.

Students seeking the BPhil in IAS must:

- have a minimum grade point average of 3.50/4.00; and
- complete eight approved courses (24 credits); and
- complete one methods course specific to their second major or to their BPhil thesis research topic; and
- complete one directed study course related to their BPhil thesis research topic; and
- complete three years of college-level language study or equivalent proficiency in a language relevant to their BPhil thesis research topic; and

- write and publicly defend their research thesis (the BPhil thesis) before a faculty examining board that includes a visiting faculty member from outside the University; and
- complete a second major in another academic discipline (note that only two courses from this major can overlap with the approved courses for the IAS major).

Students interested in the BPhil in IAS may complete one of the following tracks in UCIS: Asian Studies, European Union Studies, Global Studies, Latin American Studies, or Russian and East European Studies

Joint Major

A&S/Business, BA

A&S/Business Dual Major

The A&S/business dual major is offered jointly by Arts and Sciences (A&S) and the College of Business Administration (CBA). To satisfy the requirements, students must combine the business major with any A&S major. The A&S major will be listed first on the transcript as the degree-determining major (BS or BA), and the business major will be listed second. Students will be required to fulfill all A&S curriculum requirements. Students are admitted by a faculty committee that considers the cumulative GPA, specific courses taken and grades earned, SAT scores, and other relevant credentials. Students who have completed at least one full year of course work are eligible to apply to the program. Students interested in the program should seek assistance from their A&S advisor regarding the application process. For more information about the program, see http://www.business.pitt.edu/cba/academics/.

Major Requirements

To graduate with an A&S/business dual major, students must complete the following:

Four dual major prerequisites:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

- MATH 0120 - BUSINESS CALCULUS or
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- STAT 1100 - STAT & PROBLTY FOR BUS MGT

Note:

Competency in Microsoft Excel (spreadsheet software) is required.

Twelve required business courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MGRL ETHICS & STAKEHOLDER MGT *
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSFIN 1030 - INTRODUCTION TO FINANCE *
- BUSMKT 1040 - INTRODUCTION TO MARKETING *
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSMIS 1060 - Introduction to Information Systems *

- BUSQOM 1070 - OPERATIONS MANAGEMENT *
- BUSSPP 1080 - STRATEGIC MANAGEMENT *

Note:

Courses noted with an asterisk (*) are considered non-A&S credits. All other courses are counted toward graduation as A&S credits. A&S students may include only 18 non-A&S credits in the 120 credits required for graduation.

All of the above listed courses must be completed with an average GPA of 2.00. All courses for the business major must be taken on a letter-grade basis. Students who complete the requirements of the A&S/business dual major are not required to complete a minor or A&S related area.

A&S/Business, BS

A&S/Business Dual Major

The A&S/business dual major is offered jointly by Arts and Sciences (A&S) and the College of Business Administration (CBA). To satisfy the requirements, students must combine the business major with any A&S major. The A&S major will be listed first on the transcript as the degree-determining major (BS or BA), and the business major will be listed second. Students will be required to fulfill all A&S curriculum requirements. Students are admitted by a faculty committee that considers the cumulative GPA, specific courses taken and grades earned, SAT scores, and other relevant credentials. Students who have completed at least one full year of course work are eligible to apply to the program. Students interested in the program should seek assistance from their A&S advisor regarding the application process. For more information about the program, see http://www.business.pitt.edu/cba/academics/.

Major Requirements

To graduate with an A&S/business dual major, students must complete the following:

Four dual major prerequisites:

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

- MATH 0120 - BUSINESS CALCULUS or
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

- STAT 1100 - STAT & PROBLTY FOR BUS MGT

Note:

Competency in Microsoft Excel (spreadsheet software) is required.

Twelve required business courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - QUANTITATIVE METHODS
- BUSENV 0060 - MGRL ETHICS & STAKEHOLDER MGT *
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSFIN 1030 - INTRODUCTION TO FINANCE *
- BUSMKT 1040 - INTRODUCTION TO MARKETING *

- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSMIS 1060 - Introduction to Information Systems *
- BUSQOM 1070 - OPERATIONS MANAGEMENT *
- BUSSPP 1080 - STRATEGIC MANAGEMENT *

Note:

Courses noted with an asterisk (*) are considered non-A&S credits. All other courses are counted toward graduation as A&S credits. A&S students may include only 18 non-A&S credits in the 120 credits required for graduation.

All of the above listed courses must be completed with an average GPA of 2.00. All courses for the business major must be taken on a letter-grade basis. Students who complete the requirements of the A&S/business dual major are not required to complete a minor or A&S related area.

Certificate

Children's Literature Certificate

Books written for children are among the best-loved and best-remembered of all works of literature. They also provide some of the most important early learning experiences. In recent years, books written for children have attracted increasing interest from scholars and students as well as parents, educators, publishers, and journalists. What kinds of stories do we consider appropriate for children, and why? How have our opinions about this topic changed over time and across different cultures? And how is literacy changing, now that children are exposed not only to books, films, and television, but also to video games and the world wide web?

The interdisciplinary Certificate in Children's Literature offers undergraduates the opportunity to bring together studies across a broad range of subjects as they contemplate these and other questions pertaining to youth literature and culture. Founded in 1981, the program is designed to meet the individual student's interests and strengths and fulfills the Arts and Sciences requirement for a related area. The Children's Literature Certificate provides a useful background for many areas of professional work and study. Many of our students pursue careers in elementary, secondary, and special education, or in information science, child care, or social work. Others students have gone to graduate school in the humanities (English, History, Film Studies) or social sciences (Sociology, Psychology, Anthropology). Recent graduates of our new "Writing Youth Literature" course have gone to internships at Sesame Street Productions and the Harvey Klinger Literary Agency in New York City. For more information on the study of children's literature at the University, see www.childrenslit.pitt.edu.

Requirements

The certificate is a planned interdisciplinary sequence of at least 18 credits. The program director must also be consulted about the design of the student's individual course of study. The three required core courses for the certificate are listed below.

Students are encouraged to take all four of the below courses, since either ENGLIT 0562 or ENGLIT 0655 may be taken as a Category 1 elective. Of these two courses, the course not taken as an elective must be taken as a core course.

In addition to the three core courses, students should design their own course of study to complete the remaining credits, in consultation with the program director. Courses must be selected from an approved list of courses, available from the program director.

- ENGLIT 0560 - CHILDREN AND CULTURE

- ENGLIT 0562 - CHILDHOOD'S BOOKS or
- ENGLIT 0655 - REPRESENTING ADOLESCENCE

- ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT *

Note:

* ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT is the capstone course for the Children's Literature program and must be taken last.

Jewish Studies Certificate

The Jewish Studies Program is open to all students interested in the Hebrew language and the history and culture of the Jewish people and their contributions to Western civilization. In the historical courses, emphasis is on the interaction of the Jewish people with their neighbors, as well as the development of distinctive cultural and religious values. A certificate program is offered, and interdisciplinary studies options can be arranged to include courses in this program. Information is also available on opportunities for intensive study in Israel. The program in Jewish studies offers undergraduates the opportunity to supplement work in their own department or major with an interdisciplinary course of study in the area of Jewish studies. Completion of the certificate program fulfills the Arts and Sciences requirement for a related area (although students should check with their major departments) and will be indicated on the transcript.

Requirements

The certificate requires 18 credits. A maximum of 9 credits may be transferred from another institution, including study abroad. Credits are to be distributed as follows:

- JS 0025 - INTERMEDIATE HEBREW 3 or higher (3 credits)
- Jewish studies: Two 1000-level courses selected from the inventory of Jewish Studies courses offered at the University of Pittsburgh (6 credits)
- JS 1901 - INDEPENDENT STUDY (3 credits)
- One course from any of the above categories (3 credits)

Those interested in graduate study are strongly urged to acquire a knowledge of Hebrew and either French or German. Students should consult with the advisor in the Jewish Studies Program in order to register their interest in the certificate program and to plan their course of study, including the choice of an appropriate independent study project.

Medieval and Renaissance Studies Certificate

In spite of change through the centuries and variations of a regional and national character, the millennium preceding the deaths of Shakespeare and Cervantes in 1616 is marked by a coherence sufficient to justify considering it as a cultural entity, worthy of study for its humanistic qualities and for its importance in preparing the modern world. Some of the principal aims of the Medieval and Renaissance Studies Program are:

- to identify and explore aspects of medieval and Renaissance cultures that are an important part of our own cultural heritage;
- to promote an understanding of our medieval and Renaissance ancestors through the investigation of the ways they faced the issues of their day, asked questions of their institutions, and were conscious of themselves and the world around them;
- to help students understand historical relativity by showing them how different periods and individuals have understood the Middle Ages and Renaissance in very different ways; and
- to provide the basis for an open-minded attitude toward any culture that is different from our own.

In consultation with a program advisor (who may be a member of the Executive Committee, one of the departmental representatives, or another faculty member specializing in the area), the candidate will define an area of interest and organize a program of courses in relation to it. In designing a certificate program, students are urged to keep in mind the aims of the program as described above. For more information, see http://www.medren.pitt.edu/.

Requirements

The Certificate requires 15 credits:

At least nine credits will be earned in 1000-level courses

One of the five courses must be focused on the medieval period; see the list of qualifying courses at http://www.medren.pitt.edu/undergraduate-certificates/overview.php

One of the five courses must be focused on the Renaissance period; see the list of qualifying courses at http://www.medren.pitt.edu/undergraduate-certificates/overview.php

The student must take at least two courses from each category. Courses should not be chosen at random but should follow a pattern of interrelated studies worked out with a Program Advisor from one of the cooperating Departments or with the Director of Medieval and Renaissance Studies. The categories are:

- language and literature, the visual arts, and music; and
- social, intellectual, economic, and ideological history (including philosophy, religious studies, the history of science and the study of institutions).

A strong recommendation, beyond these requirements, is that certificate candidates acquire a reading knowledge of a modern European language as early as possible. In addition, Latin is suggested for those who plan to do graduate work in the field.

Nanoscience and Engineering Undergraduate Certificate

Advances in nanoscience and nanotechnology (the ability to predict, create, and design with nanoscale materials and systems) are expected to reveal new physical phenomena and to enable the creation of highly desirable products and devices, in addition to revolutionary changes in industrial practice. Strength in nanoscience and nanotechnology has been identified as the nation's future competitiveness and prosperity, and strategic plans have been developed to accelerate nanoscience research and development, encourage knowledge transfer to spur economic growth, and expand educational programs and workforce training - all in a socially and environmentally responsible and sustainable manner.

Nanoscience and nanotechnology also has had a large and rapidly growing local impact. The Pittsburgh region is home to a number of corporations, including many smaller start-up companies, with major nanotechnology components to their businesses. The continued success of companies such as PPG, Seagate, Bayer, Alcoa, Plextronics, Westinghouse, Bettis, and II-VI will depend on their ability to recruit local engineering talent with the required background in nanoscience and nanotechnology. The continued development of nanotechnology-based entrepreneurial start-ups will depend in large part on a vibrant pool of young engineers and scientists with appropriate educational experience in nanoscience and nanotechnology.

This joint certificate, housed in both the Swanson School of Engineering (SSOE) and the Dietrich School of Arts and Sciences (Dietrich School) enables BS students from both schools to complement their education by completing a fivecourse sequence. The certificate is designed to be combined with coursework in any SSOE degree-granting program, or with chemistry and physics in the Dietrich School.

The course requirements for this certificate follow.

Required courses

This course has prerequisites.

- ENGR 0240 - NANOTECHN & NANOENGINEERING

One of the following courses

These courses have prerequisites.

- CHEM 1630 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE

One of the following courses

- ENGR 1730 - Research Experiences in Nanotechnology
- CHEM 1730 - RESEARCH IN NANOTECHNOLOGY
- PHYS 1903 - DIRECTED RESEARCH

Two elective courses from the following list

- CHEM 1450 - MOLECULAR MODELING & GRAPHICS
- CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMRS

- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 0257 - ANAL & DESIGN ELECTRONIC CIRCT
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 2295 - Nanosensors
- ENGR 0241 - FABRICATION & DSGN NANOTECHN

- IE 1012 - MANUFACT STRUCTRL NANOMATRLS or
- IE 2012 - Manufacture of Structural Nano-Materials

- MEMS 1057 - MICRO/NANO MANUFACTURING
- MEMS 1447 - Nanocharacterization
- MEMS 1469 - Materials Science of Nanostructures
- MEMS 1477 - THIN FILM PROCESSES
- MEMS 1478 - Nanoparticles: Science and Technology
- MEMS 1480 - Introduction to Microelectromechanical Systems
- PHYS 0577 - MODERN PHYSICAL MEASUREMENTS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1374 - SOLID STATE PHYSICS

One of the following courses

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1480 - INTERMEDIATE PHYSICAL CHEMSTRY

One of the following courses

- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1
- PHYS 1371 - INTRO TO QUANTUM MECHANICS 2

Note:

http://www.bulletins.pitt.edu/undergrad/anthropology.htm#anthro

Photonics Certificate

Photonics is one of the fastest growing high-tech industries in the world today. It includes optical communications (e.g., fiber optics, lasers, and infrared links), optical imaging (e.g., spy and weather satellites, night vision, holography, flat screen display, and CCD video cameras), optical data storage (e.g., CDs and CD-ROMs), optical detectors (e.g., supermarket scanners, medical optics, and nondestructive evaluation of materials), lasers (e.g., welding lasers, laser surgery, laser shows, and laser rangefinders), spectroscopy (e.g., chemical analysis and detection), and quantum optics (e.g., quantum cryptography, quantum computing, and single-photon detection).

Although the photonics industry is growing rapidly, photonics companies have a hard time finding qualified people because the interdisciplinary field crosses physics, physical chemistry, and electrical engineering. The photonics certificate program at the University of Pittsburgh will give this kind of cross-cutting experience and allow students to move directly into the photonics industry. The Certificate in Photonics will also serve as good preparation for graduate school in solid state physics, physical chemistry, or electrical engineering with optoelectronics emphasis.

Students in the certificate program will have opportunities for laboratory research with professors at the University of Pittsburgh and will also receive special job placement referrals.

Requirements

The certificate is designed to fit easily with a physics, chemistry, or electrical engineering major, but students with other majors can also earn the certificate.

To receive the certificate, students must have taken

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- MATH 0250 - MATRIX THEORY & DIFFT EQUATNS

One of the following pairs

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
  or
- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

One of the following pairs

- CHEM 0110 - GENERAL CHEMISTRY 1 and
- CHEM 0120 - GENERAL CHEMISTRY 2
  or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1 and
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
  or
- CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1 and
- CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

Required laboratory courses:

One of the following

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG
- PHYS 0577 - MODERN PHYSICAL MEASUREMENTS

- CHEM 0250 - INTRO ANALYTICAL CHEMISTRY and
- CHEM 0260 - INTRO ANALYTICAL CHEMISTRY LAB

- ECE 0501 - DIGITAL SYSTEMS LABORATORY

One of the following

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS

- ECE 1201 - ELECTNC MEASURMNTS & CRCTS LAB and
- ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB

- CHEM 1430 - PHYSICAL CHEMSTRY LABORATORY 1 and
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB

In addition

The following courses are required for the certificate.

- PHYS 1361 - WAVE MOTION AND OPTICS
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- Junior Photonics Seminar (two semesters, each 1 credit) (cross listed as PHYS 0177, CHEM 1750, or ECE 1248)
- Photonics Theory 1 (3 credits) (cross listed as PHYS 1363, CHEM 1470/CHEM 1472, or ECE 1240/1240)
- Photonics Theory 2 (3 credits) (cross listed as PHYS 1364, CHEM 1470/CHEM 1472, or ECE 1240/ECE 1241)
- Photonics Laboratory (1 credit) (PHYS 1365, to be cross listed in EE and CHEM)

One of the following

- CHEM 1410 - PHYSICAL CHEMISTRY 1

- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1 and
- PHYS 1371 - INTRO TO QUANTUM MECHANICS 2

Two of the following courses or sequences

- CHEM 1250 - INSTRUMENTAL ANALYSIS
- TELCOM 2222 - Photonic Communications

One of the following

- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM

- ECE 1259 - ELECTROMAGNETICS 1 and
- ECE 1266 - APPLICTIONS OF FIELDS & WAVES

Note:

For more information, see www.phyast.pitt.edu/~snoke/photonics.

Public and Professional Writing Certificate

Writing plays a crucial role in the lives of people after they leave college, as students go on to work, volunteer, attend professional schools, and advocate for themselves and others. The PPW certificate focuses on writing that serves professional goals and/or the public interest. We invite students from across the University to focus on writing as a way to develop the critical writing, learning, and thinking skills necessary to all sectors of American professional life-private, nonprofit, and government.

Students who know that they will write extensively as professionals in law, medicine, the sciences, social work, public policy, international relations, business, or other fields are good candidates for the PPW certificate, as are students who are interested in advocacy and activism. Students contemplating graduate work should also find the course of study leading to the PPW certificate useful. The courses will allow students to work on significant writing projects in a range of venues. Students who have finished the certificate should have a compelling portfolio of work that they can show to prospective employers.

Students should expect to undertake rigorous intellectual work that will increase their precision as writers, deepen their facility with language and style, and deepen their engagement with writing as a form of social action that has consequences in the world. For more information, see www.composition.pitt.edu/ppw/.

All students who wish to enroll in the certificate program must submit a letter of intent (this would be the equivalent of an admission essay), a resume, and a writing sample. Please submit this information via campus mail or U.S. mail to Department of English, Public and Professional Writing Certificate, 526 Cathedral of Learning, Pittsburgh, PA 15260.

Requirements

At least 18 credits are required to complete the PPW certificate; students must maintain a minimum B GPA in the three courses required by the certificate.

Students must take ONE of the following core courses:

After they have completed one of the core courses with at least a B, students must also complete, with at least a B, a minimum of TWO approved 1000-level courses (one of which may be a PPW internship) in the composition program.

The remaining 9 credits may come from designated intermediate and advanced course offerings in the English department. The list of designated courses that count toward the certificate will be given to students when they register for the program; designated courses are also listed online. Students may petition to have a relevant course count toward the PPW certificate.

- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN
- ENGCMP 0410 - WRITING IN THE LEGL PROFESSNS
- ENGCMP 0420 - WRITING FOR THE PUBLIC

Undergraduate Certificate in Sustainability

Environmental and sustainability programs study coupled human-natural systems using interdisciplinary approaches and knowledge. Such programs work at the science-engineering, science-policy, and policy management interfaces and aim to prepare sustainability-oriented problem solvers through interdisciplinary research, scholarship, and practice. This certificate addresses the need for education and research to strengthen our understanding of the links between human behavior and natural processes by integrating the behavioral and social sciences, earth sciences, physical sciences, engineering, and information sciences.

Completion of the certificate in the Dietrich School requires 18 credits. The following requirements are for Dietrich School students who pursue this certificate. Be advised that Swanson School of Engineering students may have different requirements.

Required Courses

- ENGR 1110
- ENGR 1905
- GEOL 1030 - THE ATMOSPHERE, OCEANS & CLMTE

Elective Courses

Select three of the following courses. Only one course may be in the student's major department.

- BIOSC 0740 - YELLOWSTONE FIELD COURSE (UHC, off-campus in Wyoming)
- BIOSC 1160 - FOREST ECOLOGY (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1220 - ECOLOGICAL FIELD STUDIES (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1610 - CONSERVATION BIOLOGY (off-campus at Pymatuning Laboratory of Ecology)
- CEE 1209 - LIFE CYCLE ASSMNT METH & TOOLS
- CEE 1217 - GREEN BUILDING DSGN & CONSTRCT
- CEE 1218 - DESIGN FOR THE ENVIRONMENT
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG

- CS 0090 - SUSTAINABILITY AND COMPUTING
- ECE 1769 - POWER SYSTEM ANALYSIS 1
- ECON 0360 - INTRO ENVIRON & RESOURCE ECON
- ECON 0530 - INTRO TO DEVELOPMENT ECONOMICS
- ECON 1360 - ENVIRONMENTAL ECONOMICS
- ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LIT
- ENGLIT 1005 - LITERATURE & THE ENVIRONMENT
- ENGR 1060 - SOCL ENTREP-ENGRG FOR HUMANITY
- GEOL 0860 - ENVIRONMENTAL GEOLOGY
- GEOL 1051 - GROUNDWATER GEOLOGY
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1333 - SUSTAINABILITY
- GEOL 1334 - ENVIRONMENTAL POLICY
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1904 - DIRECTED READING
- GSWS 1450 - GENDER AND SUSTAINABILITY
- HAA 0940 - APPROACHES TO BUILT ENVIRNMNT
- HIST 1019 - CITIES HISTORICAL PERSPECTIVE
- HIST 1695 - ENVIRONMENTAL HISTORY
- HONORS 1544 - READING THE EARTH (UHC, off campus in Wyoming)
- MEMS 1065 - THERMAL SYSTEMS DESIGN
- PIA 2008
- PIA 2231
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- SA 1340 - SCULPTURE STUDIO: PROJECTS
- SOC 1445 - SOCIETY AND ENVIRONMENT
- URBNST 0080 - INTRODUCTION TO URBAN STUDIES
- URBNST 1614 - URBAN SUSTAINABILITY

Department of Linguistics

Linguistics is concerned with the study of language as a core property of human cognition and interaction. It is a broad field that straddles the humanities, social sciences, and natural sciences. Major areas of study in linguistics include the following fields:

- Applied linguistics: second-language learning theory, literacy, bilingual education
- Computational linguistics: natural language generation, knowledge representation and artificial intelligence, recognition of systems
- Theoretical linguistics: development of psychologically plausible models of language sound systems, word structure, sentence and discourse structure, meaning
- Historical and comparative linguistics: study of language history, both language change and relationships among languages
- Descriptive-anthropological linguistics: documentation and analysis of languages, especially little-known languages through field work
- Psycholinguistics: research on such topics as sentence processing, problems in reading, how children acquire their first language (childhood language acquisition)
- Sociolinguistics: study of language use and socially controlled variation in form, conversation and narrative discourse, social trends reflected in language use, political aspects of language use

Careers in linguistics include teaching English as a second language and other languages including American Sign Language; computational linguistic research in industry and public agencies; field research on endangered languages and cultures; research and teaching at the university level; careers in publishing and advertising; speech pathology and rehabilitation; translation and interpreting; law; and governmental consulting on language policies. Most careers in linguistics require graduate training.

Many, but certainly not all, people come to linguistics through a love of languages. However, love of languages itself is not sufficient to ensure success and happiness as a linguistics major. The student must also enjoy analytical thought, as linguists employ analytical tools in the study of human languages. Students considering a major in linguistics should take the introductory linguistics course (LING 1950 - INTRODUCTION TO LINGUISTICS) at their earliest opportunity to help gauge if the major is right for them. The linguistics major gives students a solid foundation in the central areas of linguistic theory and analysis. The structure of human language (its sounds, word structures, and syntax) is the focus of the linguistics courses required for the major. In addition, the major's language requirement is designed to make sure students acquire a perspective on linguistic structures besides those of their native language and at least some exposure to one language that is structurally very unlike English. For more information on the major or the Department of Linguistics, see www.linguistics.pitt.edu.

Major

Linguistics, BA

Major Requirements

Students must complete at least 24 credits in the linguistics department including the following courses:

- LING 1950 - INTRODUCTION TO LINGUISTICS

- LING 1682 - INTRODCTN TO SEMANTIC THEORY or
- LING 1860 - INTRO TO HISTORCAL LINGUISTICS

- LING 1773 - MORPHOLOGY
- LING 1777 - SYNTACTIC THEORY
- LING 1578 - PHONETICS AND PHONEMICS
- LING 1579 - PHONOLOGY

Note:

A student may petition to have a given requirement waived if an equivalent course was completed elsewhere before registering as a departmental major.

Other requirements and rules for linguistics majors are as follows:

- Knowledge of any second language equivalent to one year of college-level study is required. The student's knowledge of the language may be evaluated if first-year college-level courses are not taken.
- Majors must have at least a 2.00 GPA in linguistics courses.
- No more than 6 credits may be taken on the S/NC basis (formerly the S/N option).
- Credit by examination is not available.
- Courses for the W requirement and for the A&S-required 12-credit related area are chosen in consultation with the departmental advisor. Besides second language and literature departments, the most appropriate related areas are anthropology, communication, computer science, English, history and philosophy of science, psychology, philosophy, sociology, and theatre arts.
- LING 0080 - ASPECTS OF LANGUAGE and LING 0101-0964 (uncommonly taught languages) do not count toward the major.
- Any student considering graduate work in linguistics, especially at the PhD level, should take French, German, or Russian. In addition to the language requirement described above, the student must take three more terms of language study (although in special cases, students may petition to have part of this requirement waived). At least 3 credits of this additional requirement must be taken in some language that is not Romance (including Latin), Germanic, Baltic, Slavic, or Greek, unless the language chosen to fulfill the language requirement above falls into this category.

Note:

Courses offered by the English Language Institute for students who are learning or improving their English language skills do not count toward the linguistics major.

Minor

Linguistics Minor

An minor in linguistics would be particularly useful for students majoring in English, second languages, philosophy, anthropology, psychology, sociology, communications, speech science, neuroscience, computer science, and information science, as well as for students with an interest in teaching English as a second language, going to law school, or otherwise choosing a profession in which language plays a crucial part.

Academic Requirements

The minor consists of 15 credits and comprises the following courses:

- LING 1950 - INTRODUCTION TO LINGUISTICS
- LING 1578 - PHONETICS AND PHONEMICS
- LING 1777 - SYNTACTIC THEORY
- Two electives, chosen from the linguistics courses at the 1000 level (e.g., Phonology, Morphology, Historical Linguistics, Aspects of Sociolinguistics, Introduction to Applied Linguistics)

Certificate

American Sign Language Certificate

The Department of Linguistics offers an undergraduate Certificate in American Sign Language (ASL). This certificate program should lead students to: a high degree of proficiency in ASL; an understanding of the structure of ASL as a visual/gestural language; and an understanding of important issues in deaf culture and education.

This certificate program could conveniently accompany various undergraduate majors including, but not limited to, linguistics, communication science, and various undergraduate disciplines that serve as the basis for graduate-level degrees and certificates in the University of Pittsburgh School of Education. The program draws on the academic strengths and resources of the Department of Linguistics in the Faculty of Arts and Sciences and the Department of Instruction and Learning in the School of Education.

Currently, there is a limit of 20 students per academic year who can enroll in the ASL certificate program. For this reason, each applicant will be required to go through an evaluation process. Applications are accepted early during the spring term of each academic year, and students will be notified of their acceptance or non-acceptance into the program before registering for fall classes. Please contact the Less-Commonly-Taught Languages Center, CL G-47, for application packets or more information (lctl@pitt.edu, 412-624-5512).

Requirements

- LING 0471 - AMERICAN SIGN LANGUAGE 1 (B or higher)
- LING 0472 - AMERICAN SIGN LANGUAGE 2 (B or higher)
- Successful performance on skills and knowledge evaluations

Required courses (18 credits)

Category 1:

- LING 0473 - AMERICAN SIGN LANGUAGE 3
- LING 0474 - AMERICAN SIGN LANGUAGE 4

Category 2:

- LING 1722 - DEAF CULTURE

Category 3:

- LING 1000 - INTRODUCTION TO LINGUISTICS

Category 4:

- LING 1720 - STRUCTURE OF SIGN LANGUAGES

Category 5:

(one of the following)

- LING 1721 - SOCIOLINGUISTICS OF SIGN LANG
- LING 1723 - ANALYSES OF ASL LITERATURE

Arabic Language and Linguistics Certificate

The Department of Linguistics offers an undergraduate certificate in Arabic Language and Linguistics. This certificate program should lead students to:

- an intermediate to advanced proficiency in Modern Standard Arabic (formal Arabic) and at least one Arabic dialect;
- an understanding of the linguistic structure of Arabic;
- an understanding of important issues in Arabic literature and culture; and
- exposure to authentic Arabic reading and listening materials, and discussion of general topics of interest in the Arab world in Arabic.

The certificate program could conveniently accompany several undergraduate majors including, but not limited to, linguistics, political science, communication science, and various undergraduate disciplines that serve as the basis for graduate-level degrees and certificates in the schools of education, law, and others.

Students who are interested in the Arabic Language and Linguistics Certificate can apply for the program after they complete the prerequisites for the certificate which is the completion of two semesters of the language with an average B grade or higher. However, students could also apply for the certificate any time before their graduation if they complete the requirements by then. Contact the Arabic coordinator, Amani Attia (ama66@pitt.edu) for advice on course planning, and to submit the application packet, which consists of three forms to be filled out by candidates. This certificate requires 32-34 credits for completion.

Prerequisite dialect courses

Students must complete two semesters of Modern Standard Arabic in one dialect - Egyptian or Levantine, with a letter grade of B or higher to declare the certificate.

Choose one of the following pairs of courses

- Egyptian
  - LING 0141/ ARABIC 0101 Modern Standard Arabic 1, Egyptian (5 credits)
  - LING 0142/ ARABIC 0102 Modern Standard Arabic 2, Egyptian (5 credits)
- Levantine
  - LING 0151/ ARABIC 0121 Modern Standard Arabic 1, Levantine (5 credits)
  - LING 0152/ ARABIC 0122 Modern Standard Arabic 2, Levantine (5 credits)

In addition to the prerequisite courses, the certificate requires 22-23 credits of course work as follows:

Required Courses:

Two additional courses in the same dialect

In some cases, students could change from one dialect track to the other, based on study abroad needs, schedule conflicts, or other factors. The student must show a certain level of proficiency in the target dialect. Contact Arabic coordinator (ama66@pitt.edu) for advice on this issue.

Egyptian

- LING 0143 - MOD STNDRD ARABIC 3/EGYPTIAN 3 or
- ARABIC 0103 - MODERN STANDARD ARABIC 3/EGYPTIAN 3

- LING 0144 - MOD STNDRD ARABIC 4/EGYPTIAN 4 or
- ARABIC 0104 - MODERN STANDARD ARABIC 4/EGYPTIAN 4

Levantine

- LING 0153 - MOD STNDRD ARABIC3/LEVANTINE 3 or
- ARABIC 0123 - MODERN STANDARD ARABIC 3/LEVANTINE 3

- LING 0154 - MOD STNDRD ARABIC4/LEVANTINE 4 or
- ARABIC 0124 - MOD STNDRD ARABIC4/LEVANTINE 4

Prerequisite introductory linquistic course; choose one

As a prerequisite for LING 1520 / ARABIC 1705 - INTRODUCTION TO ARABIC LINGUISTICS:

- LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1020 - NATURE OF LANGUAGE

Arabic linguistics courses; both courses are required

- LING 1520 - INTRO TO ARABIC LINGUISTICS or
- ARABIC 1705 - INTRODUCTION TO ARABIC LINGUISTICS

- LING 1524 - READINGS IN ARABIC or
- ARABIC 1115 - READINGS IN ARABIC

Arabic culture course; choose one

- LING 1522 - ARABIC LIFE AND THOUGHT or
- ARABIC 1615 - ARABIC LIFE AND THOUGHT

- LING 1523 - INTRO TO MODERN ARABIC LITERTR or
- ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE

One of the following Arabic related elective courses

These could be Arabic content courses, or Arabic related courses taught in English:

- LING 0145 - MOD STNDRD ARABIC 5/EGYPTIAN 5 or
- ARABIC 0105 - MODERN STANDARD ARABIC 5/EGYPTIAN 5

- LING 0146 - MOD STNDRD ARABIC 6/EGYPTIAN 6 or
- ARABIC 0106 - MODERN STANDARD ARABIC 6/EGYPTIAN 6

- LING 0155 - MOD STNDRD ARABIC5/LEVANTINE 5 or
- ARABIC 0125 - MODERN STANDARD ARABIC 5/LEVANTINE 5

- LING 0156 - MOD STNDRD ARABIC6/LEVANTINE 6 or
- ARABIC 0126 - MODERN STANDARD ARABIC 6/LEVANTINE 6

- LING 0711 - IRAQI ARABIC 1 or
- ARABIC 0211 - IRAQI ARABIC 1

- LING 0712 - IRAQI ARABIC 2 or
- ARABIC 0212 - IRAQI ARABIC 2

- LING 0713 - IRAQI ARABIC 3 or
- ARABIC 0213 - IRAQI ARABIC 3

- LING 0731 - MOROCCAN ARABIC 1 or
- ARABIC 0221 - LEVANTINE ARABIC 1

- LING 0732 - MOROCCAN ARABIC 2 or
- ARABIC 0222 - LEVANTINE ARABIC 2

- LING 0733 - MOROCCAN ARABIC 3 or
- ARABIC 0223 - LEVANTINE ARABIC 3

- LING 1522 - ARABIC LIFE AND THOUGHT or
- ARABIC 1615 - ARABIC LIFE AND THOUGHT

- LING 1523 - INTRO TO MODERN ARABIC LITERTR or
- ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE

- LING 1527 - SPECIAL TOPICS IN ARABIC or
- ARABIC 1909 - SPECIAL TOPICS IN ARABIC

- ECON 0640 - ECON DEVELOPMENT OF THE MENA

- HIST 0756 - INTRO TO ISLAMIC CIVILIZATION or
- RELGST 0455 - INTRO TO ISLAMIC CIVILIZATION

- PS 1351 - GOVERMNT & POLITICS MIDDL EAST
- SOC 1366 - SOCIOLOGY OF ISLAM
- Other Arabic-related courses offered by another Dietrich School department or University of Pittsburgh school, such courses taken as part of a study abroad program, with the approval of the Arabic coordinator

Department of Mathematics

The Department of Mathematics offers course work leading to a Bachelor of Science degree in mathematics as well as various courses for non-majors. Students concentrating in mathematics may pursue majors in mathematics, applied mathematics, actuarial mathematics, or mathematical biology, or they may pursue a joint major in mathematics and economics. Each of the department's majors has its own philosophy and its own formal requirements, so students should consult with a major advisor. For more information on these majors and the Department of Mathematics, see www.mathematics.pitt.edu.

Major

Actuarial Mathematics, BS

Students wishing to pursue a major in Actuarial Mathematics must complete both MATH 0220 and MATH 0230 or their equivalents with a letter grade of C or better before declaring actuarial mathematics as their major. Students will be required to take 63 credits, of which 46 will be in Mathematics and Statistics. Specific requirements are:

Prerequisite courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2

Basic Calculus

Choose one of the following courses

- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL

Analysis:

choose one of the following courses

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0450 - INTRODUCTION TO ANALYSIS

Linear algebra:

choose one of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

Differential Equations:

Choose one of the following courses

- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1
- MATH 1275 - HNRS ORDINARY DIFFT EQUATNS 1

Actuarial Mathematics courses

- MATH 0470 - ACTUARIAL MATHEMATICS 1

- MATH 1121 - ACTUARIAL MATHEMATICS 2

Numerical Methods:

choose one of the following courses

- MATH 1070 - NUMERICAL MATHEMATICAL ANLYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA

Applied Mathematics:

Choose two of the following courses

- MATH 1100 - LINEAR PROGRAMMING
- MATH 1110 - INDUSTRIAL MATHEMATICS (writing-intensive course)
- MATH 1122 - ACTUARIAL MATHEMATICS 3
- MATH 1123 - ACTUARIAL MATHEMATICS 4
- MATH 1280 - ORDINARY DIFFERNTL EQUATIONS 2
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS

Economics

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY

Computer programming

Choose one of the following courses

- CS 0004 - INTRO COMPUTER PROGRMMNG-BASIC
- CS 0007 - INTRO TO COMPUTER PROGRAMMING
- CS 0008 - INT COMPUTER PRGMG WITH PYTHON
- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- STAT 1301 - STATISTICAL PACKAGES
- BUSBIS 1060 - INTRO TO INFORMATION SYSTEMS
- ENGR 0012 - INTRO TO ENGINEERING COMPUTING

Statistics

- STAT 1000 - APPLIED STATISTICAL METHODS

Probability

Choose one of the following courses

- STAT 1151 - INTRODUCTION TO PROBABILITY

- MATH 1510 - PROBABILITY

Analysis

Choose one of the following courses

- ECON 1150 - APPLIED ECONOMETRICS 1
- STAT 1221 - APPLIED REGRESSION

Time Sequence

Choose one of the following courses

- STAT 1321 - APPLIED TIME SERIES
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY

Finance

Choose one of the following courses

- BUSFIN 1311 - CORPORATE FINANCE
- ECON 1440 - ECONOMICS OF CORPORTN FINANCE

Other Requirements and Recommendations

- Before declaring this major, students must complete MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2 or MATH 0235 - HONORS 1 - VARIABLE CALCULUS , or their equivalents, with a letter grade of C or better. Additionally, Students must complete MATH 0470 - ACTUARIAL MATHEMATICS 1 with a letter grade of B or better to declare this major.
- A letter grade of C or higher is necessary in all courses required for the major.
- No course that counts toward the major can be taken on the Satisfactory/No Credit (S/NC) basis.
- Students must complete at least one writing-intensive course (W-course) in the major. MATH 1110 - INDUSTRIAL MATHEMATICS is a W-course option for this major.
- The required courses include nine credits of statistics courses and nine to 12 credits of economics courses. Majors can fulfill the related area requirement by taking an additional statistics or economics course to achieve a total of 12 credits in one of these subjects.

Applied Mathematics, BS

Students majoring in Applied Mathematics must complete 40 credits in mathematics, distributed as follows. Since different program emphases are possible, students should consult the advisor as early as possible in regards to selection of courses:

Calculus

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

Introductory theoretical course

- MATH 0413 - INTRO THEORETICAL MATHEMATICS

- MATH 0420 - INTRO THEORY 1-VARIABLE CALCUL

Upper-level required courses

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

One of the following courses

- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1
- MATH 1275 - HNRS ORDINARY DIFFT EQUATNS 1

Numerical Mathematics:

choose one of the following courses

- MATH 1070 - NUMERICAL MATHEMATICAL ANLYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1100 - LINEAR PROGRAMMING
- MATH 1110 - INDUSTRIAL MATHEMATICS

Applied Analysis:

choose one of the following courses

- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- MATH 1570 - FOURIER ANALYSIS

Differential Equations:

choose one of the following courses

- MATH 1280 - ORDINARY DIFFERNTL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1480 - PARTL DIFFERENTIAL EQUATIONS 2

One of the following courses

- MATH 1110 - INDUSTRIAL MATHEMATICS
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1370 - INTRO TO CMPTL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY

Physics courses

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)

- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

Computer Science:

choose one of the following courses

- CS 0007 - INTRO TO COMPUTER PROGRAMMING
- CS 0008 - INT COMPUTER PRGMG WITH PYTHON
- CS 0401 - INTRMEDT PROGRMMING USING JAVA

Statistics:

choose one of the following courses

- MATH 1510 - PROBABILITY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STAT & PROBLTY FOR BUS MGT
- STAT 1151 - INTRODUCTION TO PROBABILITY

Other Requirements and Recommendations

- Students interested in graduate study are strongly advised to take MATH 1530 - ADVANCED CALCULUS 1 and MATH 1540 - ADVANCED CALCULUS 2. These two courses may be substituted for the Applied Analysis and the Differential Equations courses, respectively.
- A grade of C or higher is necessary in all courses required for the major. A minimum GPA of 2.0 in departmental courses is required for graduation.
- Students must complete at least one writing-intensive course (W-course) in the major.
- No course that counts toward the major may be taken on the S/NC basis.
- Students must complete at least 12 credits in a related area. A minor in Chemistry, Computer Science, Economics, or Physics would fulfill this requirement. Speak to the departmental advisor for more options or details.
- Honors in Applied Mathematics is granted if the student:
    - Completes all requirements for the major
    - Completes the following courses with a letter grade of B or higher:
        - MATH 1470
        - MATH 1530
        - MATH 1540
        - A 2000-level course in lieu of a 1000-level elective
    - Completes an honors thesis under the direction of a member of the Department of Mathematics faculty, or completes a 2000-level course in lieu of the honors thesis.
- The statistics requirement is waived for students seeking honors in Applied Mathematics.

Mathematical Biology, BS

Students pursuing the Mathematical Biology major are encouraged to take CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2, as these courses will satisfy the Dietrich School of Arts and Sciences breadth requirement in natural science and will expand their biology and neuroscience course options. Several of the BIOSC courses that fulfill requirements for this major have prerequisites, but some do not have prerequisites. PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD) also carry a high degree of relevance for Mathematical Biology majors.

Requirements

The Mathematical Biology major will require the completion of 43 credits in mathematics.

Three Calculus courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

Two introductory theoretical courses

- MATH 0413 - INTRO THEORETICAL MATHEMATICS *
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCUL *

Note:

* Qualified students may substitute MATH 0450 - INTRODUCTION TO ANALYSIS for MATH 0413 and MATH 0420.

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

One of the following courses

- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1
- MATH 1275 - HNRS ORDINARY DIFFT EQUATNS 1

Two mathematical biology courses

- MATH 1370 - INTRO TO CMPTL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY

Two numerical mathematics courses

- MATH 1070 - NUMERICAL MATHEMATICAL ANLYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA

Two applied analysis courses

From the following list.

- MATH 1280 - ORDINARY DIFFERNTL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS

Four Biology or Neuroscience courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

Two of the following

At least one must be at the 1000 level.

- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY

One of the following courses

- BIOSC 0350 - GENETICS
- BIOSC 0355 - UHC GENETICS

One of the following courses

- BIOSC 1070 - HUMAN PHYSIOLOGY-UHC
- BIOSC 1250 - HUMAN PHYSIOLOGY
- BIOSC 1870 - ANIMAL PHYSIOLOGY
- BIOSC 1130 - EVOLUTION
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1470 - BIOPHYSICAL CHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1760 - IMMUNOLOGY

One of the following courses

- NROSCI 1000 - INTRO TO NEUROSCIENCE
- NROSCI 1003 - UHC INTRO TO NEUROSCIENCE
- NROSCI 1011 - FUNCTIONAL NEUROANATOMY
- NROSCI 1012 - NEUROPHYSIOLOGY
- NROSCI 1017 - SYNAPTIC TRANSMISSION
- NROSCI 1034 - NEURAL BASIS OF COGNITION

One of the following statistics courses

- MATH 1510 - PROBABILITY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STAT & PROBLTY FOR BUS MGT

Note:

Mathematical Biology students who plan to continue in graduate studies are advised to take advanced calculus, MATH 1530 - ADVANCED CALCULUS 1 and MATH 1540 - ADVANCED CALCULUS 2. MATH 1370 - INTRO TO CMPTL NEUROSCIENCE and MATH 1380 - MATH BIOLOGY introduce students to techniques for independent research; students in these courses are encouraged to pursue research opportunities in Mathematical Biology that are available locally and nationally.

Other Requirements and Recommendations

- A grade of C or higher is necessary in all courses required for the major. A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major may be taken on the S/NC basis.
- Students must complete at least one writing-intensive course (W-course) in the major. Either MATH 0413 or MATH 0450 will satisfy this requirement.
- Students must complete at least 12 credits in a related area.
- Students seeking honors in Mathematical Biology will earn departmental honors if they meet the following requirements.
    - Fulfill all requirements for the major.
    - Complete the following courses with a letter grade of A- or better.
        - MATH 1370 - INTRO TO CMPTL NEUROSCIENCE
        - MATH 1380 - MATH BIOLOGY
    - Complete the following courses with a letter grade of B or higher.
        - MATH 1530 - ADVANCED CALCULUS 1
        - One 2000-level mathematics course in lieu of an upper level elective
    - Complete one of the following conditions.
        - An honors thesis under the direction of a faculty member in the Department of Mathematics; for students seeking a BPhil from the University Honors College, this requirement could be satisfied by the Honors College thesis
        - A 2000-level mathematics course with a letter grade of B or higher, in addition to the course use for the third item, above.
    - Although not required, the department strongly recommends that honors degree candidates take the intermediate honors courses MATH 1185 and MATH 0450 during their freshman or sophomore year.

Mathematics, BS

Requirements

Calculus courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

Introductory theoretical courses

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCUL
- MATH 0430 - INTRO ABSTRCT ALGBRAIC SYSTEMS

Upper-level required courses

Required course

- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

One of the following courses

- MATH 1020 - APPLD ELEMENTARY NUMBER THEORY
- MATH 1025 - INTRO TO MATHMTL CRYPTOGRAPHY
- MATH 1050 - COMBINATORIAL MATHEMATICS
- MATH 1250 - ABSTRACT ALGEBRA
- MATH 1310 - GRAPH THEORY

Upper-level elective courses

Three of the following courses

- MATH 1020 - APPLD ELEMENTARY NUMBER THEORY
- MATH 1025 - INTRO TO MATHMTL CRYPTOGRAPHY
- MATH 1050 - COMBINATORIAL MATHEMATICS
- MATH 1070 - NUMERICAL MATHEMATICAL ANLYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1100 - LINEAR PROGRAMMING
- MATH 1110 - INDUSTRIAL MATHEMATICS
- MATH 1240 - LINEAR ALGEBRA 2
- MATH 1250 - ABSTRACT ALGEBRA
- MATH 1280 - ORDINARY DIFFERNTL EQUATIONS 2
- MATH 1290 - TOPICS IN GEOMETRY
- MATH 1310 - GRAPH THEORY
- MATH 1330 - PROJECTIVE GEOMETRY
- MATH 1350 - INTRO TO DIFFERENTIAL GEOMETRY
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1410 - INTRO FNDTNS OF MATHEMATICS
- MATH 1420 - FOUNDATIONS OF MATHEMATICS 2
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1510 - PROBABILITY
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- MATH 1570 - FOURIER ANALYSIS
- MATH 1700 - INTRODUCTION TO TOPOLOGY
- MATH 2XXX, 3XXX 3-credit graduate level course
- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STAT

Physics course

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)

Programming course

Choose one

- CS 0007 - INTRO TO COMPUTER PROGRAMMING
- CS 0008 - INT COMPUTER PRGMG WITH PYTHON
- CS 0401 - INTRMEDT PROGRMMING USING JAVA

Other Requirements and Recommendations

- Majors must complete 40 credits (see below for curriculum details on each major) with a grade of C or higher in each course for the major and at least a 2.00 GPA overall in mathematics courses. The S/NC grade option is not permitted.
- MATH 0413 - INTRO THEORETICAL MATHEMATICS meets the departmental W requirement.
- Credit by examination is usually available only through the placement testing offered for incoming students.
- Appropriate courses for the Dietrich School -required 12-credit related area are determined in consultation with the mathematics advisor. A 12-credit related area for applied mathematics majors must be approved by the Undergraduate Committee.
- Students considering graduate work in mathematics should be aware that many programs require a reading knowledge of one or two second languages from among French, German, and Russian.
- To graduate with honors in mathematics or applied mathematics, students must meet the following requirements in addition to the other requirements for the major.
    - Completion of all mathematics requirements
    - Completion of each of the following courses with a grade of B or better:
        - MATH 1250 - ABSTRACT ALGEBRA
        - MATH 1530 - ADVANCED CALCULUS 1
        - MATH 1540 - ADVANCED CALCULUS 2
        - A graduate level mathematics course
    - Completion of an honors thesis under the direction of a member of the mathematics faculty or completion of a second graduate level mathematics course in lieu of the honors thesis
- Students interested in graduate study in mathematics are advised to take MATH 1530 and MATH 1540. Those interested in pursuing secondary education certification in mathematics are required to take MATH 1020, MATH 1230, and MATH 1290, MATH 1230 does not count toward the major.

The statistics requirement is waived for mathematics majors graduating with honors. Although not required, it is recommended that honors candidates take the intermediate honors courses MATH 0450 - INTRODUCTION TO ANALYSIS and MATH 1185 - HONORS LINEAR ALGEBRA during their freshman and sophomore years.

Minor

Mathematics Minor

Students wishing to pursue a minor in Mathematics must complete at least 15 credits of Mathematics coursework at the level of MATH 0250 or above. At least six of these credits must be in courses numbered 1000 or above. Students must complete these requirements with an average grade of C or better.

Prerequisites:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

Joint Major

Mathematics - Economics, BS

Requirements

Students seeking a mathematics and economics joint major must adhere to the following rules and requirements:

- Completion of at least 58 credits in mathematics and economics courses (see below for detail).
- Earn at least a 2.00 in all courses required for the major. The S/NC option is not permitted.

- The Dietrich School 12-credit related area is not required.
- Students should check with the departmental advisors in mathematics and economics about the required W course.
- Students planning to do graduate study should keep in mind that many graduate programs require reading knowledge of one or two second languages.

The joint major provides not only a set of requirements but also suggested course sequences of mathematics and economics courses that are compatible with each other and that prepare students for various specialties. The courses follows

Required Courses in Mathematics

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCUL
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

In addition

Students are encouraged to take at least one field course in mathematics from the following list.

- MATH 1100 - LINEAR PROGRAMMING
- MATH 1110 - INDUSTRIAL MATHEMATICS
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1700 - INTRODUCTION TO TOPOLOGY
- STAT 1221 - APPLIED REGRESSION
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES
- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STAT
- STAT 1761 GAME THEORY

Required Courses in Economics (27 credits)

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1200 - GAME THEORY
- One ECON non-0800 series elective course
- Two ECON 1000-level courses that require either ECON 1100 or ECON 1110 as a prerequisite

Note:

To qualify for departmental honors in the mathematics and economics joint major, students must meet the following requirements:

- Complete the required economics courses with the added stipulation that ECON 1180 - MATHEMATICAL ECONOMICS and a proseminar be one of the field courses chosen.
- Maintain a GPA of at least 3.00 in mathematics courses, at least 3.25 in economics courses, and at least 3.25 overall.
- Complete the following courses in lieu of those normally taken:
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- MATH 0450 - INTRODUCTION TO ANALYSIS
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 1530 - ADVANCED CALCULUS 1
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Department of Music

The Department of Music makes music through composition, improvisation, and performance and explores music's meaning in the structure of individual works, the relations between them, and their place in the cultures that produce them. One of the most exciting things about music is that it brings together different types of thought and action. The most sensory and practical things and the most theoretical and abstract ones cannot be separated in the musician's world. Thus, music enjoys a special place in the endeavor to understand ourselves. The program for majors is designed to introduce students to all the above ideas and activities, and students throughout the University are invited to join in any of them. In support of this multifaceted program, the department has assembled a diverse faculty, including experts in composition, performance, theory, history, jazz, and ethnomusicology and is committed to the principle of conducting its activities within an atmosphere that encourages communication and cooperation within that diversity. The department also welcomes double majors from all colleges within the University. For more information on the major, the minor, and the Department of Music, see http://www.music.pitt.edu/.

Note: *Students considering declaring a music major or minor should take the Music Theory Placement test, available at the Dietrich School of Arts and Sciences Advising Center. A sufficient score will exempt them from the required MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC class. This exam takes about 60 minutes to complete.*

Major

Music, BA

The Department of Music offers an innovative undergraduate program that confers a bachelor's degree in music. The department's dynamic faculty offer strong support for undergraduate research and creative expression. Undergraduates also engage with the department's renowned graduate programs and are encouraged to actively participate in all aspects of the department's research and performance culture. Students are taught by a well-respected faculty of internationally recognized scholars, performers, and composers. They receive individualized attention and are mentored in ways that maximize their potential and growth.

The music major requires the completion of 42 credits. Students must choose one of the five major tracks: Composition; Music & Cultural History; Jazz; Global & Popular Music; or Performance. The tracks offer students a broad foundation in music scholarship while tailoring specific elements of music study to the students' individual talents and interests. For more information on the major, the minor, and the Department of Music's Web site.

To declare this major, students must complete MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC with a letter grade of B- or better, or achieve a sufficient score to on the Music placement exam to receive credit for this course. Students should plan to take MUSIC 0411 - THEORY 1 , MUSIC 0412 - MUSICIANSHIP 1 , and MUSIC 0416 - MUSICIANSHIP 2 in their first year, and no later than the first term of their second year.

Prerequisite theory course

Students may test out of this prerequisite by completing the Music Theory placement exam with a sufficient score. Students who take this course must earn a letter grade of B- or better to delcare the Music major.

- MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

BA Requirements

Choose one of the following courses

- MUSIC 0222 - HISTRY OF WESTERN MUSC TO 1750
- MUSIC 0224 - HISTRY OF WEST MUSC SINCE 1750

All of the following courses

- MUSIC 0411 - THEORY 1
- MUSIC 0412 - MUSICIANSHIP 1
- MUSIC 0416 - MUSICIANSHIP 2

Choose one of the following courses

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

All of the following courses

- MUSIC 1310 - GLOBAL AND POPULAR MUSIC
- MUSIC 1903 - SPECIAL TOPICS-DIRCTED RSRCH
- MUSIC 1904 - SENIOR SEMINAR
  Three MUSIC performance courses, at 1 credit each

Composition Track

Students pursuing the Composition track must take MUSIC 0222 MUSIC 0222 - HISTRY OF WESTERN MUSC TO 1750, indicated in the core course list.

- MUSIC 0224 - HISTRY OF WEST MUSC SINCE 1750
- MUSIC 0415 - THEORY 2
- MUSIC 0417 - THEORY 3
- MUSIC 0419 - THEORY 4
- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
  One elective course at the 1200- to 1400-level

Global & Popular Music Track

- MUSIC 0415 - THEORY 2
- ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY
  One upper-level popular music course
  Three upper-level ethno-music courses with the MUSIC subject code

Jazz Track

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

The following course

- MUSIC 1450 - MUSIC PRODUCTION AND RECORDING

Choose one of the following courses

- MUSIC 1731 - JAZZ COMPOSITION & ARRANGING 1
- MUSIC 1732 - JAZZ COMPOSITION & ARRANGING 2

All of the following courses

- MUSIC 1741 - JAZZ IMPROVISATION 1
- MUSIC 1742 - JAZZ IMPROVISATION 2
  Six MUSIC performance courses, at 1 credit each

Music & Cultural History Track

All of the following courses

- MUSIC 0224 - HISTRY OF WEST MUSC SINCE 1750
- MUSIC 0415 - THEORY 2

Choose one of the following courses

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

All of the following courses

- Two MUSIC courses at the 1200-level
- Two MUSIC courses at the 1200- to 1400-level
- Three MUSIC performance courses, at 1 credit each

Performance Track

All of the following courses

- MUSIC 0224 - HISTRY OF WEST MUSC SINCE 1750
- MUSIC 0415 - THEORY 2

- MUSIC 0417 - THEORY 3
- MUSIC 0419 - THEORY 4

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Six performance courses

Six MUSIC performance courses, at 1 credit each

One of the following composition courses

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
- MUSIC 1431 - INSTRUMNTATION & ORCHESTRATION
- MUSIC 1441 - ELECTRONIC & COMPUTER MUSIC 1
- MUSIC 1442 - ELECTRONIC & COMPUTER MUSIC 2

Other requirements

- Students may test out of MUSIC 0100 MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC by passing the Music Theory placement exam, which is administered in the Dietrich School Advising Center, 201 Thackeray Hall.
- A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major can be taken on an S/NC basis.
- Students must complete at least one W-course in the major.
- All students interested in taking private lessons must complete a Request for Private Lessons form, available in 110 Music Building. Music majors have first priority in scheduling private lessons, which cost an additional $395 per term.
- To graduate with departmental honors, a student must earn a minimum 3.25 GPA overall, a minimum 3.50 GPA in the music courses with no grade lower than a B-.

Minor

Music Minor

The music minor offers a coherent sequence of courses that will provide students with a reasonably broad introduction to the historical, theoretical, and practical branches of music. Required courses, totaling 19 credits, are as follows.

Prerequisite theory course

- MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

Required courses

- MUSIC 0222 - HISTRY OF WESTERN MUSC TO 1750

or

- MUSIC 0224 - HISTRY OF WEST MUSC SINCE 1750
- MUSIC 0411 - THEORY 1
- MUSIC 0412 - MUSICIANSHIP 1
- MUSIC 0416 - MUSICIANSHIP 2
- MUSIC 0711 - HISTORY OF JAZZ
  or
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.
- MUSIC 1310 - GLOBAL AND POPULAR MUSIC
  Three performance courses, at 1 credit each

Note

The department recommends that students considering a music minor take the prerequisite courses in the freshman year.

It is possible for students to test out of one or more of the required keyboard harmony, music theory, and/or musicianship courses; students should consult with the undergraduate advisor and/or the course instructor. The Satisfactory/No Credit (S/NC) grading option is not permitted for courses required for the minor. All students interested in taking private lessons must complete a Request for Private Lessons form in the office fo the Department of Music, Room 110, Music Building. Music majors have first priority in scheduling private lessons, which cost an additional $395 per term.

Department of Neuroscience

Neuroscience is the study of the biology and function of the central nervous system, with a special focus on the brain. The field has emerged during the past two decades as part of the explosive growth of research and interest in the neural sciences. An autonomous major in neuroscience was developed at the University of Pittsburgh in 1983, and it is among the largest undergraduate programs in neuroscience in the country, with nearly 300 students as majors.

The Bachelor of Science degree in neuroscience prepares students for the following:

- Advanced study in health-related fields, such as medicine, dentistry, pharmacy, public health, physical therapy, physician assistant, and exercise physiology;
- Graduate training in neuroscience and related fields in the biological sciences, and for a future career in a university, research institute, pharmaceutical company, or hospital;
- Research assistant positions in pharmaceutical, hospital, and university settings; and
- Public and private high school teaching following the completion of the teacher certification program in the School of Education.

The neuroscience major is designed to provide a broad and challenging sequence of courses in biological sciences, chemistry, mathematics, and physics, in addition to introductory and advanced courses in neuroscience. Students also may receive credit for original research projects they conduct in collaboration with faculty members. The relatively small size of the upper-level courses, the excellence of teaching, and the opportunity for research have been found to be especially attractive features of the major. A minor in neuroscience is also available. For more information on the major, the minor, and the Department of Neuroscience, see www.neuroscience.pitt.edu.

Major

Neuroscience, BS

Major Requirements

Neuroscience majors must complete a minimum of 59 credits, detailed as follows:

Required Courses

- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRO TO NEUROSCIENCE

- NROSCI 1011 - FUNCTIONAL NEUROANATOMY or
- NROSCI 1013 - FUNCTIONAL NEUROANATOMY

- NROSCI 1012 - NEUROPHYSIOLOGY
- NROSCI 1017 - SYNAPTIC TRANSMISSION

One of the following writing courses

- NROSCI 1800 - NEUROSCIENCE/WRITING PRACTCM 1
- NROSCI 1801 - NEUROSCIENCE/WRITING PRACTCM 2
- NROSCI 1962 - THESIS RESEARCH/WRITING PRAC

Two advanced electives to be chosen from:

- NROSCI 1014 - SPEAKING OF SCIENCE
- NROSCI 1026 - CLINICAL NEUROPHYSIOLOGY
- NROSCI 1030 - PSYCHTRC DISORDERS & BRN FUNCN
- NROSCI 1032 - FNCTNL ORGZTN HUMN NERVOS SYS
- NROSCI 1033 - NEURAL BASIS OF VISION
- NROSCI 1034 - NEURAL BASIS OF COGNITION
- NROSCI 1036 - NEUROBIOLOGY OF AGING
- NROSCI 1040 - BIO BASES OF LEARNING & MEMORY
- NROSCI 1041 - DEVELOPMENTAL NEUROSCIENCE
- NROSCI 1042 - NEUROCHEMICAL BASIS BEHAVIOR
- NROSCI 1043 - NEURAL PLASTICITY
- NROSCI 1140 - BIO BASIS LEARNING MEMORY-UHC

Capstone Requirement

Choose one of the following courses

- NROSCI 1027 - NEUROSCIENCE PROSEMINAR
- NROSCI 1901 - INDEPENDENT STUDY

Note:

Course descriptions and current syllabi can be found by clicking on the Teaching Faculty link on the right of the Neuroscience Undergraduate home page at www.neuroscience.pitt.edu/programs/undergraduate

Co-requisite Courses

It is recommended that students complete introductory biology, chemistry, and physics courses during freshman and sophomore years. Premed students should also take PHYS 0212 - INTRO TO LABORATORY PHYSICS or PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG and a statistics course to meet medical school requirements.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 *

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 *
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- BIOSC 1000 - BIOCHEMISTRY

- BIOSC 1250 - HUMAN PHYSIOLOGY or
- NROSCI 1250 - HUMAN PHYSIOLOGY

- CHEM 0110 - GENERAL CHEMISTRY 1 *
- CHEM 0120 - GENERAL CHEMISTRY 2 *
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PHYS 0111 - INTRODUCTION TO PHYSICS 2

  * Students must complete these courses with a letter grade of C or better to declare the major.

Grade requirements for the major are as follows:

- Students majoring in neuroscience must take all required courses for a letter grade.
- NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRO TO NEUROSCIENCE must be passed with a B- or better. Grades in the remaining core courses and two advanced electives are averaged. All of these courses must be passed, and the average GPA must be 2.00 or better.
- In the co-requisites, a passing grade below C may be accepted only if it is balanced with higher grades, so that the total GPA in co-requisite courses is 2.0 or better. This requirement applies collectively to corequisite courses taught in the Department of Neuroscience (e.g., NROSCI 1070 - HUMAN PHYSIOLOGY-UHC) and those taught in other departments.
- Majors must have a grade of B- in NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRO TO NEUROSCIENCE as a prerequisite to taking any other departmental core or advanced elective courses.
- The co-requisite courses in biology and chemistry satisfy the related area requirement for this major.

Department Honors and Undergraduate Research

- To qualify for departmental honors, students need to maintain a minimum overall GPA of 3.25 as well as a GPA of 3.25 in the neuroscience major. In addition, students must complete a substantial amount of experimental neuroscience research on an approved research project and give a public presentation of the work. The full faculty of the department approves departmental honors after consideration of all eligible students.
- The Department of Neuroscience encourages interested undergraduate majors to gain research experience within an active neuroscience laboratory. The department is a world-class research department committed to high quality research and sharing the excitement of scientific exploration with trainees. Majors are encouraged to take advantage of the opportunity to do meaningful neuroscience research while still undergraduates. It is not unusual for majors to report their research at scientific meetings and to be published. While research experience itself has strong benefits, it is also useful for interacting more closely with professors and enhancing preparation for graduate or medical school. Most undergraduates who enroll in research for credit are interested in completing an independent project that results in an undergraduate thesis.

Minor

Neuroscience Minor

Minor Requirements

A minimum of 14 credits is required for a neuroscience minor. The minor includes the following:

- NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRO TO NEUROSCIENCE with a grade of C or better
- Three core courses:
    - NROSCI 1011 - FUNCTIONAL NEUROANATOMY
    - NROSCI 1012 - NEUROPHYSIOLOGY
    - NROSCI 1017 - SYNAPTIC TRANSMISSION
- As an alternative to the three core courses, students may take two of the core courses and at least one advanced elective from the following list.
    - NROSCI 1030 - PSYCHTRC DISORDERS & BRN FUNCN
    - NROSCI 1032 - FNCTNL ORGZTN HUMN NERVOS SYS
    - NROSCI 1034 - NEURAL BASIS OF COGNITION
    - NROSCI 1035 - CONTROL OF MOVEMENT
    - NROSCI 1036 - NEUROBIOLOGY OF AGING
    - NROSCI 1040 - BIO BASES OF LEARNING & MEMORY
    - NROSCI 1041 - DEVELOPMENTAL NEUROSCIENCE
    - NROSCI 1042 - NEUROCHEMICAL BASIS BEHAVIOR

Department of Philosophy

The University of Pittsburgh has one of the best philosophy departments in the country, one with a long tradition of fine teaching. A major in philosophy provides excellent preparation for such professions as law, medicine, and business. The conceptual sophistication imparted by training in philosophy is invaluable in virtually any field of learning or any serious profession. For example, students who are majoring in biology, psychology, history, or computer science would do well to pick up a second major in philosophy, something the Department of Philosophy encourages by offering a standard major track along with its more time-consuming intensive major track. A minor in philosophy is also available. While the department encourages students to major in philosophy, either alone or as a second major, only rarely does it encourage students to pursue philosophy in graduate school as preparation for a scholarly career. Students who do especially well in either the standard or intensive major program are graduated with honors in philosophy. Because of the national reputation of the philosophy department, a major in philosophy or honors in philosophy should materially help University of Pittsburgh graduates get into good graduate schools or professional schools. For more information on the program and the Department of Philosophy, see www.philosophy.pitt.edu.

Major

Philosophy - Intensive Track, BA

Major Requirements

The standard philosophy major track requires at least 24 credits, while the intensive philosophy major track requires a minimum of 36 credits, as detailed below:

- An acceptable senior paper. The student must sign up either for PHIL 1940 - HONORS THESIS/MAJORS (3 credits) or PHIL 1940 - HONORS THESIS/MAJORS and PHIL 1941 - HONORS THESIS 2/MAJORS (6 credits), with the prior permission of a faculty member who has agreed to supervise the student's work. Neither PHIL 1940 nor PHIL 1941 counts toward the five 1000-level courses mentioned above.
- The following rules and requirements apply to all philosophy majors, regardless of the track chosen:
    - Only those philosophy courses completed with a grade of C or better will count for the major.
    - No restrictions are placed on the number of courses taken under the S/NC option (formerly the S/N option).
    - Arrangements for credit by examination in appropriate cases may be made through departmental advisors.
    - There are no departmental second language requirements; however, students who plan to pursue philosophy in graduate school are strongly encouraged to develop at least a good reading competence in one or more second languages of special relevance to philosophy (e.g., Greek, Latin, French, and German).
    - Joint majors are not double majors but multidisciplinary majors offered by two or more departments. Presently, the Department of Philosophy offers a joint major in politics and philosophy with the Department of Political Science (see Politics and

Philosophy major information under non-departmental A&S Majors) as well as a joint major in mathematics and philosophy with the Department of Mathematics (see Mathematics-Philosophy).

- Students who complete the philosophy major (standard or intensive track) or joint major will be graduated with honors in philosophy if they have earned a grade of A- or better in at least six 1000-level philosophy courses exclusive of PHIL 1902 - DIRECTED STUDY--UNDERGRADUATE, PHIL 1903 - DIRCTED RESEARCH--UNDERGRADUT, PHIL 1940 - HONORS THESIS/MAJORS, PHIL 1941 - HONORS THESIS 2/MAJORS, and PHIL 1942 - HONORS THESIS 3/MAJORS.

The intensive major track requires the following courses:

NOTE: the intensive major has no official standing and should be thought of as a recommendation only.

- PHIL 0500 - INTRODUCTION TO LOGIC or
- PHIL 1500 - SYMBOLIC LOGIC

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY or
- PHIL 1020 - PLATO or
- PHIL 1040 - ARISTOTLE

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY or
- PHIL 1110 - RATIONALISM or
- PHIL 1140 - EMPIRICISM

At least five 1000-level courses

Beyond those counted above to include at least one course from each of the four groups:

- PHIL 1020-PHIL 1190 History of Philosophy
- PHIL 1300-PHIL 1390 Value Theory
- PHIL 1420-PHIL 1490 Metaphysics and Epistemology
- PHIL 1500-PHIL 1690 Logic and Philosophy of Science

Philosophy - Standard Track, BA

Major Requirements

The standard philosophy major track requires at least 24 credits, while the intensive philosophy major track requires a minimum of 36 credits, as detailed below:

- An acceptable senior paper. The student must sign up either for PHIL 1940 - HONORS THESIS/MAJORS (3 credits) or PHIL 1940 - HONORS THESIS/MAJORS and PHIL 1941 - HONORS THESIS 2/MAJORS (6 credits), with the prior permission of a faculty member who has agreed to supervise the student's work. Neither PHIL 1940 nor PHIL 1941 counts toward the five 1000-level courses mentioned above.
- The following rules and requirements apply to all philosophy majors, regardless of the track chosen:
  - Only those philosophy courses completed with a grade of C or better will count for the major.
  - No restrictions are placed on the number of courses taken under the S/NC option (formerly the S/N option).
  - Arrangements for credit by examination in appropriate cases may be made through departmental advisors.
  - There are no departmental second language requirements; however, students who plan to pursue philosophy in graduate school are strongly encouraged to develop at least a good reading competence in one or more second languages of special relevance to philosophy (e.g., Greek, Latin, French, and German).
  - Joint majors are not double majors but multidisciplinary majors offered by two or more departments. Presently, the Department of Philosophy offers a joint major in politics and philosophy with the Department of Political Science (see Politics and Philosophy major information under non-departmental A&S Majors) as well as a joint major in mathematics and philosophy with the Department of Mathematics (see Mathematics-Philosophy).

- Students who complete the philosophy major (standard or intensive track) or joint major will be graduated with honors in philosophy if they have earned a grade of A- or better in at least six 1000-level philosophy courses exclusive of PHIL 1902 - DIRECTED STUDY--UNDERGRADUATE, PHIL 1903 - DIRCTED RESEARCH--UNDERGRADUT, PHIL 1940 - HONORS THESIS/MAJORS, PHIL 1941 - HONORS THESIS 2/MAJORS, and PHIL 1942 - HONORS THESIS 3/MAJORS.

The standard major track requires the following courses:

- PHIL 0500 - INTRODUCTION TO LOGIC or
- Any 1500 level course (Logic group)

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY or
- PHIL 1020 - PLATO or
- PHIL 1040 - ARISTOTLE

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY or
- PHIL 1110 - RATIONALISM or
- PHIL 1140 - EMPIRICISM

- PHIL 0300 - INTRODUCTION TO ETHICS or
- Any 300 or 1300-level course (the value theory group)

- Any four 1000-level courses beyond those outlined above

Minor

Philosophy Minor

Minor Requirements

The philosophy minor requires six 3-credit courses (18 credits total) to be distributed as follows:

- PHIL 0500 - INTRODUCTION TO LOGIC or
- One 1500 level course (Logic group)

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY or
- PHIL 1020 - PLATO

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY or
- PHIL 1110 - RATIONALISM or
- PHIL 1140 - EMPIRICISM

- Any course in the 1300s Value Theory, Social and Political Philosophy
- Two additional 1000-level courses must be completed.

Any course in moral, social, or political philosophy

PHIL 0300 - INTRODUCTION TO ETHICS is preferred, but any of the following is acceptable:

- PHIL 0320 - SOCIAL PHILOSOPHY
- PHIL 0330 - POLITICAL PHILOSOPHY
- PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES

- PHIL 0360 - MORALITY AND MEDICINE

Note:

At least one of the above four courses (numbers one-four) must be taken at the 1000 level.

Department of Physics and Astronomy

The Department of Physics and Astronomy offers three major degree options: a BS in physics, a BS in physics and astronomy, and a BA in astronomy. The BS degrees are intended for students who wish to prepare for graduate school in a scientific or technical discipline or who are interested in professional careers in which a background in physics or astronomy is appropriate. The BA degree are designed primarily for students who wish to develop a general scientific background appropriate for many careers including health-related professions or MBA programs. The Certificate in Photonics may be added by students in the bachelor of science physics program.

Students planning to pursue a degree within the department are urged to consult a departmental advisor at any time during the freshman year and should obtain a copy of the department's brochure for undergraduates in 100 Allen Hall.

*The department offers the physics minor, best suited for students from other schools. The department wishes to emphasize that its 0080s courses, in both physics and astronomy, use little mathematics and are especially designed for liberal arts students.

Major

Astronomy - Science Breadth Concentration, BA

Major Requirements

The BA in Astronomy requires 39 credits of course work as follows.

Specifications

- **Grade requirements:** A minimum GPA of 2.0 in departmental courses is required for graduation.
- **Satisfactory/No Credit option:** No PHYS or ASTRON courses beyond the introductory level may be taken on an S/NC basis.
- **Writing requirement:** Students must complete at least one W-course in the major.
- **Related area:** Mathematics satisfies the related area requirement for the Astronomy major.

Introductory Physics courses

Select one group

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Introductory Astronomy course

- ASTRON 0113 - INTRODUCTION TO ASTRONOMY

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1331 - MECHANICS

Laboratory courses

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Intermediate and advanced Astronomy courses

Choose at least six credits

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - SOLR SYS EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted

Science electives

Choose at least six credits *

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES

- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS **

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Course in the history and philosophy of science or science policy/management

Choose at least three credits

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- PHYS 0086 - PHYSICS AND PUBLIC POLICY
- PHYS 0087 - PHYSICS AND SOCIETY
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS
- Any course in the Department of History and Philosophy of Science (HPS)

Writing or communication courses

Choose at least three credits

- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN

- ENGCMP 1101 - LANGUAGE OF SCIENCE & TECHNLGY
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1340 - ADVANCED NONFICTION
- ENGWRT 1394 - SCIENCE WRITING
- LING 1000 - INTRODUCTION TO LINGUISTICS

Science Breadth concentration

This concentration provides broader exposure to other sciences in comparison to the standard Astronomy BA, while going into greater depth in physics and astronomy than a more generic natural science major. With proper selection of courses, this concentration provides the necessary requirements to apply for admission to medical school while roughly matching the credit requirements of the Astronomy BA.

Reduced physics requirements

- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2 *

Note:

* PHYS 0481 is required for the Physics minor

Reduced writing requirements

The three credit writing or communication requirement is waived for students pursuing this concentration.

Added science requirements

Choose two of the three groups, totaling at least 16 credits

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 0050 - PHYSICAL GEOLOGY
- GEOL 0890 - OCEANOGRAPHY

One of the following course groups

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

Added science electives

Choose one of the three tracks totaling at least six credits

Track 1

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 0345 - ORGANIC LABORATORY

Track 2

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES

Track 3

- Two advanced courses in Biological Sciences (BIOSC), Bioengineering (BIOE), Chemistry (CHEM), Computer Science (CS), or Geology (GEOL).

Astronomy - Science Communication Concentration, BA

Major Requirements

The BA in Astronomy requires 39 credits of course work as follows.

Specifications

- **Grade requirements:** A minimum GPA of 2.0 in departmental courses is required for graduation.
- **Satisfactory/No Credit option:** No PHYS or ASTRON courses beyond the introductory level may be taken on an S/NC basis.
- **Writing requirement:** Students must complete at least one W-course in the major.
- **Related area:** Mathematics satisfies the related area requirement for the Astronomy major.

Introductory Physics courses

Select one group

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Introductory Astronomy course

- ASTRON 0113 - INTRODUCTION TO ASTRONOMY

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1331 - MECHANICS

Laboratory courses

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Intermediate and advanced Astronomy courses

Choose at least six credits

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - SOLR SYS EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted

Science electives

Choose at least six credits *

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS **

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Course in the history and philosophy of science or science policy/management

Choose at least three credits

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- PHYS 0086 - PHYSICS AND PUBLIC POLICY
- PHYS 0087 - PHYSICS AND SOCIETY
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS
- Any course in the Department of History and Philosophy of Science (HPS)

Writing or communication courses

Choose at least three credits

- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 0520 - PUBLIC SPEAKING

- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN
- ENGCMP 1101 - LANGUAGE OF SCIENCE & TECHNLGY
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1340 - ADVANCED NONFICTION
- ENGWRT 1394 - SCIENCE WRITING
- LING 1000 - INTRODUCTION TO LINGUISTICS

Science Communication concentration

This concentration replaces the three credit writing or communication course with a three credit writing course and 12 credits of communication courses. Students pursuing this concentration may replace the six credits of science electives with the communication course requirements.

Required writing course

- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN

Communication courses

Choose at least 12 credits

- ENGCMP 1101 - LANGUAGE OF SCIENCE & TECHNLGY
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGWRT 0610 - INTRO JOURNALISM & NONFICTION
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1340 - ADVANCED NONFICTION
- ENGWRT 1394 - SCIENCE WRITING
- LING 1000 - INTRODUCTION TO LINGUISTICS

Astronomy, BA

Major Requirements

The BA in Astronomy requires 39 credits of course work as follows.

Specifications

- **Grade requirements:** A minimum GPA of 2.0 in departmental courses is required for graduation.
- **Satisfactory/No Credit option:** No PHYS or ASTRON courses beyond the introductory level may be taken on an S/NC basis.
- **Writing requirement:** Students must complete at least one W-course in the major.
- **Related area:** Mathematics satisfies the related area requirement for the Astronomy major.

Introductory Physics courses

Select one group

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Introductory Astronomy course

- ASTRON 0113 - INTRODUCTION TO ASTRONOMY

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1331 - MECHANICS

Laboratory courses

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Intermediate and advanced Astronomy courses

Choose at least six credits

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - SOLR SYS EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted

Science electives

Choose at least six credits *

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS **

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Course in the history and philosophy of science or science policy/management

Choose at least three credits

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- PHYS 0086 - PHYSICS AND PUBLIC POLICY
- PHYS 0087 - PHYSICS AND SOCIETY
- PUBSRV 1315 - MANAGING PROJECTS & CONTRACTS

- Any course in the Department of History and Philosophy of Science (HPS)

Writing or communication courses

Choose at least three credits

- COMMRC 0320 - MASS COMMUNICATION PROCESS
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN
- ENGCMP 1101 - LANGUAGE OF SCIENCE & TECHNLGY
- ENGCMP 1400 - GRANT AND PROPOSAL WRITING
- ENGWRT 1330 - INTERMEDIATE NONFICTION
- ENGWRT 1340 - ADVANCED NONFICTION
- ENGWRT 1394 - SCIENCE WRITING
- LING 1000 - INTRODUCTION TO LINGUISTICS

Physics - Education Concentration, BS

Major Requirements

- A minimum GPA of 2.0 in departmental courses is required for graduation. Honors majors must attain a minimum GPA of 3.2 in physics courses, a cumulative GPA of 3.09 or higher, completes PHYS 1903 Directed Research, submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by UHC).
- No PHYS courses beyond the introductory level may be taken on an S/NC basis.
- Students must complete at least one W-course in the major; students should consult with their department advisor about this requirement.
- The mathematics courses required for the major fulfill the related area requirement for all majors in this department.

Physics major, BS

The physics major requires the completion of 47 credits in physics distributed as follows.

Note:

While not required, the introductory level honors courses, PHYS 0475, PHYS 0476, and PHYS 0520 are appropriate particularly for students seeking degrees in physics.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least 10 credits

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Science electives

Choose at least nine credits from groups A and B. At least three credits must come from a course in group B.

Group A

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- ENGR 0240 - NANOTECHN & NANOENGINEERING
- GEOL 0040 - PHYSICAL GEOLOGY
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Group B

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- MEMS 1054 - MATERIALS SCIENCE I
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1374 - SOLID STATE PHYSICS
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1376 - INTRO TO BIOLOGICAL PHYSICS
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Departmental honors requirements

Honors in physics is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in courses required for the major, maintains a cumulative GPA of 3.0 or higher, completes MATH 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, or the Undergraduate Poster Fair hosted by UHC).

Education concentration

This concentration removes up to 10 credits of physic courses from the standard Physics major requirements. This concentration requires seven credits of lab courses instead of the standard 10 credits.

Additional education related courses

(6 credits)

- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
- IL 1580 - FOUNDATIONS OF SPECIAL EDUC

Additional courses

Emphasizing the broader impact of science; choose at least three credits.

- PHYS 0086 - PHYSICS AND PUBLIC POLICY
- PHYS 0087 - PHYSICS AND SOCIETY
- Any course offered by the Department of History and Philosophy of Science

Required courses from the Science electives

Group A

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

Group B

- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Physics courses removed

- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Physics - Graduate School Preparation Concentration, BS

Major Requirements

- A minimum GPA of 2.0 in departmental courses is required for graduation. Honors majors must attain a minimum GPA of 3.2 in physics courses, a cumulative GPA of 3.09 or higher, completes PHYS 1903 Directed Research, submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by UHC).
- No PHYS courses beyond the introductory level may be taken on an S/NC basis.
- Students must complete at least one W-course in the major; students should consult with their department advisor about this requirement.
- The mathematics courses required for the major fulfill the related area requirement for all majors in this department.

Physics major, BS

The physics major requires the completion of 47 credits in physics distributed as follows.

Note:

While not required, the introductory level honors courses, PHYS 0475, PHYS 0476, and PHYS 0520 are appropriate particularly for students seeking degrees in physics.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least 10 credits

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Science electives

Choose at least nine credits from groups A and B. At least three credits must come from a course in group B.

Group A

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- ENGR 0240 - NANOTECHN & NANOENGINEERING
- GEOL 0040 - PHYSICAL GEOLOGY
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Group B

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- MEMS 1054 - MATERIALS SCIENCE I
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1374 - SOLID STATE PHYSICS
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1376 - INTRO TO BIOLOGICAL PHYSICS
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Departmental honors requirements

Honors in physics is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in courses required for the major, maintains a cumulative GPA of 3.0 or higher, completes MATH 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, or the Undergraduate Poster Fair hosted by UHC).

Graduate School Preparation concentration

This concentration adds at least six credits of Physics courses to the standard Physics major requirements. This concentration requires seven credits of lab courses instead of the standard 10 credits.

Additional intermediate and advanced Physics courses

- PHYS 1371 - INTRO TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATCL METHODS IN PHYSICS

Physics and Astronomy - Education Concentration, BS

Major Requirements

The BS in physics and astronomy requires the completion of 50 credits in physics and astronomy distributed as follows.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Introductory Astronomy course

- ASTRON 0113 - INTRODUCTION TO ASTRONOMY

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least seven credits

Required courses

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Additional courses

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY

Intermediate and advanced Astronomy courses

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - SOLR SYS EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted for this course.

Science elective

Choose at least three credits *

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS **
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1371 - INTRO TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATCL METHODS IN PHYSICS
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for the nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2

- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Honors major requirements

Honors in physics and astronomy is granted if in addition to fulfilling all requirements for the major, the student meets the following requirements.

- Maintains a GPA of 3.2 or higher in the major
- Maintains a cumulative GPA of 3.0 or higher
- Completes ASTRON 1903 - DIRECTED RESEARCH or PHYS 1903 - DIRECTED RESEARCH
- Submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by the University Honors College).

Education concentration

This concentration removed nine credits from the standard Physics and Astronomy major requirements if one of the courses listed below is taken as a science elective.

Additional education related courses

- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
- IL 1580 - FOUNDATIONS OF SPECIAL EDUC

Physics courses removed

- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Required laboratory courses

Choose at least eight credits

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- PHYS 1361 - WAVE MOTION AND OPTICS
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Required selection of science electives

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Physics and Astronomy - Graduate School Preparation Concentration, BS

Major Requirements

The BS in physics and astronomy requires the completion of 50 credits in physics and astronomy distributed as follows.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Introductory Astronomy course

- ASTRON 0113 - INTRODUCTION TO ASTRONOMY

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least seven credits

Required courses

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Additional courses

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY

Intermediate and advanced Astronomy courses

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - SOLR SYS EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted for this course.

Science elective

Choose at least three credits *

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- GEOL 0040 - PHYSICAL GEOLOGY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS **
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1

- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1371 - INTRO TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATCL METHODS IN PHYSICS
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for the nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 0290 - DIFFERENTIAL EQUATIONS or

- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Honors major requirements

Honors in physics and astronomy is granted if in addition to fulfilling all requirements for the major, the student meets the following requirements.

- Maintains a GPA of 3.2 or higher in the major
- Maintains a cumulative GPA of 3.0 or higher
- Completes ASTRON 1903 - DIRECTED RESEARCH or PHYS 1903 - DIRECTED RESEARCH
- Submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by the University Honors College).

Graduate School Preparation concentration

This concentration adds six credits to the standard Physics and Astronomy major requirements if one of the courses listed below is taken as a science elective.

Additional intermediate and advanced Physics courses

- PHYS 1371 - INTRO TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATCL METHODS IN PHYSICS

Physics and Astronomy, BS

Major Requirements

The BS in physics and astronomy requires the completion of 50 credits in physics and astronomy distributed as follows.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for the nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Honors major requirements

Honors in physics and astronomy is granted if in addition to fulfilling all requirements for the major, the student meets the following requirements.

- Maintains a GPA of 3.2 or higher in the major
- Maintains a cumulative GPA of 3.0 or higher
- Completes ASTRON 1903 - DIRECTED RESEARCH or PHYS 1903 - DIRECTED RESEARCH
- Submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by the University Honors College).

Physics, BS

Major Requirements

- A minimum GPA of 2.0 in departmental courses is required for graduation. Honors majors must attain a minimum GPA of 3.2 in physics courses, a cumulative GPA of 3.09 or higher, completes PHYS 1903 Directed Research, submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by UHC).
- No PHYS courses beyond the introductory level may be taken on an S/NC basis.
- Students must complete at least one W-course in the major; students should consult with their department advisor about this requirement.
- The mathematics courses required for the major fulfill the related area requirement for all majors in this department.

Physics major, BS

The physics major requires the completion of 47 credits in physics distributed as follows.

Note:

While not required, the introductory level honors courses, PHYS 0475, PHYS 0476, and PHYS 0520 are appropriate particularly for students seeking degrees in physics.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD) and
- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 and
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Intermediate and advanced Physics courses

- PHYS 0477 - INT THERMAL AND MODERN PHYSICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATNAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMDYNMC & STATISCAL MECHANC
- PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
- PHYS 1370 - INTRO TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least 10 credits

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Science electives

Choose at least nine credits from groups A and B. At least three credits must come from a course in group B.

Group A

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or

- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CS 0401 - INTRMEDT PROGRMMING USING JAVA
- CS 0445 - DATA STRUCTURES
- ENGR 0240 - NANOTECHN & NANOENGINEERING
- GEOL 0040 - PHYSICAL GEOLOGY
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Group B

- ASTRON 1120 - STARS; STELLAR STRUCT & EVOLT
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
- MATH 1550 - VECTOR ANLYSIS & APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATNS
- MEMS 1054 - MATERIALS SCIENCE I
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1374 - SOLID STATE PHYSICS
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1376 - INTRO TO BIOLOGICAL PHYSICS
- PHYS 1378 - INT TO NUCLR & PARTCL PHYSICS

Prerequisite Mathematics courses

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA

- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTL EQUATNS 1

Departmental honors requirements

Honors in physics is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in courses required for the major, maintains a cumulative GPA of 3.0 or higher, completes MATH 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, or the Undergraduate Poster Fair hosted by UHC).

Minor

Physics Minor

Select one course

- PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
- PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1

Select one course

- PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
- PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2

Select one course

- PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

Both courses

- PHYS 0479 - PRINCIPLES OF MODERN PHYSICS 1
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Department of Political Science

A major in political science is designed to help students understand the complexity of political developments in the United States and throughout the world. The major also provides students with a broad education that will help them to prepare for a wide variety of careers in various levels of government service, law, education, journalism, business, and the nonprofit sector. Those interested in government service careers may wish to complement their study of political science with courses in public service offered through the College of General Studies and the Graduate School of Public and International Affairs.

The political science department offers many courses that meet the international/foreign cultures requirements of the core curriculum of the Dietrich School of Arts and Sciences, as well as requirements for the wide range of certificate programs sponsored by the University Center for International Studies (African Studies, Asian Studies, European Union Studies, Global Studies, Latin American Studies, Russian and East European Studies, West European Studies, Global Service Center).

Major

Political Science, BA

Political Science, BA

Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

Core Courses

Students take all five of the core courses, which provide first and second year students with a survey of each of these fields and with the methods employed in the contemporary study of politics.

- PS 0200 American Political Process: An introduction to the institutions and political processes in the United States. The course surveys the presidency, Congress, and the judicial system as well as political behavior, public opinion, political attitudes, and the party system.
- PS 0300 Comparative Politics: An introduction to political systems outside the United States. The course surveys a variety of theoretical approaches to the comparison of political systems and an examination of the political processes, institutions, and current political developments in a variety of political systems in all of the major regions of the world.
- PS 0500 World Politics: An introduction to the study of foreign policy, covering the international political environment in which nation-states and other actors operate, as well as the specific policies adopted by particular states.
- PS 0600 Political Theory and Analysis: An introduction to the history of Western political ideas, including the thought of Plato, Aristotle, Machiavelli, Locke, Mill, and Marx.
- PS 0700 Research Methods in Political Science: An introduction to the methods used in political science research, covering the logic of social scientific inquiry, the basics of research design, and the quantitative and qualitative methods that are commonly used by political scientists to investigate important questions about the political world.

Field Courses

At the 1000 level, students must take a total of six courses (18 credits), distributed across a major field (three courses), a minor field (two courses) and one course in an elective field. In the major field, one of the courses must be a capstone seminar.

In each of the four substantive undergraduate fields of political science, a wide variety of advanced (1000-level) courses is offered on a regular basis. Some courses are offered annually, while others are offered less frequently. For details on course offerings and content, see the Undergraduate Course Descriptions.

American Politics

- PS 1201 - CONSTITUTION & CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1203 - JUDICIAL POLITICS
- PS 1204 - WOMEN IN POLITICS
- PS 1211 - LEGISLATIVE PROCESS
- PS 1212 - AMERICAN PRESIDENCY
- PS 1213 - LAW AND POLITICS
- PS 1230 - INTEREST GROUP POLITICS
- PS 1231 - POLITICAL PARTIES & ELECTIONS
- PS 1233 - POLITICAL PSYCHOLOGY
- PS 1234 - ELECTRL BEHAVR & DEMOCRTC PROC

- PS 1235 - MEDIA AND POLITICS
- PS 1252 - STATE GOVERNMENT
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1275 - RELIGION & AMERICAN POLITICS
- PS 1281 - CAPSTONE SEM AMERICAN POLITICS

Comparative Politics

- PS 1302 - POLITICAL DEVELOPMENT
- PS 1311 - WESTERN EURP GOVERMNT & POLIT
- PS 1314 - GERMAN GOVERNMENT AND POLITICS
- PS 1317 - POLITICS OF THE EUROPEAN UNION
- PS 1321 - LATIN AMERICAN POLITICS
- PS 1324 - US-LATIN AMERICAN RELATIONS
- PS 1330 - EUROPEAN UNION SEMINAR
- PS 1332 - GVRNT & POLIT IN CNTMPRY CHINA
- PS 1333 - GOVERNMENT & POLITICS OF JAPAN
- PS 1336 - CONTEM CHIN POLIT, SOCTY ECONY
- PS 1341 - GVRNT & POLIT USSR/RUSS FEDRTN
- PS 1348 - XENOPHOBIA IN MODERN EUROPE
- PS 1350 - RUSSA, CIS EXPNDNG EURPN UNIN
- PS 1351 - GOVERMNT & POLITICS MIDDL EAST
- PS 1352 - INTRODUCTION TO AFRCN POLITICS
- PS 1353 - AFRICAN LIBERATION MOVEMENTS
- PS 1361 - COMPARTV POLITCL PRTY SYSTEMS
- PS 1381 - CAPSTONE SEMINAR COMP POLITICS

International Relations

- PS 1501 - THEORY OF INTERNATIONAL RELTN
- PS 1503 - INTERNATIONAL ORGANIZATION
- PS 1504 - NATIONALISM
- PS 1509 - CONFLICT AND WAR THEORY
- PS 1510 - COLDWAR:SOVT UNIN WEST 1917-91
- PS 1511 - AMERICAN FOREIGN POLICY
- PS 1513 - FORGN POLICIES--CHANGNG WORLD
- PS 1521 - EASTRN EURP IN WORLD POLITICS
- PS 1522 - LATIN AMERC IN WORLD POLITICS
- PS 1523 - EAST ASIA IN WORLD POLITICS
- PS 1530 - NEW INT'L RELATIONS OF EUROPE
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- PS 1543 - GLOBALIZATION & INT'L POLITICS
- PS 1551 - INTERNATIONAL COOPERATION
- PS 1581 - CAPSTONE SEM INT'L RELATIONS

Political Theory and Analysis

- PS 1601 - ANCIENT & MEDIEVAL POL THOUGHT
- PS 1602 - EARLY MODERN POLITICAL THOUGHT
- PS 1603 - MODERN & CONTEM POL THOUGHT

- PS 1607 - AMERICAN POLITICAL THOUGHT
- PS 1610 - POL THRY OF THE AMER FOUNDING
- PS 1614 - THEORIES OF JUSTICE
- PS 1622 - WOMEN AND POLITICAL THEORY
- PS 1629 - TOPICS IN POLITICAL THEORY
- PS 1681 - CAPSTONE SEM POLITICAL THEORY

Additional Offerings

- PS 1701 - FLD METHODS POLITICAL RESEARCH
- PS 1702 - ANLYSIS OF POLITICAL VARIABLES
- PS 1710 - STRATEGY AND GAMES OF POLITICS
- PS 1900 - INTERNSHIP
- PS 1901 - INDEPENDENT STUDY
- PS 1902 - DIRECTED READING
- PS 1903 - DIRECTED RESEARCH

Capstone seminar

The University of Pittsburgh requires students to complete one writing-intensive course in their major. The Capstone Seminar, which is taken in the major field, fulfills the university-wide requirement of an intensive writing course (W-course) in the major and allows students to undertake advanced work under the direction of faculty in a smaller seminar setting.

Departmental honors requirements

Departmental honors are conferred upon students who maintain an overall GPA of 3.5 and achieve a GPA of 3.7 or better in political science.

Related area

A minimum of 12 credits is required in any one Arts and Sciences department chosen in consultation with the major advisor. The completion of an official Arts and Sciences minor or an Arts and Sciences or UCIS certificate also satisfies this requirement.

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation. In addition, a student must earn a grade of at least C- for a course to satisfy a PS requirement.

Satisfactory/No Credit option

No course to be counted toward the major can be taken on an S/NC basis.

Political Science, BPHIL

Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and

field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

BS and BPhil in Political Science

Outstanding and motivated students seeking an even more challenging academic experience, especially those who are considering graduate school, should consult with an advisor about the option of a BS or BPhil in Political Science. The BS degree requires the departmental minor field to be Methods and Models in Political Science (PS 1702 and PS 1710), as well as 12 credits of additional coursework in cognate fields and an original paper of high quality. The BPhil degree, which is offered through the University Honors College (UHC), requires a plan of cognate fieldwork and a thesis approved by the department and UHC. For more information on the BPhil, see http://www.honorscollege.pitt.edu/bphildegree.

Second Language

None required beyond the requirements of Arts and Sciences. Study of a second language is highly recommended for students with an interest in politics outside of the United States and for all those considering graduate work in comparative politics or a career in government agencies concerned with international affairs.

Statistics

Not required for majors, but highly recommended for all those interested in graduate education in political science, business, or public policy.

Independent Study

Students who have completed the field course may explore a particular subject in greater depth in a tutorial with the appropriate faculty member. Permission of the instructor is required.

Political Science, BS

Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

BS and BPhil in Political Science

Outstanding and motivated students seeking an even more challenging academic experience, especially those who are considering graduate school, should consult with an advisor about the option of a BS or BPhil in Political Science. The BS degree requires the departmental minor field to be Methods and Models in Political Science (PS 1702 and PS 1710), as well as 12 credits of additional coursework in cognate fields and an original paper of high quality. The BPhil degree, which is offered through the University Honors College (UHC), requires a plan of cognate fieldwork and a thesis approved by the department and UHC. For more information on the BPhil, see http://www.honorscollege.pitt.edu/bphildegree.

Second Language

None required beyond the requirements of Arts and Sciences. Study of a second language is highly recommended for students with an interest in politics outside of the United States and for all those considering graduate work in comparative politics or a career in government agencies concerned with international affairs.

Statistics

Not required for majors, but highly recommended for all those interested in graduate education in political science, business, or public policy.

Independent Study

Students who have completed the field course may explore a particular subject in greater depth in a tutorial with the appropriate faculty member. Permission of the instructor is required.

Minor

Political Science, Minor

A minor in political science is composed of one core course and four field courses in one of the four fields of political science.

Internships

A wide range of internships related to the study of politics at the local, national, and international levels are available in both the public and private sectors in Pittsburgh, Washington D.C., and other major cities. Students must work closely with a faculty advisor to assure full academic credit.

Study Abroad

Majors in political science receive full academic credit for participation in all study abroad programs. The University of Pittsburgh is a participant in a wide range of programs of international study.

Honors Society

Students who have achieved a GPA of 3.0 in political science are encouraged to join Pi Sigma Alpha, the national honors society in political science. This society sponsors many extracurricular activities linked to the study of politics.

Advising

Questions about courses, departmental requirements, and extracurricular opportunities should be addressed to the undergraduate advisors.

Department of Psychology

The psychology major is part of the liberal arts program in the Dietrich School. As such, it provides students with the skills needed to succeed in a job and in graduate school, to think critically and communicate effectively about human behavior and related topics. The Department of Psychology also functions from the perspective that psychology is a natural science. The emphasis it places on research is evident in the foundation courses required to declare the psychology major (e.g., statistics, research methods), as well as in the focus on the scientific methods throughout the content of all other psychology courses. To complement their arts and sciences training, the department also encourages students to participate in directed research and/or supervised field placement opportunities. For more information on the psychology department and its programs, please visit www.psychology.pitt.edu

Psychology majors can participate in one of two major options:

Major

Psychology, BS

The psychology major is part of the liberal arts program in the Dietrich School. As such, it provides students with the skills needed to succeed in a job and in graduate school, to think critically and communicate effectively about human behavior and related topics. The Department of Psychology also functions from the perspective that psychology is a natural science. The emphasis it places on research is evident in the foundation courses required to declare the psychology major (e.g., statistics, research methods), as well as in the focus on the scientific methods throughout the content of all other psychology courses. To complement their arts and sciences training, the department also encourages students to participate in directed research and/or supervised field placement opportunities. For more information on the psychology department and its programs, please visit the Department of Psychology Web site.

Psychology majors an participate in one of two major options: General major in Psychology, and Honors in Psychology. Students who declare the Psychology major are automatically enrolled in the general major track. This track provides students with a broad background in psychology and a firm understanding of the scientific method. The majority of students remain in this track.

In addition to Dietrich School skills and General Education Requirements, psychology majors must complete 34 to 35 credits in psychology, four credits in statistics, and nine to10 credits of co-requirements as described below. The honors track offers students a challenging and unique opportunity: to conduct their own, independent research study under the guidance of a faculty member. Additional course and GPA requirements apply. Students interested in pursuing the honors track should speak with an advisor in the Psychology Advising Office.

Foundation courses

Three courses are required to declare the major; students must earn a C or better in all three foundation courses if they wish to graduate with a psychology major.

- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0035 - RESEARCH METHODS

One course in Statistics

Choose one of the following courses.

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STAT & PROBLTY FOR BUS MGT

Core courses

Choose five courses from the following list

- PSY 0105 - INTRODUCTION TO SOCIAL PSYCH
- PSY 0160 - PSYCHOLOGY OF PERSONALITY
- PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
- PSY 0422 - COGNITIVE PSYCHOLOGY
- PSY 0505 - INTRO TO BIOPSYCHOLOGY
  or
- NROSCI 1000 - INTRO TO NEUROSCIENCE
- PSY 1205 - ABNORMAL PSYCHOLOGY

Upper level

Choose two 1000-level courses, not to include the following courses

- PSY 1205 - ABNORMAL PSYCHOLOGY

- PSY 1900 - SUPERVISED FIELD PLACEMENT
- PSY 1902 - DIRECTED INDIVIDUAL READING
- PSY 1903 - DIRECTED INDIVIDUAL RESEARCH
- PSY 1950 - PSYCHOLOGY SENIOR SEMINAR
- PSY 1970 - UNDERGRAD TEACHING EXPERIENCE
- PSY 1973 - HONORS DIRECTED RESEARCH
- PSY 1975 - HONORS THESIS/MAJORS

Electives

Choose a course from any of the following levels.

- PSY 0100-level
- PSY 0300-level
- PSY 0400-level
- PSY 0500-level
- PSY 1000-level

The elective course cannot include any course used to fulfill a core requirement, any 1000-level requirement, or lab methods requirement. Experiential learning courses - PSY 1900 PSY 1900 - SUPERVISED FIELD PLACEMENT , PSY 1902 PSY 1902 - DIRECTED INDIVIDUAL READING , and PSY 1903 PSY 1903 - DIRECTED INDIVIDUAL RESEARCH may be used to fulfill this requirement. PSY 1950 PSY 1950 - PSYCHOLOGY SENIOR SEMINAR , PSY 1970 PSY 1970 - UNDERGRAD TEACHING EXPERIENCE , PSY 1973 PSY 1973 - HONORS DIRECTED RESEARCH , and PSY 1975 PSY 1975 - HONORS THESIS/MAJORS may not be used to fulfill this requirement.

Laboratory

Choose one of the following courses.

- PSY 0405 - LEARNING AND MOTIVATION
- PSY 0423 - COGNITIVE PSYCHOLOGY LAB
- PSY 1025 - TESTS AND MEASUREMENT
- PSY 1059 - TOPCS IN ADVNCD RSRCH METHDS
- PSY 1112 - PSYLGCL ASPCT SEXLTY RES WRIT
- PSY 1305 - EXPERIMENTAL CHILD PSYCHOLOGY
- PSY 1471 - MAPPING BRAIN CONNECTIVITY
- PSY 1975 - HONORS THESIS/MAJORS

Co-requirements

The Department of Psychology requires that students further develop their scientific skills through certain approved courses in math, biological sciences, and social sciences. A list of these approved courses is available in the Psychology Advising Office. The co-requirements may be used to fulfill Dietrich School General Education Requirements, where appropriate, or can be taken as separate courses.

Psychology majors must also follow these rules and requirements:

- Students who wish to delcare a major in psychology must first complete PSY 0010 PSY 0010 - INTRODUCTION TO PSYCHOLOGY and one of the foundation statistics courses with a letter grade of C or better and must be enrolled in PSY 0035 PSY 0035 - RESEARCH METHODS .
- New majors must complete an online orientation prior to scheduling an appointment with tehir assigned psychology advisors. Students will receive an e-mail with instructions and dates approximately the fourth week of each fall and spring term.
- Psychology majors must maintain at least a 2.0 GPA in their departmental courses.
- All psychology and statistics courses used to fulfill requirements for the major must be taken for a letter grade.
- Majors must take one of the writing-intensive courses (W-courses) offered within the department. PSY 0035 PSY 0035 - RESEARCH METHODS is offered every term and is a W-course. Other W-courses offered in the department are PSY 0420 PSY 0420 - COGNITV

PSYCHOLOGY FOR MAJORS , PSY 1112 PSY 1112 - PSYLGCL ASPCT SEXLTY RES WRIT, and PSY 1305 PSY 1305 - EXPERIMENTAL CHILD PSYCHOLOGY.

- In addition to their major requirements, all Dietrich School students are required to complete a related area, minor, or certificate. Students should consult a psychology advisor when deciding which courses they would like to pursue to fulfill this requirement.

Department of Religious Studies

Religion is one of the creative expressions of the human spirit. As such, it has shaped and, in turn, been shaped by virtually all historical traditions as well as by many other forms of human activity such as the arts, literature, political thinking, and social behavior. Therefore, the academic study of religion should be carried out through diverse scholarly methodologies, and it should treat experiences in a variety of cultural contexts in different periods. Students who wish to understand the manner in which religion, in its broadest terms, has contributed to the shaping of the human experience are encouraged to pursue a course of study that will expand their methodological skills as well as give them a firm command of a particular cultural or historical context. Courses in the study of religion tend to emphasize the human search for meaning and value in history; the manner in which particular religious traditions, practices, thoughts, and orientations have evolved over time; and the degree to which religious views have interacted creatively with other systems of thought and other meaningful expressions of human activity. In addition to courses in the Department of Religious Studies, other departments, such as anthropology, classics, history, philosophy, and sociology, offer related courses. For more information on the Department or Religious Studies and its programs, visit www.religiousstudies.pitt.edu.

Major

Religious Studies, BA

Major Requirements

Students pursuing a major in Religious Studies are required to complete 10 courses, to include:

- Two designated introductory courses, RELGST 0105 - RELIGIONS OF THE WEST and RELGST 0505 - RELIGION IN ASIA.
- Two courses acquainting the student with specific methodological approaches to the study of religions (one methods course reflecting historical approaches the other reflecting a philosophical, social scientific, or literary approach)
- Three courses at the 1000-level from each of three different categories reflecting different areas of the world and different historical periods (religions of the East, pre-modern religions in the West, and modern/contemporary religions in the West)
- Two additional courses in Religious Studies, at least one of which must be a 1000-level course
- A capstone seminar that satisfies the Arts and Sciences requirement for a writing course in the major

Majors must earn a grade of C or better in each departmental course taken. Courses required for the major must be taken on a letter-grade basis. Students should check with the departmental advisor for the credit by examination option.

The required A&S 12-credit related area may encompass study of literature, language, art, or history of a culture the student is seeking to understand or disciplines or processes that are related to religion, such as social change, mythology, symbolism, and literature. Students may use second languages as their related area, but those languages must show some relationship to the primary religion or cultural context within the major. Students planning to attend graduate school should know that competence in those languages related to the culture they will be studying is mandatory. The department strongly encourages development of language skills during undergraduate years.

Minor

Religious Studies Minor

Students pursuing a minor in Religious Studies are required to take:

- Two courses from a list of survey and introductory courses
- One course at the 1000-level in western religion from a designated list
- One course at the 1000-level in eastern religion from a designated list

- One elective course at the 1000-level

Department of Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers majors in Russian and Slavic Studies. These majors provide students with the opportunity to study the languages, literatures, and cultures of Russia and of the Slavic-speaking Eastern European countries, including Poland, Ukraine, Slovakia, Serbia, and Croatia.

Students in the Department of Slavic Languages and Literature include those whose primary interest is languages and/or literature, those who wish to enhance their career opportunities in a special way, those who have an interest in the politics and culture of Russia and the Slavic speaking Eastern European countries, and those who have a desire to explore their ethnic heritage. Many majors continue their studies in graduate or professional school and then go on to careers in business, government, teaching, law, medicine, social work, other health-related professions as well as the CIA, FBI and various NGOs and public policy institutions. Knowledge of a Slavic language has been valuable in working in local Western Pennsylvania institutions, politics, business, health-related professions, and the media because of the large population of those ethnicities in this region. Students are advised to begin language study early in order to gain as complete a command of the language as possible. For more information on the Department of Slavic Languages and Literatures and its programs, see www.slavic.pitt.edu.

During the fall and spring terms, the department offers language courses in Russian, Polish, Slovak and Ukrainian, with Serbian and Croatian available through the Language Acquisition Institute. Any student with prior experience in Russian or Ukrainian (including heritage speakers and those who studied a language in high school or abroad) are required to consult with the instructor before being admitted to any language courses in the department. Placement tests are offered to test suitability.

Summer term intensive courses in Russian, Polish, Slovak, Serbian, Croatian, Bulgarian, Macedonian, Ukrainian as well as Romanian and Hungarian are offered through the Slavic Department's Summer Language Institute [SLI]. Summer language courses are intensive and cover an entire year of study. First through fourth year level courses may be offered. These courses afford students the opportunity to make rapid progress through the language in order to qualify for advanced courses and for various study abroad opportunities. Summer study in the SLI now offers the opportunity to study for the first half of the course in Pittsburgh and the second part in the target country, with excursions to major cities and monuments. Scholarships are available for the SLI programs.

Deserving of special mention is the department's program in Slovak language, literature and culture-the only such program in the United States, and one that additionally offers the opportunity for several students each year to study abroad in Slovakia.

Major

Russian, BA

Major Requirements

The Russian major requires at least 33 distributed as follows.

Prerequisite courses

These courses do not count toward the 33 credits required for the major.

- RUSS 0010 - ELEMENTARY RUSSIAN 1
- RUSS 0020 - ELEMENTARY RUSSIAN 2
- RUSS 0030 - INTERMEDIATE RUSSIAN 1
- RUSS 0040 - INTERMEDIATE RUSSIAN 2

Language courses

- RUSS 0400 - ADVANCED RUSSIAN 1

- RUSS 0410 - ADVANCED RUSSIAN 2
- RUSS 0420 - RUSSIAN NEWSPAPERS & MAGAZINES
- RUSS 0430 - READINGS IN RUSSIAN LITERATURE
- RUSS 1420 - FOURTH-YEAR RUSSIAN 1
- RUSS 1430 - FOURTH-YEAR RUSSIAN 2

Literature and culture courses

- RUSS 0800 - MASTERPIECES 19THC RUSSIAN LIT
- RUSS 0810 - MASTERPIECES 20THC RUSSIAN LIT
- RUSS 0850 - EARLY RUSSIAN CULTURE
- RUSS 0860 - MODERN RUSSIAN CULTURE
- One 1000-level Russian elective course

Note:

Additional courses at the 1000 level in Russian literature are strongly recommended. Prospective majors are encouraged to take RUSS 0800 - MASTERPIECES 19THC RUSSIAN LIT and RUSS 0810 - MASTERPIECES 20THC RUSSIAN LIT as early as possible as an introduction to Russian literature.

The following rules and requirements apply to Russian majors.

- Advanced placement assessment and credit by examination may be arranged through consent of the instructor and the department chair.
- RUSS 0800 - MASTERPIECES 19THC RUSSIAN LIT and RUSS 0810 - MASTERPIECES 20THC RUSSIAN LIT are offered regularly as W courses and will satisfy the departmental W-course requirement.
- A grade of C or better is required in each course that counts toward the major. A grade of B- or better in language courses is required to advance to the next level. A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major may be taken on an S/NC basis.

Honors in the major

Honors in Russian is granted if, in addition to fulfilling all requirements for the major, the student meets the following conditions.

- Maintain a GPA of 3.75 or higher in RUSS courses.
- Maintain an overall GPA of 3.25 or higher.
- Complete at least one additional RUSS 1000-level course.
- Complete a 20-page paper involving Russian primary-source research and a two-page summary in Russian, under the supervision of an appointed faculty committee.
- Consulted with the undergraduate advisor in their junior year.

Study abroad

Students are encouraged to participate in an approved study-abroad program for a semester or the summer term. The department will adjust the course requirements in individual cases to accommodate this participation without delaying the student's graduation. Majors often apply for Nationality Rooms Program Scholarships for summer study abroad. The Summer Language Institute (SLI) offers generous scholarships as well. The following represents a partial list of study abroad opportunities available to students.

- **Summer study in Moscow:** The Department of Slavic Languages and Literatures currently sponsors a ten-credit summer-study program as part of the SLI in Pittsburgh (5 weeks) and Moscow (5 weeks) at the Moscow State University. Students may study first through fourth year Russian, covering one full year language study in ten weeks. Similar programs exist for study in Poland and Bulgaria. The Slavic department can be reached at 412-624-5096 or via e-mail at slavic@pitt.edu.
- **The University of Pittsburgh** is affiliated with a number of organizations holding both summer and semester, or year-long study in Russia. The Study Abroad Office, located in 802 William Pitt Union, can be reached at 412-647-7413.

- **The Russian and East European Study Center** regularly organizes summer study abroad programs in languages and social sciences in locations from the Czech Republic to Slovakia. REES makes scholarships available for many of these programs. Nadia Kirkov, the REES undergraduate advisor, can be reached at 412-648-7418.
- **The Nationality Rooms Program** offers a wide variety of competitive scholarships for summer study abroad in many parts of the world, including Central and Eastern Europe. Applications are due in January. The NRP, located in 1209 CL, can be reached at 412-624-6510.

For more information, see www.slavic.pitt.edu/undergraduate/russian/index.php.

Slavic Studies - Option 1, BA

Major Requirements

Academic requirements for the Slavic studies major may be fulfilled through one of two options.

Option 1

1. Three to four courses (two years) of a Slavic language above the intermediate level

- RUSS 0400 - ADVANCED RUSSIAN 1
- RUSS 0410 - ADVANCED RUSSIAN 2
- RUSS 0420 - RUSSIAN NEWSPAPERS & MAGAZINES
- RUSS 0430 - READINGS IN RUSSIAN LITERATURE
  or

- POLISH 0400 - ADVANCED POLISH THROUGH FILM
- POLISH 0410 - ADVANCED POLISH 2
- POLISH 1901 - INDEPENDENT STUDY
  or

- SLOVAK 0400 - ADVANCED SLOVAK 1
- SLOVAK 0410 - ADVANCED SLOVAK 2
- SLOVAK 1901 - INDEPENDENT STUDY
  or

- SERCRO 0400 - ADV BOSNIAN/CROATIAN/SERBIAN 5
- SERCRO 0410 - ADV BOSNIAN/CROATIAN/SERBIAN 6
- Fourth year Serbian/Croatian (LAI or study abroad)

Note:

1. Eighteen credits of designated Slavic department courses in literature, film, and culture. Students must take three literature courses, one film course, and two courses in Slavic culture. One of the above must be a W-course. *Six credits of Dietrich School courses with a strong Slavic component (courses found in the Russian and East European studies listings) may be substituted, with the advisor's approval.*
2. Six credits of Study Abroad or designated Slavic courses in any of the categories above. If students choose a language course, the number of credits may be six to ten.

Note:

The first two years of language study do not count as credits toward the major, unless the first-year language course is taken as part of Option 2.

Slavic Studies - Option 2, BA

Major Requirements

Academic requirements for the Slavic studies major may be fulfilled through one of two options.

Option 2

- One year of primary Slavic language above the intermediate level. The language may be Russian, Polish, Slovak, or Bosnian/Serbian/Croatian.
- One year of a second Slavic language at any level. The language can be Russian, Polish, Slovak, Bosnian/Serbian/Croatian, Ukranian, Bulgarian, Macedonian, or Czech.
- Eighteen credits of designated Slavic department courses in literature, film, and culture. Students must take three literature courses, one film course, and two courses in Slavic culture. One of the above must be a W-course. *Six credits of Dietrich School courses with a strong Slavic component (courses found in the Russian and East European studies listings) may be substituted, with the advisor's approval.*
- Six credits of Study Abroad or designated Slavic courses in any of the categories above. If students choose a language course, the number of credits may be six to ten.

Note:

The first two years of language study do not count as credits toward the major, unless the first-year language course is taken as part of Option 2.

Minor

Slovak Studies Minor - Culture Option

Minor in Slovak Studies

An undergraduate minor in Slovak studies motivates students to continue with their language and culture studies in a meaningful way. This program would be particularly useful for students majoring in anthropology, political science, and history, many of whom focus their work on Slovakia or Central Europe and see Slovak language and culture as a gateway to the study of the area. Several of the graduates with considerable work in Slovak at Pitt have been offered jobs at the Pentagon, international nonprofit and nongovernmental organizations (NGOs), Radio Free Europe, and the U.S. Department of State.

Students who are interested in the minor may tailor their course selections according to the focus of their interest in the Slovak language or in Slovak culture.

Culture Option

The Slovak culture option requires the following distribution of courses for a total of 17 credits.

- SLOVAK 0010 - ELEMENTARY SLOVAK 1
- SLOVAK 0020 - ELEMENTARY SLOVAK 2

Three of the following

- SLOVAK 0030 - INTERMEDIATE SLOVAK 3
- SLOVAK 0380 - SLOVAK TRANSATLANTIC CULTURES
- SLOVAK 0890 - SLOVAK, CZECH & CNTR EURPN FLM
- SLOVAK 1250 - A CULTURAL HISTORY OF SLOVAKIA
- SLOVAK 1260 - SURVEY OF SLOVAK LIT & CULTURE
- SLOVAK 1270 - SLOVAKIA TODAY

- SLOVAK 1865 The Year Communism Crumbled - 3 credits

Slovak Studies Minor - Language Option

Minor in Slovak Studies

An undergraduate minor in Slovak studies motivates students to continue with their language and culture studies in a meaningful way. This program would be particularly useful for students majoring in anthropology, political science, and history, many of whom focus their work on Slovakia or Central Europe and see Slovak language and culture as a gateway to the study of the area. Several of the graduates with considerable work in Slovak at Pitt have been offered jobs at the Pentagon, international nonprofit and nongovernmental organizations (NGOs), Radio Free Europe, and the U.S. Department of State.

Students who are interested in the minor may tailor their course selections according to the focus of their interest in the Slovak language or in Slovak culture.

Language Option

The Slovak language option requires the following distribution of courses for a total of 17 credits.

- SLOVAK 0010 - ELEMENTARY SLOVAK 1
- SLOVAK 0020 - ELEMENTARY SLOVAK 2
- SLOVAK 0030 - INTERMEDIATE SLOVAK 3
- SLOVAK 0040 - INTERMEDIATE SLOVAK 4
- SLOVAK 0400 - ADVANCED SLOVAK 1

Department of Sociology

This is an exciting time of dramatic social change, both nationally and internationally. Global processes are integrating the world and creating the "global village." At the same time, old hostilities based on ethnic solidarity are re-emerging and tearing the social fabric of various parts of the world. The U.S. economy is undergoing structural change, which, in turn, is altering the occupational structure; the United States is becoming more multicultural, and the meanings of "community" are shifting. In these changes there are huge benefits for some and heavy costs for others. "Social problems" (e.g., health care availability, poverty, crime, or threats to the environment) are not marginal to societies but integral to them.

Sociologists try to understand these phenomena. For some, this means informing public policy; for others, the social world is simply one of the most interesting things to study. Sociologists study social organization. For some, this means examining societies-how they are structured, how they work, and how they change. Other sociologists study how small social groups work and how they change. This includes the social networks that people form as part of their social life. Issues of race, class, and gender affect the opportunities and constraints faced by different groups in society. Sociologists study how people belong to families, groups, and organizations-how people develop identities and how their social organizations become real. Sociologists also focus on broad patterns of social organization socialization, education, welfare, health care, etc. In short, the social world is endlessly fascinating.

For more information on the sociology major, the sociology minor, and the Department of Sociology, see www.sociology.pitt.edu.

Major

Sociology, BA

Major Requirements

A total of 27 credits in sociology and four credits in statistics, distributed as follows, are required for completion of the major.

One of the Following Courses

- SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY

Both of the Following Courses

- SOC 0230 - SOCIAL RESEARCH METHODS
- SOC 0150 - SOCIAL THEORY

One of the Following Courses

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- Research practicum course
- SOC 1500 - CAPSTONE RESEARCH PRACTICUM
- At least 6 credits from advanced-level courses (1000-level). Internships and directed study do not count toward these 6 credits.
- Nine additional elective credits in SOC courses must be taken to complete the major.

In Addition, Sociology Majors Must Adhere to These Rules and Requirements

- A minimum 2.00 cumulative GPA in all departmental courses is required to graduate.
- Sociology majors may take no more than 6 of their 27 credits under the S/NC option. After declaring the sociology major, students may not take SOC 0150 - SOCIAL THEORY and SOC 0230 - SOCIAL RESEARCH METHODS on the S/NC basis.
- Sociology majors must complete the 12-credit required Dietrich School related area. Acceptable related areas include anthropology, Africana studies, computer science, economics, history, mathematics, philosophy, political science, psychology, or religious studies. In special cases, the sociology advisor may approve some other field to satisfy this requirement, such as the study of an international area or second language.

The Department of Sociology Offers Courses that are Particularly Suitable for the Following Special Programs

Pre-Education

- SOC 0426 - SOCIETY AND THE CHILD
- SOC 0478 - YOUTH AND SOCIETY

Pre-Law

- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0472 - INTRODUCTION TO CRIMINOLOGY
- SOC 0474 - SOCIETY AND THE LAW
- SOC 1443 - JUVENILE DELINQUENCY
- SOC 1516 - ORGANIZED CRIME
- SOC 1518 WHITE COLLAR CRIME

Pre-Social Work

- SOC 0424 - SMALL GROUPS
- SOC 0438 - SOCIOLOGY OF THE FAMILY
- SOC 0460 - MINORITY GROUPS
- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1413 - MARRIAGE
- SOC 1450 - HEALTH AND ILLNESS

Pre-Medical

- SOC 0312 - SCIENCE IN SOCIETY
- SOC 0441 - PROFESSIONS AND DYING PATIENT
- SOC 0475 - SOCIOLOGY OF AGING
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1370 - GENDER AND HEALTH WORLDWIDE
- SOC 1450 - HEALTH AND ILLNESS
- SOC 1467 - TOPICS MENTAL HEALTH & ILLNESS
- SOC 1470 - RESEARCH ON AGING
- SOC 1488 - HISTORY MEDICINE & HEALTH CARE

Gender, Sexuality, and Women's Studies

- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1333 - COMPARATV PERSPECTVS ON WOMEN
- SOC 1365 - RACE, GENDER AND DEVELOPMENT
- SOC 1448 - WORKING WOMEN

Minor

Sociology Minor

Minor Requirements

A minor in sociology requires the following distribution of courses for a total of 15 credits:

- SOC 0150 - SOCIAL THEORY
- SOC 0230 - SOCIAL RESEARCH METHODS
- An elective in sociology
- One elective upper-level sociology course (1000-2000)

One of the Following Courses

- SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY

Department of Statistics

The field of statistics is concerned with ways of understanding variability in measurements. It is the science and art of making informed decisions in the face of uncertainty. Statistical reasoning is fundamental to research in many scientific fields. For example, probabilistic models of learning are used in education and psychology, and time series and regression models guide research in engineering, chemistry, economics, biology, and medicine. Recent high-profile court cases have shown the importance of the use of probability and statistics in law, especially in the fields of forensic medicine and DNA fingerprinting. Statisticians have also been instrumental in developing methods by which observations are obtained in many disciplines. Examples include randomized clinical trials in medicine and complex sampling surveys in social and political science. Probability and statistics are basic to the actuarial sciences. When lists are compiled of the most important scientific theories and discoveries of the last century, a substantial number of these developments are seen to be inherently statistical in nature.

The Department of Statistics offers course work leading to a Bachelor of Science degree in statistics, a minor in applied statistics, and a combined five-year bachelor and master's degree in statistics. The department also offers a wide array of introductory service courses for general undergraduate audiences that deal with statistical methods in applications (and which require only high school mathematics). A joint major in economics and statistics is also available. Interested students should consult the requirements listed under Economics. Students considering majoring in statistics should consult with a department advisor early in their studies, preferably during their freshman year. For more information on the major, other programs, and the Department of Statistics, visit www.stat.pitt.edu.

Major

Statistics, BS

Requirements for a BS in Statistics

The statistics major requires a minimum of 50 credits, including the following required courses:

Required Course

- STAT 1000 - APPLIED STATISTICAL METHODS *

Note:

* With approval of the major advisor, students may substitute STAT 1000 under the following conditions.

- Complete STAT 0200 with a grade of B- or better; or
- Receive advanced placement for STAT 0200; or
- Complete STAT 1100 if the student is a Statistics-Business dual major.

All of the Following Courses

- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLD REGRESSN WRIT COMPONENT
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

Two of the Following Introductory Applied Statistics Courses

- STAT 1201 - APPLD NONPARAMETRIC STATISTICS
- STAT 1211 - APPLD CATEGORICAL DATA ANLYSIS
- STAT 1231 - APPLIED EXPERIMENTAL DESIGN
- STAT 1241 - APPLIED SAMPLING
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1291 - TOPICS APPLIED STAT 1

- STAT 1292 - TOPICS IN APPLIED STATISTICS 2
- STAT 1293 - TOPICS IN APPLIED STATISTICS 3
- STAT 1294 - TOPICS IN APPLIED STATISTICS 4

One Intermediate Applied Statistics Course from the Following List:

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Both of the Following Courses

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STAT

One Statistics Course from the Following List

- STAT 1651 - BAYESIAN STATISTICS
- STAT 1661 - LINEAR REGRESSION
- STAT 1662 - NONLINEAR REGRESSION
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY
- STAT 1761 - GAME THEORY
- STAT 1781 - COMBINATORICS
- STAT 1791 - TOPICS PROBABILITY & STAT 2
- STAT 1792 - TOPICS IN PROBABILITY AND STATISTICS 2
- STAT 1793 - TOPICS IN PROBABILITY AND STATISTICS 3
- STAT 1794 - TOPICS IN PROBABILITY AND STATISTICS 4

Mathematics Courses:

Choose one group.

Group 1

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

Group 2

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

One of the Following Courses

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 1180 - LINEAR ALGEBRA 1

- MATH 1185 - HONORS LINEAR ALGEBRA

Elective Courses

Because professional statisticians collaborate with other scientists, students are encouraged to take elective courses from the behavioral, natural, physical, and social sciences.

Statistics Majors Must Adhere to the Following Rules and Requirements as Well:

- Students must earn at least a C grade in each course required for the major.
- Students may not take required courses on the S/NC option .
- Since 15 credits of mathematics is one of the corequisites for the major, students who complete the major automatically fulfill the Dietrich School 12-credit related area requirement.
- Courses in technical writing and public speaking are recommended.
- Students planning to continue their studies in a graduate program are strongly encouraged to take MATH 0413 - INTRO THEORETICAL MATHEMATICS, MATH 0420 - INTRO THEORY 1-VARIABLE CALCUL, MATH 1180 - LINEAR ALGEBRA 1, and as many additional mathematics courses in advanced calculus, numerical analysis, and computer sciences as possible.

In order to qualify for departmental honors at graduation, students must

- Have a GPA of at least 3.50 in all mathematics and statistics courses taken
- Have a GPA of at least 3.70 in all 1000-level courses taken within the department and
- Complete all other requirements for the statistics major.

Statistics, BS/MA

Requirements for a Combined Five-Year Bachelor's and Master's Degree in Statistics

Admission to the program requires the approval of both the undergraduate and graduate directors. The minimum requirements for admission are:

1. Two letters of recommendation,
2. minimum high school GPA of 3.25 or top 10 percent of class, and
3. an SAT score of at least 1270 with a math score of at least 650.

Requirements for a Combined BS and MA in Statistics

1. Introductory Mathematics Courses:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1

2.

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION

- STAT 1223 - APPLD REGRESSN WRIT COMPONENT where STAT 1223 is a W (writing) course

3. Three Introductory Applied Statistics Courses from the Following List:

- STAT 1201 - APPLD NONPARAMETRIC STATISTICS
- STAT 1211 - APPLD CATEGORICAL DATA ANLYSIS
- STAT 1231 - APPLIED EXPERIMENTAL DESIGN
- STAT 1241 - APPLIED SAMPLING
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1291 - TOPICS APPLIED STAT 1
- STAT 1292 - TOPICS IN APPLIED STATISTICS 2
- STAT 1293 - TOPICS IN APPLIED STATISTICS 3
- STAT 1294 - TOPICS IN APPLIED STATISTICS 4

4. One Intermediate Applied Statistics Course from the Following List:

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

5.

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS

6.

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STAT

7.

- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

8.

- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

9. Electives in Statistics:

Three additional courses, at least two of which must be graduate-level courses. STAT 2711 and 2712 are excluded, and courses at the 3000 level must be approved by the student's advisor

10.

One graduate-level course from outside of the department, chosen in consultation with the graduate advisor

11.

Master's pass on Preliminary Examination

Requirements for a Combined BS and MS in Statistics

Requirements one through 11 as above, except that requirement nine is reduced to one undergraduate or graduate course. In addition, the student must write and successfully defend a master's thesis.

- Grade requirement: Students in the program must earn at least a B grade in each required course as well as maintain a 3.25 GPA.

Typical Schedule

First Year:

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLD REGRESSN WRIT COMPONENT

Second Year:

- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- STAT 1200-level course
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- STAT 1200-level course

Third Year:

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1200-level course
- STAT 1152 - INTRO TO MATHEMATCL STATISTICS
- STAT 1300-level course

Fourth Year:

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 1632 - INTERMEDIATE MATHEMATICAL STAT
- STAT 2132 - APPLIED STATISTICAL METHODS 2
- STAT 2000-level course

Fifth Year:

- Take Comprehensive Exam
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING
- Two STAT electives or master's thesis
- One outside graduate-level course

Comparison of Programs

Separately, the Bachelor of Science in statistics requires 50 credits, and the Master of science in applied statistics requires 33 credits, of which 21 must be graduate level. The combined program requires 69 credits, of which 18 must be graduate level.

Minor

Applied Statistics Minor

Requirements for a Minor in Applied Statistics

Professionals in many fields use statistical procedures regularly. Decisions based on numerical information or data, if the data are collected and analyzed properly, are typically better decisions. The minor in applied statistics was designed to give students additional statistical tools and a better understanding of statistical reasoning.

The minor in applied statistics requires 16 credits, consisting of the following courses

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- Three additional courses from STAT 1200 through STAT 1700, excluding
- STAT 1223 - APPLD REGRESSN WRIT COMPONENT

Note:

* Acceptable substitutes include STAT 1100 Statistics and Probability for Business Management, ENGR 0020 Probability and Statistics for Engineers 1, and STAT 0200 Basic Applied Statistics.

Department of Studio Arts

The practice of art is among the oldest and most fundamental forms of human expression. The Department of Studio Arts provides the opportunity for students to explore the visual arts through foundation courses and through upper-level courses in painting, sculpture, drawing, printmaking, and graphic design. Studio activities are designed to intensify students' visual perception of the formal and expressive means of art, to develop understanding of a variety of technical processes, and to encourage insight into the significance of making art today. Course offerings of the department address the following goals:

- Provide a degree program for art majors who desire a liberal education and want to prepare for graduate art school or pursue a career in an art-related field;
- Provide a related area in studio arts for majors in other departments by taking the four foundation courses or by completing 12 credits in a specified studio area;
- Facilitate development of art-making skills and concepts through the foundation courses for all undergraduate students, while satisfying the Dietrich School creative expression requirement; and
- Provide a 15-credit minor in studio arts.

The Department of Studio Arts sponsors an annual student exhibition and a biannual faculty exhibition in the University of Pittsburgh Art Gallery. The University's Frick Fine Arts Library is one of the finest available. Also in close proximity is The Carnegie, with its museum and library providing access for research and study. For more information on the major, the minor, and the Department of Studio Arts, see http://www.studioarts.pitt.edu/.

Major

Studio Arts, BA

Major Requirements

Majors must complete a minimum of 36 credits in studio arts (SA) courses and 12 credits in history of art and architecture (HA&A) courses, distributed as follows:

Foundation Courses

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Upper-Level Required Courses

- SA 1220 - PAINTING STUDIO 2
- SA 1230 - DRAWING STUDIO 2
- SA 1240 - SCULPTURE STUDIO 2
- SA 1260 - PRINT STUDIO: INTAGLIO
- SA 1270 - DIGITAL STUDIO: IMAGING

Upper-Level Elective Courses

- Three courses from SA 1330-SA 1900 (Check the department Web site for the titles of courses in these levels.)

History of Art and Architecture Required Courses

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0030 - INTRODUCTION TO MODERN ART

History of Art and Architecture Elective Courses

- Students must take two elective HAA courses, one of which should be a writing intensive (W) course.

Studio Arts Majors Must Also Adhere to These Rules and Requirements:

- Students must attain at least a 2.00 GPA in the major.
- No department course that counts toward the major may be taken on the S/NC basis. Credit by exam is generally not available.
- Students should take one of the HAA courses required for the major as a W course.
- Students who earn a 3.50 GPA in the major and an overall 3.25 GPA receive departmental honors.
- Corequirements in HAA automatically fulfill the Dietrich School required 12-credit related area.
- Seniors are expected to exhibit their work in the Annual Student Exhibition at the University of Pittsburgh Art Gallery.
- In addition to required courses, focus in a particular medium is possible through directed study. Internships are also available in art-related fields.
- Majors may take special workshops and courses when offered, but only if they have fulfilled the prerequisites, or by departmental permission. The department recommends that a student take no more than two studio arts courses in one term.

Courses for Non-Studio Arts Majors

All level-one core courses are open to non-art majors. Non-art majors may take level-two courses but must complete the prerequisites for the specific courses. A related area in studio arts requires 12 credits. A student may elect one of the following options: 12 credits in level-one foundation courses

or 12 credits within a specific field with prerequisites. Non majors may take special workshops and advanced courses when offered, but only if they have fulfilled the prerequisites, or by departmental permission.

Minor

Studio Arts Minor - Option 1

Minor Requirements

The studio arts minor requires the completion of 15 credits in any of five options.

Four Foundation Courses:

This option may not be declared after September 4, 2015.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Any Level History of Art and Architecture Course

Note:

The department recommends completing SA 0110 Foundation Design and SA 0130 Foundation Drawing before enrolling in SA 0120 Foundation Painting.

Option 1: Five Introductory-Level SA Courses

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY

Studio Arts Minor - Option 2

Minor Requirements

The studio arts minor requires the completion of 15 credits in any of five options.

Four Foundation Courses:

This option may not be declared after September 4, 2015.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Any Level History of Art and Architecture Course

Note:

The department recommends completing SA 0110 Foundation Design and SA 0130 Foundation Drawing before enrolling in SA 0120 Foundation Painting.

Option 2: Four Introductory-Level SA Courses and One Three-Credit HAA Course

- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- HAA three-credit course

Two of the Following Courses

- SA 0120 - PAINTING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY

Studio Arts Minor - Option 3

Minor Requirements

The studio arts minor requires the completion of 15 credits in any of five options.

Four Foundation Courses:

This option may not be declared after September 4, 2015.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Any Level History of Art and Architecture Course

Note:

The department recommends completing SA 0110 Foundation Design and SA 0130 Foundation Drawing before enrolling in SA 0120 Foundation Painting.

Option 3: Four Introductory-Level SA Courses and One 1200-Level SA Course

- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- SA 1200-level course

Two of the Following Courses

- SA 0120 - PAINTING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY

Studio Arts Minor - Option 4

Minor Requirements

The studio arts minor requires the completion of 15 credits in any of five options.

Four Foundation Courses:

This option may not be declared after September 4, 2015.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Any Level History of Art and Architecture Course

Note:

The department recommends completing SA 0110 Foundation Design and SA 0130 Foundation Drawing before enrolling in SA 0120 Foundation Painting.

Option 4: Three Introductory-Level SA Courses, One 1200-Level SA Course, and One Three-Credit HAA Course

- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- SA 1200-level course
- HAA three-credit course

One of the Following Courses

- SA 0120 - PAINTING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY

Studio Arts Minor - Option 5

Minor Requirements

The studio arts minor requires the completion of 15 credits in any of five options.

Four Foundation Courses:

This option may not be declared after September 4, 2015.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Any Level History of Art and Architecture Course

Note:

The department recommends completing SA 0110 Foundation Design and SA 0130 Foundation Drawing before enrolling in SA 0120 Foundation Painting.

Option 5: Three Introductory-Level SA Courses and Two Upper-Level SA Courses Sequenced in the Same Media

- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- SA 1200-level course
- SA 1300-level course in same medium as the 1200-level course

One of the Following Courses

- SA 0120 - PAINTING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - DIGITAL STUDIO: PHOTOGRAPHY

Department of Theatre Arts

The Department of Theatre Arts offers training in both the practical and academic aspects of theatre. Undergraduates may specialize in acting, directing, design and technical theatre, theatre history and criticism, or any combination of these.

While the department is not a professional school, the presence of strong graduate programs creates the atmosphere of professional training. Instead of the protected environment of a conservatory, undergraduate theatre training at Pitt takes place within the context of the liberal-arts experience at a large, urban university.

The department recommends that students declare this major as early as possible. For more information, please contact the Director of Undergraduate Studies, Don Mangone at dmangone@pitt.edu.

Major

Theatre Arts, BA

The Department of Theatre Arts offers training in both the practical and academic aspects of theatre. Undergraduates may specialize in acting, directing, design and technical theatre, theatre history and criticism, or any combination of these areas. While the department is not a professional school, the presence of strong graduate programs creates the atmosphere of professional training. Instead of the protected environment of a conservatory, undergraduate theatre training at Pitt takes place within the context of the liberal-arts experience at a large, urban university. The

department recommends that students declare this major as early as possible. For more information, please contact the department's Director of Undergraduate Studies.

This major requires 42 credits of course work as follows.

Introductory courses

- THEA 0804 - THEATRE AND COLLABORATION
- THEA 0810 - INTRODUCTION TO DRAMATIC ART

Performance courses

Choose three of the following courses.

- THEA 0830 - INTRODUCTION TO PERFORMANCE
- THEA 1100 - VOICE AND MOVEMENT 1
- THEA 1101 - VOICE AND MOVEMENT 2
- THEA 1102 - ACTING 1
- THEA 1103 - ACTING 2
- THEA 1104 - ACTING 3
- THEA 1110 - DIRECTING 1
- THEA 1111 - DIRECTING 2
- THEA 1121 - THEATRE FOR CHILDREN
- THEA 1229 - STAGE MANAGEMENT 1
- THEA 1338 - MUSICAL THEATRE PERFORMANCE
- THEA 1392 - SPECIAL TOPICS: PERFORMANCE

Design/Technical courses

- THEA 0842 - INTRODUCTION TO STAGECRAFT
- THEA 0880 - THEATRICAL PRODUCTION
  Students will take this course three times: once as Construction; and twice as Run Crew.
- THEA 1240 - COSTUME PRODUCTION TECHNOLOGY

Choose one of the following courses

- THEA 0840 - INTRODUCTION TO THEATRE DESIGN
- THEA 1230 - STAGE LIGHTING 1
- THEA 1235 - SCENE DESIGN 1
- THEA 1246 - COSTUME DESIGN 1

Playwriting, History, and Criticism

Choose two of the following courses

- THEA 1341 - WORLD THEATRE: 500 BCE TO 1640
- THEA 1342 - WORLD THEATRE: 1640 TO 1890
- THEA 1343 - WORLD THEATRE: 1890-1970

Choose one of the following courses

Choose one of the following writing-intensive courses.

- THEA 1360 - THEATRE CRITICISM
- THEA 1903 - SEMINAR IN THEATRE ARTS

Choose one elective from the Playwriting, History, and Criticism category

- THEA 0505 - ENJOY PERFORMANCES
- THEA 0810 - INTRODUCTION TO DRAMATIC ART
- THEA 0825 - CONTEMPORARY GLOBAL STAGES
- THEA 1341 - WORLD THEATRE: 500 BCE TO 1640
- THEA 1342 - WORLD THEATRE: 1640 TO 1890
- THEA 1343 - WORLD THEATRE: 1890-1970
- THEA 1350 - AMERICAN THEATRE
- THEA 1360 - THEATRE CRITICISM (writing-intensive)
- THEA 1365 - PLAYWRITING 1 (writing-intensive)
- THEA 1366 - PLAYWRITING 2 (writing-intensive)
- THEA 1390 - SPECIAL TOPICS
- THEA 1903 - SEMINAR IN THEATRE ARTS (writing-intensive)

Elective course

Students must take one course selected from offerings in Performance, Design / Tech, or Playwriting / History / Criticism. Directed study (THEA 1480 - THEA 1485) and independent study (THEA 1900 - THEA 1901) courses cannot be used to satisfy this requirement.

In addition, theatre arts majors should adhere to these rules and requirements.

- Students are encouraged to declare this major early and register with the departmental advisor.
- Majors must maintain at least a 2.0 GPA in all theatre arts courses.
- Students must check with the program advisor to determine the appropriateness of using the Satisfactory/No Credit (S/NC) grade option in departmental courses. No more than two courses in the major may be taken on an S/NC basis.
- A minimum of 12 credits is required in a related area. Any area that corresponds with the student's interests is appropriate, but Studio Arts is strongly suggested. Also recommended are: Anthropology; Africana Studies; Classics; English; History of Art and Architecture; a second language; History; Music; Philosophy; Psychology; Sociology; and Communication and Rhetoric.

For more information on the major and the Department of Theatre Arts, visit their Web site.

Minor

Theatre Arts Minor

Minor Requirements

Required Courses for the Minor

- THEA 0880 - THEATRICAL PRODUCTION : Run Crew

Choose two of the following courses

These courses cannot count for both the required course and the playwriting / history / criticism track.

- THEA 0505 - ENJOY PERFORMANCES
- THEA 0804 - THEATRE AND COLLABORATION
- THEA 0810 - INTRODUCTION TO DRAMATIC ART

Choose three courses from among one of the following groups.

Performance courses

- THEA 0804 - THEATRE AND COLLABORATION
- THEA 1100 - VOICE AND MOVEMENT 1
- THEA 1101 - VOICE AND MOVEMENT 2
- THEA 1102 - ACTING 1
- THEA 1103 - ACTING 2
- THEA 1104 - ACTING 3
- THEA 1108 - THEATRE PRACTICUM-PERFORMANCE
- THEA 1109 - PERFORMANCE LAB
- THEA 1110 - DIRECTING 1
- THEA 1111 - DIRECTING 2
- THEA 1120 - DRAM & PERFORMANCE IN CLSSROOM
- THEA 1121 - THEATRE FOR CHILDREN
- THEA 1229 - STAGE MANAGEMENT 1
- THEA 1338 - MUSICAL THEATRE PERFORMANCE
- THEA 1390 - SPECIAL TOPICS
- THEA 1392 - SPECIAL TOPICS: PERFORMANCE
- THEA 1483 - DIRCTED PROJECT DIRCTING/PERF
- THEA 1500 - MODERN ACTING
- THEA 1501 - SHAKESPEARE ACTING

Design/Technical courses

- THEA 0840 - INTRODUCTION TO THEATRE DESIGN
- THEA 0842 - INTRODUCTION TO STAGECRAFT
- THEA 0880 - THEATRICAL PRODUCTION
- THEA 1227 - SCENE PAINTING
- THEA 1230 - STAGE LIGHTING 1
- THEA 1235 - SCENE DESIGN 1
- THEA 1240 - COSTUME PRODUCTION TECHNOLOGY
- THEA 1241 - HISTORY OF COSTUME
- THEA 1245 - STAGE MAKEUP
- THEA 1246 - COSTUME DESIGN 1
- THEA 1405 - COSTUMES AND RUN CREW
- THEA 1480 - DIRECTED PROJECT SCENERY/PROPS
- THEA 1481 - DIRECTED PROJECT CSTUME/MAKEUP
- THEA 1482 - DIRCTED PROJECT LIGHTING/SOUND
- THEA 1484 - DIRECTED PROJECT BUSINESS MGT
- THEA 1485 - DIRECTED PROJECT STAGE MGMNT

Playwriting, History, and Criticism courses

- THEA 0505 - ENJOY PERFORMANCES
- THEA 0804 - THEATRE AND COLLABORATION
- THEA 0810 - INTRODUCTION TO DRAMATIC ART
- THEA 0825 - CONTEMPORARY GLOBAL STAGES
- THEA 1341 - WORLD THEATRE: 500 BCE TO 1640
- THEA 1342 - WORLD THEATRE: 1640 TO 1890
- THEA 1343 - WORLD THEATRE: 1890-1970
- THEA 1350 - AMERICAN THEATRE
- THEA 1360 - THEATRE CRITICISM
- THEA 1365 - PLAYWRITING 1
- THEA 1366 - PLAYWRITING 2
- THEA 1390 - SPECIAL TOPICS
- THEA 1903 - SEMINAR IN THEATRE ARTS

Department of Urban Studies

While urban studies is not a department, it is an administrative unit offering a major in urban studies for students who have an interest in unraveling the complexities of the urban world. The major is interdisciplinary, meaning that students learn about cities as historical, social, cultural, economic, and political phenomena. The major is "real world" in the sense that students apply what they learn to the world beyond the classroom. Finally, the major is career oriented in that, after graduation, students attempt to find roles for themselves in the urban environment. To accomplish all of these goals, the urban studies curriculum integrates "knowing" with "doing." The major combines courses offered by the program with courses offered through other social science departments. For more information, see www.urbanstudies.pitt.edu.

Major

Urban Studies, BA

Major Requirements

The Urban Studies Major Requires 33 Credits, Distributed as Follows:

- URBNST 0080 - INTRODUCTION TO URBAN STUDIES
- URBNST 1300 - URBAN SKILLS SEMINAR
- URBNST 1500 - URBAN RESEARCH SEMINAR
- URBNST 1900 - URBAN FIELD PLACEMENT - six credits

- STAT 0200 - BASIC APPLIED STATISTICS or
- STAT 1000 - APPLIED STATISTICAL METHODS is strongly recommended but not required

- URBNST 1200 - URBAN STUDIES FLD RESEARCH SEM is not required but fills the elective requirement. This seminar is offered only in the summer.
- URBNST 1700 - INTERNATIONAL URBANISM SEMINAR is required for comparative urbanism students.

Additional Rules and Requirements:

- Students are encouraged to take URBNST 0080 Introduction to Urban Studies as early as possible, ideally in the fall or spring of the freshman year, and to develop a broad background in the social sciences among lower-level social science courses such as the following:
    - ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY
    - AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
    - ECON 0110 - INTRO MACROECONOMIC THEORY
    - HIST 0601 - UNITED STATES 1865-PRESENT
    - PS 0200 - AMERICAN POLITICS
    - SOC 0010 - INTRODUCTION TO SOCIOLOGY
- Students must have at least a 2.00 GPA in all courses to be applied to the major.
- Students may take as many courses on the S/NC basis as they wish.
- URBNST 1500 - URBAN RESEARCH SEMINAR, which is required for the major, satisfies the W course requirement.
- Students are required by Dietrich School to complete a 12-credit related area. Particularly appropriate areas are sociology, economics, political science, anthropology, Africana studies, and history, although students may consult with their advisor about other possibilities.

University Honors College

The University Honors College (UHC) seeks to create opportunities for dedicated and engaged students to explore their interests in great depth and with great rigor. The UHC offers a variety of carefully designed courses from the humanities, social sciences, and natural sciences, along with supplemental advising opportunities, academic activities, and a distinctive baccalaureate degree in any undergraduate school of the University.

Contact Information

University of Pittsburgh
University Honors College
3600 Cathedral of Learning
Pittsburgh, PA 15260
412-624-6880
www.honorscollege.pitt.edu

Admission Requirements

A distinctive feature of the University Honors College (UHC) is that unlike honors programs and colleges at virtually all other universities, students do not apply for membership, students are not accepted into the UHC, and students are not rejected for membership. Rather, all undergraduate students who seek an enriched education are invited to pursue the rigorous academic opportunities provided by the UHC.

Advising

The UHC offers multiple forms of advising that are intended to complement the advising students receive from their primary advisor. These include supplemental academic advising, Health Professions Advising, national scholarships advising, community engagement advising, and Politics and Philosophy major advising.

Please note that all students are welcome to meet with UHC advisors and are encouraged to either make an appointment online or simply email the relevant advisor.

Supplemental Academic Advising

UHC supplemental academic advisors help students explore interests and goals, assist in matching them to relevant opportunities in research, student groups, and academics within the UHC and at Pitt; assist in planning double majors and/or an interdisciplinary approach to their education; provide

general academic advice on courses, majors, and research; and aid in the preparation of personal statements for scholarships and graduate study. For more information: http://www.honorscollege.pitt.edu/advising

Health Professions Advising

Health professions advising assists students as they explore major choices, course selection, long range planning, and successful application to both the health professions committee and to medical, dental, optometry, podiatry, and veterinary schools. Advisors assess student goals and then recommend academic and experiential opportunities that mesh with student interests. For more information: http://www.honorscollege.pitt.edu/health-professions-advising

National Scholarships

The office of National Scholarships works closely with students to identify scholarships relevant to their academic and personal goals, and explore the steps to become competitive applicants for these awards. National scholarship advising can help students attain a broader perspective and refined understanding of their personal, academic, and professional goals; strengthen their writing skills through the creation and revision of personal statements and grant proposals; and develop the resourcefulness to identify opportunities to conduct meaningful research and/or incorporate service and international experiences into their educational plan. For more information: http://www.honorscollege.pitt.edu/nationalscholarships-advising

Community Engagement

Community Engagement Advising and programming provides students with opportunities to use their academic interests and skills to positively impact their communities. Community Engagement Advising introduces students to pertinent social issues in the city of Pittsburgh as well as key organizations, leaders, and advocates who are involved with those issues; connects students to research, fellowships, experiential learning opportunities, and other scholarly projects that relate to public service and social change; supports students in designing independent experiences and research projects that integrate academic skills and interests with investigating and addressing community issues. For more information: http://www.honorscollege.pitt.edu/community-engagement-advising

Politics and Philosophy Major

This interdisciplinary major in the Kenneth P. Dietrich School of Arts and Sciences is advised through the UHC and provides students with training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances understanding of the moral and political complexities of public life and offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs. For more information: http://www.honorscollege.pitt.edu/politics-philosophy

The Bachelor of Philosophy Degree

The Bachelor of Philosophy (BPhil) degree is jointly awarded by the UHC and any undergraduate school/college at Pitt. The BPhil degree signifies the highest level of research/scholarship attainable by an undergraduate student. To receive the BPhil degree, students must fulfill the degree requirements (major, general education, and/or other curricular requirements) of their "home school" (e.g., Kenneth P. Dietrich School of Arts and Sciences, Swanson School of Engineering, College of Business Administration, School of Nursing, etc.) and maintain a 3.50 cumulative GPA. The UHC adds two requirements: a more demanding program of study which should have breadth, depth, and focus and independent research/scholarship under the guidance of a faculty member culminating in a written thesis that is defended before a faculty examination committee that includes a visiting external examiner from another college or university. For more information: http://www.honorscollege.pitt.edu/bphil-degree

Special Academic Opportunities

Student Publications

The UHC advises and directs the publishing of four undergraduate publications: Collision (prose and poetry), Pittsburgh Undergraduate Review (analytical and scholarly essays), Three Rivers Review (literary magazine), Pitt Political Review (political writing). All publications are student run and always interested in new members. Consult the UHC publications page for more information: http://www.honorscollege.pitt.edu/activities/student-publications

Research Opportunities

The UHC provides research opportunities in the fall and spring semesters as well as the summer. These include the Brackenridge Research Fellowships, Health Sciences Summer Research Fellowships, and Chancellor's Undergraduate Research Fellowships just to name a few. For more in depth information about these programs and their application deadlines, please visit: http://www.honorscollege.pitt.edu/fall-and-spring-research-opportunities and http://www.honorscollege.pitt.edu/summer-research-opportunities

Housing

The UHC offers First-Year Honors Housing, located in Sutherland West, and Upper-Class Honors Housing in Pennsylvania Hall and Forbes Craig Apartments. Honors Housing is unique in that it connects highly motivated students from across schools and majors in communities that are shaped by their shared academic, cultural, and personal interests. To learn more about Honors Housing, visit: http://www.honorscollege.pitt.edu/housing

Major and Minor Descriptions

Major

Politics and Philosophy, BA

The politics and philosophy major, a major in the Kenneth P. Dietrich School of Arts and Sciences, advised through the University Honors College, provides students with interdisciplinary training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances students' understanding of the moral and political complexities of public life and it offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs.

By combining course work from different disciplines -- political science, philosophy, and economics -- the program's scope is broad, yet the structure of the curriculum also requires depth. The thematic nature of the major allows for flexibility in course selection. In collaboration with the major advisor, students design a cohesive program of study tailored to meet their individual post-graduate/career interests and needs.

The politics and philosophy major is a rigorous, but rewarding, program. Upon graduation, an academic career is certainly a possible pursuit; the major also provides excellent preparation for careers in law, government, community organizations, and social action groups.

The major is comprised of elements from the political science, philosophy, and economics departments and involves a minimum of 51 credits distributed as follows: political science - 21 credits; philosophy - 21 credits; economics - 9 credits. A capstone, which may have associated credits, is also required.

Required Courses

Political Science Courses

Students must complete seven courses in political science. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Philosophy Courses

Students must complete seven courses in philosophy. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Economics Courses

- ECON 0100 - INTRO MICROECONOMIC THEORY
- ECON 0110 - INTRO MACROECONOMIC THEORY
- ECON XXXX any course (no course in the 0800 series may count toward this requirement)

Capstone Requirement

In consultation with the major advisor, students may opt for one of the following.

- completion of the Bachelor of Philosophy thesis through the University Honors College (UHC);
- participation in a graduate-level seminar (with permission from the instructor); or
- completion of a Directed Research Project, an Independent Study, or an Internship.

Grade requirements: A minimum GPA of 2.0 is required in those courses that count toward the major.

Satisfactory/No Credit option: There is no limit on the number of courses in the major that can be taken on an S/NC basis, but it is suggested that these courses be taken for a letter grade.

Writing (W) requirement: The W courses listed under the political science and philosophy requirements satisfy the W requirement for the major.

Related area: A related area is not required due to the interdisciplinary nature of the major.

School of Dental Medicine

The University of Pittsburgh Dental Hygiene Program provides a comprehensive education in both the basic sciences and clinical dental hygiene over the course of a two-year (six consecutive terms) Associate of Science Degree in Dental Hygiene. The University of Pittsburgh Dental Hygiene Program differs from other programs by providing a broader range of experiences in specialty clinics within the School of Dental Medicine, as well as clinical rotations at the University of Pittsburgh Medical Center. The major areas of focus are teaching, research, patient treatment, and community service. Dental hygiene services are rendered to a varied patient population, including pediatric, geriatric, physically and mentally challenged, and immunocompromised individuals. In addition to clinical practice, graduates are prepared for careers in areas such as education, research, and dental public health.

Students who complete the Associate of Science Degree in Dental Hygiene have the option of completing a Bachelor of Science degree offered through the College of General Studies. The degree completion option includes three areas of study focusing on a student's specific career goals. These areas include dental hygiene education, research, and health management. Graduates can work as licensed dental hygienists while completing their requirements for the bachelor's degree. Classes are tailored to the student's interests and can be arranged around work schedules. The program provides a firm foundation for those desiring to pursue graduate studies. (See the College of General Studies listing for more information on the Bachelor of Science degree completion option.)

Contact Information

University of Pittsburgh
School of Dental Medicine
Director, Dental Hygiene Program

Admission Requirements and Deadlines: Associate of Science Degree in Dental Hygiene

(See Dental Hygiene Program listing under the Application for Admission section at the front of this bulletin for requirements and deadlines.)

Academic Standards: Professional/Ethical Conduct Statement for Students

Students will be evaluated on all aspects of professional behavior and ethical conduct. The evaluation will encompass criteria such as the student's interpersonal interaction with faculty, supervisors, staff, patients, and peers, as well as how the student completes all clinical and didactic assignments within scheduled deadlines and in keeping with both the quality and standards established by the Dental Hygiene Program, School of Dental Medicine faculty, and the University of Pittsburgh faculty. Additionally, student compliance with all established policies and procedures will be evaluated when considering student promotion and board eligibility.

Grading

Each dental hygiene course instructor will clearly state his/her policy regarding grades and evaluation at the beginning of the course. A course syllabus will be distributed to all students at the first class meeting. All required courses are graded according to the University's letter grade system (see Grading and Records section of this bulletin). Elective courses beyond the required number may be taken with the permission of the program director. Student advising begins with the faculty responsible for the course. It is the student's responsibility to seek assistance from the faculty in any course in which the student has a grade lower than a C.

Bachelor of Science Degree Completion Program

Students who complete this program also have the option and are encouraged to complete a Bachelor of Science in dental hygiene as offered by the College of General Studies (see College of General Studies listing for information on BS degree completion option and additional dental hygiene courses which must be taken for the BS).

School of Dental Medicine/Dental Hygiene Program Faculty

Antonia Ambrosino, *Instructor*, RDH, BS, University of Pittsburgh

Gayle L. Ball, *Assistant Professor*, RDH, MA, Antioch University

Susan Ban, *Clinical Instructor*, RDH, BS, University of Pittsburgh

Jill Beach, *Instructor*, RDH, MSDH, West Virginia University

Victoria Folino Gallo, *Instructor*, RDH, MBA, Waynesburg University

Jeong-Seon Kim, *Clinical Instructor,* PhD, Washington State University

RDH, DMD, University of Pittsburgh

Elizabeth Lillios, *Clinical Instructor*, RDH, BS, University of Pittsburgh

Faith Mahan, *Instructor*, RDH, BS, University of Pittsburgh

Angelina E. Riccelli, *Associate Professor; Director, Dental Hygiene Program*, RDH, MS, University of Pittsburgh

Jacey Sheckler, *Instructor*, RDH, MSDH, University of Bridgeport

Alicia Wicks, *Instructor*, RDH, BS, Albright College

Program and Course Offerings

Department of Periodontics and Preventive Dentistry

Major

Associate of Science Degree in Dental Hygiene

Associate of Science Degree in Dental Hygiene Requirements

For a complete list of the required courses, please refer to the program curriculum. Upon successful completion of the course requirements, the student is eligible to take the Dental Hygiene National Board and the Commission on Dental Competency Assessment Examinations and apply for state licensure.

Program Curriculum

First Term

- DENHYG 1110 - BIOLOGICAL SCIENCES 1
- DENHYG 1112 - INTRODUCTION TO DENTAL HYGIENE
- DENHYG 1113 - INTRODUCTION TO DENTISTRY
- DENHYG 1114 - DENTAL ANATOMY
- DENHYG 1116 - DENTAL HYGIENE PRECLINIC
- DENHYG 1117 - CHEM, BIOCHEMISTRY & NUTRITION

Credits: 18

Second Term

- DENHYG 1241 - PRINCIPLES OF MICROBIOLOGY
- NUR 0032 - MICROBIOLOGY LABORATORY

School of Education

The School of Education's mission is to create and disseminate knowledge that improves teaching and learning and to develop and implement effective programs for the preparation of education professionals who will enhance both the practice and outcomes of education. For general information, see www.education.pitt.edu.

The School of Education is organized into four academic departments:

- Department of Administrative and Policy Studies
- Department of Health and Physical Activity
- Department of Instruction and Learning
- Department of Psychology in Education

Undergraduate degree programs are offered in the Department of Health and Physical Activity (HPA) and the Department of Psychology in Education (PSYED). HPA offers the baccalaureate program in health and physical activity with specializations in exercise science and wellness; PSYED offers the baccalaureate program in applied developmental psychology.

Teacher certification programs are offered in the Department of Instruction and Learning at the graduate level only. No teacher certification programs are offered in the other three departments.

Undergraduate students interested in obtaining teacher certification at the University of Pittsburgh after they have earned their baccalaureate degrees are encouraged to contact the pre-admissions advisors in the School of Education early in their undergraduate programs in order to obtain information about the teacher certification programs available and the requirements of those programs. Admission for teacher certification study requires that applicants have completed liberal studies distribution requirements in the humanities, natural sciences, and social sciences, as well as course work in an academic major field or content area. Additionally, applicants to the Professional Year (PY) Program are expected to have completed preprofessional education courses (e.g., courses emphasizing human development and learning, the study of schools and society, and an introduction to the teaching seminar in the intended certification area). The number of credits and specific courses required vary by type and area of certification. Note, however, that all applicants to both the PY Program and the Master of Arts in Teaching (MAT) Program must have at least 6 credits or the equivalent in college-level mathematics, at least 3 credits or the equivalent in college-level English composition, and at least 3 credits or the equivalent in college-level American and/or British literature. For admission to teacher certification programs in the Department of Instruction and Learning, all students must have taken and passed the Praxis I Series of Tests, which includes reading, mathematics, and writing. As a point of general information, most students admitted to the PY and MAT programs have undergraduate grade point averages (GPAs) of at least 3.0. Specific information may be obtained from the Office of Admissions and Enrollment Services, 5500 Wesley W. Posvar Hall, 412-648-2230, soeinfo@pitt.edu.

Admissions

The School of Education does not admit students to its undergraduate programs at the freshman level. Therefore, students must first be admitted to another school at the University of Pittsburgh or to another institution.

If an applicant to a School of Education undergraduate program is currently a University of Pittsburgh student, the applicant should contact the dean's office of the school to which the applicant has been admitted and request an Undergraduate Academic Program Change form. After completion of this form, all records will be transferred to the School of Education, Office of Admissions and Enrollment Services, 5500 Wesley W. Posvar Hall, for review.

If an applicant to a School of Education undergraduate program is transferring from another institution, the applicant should contact the Office of Admissions and Financial Aid, Alumni Hall, for a Transfer Application. (See Transfer Student Admissions section of this bulletin for more information.)

To be admitted into a Minor program in the School of Education a student must do the following:

- Be enrolled in an undergraduate program at the University of Pittsburgh.
- Complete a School of Education Admissions Application for the selected academic minor.

Advising

Each student admitted to an undergraduate program in the School of Education is assigned an advisor.

Dean's List

Early each term, students whose grades in the previous grading period indicate outstanding achievement are recognized in the Dean's List.

Full-time students (those enrolled in 12 or more credits) who earned 12 credits in the preceding term (not including courses taken on the Satisfactory/Audit option) with a term GPA of at least 3.50 and no grade lower than a C are placed on the Dean's List.

Part-time students (those enrolled in fewer than 12 credits) who have earned 12 credits in the SOE in previous terms (not including courses taken on the Satisfactory/Audit option) with a QPA of at least 3.50 and no grade lower than a C are placed on the Dean's List.

Part-time students are evaluated for Dean's List recognition by determining if 12 credits of letter-graded coursework have been completed since the last Dean's List recognition. If 12 credits have been completed, the GPA for the terms in which the last 12 credits were completed is used to assess the Dean's List eligibility.

Degree Requirements

The undergraduate degree in the School of Education requires the satisfactory completion of a minimum of 120 credits of approved undergraduate study. Undergraduate degrees are conferred only on those students who have completed all courses required for the degree with a GPA of at least 2.50.

Students in the School of Education must complete at least 60 credits in courses offered at the University of Pittsburgh. They must be enrolled in the School of Education during the term the degree is awarded. Students who begin their study at the regional campuses must apply to relocate to the Pittsburgh campus for at least the last 60 credits.

Probation and Dismissal

All students enrolled in undergraduate programs in the School of Education are required to maintain a grade point average (GPA) of at least 2.50. The cumulative GPA is based on all course work taken after enrollment at the University of Pittsburgh. A student is automatically placed on academic probation when the cumulative GPA, exclusive of transfer credits, falls below 2.50.

Only letter grades with GPA values will be used to compute and determine academic probation status. While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.00 GPA in 9 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate study after two terms on probation if there is no improvement in the quality of their work. A student placed on academic probation status more than once is also required to terminate study. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Admissions

Specific requirements for admission to the baccalaureate program in movement science are as follows:

- An application after approximately 45 credits have been completed: these credits should have been taken in courses that meet the general liberal arts and science requirement of the exercise science curriculum;
- A minimum GPA of 2.80 in the natural sciences;
- A demonstration of appropriate health-fitness behaviors as a statement of commitment to the basic philosophy of movement science;
- A statement of career goals and a self-evaluation; and
- Three letters of recommendation and possibly an interview.

Major

Health and Physical Activity - Exercise Science Specialization, BSE

Health and Physical Activity

The baccalaureate program in health and physical activity leads to the BS degree and provides specializations in exercise science and wellness. The exercise science specialization is offered for students interested in the study of human movement, independent of its implications for teaching physical education in traditional elementary and secondary school settings. Students are prepared for careers as health-related physical fitness specialists interested in working with adult populations in community, corporate, and private fitness centers. Also, this specialization provides basic academic and clinical studies for students wishing to pursue graduate work in exercise science.

The wellness specialization is offered for undergraduates interested in corporate wellness, exercise leadership and programming, public health, and coordination of health-fitness and wellness programs. Students are provided the opportunity for professional focus in one of four areas: aquatics, fitness, aerobics, or aerobics/fitness. This specialization provides appropriate mechanisms to meet the criteria for various professional certifications in this fastgrowing and competitive field. The wellness specialization provides basic academic and clinical studies for students wishing to pursue graduate work in physical activity or the public health domain.

Health and Physical Activity Curriculum

All students in health and physical activity complete 50-52 credits of courses in liberal arts and sciences, distributed as follows:

- Communication skills (9 credits)
- Quantitative reasoning (6-7 credits)
- Humanities (9 credits)
- Sciences (17-18 credits)
- History, social science, and public policy issues (9 credits)

In addition, all students in health and physical activity complete the following core of 67-75 credits:

- Biophysical foundations (19 credits)
- Behavioral and sociocultural foundations (3 credits)
- Research methods and practicum (3-5 credits)
- Health and wellness foundations (7-9 credits)
- Natural Science Electives (13-16 credits)
- Exercise Science Foundations (22-23 credits)

All students in wellness specialization complete 58 credits of courses in liberal arts and sciences, distributed as follows:

- Communication skills (9 credits)
- Quantitative reasoning (9 credits)

Each specialization requires a clinical/field experience and a directed research or health and fitness practicum. These requirements are completed under the direct supervision of a faculty member and may occur in a variety of settings (e.g., health clubs and hospitals).

PHYSICAL ACTIVITY CORE (32-34 CREDITS)

Biophysical Foundations (19 credits)

- HPA 1033 - HUMAN PHYSIOLOGY
- HPA 1011 - APPLIED HUMAN ANATOMY
- HPA 1012 - APPLIED HUMAN ANATOMY LAB
- HPA 1042 - PHYSIOLOGY OF EXERCISE
- HPA 1485 - NUTRITION AND HEALTH
- HPA 1044 - BIOMECHANICS
- HPA 1487 - CHRONIC DISEASE AND OBESITY

Behavioral & Sociocultural Foundations (3 credits)

- HPA 1486 - BEHAVIOR CHANGE STRATEGIES

Research Methods and Practicum (3-5 credits)

- HPA 1031 - RESEARCH IN SPORTS SCIENCE
- HPA 1045 - DIRECTED RESEARCH PRACTICUM

Health and Wellness Foundations (7 credits)

- HPA 0474 - LIFETIME ACTIVITIES 1
- HPA 0475 - LIFETIME ACTIVITES 2
- HPA 0196 - FIRST AID AND CPR
- HPA 1995 - SPECIAL TOPICS

EXERCISE SCIENCE CORE (37-41 credits)

Natural Science Electives (13-16 credits)

- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LAB 2
- CHEM 0120 - GENERAL CHEMISTRY 2

Exercise Science Foundations (22-23 credits)

- HPA 1233 - PRIN OF STRENGTH & CONDITNING
- HPA 1224 - FITNESS ASSMNT & EXRCS PRESCRP
- HPA 1226 - ASSMNT & PRESCRP FOR SP POPLTN
- HPA 1035 - EXERCISE SCIENCE SEMINAR 2
- HPA 1996 - CLINICAL INTERNSHIP
- HPA 1170 - HEALTH FITNESS PRACTICUM

Instructor Courses (2 credits) (Choose 2)

- HPA 1171 - RESISTANCE TRAINING INSTRUCTOR
- HPA 1172 - GROUP FITNESS INSTRUCTOR
- HPA 1173 - AEROBICS INSTRUCTOR
- HPA 1174 - YOGA AND PILATES INSTRUCTOR
- HPA 0497 - WATER SAFETY INSTRUCTOR

Health and Physical Activity - Wellness Specialization, BSE

Health and Physical Activity

The baccalaureate program in health and physical activity leads to the BS degree and provides specializations in exercise science and wellness. The exercise science specialization is offered for students interested in the study of human movement, independent of its implications for teaching physical education in traditional elementary and secondary school settings. Students are prepared for careers as health-related physical fitness

specialists interested in working with adult populations in community, corporate, and private fitness centers. Also, this specialization provides basic academic and clinical studies for students wishing to pursue graduate work in exercise science.

The wellness specialization is offered for undergraduates interested in corporate wellness, exercise leadership and programming, public health, and coordination of health-fitness and wellness programs. Students are provided the opportunity for professional focus in one of four areas: aquatics, fitness, aerobics, or aerobics/fitness. This specialization provides appropriate mechanisms to meet the criteria for various professional certifications in this fastgrowing and competitive field. The wellness specialization provides basic academic and clinical studies for students wishing to pursue graduate work in physical activity or the public health domain.

Health and Physical Activity Curriculum

All students in health and physical activity complete 46 credits of courses in liberal arts and sciences, distributed as follows:

- Communication skills (9 credits)
- Quantitative reasoning (6 credits)
- Humanities (9 credits)
- Sciences (13 credits)
- History, social science, and public policy issues (9 credits)

In addition, all students in health and physical activity complete the following core of 69-71 credits:

- Biophysical foundations (27 credits)
- Behavioral and sociocultural foundations (3 credits)
- Research methods and practicum (18 credits)
- Health and wellness foundations (5-7 credits)
- Wellness Specialization Option (16 credits)

All students in wellness specialization complete 58 credits of courses in liberal arts and sciences, distributed as follows:

- Communication skills (9 credits)
- Quantitative reasoning (9 credits)

Each specialization requires a clinical/field experience and a directed research practicum. These requirements are completed under the direct supervision of a faculty member and may occur in a variety of settings (e.g., health clubs and hospitals).

HEALTH AND PHYSICAL ACTIVITY (58 CREDITS)

Biophysical Foundations (27 credits)

- HPA 1033 - HUMAN PHYSIOLOGY
- HPA 1011 - APPLIED HUMAN ANATOMY
- HPA 1012 - APPLIED HUMAN ANATOMY LAB
- HPA 1224 - FITNESS ASSMNT & EXRCS PRESCRP
- HPA 1226 - ASSMNT & PRESCRP FOR SP POPLTN
- HPA 1485 - NUTRITION AND HEALTH
- HPA 1044 - BIOMECHANICS

- HPA 1233 - PRIN OF STRENGTH & CONDITNING

Behavioral & Sociocultural Foundations (3 credits)

- HPA 1486 - BEHAVIOR CHANGE STRATEGIES

Research Methods and Practicum (18 credits)

- HPA 1031 - RESEARCH IN SPORTS SCIENCE
- HPA 1035 - EXERCISE SCIENCE SEMINAR 2
- HPA 1996 - CLINICAL INTERNSHIP
- HPA 1170 - HEALTH FITNESS PRACTICUM

Health and Wellness Foundations (5-7 credits)

- HPA 1995 - SPECIAL TOPICS
- HPA 0474 - LIFETIME ACTIVITIES 1
- HPA 0475 - LIFETIME ACTIVITES 2
- HPA 0196 - FIRST AID AND CPR

WELLNESS OPTIONS (Students must choose ONE OF FOUR OPTIONS)

AQUATICS (16 credit minimum)

- HPA 0497 - WATER SAFETY INSTRUCTOR
- HPA 1241 - TEACHING EXPERIENCE 1
- HPA 1242 - TEACHING EXPERIENCE 2
- HPA 1211 - ATHLETIC INJURY PREVENTION
- HPA 1212 - ATHLETIC INJURY PREVENTION LAB
- HPA 1998 - DIRECTED STUDY
- PEDC 0026 - AQUATIC CONDITIONING
- PEDC 0133 - LIFE GUARDING 1
- PEDC 0158 - WEIGHT TRAINING 1
- PEDC 0194 - SPORTS CONDITIONING
- PEDC 0211 - WATER AEROBICS 1
- PEDC 0242 - AMER RED CROS LIFEGUARD INSTRC
- PEDC 0246 - POOL OPERATIONS/EVENT MGMNT

FITNESS (16 credit minimum)

- HPA 1211 - ATHLETIC INJURY PREVENTION
- HPA 1212 - ATHLETIC INJURY PREVENTION LAB
- HPA 1171 - RESISTANCE TRAINING INSTRUCTOR
- HPA 1172 - GROUP FITNESS INSTRUCTOR
- HPA 1173 - AEROBICS INSTRUCTOR
- HPA 1174 - YOGA AND PILATES INSTRUCTOR
- PEDC 0001 - BEGINNING SWIMMING
- PEDC 0002 - INTERMEDIATE SWIMMING
- PEDC 0025 - AEROBICS-CROSS COUNTRY RUNNING
- PEDC 0026 - AQUATIC CONDITIONING
- PEDC 0158 - WEIGHT TRAINING 1
- PEDC 0171 - FITNESS KICK BOXING
- PEDC 0194 - SPORTS CONDITIONING
- PEDC 0206 - BODY SCULPTING 1
- PEDC 0207 - PILATES
- PEDC 0262 - YOGA 1

AEROBICS (16 credit minimum)

- HPA 1211 - ATHLETIC INJURY PREVENTION
- HPA 1212 - ATHLETIC INJURY PREVENTION LAB
- HPA 1171 - RESISTANCE TRAINING INSTRUCTOR
- HPA 1172 - GROUP FITNESS INSTRUCTOR
- HPA 1173 - AEROBICS INSTRUCTOR
- HPA 1174 - YOGA AND PILATES INSTRUCTOR
- PEDC 0171 - FITNESS KICK BOXING
- PEDC 0197 - BOOTCAMP FITNESS
- PEDC 0206 - BODY SCULPTING 1
- PEDC 0207 - PILATES

- HPA 0473 - DANCE PEDAGOGY

Minor

Applied Fitness Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

APPLIED FITNESS REQUIRED COURSES (13 credits)

- HPA 1011 - APPLIED HUMAN ANATOMY
- HPA 1012 - APPLIED HUMAN ANATOMY LAB
- HPA 1033 - HUMAN PHYSIOLOGY
- HPA 1042 - PHYSIOLOGY OF EXERCISE
- HPA 1224 - FITNESS ASSMNT & EXRCS PRESCRP

APPLIED FITNESS MINOR FOUNDATION COURSES (1 CREDIT) Select 1 of the following:

- HPA 0474 - LIFETIME ACTIVITIES 1
- HPA 0475 - LIFETIME ACTIVITES 2

APPLIED FITNESS MINOR INSTRUCTOR COURSES (2 CREDITS) Select 2 of the following:

- HPA 1171 - RESISTANCE TRAINING INSTRUCTOR
- HPA 1172 - GROUP FITNESS INSTRUCTOR
- HPA 1173 - AEROBICS INSTRUCTOR
- HPA 1174 - YOGA AND PILATES INSTRUCTOR

APPLIED FITNESS MINOR PRACTICUM COURSE (1 CREDIT)

- HPA 1170 - HEALTH FITNESS PRACTICUM

Aquatics Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

AQUATICS REQUIRED COURSES (15 CREDITS)

- HPA 0196 - FIRST AID AND CPR
- HPA 0497 - WATER SAFETY INSTRUCTOR
- HPA 1211 - ATHLETIC INJURY PREVENTION
- HPA 1212 - ATHLETIC INJURY PREVENTION LAB
- HPA 1241 - TEACHING EXPERIENCE 1
- HPA 1242 - TEACHING EXPERIENCE 2
- HPA 1300 - NUTRITION IN EXERCISE & SPORT
- PEDC 0133 - LIFE GUARDING 1
- PEDC 0242 - AMER RED CROS LIFEGUARD INSTRC
- PEDC 0246 - POOL OPERATIONS/EVENT MGMNT

Additional Aquatic Courses (3 CREDITS) Select 3 of the following:

- PEDC 0001 - BEGINNING SWIMMING
- PEDC 0002 - INTERMEDIATE SWIMMING
- PEDC 0026 - AQUATIC CONDITIONING
- PEDC 0158 - WEIGHT TRAINING 1
- PEDC 0193 - PERSONAL FITNESS
- PEDC 0194 - SPORTS CONDITIONING
- PEDC 0211 - WATER AEROBICS 1

Dance Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

DANCE COURSES

- HPA 0060 - INTRODUCTION TO DANCE
- HPA 0473 - DANCE PEDAGOGY
- HPA 1241 - TEACHING EXPERIENCE 1
- HPA 1242 - TEACHING EXPERIENCE 2
- HPA 0033 - BALLET 1
- HPA 0041 - JAZZ 1
- HPA 0031 - MODERN DANCE 1
- HPA 0044 - DANCE PRODUCTION
- HPA 0040 - CHOREOGRAPHY
- HPA 0244 - DANCE PRODUCTION 2

Additional Dance Courses (Choose 3.0 credits from the following 4 courses)

- HPA 0196 - FIRST AID AND CPR
- HPA 0032 - MODERN DANCE 2
- HPA 0034 - BALLET 2
- HPA 0042 - JAZZ 2

Exercise Science Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final

transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

EXERCISE SCIENCE MINOR REQUIRED COURSES (13 CREDITS)

- HPA 1011 - APPLIED HUMAN ANATOMY
- HPA 1012 - APPLIED HUMAN ANATOMY LAB
- HPA 1033 - HUMAN PHYSIOLOGY
- HPA 1042 - PHYSIOLOGY OF EXERCISE
- HPA 1224 - FITNESS ASSMNT & EXRCS PRESCRP

EXERCISE SCIENCE MINOR ELECTIVE COURSES (5-6 CREDITS) Choose from the following courses:

- HPA 1044 - BIOMECHANICS
- HPA 1233 - PRIN OF STRENGTH & CONDITNING
- HPA 1226 - ASSMNT & PRESCRP FOR SP POPLTN
- HPA 1487 - CHRONIC DISEASE AND OBESITY

Minor

Secondary Education Minor

To help undergraduate students better prepare for graduate work in education, the School of Education has created a 15-credit teacher education minor. This will allow students who plan to enter the Masters of Arts in Teaching (MAT), Professional Year (PY), or the Masters in Special Education with Academic Instructional Certification (MOSAIC) programs the opportunity to make progress on the prerequisite education courses required for those programs and earn an added credential on their official transcripts. The minor provides the undergraduate students with the admission requirement of satisfactorily completing 30 hours of site work in secondary schools by their engagement in field experiences embedded within the courses in the minor.

Completion of the teacher education minor does not automatically guarantee admission into the MAT, PY, or MOSAIC programs, nor does it fulfill all necessary prerequisites.

Information on the minor can be found on the Department of Instruction and Learning website.

Curriculum

Students must complete 5 courses (15 credits) for the minor. IL 1580 is a required prerequisite for the MAT, PY, and MOSAIC programs. IL 1257 is a required prerequisite for MOSAIC only. MAT/PY candidates should take an approved elective in place of IL 1257 . The list of approved courses is below:

- IL 1580 - FOUNDATIONS OF SPECIAL EDUC (required in-school observations)
- IL 1257 - TEACHING ENGLISH LANG LEARNERS
- IL 1701 - ERLY FIELD EXPERNC-SECONDARY - Secondary (required in-school observation)
- IL 1704 - CURRENT ISSUES SECONDARY EDUC
- EDUC 1011 - CULTURALLY RESPONSIVE PEDAGOGY

Education Electives

- ADMPS 1001 - SOCIAL FOUNDATIONS OF EDUCATN
- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
- IL 1505 - AUTISM: CHARACT AND INTERVNTN

Admission Requirements

ADP - Traditional Program

The program in applied developmental psychology uses a rolling admissions procedure which assures that all completed admission applications will be given regular review. Priority for admissions and financial aid decisions, however, will be given to those applications that are sent in by March 15, the recommended deadline for fall term admission.

In reviewing applications for admission, the Admissions Committee considers the following factors:

- Academic skill as evident on the student's transcript. The minimum acceptable GPA is 2.50;
- Documented evidence of experience and ability to work with children (experience may include volunteer work or employment);
- References, preferably from professionals familiar with the student's maturity, work habits, academic ability, and experience with children/youth; and

- Completion of 60 credits before the first term of enrollment in the program, including the following prerequisite courses, all of which should be taken for a letter grade:
    - English composition (3 credits);
    - Developmental psychology or equivalent (3 credits); and
    - Other courses broadly distributed in the humanities, social sciences, and natural sciences.

Credits awarded from the College Level Examination Program (CLEP) by the College of General Studies are acceptable for inclusion in the 60 credits.

The program welcomes applications from junior and community college students and from students at other colleges and universities, including students from other countries. These students should see the Transfer Student Admissions or International Student Admissions sections of this bulletin for further details on applying. Students from other academic backgrounds should consult the program coordinator for evaluation.

ADP - CASE Teacher Certification Program

The program in ADP - CASE Teacher Certification admits student cohorts to begin the program each fall term. Applicants are reviewed in the spring of the term before the program begins. The application deadline is March 15.

In reviewing applications for admission, the Admissions Committee considers the following factors:

- Academic skill as evident on the student's transcript. The minimum acceptable 3.25;
- Documented evidence of experience and ability to work with children (experience may include volunteer work or employment);
- Three letters of reference, preferably from professionals familiar with the student's maturity, work habits, academic ability, and experience with children/youth; and
- Completion of 61 credits of CASE prerequisites before the first term of enrollment in the program. Prerequisite courses can be found on the ADP-CASE website.

The program welcomes applications from junior college and community college students and students at other colleges and universities, including students from other countries. These students should see the Transfer Student Admissions or International Student Admissions sections of this bulletin for further details on applying. Students from other academic backgrounds should consult the program coordinator for evaluation of prerequisites.

Major

Applied Developmental Psychology, BS

The undergraduate major in Applied Developmental Psychology (ADP) develops the skills and knowledge needed for professional work in child and youth care, education and other related human service fields. ADP also prepares students for graduate school in such fields as education, psychology, and social work. Coursework includes developmental theory and research covering birth through early adulthood, professional issues, family dynamics, cultural distinctions, disabilities, psychopathology, curriculum and activity planning, practice skills, and supervision.

The undergraduate major in Applied Developmental Psychology (ADP) includes three distinct areas of concentration that lead to a BS degree:

- ADP Traditional
- ADP Practitioner
- ADP CASE (Combined Accelerated Studies in Education)

ADP - Traditional Program

The undergraduate major in Applied Developmental Psychology (ADP) emphasizes developing the skills necessary for implementing and evaluating effective programs for children, youth, and families. Course work includes the study of professional issues, program design and evaluation, counseling skills, and qualitative research methods. The program allows for a focus on Child Life hospital work, group care, family support and intervention, administration, play intervention and therapy. Successful completion of the program leads to the Bachelor of Science degree.

The ADP Bachelor of Science program is listed as an academic program to prepare Child Life Specialists by the Child Life Council.

The curriculum is organized into four terms of upper-division (junior and senior year) study. Applications for admission should be submitted during the sophomore year.

- PSYED 1002 - DVLP: CONCPTN THRGH ERLY CHLHD
- PSYED 1016 - DEVELP CURRICULUM & ACTIVITIES
- PSYED 1025 - PROFESSIONAL SEMINAR 1
- PSYED 1007 - METHDS/EVIDENCE BASED-PRACTICE
- PSYED 1012 - DEVELOPMENTAL DISABILITIES
- PSYED 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY
- PSYED 1024 - FAMILY DYNAMICS
- PSYED 1027 - CHILD AND YOUTH DEVELOPMENT 2
- PSYED 1028 - DEVELOPMNTAL PRACTC SEMINAR 1
- PSYED 1029 - DEVELOPMNTAL PRACTC SEMINAR 2
- PSYED 1031 - SENIOR PROJECT
- PSYED 1036 - DEVELOPMNTL MEANG CULTL DISTN
- PSYED 1042 - CHILD & YOUTH WORK PRACTICE 1
- PSYED 1043 - CHILD & YOUTH WORK PRACTICE 2
- PSYED 1050 - SUPRVSN ADM CHLD YTH WRK SETNG

Major Requirements

The curriculum is organized into four terms of upper-division (junior- and senior-year) study. Study encompasses developmental theory and research from birth through adolescence, professional issues, family dynamics, cultural distinction, handicapping conditions, psychopathology, curriculum and activity planning, practice skills, and an introduction to management. Students spend 300 to 600 hours of internship in the senior year in programs for children, youth, and families, including those with special needs. Flexibility in the curriculum is provided through electives, internship focus, and class project topic selection.

To graduate, students are required to take a minimum of 120 credits, 48 of which must be taken in applied developmental psychology courses. All of these courses must be completed with a grade of C- or better, and students must maintain a GPA of 2.50 in the major. Students must also perform successfully in the internship, according to prevailing standards, in order to remain in good standing in the program.

- PSYED 1042 - CHILD & YOUTH WORK PRACTICE 1
- PSYED 1043 - CHILD & YOUTH WORK PRACTICE 2
- PSYED 1027 - CHILD AND YOUTH DEVELOPMENT 2
- PSYED 1002 - DVLP: CONCPTN THRGH ERLY CHLHD
- PSYED 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY
- PSYED 1016 - DEVELP CURRICULUM & ACTIVITIES
- PSYED 1012 - DEVELOPMENTAL DISABILITIES
- PSYED 1028 - DEVELOPMNTAL PRACTC SEMINAR 1
- PSYED 1029 - DEVELOPMNTAL PRACTC SEMINAR 2
- PSYED 1036 - DEVELOPMNTL MEANG CULTL DISTN
- PSYED 1024 - FAMILY DYNAMICS
- PSYED 1007 - METHDS/EVIDENCE BASED-PRACTICE
- PSYED 1025 - PROFESSIONAL SEMINAR 1
- PSYED 1031 - SENIOR PROJECT
- PSYED 1050 - SUPRVSN ADM CHLD YTH WRK SETNG

Note:

Elective courses and directed study can also be arranged.

ADP - CASE Teacher Certification Program

The undergraduate major in Applied Developmental Psychology (ADP) also includes a Teacher Certification program. This program emphasizes developing the skills necessary for becoming a highly effective teacher of young children in grades PK-4 General Education and PK-8 Special Education. Course work includes the study of professional issues, program design and evaluation, teaching methodology and best practices in using culturally and linguistically relevant pedagogy. Successful completion of the program leads to the Bachelor of Science degree. CASE students then continue into the graduate year to complete coursework and student teaching that leads to the PK-4 Early Childhood and the PK -8 Special Education teaching certification in Pennsylvania.

The curriculum is organized into four terms of upper-division (junior and senior year) undergraduate study. Three additional terms of graduate study allows students to finish with two degrees and two teacher certifications in five years. Applications for admission should be submitted during the sophomore year.

- PSYED 1002 - DVLP: CONCPTN THRGH ERLY CHLHD
- PSYED 1007 - METHDS/EVIDENCE BASED-PRACTICE
- PSYED 1012 - DEVELOPMENTAL DISABILITIES
- PSYED 1016 - DEVELP CURRICULUM & ACTIVITIES
- PSYED 1025 - PROFESSIONAL SEMINAR 1
- PSYED 1036 - DEVELOPMNTL MEANG CULTL DISTN
- PSYED 1050 - SUPRVSN ADM CHLD YTH WRK SETNG
- IL 1042 - LANGUAGE & LIT FOR YOUNG CHILD
- IL 1045 - YOUNG ENGLISH LANGUAGE LEARNRS
- IL 1047 - INTEGRATED CURRCLM PRE-K - 4
- IL 1049 - SEM RELTD PRE-STDNT TCH PRE-K
- IL 1208 - RDG/WRIT METHS 1:PREK-GRADE 1
- IL 1209 - RDG/WRIT METHODS 2: GRADES 2-4
- IL 1268 - SOCIAL STUDIES METHS PRE-K-4
- IL 1270 - INTEGRTG ART & MUSC ELEM CLSSR
- IL 1433 - MATH/SCI INSTC YOUNG LRNRS 1
- IL 1434 - MATH AND SCIENCE METHODS 2
- IL 1562 - ASSMNT: YOUNG CHILD W/DISABS
- IL 1580 - FOUNDATIONS OF SPECIAL EDUC
- IL 1800 - PRE-STUDENT TEACHING PRE-K
- IL 1563 - INCLUSION PRE-K
- IL 1850 - PRESCH/PRIM LIFE SKILLS PRAC
- IL 1852 - SEM PRESCH/PRIM LIFE SKILLS

Major Requirements

The curriculum is organized into four terms of upper-division (junior- and senior-year) undergraduate study and three additional terms of graduate study. Study encompasses developmental theory and research from birth through adolescence, professional issues, family dynamics, cultural distinction, psychopathology, curriculum and activity planning, practice skills, and an introduction to management. Students spend 4 terms in student teaching placements during the senior and graduate years. To graduate with the B.S. in ADP-CASE, students are required to take a minimum of 127 credits. All courses must be completed with a grade of C- or better, and students must maintain a GPA of 3.0. Students must also perform successfully in their practicum and student teaching placements according to University of Pittsburgh and Pennsylvania Department of Education standards in order to remain in good standing in the program.

- PSYED 1002 - DVLP: CONCPTN THRGH ERLY CHLHD
- PSYED 1036 - DEVELOPMNTL MEANG CULTL DISTN
- IL 1042 - LANGUAGE & LIT FOR YOUNG CHILD
- IL 1045 - YOUNG ENGLISH LANGUAGE LEARNRS
- IL 1208 - RDG/WRIT METHS 1:PREK-GRADE 1
- IL 1562 - ASSMNT: YOUNG CHILD W/DISABS
- PSYED 1005 - TEACHING GLOBALLY AND LOCALLY IN A DIVERSE WORLD
- PSYED 1016 - DEVELP CURRICULUM & ACTIVITIES

- PSYED 1025 - PROFESSIONAL SEMINAR 1
- PSYED 1050 - SUPRVSN ADM CHLD YTH WRK SETNG

Graduate level coursework can be found on the ADP-CASE curriculum website.

Institute for Practice & Research in Education

Swanson School of Engineering

The Swanson School of Engineering's undergraduate programs prepare students for entrance into a diverse spectrum of careers, providing both a strong, fundamental engineering education and a thorough understanding of the broader aspects of society. Students have an opportunity to participate in the highly successful Cooperative Engineering Education Program, an increasing number of study abroad opportunities, joint programs with the University Honors College, and a number of certificate programs. Students also have the option of earning a minor or a dual degree from various Dietrich School of Arts and Sciences programs: minors may also be earned from the other engineering programs. The curricula provide sufficient flexibility to allow graduates to pursue careers in industry, government, or education, including programs in medicine, law, or business.

Full-time Bachelor of Science in Engineering degree programs are offered on the Pittsburgh campus in the following engineering disciplines: bioengineering, chemical, civil, computer, electrical, engineering science, industrial, materials science, and mechanical. Special interdisciplinary programs can be structured based upon individual student interest and ability through the engineering science program. The Cooperative Engineering Education Program, which alternates terms of relevant work experience with course work, is available for students in all programs; approximately half of the graduating seniors complete at least three co-op rotations. There are also certificate programs in nuclear engineering, energy resource utilization, product realization, supply chain management, mining engineering, engineering for humanities, international engineering studies, civil engineering and architectural studies, and sustainable engineering.

Application Procedures

The Swanson School of Engineering works closely with the University of Pittsburgh's Office of Admissions and Financial Aid (OAFA). Ultimately, all admissions decisions take place through OAFA following the procedures detailed below:

First Year Engineering Applicants

All admissions to the Swanson School of Engineering are determined by the University's Office of Admissions and Financial Aid. (Please see Pittsburgh Campus Freshman Admissions section of this bulletin for details.) Approximately 560 first year students enter the Swanson School of Engineering each fall term.

Transfer Students from Other Colleges and Universities

The Swanson School of Engineering admits applications from transfer students. Currently, approximately a third of the students receiving the BSE degree transferred into the school. Transfer applicants are evaluated according to their academic record and potential for completing the particular engineering program, and conditional upon space available in the program of choice. An applicant for transfer to the Swanson School of Engineering from another college or university should request a transfer application from the Office of Admissions and Financial Aid.

Contact the Freshman Engineering Program at 412-624-9825 or see the transfer engineering students' Web site http://www.engineering.pitt.edu/First-Year/First Year/Transfer-Students/External-Transfer-Students for more information on transfer procedures.

A transfer applicant from a two-year or four-year college should have a grade point average (GPA) of at least a 3.00 (for courses that satisfy Swanson School of Engineering's first-year requirements) on a 4.00 scale at the institution transferring from to be considered for admissions. Students interested in the Bioengineering program need a minimum of 3.5 GPA. Students must also have completed two semesters of Calculus, Calculus-based Physics and Chemistry for consideration. In general transfer students will only be accepted for the upcoming Fall Term; in only special cases will transfers be accepted for the Spring or Summer terms. For more information, visit http://www.engineering.pitt.edu/.

All transfer applicants are required to provide SAT I critical reading and mathematics scores and high school academic records. Advanced standing credits will be granted for college course work at another accredited institution depending on grades received and on the relevance of the courses to the applicant's proposed program in the Swanson School of Engineering. Only courses in which the applicant received at least a C (2.00 on a 4.00 scale) will be considered for transfer and then only if the courses are an integral part of the proposed degree program.

Transfer Students from another University of Pittsburgh Oakland Campus School

Most transfer applicants from other Pittsburgh campus units to the Swanson School of Engineering come from either the Dietrich College of Arts and Sciences (DSAS) or the College of General Studies (CGS), although students from any of the University's other schools are eligible for transfer if they meet the Swanson School of Engineering's requirements.

An applicant for transfer from an Oakland campus school must have a minimum 3.00 cumulative GPA (3.50 for Bioengineering) and must have completed no fewer than 7 of the 8 Freshman Engineering courses (MATH 0220 and 0230 - Analytic Geometry and Calculus 1 and 2; PHYS 0174 and 0175 - Physics for Science and Engineering 1 and 2; CHEM 0110 and 0120 - General Chemistry 1 and 2; and ENGR 0015 and 0016 Introduction to Engineering Analysis and Introduction to Engineering Computing) to be considered for admission. Completion of all transfer minimum requirements does not guarantee transfer, as space limitations within each degree program will be considered. For additional information, see the transfer engineering students' Web site at http://engineering.pitt.edu/First-Year/First-Year/Transfer-Students/Internal-Transfer-Students/.

The GPA for students transferring into the Swanson School of Engineering from another school or campus within the University will be recalculated in accordance with the Swanson School of Engineering's policy.

Regional Campus Students

Request forms for relocation from the pre-engineering programs at the Bradford, Greensburg, or Titusville campuses or the Engineering Technology Program at the Johnstown campus are available at each regional campus. Pre-engineering students who have a grade point average of 3.0 or higher (with the exception of bioengineering, which requires a 3.50 GPA) in the required engineering curricula are able to relocate pending departmental approval. Completion of all transfer minimum requirements does not guarantee transfer, as space limitations within each major will be considered. Students from the Johnstown campus in Chemical, Civil, Computer, Electrical and Mechanical must complete the first-two years of their degree program before applying to transfer to the Oakland campus. Students wishing to transfer into one of the degree programs not available at the Johnstown campus may apply for transfer upon completion of the first year. See the Transfer within University Schools and Regional Campuses section of this bulletin. For more information see the regional campus transfer Web site at: http://engineering.pitt.edu/First-Year/First-Year/Transfer-Students/Internal-Transfer-Students/

Academic Standing

To be considered in good academic standing, a student's cumulative grade point average (GPA) must be at least 2.00 and the student must be making satisfactory progress toward earning an engineering degree. A student who is not in good academic standing will be placed on probation and may be subject to suspension or dismissal if his or her cumulative GPA remains below a 2.00 for two consecutive terms (with the exception of freshman students). Every engineering student's academic record is reviewed at the end of each term to certify whether or not the student is in good academic standing. Students will be notified by letter if they are no longer in good academic standing and are on probation.

Students in the Freshman Engineering Program (FEP) who enter in the fall term may be suspended or dismissed from the Swanson School of Engineering if they do not attain a cumulative GPA of 1.75 or greater by the end of the spring term and/or if they have not completed the first term of engineering courses.* Furthermore, FEP students with cumulative GPA's between 1.75 and 1.99 by the end of their first academic year who fail to obtain a cumulative GPA of 2.00 by the end of their third term are subject to suspension or dismissal. A similar timeline will apply to students who begin the FEP in the spring term.

After being suspended, students are not eligible to re-enroll for one calendar year, after which they are required to apply for reinstatement through the Swanson School of Engineering Office of Administration. Students returning from academic suspension are reinstated on academic probation and their academic performance will be reviewed after each subsequent term. If the student's cumulative GPA remains below 2.00 for two consecutive terms, he or she will be subject to dismissal. Dismissal is a final action. Dismissed students are not eligible at the University of Pittsburgh.

Advanced Standing for Courses Taken Outside the University

Students transferring into the Swanson School of Engineering from other college-level programs will have their academic records reviewed for advanced-standing credit only after they have been admitted and pay their tuition deposit. This determination will be made by the responsible academic department or program in accord with Swanson School of Engineering policy and criteria established by ABET, the engineering accrediting organization. In general, advanced standing for engineering or engineering science courses will be given only if the courses were taken from an ABET-accredited engineering program. Advanced standing for mathematics, science, humanities, and social sciences courses will be awarded to the extent that such courses match specific University of Pittsburgh Dietrich School of Arts and Sciences courses as required by the Swanson School of Engineering. In particular, humanities and social sciences courses must correspond to those on the Swanson School of Engineering's approved list of humanities and social sciences electives. Contact the Swanson School for information on these approved electives.

No more than 60 credits may be transferred from a two-year college. No more than 90 may be transferred from a four-year college. If 60 or more credits have been earned at a college or university, no transfer credit will be accepted for credits earned subsequently at a two-year school. The Swanson School of Engineering does not accept CLEP credit for course credits. For more information on Swanson School of Engineering transfer credit policies, please refer to http://engineering.pitt.edu/First-Year/First-Year/Transfer-Students/Swanson-School-of-Engineering-Transfer-Policies/

Credits for students transferring from a college that has a 3/2 program articulation agreement with the Swanson School of Engineering (see Combined Liberal Arts-Engineering 3/2 Program), a community college having an articulation agreement with the Swanson School of Engineering, or a pre-engineering program at a University of Pittsburgh regional campus will be accepted in accord with those agreements, University policy, and available space in the program of interest.

Students enrolled in the Swanson School of Engineering may take courses at other universities to satisfy graduation requirements only if the student's academic advisor or undergraduate coordinator has approved those courses in advance. Such courses must be taken at colleges or universities that offer full four-year degree programs. Engineering and engineering science courses must be taken at an ABET-approved engineering program. Students must earn a grade of C or higher for the course to be accepted for transfer credit. Students must arrange for their transcript to be sent to their undergraduate coordinator. As noted above, once a student is enrolled in the Swanson School of Engineering, he or she is no longer permitted to take courses at a two-year or community college for transfer credit.

Students may also earn advanced standing credit by taking Advanced Placement or International Baccalaureate classes in their high schools. Students who have their AP or IB scores sent to the University of Pittsburgh will have those scores evaluated by an academic advisor, who will determine their transferability. For a complete list of AP scores accepted by the Swanson School of Engineering, please see: http://engineering.pitt.edu/Admissions-Academics/Admissions/Undergraduate/AP-Courses/

Interdepartmental Transfers

A Swanson School of Engineering student whose academic record satisfies the minimum requirements for continued registration may apply for transfer from one engineering department or program to another. To initiate a change of departmental status, the student must complete a Program Change form, available at the Swanson School of Engineering Office of Administration. It is the prerogative of the department or program to which the student desires to transfer to approve or reject a change-of-status transfer request.

Reinstatement

An engineering student in good academic standing who has not attended the University of Pittsburgh for three consecutive terms and has attended no other institution in the intervening period will be considered for reinstatement after making application to the department chair or program director. If the student has attended another institution and completed more than 12 credits, the student must reapply through the University's Office of Admissions and Financial Aid in accordance with the procedure for transfer applicants from other colleges or universities.

A student who has withdrawn while on academic probation may be reinstated only by action of the appropriate faculty committee, typically based upon substantial evidence of a positive change in the student's attitude toward academic work. The student must initiate the request for reinstatement with the appropriate department chair.

Grading Policies

The following section details the Swanson School of Engineering's regulations regarding some of the grades that may appear on a student's transcript. (For a complete discussion of all grades and grading options, see the Grading and Records section of this bulletin.)

G Grade (Incomplete)

An instructor may give the G grade when a student is unable to complete the work of a course during the term because of extenuating personal circumstances.

To remove a G grade, a student is expected to complete the course requirements within the next term of registration or within the time specified by the instructor. The instructor of the course will complete a Grade Change Authorization form and send it to the Swanson School of Engineering Office of Administration for processing. If a G grade is not removed within one year, the instructor may change it to an F grade for the course.

S/NC Option

With the exception of undergraduate seminar courses, which are only offered satisfactory/no-credit (S/NC), the S/NC option cannot be used for any course that is used to meet graduation requirements. This restriction includes humanities/social science electives and other science/engineering electives. Freshmen may not elect to take courses under the S/NC option. Upper-class engineering students man elect to take courses that will not be used to meet graduation requirements as S/NC. Because S/NC courses are not considered in the calculation of the grade point average, the option is appropriate for students wishing to explore disciplines they might not otherwise pursue because of potential negative impact on the grade point average.

A student who wishes to take a course under the S/NC option should first consult his/her advisor to assure that the S/NC option is permissible. A student must register for and complete at least one course for a letter grade to be eligible for an S/NC option course in any term. To register for more than one S/NC option course per term, and a maximum of two, a student must register for 12 or more credits for letter grades.

Calculation of the Grade Point Average

Each credit carried for a letter grade is awarded quality points as noted under the Grading and Records section of this bulletin. A student's term grade point average (term GPA) is the total quality points earned for the term divided by the total credits assigned letter grades. The cumulative grade point average (cumulative GPA) is determined by dividing the total number of quality points by the total number of credits assigned letter grades. Only credits and quality points for courses taken at the University of Pittsburgh and that count toward the requirement for the BSE degree are used in the calculation of the GPA.

Repeating Courses

The Swanson School of Engineering permits a student to repeat required courses in which grades below C were received. A student may not repeat a course more than twice. If the course is repeated within one academic year following the original registration, the original credits and quality points of these repeated courses will not be included in the student's cumulative GPA. Keep in mind that any grade earned in the repeated course will be posted to the academic record even if it is lower than the original grade. Also note that a sequence course cannot be repeated and have the grade replaced if a succeeding course in that sequence has been taken (e.g., MATH 0220, 0230, and 0240 Analytic Geometry and Calculus 1, 2, and 3; PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2). The same course repeat rules will apply to transfer students from the Dietrich School of Arts and Sciences, the College of General Studies, and the regional campuses.

Honors Lists

At the end of each term, the academic records of all undergraduate degree students in the Swanson School of Engineering are reviewed to determine eligibility for the Term Honor List and the Dean's Honor List. Students who qualify for both honor lists will appear only on the Dean's Honor List.

Term Honor List

To be eligible for the Term Honor List, a student must

Earn a GPA of at least 3.25,
Complete a minimum of 15 credits of academic work for letter grades at the University of Pittsburgh, and
Complete a minimum of 6 credits of work for letter grades in the term of eligibility.

Dean's Honor List

To be eligible for the Dean's Honor List, a student must

Earn cumulative and term GPA's of 3.25 or higher,
Complete a minimum of 30 credits of academic work for letter grades at the University of Pittsburgh, and
Complete a minimum of 6 credits of work for letter grades in the term of eligibility.

Credits

In the Swanson School of Engineering, a credit or credit hour is one of the following:

One hour of lecture or recitation a week, requiring two hours of outside preparation
Two hours of laboratory a week, requiring one hour of outside preparation
Three hours of laboratory a week, requiring no outside preparation

Registration

Each student registers for future terms with the assistance of his or her academic advisor during registration periods specified by the Office of the University Registrar. A student who has registered for a course but has failed to satisfy the prerequisites for that course prior to the beginning of the term may not be permitted to continue attending class and must withdraw from the course if requested to do so. Freshman engineering students register for the fall term during the summer advising sessions. (See Registering for Classes for more information.)

Maximum Credit Registration

All full-time undergraduate engineering students are expected to register for a normal full term of academic courses (i.e., at least 12 credits). No student shall be allowed to register for more than 18 credits without specific written permission from his/her academic advisor and approval by the senior associate dean for academic affairs. Such permission is given only after a review of the student's academic record in order to verify that an overload is academically justifiable. All credits above 18 for undergraduates will be billed over and above the full-time tuition rate at the prevailing per-credit tuition charge.

Registration for Graduate Credit

A Swanson School of Engineering undergraduate student requiring fewer than 15 credits to complete the requirements for the baccalaureate degree and who intends to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate program. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate record.

Advanced Standing for Courses Taken Outside the University

Students transferring into the Swanson School of Engineering from other college-level programs will have their academic records reviewed for advanced-standing credit after they have been admitted and pay their tuition deposit. This determination is made by the responsible academic department or program in accord with Swanson School of Engineering policy and criteria established by ABET, the engineering accrediting organization. In general, advanced standing for engineering or engineering science courses will be given only if the courses were taken from an ABET-accredited engineering program. Advanced standing for mathematics, science, humanities, and social sciences courses will be awarded to the extent that such courses match specific University of Pittsburgh Arts and Sciences courses that are required by the Swanson School of Engineering. In particular, humanities and social sciences courses must correspond to those on the Swanson School of Engineering's approved list of humanities and social sciences electives. Contact the school for information on these approved electives.

No more than 60 credits may be transferred from a two-year college. No more than 90 may be transferred from a four-year college. If 60 or more credits have been earned at a college or university, no transfer credit will be granted for credits earned subsequently at a two-year school. The Swanson School of Engineering does not accept CLEP credit for course credits. For more information on Swanson School of Engineering transfer credit policies, please refer to http://www.engineering.pitt.edu/Freshman/Transfer_Students/SSOE_Transfer_Policies/

Credits for students transferring from a college maintaining a 3/2 program with the Swanson School of Engineering (see Combined Liberal Arts-Engineering 3/2 Program), a community college having an articulation agreement with the Swanson School of Engineering, or a pre-engineering program at a University of Pittsburgh regional campus will be accepted in accord with those agreements and University policy.

Students enrolled in the Swanson School of Engineering may take courses at other universities to satisfy graduation requirements only if the student's academic advisor or undergraduate coordinator has approved those courses in advance. Such courses must be taken at colleges or universities that offer full four-year degree programs. Engineering and engineering science courses must be taken at an ABET-approved engineering program. Students must earn a grade of C or higher for the course to be accepted for transfer credit. Students must arrange for their transcript to be sent to their undergraduate coordinator. Once a student is enrolled in the Swanson School of Engineering, he or she is no longer permitted to take courses at a two-year or community college for transfer credit.

Students may also earn advanced standing credit by taking Advanced Placement or International Baccalaureate classes in their high schools. Students who have their AP or IB scores sent to the University of Pittsburgh will have those scores evaluated by an academic advisor, who will determine their transferability. For a complete list of AP scores accepted by the Swanson School of Engineering, please see:
http://www.engineering.pitt.edu/freshman/advising/AP/

Special Academic Opportunities and Programs

Nuclear Engineering

Strong growth in the global demand for power is projected for the next half-century and beyond. This growth provides great opportunities for the nuclear industry, particularly companies located in southwestern Pennsylvania including Westinghouse Electric, First Energy and Bechtel Bettis. The undergraduate Certificate in Nuclear Engineering is a five-course sequence consisting of three nuclear engineering courses and two discipline

specific courses related to nuclear engineering from the various engineering departments. The certificate is open to all undergraduate engineering students in the Swanson School of Engineering and can be earned in conjunction with all nine of the School's BS engineering degrees. Qualified Arts and Science students may also elect to take the certificate.

The undergraduate Certificate in Nuclear Engineering targets competency gaps that exist in the following educational areas:

- Basic theoretical concepts of nuclear physics, radiation protection, reactor physics, reactor kinetics, fuel depletion and energy removal
- Tasks of the reactor thermal designer, nuclear designer and mechanical designer
- Interfaces among engineering disciplines involved with the design of a reactor core and the reactor coolant system for light water reactors
- Fundamental analytical skills that can aid in understanding nuclear energy problems and solutions Knowledge of important social and technical issues related to nuclear science and technology
- Improvements in c nuclear plants and future designs
- Important fuel cycle operations with uranium from exploration through enrichment including fundamental aspects of spent-fuel reprocessing and fuel-cycle waste management

Course work takes advantage of field trips to state-of-the-art facilities in the Western Pennsylvania region including the Penn State Nuclear Reactor, the Beaver Valley Nuclear Power Plant, and various Westinghouse facilities. Interested students should visit http://www.engineering.pitt.edu/nuclear/ or call 412-624-9780 for more information.

Engineering for Humanity Certificate

The Engineering for Humanity certificate is open to all undergraduate students and both guides and formalizes student participation in sustainable engineering projects that serve poor communities. Moreover, the certificate program addresses the significance of cultural, political, and business forces that shape sustainable engineering solutions and empowers poor communities to improve their quality of life.. The center piece of the Certificate is an approved engineering service project that gives the student experience of working for people with basic needs. A total of 15 credits is required to complete this certificate. Students have the option of pursuing either a U.S. or international track. For additional information please contact Dr. Nettleship of the Department of Mechanical Engineering and Materials Science. More information on the Certificate can be found at: http://www.engineeringx.pitt.edu/SubSites/MCSI/MCSIFourColumn.aspx?id=2147502144

Statute of Limitations

All required academic work for the Bachelor of Science in Engineering degree, including courses for which advanced-standing credit has been granted, must be completed within 12 consecutive calendar years. Under unusual circumstances, a student may, with the approval of the department or program chair, request a waiver of this policy. This policy means that part-time students must progress toward the degree at a minimum rate of 12 credits per calendar year.

Graduation Requirements

In order to graduate with a BSE, a student must have satisfactorily completed all degree requirements and earned the total number of credits required by the department or program in which the student is enrolled. The student must also have obtained a minimum GPA of 2.00 for (a) all required courses completed at the University of Pittsburgh and (b) all departmental courses. Students who have a cumulative GPA of 2.00 for all courses taken but have not obtained the minimum 2.00 departmental GPA may be certified for graduation by the program by repeating all program courses in which a grade below C was awarded and earning a grade of C or better for each repeated course.

Advanced-standing credits accepted by the Swanson School of Engineering may partially fulfill course requirements for graduation, but grades and credits earned in such courses are not included in the GPA calculations.

The work of the senior year (a minimum of 24 credits) must be completed while in residence at the Swanson School of Engineering, University of Pittsburgh. Exceptions to this regulation may be granted for a limited number of credits through petition to the department or program and approval by the senior associate dean for academic affairs. This regulation will be waived for students completing an approved study abroad program during their senior year.

(See the Graduation section of this bulletin for further information on graduation requirements and procedures.)

Academic Integrity

The integrity of the academic process requires fair and impartial evaluation on the part of faculty and honest academic conduct on the part of students. Students are expected to conduct themselves with a high level of responsibility in the fulfillment of their course of study. It is the corresponding responsibility of faculty to make clear to students those standards by which they will be evaluated and the resources permissible for use by students during their course of study. The educational process is perceived as a joint faculty-student enterprise that will involve professional judgment by faculty and may involve, without penalty, reasoned exception by students to the data or views offered by faculty. Consistent with these considerations (and without limiting their scope and application in their entirety to the academic programs of the University), faculty and students are directed to observe established guidelines on academic integrity. Copies of both the Swanson School of Engineering and the University of Pittsburgh *Guidelines on Academic Integrity* are available to faculty and students in the departmental offices of the Swanson School of Engineering and is also available at: http://www.engr.pitt.edu/WorkArea/DownloadAsset.aspx?id=2147488315.

Assessment

As part of the Swanson School of Engineering's commitments to student learning and academic achievement, effective teaching, and continuous improvement of our programs, we regularly conduct outcomes assessment activities. To obtain periodic measurements of student perceptions and intellectual growth, students will be expected to participate in surveys, focus groups, interviews, and related activities. While individual input is collected, the data resulting from these assessments will be published only in aggregate form.

Advising

All students are assigned an advisor and are expected to meet with their advisor prior to registration. The Freshman Engineering Program's professional staff serves as the freshmen's advisors. Throughout the freshman year, students are encouraged to meet with their advisor if they need to register for classes, withdraw from classes, add and/or drop classes, seek out resources, find out about their academic progress, discuss problems they are having in a course, or get help deciding on a program. Freshmen are also assigned a peer advisor from the Freshman Leadership Team, with whom they will meet weekly. Once students are admitted to a department or program, they are then assigned a faculty advisor. Students who wish to change advisors should meet with the department chair, program director, or undergraduate coordinator to request a change. See http://www.engineering.pitt.edu/freshman/advising/ for more information.

General Degree Requirements

The degree requirements are established by the individual departments and programs. Depending on the program, between 126 to 135 credits may be required for the individual degree. Each program's requirements include the common freshman year, a mathematics sequence (four or five courses depending on the program), and six approved humanities and social science electives (including the W-course requirement). The specific degree requirements are found in the program descriptions below.

Humanities and Social Science Requirement

An important part of the undergraduate engineering student's education is the humanities and social science component. All Swanson School of Engineering undergraduates must complete at least six humanities and social science elective courses from the school's approved list of A&S courses, while meeting the school and ABET requirements for breadth and depth. To meet the depth requirement, a student must complete two or more courses in the same area of study only one of which can be considered an introductory course from Arts and Sciences. The depth requirement can also be satisfied by taking two or more courses with a related theme, e.g., courses that focus on a geographic region, historic period, or ideological perspective. For the breadth requirements, it is recommended that the courses include approved offerings from at least three different departments from Arts and Sciences. Students may use one study abroad course that might not otherwise be counted toward satisfying this requirement.

No more than two of the required six elective courses can be satisfied via high school Advanced Placement, International Baccalaureate, and/or GCE-A-Level credits.

Students must also complete one W-designated course, i.e., a course that has a substantial writing component that has been so designated by Arts and Sciences. Depending on the course, it may also count as one of the humanities/social science electives. The senior associate dean for academic affairs

maintains a list of approved humanities and social science electives. Students are not permitted to use College of General Studies courses including those indicated as either hybrid, self-paced, or online web courses.

Online Courses

Undergraduate engineering students may take one humanity/social science and one engineering, engineering science, math or science course online subject to the following conditions:

- Student must present a valid reason for taking the course; a comparable course is not available at the University.
- The course must be from a four-year college or university that is accredited by Middle States Association of Colleges and Schools (or equivalent if outside the region).
- In addition, an engineering or engineering science course must be from an ABET accredited program.
- The humanities/social science courses must be from the arts and science unit of the institution and not from a continuing education, or general studies unit. The course must be taught in English.
- The course must be first approved by the undergraduate coordinator and then by the Associate Dean for Academic Affairs.

Major and Degree Options

The following majors (described in the Program Descriptions section) within the Swanson School of Engineering offer the Bachelor of Science in Engineering:

- Bioengineering
- Chemical engineering
- Civil engineering (offered by the Department of Civil and Environmental Engineering)
- Computer engineering (offered by the Department of Electrical and Computer Engineering and the Department of Computer Science, A&S)
- Electrical engineering (offered by the Department of Electrical and Computer Engineering)
- Engineering Science (administered through the Department of Mechanical Engineering and Materials Science)
- Environmental Engineering (administered through the Department of Civil Engineering)
- Industrial engineering
- Materials science and engineering (administered through the Department of Mechanical Engineering and Materials Science)
- Mechanical engineering (administered through the Department of Mechanical Engineering and Materials Science)

Minors in Engineering

The Swanson School of Engineering offers a number of minors to its students who wish to expand their field of knowledge in engineering. Engineering students may also pursue a minor in Arts and Sciences (see A&S section of this bulletin for details on the minors offered within A&S). Engineering students are not permitted to minor in the same field in which they are majoring. Students from outside the Swanson School of Engineering may pursue one of these minors with the permission of the given department. Any student interested in a minor should consult with the given department to determine the eligibility and completion requirements for each minor. The minors offered by the school are as follows:

- Bioengineering
- Chemical engineering
- Civil engineering
- Electrical engineering
- Environmental engineering
- Industrial engineering
- Materials science and engineering
- Mechanical engineering
- Petroleum engineering
- Polymer engineering

Special Academic Opportunities/Programs

The Swanson School of Engineering offers numerous special academic opportunities as detailed in the following pages:

Arts and Sciences-Engineering Dual Degree Program

The Dietrich School of Arts and Sciences (A&S) and the Swanson School of Engineering have developed an undergraduate dual degree program that permits a student to combine a major in arts and sciences with a program in engineering and then receive degrees from both A&S and the Swanson School of Engineering. A student can apply for admission into this program through either A&S or the Swanson School of Engineering and must be admitted into both schools.

While the form of the program is dependent upon the individual student's interests, the first year's curriculum is typically the standard engineering program. During the next three years the student may complete the specific requirements for his or her engineering degree while fulfilling certain A&S major and general education requirements. Typically, the fifth year is then used to complete the A&S requirements. Students must complete a minimum of 90 A&S credits, including all A&S skills and general education requirements and an A&S major (but not a related area). Students must also complete all the degree requirements of their chosen engineering program, usually consisting of 70 or more Swanson School of Engineering credits. Each program should be developed with an advisor in Arts and Sciences and an advisor in the Swanson School of Engineering and tailored to the student's special interests. Students in this program have combined engineering with neuroscience, philosophy, economics, music, and a number of the language programs.

Students must satisfy both schools' normal progress requirements and criteria for academic standing as long as they remain in the joint degree program. Students also must apply for graduation from both schools. A&S students earn either a BA or BS degree, depending upon the A&S program of study. The student's GPA for graduation from A&S is calculated based solely upon the credits earned for the A&S degree. For further information, students may contact one of the following: the Freshman Engineering Program Office, 152 Benedum Hall; an engineering departmental undergraduate coordinator; the A&S Office, 140 Thackeray Hall; the A&S Advising Center, 252 Thackeray Hall; or the University Honors College engineering advisor, 3600 Cathedral of Learning.

Bachelor of Philosophy Degree Program with University Honors College

Undergraduate students with exceptional academic ability and motivation may elect to complete the Bachelor of Philosophy degree program in addition to their engineering bachelor of science degree. Students who have completed the freshman year may apply for degree candidacy in the UHC. Outstanding students enrolled in any of the Swanson School of Engineering programs may elect to complete these interschool degree requirements. In addition, students pursuing the five-year joint degree program with Arts and Sciences are also encouraged to pursue the honors college degree.

All of the UHC degree programs require independent scholarship and a competency-based evaluation by faculty in the last year. The requirements for independent scholarship entail the completion and defense of a thesis during the junior and senior years. Qualified engineering students may join with an engineering faculty member to propose an individualized plan of study leading to independent scholarship and an honors college degree, provided the basic graduation requirements of the student's engineering department are fulfilled. Students interested in the honors college should contact the dean of the honors college, 3500 Cathedral of Learning, Pittsburgh, PA 15260, or call 412-624-6880. (See the University Honors College section of this bulletin.)

Cooperative Engineering Education Program

The school's Cooperative Engineering Education Program enhances the student engineer's educational experience through a series of challenging, highly relevant "real world" work sessions. This is accomplished by integrating a rotation of school and employment terms that enables the cooperative education student to complement his or her formal classroom training with additional technical knowledge, hands-on experience, and financial remuneration. The co-op graduate possesses the maturity and assurance of a more seasoned employee and the ability to incorporate academic knowledge and theory into practice. During co-op sessions, students earn competitive salaries, which also makes this program financially rewarding. Almost half of the graduating seniors complete the co-op program requirements. Through the assistance of the Swanson School of Engineering's Cooperative Education Office, formal arrangements are established with industry that permit students to rotate four-month terms between the workplace and the classroom. At the University of Pittsburgh, this rotation begins during either the sophomore or junior year and extends into the senior year, with the co-op student completing at least three four-month work periods. These employment sessions, which are typically with the same employer, allow job duties to increase as the knowledge and skills of the student engineer progress. The positions can be local, national, or international. This practical work experience has also been found to increase academic motivation and classroom performance. Co-op

students become aware of business practice and etiquette and possess a mature, responsible attitude. Thus, upon graduation, students who have successfully completed the three co-op rotations are able to handle more challenging initial assignments with confidence and assurance. A high percentage of co-op students also obtain and accept full-time offers from their co-op employers.

Students earn transcript certification and a total of three credits towards departmental graduation requirements upon satisfactory completion of the program requirements. The co-op program offers resume preparation, interviewing skills, workshops and job fairs in order to facilitate appropriate placements for students.

Sample Co-op Schedules

SCHEDULE A	**Fall (Sept.-Dec.)**	**Spring (Jan.-April)**	**Summer (May-Aug.)**
First Year	School	School	
Second Year	School	School	
Third Year	**Work**	School	**Work**
Fourth Year	School	**Work**	School
Fifth Year	School		

SCHEDULE B	**Fall (Sept.-Dec.)**	**Spring (Jan.-April)**	**Summer (May-Aug.)**
First Year	School	School	
Second Year	School	School	**Work**
Third Year	School	**Work**	School
Fourth Year	**Work**	School	**Work**
Fifth Year	School		

SCHEDULE C	**Fall (Sept.-Dec.)**	**Spring (Jan.-April)**	**Summer (May-Aug.)**
First Year	School	School	
Second Year	School	**Work**	School
Third Year	**Work**	School	**Work**
Fourth Year	School	**Work**	School
Fifth Year	School		

For more information, please contact: Cooperative Engineering Education Program, 152 Benedum Hall, Pittsburgh, PA 15260, 412-624-9826, paub2m@pitt.edu, or see www.engineering.pitt.edu/coop/.

Engineering-School of Education Certification Program

The Swanson School of Engineering realizes the need to provide program flexibility and a variety of career options to undergraduate engineering majors. Careers in the teaching of mathematics, chemistry, and physics present one such option to students who have acquired a knowledge base in engineering. Through an articulated agreement with the University of Pittsburgh School of Education, a five-year Program of Study combines course work in engineering with Content Core Studies for the teaching of chemistry, mathematics, or physics; additionally, general education courses and pre-educational professional credits are included in the program. During the program's fifth year (after completion of the BS in engineering degree), students will complete the requirements for the Instructional I Certificate in their area of choice. This two-term program will enable them to teach in the Commonwealth of Pennsylvania.

For more information regarding scheduling and the admission policy of the agreement, talk with your advisor, or call 412-648-2230 to schedule a pre-admission meeting with a School of Education representative. See also http://www.education.pitt.edu/programs/certificates.aspx

Certificate Programs

Swanson School of Engineering undergraduate students are encouraged to broaden their educational experience by electing to take one of the certificate programs currently offered by Arts and Sciences, the University Center for International Studies (UCIS), or the Swanson School of Engineering. These certificate programs may be used by the engineering student to partially fulfill the humanities/social sciences requirement, thereby allowing specialization in an area of interest while pursuing an engineering degree. The requirements for each certificate vary, and students should contact the appropriate certificate program director.

The Swanson School of Engineering offers ten certificates at the undergraduate level:

Civil Engineering and Architectural Studies

Recognizing the close relations between architects and structural engineers, in particular, a special program of cooperation was established in 1990 between the Department of Architectural Studies of the School of Arts and Sciences, and the Civil & Environmental Engineering Department. Students from the Civil & Environmental Engineering Department may elect to study for a certificate in architectural studies. The certificate is described at the following location: http://www.arch.pitt.edu/program/related-areas.php#civil-engineeringcertificate

Interested students should work with their respective advisor to select the most appropriate classes for this opportunity.

Related Area in Architectural Studies for Engineering Students

The related area in architectural studies is intended to offer students majoring in engineering an opportunity to explore the aesthetic side of problem-solving design activity. The selection of courses can be formulated to fit the interests and goals of the individual student. The related area may range from 12 to 15 credits that may be used to partially satisfy the 18-credit Swanson School of Engineering humanities/social sciences requirements. Engineering students selecting this option must take HA&A 0040 Introduction to Architecture, and HA&A 1040 History of Architecture Theory is strongly recommended. Students may elect either two or three courses in the history of architecture, e.g., HA&A 0045 Introduction to Modern Architecture, HA&A 1306 High Renaissance Architecture, and HA&A 1160 Roman Architecture or HA&A 1480 Architecture Since 1945 and HA&A 1913 Senior Seminar for Architectural Studies Majors. Please contact the Department of Civil and Environmental Engineering at http://www.engineering.pitt.edu/civil/ or by calling 412-624-9870.

Energy Resource Utilization

The Energy Resource Utilization Certificate is designed for those students interested in both the development of new energy resources and the study of existing ones. Students in the Swanson School of Engineering may earn a certificate in energy resource utilization by completing two 6-credit courses. The first course, Energy Today, offered by the Chemical and Petroleum Engineering Department at the University of Pittsburgh, examines current technologies that supply energy from coal, petroleum, gas, and uranium. The second course, Energy Beyond 2000, offered by the University

of New South Wales in Sydney, Australia, examines energy efficiency and renewable energy technologies and those techniques that will be used in the future to reduce dependence on fossil fuels. Both courses are offered in the summer term: Energy Today from mid-May to mid-June, and Energy Beyond 2000 from late June to early August.

International Engineering Studies

An innovative International Engineering Certificate Program has been created for those students who wish to enhance their degree program with an education abroad experience. Students in the Swanson School of Engineering may earn a Certificate in International Engineering Studies (IES) by completing a minimum set of requirements that include completion of an approved education abroad program or co-op work experience and associated cultural enrichment and language studies. A total of 16 credits are required to complete this certificate. Students who study or work in English-speaking countries are also eligible to earn the certificate by fulfilling special requirements. The certificate appears on the student's transcript upon graduation. Please contact the Office of Engineering International Programs at international@engr.pitt.edu or by calling (412) 624-5942 for additional information.

Mining Engineering

The Minerals Industry is a vital and growing part of the US economy and the demand for professionals with knowledge and skills in the field of mining engineering is high. To help address this demand the Swanson School of Engineering offers three Mining Engineering Certificates. One certificate is for undergraduate engineers and geologists and requires three mining courses and two department specific courses. A second is for graduate engineering students and a third is for Post-Baccalaureate students with a BS degree. Both of these certificates require five mining engineering courses. Many of the mining engineering courses are offered via the distance learning format so professionals working in the minerals industry can participate from remote locations. Course work focuses on health and safety and environmental issues in the minerals industry and utilizes field trips to operating mines to demonstrate important principles. Interested students should check http://www.engineering.pitt.edu/mining/ for updated information on this program.

Nuclear Engineering

Strong growth in the global demand for power is projected for the next half-century and beyond. This growth provides great opportunities for the nuclear industry, particularly companies located in southwestern Pennsylvania including Westinghouse Electric, First Energy and Bechtel Bettis. The undergraduate Certificate in Nuclear Engineering is a five-course sequence consisting of three nuclear engineering courses and two discipline specific courses related to nuclear engineering from the various engineering departments. The certificate is open to all undergraduate engineering students in the Swanson School of Engineering and can be earned in conjunction with all nine of the School's BS engineering degrees. Qualified Arts and Science students may also elect to take the certificate.

The undergraduate Certificate in Nuclear Engineering targets competency gaps that exist in the following educational areas:

- Basic theoretical concepts of nuclear physics, radiation protection, reactor physics, reactor kinetics, fuel depletion and energy removal
- Tasks of the reactor thermal designer, nuclear designer and mechanical designer
- Interfaces among engineering disciplines involved with the design of a reactor core and the reactor coolant system for light water reactors
- Fundamental analytical skills that can aid in understanding nuclear energy problems and solutions
- Knowledge of important social and technical issues related to nuclear science and technology
- Improvements in nuclear plants and future designs
- Important fuel cycle operations with uranium from exploration through enrichment including fundamental aspects of spent-fuel reprocessing and fuel-cycle waste management

Course work takes advantage of field trips to state-of-the-art facilities in the Western Pennsylvania region including the Penn State Nuclear Reactor, the Beaver Valley Nuclear Power Plant, and various Westinghouse facilities. Interested students should visit http://www.engineering.pitt.edu/nuclear/ or call 412-624-9720 for more information.

Product Realization

Employers now seek engineers with skills in these technologies and who are able to work under the added pressure of moving products from conception to market in extremely short time periods. With this increased emphasis on minimizing the time to market, it has become essential for engineers to integrate marketing and business strategies with new products design skills. The Product Realization Certificate cuts across the Swanson

School of Engineering and into the College of Business Administration of the Joseph M. Katz Graduate School of Business. The objectives of the certificate in product realization are to close the current competency gaps that exists between academia and industry in the areas of design and product creation and to create a benchmark educational program that can serve as a model throughout academia.

The Certificate in Product Realization specifically targets competency gaps that exist in the following educational areas:
computational analysis methods, virtual and rapid prototyping techniques, micro-electronic mechanical systems (MEMS), digital control systems and wireless communication, and business aspects of product creation. Course work takes advantage of state-of-the-art facilities that currently exist in the Swanson Center for Product Innovation (SCPI). The certificate is designed for undergraduate engineering students, as well as qualified students in the College of Business Administration with an interest in new product development. Students from the bio, industrial, mechanical, and electrical/computer engineering programs may be most interested in obtaining the certificate. Students take a total of five courses to include at least one College of Business Administration course, two engineering courses, and the capstone design course, Product Realization.

For information contact:
Mary Besterfield Sacre
1040 Benedum Hall
412-624-9836
mbsacre@pitt.edu

Supply Chain Management

The Certificate in Supply Chain Management (CSCM) provides undergraduate engineering students with the opportunity to understand important concepts in supply chain management and develop technical and managerial skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations.

Supply chain management encompasses not only the design and planning of supply chain activities, but also the execution, control and monitoring that help companies build a competitive infrastructure and create net value. The supply chain covers all areas, not just manufacturing and services, but also includes suppliers, retailers, warehouses, logistics and customer service; all functional areas involved in receiving and filling a customer's order with a repeatable and satisfying experience. This certificate requires 15 credits to complete.

Enrollment is open to students in all of the undergraduate engineering programs in the Swanson School of Engineering. Students interested in the program should contact Dr. Karen Bursic (kbursic@pitt.edu) for more details.

Engineering for Humanity Certificate

The Engineering for Humanity certificate is open to all undergraduate students and both guides and formalizes student participation in sustainable engineering projects that serve poor communities. Moreover, the certificate program addresses the significance of cultural, political, and business forces that shape sustainable engineering solutions and empowers poor communities to improve their quality of life. The center piece of the Certificate is an approved engineering service project that gives the student experience of working for people with basic needs. A total of 15 credits is required to complete this certificate. Students have the option of pursuing either a U.S. or international track. For additional information please contact Dr. Nettleship of the Department of Mechanical Engineering and Materials Science. More information on the Certificate can be found at: http://www.engineeringx.pitt.edu/SubSites/MCSI/MCSIFourColumn.aspx?id=2147502144

Sustainable Engineering

An undergraduate Certificate in Sustainable Engineering is available to all undergraduate engineering students. The certificate is housed in the Department of Civil and Environmental Engineering and administered through the Mascaro Center for Sustainable Innovation. The certificate provides interested students with an awareness and sensitivity to environmental issues and consequences of engineering systems consistent with their engineering major. The certificate builds upon an increasing number of courses being offered with an emphasis on sustainability and requires 12 credits to complete.

For information on this program contact:

Melissa Bilec
153 Benedum Hall (MCSI)

(412) 648-8075
mbilec@pitt.edu

Engineering International Programs

As the world around us grows ever more connected, it has become evident that engineering students must be prepared to engage in an increasingly globalized world, and, upon graduation, to compete in an increasingly international jobs market. Accordingly, the Swanson School of Engineering (SSOE) has placed a tremendous emphasis on the development of exciting and academically enriching international programs for its students.

All students in SSOE are encouraged to add a global dimension to their education by pursuing one or more international programs as part of their academic study. At present, SSOE students may elect to participate in study, research, co-op, internship, or service learning abroad. Most of these opportunities are offered on a for-credit basis, and many can be used to satisfy major, minor, technical elective, or other degree requirements. Foreign language study is helpful, but not required, as many courses are on offer in English. Depending on their academic and personal interests, students may elect to participate in dozens of individual international programs. Some of these may last for only a week or two, either during spring break or over the summer term. Others may involve a commitment of a semester or even an entire academic year abroad.

The Swanson Signature Study Abroad Programs are short term opportunities that focus on a relevant engineering topic in detail over the course of 10 to 14 days. Recently, Swanson Signature programs have occurred in Brazil, Uruguay, Peru, Italy and Germany, studying such diverse topics as renewable energy and sustainability, engineering of pre-Columbian civilizations, and global supply networks. Plus3 is another innovative short term program designed for first year SSOE students, and which has gone to such locations as Chile, Brazil, Germany, China and Viet Nam. Meanwhile, students who wish to invest in longer term language or cultural study may decide to participate in an exchange program. This affords them the opportunity to study engineering, social sciences or humanities at a foreign college or university for one or two consecutive academic terms, and for little more than the cost of a regular term in Pittsburgh. Finally, scholarships and other funding opportunities are also available, and financial aid administered by the University of Pittsburgh may apply.

Current and prospective SSOE students and their parents are welcome to contact the Office of Engineering International Programs for more information. Please visit: http://www.engineering.pitt.edu/international.

Combined Liberal Arts-Engineering 3/2 Program

The Swanson School of Engineering has developed combined liberal arts/engineering dual degree programs with a number of accredited liberal arts colleges. In these "3/2 programs," students first complete a three-year structured course of study at the liberal arts college, including that college's general education requirements, specific introductory courses required for the engineering program of interest, and other courses necessary for acceptance into a Swanson School of Engineering program. With the recommendation of the faculty advisor at the liberal arts college, the student applies for transfer to the University of Pittsburgh Swanson School of Engineering, spending the final two years in an engineering program. Such programs typically enable the student to earn both a liberal arts degree and an engineering degree.

Swanson School of Engineering-Diversity Initiatives

The Engineering Office of Diversity exists to create and sustain learning and working environments where differences and similarities are valued and respected, and all students, especially underrepresented students, are included and empowered to excel in engineering education. The office provides diversity education to undergraduates, graduate students, staff and faculty. The office also provides continuous academic and community support services through the its pre-college, undergraduate and graduate student programming.

Pre-College and Undergraduate Diversity Programs

The Swanson School of Engineering pre-college and undergraduate diversity programs develop and implement activities that promote and support the academic excellence of high achieving pre-college and undergraduate students from groups historically underrepresented in science, technology, engineering and mathematics (STEM) fields. These initiatives provide a continuous pipeline for students to prepare for, enter and graduate from the University of Pittsburgh as STEM majors.

Global Engineering Preparedness Scholarship (GEPS) Programs

Educating Engineers in Cultural and Societal Contexts

Thanks to a grant from the National Science Foundation, the University of Pittsburgh Swanson School of Engineering and its Office of Diversity (EOD) have established the Global Engineering Preparedness Scholarship program (GEPS). GEPS helps to support the recruitment, retention and graduation of low-income students from underrepresented minorities and majority populations. GEPS also prepares students for the global marketplace by offering international opportunities that students would not normally be able to participate without additional supporting funds.

Because the engineering career of the 21st century is more globally competitive than ever, GEPS also provides an integrative framework that focuses on access, continuous academic support, development of global competency and leadership experience. International experience is now an integral part of engineering education, and highly sought after by employers across all engineering disciplines. GEPS Scholars will have access to Pitt's exceptional education abroad programs to experience international skills sought by the engineering profession.

GEPS Benefits

- Academic Counseling and Advising -Structured on-on-one academic counseling and advising for all first-year students. Students will meet with an Academic Counselor regularly, as well as with the Associate Dean for Diversity at the beginning of each semester to set goals and at the end of each semester to review goal attainment.
- Academic Living/learning Community (ALC): All GEPS Scholars participate in ALC program activities in the first year at Pitt. This provides Scholars the opportunity to live and learn from each other and develop and cultivate cross-cultural lifelong friendships.
- Academic Tutoring - Tutoring support will be provided for all GEPS Scholars in physics, chemistry and math courses through the EXCEL office.
- Exceptional Education: The Swanson School of Engineering is ranked among the top 25 public university engineering programs by *US News and World Report*, while the University of Pittsburgh was named a "Best Value College" by *The Princeton Review* and *USA TODAY* for the fourth consecutive year; and Best Value In Public Higher Education in Pennsylvania by *Kiplinger's* for the ninth consecutive year (2014).
- Faculty Mentoring: Students will be matched with faculty who will engage in a professional one-on-one relationship to further challenge students in scholarly activities.
- Global Leadership Competency Development for Engineers (GLE) - After the first year, Scholars will participate in GLE activities designed to enrich global leadership experience and global preparedness. GLE activities are supported through partnerships with employers, international study abroad, and career development programs, allowing Scholars to engage in engineering design and problem solving in cultural and societal contexts, both at home and abroad.
- Peer Mentoring: GEPS will provide a more structured and effective peer mentoring program by pairing GEPS first-year students with Engineering Ambassadors selected from a group of outstanding engineering juniors and seniors. The Engineering Ambassadors will help students develop good study skills, capacity building skills, and communication skills critical during the first year at the Swanson School.
- Summer Engineering Academy (SEA): A rigorous two-week pre-college program designed to assist students in making a smooth transition from high school to college.

Scholarship Eligibility, Selection, and Retention

GEPS Scholars will be selected from the pool of admitted students or transferring students meeting US citizenship or permanent residency requirements and having unmet financial needs as determined through the Office of Admissions and Financial Aid. Student should be in to top 10-20 percent of class high school ranking, ACT/SAT above 27/1300, or college transfer GPA of 3.0 or above.

Beyond scores and academic performance students are offered GEPS admission by committee review of GPA, SAT/ACT scores, strength of high school courses, class ranking, teacher recommendations for overall potential for success, extracurricular activities, honors and awards, professionalism, leadership, and personal statement.

All GEPS Scholars must maintain a cumulative GPA of 3.0 to retain the Scholarship. All GEPS Scholars who complete the second year of the program with GPA of 3.0 and above are eligible for the GEPS International Study Abroad Scholarship

How to Apply

High School Students/Prospective First-Year Students: engineering.pitt.edu/geps/firstyear
Transfer Students: engineering.pitt.edu/geps/tranfer

Investing Now

INVESTING NOW, created in 1988, is a college preparatory program created to stimulate, support, and recognize the high academic performance of pre-college students from historically underrepresented groups. The purpose of this program is to expose high achieving students to science, technology, engineering and mathematics (STEM) careers and prepare them to be successful at the University of Pittsburgh or other highly competitive universities.

The program's primary goals are to:

- Create a pipeline for well-prepared students to enter college and pursue science, technology, engineering and mathematics majors;
- Encourage and support student' enrollment and achievement in advanced mathematics and science courses;
- Ensure that the participants make informed college choices;
- Support and encourage parents in their role as advocates for their children; and
- Coordinate partnerships between the University of Pittsburgh's Swanson School of Engineering and local and regional schools.

Membership in INVESTING NOW a student's commitment to attend year-round programming from ninth through twelfth grade.

For further information, contact:

INVESTING NOW

Pitt EXCEL Program

Pitt EXCEL is a comprehensive diversity program committed to the recruitment, retention and graduation of academically excellent engineering undergraduates, particularly individuals from groups historically underrepresented in the field. Program activities include academic counseling, peer mentoring, engineering research opportunities, graduate school preparation and career development workshops, as well as a two-week intensive study skills, math and science review session for pre-freshmen.

The goals of the Pitt EXCEL programs are to:

- Collaborate with the INVESTING NOW program, the First Year Engineering Program Office and the Office of Admissions & Financial Aid in order to increase the number of students from underrepresented groups enrolled in the Swanson School of Engineering.
- Provide students with support activities and enrichment opportunities that will make them marketable to corporations and graduate schools.
- Provide community building activities that will help students to develop a supportive and diverse peer network.

Programming offered to Pitt EXCEL students includes:

The Summer Engineering Academy (SEA) is a residential program that enables students to make a smooth transition from high school to college. During SEA, students learn essential study skills for college and receive an intensive review of chemistry, pre-calculus and physics concepts, with an introduction to engineering problem solving. By attending this program students can prepare for success during their first year of college.

Summer Research Internships (SRI) focuses on the preparation of underrepresented students for graduate education and professional careers in engineering. The goals of the program are to identify motivated students and match them with faculty mentors. The mentors assist the students through the completion of a summer research project.

Swanson School of Engineering Faculty

STEVEN D. ABRAMOWITCH, Associate Professor, Bioengineering, PhD, University of Pittsburgh

MURAT AKCAKAYA, Assistant Professor, Electrical and Computer Engineering, PhD, Washington University

MOHAMMAD M. ATAAI, Professor, Chemical and Petroleum Engineering, PhD, Cornell University

ANNA C. BALAZS, Distinguished Professor of Chemical and Petroleum Engineering and Robert von der Luft Professor, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

IPSITA BANERJEE, Associate Professor, Chemical and Petroleum Engineering, PhD, Rutgers University

AARON P. BATISTA, Professor, Bioengineering, PhD, California Institute of Technology

ERIC J. BECKMAN, George M. Bevier Chair Professor, Chemical and Petroleum Engineering, PhD, University of Massachusetts

MOSTAFA BEDEWY, Assistant Professor, Industrial Engineering, PhD, University of Michigan

MARY BESTERFIELD-SACRE, Professor, Industrial Engineering, PhD, University of Pittsburgh

KYLE BIBBY, Assistant Professor, Civil and Environmental Engineering, PhD, Yale University

BOPAYA BIDANDA, Chair and Ernest E. Roth Professor, Industrial Engineering, PhD, Pennsylvania State University

HODA BIDKHORI, Assistant Professor, Industrial Engineering, PhD, Massachusetts Institute of Technology

MELISSA M. BILEC, Associate Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

HARVEY S. BOROVETZ, Professor and Former Chair, Bioengineering, PhD, Carnegie Mellon University

J. ROBERT BOSTON, Professor, Electrical and Computer Engineering, PhD, Northwestern University

JOHN C. BRIGHAM, Associate Professor, Civil and Environmental Engineering, PhD, Cornell University

BRYAN N. BROWN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

DANIEL D. BUDNY, Associate Professor, Civil and Environmental Engineering; Director, Freshman Engineering Program, PhD, Michigan State University

ANDREW P. BUNGER, Assistant Professor, Civil and Environmental Engineering, Chemical and Petroleum Engineering, PhD, University of Minnesota

KAREN BURSIC, Associate Professor and Undergraduate Program Director, Industrial Engineering, PhD, University of Pittsburgh

LEONARD W. CASSON, Associate Professor, Civil and Environmental Engineering, PhD, University of Texas at Austin

RAKIE CHAM, Associate Professor, Bioengineering, PhD, University of Pittsburgh

MARKUS CHMIELUS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Technical University, Berlin, Germany

KEVIN P. CHEN, Professor, Electrical and Computer Engineering, PhD, University of Toronto

YIRAN CHEN, Assistant Professor, Electrical and Computer Engineering, PhD, Purdue University

SUNG KWON CHO, Associate Professor, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea

YOUNGJAE CHUN, Assistant Professor, Industrial Engineering, PhD, University of California, Los Angeles

MINKING CHYU, Associate Dean for International Initiatives; Leighton E. and Mary N. Orr Chair Professor, Mechanical Engineering and Materials Science, PhD, University of Minnesota

WILLIAM W. CLARK, Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University

DANIEL G. COLE, Associate Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University

XINYAN CUI, Professor, Bioengineering, PhD, University of Michigan

LANCE A. DAVIDSON, Associate Professor, Bioengineering, PhD, University of California at Berkeley

ANTHONY J. DEARDO, Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

RICHARD E. DEBSKI, Associate Professor, Bioengineering, PhD, University of Pittsburgh

SAMUEL J. DICKERSON, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

AMRO EL-JAROUDI, Associate Professor, Electrical and Computer Engineering, PhD, Northeastern University

MAHMOUD EL NOKALI, Interim Chair and Associate Professor, Electrical and Computer Engineering, PhD, McGill University

ROBERT M. ENICK, Covestro Professor and Vice Chair for Research, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

WILLIAM FEDERSPIEL, Professor, Graduate Coordinator, Bioengineering, PhD, University of Rochester

SUSAN FULLERTON, Assistant Professor, Chemical and Petroleum Engineering, PhD, The Pennsylvania State University

GIOVANNI P. GALDI, Leighton E. and Mary N. Orr Professor, Mechanical Engineering and Materials Science, PhD, University of Naples, Italy

NEERAJ J. GANDHI, Associate Professor, Bioengineering, PhD, University of California, San Francisco

DI GAO, Associate Professor and William Kepler Whiteford Faculty Fellow, Chemical and Petroleum Engineering, PhD, University of California at Berkeley

LEEANNE GILBERTSON, Assistant Professor, Civil and Environmental Engineering, PhD, Yale University

PEYMAN GIVI, Distinguished Professor and James T. MacLeod Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

BRIAN M. GLEESON, Chair and Harry S. Tack Professor, Mechanical Engineering and Materials Science PhD, University of Los Angeles
BRANDON GRAINGER, Visiting Research Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

KILICHAN GURLEYIK, Assistant Professor, Bioengineering, DSc, Washington University in St. Louis

JOEL M. HAIGHT, Associate Professor, Industrial Engineering, PhD, Auburn University

KENT A. HARRIES, Associate Professor, Civil and Environmental Engineering, PhD, McGill University

ALAN HIRSCHMAN, Professor, Bioengineering, PhD, Carnegie Mellon University

GERALD D. HOLDER, USX Dean, Swanson School of Engineering; Professor, Chemical and Petroleum Engineering, PhD, University of Michigan

TIN-KAN HUNG, Professor, Bioengineering, PhD, University of Iowa

ANTHONY T. IANNACCHIONE, Associate Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

TAMER S. IBRAHIM, Associate Professor, Bioengineering, PhD, The Ohio State University

STEVEN P. JACOBS, Assistant Professor, Electrical and Computer Engineering, DSc, Washington University

TEVIS D. B. JACOBS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pennsylvania

DANIEL R. JIANG, Assistant Professor, Industrial Engineering, PhD, Princeton University

J. KARL JOHNSON, William Kepler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Cornell University

ALEX K. JONES, Associate Professor and COE Undergraduate Program Director, Electrical and Computer Engineering, PhD, Northwestern University

IRVIN R. JONES, JR, Assistant Professor and EE Undergraduate Program Director, Electrical and Computer Engineering, PhD, University of Colorado at Boulder

VIKAS KHANNA, Assistant Professor, Civil and Environmental Engineering, PhD, The Ohio State University

JOHN A. KEITH, Assistant Professor, Chemical and Petroleum Engineering, PhD, California Institute of Technology

JEFFREY P. KHAROUFEH, Professor, Industrial Engineering, PhD, The Pennsylvania State University

HONG KOO KIM, Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

GEORGE E. KLINZING, Professor, Chemical and Petroleum Engineering, PhD, Carnegie Mellon University

TAKASHI DANIEL YOSHIDA KOZAI, Assistant Professor, Bioengineering, PhD, University of Michigan

GEORGE L. KUSIC, Associate Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

PRASHANT N. KUMTA, Edward R. Weidlein Chair Professor, Bioengineering, PhD, University of Arizona

ALEXIS KWASINSKI, Associate Professor, Electrical and Computer Engineering, PhD, University of Illinois at Urbana-Champaign

JUNG-KUN LEE, William Kepler Whiteford Faculty Fellow, Associate Professor, MSE Graduate Director, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea

SANGYEOP LEE, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

PAUL LEU, Associate Professor, Industrial Engineering, PhD, Stanford University

CHING CHUNG LI, Professor, Electrical and Computer Engineering, PhD, Northwestern University

GUANGYONG LI, Associate Professor, Electrical and Computer Engineering, PhD, Michigan State University

HAI (HELEN) LI, Associate Professor, Electrical and Computer Engineering, PhD, Purdue University

LEI LI, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Michigan

XU LIANG, Professor, Civil and Environmental Engineering, PhD, University of Washington

JEEN-SHANG LIN, Associate Professor, Civil and Environmental Engineering, ScD, Massachusetts Institute of Technology

STEVEN LITTLE, Chair and William Kepler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

PATRICK J. LOUGHLIN, Professor, Bioengineering, PhD, University of Washington

NIATIKUN LOUIS LUANGKESORN, Assistant Professor, Industrial Engineering, PhD, Northwestern University

SPANDAN MAITI, Assistant Professor, Bioengineering, PhD, University of Illinois, Champaign

LISA M. MAILLART, Associate Professor, Industrial Engineering, PhD, University of Michigan

SCOTT X. MAO, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, Tohoku University

ZHI-HONG MAO, Associate Professor, Electrical and Computer Engineering, PhD, Massachusetts Institute of Technology

MARK MAGALOTTI, Professor of Practice, Civil and Environmental Engineering, PhD, University of Pittsburgh

JOSEPH J. McCARTHY, William Kepler Whiteford Professor and Vice Chair for Education, Chemical and Petroleum Engineering, PhD, Northwestern University

JAMES R. McKONE, Assistant Professor, Chemical and Petroleum Engineering, PhD, California Institute of Technology

RAVI S. MEENAKSHISUNDARAM, Associate Professor, Industrial Engineering, PhD, Purdue University

GERALD H. MEIER, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, Ohio State University

IRENE MENA, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Purdue University

NATASA MISKOV-ZIVANOV, Assistant Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

KARTIK MOHANRAM, Associate Professor, Electrical and Computer Engineering, PhD, University of Texas at Austin

BADIE I. MORSI, Professor, Chemical and Petroleum Engineering, PhD, ScD, Institut National Polytechnique de Lorraine-Ecole Nationale Superieure des Industries Chimiques

SEYED MOHAMMAD MOUSAVI, Assistant Professor, Industrial Engineering, PhD, Stanford University

GIANNIS MPOURMPAKIS (Ioannis Bourmpakis), Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Crete, Greece (Heraklion)

IAN NETTLESHIP, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Leeds

CARLA NG, Assistant Professor, Civil and Environmental Engineering, PhD, Northwestern University

BRYAN A. NORMAN, Associate Professor, Industrial Engineering, PhD, University of Michigan

ROBERT S. PARKER, Professor and B.P. America Faculty Fellow, Chemical and Petroleum Engineering, PhD, University of Delaware

JOHN F. PATZER II, Associate Professor and Undergraduate Coordinator, Bioengineering, PhD, Stanford University

OLEG A. PROKOPYEV, Associate Professor, Industrial Engineering, PhD, University of Florida

JAYANT RAJGOPAL, Professor and Graduate Program Director, Industrial Engineering, PhD, University of Iowa

MARK S. REDFERN, Vice Provost for Research, Swanson School of Engineering; Professor, Bioengineering, PhD, University of Michigan

GREGORY F. REED, Associate Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

PIERVINCENZO RIZZO, Associate Professor, Civil and Environmental Engineering, PhD, University of California at San Diego

ANNE M. ROBERTSON, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, University of California at Berkeley

PARTHA ROY, Associate Professor, Bioengineering, PhD, University of Texas, Southern Medical Center

JOSEPH T. SAMOSKY, Assistant Professor, Bioengineering, PhD, Massachusetts Institute of Technology

WISSAM SAIDI, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Ohio State University

DAVID SCHMIDT, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

JOHN SEBASTIAN, Professor of Practice, Civil and Environmental Engineering, MBA, University of Pittsburgh

ERVIN SEJDIC, Assistant Professor, Electrical and Computer Engineering, PhD, Columbia University

NITIN SHARMA, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Florida

JASON SHOEMAKER, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of California, Santa Barbara

SANJEEV G. SHROFF, Chair, Distinguished Professor of and Gerald E. McGinnis Chair, Bioengineering, PhD, University of Pennsylvania

LARRY J. SHUMAN, Senior Associate Dean, Swanson School of Engineering; Distinguished Professor, Industrial Engineering, PhD, The Johns Hopkins University

WILLIAM S. SLAUGHTER IV, Associate Professor and Undergraduate Director, Mechanical Engineering and Materials Science, PhD, Harvard University

PATRICK SMOLINSKI, Associate Professor, Mechanical Engineering and Materials Science, PhD, Northwestern University

WILLIAM E. STANCHINA, Professor, Electrical and Computer Engineering, PhD, University of Southern California

GEORGE DEWITT STETTEN, Professor, Bioengineering, PhD, University of North Carolina

ALBERT C. F. TO, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of California at Berkeley

MORTEZA A.M. TORKAMANI, Associate Professor, Civil and Environmental Engineering, PhD, University of California at Los Angeles

GELSY TORRES, Assistant Professor, Bioengineering, PhD, Georgia Institute of Technology and Emory University

LUIS E. VALLEJO, Professor, Civil and Environmental Engineering, PhD, University of Wisconsin

JONATHAN VANDE GEEST, Professor, Bioengineering, PhD, University of Pittsburgh

JULIE M. VANDENBOSSCHE, Associate Professor, Civil and Environmental Engineering, PhD, University of Minnesota

SACHIN S. VELANKAR, Associate Professor, Chemical and Petroleum Engineering, PhD, University of Delaware

GÖTZ VESER, Nickolas A. DeCecco Professor, Chemical and Petroleum Engineering, PhD, Fritz-Haber-Institute of the Max-Planck-Society

NATASA VIDIC, Assistant Professor, Industrial Engineering, PhD, University of Pittsburgh

RADISAV D. VIDIC, Chair and Professor, Civil and Environmental Engineering, PhD, University of Cincinnati

JUAN PABLO VIELMA, Assistant Professor, Civil and Environmental Engineering, PhD, Georgia Institute of Technology

JEFFREY S. VIPPERMAN, Professor and Vice Chair, Mechanical Engineering and Materials Science, PhD, Duke University

DAVID VORP, Associate Dean for Research, Professor, Bioengineering, PhD, University of Pittsburgh

GUOFENG WANG, Associate Professor, Mechanical Engineering and Materials Science, PhD, California Institute of Technology

QING-MING WANG, Professor and ME Graduate Director, Mechanical Engineering and Materials Science, PhD, Pennsylvania State University

YADONG WANG, Professor, Bioengineering, PhD, Stanford University

DOUGLAS WEBER, Associate Professor, Bioengineering, PhD, Arizona State University

JOHN WHITEFFOT, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Michigan-Ann Arbor

JÖRG M. WIEZOREK, Professor, Mechanical Engineering, PhD, University of Cambridge

CHRISTOPHER E. WILMER, Assistant Professor, Chemical and Petroleum Engineering, PhD, Northwestern University

SAVIO L.Y. WOO, University Professor of Bioengineering, PhD, University of Washington

SYLVANUS N. WOSU, Associate Dean for Diversity; Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Oklahoma

WEI XIONG, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

JUDITH C. YANG, Nickolas A. DeCecco Professor, Chemical and Petroleum Engineering, PhD, Cornell University

JUN YANG, Associate Professor, Electrical and Computer Engineering, PhD, University of Arizona

QIANG YU, Assistant Professor, Civil and Environmental Engineering, PhD, Northwestern University

MIN HEE YUN, Associate Professor, Electrical and Computer Engineering, PhD, Arizona State University

BO ZENG, Assistant Professor, Industrial Engineering, PhD, Purdue University

XUDONG ZHANG, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Michigan

Program and Course Offerings

Students enter one of the specific engineering major programs below at the sophomore level after successfully completing the Freshman Engineering Program.

Certificate

International Engineering Studies Certificate

Requirements for the INTERNATIONAL ENGINEERING STUDIES (IES) CERTIFICATE include a study abroad experience and associated cultural enrichment and language studies. The certificate will indicate the country and language in which the IES program was completed. The certificate can be earned with completion of at least four of the five following requirements.

If the study abroad experience is in an English speaking country, the first requirement is waived and the student must complete three of the remaining four requirements. The courses taken as part of requirements 1, 2, and 3 may be used to satisfy part of the student's humanities and social science requirements as long as the courses are on the approved list of such courses for the School of Engineering and focus on the local culture of the country of interest. The student must formally apply to and be accepted into the IES program.

Application forms may be obtained from the ENGINEERING INTERNATIONAL PROGRAMS OFFICE. The application must include a plan for completing the requirements for a certificate. The plan must specify all relevant coursework to be completed at the University of Pittsburgh as well as the activities and site of the study abroad experience. The study abroad program must be formally approved by the student's advisor and the IES Faculty Committee.

Language Training

A minimum of either one term-long course at the intermediate level in the local language on-site during the study abroad program, or two term-long, intermediate level courses at the University of Pittsburgh. A summer language school program at the study abroad site could be used to satisfy this requirement.

Local Culture

A minimum of one term-long course on-site during the study abroad experience. Acceptable areas are broadly defined to include subjects such as fine arts, history, literature etc., and should focus on the culture local to the study abroad program.

Culture Requirement at Pitt

An upper division (1000 level) course at the University of Pittsburgh which will serve as a complement to Requirement 2.

Academic Courses in Engineering

A minimum of two term-long courses on-site during the study abroad experience. The courses must satisfy graduation requirements for specific courses in the student's major department or program.

Work Experience/Internship

Equivalent of one term spent in engineering-related work in the study abroad country. A co-op rotation or an internship may be used to satisfy this requirement.

Department of Bioengineering

Major

Bioengineering - Bioimaging and Signals Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Bioengineering

The undergraduate program in Bioengineering combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences. Students enrolled in the program will be prepared for continued graduate studies or a career in a bioengineering-related industry. The program also provides a solid undergraduate education for further studies in a school of medicine. The bioengineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

In keeping with the two-fold mission of the Department of Bioengineering to

- provide a high quality engineering education to both undergraduate and graduate students and
- be a leader in research in specific areas encompassed by Bioengineering,

The Bioengineering undergraduate curriculum objective is to prepare students to achieve their post-baccalaureate goal of:

- an industrial career in bioengineering or related field;
- graduate school (MS and PhD programs related to bioengineering); or
- professional school (Medical, Dental, Health Related, Business, and Law).

To achieve the objective, students are:

- Provided both a broad knowledge of the technical and social principles of bioengineering as well as a focused education in one concentration area within bioengineering, and
- Prepared through educational experiences beyond the classroom that deepen their understanding of the technical and non-technical issues in bioengineering, process and design.

The Bioengineering undergraduate curriculum has seven components:

- Mathematics (6 courses)
- Basic Sciences (7 courses/1 lab)
- Humanities and Social Sciences (6 courses)
- Basic Engineering (3 courses)
- Core Bioengineering (11 courses, 6 seminars)
- Bioengineering Concentrations (6 courses)
- Advanced Engineering and Science (2 courses)

with options for

- Dual Degrees, Minors and Certificates

Mathematics

We require that students master basic mathematical skills in analytical geometry, calculus, linear algebra, differential equations, and statistics as preparation for mastery of bioengineering applications. The basic math courses include

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 0290 - DIFFERENTIAL EQUATIONS
- ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Statistics (4 credits):

- ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Note:

Current MATH course descriptions can be found at the DSAS Course Descriptions web site.

Basic Sciences

Engineering practice is frequently described as "applied science". In addition to knowledge of and ability to use basic physics and chemistry, bioengineers need to be conversant with and able to use concepts of biology and physiology. Because of the importance of cellular processes in bioengineering applications, we have developed our own (required) 2-course sequence in cell and molecular biology. We DO NOT accept general biology (BIOSC 0150 and BIOSC 0160) as meeting the cell biology requirement or as advanced science courses. The basic science requirements include

PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2 or
BIOENG 1072 - HONORS INTROD TO CELL BIOL 2

BIOSC 1250 - HUMAN PHYSIOLOGY

Humanities and Social Sciences

The Swanson School of Engineering (SSOE) requires all undergraduates to complete **at least six** humanities and social science elective courses from the School's list of approved courses in order to satisfy SSOE and ABET accreditation requirements for breadth and depth. Complete rules for breadth and depth can be found at the web site.

The Department of Bioengineering feels that ethics is such an integral part of societal practice of bioengineering that we have developed our own bioethics course (BIOENG 1241 (3 credits): Social, Political, and Ethical Issues in Bioengineering) that emphasizes the fact that we practice bioengineering in the real world and that we need to be aware of the broad societal impact of doing so.

BIOENG 1241 **is a REQUIRED course for all bioengineering undergraduate students.** Because of the strong humanities and social science basis, BIOENG 1241 is acceptable as one of the required six humanities and social science electives. Thus bioengineering undergraduates need at least five additional humanities and social science elective courses drawn from the School's list of approved courses.

Please note that DSAS courses cross-listed with CGS that are designated as self-paced (self), online (www) or hybrid online (hybrid) are not acceptable for fulfilling the humanities/social science requirement.

"W" requirement: All students must have a "W"riting course, designated as such in their academic record, in order to satisfy graduation requirements. The "W" can be satisfied by a course in any DSAS department. However, most students choose to take a three-credit course in the humanities/social sciences. A one-credit "W" addition to a three credit course is also acceptable. A two-credit "W" course satisfies the"W" requirement, but cannot be used to satisfy a course requirement. Listings of "W" courses can be found at the DSAS Course Descriptions web site.

Basic Engineering

The basic engineering courses include

ENGR 0011 - INTRO TO ENGINEERING ANALYSIS or
ENGR 0711 - HONORS ENGR ANAL & COMPUTING or
ENGR 1716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0012 - INTRO TO ENGINEERING COMPUTING or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH or
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0135 - STATICS & MECHC OF MATERIALS 1

Note:

The common Freshman courses, ENGR 0011 and ENGR 0012 are integrated with the Freshman math, physics, and chemistry courses with the specific goals of (1) introducing students to fundamentals of engineering common to all engineering disciplines, (2) providing an overview of how engineers integrate math, physics, chemistry, and communications into solving practical problems of interest to society and (3) providing a rigorous foundation in design of computer programs to solve engineering problems.

ENGR 0135 is a basic course in statics and mechanics of materials that applies basic concepts from physics in understanding the effect of external forces acting on particles and deformable bodies with emphasis on how material responses to external forces impact engineering choices of appropriate materials to use to meet design specifications.

Core Bioengineering

The bioengineering core, which consists of,

BIOENG 1210 - BIOENGINEERING THERMODYNAMICS or
BIOENG 1211 - HONORS BIOENG THERMODYNAMICS

BIOENG 1220 - BIOTRANSPORT PHENOMENA

BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV or
BIOENG 1580 - BIOMD APPLC OF SIGNAL PROCING or
BIOENG 1680 - BIOMEDICAL APPLC OF CONTROL

BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS
BIOENG 1002 - INTRAMURAL INTERNSHIP
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
Imaging Course (3 credits): Selected from approved lilst
BIOENG 1160 - BIOENGINEERING DESIGN 1
BIOENG 1161 - BIOENGINEERING DESIGN 2
BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR

Note:

The core has been designed to provide students with exposure to the basic engineering disciplines that bioengineers use and are conversant with in practicing the bioengineering profession, BIOENG 1210 and BIOENG 1220 provide knowledge and applications in thermal/fluid engineering which are important in design and operation of tissue culture applications and artificial organs technology. BIOENG 1310, BIOENG 1320, BIOENG 1255, BIOENG 1580, and BIOENG 1680 provide knowledge and applications in electrical engineering that are required for data acquisition, signal processing, imaging, and systems control. BIOENG 1630, coupled with ENGR 0135, provides knowledge and applications that are required to model and design solutions in such diverse areas as motion and balance, prosthetics design, and soft tissue mechanics. Both BIOENG 1002 and BIOENG 1150 are laboratory, research based courses that focus on communications skills; BIOENG 1002 on preparation and public presentation of research, BIOENG 1150 on analysis and written communication. Senior Design (BIOENG 1160 & BIOENG 1161) is a two-semester capstone sequence that challenges teams of students to develop and implement practical solutions to real problems. Finally BIOENG 1085 is used both as a vehicle for communication between the department and students and as a setting to provide diverse perspectives on the professional practice of bioengineering.

Bioengineering Concentrations

The Bioengineering Concentrations offer the student an opportunity to focus on an area of bioengineering practice in greater depth than is possible in the core course. The department offers four concentrations:

Bioimaging and Signals
Biomechanics
Cellular Engineering
Medical Product Engineering.

Each concentration consists of seven courses split between concentration requirements and concentration electives. Each concentration has an imaging course requirement that meets the needs of the concentration. Concentration requirements are courses that the concentration leader and faculty deem required knowledge for professional practice in the concentration. While narrower than the breadth reflected in the core bioengineering

curriculum, each concentration can be further divided into tracks within the concentration with associated courses. Concentration electives are generally drawn from a restricted list of courses that offer greater depth in track of interest to the student.

Note: because of the large number of bioengineering students interested in medical school post-graduation, CHEM 0310 (Organic Chemistry1) and CHEM 0320 (Organic Chemistry 2) are accepted as a concentration elective in all concentrations.

Note: CHEM 0320 (Organic Chemistry 2) is a prerequisite for BIOENG 1620 (Introduction to Tissue Engineering) and BIOENG 1810 (Biomaterials and Biocompatibility). Students who want to take those courses need to take the CHEM 0310/CHEM 0320 sequence prior to doing so.

Note: particular minors are easier to obtain through different concentrations. The key to obtaining a minor is to start planning early.

Advanced Engineering and Science

Students are required to take two advanced engineering or science elective courses. If the student has already taken a course in a discipline, the Advanced Engineering/Science elective must be at a more advanced level (depth) or cover a different aspect of the discipline (breadth).

Note: The University Bulletin states "Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit." Other departments offer courses that substantially duplicate content in some BIOENG courses (which focus on engineering applications in biology, physiology, and medicine). Known courses that students cannot use for an advanced engineering or science elective under this prohibition include:

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1
COE 0031 - LINEAR CIRCUITS AND SYSTEMS 1 and
MEMS 0031 - ELECTRICAL CIRCUITS (duplicates BIOENG 1310)

ENGR 0145 - STATICS & MECHC OF MATERIALS 2 (duplicates BIOENG 1630)
ENGR 1010 - COMMUNICTN SKILLS FOR ENGINRS (duplicates BIOENG 1002 and BIOENG 1150)
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS (duplicates BIOENG 1210)

ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS
COE 1552 and
MEMS 1014 - DYNAMIC SYSTEMS (duplicates BIOENG 1320)

Note:

Note: Students MAY NOT use any natural science course (ASTRON, BIOSC, CHEM, GEOL, NROSCI, PHYS) with a course number less than 0100 to satisfy the Advanced Engineering and Science requirement.

Note: Students may use an ENGR study abroad experience, such as the Plus3 program, either as an Advanced Engineering/Science elective or as a humanities/social science elective.

Note: Students who successfully complete three co-op rotations can also apply that experience to satisfy one of the electives.

Dual Degrees, Minors and Certificates

We encourage our students to take full advantage of University of Pittsburgh resources and educational opportunities. Many of our students seek a dual degree that augments the bioengineering experience; sometimes another engineering degree, sometimes a degree in Dietrich School of Arts and Sciences. Almost all obtain minors and certificates that add value to their education and distinguish them as they move forward in their careers. Planning for minors and certificates needs to start as early as the sophomore year (perhaps, even, the freshman year)!

For more information on the bioengineering program, visit http://www.engineering.pitt.edu/bioengineering/.

Bioengineering Undergraduate Curriculum

Sophomore Year

Third Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0290 - DIFFERENTIAL EQUATIONS
Bioengineering Concentration Elective - 3 Credits *

Credits: 18

**Premed and Cellular Engineering Concentration students should take CHEM 0310 - ORGANIC CHEMISTRY 1 for the Concentration Elective.*

Fourth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1 * or
Concentration Elective (CHEM 0320 only)

Credits: 16(15)

** Premed and Cellular Engineering Concentration Students should take CHEM 0320 - ORGANIC CHEMISTRY 2 in the fourth term and ENGR 0020 in the sixth term.*

Junior Year

Fifth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1002 - INTRAMURAL INTERNSHIP *
BIOENG 1220 - BIOTRANSPORT PHENOMENA
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOSC 1250 - HUMAN PHYSIOLOGY
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
BIOENG 1241 - SOCTL, POL & ETHCL ISS BIOENG *

Credits: 18

** BIOENG 1002 may be taken Fall or Spring Term in the Junior or Senior year.*

Sixth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV #

Concentration Elective - 3 Credits * or
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Concentration Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits

Credits: 16(17)

#Either BIOENG 1580 or BIOENG 1680 may be taken instead of BIOENG 1255.

**Students who took CHEM 0320 in the fourth term must take ENGR 0020.*

Senior Year

Seventh Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1160 - BIOENGINEERING DESIGN 1
Concentration Elective - 3 Credits
Concentration Elective - 3 Credits
Engineering Science Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits

Credits: 15

Eighth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1161 - BIOENGINEERING DESIGN 2
Human/Social Science Elective - 3 Credits
Concentration Elective - 3 Credits
Concentration Elective - 3 Credits
Engineering/Science Elective - 3 Credits

Credits: 15

Bioengineering - Biomechanics Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the

Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Bioengineering

The undergraduate program in Bioengineering combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences. Students enrolled in the program will be prepared for continued graduate studies or a career in a bioengineering-related industry. The program also provides a solid undergraduate education for further studies in a school of medicine. The bioengineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

In keeping with the two-fold mission of the Department of Bioengineering to

- provide a high quality engineering education to both undergraduate and graduate students and
- be a leader in research in specific areas encompassed by Bioengineering,

The Bioengineering undergraduate curriculum objective is to prepare students to achieve their post-baccalaureate goal of:

- an industrial career in bioengineering or related field;
- graduate school (MS and PhD programs related to bioengineering); or
- professional school (Medical, Dental, Health Related, Business, and Law).

To achieve the objective, students are:

- Provided both a broad knowledge of the technical and social principles of bioengineering as well as a focused education in one concentration area within bioengineering, and
- Prepared through educational experiences beyond the classroom that deepen their understanding of the technical and non-technical issues in bioengineering, process and design.

The Bioengineering undergraduate curriculum has seven components:

- Mathematics (6 courses)
- Basic Sciences (7 courses/1 lab)
- Humanities and Social Sciences (6 courses)
- Basic Engineering (3 courses)
- Core Bioengineering (11 courses, 6 seminars)
- Bioengineering Concentrations (6 courses)
- Advanced Engineering and Science (2 courses)

with options for

- Dual Degrees, Minors and Certificates

Mathematics

We require that students master basic mathematical skills in analytical geometry, calculus, linear algebra, differential equations, and statistics as preparation for mastery of bioengineering applications. The basic math courses include

- MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
- MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Statistics (4 credits):

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Note:

Current MATH course descriptions can be found at the DSAS Course Descriptions web site.

Basic Sciences

Engineering practice is frequently described as "applied science". In addition to knowledge of and ability to use basic physics and chemistry, bioengineers need to be conversant with and able to use concepts of biology and physiology. Because of the importance of cellular processes in bioengineering applications, we have developed our own (required) 2-course sequence in cell and molecular biology. We DO NOT accept general biology (BIOSC 0150 and BIOSC 0160) as meeting the cell biology requirement or as advanced science courses. The basic science requirements include

PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2 or
BIOENG 1072 - HONORS INTROD TO CELL BIOL 2

BIOSC 1250 - HUMAN PHYSIOLOGY

Humanities and Social Sciences

The Swanson School of Engineering (SSOE) requires all undergraduates to complete **at least six** humanities and social science elective courses from the School's list of approved courses in order to satisfy SSOE and ABET accreditation requirements for breadth and depth. Complete rules for breadth and depth can be found at the web site.

The Department of Bioengineering feels that ethics is such an integral part of societal practice of bioengineering that we have developed our own bioethics course (BIOENG 1241 (3 credits): Social, Political, and Ethical Issues in Bioengineering) that emphasizes the fact that we practice bioengineering in the real world and that we need to be aware of the broad societal impact of doing so.

BIOENG 1241 **is a REQUIRED course for all bioengineering undergraduate students.** Because of the strong humanities and social science basis, BIOENG 1241 is acceptable as one of the required six humanities and social science electives. Thus bioengineering undergraduates need at least five additional humanities and social science elective courses drawn from the School's list of approved courses.

Please note that DSAS courses cross-listed with CGS that are designated as self-paced (self), online (www) or hybrid online (hybrid) are not acceptable for fulfilling the humanities/social science requirement.

"W" requirement: All students must have a "W"riting course, designated as such in their academic record, in order to satisfy graduation requirements. The "W" can be satisfied by a course in any DSAS department. However, most students choose to take a three-credit course in the humanities/social sciences. A one-credit "W" addition to a three credit course is also acceptable. A two-credit "W" course satisfies the"W" requirement, but cannot be used to satisfy a course requirement. Listings of "W" courses can be found at the DSAS Course Descriptions web site.

Basic Engineering

The basic engineering courses include

ENGR 0011 - INTRO TO ENGINEERING ANALYSIS or
ENGR 0711 - HONORS ENGR ANAL & COMPUTING or
ENGR 1716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0012 - INTRO TO ENGINEERING COMPUTING or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH or
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0135 - STATICS & MECHC OF MATERIALS 1

Note:

The common Freshman courses, ENGR 0011 and ENGR 0012 are integrated with the Freshman math, physics, and chemistry courses with the specific goals of (1) introducing students to fundamentals of engineering common to all engineering disciplines, (2) providing an overview of how engineers integrate math, physics, chemistry, and communications into solving practical problems of interest to society and (3) providing a rigorous foundation in design of computer programs to solve engineering problems.

ENGR 0135 is a basic course in statics and mechanics of materials that applies basic concepts from physics in understanding the effect of external forces acting on particles and deformable bodies with emphasis on how material responses to external forces impact engineering choices of appropriate materials to use to meet design specifications.

Core Bioengineering

The bioengineering core, which consists of,

BIOENG 1210 - BIOENGINEERING THERMODYNAMICS or
BIOENG 1211 - HONORS BIOENG THERMODYNAMICS

BIOENG 1220 - BIOTRANSPORT PHENOMENA

BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV or
BIOENG 1580 - BIOMD APPLC OF SIGNAL PROCING or
BIOENG 1680 - BIOMEDICAL APPLC OF CONTROL

BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS
BIOENG 1002 - INTRAMURAL INTERNSHIP
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
Imaging Course (3 credits): Selected from approved lilst
BIOENG 1160 - BIOENGINEERING DESIGN 1
BIOENG 1161 - BIOENGINEERING DESIGN 2
BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR

Note:

The core has been designed to provide students with exposure to the basic engineering disciplines that bioengineers use and are conversant with in practicing the bioengineering profession, BIOENG 1210 and BIOENG 1220 provide knowledge and applications in thermal/fluid engineering which are important in design and operation of tissue culture applications and artificial organs technology. BIOENG 1310, BIOENG 1320, BIOENG 1255, BIOENG 1580, and BIOENG 1680 provide knowledge and applications in electrical engineering that are required for data acquisition, signal processing, imaging, and systems control. BIOENG 1630, coupled with ENGR 0135, provides knowledge and applications that are required to model and design solutions in such diverse areas as motion and balance, prosthetics design, and soft tissue mechanics. Both BIOENG 1002 and BIOENG 1150 are laboratory, research based courses that focus on communications skills; BIOENG 1002 on preparation and public presentation of research, BIOENG 1150 on analysis and written communication. Senior Design (BIOENG 1160 & BIOENG 1161) is a two-semester capstone sequence that

challenges teams of students to develop and implement practical solutions to real problems. Finally BIOENG 1085 is used both as a vehicle for communication between the department and students and as a setting to provide diverse perspectives on the professional practice of bioengineering.

Bioengineering Concentrations

The Bioengineering Concentrations offer the student an opportunity to focus on an area of bioengineering practice in greater depth than is possible in the core course. The department offers four concentrations:

Bioimaging and Signals
Biomechanics
Cellular Engineering
Medical Product Engineering.

Each concentration consists of seven courses split between concentration requirements and concentration electives. Each concentration has an imaging course requirement that meets the needs of the concentration. Concentration requirements are courses that the concentration leader and faculty deem required knowledge for professional practice in the concentration. While narrower than the breadth reflected in the core bioengineering curriculum, each concentration can be further divided into tracks within the concentration with associated courses. Concentration electives are generally drawn from a restricted list of courses that offer greater depth in track of interest to the student.

Note: because of the large number of bioengineering students interested in medical school post-graduation, CHEM 0310 (Organic Chemistry1) and CHEM 0320 (Organic Chemistry 2) are accepted as a concentration elective in all concentrations.

Note: CHEM 0320 (Organic Chemistry 2) is a prerequisite for BIOENG 1620 (Introduction to Tissue Engineering) and BIOENG 1810 (Biomaterials and Biocompatibility). Students who want to take those courses need to take the CHEM 0310/CHEM 0320 sequence prior to doing so.

Note: particular minors are easier to obtain through different concentrations. The key to obtaining a minor is to start planning early.

Advanced Engineering and Science

Students are required to take two advanced engineering or science elective courses. If the student has already taken a course in a discipline, the Advanced Engineering/Science elective must be at a more advanced level (depth) or cover a different aspect of the discipline (breadth).

Note: The University Bulletin states "Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit." Other departments offer courses that substantially duplicate content in some BIOENG courses (which focus on engineering applications in biology, physiology, and medicine). Known courses that students cannot use for an advanced engineering or science elective under this prohibition include:

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1
COE 0031 - LINEAR CIRCUITS AND SYSTEMS 1 and
MEMS 0031 - ELECTRICAL CIRCUITS (duplicates BIOENG 1310)

ENGR 0145 - STATICS & MECHC OF MATERIALS 2 (duplicates BIOENG 1630)
ENGR 1010 - COMMUNICTN SKILLS FOR ENGINRS (duplicates BIOENG 1002 and BIOENG 1150)
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS (duplicates BIOENG 1210)

ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS
COE 1552 and
MEMS 1014 - DYNAMIC SYSTEMS (duplicates BIOENG 1320)

Note:

Note: Students MAY NOT use any natural science course (ASTRON, BIOSC, CHEM, GEOL, NROSCI, PHYS) with a course number less than 0100 to satisfy the Advanced Engineering and Science requirement.

Note: Students may use an ENGR study abroad experience, such as the Plus3 program, either as an Advanced Engineering/Science elective or as a humanities/social science elective.

Note: Students who successfully complete three co-op rotations can also apply that experience to satisfy one of the electives.

Dual Degrees, Minors and Certificates

We encourage our students to take full advantage of University of Pittsburgh resources and educational opportunities. Many of our students seek a dual degree that augments the bioengineering experience; sometimes another engineering degree, sometimes a degree in Dietrich School of Arts and Sciences. Almost all obtain minors and certificates that add value to their education and distinguish them as they move forward in their careers. Planning for minors and certificates needs to start as early as the sophomore year (perhaps, even, the freshman year)!

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2

Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Bioengineering

The undergraduate program in Bioengineering combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences. Students enrolled in the program will be prepared for continued graduate studies or a career in a bioengineering-related industry. The program also provides a solid undergraduate education for further studies in a school of medicine. The bioengineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

In keeping with the two-fold mission of the Department of Bioengineering to

- provide a high quality engineering education to both undergraduate and graduate students and
- be a leader in research in specific areas encompassed by Bioengineering,

The Bioengineering undergraduate curriculum objective is to prepare students to achieve their post-baccalaureate goal of:

- an industrial career in bioengineering or related field;
- graduate school (MS and PhD programs related to bioengineering); or
- professional school (Medical, Dental, Health Related, Business, and Law).

To achieve the objective, students are:

- Provided both a broad knowledge of the technical and social principles of bioengineering as well as a focused education in one concentration area within bioengineering, and
- Prepared through educational experiences beyond the classroom that deepen their understanding of the technical and non-technical issues in bioengineering, process and design.

The Bioengineering undergraduate curriculum has seven components:

- Mathematics (6 courses)
- Basic Sciences (7 courses/1 lab)

Humanities and Social Sciences (6 courses)
Basic Engineering (3 courses)
Core Bioengineering (11 courses, 6 seminars)
Bioengineering Concentrations (6 courses)
Advanced Engineering and Science (2 courses)
with options for

Dual Degrees, Minors and Certificates

Mathematics

We require that students master basic mathematical skills in analytical geometry, calculus, linear algebra, differential equations, and statistics as preparation for mastery of bioengineering applications. The basic math courses include

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Statistics (4 credits):

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Note:

Current MATH course descriptions can be found at the DSAS Course Descriptions web site.

Basic Sciences

Engineering practice is frequently described as "applied science". In addition to knowledge of and ability to use basic physics and chemistry, bioengineers need to be conversant with and able to use concepts of biology and physiology. Because of the importance of cellular processes in bioengineering applications, we have developed our own (required) 2-course sequence in cell and molecular biology. We DO NOT accept general biology (BIOSC 0150 and BIOSC 0160) as meeting the cell biology requirement or as advanced science courses. The basic science requirements include

PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2 or
BIOENG 1072 - HONORS INTROD TO CELL BIOL 2

BIOSC 1250 - HUMAN PHYSIOLOGY

Humanities and Social Sciences

The Swanson School of Engineering (SSOE) requires all undergraduates to complete **at least six** humanities and social science elective courses from the School's list of approved courses in order to satisfy SSOE and ABET accreditation requirements for breadth and depth. Complete rules for breadth and depth can be found at the web site.

The Department of Bioengineering feels that ethics is such an integral part of societal practice of bioengineering that we have developed our own bioethics course (BIOENG 1241 (3 credits): Social, Political, and Ethical Issues in Bioengineering) that emphasizes the fact that we practice bioengineering in the real world and that we need to be aware of the broad societal impact of doing so.

BIOENG 1241 **is a REQUIRED course for all bioengineering undergraduate students.** Because of the strong humanities and social science basis, BIOENG 1241 is acceptable as one of the required six humanities and social science electives. Thus bioengineering undergraduates need at least five additional humanities and social science elective courses drawn from the School's list of approved courses.

Please note that DSAS courses cross-listed with CGS that are designated as self-paced (self), online (www) or hybrid online (hybrid) are not acceptable for fulfilling the humanities/social science requirement.

"W" requirement: All students must have a "W"riting course, designated as such in their academic record, in order to satisfy graduation requirements. The "W" can be satisfied by a course in any DSAS department. However, most students choose to take a three-credit course in the humanities/social sciences. A one-credit "W" addition to a three credit course is also acceptable. A two-credit "W" course satisfies the"W" requirement, but cannot be used to satisfy a course requirement. Listings of "W" courses can be found at the DSAS Course Descriptions web site.

Basic Engineering

The basic engineering courses include

ENGR 0011 - INTRO TO ENGINEERING ANALYSIS or
ENGR 0711 - HONORS ENGR ANAL & COMPUTING or
ENGR 1716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0012 - INTRO TO ENGINEERING COMPUTING or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH or
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0135 - STATICS & MECHC OF MATERIALS 1

Note:

The common Freshman courses, ENGR 0011 and ENGR 0012 are integrated with the Freshman math, physics, and chemistry courses with the specific goals of (1) introducing students to fundamentals of engineering common to all engineering disciplines, (2) providing an overview of how engineers integrate math, physics, chemistry, and communications into solving practical problems of interest to society and (3) providing a rigorous foundation in design of computer programs to solve engineering problems.

ENGR 0135 is a basic course in statics and mechanics of materials that applies basic concepts from physics in understanding the effect of external forces acting on particles and deformable bodies with emphasis on how material responses to external forces impact engineering choices of appropriate materials to use to meet design specifications.

Core Bioengineering

The bioengineering core, which consists of,

BIOENG 1210 - BIOENGINEERING THERMODYNAMICS or
BIOENG 1211 - HONORS BIOENG THERMODYNAMICS

BIOENG 1220 - BIOTRANSPORT PHENOMENA

BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV or
BIOENG 1580 - BIOMD APPLC OF SIGNAL PROCING or
BIOENG 1680 - BIOMEDICAL APPLC OF CONTROL

BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS

BIOENG 1002 - INTRAMURAL INTERNSHIP
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
Imaging Course (3 credits): Selected from approved lilst
BIOENG 1160 - BIOENGINEERING DESIGN 1
BIOENG 1161 - BIOENGINEERING DESIGN 2
BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR

Note:

The core has been designed to provide students with exposure to the basic engineering disciplines that bioengineers use and are conversant with in practicing the bioengineering profession, BIOENG 1210 and BIOENG 1220 provide knowledge and applications in thermal/fluid engineering which are important in design and operation of tissue culture applications and artificial organs technology. BIOENG 1310, BIOENG 1320, BIOENG 1255, BIOENG 1580, and BIOENG 1680 provide knowledge and applications in electrical engineering that are required for data acquisition, signal processing, imaging, and systems control. BIOENG 1630, coupled with ENGR 0135, provides knowledge and applications that are required to model and design solutions in such diverse areas as motion and balance, prosthetics design, and soft tissue mechanics. Both BIOENG 1002 and BIOENG 1150 are laboratory, research based courses that focus on communications skills; BIOENG 1002 on preparation and public presentation of research, BIOENG 1150 on analysis and written communication. Senior Design (BIOENG 1160 & BIOENG 1161) is a two-semester capstone sequence that challenges teams of students to develop and implement practical solutions to real problems. Finally BIOENG 1085 is used both as a vehicle for communication between the department and students and as a setting to provide diverse perspectives on the professional practice of bioengineering.

Bioengineering Concentrations

The Bioengineering Concentrations offer the student an opportunity to focus on an area of bioengineering practice in greater depth than is possible in the core course. The department offers four concentrations:

Bioimaging and Signals
Biomechanics
Cellular Engineering
Medical Product Engineering.

Each concentration consists of seven courses split between concentration requirements and concentration electives. Each concentration has an imaging course requirement that meets the needs of the concentration. Concentration requirements are courses that the concentration leader and faculty deem required knowledge for professional practice in the concentration. While narrower than the breadth reflected in the core bioengineering curriculum, each concentration can be further divided into tracks within the concentration with associated courses. Concentration electives are generally drawn from a restricted list of courses that offer greater depth in track of interest to the student.

Note: because of the large number of bioengineering students interested in medical school post-graduation, CHEM 0310 (Organic Chemistry1) and CHEM 0320 (Organic Chemistry 2) are accepted as a concentration elective in all concentrations.

Note: CHEM 0320 (Organic Chemistry 2) is a prerequisite for BIOENG 1620 (Introduction to Tissue Engineering) and BIOENG 1810 (Biomaterials and Biocompatibility). Students who want to take those courses need to take the CHEM 0310/CHEM 0320 sequence prior to doing so.

Note: particular minors are easier to obtain through different concentrations. The key to obtaining a minor is to start planning early.

Advanced Engineering and Science

Students are required to take two advanced engineering or science elective courses. If the student has already taken a course in a discipline, the Advanced Engineering/Science elective must be at a more advanced level (depth) or cover a different aspect of the discipline (breadth).

Note: The University Bulletin states "Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit." Other departments offer courses that substantially duplicate content in some BIOENG courses (which focus on engineering applications in biology, physiology, and medicine). Known courses that students cannot use for an advanced engineering or science elective under this prohibition include:

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1
COE 0031 - LINEAR CIRCUITS AND SYSTEMS 1 and
MEMS 0031 - ELECTRICAL CIRCUITS (duplicates BIOENG 1310)

ENGR 0145 - STATICS & MECHC OF MATERIALS 2 (duplicates BIOENG 1630)
ENGR 1010 - COMMUNICTN SKILLS FOR ENGINRS (duplicates BIOENG 1002 and BIOENG 1150)
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS (duplicates BIOENG 1210)

ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS
COE 1552 and
MEMS 1014 - DYNAMIC SYSTEMS (duplicates BIOENG 1320)

Note:

Note: Students MAY NOT use any natural science course (ASTRON, BIOSC, CHEM, GEOL, NROSCI, PHYS) with a course number less than 0100 to satisfy the Advanced Engineering and Science requirement.

Note: Students may use an ENGR study abroad experience, such as the Plus3 program, either as an Advanced Engineering/Science elective or as a humanities/social science elective.

Note: Students who successfully complete three co-op rotations can also apply that experience to satisfy one of the electives.

Dual Degrees, Minors and Certificates

We encourage our students to take full advantage of University of Pittsburgh resources and educational opportunities. Many of our students seek a dual degree that augments the bioengineering experience; sometimes another engineering degree, sometimes a degree in Dietrich School of Arts and Sciences. Almost all obtain minors and certificates that add value to their education and distinguish them as they move forward in their careers. Planning for minors and certificates needs to start as early as the sophomore year (perhaps, even, the freshman year)!

For more information on the bioengineering program, visit http://www.engineering.pitt.edu/bioengineering/.

Bioengineering Undergraduate Curriculum

Sophomore Year

Third Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0290 - DIFFERENTIAL EQUATIONS
Bioengineering Concentration Elective - 3 Credits *

Credits: 18

**Premed and Cellular Engineering Concentration students should take CHEM 0310 - ORGANIC CHEMISTRY 1 for the Concentration Elective.*

Fourth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1 * or
Concentration Elective (CHEM 0320 only)

Credits: 16(15)

** Premed and Cellular Engineering Concentration Students should take CHEM 0320 - ORGANIC CHEMISTRY 2 in the fourth term and ENGR 0020 in the sixth term.*

Junior Year

Fifth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1002 - INTRAMURAL INTERNSHIP *
BIOENG 1220 - BIOTRANSPORT PHENOMENA
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOSC 1250 - HUMAN PHYSIOLOGY
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
BIOENG 1241 - SOCTL, POL & ETHCL ISS BIOENG *

Credits: 18

** BIOENG 1002 may be taken Fall or Spring Term in the Junior or Senior year.*

Sixth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV #

Concentration Elective - 3 Credits * or
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Concentration Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits

Credits: 16(17)

#Either BIOENG 1580 or BIOENG 1680 may be taken instead of BIOENG 1255.

**Students who took CHEM 0320 in the fourth term must take ENGR 0020.*

Senior Year

Seventh Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1160 - BIOENGINEERING DESIGN 1
Concentration Elective - 3 Credits
Concentration Elective - 3 Credits
Engineering Science Elective - 3 Credits

Humanities/Social Science Elective - 3 Credits

Credits: 15

Eighth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1161 - BIOENGINEERING DESIGN 2
Human/Social Science Elective - 3 Credits
Concentration Elective - 3 Credits
Concentration Elective - 3 Credits
Engineering/Science Elective - 3 Credits

Credits: 15

Bioengineering - Medical Product Engineering Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Bioengineering

The undergraduate program in Bioengineering combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences. Students enrolled in the program will be prepared for continued graduate studies or a career in a bioengineering-related industry. The program also provides a solid undergraduate education for further studies in a school of medicine. The bioengineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

In keeping with the two-fold mission of the Department of Bioengineering to

provide a high quality engineering education to both undergraduate and graduate students and

be a leader in research in specific areas encompassed by Bioengineering,

The Bioengineering undergraduate curriculum objective is to prepare students to achieve their post-baccalaureate goal of:

an industrial career in bioengineering or related field;
graduate school (MS and PhD programs related to bioengineering); or
professional school (Medical, Dental, Health Related, Business, and Law).

To achieve the objective, students are:

Provided both a broad knowledge of the technical and social principles of bioengineering as well as a focused education in one concentration area within bioengineering, and
Prepared through educational experiences beyond the classroom that deepen their understanding of the technical and non-technical issues in bioengineering, process and design.

The Bioengineering undergraduate curriculum has seven components:

Mathematics (6 courses)
Basic Sciences (7 courses/1 lab)
Humanities and Social Sciences (6 courses)
Basic Engineering (3 courses)
Core Bioengineering (11 courses, 6 seminars)
Bioengineering Concentrations (6 courses)
Advanced Engineering and Science (2 courses)

with options for

Dual Degrees, Minors and Certificates

Mathematics

We require that students master basic mathematical skills in analytical geometry, calculus, linear algebra, differential equations, and statistics as preparation for mastery of bioengineering applications. The basic math courses include

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Statistics (4 credits):

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Note:

Current MATH course descriptions can be found at the DSAS Course Descriptions web site.

Basic Sciences

Engineering practice is frequently described as "applied science". In addition to knowledge of and ability to use basic physics and chemistry, bioengineers need to be conversant with and able to use concepts of biology and physiology. Because of the importance of cellular processes in bioengineering applications, we have developed our own (required) 2-course sequence in cell and molecular biology. We DO NOT accept general biology (BIOSC 0150 and BIOSC 0160) as meeting the cell biology requirement or as advanced science courses. The basic science requirements include

PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1

CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2 or
BIOENG 1072 - HONORS INTROD TO CELL BIOL 2

BIOSC 1250 - HUMAN PHYSIOLOGY

Humanities and Social Sciences

The Swanson School of Engineering (SSOE) requires all undergraduates to complete **at least six** humanities and social science elective courses from the School's list of approved courses in order to satisfy SSOE and ABET accreditation requirements for breadth and depth. Complete rules for breadth and depth can be found at the web site.

The Department of Bioengineering feels that ethics is such an integral part of societal practice of bioengineering that we have developed our own bioethics course (BIOENG 1241 (3 credits): Social, Political, and Ethical Issues in Bioengineering) that emphasizes the fact that we practice bioengineering in the real world and that we need to be aware of the broad societal impact of doing so.

BIOENG 1241 **is a REQUIRED course for all bioengineering undergraduate students.** Because of the strong humanities and social science basis, BIOENG 1241 is acceptable as one of the required six humanities and social science electives. Thus bioengineering undergraduates need at least five additional humanities and social science elective courses drawn from the School's list of approved courses.

Please note that DSAS courses cross-listed with CGS that are designated as self-paced (self), online (www) or hybrid online (hybrid) are not acceptable for fulfilling the humanities/social science requirement.

"W" requirement: All students must have a "W"riting course, designated as such in their academic record, in order to satisfy graduation requirements. The "W" can be satisfied by a course in any DSAS department. However, most students choose to take a three-credit course in the humanities/social sciences. A one-credit "W" addition to a three credit course is also acceptable. A two-credit "W" course satisfies the"W" requirement, but cannot be used to satisfy a course requirement. Listings of "W" courses can be found at the DSAS Course Descriptions web site.

Basic Engineering

The basic engineering courses include

ENGR 0011 - INTRO TO ENGINEERING ANALYSIS or
ENGR 0711 - HONORS ENGR ANAL & COMPUTING or
ENGR 1716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0012 - INTRO TO ENGINEERING COMPUTING or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH or
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR

ENGR 0135 - STATICS & MECHC OF MATERIALS 1

Note:

The common Freshman courses, ENGR 0011 and ENGR 0012 are integrated with the Freshman math, physics, and chemistry courses with the specific goals of (1) introducing students to fundamentals of engineering common to all engineering disciplines, (2) providing an overview of how engineers integrate math, physics, chemistry, and communications into solving practical problems of interest to society and (3) providing a rigorous foundation in design of computer programs to solve engineering problems.

ENGR 0135 is a basic course in statics and mechanics of materials that applies basic concepts from physics in understanding the effect of external forces acting on particles and deformable bodies with emphasis on how material responses to external forces impact engineering choices of appropriate materials to use to meet design specifications.

Core Bioengineering

The bioengineering core, which consists of,

BIOENG 1210 - BIOENGINEERING THERMODYNAMICS or
BIOENG 1211 - HONORS BIOENG THERMODYNAMICS

BIOENG 1220 - BIOTRANSPORT PHENOMENA

BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV or
BIOENG 1580 - BIOMD APPLC OF SIGNAL PROCING or
BIOENG 1680 - BIOMEDICAL APPLC OF CONTROL

BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS
BIOENG 1002 - INTRAMURAL INTERNSHIP
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
Imaging Course (3 credits): Selected from approved lilst
BIOENG 1160 - BIOENGINEERING DESIGN 1
BIOENG 1161 - BIOENGINEERING DESIGN 2
BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR

Note:

The core has been designed to provide students with exposure to the basic engineering disciplines that bioengineers use and are conversant with in practicing the bioengineering profession, BIOENG 1210 and BIOENG 1220 provide knowledge and applications in thermal/fluid engineering which are important in design and operation of tissue culture applications and artificial organs technology. BIOENG 1310, BIOENG 1320, BIOENG 1255, BIOENG 1580, and BIOENG 1680 provide knowledge and applications in electrical engineering that are required for data acquisition, signal processing, imaging, and systems control. BIOENG 1630, coupled with ENGR 0135, provides knowledge and applications that are required to model and design solutions in such diverse areas as motion and balance, prosthetics design, and soft tissue mechanics. Both BIOENG 1002 and BIOENG 1150 are laboratory, research based courses that focus on communications skills; BIOENG 1002 on preparation and public presentation of research, BIOENG 1150 on analysis and written communication. Senior Design (BIOENG 1160 & BIOENG 1161) is a two-semester capstone sequence that challenges teams of students to develop and implement practical solutions to real problems. Finally BIOENG 1085 is used both as a vehicle for communication between the department and students and as a setting to provide diverse perspectives on the professional practice of bioengineering.

Bioengineering Concentrations

The Bioengineering Concentrations offer the student an opportunity to focus on an area of bioengineering practice in greater depth than is possible in the core course. The department offers four concentrations:

Bioimaging and Signals
Biomechanics
Cellular Engineering
Medical Product Engineering.

Each concentration consists of seven courses split between concentration requirements and concentration electives. Each concentration has an imaging course requirement that meets the needs of the concentration. Concentration requirements are courses that the concentration leader and faculty deem required knowledge for professional practice in the concentration. While narrower than the breadth reflected in the core bioengineering curriculum, each concentration can be further divided into tracks within the concentration with associated courses. Concentration electives are generally drawn from a restricted list of courses that offer greater depth in track of interest to the student.

Note: because of the large number of bioengineering students interested in medical school post-graduation, CHEM 0310 (Organic Chemistry1) and CHEM 0320 (Organic Chemistry 2) are accepted as a concentration elective in all concentrations.

Note: CHEM 0320 (Organic Chemistry 2) is a prerequisite for BIOENG 1620 (Introduction to Tissue Engineering) and BIOENG 1810 (Biomaterials and Biocompatibility). Students who want to take those courses need to take the CHEM 0310/CHEM 0320 sequence prior to doing so.

Note: particular minors are easier to obtain through different concentrations. The key to obtaining a minor is to start planning early.

Advanced Engineering and Science

Students are required to take two advanced engineering or science elective courses. If the student has already taken a course in a discipline, the Advanced Engineering/Science elective must be at a more advanced level (depth) or cover a different aspect of the discipline (breadth).

Note: The University Bulletin states "Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit." Other departments offer courses that substantially duplicate content in some BIOENG courses (which focus on engineering applications in biology, physiology, and medicine). Known courses that students cannot use for an advanced engineering or science elective under this prohibition include:

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1
COE 0031 - LINEAR CIRCUITS AND SYSTEMS 1 and
MEMS 0031 - ELECTRICAL CIRCUITS (duplicates BIOENG 1310)

ENGR 0145 - STATICS & MECHC OF MATERIALS 2 (duplicates BIOENG 1630)
ENGR 1010 - COMMUNICTN SKILLS FOR ENGINRS (duplicates BIOENG 1002 and BIOENG 1150)
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS (duplicates BIOENG 1210)

ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS
COE 1552 and
MEMS 1014 - DYNAMIC SYSTEMS (duplicates BIOENG 1320)

Note:

Note: Students MAY NOT use any natural science course (ASTRON, BIOSC, CHEM, GEOL, NROSCI, PHYS) with a course number less than 0100 to satisfy the Advanced Engineering and Science requirement.

Note: Students may use an ENGR study abroad experience, such as the Plus3 program, either as an Advanced Engineering/Science elective or as a humanities/social science elective.

Note: Students who successfully complete three co-op rotations can also apply that experience to satisfy one of the electives.

Dual Degrees, Minors and Certificates

We encourage our students to take full advantage of University of Pittsburgh resources and educational opportunities. Many of our students seek a dual degree that augments the bioengineering experience; sometimes another engineering degree, sometimes a degree in Dietrich School of Arts and Sciences. Almost all obtain minors and certificates that add value to their education and distinguish them as they move forward in their careers. Planning for minors and certificates needs to start as early as the sophomore year (perhaps, even, the freshman year)!

For more information on the bioengineering program, visit http://www.engineering.pitt.edu/bioengineering/.

Bioengineering Undergraduate Curriculum

Sophomore Year

Third Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0050 - FOUNDATIONS OF BIOLOGY LAB 1
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0290 - DIFFERENTIAL EQUATIONS

Bioengineering Concentration Elective - 3 Credits *

Credits: 18

**Premed and Cellular Engineering Concentration students should take CHEM 0310 - ORGANIC CHEMISTRY 1 for the Concentration Elective.*

Fourth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1 * or
Concentration Elective (CHEM 0320 only)

Credits: 16(15)

** Premed and Cellular Engineering Concentration Students should take CHEM 0320 - ORGANIC CHEMISTRY 2 in the fourth term and ENGR 0020 in the sixth term.*

Junior Year

Fifth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1002 - INTRAMURAL INTERNSHIP *
BIOENG 1220 - BIOTRANSPORT PHENOMENA
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOSC 1250 - HUMAN PHYSIOLOGY
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
BIOENG 1241 - SOCTL, POL & ETHCL ISS BIOENG *

Credits: 18

** BIOENG 1002 may be taken Fall or Spring Term in the Junior or Senior year.*

Sixth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV #

Concentration Elective - 3 Credits * or
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1

Concentration Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits

Credits: 16(17)

#Either BIOENG 1580 or BIOENG 1680 may be taken instead of BIOENG 1255.

**Students who took CHEM 0320 in the fourth term must take ENGR 0020.*

Senior Year

Seventh Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1160 - BIOENGINEERING DESIGN 1
Concentration Elective - 3 Credits
Concentration Elective - 3 Credits
Engineering Science Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits

Credits: 15

Eighth Term

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1161 - BIOENGINEERING DESIGN 2
Human/Social Science Elective - 3 Credits
Concentration Elective - 3 Credits
Concentration Elective - 3 Credits
Engineering/Science Elective - 3 Credits

Credits: 15

Minor

Bioengineering Minor

Undergraduates in other departments can obtain a Minor in Bioengineering by satisfactorily completing (grade of C or better) one BioE seminar and five courses for a total of 16 credits. Students interested in a Bioengineering Minor are required to submit a completed BIOE Minor Checklist to the Bioengineering Undergraduate Administrator for course approvals PRIOR TO enrolling in BIOENG courses in order to ensure that the requirements for the minor are fulfilled. Approval to use substitute courses to meet minor requirements must be obtained in advance from the Bioengineering Undergraduate Administrator.

Requirements for the Bioengineering Minor are:

Bioengineering Seminar - 0 Credits

BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR

Basic Life Science Course - 3 Credits

Acceptable course options include (others may be used with permission)

BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

BIOSC 1000 - BIOCHEMISTRY or
BIOSC 1810 - MACROMOLECULAR STRUCT & FUNCTN or
CHEM 1810 - CHEMICAL BIOLOGY or
CHE 1530 - BIOCHEMISTRY FOR ENGINEERS

BIOSC 1250 - HUMAN PHYSIOLOGY
HRS 1020 - ANATOMY AND PHYSIOLOGY
HRS 1022 - HUMAN ANATOMY
HRS 1023 - HUMAN PHYSIOLOGY
HRS 1024 - INTRO TO NEUROSCIENCES

Course in Statistics - 4 Credits

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
or
STAT 1000 - APPLIED STATISTICAL METHODS

Three BIOENG Elective Courses - 9 Credits

NOTE: Students must meet prerequisites (or equivalent) to enroll in BIOENG courses.

BIOENG 0050 - WORKSHOP IN BIOENG DESIGN
BIOENG 0051 - WORKSHOP IN MEDICAL DEVICES
BIOENG 0052 - WORKSHOP IN OPENSIM
BIOENG 0053 - WORKSHOP IN STATISTICAL DESIGN
BIOENG 0054 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY
BIOENG 1002 - INTRAMURAL INTERNSHIP
BIOENG 1005 - RADIOFREQUENCY MEDICAL DEVICES
BIOENG 1050 - ARTIFICIAL ORGANS
BIOENG 1051 - ARTIFICIAL ORGANS 2
BIOENG 1052 - ARTIFICIAL ORGANS 3
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
BIOENG 1085 - INTRO TO BIOENGNRNG: SEMINAR
BIOENG 1095 - SPECIAL PROJECTS
BIOENG 1096 - UGRD TEACHING EXPERIENCE
BIOENG 1150 - BIOENG METHODS & APPLICATIONS
BIOENG 1160 - BIOENGINEERING DESIGN 1
BIOENG 1161 - BIOENGINEERING DESIGN 2
BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
BIOENG 1218 - EMERGING BIOMEDICAL TECHNOLOGIES
BIOENG 1220 - BIOTRANSPORT PHENOMENA
BIOENG 1241 - SOCTL, POL & ETHCL ISS BIOENG
BIOENG 1255 - DYNAMC SYSTMS: PHYSIO PERSPCTV
BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1
BIOENG 1320 - BIOLOGICAL SIGNALS & SYSTEMS
BIOENG 1330 - BIOMEDICAL IMAGING
BIOENG 1351 - COMPTR APPLCTNS IN BIOENGNRNG
BIOENG 1370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
BIOENG 1383 - BIOMEDICAL OPTICAL MICROSCOPY
BIOENG 1533 - CONTROLLED DRUG DELIVERY
BIOENG 1580 - BIOMD APPLC OF SIGNAL PROCING
BIOENG 1586 - QUAN SYSTEMS NEUROSCIENCE
BIOENG 1620 - INTRO TO TISSUE ENGINEERING

BIOENG 1630 - BIOMECH 1-MECHL PRIN BIO SYMS
BIOENG 1631 - BIOMECHANICS 2
BIOENG 1632 - BIOMECH 3: BIODYNAMICS OF MOVM
BIOENG 1633 - BIOMECHANICS 4
BIOENG 1680 - BIOMEDICAL APPLC OF CONTROL
BIOENG 1810 - BIOMAT AND BIOCOMPATIBILITY
ENGR 0501 - MUSIC ENGINEERING
ENGR 1770 - ENGINEERING FOUNDATIONS OF MUSIC

Additional Information

NOTE : BIOENG 1070 (Cell Biology 1) and BIOENG 1071 (Cell Biology 2) are considered Basic Life Science Courses. Neither can be used to satisfy a BIOENG elective course requirement.

NOTE : BIOENG 1241 (Societal, Political and Ethical Issues in Biotechnology) is a humanities/social science course that is restricted to Department of Bioengineering students only. The course cannot be used to satisfy a BIOENG elective course requirement.

NOTE : BIOENG 1095 (Special Projects) cannot be used to satisfy a BIOENG elective course requirement

Department of Chemical and Petroleum Engineering

Chemical engineering is concerned with processes in which matter and energy undergo change. Despite the historically-inspired name, the material/energy transformations studies by chemical engineers include not only chemical, but also physical and biological changes. The range of concerns, therefore, is so broad that the chemical engineering graduate is prepared for a variety of interesting and challenging employment opportunities. The chemical engineer with his/her strong background in chemical, physical, and biological sciences is found in management, design, operations, and research. The chemical engineer is employed in almost all industries including food, polymers, chemicals, pharmaceuticals, petroleum, medical, materials, and electronics. Since solutions to energy, environmental, medical, and food problems (to name but a few) must surely involve material and/or energy transformations, there will be continued demands for chemical engineers in the future. The chemical engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org

The major objectives of the chemical engineering program are that

- Graduates will gain employment in professional careers (often in positions of technical expertise in chemical engineering, but also including professions such as medicine, law, business, finance, non-profit organizations, government, education, etc.) and/or enroll in graduate studies.
- Graduates will be committed to lifelong learning throughout their careers.
- Graduates will assume positions of leadership.
- Graduates will recognize the importance of utilizing their knowledge, skills, and initiative for the benefit of society and demonstrate that understanding through their interactions within their community, in government, or in society as a whole.

The chemical engineering faculty have strong interests in transport phenomena, process dynamics, biotechnology, biomedical application, nanotechnology, kinetics, catalysis, thermodynamics, polymers, and energy supply and conversion. Petroleum engineering faculty interests are in fluid displacement in porous media and enhanced oil recovery and reservoir modeling. Courses and research opportunities are available in all of these areas for undergraduate students of demonstrated ability. For more information on these programs, contact che@engr.pitt.edu, or see http://www.engineering.pitt.edu/chemical

Major

Chemical Engineering - Biochemical Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Chemical Engineering Undergraduate Curriculum

Undergraduate chemical engineering courses cover thermodynamics; mass and energy balances; energy, mass, and momentum transfer; unit operations; process dynamics and control; process design; plant and product design; professional practice; and chemical reaction engineering.

In addition, the curriculum provides a sequence of technical electives that makes possible specialization in some of the most important areas in today's society. Among these are the biochemical, petroleum, and polymers areas of concentration. Students may select any combination of technical electives. The appropriate selection of electives, however, can lead to a minor or area of concentration. (See Minors in Engineering.)

Biochemical Concentration

Students interested in an area of concentration in biochemical engineering should take BIOSC 1000 - BIOCHEMISTRY, or CHE 0150 Biochemistry for Chemical Engineers as well as choose two courses from CHE 1531 - FUNDMS OF BIOCHEMICAL ENGR and CHE 1532 - BIOSEPARATIONS, among others.

Requirements

Third Term

CHEM 0310 - ORGANIC CHEMISTRY 1
CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
CHE 0101 - FOUNDATIONS OF CHE LABORATORY
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fourth Term

CHEM 0320 - ORGANIC CHEMISTRY 2
MATH 0290 - DIFFERENTIAL EQUATIONS *(also MATH 1270)*
CHE 0200 - CHEMICAL ENGR THERMODYNAMICS
CHE 0201 - CHE THERMODYNAMICS LABORATORY
CHE 0214 - INT TO CHEMICAL PRODC DESIGN
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
Humanities/Social Science - 3 Credits
CHE 0300 - TRANSPORT PHENOMENA
CHE 0301 - TRANSPORT PHENOMENA LABORATORY
CHE 0314 - TAKING PRODUCTS TO MARKET
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 17

Sixth Term

CHEM 1480 - INTERMEDIATE PHYSICAL CHEMSTRY
Composition Requirement - 3 Credits
CHE 0400 - REACTIVE PROCESS ENGINEERING
CHE 0401 - REACTIVE PROCESS ENGR LAB
Humanities/Social Science - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Engineering Elective - 3 Credits

Suggestions:

ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
ENGR 1700 - INTRO TO NUCLEAR ENGINEERING
ENGR 1701 - FUNDMS OF NUCLEAR REACTORS
ENGR 1702 - NUCLEAR PLANT TECHNOLOGY
ENGR 1869 - INTRO ELEC ENGRG FOR NON EE'S

Credits: 18

Seventh Term

CHE 0500 - SYMS ENGR 1: DYNAMICS & MODLNG
CHE 0501 - SYSTEMS ENGR 1 LABORATORY
Humanities/Social Science - 3 Credits

CHE 1530 - BIOCHEMISTRY FOR ENGINEERS or
BIOSC 1000 - BIOCHEMISTRY

Technical Elective - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Advanced Science - 3 Credits

Suggestions:

CHEM 0250 - INTRO ANALYTICAL CHEMISTRY
CHEM 1130 - INORGANIC CHEMISTRY
CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMRS
BIOSC 1500 - CELL BIOLOGY
BIOSC 1940 - MOLECULAR BIOLOGY

Advanced Lab - 1 Credit

Suggestions:

CHEM 0260 - INTRO ANALYTICAL CHEMISTRY LAB
CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
CHEM 1430 - PHYSICAL CHEMSTRY LABORATORY 1
CHEM 1605 - SYNTH & CHARCTRZTN POLYMRS LAB

Credits: 16

Eighth Term

CHE 0613 - SYS ENGNR 2: PROCESS DESIGN
CHE 0602 - CHE SAFETY AND ETHICS
ChE or PETE Elective - 3 Credits
Humanities/Social Science - 3 Credits
Professional Elective - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Total Credits Required For BS Degree 131

Chemical Engineering - Petroleum Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Chemical Engineering Undergraduate Curriculum

Undergraduate chemical engineering courses cover thermodynamics; mass and energy balances; energy, mass, and momentum transfer; unit operations; process dynamics and control; process design; plant and product design; professional practice; and chemical reaction engineering.

In addition, the curriculum provides a sequence of technical electives that makes possible specialization in some of the most important areas in today's society. Among these are the biochemical, petroleum, and polymers areas of concentration. Students may select any combination of technical electives. The appropriate selection of electives, however, can lead to a minor or area of concentration. (See Minors in Engineering.)

Petroleum Concentration

Students electing the petroleum engineering area of concentration would choose from a variety of classes including PETE 1160 - PETROLEUM RESERVOIR ENGINRING, PETE 1202 - PETROLM DRILLING & PRODUCTION, and PETE 1097 - SPECIAL PROJECTS among others.

Requirements

Third Term

CHEM 0310 - ORGANIC CHEMISTRY 1
CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
CHE 0101 - FOUNDATIONS OF CHE LABORATORY
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fourth Term

CHEM 0320 - ORGANIC CHEMISTRY 2
MATH 0290 - DIFFERENTIAL EQUATIONS *(also MATH 1270)*
CHE 0200 - CHEMICAL ENGR THERMODYNAMICS
CHE 0201 - CHE THERMODYNAMICS LABORATORY
CHE 0214 - INT TO CHEMICAL PRODC DESIGN
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
Humanities/Social Science - 3 Credits
CHE 0300 - TRANSPORT PHENOMENA
CHE 0301 - TRANSPORT PHENOMENA LABORATORY
CHE 0314 - TAKING PRODUCTS TO MARKET
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 17

Sixth Term

CHEM 1480 - INTERMEDIATE PHYSICAL CHEMSTRY
Composition Requirement - 3 Credits
CHE 0400 - REACTIVE PROCESS ENGINEERING
CHE 0401 - REACTIVE PROCESS ENGR LAB
Humanities/Social Science - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Engineering Elective - 3 Credits

Suggestions:

ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
ENGR 1700 - INTRO TO NUCLEAR ENGINEERING
ENGR 1701 - FUNDMS OF NUCLEAR REACTORS
ENGR 1702 - NUCLEAR PLANT TECHNOLOGY
ENGR 1869 - INTRO ELEC ENGRG FOR NON EE'S

Credits: 18

Seventh Term

CHE 0500 - SYMS ENGR 1: DYNAMICS & MODLNG
CHE 0501 - SYSTEMS ENGR 1 LABORATORY
Humanities/Social Science - 3 Credits

CHE 1530 - BIOCHEMISTRY FOR ENGINEERS or
BIOSC 1000 - BIOCHEMISTRY

Technical Elective - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Advanced Science - 3 Credits

Suggestions:

CHEM 0250 - INTRO ANALYTICAL CHEMISTRY
CHEM 1130 - INORGANIC CHEMISTRY

CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMRS
BIOSC 1500 - CELL BIOLOGY
BIOSC 1940 - MOLECULAR BIOLOGY

Advanced Lab - 1 Credit

Suggestions:

CHEM 0260 - INTRO ANALYTICAL CHEMISTRY LAB
CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
CHEM 1430 - PHYSICAL CHEMSTRY LABORATORY 1
CHEM 1605 - SYNTH & CHARCTRZTN POLYMRS LAB

Credits: 16

Eighth Term

CHE 0613 - SYS ENGNR 2: PROCESS DESIGN
CHE 0602 - CHE SAFETY AND ETHICS
ChE or PETE Elective - 3 Credits
Humanities/Social Science - 3 Credits
Professional Elective - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Total Credits Required For BS Degree 131

Chemical Engineering - Polymers Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *

PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Chemical Engineering Undergraduate Curriculum

Undergraduate chemical engineering courses cover thermodynamics; mass and energy balances; energy, mass, and momentum transfer; unit operations; process dynamics and control; process design; plant and product design; professional practice; and chemical reaction engineering.

In addition, the curriculum provides a sequence of technical electives that makes possible specialization in some of the most important areas in today's society. Among these are the biochemical, petroleum, and polymers areas of concentration. Students may select any combination of technical electives. The appropriate selection of electives, however, can lead to a minor or area of concentration. (See Minors in Engineering.)

Polymers Concentration

A number of chemical engineering graduates find employment with firms that produce polymeric materials. Those interested in preparing for the area of concentration in polymers would select CHE 1754 - PRINCIPLES OF POLYMER ENGINRNG, CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMRS (plus lab), and CHE 1097 - SPECIAL PROJECT (with polymer emphasis).

Requirements

Third Term

CHEM 0310 - ORGANIC CHEMISTRY 1
CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
CHE 0101 - FOUNDATIONS OF CHE LABORATORY
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fourth Term

CHEM 0320 - ORGANIC CHEMISTRY 2
MATH 0290 - DIFFERENTIAL EQUATIONS *(also MATH 1270)*
CHE 0200 - CHEMICAL ENGR THERMODYNAMICS
CHE 0201 - CHE THERMODYNAMICS LABORATORY
CHE 0214 - INT TO CHEMICAL PRODC DESIGN
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
Humanities/Social Science - 3 Credits
CHE 0300 - TRANSPORT PHENOMENA

CHE 0301 - TRANSPORT PHENOMENA LABORATORY
CHE 0314 - TAKING PRODUCTS TO MARKET
CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 17

Sixth Term

CHEM 1480 - INTERMEDIATE PHYSICAL CHEMSTRY
Composition Requirement - 3 Credits
CHE 0400 - REACTIVE PROCESS ENGINEERING
CHE 0401 - REACTIVE PROCESS ENGR LAB
Humanities/Social Science - 3 Credits
CHE 1085 - DEPARTMENTAL SEMINAR

Engineering Elective - 3 Credits

Minor

Chemical Engineering Minor

Requirements

Bioengineering majors can earn a Minor in Chemical Engineering by taking:

CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
and
CHE 0101 - FOUNDATIONS OF CHE LABORATORY
(OFFERED FALL SEMESTER ONLY)

CHE 0400 - REACTIVE PROCESS ENGINEERING
and
CHE 0401 - REACTIVE PROCESS ENGR LAB
(OFFERED SPRING SEMESTER ONLY)

Addional Information

Neither course satisfies an elective in any Bioengineering concentration. Both can, however, be used to satisfy the Bioengineering 2-couse, 6-credit advanced engineering/science elective requirement.

Petroleum Engineering Minor

Certificate

Energy Resource Utilization Certificate

The Energy Resource Utilization Certificate is designed for those students interested in both the development of new energy resources and the study of existing ones. Students in the Swanson School of Engineering may earn a certificate in energy resource utilization by completing two 6-credit courses. The first course, Energy Today, offered by the Chemical and Petroleum Engineering Department at the University of Pittsburgh, examines current technologies that supply energy from coal, petroleum, gas, and uranium. The second course, Energy Beyond 2000, offered by the University of New South Wales in Sydney, Australia, examines energy efficiency and renewable energy technologies and those techniques that will be used in the future to reduce dependence on fossil fuels. Both courses are offered in the summer term: Energy Today from mid-May to mid-June, and Energy Beyond 2000 from late June to early August.

Department of Civil Engineering

Civil engineers are concerned with safeguarding life, health, and property while promoting the general welfare of society. They are the designers of the public and private works that affect large segments of the population. However, because problems of expanding population and increasing human needs that confront our civilization, the responsibility of civil engineers extends beyond mere physical structures into the social, political, and economic welfare of the United States and other countries. In brief, the work of the civil engineer has a significant impact on the quality of life in all areas of modern society.

The civil engineer deals in environmental control and in the development or redevelopment of a geographic area through overall planning, as well as in the design, construction, and operation of structures and facilities for public and private use. This broad field of activity includes all types of structures for the following areas: buildings, bridges, and industrial installations; soil mechanics and foundations; transportation, including highways, traffic, airports, and harbors; hydraulic engineering, including irrigation; water resources, including power plants and dams; water supply; waste disposal; air pollution; hazardous and solid wastes; and environmental sanitation. Modern-day requirements have necessitated involvement in the medical and dental fields, oceanography, polar exploration, energy resources, and the space effort.

The educational objectives of the civil engineering major are as follows:

- Program graduates will have the skills to become successful civil engineering professionals and problem solvers;
- Program graduates will actively engage in lifelong learning, pursue professional licensure, and be professionally active;
- Program graduates will become leaders in shaping engineering and public policy; and
- Program graduates will be prepared for the successful pursuit of advanced degrees.

The undergraduate program begins by providing study in the humanities, social sciences, physical sciences, and mathematics, and proceeds to the fundamental aspects of civil engineering. The curriculum focuses on the electives available for designing individualized programs suited to the student's career goals. Emphasis is placed on societal needs and ways of meeting those needs. Thus, graduates are prepared to begin work in any of the several branches of civil engineering or to continue their education at the graduate level. The civil engineering program is accredited by the Engineering Accreditation Commission of ABET. http://www.abet.org.For more information on the civil and environmental engineering department, contact casson@pitt.edu or see http://www.engineering.pitt.edu/Departments/Civil-Environmental/_Content/Undergraduate/Civil-Engineering-at-Pitt/

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Civil Engineering Undergraduate Curriculum

The civil engineering major is designed for the students who enter the program after successfully completing their freshman year in the Swanson School of Engineering. Transfer students are also accepted to the program as space allows. In addition, summer programs are available primarily to assist students who are not taking the structured curriculum on schedule. Students are expected to complete all prerequisite courses before advancing to the next term. Beginning with the seventh term, a student may elect to obtain an area of concentration in one of the following areas: construction management, environmental engineering, geotechnical and pavement engineering, structural engineering, transportation engineering or water resources engineering.

Third Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
ENGR 0131 - STATICS FOR CIVL & ENVRL ENGNR
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
CEE 0085 - SOPHOMORE SEMINAR

Credits: 17

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0141 - MECHC OF MATLS CVL & ENV ENGR
CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1
CEE 1105 - MATERIALS OF CONSTRUCTION
ECON 0100 - INTRO MICROECONOMIC THEORY
Science Elective - 3 Credits
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 18

Fifth Term

CEE 1330 - INTRO TO STRUCTURAL ANALYSIS
CEE 1402 - FLUID MECHANICS
CEE 1811 - PRINCIPLES OF SOIL MECHANICS
ENGR 0151 - DYNAMICS CIVIL & ENVRN ENGNRS
Social Science Elective - 3 Credits
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

CEE 1200 - CONSTRUCTION MANAGEMENT

CEE 1609 - LIFE CYCL ASSMNT METHODS TOOLS or
CEE 1610 - ENGR SUSTAINABLE DEVELOPMENT or

Credits: 15

Eighth Term

Humanities/Social Science Elective - 3 Credits

CEE 1233 - CONSTRUCTION DESIGN PROJECT or
CEE 1333 - STRUCTURAL DESIGN PROJECT or
CEE 1433 - WATER RESOURCES DESIGN PROJECT or
CEE 1533 - ENVRL ENGR DESIGN PROJECT or
CEE 1733 - TRANSPORTATION DESIGN PROJECT or
CEE 1833 - GEOTECHNICAL DESIGN PROJECT

CEE-Elective - 3 Credits**

CEE-Elective - 3 Credits**
CEE-Elective - 3 Credits**
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Note:

*Design Electives are: (CEE 1340 or CEE 1341), (CEE 1410 or CEE 1401), (CEE 1505, CEE 1513 or CEE 1515), (CEE 1714 , CEE 1715, CEE 1821 or 1814). One course from each group is required.

**Any non-required CEE undergraduate courses, Mining Engineering Courses with the ENGR classification, 2000 level CEE graduate courses - and any ENGR course offered by the CEE Department are suitable for CEE Electives.

Minimum Grade Requirements

ENGR 0131 and ENGR 0141 must pass with a grade of "C" or higher. CEE 1330, CEE 1402, CEE 1503, CEE 1811 must pass with a grade of "C-" or higher. All design electives must pass with a grade of "C-" or higher.

Environmental Engineering, BSE

Undergraduate students majoring in environmental engineering develop a skill set that will enable them to tackle increasingly complex and rapidly evolving technological problems in environmental engineering. The environmental engineering major will allow the Department to produce environmental engineers who will be prepared to pursue a professional licensure in Environmental Engineering (once the program obtains ABET accreditation) and address future challenges in environmental engineering practice; pursue graduate study in environmental engineering; or pursue a career in business, law or policy with a strong focus on the environment.

The environmental engineering major leading to the Bachelor of Science in Engineering will prepare graduates to apply knowledge of mathematics through differential equations, probability and statistics, calculus-based physics, chemistry (including stoichiometry, thermodynamics, and kinetics), earth science, biological science, and fluid mechanics. The curriculum will prepare graduates to formulate material and energy balances, and analyze the fate and transport of substances in and between air, water, and soil phases; conduct laboratory experiments, and analyze and interpret the resulting data in more than one major environmental engineering focus area (e.g., air, water, land, energy, and sustainability); design environmental engineering systems that include considerations of risk, uncertainty, sustainability, life-cycle principles, and environmental impacts; and apply advanced principles and practice relevant to the program objectives. The curriculum will also prepare graduates to understand concepts of professional practice, project management, and the roles and responsibilities of public institutions and private organizations pertaining to environmental policy and regulations. The major objectives of the environmental engineering program are:

Program graduates will have the skills to become successful environmental engineering professionals and problem solvers;
Program graduates will actively engage in lifelong learning, pursue professional licensure, and be professionally active;
Program graduates will become leaders in shaping engineering and public policy; and
Program graduates will be prepared for the successful pursuit of advanced degrees.

The undergraduate program begins by providing study in the humanities, social sciences, physical sciences, and mathematics, and proceeds to the fundamental aspects of civil engineering. The curriculum focuses on the electives available for designing individualized programs suited to the student's career goals. Emphasis is placed on societal needs and ways of meeting those needs. The environmental engineering program will seek to be accredited by the Engineering Accreditation Commission of ABET once it produces the first program graduate (expected in April 2017). http://www.abet.org. For more information on the civil and environmental engineering department, contact casson@pitt.edu or see http://www.engineering.pitt.edu/Departments/Civil-Environmental/_Content/Undergraduate/Environmental-Engineering-at-Pitt/

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an

engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques

for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Environmental Engineering Undergraduate Curriculum

The environmental engineering major program is designed for the students who enter the program at the end of their freshman year. Transfer students are also accepted to the program as space allows. In addition, summer programs are available primarily to assist students who are not taking the structured curriculum on schedule or students participating in the cooperative study program. Students are expected to complete all prerequisite courses before advancing to the next term.

Third Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
ENGR 0131 - STATICS FOR CIVL & ENVRL ENGNR
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
CEE 0085 - SOPHOMORE SEMINAR
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 17

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0141 - MECHC OF MATLS CVL & ENV ENGR
CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1
CHEM 0310 - ORGANIC CHEMISTRY 1
ECON 0100 - INTRO MICROECONOMIC THEORY
Physical Science Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 18

Fifth Term

BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
CEE 1402 - FLUID MECHANICS
CEE 1811 - PRINCIPLES OF SOIL MECHANICS
CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT
Social Science Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Sixth Term

CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING

CEE 1209 - LIFE CYCLE ASSMNT METH & TOOLS or
CEE 1609 - LIFE CYCL ASSMNT METHODS TOOLS or
CEE 1610 - ENGR SUSTAINABLE DEVELOPMENT or
CEE 1618 - DESIGN FOR THE ENVIRONMENT

CEE 1412 - INTRODUCTION TO HYDROLOGY
CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
CEE 1523 - ENVIRONMENTAL ENGINEERING LAB
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Seventh Term

CEE 1505 - WATR TRETMNT & DISTB SYS DESGN
CEE 1515 - WASWTR COLLC & TRMNT PLNT DSGN

CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
Environmental Engineering Elective - 3 credits
Engineering Elective - 3 credits
Humanities/Social Science Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Eighth Term

Humanities/Social Science Elective - 3 credits
CEE 1533 - ENVRL ENGR DESIGN PROJECT
Civil Engineering Elective - 3 credits

CEE 1401 - OPEN CHANNEL HYDRAULICS or
CEE 1410 - WATER RESOURCES ENGINEERING

Environmental Engineering Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Minimum Grade Requirements

ENGR 0131 and ENGR 0141 must be passed with a grade of "C" or higher.
CEE 1503 , CEE 1505 /CEE 1515 , CEE 1513 and CEE 1523 must be passed with a grade of "C-" or higher.

Minor

Civil Engineering Minor

Environmental Engineering Minor

Requirements

Bioengineering majors can earn a Minor in Environmental Engineering by completing five courses.

CEE 1412 - INTRODUCTION TO HYDROLOGY
CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
CEE 2507 - INDUSTRIAL WASTE MANAGEMENT
CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMNT

Additional Information

None of the courses can be used for any Bioengineering concentration elective. Two can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The remaining three are extra and on your own.

Certificate

Civil Engineering and Architectual Studies

Recognizing the close relations between architects and structural engineers, in particular, a special program of cooperation was established in 1990 between the Department of Architectural Studies of the School of Arts and Sciences, and the Civil & Environmental Engineering Department. Students from the Civil & Environmental Engineering Department may elect to study for a certificate in architectural studies. The certificate is described at the following location: http://www.arch.pitt.edu/program/related-areas.php#civil-engineeringcertificate

Interested students should work with their respective advisor to select the most appropriate classes for this opportunity.

Related Area in Architectural Studies for Engineering Students

The related area in architectural studies is intended to offer students majoring in engineering an opportunity to explore the aesthetic side of problem-solving design activity. The selection of courses can be formulated to fit the interests and goals of the individual student. The related area may range

from 12 to 15 credits that may be used to partially satisfy the 18-credit Swanson School of Engineering humanities/social sciences requirements. Engineering students selecting this option must take HAA 0040 - INTRO TO WESTERN ARCHITECTURE, and HAA 1040 - ARCH: IMAGE, TEXT, THEORY is strongly recommended. Students may elect either two or three courses in the history of architecture, e.g., HAA 0045 - INTRO TO MODERN ARCHITECTURE, HAA 1306 - HIGH RENAISSANCE ARCHITECTURE, and HAA 1160 - ROMAN ARCHITECTURE or HAA 1480 - ARCHITECTURE SINCE 1945 and HAA 1913 - FOUNDATIONS STUDIO 1 for Architectural Studies Majors. Please contact the Department of Civil and Environmental Engineering at http://www.engineering.pitt.edu/civil/ or by calling 412-624-9870.

Civil Engineering Certificate

A certificate in elementary structural engineering for architectural studies majors is available under the auspices of the Swanson School of Engineering's Department of Civil and Environmental Engineering. It offers a technical, professional component to the major. It consists of a minimum of 27 credits and includes courses in statics and particle dynamics, mechanics of materials, structural analysis, computer methods, concrete structures, and metal structures. Students must go to the Department of Civil and Environmental Engineering in 742 Benedum Hall to declare the Civil Engineering Certificate.

Prerequisite courses

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1

One of the following courses

CS 0007 - INTRO TO COMPUTER PROGRAMMING
CS 0401 - INTRMEDT PROGRMMING USING JAVA

One of the following courses

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
MATH 0235 - HONORS 1 - VARIABLE CALCULUS

One of the following courses

PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1 (Honors)

One of the following courses

PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2 (Honors)

Required courses

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0131 - STATICS FOR CIVL & ENVRL ENGNR
ENGR 0141 - MECHC OF MATLS CVL & ENV ENGR
CEE 1105 - MATERIALS OF CONSTRUCTION
CEE 1330 - INTRO TO STRUCTURAL ANALYSIS

At least one of the following courses*

* If taking only one of these courses, the student must also complete CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1.

CEE 1340 - CONCRETE STRUCTURES 1
CEE 1341 - STEEL STRUCTURES 1

Mining Engineering Certificate

The Minerals Industry is a vital and growing part of the US economy and the demand for professionals with knowledge and skills in the field of mining engineering is high. To help address this demand the Swanson School of Engineering offers three Mining Engineering Certificates. One certificate is for undergraduate engineers and geologists and requires three mining courses and two department specific courses. A second is for graduate engineering students and a third is for Post-Baccalaureate students with a BS degree. Both of these certificates require five mining engineering courses. Many of the mining engineering courses are offered via the distance learning format so professionals working in the minerals industry can participate from remote locations. Course work focuses on health and safety and environmental issues in the minerals industry and utilizes field trips to operating mines to demonstrate important principles. Interested students should check http://www.engineering.pitt.edu/mining/ for updated information on this program.

Sustainable Engineering Certificate

An undergraduate Certificate in Sustainable Engineering is available to all undergraduate engineering students. The certificate is housed in the Department of Civil and Environmental Engineering and administered through the Mascaro Center for Sustainable Innovation. The certificate provides interested students with an awareness and sensitivity to environmental issues and consequences of engineering systems consistent with their engineering major. The certificate builds upon an increasing number of courses being offered with an emphasis on sustainability and requires 12 credits to complete.

For information on this program contact:

Melissa Bilec

mbilec@pitt.edu

Department of Electrical and Computer Engineering

Computer Engineering

Computer engineers are active in and in demand for all phases of technology research, design and development, testing, manufacturing, sales, and management of computer technologies. In addition, many successful leaders in other professions, such as law, medicine, and business, pursue an undergraduate education in computer engineering as preparation for later professional study. Thus the undergraduate curriculum provides preparation in both mathematics and physical sciences, coupled with coverage of all aspects of computing, software, hardware, design, and application. The program's flexible elective structure offers the student considerable opportunity for professional specialization, area specialization within the computing discipline, or interdisciplinary broadening. The computer engineering program is accredited by the Engineering Accreditation Commission of ABET. http://www.abet.org. For more information about the program, contact compengr@engr.pitt.edu or see http://www.engineering.pitt.edu/

Electrical Engineering

Electrical engineers are involved in research, design, development, testing, manufacturing, sales, and management of electrical systems and devices, such as televisions, wireless telephone systems, computers and computer networks, patient monitoring equipment, and power generation and distribution systems. Many successful leaders in professions such as law, medicine, and business have used an undergraduate education in electrical engineering as preparation for later professional study. The undergraduate curriculum includes required courses in the basic electrical and physical sciences as well as electives that provide the student an opportunity to choose professional specialization or interdisciplinary breadth. The

curriculum also includes elective courses in the humanities and social sciences to provide a balanced, liberal education so that the graduate may participate creatively in society and become both an educated and effective citizen.

During the sophomore year, electrical engineering students take courses in calculus, matrix theory, differential equations, and communication skills. There are also required electrical engineering courses in linear circuits and systems, digital logic, computer organization, electronics, and an introductory lab. In the junior year, students have required courses in signals and systems, electromagnetics, semiconductor electronics, laboratories in signal processing and electronic circuit design, and elective courses. During the senior year, students take only electives, including electrical engineering (EE) electives, selected from more than 25 offerings. The culmination of the student's curriculum is the Senior Design elective, in which the student initiates and completes a significant design project. Each term students take the undergraduate seminar, which addresses professional issues and career opportunities. All undergraduate students are required to use computers and computer software in project work and in homework assignments.

Non-EE elective courses in the undergraduate program include humanities and social science electives, a communication skills course, an open elective, and technical electives. The humanities and social science electives must be selected from the list of acceptable electives compiled by the school. The communications skills elective is also chosen from a list available on the department web site. The open elective may be satisfied by taking a course that is acceptable for any other elective course category, or by using (for example) 3 credits of band, Reserve Officer Training Corps (ROTC), 3 rotations of co-operative education or chorus. Technical electives may include electrical engineering electives, courses in other engineering disciplines, mathematics courses, or basic science courses. The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET. http://www. abet.org. For more information on the program, visit our website or contact eeadmin@ee.pitt.edu.

The overall objective of the EE program is for our graduates to be successful professionals in the diverse, global environment of the 21st century. This entails the ability to adapt to new and shifting technologies, in whatever career path they choose to pursue. This includes careers in electrical engineering through employment in industry, government or private practice, as well as careers in other engineering or professional disciplines such as bioengineering, computer engineering, business, law, or medicine. Our graduates can also pursue advanced study in electrical engineering or other engineering or professional fields and be able to serve in leadership positions in academia, industry or government.

Specialization and Interdisciplinary Studies

Specialization is readily available for students with specific career goals. To facilitate specialization, optional areas of concentration have been defined to allow a student to develop strength in a particular area of interest. Areas of concentration that are currently available include digital systems, electronics, telecommunications/signal processing and power. Requirements for the areas of concentration are met by proper selection of design and other elective courses. Students may take some courses in an area of concentration without completing all of the requirements.

For students interested in interdisciplinary studies, special programs can be arranged using the elective structure that exists within the regular electrical engineering curriculum. Formal interdisciplinary programs have been developed through minors offered by other engineering departments. Students may use electives to satisfy both EE and minor requirements.

Major

Computer Engineering, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS

ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Computer Engineering Undergraduate Curriculum

The sophomore year (terms three and four) starts the student's specialization with courses in programming; data structures; digital logic; computer organization and the digital systems laboratory; as well as linear algebra and differential equations; linear systems and circuits; and electives in the humanities, social sciences, and communications skills. The junior year (terms five and six) develops the student's knowledge in the practical foundations of computer engineering with courses in algorithm design, computer architecture, systems software, an advanced digital laboratory, and computer interfacing. These are complemented with courses in probability and statistics, as well as with electives in the humanities and social sciences. The senior year (terms seven and eight) continues the foundation sequence with software engineering and then extends the student's experience with both technical and design electives in computer engineering. The rich set of electives available from computer engineering, computer science, telecommunications, and electrical engineering provides the student with exposure to several of the many subdisciplines within the field.

The overall objective of the computer engineering program is to prepare individuals to be confident and successful in whatever path they choose to pursue in the 21st century global economy. This includes those who move into practice within the computer engineering discipline either through employment in industry or government, or through a start-up of their own, those who move on to advanced computer study and research in graduate school, or those that move into other professions such as law, business, or management.

As indicated, the program has considerable elective flexibility. The humanities and social science electives must be selected from the list of acceptable courses compiled by the Swanson School of Engineering. The open elective may be satisfied by any University course, including band, Reserve Officers Training Corps (ROTC), or physical education. Technical electives may include computer engineering; electrical engineering; computer science; or other engineering, mathematics, or basic science courses.

Third Term

COE 0401 - INTRMEDT PROGRMMING USING JAVA or
CS 0401 - INTRMEDT PROGRMMING USING JAVA

COE 0132 - DIGITAL LOGIC or
ECE 0132 - DIGITAL LOGIC

COE 0031 - LINEAR CIRCUITS AND SYSTEMS 1 or
ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1

Electrical Engineering, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)

ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Electrical Engineering Undergraduate Curriculum

Third Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1
ECE 0132 - DIGITAL LOGIC
ECE 1885 - DEPARTMENTAL SEMINAR
Humanities/Social Science Elective 3 - 3 Credits

Communications Skills Elective - 3 Credits

Credits: 15

Fourth Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
ECE 0041 - LINEAR CIRCUITS AND SYSTEMS 2
ECE 0142 - COMPUTER ORGANIZATION
ECE 0501 - DIGITAL SYSTEMS LABORATORY
ECE 0257 - ANAL & DESIGN ELECTRONIC CIRCT
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

ECE 1247 - SEMICONDUCTOR DEVICE THEORY
ECE 1201 - ELECTNC MEASURMNTS & CRCTS LAB
ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS
ECE 1259 - ELECTROMAGNETICS 1
Humanities/Social Science Elective 4 - 3 Credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
ECE 1563 - SIGNAL PROCESSING LABORATORY
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
Technical Elective 1 - 3 Credits
Humanities/Social Science Elective 5 - 3 Credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

ECE-Design Elective - 3 Credits
ECE-Elective 1 - 3 Credits
ECE-Elective 2 - 3 Credits
Technical Elective 2 - 3 Credits
ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 16

Eighth Term

ECE-Elective 3 - 3 Credits
ECE-Elective 4 - 3 Credits
Technical Elective 3 - 3 Credits
Humanities/Social Science Elective 6 - 3 Credits
Open Elective - 3 Credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Each student must complete at least four ECE elective courses from the following list.

There are additional special topics courses offered to address changes in technology.

ECE 1150 - INTRO TO COMPUTER NETWORKS
ECE 1160 - INTRO EMBDDED SYSTEM DESIGN
ECE 1161 - EMBEDDED COMPUTER SYS DESIGN 2
ECE 1180 - CMPTL MODLNG & SIMUL ENGRNS
ECE 1186 - SOFTWARE ENGINEERING
ECE 1192 - INTRODUCTION TO VLSI DESIGN
ECE 1232 - INTRO LASERS & OPTCL ELECTNC
ECE 1236 - ELECTRNC DESIGN INTGD CIRCUITS
ECE 1238 - DIGITAL ELECTRONICS
ECE 1266 - APPLICTIONS OF FIELDS & WAVES
ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT
ECE 1390 - INTRO TO IMAGE PROCESSING
ECE 1472 - ANALOG COMMUNICATION SYSTEMS
ECE 1473 - DIGITAL COMMUNICATION SYSTEMS
ECE 1562 - DIGITAL AND ANALOG FILTERS
ECE 1673 - LINEAR CONTROL SYSTEMS
ECE 1700 - CONSTRCT/COST ELECTRICAL SUPLY
ECE 1710 - PWR DISTB SYS ENGR SMART GRIDS
ECE 1769 - POWER SYSTEM ANALYSIS 1
ECE 1771 - ELECTRIC MACHINERY
ECE 1773 - POWER GENERATION, OPER & CTRL

Each student must complete at least one ECE design elective from the following list.

ECE 1161 - EMBEDDED COMPUTER SYS DESIGN 2
ECE 1193 - ADVANCED VLSI DESIGN
ECE 1896 - SENIOR DESIGN PROJECT
ENGR 1050 - PRODUCT REALIZATION (with approval)

Note:

Students are asked to present and demonstrate their design projects at one of the ECE department's senior design expos, which are held near the end of the fall and spring terms. These design electives can also be used to satisfy ECE elective requirements. However, a given course can only be used to satisfy one requirement.

Minor

Electrical Engineering Minor

Bioengineering majors can earn a Minor in Electrical Engineering by completing three required courses and three elective courses.

Required Courses

Required Courses:

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1 or
BIOENG 1310 - LINEAR SYSTEMS & ELECTRONICS 1

ECE 0041 - LINEAR CIRCUITS AND SYSTEMS 2
ECE 0132 - DIGITAL LOGIC

Electives

While the three elective courses can be selected from any offered in Electrical Engineering, the following provide focus in a particular area.

Electronics

ECE 1247 - SEMICONDUCTOR DEVICE THEORY
ECE 1238 - DIGITAL ELECTRONICS
ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT

Instrumentation

The two courses listed below, plus another ECE course.

ECE 1201 - ELECTNC MEASURMNTS & CRCTS LAB
ECE 1247 - SEMICONDUCTOR DEVICE THEORY

Digital Systems

NOTE: BioE students may not use credit for both BIOENG 1680 and ECE 1683 toward graduation.

ECE 0142 - COMPUTER ORGANIZATION or
COE 0142 - COMPUTER ORGANIZATION

ECE 1192 - INTRODUCTION TO VLSI DESIGN
ECE 1673 - LINEAR CONTROL SYSTEMS

Signals and Systems

NOTE: BioE students may not use credit for ECE 1552 toward graduation (duplication of BIOENG 1320).

The two courses listed below, plus another ECE course.

ECE 1562 - DIGITAL AND ANALOG FILTERS
ECE 1673 - LINEAR CONTROL SYSTEMS

Concentrations

Bioengineering majors need five ECE courses to obtain the minor.

Bioimaging & Signals Concentration

Bioimaging & Signals concentration students can use two ECE courses as concentration electives and two ECE courses toward the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The fifth course is extra and on your own.

Biomechanics, CE, and MPE Concentration

Biomechanics, CE, and MPE concentration students can use two ECE courses to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The remaining three courses are extra and on your own.

Department of Industrial Engineering

Industrial Engineering (IE) is all about choices. It is the engineering discipline that offers the most wide-ranging array of opportunities in terms of employment, and it is distinguished by its flexibility. While other engineering disciplines tend to apply skills to specific areas, industrial engineers may be found working everywhere from traditional manufacturing companies to airlines, distribution companies to financial institutions, hospitals to consulting companies, high-tech corporations to luxury retailers. Engineers are educated to design and build things, but IEs are educated to design and improve the productivity and quality of integrated systems of people, material, computers, information, equipment, and other resources. IEs draw upon the specialized knowledge and skills in the mathematical, physical and social sciences together with the principles, methods and modeling tools of engineering analysis to make improvements in business processes. In addition to making significant contributions to corporate profitability, they also make the workplace a more productive and streamlined environment. The Department of Industrial Engineering meets the challenge of the growing complexity of modern industry through an intensive educational program that includes a required international component. Building upon a solid foundation in the basic sciences, engineering, and computers, the curriculum provides the student with a capability for systems analysis and design that crosses traditional disciplinary lines and an awareness of and concern for the demands of today's dynamic social systems. The industrial engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Major

Industrial Engineering, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Undergraduate Curriculum

The objectives of our undergraduate program are for our graduates to be:

- Successful professionals, who adapt to changes in technology and our global society in their desired career path, including industrial engineering based careers, as well as other professional disciplines;
- Lifelong learners and pursuers of advanced knowledge;
- Active leaders in their profession and/or community.

The IE faculty has committed itself to the broad, multidisciplinary approach needed to solve problems in today's organizations. In addition to core courses in industrial engineering, you will be exposed to the humanities and social sciences with a global focus and have the opportunity to select four technical electives. These technical electives may be chosen from specialized and advanced offerings of the industrial engineering department. In consultation with your advisor, up to two of these electives may be selected from other programs in the University such as other engineering departments, the sciences, mathematics, economics, business, computer science, or information science.

Recognizing that engineering is an increasingly global profession, the undergraduate program is also committed to providing its graduates with the skills they need to compete on an international basis. Such skills will enable Pitt IE graduates to not only have a distinct employment advantage, but will also provide them with a cross-cultural awareness that will enhance their leadership abilities. This commitment is emphasized through an international requirement for all of our undergraduates for which students are expected to complete an international experience, or, in some cases select an integrated set of humanities and social sciences courses with a global focus. The final term of our undergraduate program includes a capstone senior design course in which you, working in small teams with other students, will complete a semester long project in a corporate setting. These projects are sponsored by local industry through our Sponsor An Industrial Engineering Team (SAINT) program, jointly supervised by an individual from the company and an IE faculty member.

For more information on the industrial engineering program contact ugradie@pitt.edu or www.engineering.pitt.edu/industrial

Third Term

- MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
- IE 1040 - ENGINEERING ECONOMIC ANALYSIS
- IE 1054 - PRODUCTIVITY ANALYSIS
- IE 1070 - PROBLTY, RANDOM VARBLS, DISTBS
- ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
- IE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- IE 0015 - INTRO INFORMATION SYS ENGINRNG
- IE 1052 - MFG PROCESSES AND ANALYSIS
- IE 1071 - STATSTCL TESTING & REGRESSION
- Focused Elective (see approved list) - 3 Credits
- IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fifth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
IE 1051 - ENGINEERING PRODUCT DESIGN
IE 1061 - HUMAN FACTORS ENGINEERING
IE 1081 - OPERATIONS RESEARCH
ENGR 1869 - INTRO ELEC ENGRG FOR NON EE'S
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

IE 1035 - ENGINEERING MANAGEMENT
IE 1055 - FACLT LAYOUT & MATRL HANDLING
IE 1082 - PROBLSTC METH IN OPERATNS RES
IE 1083 - SIMULATION MODELING
Humanities/Social Science Elective 3 - 3 Credits
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

IE 1080 - SUPPLY CHAIN ANALYSIS
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
Technical Elective 1 - 3 Credits
Technical Elective 2 - 3 Credits
Humanities/Social Science Elective 4 - 3 Credits
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

IE 1090 - SENIOR PROJECTS
Humanities/Social Science Elective 5 - 3 Credits
Humanities/Social Science Elective 6 - 3 Credits
Technical Elective 3 - 3 Credits
Technical Elective 4 - 3 Credits
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Minor

Industrial Engineering Minor

Bioengineering majors can earn a Minor in Industrial Engineering by completing two required courses and three elective courses.

Required Courses

ENGR 0020 - PROBLTY & STAT FOR ENGINEERS 1
IE 1054 - PRODUCTIVITY ANALYSIS

Elective Courses

Choose any 3 of the following courses.

IE 1035 - ENGINEERING MANAGEMENT
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
IE 1051 - ENGINEERING PRODUCT DESIGN
IE 1052 - MFG PROCESSES AND ANALYSIS
IE 1061 - HUMAN FACTORS ENGINEERING
IE 1080 - SUPPLY CHAIN ANALYSIS
IE 1081 - OPERATIONS RESEARCH
IE 1083 - SIMULATION MODELING

Additional Information

Since Bioengineering majors are required to take ENGR 0020 , the Industrial Engineering Minor requires 4 additional courses.

Bioimaging & Signals and CE students can use two of the four courses to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The other two courses are extra and on your own.
Biomechanics concentration students can use IE 1061 as a concentration elective. Two courses can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The last course is extra and on your own.
MPE concentration students can use IE 1051 , IE 1052 and IE 1061 as concentration electives. The fourth course can be used to satisfy one of the courses for the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Department of Mechanical and Materials Engineering

Materials Science and Engineering

Materials limitations often impede technological and social progress. The materials engineer applies special knowledge of the structure, behavior, and properties of materials to solve these engineering problems. The engineer may be concerned with developing and improving processes for producing metals and alloys or ceramics; developing new alloys or improving existing alloys; and/or achieving better use of alloys and other materials. New materials must be designed for a variety of functions, including structural, esthetic, electrical, or magnetic and operating environments. Materials may come in forms so minute that the work is done under a microscope or in forms so large that special handling cranes are required.

Research efforts in the department involve work on the development of new high-strength steels, corrosion and oxidation, structural and electronic ceramics, smart materials, high-temperature materials, plastic deformation, phase transformations, and strengthening mechanisms. A number of graduate students are engaged in thesis research on these topics, and undergraduates are encouraged to work on related senior projects. The materials science and engineering program is accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org. For more information on the program, contact undrmems@engr.pitt.edu or see http://www.engineering.pitt.edu/MEMS/Undergraduate/Materials_Science_and_Engineering_Curriculum/.

Mechanical Engineering

Mechanical engineering is concerned with both energy use and the design of machines and systems in such sectors as transportation, manufacturing, materials handling, power generation, and environmental control. Mechanical engineers are involved in design, development, research, management, and related activities in these fields. The breadth and diversity of the profession requires an undergraduate curriculum that provides a sound foundation in the basic sciences, computational skills including use of computers, and the fundamentals of engineering and engineering design. This curriculum provides a base for future professional growth and is also an excellent background for those who wish to pursue careers in other professions including management, law, or medicine. The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET< http://www.abet.org. For more information on the program, contact pittmems@engr.pitt.edu or see http://www.engr.pitt.edu/MEMS/Undergraduate/Mechanical_Engineering_Curriculum/.

Major

Engineering Science - Engineering Physics Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Engineering Science

The Engineering Science Program is designed for students who have a strong interest in science and mathematics as well as a desire to acquire the skills and perspective of engineering. The Engineering Science Program offers flexible curricula in several interdisciplinary areas of concentration. The program is built on sequences of courses from multiple science and engineering programs. All areas of concentration combine in-depth exposure

to both science and engineering. All areas of concentration include a two-term capstone design experience. The overall goal of the program is to develop each student's ability to think analytically across disciplines and develop a knowledge base well suited to tackle future technical challenges that will require a thorough understanding of a discipline in the physical sciences and/or mathematics combined with engineering. Interested students are encouraged to pursue the Engineering Science degree jointly with the University Honors College (UHC) by completing the requirements for Engineering Science and satisfying the special degree requirements of the UHC. The Engineering Science program is ideal preparation for graduate school in a wide range of disciplines, for rewarding careers in industry, and is an excellent background for those who wish to pursue careers in other professions, such as management, law, education, or medicine.

NOTE: The Engineering Physics curriculum (which had been available as a separate Engineering Physics Program until 2010) is now an *area of concentration* within Engineering Science.

The program objectives for Engineering Science are to produce engineers who build successful, diverse careers based on:

- an understanding of the physical/life sciences, engineering analysis and design, and interdisciplinary problem solving;
- a commitment to ongoing professional development as exemplified by, for example, graduate study, training, conference participation, and certification;
- advancement and leadership in professional and/or community life.

For more information on the program, contact undrmems@pitt.edu or see
http://www.engineering.pitt.edu/MEMS/Undergraduate/ESCI/What_is_Engineering_Science_/

Engineering Science Undergraduate Curriculum

The Engineering Science Program currently offers three areas of concentration: **Engineering Physics, Nanotechnology, and Nuclear Energy.**

Engineering Physics

Engineering Physics prepares students for engineering practice based on a curriculum designed to develop an understanding of physics and its application in electrical engineering and materials science through classroom instruction and hands-on laboratory experience. The core of the curriculum is comprised of a sequence of fundamental courses in modern physics, electricity and magnetism of materials, design of electronic circuits, semiconductor devices, and signal processing. The curriculum culminates with program electives and a two-term Senior Design sequence. The design project builds on the knowledge gained in coursework and emphasizes independent and team problem solving under the guidance of a faculty mentor.

Area of Concentration: Engineering Physics Sample Curriculum

Third Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1
PHYS 0219 - BASIC LAB PHYS SCIENCE & ENGRG
Humanities/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ECE 0041 - LINEAR CIRCUITS AND SYSTEMS 2

ECE 0257 - ANAL & DESIGN ELECTRONIC CIRCT
EE 1201 Electronic Measurements and Circuits Laboratory - 3 Credits
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fifth Term

MEMS 1053 - STRUCT OF CRYSTALS & DIFFRCTN
MEMS 1059 - PHASE EQUILIBRIA IN MATERIALS`
PHYS 0477 - INT THERMAL AND MODERN PHYSICS
Upper Level Physics - 3 Credits
Upper Level Physics - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Sixth Term

MEMS 1063 - PHASE TRANSFRMTN AND EVOLUTION
ECE 1247 - SEMICONDUCTOR DEVICE THEORY
ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS
PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
Humanity/Social Science Elective 4 - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

MEMS 1058 - ELECTROMAGNETIC PROPS MATRLS
ECE 1266 - APPLICTIONS OF FIELDS & WAVES
Senior Design 1 - 3 Credits
P-Upper Level Physics - 3 Credits
Program Elective - 3 Credits
Humanity/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18

Eighth Term

Upper Level Mathematics - 3 Credits
ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
Senior Design 2 - 3 Credits
Program Elective - 3 Credits
Humanity/Social Science Elective - 3 Credits

MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Total Credits: 131

Note:

1 or PHYS 1341

2 or MEMS 1010, MEMS 1057, MEMS 1070

Senior Design: at least one senior design course offered by one of the other SSOE engineering programs is required; the second course may be a senior project arranged with a faculty mentor and taken as ENGSCI 1801. Students wishing to complete a two-term project with a faculty mentor may request approval for the second term to count as a program elective (ENGSCI 1802

Upper Level Physics: Physics courses with course numbers > 1000
Upper Level Mathematics: Mathematics courses with course numbers> 1000

Engineering Science - Nanotechnology Concentration Chemistry/Bioengineering Emphasis, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1

Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or

Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Engineering Science

The Engineering Science Program is designed for students who have a strong interest in science and mathematics as well as a desire to acquire the skills and perspective of engineering. The Engineering Science Program offers flexible curricula in several interdisciplinary areas of concentration. The program is built on sequences of courses from multiple science and engineering programs. All areas of concentration combine in-depth exposure to both science and engineering. All areas of concentration include a two-term capstone design experience. The overall goal of the program is to develop each student's ability to think analytically across disciplines and develop a knowledge base well suited to tackle future technical challenges that will require a thorough understanding of a discipline in the physical sciences and/or mathematics combined with engineering. Interested students are encouraged to pursue the Engineering Science degree jointly with the University Honors College (UHC) by completing the requirements for Engineering Science and satisfying the special degree requirements of the UHC. The Engineering Science program is ideal preparation for graduate school in a wide range of disciplines, for rewarding careers in industry, and is an excellent background for those who wish to pursue careers in other professions, such as management, law, education, or medicine.

NOTE: The Engineering Physics curriculum (which had been available as a separate Engineering Physics Program until 2010) is now an *area of concentration* within Engineering Science.

The program objectives for Engineering Science are to produce engineers who build successful, diverse careers based on:

- an understanding of the physical/life sciences, engineering analysis and design, and interdisciplinary problem solving;
- a commitment to ongoing professional development as exemplified by, for example, graduate study, training, conference participation, and certification;
- advancement and leadership in professional and/or community life.

For more information on the program, contact undrmems@pitt.edu or see
http://www.engineering.pitt.edu/MEMS/Undergraduate/ESCI/What_is_Engineering_Science_/

Engineering Science Undergraduate Curriculum

The Engineering Science Program currently offers three areas of concentration: **Engineering Physics, Nanotechnology, and Nuclear Energy.**

Area of concentration: Nuclear Energy

Sample Curriculum

Third Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
H/SS Elective 3 - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0145 - STATICS & MECHC OF MATERIALS 2

MEMS 0031 - ELECTRICAL CIRCUITS or

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1

MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
MEMS 1015 - RIGID-BODY DYNAMICS
H/SS Elective 4 - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18

Fifth Term

MEMS 1053 - STRUCT OF CRYSTALS & DIFFRCTN
ENGR 1700 - INTRO TO NUCLEAR ENGINEERING
PHYS 0477 - INT THERMAL AND MODERN PHYSICS
PHYS 1351 - INTERMEDT ELECTRCITY/MAGNETISM
MATH 1470 - PARTIAL DIFFERNTL EQUATIONS 1
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

MEMS 0071 - INTRO TO FLUID MECHANICS
ENGR 1701 - FUNDMS OF NUCLEAR REACTORS
PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
ECE 0041 - LINEAR CIRCUITS AND SYSTEMS 2
H/SS Elective 5 - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

Senior Design 1 - 3 Credits
ENGR 1702 - NUCLEAR PLANT TECHNOLOGY
Program Elective 1 - 3 Credits
Program Elective 2 - 3 Credits
H/SS Elective 6 - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

Senior Design 2 - 3 Credits
MEMS 1071 - APPLIED FLUID MECHANICS
BIOENG 1330 - BIOMEDICAL IMAGING
Program Elective 3 - 3 Credits
Program Elective 4 - 3 Credits

MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Note:

* at least one senior design course offered by one of the other SSOE engineering programs is required; the second course may be a senior project arranged with a faculty mentor and taken as ENGSCI 1801. Students wishing to complete a two-term project with a faculty mentor may request approval for the second term to count as a program elective (ENGSCI 1802).

Program Electives (12 credits)

To earn a B.S. in Engineering Science with a concentration in Nuclear Energy students take an additional 12 credits of Program Electives in addition to the required courses. The 12 credits must include an area of emphasis consisting of at least 6 credits of interrelated courses demonstrating depth of knowledge. At least 6 of the 12 program elective credits must be in Engineering, Science, or Math. Potential 2-course areas of emphasis are listed below but sequences in foreign languages and culture, economics, business, and other areas can be approved by the ESCI program director.

Potential areas of emphasis:

Nuclear Engineering - graduate nuclear engineering courses
Civil and Environmental Engineering - Structural, Water Resources, Construction Management & Sustainability, Environmental Engineering
Bioengineering - Biosignals and Imaging
Electrical Engineering - Power
Industrial Engineering - Engineering Management
Mechanical Engineering - Dynamic Systems, Solid Mechanics
Material Science & Engineering
Physics
Mathematics - Numerical methods and Analysis

Alternatively the student may fulfill the elective requirement by earning a certificate (besides the Nuclear Engineering Certificate) offered by the SSOE:

Energy Resource Utilization
Fessenden Honors Engineering
International Engineering Studies
Product Realization
Sustainable Engineering

Materials Science and Engineering - Ferrous Physical Metallurgy Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the

Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Materials Science and Engineering Undergraduate Curriculum

The undergraduate program is designed to give the student a basic understanding of the structure and properties of materials, the principles underlying the processing of materials, and the concepts of engineering design and problem solving. Both theory and practice are emphasized. Laboratory experiences are integrated into the curriculum, and a variety of professional and engineering science electives are available. When desirable, specialized programs can be arranged for the students with well-defined interests and goals. Students are prepared to accept positions in production, research, and management, in both the basic materials and advanced or high-tech materials industries. This versatile education is a strong preparation for graduate work in metallurgy and materials and other related fields.

The major objectives of the materials science and engineering program are to

- Prepare students to assume positions of technical leadership in industries that require their specialized knowledge of materials science and engineering.
- Provide students with an education, grounded in the fundamentals, enabling them to succeed in graduate studies and research in materials science and engineering.
- Encourage students to remain committed and engaged in the discipline of materials science and engineering throughout their careers.
- Provide students with a comprehensive education in engineering science that will prepare them to succeed in management positions in industry or other professional careers (e.g. teaching, law, etc.).

Third Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG

Concentration in Ferrous Physical Metallurgy for Undergraduate Students

The concentration program of study in Ferrous Physical Metallurgy is offered by the Department of Mechanical Engineering and Materials Science. This concentration available as an option for all undergraduate engineering students pursuing the BS degree in materials science and engineering, mechanical engineering or engineering physics. Four courses (12 credits) are required to complete the concentration.

The goal of this concentration is to provide a strong educational and training program focused on the use of physical metallurgy, advanced alloy design philosophies and modern thermomechanical processing strategies for the enhanced design and manufacture of high-performance steels.

Requirements

To obtain a background in ferrous physical metallurgy, the following four courses are required:

MEMS 1010 - EXPERIMENTAL METHODS IN MSE
MEMS 1101 - FERROUS PHYSICAL METALLURGY
MEMS 1102 - PRIN APPLCS STEEL ALLOY DESIGN
MEMS 1103 - PRIN APPLCS STEEL PROCNG DSGN

Enrollment

Students considering enrolling in the ferrous physical metallurgy concentration area are encouraged to declare during their sophomore year. Interested students may wish to speak with Dr. Anthony DeArdo (deardo@engr.pitt.edu) or Dr. Isaac Garcia (Garcia@engr.pitt.edu) for more information.

Materials Science and Engineering, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). Mechanical Engineering - Ferrous Physical Metallurgy Concentration, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS

ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Honors Elective - 3 Credits

Credits: 18

*Students who earn a C or higher in MATH 0235 for the first term may take UHC MATH 0240 the second term and will be awarded advanced placement credit for MATH 0220.

Students who opt to take Engr 0711 (Honors Engineering Analysis and Engineering Computing) in the fall term of their freshman year have the opportunity to take a unique service learning course in the second term. This course, ENGR 0716 Art of Hands-On System Design and Engineering, is only open to students who successfully complete ENGR 0711 with a grade of C or better. In this course, students will explore tools and techniques for inventing, designing and prototyping systems. Students will gain an introduction to 'smart systems'; i.e.,automated systems that can sense the world and automatically respond in useful ways.

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, students with an SAT Critical Reading score below 500 will be required to take at least one English Composition Course during their freshman year that will not count toward the Swanson School of Engineering graduation requirements.

All students must take at least one W course as part of their humanities/social science requirements. Please note that students may also satisfy the W requirement by taking a science course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and an A&S major, it is important to note the following: The University of Pittsburgh Composition Program has agreed that there is no need for students who have taken freshman writing through the Freshman Engineering English Writing Program to take Seminar in Composition (ENGCMP 0200) as well. Taking just one of these courses to meet the A&S General Education requirement for composition is sufficient to meet the composition requirement.

Mechanical Engineering Undergraduate Curriculum

In the first two years, the mechanical engineering curriculum concentrates on the fundamentals of sciences, mathematics, and engineering. The last two years provide increased depth in the engineering sciences, including fluid mechanics, heat transfer, and systems analysis and also provide exposure to engineering applications, such as mechanical measurements, manufacturing, mechanical design, and thermal systems. Sufficient technical electives are allowed to permit each student to explore areas of special interest.

Course work in the social sciences and humanities is included for the enhancement of the student's awareness of the importance of social, political, and economic problems in the practice of engineering. Where appropriate, the upper-level courses introduce consideration of human values, social benefits, and constraints to prepare future practicing engineers to be responsive to such concerns.

The major objectives of the program are to:

- Demonstrate successful application of mechanical engineering knowledge and skills for industry, public sector organizations or their profession.
- Pursue life-long learning through advanced professional degrees, graduate studies in engineering, professional training or engineering certification.
- Demonstrate professional and intellectual growth as leaders in their profession and/or community.

Third Term

MATH 0240 - ANALYTC GEOMETRY & CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MEMS 0024 - INTRO MECHANICAL ENGR DESIGN
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0145 - STATICS & MECHC OF MATERIALS 2
MEMS 0031 - ELECTRICAL CIRCUITS
MEMS 0040 - MATERIALS AND MANUFACTURING
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
Communication Skills Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18

Fifth Term

MEMS 0071 - INTRO TO FLUID MECHANICS
MEMS 1014 - DYNAMIC SYSTEMS
MEMS 1028 - MECHANICAL DESIGN I
Engineering Elective - 3 Credits
Humanity/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

MEMS 1015 - RIGID-BODY DYNAMICS
MEMS 1029 - MECHANICAL DESIGN II
MEMS 1041 - MECHANICAL MEASUREMENTS 1
MEMS 1051 - APPLIED THERMODYNAMICS
Humanity/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

MEMS 1042 - MECHANICAL MEASUREMENTS 2
MEMS 1052 - HEAT AND MASS TRANSFER
ME Technical Elective - 3 Credits
Dynamic Systems Elective - 3 Credits
Humanity/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

MEMS 1043 - SENIOR DESIGN PROJECT
MEMS 1071 - APPLIED FLUID MECHANICS
ME Technical Elective - 3 Credits
ME Technical Elective - 3 Credits
Humanity/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Concentration in Ferrous Physical Metallurgy for Undergraduate Students

The concentration program of study in Ferrous Physical Metallurgy is offered by the Department of Mechanical Engineering and Materials Science. This concentration available as an option for all undergraduate engineering students pursuing the BS degree in materials science and engineering, mechanical engineering or engineering physics. Four courses (12 credits) are required to complete the concentration.

The goal of this concentration is to provide a strong educational and training program focused on the use of physical metallurgy, advanced alloy design philosophies and modern thermomechanical processing strategies for the enhanced design and manufacture of high-performance steels.

Requirements

To obtain a background in ferrous physical metallurgy, the following four courses are required:

MEMS 1010 - EXPERIMENTAL METHODS IN MSE
MEMS 1101 - FERROUS PHYSICAL METALLURGY
MEMS 1102 - PRIN APPLCS STEEL ALLOY DESIGN
MEMS 1103 - PRIN APPLCS STEEL PROCNG DSGN

Enrollment

Students considering enrolling in the ferrous physical metallurgy concentration area are encouraged to declare during their sophomore year. Interested students may wish to speak with Dr. Anthony DeArdo (deardo@engr.pitt.edu) or Dr. Isaac Garcia (Garcia@engr.pitt.edu) for more information.

Mechanical Engineering, BSE

Freshman Engineering Program

All engineering freshmen pursue a common academic program, selecting a major upon completion. The freshman-year curriculum includes two specially designed engineering-oriented courses (ENGR 0011 Introduction to Engineering Analysis and Engineering 0012 Introduction to Engineering Computing). These courses provide freshman students with an overview of the various areas of engineering, introduce certain engineering skills and tools, and acquaint students with the engineering problem solving process. Freshman students also participate in an engineering seminar, conducted in part by the Freshman Leadership Team's Peer Advisors. These seminars provide general information on the transition to college and the improvement of study skills and provide an overview of the various engineering fields so that freshmen can make an informed choice of majors at the end of the first year. Students are also given several opportunities to visit the various programs in order to talk to the faculty and learn about the specific academic requirements. All engineering freshmen participate in the Freshman Engineering Conference during the Spring Term. Outstanding freshman students may also participate in the Fessenden Honors in Engineering Program (See Special Academic Opportunities/Programs for details). For more information on the Freshman Engineering Program, visit http://www.engineering.pitt.edu/freshman/

The freshman-year curriculum is detailed below:

First Term

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Second Term

MATH 0230 - ANALYTC GEOMETRY & CALCULUS 2

CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
ENGR 0012 - INTRO TO ENGINEERING COMPUTING
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Humanities or Social Science Elective - 3 Credits*

Credits: 17

Note:

* Students choose electives from an extensive list of acceptable Arts and Sciences humanities and social science courses, including a large number of languages that students are encouraged to study. Students may not take self-paced, hybrid, or online courses to satisfy the humanities/social science requirement.

Honors Courses for Engineering Freshmen

Outstanding freshman engineering students are eligible to participate in the University Honors College (UHC). Entering freshman students who are in the top 5 percent of their graduating class and have a minimum SAT I score of 1450 are eligible for honors courses. Students participating in the University Honors College may take honors courses that substitute for regular required course offerings in their first two terms. For more information on the UHC, visit www.honorscollege.pitt.edu

Honors courses offered include:

First Term

Freshman Course

MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
PHYS 0174 - BASC PHYS SCI & ENGR 1 (INTGD)
CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
ENGR 0011 - INTRO TO ENGINEERING ANALYSIS
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Elective

Honors Freshman Equivalent

MATH 0235 - HONORS 1 - VARIABLE CALCULUS *
PHYS 0475 - INTRO PHYS SCIENCE & ENGRG 1
CHEM 0760 - UHC GENERAL CHEM FOR ENGINRS 1
ENGR 0711 - HONORS ENGR ANAL & COMPUTING
ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1
Honors Elective - 3 Credits

Credits: 17

*Students who receive a C or higher in MATH 0235 will be awarded advanced placement credit for MATH 0220.

Second Term

Freshman Course

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0175 - BASC PHYS SCI & ENGR 2 (INTGD)
CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2
Elective

Honors Freshman Equivalent

MATH 0245 - HONORS 1- MULTIVARIABLE CALCUL
PHYS 0476 - INTRO PHYS SCIENCE & ENGRG 2
CHEM 0770 - UHC GENERAL CHEM FOR ENGINRS 2
ENGR 0716 - ART HANDS-ON SYS DSGN ENGR or
ENGR 0712 - ADV ENGR APPLCS FOR FRESH
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2

Minor

Materials Science and Engineering Minor

Requirements

Bioengineering majors can earn a Minor in Materials Science Engineering by completing five courses.

ENGR 0022 - MATERLS STRUCTURE & PROPERTIES
MEMS 0040 - MATERIALS AND MANUFACTURING
MEMS 1053 - STRUCT OF CRYSTALS & DIFFRCTN
MEMS 1059 - PHASE EQUILIBRIA IN MATERIALS`
MEMS 1063 - PHASE TRANSFRMTN AND EVOLUTION

Additional Information

ENGR 0022 is a concentration elective for Biomechanics and MPE concentration students. None of the courses can be used for any other Bioengineering Concentration elective. Two of the courses can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. Any remaining courses are extra and on your own.

Mechanical Engineering Minor

Bioengineering students can earn a Minor in Mechanical Engineering by completing two required courses and three elective courses in one of four focused option areas.

Required Courses

MEMS 0024 - INTRO MECHANICAL ENGR DESIGN
MEMS 1028 - MECHANICAL DESIGN I

Focus Options/Elective Courses

Thermal-Fluids Option

MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
MEMS 0071 - INTRO TO FLUID MECHANICS
and either
MEMS 1051 - APPLIED THERMODYNAMICS or
MEMS 1071 - APPLIED FLUID MECHANICS

Dynamic Systems Option

MEMS 1014 - DYNAMIC SYSTEMS
MEMS 1015 - RIGID-BODY DYNAMICS
MEMS 1045 - AUTOMATIC CONTROLS

Mechanical Design Option

MEMS 1029 - MECHANICAL DESIGN II
MEMS 1033 - FRACTURE MECHANICS
MEMS 1047 - FINITE ELEMENT ANALYSIS

Mechanical Measurements Options

MEMS 1014 - DYNAMIC SYSTEMS
MEMS 1041 - MECHANICAL MEASUREMENTS 1
MEMS 1042 - MECHANICAL MEASUREMENTS 2

Additional Information

Depending upon concentration, Bioengineering students have several different possibilities to earn a Mechanical Engineering minor.

Bioimaging & Signals concentration students : none of the courses in any option can be used as a concentration elective. Two courses can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. Two, and possibly three, courses are extra and on your own.
Biomechanics concentration students : MEMS 0024 and MEMS 1028 are concentration electives.
Thermal-Fluids Option

BIOENG 1210 is a required course for BioE majors. MEMS 1071 is a concentration elective. MEMS 1071 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Dynamics Systems Option

BIOENG 1255 is a required course for BioE majors. MEMS 1015 is a concentration elective. MEMS 1045 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Design Option

BIOENG 1161 is a required course for BioE majors. MEMS 1033 and MEMS 1047 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Measurements Option

BIOENG 1255 is a required course for majors. MEMS 1041 and MEMS 1042 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

CE concentration students : all options can use two of the courses to satisfy the Bioengineering 2- course, 6-credit advanced engineering/science elective requirement. At least one other course is extra and on your own.

MPE concentration students : MEMS 0024 and MEMS 1028 are concentration electives.

Thermal-Fluids Option

BIOENG 1210 is a required course for BioE majors. MEMS 1071 is a concentration elective. MEMS 0071 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science requirement.

Dynamics Systems Option

BIOENG 1255 is a required course for BioE majors. MEMS 1015 and MEMS 1045 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Design Option

BIOENG 1161 is a required course for BioE majors. MEMS 1033 and MEMS 1047 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Measurements Option

BIOENG 1255 is a required course for majors. MEMS 1041 and MEMS 1042 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Polymer Engineering Minor

The Minor in Polymer Engineering consists of six courses.

Core Courses

CHE 1754 - PRINCIPLES OF POLYMER ENGINRNG

CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMRS with lab
CHEM 1605 - SYNTH & CHARCTRZTN POLYMRS LAB

Required Chemistry Courses

CHEM 0310 - ORGANIC CHEMISTRY 1
CHEM 0320 - ORGANIC CHEMISTRY 2

Two Research Projects with Polymer Content (3 credits each)

CHE 1097 - SPECIAL PROJECT
CHEM 1710 - UNDERGRADUATE RESEARCH

Other Information

CHEM 0310 and CHEM 0320 are concentration electives for all concentrations. With prior approval of the Undergraduate Coordinator in both BioE and ChE, BIOENG 1095 : Special Projects can be used to satisfy the CHE 1097 research project requirement as long as a significant polymer content is part of the research project. None of the core or research project courses can be used for any Bioengineering concentration elective. Two can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The remaining two are extra and on your own.

Certificate

Engineering for Humanity Certificate

The Engineering for Humanity Certificate is open to all undergraduate students and both guides and formalizes student participation in engineering projects in which social and/or environmental sustainability is a core thrust. Moreover, the certificate program addresses the significance of cultural, political, and business forces in rapid and effective penetration of new technologies. This certificate will allow students to earn credit for service learning projects. Students have the option of pursuing either a U.S. or international track.

The certificate embodies significant flexibility, with only 2 of 5 courses being explicitly defined, so participating students may tailor course work to their region and topic of interest. It is expected that with appropriate planning at least two of the courses will align with departmental BS graduation requirements.

Bioengineering students need to plan early to obtain this certificate. Required courses can be used to to satisfy the 2-course, 6-credit advanced engineering/science elective requirement. MPE concentration students can also potentially satisfy a concentration elective. The Societal Perspective requirement can be used as one of the Humanities/Social Science electives. The In Depth Service Learning Project is on your own.

Required Courses

ENGR 1500 - ETHCL DIL BALNC COST,RISK,SCHD
(can be used as advanced engineering/science elective)
CEE 1210 - ENGR & SUSTAINABLE DEVELOPMENT
(can be used as advanced engineering/science elective)

Business Perspective

Choose one.

ENGR 0715 - ENGR APPLICATIONS FOR SOCIETY
(can be used as advanced engineering/science elective)
ENGR 1050 - PRODUCT REALIZATION
(MPE concentration elective, can be used as advanced engineering/science elective)
ENGR 1060 - SOCL ENTREP-ENGRG FOR HUMANITY
(can be used as advanced engineering/science elective)
ENGR 1610 - PRODUCT REALIZ GLOBAL OPPORT
(can be used as advanced engineering/science elective)
CEE 1209 - LIFE CYCLE ASSMNT METH & TOOLS
(can be used as advanced engineering/science elective)
CEE 1218 - DESIGN FOR THE ENVIRONMENT
(can be used as advanced engineering/science elective)
BUSECN 1010 - MANAGERIAL ECONOMICS
BUSMKT 1040 - INTRODUCTION TO MARKETING

Tracks

Students can choose either the U.S. Track or International Track.

U.S. Track

Service Learning Project

In Depth Service Learning Project (3 credits)
Subject to Committee Pre-Approval

Societal Perspective

Select one.

(Examples for the United States)

PS 0200 - AMERICAN POLITICS
PS 0300 - COMPARATIVE POLITICS
SOC 0312 - SCIENCE IN SOCIETY
SOC 0432 - WEALTH AND POWER
SOC 0434 - POLITICAL SOCIOLOGY
SOC 0444 - URBAN SOCIOLOGY
SOC 1445 - SOCIETY AND ENVIRONMENT
ANTH 1777 - AMERICAN CULTURE

International Track

Service Leanring Project

In Depth Service Learning Project (3 credits)
Subject to Committee Pre-Approval

Societal Perspective

Select one.

(Examples for the Latin America)

SPAN 0082 - LATIN AMERICA TODAY
SOC 0362 - LATIN AMERICAN SOCIETIES
SOC 0432 - WEALTH AND POWER
SOC 0444 - URBAN SOCIOLOGY
PS 1321 - LATIN AMERICAN POLITICS
PS 1503 - INTERNATIONAL ORGANIZATION
PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
ENGR 2210 - UNDST BRAZIL-PREP RES & STUDY

Nuclear Engineering Certificate

The objective of the Nuclear Engineering Certificate is to develop the basic competencies needed by science and engineering graduates to contribute quickly and effectively to the renaissance of nuclear science and technology in the United States and abroad.

The nuclear engineering certificate currently targets competency gaps that exist in the following educational areas :

Basic theoretical concepts of nuclear physics, reactor physics, reactor kinetics, fuel depletion and energy removal.
Fundamental analytical skills that can aid in understanding nuclear energy problems and solutions.
Interfaces between engineering disciplines involved with the design of a reactor core and the reactor coolant system for light water reactors.
Knowledge of important social and technical issues related to nuclear science and technology.

Requirements for Bioengineering Students

None of the three core courses, ENGR 1700, 1701 or 1702, satisfy any concentration elective. Two of the three courses can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. The third course is extra and on your own.

ENGR 1700 - INTRO TO NUCLEAR ENGINEERING
ENGR 1701 - FUNDMS OF NUCLEAR REACTORS
ENGR 1702 - NUCLEAR PLANT TECHNOLOGY

Supporting Courses

Two (as yet to be specified) supporting courses are required.

Product Realization Certificate

A total of five courses are required for the Product Realization Certificate.

Business Administration Courses

Students choose at least one of the College of Business Administration courses:

BUSERV 1985 - SMALL BUSINESS MANAGEMENT
BUSMKT 1431 - PRODUCT DEVELOPMNT & MGMNT

Swanson School of Engineering Courses

Students choose at least two of the Swanson School of Engineering courses:

IE 1052 - MFG PROCESSES AND ANALYSIS
IE 1089 - ADDITIVE MANUFACTURING (NOT CURRENTLY OFFERED)
ME 1037 - MANUFCTRNG QUALITY ASSESSMNT (NOT CURRENTLY OFFERED)
ENGR 1859 - PRODUCTRONICS (NOT CURRENTLY OFFERED)

Required Course

All students must take the following course to complete the Certificate:

ENGR 1050 - PRODUCT REALIZATION

Additional Information

MPE concentration students : Because either BUSERV 1985 or BUSMKT 1431 is a concentration elective and IE 1052 and ENGR 1050 are concentration electives, MDE Concentration students can obtain the Product Realization Certificate with an additional two courses that can be counted toward the 2-course, 6-credit advance engineering/science elective requirement.

NOTE : Elective requirements for the Product Realization Certificate are currently in a state of flux. Updates can be obtained from the certificate administrator: Dr Mary Besterfield-Sacre.

Supply Chain Management Certificate

The Certificate in Supply Chain Management (CSCM) provides undergraduate engineering students with the opportunity to understand important concepts in supply chain management and develop technical and managerial skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations.

Supply chain management encompasses not only the design and planning of supply chain activities, but also the execution, control and monitoring that help companies build a competitive infrastructure and create net value. The supply chain covers all areas, not just manufacturing and services, but also includes suppliers, retailers, warehouses, logistics and customer service; all functional areas involved in receiving and filling a customer's order with a repeatable and satisfying experience. This certificate requires 15 credits to complete.

Enrollment is open to students in all of the undergraduate engineering programs in the Swanson School of Engineering. Students interested in the program should contact Dr. Karen Bursic (kbursic@pitt.edu) for more details.

School of Health and Rehabilitation Sciences

Welcome to The School of Health and Rehabilitation Sciences (SHRS)

The School of Health and Rehabilitation Sciences (SHRS) offers educational programs leading to a baccalaureate degree in the following areas:

- Athletic Training
- Communication Science
- Emergency Medicine
- Health Information Management
- Nutrition and Dietetics
- Rehabilitation Science

SHRS participates in the University Honors College. Students with high GPAs, and whose studies demonstrate breadth and depth, may apply to complete a research thesis and earn a Bachelor of Philosophy (BPhil) degree in their area of major study.

Through the undergraduate program in Rehabilitation Science, SHRS offers three undergraduate certificate programs in the following areas:

- Assistive Technology in Rehabilitation
- Pathokinesiology in Rehabilitation
- Psycho-Social Issues in Rehabilitation and Personal Care

The School of Health and Rehabilitation Sciences is affiliated with the University of Pittsburgh Schools of the Health Sciences and also shares a close affiliation with the world-class University of Pittsburgh Medical Center (UPMC). The medical center comprises a variety of hospitals and clinical facilities that affords students a wealth of opportunities for professional experience.

The mission of the school is to advance the theoretical base of knowledge underlying the practice of health and rehabilitation disciplines and professions through research, teaching, and professional service.

The SHRS faculty base their teaching upon research studies, clinical service, and participation in their respective professional associations. Faculty research and service typically occurs through multi-disciplinary collaboration in diverse health care and research environments. Consequently, SHRS students are exposed to state-of-the art curricula, which are continually being reviewed.

Our students are educated and trained to question the basis of current practice, and to challenge prevailing models and assumptions. The entry-level curricula reflect the importance of effective team participation in an inter-disciplinary and rapidly changing environment. Emphasis is given to the student's development of analytical problem solving skills and human relations skills required for effective clinical and supervisory practice. The student is confronted with the transition between a professional commitment to providing high quality care and service, while recognizing the effects of competitive pressures and cost constraints upon the health care organization.

The primary objective of our entry-level professional programs is to educate knowledgeable, skilled, and ethically responsible practitioners, committed to their respective professions and to the high standards of health care and rehabilitation services.

The primary objective of our pre-professional programs is to provide students with an excellent preparation for entry-level professional health care educational programs that are offered at the graduate level, either at the University of Pittsburgh or other universities.

Admission Information

Admissions Policy

Admission to most SHRS undergraduate programs is on a competitive basis as class sizes are limited. Students are strongly encouraged to complete as many prerequisites as possible prior to applying and to apply by the application deadlines published by the individual departments. Applications will be evaluated and qualified applicants will be admitted until classes are filled. Visit SHRS Programs and Course Offerings for individual department and program admission policies.

Admission Requirements

General admission requirements for the SHRS baccalaureate degree programs include a cumulative grade point average (GPA) of at least 2.500 (based on 4.000) and successful completion of a minimum of 60 college-level credits which includes specific prerequisite courses. If letter grading is available, all prerequisite courses must be taken for a letter grade, and a minimum grade of C- is required. (A minimum grade of C is required for all credits transferred from other institutions). SHRS also recommends prior study in a second (foreign) language and prior completion of a college-level computer science course. Visit admissions pages for each program's specific admission and application requirements.

30 of the 60 credits required for admission must be from four basic content areas, with minimum credits in each of the four areas as listed in the table below. These 30 credits must consist of courses which are equivalent to those taken by students in the first two years of a four year liberal arts or science degree. Courses from two-year colleges are acceptable if they meet this standard.

Content Area	Minimum Required Credits	Examples of courses
Natural Sciences/Psychology (Introductory basic science or psychology courses)	6	Physics, Chemistry, Biology, Psychology, Neuroscience, etc.
Humanities/Social Sciences	6	Foreign language, English literature, Economics, History, Philosophy, etc.
Oral and Written Communication	6	Public Speaking, English Composition, Intensive Writing Course, etc.
Mathematics/Statistics / Computer Science	4	Algebra, Calculus, Introduction to Statistics, Computer Programming, etc.
Total from all four Content Areas must equal 30 credits		

Students with questions about identifying specific courses that will satisfy the prerequisites for our undergraduate program should contact the SHRS Admissions Office at admissions@shrs.pitt.edu or 412-383-6558.

Application Procedures

Freshman application is made through the Office of Admissions and Financial Aid. SHRS is an upper-division school and does not admit students to its undergraduate programs at the freshman level. Therefore, students must first be admitted to another school at the University of Pittsburgh or to another institution. (See Pittsburgh campus Freshman Admissions section of this bulletin for more information.)

Transfer students who have previously enrolled at a college or university other than the University of Pittsburgh, including former University of Pittsburgh students who have since earned college credits at another institution and now wish to return to the School of Health and Rehabilitation Sciences must complete a University of Pittsburgh *transfer* application, submit an application fee of $45 to the University of Pittsburgh's Office of

Undergraduate Admissions and Financial Aid and complete the supplemental information required for SHRS. (See Transfer Student Admissions section of this bulletin for more information.)

International applicants must complete the International Undergraduate Student application and the supplemental information required for SHRS. (See International Undergraduate Student Admissions section of this bulletin for more information.)

University of Pittsburgh students applying to the Athletic Training, Communication Science, Emergency Medicine, Health Information Management, Nutrition and Dietetics, and Rehabilitation Science programs must complete the SHRS Apply Yourself application. An application fee is not required of current Pitt students applying to the SHRS undergraduate programs.

The following information is required as part of the application process:

- Essay: See individual program admission pages on SHRS website, for specific essay requirements. This essay should be no longer than two pages.
- One letter of recommendation: This letter should be from a college level instructor, employer, or a clinical supervisor. These individuals should be able to comment on a student's academic, professional, and interpersonal abilities. This recommendation can be submitted electronically through the online application system by the applicant's reference, or by mailing a hard copy letter to the SHRS admissions office accompanied by the appropriate recommendation form as provided in the downloadable forms and recommendation section of the application. A letter of recommendation is not required for the Communication Science program.
- Transcripts: Official transcripts from all colleges attended are required. Transfer applicants must also submit their high school transcripts to the Office of Admission and Financial Aid. Credits shown on a transcript as transfer credits from another institution cannot substitute for the official transcript of the college or university at which the credits were earned.
- While not required, a resume is highly encouraged.

University of Pittsburgh students applying from the University of Pittsburgh in Bradford, Greensburg, Johnstown and Titusville should follow the same guidelines as stated above for students at the Oakland campus. A Relocation Form should only be submitted to the regional campuses if a student is admitted to a program at SHRS to facilitate the transfer of student records.

Advanced Standing on Admission

Students enter SHRS as juniors with 60 advanced standing credits. (Exception is the Emergency Medicine Senior Transfer option for paramedics and currenlty serving military applicants. These students are granted 90 advanced standing credits and admitted as seniors.)

Students are expected to take all core courses required by their program at SHRS; however, students with more than 60 credits of undergraduate coursework completed at a four year academic institution may be granted up to 30 additional credits pending approval of the Program Director. The Program Director must:

- review and approve these additional credits
- indicate additional classes/credits on the student's Plan of Study, and
- submit to the Director of Student Services, Registrar a request to accept additional credits
- all required academic work for a degree in SHRS, including courses for which advanced- standing credit has been granted, must be completed within ten (10) consecutive calendar years. Departments have the discretion to lessen this number for specific coursework deemed integral to the course of study in a particular discipline

See **Allowable Credits** section of this catalog for additional information about advanced standing.

Admission Status

Students are admitted to SHRS on one of the following statuses: full, conditional or non-degree.

- Full status is granted to those who have met all admission criteria and have been admitted either as full-time or part-time students for study toward the baccalaureate degree
- Conditional status is granted to those who are in the process of completing prerequisite courses. These students must complete all requirements successfully prior to matriculation. At the discretion of the Department Chair students may to be admitted to an SHRS undergraduate program with a maximum of two courses of prerequisite work remaining to be taken in their designated program. Any outstanding prerequisite work taken while enrolled in an SHRS undergraduate program must be completed by the end of the fall term of the senior year.
- Non-degree status is granted to those who enroll at SHRS to take courses for credit without reference to a degree

Reinstatement

Reinstatement is not guaranteed. Students who have been dismissed from SHRS for academic reasons or who have not enrolled at SHRS for three consecutive terms may apply for reinstatement. To request reinstatement a student must initiate the request via a letter to the department chair. This letter must be submitted at least three months prior to the beginning of the term for which the student is requesting reinstatement. The faculty within the student's academic program will review the request for reinstatement. The review will be conducted with consideration given to the following criteria:

A period of one year must have elapsed from the time the student is dismissed to the time in which he/she is reinstated
Demonstration of academic success since leaving the program
Demonstration of personal and/or professional development since leaving the program
Space available within the program of study

Financial Information

Tuition and Fee Rates

Tuition and fee rates are availiable on the Financial Information page.

Additional Fees

Lab Fees: Lab courses may incur an additional fee to cover laboratory expenses. These fees will be charged to the student directly and will appear on the invoice generated by Student Accounts in addition to tuition and other fees each semester.

Liability Insurance: Students enrolled in a clinical education or practicum must carry liability insurance. Liability insurance is required for SHRS students and will automatically be included on the tuition bill.

Scholarships, Grants and Financial Aid

If you are interested in applying for loans, scholarships, grants, or work study, you should call, write or visit the University of Pittsburgh, Office of Admissions and Financial Aid, Alumni Hall, Pittsburgh, PA 15260, 412-624-PITT, https://oafa.pitt.edu/learn-about-aid/ See also the SHRS website financial information page.

Financial Obliation of Students

The University of Pittsburgh has the right to withold services if a student defaults on any financial obligation until repayment arrangements have been made that are satisfactory to the office or department to which the debt is owed.

SHRS Academic Regulations

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. *These may be found in SHRS Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.*

Student Roles and Responsibilities

University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability. Further, the University will continue to take affirmative steps to support and advance these values consistent with the mission of the University. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

University and SHRS Rules and Regulations

Students should understand and know how to access University, SHRS and individual program rules and regulations. Students should complete the SHRS new student orientation, and review the most updated online version of the **University Undergraduate Catalog, handbook and their program's policy information**. Students should be aware of and meet important academic deadlines, e.g. registration, add/drop and monitored withdrawal. See the Academic Calendar .

Communicate with SHRS Faculty and Staff

Students should stay in regular communication with their academic advisor and faculty members. To facilitate this, the student should:

check **Pitt email** regularly
inform academic advisor, faculty or department chair of difficulties that may impact academic standing
seek help as needed
make and keep regular advising/registration appointments with academic/faculty advisor

Name and Social Security Number Changes

Students are required to notify the University Registrar (G-3 Thackeray) to process changes in name and social security number. Please visit http://www.registrar.pitt.edu/personalinfo.html for more information. Students should also notify the SHRS Dean's Office and their academic department of any changes to their contact information.

Plan of Study

Every student in SHRS must have a Plan of Study, signed by academic/faculty advisor, on file with Student Services by the end of the first semester in SHRS and as revised. Any changes to the Plan of Study must be approved by the academic/faculty advisor or Department Chair. To be certified for graduation, students must have successfully completed all courses outlined in their final Plan of Study as well as any other requirements for the degree. A final Plan of Study must be on file in Student Services 4019 Forbes Tower.

Minimum Academic Standard

All required and prerequisite coursework must be taken for a grade, when letter grade option is available. Students must receive a C- or better in each required course and SHRS elective course to earn credit. For non-SHRS, non-required coursework, students must earn a grade of D or better (C required for transfer credits). All Pitt grades will still appear on the transcript and be calculated into the GPA unless the student repeats the course. However, credits from courses in which student has earned unacceptable grades will not be counted toward graduation.

Students who receive a grade below a C- in a required course must repeat that course and attain a grade of C- or better. Students will not be permitted to register for a course until they attain a C- or better in its prerequisite. Failure to receive an acceptable grade after the second repeat of a required course may result in the student being dismissed from the program and SHRS.

Advising

Academic and faculty advisors for SHRS undergraduate students are assigned by the Program Directors. Students are notified of the name of their advisor by their Department.

Change of Advisor

If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a *Change of Academic Advisor form*, located on the SHRS website under forms, complete the form and secure the required signatures, and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate change of advisor procedures.

Initial Responsibilities of the Advisor

Meet with each student advisee as soon as possible after admission to review goals, policies and procedures of the program, to assist the student in clarifying his or her educational goals, and to design a preliminary Plan of Study. The preliminary Plan of Study must be on file in Student Services by the end of the first term and then as revised.

Assist the student in selecting courses for the first term registration, sign all completed enrollment forms.

Ongoing Responsibilities of the Advisor

The student's advisor should continue to provide support by:

- being available to the student on a regular basis
- meeting with the student as needed prior to each registration and reviewing academic progress
- signing all completed necessary forms in a timely manner
- helping the student meet important deadlines, e.g. registration, application for graduation
- meeting with the student upon his/her notification of probationary status
- assisting the student to access resources as needed
- assist the student in creating, reviewing, and updating his/her Plan of Study according to undergraduate program and intended graduate program or professional requirements
- help ensure that that Plan of Study is submitted to Student Services and updated as necessary
- assist the student in planning internships or research projects

Allowable Credits

Some SHRS programs may allow students to earn particular course credits by successful completion of the following:

Advanced Placement (AP) and International Baccalaureate (IB) Credits

See https://oafa.pitt.edu/apply/ap-ib-credit/ for credits and course equivalencies currently granted by the University of Pittsburgh for Advanced Placement and International Baccalaureate examinations.

College Level Examination Program (CLEP)

SHRS does NOT accept CLEP general examination credits.

Credit by Course Examination

The following regulations govern this procedure:

- The individual department shall determine specific courses open to examination

A student may not earn credit by examination if s/he has previously taken the course
Student may obtain the form, Credit by Course Examination, from the Office of Student Services (4019 Forbes Tower)
Enrolled students must apply for examination during the term preceding the term in which the course is scheduled
Newly admitted students may apply and take the examination early in the term in which the course is taught

The Credit by Course Examination form and a check or money order for the appropriate fee must be processed in the Cashier's Office, G-7 Thackeray Hall, for validation prior to taking the examination. Upon passing the examination, the department will submit the Credit by Course Examination form to Student Services. Students will receive advanced standing credit for the course, which may be applied towards graduation. If a student fails the exam, neither a failing grade nor credits will be posted on the transcript. An exemption examination may be taken only once per course. The faculty of each Department will determine the number of courses that can be exempted by students enrolled in that academic program.

Online Courses

The acceptance of online coursework is at the discretion of the department to which the student is applying. All online coursework must be taken at a regionally accredited institution.

Reserve Officer Training Corps (ROTC)

A total of four (4) ROTC credits earned by students will be accepted for purposes of admission and graduation. Grades for ROTC courses will be included in calculating the student's GPA.

Transfer Credit Policy

At the time of application coursework completed outside the University of Pittsburgh is evaluated by the SHRS Admissions Office to determine if it meets University and SHRS policy required for transfer.

A maximum of 60 credits can be transferred into the University of Pittsburgh from a two-year degree program; and a maximum of 90 from a four-year college/university
Courses must be passed with a grade of C or better and must be earned at an appropriately accredited institution
Courses must have reasonable equivalents at the University of Pittsburgh to be eligible for transfer. When requested, students are responsible for supplying descriptions for courses taken elsewhere
The number of credits granted for a given course cannot exceed the number awarded for the course on the transcript of the school where the course was taken or the number earned for the corresponding course at the University of Pittsburgh
Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits)
SHRS accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation, but will not be calculated into the student's GPA at the University of Pittsburgh
Contact the SHRS Admissions Office at 412-383-6557 for information about transfer credit evaluation
Please note: All transfer credits are subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Information for Transfer Students

Upon application, transfer students will receive a formal credit evaluation. Following admission, transfer students will receive formal notification from SHRS indicating which requirements have been satisfied and if any prerequisite coursework or credits are outstanding.

Information for Current SHRS Students

Current SHRS students in good academic standing (cumulative GPA of at least 2.00) may attend another accredited institution in order to complete their degree requirements, provided they receive prior approval from the SHRS Dean's office. Students will be required to fill out an approval form and provide appropriate course descriptions. Students will not receive credit for courses taken without advance approval. SHRS students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating from SHRS.

Independent Study

The independent study allows the student to pursue independent academic work for credit. The independent study must be supervised by an SHRS approved faculty member. To register for an independent study, the student must:

- identify and develop an independent study project with independent study supervisor
- complete the *Independent Study form* (Found on the SHRS website)
- have *Independent Study form* approved and signed by the IS supervisor, academic/faculty advisor, and Assistant Dean of Undergraduate Studies
- copy *Independent Study form* as necessary
- submit an *Independent Study form*, *Enrollment form*, and have your advisor send Student Services an approval email to receive a permission number
- enroll online for the independent study course

Clinical Education and Directed Practice

Clinical learning experience is an integral and essential part of SHRS undergraduate entry level professional programs. All students in these programs are required to participate in clinical education. Participation is optional but recommended for students in pre-professional programs. The following is required for all SHRS undergraduate clinical education:

- all clinical education sites must have current contracts with the University of Pittsburgh
- each program's clinical education coordinator will assign students to their clinical education site
- student must use an *Enrollment Form* to register for appropriate clinical education and submit other forms as directed by clinical education coordinator and listed below
- student must provide proof of HIPAA certification with registration
- student must provide proof of Blood Borne Pathogen certification with registration
- students are required to carry personal health insurance
- student must provide proof of having undergone a physical exam and blood work as well as proof of vaccinations
- list of exam and vaccination requirements and required form will be provided by the clinical education coordinator

Some SHRS programs require that students complete clinical education at facilities internal or external to the University and may require completion of: 1) Pennsylvania Department of Human Services Child Abuse History Clearance; 2) Pennsylvania State Police Criminal Record Check; 3) FBI Criminal Record Check to determine whether the student is qualified to participate in clinical education. If these are deemed to be required and the student has not already done so, he/she should immediately start the process of obtaining these three clearances and background checks.

The Commonwealth of Pennsylvania has posted information on how to obtain these clearances and background checks here: http://www.dhs.state.pa.us/findaform/childabusehistoryclearanceforms/S001087.

Additional requirements may also include a drug screen, CPR training, attending orientation sessions, compliance with dress code, and personal transportation. Each program's clinical education coordinator will advise students of additional program or site-specific requirements and instructions on how to submit required documentation to verify completion of all requirements.

Students may be required to travel a distance or to relocate outside the city for their clinical education assignments. All expenses for transportation, housing, food, etc. are the responsibility of the student. Any student who misses clinical education time for any reason must meet with his/her clinical education coordinator to discuss any needed make-up time. See individual program for specific details regarding clinical education.

Health Insurance Portability and Accountability Act (HIPAA)

All SHRS students participating in clinical education or field experience must complete HIPAA certification training prior to beginning at the clinical/field site. No clinical contact in a "covered entity" will be allowed before certification is completed. (Student should see individual department information regarding additional HIPAA certification requirements.)

Procedure for completing HIPAA certification: Go to http://cme.hs.pitt.edu. Look for UPMC HIPAA Security Awareness Training for Physicians (formerly RPF Module 15) and HIPAA Physicians Privacy Awareness Training by UPMC (formerly RPF Module 8). Complete the UPMC HIPAA Security Awareness Training for Physicians and HIPAA Physicians Privacy Awareness Training by UPMC. Complete the quizzes. Print certificates, complete all information, sign them, and turn them in to your department.

Blood Borne Pathogen Training and Certification

All SHRS students who will be going into a clinical setting must complete Blood Borne Pathogen (BBP) training and certification annually. This certification must be completed prior to the beginning of the term in which the clinical setting will begin. No clinical placement will be allowed before certification is completed.

Procedure for completing online BBP training and certification: Go to http://cme.hs.pitt.edu. Look for Blood Borne Pathogen Training (formerly RPF Module 9). Complete Blood Borne Pathogens Training. Complete the quiz. Print certificate, complete all information, sign it, and turn it in to your department.

Dual Degree Option

Students may pursue dual degrees within SHRS or between SHRS and another school at the University. SHRS follows the University policy concerning dual degrees.

- the student must complete 150 credits accepted by the University
- the student must complete all requirements necessary to complete each degree
- the student must receive both degrees simultaneously
- the student must be admitted and enrolled in SHRS as his/her primary academic center for half the terms necessary to complete both degrees, typically this is 4-5 semesters
- students must contact SHRS Admissions Office, 4021 Forbes Tower, to be admitted prior to the midpoint of their studies

Registration and Add/Drop Processes

A student must be registered **for at least one credit in a twelve (12) month period** from the time of admission until the degree is granted **in order to maintain active status.** Those students who fail to observe this rule will be placed on inactive status and will have to seek formal readmission in order to continue in the program. If active status is not maintained, the student is not permitted to use University facilities or receive counseling or active supervision by a faculty member, advisor, or committee.

Student Enrollment Process

Appointment times are assigned to students by the University Registrar's Office process (fall and spring terms only). To access your Enrollment Appointment go to the Pitt Portal www.my.pitt.edu and log in; go to the Academic Resources tab and log in to PeopleSoft at the Student Center Login, click the Self Services link, then the Student Center link. Once in your Student Center, your Enrollment Appointment will be listed in the box entitled Enrollment Dates on the right hand side of the page.

Prior to your appointment date/time you must meet with your academic advisor within your department to determine your courses, complete enrollment form, if required by your department (signed by you & advisor). The schedule of Classes can be found on the University Registrar's website at http://www.registrar.pitt.edu/courseclass.html

Be sure to pay attention to any Special Indicators noted for the course (@, R, etc.) and go to the Schedule of Classes Guide on p.4 to see what they mean. Most of these are here to inform you of courses that require special permission. **If courses require permission** please seek permission from the instructor of the course. You may do so via email with the instructor. If it is a course within SHRS see the Student Services Coordinator with proof of permission for a "permission number." If it is a course outside of SHRS you will need to receive a "permission number" from the school in which the course is offered. You will need this "permission number" in order to register for a closed/restricted course in PeopleSoft.

Resolve any holds that you may have on your account with the respective departments that have placed the holds or they will prevent you from registering for your classes.

Demos/handouts on how to do your Self-Enrollment are available in PeopleSoft. Go to the Portal www.my.pitt.edu, University Services & Information tab, and then click on Self Service Enrollment. Handouts/demos are available on the following:

- Preparation Steps
- Adding a Class
- Dropping a Class
- Editing a Class

Swap a Class
Waitlist a Class

Add/Drop Process

Students are allowed to add or drop classes until the end of the second week of classes each fall and spring term. Add/drop during the summer sessions is dependent on the length of the class session. (See University Academic Calendar for specific dates.) The following is a typical add/drop process:

Students should make an appointment with their advisor to discuss adding/dropping courses
Once approved by the advisor, students will make the enrollment changes online

Problem with Enrollment After the Add/Drop Deadline

Should a student find an error in their enrollment after the add/drop period had ended, a formal memo is required from the student's advisor to the SHRS, Director of Student Services, Registrar. This memo will need to include the student name, PeopleSoft number, the course(s) to be added or dropped (subject, name & section), the number of credits, and the reason for the error. If the error is the students fault, the student will be charged a late fee at the discretion of the main University of Pittsburgh Registrar. If the fault is with the Department the student is enrolled, that department Chair can provide an account number in which the late charge is to be paid from.

Upon approval from the SHRS Director of Student Services, Registrar the memo will be submitted to the University of Pittsburgh Registrar to process the exception.

Monitored Withdrawal

After the add/drop deadline has passed, the student must process a Monitored Withdrawal Request form to drop a class. (See University Academic Calendar for deadlines to process a Monitored Withdrawal.) Student should consult with academic/faculty advisor before withdrawal from course(s). The form must be signed by the instructor of the course and be returned to the Director of Student Services, Registrar, 4024 Forbes Tower within the first nine weeks of the term in the fall and spring.

Because summer sessions vary in length, students should check the summer Schedule of Classes for those deadlines. The grade W will appear on the student's grade report and transcript. There is no tuition adjustment associated with a course withdrawal. Please note, withdrawing from a course may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

Resignation from All Courses and SHRS

If you are considering resigning for the term (academic withdrawal from all of your classes), please discuss your situation with your academic advisor, a Financial Aid counselor, or a staff member in the Office of Student Appeals to be certain you understand all of your options and obligations.

The effective date of your resignation determines if you are eligible for an adjustment in the tuition and fees you were charged for the term. The effective date of your resignation will normally be the date you notify the University by one of the methods listed on the Student Payment Website under Resignation. You are responsible for satisfying all financial obligations accumulated until the time you officially resign. The timing of your resignation also has an impact on how grades are recorded on your transcript. The last day to resign from a term is when sixty percent of the term has passed.

Please visit the Student Payment center resignation page on the University of Pittsburgh website for more information.

Grading Policy and Records

Grade Point Average (GPA)

The GPA is a numerical indication of a student's academic achievement based on a 4.000 grade point scale. The University letter grade system identified below will be followed without exception:

Grade	Quality Points
A+	4.00
A	4.00
A-	3.75
B+	3.25
B	3.00
B-	2.75
C+	2.25
C	2.00
C-	1.75
D+	1.25
D	1.00
D-	0.75
F	0.00

Course Grading

The method of evaluation and grading is the prerogative of the course instructor and is based on the course objectives and expectations. SHRS faculty have the option of issuing "+" or "-" grades. SHRS faculty have the option of assigning letter grades or HSU evaluations, as printed in the course catalog and determined at student's enrollment. Students will be apprised of the evaluation procedure by the instructor at the beginning of each course. It is the student's responsibility to request clarification of any evaluation or grading policy.

Dean's List for SHRS

The SHRS Dean's List is compiled upon completion of each fall and spring term. The criteria used to determine eligibility for the Dean's List is as follows:

full-time student status for the term
minimum GPA of 3.500 for the term
minimum cumulative GPA of 3.000 (total Pitt)

SHRS Policy and Procedure for G and I Grades

G Grade Policy

Student's assigned G (incomplete) grades due to course work unfinished because of extenuating personal circumstances, are required to complete course requirements no later than one year after the term in which the course was taken. Once the deadline has passed, the G grade will remain on the record, and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation. Students will not be permitted to register for courses in which a prerequisite course resulted in a 'G' grade, unless approval has been obtained by the Department/Program Chair, or their designee.

I Grade Policy

The I grade indicates that the work of the course for which it is awarded has not been completed due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars. It is to be awarded only to students who have been doing the regular work of the course but who need more time than the term allows to complete the course work. That is, the extenuating circumstances ought to arise from the nature of the course work rather than from the student's personal difficulties (in which case a G grade is appropriate; see above).

Starting the fall of 2016, all *incomplete* grades are expected to be completed by no later than the end of the next consecutive semester. It is the responsibility of the faculty member to clearly state to the student the expected due date.

If the incomplete grade is given in the spring, it is expected to be completed by the end of the summer term in August.

Action required by the student and faculty member for a "G" or "I" grade:

The student, faculty and advisor are to fill out a Completion Agreement of Incomplete Credits Form (Form can be found on the SHRS website)
A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the current semester.
Failure to submit this form before the end of the add/drop period will result in an automatic change to a failing grade.

Student Services, will be following up on any Incompletes or G grades that are not changed within the expected timeframe at the end of every term.

Satisfactory/No Credit (S/NC) grading option

Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a C- or better (C for transfer credits). Students planning to apply to SHRS are strongly encouraged to consult their advisor whenever considering the S/NC grading option to make certain the course is not required for the degree being sought in SHRS.

Repeating Courses

A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
The grade earned by repeating a course is used instead of the grade originally earned. Withdrawal (W), Repeat (R), and Audit/Non-Credit (N) grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA.
Incomplete grades (G and I) are not identified as repeated courses until the coursework is completed.
Students are only permitted to repeat a course twice. Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.
Students seeking to repeat other non-SHRS (prerequisites, electives, etc.) courses will be permitted to do so at the discretion of the program director.

Statute of Limitations on Allowable Coursework

All required academic work for a degree in SHRS, including courses for which advanced- standing credit has been granted, must be completed within ten (10) consecutive calendar years. Departments have the discretion to lessen this number for specific coursework deemed integral to the course of study in a particular discipline.

Leave of Absence

Under special conditions, undergraduate students may be granted one leave of absence. All request should be put in writing to the Associate Dean of Undergraduate Studies.

Academic Probation and Dismissal Policy

Students who have completed at least 12 credits and whose cumulative GPA falls below 2.000 will be placed on academic probation and will receive written notification of this status. At this point it is the student's responsibility to meet with his or her advisor.

To be removed from academic probation, the student will need to achieve a cumulative GPA of 2.000 within his or her next two terms of study. Failure to do so may subject the student to recommendation for immediate dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Undergraduate Studies.

Students who fail to demonstate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or recommended for dismissal fro the program by the Department Chair in collaboration with that Assoicate Dean of Undergraduate Studies. SHRS reserves the right to terminate a student at any time for academic or other reasons.

Dismissal from the program is at the discretion of the SHRS Dean. Notwithstanding the foregoing, in the event it is not mathematically possible for a student to remediate their cumulative program GPA within their next two terms of study the student may be immediately dismissed.

A student may appeal their dismissal with the University of Pittsburgh Provost office.

Graduation Requirements

Graduation Requirements for a Bachelor's Degree from the School of Health and Rehabilitation Sciences are as follows:

- satisfactory completion of a minimum of 120 approved credits (including advanced standing)
- minimum of 30 SHRS credits taken once admitted and enrolled in SHRS department or program
- minimum cumulative GPA 2.000
- the GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
- completion of all requirements for the program in which student has enrolled
- no outstanding D, F, G or I grades in a required course
- updated and approved Plan of Study on file in Student Services, 4019 Forbes Tower
- An **application for graduation** must be filed in the SHRS Office of Student Services, based on the deadlines determined for that term. Email notification of theses deadlines will be sent to students in the prior term. The graduation application is available on the SHRS website under forms.
- no unresolved financial obligations to the University
- student must be considered an "active student" at time of graduation; s/he must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions
- students may **not** enroll in courses outside the University of Pittsburgh in the semester they are graduating

Graduation with Honors

A baccalaureate degree student attaining an outstanding scholastic record will be graduated with University honors if a minimum of 60 letter-graded credits have been earned at the University of Pittsburgh. The GPA used for the awarding of honors at graduation will be calculated as a composite of courses taken at the University of Pittsburgh and counting toward completion of the degree. The following recognition of academic standing with honors applies:

Cum Laude	3.250 - 3.490
Magna Cum Laude	3.500 - 3.740
Summa Cum Laude	3.750 - 4.000

SHRS Student Organizations

The School of Health and Rehabilitation Sciences has student organizations for undergraduate students. Visit http://www.shrs.pitt.edu/studentgroups/ for more information.

Disability Resources and Services (SHRS specific Regulations)

Students with disabilities who require special testing, accommodations or other classroom modifications should notify no later than the 4th week of the term:

- their Department Chair
- their instructor(s)
- the Office of Disability Resources and Services (DRS)
  Students will be asked to provide documentation of any necessary accommodations as prescribed by DRS. For more information, go to: http://www.studentaffairs.pitt.edu/drswelcome.

Veteran Benefits

Veterans and dependents of disabled or deceased veterans may be eligible for benefits according to federal administration guidelines. The University has an Office of Veterans Services located on the fourth floor of the Cathedral of Learning (www.veterans.pitt.edu). For additional information on Veterans Education Benefits, visit www.gibill.va.gov.

School of Health and Rehabilitation Sciences Faculty

SHRS Faculty

Program and Course Offerings

Department of Sports Medicine and Nutrition

The Department of Sports Medicine and Nutrition offers outstanding undergraduate programming in Athletic Training as well as Nutrition and Dietetics with the mission to provide superior academic, clinical and research opportunities for students interested in a career in the areas of Athletic Training, Sports Medicine, Nutrition, Dietetics and Human Performance. SMN is committed to promoting intellectual curiosity, ethical practice, critical thinking and professional responsibility in students as well as the faculty and staff who contribute to all facets of the department's infrastructure.

The department aims to meet these objectives by:

- developing cognitive skills, psychomotor mastery, and affective values in students through the delivery of a proven formula of sound classroom education, combined with invaluable clinical education experiences, for the promotion of competent entry-level clinicians and enhancing the health and well-being of individuals and diverse populations
- becoming thought leaders by advancing the state of the science through evidenced-based practice, rigorous curricula, interdisciplinary collaboration and innovative technology
- mitigating injury and disease and optimize human performance by conducting innovative, multidisciplinary basic and applied research, and contributing to the scientific community in order to enhance clinical decisions and education

Major

Athletic Training, BS

The undergraduate athletic training education degree program earned initial accreditation in 1997 and continuing accreditation in 2004 and 2012 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Role Delineation Study/ Practice Analysis, which consists of five performance domains to include: (1) Injury/Illness Prevention and Wellness Protection; (2) Clinical Evaluation and Diagnosis; (3) Immediate and Emergency Care; (4) Treatment and Rehabilitation; (5) Organizational and Professional Health and Well-Being. The curriculum is structured to provide both academic and clinical instruction. The academic curriculum includes such courses as anatomy, kinesiology, human and exercise physiology, injury evaluation and treatment, and therapeutic modalities and exercise, among others. This course work provides a foundation for the hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon completion of the four-year baccalaureate degree, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; and professional athletic teams. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

Application Procedures

Admission to the Athletic Training Education Program requires successful completion of a minimum of 60 credits and enrollment in ATHLTR 1811 and ATHLTR 1812. Notification of admission occurs following a personal interview with the athletic training faculty and verification of completion of all prerequisite criteria. The deadline for submission of an application for admission consideration is March 15 annually.

Prerequisites for Admission

Completion of the following

Completion of	Credits
1. Foundations of Biology/Lab: BIOSC 0150/BIOSC 0050	4
2. General Chemistry/Lab: CHEM 0110	4
3. Introduction to Physics: PHYS 0110	3
4. Mathematics, Algebra: MATH 0031	3
5. Statistics, Basic Applied Statistics: STAT 0200	4
6. Psychology, Introduction to Psychology: PSY 0010	3
7. Developmental Psychology: PSY 0310	3
8. English Composition: ENGCMP 0200 minimum	6
9. Writing Intensive Course: ENGCMP 0400 recommended	3

10. Public Speaking: COMMRC 0520 3

11. Humanities Electives: 6

12. Basic Athletic Training: ATHLTR 1811 3

13. Basic Athletic Training Lab: ATHLTR 1812 1

A grade of C- or better is required for 1-11.
A grade of B or better is required for 12-13.
46 credits of prerequisite course work
14 additional credits of elective course work required

Successful completion of at least 60 credits of course work.

EMT certification is required through course for credit or other qualified course leading to the EMT or NREMT credential.

Forty-five clinical observation hours under the direct supervision of a certified athletic trainer at the University of Pittsburgh. These hours are made available to students who are registered for ATHLTR 1812 - BASIC ATHLETIC TRAINING LAB.

Twenty clinical observation hours outside the University of Pittsburgh and under the direct supervision of a certified athletic trainer at a high school facility.

Completion of admissions application including Technical Standards for admission.

The Athletic Training Education Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Education Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Education Program.

Candidates for selection to the Athletic Training Education Program must demonstrate:

The mental capacity to assimilate, analyze, synthesize, integrate concepts, and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
The ability to record the physical examination results and a treatment plan clearly and accurately.
The capacity to maintain composure and continue to function well during periods of high stress.
The perseverance, diligence, and commitment to complete the athletic training education program as outlined and sequenced.
Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Candidates for selection to the Athletic Training Education Program will be required to meet these Technical Standards with or without reasonable accommodation.

Selection Criteria

Based upon the following:

A. Overall minimum GPA of 2.50
B. Completion of all prerequisites

C. Personal interview
D. Personal qualities important for athletic training, i.e., enthusiasm, motivation, positive health habits, strong work ethic, and time commitment

Transfer Students

Students with prior athletic training experience seeking to transfer to the University of Pittsburgh for admission to the Athletic Training Education Program must complete the same pre-requisite requirements as all other candidates including the Basic Athletic Training (ATHLTR 1811) and Basic Athletic Training Lab (ATHLTR 1812) courses and all observation hours. If admitted to the program, all students must complete University of Pittsburgh core athletic training courses. In some instances, credit may be given for other coursework taken at another institution and will be evaluated on an individual case basis.

Curriculum Sequence

The following course sequence is identical for all athletic training students in the junior and senior years.

Junior Year-Fall Term

REHSCI 1200 - HUMAN ANATOMY
REHSCI 1205 - HUMAN PHYSIOLOGY
ATHLTR 1821 - INJURY EVAL AND TREATMENT 1
ATHLTR 1824 - ATHLETIC TRAINING PRACTICUM 1
ATHLTR 1831 - THERAPEUTIC MODALITIES AND LAB

Total: 18

Junior Year-Spring Term

REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
ATHLTR 1822 - INJURY EVAL AND TREATMENT 2
ATHLTR 1832 - THERAPEUTIC EXERCISE AND LAB
ATHLTR 1833 - STRENGTH AND CONDITIONING
ATHLTR 1835 - ATHLETIC TRAINING PRACTICUM 2

Total: 15

Senior Year-Fall Term

HRS 1006 - INTRO TO HUMAN NUTRITION
REHSCI 1215 - EXERCISE PHYSIOLOGY
REHSCI 1235 - MEDICAL TERMINOLOGY
ATHLTR 1885 - INTRODUCTION TO EVIDENCE BASED REHABILITATION
ATHLTR 1823 - ADMINV ASPECT OF ATHL TRAINING
ATHLTR 1841 - ATHLETIC TRAINING PRACTICUM 3
Elective (1-3)

Total: 14-18

Senior Year-Spring Term

REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
ATHLTR 1834 - SPEC TOPICS ATHLETIC TRAINING
ATHLTR 1842 - ATHLETIC TRAINING PRACTICUM 4
ATHLTR 1843 - ADVANCED ORTHOPEDIC ASSESSMENT
ATHLTR 1866 - PSYCHOLOGY OF SPORT
Elective (1-5)

Total: 14-18

Total Prerequisite Credits: 60

Total SHRS Credits: 61-69

Total Degree Credits: 121-129

Nutrition and Dietetics, BS

Proper nutrition plays a major role in the maintenance of health and the quality of life, prevention and treatment of certain diseases, as well as recovery and rehabilitation following physiological trauma. Although a number of professions include nutrition as one area of research and/or practice interests, it is the profession of dietetics that dedicates its efforts entirely to the improvement of the nutritional status of people and the advancement of the science of nutrition. Registered Dietitian Nutritionists (RDNs) possess specialized education to provide nutritional care to people, both well and ill, by using their expertise in nutrition science, food science, psychological and social significance of eating behavior management, food economics, budgeting, counseling, and education, and research methodology. Registered Dietitian Nutritionists practice in a variety of settings. These include hospitals and other health care institutions, industry, wellness and community programs, government, research, and private practice.

Preparation for a career as a Registered Dietitian Nutritionist requires the completion of:

a bachelor's degree and coursework verified by the Accreditation Council on Education in Nutrition and Dietetics (ACEND)
an accredited supervised practice experience
The National Registration Examination for Dietitians.

The Nutrition and Dietetics program offers several options for meeting the eligibility requirements to take the registration examination:

Completion of a Bachelor of Science degree in Nutrition and Dietetics. The B.S. degree is a Didactic Program in Dietetics accredited by the Accreditation Council for Education in Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995. Following competition of the didactic BS degree, completion of an accredited post baccalaureate supervised practice program is required in order to be eligible for the National Registration Examination for Dietitians. The University assumes no responsibility for the placement or supervision of graduates in supervised practice programs.

Completion of the Coordinated Master Program in Nutrition and Dietetics (CMD), which combines didactic education leading to a Master of Science degree with supervised practice. The CMD emphasis area is nutrition therapy. Admission prerequisites for the CMD are provided in the graduate bulletin or see http://www.shrs.pitt.edu/ndms/. The CMD is accredited by the Accreditation Council on Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995

Application Procedures

Admission to the Nutrition and Dietetics program requires successful completion of a minimum of 60 credits including all prerequisite courses below. The deadline for submission of an application for admission consideration is March 15th annually.

Prerequisites for Admission

	Completion of the following courses:	Credits
1.	Foundations of Biology 1: BIOSC 0150	3
2.	Foundations of Biology Lab 1: BIOSC 0050	1
3.	Foundations of Biology 2: BIOSC 0160	3
4.	Introduction to Microbiology: HRS 1025 or BIOSC 1850	3
5.	General Chemistry 1 with Lab: CHEM 0110	4
6.	General Chemistry 2 with Lab: CHEM 0120	4
7.	Organic Chemisty: Students should take Principles of Organic Chemistry:CHEM 0350 offered each spring term or must take both Organic Chemistry 1: CHEM 0310 and Organic Chemistry 2: CHEM 0320	3-6
8.	Economics: ECON 0800, ECON 0100 , or ECON 0110	3
9.	English Composition: ENGCMP 0200	3
10.	Intensive Writing (W) Course: ENGCMP 0450 recommended	3
11.	Algebra or higher math: MATH 0031 , MATH 0032 , MATH 0100 , or MATH 0200	2-4
12.	Introduction to Psychology: PSY 0010	3
13.	Public Speaking: COMMRC 0520	3
14.	Introduction to Sociology: SOC 0010	3
15.	Statistics: STAT 0200 or STAT 1000	4
16.	Introduction to Human Nutrition: HRS 1006 or NUTR 1006	3
17	Introduction to the Profession of Dietetics: NUTR 1600 Note: Transfer students may take this course in the Fall Term, of the Junior Year.	1

Admission Selection Criteria Include:

A minimum cumulative GPA of 2.5
A minimum prerequisite GPA of 2.5
A minimum grade of C- in all courses designated as prerequisites taken at the University of Pittsburgh. If the course is taken at another college/university, a minimum grade of C is required.

Submission of one letter of recommendation (college instructor/professor, recent supervisor, or academic advisor preferred).
Submission of a personal statement discussing why the applicant is interested in the program and the field of nutrition and dietetics, professional goals, and any work or volunteer experience in the field.

Please note that admission is competitive. Meeting the minimum admission criteria does not guarantee admission.

Curriculum Sequence

The BS degree in Nutrition and Dietetics requires the completion of a minimum of 122 credits which includes 60 credits prior to admission and 62 credits of required courses taken within the program. The program curriculum is as follows:

Junior Year - Fall Term

HRS 1000 - INTRODUCTION TO RESEARCH
HRS 1023 - HUMAN PHYSIOLOGY
NUTR 1620 - MACRONUTRIENT METABOLISM
NUTR 1609 - CLINICAL BIOCHEMISTRY
NUTR 1602 - NUTRITION ASSESSMENT 1

Credits: 16

Junior Year - Spring Term

NUTR 1610 - FOOD SCIENCE 1
NUTR 1613 - FOOD SCIENCE 1 LABRATORY
NUTR 1612 - SOCL & CULTL DETRM HABITS
NUTR 1621 - MICRONUTRIENT METABOLISM
Electives - 6 Credits

Credits: 16

Senior Year - Fall Term

NUTR 1605 - PRINCPLS NUTRTNS EDUC & CNSLG
NUTR 1614 - NUTRITION & CRITICAL THINKING
NUTR 1630 - NUTRITION THERAPY 1
NUTR 1603 - NUTRITION ASSESSMENT 2
HRS 1009 - ORGANIZATIONAL THEORY & BEHAVR

Credits: 15

Senior Year-Spring Term

NUTR 1608 - PROFESSIONAL TRENDS & ISSUES
NUTR 1622 - NUTRITION IN THE LIFE CYCLE
NUTR 1604 - FOOD SERVICE MANAGEMENT

NUR 1632 - NUTRITION THERAPY 2
Electives - 3 Credits

Credits: 15

Total Program Credits: 62

Total Degree Credits: 122

Department of Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders offers an undergraduate major in Communication Science. The program focuses on the anatomical, physiological, and psychological foundations of communication as well as on the basic structure of language and the process of speech and language development. The program is also designed to develop critical thinking skills including the ability to evaluate scientific information.

This major is particularly appropriate for students considering graduate study and a career in Speech-Language Pathology [SLP] or Audiology [AuD]. (A graduate degree is required for clinical practice in both professions). Speech-language pathology and audiology are among the most attractive and diverse healthcare and educational professions available. The scientific basis of the field appeals to the scientist who has an interest in basic or applied research, whereas the clinical element of the field appeals to the practitioner who is motivated to make a difference in people's lives.

Recent projections from the U.S. Department of Labor indicate a shortage of speech-language pathologists and audiologists. The future of the job market is healthy due to an increasing public awareness of the need for early diagnosis of communication disorders; an awareness of the educational, social, and vocational benefits of programs for communication disorders; and an aging population. The need for speech, language, and hearing scientists is also great; there are many research and academic opportunities for those interested in research in these fields.

The undergraduate degree in Communication Science is also an excellent preparation program for profesional or graduate programs in education of the deaf and hard of hearing, early-childhood, elementary or special education, the neurosciences, speech and hearing sciences, and other health-related professions such as rehabilitation counseling, occupational therapy, and physical therapy. The necessary prerequisites for these programs can be taken while completing the major.

Students attain broad-based knowledge in this major about the basic aspects of speech, language, and hearing sciences, which prepares students for a number of related career fields and employment positions upon graduation as well. More information is available in the CSD Advising Office.

Interested students should contact the Director of CSD Undergraduate Education, Dr. Janice Vance, jvance@pitt.edu or 412-383-6562.

Admission Requirements

Students are eligible for admission to the Communication Science program after successful completion of 60 credits. Students should complete the Basic Skills Prerequisites and Basic Sciences prior to application. Students should also complete as many of the General Education Requirements and Additional Requirements courses as possible prior to application. Some may be completed while enrolled in the program. Applications will be reviewed when approximately 45 credits are completed and 15 credits are in progress.

Students should contact the Director of CSD Undergraduate Education, Dr. Janice Vance, jvance@pitt.edu or 412-383-6562, prior to applying. (Specialized advising is available to freshman and sophomore students.) For admission, an application with all transcripts from universities/colleges attended and a personal essay is required. Resumes are strongly suggested. A letter of recommendation is NOT required. A minimum GPA of 2.75 is preferred, but students may be admitted provisionally if program capacity permits.

University of Pittsburgh Freshman Guarantee

Entering freshmen may qualify for a guarantee into the graduate programs in Audiology or Speech-Language Pathology. For consideration for the Freshman Guarantee, indicate an intended field of study as Pre- Communication Science on your application when applying as a freshman (at regional campuses, choose corresponding codes). Qualifying students admitted in the Fall of 2016 will meet the following criteria: SAT scores of 1410 (combined Critical Reading and Math) or an ACT Composite score of 30. Students must also be in the top 10% of their high school graduating class.

The student must have an overall GPA of 3.6 when applying to the Communicaiton Science program at the beginning of the spring semester of sophomore year. At the time of application to the a graduate program, guaranteed students must have a cumulative grade point average (GPA) of 3.6 or better and a GPA of 3.75 in the core communication science major courses. Additionally, guaranteed students must achieve a GRE ranking in the 50th percentile or higher for the Quantitative and Verbal sections and a 3.5 on the Analytical Writing section. Finally, a full application must be submitted on time through the CSDCAS website.

Early Decision for Graduate Programs

Students pursuing an undergraduate degree in Communication Science from the University of Pittsburgh are eligible to apply Early Decision to either the University of Pittsburgh's graduate program in Audiology or Speech-Language Pathology. Contact Dr. Erin Lundblom, lundblom@pitt.edu, for candidate details and information on the process.

Major

Communication Science, BA

Course Requirements for the Undergraduate Major in Communication Science

(Total credits required = 120)

Students can contact the Director of CSD Undergraduate Education, Dr. Janice Vance, jvance@pitt.edu or 412-383-6562, for specialized advising as a freshman and/or sophomore.

Basic Skills Prerequisites

(15 credits)

Basic Writing (or exemption) - 3 Credits

English Composition (ENGCMP 0200 or higher) - 3 Credits

Mathematics (MATH 0031 or higher.) - 3 Credits

Second Language: First and Second Levels - 6 Credits

(Spanish, Latin, ASL, etc.)

(May also be satisfied by three years of high school second language.)

General Education Requirements

(21 to 24 credits)

English or American Literature - 3 Credits

Writing Intensive (W)* - 3 Credits

*May be combined with another requirement *(e.g., literature, history, etc.)*

Music or Art - 3 Credits

Second Literature / Music / Art or Creative Expression - 3 Credits

History - 3 Credits

International Culture - 6 Credits

International Culture (non-western) - 3 credits

Basic Science

(9 credits)

Behavioral Science - PSY 0010 INTRODUCTION TO PSYCHOLOGY - 3 Credits

Biological Science - A course in human biology (i.e.,BIOSC 0850 , BIOSC 0815 , or BIOSC 0150) or human anatomy and physiology. - 3 Credits

Physical Science -Suggested courses include: PHYS 0091 , PHYS 0110, or PHYS 0174 - 3 Credits

Additional Requirements

(15 credits)

Five additional courses must be completed, one from each of the areas listed below. These courses are designed to ensure that the student is well educated in related disciplines, in keeping with the place of communication science and disorders at the confluence of several realms of study. Some are also required for professional certification. Consult with the CSD Advising Office for more course options.

Statistical Methods - STAT 0200 or STAT 1000.

Neurological and Cognitive Foundations of Language - PSY 0405, PSY 0422, PSY 0505, PSY 0510, NROSCI 0080, or NROSCI 1000.

Philosophy of Science -HPS 0515, HPS 0608, HPS 0611, HPS 0612, HPS 0613, HPS 1653, PHIL 0350, PHIL 0610, or PHIL 1610.

Sociocultural Studies - ANTH 0620, ANTH 0780, PSY 0105, HIST 1090, LING 1235, LING 1263, LING 1267, LING 1722, LING 1724, SOC 0007, SOC 0312, SOC 0317, SOC 0352 , SOC 0477, or SOC 1450.

Lifespan Development - PSY 0310

Major (Core) Courses (41 credits)

Most of the core courses in Communication Science are taken after admission to the Communication Science program. Four of the core courses are available to freshman and sophomore students. These four courses can also be as part of the Communication Science program of study. Several core courses have prerequisites resulting in a sequence of courses. The course sequence is represented in the example Plan of Study. Interested students should be aware that the core courses or sequence of courses may change.

Courses

All courses are required.

CSD 1020 - NATURE OF LANGUAGE
CSD 1021 - LANGUAGE DEVELOPMENT
CSD 1022 - TRANSCRIPTION PHONETICS
CSD 1023 - ANATMY & PHYSIOLOGY OF SPEECH
CSD 1024 - ANATMY & PHYSIOLOGY OF HEARING
CSD 1025 - HEARING SCIENCE
CSD 1026 - SPEECH SCIENCE
CSD 1027 - LAB IN ANAT/PHYSIOLGY OF SPCH
CSD 1028 - LAB IN HEARING SCIENCE
CSD 1029 - LAB IN ANAT/PHYSLGY OF HEARNG
CSD 1030 - LAB IN SPEECH SCIENCE
CSD 1101 - INTRO TO CLINICAL PROCESSES
CSD 1230 - INTRO SPEECH LANG PATHOLOGY
CSD 1231 - EVAL TREATMNT COMMNCTN DISEAS
CSD 1232 - INTRODUCTION TO AUDIOLOGY
CSD 1233 - INTRODUCTION TO RESEARCH
CSD 1234 - WRIT PRAC FOR EVAL & TREATMENT

Courses Available to Freshman and Sophomore

The following courses are available to freshman and sophomore students. These courses can also be completed during the Communication Science program of study if not completed prior to admission.

Freshman Fall

CSD 1232 - INTRODUCTION TO AUDIOLOGY

Freshman Spring

CSD 1230 - INTRO SPEECH LANG PATHOLOGY

Sophomore Fall

CSD 1020 - NATURE OF LANGUAGE
If not already completed - CSD 1232 - INTRODUCTION TO AUDIOLOGY

Sophomore Spring

CSD 1101 - INTRO TO CLINICAL PROCESSES in SLP and Audiology - Prerequisites for this course are CSD 1232 and CSD 1230 (CSD 1230 may be taken simultaneously.)
If not already completed - CSD 1230 - INTRO SPEECH LANG PATHOLOGY

Plan of Study

This plan of study identifies the sequence of core courses offered in the Communication Science program. A course schedule for each semester is completed with any remaining General Education Requirements or Additional Requirements, minor or certificate courses, or other elective courses.

Junior Fall

If not already completed - CSD 1020 - NATURE OF LANGUAGE

If not already completed - CSD 1232 - INTRODUCTION TO AUDIOLOGY
CSD 1022 - TRANSCRIPTION PHONETICS
CSD 1023 - ANATMY & PHYSIOLOGY OF SPEECH
CSD 1027 - LAB IN ANAT/PHYSIOLGY OF SPCH

Junior Spring

If not already completed - CSD 1230 - INTRO SPEECH LANG PATHOLOGY
If not already completed - CSD 1101 - INTRO TO CLINICAL PROCESSES
CSD 1021 - LANGUAGE DEVELOPMENT
CSD 1026 - SPEECH SCIENCE
CSD 1030 - LAB IN SPEECH SCIENCE

Senior Fall

CSD 1024 - ANATMY & PHYSIOLOGY OF HEARING
CSD 1029 - LAB IN ANAT/PHYSLGY OF HEARNG
CSD 1231 - EVAL TREATMNT COMMNCTN DISEAS
CSD 1234 - WRIT PRAC FOR EVAL & TREATMENT

Senior Spring

CSD 1025 - HEARING SCIENCE
CSD 1028 - LAB IN HEARING SCIENCE
CSD 1233 - INTRODUCTION TO RESEARCH

Related Area / Minors and Certificates / Directed or Independent Studies

No additional related area is required for this undergraduate degree.

Many students are able to complete certificate programs or minors in addition to the requirements for the BA in *Communication Science*. In recent years, students have attained certificates in Conceptual Foundations of Medicine, Latin American studies, American Sign Language, and Children's Literature and minors in Neuroscience, Linguistics, Social Work and Sociology, among others. These are only a few of the many certificate and minor programs available at the University of Pittsburgh.

In some locations, employment within an educational setting requires additional courses and/or certification. Students considering work in educational settings should consider enrolling in education courses (i.e., IL) as electives. Students can consult with Dr. Erin Lundblom (lundblom@pitt.edu) in the CSD Advising Office for more information about teaching certification or state licensure.

Students may consult with Dr. Janice Vance (jvance@pitt.edu), Director of CSD Undergraduate Education, about the possibility of pursuing a directed or independent study with a member of the faculty as a formal approval process is required.

Emergency Medicine Program

Today, the field of out-of-hospital medicine is expanding rapidly to include many aspects of patient care in addition to emergency management and community medicine. As this field continues to grow and change, leaders and educators with a background in emergency medicine are needed to help shape the future of Emergency Medical Services (EMS). A Bachelor of Science degree in Emergency Medicine can benefit the EMS professional in many ways. This dynamic and multidisciplinary approach to emergency medicine education will provide the student with a strong foundation in clinical experiences, educational expertise and administrative leadership.

This Program is designed to meet the growing need for the advanced skill levels required in the EMS profession and to prepare students for the technical, clinical and administrative challenges of a career in EMS and health care today. Many Emergency Medicine (EM) students continue to medical school, PA School and other graduate level education.

Recognizing that students will be entering the Program with varying levels of education and experience, students are admitted into the program at the appropriate level based on student's career and academic experiences.

Students who have completed a minimum of 60 credits, including Pennsylvania or National Registry of EMTs (NREMT) EMT certification and the designated prerequisites, are admitted into the program for the junior year and with successful completion are provided the opportunity to obtain Pennsylvania paramedic certification and National Registry paramedic certification at the end of that year.

Students who have earned the aforementioned credits and are currently certified or licensed at the paramedic levels (by a state EMS agency or the National Registry of EMTs), may be awarded advanced standing and admitted into the Program as a senior transfer student. During the senior year, these students will be required to complete 30 credits within the School of Health and Rehabilitation Sciences to be eligible for graduation. Senior transfer students must complete EM core credits in a traditional format; web-based or distance course delivery format is not available. For more information, please contact the program at 412-647-4547.

Students who have earned the aforementioned credits, are currently active with the military and are currently US SOCM ATPs or certified or licensed at the paramedic level (by a state EMS agency or the National Registry of EMT), may be awarded advanced standing and admitted into the Program as active military transfer students. During the senior year, these students will be required to complete 30 credits within the School of Health and Rehabilitation Sciences to be eligible for graduation. Web-based delivery format is provided for all core courses. For more information, please contact the program at 412-647-4547.

Due to the ever changing health care industry and the integral part EMS has played in public safety, EMS will be more than a medical response in an emergency. It will play a vital role in improving the general health of the population in the community it serves. The demand is also growing for EMS professionals to have an expertise in business, management, teaching and clinical techniques. This Program is intended to give its students the edge in every aspect of the field.

Admission Requirements

Notification of admission occurs following a personal interview with the Emergency Medicine faculty and evidence of completion of all prerequisite criteria.

Applications are due March 15 and interviews will begin in January for all applicants. Applications received after the deadline will be reviewed based upon available space. All applicants are encouraged to apply early, as limited seats are available. Applications may be submitted while course requirements are in progress.

For Juniors: For Juniors: This Program requires students to complete clinical education at facilities external to the University, and such facilities will require a criminal background check, an Act 33/34/73 clearance, physical examination, blood titers, and a drug screen to determine whether the student applicant is qualified to participate in the clinical education. Students must be currently certified as an EMT by the Commonwealth of Pennsylvania. Out of state and Nationally Registered EMTs must apply for and receive endorsement by certification equaling reciprocity. A Program Fee of $1,500 is charged to each junior student to cover the cost of disposable equipment, supplies and specialty certifications. Students are required to purchase and wear clinical uniforms designated by the Program and maintain health insurance throughout the entire junior year. Additionally, in order to become certified/ licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor and a felony.

Major

Emergency Medicine Program

Prerequisite Courses

Students are admitted into the Emergency Medicine program after successful completion of a minimum of 60 college credits, including the following prerequisite courses:

Oral*/Written Communications - 6 Credits
Mathematics/Statistics/Computer Science - 4 Credits
Natural Sciences/Psychology - 6 Credits
Humanities/Social Science (ex . Anthropology, Economics, English Literature/Writing, Second Language, History, Music, Performing & Visual Arts, Philosophy, Religion, Sociology, etc.) - 6 Credits
Additional Credits from Above Content Areas - 8 Credits
EMT with Lab ** - 4 Credits
Additional Coursework - 26 Credits

*Accepted Oral Communications Courses: COMMRC 0500, COMMRC 0510, COMMRC 0520, COMMRC 0530, COMMRC 0540, COMMRC 0550.

**Verification of current Pennsylvania or National Registry EMT certification must be provided. If a non-credit course was taken for this certification, 4 credits may be granted through credit by course examination. Junior year students without Pennsylvania EMT certification will be required to apply for and receive reciprocity from the Pennsylvania Department of Health.

**Current Paramedic certification must be demonstrated to receive the advanced standing of 39 credits (*includes four credits of EMT). The awarding of 39 advanced standing credits limits the transfer of college credits to no more than 51 credits (including required 30 prerequisites and 21 additional coursework credits). College classes taken as requirement for obtaining paramedic certification may not be utilized toward the 51 credits.

Emergency Medicine Curriculum

Fall Term-Junior Year

EM 1111 - FOUNDATIONS OF EMERGENCY CARE
EM 1112 - PATHOPHYSIOLOGY
EM 1114 - MEDICATION ADMINISTRATION
EM 1115 - INTRO TO PHYSICAL ASSESSMENT
EM 1116 - PHYSICAL EXAM LAB
EM 1122 - CARDIOLOGY AND RESPIRATORY
EM 1131 - CLINICAL 1

Spring Term-Junior Year

EM 1113 - PHARMACOLOGY
EM 1117 - EMS OPERATIONS
EM 1123 - CARDIOLOGY LAB
EM 1124 - ADULT MEDICAL EMERGENCIES
EM 1125 - OB/GYN, NEWBORN, & PEDS CARE
EM 1126 - ASSESSMENT BASED MANAGEMENT
EM 1132 - CLINICAL 2

Fall Term-Senior Year Core Content

EM 1152 - ISSUES IN HEALTH CARE
EM 1153 - ISSUES IN HLTH CARE EDUCATION
EM 1154 - HEALTH CARE RESEARCH
EM 1155 - LEGAL ISSUES IN HEALTH CARE
EM 1158 - FINC & ACCT FOR HEALTH CARE
EM 1180 - HEALTH CARE MANAGEMENT

Spring Term-Senior Year Core Content

EM 1160 - PROFESSIONAL ISSUES
EM 1166 - SENIOR INTERNSHIP
EM 1168 - LEADERSHIP IN HEALTHCARE
EM 1169 - CRITICAL CARE MANAGEMENT
EM 1177 - SENIOR SEMINAR

Additional Senior Level Elective Courses

EM 1185 - BEYOND THE BODY - WEB
EM 1187 - ORGANIZATIONAL THEORY-WEB
EM 1186 - CERTIFIED AMBULANCE CODER-WEB
EM 1250 - INTRODUCTION COMMUNITY HEALTH
EM 1251 - MOBILE INTEGRATED HEALTHCARE
EM 1260 - COGV PSYCH OF DECISION MAKING

Transfer Students

Students are required to earn 30 credits within the University of Pittsburgh School of Health and Rehabilitation Sciences and these may not include prerequisite courses. Senior transfer students are required to have current certification/licensure as a paramedic and have completed 51 college credits, including the required prerequisite courses. All senior transfer students will be offered a 3-credit online EM course each semester to fulfill the 30-credit requirement (Beyond the Body will be offered in the fall semester and Organizational Theory will be offered in the spring). Students may take other 3-credit courses within SHRS each semester to fulfill the 30-credit requirement. Senior transfer students must complete EM core credits in a traditional format; web-based or distance course delivery format is not available.

For Juniors: This Program requires students to complete clinical education at facilities external to the University, and such facilities will require a criminal background check, an Act 33/34/73 clearance, physical examination, blood titers, and a drug screen to determine whether the student applicant is qualified to participate in the clinical education. Students must be currently certified as an EMT by the Commonwealth of Pennsylvania. Out of state and Nationally Registered EMTs must apply for and receive endorsement by certification equaling reciprocity. A Program Fee of $1,500 is charged to each junior student to cover the cost of disposable equipment, supplies and specialty certifications. Students are required to purchase and wear clinical uniforms designated by the Program and maintain health insurance throughout the entire junior year. Additionally, in order to become certified/ licensed, many states will inquire as to whether the applicant has been convicted of a misdemeanor and a felony.

Active Duty Militaty Students

Students are required to earn 30 credits within the University of Pittsburgh School of Health and Rehabilitation Sciences and these may not include prerequisite courses. Active military transfer students are required to have current certification/licensure as a paramedic and have completed 51 college credits, including the required prerequisite courses. Beyond the Body and Organizational Theory are offered as part of the core curriculum for this program. All core coursework for active military students is provided in a web-based format.

Department of Health Information Management

Accurate, reliable patient data is critical to health professionals, and the health information management department is the key health center for medical staff, administrators, other health professionals, and the community. In today's, environment, HIM professionals engage in a variety of roles, from the more traditional HIM directors, to privacy officers, systems analysts, and electronic health record specialists. The health information management professional is a key member of an organization and ensures that patient information is available when it is needed, while maintaining high standards of data integrity, confidentiality, and security. Health information management professionals design, develop, evaluate, and manage health information systems and disease registries in all types of health care facilities, organizations, and agencies. Please visit AHIMA.org for more information on career paths.

Health information management graduates are prepared to serve the health care industry wherever health information is collected, organized, and analyzed, and work in a variety of health care settings such as acute-care hospitals, psychiatric facilities, ambulatory-care facilities, physician office practices, long-term care facilities, mental health agencies, and rehabilitation centers. HIM professionals use their expertise in over 40 different work

settings such as hospitals, healthcare technology vendors, consulting firms and insurance companies to name a few. Their ranks are also increasing in consulting, accounting and legal firms, disease registries, payer organizations (e.g. insurance, reimbursement), research and policy agencies, and educational institutions.

Due to the increased presence of technology as a key component of health care delivery, more HIM professionals are finding career opportunities in the information systems environment, where they develop, market, and implement software; ensure that systems comply with standards and regulations, and work in support of quality, privacy, and security in paper-based as well as electronic medical records. The opportunities for graduates continue to be plentiful. The Bureau of Labor Statistics cites health information professionals as one of the 20 fastest-growing occupations in the US. On top of strong job prospects, competitive salaries also await HIM graduates. More than half of new HIM graduates with a bachelor's degree start with salaries in the $40-50,000 range.

In order to meet the data requirements of all facets of the health care delivery system, a broad-based curriculum has been designed for health information management students. The health information manager combines knowledge of health care, health records, information management, and administration to provide quality services that meet the medical, epidemiological, administrative, legal, ethical, regulatory, and institutional requirements of the health care delivery system being served. The graduate must also have an understanding of anatomy, physiology, pathophysiology, epidemiological research, statistical methods, and legal aspects of health care, as well as knowledge of both state and federal regulations.

Clinical education, beginning in the spring term of the junior year, is scheduled at various health care institutions to provide the student with real experiences in the profession. The final clinical education is a six-week full-time management affiliation at a health care institution within, or, at times, outside the state. Students are required to provide their own transportation to clinical sites, whether they are on campus or located at an off-campus site and are responsible for all expenses during clinical education.

The health information management program is accredited by the Commission on Health Informatics and Information Management Education (CAHIIM). Following satisfactory completion of all course requirements, the graduate will be awarded the degree of Bachelor of Science and students are eligible to sit for the RHIA (http://www.ahima.org/certification/RHIA) credentialing examination administered by the Commission on Certification for Health Informatics and Information Management (CCHIIM) an affiliate of the American Health Information Management Association (AHIMA) during their last semester of study. For more information, see http://www.shrs.pitt.edu/him/.

Results from the 2015 outcomes assessment reported to CAHIIM in the 2016 Annual Program Report (APAR) indicate:

A 100% employer satisfaction rate

A 100% graduate satisfaction rate

A 93% pass rate National Certification Exam

Part-Time Study

Students may pursue this program on a part-time basis. A meeting with the appropriate advisor is recommended.

Progression for the Registered Health Information Technician (RHIT)

Provision for transfer of credits may be made for those students who have satisfactorily completed a junior college health information technology program accredited by the Commission on Health Informatics and Information Management Education (CAHIIM). In addition, the HIM department has an articulation agreement with the Health Information Technology Program at the Community College of Allegheny County, enabling qualified graduates of the HIT program to matriculate into the HIM program at the University of Pittsburgh as juniors.

The Pitt Freshman Guarantee

All incoming Pitt freshmen choosing the Pre-Health Information Management major will be granted guaranteed admission for the Master of Science in Health and Rehabilitation Sciences with a concentration in Health Information Management (at regional Pitt campuses, choose corresponding codes).

Fax: 412-383-6655

E-mail: him@pitt.edu

http://www.shrs.pitt.edu/HIM/

Admission Requirements

Students are admitted into the health information management program after successful completion of a minimum of 60 credits, including the following prerequisite courses:

- General Biology - 3 Credits
- General Chemistry - 3-4 Credits
- Communication/Public Speaking - 3 Credits
- Information Science/Computer Science (must include a programming course) - 9 Credits
- General Writing - 6 Credits
- Mathematics* - 2-3 Credits
- General Psychology - 3 Credits
- Statistics* - 3-4 Credits
- Humanities/Social Sciences - 6 Credits

*A combination of 6 credits of math and statistics is required.

Other admission criteria include minimum cumulative GPA of 2.50 (based on 4.00), and minimum of a C- grade in all courses designated as prerequisite (C required for credit transfer from other institutions); volunteer or paid work experience in the field of health information management is recommended.

Pitt Students (including regional campuses)

Complete the SHRS ApplyYourself online application.

Transfer Students

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Health Information Management as their intended field of study. International transfer students click here.

All applicants must:

- Submit a personal essay-a brief statement discussing why you are interested in the Undergraduate Program in Health Information Management, your professional goals including how and when you became interested in this field of study. You may also include other areas of interest, extra-curricular activities and leadership experiences;
- Submit one letter of recommendation. Recommendation from a college instructor/professor, recent supervisor, or academic advisor preferred;
- Submit official transcripts from all colleges and universities attended;
- Applications can be submitted when course requirements are in progress.

Applications are reviewed on a rolling basis.

Note: For part-time and registered health information technician students, HIM Clinical Education HIM 1440, HIM 1460, HIM 1480, and HIM 1495 and HIM 1496 (Capstone Course in HIM) may be taken in any term with permission of advisor and the instructor after the appropriate prerequisite courses have been completed.

Clinical Education

Health Information Management undergraduate students participate in four different clinical education (CE) internships that facilitate a deeper understanding of the professional practice aspects of health information and related health-care areas. The overall goal of the clinical education is to provide students with practical experiences to apply their knowledge and skills that they develop as they progress through the HIM curriculum. Each internship experience provides the HIM student with a different focus, and the opportunity for the student to interact with HIM professionals as well as other professionals in the health care field.

The HIM department has affiliation agreements with approximately 200+ clinical sites for student internships. The following list provides a sample of these sites:

Adelphoi Village (behavioral health)
Allegheny Valley Hospital

Center for Connected Medicine
Country Meadows Nursing Home
creehan & company
Diskriter, Inc.
Geisinger Health System
Heritage Valley Health Center
Intermountain Health Care, Salt Lake City, UT
Jameson Health System
M*Modal
MedAllies
PA Department of Corrections
The Innovation Center of UPMC
Trinity Health System
UCLA Medical Center
University of Pittsburgh Dental Informatics
University of Pittsburgh Cancer Institute (Hillman Cancer Center)
UPMC Health Plan
UPMC Health System
UPMC Physician Services Division
Wheeling Hospital
WVU Healthcare

Prerequisites for Clinical Education:

Students must complete certain requirements to be eligible to participate in clinical education. The HIM Clinical Education Coordinator will provide detailed information and time guidelines for completion of these requirements once the student matriculates into the HIM program.

- Physical examination including proof or completion of specific immunizations
- TB test, 2-step
- Pennsylvania Criminal Record Check
- Pennsylvania Child Abuse Clearance
- FBI Background Check (includes fingerprinting)
- HIPAA Training and Certification
- Bloodborne Pathogen Training and Certification
- Students must carry personal health insurance while participating in clinical education
- Students must carry professional student liability insurance coverage while participating in clinical education. This coverage is provided by the SHRS group insurance plan and will appear as a charge on the students' tuition bill.
- Some sites may have additional requirements (i.e. drug screen, influenza vaccine, or orientation programs specific to their organization).
- Clinical Education sites may not allow a student to participate in an internship at their site if the background check reports that they have been convicted of a misdemeanor; a felony; or a felonious or illegal act associated with alcohol and/or substance abuse.

Additional Information:

- Travel to clinical education sites is the responsibility of the student. Students are expected to have a car or to provide their own transportation to all remote sites; no exceptions will be made. Not all sites are accessible by public transportation.
- All expenses for transportation, parking, meals, and costs of prerequisites associated with clinical education are the responsibility of the student.
- Approximate cost for clearances is $100 annually, and costs for physical exam and immunization status are dependent on health insurance coverage and provider costs.
- Approximate cost for drug screen is $40.

For more information on Clinical Education, email Patti Anania Firouzan, HIM Clinical Education Coordinator: patti@pitt.edu.

Department of Rehabilitation Science

Major

Rehabilitation Science, BS

The Bachelor of Science program in rehabilitation science offers a dynamic curriculum designed to prepare students for graduate education in occupational therapy, physical therapy, physician assistant studies, prosthetics and orthotics, rehabilitation counseling and assistive technology, as well as for graduate studies in other health care fields. In addition to the coursework offered, the program has the flexibility to allow students to pursue their particular interests and goals. Students are encouraged to explore other areas of academic inquiry through elective courses, minors and certificates throughout the University and abroad; to participate in clinical experiences; to involve themselves in undergraduate research; and to develop their leadership and community building skills through participation in student organizations and community service.

The majority of faculty members who teach in this program are a strong interdisciplinary group of individuals from the School of Health and Rehabilitation Sciences departments, including the departments of Emergency Medicine, Occupational Therapy, Physical Therapy, Physician Assistant Studies, and Rehabilitation Science and Technology. In addition, instructors from other schools of the health sciences teach within the program along with community leaders, clinicians and researchers with experience in selected areas.

Admission Requirements

Students are eligible for admission to the rehabilitation science program after successful completion of 60 college credits including the following prerequisite courses, other admission criteria and an application.

General Biology (BIOSC 0150) and Lab (BIOSC 0050 or BIOSC 0057) - 4 Credits
General Chemistry and Lab (CHEM 0110) - 4 Credits
Physics 1 (PHYS 0110) - 3-4 Credits
Mathematics (MATH 0031 or higher) - 2-3 Credits
MATH 0032 - TRIGONOMETRY AND FUNCTIONS or higher is highly recommended.
Statistics (STAT 0200, STAT 1000, or higher) - 3-4 Credits
Introduction to Psychology (PSY 0010) - 3 Credits
Human Development - 3 Credits
REHSCI 1245 - HUMAN DEVELOPMENT or PSYED 0005 - LIFE SPAN DEVELOPMENT preferred; PSY 0310 - DEVELOPMENTAL PSYCHOLOGY accepted
English Composition (Minimum ENGCMP 0200 or equivalent) - 3 Credits
Intensive Writing (W) (ENGCMP 0450 recommended) - 3 Credits
Social Science/Humanities (ANTH 0780 recommended) - 6 Credits

Total Prerequisites: 34-37

Students planning to apply to graduate programs in health sciences are encouraged to complete most of the prerequisite courses for those programs (e.g., Physics 2, Biology 2, Chemistry 2, etc.) prior to admission to the undergraduate rehabilitation science program. Anatomy and Physiology (prerequisites for many professional health science programs) are included in the rehabilitation science curriculum.

For additional admission criteria, see the SHRS Admissions section of this Bulletin.

Please note that admission to the Rehabilitation Science program is competitive. Meeting the minimum admission criteria does not guarantee admission.

Rehabilitation Science Degree Requirements

General Requirements

Prerequisites for admission into BS program
Minimum of 60 Rehabilitation Science credits
(minimum 30 SHRS credits and 30 additional credits approved by RS Program Director)
120 credits total
Fulfillment of core requirements
Plan of study approved by Academic Advisor

Core Curriculum Requirements

REHSCI 1225 - INTRO TO REHABLTTN SCIENCE
REHSCI 1235 - MEDICAL TERMINOLOGY

Credits: 15

Senior Year-Term 2

REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
REHSCI 1280 - PSYCH AND SOCLGY OF DISABILITY
REHSCI 1295 - FIELD EXPERIENCE
Electives - 5 Credits

Credits: 15

Certificate

Assistive Technology in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The undergraduate program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

The undergraduate Rehabilitation Science certificates are listed below followed by the specific course requirments for each:

Assistive Technology in Rehabilitation
Pathokinesiology in Rehabilitation
Psycho-Social Issues in Rehabilitation and Personal Care

Requirements

This certificate provides a focused area of study for students interested in careers providing technology to individuals with disabilities. It will prepare students for graduate programs such as prosthetics and orthotics or rehabilitation technology. It will also provide the course work and some of the clinical hours needed to satisfy the requirements for the RESNA (Rehabilitation Engineering and Assistive Technology Society of North America) Assistive Technology Supplier certification.

REHSCI 1200 - HUMAN ANATOMY *

REHSCI 1205 - HUMAN PHYSIOLOGY *
HRS 1701 - INTRO ORTHOTICS & PROSTHETICS
HRS 1704 - INTRO TO ASSISTIVE TECHNOLOGY
HRS 1706 - INTRO REHAB ENGR DESIGNS

REHSCI 1210 - NEUROSCIENCE or
NROSCI 1000 - INTRO TO NEUROSCIENCE or
PSY 0505 - INTRO TO BIOPSYCHOLOGY

REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS

REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY or
HRS 1017 - INTRO TO EPIDEMIOLOGY or
HRS 1052 - TOPICS IN CLINICAL PSYCHOLOGY or
PSY 1052 - TOPICS IN CLINICAL PSYCHOLOGY or
IL 1580 - FOUNDATIONS OF SPECIAL EDUC or
IL 1562 - ASSMNT: YOUNG CHILD W/DISABS

REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
REHSCI 1296 - ATR FIELD EXPERIENCE

Total Certificate Credits: 32-33

*Or other approved Human Anatomy/Physiology course sequence.

Pathokinesiology in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The undergraduate program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

The undergraduate Rehabilitation Science certificates are listed below followed by the specific course requirments for each:

Assistive Technology in Rehabilitation
Pathokinesiology in Rehabilitation
Psycho-Social Issues in Rehabilitation and Personal Care

Requirements

Completion of this certificate provides the student with an excellent background in the sciences related to normal and pathological motion. It often complements coursework offered in graduate programs such as physical therapy, occupational therapy, physician assistant studies, exercise science, kinesiology, and sports medicine. With minimal additional coursework (nutrition and fitness instruction), it also prepares students to take examinations for certification as a personal trainer or fitness expert, such as the Certified Strength and Conditioning Specialist (CSCS®) offered by the National Strength and Conditioning Association.

REHSCI 1200 - HUMAN ANATOMY
REHSCI 1205 - HUMAN PHYSIOLOGY
REHSCI 1210 - NEUROSCIENCE
REHSCI 1215 - EXERCISE PHYSIOLOGY
REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
REHSCI 1285 - INTRO TO EVIDENCED-BASED REHAB

Total Certificate Credits: 25

Psycho-Social Issues in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The undergraduate program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

The undergraduate Rehabilitation Science certificates are listed below followed by the specific course requirments for each:

Assistive Technology in Rehabilitation
Pathokinesiology in Rehabilitation
Psycho-Social Issues in Rehabilitation and Personal Care

Requirements

Completion of this certificate provides the student with a background in the psychological and social issues involved in disability, rehabilitation, and personal care. It helps prepare students for graduate programs in areas such as occupational therapy, physician assistant studies, rehabilitation counseling, accelerated or direct entry nursing programs, or disability studies. This certificate also introduces the student to some of the knowledge needed to provide personal care to individuals with disabilities.

HRS 1704 - INTRO TO ASSISTIVE TECHNOLOGY
REHSCI 1200 - HUMAN ANATOMY
REHSCI 1205 - HUMAN PHYSIOLOGY

REHSCI 1210 - NEUROSCIENCE or
NROSCI 1000 - INTRO TO NEUROSCIENCE or
PSY 0505 - INTRO TO BIOPSYCHOLOGY

REHSCI 1230 - REHABILITATION ETHICS
REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE

REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY or
HRS 1052 - TOPICS IN CLINICAL PSYCHOLOGY or
PSY 1052 - TOPICS IN CLINICAL PSYCHOLOGY or
HRS 1017 - INTRO TO EPIDEMIOLOGY or
IL 1580 - FOUNDATIONS OF SPECIAL EDUC or
IL 1562 - ASSMNT: YOUNG CHILD W/DISABS or
PSYED 1012 - DEVELOPMENTAL DISABILITIES or
REHSCI 1255 - EPIDEMIOLOGY OF DISABILITY

REHSCI 1275 - INTRO TO OCCUPATION SCIENCE

Total Certificate Credits: 26-27

*Or other approved Human Anatomy/Physiology course sequence.

School of Information Sciences

The Bachelor of Science in Information Science degree program at the University of Pittsburgh offers a curriculum that meets industry's needs. In fact, industry leaders have helped to develop this program. Our graduates have gained critical skills and broad theoretical knowledge in programming principles, database systems, networks, human-computer interaction, and systems design. They understand how to manage today's complex information systems and design the systems that business and industry will need in the future.

The program offers a chance to focus on one of three industry-centered specializations: information systems, user-centered design, and networks and security. Or, take advantage of the breadth of courses offered in the School by self-designing a major. Students are required to participate in a capstone experience such as an internship with a regional company. With the University located in a major urban environment, our students find amazing internship opportunities with health care entities, manufacturing companies, and technology-related corporations.

This undergraduate program has prepared students for successful careers as system analysts and designers, database managers, network analysts, software engineers, project data managers, business analysts, security managers, Web site designers, Web report developers, information architects, and information analysts.

For more information about the program, please visit the School of Information Sciences' Web site, www.ischool.pitt.edu/bsis.

www.ischool.pitt.edu

Admission Procedures

The freshman and sophomore years are spent in the College of Arts and Sciences or the College of General Studies. During the first two years, a pre-Information Science student takes courses needed for admissions and begins satisfying some of the required Skills, General Education, Related Area, and Information Science course requirements.

Upon completion of 55 credits, pre-Information Science students can apply to the Information Science program by meeting with their advisors and completing an Undergraduate Academic Program/Plan Add/Change Form and a BSIS School Transfer Application. Your advisor will send these, plus your folder, to the School of Information Sciences, and they will be reviewed by an admissions committee. Decisions are made in about two weeks. Deadlines: August 1 for the Fall Term, December 1 for the Spring Term, April 1 for the Summer Term.

Admission Requirements

To be considered for transfer to the Information Science program, applicants must present an adequate lower-level undergraduate academic record and be in good standing in the college or school in which they are currently enrolled. Applicants must have earned at least 55 credits hours of course work (including current term credits) and have demonstrated strong evidence of academic achievement. Students must have earned a "C" or better in any General Education, Skills, Related, or Information Science course. Meeting these minimum qualifications does not guarantee admission to the program. The total academic record, as well as the probability of completion of the Information Science program requirements within the remaining credit hours, will be considered. For further information, see the Transfer Students section below.

Students must complete INFSCI 0010-Introduction to Information, Systems, and Society.

Transfer Students

Students at other institutions who wish to apply for admission as transfer students to the program should submit a Transfer Application and supporting materials to the Office of Admissions and Financial Aid. Prospective transfer students should note especially that the evaluation of course work taken at other colleges and universities will be made by advisors at the iSchool. Students who have been admitted as transfer students will be told at the time of admission how much advanced standing credit they have been awarded by the undergraduate advisor.

Students in Pitt's undergraduate schools or regional campuses at the University should initiate the process of transferring into the Information Science program by completing an Undergraduate Academic Program/Plan Add/Change form and a BSIS Transfer Application and requesting that the school in which they were most recently enrolled send these to the School. Students currently on inactive status in the school of last registration must first be reinstated in that school before the transfer process can be completed.

Former students who have enrolled in other institutions may apply for readmission with advanced standing. Such students should apply to the University's Office of Admissions and Financial Aid. Credits earned elsewhere and accepted for transfer by the School will be added to those satisfactory credits originally earned at the University of Pittsburgh.

Post Baccalaureate and Guest Students

Post baccalaureate and guest students are holders of bachelor's degrees who have been permitted to take additional undergraduate course work as nondegree students. The number of credits that may be taken by nondegree, post baccalaureate students is limited to a maximum of 12.

Guest students are students who are matriculated in degree programs elsewhere but whom, with the permission of their home schools, wish to take courses in the Information Science program. The expectation is that credit thus earned will be transferred to the home school to be used in satisfying degree requirements. The home school must certify that the proposed arrangement is satisfactory before such a student will be admitted. Suspended or dismissed students, even with their home school's permission, cannot be admitted as guest students. Guest student status is not usually granted for more than two terms.

Application forms for admission as either a nondegree post baccalaureate or guest student are available at the School of Information Sciences. Acceptance cannot be granted until all necessary materials have been received, including the completed application form, official transcripts, and application fee. The deadlines for application for special students are August 1 for Fall Term, December 1 for Spring Term, and April 1 for Summer Term admissions.

Academic Integrity

A student has an obligation to exhibit honesty, and to respect the ethical standards of the information professions in carrying out his or her academic assignments. All students are responsible for adhering to policies on academic integrity, which are available on the School's Web site.

Advising

Since several of the Information Science courses may be taken during the first and second years of study, Information Science faculty cooperate with Arts and Sciences (A&S) and College of General Studies (CGS) advisors to help students plan the first two years of study. Information Science courses taken during the first two years serve two purposes:

- For those students who are undecided on a major, early contact with Information Science can provide a basis for deciding whether or not to major in the subject; and
- For those students who have already decided on Information Science as a major, the courses can indicate more fully the topics that are of interest and also reduce the load to be taken during the third and fourth years.

Once students have been accepted into the Information Science program, they are assigned an advisor. Initially, the student and advisor discuss the student's program in Information Science, a related field, and other academic options. Each term, the student and advisor should review the student's progress and select the courses to be taken to satisfy the student's program goals. In addition, the student and advisor should discuss career goals, educational plans, and any academic-related problems.

The School's policy emphasizes the role of an advisor in providing advice for academic decisions, and students are urged to take full advantage of their advisor's experience and knowledge as often as needs arise. To avoid schedule conflicts, students are strongly advised to contact their advisors for an appointment.

Academic Standards

Full-time students in the program are expected to complete 24 credit hours of work each academic year with a GPA of at least 2.75 (12 credit hours for students granted part-time status). They are also expected to maintain a cumulative GPA of 2.50 and a 2.50 GPA in Information Science courses. Failure to meet any or all of these conditions automatically places a student in academic jeopardy. Students who fail to meet these conditions for two consecutive terms and who, in their most recent term of residence, failed to complete 12 credits (6 credits for part-time students) with a GPA of 2.50 are liable to be suspended. Students who have been suspended are not permitted to enroll in University courses for one calendar year.

Students who have been admitted to the Information Science program are eligible to continue as long as a satisfactory academic standing is maintained or until the degree has been earned. The School's statute of limitations requires that all of the credits required for the Bachelor of Science degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, the director of the undergraduate program may waive this limitation. In such cases, the waiver is for a specific period during which the program must be completed.

Credit Load

A normal credit load ranges from 12 to 18 credits per term, with a minimum of 24 credits in an academic year. Any term credit load in excess of 18 credits requires the approval of the director of the undergraduate program and approval of the dean at the School of Information Sciences. No more than 60 credits may be taken in one department or school, and usually not more than 40 credits are considered desirable in a well-balanced program.

Course Repetitions

Required courses for an Information Science major must be repeated or replaced by a comparable course if a grade of C- or lower is received. If a grade of C- or lower is earned in a prerequisite course, the course must be repeated before the higher-level course may be taken. If a grade of C- or lower is earned in any course taken to satisfy a degree requirement, the course must be repeated or replaced. Course repetitions are subject to the following limitations:

- No course passed with a C or higher letter grade or with an S grade should be repeated.
- The grade earned by repeating the same course replaces the grade originally earned, although the original grade is not removed from the transcript. The grade originally earned is not counted in the computation of the GPA. The new grade does not increase the number of credits counted toward graduation unless an F grade is replaced by a higher grade or an S grade.
- No course may be repeated at any other institution.
- A specific course may be taken for credit only once.

Similar Course Content

Students should not take courses with similar content from other departments. Limitations have been imposed on certain computer programming language and psychology courses. A listing of these limitations may be obtained from the director of the undergraduate program.

Courses Taken Elsewhere

Students in good academic standing may attend a summer or special session at another accredited institution in order to supplement their program. The students should meet with and obtain approval from either the BSIS Program Director or their advisor PRIOR to registering for these special courses. Students who have already completed 90 credits of coursework are not allowed to take courses elsewhere. Generally, courses may not be a repetition of any course previously taken (passed or failed).

To obtain permission to attend another institution, a student must have begun his or her program at the University of Pittsburgh or have been admitted as a transfer student from another institution with no more than 60 advanced standing credits.

A maximum of two summer or special sessions may be taken at other institutions with a maximum of two courses per session. After completing such courses, an official transcript should be submitted to the BSIS office.

Transfer Credits

Students admitted by transfer will have their transfer credits evaluated subject to the following conditions:

- Students who have not satisfied the second language requirement (detailed under the Program Description section) shall be required to do so in the first two terms of residence at the School of Information Sciences.
- An official transcript of all courses taken at other institutions must be submitted at the time of application, whether or not it is intended that such courses be counted toward the degree. For acceptance, courses must be passed with a satisfactory grade (minimum of C or equivalent) and must be earned at an institution accredited by the appropriate regional accrediting association. Grades for such courses are not used in computing a student's GPA nor in determining probationary status or eligibility for graduation honors.
- Generally, courses that have a reasonable counterpart in the curricula of the various schools/departments of the University of Pittsburgh are eligible for transfer.
- The number of credits granted for a course cannot exceed the number on the transcript from the institution where they were earned nor, usually, exceed the number to be earned in the corresponding course at the University of Pittsburgh.
- No transfer credits may be part of the final 30 required credits for the degree. These credits must be earned in residence at the School of Information Sciences. Credits earned at regional campuses and in international programs are considered as transfer credits.
- Credits accepted for advanced standing must have been earned within 12 years of the date when the degree requirements must be completed.
- Transfer credits for courses that do not have reasonable counterparts in the curricula of the various schools or departments of the University cannot be used to satisfy requirements for the degree, unless approved by the director of the undergraduate program.
- No more than 90 credits may be transferred from a four-year institution, and no more than 60 credits may be transferred from a two-year institution.
- If a course for which advanced standing credit has been granted is repeated, the advanced standing credit is canceled.

Credit by Examination

Students may earn credits toward graduation not only by successfully completing courses but also by taking special examinations. Each test for credit by examination must be arranged with the school/department offering the course for which credit is desired. The examination must be in a specific course offered by the faculty of the school or department. Schools/departments may specify the time and type of examination as well as which courses are possible to elect as credit.

Students may not take credit by examination for material prerequisites for college admission. If, during their high school careers, students have mastered material traditionally covered in college courses and not required for college admission, they may request credit by examination for the material if the school's or department's equivalent course is one for which it generally permits credit by examination. Credit by examination cannot be obtained for a college-level course for which credit has already been awarded, nor can it be used to alter a grade already received. Credit may not be earned by examination in lower-level sequence courses when the student has already obtained credit for a higher-level course in the sequence. Students are not permitted to audit courses without registering and then apply for credit by examination. Students wishing to earn credit by examination should consult the school/department in which the course is given and then obtain the requisite form from the appropriate dean's office. There is a fee for the examination whether or not credits are earned.

Grades

The School of Information Sciences uses both the University's letter grade and Satisfactory/No-Credit (S/NC) grade options (formerly the S/N option) (see Grading and Records for more information). In addition to the general University rules governing those grading systems, there are a few formal limitations to the student's freedom of choice regarding grading systems:

- Students must decide by one week after the end of the add/drop period which grading system they propose to use for each of their courses. This decision may not be changed, nor may a grade of one kind received for a course be changed to a grade of the other kind (e.g., from an S/NC grade (formerly the S/N option) to a letter grade).

Schools/departments may decide which courses may be taken on the S/NC system (formerly the S/N option).

No courses required for the information science major, the related field, information science distribution, general distribution, English composition, or language requirements may be taken on the S/NC system (formerly the S/N option).

Students are limited to a total of 18 credits of S grades that may be applied to the 120 credits required for the degree.

Students should be sure, before deciding on the grading system for a course, that their decision will not have an adverse effect on their plans for a major.

Under certain circumstances, schools/departments may declare a course available only on the S/NC system (formerly the S/N option). In such courses, students may not elect to receive a letter grade.

Evaluation of a student's ability and achievement in a course is not eliminated by the Satisfactory/No-Credit (S/NC) system (formerly the S/N option). Recitations, tests, and papers may all be required and assessed by instructors who will convey to the student their judgments of the worth of the student's work. Because the publicly recorded evaluation is minimal, students should use the instructor's comments in the most helpful way possible: as a guide to their own future course of study and for assessment of their own potential.

Since it is difficult to evaluate transcripts containing very few letter grades, students seriously considering transferring to the Information Science program or considering graduate study should keep this in mind. The student may wish to ask instructors from whom they have taken courses on the Satisfactory/No-Credit (S/NC) system to write letters of recommendation for them immediately at the end of the course. The office of the undergraduate program will supply forms for such letters and will make them a permanent part of the student's file. Students may also wish to keep portfolios of their best academic work and other evidence of ability and accomplishment with which they might supplement the formal transcript and letters of evaluation when they apply for transfer or for graduate study. This recommendation is useful for all students whatever grade options they select.

Dean's List

Early in each term, a list is compiled of students whose academic record in the preceding term indicates outstanding academic achievement. To be placed on the School's Dean's List, a student must have earned at least 12 credits with a grade of A, B, or C; must have no grade lower than C; and must have a term GPA of at least 3.25. Full-time and part-time students are eligible for placement on the Dean's list.

Reinstatement

Students who have resigned or been suspended, as well as other students who have been away from the University for more than one term may apply for reinstatement. Students interested in reinstatement should contact the BSIS office. A reinstatement application should be submitted to the Undergraduate Admissions and Evaluation Committee at least one month prior to the beginning of the term in which the student plans to enroll. Favorable action may be expected if students provide evidence that they can pursue an academic program with some prospects for success. Since registration advising meetings are usually held from the seventh to the twelfth week of the preceding term, applications for reinstatement should be received within that period so that the faculty advisor may assist in planning the program and in registering the student. The student's status upon reinstatement will be that attained at the end of his or her last term in residence or at the beginning of the term during which resignation took place. Applicants will be notified by letter of the action taken on their requests. Any courses that students take at another institution during a period of suspension shall not be granted credit by the School after the student has been reinstated unless the student petitioned the faculty and received permission in advance.

Dismissal

A suspended student who is subsequently reinstated remains on probation for at least one term and until the cumulative GPA has been raised to at least 2.50 and the information science major GPA has been raised to at least 2.50. As long as the reinstated student remains on probation, failure in any term to complete 12 credits of work (or those credits for which a part-time student has registered) with a cumulative GPA of at least 2.50 and an information science GPA of 2.50 will constitute grounds for dismissal from the School of Information Sciences for five years.

Special Academic Opportunities/Programs

The following additional academic opportunities are available through the School of Information Sciences:

Cooperative Program with the University of Pittsburgh at Greensburg

A cooperative arrangement between the School and the Greensburg campus of the University of Pittsburgh makes it possible for Greensburg students to major in information science. Students may complete most of their course work, including work in major courses, on the Greensburg campus but will typically want to cross register for some courses on the Pittsburgh campus to take advantage of courses and laboratories not available at Greensburg. The Bachelor of Science degree in Information Science is awarded by the School of Information Sciences. For additional information about this program, students should contact Susan Hahn (shahn@pitt.edu) at the University of Pittsburgh at Greensburg.

Double Degrees

Students in the School of Information Sciences may choose to simultaneously pursue more than one undergraduate degree, either within the College of Arts and Sciences or in another undergraduate school at the University. The School of information Sciences also offers a joint degree program with the College of Business Administration. In general, earning two degrees requires a minimum of 150 credits and completion of the curriculum requirements of both schools. Detailed information about double degrees or joint programs is available from the BSIS office.

Second Degree Program

Those who already have received a Baccalaureate degree in another discipline and wish to earn a BSIS degree are encouraged to apply to:

The BSIS office (if you've received a Baccalaureate degree from the University of Pittsburgh within the last 12 years).

The University of Pittsburgh's Office of Admissions and Financial Aid (if you earned a Baccalaureate degree from an institution other than the University of Pittsburgh within the last 12 years). You will need to complete a Transfer Application and submit any requested fees.

Enrollment in Graduate Courses

Undergraduates with sufficient preparation are encouraged to take advantage of the rich variety of graduate courses offered by the departments and schools of the University. Students enrolled in the Information Science program may use credits in graduate courses toward their undergraduate degree. To enroll in a graduate course, students must obtain the written consent of the instructor of the course, have a 3.00 cumulative GPA, and have the approval of the director of the undergraduate program.

Independent Study Courses

The Information Science program offers the student the option of conducting an independent study with a faculty member in the School of Information Sciences. Students who have a special project or wish to work in an area not adequately covered by regular iSchool courses should request a faculty member to supervise independent work aimed at their particular interests, and, if accepted, they should register for INFSCI 1080 Independent Study. Any student registering for an information science independent study course must have at least five information science courses completed, a 3.00 cumulative GPA, and consent of the faculty advisor and faculty sponsor.

To obtain permission to complete an independent study, students must submit a proposal presenting a design for the project and must find a faculty sponsor who will serve as director. The proposal must include detailed plans for the project. Substantial written work or some other form of creative product is usually one outcome of an independent study course.

The Capstone Experience/Course

Students in the undergraduate program in information science will participate in a capstone experience, gaining experience through a research project in the school, an internship with regional industry, or a self-designed project.

Students planning to enter the workforce upon graduation are strongly encouraged to intern with one of the many businesses and industries in the Pittsburgh region. Pittsburgh is home to many international corporations in a variety of industries including health care, financial services, education, manufacturing, and technology.

In completing your capstone experience, you can:

- Assist with graduate-level research
- Self-design a project
- Intern with a regional company. iSchool students have interned with PPG, U.S. Steel, Alcoa, Mellon Financial Corp., Google, Lockheed-Martin, Deloitte, FedEx Ground, and the University of Pittsburgh Medical Center.

School of Information Sciences Course Offerings

Courses offered by the School of Information Science are available at: www.ischool.pitt.edu/bsis/course-ofstudy/course-descriptions.php

School of Information Sciences Undergraduate Program Faculty

www.ischool.pitt.edu/isis/about/faculty/index.php

Program and Course Offerings

Department of Information Sciences

Major

Information Science, BS

To be awarded a Bachelor of Science degree with a major in Information Science, the student must:

- Earn a minimum of 120 credits with a minimum of 15 of those credits in a related field. A related field consists of five courses from the same academic area. All of the final 30 credits and at least 15 credits in Information Science (INFSCI) must be taken through the School of Information Sciences.
- Possess an overall cumulative and Information Science GPA of at least 2.50.
- Satisfy the distribution of studies requirement.
- Fulfill any remaining requirements that may have been noted at the time of entrance (e.g., English composition, language requirements, and statistics requirements).
- To apply for graduation, you should make an appointment with the Undergraduate advisor in the term BEFORE you expect to graduate.

Note:

The School of Information Sciences offers the Bachelor of Science in Information Science. The requirements outlined in this section represent minimum degree satisfaction. For further information about these requirements, please consult the BSIS Web site at www.ischool.pitt.edu/bsis.

Major Requirements

English Composition Requirements

All students entering Arts and Sciences (A&S) as freshmen are required to take a writing placement examination. (For more information on the A&S composition requirement, see Skills Requirements in the Arts and Sciences section.)

In addition, Information Science students are required to take ENGCMP 0200 - SEMINAR IN COMPOSITION along with ENGCMP 0400 - WRITTEN PROFESSNL COMMUNICTN, ENGCMP 0440 - CRITICAL WRITING, or ENGCMP 0450 - RESEARCH WRITING.

Language Requirements

All students entering the Information Science program are required to satisfy a second language requirement. This requirement can be fulfilled by one of the following:

Two years of the same second language in high school completed with a grade of C or better each year,
One year of a second language in high school completed with a grade of C or better and one term of the same second language in college completed with a letter grade of C or better, or
Two terms of the same second language in college completed with a letter grade of C or better.

If the second language requirement has not been satisfied by the time of admission, the student will be required to resolve this deficiency by the end of the second term at the School. In addition, all Information Science students are required to complete LING 1000 - INTRODUCTION TO LINGUISTICS or PHIL 0500 - INTRODUCTION TO LOGIC with a letter grade of C or better.

Quantitative Requirements

All Information Science students must complete one of the following mathematics courses with a letter grade of C or better:

MATH 0120 - BUSINESS CALCULUS
MATH 0220 - ANALYTC GEOMETRY & CALCULUS 1
MATH 0400 - FINITE MATHEMATICS

Note:

In addition, a statistics course must be completed with a letter grade of C or better. See this Web site for listing of specific statistics courses.

General Distribution of Studies Requirement

All students are required to complete 9 credits in each of the three traditional divisions of A&S: the humanities, the natural sciences, and the social sciences. A copy of the Information Science-approved list of courses may be obtained from the BSIS Web site.

Literature: A minimum of one literature course selected from the Information Science-approved list and completed with a letter grade of C or better.

Music and Art: A minimum of one course selected from the Information Science-approved list and completed with a letter grade of C or better.

Communication: A minimum of one of the following communication courses with a letter grade of C or better:

COMMRC 0300 - COMMUNICATION PROCESS
COMMRC 0520 - PUBLIC SPEAKING

Social Science: A minimum of two courses from among two different fields selected from the Information Science-approved list must be completed with a letter grade of C or better.

History and Culture: A minimum of one course from the Information Science-approved list must be completed with a letter grade of C or better.

Psychology: All Information Science students must complete one of the following courses with a letter grade of C or better:

PSY 0010 - INTRODUCTION TO PSYCHOLOGY
PSY 0012 - FOUNDATIONS OF PSYCHOLOGY
PSY 0015 INTRO TO PSYCHOLOGY AS A NATURAL SCIENCE

Natural Science: Students must complete a two-course sequence in biological sciences, neurosciences, chemistry, geology and planetary science, or physics and astronomy, selected from the Information Science-approved list. In addition, one course in a field different from the two-course sequence will be required. All courses must be completed with a letter grade of C or better.

Information Science Course Requirements

Core courses must be taken by all students

INFSCI 0010 - INTRO TO INFORM, SYS & SOCIETY
INFSCI 0017 - FUNDAMNTLS OF OBJ-ORIEN PRGMG
INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS
INFSCI 1070 - INTRO TO TELCOM & NETWORKS
INFSCI 1024 - ANALYSIS OF INFORMTN SYSTEMS
INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN

Note:

Students may then choose to tailor their studies by taking one of our industry-advised specializations.

Information Systems

This specialization in information systems enables students to use object-oriented design tools and state-of-the-art best practices to design, build, implement, and test Web-based information systems. Coursework may include INFSCI 1017 - IMPLEMENTATION OF INFO SYSTEMS, INFSCI 1068 - GEOSPATIAL INFO SYSTEMS (GIS), INFSCI 1025 - DESIGN OF INFORMATION SYSTEMS, INFSCI 1026 - MGMNT OF INFORMATION SYSTEMS, and INFSCI 1092 - SPECIAL TOPICS: SYSTEMS. See the course descriptions here for more details and prerequisites.

Networks and Security

This specialization offers skills needed to design, build, and test LANS, WANS, Wireless, Internet, and Web-based networks. Coursework might include INFSCI 1071 - APPLICATIONS OF NETWORKS, INFSCI 1074 - COMPUTER SECURITY, INFSCI 1072 - INTRO TO WIRELESS NETWORKS, and INFSCI 1073 - APPLC DEVELP MOBILE DEVICES, INFSCI 1070 - INTRO TO TELCOM & NETWORKS, INFSCI 1075 - NETWORK SECURITY, and INFSCI 1092 - SPECIAL TOPICS: SYSTEMS. See the course descriptions here for more details and prerequisites.

User-Centered Design

This specialization provides the visual and human-computer interaction skills needed to design and build prototypes of information systems interfaces as well as to perform usability testing of these systems. Coursework might include INFSCI 1052 - USER CENTERED DESIGN, INFSCI 1014 - GRAPHICS, INFSCI 1059 - WEB PROGRAMMING, INFSCI 1079 - COMPUTER NETWORKING LABORATORY, and INFSCI 1092 - SPECIAL TOPICS: SYSTEMS (see the course descriptions here for more details and prerequisites.)

School of Nursing

The School of Nursing, as an integral part of the University of Pittsburgh, subscribes to the University's commitment to teaching, research, and service. Through these major functions, the school strives to have a positive impact on the quality of health care for all people.

The school offers baccalaureate (BSN), master's (MSN), and doctoral programs in philosophy (PhD) or nursing practice (DNP) that anticipate and reflect health care needs locally, nationally, and internationally. It prepares graduates to function effectively in multifaceted, roles in a variety of settings to promote the health and well-being of people. It strives to instill a spirit of inquiry, encourage academic excellence, and foster lifelong learning in all students. The school seeks to enroll highly qualified students who represent racial, cultural, and geographic diversity and to prepare students for employment in a multicultural society. In keeping with the University's emphasis on excellence in undergraduate education, the school is committed to providing an undergraduate program with a strong clinical focus that builds upon a background in the liberal arts and sciences and provides the foundation for its graduates to become outstanding clinicians.

The knowledge, skill, teaching effectiveness, and diversity of the faculty are important factors in the success of our graduates. The school is committed to fostering excellence in teaching through the faculty's clinical expertise and practice, instructional competency, and development of state-of-the-art knowledge through research. State-of-the-art technology is used to enhance student access and learning. The school supports an environment conducive to research, encourages interdisciplinary collaboration, and seeks to make research an integral part of the learning environment. The success of the school's research agenda continues to determine its national recognition and realm of influence.

The school believes that faculty and students should engage in public, professional, and community services as a way for them to share their knowledge, positively influence patient care delivery, and enhance their own and their peers' professional growth. Such involvement provides leadership for societal change, helps develop effective health care policies, and enhances health care for all people. Service is reflected in leadership and volunteer responsibilities related to the political process, professional organizations, and community service agencies.

Nursing Living Learning Center (NLLC)

The NLLC is an on-campus residency/learning community for nursing students. NLLC expresses the School of Nursing's commitment to giving a small campus experience at a large institution. Students are provided with a well-rounded approach to their studies as well as University life, while allowing students to be housed together on one floor, in a group setting. Situated in Lothrop Hall, the NLLC is adjacent to the Victoria Building, which houses the School of Nursing. This proximity to the Nursing School provides and added element of convenience for the student. The resident assistant for the NLLC is a Junior or Senior nursing student who works closely with the faculty and staff in the School of Nursing. One of the goals for the NLLC is to provide students with educational experiences that are not normally afforded to incoming freshmen. Students who participate in the NLLC are given an early opportunity to develop their leadership skills by attending the prestigious Emerging Leaders Program. The NLLC also schedules and facilitates study group sessions, nursing presentations, and social gatherings for the nursing residents.

Admission to the NLLC is by application only and is limited to incoming freshman in the traditional undergraduate baccalaureate program. Applications will also be considered from Sophomores, Juniors and transfer students, according to University guidelines and space availability.

Contact Information

University of Pittsburgh

www.nursing.pitt.edu

Admission Information

The School of Nursing will accept applications for the Undergraduate Baccalaureate Program from prospective students who have had the following educational preparation:

High school graduates
Students transferring from the regional campuses and other schools of the University of Pittsburgh
Students transferring from other colleges and universities
Graduates from a baccalaureate program in any field of study (Accelerated 2nd Degree BSN Program)

All students who wish to obtain a Bachelor of Science in Nursing degree must apply and be accepted into the School of Nursing. Admission to other schools within the university, or to regional campuses does not guarantee admission to the School of Nursing. In general, the student's educational background will determine the most appropriate curriculum plan and program track in which to earn a BSN.

Individual State Boards of Nursing may prohibit a person convicted of any felonious act from licensure as a registered nurse (RN) Prospective students in that situation should contact the Board of Nursing in the state where they plan to practice following graduation.

High School Graduates

Applicants may obtain application information from the Office of Admissions and Financial Aid's Web site: http://www.oafa.pitt.edu/freshadm.aspx. Online application is also available on the OAFA web site

Additional information regarding the application process and eligibility criteria is available on the School of Nursing Web site: http://www.nursing.pitt.edu/degree-programs/undergraduate-bsn-program

All high school applicants must meet the requirements for admission to the University of Pittsburgh as well as those specifically for the School of Nursing. High school courses required of all applicants are:

Course	**Units***
English	4
Mathematics	4
Social Studies	3
Science with a related laboratory or the equivalent (one unit must be in chemistry)	3
Academic Electives**	5
Total	19

*A unit is equivalent to one year of successful completion of acceptable coursework.

**Two units of second language as an elective are highly recommended.

Each high school applicant is required to submit results of the SAT or ACT. The Admissions Office may request additional information, examinations, or measures for determining eligibility.

Students Applying for Transfer from within the University (Internal Transfer)

Students who wish to transfer from schools within the University (College of Arts and Sciences, College of General Studies, and regional campuses) to the undergraduate program in the School of Nursing must consult with their academic advisor to officially initiate the transfer process. All records must be received by the School of Nursing in order for students to be considered for admission. Admission is offered for the Fall and Spring terms. The School of Nursing makes transfer decisions through a competitive process based upon academic eligibility and seating availability. For more information refer to:

http://www.nursing.pitt.edu/admissions/internal-transfer-applicants

Students Applying for Transfer from Other Universities or Colleges (External Transfer)

Applicants who have completed at least 12 credits or one full-time term of study at any institution of higher education other than the University of Pittsburgh will be considered for transfer into the School of Nursing on a competitive basis. Prospective transfer students are required to complete an online Transfer Application and submit all necessary supporting materials to the Office of Admissions and Financial Aid. For more information refer to: http://www.nursing.pitt.edu/admissions/external-transfer-applicants

Admission to the School of Nursing as a transfer student is contingent upon vacancies in the freshman class. Competitive transfer applicants typically have a minimum GPA of 3.5 (on a 4.0 scale) after completion of 24 credits at a college level and B grades or better in science classes and a SAT score of 1200 or higher (or an ACT composite score of 27 or higher). However, exceptions may be considered based upon the qualifications of the applicant. Applicants will be evaluated on their academic performance in both high school and a college or university. The following points govern the allowable advanced-standing credits:

- Official transcripts of courses taken at other universities or colleges must be submitted.
- Course descriptions for each course must be submitted to be considered for advanced-standing credits.
- Course content must be comparable to that offered at the University of Pittsburgh.
- The credit transferred for any course can be no greater than the credit given at the University of Pittsburgh.
- Only courses with letter grades of B- or better are transferable.
- Credit for service, correspondence, or extension courses is not transferable.
- Courses must have been completed within the past ten years. The Associate Dean for Clinical Education (or designee) must approve any exception to the ten-year guideline.

Readmission

A student who has not been in attendance in the school for more than one year will be required to seek readmission through the School of Nursing. A student who has attended a different university/college while not attending the University of Pittsburgh is required to reapply through the University Office of Admissions and Financial Aid. Readmission will be contingent upon a vacancy in the class to which the student is to be readmitted. The program of studies will be based on courses completed, current curriculum, and placement considerations.

Admission of Students from Other Countries

International applicants for the traditional undergraduate BSN should apply using the International Student Undergraduate Application. For more information go to the International Student Admissions Web site: http://www.oafa.pitt.edu/intladm.aspx.

RN Options and Accelerated 2nd Degree BSN International applicants should apply directly to the School of Nursing: https://app.applyyourself.com/?id=up-nurs

Applicants are required to submit official, original academic credentials in certified English translation. The application process should be started 9 to 12 months in advance of the intended enrollment date.

An applicant whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and submit official test results. Applicants must have a level of English proficiency reflected by a score of at least 213 or greater (computer-based test), or 550 or greater (paper-based test), or 80 or greater (Internet-based test). Applicants seeking fall term admission must take the TOEFL no later than the preceding March. The TOEFL code for the University of Pittsburgh is 2927. See the International Student Admissions section of this bulletin for more information on the TOEFL. Subject-specific international academic credential evaluation of official college transcript is required. For more information refer to: http://www.oafa.pitt.edu/intladm.aspx.

RN Options Applicants

The University of Pittsburgh RN Options (Early Admission to MSN or DNP) curriculum is designed for registered nurses, who obtained their initial nursing education through either a CCNE, ACICS or ACEN [NLN] accredited diploma or associate degree or diploma program and want to pursue

undergraduate education with early admission to graduate nursing program. Courses are taught by nursing leaders who are experts in their field. Faculty serve as educators, role models and mentors for their students. The RN Options curriculum builds upon the individual professional nurse's strengths and experiences to expand professional knowledge and practice skills. Graduates of the University of Pittsburgh School of Nursing possess critical appraisal/thinking skills, sophisticated clinical practice knowledge, and the ability to integrate the latest research findings to provide quality, safe and effective patient care.

Registered nurses who are interested in pursuing a Bachelor's Degree and Early Admission to the MSN or DNP track applicants should apply online directly to the School of Nursing at: http://app.applyyourself.com/?id=up-nurs

Course offerings are flexible and students may begin coursework in any term (fall/spring/summer). Upon finishing the first 84 of 96 credits in the RN Options track, students must select to complete their remaining requirements in the Early Admission to the MSN or DNP selected program or complete the BSN curriculum.

Students who pursue the Early Admission to the MSN or DNP track students must: (1) take the Graduate Record Examination (GRE), (2) provide necessary documentation for desired major, and (3) complete the remaining 36 credits of which 24 will be at the graduate level. Full and part-time schedules are available.

Application Guidelines

Applications are reviewed on a rolling basis. Applicants must submit evidence of previous education and other required documents as listed below.

Graduate from a CCNE, ACICS or ACEN [NLN] accredited associate degree program or diploma school of nursing
Cumulative Grade Point Average (GPA) of 3.0 or above in previous academic work
Valid Registered Nurse license (all admitted students must obtain PA License)or transferable to PA)
Complete RN Option application
Application Deadline: August 1 (fall term); December 1 (spring term); and April 1 (summer term)

Accelerated 2nd Degree BSN Program Applicants

The Accelerated 2nd Degree BSN is designed to enable individuals with a Baccalaureate Degree in another discipline the ability to earn a Bachelor's of Science Degree in Nursing (BSN) in three consecutive full-time terms. The Accelerated 2nd Degree BSN requires 122 credits: 31 credits from a previous degree, 36 prerequisite credits, and 55 curriculum credits. The curriculum is fast-paced and designed to build upon the individual's previous education while providing additional science and nursing content. At the completion, graduates are eligible to take the National Council Licensure Examination (NCLEX) to become Registered Nurses (RN).

Admission to the Accelerated 2nd Degree BSN is competitive and is based upon proven academic achievement and grades earned in prerequisite courses. The school admits three cohorts, Fall, Spring and Summer.

The Accelerated 2nd Degree BSN requires an applicant to complete 36 prerequisite credits. These courses may be taken at any college or university. Courses from other institutions must be evaluated as equivalent to University of Pittsburgh courses. (Coursework taken at the University of Pittsburgh School of Nursing prior to admission may be taken as a non-degree seeking student.)

Required prerequisites include:

Course	**Credits**
General & Bio-Organic Chemistry*+ *(includes a lab)*	4
English Composition (scientific/technical)	3
Directed Elective	3
Psychology	3

Sociology	3
Statistics *(descriptive, probability, & inferential)*	3
Human Anatomy & Physiology *+ *(includes a lab)*	6-8
Human Genetics *+	3
Microbiology *+ *(includes a lab)*	4
Pathophysiology	4

**Should have been completed within the past ten years*

+Should have achieved a grade of "B-" or better

Early submission of an application is recommended. New classes begin in the Fall, Spring and Summer term. Accelerated 2nd Degree BSN applications are reviewed, and admission decisions are made based on the application deadlines: Fall Term--February 15; Spring Term--June 1; and Summer Term--October 1. Application information and other materials are located on the web at http://www.nursing.pitt.edu/degree-programs/accelerated-2nd-degree-bsn/accelerated-2nd-degree-bsn-applicationadmission. Prospective students must apply online to the School of Nursing at http://app.applyyourself.com/?id=up-nurs.

Application items include:

- Completed online application
- Official transcripts of all course work taken at any university or college
- Official copy of GRE score sent to the University of Pittsburgh (Institution Code-2927).
- Two (2) letters of professional recommendation (via online application or mailed in signed, sealed envelopes)
- Resume
- Personal essay explaining how this program will help achieve professional goals
- Application fee (non-refundable and does not apply to payment of tuition)
- INTERNATIONAL APPLICANTS: (in addition to above items)
    - Official graduation certificate verifying degree obtained (English translation)
    - Subject-specific international academic credential evaluation of official college transcript
    - Official TOEFL or IELTS score - exempt if native language is English or graduate of a degree program at an accredited institution in the United States

NOTE: All official documentation must be submitted in sealed envelopes from the originating institutions to the School of Nursing (3500 Victoria Street, 239 Victoria Building, Pittsburgh, PA 15261).

Provisional admission may be granted after completion of 6 credits of prerequisites if all other admission requirements are met. Undergraduate applicants who are within 12-18 credits of graduation will be considered for provisional admission. All prerequisite courses must be completed and official transcripts received by the start of the first term. Effective of the Fall Term 2016, all admitted students will be required to place a $250 as non-refundable deposit upon acceptance of admission, which will be count towards tuition in the first term of study.

Academic Standards

Students have the obligation to exhibit honesty and to respect the ethical standards of the nursing profession in carrying out their academic assignments. The academic standards of the school are:

- A student may be placed on probation or dismissed for illegal, unsafe, or unethical professional conduct.
- Students must maintain a cumulative GPA of 2.00 or better throughout the program.
- Students must fulfill the requirements for the baccalaureate degree within a period of eight years.

Students should view the School of Nursing Web site's Student Affairs and Alumni Relations web page http://www.nursing.pitt.edu/resources-students/policies for current policies.

Academic Advising

For students in the traditional BSN undergraduate track, the academic advisement process begins during the University freshman orientation program (PittStart), at which time students meet with their assigned academic advisor to develop their individual plan of study. Students maintain the same advisor throughout the program of study, and continue to meet on a regular basis. This continuity permits advisors to promote academic achievements by guiding students through each level in the program, assisting in career planning and preparation, and by serving as primary educational resource, facilitator and student advocate.

Preclinical Requisites

Before beginning each school year, it is mandatory that students meet the following requirements for clinical experience (the frequency of these requirements vary by clinical site):

HIPAA module (completed during the Spring Term of the Freshman year for traditional licensure)
The American Heart Association (AHA)--BLS- Healthcare Provider Course Certification
Personal health insurance coverage
ACT 33/34 clearances (child abuse/criminal record check)
ACT 73 FBI fingerprinting background check
ACT 168 Pennsylvania Sexual Misconduct/Abuse Disclosure Release (for seniors)
Initial health or an updated health form to be submitted to Clinical Site Coordinator in the Office of the Dean, School of Nursing

School of Pharmacy

The School of Pharmacy has been developing leaders who have been driving the future of pharmacy for over 135 years. We investigate, discover, and create ways to improve patient health and, through partnerships, change practice and improve efficiency of care. Pitt Pharmacy ranks in the top ten in NIH funded research and in US News and World Report among schools of pharmacy. The School of Pharmacy leads the way in education, personalizing education and getting students to expert faster. Chartered in 1878, the School of Pharmacy is among the oldest pharmacy schools in the country.

Contact Information

University of Pittsburgh
School of Pharmacy
904 Salk Hall
Pittsburgh, PA 15261
Admissions: 412-383-9000
rxschool@pitt.edu
www.pharmacy.pitt.edu

Admissions

The School of Pharmacy admits students to its programs under one of two statuses-guarantee or open. Those two admission statuses are detailed below:

Pharmacy Guarantee Freshman Admission

All students should first submit and application to the University of Pittsburgh, Office of Admissions and Financial Aid. The School of Pharmacy does not admit freshmen directly to the professional program. Candidates who specify prepharmacy on their application, demonstrate academic success in high school, and score 1360 or higher on the SAT I (Math and Critical Reading sections), with a minimum of 690 in the Math section, will be offered a pharmacy guarantee if availabel. Students who receive the guarantee are expected to perform well in their preprofessional courses. In order to secrue a place in the PharmD Program, students must earn:

- a letter grade of a C or better in all preprofessional courses with no repeated courses
- a 3.25 or greater overall GPA in preprofessional courses
- a 3.25 or greater GPA in the required Math and Science courses

NOTE: Math and Science required courses must be taken at the University of Pittsburgh. (AP credits are acceptable)

To exercise the conditional admission, all applicants must:

- submit the Pharmacy College Admissions Test (PCAT) scores
- submit a completed PharmCAS application and fee
- submit a completed Supplemental Application and fee
- participate in a satisfactory interview prior to School of Pharmacy Admission

Students who meet these performance criteria will be admitted into the PharmD Program.

All students interested in applying to the pharmacy program should also consult the Application for Admission of the *Graduate and Professional Catalog*.

Visit the School of Pharmacy Web site at www.pharmacy.pitt.edu.

Program Offerings

Major

Pharmaceutical Sciences, BSPS

The School of Pharmacy offers the opportunity for enrolled PharmD students to obtain a Bachelor of Science in Pharmaceutical Sciences (BSPS) degree after the completion of a minimum of 120 credit hours. Typically, students will have completed the pre-professional component and the first four academic terms (semesters) of the nine term (semester) PharmD program. Students are not enrolled into the BSPS program without admission to the PharmD program.

The school also offers graduate programs leading to an MS and a PhD.

For further information on the professional and graduate programs, see the School of Pharmacy-Graduate and Professional Degrees sections of the Graduate & Professional Studies Catalog.

School of Social Work

The School of Social Work was founded in September 1938 as successor to the Division of Social Work in the Department of Sociology. The Bachelor of Arts in Social Work (BASW) program was accredited in 1973 and has been continuously reaffirmed since that time.

The mission of the School of Social Work is to advance knowledge and to apply that knowledge for the fulfillment of human potential through the prevention and amelioration of social problems. The school is committed to promoting the values of social and economic justice. Recognizing the complexities of contemporary society, the school dedicates itself through its educational, research, and public service activities to advocating for a society that respects the dignity and achievement of all individuals, families, and communities.

In furtherance of its mission, the School of Social Work strives to

- Educate professional social workers with the knowledge, skills, and values needed to engage in culturally competent practice with diverse populations and communities; to critically analyze personal, familial, and environmental factors affecting practice settings and practice techniques; and to advocate for those who confront barriers to maximizing the achievement of their fullest potential.
- Engage in scholarly activities that contribute to professional knowledge about complex social problems and innovative approaches to ameliorate those problems.
- Provide service to local, national, and international communities through the development of and participation in collaborations with social agencies, community-based organizations, government, and foundations.

The BASW Program prepares its graduates to engage in entry-level generalist social work practice with individuals, families, groups, communities, and/or organizations within a multicultural society. Professional practice settings for entry-level generalist practitioners include child welfare, family preservation, mental retardation and mental health, drug and alcohol, juvenile justice, aging, shelters for battered women, homeless shelters, community food banks, neighborhood citizen organizations, hospitals, and rehabilitation centers, among many others. Since 2001, the BASW Program has offered the Child Welfare Education for Baccalaureates (CWEB) program as an educational opportunity for undergraduate social work majors to prepare for employment in one of Pennsylvania's 67 public child welfare agencies.

The BASW Program is offered as an upper-division (i.e., junior and senior years only) academic major, underscoring the program's commitment to a strong liberal arts base. Learn more about degree requirements, full- and part-time enrollment options and class schedule, and field education for BASW students.

The Social Work Minor is open to undergraduate students throughout the university (see minor requirements)

The Goals of BASW Program are to prepare students to competently engage in generalist social work practice.

As such, it is our goal that by completion of the program, students will be prepared to:

- Use their liberal arts foundation and their understanding of bio-psycho-social-spiritual-cultural development to engage in evidence-based generalist social work practice with individuals, families, groups, communities and organizations within a multicultural society (EP 2.1.1, EP 2.1.3, EP 2.1.4, EP 2.1.6, EP 2.1.7, EP 2.1.8, EP, 2.1.9, EP 2.1.10).
- Practice according to the principles, values, and ethics that guide the social work profession (EP 2.1.1, E.P.2.1.2).
- Advocate for human rights and social and economic justice. (EP 2.1.3, EP 2.1.4, EP 2.1.5, EP 2.1.8, EP 2.1.9).
- Continue formal education in either graduate social work education or other graduate disciplines (EP 2.1.1).

The BASW Program Faculty have defined "generalist practice" as:

The application of knowledge, values, and skills of the general method of problem-solving, which spans the processes of engagement, data collection, assessment, intervention, evaluation, and termination. Preparation in the general method focuses on the application of the method to client/consumer systems of various sizes (individuals, families, groups, communities, organizations). Key to this problem-solving approach is its applicability to multi-cultural contexts, focusing on the strengths inherent in clients/consumers' and systems. The ethics and values of the social work profession anchor this practice.

The BASW Program has also identified a number of more specific and measurable objectives that allow us to document progress toward attaining our goals. We expect graduates from the BASW Program to practice in a manner consistent with social work traditions, values, and ethics, as expressed in the NASW Code of Ethics.

Special Opportunities

The Child Welfare Education for Baccalaureates (CWEB) Program provides an educational opportunity for students interested in public child welfare services. Qualified students who are enrolled as social work majors may receive substantial financial support in return for a contractual obligation to accept employment in a Pennsylvania public child welfare agency following completion of their social work degree. Students interested in the program should contact Dr. Cynthia Bradley-King, CWEB Coordinator, School of Social Work at ckb11@pitt.edu or 412-624-2830.

The Behavioral Health Case Management Program is a certificate available to Social Work and Psychology majors, that leads to possible employment opportunities in a fast paced behavioral health service sector. To read more about the career opportunities available to graduates who hold this certificate please visit the Allegheny County Department of Human Services (DHS) web page.

More information about the program is available on the web and by contacting the Director of the Bachelor of Arts in Social Work Program, Keith J. Caldwell, MSW at kjc45@pitt.edu or 412-648-9441

Admission Requirements

For admission to the Bachelor of Arts in Social Work program (BASW), a student must meet the following requirements:

Completion of 60 transferable credits from an accredited undergraduate institution and/or completion of an accredited associate degree program.
A minimum of 2.00 GPA on a 4.00 scale.

The distribution of liberal arts credits should be as follows:

Humanities-9 credits
Natural Sciences-9 credits
Social Sciences-9 credits
Other courses (preferably a computer skills course and courses in the humanities and behavioral and social sciences)-33 credits

Credits awarded from the College Level Examination Program [CLEP] by the College of General Studies are counted toward the 60 credits. Academic and field education credits are not granted in the BASW program for life, volunteer, or employment experience.

Application Procedures

Students may apply for the fall term or spring term. Students currently enrolled within the University of Pittsburgh system should submit applications and all credentials to the School of Social Work Office of Admissions. Students applying from outside the University of Pittsburgh should send all application materials and credentials directly to the University Office of Admissions and Financial Aid (see Pittsburgh campus Freshman Admissions for address). The Undergraduate program in the School of Social Work has a ROLLING ADMISSIONS POLICY. There is no specific deadline for submitting applications.

The application fee of $45 (only if applying from another institution; current University of Pittsburgh students do not have to pay this fee).
A complete transcript from the registrar of each college attended. If course work is still in progress at the time the application is filed, the student should request a supplemental transcript at the end of each term. Although a decision for acceptance may be made while academic work is still in progress, an up-to-date transcript must be received before the applicant can register for course work. Persons seeking a transfer to the University of Pittsburgh from another college or university must also submit a high school transcript or its equivalent.
A three-part typewritten statement (of no more than eight pages) discussing the following concerns in depth:
the influence in the student's life experience that made him/her select social work as a profession,
what the student believes social work education can contribute to his/her professional competence, and

what the student believes to be one of the most important contemporary social issues and why.

The application supplement sheet, which requests information on the student's employment background, a list of the names and addresses of the people who will be completing reference forms on the applicant's behalf, and academic credit requirement questions.

Three letters of reference. **Required** references include college advisors, an instructor at the college level, and the current (or last) employer/volunteer supervisor. Applicants should send the blank reference forms received with the application materials to each of the reference persons. The School of Social Work admissions office will periodically notify the applicant of the status of the application materials, and the applicant will be expected to follow through with each reference to ensure receipt of the letter. Reference persons should mail the completed form directly to the School of Social Work Office of Admissions.

Other Supporting Application Materials

The School of Social Work does not require the submission of scores from an examination for admission consideration. However, applicants wishing to submit such exam scores or other materials (publications, major papers, etc.) in support of their application may do so. In no instance will an applicant not submitting these be penalized in determining acceptance for the program.

Admission Interviews

Interviews may be initiated by the admissions personnel of the School of Social Work. Applicants who feel they would like to discuss special circumstances surrounding their applications are encouraged to seek admission interviews. The interview, if requested, should be scheduled after all application materials have been received. Usually, decisions on applications for admission are made without an interview.

Grading Standards Policy for the BASW Program

This policy covers the following areas in regard to grading:

Good Academic Standing

In order to remain in good academic standing and to graduate from the BASW program, all students must

Obtain a grade of C- or better in all courses required for the major (including Practicum 1 and 2),
Maintain a minimum 2.50 on a 4.00 scale in their social work major
Conform to the standards of professional conduct as specified in the NASW Code of Ethics (see below), and
Maintain a minimum cumulative GPA of 2.00 on a 4.00 scale.

Honors

The program honors those students whose academic performance (cumulative GPA) places them in the upper two percent of their graduating class. These students are considered for honors recognition at the annual Honors Convocation conducted by the University in the spring of each year. BASW majors are also eligible for membership in *Phi Alpha*, the National Social Work Honor Society, if they have completed their social work major with a social work GPA of 3.85 or higher.

Bachelor of Philosophy Degree

In the spirit of intellectual curiosity envisioned by the Board of Trustees and the University Honors College when the Bachelor of Philosophy degree (BPhil) was created, the BPhil creates the opportunity for undergraduate students to engage in research and scholarly work toward a more rigorous baccalaureate degree traditionally reserved for the graduate level. In combination with the University Honors College requirements it, "preserves an element of intellectual scope, ever the distinctive feature of American undergraduate education (A. Stewart)." This degree is offered jointly between the University Honors College and the School of Social Work.

BASW majors who meet the University Honors College (UHC) eligibility requirements and who are interested in pursuing a Bachelor of Philosophy degree in social work should make an appointment with the BASW Program Director to review criteria and process for the degree.

The BASW student will be referred to the University Honors College Web site to review the Bachelor of Philosophy degree requirements.

The requirements to participate in the UHC are as follows:

- Maintain a 3.25 GPA or higher in BASW major in the School of Social Work and a 3.25 GPA or higher overall at the University of Pittsburgh.
- Transfer students must have an incoming GPA of 3.25 or higher and maintain a 3.25 GPA in BASW major course work offered through the School of Social Work as well as a 3.25 GPA or higher overall at the University of Pittsburgh.
- In unusual circumstances, a student who shows exceptional promise but does not meet the above requirements may be accepted to BPhil candidacy as recommended by the BASW Program Director to the School of Social Work Associate Dean for Academic Affairs and determined by the UHC advising staff.

Based upon a BASW student's area of interest, a thesis advisor will be assigned by the Associate Dean for Academic Affairs. The BASW Program Director and the student's advisor will meet with the student to draft a program of study/curriculum plan. Assignment of an advisor is contingent upon faculty availability and willingness to serve.

General degree requirements are:

- Fulfill the BASW degree requirements with a minimum 3.25 GPA.
- Complete the social work general education requirements with a minimum 3.25 GPA. This includes 24 credits in the social and behavioral sciences; minimum of 3 credits in Africana studies; minimum of 3 credits in English composition; minimum 3 credits in human biology and a minimum of 3 credits in statistics.
- Enroll in one course in each of the following areas, selecting one as an area of specialization, with a minimum of 12 credits and grades corresponding to a 3.25 GPA or higher: Africana studies; anthropology; economics; global studies; political science; psychology; sociology; urban studies; women's studies.
- In all of the above coursework, a prospective BPhil student is encouraged to enroll in an UHC section of the course, if available. Overall GPA requirements remain the same for these courses.

The prospective BPhil student will make an appointment with the UHC advising staff regarding Honors College qualifications for degree candidacy.

The prospective BPhil student will complete the BASW degree requirements listed above as well as complete independent research culminating in the production of an original undergraduate thesis.

If all of the degree requirements are met, a single degree, the Bachelor of Philosophy degree with a major in social work, will be conferred jointly by the School of Social Work and the University Honors College.

For additional details on this degree program, please contact the School of Social Work or the Honors College.

National Association of Social Workers (NASW) Code of Ethics

Professional ethics are at the core of social work. The profession has an obligation to articulate its basic values, ethical principles, and ethical standards. The NASW Code of Ethics sets forth these values, principles, and standards to guide social workers' conduct. The code is relevant to all social workers and social work students, regardless of their professional functions, the settings in which they work, or the populations they serve. The NASW Code of Ethics serves six purposes:

- The code identifies core values on which social work's mission is based.
- The code summarizes broad ethical principles that reflect the profession's core values and establishes a set of specific ethical standards that should be used to guide social work practice.
- The code is designed to help social workers identify relevant considerations when conflicting professional obligations or ethical uncertainties arise.
- The code provides ethical standards to which the general public can hold the social work profession accountable.
- The code socializes practitioners new to the field to social work's mission, values, ethical principles, and ethical standards.
- The code articulates standards that the social work profession itself can use to assess whether social workers have engaged in unethical conduct. NASW has formal procedures to adjudicate ethics complaints filed against its members. In subscribing to this code, social workers are required to cooperate in its implementation, participate in NASW adjudication proceedings, and abide by any NASW disciplinary rulings or sanctions based on it.

The code offers a set of values, principles, and standards to guide decision making and conduct when ethical issues arise. It does not provide a set of rules that prescribe how social workers should act in all situations. Specific applications of the code must take into account the context in which it is being considered and the possibility of conflicts among the code's values, principles, and standards. Ethical responsibilities flow from all human relationships, from the personal and familial to the social and professional. Social work students are required to comply with the NASW Code of Ethics. Copies can be obtained from the NASW Web page at www.socialworkers.org.

Statute of Limitations

There is a seven-year limitation on the earning of the BASW degree with the seven-year period beginning from the date of entry into the program. Under the following extenuating circumstances, the advisor may recommend an extension of time to the program director and the associate dean:

Extended illness of the student,
Involuntary mobilization into a U.S. military unit,
Death of a close family member,
Extended personal emergency, or
Academic probation in the last term of the student's program.

Undergraduate Advising

When admitted, new BASW majors are assigned an advisor by the BASW program director (students completing the social work minor maintain the academic advisor in their current college or school). Incoming BASW majors meet their assigned faculty advisor at the school's orientation, which is held prior to the start of fall semester. Incoming students are then encouraged to make an appointment with their faculty advisor during the first three to four weeks of the term. Each advisor will work with his or her advisee to clarify educational options, answer questions about the BASW Program, and discuss career opportunities. When students enroll for Practicum Seminar I and the concurrent Practicum Seminar and Lab I, the seminar and lab instructor in the section the student chooses becomes his or her faculty advisor for the remainder of their enrollment in the program. Faculty advisors should be the first point of contact for any or all of the following:

Registration including add/drop, leaves of absence, and withdrawals; Clarification of all academic policies and procedures (i.e., grading policies, graduation requirements, directed study);
Discussions regarding academic expectations and performance;
Information about other departments and/or programs in the School of Social Work or the University of Pittsburgh;
Planning of the student's educational program in accordance with his or her career interests.

Phi Alpha National Honor Society

Mu Omicron Chapter

Phi Alpha Honor Society was created to provide a closer bond between social work students and the profession in order to promote humanitarian goals and ideals. With the motto, "Through knowledge-the challenge to serve," Phi Alpha fosters high standards of education for social workers and invites into membership those who have attained excellence in scholarship and achievement in social work. Founded in 1960, Phi Alpha Honor Society currently has more than 110 chapters nationwide.

Major

Social Work, BASW

Degree Requirements

The School of Social Work requires a minimum of 120 credits for graduation. The courses listed below are required of all students working toward the Bachelor of Arts in Social Work:

Social work courses:

A total of 48 credits in the social work major:

SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
SOCWRK 1005 - FOUNDATIONS OF WELFARE STATE
SOCWRK 1006 - POLICY ANALYSIS
SOCWRK 1008 - ETHNICITY AND SOCIAL WELFARE
SOCWRK 1010 - PRA MODL:HELP PEPL HELP SELVES
SOCWRK 1011 - SOCIAL WORK W/INDIVS & FMLYS
SOCWRK 1012 - SOCIAL WORK W/COMNYS & ORGNS
SOCWRK 1013 - SOCIAL WORK WITH GROUPS
SOCWRK 1015 - HUMAN BEHAVR & SOCL ENVIRONMNT
SOCWRK 1020 - INTRO TO SOCIAL WORK RESEARCH
SOCWRK 1024 - PRACTICUM SEMINAR AND LAB 1
SOCWRK 1025 - PRACTICUM 1
SOCWRK 1026 - PRACTICUM SEMINAR AND LAB 2
SOCWRK 1027 - PRACTICUM 2

Social and behavioral sciences requirements: 24 credits **

Anthropology (3)
Economics (3)
Political Science (3)
Psychology (3)
Sociology (3)
Additional credits in one of the following areas will fulfill the area of specialization requirement: Africana Studies, Anthropology, Economics, Global Studies, Political Science, Psychology, Sociology, Urban Studies or Women's Studies. (9-12 *)

Note:

* If Global Studies, Urban Studies, or Women's Studies is chosen as the area of specialization, students will need to complete a total of 12 credits in these areas.

Other course requirements: 12 credits **

Africana Studies (3)
English Composition (3)
Human Biology (or equivalent course emphasizing the biological determinants of human behavior) (3)

Statistics (3)

Note:

* Course of equivalent content may have been taken at another institution.

** These courses/credits (in part or in whole) may have been taken as part of the 60 credits required for admission. Any of these courses/credits not taken prior to admission must be completed prior to graduation.

Minor requirements:

The minor includes successful completion (with a grade of C- or better) of four of the following seven 3- credit courses:

SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK *
Foundations of the Welfare State

Note:

* SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK is required for all subsequent courses, with the exception of SOCWRK 1005

Social Work, BPHIL

University Center for International Studies

The University Center for International Studies (UCIS) is the primary resource for initiating and managing international programs, studies and support services while promoting the University's reputation as a leader in global education. A key goal of UCIS is to cultivate globally capable and engaged students toward lives of impact in their community and beyond. In short, to prepare undergraduate students who are global ready. This is achieved by certificate programs, study abroad, curriculum development, and seminars. UCIS offers 9 certificates and 3 related concentrations, which are academic credentials that attest to acquisition of international knowledge about a particular world region or global issue, cross-cultural understanding, and language proficiency relevant for international careers or for advanced degrees. Certificates are available in:

- African Studies
- Asian Studies
- East European Studies
- European Union Studies
- Global Studies
- Latin American Studies
- Russian Studies
- Transatlantic Studies
- West European Studies

The certificates are administered through the African Studies Program, Asian Studies Center, European Studies Center, Global Studies Center, Center for Latin American Studies, and the Center for Russian and East European Studies. Four centers--European Studies Center, Global Studies, Latin American Studies, and Russian and East European Studies--are designated by the federal government as National Resource Centers.

UCIS certificates evidence language proficiency, regional knowledge and cultural competency that students find useful for international careers or for advanced degrees with a concentration in a particular world area or global theme.

Admission to Certificate Programs

Formal admission to the UCIS certificate programs is accomplished by completing a simple application form. Interested students are encouraged to apply in their freshman or sophomore year. There are no special requirements for admission. All undergraduate certificate programs in UCIS (with the exception of the certificate programs in Global Studies, European Union Studies and Latin American Studies described below) require 15 credits/five courses in the applicable area, with three or more courses in at least two departments other than the major. Language requirements vary from four to six terms.

Certificate courses can be used simultaneously to fulfill the student's general education and international/foreign culture requirements. Grades generally must be C or better to be accepted for the certificate program. Upon graduation, both the academic degree and the certificate are posted on the student's transcript.

Advising

All UCIS certificate programs provide personalized advising services to students interested or registered in its programs in addition to those routinely offered by the students' major advisors. Center advisors assist in selecting courses, language training, and arranging internships or study abroad to fit the students' academic and personal interests. See the program descriptions below for contact information.

Special Academic Opportunities

In addition to the regular certificate programs, UCIS offers the following special academic opportunities:

Asian Studies Scholarships and Fellowships

Students enrolled in the Asian Studies certificate program are eligible for a variety of fellowships and scholarships, including the Chinese Summer Language Study Abroad Scholarships, the Japanese Studies Undergraduate Scholarship, the Study-in-Japan Scholarship, and the Japanese Summer Language Study Scholarship. In addition, a new undergraduate scholarship program for students studying Chinese and Japanese languages is available for study abroad in an approved program. For more information on these funding opportunities, please click here.

Latin American Studies Undergraduate Seminar/Field Trip Program

The Undergraduate Seminar/Field Program is a unique component of the Latin American studies undergraduate certificate program. The Center for Latin American Studies (CLAS) firmly believes that all undergraduates should have the opportunity to experience Latin American culture firsthand. This objective is met through an annual field trip to a selected Latin American country for which about 10 - 14 students are chosen each year. CLAS subsidizes the majority of the cost of this program via scholarships to place it within the means of most students. Student participants register for a seminar in the spring term (January-April) that prepares them for the field experience through study of the culture, economics, geography, history, and politics of the area to be visited. Students also are introduced to research methodology and are guided through the development of a project which forms the basis for research they conduct while in the field. In the summer session (early May-late June), the students travel to Latin America, where they reside with host families and undertake their field projects under the direction of a CLAS faculty member. (In past years, groups have gone to Argentina, Bolivia, Brazil, Colombia, Costa Rica, the Dominican Republic, Ecuador, Guatemala, Mexico, Uruguay, and Venezuela.)

Russian and East European Studies Summer Study Abroad and Internship Awards

The Center for Russian and East European Studies (REES) believes that study or work abroad is a key component of its certificate program. In an effort to encourage students to travel to the region, REES offers several scholarships each summer to students enrolled in the certificate program. In addition, REES offers several awards to its students annually to fund paid internships in Pittsburgh during the academic year in the field of Russian and East European studies.

West European Studies Friedl E. Kessler Memorial Fellowship

To help defray the costs of studying abroad, the European Studies Center offers the Kessler Fellowship for study or research in Germany. This competitive award is offered every year in the amount of $1,000. Any student pursuing the Certificate in West European Studies who studies German and has at least a 3.0 GPA is eligible to apply.

The overarching goal of the African Studies certificate is to deepen students' knowledge and understanding of Africa through a wide range of courses on diverse topics such as African culture, business development, economics, education, environment, history, health, languages, politics, law, and religion. A benefit to any Pitt student, the certificate bolsters the breadth of any degree program without requiring a minor or major in African Studies. Since our required classes count for general education requirements, students work African Studies classes into their schedules organically. The Certificate in African Studies sets students apart in the job marketplace by demonstrating knowledge and interest in Africa to future employers.

Other Opportunities
The program also offers language and cultural immersion opportunities to study abroad in Africa, and it brings students together with faculty and visiting scholars in a variety of different academic and cultural settings. Students from **all academic areas** are welcome to participate in these activities, which are intended to deepen one's knowledge and understanding of Africa and promote awareness of African realities in a wider context. Those who enroll in the program and successfully complete the requirements will be awarded the undergraduate Certificate in African Studies.

Certificate Requirements

One required core course (3 credits) from AFRCNA 0127 - INTRODUCTION TO AFRICA, AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS, ANTH 1778 - CULTURES OF AFRICA, HIST 0795 - HISTORY OF AFRICA BEFORE 1800 , or HIST 1796 - HISTORY OF AFRICA SINCE 1800

Four elective courses (12 credits) selected from those on the course list that contain at least 25% African content

Language proficiency: a minimum of two years of study (four terms) of either an indigenous African language (Swahili or Arabic) or a European language (other than English) relevant to African studies as a consequence of Africa's historical experience (French, Portuguese, German or Spanish)

Capstone paper: This is the culmination of the student's learning experience and clearly demonstrates in-depth knowledge of African studies issues in at least one academic discipline. The capstone must be an assignment submitted as part of coursework, such as a final term paper and the student must have received a B or higher grade on the paper. It must be submitted to the African Studies Program no later than the last semester before graduation.

Special Academic Opportunities

African Studies Internships and Study Abroad Opportunities

The African Studies Program offers **two student internships every semester** where students are given full exposure to the field of African Studies and can earn 3 credits for their academic internship. Students work on skills such as networking, public speaking, communications, media relations, critical thinking, and knowledge of Africa. An African Studies internship is a great way for students to build their resume and get real life experience working for a university.

The African Studies Program also has **two Pitt study abroad programs that run during the summer** to Tanzania and South Africa. These programs allow students to get an on-the-ground appreciation for African studies and gain cultural understanding while working on their Arts and Science requirements.

Asian Studies Certificate

http://www.ucis.pitt.edu/asc/academics/certificate-program/undergraduate-certificate-program

The Asian Studies Center's mandate is to promote an enhanced understanding of East Asia, South Asia, Southeast Asia, and the Pacific Islands through exceptional undergraduate and graduate academic programs, strong interdisciplinary faculty development, and energetic community

outreach. The center has nationally recognized programs in Chinese and Japanese language and culture studies, with growing strengths in Indian and Korean studies. Its affiliated faculty spans the disciplines. More than 3,500 students enroll each year in Asia-related courses. Undergraduate students from any field or school interested in Asia can supplement and strengthen their major field of study by enrolling in the Asian Studies certificate program.

Certificate Requirements

- **Asian Area Studies Courses**: A minimum of five courses (15 credits) on Asia are required. Four courses (12 credits) must be taken in at least two departments outside the major and one course (3 credits) must be taken in the major department. If the major department does not have options for an Asian focus, the student must take an additional Asia-related course in a third department.
- **Language proficiency**: a minimum of two years (four terms) of Asian language study at the college level or equivalent proficiency. Pitt offers Mandarin Chinese, Japanese, Korean, Hindi, and Vietnamese. Heritage and native speakers are exempt from this requirement if they can demonstrate at least intermediate-level proficiency.
- **Digital Portfolio:** Students will produce a digital portfolio by the end of their Senior year. The portfolio may include reflections on academics, work/internship experiences, study abroad observations, and extra curricullar activities to highlight thier expertise in Asian studies.

Financial Assistance

Asian Studies certificate students may be eligible for a variety of scholarships and study abroad awards. For information, visit http://www.ucis.pitt.edu/asc/funding/undergraduate

The European Union (EU) Studies Certificate provides an introduction to the history of European integration, working knowledge of the EU's laws and administrative bodies, economics and the Euro Area, and (depending on the classes chosen) an overview of specific policy areas (defense and security, immigration, economic, international relations, etc.). The certificate provides a multidisciplinary and cross-regional (east-west) perspective, and it is perfect preparation for students who want to pursue careers in both public and private international organizations and to continue the study of Europe and the EU at the graduate level.

The University of Pittsburgh is an internationally recognized center for European Union studies. Selected in 1998, the university is one of 10 European Union Centers of Excellence in the United States (as chosen by the EU itself). The EU certificate has a high visibility that will assist students as they apply to competitive graduate programs in a number of disciplines and to corporations and organizations that interact with the European Union.

Certificate Requirements

- **Six EU studies courses** (18 credits) from at least three different departments are required. These courses will include PS 1317 - POLITICS OF THE EUROPEAN UNION, (a prerequisite for PS 1330), PS 1330 - EUROPEAN UNION SEMINAR, one course on the historical foundation of the EU, and three courses on the EU or with significant EU content

Approved courses are posted online at http://www.ucis.pitt.edu/euce/node/142.

- **Language proficiency:** two years of college-level study of an official European Union foreign language (excluding English). Languages currently available include: Spanish, German, French, Italian, Swedish, Modern Greek, Portuguese, Hungarian, Polish and Slovak. Students may request placement tests through the language department

Related Concentration in European & Eurasian Studies

The Related Concentration in European & Eurasian Studies is crafted to offer comparative study opportunities for students in a pre-professional field - pre-medicine, pre-law, business, engineering, and health and rehab sciences - will while capitalizing on existing European language credits. This individualized, interdisciplinary credential provides a context for studying abroad and complements most academic plans and majors. For the Related Concentration, we define Eurasia as the Russian Federation, Turkey, Mongolia, and the former Soviet republics.

Requirements

A **minimum of four** (12 credits) **content courses** is required. The courses must come from at least two different departments and none of the courses can overlap with a student's other credentials. These courses are allowed to overlap, however, with general education requirements. Students must earn a C or better in classes counting towards the certificate.

Language proficiency: one year (two semesters) of college-level study of an official European (excluding English) or Eurasian language, or demonstration of equivalent proficiency. The same language classes (or AP credits) used to fulfill the general education requirement may be used here as well.

Special Academic Opportunities

In addition to the certificate itself, the European Studies Center also offers its students a number of valuable resources, including scholarships for study abroad, directed research opportunities, research assistance, and a full calendar of events and visits from politicians and practitioners from across Europe.

Global Studies Certificate

University of Pittsburgh
University Center for International Studies
Global Studies Center
Elaine Linn, Assistant Director for Academic Affairs
4102 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-2113
eel58@pitt.edu
http://www.ucis.pitt.edu/global/

Global Studies focuses on the interconnectedness of today's world. Students pursuing an undergraduate degree in any school within the University may seek an undergraduate certificate in global studies.

Certificate Requirements

Global Concentrations: To complete the certificate, student are able to develop expertise by taking five courses in one of six global themes:
Changing Identities in a Global World
Communication, Technology and Society
Conflict and Conflict Resolution
Global Economy and Global Governance
Global Health
Sustainable Development

Six global studies courses (18 credits) are required. In addition to five thematic courses, students are required to take PS 0550 or ARTSC 0150 - INTRODUCTION TO GLOBAL STUDIES

Language proficiency: a minimum of two years of college-level study (four semesters) in a foreign language spoken in the chosen region of study, or fulfill the requirement by passing a proficiency exam. Intermediate low-mid proficiency is expected. Pitt offers instruction in over 30 languages

Global Studies Capstone research paper: This research paper is the culmination of the student's learning experience of an issue related to the global concentration. It demonstrates analytical skills within a trans-regional context. The capstone must be written as part of a course and graded by a faculty member

Special Academic Opportunities

Students enrolled in Global Studies are the first to be informed about funding for research, travel, language study, and study abroad; internships and career development; networking opportunities with dignitaries, academics, and professionals; and interesting events on campus and in the city of Pittsburgh.

Latin American Studies Certificate and Related Concentration

University of Pittsburgh
University Center for International Studies
Center for Latin American Studies
Luis G. Van Fossen Bravo, Undergraduate Advisor
4202 Wesley W. Posvar Hall
Pittsburgh, PA 15260
412-648-7393
bravo@pitt.edu
www.ucis.pitt.edu/clas

Any undergraduate student at the University of Pittsburgh may enroll in the **Certificate or Related Concentration** of the Center for Latin American Studies (CLAS). The earlier you enter the program, the easier it is to incorporate Latin American courses into your plan of study. As a CLAS student, you will become eligible for grants and fellowships awarded by the Center. You also receive information about the many events sponsored by the Center.

Certificate Requirements

Seven Latin American courses (21 credits): two courses in the major department and five courses from at least two departments outside the major. If majoring in a department in which no Latin American courses are offered, the requirement is seven Latin American area courses in at least three different departments.

Language proficiency: three years (six terms) of college-level Spanish or Portuguese, or have equivalent competency

Study abroad in Latin America is required. The study abroad program must be for academic credit and last at least six weeks. *The requirement may be fulfilled by participation in the CLAS Undergraduate Seminar and Field Program.*

Related Concentration Requirements

Similar to a minor, the related concentration is designed for students who want to learn about the cultures and societies of our neighbors to the south. It is suitable for students considering a career specializing in the Latin American region, and has two academic requirements: area studies courses and language proficiency.

One course in the major department, and **four courses** from at least two departments outside the major (15 credits). If majoring in a department in which no Latin American courses are offered, the requirement is five Latin American area courses in at least three different departments.

Language proficiency: two years of study (four terms) of college-level Spanish or Portuguese, or have equivalent proficiency.

Special Academic Opportunities

The Center for Latin American Studies (CLAS) offers a variety of funding opportunities for undergraduate students entering or currently enrolled in one of its undergraduate programs. Please visit: www.ucis.pitt.edu/clas/ugrad_funding.

Russian and East European Studies Certificate

University of Pittsburgh
University Center for International Studies
Center for Russian and Wast European Studies
Andrew Behrendt, Undergradaute Academic Advisor
4417 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone: 412-648-7407
aeb72@pitt.edu
http://www.ucis.pitt.edu/crees/

The Russian and East Eurpoean Studies Certificate is an interdisciplinary credential that combines foreign language training and multidisciplinary area studies courses. Through this stimulating program, students develop a broad understanding of the historical and cultural processes shaping states and societies in Eastern Europe, Russia, and Eurasia.

Certificate Requirements

Coursework: Five Russian & East European area studies (non-language) courses (15 credits). Courses must be taken in at least three departments, and up to two courses may be taken in the major department.

Language proficiency: a minimum of two years (four terms) of college-level study of a language of the former Soviet Union or East/Central Europe. Pitt offers Russian, Polish, Slovak, Ukrainian, Modern Greek, Turkish, and Bosnian/Croatian/Serbian. Additionally, Pitt's Summer Language Institute offers Estonian, Latvian, Lithuanian, Bulgarian, Czech and Hungarian. Heritage speakers must demonstrate intermediate-level proficiency.

Capstone Paper: this is the culmination of the student's learning experience and demonstrates in-depth, interdisciplinary knowledge of Russian & East European studies. This 10 to15-page paper must be written in junior or senior year, and be submitted to the certificate advisor with grade documentation prior to graduation.

Students are strongly encouraged to take the 3-credit REES capstone course, which fulfills this requirement and counts as an area studies course.

Related Concentration in European & Eurasian Studies

The Related Concentration in European & Eurasian Studies is crafted to offer comparative study opportunities for students in a pre-professional field - pre-medicine, pre-law, business, engineering, and health and rehab sciences - will while capitalizing on existing European language credits. This individualized, interdisciplinary credential provides a context for studying abroad and complements most academic plans and majors. For the Related Concentration, we define Eurasia as the Russian Federation, Turkey, Mongolia, and the former Soviet republics.

Requirements

A **minimum of four** (12 credits) **content courses** is required. The courses must come from at least two different departments and none of the courses can overlap with a student's other credentials. These courses are allowed to overlap, however, with general education requirements. Students must earn a C or better in classes counting towards the certificate.

Language proficiency: one year (two semesters) of college-level study of an official European (excluding English) or Eurasian language, or demonstration of equivalent proficiency. The same language classes (or AP credits) used to fulfill the general education requirement may be used here as well.

Special Academic Opportunities

Pitt offers a range of study abriad course that can be used to fulfill certificate requirements. Short-term summer study abroad courses, taught in English and offering 3 to 6 Pitt credits, include:

Czech Republic and Poland: Economy and Policy (ECON 0905) in Prague and Krakow, May

Romani (Gypsy) Music, Culture, and Human Rights (MUSIC 1362 , URBNST 1901) in Prague and Budapest, 6 credits, May-June
Architecture and the City in Central Europe (HAA 1907) in Vienna, Zagreb, Ljubljana, and Prague, May.

The intensive Summer Language Institute (SLI) is a great option to study languages of our region. Study abroad options are available for Russian, Bosnian/Croatian/Serbian (BCS), Bulgarian, Czech, Hungarian, Polish, and Slovak (www.sli.pitt.edu).

**For those students interested in pursuing graduate or other advanced regional studies, a Bachelor of Philosophy degree in International and Area Studies/Russian and East European Studies Track is also available.*

Transatlantic Studies Certificate

University of Pittsburgh
University Center for International Studies
European Studies Center
Zachary Kimes, Undergraduate Academic Advisor
4215 Wesley W. Posvar Hall
Pittsburgh, PA 15260
Phone:412-648-7406
z.kimes@pitt.edu
http://www.ucis.pitt.edu/esc/

The Certificate in Transatlantic Studies lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Certificate Requirements

A **minimum of five** (15 credits) **Transatlantic Studies content courses** is required. Two of the courses may overlap with the student's major or other credentials. The remaining courses must be from at least two departments outside the student's major. Two of the courses must be at the 1000 level and students must earn a C or better in classes counting towards the certificate. Courses must be thematically relevant to each other.

Language proficiency: two years (four semesters) of college-level study of an official European language (excluding English). Languages currently available include: Spanish, German, French, Italian, Swedish, Modern Greek, Irish Gaelic, Portuguese, Hungarian, Polish and Slovak. Students may request placement tests through the language department.

Special Academic Opportunities

In addition to the certificate itself, the European Studies Center also offers its students a number of valuable resources, including scholarships for study abroad, directed research opportunities, research assistance, and a full calendar of events and visits from politicians and practitioners from across Europe.

Pittsburgh, PA 15260
Phone: 412-648-7406
z.kimes@pitt.edu
http://www.ucis.pitt.edu/esc/

The Certificate in Western European Studies provides students with strong interests in predominantly Western European history, culture, politics, and languages to complement their major with a regional specialization.

Certificate Requirements

A minimum of **five West European studies courses** (15 credits). Courses must be chosen according to a theme to ensure intellectual cohesion. Possible themes include: European humanities, cultural and social development, continental European politics, Spanish studies, German studies, or self-designed theme after consultation with the international advisor

Two courses from the major may overlap with the certificate. Remaining courses must be from at least two departments outside the major. One of the five courses must be on 20th/21st century Western Europe, if applicable to the theme.

Language proficiency: two years of college-level study (four terms) in French, German, Spanish, Portuguese, Italian, Irish Gaelic, Swedish or Modern Greek

Digital Portfolio: this is the culmination of the student's learning experience and demonstrates in-depth knowledge of West European studies issues. Details will be discussed with the advisor.

Special Academic Opportunities

In addition to the certificate itself, the European Studies Center also offers its students a number of valuable resources, including scholarships for study abroad, directed research opportunities, research assistance, and a full calendar of events and visits from politicians and practitioners from across Europe.

University Honors College

The University Honors College (UHC) seeks to create opportunities for dedicated and engaged students to explore their interests in great depth and with great rigor. The UHC offers a variety of carefully designed courses from the humanities, social sciences, and natural sciences, along with supplemental advising opportunities, academic activities, and a distinctive baccalaureate degree in any undergraduate school of the University.

Contact Information

University of Pittsburgh
University Honors College
3600 Cathedral of Learning
Pittsburgh, PA 15260
412-624-6880
www.honorscollege.pitt.edu

Admission Requirements

A distinctive feature of the University Honors College (UHC) is that unlike honors programs and colleges at virtually all other universities, students do not apply for membership, students are not accepted into the UHC, and students are not rejected for membership. Rather, all undergraduate students who seek an enriched education are invited to pursue the rigorous academic opportunities provided by the UHC.

Advising

The UHC offers multiple forms of advising that are intended to complement the advising students receive from their primary advisor. These include supplemental academic advising, Health Professions Advising, national scholarships advising, community engagement advising, and Politics and Philosophy major advising.

Please note that all students are welcome to meet with UHC advisors and are encouraged to either make an appointment online or simply email the relevant advisor.

Supplemental Academic Advising

UHC supplemental academic advisors help students explore interests and goals, assist in matching them to relevant opportunities in research, student groups, and academics within the UHC and at Pitt; assist in planning double majors and/or an interdisciplinary approach to their education; provide general academic advice on courses, majors, and research; and aid in the preparation of personal statements for scholarships and graduate study. For more information: http://www.honorscollege.pitt.edu/advising

Health Professions Advising

Health professions advising assists students as they explore major choices, course selection, long range planning, and successful application to both the health professions committee and to medical, dental, optometry, podiatry, and veterinary schools. Advisors assess student goals and then recommend academic and experiential opportunities that mesh with student interests. For more information: http://www.honorscollege.pitt.edu/health-professions-advising

National Scholarships

The office of National Scholarships works closely with students to identify scholarships relevant to their academic and personal goals, and explore the steps to become competitive applicants for these awards. National scholarship advising can help students attain a broader perspective and refined

understanding of their personal, academic, and professional goals; strengthen their writing skills through the creation and revision of personal statements and grant proposals; and develop the resourcefulness to identify opportunities to conduct meaningful research and/or incorporate service and international experiences into their educational plan. For more information: http://www.honorscollege.pitt.edu/nationalscholarships-advising

Community Engagement

Community Engagement Advising and programming provides students with opportunities to use their academic interests and skills to positively impact their communities. Community Engagement Advising introduces students to pertinent social issues in the city of Pittsburgh as well as key organizations, leaders, and advocates who are involved with those issues; connects students to research, fellowships, experiential learning opportunities, and other scholarly projects that relate to public service and social change; supports students in designing independent experiences and research projects that integrate academic skills and interests with investigating and addressing community issues. For more information: http://www.honorscollege.pitt.edu/community-engagement-advising

Politics and Philosophy Major

This interdisciplinary major in the Kenneth P. Dietrich School of Arts and Sciences is advised through the UHC and provides students with training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances understanding of the moral and political complexities of public life and offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs. For more information: http://www.honorscollege.pitt.edu/politics-philosophy

The Bachelor of Philosophy Degree

The Bachelor of Philosophy (BPhil) degree is jointly awarded by the UHC and any undergraduate school/college at Pitt. The BPhil degree signifies the highest level of research/scholarship attainable by an undergraduate student. To receive the BPhil degree, students must fulfill the degree requirements (major, general education, and/or other curricular requirements) of their "home school" (e.g., Kenneth P. Dietrich School of Arts and Sciences, Swanson School of Engineering, College of Business Administration, School of Nursing, etc.) and maintain a 3.50 cumulative GPA. The UHC adds two requirements: a more demanding program of study which should have breadth, depth, and focus and independent research/scholarship under the guidance of a faculty member culminating in a written thesis that is defended before a faculty examination committee that includes a visiting external examiner from another college or university. For more information: http://www.honorscollege.pitt.edu/bphil-degree

Special Academic Opportunities

Student Publications

The UHC advises and directs the publishing of four undergraduate publications: Collision (prose and poetry), Pittsburgh Undergraduate Review (analytical and scholarly essays), Three Rivers Review (literary magazine), Pitt Political Review (political writing). All publications are student run and always interested in new members. Consult the UHC publications page for more information: http://www.honorscollege.pitt.edu/activities/student-publications

Research Opportunities

The UHC provides research opportunities in the fall and spring semesters as well as the summer. These include the Brackenridge Research Fellowships, Health Sciences Summer Research Fellowships, and Chancellor's Undergraduate Research Fellowships just to name a few. For more in depth information about these programs and their application deadlines, please visit: http://www.honorscollege.pitt.edu/fall-and-spring-research-opportunities and http://www.honorscollege.pitt.edu/summer-research-opportunities

Housing

The UHC offers First-Year Honors Housing, located in Sutherland West, and Upper-Class Honors Housing in Pennsylvania Hall and Forbes Craig Apartments. Honors Housing is unique in that it connects highly motivated students from across schools and majors in communities that are shaped by their shared academic, cultural, and personal interests. To learn more about Honors Housing, visit: http://www.honorscollege.pitt.edu/housing

Major and Minor Descriptions

Major

Politics and Philosophy, BA

The politics and philosophy major, a major in the Kenneth P. Dietrich School of Arts and Sciences, advised through the University Honors College, provides students with interdisciplinary training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances students' understanding of the moral and political complexities of public life and it offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs.

By combining course work from different disciplines -- political science, philosophy, and economics -- the program's scope is broad, yet the structure of the curriculum also requires depth. The thematic nature of the major allows for flexibility in course selection. In collaboration with the major advisor, students design a cohesive program of study tailored to meet their individual post-graduate/career interests and needs.

The politics and philosophy major is a rigorous, but rewarding, program. Upon graduation, an academic career is certainly a possible pursuit; the major also provides excellent preparation for careers in law, government, community organizations, and social action groups.

The major is comprised of elements from the political science, philosophy, and economics departments and involves a minimum of 51 credits distributed as follows: political science - 21 credits; philosophy - 21 credits; economics - 9 credits. A capstone, which may have associated credits, is also required.

Required Courses

Political Science Courses

Students must complete seven courses in political science. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Philosophy Courses

Students must complete seven courses in philosophy. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Economics Courses

ECON 0100 - INTRO MICROECONOMIC THEORY
ECON 0110 - INTRO MACROECONOMIC THEORY
ECON XXXX any course (no course in the 0800 series may count toward this requirement)

Capstone Requirement

In consultation with the major advisor, students may opt for one of the following.

completion of the Bachelor of Philosophy thesis through the University Honors College (UHC);
participation in a graduate-level seminar (with permission from the instructor); or
completion of a Directed Research Project, an Independent Study, or an Internship.

Grade requirements: A minimum GPA of 2.0 is required in those courses that count toward the major.

Satisfactory/No Credit option: There is no limit on the number of courses in the major that can be taken on an S/NC basis, but it is suggested that these courses be taken for a letter grade.

Writing (W) requirement: The W courses listed under the political science and philosophy requirements satisfy the W requirement for the major.

Related area: A related area is not required due to the interdisciplinary nature of the major.

Special Academic Opportunities

The University of Pittsburgh makes many special academic opportunities available to all of the University's undergraduate students. These opportunities provide students with ways to augment their education and experience with expanded study programs both on campus and off campus, in both University and professional settings.

Area of Concentration (Sub-Plan)

An area of concentration is an approved educational experience that results in concentrated training in or knowledge of a particular area within the discipline of a degree program. For more information about specific areas of concentration, see individual school sections.

Certificate Programs

Students may broaden their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed below. The certificate may partially fulfill the degree requirements of the student's school. The requirements for each certificate vary, and students should contact the certificate program director. For more information about these certificate programs, see their individual listings in the school or center section identified in parentheses.

- Accounting (CGS)
- African Studies (UCIS)
- American Sign Language (A&S)
- Asian Studies (UCIS)
- Assistive Technology in Rehabilitation (SHRS)
- Children's Literature (A&S)
- Civil Engineering and Architectural Studies (ENGR)
- Communications (CGS)
- Community Health Assessment (CGS)
- Conceptual Foundations of Medicine (A&S)
- Corporate/Community Relations (CGS)
- Dental Hygiene (DEN)
- Digital Media (CGS)
- Emergency Medicine in Rehabilitation (SHRS)
- Energy Resource Utilization (ENGR)
- English Writing (CGS)
- European Union Studies (UCIS)
- Fessenden Honors Engineering (ENGR)
- Gender, Sexuality, and Women's Studies (A&S) (CGS)
- Geographic Information Systems (A&S)
- German Language (A&S)
- Global Studies (UCIS)
- Historic Preservation (A&S)
- History and Philosophy of Science (A&S)
- Information System Design (CGS)
- International Business (CBA)
- International Engineering Studies (ENGR)
- Jewish Studies (A&S)
- Latin American Studies (UCIS)
- Leadership (A&S)
- Leadership and Ethics (CBA)
- Managing Health Services Programs and Projects (CGS)
- Medieval and Renaissance Studies (A&S)
- National Preparedness and Homeland Security (CGS)
- Nonprofit Management (CGS)
- Nuclear Engineering (ENGR)

Pathokinesiology in Rehabilitation (SHRS)
Photonics (A&S)
Product Realization (ENGR)
Psycho-Social Issues in Rehabilitation (SHRS)
Public and Professional Writing (A&S)
Russian and East European Studies (UCIS)
Sustainable Engineering (ENGR)
West European Studies (UCIS)
Writing for the Professions (CGS)

Abbreviations are as follows:

A&S = Arts and Sciences
CBA = College of Business Administration
DEN = School of Dental Medicine
CGS = College of General Studies
ENGR = Swanson School of Engineering
UCIS = University Center for International Studies

Cooperative Programs

The University has established some arrangements with industry that permit students to rotate four-month terms between the workplace and the classroom. These programs are administered by the Swanson School of Engineering and available to engineering, computer science, and engineering technology students. The experience normally starts in the sophomore or junior year. Call 412-624-9826 for more information or see www.engineering.pitt.edu/coop.

Cross Registration

Cross-college and cross-university registration is a program designed to provide enriched educational opportunities for undergraduates in any of the following participating Pittsburgh-area institutions: Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, Robert Morris University, and the University of Pittsburgh. For requirements and limitations, see the Cross-Registration section of this catalog or visit www.pchepa.org.

Double And Joint Degrees

Students may simultaneously pursue more than one undergraduate degree (e.g., a BA and a BS within Arts and Sciences, or an undergraduate degree in the Swanson School of Engineering and in Arts and Sciences). Students must be admitted to both schools offering the degrees and fulfill the degree requirements of both schools. For the double degree (whether within or between schools), the student must complete not only the requirements for both degrees, but also a minimum of 30 credits beyond what is normally required for the primary degree (e.g., a student earning two A&S degrees would need at least 150 credits, rather than the usual 120; a student earning an A&S degree as the primary degree and a degree from another University of Pittsburgh school as the secondary degree would need at least 150 credits). Students must maintain a 2.00 GPA in all courses. Check with the individual school for other specific requirements that apply.

Graduate And Professional School Opportunities

Graduate school provides students with the opportunity to enhance their knowledge and qualifications in areas of academic and professional interest. All students can take advantage of being at a major research and graduate institution by exploring the many possibilities for graduate study that exist at the University. For information about specific programs, see the Graduate and Professional Studies Catalog.

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. See the *Graduate Catalog - Academic Regulations* section "Enrollment in Graduate Courses as an Undergraduate".

Some schools offer accelerated admission into certain graduate and professional schools through a combined program leading to both a bachelor's and graduate or professional degree. The participating undergraduate schools and their early admissions graduate school partners are listed below:

Arts and Sciences (A&S)-Communication Science Program (speech, pathology, and audiology) within the School of Health and Rehabilitation Sciences (SHRS)
A&S-Physical Therapy Program within SHRS
A&S-School of Dental Medicine
BS in Computer Science and MA or MS in Computer Science, both from Arts and Sciences
BS in Statistics and MA or MS in Statistics, both from Arts and Sciences
BA from Arts and Sciences and JD from Law
BA or BS (unspecified major, but prerequisites required) from Pitt and MS or MPH in Environmental and Occupational Health, MS or MPH in Infectious Diseases and Microbiology, MS in Human Genetics, MS or MPH in Biostatistics, or BCHS or MHPE in Health services Administration from Graduate School of Public Health
School of Nursing-RN-Option Program (RN-MSN option)
SHRS-Health Information Management Program
BA in Legal Studies from the College of General Studies and Masters of Law from Law
BSBA from College of Business Administration and JD from Law

Honors College And Honors Courses

The University Honors College (UHC) seeks to meet the special academic and cocurricular needs of the University's most able and motivated undergraduate students. The University Honors College offers a variety of carefully designed courses from the humanities, social sciences, and natural sciences, along with special advising opportunities for an academic community of motivated students, and a special baccalaureate degree in any undergraduate school of the University. See the University Honors College section of this catalog for more information. In addition, some schools and departments offer an honors major. Students should see their school for more information on this opportunity.

Internships

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either on a volunteer or compensated basis. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

Minors (Plans)

A minor provides an option for a student obtaining a degree in a particular discipline to attain knowledge of another discipline. Students may earn minors in schools other than the school in which they are enrolled. After the student lists the official minor on his or her graduation application, the minor appears on the student's academic record and official transcript when the degree is awarded. (See the Academic Programs section of this catalog for available minors.)

Reserve Officer Training Corps (ROTC)

ROTC is an educational program designed to provide full-time students an opportunity to become military officers while completing a Bachelor's or a graduate degree. Students may elect to participate in either the Air Force or Army ROTC program at the University of Pittsburgh or the Naval ROTC program at Carnegie Mellon University. Students in the Air Force program have the option of completing a two or a four-year program. Students in the Army ROTC Program and Naval ROTC programs have the option of completing a two, three, or four-year program. Completion of the Air Force ROTC program leads to a commission as a Second Lieutenant in the U.S. Air Force. Completion of the Army ROTC program leads to a commission as a Second Lieutenant in the U.S. Army, the Army National Guard, or the U.S. Army Reserve. Completion of the Navy ROTC

program leads to a commission as an Officer in the Navy or Marine Corps. All three programs offer monthly stipends, a book allance and tuition scholarships. Call 412-624-6396 or see http://www.afrotc.pitt.edu/ for more information on the Air Force ROTC program, 412-624-6197 or see www.rotc.pitt.edu for more information on the Army ROTC program, and 412-268-5109 or http://www.cmu.edu/nrotc for more information on the Navy ROTC program.

Study Abroad

Students are encouraged to add an international dimension to their undergraduate education through study abroad. Programs of study exist in almost every corner of the world and will fulfill requirements for almost any field of study. Second language proficiency is not a requirement, as most programs offer courses taught in English. Financial aid and scholarships are available. Interested students should come to the Study Abroad Office in 802 William Pitt Union to discover their many options. Call 412-648-7413 to schedule an Essentials of Study Abroad Session or explore www.abroad.pitt.edu. The Engineering Study Abroad Office is in B-80G Benedum, and the College of Business Administration Study Abroad Office is in 2514 Sennott Square.

Summer Sessions

The University offers a large selection of courses in a variety of compressed sessions throughout the summer. Current students can register through their school. Several summer sessions are offered, see the Academic Calendar.

During the summer term and summer sessions, most students are charged tuition on a per-credit basis regardless of the number of credits taken. See Financial Information. Additional information is available through the Office of University Summer Sessions at 412-383-8600 or www.summer.pitt.edu.

Summer Edge

The University offers intensive summer programs that provide academic and experiential studies delivered in a small cohort. In summer 2017, these programs are the Edge in Public and Global Health and the Edge in Wyoming. All University of Pittsburgh undergraduate students are eligible to apply. A transcript notation stating completion of the specific program will appear on the student's transcript. For more information including program costs, see http://www.summeredge.pitt.edu/.

In the Edge in Public and Global Health (11-12 credits), students learn to analyze and tackle critical world health problems through the integrated application of biological, social, and quantitative sciences. Working individually or in pairs with Public Health faculty, students will have opportunities to experience laboratory, quantitative, policy, or social science research, or field work with community organizations or health agencies. The program is administered through the School of Public Health and is offered over the 12-week summer session.

In the Edge in Wyoming (6 credits), students explore the history and politics of the American West, including issues related to environmental policy. While at the University of Wyoming, students will experience the West and its culture by interacting with local guest speakers and visiting relevant, regional sites. The program is administered through the Dietrich School of Arts and Sciences and is offered during 4-week-2 summer session at the University of Wyoming.

Course Information

Please note, when searching courses by Catalog Number, an asterisk (*) can be used to return mass results. For instance a Catalog Number search of " 1 " can be entered, returning all 1000-level courses.*

Admin and Policy Studies

ADMPS 1001 - SOCIAL FOUNDATIONS OF EDUCATN

Minimum Credits: 3
Maximum Credits: 3
Students in the course have the opportunity to develop a foundational understanding of the dynamics of schooling in society by addressing the cultural aspects that underlie society's educational ideas and practices. Through an interdisciplinary approach, readings and activities are designed for school practitioners, or those contemplating careers in education, to engage in the study of those cultural aspects and consequences. The general intent of foundational study is to introduce students to interpretive uses of knowledge Germane to education and to establish a basis for lifelong learning through normative and critical reflection on education within its historical philosophical, cultural and social contexts. Special emphasis is focused on the role of schooling in cultivating the habits necessary for democratic citizenship which include ongoing efforts to secure equitable and just social relations, and to advance the common good.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

ADMPS 1086 - RESIDENCE LIFE:THEORY & PRACTC

Minimum Credits: 1
Maximum Credits: 1
This course reviews the historical and theoretical foundations of the student affairs field with an emphasis on residential living. The course will focus on the developmental impact of living in the residence halls, and the impact staff members have on the evolution of community, student leadership skills, and student psychosocial growth. Special attention will be given to the role of the resident assist ant in the areas of leadership, conflict mediation, academic support and intentional intervention.
Academic Career: UGRD
Course Component: Lecture
Grade Component: H/S/U Basis

ADMPS 1089 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
This course is for administrative and policy studies newly instituted and experimental courses.
Academic Career: UGRD
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

ADMPS 1360 - PEACE MOVEMENTS & PEACE EDCTN

Minimum Credits: 3
Maximum Credits: 3
This course focuses on two major components in the field of peace studies; peace movements and peace education. Key concepts (e.., Peace, war, violence, conflict, justice, equality, democracy, and citizenship) and theories are discussed. Movements for (inter-personal, inter-group, and international) peace initiated by people in the United States and other countries historically and today will be analyzed. School-, university-, and community-based peace education programs developed in various countries will also be examined.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Administration of Justice

ADMJ 0100 - SOCIETY AND THE LAW

Minimum Credits: 3
Maximum Credits: 3
Every society regulates behavior and the means, i.e., either informal or formal, with which this is done varies according to level of social development. This course examines the regulation of behavior in primitive, transitional, and modern societies and traces the development of law and legal systems and their relationship to different characteristics of social development. We will examine legal jurisprudence and the application of the principles of these philosophies and explore how they have shaped legal action.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 0500 - INTRO TO ADMIN OF JUSTICE

Minimum Credits: 3
Maximum Credits: 3
Introductory course designed to provide the student with basic information on the criminal justice system. Views the criminal justice system as consisting of six sub-systems; police, prosecution, courts, corrections, probation and parole. Explores law and society in general, the history, structure, function and contemporary problems in each major sub-system. Also explores the trend of the criminal justice system and the directions and implications involved.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 0600 - INTRODUCTION TO CRIMINOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the study of the causes and social responses to crime. It examines legal definitions and elements of crime; surveys major categories of crime, i.e., Predatory and non-predatory acts; reviews major measures of crime; identifies major correlates and theories of crime; differentiates types of offenders and evaluates the working of the criminal justice system.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1100 - CRIME SCENE INVESTIGATION

Minimum Credits: 3
Maximum Credits: 3
This course provides students with an overview of crime scene investigative issues and problems, as well as techniques used in the collection, preservation, analysis, and utilization of physical and testimonial evidence in criminal prosecutions. Topics include forensic photography, crime scene collection equipment, canvassing, and interrogation techniques in investigations of robbery, burglary, assault, and homicide crimes.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1115 - CRIMINALISTICS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the scientific tools of analysis of crime scene evidence. Topics include toxicology, hair, fiber, blood, DNA, fingerprint, and firearms analysis, as well as cause of death issues such as sexual homicides, suicides, and assisted suicides, drug and carbon monoxide poisoning, accidental deaths, and blunt force trauma deaths. The class consists of integrated lecture and lab each week. The laboratory activities require only basic calculations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1118 - CRIMINALISTICS LAB

Minimum Credits: 1
Maximum Credits: 1
This is an optional lab for students enrolled in administration of justice 1115. Designed for non-science majors, the lab will introduce students to the basic principles of chemistry, biology, and physics as they are used on a daily basis in criminal investigations. Topics include: identification of hair and fibers, DNA, and chromatography. These and other techniques are then applied to a simulated drug bust, a kidnapping case, and a suicide/homicide investigation.
Academic Career: UGRD
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: ADMJ 1115

ADMJ 1200 - INTRO TO LAW ENFORCEMENT

Minimum Credits: 3
Maximum Credits: 3
Introduces various historical and philosophical approaches to law enforcement. Course explores origins of policing; philosophical positions on nature of law enforcement and its justification; comparisons of various types of policing in different historical epoch; and emergence of bureaucratized urban force. Topics include development of law enforcement from ancient times with emphasis on philosophical approaches to policing in U.S.; Introduction to constitutional issues and problems.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1205 - INTRODUCTION POLICE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the management of police organizations. Topics include the evolving community expectations, alternative organizational models, recruitment, training and education, performance evaluations, technology and communications, research and planning, internal and external police accountability, and police culture and ethics.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

ADMJ 1210 - JUVENILE DELINQUENCY

Minimum Credits: 3
Maximum Credits: 3
Provides an overview of the field of juvenile delinquency. Topics covered include theories and research on causes of juvenile delinquency; law enforcement practices encountered in attempts to control delinquency; juvenile treatment under law; correctional philosophy and practices in juvenile justice; and impacts of juvenile criminality upon the rest of society. Students emerge from the course with knowledge of causes, prevention, treatment, and control of juvenile delinquency and should be prepared to move into more detailed study of this subject.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1220 - DEVIANCE AND THE LAW

Minimum Credits: 3
Maximum Credits: 3
This course will examine the concept of deviant behavior and how departing from socially acceptable norms in legal, social and institutional settings sparks certain emotional reactions from those who encounter or experience it. The course will also, identify what is deviancy, types of deviant behavior, who engages in it, what causes it and how in certain circumstances it violates the law by considering the characteristics of the deviant person from both a socio-cultural and historical perspective. In addition, it will outline various theories to deviant behavior.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1225 - THE JUVENILE JUSTICE PROCESS

Minimum Credits: 3
Maximum Credits: 3
Presentation, discussion and analysis of the nature of the juvenile justice process, legal steps required in processing juveniles, nature and operation of juvenile justice institutions, interrelationships between parts of the system, and problems and prospects for their solution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1230 - WHITE COLLAR CRIME

Minimum Credits: 3
Maximum Credits: 3
This course examines the meaning, varieties, and extent of white collar crime" in America. It investigates the developmental history of this concept, theories of white collar crime causation, specific types of white collar crime, empirical and theoretical controversies surrounding white collar crime, and the probable future directions for this type of criminal behavior."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1234 - INTRODUCTION TO CYBERCRIME

Minimum Credits: 3
Maximum Credits: 3
Traditionally, crime has taken place in the physical world. Since the dawn of the internet, criminal activities on the web have been continually increasing. Crime is no longer restricted to a town, city, state or even country as the internet crime transcends all different types of jurisdictions.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1235 - ORGANIZED CRIME

Minimum Credits: 3
Maximum Credits: 3
This course is designed to examine the history of organized crime not only within the United States, but from an international perspective as well. The emergence of non-traditional" groups which are competing for power and profits will be examined, as well as the alliances between various criminal groups that have evolved, resulting in the phenomenon of "transnational" organized crime. Those "non-traditional" groups include, but are not necessarily limited to, domestic and international terrorist organizations, the reasons for their development as well as the perceived risk to

American citizens both in a domestic environment and abroad. Neither organized crime nor a terrorist organization can be effectively discussed without integrating the evolution of US drug policy, which will be included. Finally, the various government tactics implemented to counter the threats mentioned herein as well as the impact on the private sector will be integrated into lectures throughout the program."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1236 - INTERNATIONAL ORGANIZED CRIME

Minimum Credits: 3
Maximum Credits: 3
Organized crime is no longer confined to a few countries such as Italy, the United States, and Japan. During the 1980s and 1990s it has become much more pervasive, and has had a major impact in countries in transition; turkey, Mexico, and South Africa. This course looks at the dynamics of organized crime, explains why it develops in particular countries, the various forms it takes, and the responses of law enforcement agencies and international institutions.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

ADMJ 1238 - CYBER SECURTY/LAW/MONY LAUNDER

Minimum Credits: 3
Maximum Credits: 3
This course will examine the scope of cyber-crime and its impact on today's system of criminal justice. Similarly, the vulnerabilities to cyber-assault will be examined. Topics include the use of computer technology to commit crimes such as "hacking" and other computer based criminology, as well as means of committing more traditional violations of law. Also included will be an analysis of the legal considerations facing law enforcement and other cyber-security professionals who are tasked with meeting the challenges of discovering, investigating and prosecuting cyber-crimes. Since our economy and security enterprises are so dependent on the electronic dissemination of information, effective measures to secure this vital resource will be explored. Given the fact that funds are transferred electronically, the electronic transmission of finances will be examined as well as the more basic methods of raising funds and laundering same to advance terrorist activities throughout the world.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1240 - FEMALE OFFENDER IN SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Women are disproportionately uninvolved in crime in American society. While females account for half of the population, they account for less than 25% of those arrested for all crime. This pattern is stable across cultures and persistent over time. This course examines the reasons for these male/female differences and how they might be explained. The course examines the empirical evidence on gender differences and the major theories accounting for them.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1242 - GENDER, RACE, CLASS, AND CRIME

Minimum Credits: 3
Maximum Credits: 3
Gender, race and class are overlapping categories of experience that affect all aspects of life. There is perhaps no other context in which the effects of gender, race and class are as acutely evident as in the criminal justice system. That is, the people who are processed through the criminal justice system are disproportionately male, nonwhite, and from the lower classes. This class is designed to examine the cumulative and interlocking effects of gender, race, and class on crime.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1245 - TERRORISM

Minimum Credits: 3
Maximum Credits: 3
This course focuses upon the social, political, economic and philosophical reasons for the development and spread of terrorism throughout the world, and examines potential dangers inherent in these practices and possible means of solutions to them. Special attention will be given each term to domestic and international acts of terror that affect American citizens, interests, and policies.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1246 - FINANCING TERRORISM

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide the student with an understanding of how terrorists and insurgents fund their activities and finance their operations. The course analyzes the relationship between states and non-state actors, U.S. And international responses to terrorist financing, and anti-terror strategies. Selected topics include the political economy of terrorism financing, the 'HAWALA' system, various mechanisms and policy dilemmas associated with terrorism financing, warning indicators, and terrorist organizations' vulnerabilities and inefficiencies.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1250 - PRINCIPLES OF INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide the student with the skills to distinguish between intelligence and information, what distinguishes intelligence from policy and how intelligence is utilized to form public policy. Students will study the intelligence cycle, methods of gathering and collecting intelligence data, and approaches to synthesize and analyze intelligence materials. Students will be exposed to the strengths and weaknesses of intelligence from a policy maker's perspective, as well as the advantages and disadvantages of competitive intelligence and how decisions are made based on intelligence. Evaluations of scenario-based models and predicting outcomes of events based on available intelligence will cause the student to have a full exposure to and understanding of the various aspects of the intelligence communities. From an investigative and practical perspective, students will be exposed to "investigative resources" utilized to gather intelligence on a basic level such as credit history and credit reports, courthouse searches including Prothonotary's Office, Voter's Registration, Register of Wills, Family Court Division, Clerk of Courts, Recorder of Deeds and Jury Commission. Instruction will also include information on municipality searches, asset searches and every component necessary to conduct a "due diligence" background search.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1252 - CRITICAL INCIDENT MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course will enable students to build on the preventive nature of thorough resources protection planning and develop policies, programs, and procedures to minimize the impacts of severely detrimental events or activities. Acts of terror, the flu pandemic, natural disasters, and major crime incidents are some of the critical incidents facing public safety and private sector security personnel today. This course will provide students with an overview and understanding into the importance of preparation, planning, training, and response to critical incident when protective and preventive measures fail. It will also cover public and media issues and coordination between not only government agencies, but between public and private sectors as well. The course is highlighted by an off-site mock scenario utilizing a model city and a "hands on" response to a critical incident. Completion of the course will include a certification by FEMA'S emergency management institute in an on-line course available for state and local officials and responders.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1260 - RESOURCE PROTECTION PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course will enable students to build on the preventive nature of thorough resources protection planning and develop policies, programs, and procedures to minimize the impacts of severely detrimental events or activities. Acts of terror, the flu pandemic, natural disasters, and major crime incidents are some of the critical incidents facing public safety and private sector security personnel today. This course will provide students with an overview and understanding into the importance of preparation, planning, training, and response to critical incident when protective and preventive measures fail. It will also cover public and media issues and coordination between not only government agencies, but between public and private sectors as well. The course is highlighted by an off-site mock scenario utilizing a model city and a "hands on" response to a critical incident. Completion of the course will include a certification by FEMA'S emergency management institute in an on-line course available for state and local officials and responders.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1265 - ADVANCED TOPICS IN CRIMINOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is an advanced course that examines specific and controversial issues related to crime and the criminal justice system. While the exact topics change from year to year, those that have been studied include: the death penalty, mandatory sentencing, jail and prison overcrowding, victims' rights, and white collar crime.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1300 - INTRODUCTION TO CORRECTIONS

Minimum Credits: 3
Maximum Credits: 3
Introduces various historical and philosophical approaches to corrections. Course explores origins of correctional institutions and evolution of correctional practices in contemporary society. Emphasis on modifications of institutional practices in contemporary society and development of new strategies as alternatives to incarceration. Various methodologies applicable to homogeneous and heterogeneous population groupings of offenders are examined taking into account individual characteristics and differences.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1350 - PROBATION AND PAROLE

Minimum Credits: 3
Maximum Credits: 3
Presents and evaluates the nature and impact of probation and parole, research on effects of both, and strategies for their most effective use. The course examines the nature of parole; factors affecting grant of denial or probation; structure and operation of probation services; differences between juvenile and adult probation services; and impacts of probation and parole upon both the criminal justice system and larger society.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1400 - INTRODUCTION TO CRIMINAL LAW

Minimum Credits: 3
Maximum Credits: 3
Acquaints the student with basic principles of criminal law derived from our English common law heritage and from more recent statutory penal code revisions in the American states. Course examines the meaning of crime and of criminal complicity and conspiracy; sentencing alternatives; and the decriminalization of some crimes.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1410 - INTRO TO CRIMINAL PROCEDURE

Minimum Credits: 3
Maximum Credits: 3
This course examines the procedural effects of criminal law, including constitutional rights, state criminal procedure, and appellate decisions and rules.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1425 - PRINCIPLES HOMELAND SECURITY

Minimum Credits: 3
Maximum Credits: 3
This course examines the new problems facing our domestic public service and justice personnel -- the borderless world of globalization and technology. Attention is paid to problems of terrorism, incident management systems, violence incident response procedures, planning for violence, changing federal, state, and local roles and response planning, weapons of mass effects, mass casualty programs, crime scene operations, technology and emergency responses, the evolving role of the intelligence community, and government, private, and non-government security issues.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1450 - CRITICAL ISS IN CRIMNL JUSTICE

Minimum Credits: 3
Maximum Credits: 3
Analyzes contemporary issues relating to policies, goals, and procedures of all criminal justice agencies. Topics covered include trends and controversies regarding law enforcement activities, the changing role of police, police court controversies, standards and goals, future trends in criminal justice, manpower utilization, organizational changes, long-range planning, and projections for future of police agencies.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ADMJ 1452 - CAPSTONE SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This seminar will simulate an event of the student's choosing, possibly including, but not limited to, a terrorist event affecting a major local industry

of national importance and impact. Students will develop a response to the event from the perspective of resources protection and critical incident management planning, to include:-continuity of business planning -initial response action-crisis mitigation-involvement of federal, state and local authorities-coordination/communications between all agencies-recovery actions.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ADMJ 1900 - PRESERVICE INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
This course is a supervised placement with specific agencies in the criminal justice system.
Academic Career: UGRD
Course Component: Practicum
Grade Component: Satisfactory/No Credit

ADMJ 1901 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
Allows advanced students to pursue topics and research of special interest which are not otherwise available.
Academic Career: UGRD
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

Aero-Space Studies

AFROTC 0001 - FOUNDATIONS OF US AIR FORCE
Minimum Credits: 1
Maximum Credits: 1
As 100 is a survey course designed to introduce cadets to the United States air force and air force reserve officer training corps. Featured topics include: mission and organization of the air force, officer ship and professionalism, military customs and courtesies, air force officer opportunities, and an introduction to communication skills. Leadership laboratory is mandatory for AFROTC Cadets and complements this course by providing cadets with follower ship experiences.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

AFROTC 0002 - FOUNDATIONS OF US AIR FORCE
Minimum Credits: 1
Maximum Credits: 1
This course is the second of a two semester sequence dealing with the U.S. Air force in the contemporary world. The sequence focuses on the basic characteristics of air doctrine; strategic offensive and defense, general purpose, and aerospace support forces; and officer ship.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: LVL: Fr or So

AFROTC 0003 - EVOLUTION OF AIR & SPACE POWER
Minimum Credits: 1
Maximum Credits: 1
As200 course designed to examine general aspects of air & space power, through historical perspective. Course covers time period from the first balloons & dirigibles to space age global positioning systems of the Persian Gulf War. Historical examples provided to extrapolate development of a capabilities & missions to demonstrate evolution of what has become today's USAF Air & Space Power. Course provides cadets with knowledge level understanding of air & space power from an institutional doctrinal & historical perspective. LLAB mandatory for AFROTC Cadets & complements course.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

AFROTC 0004 - EVOLUTION OF AIR & SPACE POWER
Minimum Credits: 1
Maximum Credits: 1
This course is the second of a two semester sequence which surveys the history of air power from balloons and dirigibles through the jet age. It focuses on factors contributing to change in the nature of military conflict; the development of air power and the evolution of air power doctrine and concepts; and the role of technology in the growth of air power.
Academic Career: UGRD
Course Component: Lecture

Grade Component: Letter Grade
Course Requirements: LVL: So

AFROTC 0005 - FRESHMAN LEADERSHIP LAB

Minimum Credits: 0
Maximum Credits: 0
The as100 and as200 leadership laboratory courses (LLABS) include a study of air force customs and courtesies, drills and ceremonies, and military commands. The LLAB also includes studying the environment of an air force officer and learning about areas of opportunity available to commissioned officers.
Academic Career: UGRD
Course Component: Practicum
Grade Component: H/S/U Basis
Course Requirements: LVL: Fr

AFROTC 0006 - SOPHOMORE LEADERSHIP LAB

Minimum Credits: 0
Maximum Credits: 0
The as100 and as200 leadership laboratory courses (LLAB) include a study of air force customs and courtesies, drill and ceremonies, and military commands. The LLAB also includes studying the environment of an air force officer and learning about areas of opportunity available to commissioned officers.
Academic Career: UGRD
Course Component: Practicum
Grade Component: H/S/U Basis
Course Requirements: LVL: So

AFROTC 1005 - JUNIOR LEADERSHIP LAB

Minimum Credits: 0
Maximum Credits: 0
The as300 and as400 LLABS consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps, and the preparation of briefings and other oral and written communications. LLABS also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets.
Academic Career: UGRD
Course Component: Practicum
Grade Component: H/S/U Basis
Course Requirements: LVL: Jr

AFROTC 1006 - SENIOR LEADERSHIP LAB

Minimum Credits: 0
Maximum Credits: 0
The as300 and as400 LLABS consist of activities classified as leadership and management experiences. They involve the planning and controlling of military activities of the cadet corps, and the preparation of briefings and other oral and written communications. LLABS also include interviews, guidance, and information which will increase the understanding, motivation, and performance of other cadets.
Academic Career: UGRD
Course Component: Practicum
Grade Component: H/S/U Basis
Course Requirements: LVL: Sr

AFROTC 1013 - AIR FORCE LEADERSHIP STUDIES

Minimum Credits: 3
Maximum Credits: 3
As 300 is a study of leadership, mgmt. Fundamentals, professional knowledge, air force personnel & evaluation systems, leadership ethics, & the communication skills required of an Air Force Junior Officer. Case studies are used to examine Air Force Leadership & Mgmt. Situations as a means of demonstrating & exercising practical application of the concepts being studied. A mandatory leadership laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply the leadership & mgmt. Principles of this course.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

AFROTC 1014 - AIR FORCE LEADERSHIP STUDIES

Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-semester integrated management course emphasizing the concepts and skills required by the successful manager and leader. It also includes instruction on communication skills and military ethics. The curriculum encompasses individual motivational and behavioral processes, leadership, communication, and group dynamics within the context of a military organization.
Academic Career: UGRD

Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: LVL: Jr

AFROTC 1015 - NATIONAL SECURITY AFFAIRS
Minimum Credits: 3
Maximum Credits: 3
As 400 examines the national security process, regional studies, advanced leadership ethics, and air force doctrine. Special interest topics focus on the military as profession, officer ship, military justice, civilian control of the military, preparation for active duty, & current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. A mandatory leadership lab complements this course by providing advance leadership experiences, giving students the opportunity to apply the leadership and management principles of this course.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFROTC 1016 - NATIONAL SECURITY FORCES
Minimum Credits: 3
Maximum Credits: 3
This course is the second of two semester sequence surveying key issues of U.S. National security. The second semester focuses on the soviet union and major regional issues of importance to U.S. National interests. It also includes instruction on the military as a profession, Officership, and the military justice system.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

Africana Studies

AFRCNA 0025 - YORUBA 1
Minimum Credits: 4
Maximum Credits: 4
The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0026 - YORUBA 2
Minimum Credits: 4
Maximum Credits: 4
At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language. To recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0031 - INTRODUCTION TO AFRCNA STUDIES
Minimum Credits: 3
Maximum Credits: 3
This is a survey course for Africana studies. An Afrocentric approach will be used to review the eight basic subject areas of the multidisciplinary focus; black history, black religion, black creative productions, black politics, black economics, black social organizations, black psychology and black education. Two alternative views will be pursued; a theoretical review of the literature and a summation of the practical experiences of black life.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0032 - YORUBA 3
Minimum Credits: 3
Maximum Credits: 3
The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.
Academic Career: UGRD

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0033 - YORUBA 4

Minimum Credits: 3
Maximum Credits: 3
At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0045 - SOCL HISTORY AFRCN AMER IN PGH

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to document the social history of the black community in Pittsburgh. The primary concern is to understand and to analyze the development of the black community in relation to Pittsburgh and the United States.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0120 - AFRICAN AMER EXPERIENCE SPORTS

Minimum Credits: 3
Maximum Credits: 3
This course examines blacks in sports. It focuses on sport as a microcosm of the larger society and also addresses sport's relationship to politics, economics, race relations, and South African apartheid. It looks at the history of blacks in sports as well as three aspects of sports that appear to be racially biased; position allocation, performance differentials, and rewards and authority structure.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0127 - INTRODUCTION TO AFRICA

Minimum Credits: 3
Maximum Credits: 3
Multidisciplinary introduction to Africa emphasizing the richness, diversity and dynamism of the African experience and presented through lecture discussions of culture, social structure, history, economy, politics and other aspects of Africa's development.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0150 - AFRICAN AMERICAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Introduction to black American literature from its oral traditions to the written form from the 18th to 20th century interrelated to historical social and political movements. Minimum Credits: 3
Maximum Credits: 3
This course provides an understanding of the social, political cultural and economic context out of which black social movements developed. The main themes of the course concern migration, class differences, racism, and gender relations. The social movements the course examines includes, the Marcus Garvey movement, father divine, labor organization and the black women's club movement.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1021 - HISTORY OF THE AFRCN DIASPORA

Minimum Credits: 3
Maximum Credits: 3
History of the African diaspora focuses on the historical processes that have shaped, & continue to shape the peoples cultures of the African diaspora. It examines the triangle relationships between the African homeland & its American & European diaspora. Attention will be given to an understanding of the manifold circuits in the trans-Atlantic circulation of peoples, ideas & culture. The dynamism, complexity & global ramifications of the African diaspora will be revealed through discussions of important themes, including race, economic systems & construction of diaspora ID's.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1025 - HIST/MUSIC AFRC & THE DIASPORA

Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course focuses on the interrelation ship of history and music in the orally-based cultures of Africa; its diaspora. Using oral traditions and recorded music, the course will demonstrate first, how history can be used to interpret music and how music in turn is a medium for disseminating historical information, and second, how the interrelationship between history and music informs politics, religion, theater and other areas of black life.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1026 - AFRCN PRSEN LAT AMERN LIT/CULT

Minimum Credits: 3
Maximum Credits: 3
This course is a chronological and topical introduction to afro-Latin American culture, making use of literary texts, historical documents, feature films, etc. It aims at providing students with a concrete frame of reference for the African presence in Latin America.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1030 - AFRICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
A general introduction to African politics at macro level for freshmen and sophomores with special focus on traditional African political system, European imperialism in Africa, African nationalism, independence and post-independence problems of nation-building and economic development.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1033 - AFRCN AMERICANS AND MASS MEDIA

Minimum Credits: 3
Maximum Credits: 3
This course is a critical analysis of mass media content as it pertains to black Americans. The primary media are newspapers, radio, and television. For comparative purposes, media content related to children, other minorities, and women are used.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1039 - HISTORY OF CARIBBEAN SLAVERY

Minimum Credits: 3
Maximum Credits: 3
Today's sounds and tastes of the Caribbean from reggae and salsa music to dishes like mofongo and jerk chicken have deep historical roots in slavery. The Atlantic slave trade transported over four million Africans to the Caribbean ' eight times the number that arrived in the United States. How did Africans and their descendants persevere under the colonial slave system? How does the legacy of slavery present itself in the 21st century? This course explores these questions by examining the Caribbean from the perspectives of enslaved women and men from the 17th through the 19th centuries, particularly in Cuba, Haiti, and Jamaica, and their contemporary manifestations in films, policies, and national identities

Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1043 - CONTEM AFRCN AMERICAN DRAMA 2

Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of black contemporary drama 1. This is an advanced level experimental studio performance course, with emphasis placed on textual analysis of scripts for both directing and acting, with movement toward street theatre performances. Some attention will be given to radio and television acting. Major focus is placed upon the review of the current literature on film acting and directing.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1046 - AFRICAN POETRY

Minimum Credits: 3
Maximum Credits: 3
Examination of the important streams that make up African poetry in several languages. Emphasis on the oral tradition, the negritude poets, and nineteenth century British Influences. Several critical texts and anthologies will be used including those by Chipasula, Chinweizu, Okpewho and Soyinka.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1071 - SPECIAL TOPICS IN CULTRL ANTH

Minimum Credits: 1
Maximum Credits: 4
This course will be on a topic in the area of specialization description of a visiting scholar yet to be determined.
Academic Career: UGRD
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

AFRCNA 1083 - SPEC TOPICS AFRICANA STUDIES

Minimum Credits: 3
Maximum Credits: 3
The study of a special topic in Africa studies. Content will vary from term to term, depending on instructor.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

AFRCNA 1103 - FEMALE PLAYWRIGHTS BEFORE 1959

Minimum Credits: 3
Maximum Credits: 3
This course will discuss the plays written by black female playwrights prior to Lorraine Hansberry.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1108 - AFRICAN AMERICAN FOLK CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course will explore several aspects of African American folk culture being defined as non-elite expressions of art, music, dance, theatre, literature, humor, material culture, and religious beliefs. Particular attention will be given to the role of folklore in the perpetuation and transmission of shared cultural knowledge among blacks in the United States.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1137 - 19TH CENTURY AFRICAN AMER HIST

Minimum Credits: 3
Maximum Credits: 3
An examination of the intellectual and social history of black people in the United States between 1817 and 1861. It discusses the life and contributions of the major black political milieu out of which these leaders emerged. This approach will require an examination of the demographic and socio-economic characteristics of black population concentrations throughout the USA during the ante-bellum years in the 19th century.
Academic Career: UGRD

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1145 - AFRICAN AMERICAN RHETORIC

Minimum Credits: 3
Maximum Credits: 3
The purposes of this course are a historical-critical review of scholarship in black American rhetoric; and a theoretical-conceptual framework for the study of black American rhetoric. This course places considerable emphasis on the African roots of black American rhetoric, but the ultimate concern is with black Americans' behavior. The course covers consequences of African and European inter actions in America, factors that forged the distinctive aspects of black American rhetoric, the effects of culture, racism, colonialism, and social class on communication.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1150 - CONTEM AFRCN AMERICAN WRITING

Minimum Credits: 3
Maximum Credits: 3
Writers in the period spanning the civil rights and black nationalist-humanist movements became a vanguard voice for black people. This course explores the written language of the period as an aid to the creation of student writings. As such, this course is a workshop and continuation of black creative writing on a higher level.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1201 - GLOBAL DIASPORAS

Minimum Credits: 3
Maximum Credits: 3
What do Akon and Rihanna have in common? They are both part of recent diasporas from Africa and the Caribbean. This course focuses on the issues and experiences of people of African descent in contemporary (20th and 21st centuries) migratory diasporas from both Africa and the Caribbean. The course draws on extensive literature on migration, transnationalism, racial and ethnic identity formation, health, and other topics to illuminate the causes for migration and the experiences that migrants have in different host countries. What experiences do migrants from Africa and the Caribbean share? How do their experiences differ? How do migrants define themselves in new host countries? How do they stay connected to their homelands?
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

AFRCNA 1223 - PERSNL GROWTH THRGH PSYCHODRAM

Minimum Credits: 3
Maximum Credits: 3
This course includes the 5 philosophical concepts, the six operational elements, the format, the procedure and processes, and the basic techniques and strategies of psychodrama as developed by J.L. Moreno. Another aspect of the course is the examination of theories and of current research on the use of psychodrama sociodrama and as a teaching strategy.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Inquiry into significant aspects of contemporary African social, political, cultural and human problems approached through the detailed study of representative African novels, plays and poetry written by African authors.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1306 - WORLD LITERATURE IN ENGLISH

Minimum Credits: 3
Maximum Credits: 3
This course examines contemporary literature, primarily in English, written in eastern Europe, Africa, Latin America, etc. It pays particular attention to its depiction of social, political and moral concerns.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

AFRCNA 1309 - WOMN OF AFRC & AFRCN DIASPORA

Minimum Credits: 3
Maximum Credits: 3
A cross-cultural study of women of African descent in West and southern Africa, the United States, brazil, and the Caribbean.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1310 - CULTURES OF AFRICA

Minimum Credits: 3
Maximum Credits: 3
This course explores the traditional cultures and societies of Africa from prehistoric to modern times. Emphasis is on the conditions prior to contemporary changes but some attention is given to modern developments. Concern is with the variety of cultures on the continent. How people make a living. What family life is like? How disputes are settled, and religion. Through lectures, films, and readings, the student gets a feeling for life in this fascinating part of the world.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1331 - AFRICAN LIBERATION MOVEMENTS

Minimum Credits: 3
Maximum Credits: 3
A course on the theories of revolution and national liberation struggles, decolonization and guerrilla warfare, and their special application to continental African experience since the end of World War II.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1334 - MUSIC IN AFRICA

Minimum Credits: 3
Maximum Credits: 3
The historical, social, and cultural background of music in Africa with particular reference to music in community life, performing groups, the training of musicians, instrumental, resources, structures in African music and the interrelations of music and dance. (Slides, films and recordings will be used to illustrate lectures.)
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1335 - AFRICAN-AMERICAN MUSIC IN U.S.

Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize the student with various phases of African-American music existing in North America; blues, gospel-spirituals, work songs, children's games songs, and classical compositions of ragtime composers Scott Joplin, J.P. Johnson, etc. Students will conduct field projects centered around street recordings, locations, interviews of local and visiting artists, etc." A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1347 - FRANCOPHONE AFRCNA LITERATURE

Minimum Credits: 3
Maximum Credits: 3
An examination of the cultural, social, and political relationships of French-speaking African and the Caribbean as reflected through different genres from the 1900's. Reading poetry, folklore, and novels produced by African writers sheds light on the issues confronting them such as polygamy, urbanization, assimilation, rituals, and the marginal man and woman.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1349 - CONTEM CARIBBEAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Study the fiction, poetry, and drama of the English Caribbean in chronological order. Exile, liberation, autonomy, the female voice, cultural, and political identity will be examined in writing from Jamaica, Trinidad, Grenada, Antigua, and Guyana with recordings and films.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1353 - COMPARATIVE DANCE EXPRESSION

Minimum Credits: 3
Maximum Credits: 3
This course will examine the cultural patterns of black dance styles and the similarities and differences in the motor behaviors among blacks in dance from South America, the Caribbean islands, Africa, and North America. Contents of the course will be introduced through films, lecture and videotapes.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1383 - CONCEPTS IN AFRCN AMER THEATER

Minimum Credits: 3
Maximum Credits: 3
A review of the literature and ideas on and about black theater in North America. A study of the implementation of those concepts thru the works of playwrights, theater historians and scholars, directors, actors, and institutions which have sought to house the concepts. One of the goals is to show the vigor, vitality and vigilance of black theater.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1402 - LRNG PARDGMS AFRC-AM CHLD DVLP

Minimum Credits: 3
Maximum Credits: 3
To examine systemic factors which affect the cultural, social, emotional, and cognitive development of black children.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1415 - RACE AND RELIGION IN AMERICA

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

AFRCNA 1420 - POWER & PERFORMANCE IN AFRICA

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: Letter Grade

AFRCNA 1454 - AFRICNA DANCE WRKSHP CHRGRPHY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to acquaint non-dancers and dancers with dance techniques and styles developed by choreographers such as Alvin Ailey, Eleo Pomare, Rod Rogers, Pearl Primus, Arthur Mitchell and Katherine Dunham. The theoretical and practical aspects of choreography will be introduced through lecture, audio visuals and demonstration.
Academic Career: UGRD
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

AFRCNA 1522 - SEX AND RACISM

Minimum Credits: 3
Maximum Credits: 3
Sex and racism affords an opportunity to explore sex, sexism, and racism, to examine the historical development and economic impact of racism in America, to analyze the conceptual framework, the research methods, and approaches from which past and current studies on sex, sexism racism, have been and are being developed. The course will also explore sex and racism as a multi-dimensional continuum, and solutions to sex and racism.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1538 - HISTORY OF BLACK PITTSBURGH

Minimum Credits: 3
Maximum Credits: 3
This course will explore the role and experiences of black Pittsburghers over the past 200 years of the city's history.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1555 - AFRO CARIBBEAN DANCE

Minimum Credits: 3
Maximum Credits: 3
This course will focus on Katherine Dunham as an ethnologist and choreographer politically, socially, and aesthetically. The course discussion will clearly define the contents of Dunham's dance research and life experiences of Haiti.
Academic Career: UGRD
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

AFRCNA 1605 - AUGUST WILSON DRAMAS

Minimum Credits: 3
Maximum Credits: 3
This course is intended to critique the plays of August Wilson and his source of inspiration - the blues.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1616 - AFRICAN AMERICAN WOMEN WRITERS

Minimum Credits: 3
Maximum Credits: 3
An inter-or-cross genre study of the African North American experience thru selected readings in novels, poetry, drama, short stories, and the essay (religious, secular and philosophical).
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1620 - AFRICAN AMERICAN LIT CRITICISM

Minimum Credits: 3
Maximum Credits: 3
This course affords the study of content and African American literary research and criticism from web. Dubois, Alain Locke, Sterling Brown to Nick Arron Ford, Deborah McDowell, Barbara Smith and Hazel Carboy. Some attention will be paid to the history of ideas, to bibliographical and textual criticism to the historical development of black literary criticism and to the commonly employed approaches of literary historians and critics of black writers in America.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1644 - THE AFRICAN NOVEL

Minimum Credits: 3
Maximum Credits: 3
The novels studied will be drawn from several parts of the African continent and will all be available in English or translation. The emphasis will be on recurring themes in the works and on the influence of traditional African narrative forms.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1655 - AFRICAN CINEMAS/SCREEN GRIOTS

Minimum Credits: 3
Maximum Credits: 3
Ousmane Sembene, known as the father of African cinema, popularized the notion of the African director as the modern day griot (oral historian) and traditional storyteller. Therefore, this course is an introduction to a cross-section of post-independence films (1963-2004) as an art form and as a visual space on socio-political, economic and cultural topics by screen griots from Burkina Faso, Cameroon, and chad, the democratic republic of the Congo, Ethiopia, Niger, Nigeria, Senegal, South Africa and Zimbabwe.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

AFRCNA 1656 - HISTORY OF AFRICA SINCE 1800

Minimum Credits: 3
Maximum Credits: 3
Surveys history of Africa from 1800 to the present day. Major themes include African statecraft, European colonization, African nationalism and post-independence problems. Processes of African institutional growth within the perspectives of resiliency, change and adaptation will be emphasized.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1661 - POLITICAL ECONOMY OF AFRICA

Minimum Credits: 3
Maximum Credits: 3
An inquiry into the process of political and economic development in Africa from colonial domination to the present. Problems of economic dependence and integration into the global capitalist economic system are examined.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1704 - AFRICANA WORLD LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Despite their geographical and cultural differences, writers from Africa, the Caribbean, and the United States undergo similar experiences of oppression. Problems of self-identity, and the quest for self-respect. These similarities will be discussed in class along with a comparative approach to the texts with supplementary films, slides, and recordings.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES

Minimum Credits: 3
Maximum Credits: 3
Course will focus on black health issues from analytical, theoretical and practical perspectives. These perspectives will be introduced through cross examination of health topics which are critical to the black population, the developing of health policies and conceptual models for health promotion and disease prevention.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1711 - THE CITY IN AFRICA

Minimum Credits: 3
Maximum Credits: 3
Course examines the urban experience in Africa, beginning with ancient Nile Valley civilizations. In spite of this antiquity, colonial discourse and administrative practices created the notion of rural tribesmen whose presence in cities was unnatural and corrupting. We investigate this moral contrast between town and country as it persists today in the popular imagination, serving as a potent critique of possibilities and perversities of African modernity. We consider prospects and contributions of a distinctly African solution to problems of globalization, the informal city"."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1715 - HISTORY OF SOUTHERN AFRICA

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

AFRCNA 1720 - WEST AFRICA/ERA OF SLAVE TRADE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1725 - EAST AFRICA ISSUES

Minimum Credits: 3
Maximum Credits: 3

Academic Career: UGRD
Course Component: Seminar
Grade Component: Letter Grade

AFRCNA 1760 - AFRICANA THEORY & METHODOLOGY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: Letter Grade

AFRCNA 1768 - AFRCNA SENIOR RESEARCH SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This course will assist the student in conducting a research project of her choice. The student will select a topic, write a proposal including the statement of a question or hypothesis, a list of the goals and objectives. A design of the methodology and a review of the relevant literature.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

AFRCNA 1900 - INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
This course offers the student an opportunity to extend his/ her academic training to a practical work experience in the city of Pittsburgh.
Academic Career: UGRD
Course Component: Internship
Grade Component: Satisfactory/No Credit

AFRCNA 1901 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
Students desiring to take an independent study should develop a typed proposal on a specific topic outlining the substance of the work, the objectives, the methodology, and the evaluation by which to determine when the objectives are met.
Academic Career: UGRD
Course Component: Independent Study
Grade Component: Letter Grade

AFRCNA 1902 - DIRECTED READING
Minimum Credits: 1
Maximum Credits: 6
This course introduces the students to a specific topic which is not normally taught in an Africana studies core course. It is an individual project administered under faculty supervision.
Academic Career: UGRD
Course Component: Directed Studies
Grade Component: Letter Grade

AFRCNA 1903 - DIRECTED RESEARCH
Minimum Credits: 1
Maximum Credits: 6
This is an individual research project/course under the supervision of a faculty member. Theoretical and conceptual interest in the emerging discipline of Africana studies and the black experience offer students dynamic, creative and intellectual avenues into new areas for discovery.
Academic Career: UGRD
Course Component: Directed Studies
Grade Component: Letter Grade

Anthropology

ANTH 0501 - ARCHEOLOGY: AN OVERVIEW
Minimum Credits: 3
Maximum Credits: 3
Designed for non-majors, this course presents a broad introduction to the goals and techniques of today's archeology through readings, videos, and short exercises. The course reviews global human prehistory from the earliest appearances of human ancestors some 4 million years ago through the development of the Ancient Egyptian, Mayan, Chinese, and Inca Civilizations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0534 - PREHSTRC FDS OF EURPN CIVILZTN

Minimum Credits: 3
Maximum Credits: 3
Neanderthals, ice-age art, Indo-European languages, Stonehenge, megaliths, Celts, and more; the major archeological discoveries, from the first traces of human occupation of European soil up to the early middle ages, will be covered through illustrated lectures, films, and perhaps museum visits. Course also offers a basic introduction to the discipline of archeology, thus serving as preparation for other courses in the subject; it also serves as a useful foundation for studies in history, ethnic history, art history, and classics.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0536 - MESOAMERICA BEFORE CORTEZ

Minimum Credits: 3
Maximum Credits: 3
When Cortez and his Spanish soldiers arrived in Mexico, they found Indians living in large cities with impressive temples raised on tall pyramids, lavish palaces for rulers, elaborate markets, and skilled craftsmen working in gold, copper, feathers, stone, pottery, and other materials. They were astonished at a civilization so like their own and yet so different (so barbaric" to European eyes). This course explores the development of this civilization back to its roots several thousand years ago, by reconstructing earlier cultures known only from archeological evidence."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0538 - THE ARCHELOGST LOOKS AT DEATH

Minimum Credits: 3
Maximum Credits: 3
Pyramids, tombs, burial mounds, graves, skeletons, mummies; the stuff of gothic romance. But the way people disposed of their dead also tells us an amazing amount about life in the past. We will look at the wide range of burial practices in the world, including the American way of death", and then concentrate on the physical remains themselves. What do burial practices indicate as to beliefs, rituals, religion and society?"
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0582 - INTRODUCTION TO ARCHEOLOGY

Minimum Credits: 3
Maximum Credits: 3
Examines the nature of modern archaeological research. Lectures look at how archaeologists work in the field, their analytic techniques, and some of the principal methodological and theoretical problems facing the field. Specific examples are used to illustrate these topics.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0601 - PHYSICAL ANTHROPLGY: OVERVIEW

Minimum Credits: 3
Maximum Credits: 3
Designed for undergraduate non-majors, this course will provide a basic introduction to the issues, theories, and methods of physical anthropology. Beginning with a consideration of evolutionary, genetic and geologic principles, the course goes on to consider the diversity of fossil and extant primates, including humans. Issues in anatomy, paleontology and behavior will all be addressed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0611 - INTRODUCTION TO NEO-DARWINISM

Minimum Credits: 3
Maximum Credits: 3
This natural science course explores why organisms are the way they are, in terms of the most powerful available theory, Darwin's evolution by natural selection. Mendelian and molecular genetics are discussed, as in gene action. Against this background, we build up a detailed argument for evolution starting with Darwin's original principles. Emphasis is placed on current debates such as: levels of selection, neutralism, punctuationism, cladistic taxonomy, and the origin of life.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0620 - BIOCULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course is an introduction to general anthropology emphasizing the interaction of human biology and behavior. The course considers what it means to be human by examining the biocultural interface of both present and past human populations. Topics of discussion will include human adaptation to extreme environments, cross-cultural variations in infant sensorimotor development and biological and cultural diversity in general. An understanding and appreciation of the how's and why's of human biological and cultural variation will be stressed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0630 - FORENSIC ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0645 - INTRODUCTION TO HUMAN BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Human biology deals with the nature and growth of human populations, human growth and development, human ecology and physiology, and the adaptation to various hostile environments that humans have made. This is an introductory course which places these topics in the framework of the study of human origins and the environments that our ancestors may have encountered in their evolutionary history. The emphasis is on morphologic variability.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0646 - INTRO TO EVOLUTIONARY THEORY

Minimum Credits: 3
Maximum Credits: 3
This is a survey course on the history and development of evolutionary thought, culminating in the present-day models of evolutionary processes. We will emphasize past and present developments, debates, and controversies in, e.g. Genetics, geology, paleontology, and systematics.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0655 - SOCIOBIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course analyzes behavior, and social behavior in particular, from a Darwinian perspective. It is intended for students with no college training in biology, and begins by developing the basics of modern evolutionary and genetic theory. The implications of these theories for our explanations of animal and human behavior are then explored.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0669 - SEX AND EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
This course analyzes sexual phenomena from a Darwinian perspective. It is intended for students with no college training in biology, and begins by developing the basics of modern evolutionary and genetic theory. These theories are then applied in analyzing a series of problems relating to sex; why did sexual reproduction evolve; how does evolution maintain the sex ratio; what are female" and "male", and to what extent will evolution foster differences between the two; what kinds of mating and parental strategies have evolved?"
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0680 - INTRO PHYSICAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce the undergraduate to the issues, theories and methods of physical anthropology. Beginning with a consideration of evolutionary, genetic and geologic principles, the course goes on to consider, the diversity of fossil and extant primates, including humans. Issues in anatomy, paleontology and behavior will all be addressed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0681 - INTRODUCTION TO HUMAN EVOLUTN

Minimum Credits: 3
Maximum Credits: 3
This is an introduction to human evolution and, in general, the evolution of the larger group to which we belong, the order primates. We will survey first the development of evolutionary ideas and modern developments in biology and geology and then review the diversity of living and fossil primates, dwelling especially on the discoveries and controversies surrounding our own evolutionary past.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0701 - CULTURAL ANTHROPLGY: OVERVIEW

Minimum Credits: 3
Maximum Credits: 3
Designed for undergraduate non-majors, this course will provide a broad introduction to cultural anthropology. This course examines the behavior and customs of peoples throughout the world and considers what it means to be human. We will consider patterns of marriage, family organization, gender, political behavior, economic systems, rituals, etc., Of other peoples and compare these with American social patterns.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0710 - SPEC TOPICS IN CULTRL ANTHRO

Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0712 - INTRO TO CULTURAL GEOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
A systematic study of the spatial dimension in human cultures. In succession we examine human populations through the millennia, agricultural systems, political systems, languages, religions, folk and popular cultures, urban systems, industry, and transportation networks. Geography" is conceived as the study of human impact on the earth and of the ecological relationships between humans and the natural world."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0715 - ANTHROPOLOGY OF LATIN AMERICA

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to offer students a basic yet comprehensive survey of the anthropology (including history, archeology and geography) of Latin America. This survey course will emphasize the development of Latin American societies and cultures since the European conquest, and focus on key issues/themes that have consistently surfaced in Latin American cultural anthropology and that have continuing priority, relevance and interest up to the present. This course is especially tailored to freshmen students with little or no knowledge of Latin America.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0716 - ANTH OF LATIN AMERC PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Special recitation attached to anthropology of Latin America (ANTH 0715) taught in Spanish for 1 credit. This recitation is taken in addition to the other recitation attached to the course. This course is offered in conjunction with ANTH 0715, Anthropology of Latin America. It is a supplementary, one-credit Spanish-language recitation, where issues raised each week in ANTH 0715 will be discussed in greater detail in a Spanish-immersion format. This practicum offers an opportunity for students to utilize, reinforce, and deepen the skills they have acquired in foreign language courses. We will listen to Latin American music, read primary sources from political manifestoes to poetry, and generally enrich our understanding of Latin America's diverse past even as we improve our Spanish-language conversational fluency. This practicum is a great option for students hoping to study abroad in the future.
Academic Career: UGRD
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

ANTH 0717 - MAGC, WTCHCRAF & SUPRNATRL BDY

Minimum Credits: 3
Maximum Credits: 3

Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

ANTH 0720 - FOLKLORE & CULTURAL DIVERSITY

Minimum Credits: 3
Maximum Credits: 3
The main objectives of this course are threefold: 1) to introduce students to the subject matter, methods and theories of folklore as they relate to sociocultural anthropology; 2) to create greater awareness and appreciation of folklore and its connection to cultural diversity in our everyday lives; 3) to promote deeper understanding of the ways in which folklore is embedded within wider social and cultural contexts of power and resistance.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0730 - HIMALAYAN GEOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
The Himalayan region is characterized by a tremendous range of social and cultural diversity that corresponds to climatic, ecological and geographical variation, as well as local and regional geopolitical factors. Historical change from the emergence of early forms of social complexity centered on chiefs and their forts ' from which the regional designation of 'Garhwali' takes its name ' through the development of kingdoms and larger polities shows the intimate link between geography, environment and socio-political transformation. Similarly, local language patterns, regional religious practices, musical styles, mythology, food culture, sartorial fashion, architectural design, agricultural and transportation technologies and engineering and trade networks have all been shaped by the structure of Muntain barriers, bounded valley communities and bracketed lines of communication that follow river systems. Whereas the political economy of the Himalayas has been structured around agricultural production, and the development of elaborate field terrace systems, there have also been subsidiary economies centered on trans-Himalayan trade and pilgrimage as well as pastoral nomadism and transhumance. Since the colonial period, the Himalayas have increasingly become a place for rest, relaxation, tourism and adventure, and this ' along with further political transformations since Indian independence `has led to the rapid development of urban areas. This course will provide a survey of Himalayan history, society and culture with a focus on the relationship among nature, the environment and geography.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0768 - HUMAN SEXUALITY IN CROS CULTUR

Minimum Credits: 3
Maximum Credits: 3
This course explores the expression of human sexuality across a diversity of cultural and social settings using a cross-cultural framework that is based on comparing information on sexuality in other cultures with data from us. It includes how human groups manage sexuality and reproduction; theories of the development of marriage, family, and household systems; differences in values and expectations related to sexuality; the development as sexual expression across the life span; understanding heterosexual and homosexual relationships; and understanding sexual violence.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 0780 - INTRO TO CULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
By examining the behavior and customs of peoples throughout the world, the course considers what it means to be human. We will describe the patterns of marriage, family organization, warfare and political behavior, economic systems, rituals, etc., Of other peoples, especially those of tribal societies, and compare these with American social patterns. Anthropological films and slide presentations will supplement lectures.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0785 - MATHEMATICS AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the role of mathematical ideas in various cultural settings. It focuses on the use of math in everyday life.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1083 - JAPANESE CULTURE

Minimum Credits: 1
Maximum Credits: 1
This one credit course on Japanese society, culture and history accompanies a course on basic Japanese language, though either the language or

culture course can be taken independently of one another. A series of lectures by distinguished experts on such topics as the Japanese economy, history, family, politics, business, theatre, religion, literature, education and fine arts is given.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1440 - LANG AND PREHIST IN MESOAMERC

Minimum Credits: 3
Maximum Credits: 3
Mesoamerica is well-known linguistically, and its linguistic prehistory is rather well understood. Archeological research has achieved knowledge in great detail for many key areas. Ethnohistorical sources in native languages abound. The integration of linguistic, archeological, and ethnohistorical knowledge can yield a detailed picture of the area's culture history. We will survey the ethnolinguistic history of MesoAmerica from 5000 BC to 1500 ad. Attention will be given to the ethnic associations of archeological cultures.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3
Maximum Credits: 4
This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of non (indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethnosemantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.
Academic Career: UGRD
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: LING 1578 and 1773 and 1777; LVL: Sr

ANTH 1442 - MAYAN LANGUAGES AND CULTURES

Minimum Credits: 3
Maximum Credits: 3
The 30 Mayan languages of southern Mexico, Guatemala, and Belize are among the best documented languages of MesoAmerica; they are ergative, and have both passives and antipassives. The results of comparative study of Mayan languages surpass those for any other MesoAmerican family. Some Mayans had pre-Columbian writing, and this writing system is currently being deciphered. Mayan society has been well studied by ethnographers, and ethno historical sources are numerous and valuable. Beside these topics, ethnographically meaningful texts in two Mayan languages.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1443 - AMERICAN INDIAN LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
Of over 1000 different languages spoken by native Americans in 1492, about 600 survive, most spoken by small numbers, although many populous Amer-Indian ethnic groups are found in MesoAmerica and the Andes. This course will survey the language families of the new world, and study the grammar and ethnographic texts of two languages. The results of historical and comparative research on Amer-Indian languages will be studied, particularly as they relate to the culture history of their region. We will also study pre-Columbian writing, literature and efforts at cultural maintenance.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1444 - GYPSY LANGUAGE AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
Romani is spoken by more than 10,000,000 gypsies living in Europe and the Americas. They left their homeland in India over 2000 years ago, entering Europe around 1200 ad. Their unfriendly reception has made them shy and hard to know. Misunderstanding and misinformation on gypsies are abundant. This course will focus on reliable ethnographic descriptions from Europe and North America, and the language and folklore of one or more branches of the Romani nation. The history of the gypsies as discernible in their language and written records will also be studied.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1447 - LANGUAGE, CULTURE, AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Certain cultural concerns are well-labelled linguistically: kinship, plant-names, diseases, colors, etc. The study of how such semantic fields are labelled and organized is ethnosemantics. Much of the way language is used depends on the context of speaking. Different ways of talking to different people is the subject matter of sociolinguistics. Some thoughts that we habitually think seem illogical on reflection, but it seems as if our language predisposes us to think this way. Such phenomena are addressed by the Sapir-Whorf hypothesis.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1448 - AZTEC LANGUAGE AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
The Aztecs spoke Nahuas, as did the Toltec's before them. One million present-day Nahuas still speak the language and practice an Amer-Indian culture. The Nahuas language is the best-documented of all native American languages, from the 16th century to the present. The ethnohistorical sources in Nahuas and on late pre-Columbian culture are unsurpassed in scope. All the writings in Nahuas make up a small library. In this course we will study the grammar of Nahuas, read ethnographic texts from the 20th and 16th centuries, and trace the culture history of the Nahuas-speaking peoples.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1450 - GENDER AND SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: Letter Grade

ANTH 1466 - TOPICS IN ANTHROPOLOGICAL LING

Minimum Credits: 3
Maximum Credits: 3
This is a seminar for the investigation of anthropological linguistic topics of interest to the professor and students. Topics covered might include ethnobotany, ethnozoology, ethnomedicine, ethnopsychology, kinship terminology, diffusion of artifacts/cultigens and their names, and many others. Methodology will vary with topic.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1520 - SEDIMENTOLOGY AND STRATIGRAPHY

Minimum Credits: 4
Maximum Credits: 4
The first part of this course involves the description of sedimentary particles and deposits using the fundamental properties (composition, size, shape, orientation and packing) and derived properties (porosity, permeability and sedimentary structures). Included is a discussion of the processes related to these properties. The second part reviews modern sedimentary environments and their rock products. Finally, principles of stratigraphy are introduced.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 0055

ANTH 1521 - GEOARCHEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is an examination of geological methods applied to the study of archeology. The first part of the course examines locations of sites by familiarization with the physical environment, maps, and air photos. Second, characteristics of site sediments and artifacts are examined with emphasis on stratigraphic principles. Finally, specific sites selected from different environmental settings are discussed. Field and laboratory methods applicable to study of archeological materials and sites are introduced wherever Germane.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1522 - EUROPE IN LATER PREHISTORY

Minimum Credits: 3
Maximum Credits: 3
From the end of the ice age to the early middle ages: the establishment and development of agriculture, metallurgy, and the first cities.

Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1523 - EUROPEAN ARCHELGY: THE ICE AGE

Minimum Credits: 3
Maximum Credits: 3
Course includes the following topics: (1) history of discoveries and of the discipline of archeology; (2) the role played by archeology in the development of the concepts of prehistory and of human evolution; (3) introduction to pleistocene geology, and the effects of the changing environment of human life; (4) the first human traces to the late pleistocene cave sites (France, Spain) and open-air encampments (especially on the Russian Plain); (5) the beginnings of artistic and symbolic behavior, and their significance.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1524 - CHINESE ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
An introduction to Chinese Archeology from the earliest known beginnings through the Han Civilization of the second century A.D. Attention will be given to innovations of people in this part of the world -- the agricultural beginnings, the first cities and states, the formation of an empire. Emphasis will be placed on such topics as the role of archeology in the study of history and art as well as in understanding china today.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1525 - EASTRN NORTH AMERCN ARCHEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course deals with cultural development in the eastern United States from approximately 20,000 years ago to the period of European contact. Particular attention will be paid to man's adaptation to late pleistocene and holocene environments, the initial occupation of the region East of the Mississippi, the origins of agricultural systems and the rise of complex societies, including the Adena, Hopewell, and Mississippian manifestations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1526 - WESTERN NORTH AMERCN ARCHELGY

Minimum Credits: 3
Maximum Credits: 3
The prehistory of Western North America is examined in detail from the initial peopling of the area to the period of historic contact. Special emphasis is given to the Paleo-Indian and archaic techno/subsistence stages in the arid portions of the West.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1527 - ARCLGY OF NORTH AMER INDIANS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course deals with cultural development in South America from 20,000 B.C. To Spanish contact. Emphasis will be placed on the earliest evidence for man, maritime adaptations, and origins of agriculture, rise of the state in the Central Andes and the rise of complex societies in the tropical forest. Stress will be placed on the evolution of Andean states including the origins and spread of the Chavin, Moche, Nasca, Tiahuanco, Chimu and Inca Empires.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1530 - ORIGINS OF CITIES

Minimum Credits: 3
Maximum Credits: 3
A broad introduction to the process of urbanism and the rise of early pre-industrial cities in both the new and old worlds. Specific cases from

MesoAmerica, the Andes, North America, Egypt, and the near East are examined in order to elucidate the varying roles cities played in ancient civilizations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1531 - MUSEUM PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Students will work in the archaeology laboratories and collection (ethnographic and archaeological) areas of the division of anthropology, the Carnegie Museum of Natural History research facility under the supervision of the anthropology staff.
Academic Career: UGRD
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

ANTH 1532 - PREHISTORIC ART AND SYMBOL

Minimum Credits: 3
Maximum Credits: 3
Course will focus on the animal art of the ice-age cave painters and on later rock art, on images of the human female throughout prehistory, and on questions of method and theory.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4
Maximum Credits: 4
An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1535 - BASIC ARCHELOGCL FIELD TRAING

Minimum Credits: 6
Maximum Credits: 6
The university of Pittsburgh field training program in archaeology is conducted at various locations. Features of the excavations include basic training in mapping, archaeological survey, excavation methods, soil analysis, data recording, and preliminary artifact analysis.
Academic Career: UGRD
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

ANTH 1535IS - ARCHELOGCL FIELD SCHOOL - IS

Minimum Credits: 0
Maximum Credits: 0
Non-graded course for in-state tuition.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

ANTH 1535OS - ARCHELOGCL FIELD SCHOOL - OS

Minimum Credits: 0
Maximum Credits: 0
Non-graded course for out-of-state tuition.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

ANTH 1536 - PALEO-KITCHEN

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1537 - BASIC LABORATORY ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This is a follow-up course for anthropology 1534 basic field methods in archaeology. In anthropology 1537, students who have participated in the summer field training program will be instructed in the Methodology of Artefactual and Non-Artifactual analysis. All data recovered during the summer field training program will be processed by the students under the supervision and direction of the instructor. Special emphasis will be placed on lithic and perishable analysis as well as paleo-climatic reconstruction and quantitative methods.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1538 - ADVANCED LABORATORY ANALYSIS
Minimum Credits: 3
Maximum Credits: 9
This course is a continuation of anthropology 1537-basic laboratory analysis.
Academic Career: UGRD
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

ANTH 1539 - ANCIENT MAYA
Minimum Credits: 3
Maximum Credits: 3
Examines the growth of ancient Maya civilization over two thousand years from the first millennium B.C. To the Spanish conquest in the sixteenth century A.D.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1540 - SPECIAL TOPICS IN ARCHEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Topics covered vary greatly with instructor and term.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course will cover in an introductory way all aspects of cultural resource management and historic preservation. Major topics include federal historic preservation legislation, cultural resources (historic and prehistoric archaeology, historic structures), the national register of historic places, section 106 and 110 of the NHPA, historic preservation planning, and state historic preservation plans. Course will utilize historic architectural examples as well as prehistoric and historic archaeological sites. Greater emphasis placed on how to evaluate historic properties for national register.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1542 - ARCHAEOLOGY OF THE OHIO VALLEY
Minimum Credits: 3
Maximum Credits: 3
This course examines from an archaeological perspective, the prehistory and early colonial history of the region surrounding Pittsburgh, the Upper Ohio Valley. Students will gain an appreciation of the rich and diverse array of human occupation of the region which encompasses parts of Pennsylvania, New York, Ohio, West Virginia, and Maryland. This course will be worthwhile to students with an interest in the local past as well as those interested in pursuing careers in archaeology in the Northeastern United States.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1543 - ANCNT STATES IN THE NEW WORLD
Minimum Credits: 3
Maximum Credits: 3
Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among prehispanic states in MesoAmerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.

Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1544 - ANCIENT CIVILIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This course examines the rise and fall of several ancient civilizations. It covers the archaeology and earliest history of regions recognized as significant independent centers for the development of early civilization: Mesopotamia, Egypt, Indus Valley, China, South East Asia, MesoAmerica, and Andean South America. Central themes concern: why and how civilizations first emerge and then collapse; relationships among economic, political, social, and ideological factors in early civilizations; generic versus unique qualities of different early civilizations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1546 - CAVEMAN

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1547 - POTS AND PEOPLE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1548 - AMAZONIAN ARTS: MAKING MEANING

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the arts of the Amazonian region in the context of their function and meaning. The course will be taught as a combination of lecture and hands-on experience working with native potters from the Bobonaza river. Students will learn to make pottery in the Kichwa (Quichua) tradition, and to understand the role of pottery and material culture in the daily lives of people in this region. On a number of occasions, students will accompany the native potters on journeys into the adjacent forest to gather materials and to study the patterns in nature that inspire them. Here students will observe related arts such as face paint patterns, beaded ornaments, ritual singing and storytelling. Carefully selected readings and lectures will use these arts as a window for exploring Amazonian thinking about the natural world behind the designs, and the ways in which the designs can be used to understand patterns of social interaction. Interviews with potters will aid in understanding these arts in the context of daily and ceremonial life. In the process, the arts become a doorway allowing the student to explore Amazonian culture and environment first hand. Comparative material from several other world regions will also be discussed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

ANTH 1591 - HISTORICAL ARCHEOLOGY

Minimum Credits: 3
Maximum Credits: 3
Historical archaeology examines the material culture of societies that are literate. It therefore combines archaeological data with historical information such as tax, deeds, will, probate and other sources to derive a fuller picture of past lifeways. This course exposes students to the archaeology of North America from Viking contacts of ca. 1000 A.D. Through the industrial period. Emphasis is placed on delineating changes in cultural adaptations during this period as a result of culture contact, the development of international trade, and technological innovation.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1600 - HUMAN EVOLUTION AND VARIATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1601 - STRUCTURE AND FUNCTION

Minimum Credits: 3
Maximum Credits: 3

Students will explore the literature of human biology and develop questions and hypotheses regarding undocumented concepts. Each student's goal will be to design a laboratory study which tests the hypothesis he/she has formulated. Areas which might be investigated include locomotion, feeding adaptations, and adaption to various environmental conditions. Students will learn techniques of experimental surgery used to investigate the relationships between structure and function.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1602 - HUMAN SKELETAL ANALYSIS

Minimum Credits: 4
Maximum Credits: 4
This is an introduction to the study and analysis of the human skeleton, which will be based on lectures and lab. Topics include: development of teeth and bone, identification of whole bones and fragments and determination of sex, age, and stature (and other metric analyses), disease, and populational features. Real bony materials will be used in lab.
Academic Career: UGRD
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

ANTH 1603 - HUMAN ORIGINS

Minimum Credits: 3
Maximum Credits: 3
This will be an in-depth look at the history of study of human evolution and the current theories and controversies surrounding the interpretation of our relatedness to the various apes as well as of the fossils representing our evolutionary past.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1605 - PRIMATE ANATOMY

Minimum Credits: 4
Maximum Credits: 4
This course offers a detailed consideration of the anatomy of the primates. It will follow an integrated regional approach (i.e., The back, the upper extremities, the hand, etc.), However, the major focus will be on the musculoskeletal system. Students will dissect human material (cadavers) but emphasis will be on the comparative aspects within the order whenever possible. Other non-human primate skeletal material will also be used.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1606 - FOSSIL AND LIVING PRIMATES

Minimum Credits: 3
Maximum Credits: 3
This is an in-depth survey of all non-human/ape primates, from the potential beginning of the group of mammals to which we belong, primates. We will review all relevant living and fossil primates and deal with issues of their evolutionary relationships, the very origin of primates, and the origin of higher" primate groups."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1607 - PRIMATE BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
This course takes a Darwinian approach to explaining the diversity in contemporary primate behavior and ecology. We stress the comparative method, and seek to develop general principles of adaptation that will explain the taxonomic distribution of particular behavioral and ecological traits.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1608 - COMPAR OSTEOLOGY & ODONTOLOGY

Minimum Credits: 3
Maximum Credits: 4
This will be a survey of the differences among the major groups of mammals (humans included) in structure and shape of their teeth and bones from an evolutionary and systematic as well as practical (i.e. In identification) perspective.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1609 - ADVANCED SKELETAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ANTH 0630 or ANTH 1602

ANTH 1611 - EVOLUTIONARY THEORY
Minimum Credits: 3
Maximum Credits: 3
Intended as a sequel to ANTH 0011, this course explores modern evolutionary theory in detail. Some coverage is given to the history of debates, but more emphasis is placed on their current status. Both phylogentic and adaptive components of the evolutionary process are discussed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1613 - PRIMATE BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1615 - EVOLUTION OF THE VERTEBRATES
Minimum Credits: 3
Maximum Credits: 3
This course is a survey of the various groups of living and fossil vertebrates (animals with backbones) and the various theories on the evolution and diversification (and extinction!) Of the group.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1618 - SPECIAL TOPICS IN SOCIOBIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Each semester a single topic such as sexual selection, human sociobiology or the evolution of sociality will be explored in detail.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1619 - SPECIAL TOPICS IN PHYSCL ANTH
Minimum Credits: 3
Maximum Credits: 3
Topics covered vary greatly with instructor and term.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1708 - SOCIETY, CULTURE, AND POWER IN
Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade

ANTH 1710 - PHILOSOPHY OF ANTHROPOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course studies the nature of anthropological knowledge. Topics covered include: the possibility of a human science; classification, description, and the nature of anthropological evidence; laws and explanation in anthropology; and various forms of relativism.
Academic Career: UGRD

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1711 - ETNBIO AMZNIN RELIGION NATURE

Minimum Credits: 3
Maximum Credits: 3
The course explores Amazonian cultural knowledge of plant and animal species, comparing it to scientific knowledge, to uncover underlying assumptions that constitute a systematic, if implicit, Amazonian philosophy of nature. It also teaches students how to ask key questions and to carry out qualitative research on ethnobiology. Over generations of hunting and gathering Amazonian cultures gained an intimate knowledge of their rainforest environment, the most bio-diverse on earth. Now, more than ever, preservation of that environment depends on improving understanding and cooperation between environmentalists and the native peoples who live there; and upon integrating traditional Amazonian and scientific knowledge of the natural world. The course addresses key ethnobiological questions such as: how do native Amazonian people classify plant and animal species? How do they understand the extinction or the emergence of new species? How do they understand plant and animal behavior? How is plant and animal ecology believed to serve as a model for understanding human society and vice versa? How should human emotions be regulated so as to better work with nature? What aesthetic, emotional or religious practices were developed to create bonds of empathy or communication between human beings and other species? What are the practical implications of the answers to these questions for collaborative environmental work with indigenous communities?
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1712 - AMAZONIAN ETHNOBOTONY

Minimum Credits: 3
Maximum Credits: 3
This course examines the cultural understanding and uses of plants in the Ecuadorian amazon. How do Amazonian people understand what plants are? How did they originate? How are they classified? How are they similar or different from humans? How are plant foods and medicines believed to work on the human body? How should they be harvested and prepared? What sorts of human moods or attitudes are necessary to work with plants? What ritual techniques are used to achieve empathy required to work successfully with plants?
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1713 - HLTH, NUTRITION & POPULATION 1

Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to the study of the health, population and nutrition concerns of indigenous peoples; provide an understanding of the health concerns of the Kichwa speaking people of the Ecuadorian amazon and provide a grounding for research on the health of Amazonian peoples. It will be taught as a combination of lectures, discussion of readings, site/field visits, interviewing of key actors and analysis of primary materials derived from interviews and observations of Kichwa people, healers and patients.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1714 - HLTH, NUTRITION & POPULATION 2

Minimum Credits: 3
Maximum Credits: 3
This course will continue the study of the health, nutrition and population of the NAPO Kichwa begun in HPNI. It will specifically address the historical and contemporary food systems of the NAOP Kichwa; the production and management of Chica (manioc beer) as a cultural superfood and dietary staple; the management of pregnancy and childbirth in the Kichwa ethnomedical system; the impact of the intercultural health movement and the millennium development goals for safe motherhood on the provision pregnancy and birth care services in the Ecuadorian national system; and the impact of biomedicine on Kichwa health practice. Hpnii will be taught as a combination of lectures, discussion of readings, site/field visits, interviewing of key actors and analysis of primary materials derived from interviews and observations of Kichwa people, healers and patients. It will have a significant independent research component.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1715 - UNDERSTANDING MODERN ITALY

Minimum Credits: 3
Maximum Credits: 3
This course uses anthropological methods to understand and analyze contemporary culture in Italy through an examination of everyday life in florence.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1716 - POLITICS OF GENDER AND FOOD
Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1725 - SOCIAL HLTH ISSUES EAST AFRICA
Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: Letter Grade

ANTH 1729 - BRAZIL
Minimum Credits: 3
Maximum Credits: 3
The course begins with an overview of Brazilian culture and of the country's enormous resource base. Cultural change is traced through the pre-Columbian, colonial, imperial, and republican periods. A major theme throughout is the evolution of a Portuguese heritage into today's distinctive Brazilian national culture. The country is then divided into five regions as a means of understanding its internal diversity. Popular American ideas about subjects like carnival, the amazon rainforest, coffee, Copacabana Beach, and the huge foreign debt are also dealt with.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1731 - WOMEN & GENDER IN THIRD WORLD
Minimum Credits: 3
Maximum Credits: 3
This course will examine the situation of women and the dynamics of gender in third world societies--i.e., Those of contemporary Asia, Africa, and Latin America. With particular attention to the effects of colonialism and capitalist development on women's lives and gender arrangements, we will analyze the impact of recent changes on economic and political roles, family structures and reproductive choices, and ideological orientations and self-images. The course will also explore major social issues and their implication for theories of third world development.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1733 - DRUGS, ETHNY, & CLSS IN THE US
Minimum Credits: 3
Maximum Credits: 3
While the study of ethnicity has a long and distinguished tradition in cultural anthropology, the discipline has placed comparatively little emphasis on the study of class. In addition, only recently have cultural anthropologists begun to pay closer attention to the consumption of drugs as a significant phenomenon in contemporary complex societies, such as the United States. Drawing on literature and themes from different disciplines, but especially from political economic and critical approaches within cultural anthropology, we will critically explore the dynamic intersection of drugs/class.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1734 - GENDER IN EAST ASIA
Minimum Credits: 3
Maximum Credits: 3
This course focuses on gender in East Asia, particularly in Chinese, Japanese, and South Korean society. Materials from Hong Kong and Taiwan will be included. The course is broadly comparative, and raises questions about the similarities and differences in gender roles and meanings within this vast and diverse region. Key themes include gender and work, sexuality, religion, and family. The primary focus is on contemporary East Asia, and on recent change.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1735 - SPECIAL TOPICS IN CULTRL ANTH
Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1737 - SPECIAL TOPICS IN CULTRL ANTH

Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1738 - GENDER PERSPECTIVES IN ANTHRO

Minimum Credits: 3
Maximum Credits: 3
This course analyzes gender perspectives in anthropology. Students are asked to consider how gender differences relate to women's and men's roles in productive labor, in property rights, and in family and kin relations. Special attention is given to the way gender and sexual difference are represented in culture.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1739 - CULTURES OF EAST ASIA

Minimum Credits: 3
Maximum Credits: 3
This course compares the social systems of Japan, Korea and china. Special attention is given to comparisons of family and kinship organization, religious traditions, language, and processes of industrialization. Discussions will concentrate on the post World War II period.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1741 - ENRGY & ENERGOPOLITICS EURASIA

Minimum Credits: 3
Maximum Credits: 3
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1742 - THE CITY IN AFRICA

Minimum Credits: 3
Maximum Credits: 3
Course examines the urban experience in Africa, beginning with ancient Nile Valley civilizations. In spite of this antiquity, colonial discourse and administrative practices created the notion of rural tribesmen whose presence in cities was unnatural and corrupting. We investigate this moral contrast between town and country as it persists today in the popular imagination, serving as a potent critique of possibilities and perversities of African modernity. We consider prospects and contributions of a distinctly African solution to problems of globalization, the informal city"."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1743 - ANTHROPOLOGY OF AGING & DEATH

Minimum Credits: 3
Maximum Credits: 3
This course will offer an anthropological perspective to aging, which is becoming one of the key social issues of the advanced industrial societies. Through evidence of social evolution, this course acquaints the student with the variety of ways in which human aging has been culturally defined and treated. It provides an appreciation of the political economic, national, and ethnic dimensions of aging so that a student may make meaningful choices with both public and personal implications as he/she confronts the life course.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1745 - URBAN POVERTY CULTRL IMPLICATN

Minimum Credits: 3
Maximum Credits: 3
This course will survey urban centers in a variety of cultural contexts: United States, Italy, Latin America, Middle East, Caribbean and Australia. It will focus on the poor in these cities. The concept of the culture of poverty will be discussed briefly. The major emphasis will be on how poverty affects the cultural behavior of this population. Social organization, political behavior, and expressive style of the poor will be analyzed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1748 - CULTURES OF SOUTH AMERICA
Minimum Credits: 3
Maximum Credits: 3
This course surveys the societies and cultures of South America. Through films, lectures, readings, and class discussion, the course examines subsistence economies, sex, kinship, and marriage, political organization, warfare, religion, and cultural change.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1749 - COGNITION AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
This course explores how communities of people classify, reason, and make decisions in a cultural context. This exploration contributes to an understanding of how people think and of what culture is. The questions addressed by this course include; does the language people speak affect the way they see the world? How is cultural knowledge organized? How do members of the same society vary in their knowledge and what does this variation tell us about how individuals learn?
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1750 - UNDERGRADUATE SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This seminar brings together all undergraduate majors in anthropology for a seminar on the methods by which cultures around the world change over time. Defining such methods occupies much of any anthropologist's time, be he or she an ethnographer, archaeologist, physical anthropologist or linguist. The seminar therefore examines this central problem from many perspectives and affords the student ample opportunity for personal expression as well as rewarding discussion and research in a peer group environment.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1751 - PEOPL & ENVIRONMNT IN AMAZONIA
Minimum Credits: 3
Maximum Credits: 3
This course introduces the complexity of relationships among environment, indigenous populations, and Western society in the Amazonian region of South America from historical and ecological perspectives.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1752 - ANTHROPOLOGY OF FOOD
Minimum Credits: 3
Maximum Credits: 3
This course surveys the general subject of culinary anthropology. Topics include food exchanges and the construction of social groups, food and social boundaries, food taboos, symbolism of food, folk conceptions of food, sacrifice and food in religious contexts, world standardization of food preferences. Thus, the focus is on social aspects of food, eating, and exchange.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1753 - NORTH AMERICAN INDIANS
Minimum Credits: 3
Maximum Credits: 3
This course presents a survey of native American cultures North of Mexico, both historical and modern. Case studies from several different regions are used to provide in-depth material on North American Indian cultural patterns.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1754 - CULTURE REGIONS UNITED STATES
Minimum Credits: 3
Maximum Credits: 3
This course examines contemporary American culture from a spatial-geographic perspective. It begins with the concept of region, including conventional and unconventional divisions of the United States. Colonial source areas of the national culture are studied, along with the role of the frontier in culture diffusion. Acquisition of a huge natural resource base and our interaction with it are also explored. The country is divided into

eight major culture regions, each of whose own ecosystems and landscapes make it distinctive. We end by anticipating future regions.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1755 - URBAN ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course outlines the origins and evolution of cities and explores their roles within their historical, social, and cultural contexts. It examines the nature of life in cities cross-culturally from the perspective of the inhabitants. Features associated with urban life--such as migration, squatter settlements, family organization, ethnicity, social stratification, social networks, and social pathologies- receive special attention.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1756 - ECONOMIC ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course reviews the development of economic anthropology as a special field of study. Emphasis is placed on economic change and the impact of industrialization on the third world. Ethnographic examples are drawn from Latin America, Africa, Asia, Oceania, and Europe. Topics to be discussed include economic theory in anthropology, exchange and the origin/use of money, the development of wage labor, marketing and commodity production, theories of economic development and underdevelopment.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1757 - SOCIAL ORGANIZATION

Minimum Credits: 3
Maximum Credits: 3
This is a course on the social institutions of primitive and folk people throughout the world. It presents a general survey of kinship units and principles of organization that operates at the primitive, tribal, and folk levels. At the end of the course the main theories that anthropologists have employed in analyzing kinship and social organization will be discussed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1758 - COMPARATIVE POLITICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
A comparative study of political organization and control in non-Western societies utilizing ethnographic data from several major areas. Such areas as leadership, decision making, sanctions, and political symbols will receive particular attention. A comparative framework will be the basis for the analysis of political change.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1759 - CHINESE SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course deals with traditional and modern Chinese society, before and after the 1949 communist revolution. Topics covered include: family and kinship, marriage, community organization, agriculture and industry, gender roles, social stratification, religion, land reform and collectivization, and the cultural construction of a new socialist system. Films, slides, and media presentations supplement lectures.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1760 - ANTHROPOLOGY OF LAW

Minimum Credits: 3
Maximum Credits: 3
This course examines anthropological analyses of law and law-like phenomena in a number of societies, including the United States. Particular attention is given to the various ways that disputes are resolved in different social and cultural settings, and to the theoretical analyses used to explain these differences.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1761 - PATNTS & HEALERS: MEDCL ANTH 1

Minimum Credits: 3
Maximum Credits: 3
This course surveys the field of medical anthropology and its history within the discipline of anthropology as a whole, from the perspective of social-cultural theory. Topics dealt with include ethnomedicine, ethnographic cases, cross-cultural studies of healing practices and connections between medicine and religion. Reference is also made to applied research in contemporary situations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1762 - HUMAN ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course explores the ecology of the human species. We will study how humans adapt to their physical and cultural environment, and the interrelationships between people and the environment. Topics discussed include evolution and adaptation, population growth and regulation, foraging and subsistence strategies and production decisions, population interactions and resource management, and energy and human society.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1763 - FIELD METHODS

Minimum Credits: 4
Maximum Credits: 4
This course is designed to acquaint students with basic ethnographic fieldwork techniques. Topics addressed include taking and managing fieldnotes on participant-observation, systematic or structured interviews, behavioral observation, and use of archival materials. There will also be some discussion of the relationship between research design, data collection, and data analysis.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1764 - CULTURES & SOCIETIES OF INDIA

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to the cultural history of India and to the culture and society of the modern country, concentrating on the description and analysis of modern Indian society. Topics to be covered include caste, kinship and marriage, village communities, law and society and politics in modern India.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1765 - LANGUAGE, ETHNICITY & NATNLSM

Minimum Credits: 3
Maximum Credits: 3
This course explores how people use language to construct ethnicity, and the role that language plays in theories and ideologies of nationalism. Using cross-cultural examples from Africa, Asia, Europe, Latin America, and the U.S., We consider issues such as language standardization and planning, the challenges facing multilingual nation-states, ethnolinguistic revitalization movements, the linguistic aspects of colonialism, including pidgins and creoles, and the linguistic and cultural aspects of the spread of English as a global language.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1766 - ENDANGERED LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
This course takes an anthropological approach to language shift and ethnolinguistic revitalization. First, we explore how and why languages "die", how discourses of death and endangerment impact languages and speakers, and the structural effects of processes of obsolescence on languages. Then, we explore the reasons why groups wish to preserve and revitalize languages, the potential benefits of language revitalization, and the factors in successful and unsuccessful language revitalization movements, including ideologies of discrimination and resistance, language policy and planning, education, media, literacy and language standardization.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1768 - CULT & SOCIETIES EASTRN EUROPE

Minimum Credits: 3
Maximum Credits: 3

This course is an introduction to the socialist countries of eastern Europe apart from the soviet union. It is particularly concerned with how the region has developed under socialism and with how the new, socialist societies have affected the different indigenous cultures. Topics include industrialization and transformation of agriculture, kinship and family, among others.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1769 - DYNAMICS OF ETHNICITY

Minimum Credits: 3
Maximum Credits: 3
The course materials and lectures will discuss the older studies of ethnicity in the United States and their differences with the recent revival of interest in ethnicity and ethnic groupings. A second portion of the course will analyze the various reasons for ethnicity in different cultural contexts, and how ethnic groups adapt. The last portion will attempt to describe the ethnic heritage of Western Pennsylvania and how the group strategies for mobility effected their class and ethnic stratification.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1770 - KINSHIP AND THE FAMILY

Minimum Credits: 3
Maximum Credits: 3
In this course Western and Non-western forms of kinship, family, and marriage will be discussed and analyzed. Special attention will be given to the history of European marriage, to family organization and industrialization, and to women's relation to kinship and family order. The differences in European and Non-European reactions to industrialization will be compared in some detail. Europe, China, India, and Japan will receive special attention.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1771 - RELIGION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
Religion is thought, felt, and acted out in social and cultural contexts. The relationship between religion and culture is the focus of the course. The objectives are to understand religion wherever and whenever found, and to understand the anthropological approach in the cross cultural study of religion. Religious belief, ritual, myth, dogma and religious specialists in industrial and non-industrial societies are compared.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1772 - ANTHROPOLOGY OF WOMEN

Minimum Credits: 3
Maximum Credits: 3
During this course students are asked to consider how gender differences relate to women's and men's roles in productive labor, in the disposition of property, and in the realm of family and kinship. Building on these discussions participants will also examine the way in which gender and sexual differences are represented at the cultural and ideological level. Cultural constructions of masculinity and femininity in southern Europe, china, and new guinea will receive particular attention.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1773 - CULTURES OF MESOAMERICA

Minimum Credits: 3
Maximum Credits: 3
A general survey of problems and cultures of Mexico and Guatemala from the time of the Spanish conquest to the present. The course will be divided into three parts; MesoAmerica at the time of the arrival of the Spaniards; the colonial transformation of the Indian population; and the contemporary position of the Indians within the Pluri-Ethnic societies of which they are part.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1774 - PERSPECTIVES ON RELIGION

Minimum Credits: 3
Maximum Credits: 3
A serious introduction to the study of religion is undertaken by reviewing the efforts and insights of the principal scholars in the field in the modern period.
Academic Career: UGRD

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1775 - APPLIED ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
Viewing applied anthropology as a possible career choice, this course will define the field, contrast it with basic anthropology, examine the concept of policy analysis, and survey the kinds of applied anthropology conducted within the realm of cultural anthropology (urban, education, community development, etc.). Methods and techniques used in applied anthropology will be reviewed.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1776 - MYTH, SYMBOL AND RITUAL

Minimum Credits: 3
Maximum Credits: 3
A comparative examination of the myths, symbols, and rituals of different cultures.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1777 - AMERICAN CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course explores American culture as if it were strange and exotic. Topics covered include communication and speech styles, social class, race, and ethnicity, cults and religion, family, socialization, work and play, poverty and deviance, and changing values. Appropriate films and guest lectures are scheduled. A prior exposure to anthropology is not necessary as technical terms will be kept to a minimum and simply explained.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Anthropology (BA)

ANTH 1778 - CULTURES OF AFRICA

Minimum Credits: 3
Maximum Credits: 3
This course explores the traditional cultures and societies of Africa from prehistoric to modern times. Emphasis is on the conditions prior to contemporary changes but some attention is given to modern developments. Concern is with the variety of cultures on the continent, how people make a living, what family life is like, how disputes are settled, and religion. Through lectures, films, and readings, the student gets a feeling for life in this fascinating part of the world.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1779 - SOCIAL AND CULTURAL CHANGE

Minimum Credits: 3
Maximum Credits: 3
Various theories of social and culture change will be examined from a historical perspective. These theories will be employed to structure materials in their non-Western case studies of social and cultural change.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1780 - INTRODUCTION TO ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course surveys the biological and cultural heritages which distinguish humans from other advanced evolutionary forms. Through physical anthropology and prehistory, it outlines major developments over the past five million years. Through linguistic and sociocultural anthropology, it describes the universal features of social institutions and human behavior, drawing comparative examples from primitive, traditional, and modern societies.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1781 - ANTHRO OF CONTEMPORARY CARIBBN

Minimum Credits: 3
Maximum Credits: 3

This course provides an historical background on the Caribbean focusing largely upon the experiences of the Caribbean in the 1990s through an examination of the culture areas of tourism, urbanism, industrialism, migration, cultural practices, and political and social movements.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1782 - SOCL STRATFCTN & EXPRESSV CULT

Minimum Credits: 3
Maximum Credits: 3
The main object of the course is to present the view that social stratification has an important expressive component that has been consistently ignored in anthropological and sociological studies of stratification. Concentrating on a number of special cases, spanning the evolutionary spectrum from peasant to modern industrial societies, the expressive component of class is placed in perspective in relationship to power, wealth and other structural and ideological variables.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1783 - JAPANESE CULTURE

Minimum Credits: 1
Maximum Credits: 1
This one credit course on Japanese society, culture and history accompanies a course on basic Japanese language, though either the language or culture course can be taken independently of one another. A series of lectures by distinguished experts on such topics as the Japanese economy, history, family, politics, business, theatre, religion, literature, education and fine arts is given.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1784 - JAPANESE SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to contemporary Japanese culture and social institutions. Using scholarly books, essays, fiction and film, it will give students a range of different exposures to various aspects of Japanese society and everyday life: economic miracle, recession, middle class society, gender relations, sexuality, education, consumerism, and mass culture. The special focus of the course will be popular culture in japan. We will review the postwar history of popular culture and consider the reasons for its recent appeal abroad.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1786 - CULTURES OF THE PACIFIC

Minimum Credits: 3
Maximum Credits: 3
This course examines the traditional and contemporary peoples and cultures of the pacific islands. A geographical and historical review of the region is included.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1787 - SPECIAL TOPICS IN CULTRL ANTH

Minimum Credits: 1
Maximum Credits: 4
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.
Academic Career: UGRD
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

ANTH 1788 - ANDEAN SOCTY/CULT:PERU BOL

Minimum Credits: 3
Maximum Credits: 3
This course will survey major topics and issues relevant to the anthropology of the South American Andean culture region, with special emphasis on Bolivia and Peru. Examples of topics include: cultural adaptations to the physical landscape; kinship and social organization; gender; religion; economic organization (including land and labor patterns); ethnicity and class; migration; and resistance and rebellion. Also some landmark studies in Andean social history that have had considerable impact on current ethnographic and anthropological research.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1789 - AFRICAN AMERICAN FOLK CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course will explore several aspects of African American folk culture being defined as non-elite expressions of art, music, dance, theatre, literature, humor, material culture, and religious beliefs. Particular attention will be given to the role of folklore in the perpetuation and transmission of shared cultural knowledge among blacks in the United States.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1791 - DIALCTICS OF IDENTTY WEST EURP

Minimum Credits: 3
Maximum Credits: 3
This course examines a number of case studies on historical and emerging identities in local, regional, and national contexts in Western Europe, the major focus is on the relationships between local senses of identity and wider ones and the tensions that arise out of disjunctions between these contexts. For this reason, materials are chosen from peripheral" areas in Western Europe, such as Celtic fringe societies (e.g., Scotland, Brittany, Wales) vis-a-vis England and France; and from Greece in the Mediterranean region."
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1792 - POPULATION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course centers its attention on the complex interplay between demographic process and outcomes (such as fertility and population growth, population decline and mortality, and migration) on the one hand, and social/cultural evolution and social/ cultural forms studied by cultural anthropologists and archaeologists. We will critically review major concepts and theories in demography and demographic anthropology. Course takes the subject matter of population dynamics as the framework for examining important anthropological themes, debates and theories in the context of different societies/cultures.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Anthropology (BA)

ANTH 1793 - ASIAN MEDICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Using scholarly texts, ethnographic studies and historical documents, this seminar will focus on the medical systems of India, china, Japan, and South East Asia. The primary objective of the course is to understand various Asian medical systems on their own terms, both in theory and in contemporary practice. Primary attention will be given to Ayurveda, Unnani and traditional Chinese medicine. We will look at how so-called traditional medicine in Asia is being modernized in response to political, economic, social, and cultural transformations.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1794 - GENDER AND HEALTH

Minimum Credits: 3
Maximum Credits: 3
There is a great deal of innovative, theoretical work being done in anthropology and related disciplines on issues of gender and health. This seminar will focus attention on this work, much of which has developed in response to questions of power and knowledge in discourses of and about female and male bodies. Although most of the literature on gender and health is about women, we will examine the structures of power and knowledge in the larger domain of culture and health as these structures are revealed and critically analyzed in terms of gender theory.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1795 - SHAMANISM HEALING SPIRIT POSS

Minimum Credits: 3
Maximum Credits: 3
Shamanism is a phenomenon that has been the focus of intensive anthropological investigation since the birth of the discipline. It has also been a topic that has helped to define key theoretical issues in the field. In this course we will use shamanism, broadly defined, as medium through which to study anthropological theory. The course is designed as a reading intensive seminar, and one of the objectives is to teach students how to read and think critically.

ANTH 1796 - ALTERNATIVE HEALTH AND HEALING

Minimum Credits: 3
Maximum Credits: 3
Using the material culture of medical technology, the purpose of this course is to understand the theoretical, philosophical and methodological links between alternative medicine in the United States and traditional forms of medicine in Asia.
Academic Career: UGRD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1797 - MOUNTAINS AND MEDICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
India is a social, political and economic environment in which a broad range of South Asian medical systems have grown and developed over the course of several years. In the past 150 years these systems have been institutionalized and professionalized within the framework of colonial and national medical and public health policy. Many of these systems are intimately connected to the environment, and to the conceptualization, categorization, production and consumption of natural resources. This course focuses on non-biomedical systems of medicine: Ayurveda, Unani, siddha, Tibetan medicine, yoga and nature cure and homeopathy, as each one of these is supported and regulated by the government of India. The purpose of the course is not to evaluate the effectiveness or medical value of these systems; it is to understand how these medical systems fit into a range of social, political, ecological, botanical and economic contexts. Given that a number of these medical systems are intimately linked to Himalayan botanical and environmental knowledge, the course will focus on the relationship between South Asian medical systems and mountain ecology.

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1798 - RELIGION AND ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
The Himalayas have inspired more religious thought, given rise to more forms of religious practice and are more distinctively featured in a spectrum of epic religious literature, than almost any other geographic region in the world, with the possible ' but unlikely `exception of a small parcel of relatively dry hilly ground between Jerusalem and mecca. In any case, Siddhartha Gautham was born and taught in the shadow of the lower Himalayas, where Buddhism emerged in the 4th century BCE. Many specific mountains, lakes and rivers, as well as the broader geography of the Himalayas ' most notably sacred rivers ' define the landscape of Hindu mythology, pilgrimage and ritual. The practice of yoga as a metaphysical philosophy is intimately linked to the idea of mystical Himalayan masters. The Western watershed of the Punjab, including the iponymous five rivers ' Indus, Jhelum, Chenab, RAVI and Sutlej ' is the heartland of Sikh cultural and religious identity. In addition to being a center of medieval Hindu literary learning, Kashmir and the Western Himalayas, extending through the Hindu Kush, have defined routes of exchange, communication, conversion and confrontation between Greeks, Persians, Buddhist monks, and Mongol armies. More recently ' in terms of centuries ' Tibetan Buddhism has emerged out of a history of development in Lhasa ' relocated to McLeod Ganj in the early 1960s '- that combines elements of tantra from the southeastern Brahmaputra region with transmutations of Buddhism that have taken shape in greater china. Although not inspired by the Himalayas per se, Islam in South Asia has been shaped by geography and the environment in specific ways, and the development of a particular interpretation of the Koran in a small center of learning in the town of Deobandi ' close to where the epic battle of the Bhargava Gita is said to have been waged in Kurukshetra ' implicates the geography and geopolitics of the Himalayas in the emergence of reform oriented, Orthodox Islam.

Grade Component: LG/SNC Elective Basis

ANTH 1799 - HIMALAYAN POLITICAL ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
The Himalayan region is characterized by dramatic climatic and geological variation, a tremendous range of biodiversity and a complex ecology. Within the region there is also profound cultural variation. This course seeks to provide a critical perspective on the ecology and environment of the Himalayas by examining how different groups at the village, state, national and international level are implicated in the political ecology of the mountains. We will look at the way in which village farming communities use natural resources, what kind of pressure is put on resources as a result of development and population growth, how the mountain environment shapes the politics and resource distribution at the level of the state and, finally, how environmental and energy issues shape national policy and international relations.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1801 - HIMALAYAN BIODIVERSITY

Minimum Credits: 3
Maximum Credits: 3
Ranging in altitude from several hundred meters above sea level to over seven thousand, from subtropical forests to high altitude meadows and deserts, and from areas with little or no rainfall to regions that are among the wettest in the world, the Himalayas define a geographical region of enormous geological variation and biodiversity. The goal of this course is to gain an understanding of this diversity, with a focus on ecology. More

specifically we will examine ecology and ecosystems in terms of biosemiotics ' how and why organisms within an ecological niche communicate with one another, and how these patterns and structures of communication define different kinds of interdependence. Within the framework of standard classificatory schemes ' mammals, birds, reptiles, insects ' we will focus on particular species and specific niche systems for more detailed biosemiotic/behavioral analysis.

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1900 - INTERNSHIP IN ANTHROPOLOGY
Minimum Credits: 1
Maximum Credits: 6
Working in consultation with faculty, advanced students wishing to pursue careers in anthropology have the opportunity to extend academic training to a practical work experience in a particular subfield of Anthropology. Students will be required to submit a preliminary proposal to a faculty sponsor preferably sometime during the prior term, or should respond to faculty listings of specific internship projects that will be posted. Examples of projects are: physical anthropology research at the Pittsburgh Zoo; analysis of archeological artifacts; local ethnographic or folklore research.
Academic Career: UGRD
Course Component: Internship
Grade Component: Satisfactory/No Credit

ANTH 1901 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
This course allows qualified students to develop highly personalized research projects in conjunction with a faculty sponsor. The student will have to develop a bibliography, outline an approach to the project, and devise a methodology. The project work products are agreed to by the student and the faculty sponsor. Typical products may be a report, paper, or other tangible result of the student's efforts.
Academic Career: UGRD
Course Component: Independent Study

Maximum Credits: 12
Academic Career: UGRD
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ANTH 1903 - DIRECTED RESEARCH-READINGS
Minimum Credits: 1
Maximum Credits: 3
Not all topics in anthropology can be adequately addressed in formal courses. The reading course allows qualified students to develop a bibliography for a specific topic not covered by other courses in the department. The work is done in conjunction with a faculty sponsor, and the student and faculty sponsor jointly determine the work products for the course, a research paper or annotated bibliography based upon the readings is typical, but other products may be substituted.

Arts and Sciences

ARTSC 0020 - LATIN AMERICA AND CARIBBEAN
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students with substantial knowledge concerning the geography, history, and culture of Latin America and the Caribbean and to introduce them to how issues related to the region are studied from a variety of disciplinary perspectives.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARTSC 0050 - LATIN AMERICA
Minimum Credits: 3
Maximum Credits: 3
This course will stress the contrasts between the different cultures, the contradictions that have characterized the region for centuries, the relations between Latin America and the U.S. And the problems of reform and revolution. It begins with a survey of the conquest of Latin America and the main Indian cultures as well as the nature and goals of Spanish and Portuguese colonization. The differences between 19th century rural and urban society and different aspects of Latin American society in the mid-20th century will also be studied.

ARTSC 0108 - ACADEMIC SKILLS FOCUS COURSE

Minimum Credits: 1
Maximum Credits: 1
The course is designed to prepare students for college experience by helping them to: acquire self-confidence; refining their classroom skills; set and achieve their academc and career goals; accept challenges and rewards openly; find, analyze and solve problems skillfully.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Satisfactory/No Credit

ARTSC 0109 - ACADEMIC INTERVENTION

Minimum Credits: 0
Maximum Credits: 0
A highly interactive course designed for second term freshmen with a first term GPA between 1.00 And 1.99 Who want to improve their academic performance. The course content focuses on improving study and learning strategies, enhancing motivation, reacquainting students with available services and developing a study oriented peer network.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Satisfactory/No Credit

ARTSC 0110 - HEALTH FOCUS

Minimum Credits: 1
Maximum Credits: 1
A course designed for second term freshmen to help develop skills, talents and interests relevant to pursuing health science careers. Students will experience self-assessment and self-evaluation activities; explore the requirements necessary for admission; interact with peers who have the same interest and goals, as well as faculty, students and staff in the health science professional schools.

ARTSC 0111 - RIGHT START 1

Minimum Credits: 1
Maximum Credits: 1
This course is designed to enhance the academic skills of new students participating in the student support services project (SSS). The course will use collaborative learning strategies to address such topics as note-taking, problem-solving, time-management, test-taking, and goal-setting. This course is very interactive and will use multiple methods of communication and technology to apprise students of course activities along with upcoming SSS events.
Academic Career: UGRD
Course Component: Seminar
Grade Component: Letter Grade

ARTSC 0112 - RIGHT START TO COLLEGE 2

Minimum Credits: 1
Maximum Credits: 1
You must be a part of the trio student support services (SSS) program to take this course. This course is designed to enhance the level of career awareness of students in the student support services (SSS) program. The course will focus on the following topics: academic majors, resume-writing, interview techniques, professional communication, and career investigation. This course is interactive and will use multiple methods of communication and technology to apprise students of course activities along with upcoming SSS events.

ARTSC 0150 - INTRODUCTION TO GLOBAL STUDIES

Minimum Credits: 3
Maximum Credits: 3
The course provides an introduction to interdisciplinary approaches to global studies. It examines current global trends and issues in ways that encourage students to think critically about how we analyze, interpret, and respond to global phenomena and their consequences for different regions, localities, and groups. It gives particular attention to the concept of globalization, highlighting the controversies surrounding its use and helping students to engage core debates about the impact of global and transnational processes on cultural interactions, economic and social relations, politics and governance, security, and the possibility of sustainable development.
Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARTSC 0500 - INTRODUCTION TO STUDY ABROAD

Minimum Credits: 1
Maximum Credits: 1
This course explores the study abroad experience. It also addresses the issues of cultural diversity, international understanding and the role of the individual in the global community. The course will inform students of the ways in which study abroad complements and augments their academic program, career goals, and overall personal development.
Academic Career: UGRD
